Clayton County Public Schools

AI PARENT INFORMATION SESSION

WELCOME TO THE CONVERSATION ABOUT ARTIFICIAL INTELLIGENCE IN CLAYTON COUNTY PUBLIC SCHOOLS

Welcome, parents and community members! We are excited to talk about how **Artificial Intelligence (AI)** will help our students learn and grow in Clayton County Public Schools (CCPS). This is a journey we are taking together, focused on preparing every child for the future.

IS AI, IN SIMPLE TERMS?

AI is a smart tool that helps computers think and learn in ways that are similar to people.

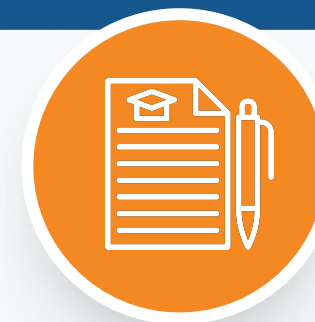

Think of it like a helpful assistant that can:

Help teachers personalize learning for each child.

Translate languages so everyone can understand.

Help with essential tasks like feedback and grading.

**Important: AI is a tool to help our teachers; it will not replace them.
People will always make the final decisions for our students.**

HOW AI WILL HELP EVERY STUDENT LEARN AND SUCCEED

At CCPS, our goal is for AI to help every child learn in the best way for them. Here's how:

- **Personalized Learning**

AI can help teachers adjust lessons to fit what each student needs, giving instant feedback and helping them improve.

- **Language Support**

AI tools can help translate languages for students and families, making our schools more inclusive.

- **Creative Support**

AI can help students generate ideas and create things like images for projects, fostering new skills.

