232	Community member	3/3/2026 7:03 PM
233	I do not have any children in schools but i am an educaator and when i was in schools before obtaining advanced degrees, I attended public schools in the cities and coiunties and these schoools need to make sure thathaat they remain as they are, no need to consconsolodiate. Lots of mmoneies have already been put into different schools adding to them and making them better so these funds already used have been spent dffoolishly. it is hard also for school age children and lowers grades to have to change schools and enronments just because some hierarchy says this shuould be done. this is a waste of good taxpayer monies.	3/3/2026 4:58 PM
234	I’m a prior student	3/3/2026 4:08 PM
235	IHM	3/3/2026 3:50 PM

Q4 Please share your feedback on the initial facilities scenario (consolidations).

Answered: 4,622 Skipped: 4,382

#	RESPONSES	DATE
1	Whatever happened to the re-zoning proposition that surfaced around 2019? Aren't the middle and high schools in the northern part of the county over-flowing? Why can't we re-zone the district and shift students/zones southward? Some school closures may be inevitable.	3/9/2026 11:33 AM
2	Yes, We need to consolidate the schools. This generation does not have the same number of kids in families that they had 1-2 generations ago.	3/9/2026 8:37 AM
3	I don't think the school should consolidate because of overcrowding of the classes.	3/9/2026 7:09 AM
4	The closure recommendation for Ashford Park Elementary seems to directly contradict the SAP's own stated criteria: underutilized (over capacity enrollment), nearby under capacity facilities (closest buildings are slated for expansion because they too are over-utilized), and opportunity for cascading (building unsuitable for middle / high school). APS is a strong, high performing community of high achieving students and involved parents so in light of the contraindicated data, closing this community seems destructive rather than useful on the terms that SAP set forth. Yes, the facilities need significant attention after decades of neglect, and we realize it is a difficult site on which to build. But we've come together with at least 2 pathways (rebuild on site or relocation to John Lewis) that can keep the community in tact, and we're ready to face the challenges that may come with change.	3/9/2026 6:38 AM
5	Without knowledge or even projections of what will be done with the vacated facilities, it is very hard to provide input. It's unclear what financial impact consolidations would have and how that $ would be used for students. You need to model it out for an average (can be without name) school to show the benefit of saving on maintenance, administrative positions, etc. + the potential financial benefit from selling properties. There's too much talk about which schools and not enough clarity on the actual benefits.	3/9/2026 6:00 AM
6	I object to any school closings in our 30035 communities! Our schools need to be open in our local neighborhoods, instead of busing our children further away from home, spending more time on school buses!	3/9/2026 4:07 AM
7	I'm concerned about the impacts of closing Ashford park on our community and home values. The school is currently a core part of our community and is more than just a building. Due to its location, it has attracted the support of our community which has poured time and money into making it what it is today. It is important to us that our community stay together in the Chamblee cluster and that decisions do not cause us to be "bused" to elementary schools long distances away. I find it almost punitive to consolidate over populated schools that are doing well and overcrowded with less successful schools.	3/9/2026 3:36 AM
8	Believe Brockett Elementary should be kept open	3/9/2026 2:58 AM
9	Don't touch the elementary schools, unless some a near empty. That is far from the case at Oak Grove Elementary.	3/9/2026 2:09 AM
10	Related to consolidation: communities need to remain whole. Consideration should also be given to grounds, space, traffic patterns and community.	3/9/2026 1:31 AM
11	Well since the new principal, Dr. Blakely came into town, the school has went to hell if we must be honest…	3/9/2026 1:17 AM
12	Renovate and expand Evansdale . The footprint of the property would accommodate this plan	3/9/2026 1:17 AM
13	I think it's a terrible idea. The classrooms will end up being over crowded. The teachers are already quitting in droves because the kids are so disruptive and more students for them to deal with is NOT going to help. Smaller class sizes is the way to go. Also, why aren't any of the schools in higher income neighborhoods being affected by this?	3/9/2026 1:15 AM

14	John Lewis and Ashford park need to be consolidated and work together to decompress the Ashford park campus.	3/9/2026 12:50 AM
15	Seems ill-advised to look at facilities in a vacuum without considering programs, locations, neighborhoods, transportation, successes of schools, parent involvement, etc.	3/9/2026 12:31 AM
16	I feel that there are multiple elementary schools that are not needed and that all could benefit from a consolidation however maybe if some teachers were more professional then student loss wouldn't be at an all time high. The consolidation will inconvenience parents as travel time to and from schools for activities will be strenuous.	3/9/2026 12:27 AM
17	I am opposed to the closing of Oak Grove Elementary.	3/9/2026 12:21 AM
18	Consolidations (and expansions) only make sense if class sizes are kept much lower than that state maximums by grade level. Currently, our local elementary school does not regularly have low class sizes (often starting the year over state maximums for lower grade levels) and yet we are being considered for a project expansion while two other "small" schools in our cluster, also under 500 seats, are being considered for consolidation. Quality of instruction and student success is overlooked in all scenarios.	3/9/2026 12:21 AM
19	Do any of the schools that are considered for closing operate as election locations?	3/9/2026 12:13 AM
20	I understand changes may need to be made; however, I hope that the county is long-range planning and also looks at the performance of the schools as they are before making changes. Oak Grove Elementary School has been a consistently high performer among elementary schools in Dekalb County. It seems short-sighted at the very least to close down one of your highest performing schools.	3/9/2026 12:11 AM
21	Evansdale Elementary School needs to be renovated and expanded, not closed! At 10.1 acres, Evandale's lot size is bigger than neighboring schools recommended for expansion. Evansdale is unique since it has a large, separate play field, two playgrounds and multiple parking lots. Our site can accommodate additions to the back of the school and still offer plenty of play and parking space. It is uniquely situated to accommodate increasing traffic because it takes up two sides of the neighborhood block. Enrollment is expected to increase to 600 by 2030.	3/9/2026 12:10 AM
22	it does not serve our community well .There are a lot of younger families moving into our community with children and to have them "BUSED" out of the neighborhood will be devastating to our community .	3/9/2026 12:04 AM
23	No one has presented any data to show that any of this is actually a cost savings for the tax payers. How much will the renovations cost? How long will it take for the investment to be realized. How long will property sit in this "land bank" that I saw in the plan What is the impact going to be on traffic in area's not built for it after adding several hundred more kids to schools? How many millions of dollars are we paying a firm to tell us that we need to spend all kinds of money and disrupt existing communities without giving us any of these numbers so far? Additionally, how can we push through any plan without proper leadership in place? We do not have a permanent superintendent in place and our board will look every different in January.	3/9/2026 12:03 AM
24	I was initially surprised about the list and what schools were affected. I do believe the details are what needs to be discussed.	3/9/2026 12:01 AM
25	I think the fact that Dekalb has neighborhood scools with smaller student bodies are a better choice for learning than huge overwhelming schools	3/9/2026 12:01 AM
26	To maintain core aspects of our community and promote continuation of extremely successful programs, I urge you not to close Ashford Park elementary and to keep Ashford Park in the Chamblee middle and high school cluster. Ashford Park is over-enrolled, but other changes could be made to address that issue while maintaining the school's community and programming. For example, slower construction outside of school days/hours to expand the current building. Moving to a new location while keeping the name of the school, staffing, and programming such as the DLI program intact, reducing slots for non-resident enrollment, and/or splitting into a lower and an upper Ashford Park Elementary. District-wide, I feel strongly that high performing schools should be preserved and renovated as needed, and low performing schools should receive extra supports such as lower student to teacher ratio and increased interventionist/student support staff to offer multi-tiered systems of support to better provide for students with diverse learning needs. Lower enrollment should make these kinds of	3/9/2026 12:00 AM

	supports more possible. Decreased enrollment projections bring an opportunity to step up to provide more resources to students in need. Because of this, consolidation and closing programs would be counter to district-wide success. If taxes stay the same or increase for this, so be it! There is no better investment than the next generation.	
27	I'm deeply concerned about the proposed closing of Ashford park elementary school. My priority as a parent is to see the community stay together and the ability to keep our amazing staff with the students. I understand that this may mean the school may need to be in a different building, but it is truly the staff, students, an amazing parents support that make this school so special. I would strongly advocate for moving the school as a whole and keeping it within the Chamblee cluster. This is also a school that not only serves the students in our neighborhood, but also serves as a cornerstone for our entire community. Even tax paying residents that may have children that go to alternate schools still benefit from having Ashford Park in our neighborhood through community events, such as the annual fall festival, bolt 5K, and spring fling. The elementary school serves the entire community in this area of Brookhaven, which enhances the experience of the students and helps them feel more connected to their community. Also, I have reservations about the districts plan involving the special programs at Ashford Park if it closes, such as the German immersion program. A program that has been immensely beneficial to my son and the students in his class.	3/9/2026 12:00 AM
28	I want to know how your estimates of lower enrollment going forward were determined/modeled. I do not believe that it's accurate. Also, I don't think putting more children into larger schools will benefit the children or the educators. I also think this is an exercise in filling large newer buildings that should never been built to begin with. It's fine to improve building facilities of course, but not at the expense of the educators and students who teach and learn INSIDE of those buildings by NOT supporting the educational programs and learning resources they really need. I feel we are paying for past very poor decision making by the board with their "if we build it, they will come" thinking.	3/9/2026 12:00 AM
29	1. The criteria for closing schools should be created by educators and leaders not consultants. 2. More resources are going to higher income neighborhoods within Dekalb, exacerbating existing and racial and income disparities. Busing takes us backward. 3. Large schools are alienating, do not foster community and will create congestion and traffic flow issues. 4. There has not been an investigation with the community as to driving factors for people leaving the public school system. One GLARING issue is the district not meeting the needs of all students, especially children with special needs (neurodivergent, learn disabilities, emotions based school refusal, sensory differences, mental health issues, gifted learners). 5. These mega schools require huge investments and our recourses should be pour back into our communities.	3/8/2026 11:59 PM
30	The philosophy for SAP consultation states: Elementaries in areas with underutilization close due to excess capacity in the area along with cascading use. Elementaries that are appropriately placed and well utilized have proposed facility additions. Elementaries that have low educational adequacy and are in close proximity to schools with excess capacity or planned additions are proposed to close. Ashford Park is overutilized and does not have low educational adequacy, so by these criteria it should not be closed. To maintain core aspects of our community and promote continuation of extremely successful programs, I urge you not to close Ashford Park elementary and to keep Ashford Park in the Chamblee middle and high school cluster. Ashford Park is over-enrolled, but other changes could be made to address that issue while maintaining the school's community and programming. For example, construction outside of school days/hours to expand the current building. Moving to a new location while keeping the name of the school, staffing, and programming such as the DLI program intact, reducing slots for non-resident enrollment, and/or splitting into a lower and an upper Ashford Park Elementary. District-wide, I feel strongly that high performing schools should be preserved and renovated as needed, and low performing schools should receive extra supports such as lower student to teacher ratio and increased interventionist staff to offer multi-tiered systems of support to better provide for students with diverse learning needs. Lower enrollment should make these kinds of supports more possible, and the lower number of students is an opportunity to step up to provide more resources to students in need. Because of this, consolidation and closing programs would be counter to district-wide success.	3/8/2026 11:59 PM
31	I would like to provide specific feedback regarding the inclusion of Oak Grove Elementary in the list of schools considered for closure. I believe that would be a grave mistake that would adversely affect the children in my community. When we relocated to the Atlanta area from out of state over a decade ago, OGE and the community around it played crucial role in where we decided to live. What we had heard about the school turned out to be true and it was a close-	3/8/2026 11:59 PM

	knit, warm, nurturing, intellectually and socially enriching environment where our child thrived. We were a part of and witnessed first-hand the level of teacher and parent involvement and commitment. I know that community commitment is still there, stronger than ever (even though my daughter is now in high school the connection to OGE still remains). We particularly appreciated the human-size of the school and the ability for children and parents to establish a connection. This could be lost in a much larger, consolidated school. Oak Grove is a key anchor of our community. My understanding is that student enrollment levels (current and future) is not at risk. I also know that all other elements needed (teacher and parent commitment) to allow Oak Grove Elementary to continue serving this community with excellence for many decades to come are present. Thank you for your consideration.	
32	I hate it. I moved to this neighborhood specifically because of Oak Grove Elementary school. All 4 of my kids went there (my youngest is in 5th grade there). It's an incredibly important part of the community. The parent involvement is off the charts. You close that school, the whole neighborhood suffers and I guarantee you enrollment will decline even more, regardless of how whether you believe Sagamore or Briarlake are as good as or can be as good as OGE. Parents are fed up with DCSD. You're just giving them more excuses to leave. We fund more than our fair share of DCSD expenses and STILL have to cover anything extra beyond salaries and facilities (which of course we also pay for through our exorbitant property taxes). You'd be shocked at the thousands upon thousands of dollars I've spent over the last 16 years. At some point soon, somebody way more ambitious than me is going to look at Decatur or similar and say "why not us?". And then what do you do without your golden goose? At least one of them anyway.	3/8/2026 11:59 PM
33	We need oak grove elementary	3/8/2026 11:57 PM
34	I’m for having robust funding for programs to support the students but I believe that smaller classrooms help the children get the academic support they need delivered easier so the teachers aren’t overwhelmed with making sure students understand curriculum	3/8/2026 11:57 PM
35	Evansdale is the heart of our community!! It has a very large lot with room for expansion. Playgrounds, play fields and parking lots are all spacious. There are woods and trails surrounding the schools that provide a positive environment for the school.	3/8/2026 11:57 PM
36	There seems such a great disparity of school consolidations from the north and south side of Dekalb which also reveal equity disparities as well. If consolidation is to take place DCSD should offer specialize partnership for high schools to include more science/technology cohorts with opportunities for fellowships and internships with companies to support a robust curriculum for the middle and high schools on the south side.	3/8/2026 11:57 PM
37	Unfortunately, the initial facilities scenario appears to offer a short term bandaid solution to an issue (low enrollment) without addressing the root cause of low enrollment. I would prefer the district spend resources investigating the root cause and solving the issue as to why there is low enrollment and why families are choosing other schools and districts. My family has been in the district schools for over 20 years. There has been immense dissatisfaction with the poor fiscal management of the district and this proposal appears to be going down the same deteriorating path. Implementing a plan that closes long established elementary schools that are integrated in communities and creating larger elementary and middle schools will not only create a negative and unsuccessful learning environment, it will erode DeKalb County’s tax base as families inevitably will move to areas with better district planning, opportunities and management.	3/8/2026 11:57 PM
38	Many schools that are being considered for “repurpose/consolidation”seem to be in areas with low socioeconomic demographics and it is not super clear on where these students will be zoned to go if schools close. My concerns would be the accessibility of the parents of those students. I would like to know how these changes might impact student-teacher ratios and special education programming.	3/8/2026 11:56 PM
39	Oak Grove Elementary has been high achieving without using excess resources.	3/8/2026 11:52 PM
40	This is terrible as all schools nearby me would close. It doesn’t make sense to increase classroom sizes with over-crowded schools. The goal should always be smaller class sizes. The mega schools will not be good for the kids.	3/8/2026 11:52 PM
41	I don’t see how ~850 students at Ashford Park can be moved to neighboring schools that are already crowded/overcrowded. It would take years for an expansion to actually be done. Also there are not really super close neighboring schools so more kids who normally walk to school	3/8/2026 11:51 PM

	would have to change their mode of transportation to carpool or bus rider which would make traffic even worse. The elementary school is a huge asset to the neighborhood and its loss would result in a severely negative effect on this neighborhood and the properties.	
42	The data in this proposal is incorrect and misleading. Consolidating schools will inevitably increase the student:teacher ratio, which has been shown time and time again to be detrimental to students' experience and performance (e.g., reduced standardized test scores [Frontiers in Psychology, https://pmc.ncbi.nlm.nih.gov/articles/PMC11002959/]; having a smaller class size is like having an additional three months of education over four years [Tennessee STAR report, cited by Brookings Institute https://www.brookings.edu/articles/class-size-what-research-says-and-what-it-means-for-state-policy/]; etc.) These are only a few of many examples of why it is critical to maintain our current schools and rethink this idea of consolidation. My children will be worse off for it, and I strongly disagree with any suggestion of closing any of our schools.	3/8/2026 11:51 PM
43	The initial decision to close Ashford Park was poorly communicated (ie kept hidden from parent SAP liaisons), based on laughably inaccurate data, and the follow up meeting we had to get more info from the contractor company was a joke and didn't provide any meaningful information about the AP decision.	3/8/2026 11:50 PM
44	Closing some schools will not really solve the issue, there are some grade levels with higher capacity of students than others. Do even if we do cluster those those grades to large schools, we will still have some schools with a smaller capacity in them.	3/8/2026 11:50 PM
45	Better research needs to be made on the combination of schools and the impact that may have on negative interactions between the different demographics that may arise.	3/8/2026 11:49 PM
46	I'm unclear as to why Ashford Park is up for consideration of consolidation. It is an outlier school compared to the other 26 on the consolidation list in terms of utilization, proximity to other schools and more. I'm also concerned the Ashford Park advisory team representing our community's voice isn't being heard/considered as decisions are being made before they're being updated.	3/8/2026 11:48 PM
47	Oak Grove Elementary is not an underutilized school and should not be on the closure list. It is currently at 89% utilization with well over 95% utilization projected for the next academic year. Enrollment has continued to increase since the pandemic and Oak Grove Elementary is one of the most sought after school in Dekalb with respect to pre-K, K, and school choice. Enrollment will likely continue to grow with extensive residential growth planned near north Dekalb mall and related to continued growth for Emory and Children's Healthcare employees. If Oak Grove closes, there are not enough seats at Sagamore Hills and Briarlake Elementary to absorb the population. This would be disruptive to our kids, neighborhood, and community. Oak Grove is also one of the highest performing schools in the review group pertaining to content mastery and readiness. Oak Grove is a model school and should NOT be on the closure list.	3/8/2026 11:45 PM
48	Totally understand that we have schools in my cluster that will take a lot of $$ to bring the school plumbing, electrical, A/C up to a decent standard.	3/8/2026 11:44 PM
49	I oppose the fact that factors influencing performance of a school were not considered for announcement of closures. Ashford Park ES should not have been announced for closure. This destroys the formula that built its success.	3/8/2026 11:43 PM
50	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone	3/8/2026 11:42 PM

	(approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
51	I do not fully understand the cascading concept & how this leads to the potential closure of 3 elementary schools in the Lakeside cluster. Where will those students go? Why were these schools chosen and not others? Where is the data we can see behind that selection process? For example, Evansdale has more capacity and a higher building adequacy than Livsey yet it is Evansdale on the potential closure list. Evansdale also has more land for expansion.	3/8/2026 11:41 PM
52	I don’t know enough about all of the schools and communities to provide a cogent response.	3/8/2026 11:38 PM
53	I dont like it and it will effect us due to there not being any schools close by if closed down. We have built a strong connection with these schools and had 4 students go through woodridge, miller grove middle and miller grove high school to graduate. With us having 2 more children trying to follow in their siblings paths. It would be devasting to know the schools they are currently in and attending and had plans to go to would be closing.	3/8/2026 11:37 PM
54	I think it should be cluster specific.	3/8/2026 11:35 PM
55	The proposed consolidation raises concerns about capacity, long-term enrollment trends, and neighborhood infrastructure. Henderson Mill Elementary is already operating above 100% capacity, while Hawthorne Elementary is only slightly below capacity and serves a neighborhood that continues to see increasing numbers of young families moving in. Based on current trends, it is reasonable to expect enrollment at Hawthorne to grow in the coming years. Expanding Hawthorne to absorb additional students from school closures could quickly push the school beyond its intended capacity and may create unintended consequences for the surrounding neighborhood. The school sits within a residential area that already experiences significant congestion during arrival and dismissal. Increasing enrollment further would likely exacerbate traffic, safety concerns for students walking or biking, and overall strain on local streets that were not designed to handle substantially higher school traffic volumes. Given these factors, it would be helpful for the district to provide more detailed projections of enrollment growth in the Hawthorne attendance zone and a clear plan for addressing traffic and infrastructure impacts if consolidation proceeds. Community members would benefit from understanding how the district plans to ensure that any consolidation decisions remain sustainable over the long term and do not simply shift overcrowding from one school to another.	3/8/2026 11:34 PM
56	.	3/8/2026 11:32 PM
57	1. I think that large elementary schools reduce a sense of community, reduce teachers and staff knowing children and families, and reduce individualized attention. 2. I am concerned that many of the schools being closed are in lower income areas and students will have to be on buses longer. This places an undue burden on groups by income (and race) and that is a form of historical racism. 3. Traffic and congestion will be worse if schools are consolidated. 4. These expansions require significant capital investment. Why not put those resources back into the local schools? 5. This process was started under Horton and is led by Sarita Smith who led a SAP in Evanston IL. The district is now insolvent. What evidence is there that this process will produce a successful outcome? 6. What is the criteria being used to close schools?	3/8/2026 11:31 PM
58	I understand your reasoning, but I need to know more about how this would be done.	3/8/2026 11:30 PM
59	It is disappointing to see Brockett on the closure list. Brockett ES has worked very hard to	3/8/2026 11:30 PM

	become the school they are today. There is an amazing community supporting the school. The staff know the children and the children feel at home. They have worked very hard to achieve IB authorization, and this would go away if Brockett is closed. As with many schools in the area, Brockett has an older building. However, with a 14-acre property, there is room for expansion while still having an excellent outdoor educational and recreational space. Additionally, there is some growth in the area, including three new townhome complexes. Brockett pulls from an economically and culturally diverse neighborhood. There is a lot of pride in the community around Brockett. Other schools in the Tucker cluster have already been rebuilt or slated for expansion. People wonder how these choices are made and if the income of the area residents has an impact on the schools selected for expansion.	
60	I think you are failing the kids if you think the solution to the low enrollment is creating large school clusters and closing neighborhood schools. Rather than do this consider asking why so many are not putting their children in DeKalb schools and what can draw them back.	3/8/2026 11:29 PM
61	It is concerning that so many consolidations are proposed; based on 17 years as a DCSD parent/guardian, I don't think DCSD can manage this much change and still address much-needed problems/projects, including the "modernization" of Druid Hills High. Also, for over 14 years, a dangerous field at Chamblee Middle that was placed on top of a construction debris field has not been repaired. The CMS principal is completely unengaged and does not care that CMS students and staff have to use a dangerous field for PE classes daily. This was evident in recent discussions involving the principal and the school's Education Foundation President. The DCSD Operations Chief has said parents have to work through the principal, who simply does not care and has done nothing meaningful or sustained to address the field's hazards in the five years he has been principal. So, it is hard for me to imagine DCSD closing / consolidating nearly 30 schools in an efficient manner when DCSD can't even fix a hazardous field. Current needs should be a priority; a pilot program that closes the schools in the poorest condition with the lowest enrollment should be prioritized. Lessons learned from the pilot program could then be applied to another set of schools. Schools that have enrollment approaching target goals and that are in good repair or undergoing renovations should not be the priority for the pilot because the pilot should seek to realize the greatest savings and the greatest benefits for the most affected students.	3/8/2026 11:29 PM
62	Based on the reasons given for the consolidations, they seem to be a good thing. However, there definitely needs to be further discussions.	3/8/2026 11:26 PM
63	Closing Oak Grove does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization. Enrollment is increasing. Additionally, our area is growing especially with recent developments and the new hospital (AMBH) being completed. Many young families are continuing to seek out homes in the Oak Grove school district because of its high performing academics but also its reputation of being one of the top rated schools in the district. Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization.	3/8/2026 11:24 PM
64	i was extremely concerned to my children’s school, Oak Grove Elementary, on this list. Oak Grove Elementary is a highly engaged and active school community. The school is operating near capacity and currently has more than 200 students on the waitlist, including over 100 rising kindergarteners, which clearly shows strong demand from families who want to attend. In addition, Oak Grove has exceptional parent and community participation through the PTA, foundation, and volunteer involvement that support teachers, programs, and student learning. This is not a passive school community—families are deeply invested and actively contribute to the success of the school and neighborhood. This school is more than a data point, it is the heart of the Oak Grove Community.	3/8/2026 11:23 PM
65	If a school is an IB school, that will not automatic transfer to the new ES.	3/8/2026 11:22 PM
66	Consolidation could work better	3/8/2026 11:20 PM
67	Well, I understand the reason for the consolidations some of the schools mentioned I don’t agree with.	3/8/2026 11:19 PM
68	I am not in support. Midvale Elementary offers one of the only IB programs in the district that feeds up to an IB middle school and its smaller size means the teachers know the students well, students can and do walk to school and the school is a fixture of the neighborhood and community. Academic scores are rising there compared to neighboring schools and an addition/renovation was just completed. Bigger schools would likely encourage even more	3/8/2026 11:18 PM

	families to send their children to private schools, which the district cannot afford. I think the district should consider reasoning with fewer school closures rather than closing so many schools while spending massive amounts of money on new or expanded facilities.	
69	The closure of 27 schools is excessive, particularly since the majority of them are located in South DeKalb.	3/8/2026 11:18 PM
70	The proposed consolidation raises concerns about capacity, long-term enrollment trends, and neighborhood infrastructure. Henderson Mill Elementary is already operating above 100% capacity, while Hawthorne Elementary is only slightly below capacity and serves a neighborhood that continues to see increasing numbers of young families moving in. Based on current trends, it is reasonable to expect enrollment at Hawthorne to grow in the coming years. Expanding Hawthorne to absorb additional students from school closures could quickly push the school beyond its intended capacity and may create unintended consequences for the surrounding neighborhood. The school sits within a residential area that already experiences significant congestion during arrival and dismissal. Increasing enrollment further would likely exacerbate traffic, safety concerns for students walking or biking, and overall strain on local streets that were not designed to handle substantially higher school traffic volumes. Given these factors, it would be helpful for the district to provide more detailed projections of enrollment growth in the Hawthorne attendance zone and a clear plan for addressing traffic and infrastructure impacts if consolidation proceeds. Community members would benefit from understanding how the district plans to ensure that any consolidation decisions remain sustainable over the long term and do not simply shift overcrowding from one school to another.	3/8/2026 11:18 PM
71	My observation of the provided information on the consolidation is that the targeted schools are all listed on the south end of the map. Schools such as Redan Elementary's enrollment currently falls a little short of 60 students and that number is improving. Redan also falls on the greater than 450 mark for fully funded functioning schools. Redan Elementary currently offers specific special needs and academic support services that some elementary schools do not offer. The issue that I have as a parent is that closing Redan Elementary in the consolidation takes away one of the only schools in our neighborhood that offers the quality services and academic needs of students who are not enrolled in a magnet school such as Marbut Elementary. Especially special needs student services. The proposal offers funding to schools on the north end of the map that are not need of funding but continue to receive funds while fully functional schools on the south end are being neglected. The proposal forces parents to bus their children further away outside of their communities utilizing a failed transportation system that has a shortage of drivers. How can parents trust sending their children out further away to north end schools or further away within the county and may not have a way to get to them in an emergency situation or extra curricular activities? Especially those without reliable transportation? Children need stability and the district continues to disrupt that which affects the success of academics because most of the time is spent on adjusting and behaviors. That's also a problem that will occur when combining multiple communities together with a merge. This creates chaos and instability and takes away from academics because adjusting takes time. Lithonia middle is the old Lithonia High School and it's entirely too big for the students to function. The children have too much space to engage in inappropriate behaviors and there isn't enough staff coverage to govern over the students. Moving them to an even bigger school such as the new Lithonia high will only cause this issues to increase. The children and staff are still adjusting to changes made just a short time ago. This is why the school system is having problems. There is no stability and funding is being placed into the wrong endeavors. The district should consider the schools that do not offer all functioning services needed and fall below the 450 mark to consider elevation first. If consolidation is needed, merge them into the schools that are providing all academic and special needs services.	3/8/2026 11:18 PM
72	A change this massive is being rushed and is based on inaccurate data, flawed reasoning, especially during a time when community trust in current education administration is extremely low. Evansdale is only a few students shy of capacity, on a very large footprint of land with plenty of room to grow/adjust, multiple parking lots, good traffic flow off a main traffic artery-not causing any issues with pick up or drop off-with plenty of attendance able to walk to school. The bussing we do have is already stressed - and moving out of here and consolidating into massive elementary schools adds even more stress on the bussing -or traffic flow of Livsey right on a now 1 lane chamblee tucker or pleasantdale which is heading right to 285. Evansdale also has the Dual Language program which flows into Henderson-which is well established and does draw into this area. The plan suggested does not provide enough information for the community to make informed replies - and this on a very truncated timetable that is vastly	3/8/2026 11:14 PM

	unreasonable for such a large undertaking. The ability of the team to review these responses and process it and take the community feedback under consideration is not possible in this timeframe. More information needs to be provided to the communities and more time for responses, and developing reasonable changes to the plans based on community input. This entire process needs to slow down, and Evansdale should not be part of the consideration for closure.	
73	It seems the consolidations have no consideration for location/community/etc. You could redefine schools attendance zones first. Also, some of the locations outlined as new "mega" elementaries are in horrible locations, impacts to traffic, neighborhoods, etc would cause a lot of unnecessary grief.	3/8/2026 11:13 PM
74	The scenarios presented deem closure as the best option for some of the highest performing, most well attended, and highly supported community based schools in the county. This goes against every stated goal of the SAP.	3/8/2026 11:13 PM
75	I'm do not believe in shutting down the schools and changing them.	3/8/2026 11:12 PM
76	Please no. We have a great school backed by a wonderful community. No need to upset an already quality learning environment.	3/8/2026 11:09 PM
77	I understand the need to consolidate, but I think it is too stressful and vague to present only “building” scenarios. For parents to provide real feedback and be less anxious they need to understand where there child would go to school (need to incorporates boundaries and explain reassignments at same time). My schools are not on the list for closure or expansion but I wonder how our boundaries might change.	3/8/2026 11:08 PM
78	I believe scenarios with the fewest transitions for students is best. A K-8 model is best.	3/8/2026 11:08 PM
79	Consolidations only make sense if the schools that would be consolidated are underutilized. The current proposal has Oak Grove Elementary slated for closure and absorbed by sagamore and briar lake. Oak Grove is already at 89% utilization and the 26-27 school year is projected to be 96%. sagamore is at 91% and Briarlake is at 73%. Closing down a highly utilized school like Oak Grove would require massive expansion costs at Sagamore (already highly utilized at 91%) and Briarlake. With the recent development of the Arthur Blank Children’s Hospital, expansions for Emory Hospital and the redevelopment of mall area, the Oak Grove area will likely see an increase in population further stressing the consolidation process if Oak Grove is closed. Therefore, I do not believe Oak Grove should be closed.	3/8/2026 11:05 PM
80	Given the limited resources and inadequate building facilities, I support closure of Ashford Park Elementary with rezoning to John Lewis Elementary. I advocate for continuation on the path to Chamblee MS and HS.	3/8/2026 11:05 PM
81	I want to express my deep concern regarding the proposed closure of Midvale Elementary School. As a parent and community member, I urge you to reconsider this decision. Midvale is not a struggling school in need of restructuring—it is a thriving, high-performing school that represents years of intentional effort, community investment, and academic success. Midvale currently holds the highest CCRPI score in the Tucker cluster and one of only three IB programs in all of DCSD. Families are actively seeking admission, as evidenced by our school choice waitlist. Parents are choosing Midvale because of its strong academic outcomes, its close-knit community environment, and its commitment to the International Baccalaureate Primary Years Programme (PYP). Closing a school that families are actively trying to access sends a troubling message about how success is valued within our district. Because IB authorization is granted to a specific school site, you can’t just relocate an IB program–closing Midvale would terminate its PYP designation. Beyond just our community, closing Midvale would also slash the district’s K-5 IB program offerings by 30%. The District has also recently paid for important facility upgrades. Increased security at the entrance, updated bathrooms and ADA compliance, and the playground renovation a few years ago. Likewise, the PTO has used donations from the community to enhance the playground, media center, and auditorium. These investments should be built upon. Finally, the push toward creating larger consolidated schools, such as Smoke Rise Elementary School, raises concerns about long-term enrollment trends. Families consistently demonstrate a preference for strong, community-centered schools at the elementary level. Moving away from that model may contribute to continued enrollment decline as families seek alternatives that better meet their needs. Knowing that our area offers many private and charter options, that’s a risk we shouldn’t take. Midvale represents more than a building. It represents a community that can build a successful model. Rather than extinguishing that success, I encourage the district to consider how Midvale’s	3/8/2026 11:05 PM

	strengths could be shared and replicated in other communities. If we have a school that thrives academically, attracts new families, and engages the community, shouldn't we be asking how to expand that model rather than eliminate it? Closing Midvale would not advance equity or academic excellence, nor can it guarantee sustainably increased enrollment at a neighboring school. I respectfully urge you to preserve Midvale Elementary and instead explore ways to build upon its proven success.	
82	The scenarios are understandable, but it is not focusing on education. If a class is down size by few students it is easier for children to learn and be focus and more productive. This goes for the teachers as well.	3/8/2026 11:05 PM
83	Planning the consolidations as a tiered or phased schedule will allow us to pace our decisions adequately and adjust accordingly. This allows us to learn from our own mistakes (and wins) as we roll out the consolidations over time from highest to lowest needs-priority. Transparency, complete data information, and justifiable decisions based on evidence is what will create buy-in from the communities as we work to stabilize enrollment.	3/8/2026 11:05 PM
84	As a society, we are loosing our communities and connections. The LAST thing we need is huge mega schools to wear house our children. It will destroy communities, neighborhoods and childhoods.	3/8/2026 11:03 PM
85	They are based on flawed data so the whole thing should be paused.	3/8/2026 11:02 PM
86	Evansdale elementary should not be closed. It is the center of this community and was the elementary school for both of my middle school children. In addition moving these kids out of the lakeside cluster will cause unneeded disruption to the community and learning of the kids. There is room to grow and expand Evansdale on its current lot. Do not punish tomorrow's students for the previous mismanagement of school system resources.	3/8/2026 11:01 PM
87	The building and/or property currently housing Cary Reynolds ES (former Nancy Creek) should be used to help overcrowding at Montgomery Elementary. Over the years past several years, it has been used as temporary space for other clusters as Montgomery has continued to deal with overcrowding. Before that is served as the location for the Kittredge magnet program. The building/property should be purposed for the benefit of the families/students that live in the area. The current scenario calls for expanding Montgomery. I would like to know what that would entail before providing input. It's difficult to give feedback on this scenario without knowing what the eventual impacts on school assignments would be. I hope this critical piece of information will be provided in the next step.	3/8/2026 10:57 PM
88	I strongly disagree with the proposals to close high performing schools as a part of this. The schools significantly under capacity make sense to close and consolidate, but closing schools such as Oak Grove, Vanderlyn, or Ashford Park makes no sense.	3/8/2026 10:56 PM
89	Oak Grove is not an underutilized school. Not only is it at 89% utilization at 447 students currently enrolled out of our 504 student capacity, but our next school year 2026-2027 is projected at 487 students or 96%. The school has had a continuous increases since the drop off that many schools district wide saw during the pandemic. Based on considerable economic investment in the nearby area, with Children's Hospital, ongoing Emory hospital expansions, and the redevelopment of North DeKalb Mall, it is reasonable to project that people are moving into the area that Oak Grove serves and that future student population will increase. Oak Grove is one of the district's high performing schools with high test scores and in the top 10 of the district's readiness score. Between Oak Grove Elementary's high utilization (above the district's target utilization of 88%) and its high performance, the school should not be in the closure list.	3/8/2026 10:56 PM
90	My initial reaction is fear and mistrust. As a teacher, I have had multiple issues with paychecks, my own included. The previous superintendent organized many expensive school visits with multiple county office staff with a large HR expense and no value added. So many poor decisions and so much unnecessary spending, I do not believe the district is capable of making such drastic changes successfully. Achievement has decreased at the elementary level. Too many students do not attend Dekalb because of the leadership and history. The priority should be cleaning house at the AIC first and putting academics first. Build trust. These consolidations are too drastic. If you must, consider Evansdale for expansion rather than closure. The 10 acres provide a larger lot than other schools recommended for expansion. The site can accommodate more parking and building additions, and it can accommodate increased traffic with a continuous flow around the block, not on a major road such as Henderson Mill Rd or Chamblee Tucker.	3/8/2026 10:51 PM

