Notes:

Technician A is defined as one that has demonstrated proficiency in the repair and installation of computers.

Technician B is defined as one that has demonstrated in the repair and installation of computers and/or technology and possesses a degree from a college/university or industry certification related to the field.

Technician C is defined as one that is mastered in the repair and installation of computers and/or technology and possesses a degree from a college/university or industry certification related to the field.

Technicians who earn a technology industry-recognized certification may receive an additional annual supplement of \$1,500.00, pending prior approval from the technology director. Approval will be based on the school system's current need for expertise in the certificate's related area.