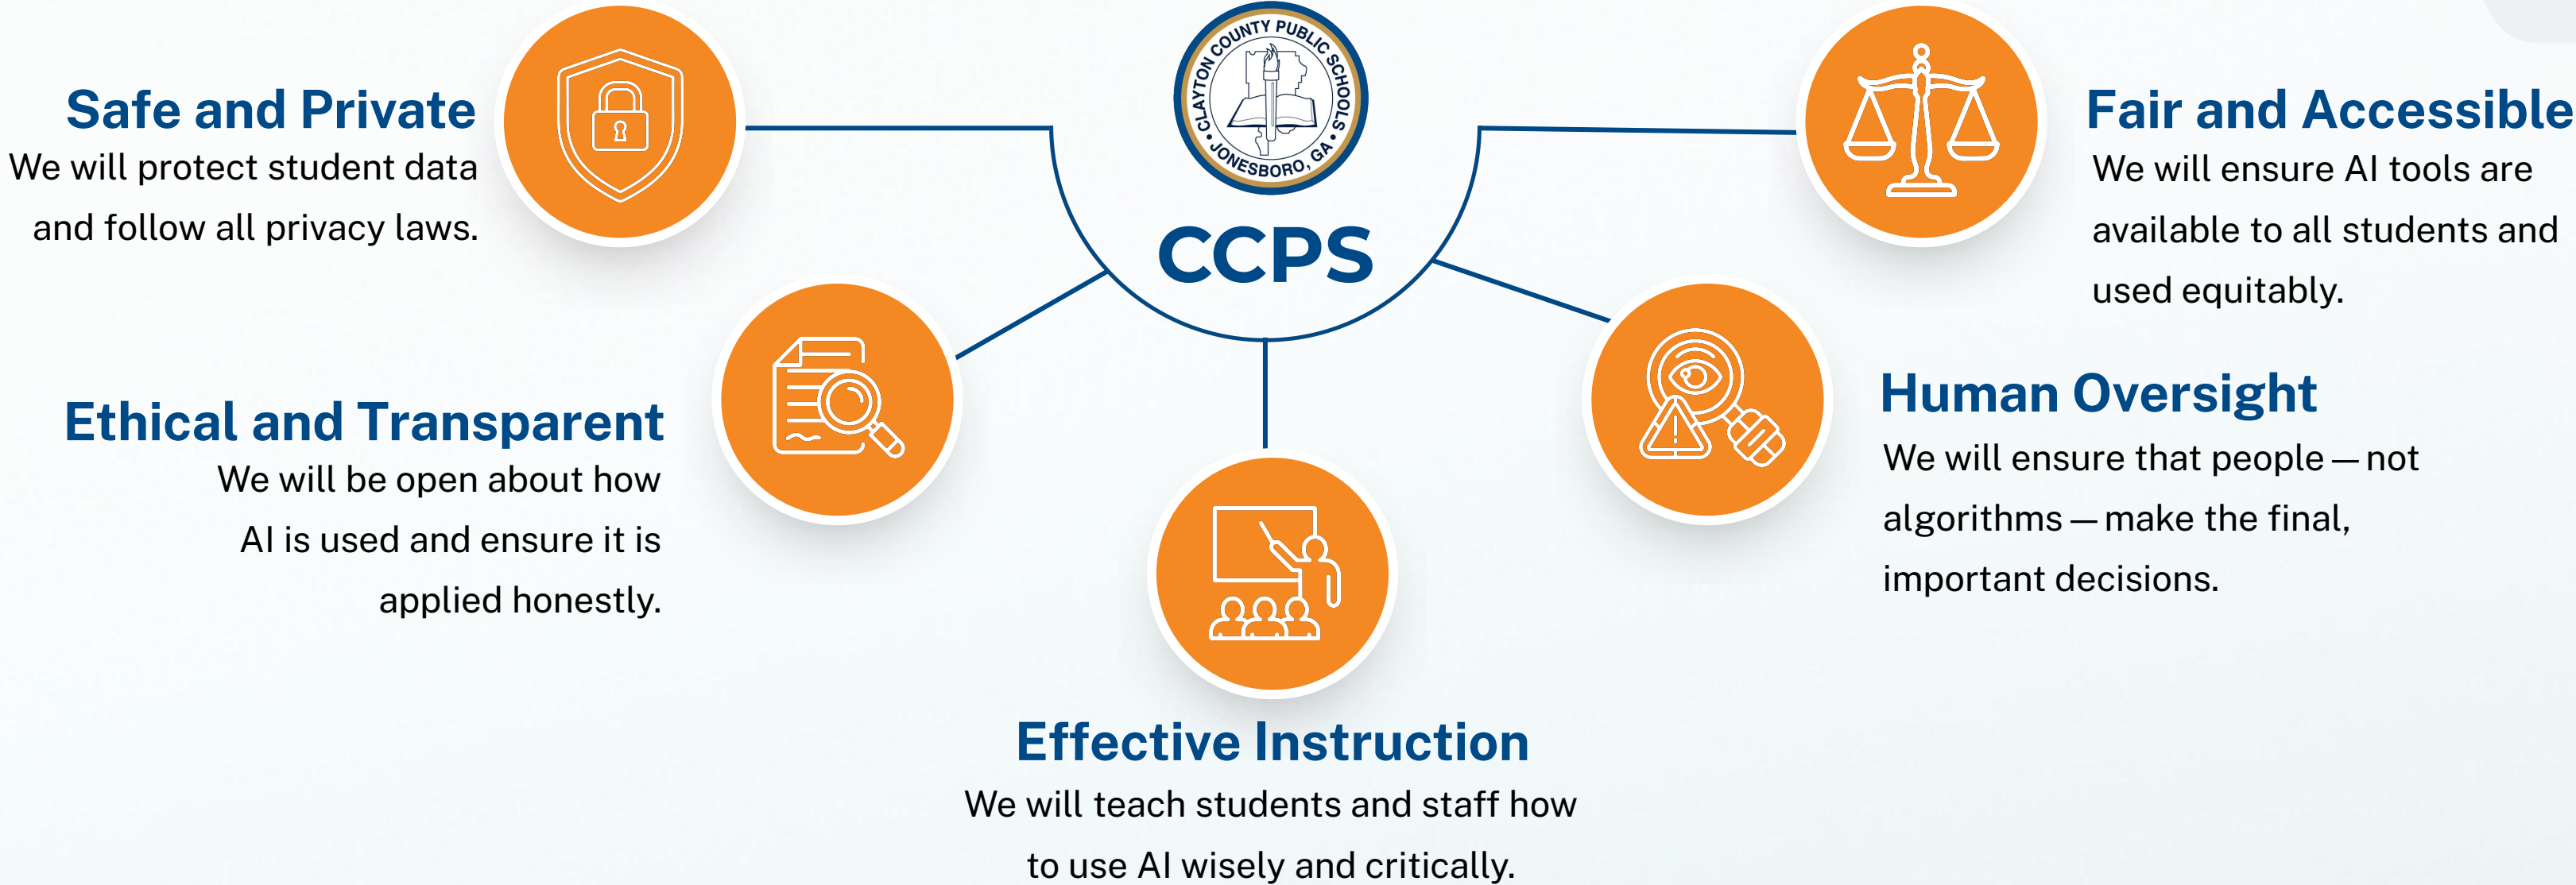

- **Efficient School Operations**

AI can help improve district operations like scheduling and data analysis to make our schools better for everyone.