91	I am have serious concerns about the proposed closure of Midvale Elementary School (and others in the Tucker cluster) as part of the district's initial consolidation scenario. When this proposal was first introduced, it was framed as the beginning of a community input process rather than a predetermined outcome. However, the current direction of the discussion makes many families feel that decisions may already be made. This lack of transparency undermines trust and discourages meaningful engagement from families who want to participate in good faith. There are several reasons why closing Midvale would not serve the best interests of students or the Tucker community. First, Midvale plays an important role in the district's International Baccalaureate (IB) feeder pattern. It is one of only three elementary IB programs in the district and currently holds the highest CCRPI score in the Tucker cluster. Families actively seek admission to Midvale because of its strong academic outcomes and its IB Primary Years Programme. Because IB authorization is granted to a specific school site, closing Midvale would effectively eliminate this program and reduce the district's K–5 IB offerings by approximately 30%. Second, Midvale is highly walkable for many Tucker families. Relocating students to Livsey Elementary would eliminate that accessibility for many households, increase car and bus traffic on already busy roads, lengthen commute times for young children, and increase daily transportation costs for the district. Capacity is also a major concern. Livsey reportedly has capacity for approximately 300 students, while Midvale currently serves around 430 students. This figure does not account for students from Brockett Elementary, which is also proposed for closure. Consolidating these populations raises serious questions about where students would actually be accommodated. Livsey already relies on trailers near a busy road, which raises safety and infrastructure concerns. In contrast, Midvale's campus has significant room for expansion if needed, including a large field behind the building. The district has also recently invested in facility improvements such as updated security, ADA-compliant bathrooms, and playground upgrades, in addition to enhancements funded by the PTO. Closing the school shortly after these investments would waste both public funds and community contributions. More broadly, I question the assumption that consolidating elementary schools into much larger buildings is the most educationally sound approach. Research and family experience consistently show that younger children benefit from smaller, community-centered school environments where they are known by teachers and staff. Larger schools can easily become more impersonal environments that prioritize scale and efficiency over individual student needs. Finally, this proposal must be considered in the broader context of public education in our district. At a time when charter schools, private school vouchers, and other alternatives are expanding, consolidating neighborhood schools sends a mixed message and risks further eroding trust in public education. Families choose public schools when they feel those schools are stable, community-centered, and responsive to their needs. Midvale is not a struggling school in need of restructuring. It is a thriving, high-performing school that families actively seek out. Rather than closing it, the district should consider how the strengths of the Midvale model—strong academics, IB programming, and community engagement—can be supported and replicated elsewhere. I urge the district to reconsider the proposed closure of Midvale Elementary and to provide clearer data, transparent communication, and meaningful opportunities for community input before moving forward with consolidation decisions.	3/8/2026 10:49 PM
92	Oak Grove Elementary is walkable from numerous directions in this neighborhood. People have bought homes in the neighborhood because their children can safely walk to and from school. Isn't that what other communities are working hard to accomplish? It's one of the things people love about the area. Unlike Briarlake Elementary which is bordered by a Highway (Lavista), Oak Grove is accessible from numerous streets with sidewalks.	3/8/2026 10:48 PM
93	I strongly oppose the proposed consolidation scenario that would close Evansdale Elementary School. Evansdale is uniquely positioned to serve our community and should be considered a long-term asset rather than a closure candidate. First, Evansdale's physical site offers clear advantages. The school sits on a comparatively larger lot that allows for future expansion, and it already has two parking lots plus available street parking. These features provide flexibility that many nearby schools lack and make Evansdale far better suited to handle enrollment growth than schools with constrained sites. Second, Evansdale hosts a French immersion program that attracts families to the community. This program is a major draw for enrollment and continuity, particularly because it feeds directly into the French program at Henderson Middle School. Disrupting that pathway by closing Evansdale or moving students outside the cluster would undermine a program that already works well and strengthens the local public school option. Third, Evansdale has stronger traffic capacity and circulation compared with nearby schools such as Livsey Elementary School or Hawthorne Elementary School, where traffic congestion is already a concern. Consolidating students into sites with weaker traffic infrastructure would create daily safety and logistical issues for families and staff. Finally, I	3/8/2026 10:47 PM

	have significant concerns about the transparency and credibility of the process used to develop these proposals. There has been a lack of clarity about the data and assumptions behind the scenarios. Given that the original facilities planning work was developed under leadership that is now associated with fraud investigations, there is understandable community distrust. Major decisions like school closures require a process that is transparent, data-driven, and broadly trusted.	
94	Evansdale n Ed's to be renovated and expanded. It is a large parcel and serves a community that has many children. The neighborhood around it attracts young growing families.	3/8/2026 10:47 PM
95	Surprised but understand the need to make adjustments. I'm Optimistic we can find a solution by which apes stays in the Chamblee HS cluster and we keep the community in tact as much as possible.	3/8/2026 10:46 PM
96	As a former Oak Grove Eagle and a parent of a second grader and a pre-K student currently attending Oak Grove Elementary School, I strongly oppose the proposed consolidation or closure of the school. Oak Grove is not only a high-performing school, it is a cornerstone of our community and a multigenerational institution—my family attended this school, as did my husband and my father-in-law, and now my children do as well. My closest friends are those I built lifelong relationships with starting at Oak Grove Elementary back in the 90s. Many classrooms at Oak Grove have two teachers to provide additional support for students with disabilities, including those with IEPs or 504 plans, helping every student reach their full potential. Families often choose to move—or move back—into this community specifically so their children can attend Oak Grove, which is widely recognized as a highly sought-after school. Numerous teachers, including the current principal, have been on staff at Oak Grove for over 20–30 years. That says something about the culture, environment, likability, and stability of the community, the school, and all those who support it. Oak Grove should serve as a model for other schools in the district, demonstrating how to successfully support students and families. From a data perspective, Oak Grove already exceeds the district's 88% utilization target (currently 89%, projected ~96% in 2026–27) and has experienced four consecutive years of enrollment growth. Closing a school that is already near or above capacity would primarily redistribute students to Sagamore Hills Elementary School and Briarlake Elementary School, creating overcrowding and requiring major boundary adjustments. Briarlake has limited capacity to absorb additional students, and Sagamore Hills is already operating at ~91% utilization. The Lakeside cluster is located in a high-growth corridor, adjacent to major expansions by Emory University and Children's Healthcare of Atlanta. Enrollment projections should reflect these developments and post-pandemic recovery trends. Closing Oak Grove now could eliminate critical capacity needed to serve these families in the near future. A phased, data-driven approach targeting schools with true underutilization would be far more responsible. Oak Grove Elementary is thriving, and it should remain open to continue supporting students, families, and the community while serving as a model for excellence in the district.	3/8/2026 10:46 PM
97	Na	3/8/2026 10:45 PM
98	I am strongly concerned about the proposed closure of Midvale ES and the overall approach to the Student Assignment Project (SAP). Factors considering school performance and student outcomes are listed as a non-purpose of SAP throughout the FAQs outlined on the SAP website. Removing considerations of the quality of work being performed by staff and/or students at each individual school within DCSD ignores a critical factor in determining the viability and/or value of a school. There is far more to a school than facility considerations. Midvale is one of the few IB programs in DCSD and has the highest CCRPI scores in the Tucker cluster. Closing or repurposing high performing schools like Midvale sends the wrong districtwide message. If facilities are the primary reason why Midvale is closing over other elementary schools within the Tucker cluster. It seems very odd that Livsey ES with the lowest building adequacy score and capacity in both the Tucker cluster and the entire school district is considered as a strong facility to continue to operate within DCSD's real estate portfolio. Given Livsey ES doesn't meet many of the key factors considered when identifying a school for closure or repurposing, DCSD needs to better articulate the school-specific rationale on why certain elementary schools were identified for closure / repurposing and others were selected to remain open. Finally, the overall process for engaging and explaining SAP to the broader DCSD community has been poorly executed. The process is being driven by an outside consultant rather than the DCSD administrative leadership and Board. HPM is a construction company with a background in K – 12 facilities. It is understandable why DCSD engaged them to produce the facilities assessment data. HPM's partnership should stop at preparing and addressing questions about facilities data. They should not be the face of	3/8/2026 10:44 PM

	feedback sessions and/or roll-out of scenarios. HPM will move on to their next client after this project and will not have long-term accountability to DeKalb County residents. Therefore, it is critical for the long-term stakeholders of DCSD who will be here after HPM's contract expires to own and communicate this process. I respectfully urge you to remove Midvale ES from the proposed school closure or repurposing list in the round 2 scenarios.	
99	As a parent in the Oak Grove community, I'm trying to understand how the proposed closure of our school aligns with the district's stated goal of addressing underutilization. The district has said that the objective of the Student Assignment Plan is to bring elementary schools to about 88% utilization. Oak Grove is already above that target. As of October 2025, Oak Grove has 447 students out of a capacity of 504, which is about 89% utilization. Projections for the 2026–27 school year estimate 487 students, which would bring the school to around 96% utilization. From a parent's perspective, it is difficult to understand how a school that already meets — and is projected to exceed — the district's utilization goal would be considered for closure. Oak Grove's enrollment has also been increasing. The school has seen enrollment grow for four consecutive years, which suggests a sustained trend rather than a temporary fluctuation. At the current pace, Oak Grove could reach or exceed full capacity within the next two to three years. In that context, closing a school that is already growing and approaching full utilization raises real questions about whether the data being used reflects the current trajectory of the community. There is also the practical question of where Oak Grove students would go if the school were closed. The two schools most likely to absorb those students are Sagamore Hills and Briarlake. Sagamore Hills currently has 413 students out of a capacity of 456, which puts it at about 91% utilization and leaves only around 43 available seats. Briarlake has 350 students out of a capacity of 480, which is about 73% utilization and leaves roughly 130 available seats. Even combined, these schools do not appear to have the capacity to absorb Oak Grove's 447 students without major boundary changes, overcrowding, or facility expansion. At the same time, Briarlake's current utilization does not necessarily reflect the residential growth already underway in the surrounding corridor. Within a few miles of these schools, several large developments are planned or under construction. The Lulah Hills redevelopment at the former North DeKalb Mall site includes up to 1,800 residential units and more than $850 million in investment, with the first 303 multifamily units expected beginning in late 2027. The Corporate Square and Northbend redevelopment includes roughly 2,000 residential units and about $605 million in investment, with Phase 1 alone including 390 apartments and 142 townhomes. Even Phase 1 activity — about 835 units — could conservatively generate between 55 and 145 additional elementary students over time. If Briarlake were to gain even 50 additional students, its utilization would rise to roughly 83%. With 100 additional students, it would approach about 90% utilization. Continued development could eventually bring Briarlake closer to 90–95% utilization. This estimate also does not include additional housing demand connected to the continued expansion of Children's Healthcare of Atlanta and Emory, both of which are major employment centers drawing families into the area. More broadly, the Druid Hills and Clifton corridor has experienced significant institutional investment. The area has seen more than $2.5 billion in investment, including the $1.5 billion Arthur M. Blank Hospital campus, thousands of employees including about 1,000 new jobs, the $87.7 million Emory Heart and Vascular expansion, and continued hospital and research growth at Emory. This suggests the area is not experiencing decline but rather sustained growth that is likely to continue bringing families into the community. Another important part of Oak Grove's community is the support the school provides to students with Individualized Education Programs (IEPs). A meaningful percentage of Oak Grove students receive special education services, and many families have chosen or remained at the school because of the strong support systems and relationships that have been built there. Teachers, staff, and specialists know these students well and work closely with families to meet their needs. For students with IEPs, stability and familiarity with their support teams are especially important. Disrupting those established relationships through a school closure could be particularly challenging for these students and their families. Another concern many parents have is whether enrollment projections may rely too heavily on pandemic-era data from 2020 through 2022. Those years created unusual enrollment patterns in many school systems and may not accurately represent current trends. It may be helpful for projections to reflect the more recent recovery years as well as the housing and economic development already underway in this corridor. Finally, Oak Grove is not only meeting utilization targets — it is also one of the highest-performing schools in the review group. Among the 26 schools being considered, Oak Grove ranks fourth in Content Mastery with a score of 94.2 and second in Readiness with a score of 95.3. From a parent's perspective, it is difficult to reconcile how closing a school that exceeds utilization targets, demonstrates sustained enrollment growth, supports a diverse group of learners, and performs strongly academically would meaningfully address the district's utilization challenge. For many families in the community, Oak Grove is a	3/8/2026 10:43 PM

school that is working — academically, socially, and structurally. That is why the possibility of closing it is so concerning to so many of us. If you'd like, I can also make a much stronger closing paragraph that tends to land very well with school boards (it reframes Oak Grove as part of the district's success story rather than a problem to solve). alos talk how theres a big possobilty we will have wvne less tham 90k if oakgrove is to close i blebe theyll go public so many oarenrs and famialies moved espaoclly for oak grove. the commnuty, the tpegthenress and its qulity Here is your full statement with that concern integrated, written naturally in a parent voice and keeping your tone thoughtful but clear. I added the point about families leaving the district in a way that sounds reasonable and grounded rather than confrontational. As a parent in the Oak Grove community, I'm trying to understand how the proposed closure of our school aligns with the district's stated goal of addressing underutilization. The district has said that the objective of the Student Assignment Plan is to bring elementary schools to about 88% utilization. Oak Grove is already above that target. As of October 2025, Oak Grove has 447 students out of a capacity of 504, which is about 89% utilization. Projections for the 2026–27 school year estimate 487 students, which would bring the school to around 96% utilization. From a parent's perspective, it is difficult to understand how a school that already meets — and is projected to exceed — the district's utilization goal would be considered for closure. Oak Grove's enrollment has also been increasing. The school has seen enrollment grow for four consecutive years, which suggests a sustained trend rather than a temporary fluctuation. At the current pace, Oak Grove could reach or exceed full capacity within the next two to three years. In that context, closing a school that is already growing and approaching full utilization raises real questions about whether the data being used reflects the current trajectory of the community. There is also the practical question of where Oak Grove students would go if the school were closed. The two schools most likely to absorb those students are Sagamore Hills and Briarlake. Sagamore Hills currently has 413 students out of a capacity of 456, which puts it at about 91% utilization and leaves only around 43 available seats. Briarlake has 350 students out of a capacity of 480, which is about 73% utilization and leaves roughly 130 available seats. Even combined, these schools do not appear to have the capacity to absorb Oak Grove's 447 students without major boundary changes, overcrowding, or facility expansion. At the same time, Briarlake's current utilization does not necessarily reflect the residential growth already underway in the surrounding corridor. Within a few miles of these schools, several large developments are planned or under construction. The Lulah Hills redevelopment at the former North DeKalb Mall site includes up to 1,800 residential units and more than $850 million in investment, with the first 303 multifamily units expected beginning in late 2027. The Corporate Square and Northbend redevelopment includes roughly 2,000 residential units and about $605 million in investment, with Phase 1 alone including 390 apartments and 142 townhomes. Even Phase 1 activity — about 835 units — could conservatively generate between 55 and 145 additional elementary students over time. If Briarlake were to gain even 50 additional students, its utilization would rise to roughly 83%. With 100 additional students, it would approach about 90% utilization. Continued development could eventually bring Briarlake closer to 90–95% utilization. This estimate also does not include additional housing demand connected to the continued expansion of Children's Healthcare of Atlanta and Emory, both of which are major employment centers drawing families into the area. More broadly, the Druid Hills and Clifton corridor has experienced significant institutional investment. The area has seen more than $2.5 billion in investment, including the $1.5 billion Arthur M. Blank Hospital campus, thousands of employees including about 1,000 new jobs, the $87.7 million Emory Heart and Vascular expansion, and continued hospital and research growth at Emory. This suggests the area is not experiencing decline but rather sustained growth that is likely to continue bringing families into the community. Another important part of Oak Grove's community is the support the school provides to students with Individualized Education Programs (IEPs). A meaningful percentage of Oak Grove students receive special education services, and many families have chosen or remained at the school because of the strong support systems and relationships that have been built there. Teachers, staff, and specialists know these students well and work closely with families to meet their needs. For students with IEPs, stability and familiarity with their support teams are especially important. Disrupting those established relationships through a school closure could be particularly challenging for these students and their families. Another concern many parents have is whether enrollment projections may rely too heavily on pandemic-era data from 2020 through 2022. Those years created unusual enrollment patterns in many school systems and may not accurately represent current trends. It may be helpful for projections to reflect the more recent recovery years as well as the housing and economic development already underway in this corridor. Finally, Oak Grove is not only meeting utilization targets — it is also one of the highest-performing schools in the review group. Among the 26 schools being considered, Oak Grove ranks fourth in Content Mastery with a score of 94.2 and second in

	Readiness with a score of 95.3. Oak Grove is a school where families feel connected, where teachers know the students, and where the community has built something strong together. For many families, Oak Grove was a major reason they chose to live in this area. Families moved here specifically for the school — for its quality, its community, and the sense of belonging it creates. If Oak Grove were to close, there is a real possibility that some families would consider leaving the district or moving to private schools. At a time when enrollment across the district is already a concern, losing families who chose DeKalb specifically because of schools like Oak Grove could have unintended consequences. For many of us in the community, Oak Grove is a school that is working — academically, socially, and structurally. That is why the possibility of closing it is so concerning to so many families.	
100	It’s hard to imagine Oak Grove going away. It’s the heart of the community. My kids are still very young but I want them to go there like me in a few years. They can walk to school! That’s the way a community should be and the education there and teachers are outstanding.	3/8/2026 10:41 PM
101	Thrilled DCSD is considering consolidations. Desperately needed for past 20 yrs because there are so many schools not earning state funding due to empty seats. I do not understand how 27 schools were picked when the district has not decided what model(s) they want to use or what magnet, theme, specialty schools they want. It puts the cart before the horse. I am shocked that Livsey which is tiny would be kept but schools like Midvale that jsut had renovations/elevator put in would be closed. Similarly, I don't understand why Hawthorne, tucked in a neighborhood would stay open but Henderson Mill - on a main road - would be closed. Where would funding come from to add additional space at several elementary schools to accomodate consolidation of others - similarly same question for middle/high school expansions. Will the district finally sell some of the many, many properties? We have land on N. Decatur, N. Druid Hills, the old Heritage Elem. and so many others (which rasises the question: why purchase a bldg on N'lake Parkway???) Vacant buidings will not be good for any community and there aren't enough "district offices" for 27 buildings. With declined enrollment, there should be a corresponding decline in central admin staff.	3/8/2026 10:37 PM
102	Announcing closure of facilities without having solidified plans for rezoning doesn’t make sense.	3/8/2026 10:36 PM
103	I am disappointed that our neighborhood school, Ashford Park Elementary, is on the list of schools to be closed. However, it is most important for me four our neighborhood and community to stay together.	3/8/2026 10:35 PM
104	Do not close Oak Grove Elementary Oak grove Elementary should remain K-5th	3/8/2026 10:34 PM
105	Any consolidation decisions must consider more than building utilization. As a teacher and a long time Brookhaven resident, I am concerned that consolidation discussions focus heavily on facilities while overlooking what is happening inside classrooms. Schools like Ashford Park represent years of strong academic performance and community investment. Major changes to schools that are currently working well should be approached very carefully because they create instability for families who have chosen to live in this area based on the strength of those schools. At the same time, I teach at John Robert Lewis Elementary School and see the challenges that occur when schools become heavily imbalanced. My classroom currently has 19 English learners out of 27 students. These students are capable and hardworking, but they require additional language support and instructional time. With only about 90 minutes of ESOL support during the day, meeting those needs becomes extremely difficult for one teacher. We need help! If consolidations are considered, they should be paired with a thoughtful plan to create balanced school populations, provide ADEQUATE staffing, and ensure that teachers have the resources needed to support students. Simply moving students between buildings will not address the deeper challenges schools are facing.	3/8/2026 10:34 PM
106	This is a high thriving community school with very high levels of parent involvement. Our children are thriving and my hope is the weight of this decision is being considered as it will majorly disrupt this community.	3/8/2026 10:33 PM
107	Oak Grove elementary does not meet the criteria for consolidation. I understand that it exceeds the minimum enrollment and will continue to grow.	3/8/2026 10:32 PM
108	Oak Grove does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3	3/8/2026 10:31 PM

	years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
109	These elementary schools are often the heart of a community. Many of my kids long term friendships began in elementary school and that was facilitated by their being able to easily connect with them after school and on weekends since we all lived close to the school.	3/8/2026 10:30 PM
110	Oak grove is already above the targeted utilization by the district with an expected enrollment of 96% next year. It is one of the highest ranking elementary schools in the nation with sustained enrollment growth over the last 4 years.	3/8/2026 10:30 PM
111	Oak Grove does not meet the stated objective of underutilization. Oak Grove is currently at 89% and estimated to climb to 96% for the 2026-27 school year.	3/8/2026 10:29 PM
112	I purchased my home here 1.5 years ago with intentions of my future children going to Evansdale given the proximity to my home and the glowing reviews my neighbors have had with their children attending over the years. I have heard that it is a better school, community and facilities than the others in question and believe if consolidation is necessary, we should consolidate into Evansdale.	3/8/2026 10:28 PM
113	Closing Oak Grove Elementary and consolidating students in neighboring Sagamore and Briarlake is a poor plan. Oak Grove continues to be a well functioning school for local families. It has above average utilization as well as above average student performance. Parent involvement is strong and it has a well funded foundation. Penalizing local students by removing such a well performing school is poor leadership from DCDS.	3/8/2026 10:28 PM
114	Consolidating is ok as long as the school system the students are moving to is on par with the education they are getting at Ashford Park and the Chamblee cluster. Also, the cluster would need to stay together so the students don't have to get used to a whole new environment to finish elementary school, then a new middle school. Children need structure, continued relationships and continuity to be able to thrive.	3/8/2026 10:27 PM
115	I wonder how some of these decisions have been made. Were things like the value of student success (reading proficiency scores for example) or building age or construction expenditures just made or planned considered? Were per pupil costs taken into account? I am troubled by some of the issues raised in a recent AJC series on the impending closures.	3/8/2026 10:26 PM
116	There are some parts that make sense - example, consolidating 2 neighboring schools at 50% capacity to a single school. Other parts of the plan make no sense and need additional information on student reassignment from schools that are closed. This causes fear and confusion	3/8/2026 10:24 PM

117	I do not agree with this at all. It appears you are looking to close public schools to create more facilities for private schools. You are also dismantling higher performing schools for no clear reason. These scenario all are economically and racially based as your spokesperson made very clear in repeatedly saying “schools on the north end” vs “schools on the south end” the south end based off your presentation clearly does not matter.	3/8/2026 10:24 PM
118	Closing and repurposing underutilized facilities is a financial necessity for Dekalb. I did not realize, as shown in the presentation, the funding differences of personnel based on enrollment. Knowing this strengthens my support of the changes.	3/8/2026 10:24 PM
119	The data collected to make the proposal on the initial facilities is inaccurate and short sighted to say the least. In the district in which I live, the elementary school that is proposed for closure has one of the higher utilization rates in the county and population growth trends do not seem to have been considered.	3/8/2026 10:24 PM
120	I believe consolidating would be a disservice to the teachers, students, and parents. The teachers may be overwhelmed with the increase in class sizes. The students would not benefit from enlarged class sizes.	3/8/2026 10:23 PM
121	I do not support the consolidation of the elementary school, specifically oak grove elementary. My sons were able to thrive in this school because it has lower than average teacher to child ratios. Also being able to attend close to home made my sons more supported, less stressed, and comforted by the environment. Consolidations will remove these protections for children at Oakgrove and nearby schools due to overcrowding and reductions in school resources.	3/8/2026 10:22 PM
122	I am submitting this feedback as a Dekalb resident of almost 40 years and proud graduate of Stone Mountain High School. I’ve seen a lot of changes over those 40 years and sadly most of them have not been for the better. I acknowledge the County’s current dilemma of having too many empty seats and their desire to consolidate and close schools. My greatest concern is that while closing schools may help the bottom line but it does nothing to address the core issue of failing schools. A crucial question is, are there so many empty seats because of population changes or because parents are choosing to send their children to private and charter schools. In the case of Ashford Park Elementary, we find a thriving school with a community that is eager to have their children enrolled there. We are so successful we have outgrown our school’s facilities and have reached the enrollment level you’ve stated is where elementary schools should be. So, to reward the incredible work of our administration, teachers, parents and students, you have recommended the County should close one of its most successful and highly desirable schools. Additionally, Ashford Park is centrally located in a growing community, removing the school would artificially create transportation hardships and cause overcrowding at our neighboring schools. The best path forward would be to add to the $26,000,000 already allocated for Ashford Park renovations and system upgrades and allow us to build a new school like so many elementary schools around us have done (Dresden, Doraville United and John Lewis). Our two priorities are maintaining the current Ashford Park community's trajectory within the Chamblee Cluster, feeding to Chamblee Middle and Chamblee High School, and keeping our attendance zone together as a thriving community. The Chamblee Cluster is a high-performing academic environment, scenarios affecting Ashford Park must also ensure continuity of academic standards and services, aligning students to schools and programs that can meet them where they are. The right solution is to lean into what is working so well and expand or rebuild our school. For these reasons, remove Ashford Park from the closure list.	3/8/2026 10:22 PM
123	Horrified that vanderlyn it considered for closure. This school should serve as a role model for other schools in the district. Smaller schools should be an option for families whose students need that for their learning to be accessible. My child could not thrive in be way she does in another bigger school and you’re destroying rather than adding resources to the school system.	3/8/2026 10:21 PM
124	I can’t begin to express how disappointed I am with your suggestion to close Oak Grove. Why would you choose to close an exemplary school with a building score higher than those nearby, just to send our children to a lesser school? The data published is incorrect, we have higher enrollment than posted, and we have over 100 students on our waitlist. I’m curious how adding on to two other schools would save money. And what would become of our building? Globe still sits empty.	3/8/2026 10:21 PM
125	While our 1st grade daughter has loved it and thrived in her first year at APES, I do realize that the facility will have to be addressed soon without kicking the can down the road. So now with the rest of the county’s needs being considered as well it is the obvious time to make hard	3/8/2026 10:20 PM

	decisions in our neighborhood too. With that being said closing APES should only be considered if there is a clear plan in place to keep a very high-performing school body and community together in a different facility. We support making a decision to move the student body of APES to John Lewis and shifting the boundary to keep us within the Chamblee cluster for middle and high school. This would keep the AP and Drew Valley community together and the school performance accelerating. After all, the majority of the families that have bought into the area in the last 5-10 years have done so because of the stellar reputation of the APES system and community and Dekalb County and the City of Brookhaven have financially benefitted mightily because of that.	
126	I understand the need for some school closures across the district due to current and projected under enrollment. I also understand that some schools are very old and have high maintenance costs. However, it is extremely difficult to give constructive feedback for Ashford Park closure (that's at double capacity) without a proposed plan of where students will be rerouted to. It is very important to me that these students and the community not be divided amongst multiple schools.	3/8/2026 10:19 PM
127	Oak Grove neighborhood is defined by the elementary school at its center. Parents walk their kids to school, teachers and staff are our neighbors. It is a close knit community that would change if the local ES closed. Buses would have to transport the youngest kids to another school in a different neighborhood.	3/8/2026 10:18 PM
128	Redan elementry	3/8/2026 10:17 PM
129	While consolidation aims for "efficiency," at Cross Keys, our primary hurdle is overcrowding. Any consolidation must be paired with immediate facility expansion. If we consolidate smaller neighboring elementary sites, the receiving buildings must be modernized to prevent the "portable city" effect. From a high school perspective, a consolidated pipeline only works if the secondary facilities (like ours) are finally sized to match that consolidated enrollment.	3/8/2026 10:16 PM
130	Oak Grove Elementary is the quintessential grade school. It is a safe space for students and it brings community together. The teaching is high quality and provided with heart and kindness. We often refer to OGE as our bubble which is more important than ever! The students are prepared for middle school and they learn to be good humans! It is an anchor to our community. The families and friends have all come from this important connection around our children. The parents are invested more than at most elementary schools and that benefits everyone.	3/8/2026 10:16 PM
131	I really like going to Oak Grove Elementary School. My mom and dad and grandpa all went to this school too. I am in multiple special reading groups, and my teachers have given me the tools and support I need to become a confident reader. Because of that, I have learned how to learn and feel proud of myself. I don't want to have to go to a different school. Moving to another school would make it hard to see my friends and get the help I need to keep learning. Oak Grove is a good school for me and for kids who need extra support to do their best. Please don't close Oak Grove. I want to stay here and keep learning.	3/8/2026 10:16 PM
132	First, I want to thank everyone who has put so much effort into this project so far. I am a former educator and former school district employee (not of DCSD), and I know how immensely challenging these jobs are, and that resources are always less than we would like. I also know that no one working on SAP would choose to put us in the position we are in, and that tough choices must be made in order to produce better outcomes for our students. I also understand that a phased and iterative process is necessary, and yet, I am also struggling to provide the best version of my feedback here, given several things. First, it would be really helpful to know exactly how this project is going to convert to better outcomes for all students. While I understand that some of that is unknown, based on the outcomes of the project, I (and I think many others), would appreciate more concrete details, such as, we imagine spending X% of funds saved to hire specialized support providers, X% to invest in teacher support and PD, X% to devote to more proactive building maintenance, whatever. I absolutely understand that there is a throughline here, but, to my knowledge, the throughline has not been explicitly stated. Unfortunately, money diverted from one problem does not always mean it is spent more wisely - I think the committee could win some advocates if all of this was more clear. On a related, but somewhat separate note, the first scenario presented was designed to talk exclusively about buildings, when your core service is to students, and by association, their families. This feels akin to asking us to give feedback on a new fleet of shipping vehicles for USPS, without any understanding of how that would affect routes, service delivery, etc. Buildings are one tool we have at our disposal to serve our students - and of course, so much of our financial resources must be devoted to them given their high cost - but there are so	3/8/2026 10:16 PM

