

STATEN ISLAND ACADEMY TAG CAMP

**Early Bird
Registration
(April 15th) \$2,100**

**Regular Rate (after
April 15th) \$2,300**

July 13th – July 31st

Exercise Your Mind!

statenilandacademy.org/summer/day-camp

Welcome to TAG Camp

What is TAG Camp?

TAG Camp is the Talented and Gifted Summer Program at Staten Island Academy. TAG campers take part in three class offerings each day. Classes are interactive and designed to help bright students explore interesting subjects. Topics in sciences, technology, math, humanities, and the arts are explored in a deep, creative way. In addition to the academic offerings, students have time each day to swim in our outdoor swimming pools, play on the fields or playground and participate in other regular day camp activities. TAG campers exhibit their talents in many ways. Some are gifted mathematicians and others are gifted readers or scientists. Research consistently shows that talented and gifted students benefit academically and socially when they learn with peers who share their passion for discovery and learning.

Who is eligible for TAG camp?

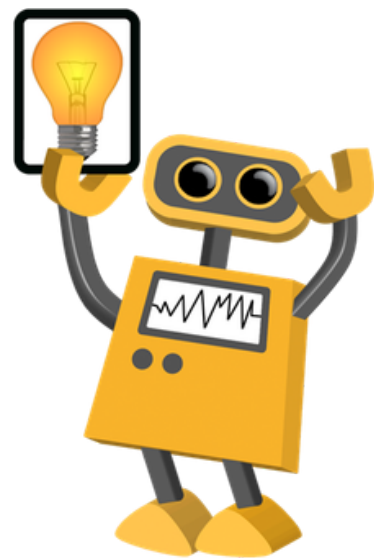

TAG camp is open to students who have been designated as gifted and talented. This can be through teacher recommendations, report cards, and/or standardized testing. For standardized testing, a student must score in the 90th percentile in at least one subject area and/or must provide two letters of recommendation from their current teachers. Students who lack standardized test scores may submit report cards and two letters of recommendation.

Students enrolled at Staten Island Academy do not have to submit documents, their admission will be reviewed by school administrators! The camp is designed for students entering Grade 1 through Grade 8.

Payment Schedule:

Payment in full with all applications:

- Early Bird- April 15th- \$2,100
- Regular rate- after April 15th- \$2,300

Course Catalog 2026

Entering Grades 1-2

Passport to the World

In this course, campers will experience a wondrous global journey around the world. They will gain knowledge of intriguing facts about countries including their geography, capital cities, flags, and even the dance of the region! Crafts and virtual tours of some of the most famous landmarks will add to the experience! What a wonderful way for children to encounter people and places from all over the world!

Stories that Spark Innovation!

What happen when a great book meets an exciting STEM challenge? Innovation comes alive! In this class, campers enjoy interactive read alouds paired with low-prep STEM and Maker activities that inspire creativity, collaboration, and critical thinking. Each mini-lesson encourages campers to experiment, invent, and explore like real engineers- all while having tons of summer fun!

Game On!

In this exciting and interactive class, campers will dive into a wide variety of games—including board games, card games, strategy challenges, and lively rounds of charades—that are designed to stretch the mind and bring friends together. As they play, campers will sharpen important skills such as problem solving, critical and creative thinking, patience, and teamwork. They'll learn how to plan ahead, think flexibly, communicate with others, and handle both winning and losing with confidence. Best of all, learning happens through laughter, friendly competition, and fun! Get ready to think, play, and collaborate—let the games begin!

Read and Respond with Art!

In this course, literacy will be combined with art. Campers will have the opportunity to develop reading skills and be encouraged to develop their own creativity through art. Campers will listen to a read aloud that will be tied to an art exploration activity as they strengthen their reading comprehension skills.

Stretch, breathe, dance and shine!

Campers will stretch, sparkle, and shine in this creative yoga and dance class! Through yoga, they will strengthen focus, balance, and self-confidence, and through dance, they will explore creative movement and choreography. As a TAG enrichment experience, campers will be challenged to think innovatively, design their own movement sequences, and express original ideas through the arts.

Fairy Tale STEM Quest: Engineering Happily Ever After

In this imaginative, hands-on course, campers will step into fairy tales and become problem-solvers for their favorite storybook characters. After reading classic tales, they'll tackle fun STEM challenges to help characters overcome obstacles and improve their stories. Using creativity, teamwork, and critical thinking, campers will design, build, test, and revise solutions—bringing fairy tales to life through science, technology, engineering, and math. From building stronger houses to planning clever escapes, campers will think like engineers and collaborate like innovators—one challenge at a time!

Under the Sea

In this class, campers will learn about fascinating sea creatures while creating fun art activities inspired by ocean life! Through hands-on projects and interactive exploration, campers will dive into the wonders of the ocean, discover new animals, and bring what they learn to life through creativity. This class encourages curiosity, imagination, and learning through play as we explore the underwater world together.