OUR GUIDING PRINCIPLES FOR RESPONSIBLE AI

Our use of AI is not accidental; it is guided by a strong commitment to our students and community. Every tool and strategy is measured against these core principles:

SPECIAL PROTECTIONS FOR OUR YOUNGEST LEARNERS (UNDER 13)

We take extra special care to protect our elementary and middle school students when they use technology.

Following Federal Law: We strictly follow the **Children's Online Privacy Protection Act (COPPA)** to keep your child's information safe online.

Requiring Parental Consent: If specific AI tools require it by law, we will always ask for your permission before your child uses them.

Using Approved Tools Only: Students will only use AI applications that have been rigorously vetted and approved by the district to be safe and age-appropriate.

YOUR CHILD'S DATA PRIVACY IS OUR PRIORITY

We Never Share Sensitive Personal Information

We will never input a student's private information (like Social Security numbers, home addresses, or health details) into AI systems.

We Use Vetted, Compliant Tools

We only use AI tools that are proven to meet our strong safety and privacy rules and follow laws like the **Family Educational Rights and Privacy Act (FERPA)**.

We Are Transparent

We are committed to being open about how AI is used to inform decisions within the district.

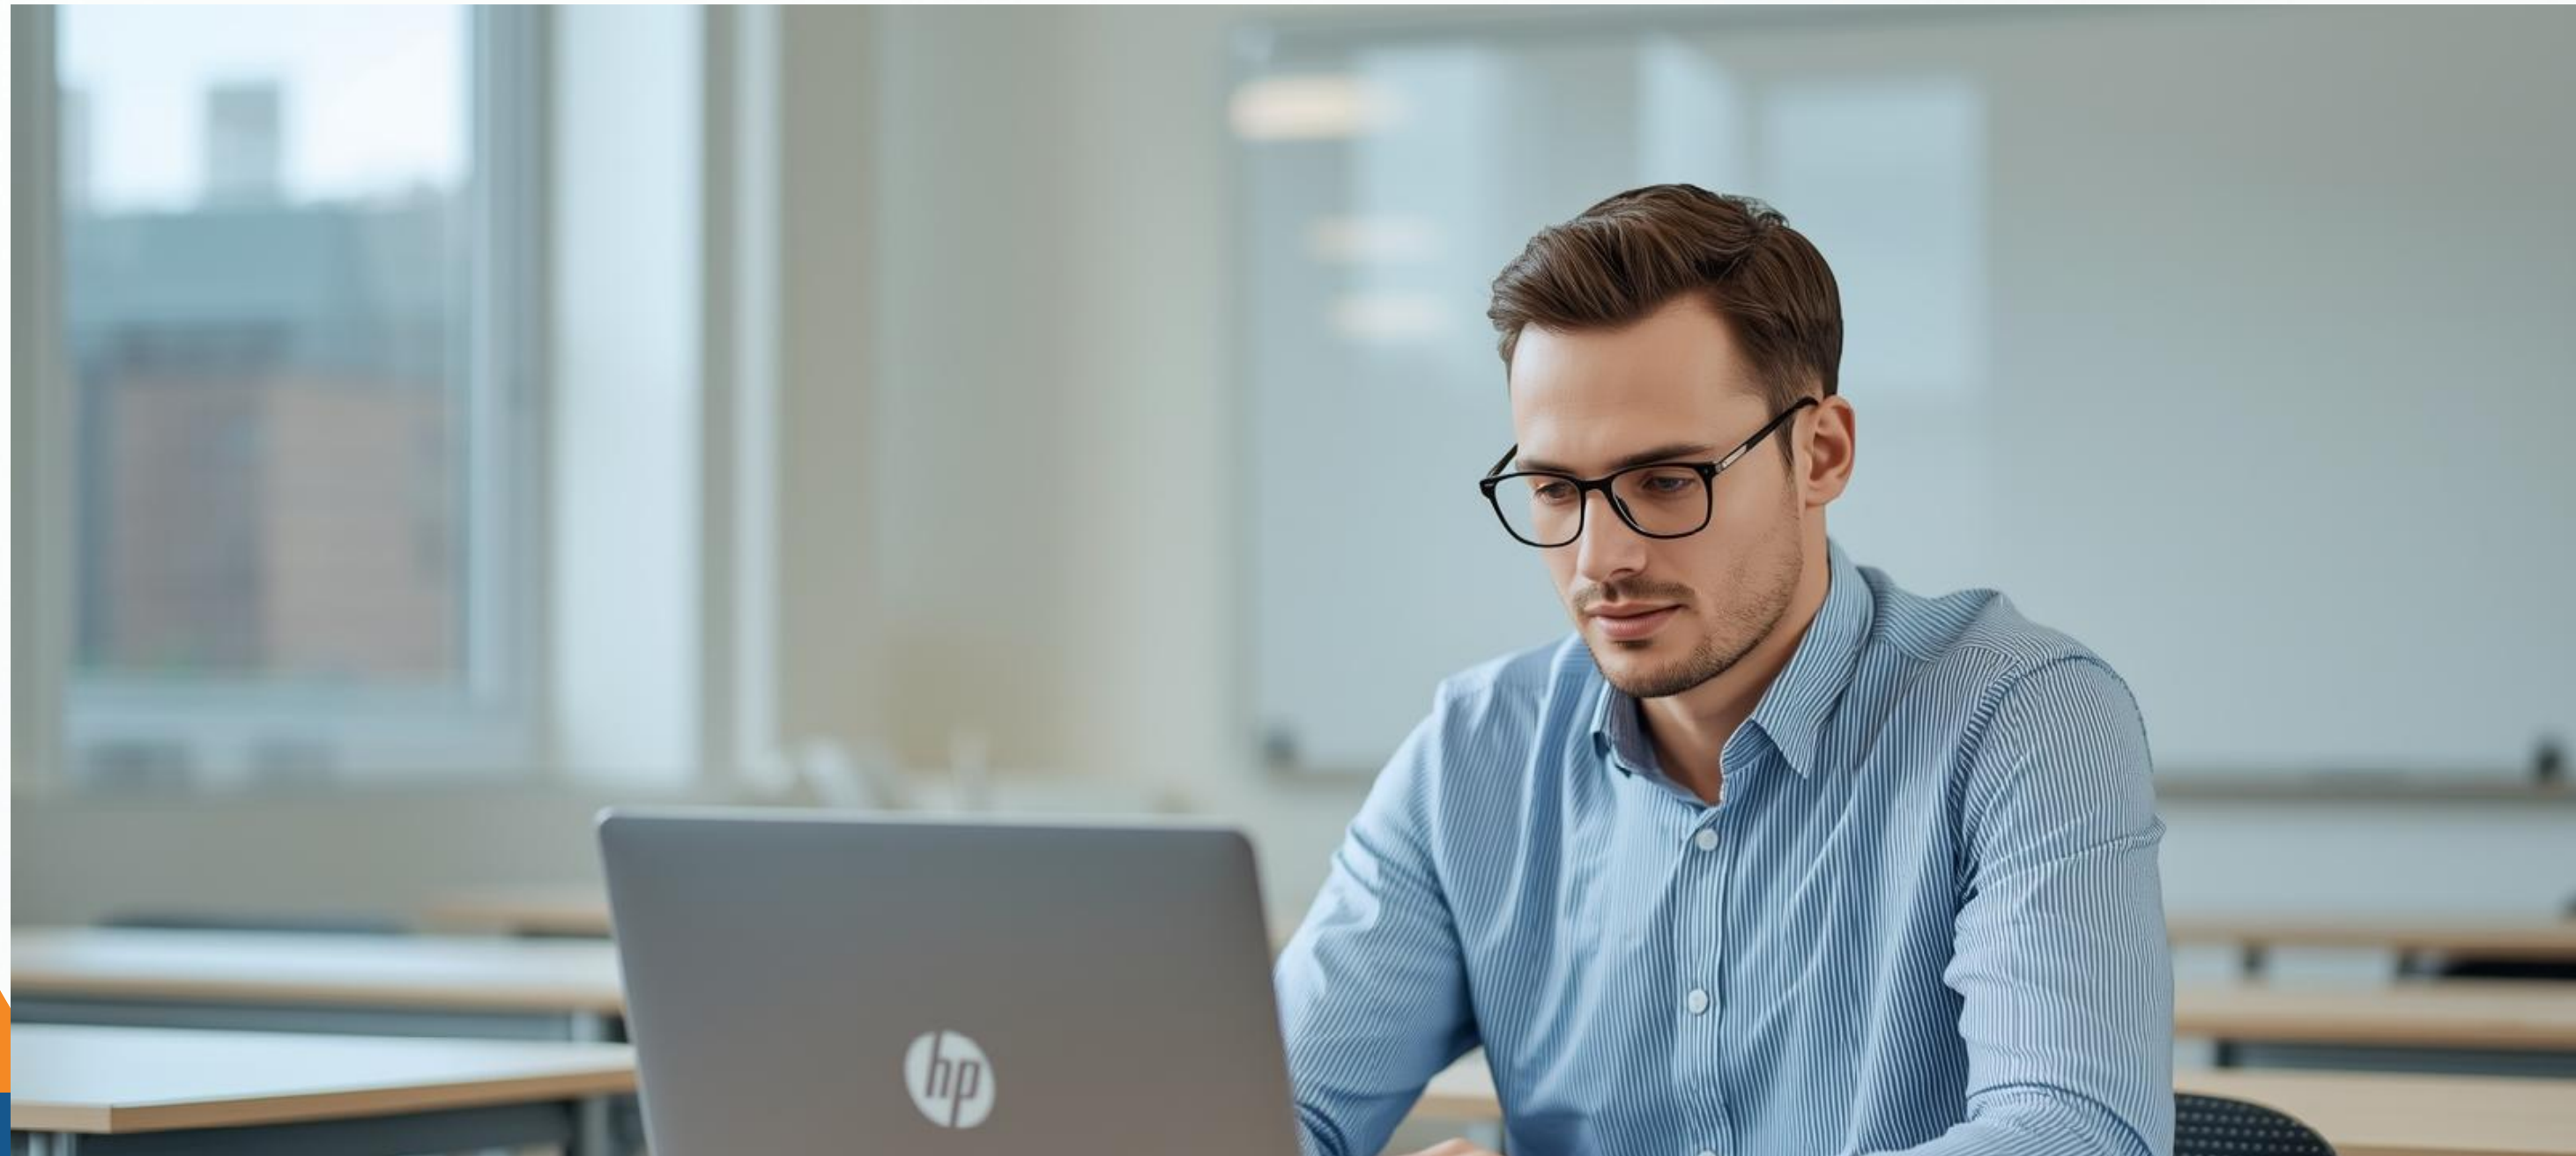

YOUR CHILD'S DATA PRIVACY IS OUR PRIORITY

On Grading

AI may help suggest feedback or score objective questions, but a teacher is always responsible for reviewing and assigning a student's final grade.

On Discipline

Decisions regarding student conduct and discipline will always be made by school staff and administrators, never by an AI system.

RESPONSIBLE AI IN ACTION: CLEAR EXAMPLES

Okay Uses

Scenario: A student uses a district-approved AI image generator to create a book cover for a report, based on their own detailed description. The student credits the tool.

Why it Works: This promotes creativity and ethical AI literacy.

Scenario: An English Language Learner uses a real-time AI translation tool to understand a teacher's instructions, then completes the work independently.

Why it Works: This overcomes a language barrier without compromising academic integrity.

Not Okay Uses

Scenario: A student uses an AI app on a parent's phone to get the answers to their math homework and writes them down as their own.

Why it Fails: This bypasses the development of problem-solving skills and violates academic honesty.

Scenario: A teacher uploads student names and lab reports into a public AI tool and enters the AI-generated grades directly into the system without review.

Why it Fails: This violates our principles of human oversight and student data privacy.

The Journey Ahead: Your Role as Our Partner

AI Position Statement

A promotional graphic for Clayton County Public Schools' AI Position Statement. It features the school district's logo and name at the top left. The main text reads "Clayton County Public School's AI POSITION STATEMENT" in a large, bold font, with "AI POSITION STATEMENT" in white on a dark blue background. Below this, it says "Scan the QR Code to learn more!". A large QR code is positioned on the right side. At the bottom left, a text box states: "The Clayton County Public Schools AI Position Statement webpage can be translated into Vietnamese, Spanish, and French. Please visit the page and use the language dropdown at the top to select your preferred language." At the bottom right, there is a small QR code inside a headset icon, with the text: "Still curious? Listen to this 5 minute AI generated podcast discussing the CCPS AI Position Statement!".