	many other tools at our disposal to serve students well, and I am disappointed to see this discussed as if the pieces are not interconnected. What it means for students in a building to receive an excellent education is a combination of so many factors - the building itself is certainly one, but so is the caliber of the staff, the culture and community built among them, access to non-traditional learning opportunities provided, community involvement, and more. If we have better facilities but break down these other factors, we will ultimately lose. I hope that in the next scenario, there will be more attention devoted to the narrative around what, if any, building closures, would mean that would improve outcomes for all kids.	
133	Está en un buen lugar	3/8/2026 10:15 PM
134	Consolidating will potentially mess up school zoning for middle and high schools and also make commutes more difficult. It will be difficult to add schools back in the future if enrollment increases. I want the entire Evansdale school zone to remain in the Lakeside Highschool zone even if Evansdale is closed.	3/8/2026 10:15 PM
135	I strongly oppose any scenario that would close or consolidate Ashford Park Elementary. Ashford Park Elementary is the heart of a thriving and highly engaged community. Families do not attend Ashford Park by default. They actively choose it. Our school consistently posts some of the highest academic performance results in the area, reflecting the strength of our teachers, leadership, and deeply involved parent base. From a capacity standpoint, Ashford Park does not reflect the underutilization challenges cited in the district's broader analysis. We currently operate at approximately 180 percent utilization. These numbers demonstrate sustained and growing demand. Closing or consolidating a school that is high performing, nearly at capacity, and in strong demand would undermine one of the district's most successful community school models. Ashford Park benefits from exceptional volunteer engagement through our PTA, with parents contributing significant time and financial support. This partnership strengthens student outcomes and reduces strain on district resources. If the goal of the Student Assignment Project is to improve resource alignment, academic quality, and long term sustainability, Ashford Park should be strengthened, not disrupted. I urge the district to reconsider any scenario that negatively impacts Ashford Park Elementary and instead prioritize solutions that address true underutilization while preserving high performing, in demand schools that families overwhelmingly support.	3/8/2026 10:15 PM
136	Vanderlyn cannot be closed. You can not relocate a community with decades of investment it a s school and expect that it can be rebuilt somewhere else. We prioritized a SMALL school over access go other resources and you can not close the top performing school in the district. Tearing down one quality school will not make another school better.	3/8/2026 10:11 PM
137	I strongly disagree with closing schools currently near or above capacity- especially neighborhood schools that have created strong community ties over several decades. In particular, my child attended Evansdale Elementary. It exists on a large lot- much larger than some of the schools currently listed to remain open and expand. The extra land also includes a large field for exercise and athletics, two playgrounds, a nature trail, and multiple parking lots. The grounds could easily accommodate an addition while maintaining parking and opportunities for physical activity. The location can manage increased traffic given that it occupies two sides of a large neighborhood block. Enrollment at Evansdale is projected to increase to more than 600 in the next 4 years. In addition, Evansdale has a successful and highly sought after French immersion program which is unique to the Lakeside cluster. The French teachers at Evansdale, Henderson Middle, and Lakeside High have chosen to live in these neighborhoods due to this specific opportunity. In order to maintain a strong French immersion program, keeping this opportunity within the Lakeside cluster is imperative.	3/8/2026 10:10 PM
138	Pk-6th/7th-12th	3/8/2026 10:07 PM
139	I am very concerned with the initial facilities scenario and how it was presented to the citizens of Dekalb Co. My major concern is that is creates a situation where the school board will separate our community with zero regard for our neighborhood. Schools create a community and our community of Ashford Park Elementary School should be the example for what a community is to the entire county/metro Atlanta area.	3/8/2026 10:06 PM
140	I strongly and unequivocally oppose any facilities plan that removes Hawthorne Elementary School from the Lakeside Cluster. Hawthorne must remain in the Lakeside Cluster. Any proposal that shifts Hawthorne students across I 85 or into another cluster is fundamentally unsafe, geographically illogical, and educationally unsound. Hawthorne is physically and programmatically anchored in the Lakeside Cluster. It is wedged directly between Henderson Mill Middle School and Lakeside High School, creating a clear and intentional K–12 feeder	3/8/2026 10:05 PM

	pattern. Disrupting this alignment would fracture a coherent community pathway that families rely on and that the district has deliberately built. Hawthorne belongs in the Lakeside Cluster—geographically, operationally, and academically—and it must remain there. Reassigning Hawthorne students west of I 85 would force families into some of the most congested corridors in the county, including the areas surrounding Dresden Elementary School, St. Pius X High School, the I 85/Shallowford Road interchange, and the Shallowford/Briarcliff intersection near Globe Academy's upper campus. These are already failing traffic zones during school hours, where travel times of 30–45 minutes for a single mile are common. Routing Hawthorne families into these conditions is neither safe nor feasible and should be categorically rejected. The proposal to consolidate or overexpand within the Lakeside Cluster is especially troubling given that the cluster is currently stable and well utilized, with Hawthorne operating at approximately 88% capacity. At the same time, the district faces extreme overutilization elsewhere—Ashford Park (162%), Chesnut (128%), Montgomery (121%), and Livsey (123%)—where reliance on trailers has become normalized. Trailers are not a long-term solution; they are a costly stopgap. Removing these trailers through targeted capacity relief would generate meaningful savings and should be a district priority. Conversely, severe underutilization persists at Toney (33%), McNair (51%), Columbia (52%), and Browns Mill (58%), representing an ongoing inefficiency and waste of taxpayer dollars. The district should address these structural imbalances before destabilizing a functioning cluster. Hawthorne must stay in the Lakeside Cluster while resources are directed to where they are most needed. Expanding Hawthorne beyond reasonable limits is also inconsistent with the district's own guidance. A DCSD Board analysis has identified the ideal elementary school size as 700–800 students, not 900. Proposals to push Hawthorne toward a 900 student footprint ignore both best practices and site constraints. Overexpansion would undermine safety, strain infrastructure, and diminish educational quality. This concern is magnified by Hawthorne's student population. Hawthorne is a Title I school, in large part because it serves families from nearby apartment communities. These students deserve investment, stability, and appropriately scaled resources—not overconsolidation. Title I status should be a reason to strengthen the school's supports, not to overload the campus in ways that dilute services and strain staff. Hawthorne proudly serves some of the district's most vulnerable students, including a significant population of students with disabilities and English language learners. Its Inclusion Program, developed in partnership with The Coralwood School, is a model of what public education should strive to achieve. Hawthorne provides exceptional students with meaningful, inclusive support while simultaneously offering neurotypical students the opportunity to develop leadership, empathy, and lifelong social awareness—outcomes consistently supported by educational research and impossible to replicate in an oversized, overcrowded environment. The district invested approximately $10 million in modernizing Hawthorne and Henderson Mill Elementary Schools in 2024. Proposing closure, consolidation, or excessive expansion so soon after this investment is fiscally irresponsible. The appropriate path forward is clear: invest in Hawthorne, do not overexpand it. Preserve its scale, protect its programs, and maintain its critical role within the Lakeside Cluster. Hawthorne must remain in the Lakeside Cluster. Hawthorne must remain in the Lakeside Cluster. Hawthorne must remain in the Lakeside Cluster. A Smarter, More Equitable Path Forward: The district should pursue a "Smarter, Not Larger" strategy—maintaining Hawthorne's enrollment within a manageable range, relieving overcrowding at overutilized schools, eliminating costly trailers, and addressing chronic underutilization elsewhere. This approach protects vulnerable students, respects taxpayer investments, and keeps strong schools strong—better, not bigger.	
141	I believe this entire process needs to be paused due to corrupt Horton's involvement, incorrect data and lack of community input. Evansdale does not have anyone on the SAP and is therefore not represented. The French Immersion program is an essential part of the Evansdale community. Do not incorporate us into Pleasantdale or Sequoia. The fact HPM is running this and stands to profit off of this project is disgusting and should kill this entirely.	3/8/2026 10:05 PM
142	I like it the way it is now!! When it was changed before that, this current scenario was based upon educational standards, not just building issues. Previously, it was 1-8 and 9-12.	3/8/2026 10:05 PM
143	We value Ashford Park elementary students staying within the Chamblee cluster. Our children are in the gifted program and German immersion and we would like for them to continue on their learning pathways they've been working on for years.	3/8/2026 10:04 PM
144	Concern from a property value perspective. Children attended Oak Grove Elementary School - we chose our home for the great value that this school offers	3/8/2026 10:04 PM
145	Lacked sufficient data for closure at Oak Grove Elementary. Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary	3/8/2026 10:03 PM

	utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026-27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2-3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: Sagamore Hills: 413 / 456 (91% utilization) Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. Question 5: Feedback on Potential Grade Band Scenarios For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK-5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization. Question 6 Answer: No. Grade bands should reflect local enrollment trends and utilization levels rather than a uniform district-wide model. Question 7 Answer: Traditional PK-5 / 6-8 / 9-12 Question 8: Additional Feedback Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4-16. Oak Grove: Already exceeds the 88% utilization target (89% current; 96% projected) Has four consecutive years of enrollment growth Ranks in the top tier academically Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity.	
146	I’m disappointed that Vanderly, at less than 50 seats away from the 600 student threshold is on the closure list. It would be easy to add 50 seats to one of the best schools in the whole county. Not to mention our family prioritized a SMALL school over access to other resources when choosing where to live. I’m disapointed that 600 min. threshold is considered when there is plenty of research showing that smaller school environments are better for children. (While it may not affect class size), I would consider a school of 600 students inaccessible for my student and their neurotypical and 504 plan needs. A small school is a priority and provides incredible support for students without needing other resources in the district. It would be a failure on Dekalb entire school board to close Vanderlyn.	3/8/2026 10:03 PM
147	I want to start with my number one concern: I WANT EVERY FAMILIY WHO IS CURRENTLY DISTRICTED TO THE CHAMBLE HIGH CLUSTER TO STAY IN THE CHAMBLEE HIGH CLUSTER!!! Based on the facilities scenarios I would like to see all Ashford Park students moved to John Lewis Elementary. Overall this is not ideal but Dekalb County has never truly listened to the Ashford Park community. We have been asking the county to add on to Ashford Park Elem for over 10 years. I remember attending a public meeting in 2016 about redistricting and the newly announced construction of John Lewis Elem. Every parent in attendance did not understand why the county was building an elementary school in the Ashford park Neighborhood while neglecting the aging Ashford Park Elementary Building. The county's rationale was because they already owned the land where John Lewis Elem is currently and it would be used to alleviate overcrowding for the district next door to Ashford park. I now see that the plan was to close Ashford Park and move our students all along. Since this is obviously what the County wants, I would like ALL students and ALL staff to move to John Lewis Elem. Based on the declining enrollment at Woodward Elem, Montclair Elem, and John Lewis this makes sense. All of Ashford Park can fit into John Lewis. All of the current John Lewis students can fit into Montclair Elem, Woodward Elem, or.....ASHFORD PARK ELEM. In the meantime the county can continue to upgrade Woodward Elem and Montclair since the county thinks these are better sites for expansion that Ashford Park Elem.	3/8/2026 10:03 PM
148	Evansdale needs to be renovated and expanded. It is bigger than other neighboring schools that are recommended for expansion.	3/8/2026 10:02 PM
149	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026-27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2-3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: Sagamore Hills: 413 / 456 (91% utilization) Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats.	3/8/2026 9:59 PM

	Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion.	
150	I believe this entire process needs to be paused due to corrupt Horton's involvement, incorrect data and lack of community input. Evansdale does not have anyone on the SAP and is therefore not represented. The French Immersion program is an essential part of the Evansdale community. Do not incorporate us into Pleasantdale or Sequoia. The fact HPM is running this and stands to profit off of this project is disgusting and should kill this entirely.	3/8/2026 9:59 PM
151	The schools are spaced out and allows each child the best possible opportunity to be able to learn from the teacher. With the current teacher to student ratio, it's already hard enough to teach the students. Combining schools only makes it harder for everyone. Combining schools for budgets means isnt the best option. A quality education and student/staff safety are the priorities!!!!	3/8/2026 9:59 PM
152	Consolidating the schools will increase class sizes. Students at low-performing schools will suffer more academically in larger classes.	3/8/2026 9:58 PM
153	The main goal is to keep Ashford Park/Chamblee Middle/Chamblee High together as a cluster. This is a community with strong ties with active parent involvement. I do agree that Ashford Park needs a plan to alleviate its overcrowding. If adding onto/rebuilding Ashford Park is not possible, considering breaking it into a smaller band (PK-2 at Ashford Park/3-5 at John Lewis) or moving Ashford Park in whole to John Lewis. In either scenario it would be imperative that teachers/staff who so choose could move with the student population.	3/8/2026 9:58 PM
154	The initial facilities scenario for Oak Grove Elementary raises many concerns. 1. This is a high performing school and as such needs to be reconsidered for any decisions on closure. It has: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) 2. Utilization: Oak Grove ES currently has fairly optimal utilization- already at 89% currently (447 students in a 504-capacity building) and is projected to reach ~96% next year (487 students shared at the Feb 9 PTA meeting), while the DCSD dashboard shows reduction in utilization. Utilization has shown an upward trend since after the pandemic for Oak Grove ES. What consideration has been given to the expansion of area and general development in the Lakeside cluster? There are many new mixed-used spaces which are developing, new constructions, new sub-divisions, all of which will increase the demand for existing schools, including Oak Grove ES. 3. Overcrowding: Proposed closure of Oak Grove ES and concurrently rise in development of properties as mentioned above will lead to overcrowding of the remaining ES (Sagamore and Briarlake that would absorb Oak ES students), may affect academic performance, cause traffic congestion and delays. 4. Unintended consequences: Overcrowding will dissuade parents for choosing public schools. There are several private schools in this cluster and more parents may end up considering private schools over the consolidated ES in the area. Smaller class size was one of the reasons parents chose private schools during the pandemic and it may happen again if school sizes grow significantly and affect neighborhood structure. This will again affect enrollment. Consolidation/ closure of school may NOT yield the intended positive consequences under the current scenario. The proposed facilities consolidation greatly affects our and neighboring communities. We sincerely request that DCSD reconsider this scenario and present a more updated data on projected utilization and enrollment based on current area growth to make a more informed decision.	3/8/2026 9:58 PM
155	I'm concerned about Midvale Elementary. It's a school nearly at capacity, good performance, an engaged community, in an area that keeps adding housing. Doesn't make any sense to me.	3/8/2026 9:58 PM
156	Large class sizes are not good. Therw are already behavior promblems in the schools.	3/8/2026 9:57 PM
157	It is very clear that DCSD needs to close some schools. The school system is close to a financial crisis. The northern part of DeKalb has schools that are overcrowded. Find ways to reduce the overcrowding. Most definitely get the Doraville cluster out of the Dunwoody attendance zone.	3/8/2026 9:56 PM
158	Biggest concern is where will the new students go if the schools are consolidated? Our school is not big enough to accommodate more students and will need a renovation to be able to accommodate. If families are sending their kids to public schools and the schools are over crowded, those are excellent schools that should be enhanced and grown. The amount of money spent on consultants and school renovations will surpass what is already being spent. This is especially true if the existing schools that are proposed to close are not sold for profit and functional use in the county. Regardless of numbers, if schools are high achieving, they	3/8/2026 9:56 PM

	should be grown and nourished. Schools that are not meeting state standards should be closed and those properties sold to gain funds to rebuild or expand the schools that are thriving. The highest achieving schools in the county should stay open and be enhanced to include more students	
159	Our community values the current school structure and benefits academically and socially for our children and their future	3/8/2026 9:54 PM
160	Oak Grove is not underutilized and the population is growing so it does not align with the objectives. Oak Grove population cannot be absorbed by the closest schools, one of which is already at over 90% utilization. With CHOA moving close to this area and Emory being nearby along with the redevelopment nearby, population is only going to increase which is going to create overcrowding. Oak Grove is a very high performing school with strong parental involvement and a great community. People purchase homes specifically for this school. Changes such as this risk decreasing our property values which will have a direct impact on the income Dekalb receives from taxes. I, like many other parents, are considering leaving the public school system should a disruption like this occur. Dekalb already loses many students in middle school which then bleeds into high school.	3/8/2026 9:54 PM
161	I strongly oppose any facilities plan that removes Hawthorne Elementary School from the Lakeside Cluster or requires students to cross I-85 to attend another cluster. These geographic barriers present serious safety and logistical concerns. Traffic west of I-85 is already heavily congested, particularly around Dresden Elementary School, St. Pius X High School, the I-85/Shallowford Road exit, and the Shallowford/Briarcliff intersection near Globe Academy's upper campus. During school hours, travel times of up to 45 minutes for a single mile are common. Redirecting Hawthorne families into these corridors would create unsafe and impractical commutes for hundreds of students. I have followed this project since its inception and was surprised by the proposed consolidations in the northern part of the county, particularly when data reflects more acute capacity challenges elsewhere. While the Lakeside Cluster is relatively balanced and well utilized—Hawthorne currently operates at approximately 88% capacity—other schools are experiencing extreme overutilization. Ashford Park (162%), Chesnut (128%), Montgomery (121%), and Livsey (123%) are relying heavily on trailers to accommodate enrollment. These trailers represent an ongoing and costly temporary solution, and removing them through thoughtful redistricting and capacity relief would result in significant long-term savings for the district. At the same time, several schools remain severely underutilized, including Toney (33%), McNair (51%), Columbia (52%), and Browns Mill (58%). Continuing to operate facilities at such low utilization is an inefficient use of taxpayer funds. These capacity imbalances should be addressed before making sweeping changes to stable and well-functioning clusters like Lakeside. Additionally, long-standing boundary inequities along Buford Highway—contributing to racial and socioeconomic imbalances between the Cross Keys and Chamblee clusters—should be corrected, as originally intended with the opening of John Lewis Elementary School in 2017. While it is encouraging to see Sequoyah Middle School coming online to relieve overcrowding and improve equity, these efforts should not come at the expense of communities that are already balanced and stable. Expanding Hawthorne is also fiscally and programmatically unsound. The district invested approximately $10 million in modernization projects at Hawthorne and Henderson Mill Elementary Schools in 2024. Significantly expanding or closing these schools so soon after this investment would represent a misuse of public funds. Moreover, an internal analysis by the DCSD Board has identified the ideal elementary school size as 700–800 students, not 900. Pushing Hawthorne beyond this threshold risks undermining both educational outcomes and site feasibility. I am advocating for investment in the Lakeside Cluster bringing schools up to the minimum thresholds to receive all State an Federal Funding, but the land and design of these schools being the center of neighborhoods would make it impractical to build very large schools; the impact to the neighborhoods would be detrimental. This concern is particularly acute given Hawthorne's student population. Hawthorne serves one of the district's most vulnerable communities, including a high concentration of students with disabilities and English language learners. The school's Inclusion Program, in partnership with The Coralwood School, is a model for the district. Hawthorne proudly supports exceptional students while simultaneously providing neurotypical students with meaningful opportunities to develop empathy, leadership, and inclusion skills—outcomes consistently supported by educational research and impossible to quantify in traditional metrics. Key Concerns: Safety and Traffic: Increased enrollment would significantly worsen congestion on Briarcliff Road and compromise safety for more than 60 families who currently walk to school. Environmental Impact: The Hawthorne site cannot support a 900-student campus without eliminating established nature trails and increasing flood risk in the Briarmoor Manor community. Infrastructure Limitations: Local sewer infrastructure is	3/8/2026 9:54 PM

already operating near capacity and cannot support a 1,000-person facility. Academic and Programmatic Impact: Oversized schools are correlated with declines in student achievement, attendance, and school climate—particularly harmful for students requiring specialized support. A Smarter Alternative: Rather than large-scale consolidations or overexpansion, we advocate for a “Smarter, Not Larger” approach that maintains enrollment in the 450–550 student range through targeted, minimal redistricting. This strategy preserves fiscal responsibility, protects vulnerable student populations, reduces reliance on costly trailers, and keeps schools better—not bigger. If you’d like, I can: Cut this down to fit a strict public-comment time limit Make it more assertive or more neutral Tailor it specifically for a DCSD Board submission or community letter Provide your feedback on BizChatYou said: make this more assertive and mention hawthorne must stay in the lakeside cluster a few times, also mention how it is wedged in between henderson mill middle and lakeside high school. Also mention Hawthorne is title 1 because it draws from the apartments - create a clever argument here to invest in the school but not over expandCopilot said: CopilotHere is a more assertive, policy-focused rewrite that repeatedly reinforces Hawthorne must remain in the Lakeside Cluster, highlights its geographic logic, and makes a clear “invest, don’t over-expand” Title I argument tied to equity, fiscal responsibility, and student outcomes: I strongly and unequivocally oppose any facilities plan that removes Hawthorne Elementary School from the Lakeside Cluster. Hawthorne must remain in the Lakeside Cluster. Any proposal that shifts Hawthorne students across I-85 or into another cluster is fundamentally unsafe, geographically illogical, and educationally unsound. Hawthorne is physically and programmatically anchored in the Lakeside Cluster. It is wedged directly between Henderson Mill Middle School and Lakeside High School, creating a clear and intentional K–12 feeder pattern. Disrupting this alignment would fracture a coherent community pathway that families rely on and that the district has deliberately built. Hawthorne belongs in the Lakeside Cluster—geographically, operationally, and academically—and it must remain there. Reassigning Hawthorne students west of I-85 would force families into some of the most congested corridors in the county, including the areas surrounding Dresden Elementary School, St. Pius X High School, the I-85/Shallowford Road interchange, and the Shallowford/Briarcliff intersection near Globe Academy’s upper campus. These are already failing traffic zones during school hours, where travel times of 30–45 minutes for a single mile are common. Routing Hawthorne families into these conditions is neither safe nor feasible and should be categorically rejected. The proposal to consolidate or overexpand within the Lakeside Cluster is especially troubling given that the cluster is currently stable and well utilized, with Hawthorne operating at approximately 88% capacity. At the same time, the district faces extreme overutilization elsewhere—Ashford Park (162%), Chesnut (128%), Montgomery (121%), and Livsey (123%)—where reliance on trailers has become normalized. Trailers are not a long-term solution; they are a costly stopgap. Removing these trailers through targeted capacity relief would generate meaningful savings and should be a district priority. Conversely, severe underutilization persists at Toney (33%), McNair (51%), Columbia (52%), and Browns Mill (58%), representing an ongoing inefficiency and waste of taxpayer dollars. The district should address these structural imbalances before destabilizing a functioning cluster. Hawthorne must stay in the Lakeside Cluster while resources are directed to where they are most needed. Expanding Hawthorne beyond reasonable limits is also inconsistent with the district’s own guidance. A DCSD Board analysis has identified the ideal elementary school size as 700–800 students, not 900. Proposals to push Hawthorne toward a 900-student footprint ignore both best practices and site constraints. Overexpansion would undermine safety, strain infrastructure, and diminish educational quality. This concern is magnified by Hawthorne’s student population. Hawthorne is a Title I school, in large part because it serves families from nearby apartment communities. These students deserve investment, stability, and appropriately scaled resources—not overconsolidation. Title I status should be a reason to strengthen the school’s supports, not to overload the campus in ways that dilute services and strain staff. Hawthorne proudly serves some of the district’s most vulnerable students, including a significant population of students with disabilities and English language learners. Its Inclusion Program, developed in partnership with The Coralwood School, is a model of what public education should strive to achieve. Hawthorne provides exceptional students with meaningful, inclusive support while simultaneously offering neurotypical students the opportunity to develop leadership, empathy, and lifelong social awareness—outcomes consistently supported by educational research and impossible to replicate in an oversized, overcrowded environment. The district invested approximately $10 million in modernizing Hawthorne and Henderson Mill Elementary Schools in 2024. Proposing closure, consolidation, or excessive expansion so soon after this investment is fiscally irresponsible. The appropriate path forward is clear: invest in Hawthorne, do not overexpand it. Preserve its scale, protect its programs, and maintain its critical role within the Lakeside Cluster. Hawthorne must remain in the Lakeside Cluster. Hawthorne must remain in the Lakeside Cluster. Hawthorne must remain

	in the Lakeside Cluster. A Smarter, More Equitable Path Forward: The district should pursue a “Smarter, Not Larger” strategy—maintaining Hawthorne’s enrollment within a manageable range, relieving overcrowding at overutilized schools, eliminating costly trailers, and addressing chronic underutilization elsewhere. This approach protects vulnerable students, respects taxpayer investments, and keeps strong schools strong—better, not bigger.	
162	The initial facilities scenarios are very difficult to address since as a parent, we do not have full picture of the boards plan. Every cluster has different assets and challenges thus each cluster should be addressed individually.	3/8/2026 9:53 PM
163	Oak grove closing would be detrimental to the neighborhood, the quality of the education since oak grove is basically one of the best elementary schools in deklab county.	3/8/2026 9:52 PM
164	keep oak grove elementary school open	3/8/2026 9:51 PM
165	If schools are consolidated, where and what would be the process of replacing students in areas where several surrounding schools would be closing. Considering that many of the schools on the closing list are Horizon schools, how would class sizes be considered to ensure learning and less behavioral distractions. Instead of closing schools, could some positions that are not conductive to learning be eliminated: Many of the District level positions, LTSE, MTSS, Behavioral Specialist, Tutors, etc. to alot funds to be funneled into the schools with students. Have considerations been made to sale properties that are not being used, the Krogers office building and others. Instead of renovating that space, could some of the olders facilities be used to efficiently use school funds.	3/8/2026 9:51 PM
166	Looking at the data with the simple Microsoft BI interface, it doesn't quite seem right. For example, it seems that the historical utilization percentages are calculated using the current capacity numbers, applied to previous years. But what about schools where the facilites have been changed, upgraded, moved, rebuilt, etc.? For example, Austin Elmentrary school built a new facility with increased capacity around 2020. But the previous years' utilization numbers are pulled down because they are based on current capacity. If this is true, then the data (and resulting conclusions) is tainted. Also, can the raw data be provided so we don't have to hobble around with Microsoft BI? Also, other details, such as forecasting model selection, parameters, etc.	3/8/2026 9:50 PM
167	Consolidating schools with low enrollment makes sense. Trying to close an over capacity school that is surrounded by other over capacity schools does not make sense. Removing kids from their communities would also be detrimental to the kids.	3/8/2026 9:50 PM
168	I don't support the removal of Oak Grove Elementary School because it is essential for the community.	3/8/2026 9:49 PM
169	We want Oak Grove to stay open.	3/8/2026 9:48 PM
170	It looks like no real consideration was made in the disruption of the communities this plan would have by closing elemtary schools.	3/8/2026 9:48 PM
171	I am very concerned about this scenario - the research has not been done especially at the local level and does not include the historical findings of past DCSD initiatives including one that later lead to the reintroduction of middle schools. There is no trust in the process and no confidence in the project especially when it does not include any feedback from the current 150 SAP committee members who are from the communities including parents and staff. How can you just tell communities that their schools are closing with no constructive solutions of where such communities and amazing teachers and staff will go?! And how did you not give any notice to the schools before it became public knowledge?! It is the fault of our own DeKalb County School District who failed to recognize the strong growth in their county and districts while neglecting the funds to invest in our infrastructure, curriculum, and staff. You must do everything in your power to keep our school community together especially Ashford Park - there is plenty of land to redevelop and develop to include multi-story buildings. You all know there is a reason why such districts are growing - we would hate to see Dekalb lose so many residents from a potential mass exodus that would result with the potential school closures of such strong and affluent communities.	3/8/2026 9:48 PM
172	As a longtime member of this community, I strongly oppose the inclusion of Oak Grove Elementary School in the closure scenarios. Oak Grove is not just a school building—it is a generational cornerstone of our neighborhood. I attended Oak Grove myself, my husband attended Oak Grove, and our children are currently students there. Our family represents just one example of the deep multigenerational ties many families have to this school. Oak Grove	3/8/2026 9:48 PM

	has long been a school that families actively move into the area to attend, helping maintain the strength and stability of the community. Closing a thriving neighborhood school like Oak Grove would disrupt established feeder patterns, fracture a highly engaged parent community, and undermine the continuity that has benefited students and families for decades. From a planning perspective, Oak Grove also does not align with the district's stated goal of addressing underutilization. The target elementary utilization is approximately 88%, yet Oak Grove is already at 89% utilization (447 students / 504 capacity as of October 2025) and projected to reach approximately 487 students (~96%) in 2026–27. Enrollment has increased for four consecutive years and is on a sustained upward trajectory. Closing Oak Grove would also create a capacity challenge for nearby schools. Sagamore Hills Elementary School is already at 91% utilization (413/456) with only about 43 available seats, and Briarlake Elementary School is at 73% utilization (350/480). Together they cannot absorb Oak Grove's 447 students without significant boundary shifts or overcrowding. At the same time, the surrounding corridor is experiencing measurable residential and employment growth, including major redevelopment projects and more than $2.5B in institutional investment in the Emory/Clifton area. Even early phases of planned housing developments could generate dozens to over 100 additional elementary students over time, which would further increase utilization at nearby schools. Oak Grove is also among the highest-performing schools in the review group, ranking near the top in both Content Mastery (94.2) and Readiness (95.3). Closing a school that exceeds utilization targets, demonstrates sustained enrollment growth, and ranks among the top academically does not directly address the district-wide utilization gap within the DeKalb County School District.	
173	As a home owner and parent of a new born, the reason we moved to the area was for oak grove elementary. We do not want this to affect our home value and education of our son.	3/8/2026 9:47 PM
174	Don't think it should happen.	3/8/2026 9:47 PM
175	Oak grove elementary has a good reputation and closing it hurts Dekalb county schools and its reputation if it's closed. It's beneficial having good reputation for future enrollment and engagement.	3/8/2026 9:47 PM
176	It makes no sense to close schools in the north when they're 98% occupied.	3/8/2026 9:46 PM
177	I support the Brookhaven community's strong support of the public school system now and for many, many years to come therefore, I support the following position… keeping our trajectory in the Chamblee MS and HS cluster, and the pathway of closing the Ashford Park Elementary School facility as a neighborhood school, and shifting the Ashford Park Elementary attendance zone to the current John Lewis Elementary facility, and preserve our (current attendance zone) Chamblee Cluster alignment.	3/8/2026 9:46 PM
178	Against it	3/8/2026 9:46 PM
179	As a deeply invested Ashford Park family and community members, we are submitting this feedback to strongly oppose the proposed closure of Ashford Park Elementary. While recognizing the complex capacity and logistical challenges the committee is working to solve, closing the district's most successful school is fundamentally the wrong approach. We urge the committee to consider an alternative path that addresses the population challenges while protecting the quality of education in our community. Our core recommendations are as follows: • Preserve the District's Top Performer: Ashford Park Elementary is currently the number-one performing school in the district. This remarkable achievement is the direct result of the culture, dedication, and expertise of our outstanding faculty and staff. Dismantling a proven, top-tier educational environment—and scattering the educators who built it—counteracts the district's primary mission of providing excellent education. We should be replicating this school's success, not closing its doors. • Expand the Existing Footprint: I fully acknowledge the reality of our capacity issues, with the school currently operating over capacity. However, the solution to a thriving, high-demand school is expansion, not elimination. The current campus footprint has the physical space to accommodate an expansion. Investing in adding to the existing infrastructure will safely house our larger student population while keeping this highly successful community intact. • Maintain the Chamblee High School Pipeline: It is imperative that our neighborhood remains zoned for the feeder pattern into Chamblee High School. The academic continuity of moving from the district's top-performing lower school into a high-caliber charter program is vital for our students' long-term success. Disrupting this pipeline would be detrimental to the academic trajectories of hundreds of students. Rather than eliminating a thriving educational community to solve a capacity issue, I ask the committee to choose a path of investment. Let's expand the physical space of	3/8/2026 9:46 PM

	Ashford Park Elementary, retain the exceptional faculty who run it, and preserve our zoning to Chamblee High	
180	My preference is to leave Oak Grove unchanged.	3/8/2026 9:45 PM
181	The proposed consolidation scenarios raise serious concerns for families in our community. Elementary schools are more than just facilities—they are neighborhood anchors that support strong family engagement, community identity, and student stability. Consolidation may appear efficient on paper, but it often leads to larger schools, longer travel times for young children, and reduced opportunities for parent involvement. For younger students especially, smaller and community-based schools provide important benefits: stronger relationships with teachers, safer environments, and easier access for families. Eliminating neighborhood elementary schools risks weakening these important supports. Before moving forward with consolidations, DCSD should carefully evaluate the long-term impact on communities, transportation costs, and student outcomes—not just building utilization rates.	3/8/2026 9:45 PM
182	I support the Brookhaven community's strong support of the public school system now and would like to keep Ashford Park in tact with the remodeling of the building. If that's not possible, I support the following position… keeping our trajectory in the Chamblee MS and HS cluster, and the pathway of closing the Ashford Park Elementary School facility as a neighborhood school, and shifting the Ashford Park Elementary attendance zone to the current John Lewis Elementary facility, and preserve our (current attendance zone) Chamblee Cluster alignment.	3/8/2026 9:45 PM
183	Many schools are closing. How will the closings effect students, parents, and staff at schools? Merging students does not always benefit the students and staff in the buildings.	3/8/2026 9:44 PM
184	Oak Grove Elementary should remain open as a neighborhood elementary for the following reasons: Oak Grove already meets the district's utilization target today (about 89%) • The school is projected to reach ~96% capacity next year • Enrollment has been increasing, not declining • Significant new investment and development in our area will become clearer in the next 12-24 months • Academic performance and teacher retention are also critical to our goal of student education	3/8/2026 9:44 PM
185	Oak Grove is and has been an integral facility within this area, affording the students the best public schooling available in the DeKalb system. Any disruption to this status would be detrimental to these children, and I should add, the surrounding neighborhood	3/8/2026 9:42 PM
186	It seems as though it would be wiser to keep your better performing schools open and consolidate the schools with poorer performance. This would result in a net decrease in poorer performing schools and give you a smaller # of schools to optimize. Furthermore, people moved to the regions with better performing schools for those schools. If you shut them down, the demand for those regions will decrease, thereby decreasing demand for those homes and depressing property values and thereby county revenue. Those who can move out to private schools will, and the # of schools with poorer schools could potentially rise…the opposite of what you would theoretically want	3/8/2026 9:42 PM
187	I support the district's responsibility to address overcrowding at Dunwoody High School; however, the current proposal to close Vanderlyn Elementary is not supported by sufficient analysis and should not move forward. While Vanderlyn's proximity to the high school places it within broader facilities planning discussions, proximity alone does not justify closure. The district has stated that the SAP is driven by enrollment trends and utilization, yet the proposal does not clearly demonstrate how these metrics have been applied at the cluster level to support this recommendation. Critical data—including receiving school enrollment capacity, projected class sizes, transportation impacts, and feeder pattern changes—has not been shared. These analyses are essential and must be provided before any consideration of closure. The shared Vanderlyn–Dunwoody campus presents a clear opportunity to pursue phased, campus-level solutions that directly address secondary capacity constraints without eliminating elementary access. Closing a successful elementary school without fully evaluating and presenting such alternatives represents a missed opportunity and an incomplete planning process. Vanderlyn is a diverse, high-performing, and inclusive school community. Disrupting a stable elementary environment without transparent justification runs counter to the district's stated priorities. I strongly urge the Board to pause any closure decision and direct district leadership to engage both school communities in a collaborative process focused on viable, data-driven solutions that relieve high school overcrowding while preserving the Vanderlyn community.	3/8/2026 9:41 PM