Woodworking

Get ready to build, create, and have fun! In this hands-on woodworking course, campers will learn real tool skills while building awesome projects they can take home and use. Campers will safely learn how to use a hammer, nails, drill, and hand saw while creating projects like toolboxes, birdhouses, wooden cars, signs, and more. Each day includes skill-building, creativity, and plenty of time to design and decorate their work.

Entering Grades 3-4

Passport to the World

In this course, campers will experience a wondrous global journey around the world. They will gain knowledge of intriguing facts about countries including their geography, capital cities, flags, and even the dance of the region! Crafts and virtual tours of some of the most famous landmarks will add to the experience! What a wonderful way for children to encounter people and places from all over the world!

Stretch, breathe, dance and shine!

Campers will stretch, sparkle, and shine in this creative yoga and dance class! Through yoga, they will strengthen focus, balance, and self-confidence, and through dance, they will explore creative movement and choreography. As TAG enrichment experience, campers will be challenged to think innovatively, design their own movement sequences, and express original ideas through the arts.

Fairy Tale STEM Quest: Engineering Happily Ever After

In this imaginative, hands-on course, campers will step into fairy tales and become problem-solvers for their favorite storybook characters. After reading classic tales, they'll tackle fun STEM challenges to help characters overcome obstacles and improve their stories. Using creativity, teamwork, and critical thinking, campers will design, build, test, and revise solutions—bringing fairy tales to life through science, technology, engineering, and math. From building stronger houses to planning clever escapes, campers will think like engineers and collaborate like innovators—one challenge at a time!

Nature Meets Art

Campers will explore nature through art by observing and drawing their surroundings, using natural materials to create artwork, and learning how recycled items can be transformed from trash to treasure. Throughout the class, artists will experiment with different materials and techniques while discussing ways art can help care for our environment.

Wonderful World of Wizards

If you are a muggle who is fascinated by Harry Potter, then you will want to join in for this wizardly adventure! Campers will have the opportunity to be sorted into the houses of Hogwarts, as well as enjoy character studies, role play, games, and crafts to name a few of the activities offered. It is recommended that the campers read *Harry Potter and the Sorcerer's Stone* prior to TAG, in order to get the most from this experience.

Design and Drawing Studio

Campers will use a variety of materials such as oil pastels, pencils, paint, colored pencils, and more to create artwork that reflects their personal interests. In addition to hands-on artmaking, campers will also explore some digital art projects. Throughout the course, artists will be encouraged to add their own creative spin to each project. The skills and techniques learned will help students grow to be more confident, independent, and expressive artists.

STEAM Innovator Workshop

Ready to design, build, and create? In this hands-on course, campers will explore engineering, technology, and creativity through exciting projects and challenges. With new themes each week—from space exploration and engineering to animation and arcade games—campers will brainstorm, tinker, and build their way through creative problem-solving tasks. They'll develop building and crafting skills alongside technology skills like block-based coding and stop-motion animation, all while collaborating with friends and having fun. This class is perfect for campers who love to create, experiment, and bring their ideas to life.

Creative Cooking Studio

Campers will become junior chefs as they learn basic cooking skills like chopping, measuring, mixing, and cleaning up. They'll try out fun recipes using kitchen tools such as hot plates, microwave ovens, and blenders, while learning important kitchen safety skills. This hands-on class is perfect for campers who love to cook, create, and taste their delicious creations!

Stitch, Design, Create!

This creative fiber arts course features a new hands-on project each week! In week one, campers will learn the basics of working with needle and thread by creating a simple cross-stitch design. In week two, they'll explore embroidery, learning a variety of stitching styles and techniques to express their creativity. In the final week, campers will design and create a woven piece, such as a decorative wall hanging, to showcase their skills. This class is perfect for campers who love crafting, designing, and creating with their hands.

Under the Sea

In this class, campers will learn about fascinating sea creatures while creating fun art activities inspired by ocean life! Through hands-on projects and interactive exploration, campers will dive into the wonders of the ocean, discover new animals, and bring what they learn to life through creativity. This class encourages curiosity, imagination, and learning through play as we explore the underwater world together.

Sew Much Fun!

In this hands-on sewing class, campers will learn to sew by hand and on a sewing machine. They will practice following patterns to create fun projects like decorative pillowcases, locker organizers, book covers, drawstring bags, tote bags, and more. Once they've mastered the basics, campers will have the chance to design and create their own original projects, putting their new skills and creativity to work.

Theater (entering grades 3-8)

Lights, camera, action! In this exciting three-week drama course, campers will work together in a multi-age group to create and perform a theatrical production. Campers will develop scenes, participate in ensemble work, and collaborate to bring a story to life on stage. Along the way, they will build acting skills, improve diction and projection, and learn how to use body language and stage presence to captivate an audience. This class is perfect for campers who love to perform, imagine, and express themselves through drama!