GET STARTED TODAY: THE COMMUNITY AI CANVAS COURSE

A Free, Self-Paced Resource for CCPS Families

Purpose: This online course is designed to provide artificial intelligence basics, orient Clayton County families and community members to CCPS’ Vision for AI integration, and provide resources for your family.

How to Join: Visit bit.ly/CCPSParentAICourse or scan the QR code below.

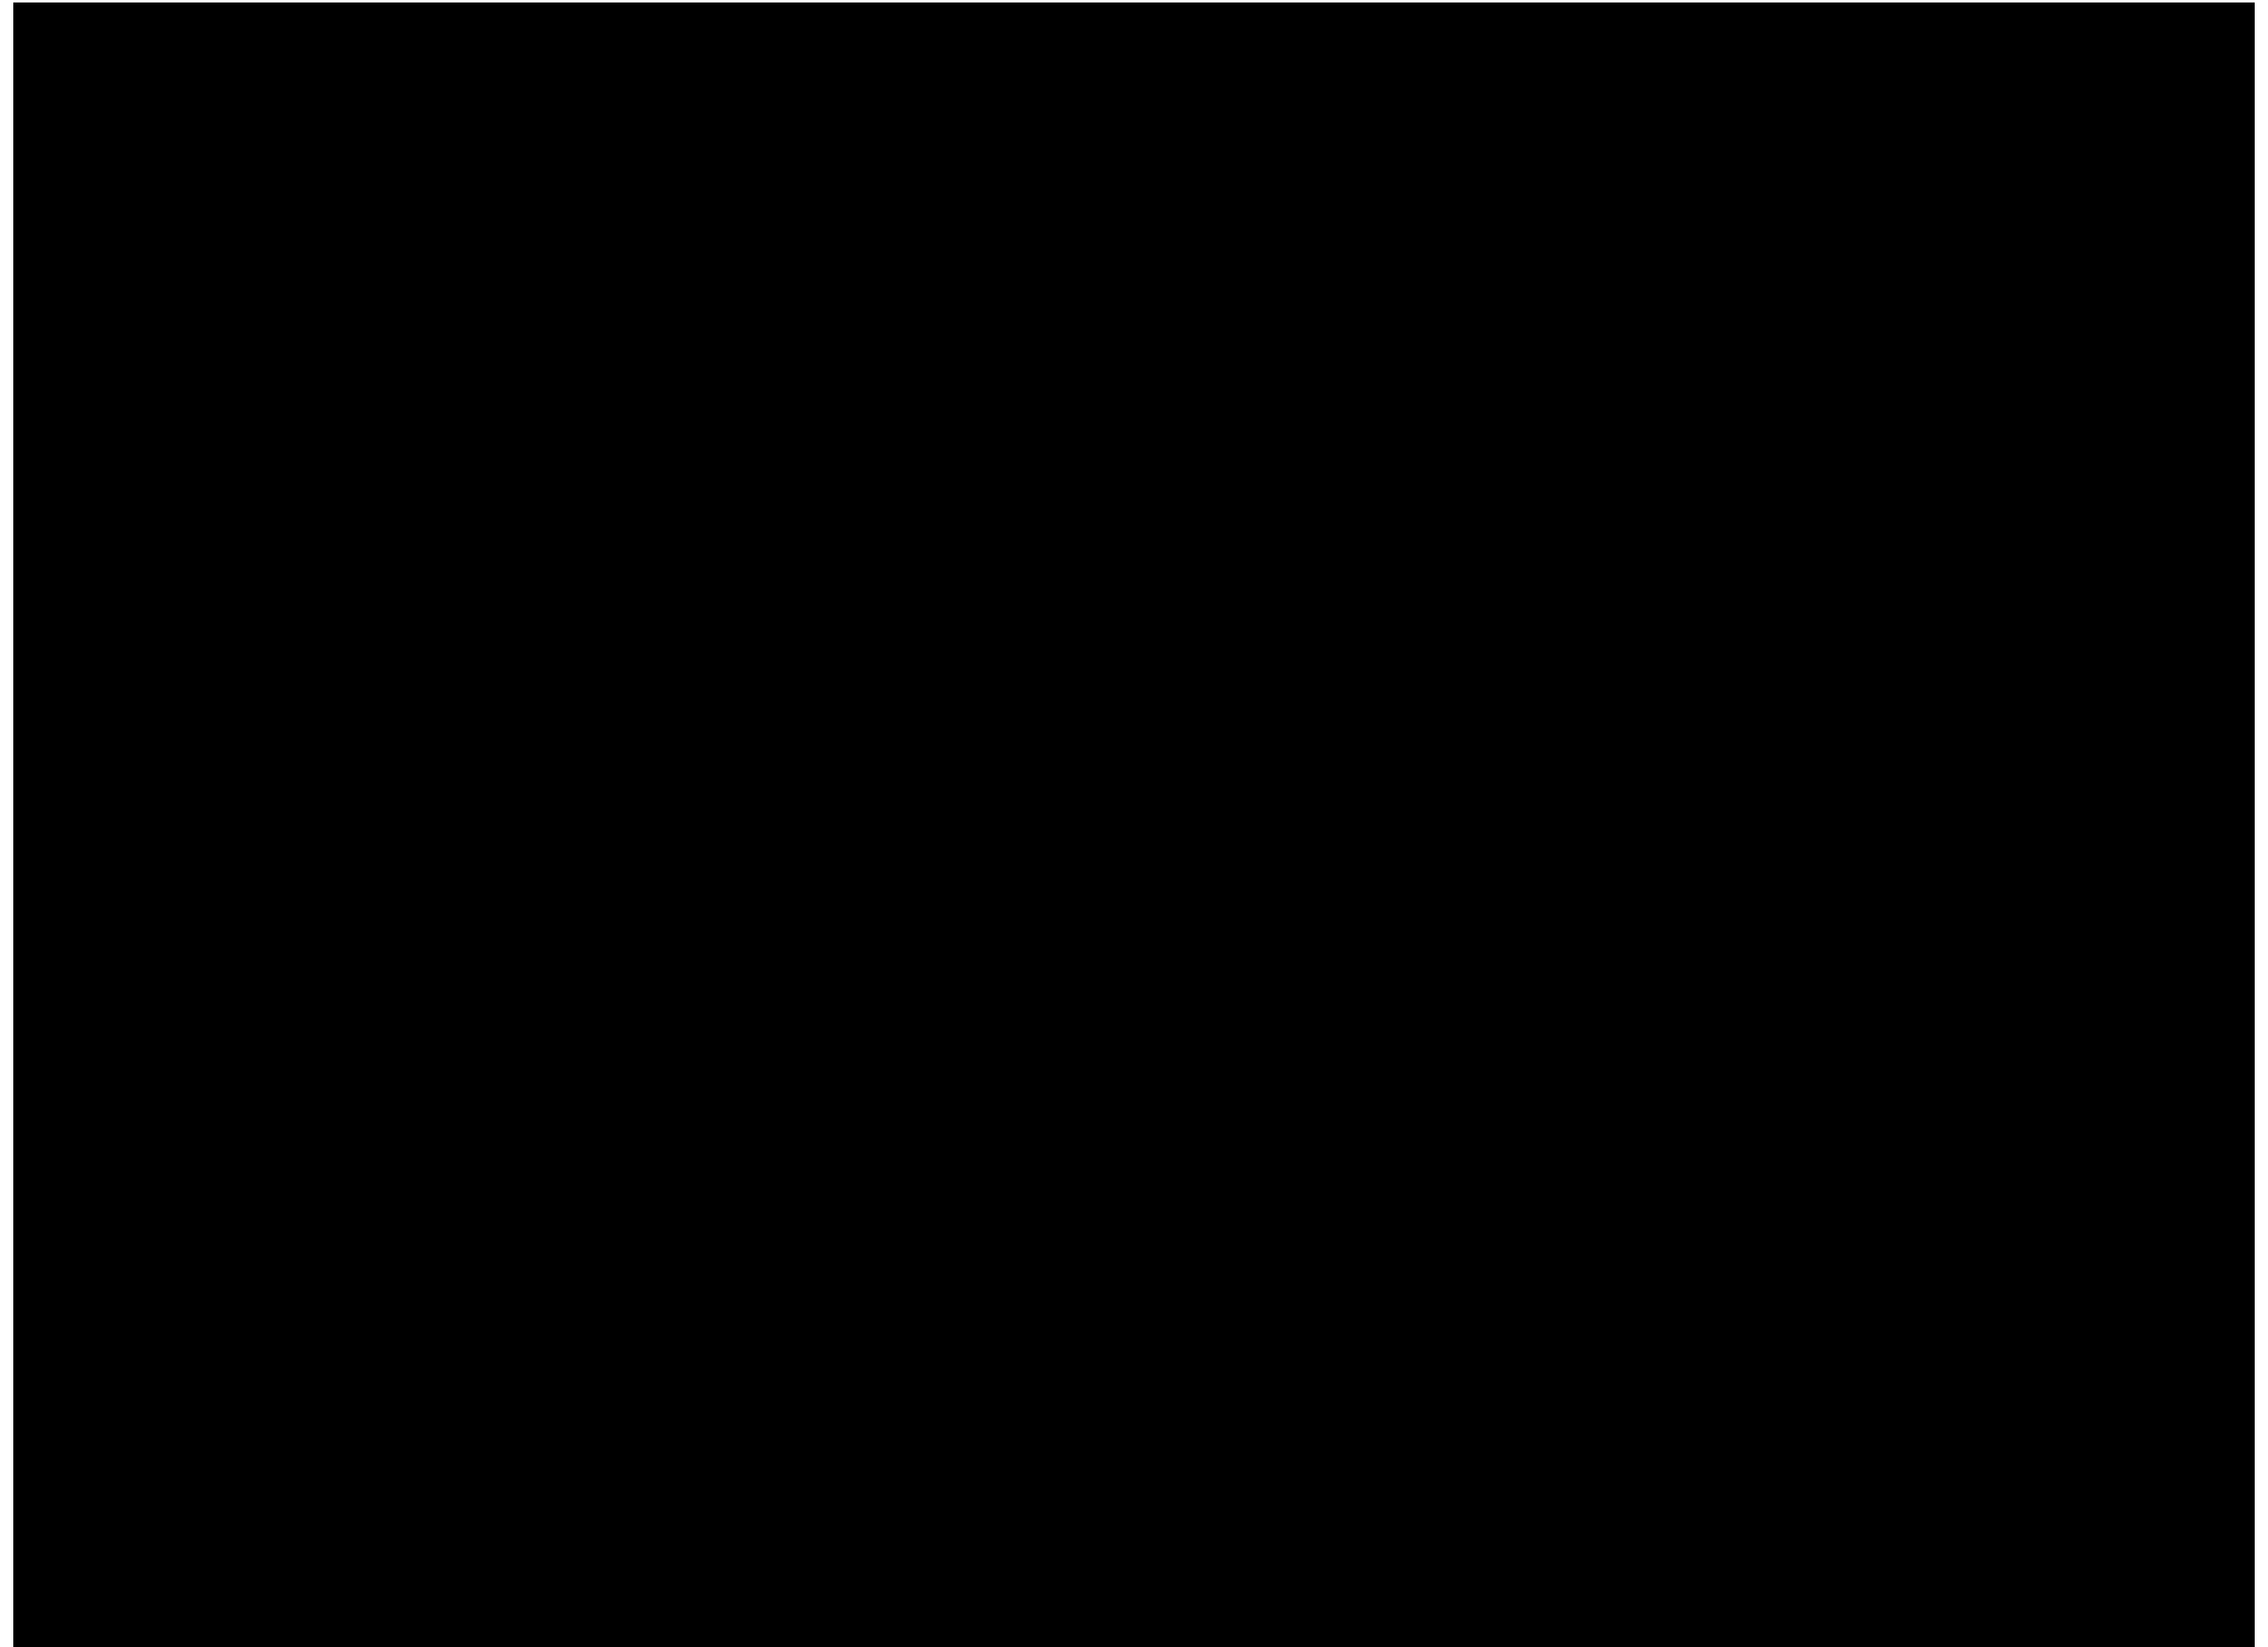

Availability: The course is available starting today, February 3, 2026.

**Scan the code or visit
the link to enroll today!**

OUR COMMITMENT TO THE CLAYTON COUNTY COMMUNITY

PREPARING FUTURE-READY LEARNERS, TOGETHER

By working together, we can thoughtfully and safely use new tools like AI to prepare our students for the world of tomorrow. We are committed to this partnership, always keeping human connection, critical thinking, and a love of learning at the very heart of everything we do in Clayton County Public Schools.