188	Current discussions around Vanderlyn students are that they would likely be split between neighboring schools, if closed. This is not comparable to combining two half-capacity schools and would create significant feeder disruption and transportation impact. If the district's objective is to right-size elementary schools toward the 600-student efficiency benchmark, Vanderlyn should be evaluated as a candidate for expansion rather than closure. The school is already operating efficiently and, given its shared campus, presents an opportunity to explore coordinated facility solutions that support Dunwoody High School's needs while preserving elementary access. We respectfully request comparative modeling that evaluates closure versus expansion scenarios within the Dunwoody cluster, including cost, utilization, and long-term flexibility, before final determinations are made. Additionally, if this proposal is driven by high school facility needs rather than elementary inefficiency, and if future enrollment shifts may relieve this pressure, closure should not be assumed as the default solution. The Dunwoody cluster cannot be evaluated using the same framework as clusters with multiple under-enrolled campuses. Do not close Vanderlyn simply to expand the high school. There is plenty of space currently available to the high school to allow for appropriate expansion to meet student size demands. Lastly, closing a high-performing STEM certified elementary school seems counterintuitive. Expansion is much more sensible to draw more students to the school thereby continuing to allow Dunwoody to serve as an excellent area to raise children.	3/8/2026 9:40 PM
189	We have experienced the middle school consolidation which in my opinion led to a deterioration of academic performance and the ability for the schools to have special programs.	3/8/2026 9:40 PM
190	Current discussions around Vanderlyn students are that they would likely be split between neighboring schools, if closed. This is not comparable to combining two half-capacity schools and would create significant feeder disruption and transportation impact. If the district's objective is to right-size elementary schools toward the 600-student efficiency benchmark, Vanderlyn should be evaluated as a candidate for expansion rather than closure. The school is already operating efficiently and, given its shared campus, presents an opportunity to explore coordinated facility solutions that support Dunwoody High School's needs while preserving elementary access. We respectfully request comparative modeling that evaluates closure versus expansion scenarios within the Dunwoody cluster, including cost, utilization, and long-term flexibility, before final determinations are made. Additionally, if this proposal is driven by high school facility needs rather than elementary inefficiency, and if future enrollment shifts may relieve this pressure, closure should not be assumed as the default solution. The Dunwoody cluster cannot be evaluated using the same framework as clusters with multiple under-enrolled campuses. Lastly, closing a high-performing STEM certified elementary school seems counterintuitive. Expansion is much more sensible to draw more students to the school thereby continuing to allow Dunwoody to serve as an excellent area to raise children.	3/8/2026 9:40 PM
191	I understand that DCSD has a responsibility to address overcrowding at Dunwoody High School; however, the current proposal to close Vanderlyn Elementary is not supported by sufficient analysis and should not move forward, as a solution to that problem. While Vanderlyn's proximity to the high school places it within a broader facilities planning discussions, proximity alone should not justify closure. The district has stated that the SAP is driven by enrollment trends and utilization, yet the proposal does not clearly demonstrate how these metrics have been applied specifically at the cluster level to support this recommendation. Critical data—including receiving school enrollment capacity, projected class sizes, transportation impacts, and feeder pattern changes—has not been shared. These analyses are essential and must be provided before any consideration of closure. As the parent of a student who graduated from Vanderlyn Elementary and is now pursuing an engineering course at a premier nationally recognized institute of higher learning, I cannot emphasize how much of an impact Vanderlyn Elementary had to boost my student into that trajectory. Closing a successful elementary school without fully evaluating and presenting such alternatives represents a missed opportunity and is a failed planning process. Vanderlyn is a diverse, high performing, and inclusive school community. Disrupting a stable elementary environment without transparent justification runs counter to the district's stated priorities. I strongly urge the Board to reconsider any closure decision and direct district leadership to engage in a collaborative process focused on viable, data driven solutions that relieve high school overcrowding while preserving the Vanderlyn community.	3/8/2026 9:36 PM
192	The proposed closing of Ashford Park Elementary would be devastating to our community for decades to come. In the last 20 years our community has made APES into a tight knit family that galvanizes our neighborhoods and makes this growing area of Dekalb County an amazing place to raise young children. Instead of closing and razing Ashford Park, this is one area where Dekalb should INVEST and expand the school to keep the community together.	3/8/2026 9:36 PM

193	I am a retired teacher from Dekalb as well as a community member in the S. Dekalb area and I feel strongly that the closures and/or consolidations primarily in our region will disrupt the lives of students and families in a major way. Transportation will be an issue for many families, but communities with closed schools face decreased property values that over the proposed time frame SAP has presented could lead to an economic downward cycle for S. Dekalb.	3/8/2026 9:36 PM
194	I am concerned about the proposed closing of many elementary schools and moving to a larger elementary school model. My children attend Lakeside High School, one of the highest populated schools in the county, and I do not think the equivalent density would be a good environment for elementary school children. I am also concerned about the proposed closing of Oak Grove Elementary, which does not align with the stated objective of addressing underutilization. The district's goal is to increase utilization to approximately 88%. Oak Grove's utilization is at 89%. Enrollment has increased for four consecutive years. At current pace, it will reach or exceed full capacity in 2-3 years.	3/8/2026 9:35 PM
195	It is important to keep the Ashford Park and Drew Valley neighborhood and community together at the same school.	3/8/2026 9:34 PM
196	OAK GROVE Elementary Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years.	3/8/2026 9:34 PM
197	I agree with the scenario of consolidation if it means more resources for our students.	3/8/2026 9:33 PM
198	Evansdale elementary is on 10.1 acres, larger than the majority of the elementary schools in the surrounding area (some slated for an expansion or rebuild) with space to expand. It has 2 playgrounds near the building that could be moved to space near the lower field to accommodate for an expansion. It also has 2 parking lots and is in a residential area with ability to use street parking unlike some of the other schools in the nearby area that are on busy roads. Currently, Evansdale is at 96% capacity and over the 500 student mark with space to increase to 600. It does not make sense to close a school with the only DLI program that feeds through the Lakeside cluster.	3/8/2026 9:33 PM
199	Evansdale's lot size is bigger than neighboring schools recommended for expansion. Evansdale is unique and that it has a large separate playfield to playgrounds and multiple parking lots. This site can accommodate additions in the back of the school and still have ample play and parking space. Evansdale is uniquely situated to accommodate increase traffic as it takes up two sides of a large neighborhood block. Evan stills enrollment is projected increased over 600 by 2030.	3/8/2026 9:32 PM
200	Emphatically against this consolidation effort. A community-shattering proposal.	3/8/2026 9:32 PM
201	I am opposed to the closing/consolidation of elementary schools due to the impact this will have on the neighborhoods served by these schools. I fear that creating larger, more heavily populated schools, the children's needs will be harder to meet as those with issues will more easily be missed. Another concern is that the environments of larger schools will be less personal and young children will not the warmth and nurturance that enhances a learning environment. My strong preference is that the county consider reducing the cachement areas of some of the high schools and middle schools and decrease the size of these campuses. Schools should be important gathering spaces for their communities and by closing schools, these communities lose these spaces.	3/8/2026 9:32 PM
202	Don't close Evansdale and move the students to another school. If anything, expand Evansdale! Evansdale has a large lot with a large separate play field, woods with an outdoor classroom, 2 playgrounds, and multiple parking lots. You could more easily ADD to Evansdale and still keep the playgrounds/parking lots. It's also a great n'hood school but yet in an easily accessible spot, traffic-wise. Also Evansdale's enrollment is projected to increase to well over 600 students in just a few years-- by 2030. Closing it would be devastating to this n'hood.	3/8/2026 9:31 PM
203	POINTS 1) Evansdale Is More Than a Neighborhood School Evansdale is not simply a neighborhood school. It is a district-wide academic choice program that attracts families across DeKalb County. The French dual-language immersion program draws families from across DeKalb through a lottery system. Many families choose Evansdale (and often choose to live in this neighborhood) intentionally because of its programming. Schools that attract	3/8/2026 9:31 PM

	voluntary enrollment help retain families in the public school system. 2) Internationally Recognized French Immersion Program Evansdale offers an internationally recognized French immersion program that provides students with global language skills and cultural competency. Evansdale offers one of the district's most distinctive academic programs. Students spend approximately half their instructional day learning in French. The program is recognized internationally through LabelFrancÉducation, awarded by the French Ministry of Foreign Affairs. Only a small number of schools in the United States have this designation. 3) The French Immersion Program Is Part of a K–12 Language Pathway The immersion program does not end at Evansdale. It continues through Henderson Middle and into advanced French at Lakeside High School. Closing Evansdale affects multiple schools, not just one. Pathway: Evansdale → Henderson → Lakeside Students continue immersion learning at Henderson Middle School. Students can take advanced French courses at Lakeside High School Important fact: Evansdale parents and teachers helped build and advocate for this pathway over many years.	
204	I do not think Midvale Elementary school should be considered for closing/repurposing. It is a good, well-kept facility with potential for expanding the building. I believe other nearby elementary schools that are not on the list for closing/repurposing do not have the same potential for expansion.	3/8/2026 9:30 PM
205	Consolidation seems appropriate, however need to look at school performance and results too, especially for elementary schools, so early child education which is foundational does not suffer	3/8/2026 9:30 PM
206	It is imperative that we consider the size of the classroom. Older schools versus new schools. It was challenging to expect every school to house the same number of students.	3/8/2026 9:27 PM
207	I am open to school consolidation if it helps the district run more efficiently, similar to approaches used in other large districts like Gwinnett. If consolidation results in cost savings, those funds should be redirected to the classroom. Specifically, the priority should be hiring additional teachers and lowering class sizes. Too many resources currently appear to be concentrated at the district level rather than going directly toward supporting students and teachers in classrooms.	3/8/2026 9:26 PM
208	I does not make sense to close high performing schools.	3/8/2026 9:26 PM
209	I find that eliminating Ashford Park ES would be a disservice to the community. It is a wonderful school with an incredible staff. If the school must be closed then I feel that the APES staff and kids should go to John Lewis ES but be kept in the Chamblee cluster.	3/8/2026 9:26 PM
210	No changes for Oak Grove Elementary	3/8/2026 9:25 PM
211	I live in the community surrounding Evensdale Elementary. My wife and I are about to have a baby who would eventually attend the school. I think it would be a shame to loose the community feel of Evensdale to transition to a larger and further away elementary school. The unique programs that Evensdale offers draw people to the neighborhood. I personally valued the potential of walking my child to school. Evensdale also has a large lot size that would allow for future expansion and a traffic arrangement that appears to glow pretty well.	3/8/2026 9:25 PM
212	Please don't close Evansdale. Such a gem for elementary education.	3/8/2026 9:24 PM
213	I am generally in favor of consolidating schools if it improves efficiency, similar to how districts like Gwinnett operate. However, any savings created through consolidation should be reinvested directly into classrooms. That means prioritizing hiring additional teachers and lowering class sizes. Right now, too much funding appears to be allocated to district-level roles that are not directly supporting students or classroom teachers.	3/8/2026 9:24 PM
214	I don't think there should be consolidations it will create overpopulation classes, which will make it less optimal learning environment for students and teachers	3/8/2026 9:24 PM
215	Unnecessarily disruptive. DCSD needs to look in the mirror for reason for declining enrollment not the school buildings. Midvale isn't a threat, it's a model for what other communities could be like.	3/8/2026 9:24 PM
216	I don't like disrupting children in certain school district being uprooting and being transferred to school out of their community. Try to get Federal Assistance to keep studies where they live unless the parent was them to go to a more school where they pay for child education in	3/8/2026 9:23 PM
217	Evansdale Elementary School has been an excellent institution of learning for so many years.	3/8/2026 9:22 PM

	It’s a wonderful community school and has been a magnet school for years. Please reconsider taking this school, as well as Midvale and Henderson Mill, out of commission. Thank you!	
218	While the outline about why the consolidation is being proposed makes sense my concern is that I did not find any info about how the required elementary school “expansions” would be funded. It sounds like a lot of construction will be required. Dekalb County doesn’t have the best reputation when it comes to prudent use of tax payer money…the public will need lots of assurance there is no corruption at work here. I also do not understand why Oak Grove ES was selected for closure when it has higher existing seating capacity than other nearby elementary schools not on closure list. Oak Grove has always had great academic reputation and strong parental engagement. I would think you would want to bring more students into that environment rather than dissipate out across several schools. I do worry about my property value as well since Oak Grove ES has long been a selling point for our neighborhoods.	3/8/2026 9:21 PM
219	I support consolidating schools to operate more efficiently, similar to the model used in Gwinnett. If consolidation frees up funding, those dollars should go directly into classrooms by hiring more teachers and reducing class sizes. Too much money is currently tied up in district-level positions that do not directly support students and teachers.	3/8/2026 9:20 PM
220	Consolidations are disproportionately affecting underserved communities. I think many of these schools could remain open and rent a portion of the building to a community-serving non-profit. They need to remain an option for the people in those communities.	3/8/2026 9:20 PM
221	I really like my school and I don’t not want it to close.	3/8/2026 9:19 PM
222	I really value our small neighborhood schools but understand the desire to cut overhead costs by consolidating schools. I hope this will come with additional programs. I think fewer students would opt for alternative schooling options if each school had a draw (eg internal magnets for high achievers, more arts programming, language immersion, etc).	3/8/2026 9:19 PM
223	My main concern is that redistricting to the new facilities scheduled to open (Sequoyah Middle and High) has not been finalized yet; I feel that a district plan for students that will attend this and other new facilities needs to happen first, then, perhaps at the same time, clearer decisions can be made about which facilities to close.	3/8/2026 9:19 PM
224	I don't want Oak Grove Elementary to close. It is one of the best, if not the best elementary school in all of DeKalb county. School performance should factor into closings. The whole reason we moved into this district was because of Oak Grove Elementary. I understand the need for cuts, but closing one of your best schools doesn't make sense to me.	3/8/2026 9:19 PM
225	I understand that the Student Assignment Project is addressing a difficult challenge for the district. Declining enrollment and significant unused capacity mean that the district may need to consolidate some schools in order to use facilities and resources more efficiently. I appreciate that the district is taking a long-term approach to planning and gathering community feedback before making final decisions. However, I strongly believe that Ashford Park Elementary should not be consolidated into another school or closed as part of the Phase 1 scenario. Ashford Park is a strong and stable neighborhood school with a deeply engaged parent community. Families, including my own, move into the area specifically because of the school and the neighborhood school model it represents. Consolidating Ashford Park into another location would disrupt a thriving school community that is already functioning well and serving students successfully. If consolidation is necessary in some parts of the district, it should prioritize schools where there is clear underutilization, facility limitations, or overlapping attendance zones. Ashford Park does not fit that description. It is a well-supported school with strong enrollment relative to its neighborhood and plays a central role in the Brookhaven community. Closing or consolidating Ashford Park would also undermine the neighborhood school model that many families rely on. Students would likely be reassigned farther from their community, increasing travel times and weakening the connection between families and their local school. This could also drive families to leave the district or pursue private education, which would further exacerbate the enrollment challenges the district is trying to solve. The district has stated that the Student Assignment Project is intended to align facilities with enrollment realities and use resources more effectively. Currently, the district has tens of thousands of empty seats across its schools, which is the main driver behind consolidation discussions. However, those system-wide challenges should not come at the expense of closing strong neighborhood schools that are working well for students and families. I encourage the district to explore alternatives such as boundary adjustments, program placement, or consolidations in areas where schools are significantly under-enrolled rather than closing Ashford Park. Preserving successful neighborhood schools and specialized programs	3/8/2026 9:19 PM

	like the German immersion program at Ashford Park will help maintain family confidence in the district.	
226	Please do not shut down Oak Grove elementary	3/8/2026 9:18 PM
227	If this proposal is driven by high school facility needs rather than elementary inefficiency, and if future enrollment shifts will relieve cluster pressure, closure should not be assumed as the default solution. The Dunwoody cluster cannot be evaluated using the same framework as clusters with multiple under-enrolled campuses. Before moving forward, families need cluster-specific reassignment modeling, receiving school utilization projections, and a clear explanation of why expansion or shared-campus options were not prioritized.	3/8/2026 9:18 PM
228	I have very strong concerns about consolidating schools generally. We have seen this when Henderson High School became a middle school, moving 1,500 + students in only 3 grades - 6,7,8 - into a single school. Middle school is a particularly challenging developmental age for students and having 500 to 600 students in one grade in a single school is not manageable while also providing a quality education. Schools built in this section of Dekalb County (30345) were built when Dekalb County used a 1-7/8-12 model, making retrofitting these schools to a new model more difficult.	3/8/2026 9:18 PM
229	Henderson Mill Elementary School has a positive climate for all of our students. At HMES, they feel protected and loved. We at HMES may not be perfect, but our community members, faculty, and staff work very hard for the well-being of all students.	3/8/2026 9:17 PM
230	The Ashford Park community strongly opposes the proposed consolidation as currently conceived. Our concerns fall into three areas: Community cohesion. Ashford Park is a thriving neighborhood school whose community has been built over many years. Consolidation that scatters students across multiple schools would destroy that community — and community cohesion is itself an educational asset that should be weighed alongside operational considerations. Preservation of the Chamblee cluster pathway. Families zoned for Ashford Park have made long-term decisions — where to live, how to plan — around the Chamblee Middle School and Chamblee Charter High School pipeline. Any consolidation that removes students from this cluster pathway would represent an involuntary reduction in educational opportunity. This is an equity issue, not merely a preference. Infrastructure, not community, should drive solutions. The District's stated concerns — building age, size, and capacity — are infrastructure problems. They do not require dismantling a high-functioning school community. Before any consolidation is finalized, the District should exhaust alternatives: renovation, replacement on the current site, or merger with a neighboring school that preserves the Chamblee cluster assignment for all affected students. If consolidation proceeds, we request that all Ashford Park students be kept together and guaranteed their pathway to Chamblee Middle and Chamblee Charter High School, with access to equivalent AP and academic programs.	3/8/2026 9:16 PM
231	I don't think the school closure would be beneficial because it will be an impact on students and parents and the community.	3/8/2026 9:14 PM
232	We are completely shocked by the scenarios that shows Ashford Park closing. We moved to Brookhaven to raise our family and be a part of the APES community for our kids. We understand the overcrowding issue. We would be more comfortable with changes if there was better understanding of what the plan is…where will our children go to school? I know that you've heard multiple comments from Brookhaven parents - we would be ok with options that keep our kids in the high performing track in the Chamblee cluster. My wife and I both have advanced college degrees, and our oldest is testing in the 95+ percentile. Quality education that pushed our children and opportunities to take advanced classes is the most important thing to us. We live on the south side of Dresden and are concerned that we may be rezoned to a lower performing cluster. We ask that you take demographics of the APES student body into consideration while evaluating scenarios. We would 100% support an addition to the current APES facility or a move to John Lewis IF all students stay together and JLES moves to the Chamblee cluster.	3/8/2026 9:14 PM
233	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73%	3/8/2026 9:13 PM

	utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
234	First and foremost, all decisions and discussions should be postponed until a new CREDIBLE Superintendent is in place. Everything he touches, the people he hired is poison. You say this has been in conversation for years, but yet you are just now advising the stakeholders of this plan and only after his hire started to run with it. HPM is construction company and is not 3rd party source that doesn't have some sort of skin in the game here! Buildings should NOT be discussed until there is a guide as to where the children would be going, the redistricting and the programs. This is NOT about the kids and what is best. This is simply about the money and pushing more to South Dekalb. The numbers being used are NOT correct that this company is using. No one is being transparent or truthful. If numbers are dropping it is because people do not want to be in a corrupt county. Who hires someone that has charges pending!?!?! Our school is STEM and DLI. It caters to ESOL and French DLI. We are in walking distance for the neighborhood. We are school choice. There is a waiting list to get into French Immersion (only school in Dekalb). You are disrupting our kids education that has worked hard to get where they are now. Will schools need to potentially close? Yes, but 27? Primarily N Dekalb?!? You built mega schools before thinking it through. This will happen again. Large schools are NOT in the best interest of the students!! Not to mention traffic issues and more. Evansdale can be expanded, there is room. We are will be over capacity by 2030, proving our enrollment is NOT declining! Shift the district lines back to 2013 and the apartments can feed into Pleasantdale. That will fill that school. You can close Henderson Mill and move some to Evansdale and other to Oak Grove/Briarlake. There are ways to move kids without the major disruption and pulling kids outside of the cluster that they are intended to go through. Again though, NOTHING should happen until a permanent Super is in place! Let's talk about the 6.3 million YOU spent on new Admin building that is also sitting vacant. Let's cut the fat at the top before messing with our kids. Sell that building in good faith. How many more millions are you needing to put in there? That money could have gone to our schools to update the HVAC!!! Right now the only ethical thing to do is pause this. Provide more information to all stakeholders. Stop focusing on buildings only!	3/8/2026 9:13 PM
235	i am not agreeing with the school closures because it will be an impact on all students and community	3/8/2026 9:12 PM
236	I think that closing Oak Grove Elementary would be a very poor choice out of all the Dekalb county schools. The school is high scoring, the teachers are phenomenal, the administration is efficient and on top of things and it would lead to these children having to go to lower performing schools without the same level of resources.	3/8/2026 9:11 PM
237	I'd like more information on the enrollment projections and how much sensitivity analysis was done to validate projected closures. Currently, Oak Grove Elementary (OGE) has 89% utilization (447 students/504 capacity (Oct 2025) and projected to 96% enrollment for Fall 2026. There are not enough empty seats at Sagamore and Briarlake to absorb the OGE	3/8/2026 9:11 PM

	students without boundary shifts, overcrowding, trailers, or facility expansion. Additionally, Briarlake Elementary is already likely to experience greater than projected occupancy due to Lula Hills development and Corporate Square/Northbend redevelopment. Additionally, the growth of CHOA and Emory facilities in the Druid Hills/Clifton corridor will certainly drive increased residential growth in our area that may not be reflected in the enrollment projections. Projections should be recalibrated to reflect 2024-2026 building and growth and documented pipeline activity. Importantly, closing an elementary school that already exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district's utilization gap.	
238	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. 239	I feel like there is no reason to snatch these kids from a school that has helped build social skills and show diversity. Sometimes change is ok but it's not just the kids, it's also the teachers these kids love so dearly.	3/8/2026 9:08 PM
240	Focusing on facilities rather than the communities and successful outcomes of students is shortsighted. Why is enrollment down? What makes families choose other options/leave the county? What is the larger economic impact of closing schools? Beyond the building, staff, and land - what is forecasted county economic development, traffic, and planning impact? The public presentations haven't instilled confidence that anything beyond facility conditions matter.	3/8/2026 9:08 PM
241	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization	3/8/2026 9:07 PM

	targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
242	I deeply value the strong, close-knit, and supportive community that has been built at Ashford Park Elementary over the years. My top priority is maintaining the current boundaries and district lines for the Ashford Park Elementary attendance zone so that this community can remain intact. My second priority is ensuring that this attendance zone continues within the Chamblee Middle and High School cluster. With those priorities in mind, I would like to offer two potential solutions for consideration: 1. Expand Ashford Park Elementary on its current site. While I understand there may be challenges related to the existing land footprint, exploring expansion options could allow the entire attendance zone to remain together while preserving established boundaries and feeder patterns. 2. Reassign the Ashford Park attendance zone to the John Lewis Elementary facility. Under this approach, students currently attending John Lewis Elementary could be reassigned to neighboring schools with available capacity. The full Ashford Park attendance zone could then move together into that building, and then John Lewis Elementary could be moved into the Chamblee Middle and High School cluster. This would preserve both community continuity and feeder alignment. I appreciate the complexity of district planning decisions and hope these options can be considered as ways to maintain stability, continuity, and community connections for Ashford Park families. Thank you for your thoughtful consideration.	3/8/2026 9:06 PM
243	Redan Elementary should only close if the closure benefits the greater good of the whole community.	3/8/2026 9:06 PM
244	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization	3/8/2026 9:05 PM
245	Scenarios should include the performance of a school. Year after year Vanderlyn is ranked a top 40 school in the state of Georgia and top 5 within the Dekalb school district. In 2025 Vanderlyn performed better than 98% of Georgia schools. The teachers and administration are top notch and the community will feel the loss of this school closure in particular.	3/8/2026 9:03 PM
246	Closing Oak Grove does not align with the stated objectives. Enrollment has increased over the last 4 years and is expected to continue to increase. The other schools that would "absorb" oak grove students in the event of closures don't seem to have capacity or better facilities. Oak Grove has a new playground and outdoor classroom.	3/8/2026 9:02 PM

247	Consolidating Midvale Elementary into Livesy will be a mistake. Midvale Elementary is an important part of our neighborhood and this closure will greatly impact all residents in the area is serves.	3/8/2026 9:02 PM
248	Oak Grove Elementary is already at 89% utilization, surpassing the district's goal of 88%. OGE is projected to reach 96% utilization in 2026-27.	3/8/2026 9:02 PM
249	Closing 2 out of 5 elementary schools in the Dunwoody cluster would be detrimental for the community. Over capacity elementary schools are bad for everyone involved. The kids, the parents, traffic and the community feeling as a whole. Abandoned buildings are even worse for the neighborhoods.	3/8/2026 9:01 PM
250	SAVE EVANSDALE ELEMENTARY! Evansdale is a key part of the Lakeside cluster pathway that many families rely on when making long-term educational decisions. Evansdale is an important part of the Lakeside school pathway. Families often choose where to live based on: Evansdale → Henderson → Lakeside. Frequent redistricting proposals create uncertainty for families and the broader community. Given Evansdale's strong academic performance, internationally recognized immersion program, established K–12 language pathway, and deep community investment, I encourage the district to carefully consider the broader programmatic value the school brings to DeKalb County as it evaluates consolidation scenarios. Schools that combine unique academic offerings, strong performance, and strong community partnerships should be thoughtfully considered before being included in consolidation proposals.	3/8/2026 9:00 PM
251	North Dekalb schools are not in the same situation as South Dekalb. Our schools are at or over capacity. Ashford Park ES isn't able to consolidate due to our enrollment numbers. Expanding the current facility or moving the entire student body to a new facility less than 1.5 miles away. If Ashford Park ES is relocated, we would like to ensure it remains in the Chamblee Middle - High School cluster. Our 7 acre site is large enough for our current enrollment with the right facilities in place. Also, the neighborhood fully supports having the school in the current location.	3/8/2026 9:00 PM
252	North DeKalb schools are not in a similar situation as South DeKalb. We are all at (or over) capacity. Ashford Park (APES) isn't able to consolidate due to our enrollment numbers. I understand that APES is too large for our current facility. I propose finding us a nearby school (less than 1.5 miles) or expanding our current one to keep our community together. If we do relocate, I request that we stay in the Chamblee cluster. Our 7 acre site is large enough to hold our current enrollment with the right buildings in place.	3/8/2026 9:00 PM
253	We prefer that Ashford Park Elementary students not be taken out of the Chamblee cluster. Our children have invested time in the German immersion program, which has become a meaningful part of their education and development. Language immersion programs require continuity and long-term participation for students to gain true proficiency. Removing students from the cluster risks disrupting that progress and undermining years of investment by both students and teachers. Beyond language learning, remaining within the Chamblee cluster provides important educational continuity. Students benefit academically and socially when they can transition from elementary to middle and high school within a consistent system where programs, expectations, and peer relationships remain stable. Maintaining this pathway allows children to build long-standing friendships, develop relationships with educators, and participate in programs that are designed to build upon one another across grade levels.	3/8/2026 9:00 PM
254	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: •Sagamore Hills: 413 / 456 (91% utilization) •Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: •Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. •Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone	3/8/2026 8:59 PM

	(approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: •+50 students → ~83% utilization •+100 students → ~90% utilization •Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: •$1.5B Arthur M. Blank Hospital campus •~4,500 employees (including ~1,000 new jobs) •$87.7M Emory Heart & Vascular expansion •Ongoing Emory hospital expansion •$1.1B in FY24 research awards •$270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: •Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) •Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
255	While some facilities in areas of low utilization make sense, no sense can possibly be made of closing multiple high usage (and high performing) schools in other neighborhoods. The local SAP representatives were shocked by the scenarios presented which makes the integrity of the entire process seem questionable at best. If I had a job in which I spent that many months to come up with a plan and what I presented to leadership was as vague as the scenario presented here I would expect to be relieved of my job duties and find employment elsewhere. I reside in a tight knit community that could be decimated with the scenario proposed. In addition to that home values will likely drop, and the entire area may become less desireable for people to move here.	3/8/2026 8:57 PM
256	The indictment of Horton is hanging over this initial scenario. There is too much baggage there, need to start fresh with a consultant who will not be allowed to bid on doing the work.	3/8/2026 8:57 PM
257	enrollment has increased in the past four years	3/8/2026 8:54 PM
258	Unhappy with the potential closures of neighborhood schools.	3/8/2026 8:51 PM
259	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top t ier academically does not directly address the district-wide utilization gap.	3/8/2026 8:50 PM

260	Surprised to see SO many schools in our area closing. Repair facilities rather than close them. Lower income areas a harshly impacted.	3/8/2026 8:49 PM
261	I do not feel that Oak Grove Elementary should be closed. From what I understand, the enrollment close to capacity. That does not mean that the school should be closed, it means that perhaps some lines should be moved around to add students.	3/8/2026 8:49 PM
262	Shocked and saddened to learn that Ashford Elem is slated to be closed. Concerned about my property values living in Ashford Park, concerned about the community that is lost if this happens, and very concerned about not being a part of Chamblee HS cluster.	3/8/2026 8:48 PM
263	I support scenario 1 with the suggested closures and consolidations. I acknowledge that school closure possibilities are tough on communities, but I applaud SAP for taking a data based approach in its recommendations. I believe any short term hardships will be outweighed by the long term benefits. I hope to see continued transparency on decisions made based on the survey feedback, and caution the committee on making any decisions not influenced by and held up by the data presented to the community.	3/8/2026 8:48 PM
264	I deeply value the strong, close-knit, and supportive community that has been built at Ashford Park Elementary over the years. My top priority is maintaining the current boundaries and district lines for the Ashford Park Elementary attendance zone so that this community can remain intact. My second priority is ensuring that this attendance zone continues within the Chamblee Middle and High School cluster. With those priorities in mind, I would like to offer two potential solutions for consideration: 1. Expand Ashford Park Elementary on its current site. While I understand there may be challenges related to the existing land footprint, exploring expansion options could allow the entire attendance zone to remain together while preserving established boundaries and feeder patterns. 2. Reassign the Ashford Park attendance zone to the John Lewis Elementary facility. Under this approach, students currently attending John Lewis Elementary could be reassigned to neighboring schools with available capacity. The full Ashford Park attendance zone could then move together into that building, and then John Lewis Elementary could be moved into the Chamblee Middle and High School cluster. This would preserve both community continuity and feeder alignment. I appreciate the complexity of district planning decisions and hope these options can be considered as ways to maintain stability, continuity, and community connections for Ashford Park families. Thank you for your thoughtful consideration.	3/8/2026 8:47 PM
265	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that	3/8/2026 8:47 PM

	exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
266	I do not support the proposed closure of Ashford Park Elementary School in Scenario 1. My feedback is based on three areas of concern. Academic performance and district value Ashford Park is one of DeKalb County's highest-performing schools. It ranks 5th among 81 ranked elementary schools in the DeKalb County School District and outperforms both the county and state averages significantly — with 78.2% of 3rd graders proficient or better in ELA, compared to 29.1% for DeKalb County and 34.9% for the state. The school ranks in the top 10% of all public schools in Georgia for overall test scores. Closing a school of this caliber works against the district's stated goal of ensuring every student has access to high-quality programs. The SAP process should protect and build on high-performing assets, not eliminate them. Enrollment and capacity Ashford Park's student population has grown by 11% over the past five school years— a trend that runs counter to the district's broader enrollment decline narrative. A school with demonstrated enrollment growth and high academic output does not fit the profile of a consolidation candidate and should not be treated as one. Community and reassignment impact Ashford Park functions as a true neighborhood school in a defined residential community. Closing it would displace a student population that is actively growing and thriving, forcing reassignment to schools that may be farther from home and less familiar to families. The SAP's own framework acknowledges proximity to where students live as a key planning factor — closing Ashford Park would work against that principle. My recommendation I urge the district to remove Ashford Park Elementary from consideration in future scenario iterations and to identify consolidation candidates based on underperformance, declining enrollment, and excess capacity — criteria this school does not meet.	3/8/2026 8:47 PM
267	I am writing to express strong opposition to any proposal to close Evansdale Elementary School or remove Evansdale from the Lakeside High School community as part of the district’s school consolidation and redistricting process. Evansdale is a vital institution within the Lakeside High School cluster, and closing it would overlook several important factors related to facilities, community investment, and future enrollment growth. Evansdale is well positioned physically to support long-term use and expansion. The school sits on approximately 10.1 acres, a lot size that is larger than many neighboring schools and provides ample room for future growth. The campus is unique in that it includes a large, separate play field, two playgrounds, and multiple parking areas. Because of this layout, additions could be constructed at the back of the school without sacrificing play space or parking. In other words, the site has the capacity to accommodate modernization and expansion rather than closure. The school is also well situated to manage transportation and traffic flow. Evansdale occupies two sides of a large neighborhood block, allowing for safer and more flexible traffic patterns for buses and carpool lines. This physical advantage would be difficult and costly to replicate elsewhere. Additionally, enrollment projections indicate that Evansdale’s student population is expected to increase to over 600 students by 2030. This projected growth suggests that closing the school now could create capacity problems in the near future and force the district to reopen or rebuild facilities later at much greater expense. Another critical factor is Evansdale’s unique role in the Lakeside cluster’s French language program. Evansdale’s French program is supported by a strong network of neighborhood parents, teachers, and community volunteers who provide valuable resources and assistance for students. Moving the program away from Evansdale would disrupt this vital community infrastructure that has taken years to build. The French language pathway connecting Evansdale Elementary, Henderson Middle School, and Lakeside High School has deep roots in the community. Teachers in this program have developed long-standing relationships with students and families, and older students often mentor younger ones within the same cluster. Maintaining this continuity is essential to preserving the strength and success of the program. Finally, enrollment projections themselves should be carefully examined. Forecasting future student populations is inherently uncertain, and current models may underestimate the number of children who will attend Evansdale. In many communities, projections fail to fully account for apartment developments, immigrant families, and newly arriving households who may not appear in traditional forecasting models. These populations often bring additional students into neighborhood schools over time, which can make projected enrollment numbers significantly lower than the reality that unfolds. Evansdale Elementary had this issue the last time Dekalb redistricted as 120 more students than estimated showed up for the school year because the student estimates had significantly underestimated our area and the large amount of families with children continuous moving into our area. Closing a school based on projections that may undercount future students could create unintended consequences for the district, including overcrowding in neighboring schools and the loss of an established community hub.	3/8/2026 8:47 PM

