

Hendry County School District

ADDENDUM #3

RFP 26-0008

Network Infrastructure Equipment

Addendum DATE: 3/13/2026

Information Technology RELATED DOCUMENTS –

Purpose of Addendum

This addendum provides official clarification to a question submitted to a previous RFI and changes to the Bid Proposal Form of the installation and configuration services.

RFI:

- Original Question

Q: Can you please provide a breakdown of quantity and switch model per school. So, we can properly quote professional services and installation?

- Original Response

A: These switches will not be allocated or have been inventoried for school purposes.

Hendry is aiming to backstock these switches for inventory until they go into production.

- Clarifying Response:

A: Hendry County School District does not have finalized quantities assigned to specific schools at this time. The requested switches will be deployed across eligible district sites as part of ongoing network infrastructure upgrades and recabling projects. Deployment will occur in phases based on project timelines and operational needs. All equipment procured through this RFP will be installed by the district and placed into production service at eligible district schools or district facilities and will be asset tagged, inventoried, and tracked in accordance with E-Rate program requirements. Professional services and installation will not be needed."