Woodworking

Get ready to build, create, and have fun! In this hands-on woodworking course, campers will learn real tool skills while building awesome projects they can take home and use. Campers will safely learn how to use a hammer, nails, drill, and hand saw while creating projects like toolboxes, birdhouses, wooden cars, signs, and more. Each day includes skill-building, creativity, and plenty of time to design and decorate their work.

Entering Grades 5-6

Nature Meets Art

Campers will explore nature through art by observing and drawing their surroundings, using natural materials to create artwork, and learning how recycled items can be transformed from trash to treasure. Throughout the class, artists will experiment with different materials and techniques while discussing ways art can help care for our environment.

Wonderful World of Wizards

If you are a muggle who is fascinated by Harry Potter, then you will want to join in for this wizardly adventure! Campers will have the opportunity to be sorted into the houses of Hogwarts, as well as enjoy character studies, role play, games, and crafts to name a few of the activities offered. It is recommended that the campers read *Harry Potter and the Sorcerer's Stone* prior to TAG, in order to get the most from this experience.

Design and Drawing Studio

Campers will use a variety of materials such as oil pastels, pencils, paint, colored pencils, and more to create artwork that reflects their personal interests. In addition to hands-on artmaking, campers will also explore some digital art projects. Throughout the course, artists will be encouraged to add their own creative spin to each project. The skills and techniques learned will help campers grow to be more confident, independent, and expressive artists.

STEAM Innovator Workshop

Ready to be an innovative game designer, movie director, or engineer? In this hands-on course, campers will explore engineering, technology, and creativity through exciting projects and challenges. They'll think like directors as they storyboard, film, and edit their own movies, and like engineers as they brainstorm, build, and test designs in bridge and car-building challenges. Campers will strengthen hands-on building and crafting skills while exploring technology tools like block-based coding, 3D modeling, and video editing—all while collaborating with friends and bringing creative ideas to life.

Creative Cooking Studio

Campers will become junior chefs as they learn basic cooking skills like chopping, measuring, mixing, and cleaning up. They'll try out fun recipes using kitchen tools such as hot plates, microwave ovens, and blenders, while learning important kitchen safety skills. This hands-on class is perfect for campers who love to cook, create, and taste their delicious creations!

Stitch, Design, Create!

This creative fiber arts course features a new hands-on project each week! In week one, campers will learn the basics of working with needle and thread by creating a simple cross-stitch design. In week two, they'll explore embroidery, learning a variety of stitching styles and techniques to express their creativity. In the final week, campers will design and create a woven piece, such as a decorative wall hanging, to showcase their skills. This class is perfect for campers who love crafting, designing, and creating with their hands.

Super Sleuths

Love solving mysteries? Step into the world of detectives in this thrilling course! Campers will explore forensic science and hands-on investigation techniques like fingerprinting, DNA analysis, and polygraph testing. They'll read gripping mystery stories and practice cracking the case using deductive reasoning skills. Plus, they'll get the chance to write and create their own short mystery stories, putting their sleuthing skills to the test!

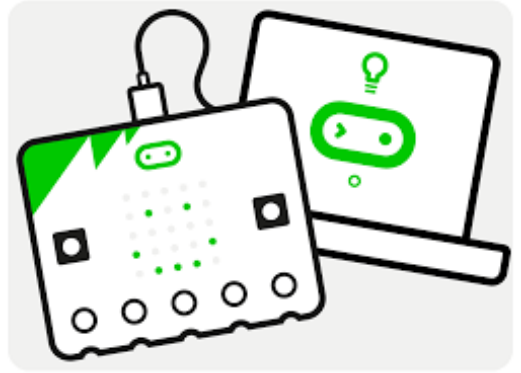

Sew Much Fun!

In this hands-on sewing class, campers will learn to sew by hand and on a sewing machine. They will practice following patterns to create fun projects like decorative pillowcases, locker organizers, book covers, drawstring bags, tote bags, and more. Once they've mastered the basics, campers will have the chance to design and create their own original projects, putting their new skills and creativity to work.

Code and Create!

Join us for a hands-on adventure where creativity meets technology! Campers will explore coding with Micro-bit and bring their ideas to life using 3D pens. Whether you're just starting out or already love tech, this class is your chance to design, build, and innovate. Unleash your inner inventor and discover how STEM can turn your ideas into reality!

Music Composition Workshop

Have you ever wondered how composers create music from scratch? Are you interested in making your own musical compositions? In this course, campers will practice writing their own music using technology, such as music grids and the sequencing program Soundtrap. They will also learn how to write rhythms and melodies using music notation and have the opportunity to build their own instruments. Along the way, campers will analyze popular song forms that musicians have used throughout history, from Beethoven to The Beatles to Taylor Swift. They will even have the opportunity to write their own song lyrics. Previous musical experience is not required to participate in this course.

