Elementary School Presentation: Lake View

Lake View Principal Jill Van Der Linden and teachers Megan Kiklas and Cindy Soto presented on how the school continues to strengthen inclusive practices as part of its identity, serving students with diverse learning styles, communication methods, and needs. Staff described how inclusion at Lake View is intentionally designed so that all students can access grade-level curriculum, build authentic peer relationships, participate in classroom and school activities, and experience a strong sense of belonging. The presentation demonstrated the collaboration between general education and special education staff to create meaningful opportunities for students receiving specialized academic instruction to learn alongside their peers. Board members also heard directly from students, who shared their personal perspectives on inclusion and how learning together has strengthened empathy, friendships, and classroom community. Lake View showed how inclusive practices are thoughtfully planned, continuously refined, and centered on ensuring every student feels supported and valued.

2025-26 Second Interim Budget Report

Assistant Superintendent of Administrative Services Keith Farrow presented the 2025–26 Second Interim Budget Report outlining Ocean View School District's current financial status and projected fiscal outlook. He provided budget assumptions, including projected enrollment, average daily attendance (ADA), cost-of-living adjustments, pension rates, and inflation factors that influence district finances. He also reviewed the District's multi-year financial projections, highlighting expected revenues, expenditures, and fund balances through 2027–28. In addition, the report addresses program contributions such as Special Education and routine maintenance, and identifies the fiscal challenges facing the District, including declining enrollment, staffing costs, attendance trends, and broader economic uncertainty. The complete presentation can be viewed here.

HVAC Update

Jim Choate, Executive Director of Facilities and Transportation, provided an update on the District's heating, ventilation, and air conditioning (HVAC) systems. The presentation explained the different types of HVAC systems in operation at various campuses, including variable refrigerant flow systems, boiler-chiller systems, rooftop unit systems, and split condensing/furnace systems. He also reviewed the expected life span of HVAC equipment based on standards from the American Society of Heating, Refrigerating, and Air-Conditioning Engineers (ASHRAE) and shared an assessment of the age and condition of systems across District facilities. The audit helps the District understand which systems are functioning within their expected life cycle and which may require maintenance, upgrades, or replacement as part of long-term facilities planning. The entire presentation can be accessed here.
