Safety Town is designed to help children recognize hazardous situations and react to them. Each session includes two weeks of instruction and fun for 3–8 year-old children, determined by their age on June 15, 2026. Safety town is coordinated by a certified teacher, and is assisted by other educational professionals, committed assistants, and dedicated volunteers. Children have "hands-on" learning while riding through the Safety Town streets along with singing safety songs, playing safe games, coloring, and participating in other activities all designed around the safety message of the day.