268	As a community member, former student of Oak Grove Elementary and also having had my own children at the school, I am particularly shocked that a school of this caliber could possibly be closed. The school is such a staple to this community. The facilities have never been underutilized. There have been many former students that have moved into this area just for this school. Now my own children want to move here. The facilities have never been underutilized. Adding more classroom in some capacity can not only help this school but also help this community thrive for many more years to come. Let’s not let a good thing be destroyed by closing down our school and the community around it.	3/8/2026 8:46 PM
269	I don't agree with or support the decision to close EES. At 10.1 acres, the EES campus is significantly larger than the lot sizes of neighboring schools being considered for expansion. The campus already includes a large, separate play field, two playgrounds, and multiple parking areas, providing valuable flexibility for future development. The site can accommodate building additions at the rear of the school while still preserving ample space for student play and parking. In addition, EES is uniquely positioned to manage increased traffic flow because the campus spans two sides of a large neighborhood block, allowing for better circulation than many surrounding schools. With enrollment projected to exceed 600 students by 2030, EES offers both the space and infrastructure needed to support responsible and sustainable growth.	3/8/2026 8:45 PM
270	I do not want Ashford Park Elementary School to close especially given the $25M renovation that is currently in progress. That location is only fit for a school and I don’t think it makes sense to have other communities use the building rather than current residents (for example, people being bussed in from out of zone due to school construction is not beneficial - it is either fit for student service or not). I’d rather some Ashford Park students move to expanding neighboring schools if it is over capacity and cannot be expanded, which would be wonderful. However, I would be opposed to Ashford Park ES changing middle school or high school cluster.	3/8/2026 8:44 PM
271	Current scenarios do not meet our goal of keeping the Ashford Park students together and in the Chamblee middle and high school cluster. Under the current scenarios we do not feel our children will be provided the best education.	3/8/2026 8:44 PM
272	The current scenarios do not align with our goal of being all Ashford Park students together, and in the assembly cluster. Under these current scenarios education of our children is jeopardized.	3/8/2026 8:44 PM
273	Closing Oak Grove Elementary does not align with the district’s stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove already exceeds that benchmark. As of October 2025, Oak Grove enrolls 447 students with a capacity of 504 (89% utilization) and is projected to reach 487 students in 2026–27 (96% utilization). Enrollment at Oak Grove has increased for four consecutive years. If this trend continues, the school will likely reach or exceed full capacity within the next 2–3 years. If Oak Grove were to close, its students would need to be absorbed primarily by Sagamore Hills and Briarlake. However, those schools do not have sufficient available capacity to absorb Oak Grove’s entire student population without significant disruption. Sagamore Hills: 413 / 456 (91% utilization) — only 43 available seats Briarlake: 350 / 480 (73% utilization) — approximately 130 available seats Combined, these schools cannot reasonably absorb 447 Oak Grove students without substantial boundary changes, overcrowding, or facility expansion. Additionally, Briarlake’s current utilization does not reflect the significant residential growth already underway in the surrounding area. Major redevelopment projects within a few miles—including the Lulah Hills redevelopment of North DeKalb Mall and the Corporate Square/Northbend redevelopment—are expected to add more than 3,000 residential units. Even the first phase of development alone (approximately 835 units) could generate an estimated 55–145 additional elementary students over time. As these developments are built out, Briarlake’s utilization could quickly increase to the 83–90% range, and potentially higher with continued growth. This does not include additional housing growth along the LCI corridor or population growth associated with major institutional expansion in the Druid Hills/Clifton area. The surrounding corridor has seen more than $2.5 billion in investment, including the new Arthur M. Blank Children’s Hospital campus and ongoing expansion at Emory University and Emory Healthcare. These investments bring thousands of jobs and new housing demand, indicating that this area is experiencing growth, not decline. Finally, Oak Grove is also one of the highest-performing schools in the district, ranking near the top among the schools under review in both Content Mastery and Readiness.	3/8/2026 8:43 PM
274	Closing 26 elementary schools is NOT CONSOLIDATION. 20 High Schools are reduced to 17 which is 15% reduction. 18 Middle schools reduced 16 is a 22% reduction. 78 elementary	3/8/2026 8:43 PM

	schools reduced to 53 is a 33% reduction.	
275	The traditional schooling seems to be fine. It would help to let PreK3 & PreK4 have half days instead of the entire school day with the rest Elementary.	3/8/2026 8:40 PM
276	I have concerns about the long-term viability of these scenarios. Current elementary school numbers may still reflect the overhang of families who started children in private school during Covid and did not want to force those children to change schools once DCSD went back to in-person instruction. While enrollment may have dipped over time, that number may be inflated. The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made.	3/8/2026 8:40 PM
277	I understand as long as teacher salaries and step increases are unaffected	3/8/2026 8:38 PM
278	In my opinion, many of the schools on the list proposed for consolidation, including the one where I work, should continue operating as they currently do. Elementary schools should remain small in order to provide more personalized and individualized education. It is important that children's first school experience takes place in a safe, supportive, and familiar environment. Achieving this becomes much more difficult when a school has more than 500 students.	3/8/2026 8:37 PM
279	Closing Oak Grove Elementary does not align with the district's stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove already exceeds that benchmark. As of October 2025, Oak Grove enrolls 447 students with a capacity of 504 (89% utilization) and is projected to reach 487 students in 2026–27 (96% utilization). Enrollment at Oak Grove has increased for four consecutive years. If this trend continues, the school will likely reach or exceed full capacity within the next 2–3 years. If Oak Grove were to close, its students would need to be absorbed primarily by Sagamore Hills and Briarlake. However, those schools do not have sufficient available capacity to absorb Oak Grove's entire student population without significant disruption. Sagamore Hills: 413 / 456 (91% utilization) — only 43 available seats Briarlake: 350 / 480 (73% utilization) — approximately 130 available seats Combined, these schools cannot reasonably absorb 447 Oak Grove students without substantial boundary changes, overcrowding, or facility expansion. Additionally, Briarlake's current utilization does not reflect the significant residential growth already underway in the surrounding area. Major redevelopment projects within a few miles—including the Lulah Hills redevelopment of North DeKalb Mall and the Corporate Square/Northbend redevelopment—are expected to add more than 3,000 residential units. Even the first phase of development alone (approximately 835 units) could generate an estimated 55–145 additional elementary students over time. As these developments are built out, Briarlake's utilization could quickly increase to the 83–90% range, and potentially higher with continued growth. This does not include additional housing growth along the LCI corridor or population growth associated with major institutional expansion in the Druid Hills/Clifton area. The surrounding corridor has seen more than $2.5 billion in investment, including the new Arthur M. Blank Children's Hospital campus and ongoing expansion at Emory University and Emory Healthcare. These investments bring thousands of jobs and new housing demand, indicating that this area is experiencing growth, not decline. Finally, Oak Grove is also one of the highest-performing schools in the district, ranking near the top among the schools under review in both Content Mastery and Readiness. Closing a school that already exceeds the district's utilization target, shows sustained enrollment growth, and demonstrates strong academic outcomes does not directly address the district's stated challenge of underutilized facilities.	3/8/2026 8:36 PM
280	I'm concerned with the potential of closing higher performing neighborhood schools and schools that offer special programs like French immersion @ Evansdale	3/8/2026 8:35 PM
281	I understand the reasoning for this move but I am concerned about how individual high performing schools like Evansdale, Oak Grove, Henderson Mill are on the potential list to be closed. Surely there is a way to achieve you goals without impacting good schools which help to attract high income families and associated high property tax households to the country tax base. Don't throw out the baby with the bath water.	3/8/2026 8:34 PM
282	Smaller neighborhood schools are so valuable to our community and allow children to live near their friends. Being able to get home safely on foot is also important for sustainable development and community health and wellness. I see people in my neighborhood constantly using the Evansdale track, soccer fields, playgrounds every day, year round. It's a huge part of the neighborhood and the greater community.	3/8/2026 8:34 PM

283	Will cause students to attend another school	3/8/2026 8:33 PM
284	I do not think any school operating at near capacity (85%+) or inside of a neighborhood (on a street within a neighborhood and not on a main road) should be considered for closure and student consolidation to other schools. I also do not think any of the school providing special services (Elementary foreign language, stem programs, arts, etc) should be candidates for closure.	3/8/2026 8:33 PM
285	Part of what makes Dekalb County schools so special is that they have always been neighborhood schools.	3/8/2026 8:33 PM
286	I believe at a young age classes should be smaller along with the school capacity. Costs of remolding the schools to hold more students will also have a negative impact on neighborhoods they are in.	3/8/2026 8:31 PM
287	I do not support this proposed scenario. Evansdale ES should not be on this list to close/repurpose. The school is at near capacity. There is a wait list for the kindergarten program. This is one of the most culturally diverse schools in the county and is a school choice location that is sought after with incredible parent involvement. It is one of the larger campuses in the county with plenty of room for expansion. If expansions are being considered this school should be prioritized over Livsey which is overflowing with trailers already. How are you going to accommodate traffic in the morning and school busses when you're cramming students into these spaces? How are you going to have reasonable lunchtime when smaller schools have children eating at 10:30 in the morning already to accommodate all students? Large schools when you are not guaranteeing smaller class sizes serve no one: not teachers, students or parents. To say this is about our students is a farce. This is about money and it isnt even a good money plan otherwise you would have told us cost savings. It's not about teacher collaboration because that can happen in continuing education classes and through mentorship programs without moving a single student. This process is woefully deficient. There was not enough chance for community engagement and involvement and asking 150 people to participate is not representative. Nor has the data been shared with enough time and detail for meaningful community feedback. You have not referenced a single study showing why large schools create better outcomes. You don't even have the correct metrics to make a recommendation and you haven't released full metrics and data available to the Public because you know it is based on faulty premises.	3/8/2026 8:31 PM
288	In general, the consolidation of facilities where there are obvious underutilizations of facilities (especially that are close to each other) and can be reasonably cascaded makes sense to me. The closing of Ashford Park (APES) for the opposite reason (over capacity) does not make sense - even if the phase 1 scenario is stated as being only "facilities" focused. APES has begun a well-planned and approved $20 million + renovation that has already started and will be complete for the beginning of the 2027-28 school year. Most of the work will be done in the summer months with no disruption APES during the school year. The renovation should very positively improve the low Building Adequacy and FCA scores that are the reason for the renovation in the first place. In addition, APES has a "lower campus" of three well maintained, spacious modulars units that have 12 classrooms where 4th and 5th Grade students as well as numerous support functions are located. I think these units should be considered as "adjusted capacity" for APES and using the 66 2/3 and 33 1/3 formula raises capacity from 480 to 672. At some point, say in the 2030 to 2032 timeframe, the 3-modular configuration could be replaced with a 1 or 2 story "lower campus" - floor one replacing the "adjusted capacity" with "fixed capacity" and a possible 2nd floor adding additional fixed capacity as well as things like an expanded STEM Lab, a Technology Lab, Special's rooms and additional support functions. Building Adequacy and FCA scores would improve more. This might greatly relieve some of the "potential capacity expansion projects" that the consulting firm is suggesting for Montgomery and Huntley Hills. Yes, I know that APES has a smaller property footprint than others and it will be "harder to build". That is offset significantly by the merits of maintaining the Ashford Park attendance boundary intact and at its present location. (Continued on Item 8).	3/8/2026 8:31 PM
289	I oppose the closure of Ashford Park Elementary because it is a vital neighborhood anchor. However, if the district determines that the current facility cannot be expanded to meet capacity needs, I am open to leveraging the John Lewis facility to make a campus setup. My support for this change is strictly contingent upon maintaining our Chamblee Cluster alignment, which the majority of our community identifies as their top priority.	3/8/2026 8:29 PM
290	Having large schools for yound children is a bad idea. Children young than teenagers learn best in smaller environments and not in mega schools, which should be reserved for 9th grade	3/8/2026 8:27 PM

	and above.	
291	Evandalwa very strong neighborhood support/ lots of new lids in neighborhood	3/8/2026 8:26 PM
292	Please upgrade Staffing to include additional assistant principles and two office staff members. Also paras for grades K and 1st. We also need in school suspension rooms for ALL schools.	3/8/2026 8:25 PM
293	k Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/8/2026 8:23 PM
294	Good	3/8/2026 8:20 PM
295	Horrible idea	3/8/2026 8:20 PM
296	I do not want Evansdale Elementary closed down	3/8/2026 8:18 PM
297	Do not close/consolidate Oak Grove Elementary School. It is a National School of Excellence and one of the finest schools in DeKalb County.	3/8/2026 8:18 PM
298	I am a parent of a student at Sagamore Hills. The current proposal would only affect our elementary school with the possible closure of Oak Grove Elementary and expansion of Sagamore. Sagamore is already a school with trailers, I don't see how a standard K-5 model could work for our area since we don't have room to absorb a school as it stands. It would be very frustrating to see the PE field or playground area be taken over with rental trailers to house both schools.	3/8/2026 8:18 PM
299	Very concerned about the potential closure of Ashford Park when the school serves over 800 children. Where would they all go? If they get picked up and moved to John Lewis, can all the staff go with them? Can John Lewis be zoned to Chamblee middle and high? Top priority is staying in the Chamblee cluster, followed closely by keeping the community together.	3/8/2026 8:17 PM
300	I really don't want my school to be closed. I love OGE and all my amazing teachers and friends. I am learning and growing so much at this school. I want to stay at this school until fifth grade.	3/8/2026 8:17 PM
301	Seems resonible so far.	3/8/2026 8:17 PM

302	I am confused as to why Ashford Park, a school that has been built by its community and has incredible, supportive and very engaged teachers, parents and students would be closed to address schools with low enrollment in areas nowhere near our community. We moved into our neighborhood so our kids could go to Ashford Park - this is a school that attracts students and families and is a huge part of the community. No surrounding schools have low enrollment to handle all of Ashford Park so if you close our school and move all students to surrounding schools, you will not solve a problem, you will create a bigger one. It's as though there has literally been no real thought about this or the negative impact it will have on an entire community that has done so much to build an incredible school.	3/8/2026 8:15 PM
303	Evansdale is a boon to the local community. The French immersion program is an amazing opportunity.	3/8/2026 8:14 PM
304	Oak Grove is not underutilized. The area is growing and the school is a high performing school.	3/8/2026 8:12 PM
305	Dear Members of the DeKalb County School Board, I am writing to express strong opposition to any proposal to close Evansdale Elementary School or remove Evansdale from the Lakeside High School community as part of the district's school consolidation and redistricting process. Evansdale is a vital institution within the Lakeside High School cluster, and closing it would overlook several important factors related to facilities, community investment, and future enrollment growth. First, Evansdale is well positioned physically to support long-term use and expansion. The school sits on approximately 10.1 acres, a lot size that is larger than many neighboring schools and provides ample room for future growth. The campus is unique in that it includes a large, separate play field, two playgrounds, and multiple parking areas. Because of this layout, additions could be constructed at the back of the school without sacrificing play space or parking. In other words, the site has the capacity to accommodate modernization and expansion rather than closure. The school is also well situated to manage transportation and traffic flow. Evansdale occupies two sides of a large neighborhood block, allowing for safer and more flexible traffic patterns for buses and carpool lines. This physical advantage would be difficult and costly to replicate elsewhere. Additionally, enrollment projections indicate that Evansdale's student population is expected to increase to over 600 students by 2030. This projected growth suggests that closing the school now could create capacity problems in the near future and force the district to reopen or rebuild facilities later at much greater expense. Another critical factor is Evansdale's unique role in the Lakeside cluster's French language program. Evansdale's French program is supported by a strong network of neighborhood parents, teachers, and community volunteers who provide valuable resources and assistance for students. Moving the program away from Evansdale would disrupt this vital community infrastructure that has taken years to build. The French language pathway connecting Evansdale Elementary, Henderson Middle School, and Lakeside High School has deep roots in the community. Teachers in this program have developed long-standing relationships with students and families, and older students often mentor younger ones within the same cluster. Maintaining this continuity is essential to preserving the strength and success of the program. Finally, enrollment projections themselves should be carefully examined. Forecasting future student populations is inherently uncertain, and current models may underestimate the number of children who will attend Evansdale. In many communities, projections fail to fully account for apartment developments, immigrant families, and newly arriving households who may not appear in traditional forecasting models. These populations often bring additional students into neighborhood schools over time, which can make projected enrollment numbers significantly lower than the reality that unfolds. Evansdale Elementary had this issue the last time Dekalb redistricted as 120 more students than estimated showed up for the school year because the student estimates had significantly underestimated our area and large amount of families with children continuous moving into our area. Closing a school based on projections that may undercount future students could create unintended consequences for the district, including overcrowding in neighboring schools and the loss of an established community hub. Evansdale Elementary has the land capacity, community support, and projected growth to remain a strong and sustainable school within the Lakeside cluster. Rather than closing it, the district should consider renovating and expanding the facility so it can continue to serve current and future families. Thank you for your time and for considering the long-term impact of this decision on students, families, and the broader community. Sincerely, Matt Murphy Please keep Evansdale Elementary intact and a key member of the Lakeside High School community.	3/8/2026 8:12 PM
306	This process needs to be completely suspended until there is a full time Superintendent to be accountable for the process. Anything that was started under Dr. Horton and pertaining to similar circumstances as his previous roles in Chicago should be paused, considered by the next appointed Superintendent and voted on by the constituents of the County.	3/8/2026 8:11 PM

307	I've looked through the SAP website and the current scenario looks good. I support it especially if it removes trailers from our schools.	3/8/2026 8:09 PM
308	Why are we closing schools? Why would smaller class sizes not be the goal	3/8/2026 8:08 PM
309	I do not understand why Ashford Park would be closed. It has double the amount of students it was made for yet still successful with the most supportive parents/teachers/community despite the extreme overcrowding & old building in need of repair. Where would these students go? Why are we in the middle of a $23 million renovation. I agree the lines need to be redrawn to reduce the amount of students as well as the building repaired & up to code. However I do not think closing it makes sense.	3/8/2026 8:08 PM
310	Unclear why dekalb wants to close oak grove elementary, a 10/10 school with enrollment over 90%. This is one of the gems in the Dekalb school system as it is one of the highest performing schools consistently. Scattering these students will disrupt their academic performance and the county's overall metrics. The oak grove neighborhood is also highly desirable and drives a significant amount of tax revenue for the county. Oak grove closure will negatively impact desirability and lead to less revenue collected. Community members have expressed concerns that closing this top tier school will lead to relocation to other areas with better schools or shift to private schools. Oak grove elementary also benefits from an unusually high level of community involvement. The oak grove foundation, a nonprofit at the school, raises money to fund innovative programs and experiences not paid for by the county. Closure will also negatively impact the community at large as the school serves as an anchor to the tight knit environment that has been vital to the school's success.	3/8/2026 8:06 PM
311	Having a community elementary in the neighborhood was a huge reason for buying my home. I love that we are able to walk to the school. The staff knows all the kids. They even know the parents. They are hands on. Cramming more kids into one school won't help the kids to "be seen." The kids need to feel like they are individuals who are cared for. Midvale is such a special school. My son is thriving due to the care and attention he has received at school.	3/8/2026 8:04 PM
312	Clarkston High School is good but the building is too old .There are no proper Air condition and water facilities in the classrooms.	3/8/2026 8:02 PM
313	I support Scenario 1 with all its closures and consolidations as they are outlined throughout the county. I know this is very hard for everyone to digest, but it does what DCSD told us on the SAP committee it needed to do (which I often worried if DCSD would follow through on - so thank you for being true to your word). I strongly believe that DCSD needs to create operational efficiency and stronger fiscal responsibility in order to create better outcomes for our students no matter where you live in Dekalb County. Additionally, I know many communities are very angry and vocal right now (as are many in my community), but I want to strongly encourage DCSD to NOT make one-off agreements with these communities, that include keeping their school open, if it chips away at the integrity of the overall goals and purpose of what must be accomplished. Because if you make an exception for one school, we will hold you accountable to make exceptions for all schools - which negates this entire process. These communities will get through these short-term struggles. It would be a tremendous disappointment, and most likely leave DCSD in further trouble in the long-term, to not make these necessary changes now.	3/8/2026 8:02 PM
314	Do what you have to. DeKalb has one of the highest school taxes around and our ratings are low. I expect our taxes to reduce after this. My biggest concern is vacant school buildings attracting unwanted crowds to our communities. Tear them down or give them to the cities.	3/8/2026 8:00 PM
315	I'm concerned about creating "mega" schools where kids tend to fall through the cracks, have lower graduation rates, and become just a number. There are many more benefits to small community schools.	3/8/2026 7:59 PM
316	Dunwoody Elementary has most of the apartments which means movement happens a lot. They need to be sprinkled to everyone giving everyone the movement and not just one school.	3/8/2026 7:55 PM
317	Evansdale offers a French language program that is unique within the Lakeside cluster and connects with continued language opportunities at Henderson Middle School and Lakeside High School. Maintaining Evansdale would preserve this successful academic pathway and the strong community support behind it. Closing Evansdale would divide the surrounding neighborhood and potentially move families to different clusters, which would disrupt an established community that has long supported the school and that took a long time to develop. Once disrupted, it would be extremely difficult to recreate. The Evansdale campus	3/8/2026 7:55 PM

	sits on a 10+ acre site that is larger than many neighboring elementary schools and has space for additions, making it well suited to support increased enrollment while maintaining adequate play and parking space. Renovating Evansdale would allow DCSD to improve facilities, increase capacity within the Lakeside cluster, and maintain stability for students and families.	
318	I think the consolidations will be a good idea as long as the schools do not become too crowded. 30 + students in a classroom is a lot for a teacher. I think that while some schools close, they should be upgraded. For example, there should be an adult restroom for teachers on at least every hallway, so they do not have to walk so far and only have access to one adult restroom in the whole school. Door ways should lock electronically. Classrooms can be renovated to have the same furniture.	3/8/2026 7:54 PM
319	I think the scenarios will disrupt strong school communities and in the end would not provide a strong educational environment in the critical early years of education. Smaller learning environments are beneficial for students in these early years.	3/8/2026 7:54 PM
320	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/8/2026 7:52 PM
321	Keep oak grove elementary school open	3/8/2026 7:52 PM
322	Evansdale is the perfect size as is	3/8/2026 7:51 PM
323	Must consolidate to be good stewards of taxpayers money which funds the schools	3/8/2026 7:51 PM
324	Worst survey ever. Are you really going to sift through these open ends? But of course my feedback is going to be negative because if our neighborhood school is consolidated (evansdale) it will wreck our neighborhood property value. I will sell, move to Brookhaven, and dekalb's tax revenue from our neighborhood will plummet from the exodus.	3/8/2026 7:51 PM
325	Consolidations are a poor choice and contrary to recommended early learning best practices.	3/8/2026 7:50 PM
326	I believe it may be a good idea as long as the students impacted by their school closure are the number one priority. One concern is that moving students to other schools, does it mean that the students/teacher ratio gets higher? Also, those schools that are getting students from school closures, are they going to be fitted to welcome those students? Thinking about renovations, facilities upgrades.	3/8/2026 7:50 PM

327	I think elementary schools should be smaller neighborhood schools. I understand that it is more expensive to operate but you have savings on larger middle and high school. We moved to DeKalb based on the smaller neighborhood schools. The plans presented do not show how to alleviate stress on Dunwoody High School. Our children attended Vanderlyn Elementary and am shocked it is on the list. It is a diverse, academically strong, and inclusive community. Preserving stable elementary environments while solving high school challenges aligns with district priorities. I would welcome collaboration between district leaders and both school communities to explore campus-level solutions that address high school capacity while preserving the Vanderlyn community.	3/8/2026 7:49 PM
328	Per usual, this proposal appears to favor North DeKalb while underserving South DeKalb. Most of the closures and conversions are concentrated in the South, while the proposed expansions primarily benefit schools in the North. This pattern raises serious concerns about equity. The scholars and educators in South DeKalb deserve the same level of investment, opportunity, and commitment as students in wealthier and predominantly white communities. They should not be asked to bear the burden of closures, disruptions, and constant restructuring while other areas receive growth and expansion. South DeKalb students are not disposable. They deserve thriving neighborhood schools, strong academic programs, and facilities that reflect a genuine belief in their potential—not plans that shut down their schools and shuffle them elsewhere.	3/8/2026 7:47 PM
329	Evansdale is the perfect size for prek-5	3/8/2026 7:46 PM
330	It's difficult to separate the facilities decisions from boundaries decisions. I have 2 children at Ashford Park Elementary, and we specifically moved to the Drew Valley neighborhood because it is zoned for Ashford Park, Chamblee Middle and Chamblee High. Although the current APES facility is dated, I would urge the committee to re-visit the decision to close APES and make a sincere effort to explore options that keep the facility as a neighborhood school, including updating and expanding the APES campus.	3/8/2026 7:46 PM
331	I strongly believe small school environments are so much better for kids and I think neighborhood elementary schools really bring neighborhoods and communities together, but I also was devastated when Briarlake's declining enrollment lost us our points for STEM and other resources according to the QBE. I wish we could mobilize to get the legislature to finally update the QBE instead. However, I know these are decisions we can't keep kicking down the road. I really am concerned about equity and making sure that in pursuing it we don't create further division and resentment.	3/8/2026 7:45 PM
332	The loss of Evansdale would be crippling to the neighborhood. Young families move here to be close to Evansdale.	3/8/2026 7:41 PM
333	Support scenario 1	3/8/2026 7:39 PM
334	I am not happy about the potential school closures - specifically OAK GROVE ELEMENTARY	3/8/2026 7:39 PM
335	Please do not close Oak Grove Elementary	3/8/2026 7:31 PM
336	Nothing about these plans are trustworthy. Eliminating elementary schools (especially staples in the community) will have an unfair and negative impact on property value and community. Having schools near neighborhoods allow parents with limited transportation or resources to access their local schools and these changes will limit partipation. How can parents reach students in emergency situations? I teach in an elementary school with a population of over 900. Larger elementary schools have MANY disadvantages including crowding in certain areas and mobility issues. This ESPECIALLY impacts younger students and students with disabilities such as limited mobility, sensory sensitivites, autism, and ADHD. There are safety and supervision concerns that come with larger elementary schools. High schools such as Towers and Cedar Grove with RICH histories and a strong alumni population have also become pillars of their communities. Closing these schools will also unfairly impact property value. Due to the HIGH sense of pride these schools, transferring students to neighboring rival school can have negative school community and social emotional impacts. The school transportation issue is impacted by poor working conditions for bus drivers (pay, limited subs, lack of support with supervision) and BOUNDARY issues. There are schools that could possibly need NO BUS SERVICES or very limited services if boundaries are reconsidered. There is VALUE in families being in close proximity to their zoned schools. CULTURE and CLIMATE are very important to DeKalb County (one of the oldest in Georgia) as a whole in a way that outside contractors may not be able to evaluate. There are SO many other ways to save money in DeKalb including minimizing the use of OUTSIDE contractors. Also, putting more $ and	3/8/2026 7:31 PM

	manpower into BUILDING MAINTENANCE can preserve the life of edifices in DeKalb and minimize the cost of renovations.	
337	I disagree with the data that is presented. Oak grove elementary has been steadily increasing their enrollment and has a school choice waitlist of 100 students. The north Druid corridor continues to grow. Closing a school which continuously meets/exceeds academic targets seems counter productive. The small size school, close knit community, and teachers who feel appreciated and valued contribute to the success of our students and growth of our community.	3/8/2026 7:27 PM
338	Consolidating schools sounds like a wonderful idea. Especially when there are newer buildings that can be used and old out of date buildings can be closed.	3/8/2026 7:26 PM
339	Are you considering traffic flow patterns? Time and disruption for the receiving schools preparing for receiving students. There seem to be a lot of issues here that are not addressed.	3/8/2026 7:25 PM
340	It is unfortunate enrollment is down. It is also unfortunate that DCSD has not presented a budget for cost of administration, consultants, contractors, and logistic planning nor budget planning and management for program costs. When budgets need to be reduced, first an internal audit should be published. Budgetary line items such as reducing FTEs, contracts, and limitation of travel touring would be beneficial to students, families, and communities. Have you asked if clusters and communities are unhappy with limited resources? Have neighborhood expansions and planned city improvements been taken into account? What about cost to bring back buildings when expansions are not timely and too costly? What happens when the state reduces dollar per child due to the economic downturn and equity to other areas in the state? Who is truly benefiting and who will truly suffer? Less is always more. More focus on fundamentals and student success rather than more in programs/extra curriculars. The conflict of interest must also be addressed with the consultant group and board members. This current process can be seen as tainted due to corruption and legacy of the prior superintendent. It would be best to cut ties and store trust with communities.	3/8/2026 7:24 PM
341	I trust these initial scenarios are good recommendations, because I don’t know enough about these schools. I wonder though about what I have heard about overcrowding at Druid Hills HS where we are districted. I wondered if lines would be redrawn in some areas currently on boundary lines to shift things around once these major changes are made.	3/8/2026 7:24 PM
342	Terrible idea. These are some of the best community schools in the county.	3/8/2026 7:23 PM
343	I'm concerned because HPM is the owner's rep, and their track record inside the city of Atlanta schools isn't GREAT. Is Dekalb, right now, empowered to be better for the next 25 years? I "think" so...	3/8/2026 7:22 PM
344	The scenarios are terrible. Nobody understands them. You probably don't actually care about feedback, you are just pretending to care.	3/8/2026 7:22 PM
345	The consolidation is necessary if enrollment is declining and there are excess seats in the classrooms. Financially, it makes sense for the county and it creates a more diverse classroom for the students.	3/8/2026 7:20 PM
346	I do not agree with them. I understand maybe having to close some schools, however, it seems like to put so many schools together in one building is a recipe for disaster. Where will the teachers go? There is already overcrowding in some schools. to have 25 students per class does not seem like it is too little. But My fear is that we will have up to 34 in an elementary school and with the way that you do nothing about the behaviors of these students, in elementary, that will be even more stressful for the teacher.	3/8/2026 7:19 PM
347	This process is disingenuous. You ask for feedback but either you are not actually interested or you are not capable because nobody who wants to really have community input would do this this way. This is a terrible survey because the scenarios are fiction. You provided no information why you picked these schools, what data you used, and how the supposed cost savings relate to the cost of the plan.	3/8/2026 7:16 PM
348	I believe in neighbor schools, where a child is a person rather than a number. Teachers and administrators know the student and their family. In large schools this is lost, our children need and are entitled to this sense of community!	3/8/2026 7:13 PM
349	Unsure	3/8/2026 7:07 PM
350	NA	3/8/2026 7:05 PM