STEM Lab

Each week, campers will solve a given problem while learning to collaborate with each other. Each STEM (science, technology, engineering and math) challenge encourages creative thinking. Campers will be asked to build a wide variety of creations such as bridges, towers, boats, airplanes, mazes, and windmills. The engineers must use the available supplies while sticking to a budget for each STEM activity. These STEM projects are sure to keep young scientists engaged, learning, and well-prepared for the future.

For the Student:

I understand that, as a participant in Talented and Gifted Camp (TAG), I have the responsibility to work to the best of my ability in all of my classes; to conduct myself appropriately and follow all rules, regulations and policies of the TAG program; to support the efforts of the TAG faculty and staff, and participants, to preserve the cleanliness and beauty of the campus, to respect the property of others, and to respect the rights and privileges of all TAG students, faculty, staff, and others in the campus community. I understand that failure to comply with the above statement may lead to program dismissal.

Signature of Student: _____ Date: _____

For the Parent or Guardian

Please check the “yes” box where permission is given or the “no” box where permission is not given. I hereby grant permission for my child, while attending the Talented and Gifted Camp to:

☐ Yes ☐ No Leave campus for approved field trips (when a trip is authorized for a particular course).

☐ Yes ☐ No Change courses on his/her daily schedule without confirming the change with parent or guardian.

☐ Yes ☐ No Provide quotes; participate in TAG pictures, and in photographic images that may be used in TAG literature, press releases, and/ or the SIA/ TAG website.

☐ Yes ☐ No Receive selected materials about other educational opportunities from organizations sanctioned by TAG.

Authorization for Medical Treatment:

This is to authorize the physicians and nursing staff of the Talented and Gifted camp and/or Emergency Room physicians (and any consultants that they deem necessary) of nearby (or the most appropriate) hospital to render necessary medical care and medications to my child, (name of child) _____. In the event of an emergency, and if I cannot be reached, I consent to allow physicians of the infirmary of the TAG site, physicians on the active staff of the nearby (or most appropriate) hospital, or other physicians or hospital (as the case may be) to perform any emergency treatment, including surgery, requiring the use of local or general anesthetic. This authorization shall be in effect as long as my child is a student at the Talented and Gifted Camp. Furthermore, I, the undersigned, will assume responsibility for all medical costs, incurred by my child, not covered by my medical insurance.

Release of Claims Against the Program:

I unconditionally release the TAG program from any claims for damage, injury, loss or expense of any sort incurred directly or indirectly in conjunction with the participation of my child in the program unless the loss is caused by gross negligence of TAG.

It is the responsibility of each applicant to adhere to the payment schedule in order to maintain his/ her enrollment status in the TAG program.

I have read the TAG program announcement and application pages including the paragraph signed by my child (above). I have read and understand the refund policy as stated within the TAG brochure. I understand that it is my responsibility to meet all financial obligations of the TAG program. I understand that I am responsible for the cost of repairing or replacing any property that my child damages while on campus. I understand that if my child fails to follow TAG program rules and regulations, he/ she may be dismissed from the program without refund and may be subject to disqualification from attendance at future sessions of Talented and Gifted Camp.

I/ we certify the above information is complete and correct. I/ we understand that any misrepresentation may result in the expulsion of the applicant from the program. I/ we acknowledge that terms and conditions in this brochure constitute part of my agreement with TAG, including sections concerning responsibility, health, refunds, changes in dates, accommodations, courses and billing options selected above. I have read the brochure and agree to TAG policies and procedures. This agreement will be effective when my application is accepted by TAG and shall be governed by the laws of the State of New York, without regard to New York conflict of laws rules.

Signature of Parent or Guardian: _____ Date: _____

Admission to the Talented and Gifted camp program is on a rolling, first-come first-served basis for qualified students. Applications are accepted and processed upon receipt. Admission to the 2025 Talented and Gifted program shall be granted or denied at the sole discretion of SIA/TAG. Applications will be accepted only if space is available. The \$2,100 Early Bird Payment must be paid in full by April 15, 2026 with your application. Cost of \$2,300 after April 15, 2026.

Payment Options: ☐ Check (Please make payable to Staten Island Academy) ☐ Money order enclosed for \$ _____
☐ Please charge my credit card for \$ _____ ☐ Visa or ☐ MasterCard
Phone number for Credit Card information: _____

Cardholder's name (please print): _____

Mail application and payment to: Staten Island Academy-Talented and Gifted Camp, 715 Todt Hill Road, Staten Island, NY 10304.

Approximately two weeks are required to review application materials to determine student eligibility. An acceptance letter will be sent to the student upon completion of this review.

Signature: _____ Date: _____