351	Please do not close the smaller schools. Neighborhood schools provide so much more than efficiency.	3/8/2026 7:05 PM
352	I don't love that so many small schools are closing. Thankfully neither of my children's schools are currently on the chopping block, but I feel like smaller schools are important to neighborhoods and communities. I am a little concerned about how the expansions will work. Why can't you just reduce class size (thereby reducing the amount of "missing" seats), which everyone knows is better for learning anyway? What guarantee do we have that class sizes won't get even bigger when you're consolidating a bunch of elementary schools into just a few other schools? I don't want my children's class sizes to be any bigger, and I don't want the school to become overwhelming in size. I like that every administrator and specials teacher knows my kids by name. How is that going to be possible if they're managing 900 kids? What will this massive reconfiguration do to provide better educational opportunities and outcomes?	3/8/2026 7:05 PM
353	Some of these don't seem to make much sense. Oak Grove ES is extremely valued by the community. The teachers/staff, parents, and community work very hard to stay in alignment and provide the students with an incredible elementary school experience. It will be a huge hit to everyone that has been a part of Oak Grove in any way. While OGE is an old building, it still functions.	3/8/2026 7:01 PM
354	Evansdale needs to be renovated and expanded. it has plenty of room for expansion. Enrollment is slated to increase to over 600 by 2030.	3/8/2026 6:59 PM
355	Oak Grove ES should not be closed for numerous reasons, including the following: It does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) All the research I found says that the ideal size for elementary schools is a maximum of 350-400 students. Smaller schools are better for the safety, academic performance, and social and emotional well being of elementary age children. In fact, any stated benefits to a big school don't apply until high school or maybe middle school. Stated benefits are more AP classes, more electives, better sports programs, etc. The residential pipeline around Oak Grove, Sagamore, and Briarlake is only growing. Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest)	3/8/2026 6:53 PM
356	Consolidation of facilities appears to be a decision based on financial considerations and not quality of education.	3/8/2026 6:52 PM
357	- Very concerned about closing Henderson Mill Elementary (located on a neutral road and relocating those and other students to Hawthorne Elementary which is in the middle of a neighborhood. The neighborhood will suffer significantly with increased traffic and bus activity. - Henderson Mill Elementary is not in a neighborhood. Moving students to Henderson Mill would not have negative impacts on a neighborhood and property values.	3/8/2026 6:49 PM
358	Chesnut Elementary school will get an overflow of students from closing nearby elementary schools. But it is old and already uses trailers to accomodate students. Modernization, repairs and expansion are imperative in Chesnut Elementary.	3/8/2026 6:47 PM
359	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to	3/8/2026 6:45 PM

	increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top t ier academically does not directly address the district-wide utilization gap.	
360	Closing a school like Oak Grove Elementary, which is above utilization, continues to grow, and is a beacon of success from an education stand point is short sighted at best and devasting from an economic and academic perspective. The decision to close a school of this caliber is not steeped in the orginally stated goal set forth by this consulting firm that has a low understanding of the region.	3/8/2026 6:44 PM
361	I am vehemently opposed to it. While I understand evolving enrollments and the geographic distribution of students necessitate some changes, this proposal unnecessarily obliterates the small, community school feeling that is so welcome and needed in Dekalb County.	3/8/2026 6:42 PM
362	Larger schools have proven to be less effective in giving students the education they need. Midvale Elementary school also has an IB program that makes it very valuable for the community and should be kept off consolidations. Keeping students in local programs vs creating mega schools should be a priority.	3/8/2026 6:39 PM
363	Consider community involvement for any closures and any obstacles to attending local schools.	3/8/2026 6:38 PM
364	Larger schools create worse learning conditions for students in elementary school. It makes no sense to close so many schools and spend a ton of money building onto other schools. It makes more sense to close a smaller number of schools and redistrict along with using school choice to fill the empty seats. It's less disruptive to students, cheaper, and keeping schools smaller build more community for the kids. Close the schools that have low enrollment and don't meet the 450 seat requirement to get federal funding.	3/8/2026 6:38 PM
365	There could be great benefit if all the facilities are given equal attention in all areas after a consolidation is enacted.	3/8/2026 6:38 PM
366	To be honest, this is a horrendous plan. As illustrated, these consolidations look to close south DeKalb poor performing schools to north DeKalb higher performing schools . If you want to see a larger loss of students in the district these scenarios will most definitely accomplish that goal.	3/8/2026 6:35 PM
367	Our community school, Oak Grove Elementary, should not be on the potential closure list. We have wait lists for multiple grades each year. Families regularly relocate to our district. The closure of Oak Grove would have a detrimental effect on our area.	3/8/2026 6:33 PM
368	Oak Grove Elementary is a critical part of our community and should remain open. The school provides a stable, high-quality learning environment that supports both academic growth and the social development of our children. Closing it would disrupt established teacher relationships, peer networks, and support systems that are essential for young students' success. Oak Grove also serves as a central community hub for families in this area. Many families intentionally moved into this neighborhood because of the school. Closing it would undermine neighborhood stability and reduce confidence in long-term school planning within DeKalb County. Oak Grove Elementary is a strong, established school with a dedicated staff	3/8/2026 6:32 PM

	and engaged families. Preserving neighborhood schools like Oak Grove strengthens both the district and the broader community.	
369	Oak Grove Elementary is the heart of the community, and it would be devastating to lose it.	3/8/2026 6:30 PM
370	Evansdale has always been a school of excellence and graduates have been well prepared for further education. The housing market is brisk in this area due to the excellence of Evansdale	3/8/2026 6:29 PM
371	I'm disheartened that the closures are impacting a particular demographic and economic communities. There is a concern with the decline in enrollment; however, there are schools with similar enrollment concerns, but they're not listed to be dismantle, displaced, and disregarded. The initial plan and decision of specific schools/communities is quite loud and overt. I'm hopeful a more equitable plan can be developed and considered.	3/8/2026 6:29 PM
372	The consolidation plan has some schools closing unnecessarily. Schools that are at 500 should stay open and schools that are at least at 430 should have time to get their numbers up to 450 (which is the magic funding number.) We understand that some schools are well below 450, but closing 27 schools seems unnecessary and a huge change. Districts across the country aren't closing this many schools at a time. This plan is hasty. It was initiated by a superintendent we no longer have. The timeline needs to be adjusted and Dekalb must listen to its constituents and regain trust through transparency. We have questions. Has there even been a cost analysis? What if these decisions drive more people from dekalb schools or worse out of dekalb? The county isn't built for mega schools.	3/8/2026 6:21 PM
373	This all makes sense to me. I just hope that the schools that are absorbing the kids from the closing schools are in good condition and can support the increases enrollment.	3/8/2026 6:17 PM
374	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/8/2026 6:16 PM
375	Oak Grove is highly used. Great feeder to school to a thriving high school!!	3/8/2026 6:15 PM
376	Evansdale needs to be renovated and expanded. - Evansdale's lot size is bigger than neighboring schools recommended by the expansion. (10.1 acres). - Evansdale is unique in that it has a large separate play field, two playgrounds, and multiple parking lots. - The site can accommodate additions in the back of the school. It is situated to accommodate	3/8/2026 6:15 PM

	additional/increased traffic as it occupies two sides of a large neighborhood block. - Evansdale's enrollment is projected to increase by over 600 by 2030.	
377	Each student, each community must be considered to have the same value and rights	3/8/2026 6:10 PM
378	There are too many being considered at once. If we have to consolidate, starting with a couple schools that are the most under-capacity seems like it makes more sense. We can look at data and see what went well or what did not go well before closing more schools.	3/8/2026 6:09 PM
379	Evansdale is the elementary school we are zoned for. I personally am ok with potentially closing it but I would want the current zone to remain together and stay in the Lakeside high school zone.	3/8/2026 6:09 PM
380	Evansville has been a strong school. Closing it is short-sighted. However, if there are no other options and Evansdale needs to be merged with another school, it is imperative to keep Evansdale in the Henderson Middle and Lakeside cluster.	3/8/2026 6:05 PM
381	The Evansdale community is very strong and close knit. Some parents went to Evandale themselves and are now sending their kids there. Evansdale is on 10 acres, with plenty of room for expansion/renovations. Closing Evansdale would damage what our community has built over the last 60 years. Our community needs Evansdale so we can continue to thrive! We are also being led by an interim superintendent and a board, most of which are cycling off in mere months. We need to table this discussion until our new leadership is in place and we can make the best decision for district going forward.	3/8/2026 6:05 PM
382	It's a shame that schools are currently not able to receive funding for their existing levels of attendance. Small schools and especially smaller class sizes are very important factors in the thriving development of children. Bills like SB233 need to be revisited so that public school funding can be upheld and the quality and quantity of public education options remains strong.	3/8/2026 6:05 PM
383	Our area continues to steadily grow with young preschool children moving in!	3/8/2026 6:04 PM
384	This without a doubt hurts neighboring communities and home values. Will force people to sell and change the fabric of the community.	3/8/2026 6:00 PM
385	Oak Grove Elementary is not underutilized, it is currently overcrowded. If capacity is an issue, the district should consider adjusting attendance boundaries rather than closing or relocating the school. Oak Grove Elementary is essential to the Lakeside/Oak Grove community, and closing or moving it would significantly impact local families. It is also worth noting that the Lakeside/Oak Grove area generates roughly 1.7–2× the district’s average property tax base per student, reflecting the strong support our community provides to the district. For these reasons, I strongly urge the district to keep Oak Grove Elementary open.	3/8/2026 6:00 PM
386	Thank you for the opportunity to provide feedback on SAP Round 1, Scenario 1. I am submitting this as a current DCSD parent and long-time engaged leader at the school and district level. I want to be upfront about where I am coming from: I believe the district faces real, structural challenges around facility utilization and budget efficiency, and I am genuinely committed to being part of finding solutions that work at the district level, not just for our school. What I hope to offer here is feedback grounded in the district's own stated criteria, accurate data, and a sincere interest in helping the SAP team build stronger, more defensible scenarios in Round 2. I also want to be direct about something that distinguishes our community's posture. The Ashford Park Elementary School community is not coming to this process with a reflexive demand to leave our school alone. That approach has been tried by other communities in past redistricting efforts and tends to produce outcomes that satisfy no one. Instead, our community has engaged seriously with the data and is coming to the table ready to work. At this juncture, focused solely on buildings, our primary ask is grounded in the district's own criteria: Ashford Park Elementary does not meet the conditions for closure. It should be removed from the closure list in Round 2 and replaced with scenarios that address what APES actually needs, which is expansion, not elimination. I. What Scenario 1 Gets Right I want to start with what I believe the scenario does well, because these elements should be preserved and built upon in Round 2. - No split feeders: Maintaining clean cluster alignment, where elementary schools feed into a single middle and high school, is the right structural approach. It builds cohesive communities, supports stable student transitions, and makes parent engagement more meaningful and sustainable. This should remain a foundational design principle in all future scenarios. - Moving toward right-sized facilities: Consolidating toward standard facility targets of approximately 900 students for elementary, 1,200 for middle, and 1,600 for high school, and exploring grade-band configurations where they make	3/8/2026 5:58 PM

geographic sense, reflects sound long-range planning. We support this direction. II. APES Does Not Meet the Criteria for Closure DCSD has communicated five key factors used to identify facilities for potential closure: proximity of schools to where students live, proximity of schools to one another, building adequacy and capacity, recent facility investments, and a cascading use approach that prioritizes the district's strongest buildings. When evaluated against these criteria honestly and specifically, Ashford Park Elementary does not belong on the closure list. I want to address each factor directly. A. Utilization: APES is the most overcrowded school in the district, not an underutilized one. Schools being considered for closure are typically underutilized, with a median utilization around 65%. APES operates at 173% utilization, with 829 students enrolled in a building designed for 480. It is the most overcrowded elementary school in the district and the only school in the Chamblee Cluster that is both severely overcrowded and experiencing sustained enrollment growth. Enrollment for the 2026-2027 school year is projected to reach approximately 835-888 students, continuing a pattern of year-over-year growth that has held consistently since students returned following COVID-19. This school does not have an empty seat problem. It has a capacity crisis that is getting worse, not better. The district's 2030 enrollment projection of approximately 700 students for APES is not consistent with any observable trend at this school and has not been accompanied by the supporting methodology that would allow our community to evaluate it. Projecting a decline of this magnitude over four years at a school that has grown year-over-year since COVID requires a clear and transparent explanation. We are asking the SAP team to share the data and assumptions behind that number. Until that information is provided and can be independently evaluated, it should not serve as a basis for a closure decision. B. Proximity and cascading use: There is no nearby school capable of absorbing APES students. The cascading use approach assumes that students from a closed school can be absorbed by nearby facilities with available capacity. That condition does not exist here. John Lewis Elementary, the only elementary school within close proximity at 1.1 miles away, currently enrolls 817 students in a 984-seat building. At a 90% utilization target, that leaves approximately 69 available seats. That is not a meaningful receiving option for a school community of 829 students. All other surrounding elementary schools are more than three miles away, creating significant transportation burdens for families and undermining the district's own stated goal of placing schools close to where students live. The cascading logic that may work in other parts of the district does not apply in this part of Brookhaven and Chamblee. C. Building adequacy and recent investment: The renovation underway will substantially improve APES adequacy scores. APES is currently undergoing a $26 million renovation to bring its electrical and HVAC systems up to code in a building approximately 75 years old. This work is scheduled for completion in August 2027. Once finished, the facility score for APES will improve substantially, moving the building well beyond the threshold associated with schools being considered for closure. Closing a school mid-renovation, after the district has committed and is actively spending $26 million of public funds on that building, would represent a significant and difficult-to-justify waste of district resources. This is directly at odds with the fiscal responsibility that this process is meant to demonstrate. It is also worth noting that this renovation does not add incremental capacity. The building will be improved but not enlarged. That fact is itself the clearest possible argument for what should come next: a serious investment in expanding APES, not closing it. III. The Right Solution for APES Is Expansion Ashford Park Elementary is not a school with a demand problem. It is a school with a supply problem. The building cannot accommodate the community it serves, and every observable trend indicates that gap will continue to grow. DCSD has stated clearly that Phase 1 of the SAP is focused on buildings. We are responding on that basis: the APES building should remain open, and it should be expanded to meet the real and growing demand in one of the district's densest residential corridors. If the building's current capacity of 480 students is the constraint driving concern, that is a solvable problem that calls for investment, not closure. APES sits in a central, high-density location that is meaningfully better positioned to serve the surrounding community than facilities that sit up against I-285 or at the edge of geographic boundaries. The right question for Round 2 is not whether to close APES, but how to build the capacity this community actually needs at the location where students already live. The idea of closing a school, already at your ideal volume, to require students to travel further goes against all stated goals. We are not focused on boundary changes, rezoning, or relocation scenarios at this stage. Those conversations may be appropriate as more information becomes available in future phases, but they are premature while the fundamental question of this building's future remains unresolved. What our community is asking for now is a Round 2 scenario in which APES is removed from the closure list and expansion is evaluated seriously, with a broader plan to right-size this facility. IV. Our Community’s Priorities Underlying everything are two priorities that will carry through every phase of this process: maintaining the full APES community's trajectory within the Chamblee Cluster, feeding to Chamblee Middle

	and Chamblee High School, and keeping our attendance zone together as a unified community. The Chamblee Cluster represents a high-performing academic environment that our students depend on. Any scenario affecting APES must also ensure continuity of academic standards and services, aligning students to schools and programs that can meet them where they are. Whatever comes next in this process, those commitments are not negotiable. V. What Would Make Round 2 More Productive To engage as constructively as possible in Round 2, our community is asking for the following: - Remove APES from the closure list in Round 2 and include scenarios that address its capacity through expansion or rebuild. - Publish the methodology and supporting data behind the district's 2030 enrollment projection of 700 students for APES, which contradicts observed year-over-year growth trends. - Provide a school-by-school closure rationale with supporting data for all 27 schools proposed for closure in Scenario 1. - Include a transparent cost estimate for scenario buildings and expansions before community feedback is solicited. This must include how it is feasible to consider closures fully dependent upon major construction expenses and how those expenses can, even at the highest level, have a timeline that aligns with available E-SPLOST funding. - Explain the sequence of the February 9 funding pull from Stoneview, Rock Chapel, and Kingsley relative to their appearance on the Scenario 1 closure list. This sequence raises serious questions about whether closure decisions were made before community input was ever solicited. If decisions have already been made for any phase of SAP, then be transparent about them now - do not continue to erode the already crumbling trust of the community in DCSD. - Clarify whether theme schools included in Scenario 1 are intended to transition to neighborhood schools, and why buildings such as DAA, Kittredge, Wadsworth, and Nancy Creek are excluded from the scenario. VI. Closing Ashford Park Elementary is a thriving, high-performing school community in the middle of a major district investment. It is over-enrolled, growing, and deeply rooted in the Chamblee Cluster. By every criterion the district has stated it is using to identify schools for closure, APES does not qualify. Closing it would not solve a capacity problem. It would create one, displacing a school community that the data shows is only growing. We are not here to simply protect the status quo. We are here because we believe the right solution exists and we want to help build it alongside the district. We are ready to be creative, and we are ready to work. What we are asking is that the SAP team bring us into that process with the transparency and genuine partnership this moment requires. I appreciate the work this team is doing and look forward to continued collaboration in Round 2.	
387	I think the consolidations are great for business but there are bound to be fights between rival schools that are now in one building. Where will all staff be placed?	3/8/2026 5:56 PM
388	I understand that DCSD has too many open seats and therefore too many facilities (many of which are in poor condition due to age). I also believe that DCSD has not always made the best decisions in the past which causes the community to lose faith in their decision making abilities that claim to best serve the students (ex. The decision to hire and extend the contract of the last superintendent, as well as the decision to purchase a building for office space near Northlake mall when those funds could have been better spent elsewhere). I also believe that there is a lot of bloat in the central office that should be addressed along with potential closures of schools. I also have concerns about the proposed expansion projects at elementary schools where those school properties do not have room for lateral expansion, and how creating a much larger elementary school would not only impact the students directly but also traffic patterns in the areas immediately around those schools.	3/8/2026 5:56 PM
389	I grew up in Dekalb County Schools and was part of the lakeside/ Druid hills/ shamrock merger which was disastrous and ended up forcing several of us to lose valuable years of our education to chaos and poor planning. I think suggesting to shut down high performing is unwise, shows a lack of insight into the needs of all people, and confirms for me that DCSB is not interested in what is best for students. If schools need improvement, focus on making improvements. Don’t shut down currently well performing schools that are at capacity.	3/8/2026 5:54 PM
390	Hopefully this would address some overcrowding at Lakeside high school.	3/8/2026 5:51 PM
391	My child attends APES. Given that it is an affected school, I obviously have concerns. I believe that APES really is a gem of a school, given how it is located in the middle of Ashford Park neighborhood. Many families walk their kids to/from school and for others it is typically a short driving distance. Unfortunately, the enrollment has exceeded the school's capacity to where students are learning in portables/trailers outside of the school. This really is not acceptable given the tax dollars that this school district contributes to DCSD. The kids that attend this school deserve better and the school has, unfortunately, been operating at this capacity for longer than is acceptable. The school and neighborhood really deserves a major	3/8/2026 5:51 PM

	addition to the school. Unfortunately, I've seen major additions or new schools built in the surrounding area while this school has been mostly ignored, as fare as facilities go.	
392	I Do not want to see elimination of neighborhood elementary schools . They create a solid community for families and students. Placing 6th grade with high school is a bad idea. Maturity between 6 and 12 grade is very different. 6 grade girls and boys being exposed to 11 and 12 grade boys and girls could create real problems	3/8/2026 5:48 PM
393	With all due respect to the process, I feel this questioning is flawed. As a parent, I am unqualified to comment as to the building conditions and adequacy and have to defer to you all. The rationale you provided for the high schools seems reasonable but again, I am not in a position to determine adequacy of one school over the other. I don't understand the proposed closure of Ashford and Oak Grove schools as no clear justification was provided and they both seem like successful schools and with strong parent support. So it would be better to start with programs and determine which ones work, which schools which they work best at and how best to expand or improve. As for proposed initiative, as mentioned before, the high school closure seems intact.	3/8/2026 5:44 PM
394	Ashford Park ES is a distinct, vibrant school community that should not be fractured into parts and divided among other ES schools in Brookhaven. It is a neighborhood school in a safe area (not on major roads which is not ideal for a school with young children). The only reason APES should close is for a complete rebuild that will be in line with "new model" elementary schools with seats for 900. Given the population growth in the area, DCSD should be working more closely city of Brookhaven about their residential projects to see how many family dwellings will be available in the next 10 years...not using faulty data with sweeping assumptions that are leading to misleading projections.	3/8/2026 5:39 PM
395	Sounds like a very bad idea. Do not close OGE. The OGE model is working.	3/8/2026 5:36 PM
396	Let’s start with the facts, starting with a look at the header of the SAP page - “ Empty seats quietly drain resources that could otherwise support more opportunities for students.” Oak Grove Elementary is projected to be at 96% capacity in the 26-27 school year. WHY is this school on the list? It is model example for Dekalb, so you have it listed to CLOSE? This is not a “well-informed, considerate decisions based on the data and input from the community.” Please Dekalb, take a look at the facts, data, and input. If you did, it is crystal clear that OGE is a growing, thriving school. It has one of the TOP special needs programs, serving the kids that truly need it. Oak Grove Elementary is a school you should be highlighting, not closing. I have sat in the meetings, listened to board members, looked at the resources - this just doesn’t make sense.	3/8/2026 5:30 PM
397	The area selection seems targeted	3/8/2026 5:28 PM
398	Firmly against closure of Mclendon Elementary school	3/8/2026 5:24 PM
399	I disagree with the consolidations and would like to see Oak Grove Elementary maintained as is.	3/8/2026 5:24 PM
400	Please don’t close oak grove elementary	3/8/2026 5:22 PM
401	I appreciate the intention of wanting to use funds efficiently and appropriately. While I agree with most of the ideas presented, I found myself questioning why "Low Cost" needs to be part of the triangle. I applaud efficient and responsible use of funds, but I don't think we should have "Low Cost" be a core tenet of something so vital as education. When I am looking for an excellent healthcare experience, I don't search for the lowest-cost provider. When I want an exceptional experience in general, very rarely does that also end up being the lowest-cost scenario. Why then, are we basing this extremely important and impactful decision on what is "low-cost"? I think that is deeply flawed and if we are beginning with that as our foundation, I don't see how we can expect results approaching anything above average.	3/8/2026 5:21 PM
402	The SAP program appears to have the potential to be very effective. However, there are a few concerns that I believe could create challenges. The primary issue involves combining multiple grade levels into one group. It doesn’t seem practical or beneficial to mix older children with younger children, as their developmental needs and learning levels can differ significantly.	3/8/2026 5:20 PM
403	If consolidation takes place, there will be too many students that have to stay after school to have teachers help them. Too long for bussing. Too many parents who wont be able to meet other parents.	3/8/2026 5:20 PM

404	I'm scared. I want what is best for the overall district but I'm scared what's best for the overall district may not be best for my family.	3/8/2026 5:19 PM
405	i believe consolidation in areas where it makes sense with under 50% enrollment. However my biggest concern before any decisions are made is that DCSD conducts its own self examination of misuse of taxpayer funds and competencies that just aren't working and use that money for facilities.	3/8/2026 5:17 PM
406	I am strongly opposed to the closure of Ashford Park Elementary school. We moved to Ashford park neighborhood specifically so that our children could attend the elementary school and Chamblee Middle/High. It's a strong elementary school with strong neighborhood involvement. I am in support of re-zoning APE so that it's right-sized to the appropriate student body size, but don't want the school to close.	3/8/2026 5:15 PM
407	Ashford Park Elementary School is a thriving neighborhood school and the community is the heart of the school's success. I believe it of utmost importance to keep the community together and within the same cluster for middle and high school as well. We need more information in order to have more robust feedback. In the initial proposal, only closure of the building was discussed. What is the plan for these students? A real discussion and feedback cannot be given until we are given the whole picture, a detailed timeline and more transparency. If this specific information is not available by next year or if the community is divided, we will likely consider private schools in the area.	3/8/2026 5:14 PM
408	We recently purchased our home in Oak Grove elementary. A huge decision making factor for us was the elementary school. It is why we chose to move where we did and would be devastated if our kids weren't able to take advantage of it.	3/8/2026 5:13 PM
409	3 elementary schools sharing one middle school building for example: loses sense of community that children of this age need. Many children need to be bussed in and hard for younger students. Longer days. May save money but there is a lot to lose.	3/8/2026 5:13 PM
410	Has the initial scenario used the most current enrollment data? What kind of modeling is being used to project further growth in the areas served by the school? Why would you take top performing schools and break them up? Instead we should be looking to fully utilize top performers and model them.	3/8/2026 5:12 PM
411	I do not agree with closing Ashford Park Elementary or breaking up the current Chamblee cluster	3/8/2026 5:11 PM
412	Lifelong community member. I believe you need to focus on a cluster approach —like Atlanta Public Schools did - you should keep existing clusters, which have their own identities and programs, and then analyze how to consolidate or restructure within each CLUSTER. Evansdale Elementary needs to be expanded, because its footprint will work for the Lakeside cluster. It has 10 acres and can be expanded.	3/8/2026 5:10 PM
413	Providing access to quality education and programs is a big priority	3/8/2026 5:10 PM
414	Evansdale Elementary is a jewel in the Dekalb School System and a rockbed for the local community. Most of the neighborhood specifically moved here for the Evansdale elementary school for their children. If you send our schools somewhere else, it will not only affect property values but degrade our close knit community while closing one of the top schools in the county. DO NOT CLOSE EVANSDALE. Also, more families are moving back into the neighborhood and Evansdale will be growing in size.	3/8/2026 5:09 PM
415	As a parent, I appreciate the community aspect of smaller schools. However, most of these smaller schools are old and in need of rebuilding. If small schools are closed in favor of larger facilities, how will the district ensure lower student/teacher ratios that are condusive to meeting the needs of all students and how will the district ensure the safety of so many students in such a large building?	3/8/2026 5:08 PM
416	It's not right to consolidate schools that are mostly on south end of dekalb. These schools have been underserved for YEARS and closing/consolidating is the "easy" way out and a way to not address the actual issues that exist in these communities	3/8/2026 5:05 PM
417	I think these changes will hurt our students.	3/8/2026 5:00 PM
418	Our children attended Oak Grove Elementary, and it is an amazing school - teachers, stem, programs, leaders - the students that attended OGE are thriving and in the top academic track at Lakeside. Eliminating this school would be removing a shining star for DeKalb. If there is an	3/8/2026 5:00 PM

	opportunity to redraw lines to redistribute more students to OGE, it would be well-received by parents. People want this kids to attend OGE. When a school is excelling, closing it just doesn't make sense.	
419	Closing Ashford Park and splitting the children up into other schools is not an option that should be considered.	3/8/2026 4:57 PM
420	I understand the data and reasoning backing the closures and know its a tough decision. We are districted for a school that could likely close (Kingsley) and are concerned about the disruptiveness. We of course love the school and neighborhood and would love to keep our kids there. We have a current 1st grader and will have a kindergartner fall 2027.	3/8/2026 4:56 PM
421	Leave Lithonia High School as is. Each Summer a New flux of people move here from other places, especially since we have New Apartments built in our Lithonia Neighborhood. As soon as you attempt to close, the need will rise again. This area is usually low-income based and needs to remain its own community of students, and not merge with any other high school. Don't need gangs in Miller Grove, more fights from angry LHS students not wanting to be at another High School, causing unwanted tension. Lithonia High is its own jungle, that just finally calmed down significantly.	3/8/2026 4:56 PM
422	I do not want to see Ashford Park closed. I understand smaller schools are more expensive to run, but believe that they benefit the students. I think that closing high performing schools is not in our students best interest.	3/8/2026 4:55 PM
423	I understand having facility plans as an option, but to throw out closing schools (ashford park) without a well thought plan is careless and indicative of leadership not actually caring about the impacts to the affected communities.	3/8/2026 4:54 PM
424	Seems pretty drastic, yet understandable. It would be nice if the county could come up with a plan to boost the economies of the families and neighborhoods near these schools, which would also attract newer families with children to help fill the empty seats.	3/8/2026 4:53 PM
425	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years.	3/8/2026 4:53 PM
426	Shut it down. It's horrible school	3/8/2026 4:50 PM
427	I think it is a disservice to Dekalb County and the hardworking taxpayers that choose to live and work here. We specifically moved to Brookhaven/Chamblee so our children could go to Ashford Park Elementary and are devastated to find out it might be closing.	3/8/2026 4:42 PM
428	Do not close our elementary school. We need a neighborhood school	3/8/2026 4:39 PM
429	I notice that the potential capacity expansion projects are only in the northern segment of the county. The map screams continued inequality.	3/8/2026 4:39 PM
430	I am shocked that the district allowed this to go out when the underlying data is incorrect. Let's take Oak Grove. Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Our school has been given 3 new positions to serve the 40 additional students we will have next year. This is just 3 students of the 450 QBE (minus the 40 pre-K) and we have all our specials and activities. Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 1 year. Even if you closed Oak Grove and expanded Sagamore and Briarlake to 600 each, it would not hold all the students in all 3. I have found a number of schools with a similar pattern to Oak Grove, including the school that Dr. Hogan mentioned in the retreat. It is growing, with high-quality schools, but HPM's data show it is losing 17% of its students within 2 years. That is insanity. We were told that there were all these meetings about how to create scenarios, but it is quite clear they basically looked at acreage. Oak Grove is one of the highest-quality schools in the district, and we have the largest percentage of students with disabilities of any general elementary school. Not looking at that as part of a scenario is disheartening.	3/8/2026 4:37 PM

431	Although Oak Grive is not at full capacity, neither Briarlake or Sagamore Hills are either and could not absorb the number of children from Oak Grove. This will cause much more traffic congestion driving and busing the children further. The Oak Grove community is such a tight knit community built around this school. People move to this neighborhood for this high performing school.	3/8/2026 4:35 PM
432	Oak Grove Elementary is mostly at capacity with waiting lists. Trying to distribute theses students elsewhere would disrupt the enrollment in all area elementary schools. This would lead to overcrowding and over capacity schools without the infrastructure and staff to have the superior schools that DeKalb county is accustomed to.	3/8/2026 4:34 PM
433	I think consolidating at this time is a step in the wrong direction for North Dekalb. Young families are living in and moving to the Chamblee/Brookhaven area for close proximity to Atlanta, Buckhead, and Alpharetta for work. This scenario will take away motivation for young families to live in these areas.	3/8/2026 4:33 PM
434	Oak Grove Elementary is the best school ever.	3/8/2026 4:25 PM
435	Oak Grove Elementary is the greatest school in the nation	3/8/2026 4:25 PM
436	Oak grove elementary school is the best school ever	3/8/2026 4:25 PM
437	Four of the 10 top-performing elementary schools are on the list for closure. Rather than closing schools that are peak performers and disrupting vibrant school communities, the district should focus on creating a better learning environment for children currently in low-performing schools. I also question how much savings will accrue when taking into account expensive additions and renovations to other schools--and whether the district has considered cutting back on administrators while maintaining support for small, local schools.	3/8/2026 4:25 PM
438	Oak grove elementary is the best school that has ever existed.	3/8/2026 4:24 PM
439	Strongly against closing Oak Grove Elementary. If area schools must close, there are compelling reasons why it should be a number of others, not the least of which is test performance.	3/8/2026 4:23 PM
440	The lack of a proposed or recommended plan for those communities affected by the potential closures is discouraging. I understand the need to assess the portfolio of facilities first, but why begin suggesting closures without a clear path forward?	3/8/2026 4:22 PM
441	The DCSD goal is 88% utilization. Oak Grove is already at 89% of utilization, 447 students out of a capacity of 504 students. It is projected to have 487 students for the 2026-207 school year, which is 96% of capacity. If Oak Grove closes, students would be absorbed primarily by Sagamore Hills and Briarlake. Together, these schools cannot absorb the 447 students at Oak Grove. In addition, the redevelopment of North Dekalb Mall into Lula Hills will add a significant number of students the nearby schools, which would make them unable to absorb other students. Oak Grove is one of the highest performing school in the review group. It has 94.2% content mastery and 95.3% readiness.	3/8/2026 4:21 PM
442	Oak Grove is not underutilized. The area is growing. Also, it’s a high performing school.	3/8/2026 4:20 PM
443	Concern about closing neighborhood elementary schools, especially HMES	3/8/2026 4:19 PM
444	Do not want Avondale Estates taken out of Druid Hills cluster	3/8/2026 4:16 PM
445	Dear Members of the Dekalb County School Board, I am writing as a parent at Ashford Park Elementary School to express my strong concern regarding any potential plans to close the school or redistribute to other schools within the district. Ashford Park Elementary is more than a school building; it is the heart of a deeply connected community and a vital part of our neighborhood’s identity and stability. Our elementary school represents a close-knit community where students, teachers and families have built strong relationships that support both academic success and emotional development. Many of the children who attend the school live within the surrounding neighborhoods and share similar community ties. This closeness allows friendships, parent involvement and support systems to flourish, creating an environment where students feel safe, supported and motivated to learn. The students at Ashford Park Elementary are thriving academically. The school has built a strong academic culture supported by dedicated teachers, involved parents, and motivated students. Disrupting a successful environment by redistributing students across multiple schools’ risks undermining the progress and stability that families and educators have worked hard to create. Our school also benefits from exceptionally strong parent involvement. Families volunteer their time,	3/8/2026 4:16 PM

	support school programs, and work closely with educators to ensure student success. This partnership between families and educators is one of the most valuable strengths of our school community. Fragmenting the student body across different schools will inevitably weaken this network of support. In addition, decisions made at the elementary level have long-term implications for middle school and high school progression within Dekalb County. Children who begin school together often continue through the district's feeder patterns, building relationships and stability that support their educational journey. Breaking apart this cohort now may create unnecessary disruption for students and families for years to come. Many families have also made significant financial commitments by purchasing homes in neighborhoods specifically connected to this school community. Stability in school zoning is an important factor in neighborhood planning and property values throughout Dekalb County. Changes that close schools or redistribute students can create uncertainty for homeowners and for families who chose to invest in these communities because of the schools. We understand that the district must make difficult decisions to serve all students across Dekalb County, but we respectfully ask the Board to consider the impact that closing or redistributing Ashford Park Elementary School will impact the students, families and neighborhoods. Ashford Park Elementary is a thriving community school that supports strong academics, engaged families, and long-term student success. Preserving the integrity of this school community would serve the best interests of both students and the surrounding neighborhood. Thank you for your time, and your continued service to the students of Dekalb County. We appreciate your consideration and listening to the voices of families who care deeply about the future of our Public Schools. Sincerely, Whitney Ridgeway (Charlotte's Mom-Current 1st Grader) Ashford Park Elementary School	
446	Too many elementary schools are closing. Neighborhood schools are important, especially in younger grade levels.	3/8/2026 4:15 PM
447	Disproportionately proposed closings are in South Dekalb	3/8/2026 4:14 PM
448	As a former Title I ESOL educator I fully appreciate the inequities in existence in DeKalb County. I fully recognize the overcrowding present in the north end of the county and the under enrollment in the south end. I'm very aware of the optics of high performing and relatively wealthy neighborhoods opposing consolidation with schools and clusters that perform lower on tests and have lower income levels. I believe with all of my heart that many of the most brilliant students and best teachers are in "underperforming" Title I schools. AND I believe that DCDS needs to operate within the realities of the broken system we find ourselves in. SAP is not going to "fix" schools being funded by property taxes, it is not going to "fix" standardized testing or schools being judged by their scores. Families with the privilege of choice will continue to choose high achieving, well performing schools and consolidating or rezoning these families to schools and clusters they perceive as under performing will only serve to create an exodus of families (and money and test scores) from the county- exacerbating and spreading the very problem you're attempting to solve in South DeKalb to North DeKalb. I have serious concerns about the lack of transparency in how these scenarios were generated. The current scenarios contradict SAP member feedback, disregard what is already working in communities, ate are short sighted. Furthermore, they provide no clearly communicated goals or plan on how much money they even save the district. In feedback sessions we were provided contradictory information as to whether consolidating buildings would mean buildings being closed or repurposed or any facts or figures suggesting what the savings of these actions might equal or how they might be spent. The suggestion that Ashford Park Elementary close, with ZERO answers and frighteningly little consideration of where its current 850+ enrollees would land is alarming and neglectful. As a collective of teachers, parents, students and neighbors the Ashford Park Community has worked hard to create the community that currently exists and *keep* families in our neighborhood public schools. Certainly the school, its attendance zone and the Chamblee cluster have not always looked as they do today, but rather have been shaped by years of hard work and choices by its community members. It feels both insulting and punishing to threaten breaking up our community and feeder system after such investment in our local public school system. Ashford Park is already near enrollment of nearly 900 (the stated target enrollment for elementary schools post-SAP) and has a strong and thriving community. We have the opportunity to be a model of what community looks like with a larger population- if we're kept in tact! While I can appreciate the cost of empty seats in our district, consolidation of buildings as a solution feels like asking students, teachers, and community members to pay the price for DCSD's poor choices to date. These stakeholders should be the last in line for any necessary disruptive changes, and I would expect county administration and board members to step up first. Instead we are facing scenarios with huge student populations, significant increases to student commute times,	3/8/2026 4:14 PM

	impactful disruptions to students' charted educational paths and the dissolution of communities while the Board settles into its new $6.5 million dollar administrative offices.	
449	Disproportionately purposed are reflected in South Dekalb County	3/8/2026 4:13 PM
450	Está bueno	3/8/2026 4:12 PM
451	Less students in class will have a huge impact on students learning. Teachers will have better control over the class and students will be able to learn without interruption of other students if the classes were over crowded.	3/8/2026 4:10 PM
452	I worry if you close elementary schools and move kids to farther schools and make the student to teacher ratio increase at those schools, you will see families leave the Dekalb county public schools.	3/8/2026 4:08 PM
453	Evansdale is not just a neighborhood school; it is a high-performing, district-wide academic asset. Closing this school would not only dismantle an internationally recognized program but would actively drive families out of DCSD. • Proximity Drives Engagement: A primary reason for Evansdale's robust parent involvement is its accessibility. Many families walk or drive just a few minutes to the campus. If students are moved to a more distant location, the deep volunteer culture and financial support of the Evansdale PTO—which currently funds vital enrichment and STEM resources—will be lost. • Failure of Larger Models: As a family zoned for Pleasantdale, we intentionally opted into Evansdale's lottery for its intimate community feel. Large, new facilities like Pleasantdale often lack this essential connection. • Leadership and Trust: We were deeply disappointed by how leadership handled the closure of the Spanish immersion program at Pleasantdale. Evansdale, by contrast, has maintained excellent communication and stability, which is why families stay in the system. • Global Recognition: Evansdale holds the LabelFrancÉducation from the French Ministry of Foreign Affairs—a rare distinction in the U.S. This French immersion program is a "choice" draw for the entire district. • The K–12 Pipeline: This is not a standalone program. It is a hard-won pathway (Evansdale → Henderson → Lakeside) that parents and teachers built over decades. Closing Evansdale breaks this entire pipeline. • Proven Growth: As a Georgia Title I Reward School, Evansdale is a leader in academic growth. It successfully combines language immersion with high-level STEM, including national robotics and tech fair recognition. Retention vs. Displacement I personally know at least seven families in the Pleasantdale zone who choose instead to attend "community-feel" schools like Midvale, Oak Grove, or Evansdale. Closing these successful, smaller hubs will not force families into larger consolidated schools; it will push them to leave the DeKalb system entirely. Evansdale represents exactly what DCSD should strive for: high academic growth, specialized global programs, and intense community investment. The district should preserve and replicate this model, not dismantle it.	3/8/2026 4:07 PM
454	Oak grove is not underutilized. It is located in a growing, prosperous area with substantially younger families, hence likely to remain in high demand. And the students perform at a high level	3/8/2026 4:06 PM
455	Will the consolidations mean there will not be overpopulated schools? fair populations? How will you make sure that resources will be available to meet academics student needs , especially those schools who may be combining with schools who are not high risk schools? Will the schools be rezoned? How will the commutes for teachers, students, and parents be impacted ,as it relates to the consolidations, pending where they will be rezoned (hope I am stating this correctly)	3/8/2026 4:06 PM
456	Do not close our beautiful community school	3/8/2026 4:04 PM
457	We would be devastated if Oak Grove Elementary school closed. There are several interior-performing schools nearby that should be considered for closure before Oak Grove.	3/8/2026 4:02 PM
458	Using plans from someone under fraud investigation is a terrible idea. Also, you cannot close both evansdale and Henderson mill without huge backlash. If you close one you may find more support	3/8/2026 4:02 PM
459	n/a	3/8/2026 3:59 PM
460	Keep Brockett Elementary Open	3/8/2026 3:56 PM
461	Dekalb County has had its recent share of challenges in maintaining a stable Board of Education. If fact, millions of dollars have been "lost" due to bad decisions of prior superintendents. It seems shameful to me that Dekalb would be moving forward with any type	3/8/2026 3:56 PM

	of consolidation without having any kind of stability in place. We don't even have a superintendant. And how much are we still paying for past hiring mistakes? A consolidation plan needs to be led by a board that is a TEAM and has a leader with integrity. When we have that in place you will see declining numbers rebound because people will actually have faith in the district. Making decisions about consolidations without having built a board people can trust will just create chaos. You want children to have equal offerings across the county and yet as a board we can stop hiring criminals. To take away neighborhood schools that create commuinty and civic pride and ask us to "trust" that the board has difficult decisions to make about facilities is just ludicrous to me at this time based on Dekalb County's BOE track record.	
462	I do not want McClendon to close	3/8/2026 3:52 PM
463	Do not split our community and keep us within the Chamblee Middle and High School cluster. Ashford Park Elementary is what it is because of many years of tight community bonds. Our school environment will suffer if we are split. Moreover, we are one of the top schools in the district performance-wise. Parents will only stay in the system if we stay within a high performance cluster. Shame of Dekalb for not expanding Ashford Park earlier, and resorting to closing/repurposing the school. We are ok moving to a different building, as long as we stay together.	3/8/2026 3:52 PM
464	Students in South dekalb are already sitting with a ration of 1:22 or more making it more difficult on the staff and students closing schools and combining them further stressing students and staff is ridiculous. The curriculum needs to be upgraded and not so heavily focused on the MAP test scores. Especially for students who are 5&6 sitting at a computer testing. Students should be actively learning with their hands and brains not rotting in front of a screen. There is a time and a place for technology but it is being heavily used as of today.	3/8/2026 3:51 PM
465	My impression is that it is looking at current usage and not forecasted usage. Oak Grove is expected to have an increase in student enrollment starting next year.	3/8/2026 3:49 PM
466	Ashford park elementary should had been expanded years ago. Shame on the county for not doing it for so long and now proposing a closure. The top priority for us is to stay within a higher performance cluster (Chamblee middle and high), even if it means the Ashford Park school community moves to a different building. We want the community to stay together, with all three neighborhoods.	3/8/2026 3:45 PM
467	Suggesting closure of schools like oak grove elementary that have rising attendance and a school choice wait list just to require additions to another nearby school to be able to make enough space seems short sighted at best. The other schools that would need to absorb these kids don’t even themselves have space which suggests overcrowding and larger classrooms which hurts the long term prospects of the children that are affected.	3/8/2026 3:42 PM
468	DCSD, I am writing as a member of the Ashford Park community regarding the ongoing discussions surrounding potential school rezoning. Our neighborhood understands the complexity involved in these decisions and appreciates the district’s commitment to balancing enrollment, resources, and student outcomes across the system. Ashford Park has long been a deeply connected and engaged community. Families here have built strong relationships through neighborhood schools, shared activities, and consistent community involvement. Maintaining that cohesion is important not only for students and parents, but also for the broader stability of the community. As the district evaluates options, we respectfully ask that consideration be given to an approach that preserves the integrity of the Ashford Park neighborhood by keeping the community together while potentially relocating it as a unified group to a new school if necessary. Maintaining neighborhood continuity would allow families to remain connected while still supporting the district’s broader enrollment and capacity goals. Neighborhood schools play an important role beyond academics. They help create strong community ties, encourage parent engagement, and foster long-term investment in local schools. When communities remain intact, these relationships often translate into higher levels of volunteerism, fundraising support, and collaboration that benefit the entire school ecosystem. Additionally, rezoning decisions can have broader impacts on local demographics, housing stability, and long-term financial investment in a community. Families often choose neighborhoods based on school alignment, and maintaining clear, consistent community assignments helps support neighborhood stability and long-term planning for both residents and the district. Our goal is not to resist change but to advocate for a solution that balances district needs with community continuity. Keeping Ashford Park together—whether at its current school or as a unified neighborhood reassigned to a new school—would help preserve the strong community fabric that supports students both inside and outside the classroom. Thank you for your time, consideration, and continued work on behalf of our students and	3/8/2026 3:37 PM

	schools. We appreciate the opportunity to share our perspective and look forward to remaining engaged in the process. Sincerely, Chris Ridgeway ridgecm@gmail.com	
469	What I love most about Briarlake is the size. Having a population of around 350 allows us to create an incredible Community that is quite Impactful on our whole family. I invited all of the kindergarten moms over to my house in the fall to start community building for my younger son. When I walk in the building I know all the staff and a lot of the students. Everyone knows my children and they feel known and seen. I just don't know how we could build community or do school wide events that mean so much to my children like a fall festival or talent show with 900 kids in a school. I also love the property- all the trees and space for The kids to run. The garden where they learn so many valuable hands on science lessons. I assume there would be little open space with a new, large school. We lost a lot of families during Covid to private schools that could afford it and I feel like public schools are just recently getting their groove back and trust in the community as a great option again, but I fear during the transition families that can choose private will and then we will have an even further division of haves and have nots and the families that carry the schools and volunteer might leave and I worrry what will happen to the public schools. I love love our school and I know all my friends feel the same about their schools in our area- but the one thing we all love is the size and how small they are. I am worried this will destroy so much good.	3/8/2026 3:37 PM
470	The rationale of why DeKalb is looking at student reassignment was well explain. What was lacking from the presentation is details regarding the impacts to any potential school expansions. Class sizes are already large AND understaffed; the impact of adding additional students to the classroom will only make matters worse, and detract from the learning.	3/8/2026 3:31 PM
471	I am completely opposed to this change. We have an interim superintendent, a past superintendent being investigated for fraud, and a member of the board who did not disclose her previous involvement with the fired gentleman. Perhaps the BOE needs to get their house in order before completely destroying and upending the lives of thousands. Our neighborhood schools are the reason people move to our area. I know of many families that have 3 generations that are/have attended the same schools.	3/8/2026 3:31 PM
472	I agree with the consolidation method	3/8/2026 3:29 PM
473	Consolidation makes sense, sadly. But I would also encourage looking into 4 day school weeks to help with financial issues that have raised from superintendents and mental health of students and staff.	3/8/2026 3:28 PM
474	The current facility scenario, which leans toward consolidation or closure, is fundamentally flawed because it prioritizes short-term administrative efficiency over the long-term health of the Brookhaven community. Ashford Park Elementary is far more than a building; it is a proven "success hub" where academic excellence and deep-rooted neighborhood ties intersect. Forcing a consolidation risks creating impersonal "mega-schools" that dilute the student-teacher connection and strip the community of its identity. Furthermore, the logistical fallout—including increased commute times and the loss of a walkable school environment—places an unnecessary burden on families who moved to this area specifically for its localized educational quality. Rather than managing a decline through closure, the district should pivot toward a "build-up" strategy. Adding a second floor is the most strategic solution for a land-locked site, allowing the school to increase its capacity and modernize its facilities without sacrificing precious playground or green space. This vertical expansion transforms the school into a 21st-century learning environment, providing room for specialized labs and collaborative workspaces that meet modern standards. It is a move from a scarcity mindset to an investment mindset, recognizing that enrollment naturally follows high-quality programs. Ultimately, investing in a second floor signals a commitment to the neighborhood's growth and stability. Closing a successful school essentially punishes the very excellence the district should be trying to replicate. By choosing to expand upward, the district protects property values, maintains the school's status as a community anchor, and ensures that Ashford Park remains a cornerstone of educational success for the next generation of Brookhaven families.	3/8/2026 3:28 PM
475	I understand the need to consolidate buildings and there is no easy way of making everyone happy. However I'm upset that the years previous when a company was called to access scenarios and decided to build multiple new facilities int eh south that are not being used is unfortunate. We missed the boat on that and now people are paying the price, hope were not falling into the same situation with these decisions now.	3/8/2026 3:23 PM
476	I think it'll be good to merge some schools so staff can be better allocated. Although, I would like to see Columbia ES stay open as they have pre-k-5th grade ID programs. So, my friends	3/8/2026 3:22 PM

	child can stay there the whole time and be familiar with the teachers.	
477	The basic argument for closing schools is to reduce the cost per student. If one looks at the declining enrollment figures beginning at 2017, it is clear that there was a precipitious drop in enrollment at about the same time as the pandemic. However, that enrollment has not recovered. Those students didn't disappear. Before closing schools, making impossible to recapture those missing students, the reason(s) they have not returned should be identified and eliminated. The cost per student is derived by dividing the entire district budget by the population. However, the 2026 Budget Book shows that only 60% of that budget goes to the schools. So, the cost per student is only 60% of the amount shown. When business declines, most businesses attempt to reduce cost in all areas, including management. The budget book actually shows school administration and central services increasing for 2026. If the goal is truly to put students first, perhaps it's time to spread the pain a little wider. The enrollment trend before and after that large drop is about the same and very small.	3/8/2026 3:19 PM
478	I would also like to take a look at central/administrative overhead and changes that might be able to be made.	3/8/2026 3:19 PM
479	Elementary age kids should not be lumped in together.	3/8/2026 3:17 PM
480	Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/8/2026 3:15 PM
481	I expect there a non-teaching staff consolidation greater than the school consolidation.	3/8/2026 3:14 PM
482	It is deplorable to close Cedar Grove HS. If seats are empty make it more attractive so more parents will enroll their children. I would like to know why so much money was put into other schools (McNair) that don’t have the numbers Cedar Grove has. If it closes I will definitely be pulling my kids out of the district.	3/8/2026 3:13 PM
483	Closing the Ashford Park school is something we don’t agree with.	3/8/2026 3:08 PM
484	While Ashford Park Elementary School has been an amazing place for my daughter to attend school, I understand that it is old and overcrowded - hence the need to close the school. The community there is unmatched and that is what I do not want to lose. That is why we bought a home in this school zone. We wanted to be a part of an amazing group of people who support and love our school community so much. I want nothing more than to keep our community together, no matter what building that lands us in, and to continue with that same community in the Chamblee cluster.	3/8/2026 3:08 PM
485	We are all confused at your choices of schools to close. Why are you trying to consolidate Tucker area schools to Livsey when Livsey already has many trailers and no land to expand? Midvale has room to expand and is already an IB school that feeds into other IB schools. The way which this was presented feels very poorly thought out. It’s scary to hear that your school is going to be closed with no plans for where our children will go.	3/8/2026 3:08 PM
486	unfortunately it's needed	3/8/2026 3:07 PM
487	I have mixed feelings regarding this. On one hand, I support the goal of providing students with better technology and more specialized teachers. On the other hand, I am concerned that closing schools will force students and parents to travel further by bus or car. Longer commuting times can be a significant burden on families and may impact student engagement.	3/8/2026 3:06 PM
488	I understand the need to consolidate and while bold, these decisions make sense in the long-term. My family's biggest concern is keeping the Ashford Park and Drew Valley Community together and ensuring we remain in the Chamblee Middle and Chamblee High cluster.	3/8/2026 3:04 PM
489	I feel as though some of the schools should close based on their enrollment, up keep of the building, and performance.k through	3/8/2026 3:02 PM
490	Concerned	3/8/2026 3:00 PM
491	I have significant concerns about the proposed consolidation scenarios, particularly as they relate to high-performing and well-utilized schools like Oak Grove Elementary. School consolidation may appear to offer efficiencies on paper, but it often produces unintended consequences that negatively affect both student outcomes and surrounding communities. Larger consolidated elementary schools—often approaching or exceeding 900 students—can diminish the close-knit learning environments that are especially important for young children. Elementary students benefit from stable relationships with teachers, administrators, and peers,	3/8/2026 2:57 PM

	and those connections are easier to build and sustain in appropriately scaled neighborhood schools. Oak Grove Elementary is a strong example of a school that is already working well. My daughter is currently in first grade there and has experienced tremendous academic growth during her first year. The school's leadership, instructional support, and strong community culture helped her transition successfully and thrive academically. Experiences like this illustrate why successful schools should be preserved and supported rather than disrupted. As a professional working in public education, I recognize that districts must regularly evaluate enrollment trends, facility utilization, and long-term financial sustainability. However, consolidation should be used carefully and strategically, focusing first on areas with sustained and significant underutilization. In communities like the Lakeside cluster, where schools are performing well and continue to serve engaged families, consolidation risks weakening the very conditions that contribute to student success. Instead of consolidating successful neighborhood schools, the district would be better served by studying what makes schools like Oak Grove effective and using those insights to strengthen other schools across DeKalb County. For these reasons, I encourage the district to reconsider consolidation scenarios affecting Oak Grove and similar schools and instead pursue a more targeted, data-driven approach that preserves high-performing neighborhood schools.	
492	Evansdale has 10.1 acres and has a large lot, two playgrounds, and outdoor areas. Evansdale can accommodate traffic and its enrollment is projected to increase.	3/8/2026 2:50 PM
493	Cedar Grove High School should not be closed. Our community needs this school. We have more students in our area than NcNair. Our property tax contributions should be used to fund our area & not used to relocate our children.	3/8/2026 2:48 PM
494	Numbers driven without other consequences	3/8/2026 2:47 PM
495	I believe the closing of the majority of Tucker elementary schools is short sighted given the over increase in young families moving to Tucker. I also believe reducing classroom size should be addressed before consolidations are done (to ensure there is adequate classroom space for students in 22-23 person classes.	3/8/2026 2:47 PM
496	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/8/2026 2:46 PM
497	I strongly oppose the closure of Oak Grove elementary. Oak Grove is one of the best	3/8/2026 2:46 PM

	elementary schools in the district. It is central to the sense of community in this area. A significant share of students walk to school each day, which will be impossible if the school closes, driving up transportation costs, reducing exercise and good habits for the students (and their parents) and damaging a core aspect of community here. Utilization of Oak Grove is well above the district average. Moreover, neighboring elementary schools lack the capacity to absorb Oak Grove students, which would require expensive and disruptive expansion projects. In addition, it is likely that more of the neighborhood will turn over in the coming years, as people nearing retirement (and whose children are grown) look to move out and are replaced by younger families with school-age children. These factors are likely to have an increasing effect on Oak Grove's enrollment in the coming years.	
498	High schools should be improved not closed. Build additions to middle schools.	3/8/2026 2:45 PM
499	Oak grove is not underutilized, the area is growing High performance school	3/8/2026 2:45 PM
500	It feels incredibly short sighted to close a well loved school just due to size of the facility grounds. Breaking up our school community will be detrimental for all of us.	3/8/2026 2:45 PM
501	not for it	3/8/2026 2:45 PM
502	• At 10.1 acres, Evansdale's lot size is bigger than neighboring schools recommended for expansion. • Evansdale has a large, separate play field, two playgrounds, and multiple parking lots. Our site can accommodate additions in the back of the school and still have ample play and parking space. • Evansdale is uniquely situated to accommodate increased traffic, as it takes up two sides of a large neighborhood block. • Evansdale's enrollment is projected to increase to over 600 by 2030.	3/8/2026 2:44 PM
503	The initial scenario is incomplete. Families are herded like cattle into thinking that they are making a choice but in the end, we are pushed to the slaughter. It would be wise to pump the brakes considering we currently do not have a permanent Superintendent, the SAP was created by a felon Super and is continuing with Ms. Smith who came with Horton, and there is a lack of buy-in and trust from the community. These scenarios presented do not align with Sauce's 3 C's - Clarity (absolutely none!), Consistency (nope!), and Coherence (definitely no). The more serious issue with DCSD is lack of trust. Is SAP about enrollment, programs, or money?	3/8/2026 2:43 PM
504	Agree Huntley Hills should expand but needs new facilities.	3/8/2026 2:41 PM
505	I strongly oppose the initial facilities scenario. It seems the scenario was proposed more or less unilaterally by the consulting firm the county has hired. While the firm professes to be working in consultation with a parent committee, the committee's role is merely advisory, and the consultants appear to have proposed a radical and aggressive approach that bears no resemblance to anything the committee had discussed or been contemplating. Most troubling of all, the consulting firm seems to be making all decisions purely on the basis of arbitrary enrollment quotas and physical building criteria keyed to those quotas. In particular, the criterion of "educational adequacy" appears to have nothing at all to do with educational adequacy. I do not understand how or why Oak Grove has been targeted for closure. The consultants appear to have used inaccurate data for some of their historical enrollment figures. It is not clear how they concocted their extrapolation of future enrollment even given their historical figures. Taking their dubious methodology at face value, it seems there are other schools that would have fallen within their crosshairs before OGE based on the data the consultants have shared. Summarily closing OGE would risk squandering the institutional knowledge and community culture that the school has developed over decades. I fear the consultants are myopically focused on bean-counting criteria that may be important but are merely means to an end. The purpose of our public school district is to educate our children. The consultants' model seems designed in a way that completely fails to account for that purpose. If these consultants decide to sacrifice Oak Grove on the altar of supposed economic efficiency, I fear my children and many others will be made immeasurably the poorer for this unforced error.	3/8/2026 2:40 PM
506	We moved to our neighborhood specifically for our 3 children to attend Oak Grove Elementary School. Having a small community-based school has been transformative not only for my children's education, but for us to develop connections, friends, neighbors and a COMMUNITY that we didn't have as we are from out of state. People actively seek to move into the Oak Grove area because of the amazing reputation of our school and our community. I can't speak to other neighborhoods/elementary schools because we have only lived in this area, however I can not imagine how it would be possible to have anything like this community if our children	3/8/2026 2:40 PM

	were combined with other schools into one giant school. You lose the personality of a school that way, you lose the pride of going to your community school that our children feel, and you lose the community and sense of belonging. We felt this when my older daughter went to Henderson Middle School - with a school that large it is IMPOSSIBLE to have a sense of community. Closures of these elementary schools, especially Oak Grove, will drive many families to private schools (for those that can afford it) or outside our our neighborhoods to other school districts, and enrollment will decline further.	
507	This is a vital part of this community. It’s a center of excellence.	3/8/2026 2:38 PM
508	We have bigger lot than neighboring schools, growing population	3/8/2026 2:35 PM
509	Oak Grove ES should not be closed for numerous reasons, including the following: It does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) All the research I found says that the ideal size for elementary schools is a maximum of 350-400 students. Smaller schools are better for the safety, academic performance, and social and emotional well being of elementary age children. In fact, any stated benefits to a big school don't apply until high school or maybe middle school. Stated benefits are more AP classes, more electives, better sports programs, etc. The residential pipeline around Oak Grove, Sagamore, and Briarlake is only growing. Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest)	3/8/2026 2:31 PM
510	Oak Grove does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake’s current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake’s enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/8/2026 2:31 PM
511	I do not support the proposed consolidation scenario as it relates to Evansdale Elementary. While I understand the district’s need to address aging facilities and improve efficiency, closing	3/8/2026 2:30 PM

	Evansdale would create more harm than benefit for students, families, and the broader Lakeside cluster. Evansdale is one of the few schools in the area with a campus large enough to support meaningful renovation and expansion. Its acreage, multiple play areas, and traffic-friendly layout make it far better suited for modernization than many of the schools recommended to remain open. Enrollment projections also show that Evansdale will continue to grow, which further supports investing in the existing site rather than eliminating it. Additionally, Evansdale's French program is a unique and long-standing asset within the Lakeside cluster. The program thrives because of deep community involvement, cross-school collaboration, and continuity from elementary through high school. Relocating or disrupting this program would weaken a successful model that has taken years to build. Finally, dividing the neighborhood across multiple clusters would undermine community cohesion and create unnecessary instability for families. A facilities plan should strengthen communities, not fracture them. For these reasons, I strongly encourage the district to prioritize renovating and expanding Evansdale rather than closing it, and to maintain the neighborhood's alignment within the Lakeside cluster.	
512	Absolutely not	3/8/2026 2:27 PM
513	Though some consolidation may be needed, does not seem right to close 4 of our immediate area elementary schools. School enrollment may be decreased partly due to immigration activities going on currently.	3/8/2026 2:27 PM
514	The preliminary scendario seems to make sense, leaving 3 elementary schools in Dunwoody (one for each area of Dunwoody). Chesnut has the most land to work with, in terms of expansion and is a great school in the top 5% of Title 1 schools. It is very overcrowded and in desperate need of more space. Dunwoody also needs space and I'm wondering if the closing is Vanderlyn could open up more expansion opportunities for DHS? Please, please however do not break up the Dunwoody cluster. Chesnut is next door to Peachtree Middle School and our neighborhood walks to both.	3/8/2026 2:27 PM
515	I have not seen an explanation as to why enrollment is down. The population in Atlanta has been growing and while not everyone has kids I would think the total number of kids are increasing. Where are the going if enrollment is down. If you can show me that there are less kids in Atlanta then fine consolidation should be considered but if they are going to private schools then overcrowding schools is only going to cause enrollment to drop further. I'm not understanding the root cause analysis done for this problem or the actual fiscal projections anticipated by consolidating and it would be great to have transparency with actual numbers	3/8/2026 2:26 PM
516	The suggested closings and reconfigurations looks at strict numbers of students and not what the communities need. OGE is one of top performing schools on the county and is recommended to close. That would bring down the ratings in the entire county. Also, the numbers used do not seem to be accurate with the growth currently seen my opening of CHOA and construction developments in several areas, the proposed future enrollments do not seem to reflective of this.	3/8/2026 2:24 PM
517	It is important to maintain our community cohesiveness. The Ashford Park and Drew Valley Neighborhoods should remain united and continue to feed into Chamble Middle and Chamblee High schools even if the Ashford Park Elementary School gets closed.	3/8/2026 2:22 PM
518	I am strongly against the proposal to close Oak Grove Elementary school. I am a mom of a kindergartener at Oak Grove Elementary. We moved from San Francisco to Atlanta for work last summer and bought our house because we wanted to send our kids to Oak Grove Elementary. When we were doing research for schools before moving, OGE stood out with its highest score in the great Atlanta area in all aspects (OGE has a score of 8 on GreatSchool while Briarlake has a 7), a reasonable teacher to student ratio, and a diverse student population. The past year that we spent at OGE has been amazing with all the teachers, curriculum, facilities, and programs, and we look forward to sending our 3-yr-old there once he's old enough. It would be an extreme shame to close down such an outstanding school. And to be honest we will move to another county if OGE gets closed.	3/8/2026 2:22 PM
519	The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made.	3/8/2026 2:20 PM
520	The stated goal for the district is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization. It is projected to be at 96% by 2026-2027. The enrollment at Oak Grove has increased for four years in a row. At this rate, Oak Grove should reach or	3/8/2026 2:19 PM

	exceed full capacity within the next 2 to 3 years. With the redevelopment around North DeKalb, Mall and corporate Square there could conservatively be 55–145 additional elementary students over the next few years. There is also much development around the Emery area, which shows that there is not a structural decline. Oak Grove is also considered one of the highest performing schools in this review group. To close Oak Grove, when it is exceeding utilization targets and demonstrates sustained growth plus ranking in the top tier of academics does not directly address the district wide utilization gap.	
521	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/8/2026 2:19 PM
522	I support district growth, but I strongly oppose moving our neighborhood out of the Dunwoody cluster. Peachtree Industrial is a major safety hazard for children and is not a walkable boundary. Our family chose this community because of the Dunwoody schools and the stability of the current feeder pattern. Please find solutions that allow the district to grow while keeping established neighborhoods in their existing clusters.	3/8/2026 2:18 PM
523	There is no clear justification for closing Oak Grove ES, a high-performing, heavily utilized school. Closing high-performing schools would negatively impact the school system over the long term: it would incentivize parents to enroll their children in private schools, thus exacerbating the underutilization problem.	3/8/2026 2:18 PM
524	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. •	3/8/2026 2:17 PM

	Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap. Finally, if all the above data is an insufficient argument - while it is understandable that DeKalb County wants to fully utilize schools, it does not make sense to use utilization as the primary driving factor of deciding which school(s) to close. It is a poor decision to close high performing schools in the district just to "make numbers". It is better for students' education overall to close under-performing schools and sending those students with resources to the higher performing schools to support the increased student numbers.	
525	I'd like to see research/data on the impact of larger classroom sizes as well as larger school populations. I'd like to see how the district is calculating in the non numerical cost of this. This includes but is not limited to: how does larger classroom sizes impact learning, how does larger school sizes impact sense of belonging and safety (which trickles down to learning). Without a full understanding of the ripple effect of consolidating schools then how can DCSD RESPONSIBLY move forward with SAP?	3/8/2026 2:16 PM
526	Oak Grove ES should not be closed for numerous reasons, including the following: It does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) All the research I found says that the ideal size for elementary schools is a maximum of 350-400 students. Smaller schools are better for the safety, academic performance, and social and emotional well being of elementary age children. In fact, any stated benefits to a big school don't apply until high school or maybe middle school. Stated benefits are more AP classes, more electives, better sports programs, etc. The residential pipeline around Oak Grove, Sagamore, and Briarlake is only growing. Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest)	3/8/2026 2:16 PM
527	Oak Grove is not underutilized. The area is growing and it is a high performing school.	3/8/2026 2:12 PM
528	Oak Grove does not align with the stated objective of addressing under utilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization and projected for more students next year. Enrollment has increased for four consecutive years at the current pace. Oak Grove is likely to reach or exceed full capacity within 2 to 3 years. Oak Grove is also one of the highest performing schools in the review group. This area is not experiencing structural decline. It is seen concentrated growth. Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district wide utilization gap.	3/8/2026 2:07 PM
529	In agreement on combining low attendance schools but seems its only affecting South Dekalb. Needs to include the whole district.	3/8/2026 2:06 PM
530	Consolidating by closing Evansdale Elementary, Henderson Mill middle and Lakeside High	3/8/2026 2:06 PM

	schools creates huge problems for all neighborhood students around these two schools. There are a lot of families that live here because of good school district. These schools should in fact be renovated or expanded.	
531	Porque razón quieren hacer esto	3/8/2026 2:04 PM
532	Evansdale needs to be renovated and expanded	3/8/2026 2:00 PM
533	Close lowest performing schools first and offer vouchers	3/8/2026 1:59 PM
534	It would be a tremendous loss to our community to close this neighborhood school. It is high-performing, well attended and actively sought after (both in terms of buying in the dictrict and for school choice). I think the current proposal is incomplete, unclear and seems poorly informed and poorly understood (including by the school board and the SAP committee themselves). Reassignment (to where? Who knows?) will almost surely be harmful to our children.	3/8/2026 1:58 PM
535	Oak grove is a great school. Our kids love it there— there is a great community and losing this school would be a determinant to our family and community. Our school has plenty of involvement and enrollment and activity.	3/8/2026 1:57 PM
536	I am a former Evansdale Elementary student and I would hate to see it shut down. It is an amazing school that provides a strong education for many students and should continue to for many years.	3/8/2026 1:57 PM
537	Consolidation makes sense as long as student teacher ratios can be optimized for best learning environments cost reduction and efficiency are important, howevershould not be the top .priority	3/8/2026 1:57 PM
538	Concerned about the closure of Midvale elementary	3/8/2026 1:56 PM
539	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/8/2026 1:56 PM
540	Please leave oak grove open	3/8/2026 1:55 PM
541	The proposed consolidation including Oak Grove raises concerns. Current enrollment trends show Oak Grove is growing and already near the district utilization target. Closing a near	3/8/2026 1:54 PM

	capacity, high performing school would remove needed capacity and shift students to neighboring schools that are already highly utilized. This could also limit student choice options for families within the cluster. Updated projections that include growth in the Clifton Corridor should be considered before consolidation decisions are made.	
542	I think more people will continue to move to DeKalb and our schools. Maintaining the possibility for growth and nimbleness will be important. Having strong neighborhood public schools is part of why people live in our community vs Fulton county.	3/8/2026 1:51 PM
543	Consolation of schools will have to be carefully planned. As middle schoolers shouldn't be with HS students. This will definitely cause overcrowding and lack of resources for both grade levels	3/8/2026 1:42 PM
544	Closing Ashford Park makes zero sense as the area is already busting at the seams. Without providing context of where all of those children would go, just created mass chaos. Beyond that, my overwhelming feedback is to keep Ashford Park in the Chamblee cluster. Ashford Park, Montgomery, and Huntley HIlls together is a tight knit community. All of our kids play recreational sports together at Murphey Candler, Cowart YMCA, and ACYA. The 3 neighborhoods together send most of our kids to the same preschools. The kids all go to the same summer camps in the community. It would break apart a strong community.	3/8/2026 1:38 PM
545	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/8/2026 1:33 PM
546	I do not think all of these community schools should be closed. They are very important to the community. Smaller schools are better for children and families. I'm concerned about not being able to walk to school, which is one reason we bought the house we did.	3/8/2026 1:30 PM
547	I think it is beter not to consolidate. Students benefit from smaller classes.	3/8/2026 1:30 PM
548	I don't think its good to close any schools. I think it would be better for ALL Dekalb county schools to have the same rating in order to not close any schools. The reason why many parents don't send their kids to low rated schools is because they want the best school for the kids to learn. There are many parents in dekalb that send their children to Gwinnett schools because they have the BEST ratings. I believe that Dekalb schools should focus on getting the schools the best education by getting. Schools like Stone Mountain, Decatur, Brooke	3/8/2026 1:29 PM

	Haven, and lithona have the lowest rating and I think that all schools should all equally get the same amount of attention in order to get more students and more resources.	
549	I'm worried about the traffic situation at Montgomery and how we will deal with morning carpool with even more students attending.	3/8/2026 1:28 PM
550	Oak Grove Elementary has great facilties.	3/8/2026 1:27 PM
551	Oak Grove Elementary is functioning at capacity based on the data parent have seen with a robust waiting list. The community is strong and vibrant with an active parent organization volunteering extensive hours. We already have a prior elementary school consolidation (2225 Heritage) with a building that has been only occasionally utilized over at least the past 20 years. If the decision to include Oak Grove was due to the aged infrastructure then the report should clearly state disinclination for a new building.	3/8/2026 1:27 PM
552	Im very sad that Mclendon elementary is on this list because I really value that it is a small school that cares about its kids and gives them a real sense of community. I think its important especially now to show kids that they're important and more than a dollar sign on a spreadsheet.	3/8/2026 1:26 PM
553	I hope the fact that Doraville United will be going to Chamblee Middle and then High doesn't mean the district end up eliminating the magnet program from Chamblee. This very successful program is one of the best programs DCSD has to offer, and it delivers results every year. KIttredge, and then Chamblee middle and high, are top performers. Facilities and teachers are already built for these students' success. Magnet programs are elevating this district's performance and appeal among public education options in metro Atlanta. Maintaining strong academic pathways for motivated students should remain part of the district's long-term vision, regardless of how facilities and boundaries evolve.	3/8/2026 1:25 PM
554	The facilities scenarios do not make sense to me based upon the provided data. High schools that were overcrowded 25 years ago are still overcrowded today, and appear projected to remain overcrowded with the offered scenario. Bringing the county wide average down looks good in summary tables, but the cost of the scenario is truly born by those students attending overcrowded facilities. The generational decline in the Dekalb student population is an opportunity to correct the decades of overcrowding at those facilities. I cannot support a plan that does not address that overcrowding. An alternative resource allocation that saves on facility count and addresses overcrowding is possible, but it has not been presented yet.	3/8/2026 1:25 PM
555	I completely understand the initial facilities scenario and I currently don't oppose these scenarios.	3/8/2026 1:22 PM
556	Incomplete. Buildings are a small part of the picture. What happens to the student body, clusters, districting, etc does seem a bigger concern and there is little shared on this.	3/8/2026 1:19 PM
557	I think there is danger and short-sightedness in targeting neighborhood schools. Many need renovation and expansion not closure (evansdale, oak grove , Lakeside). By eliminating smaller schools, I promise you that dekalb will continue to lose its tax base as families choose other districts to move to and those here send their kids to private schools. That is part of what is going currently. The waste and fraud and poor management in Dekalb county school system as led directly to the current issues. Save the smaller, well supported neighborhood schools and spend your large budget more wisely!	3/8/2026 1:19 PM
558	During the intimal scenarios, Evansdale is projected to close. However, Evansdale sits on 10.1 acres with multiple parking lots, playgrounds, and uniquely situated to accommodate increased traffic. Additionally, unlike many other schools nearby, Evansdale is projected to increase to over 600 by 2030.	3/8/2026 1:19 PM
559	At first glance it seems as though it will have a big impact on community feel and engagement. Making smaller, neighborhood elementary schools into much larger schools from a larger area will be a challenge to preserve the strong community ties the smaller neighborhood schools bring.	3/8/2026 1:18 PM
560	The initial scenario represents a bold attempt to address the mismatch between the number of facilities and the number of students that the District serves. While painful, it is clear that a significant number of facilities must either be repurposed to non-teaching spaces or closed.	3/8/2026 1:17 PM
561	Oak Grove Elementary is the crown jewel of Dekalb Schools and has been for many decades. People move to the district specifically to attend even when they plan to exit for private high	3/8/2026 1:15 PM

	school. Oak Grove is also a draw for special education and they were the first in Dekalb to embrace special education inclusion.	
562	I understand that some schools could benefit from being consolidated if they are severely under occupied and run down but Oak Grove is incredibly loved and they get a lot of support from parents and surrounding businesses.	3/8/2026 1:13 PM
563	I agree with the logic of closing facilities to reduce operating costs. However, some thought needs to given ro which schools close in order to not lose some of District's programs. For example, Midvale is an IB school. That program/pathway does not move to another school if it's closed. I think the District is right to have robust programs at the top of the triangle. I would agree that it is a higher priority than school size and costs. Do not effectively kill this IB program in Tucker by closing Midvale. Why should the Druid Hills cluster have two IB schools? Addtionally, Midvale is a neighborhood school in an established neighborhood. It would be detrimental to the neighborhood of that space functioned as anything else other than a school. Office space would be the worst.	3/8/2026 1:12 PM
564	It is hard to understand impact without indication of where students will end up and how that would be handled. The facilities themselves aren't S important as where will the affected students move, how will they be moved, what will districting look like and how changes would affect middle school and high school assignments.	3/8/2026 1:10 PM
565	I understand that there are more seats than children attending, but the answer to that is not to close schools that are thriving. Ashford Park Elementary is a booming school community, please don't close one of the few schools that is doing well	3/8/2026 1:09 PM
566	In past years, downward enrollment projections have been used to deny rebuilds and additions to schools. The projections were wrong and schools were left in extremely poor conditions. Why not determine and address causes for low enrollment and mismanagement of district funds to maximize money in DCSD instead of consolidating schools? Also, not enough specific info about what will be done with empty schools and what will determine what is done with them.	3/8/2026 1:09 PM
567	The consolidations look good and make sense.	3/8/2026 1:08 PM
568	- Evansdale's lot is bigger and provides more potential expansion space than neighboring schools for whom expansion has been recommended - Evansdale already has two playgrounds, a separate play field, and multiple parking lots. The space behind the school could accommodate additions while retaining ample room for play and parking. - Evansdale's enrollment is projected to increase to over 600 students by 2030	3/8/2026 1:07 PM
569	Evansdale should not be closed. It's on a large piece of property, has 2 playgrounds, has ample room to grow and its enrollment is projected to increase.	3/8/2026 1:05 PM
570	I hope the fact that Doraville United will be going to Chamblee Middle and then High doesn't mean the district end up eliminating a county-wide, cross-district magnet program from Chamblee. These very successful program is one of the best programs DCSD has to offer, and it delivers results every year. KIttredge, and the Chamblee middle and high, are top performers. Facilities and teachers are already built for these students' success. Magnet programs are elevating this district's performance and appeal among public education options in metro Atlanta. Maintaining strong academic pathways for motivated students should remain part of the district's long-term vision, regardless of how facilities and boundaries evolve.	3/8/2026 1:04 PM
571	I am supportive of keeping our current communities together in a common attendance zone. I do think closing some older facilities is a good idea as long as the communities stay together, the programming, funding and teacher to student ratio supports the needs of the students, and the facilities are not over capacity. I am also open to different grade banding or split feeders if that helps with any of the capacity and programming issues.	3/8/2026 1:00 PM
572	Oakgrove ES is one of the highest Performing ES in the state. To increase enrollment, consider renovating the school to take it out of the 1950s when it was built. Then perhaps less parents would be encouraged to send their kids to Globe or a private school.	3/8/2026 12:56 PM
573	As a high achiever magnet program parent, the last thing I want is undue tensions between magnet families and attendance zone area families. I think the magnet program should be expanded, using a closed or unused elementary building close to Dunwoody/Chamblee, another 4-6 building in the Lakeside/Tucker area and Wadsworth. Then, extensively renovate Henderson Middle's buildings and fields to be the High Achiever Magnet 7-12 for all three 4-6	3/8/2026 12:56 PM

	HA Magnet schools. This way there are no competing interests between attendance zone students and magnet students. If an area becomes overcrowded, the magnet program will be unaffected, as it is based on a lottery with set seats available. Henderson Middle is a former High School with a large football/soccer field and baseball field. It does require extensive renovations to become a world class magnet 7-12, but it is on property already owned by Dekalb in an easily accessible and central location for all three 4-6 magnet schools. Henderson Middle is currently underutilized and will become even more underutilized if Pleasantdale leaves the cluster. In this area, many families bypass Henderson Middle and choose to send their children to GLOBE or private schools for middle school, and then back to Lakeside for High School. The former Heritage/Globe site can be a junior high 7-8 for the Lakeside cluster in the absence of Henderson Middle.	
574	Our school, Oak Grove Elementary, is one of the star schools of the county. You need to consider factors other than real estate when making your plan. There are hundreds of students on the waiting list to come here. The community embrace of our school is tight. Don't break up a wonderful asset like Oak Grove Elementary for the sake of geography.	3/8/2026 12:53 PM
575	I think it is terrible to close so many schools including mine because schools are like a community.	3/8/2026 12:49 PM
576	I would prefer small schools that we pay more for than large schools for less. Reason is small environments promote better learning for kids.	3/8/2026 12:48 PM
577	I am opposed to the plan that would, in essence, eliminate our neighborhood schools.	3/8/2026 12:46 PM
578	I think school closures will cause an unfair increase to class sizes at the schools that remain open.	3/8/2026 12:46 PM
579	I would prefer not to shut down and/or split up staff from a well rated and highly regarded school. Would keep intact Oak Grove and any other that meets those criteria. Area schools give children an introduction to community.	3/8/2026 12:44 PM
580	Oak Grove ES is at 88% utilization which is what the district says it wants. Enrollment at OGES has increased the past four years. As an itinerant teacher serving students with special needs, it is a challenge to find space at OGES. Where will these students be served? The closest schools, Briarlake and Sagamore Hills can't absorb Oak Grove students.	3/8/2026 12:43 PM
581	The consolidation seems like a good idea, when it comes to not having to spread funds thin. But, how will consolidation affect students in other living further away and bus travel times?	3/8/2026 12:37 PM
582	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026	3/8/2026 12:36 PM

	recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
583	Evansdale Elem has the acreage to expand and unlike some other schools in the county has a growing enrollment.	3/8/2026 12:34 PM
584	We believe that the smaller school sizes are critical to achieving enhanced performance of students. The maps provided are extremely difficult to read even with a magnifying glass. one of the items mentioned is that commuting times will be decreased, but I don't see that is likely in the plan that is currently possible to visualize. The school clusters seem to be massive, and the current buildings in the area of Oak Grove Elementary have all been neglected for far too long. There needs to be a major investment in the buildings in this area to make this attractive. Right now, the Oak Grove Elementary school building is old, but it offers a small environment with excellent teachers where students can excel. If you move students to a different school with much larger enrollment, but the facilities are still out of date, I don't see how that could possibly be successful.	3/8/2026 12:30 PM
585	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment at OGE has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake Elementary Schools: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/8/2026 12:29 PM
586	Will not be able to withstand consolidation. Already needs major renovation.	3/8/2026 12:29 PM
587	I disagree with Oak Grove Elementary on the possible closure list. Our community is an active and involved partner in Dekalb County education.	3/8/2026 12:24 PM
588	I don't understand the reason why three of the top performing elementary schools in the district are slated for closing. Oak Grove, Ashford Park and Vanderlyn are some of the best performing elementary schools. You should be figuring out ways to copy what they are doing and increase enrollment in the better schools, not shuttering them. Feels like DCSD wants to punish schools and neighborhoods that have performed well.	3/8/2026 12:24 PM
589	I feel that it is taking a big step in the right direction	3/8/2026 12:16 PM
590	Evansdale's lot size is larger than the other schools recommended for family.	3/8/2026 12:13 PM

591	Please keep Oak Grove Elementary	3/8/2026 12:10 PM
592	I don’t support Kinsley and Vanderlin being closed. Dunwoody is a growing area and by closing 2 schools there will be overcrowding.	3/8/2026 12:05 PM
593	The schools slated for expansion and the schools slated for closure make no sense. Evansdale’s property is 10.1 acres, bigger than neighboring schools that SAP has determined should be expanded. Evansdale also has a great space for expansion: a large separate play field, a playground in front and a playground in back. There is easily enough room for a needed building expansion in the back without losing out on important play space and parking spaces. Evansdale also has the highest forecasted utilization in the Lakeside cluster. Why make parents travel further to a school whose immediate attendance area is going down when Evansdale’s own attendance is projected to increase? SAP data projects attendance of Evansdale at 600 by 2030: the “magic number” for efficiency as stated by HPM. Evansdale is also not on a main road, so it doesn’t clog up traffic. It can also accommodate plenty of cars in its parking lots along with street parking, as Evansdale takes up two sides of a neighborhood block. Many of these schools need updating. This plan is a harsh and unnecessary reaction to DCSD’s failure to maintain its schools throughout the years. DCSD should be maintaining and renovating schools throughout the years, not all at once. Each cluster has at least one DCSD-owned empty school that kids could move into while a school is being renovated.	3/8/2026 12:00 PM
594	It is a huge mistake to propose closing Evansdale elementary. This is a strong performing school despite being a Title 1 school. This is due in large part to its location in the community and its French Immersion program. The French teachers at Evansdale and Henderson have build a strong French Immersion program here and have strong ties to this community. This is a very tight-knit community because of this program and location in the neighborhood, where a large proportion of kids walk to school. Evansdale is a perfect location for an elementary school, and it would make sense to expand Evansdale rather than close it. Evansdale has a much bigger lot size than other schools recommended for expansion, and has a large play field, 2 playgrounds, and multiple parking lots. Its location within the neighborhood also means it could handle increased traffic during pickup and drop off. Also, Evansdale enrollment is projected to increase to over 600 by 2030. It makes much more sense to keep Evansdale as an elementary school. Closing this school would destroy an excellent Title 1 school with a thriving French immersion program	3/8/2026 11:58 AM
595	No consolidation should be allowed under any circumstances	3/8/2026 11:57 AM
596	I just hope that when consolidating schools the demographics and cultural needs of the community are taken into consideration. We have plenty of historical examples of conflicts that arise due to changing boundaries. This should not be ignored, even when we are trying to preserve funding and account for future needs within the district.	3/8/2026 11:57 AM
597	The closing of Oak Grove Elementary would depreciate home prices in the surrounding neighborhood which would lower real estate taxes and significantly impact tax revenues for Dekalb County	3/8/2026 11:55 AM
598	I think it is too aggressive for the timeline and student shortage presented. I believe the current consolidation plan will have significant negative impacts on graduation rates and therefore crime in Dekalb communities. I believe those impacts negatively outweigh any positive impact the community will receive from increased funding, programming and improved facility maintenance. The negative impacts to traffic are also not being accurately depicted. The impacts to road traffic are being depicted as a net positive which is impossible when shifting from small, neighborhood schools to large, spread out clusters of fewer schools. Walkability will be reduced dramatically with this proposal.	3/8/2026 11:53 AM
599	Closing schools is a tough choice to make, but it is a financial reality of the current DCSD enrollment and financial situation. Our schools are not full, and they are not optimized for size to efficiently use our county resources. It is important that we pull the band aid off and reduce the number of buildings in the county we are maintaining and distribute students efficiently to their local schools. I understand everyone loves their local school, but we must make this change to survive financially over the next decades. The specific changes to schools don't matter as much to me as the actual consolidations and fiscal savings need to really happen so that our district can be healthy financially.	3/8/2026 11:51 AM
600	Don’t close oak grove elementary	3/8/2026 11:46 AM
601	I do not like the possibility of my sons’ school closing and separating them from their	3/8/2026 11:45 AM

	community they've been a part of their whole life	
602	I think it's a great idea to consolidate and make schools more efficient following a model like Gwinnett. We need to free up funding to allow more hiring of teachers and reduce class sizes. Too much money is wasted on jobs in the district that do not trickle down to actually supporting students and teachers in the classroom.	3/8/2026 11:44 AM
603	Love that the district is looking at ways to align capacity to enrollment and figuring out ways to best use the money that's available.	3/8/2026 11:40 AM
604	Evansdale needs to be renovated, expanded, and maintained as a neighborhood school!	3/8/2026 11:37 AM
605	I think there would be less impact on the communities if elementary schools that were located in neighborhoods were closed first. Like Hawthorne elementary. To close a forward facing elementary school like Henderson Mill ES gives a bad look to DCSS and I believe it will deter more families away from public school.	3/8/2026 11:35 AM
606	Please be mindful of ALL the situations that these changes may bring to the neighborhood and the students	3/8/2026 11:34 AM
607	Consolidations are necessary, however, the initial outline appears to be closing higher performing / attended schools - such as Oakgrove ES vs Briarcliff ES	3/8/2026 11:31 AM
608	Don't want consolidation	3/8/2026 11:30 AM
609	I have no concerns but wondering where will students in the Cedar Grove cluster go since the schools may close. Will any of those students be reassigned to McNair High?	3/8/2026 11:30 AM
610	I do not think it is a wise plan. I think it will negatively impact the learning experience of many students. It will also negatively impact the quality of life for many DeKalb families - fewer schools means more hours and miles commuting and more traffic congestion. If low enrollment is the issue, perhaps DCSD could focus on improving issues that are driving families away from public schools - making sure that students have access to necessary services (including recess), that class sizes are small enough for effective instruction, that schools are clean and well maintained, and that teachers and staff are supported.	3/8/2026 11:30 AM
611	Bad for the neighborhood and bad for the schools, we have a great school with tons of parent participation, if you close our schools parents will seek private or charter schools in my opinion	3/8/2026 11:29 AM
612	The district needs to do whatever is most fiscally responsible, regardless of what closures or consolidations that entails.	3/8/2026 11:28 AM
613	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). My street in the Oak Grove district has seen the construction of 8 new homes in the past several years, all of which were purchased by families with several young children. There is additional land available for construction so more new homes will be coming. Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additonal elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion •	3/8/2026 11:28 AM

	$1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
614	This appears to be more about money than kids. Closing schools will cause kids to have longer times on buses and parent delays traveling farther to get their kids. Bigger schools may save money and be more efficient but there is a loss of community for parents, children and the community at large.	3/8/2026 11:26 AM
615	First off, I know this scenario looks at everything county wide. I do not think a one size fits all approach is best in this case. Different clusters have different needs to help make everyone as successful as possible. As a parent in the Dunwoody cluster, I am writing to strongly oppose the current proposal to consolidate to three Elementary schools. While I support fiscal efficiency, the plan to consolidate into 'mega-schools' by closing two of our five elementary schools is strategically flawed and educationally detrimental. I propose a four-school model that keeps Kingsley open for the following reasons: 1. Infrastructure Reality vs. Closing Narrative: The district's 2025 Educational Adequacy Report explicitly classifies Kingsley as an 'Elementary Model 1' facility with a 600+ seat capacity and a high adequacy score of 75.0%. The data you are presenting to the community shows a significantly lower capacity which is completely incorrect. While the district may currently cite a lower 'programmatic' enrollment, your own 2025 data confirms the building has the physical shell to accommodate a significant portion of the overcapacity within the cluster. Furthermore, the September 2025 Quarterly Status Report confirms that design drawings for our HVAC system are 100% complete. It is fiscally irresponsible to abandon an engineered, high-adequacy building to fund 'mega-school' construction elsewhere that will cost triple the amount. 2. The Failure of 'Mega-Schools' for Early Learners: Consolidating into only three very large schools ignores research showing that elementary students thrive in personalized environments (400–500 students). Smaller environments are vital for the social-emotional development of young children. Larger schools lead to student alienation and lower parental engagement. This is particularly damaging for high-minority and English Language Learner (ELL) populations, who greatly benefit from the high visibility and teacher-to-student ratios found in mid-sized schools. In a 700+ student facility, these foundational learners are statistically more likely to be overlooked. 3. Intentional Equity through Boundary Reform: The 'declining enrollment' cited is an artificial result of boundaries that haven't been adjusted to reflect modern demographics. Multiple other schools in our cluster are currently operating well above capacity, while Kingsley has 600+ seat potential. Instead of closing a high-functioning school, the district must implement boundary reform to balance affluent and less-affluent zones. This is the only way to ensure every child in the cluster has a fair and equal chance to succeed in a right-sized, diverse environment. Conclusion: I urge the board to adopt a four-school model for the Dunwoody cluster. Reinvest in the May 2026 HVAC project, utilize Kingsley's larger seat capacity through boundary reform, and protect the small-school environments that are proven to support all students.	3/8/2026 11:23 AM
616	I am deeply unhappy with the idea of Vanderlyn closing. My husband and I bought our home with the intent of sending our kids there, and losing that would really cause us to rethink where we want our kids to grow up. These small elementary schools are crucial for maintaining strong, safe, supportive communities. We will lose that if our kids are redirected to a mega school.	3/8/2026 11:21 AM
617	I believe that Oak Grove should not be on the list because it is a vibrant and active school that is embedded in the community and important to the area.	3/8/2026 11:20 AM
618	Just, no. This seems to have no consideration of socioeconomic factors (housing costs) and will disproportionately and negatively affect lower income families.	3/8/2026 11:20 AM
619	Closing Oak Grove Elementary would have a devastating impact on our neighborhood. We have been a blue ribbon school since I moved here 20 years ago. Maintaining a local school is critical for our neighborhood to thrive.	3/8/2026 11:18 AM
620	My initial reaction is that Towers and Columbia High Schools are known rivals and have gang activity that would make learning a issue for students because of past experiences in the neighborhoods.	3/8/2026 11:16 AM

621	Closing Evansdale will lower property values.	3/8/2026 11:14 AM
622	Please do not close our local school OGE that is walking distance from our home	3/8/2026 11:10 AM
623	OGE is already at 88% utilization and projected 487 students in 2026-27. So it does not underutilized.	3/8/2026 11:09 AM
624	I believe consolidating certain schools can be a positive step, provided that job security for faculty and staff is guaranteed. Looking at the bigger picture, a more fluid and flexible operational model—even after consolidation—can help mitigate deep-seated institutional issues and foster a more democratic atmosphere. This transition should not be limited to 'hardware' changes (the physical buildings). Unless this is used as an opportunity to upgrade the 'software'—restructuring the school to be more democratic and centered around the students and the entire community (including teachers)—the change will be incomplete.	3/8/2026 11:08 AM
625	Kelly Lake is such a pillar in the Kelly Lake Community. I do not believe it should be considered on the consolidation list. The things the faculty and staff do with the kids there are phenomenal and with the area expanding, I do not believe it will be beneficial to students or parents to consolidate. That school has been keeping the area safe and sound for years and hopefully years to come.	3/8/2026 11:04 AM
626	The scenarios are confusing because they look like some areas would leave students without instructional facilities, and the commute is still longer with the current bus driver shortage.	3/8/2026 10:57 AM
627	Consolidation decisions should carefully consider the impact on younger elementary students. Schools with very large enrollments (1,000+ students) may create challenges with supervision, transportation, and maintaining a strong sense of school community. Elementary students often benefit from smaller, neighborhood-based environments where staff can build strong relationships with families and students. If consolidations occur, it will be important to ensure that facilities, staffing, and support systems can maintain a safe and supportive learning environment for students.I understand the district’s concern about having significantly more building capacity than current enrollment and the desire to concentrate resources so that students have access to stronger programs and opportunities. At the same time, consolidating a large number of schools—particularly elementary schools—could create very large campuses that may be difficult for younger students. Schools with enrollments approaching or exceeding 1,000 students may present challenges related to supervision, transportation, and maintaining a strong sense of school community. Elementary students often benefit from smaller environments where staff can build strong relationships with students and families. As future proposals are developed, it may be helpful to carefully consider how school size impacts the learning environment for younger students.	3/8/2026 10:55 AM
628	I believe that neighborhood schools within smaller communito provide the best environment for learning.	3/8/2026 10:54 AM
629	Oak Grove elementary school	3/8/2026 10:53 AM
630	I would like to recommend keeping and expanding the Evansdale Elementary School. My children are grown and gone but I realize the impact to the community for the school to close. The property at Evansdale is 10.1 acres. It is substantially larger than many others and offers easy room for expansion. The traffic pattern would accommodate an increase as it takes up two sides of a large neighborhood block. The school has ample parking and multiple playgrounds. The surrounding neighborhood is projected to have an increase in the number of children in the coming years.	3/8/2026 10:50 AM
631	Overcrowding of schools decreases opportunities for learning and growth. It also opens up more safety concerns.	3/8/2026 10:41 AM
632	Closing an elementary school, Oak Grove ES, with high parent and community support, including volunteer and financial support, apparently because it is borderline too small is a hard pill to swallow, especially not having any idea to where the community would be transferred or how it might be split up. PreK-Elementary age kids are also least well equipped to prosper in larger schools where they may feel lost or intimidated.	3/8/2026 10:39 AM
633	I support the Brookhaven community’s strong support of the public school system now and for many, many years to come therefore, I support the following position… keeping our trajectory in the Chamblee MS and HS cluster, and the pathway of closing the Ashford Park Elementary School facility as a neighborhood school, and shifting the Ashford Park Elementary attendance	3/8/2026 10:35 AM

	zone to the current John Lewis Elementary facility, and preserve our (current attendance zone) Chamblee Cluster.	
634	High school enrollment should be reviewed separately before considering the closure or consolidation of any high school. In a large district like DeKalb County School District (DCSD), maintaining at least a 15% enrollment buffer below capacity is important to accommodate future growth, since building new schools cannot happen quickly if student numbers increase. Currently, many high schools are already facing classroom shortages, with classes holding 30–35 students, indicating that space is already stretched. Merging one high school with another could further increase class sizes and overcrowding, creating additional challenges for both students and teachers. Therefore, careful consideration of enrollment and classroom capacity is essential before making consolidation decisions.	3/8/2026 10:35 AM
635	My children are at Montgomery ES, a school slotted for expansion. As multiple classes and activities are already in trailers, I wonder what would happen for student learning while construction is happening. For those parents re-locating to a new school, I'm sure distance to the new school will be of concern. Buses are a huge consideration for us. Would not want to have to be at bus stop any earlier for elementary-- its already very early.	3/8/2026 10:33 AM
636	As a parent of kids that attend Ashford Park, ineoukd support the closure of this school and shifting the population to John Lewis Elementary ONLY as long as the change preserves the school cluster currently in place, feeding to Chamblee MS and HS. We have been in Brookhaven for 12 years, bought a house here, built a house, and have built community, including through the parent association at Ashford park. We live here and contribute in meaningful ways to the community and public schools and do not want to see that community dismantled.	3/8/2026 10:30 AM
637	I understand the need for consolidation and evaluating the decision with economics in mind. However, top performing schools should not be eliminated. I fear performance of DCSD students as a whole will drop if top performing schools like Oak Grove Elementary are closed. Instead, figure out what makes this school special and try to implement that at other schools. As an aside, my family would not have moved to DeKalb County from Gwinnett County if Oak Grove Elementary did not exist. Keep high performing schools in operation.	3/8/2026 10:30 AM
638	I was upset that the selected schools to be consolidated well affect my home school zone.	3/8/2026 10:27 AM
639	Initially, my reaction is it's a LOT. I understand that keeping schools open when enrollment falls below a certain level is not sustainable, but without fully understanding why enrollment is falling, I don't think you can make long-term decisions. I also think there is a LOT that the district needs to do to audit itself on the county-wide level. There is mistrust over the use of funds and some of the staff brought with Horton. If you're not consolidating and saving funds and correcting those problems first, we cannot trust that you're making sound decisions for the schools. Why would the administration need more office space and more staff if enrollment is falling and the district is shrinking. Also, to suggest closing schools that are in the process of being renovated seems like a huge waste of funds as well. Somewhere along the way, the processes didn't speak to each other, and there needs to be more integration in the processes --- like IB curriculum!	3/8/2026 10:23 AM
640	Dear SAP Committee Members, While I understand the District faces real operational challenges, I urge the Committee to weigh the full community impact of this decision — and to ensure that any outcome preserves what matters most to our families: a connected community and access to a high-quality, college-preparatory educational pathway. Our School, Our Community Ashford Park Elementary is more than a building — it is the foundation of our neighborhood's educational community. Families have chosen to live in this area, in part, because of the school community it anchors. The relationships formed among students, families, and teachers at Ashford Park are not easily replicated and represent years of investment by everyone involved. Closure and redistricting could scatter our children across schools outside our neighborhood, disrupting friendships, family routines, and the sense of shared community that is central to a healthy school environment. We ask the Committee to recognize that community cohesion is in and of itself an educational asset. The Chamblee Cluster Pathway Is Critical to Our Children's Futures Ashford Park is currently assigned to the Chamblee cluster, which feeds into Chamblee Middle School and Chamblee Charter High School. This pathway offers: • A rigorous, high-performing academic environment with strong test scores and graduation outcomes • Access to Advanced Placement (AP) courses that prepare students for college and competitive university admissions • A consistent, well-established pipeline from elementary through high school that families can plan around with confidence We are deeply concerned that redistricting could move us out of this cluster, the	3/8/2026 10:19 AM

	academic path that we planned our lives around, and move the community across multiple groups. This is not a matter of preference — it is a matter of educational equity. Families who have planned for a Chamblee-cluster path could face an involuntary reduction in the opportunities available to their children through no fault of their own. Acknowledging the District's Concerns We recognize that the District has cited legitimate operational concerns: Ashford Park is a small school, it is over capacity, and its building is older and less efficient. We do not dismiss these factors. However, we ask the Committee to consider that these are infrastructure challenges — ones that may have infrastructure solutions — rather than reasons to dismantle a thriving academic community. Before finalizing any closure recommendation, we urge the Committee to explore alternatives, including: • Renovating or replacing the Ashford Park facility on its current site, preserving the community and cluster assignment • Constructing a new, appropriately sized school building within the Ashford Park attendance zone • Merging Ashford Park with an adjacent school while maintaining the Chamblee cluster assignment for all affected students • Any redistricting that keeps the Ashford Park community together and preserves their Chamblee cluster pathway Our Specific Requests to the Committee If the Committee proceeds with any changes affecting Ashford Park Elementary, we respectfully request the following: • Preserve community cohesion. Keep Ashford Park students together, rather than fragmenting them across multiple schools. • Guarantee the Chamblee cluster assignment. Any redistricted Ashford Park students must retain their guaranteed pathway to Chamblee Middle School and Chamblee Charter High School. • Ensure AP and Program access. Any receiving school must offer comparable academic rigor and special programs that are available in the current Chamblee cluster pathway. • Provide full transparency. Share proposed redistricting maps and cluster assignments before any decision is finalized, with sufficient time for community input. • Explore building solutions first. Exhaust options to address the physical facility before concluding that closure is the only path forward. We understand that the District must balance many competing priorities across DeKalb County, and we respect the difficulty of that work. Our community is not asking for special treatment — we are asking to not be made worse off by a process intended to improve the system overall. The building can be replaced. The community, and the educational opportunities our children depend on, cannot be as easily restored once broken. We ask the Committee to give these concerns the weight they deserve as you deliberate. Thank you for your time and consideration.	
641	Oak Grove Elementary is not only a fantastic school, but a key part of the community. While small, consolidating it into another school would have a significant negative community impact.	3/8/2026 10:18 AM
642	Keep Oak Grove Elementary. It is a central part of our community.	3/8/2026 10:17 AM
643	Against closing of Lakeside High feeder schools, especially Evansdale Elementary School. That school has been embedded in the community for over 50 years. It is a centrally located elementary school which should accept students from Midvale or Henderson Mill Elementary if those close. We need to stay in the Lakeside High district. We fear overcrowding under the current plan. We also would eliminate the ability for new families to move in to the area if our schools are forced to be at full capacity and in areas where children have a 20-30 minute commute. Keep our community whole.	3/8/2026 10:17 AM
644	It is unclear to me how a school that is identified for potential expansion is able to accommodate the expansion. For example, Laurel Ridge classes already feel large at about 24 students with one teacher in my children’s classes. Would an expansion make each class closer to 30 students or more? or would the building be physically modified to accommodate more classrooms per grade? I certainly appreciate the long term planning and SAP goals; I also want to better understand the specific impact on individual class sizes and how many students our teachers are asked to support in their respective rooms because it is much harder to support our students’ individual needs as the class size increases.	3/8/2026 10:17 AM
645	Consolidate grades is a good idea	3/8/2026 10:16 AM
646	n/a	3/8/2026 10:13 AM
647	I strongly oppose the proposed closure of Oak Elementary in the initial facilities scenario. • Oak Grove is not a school families attend by default; it is a primary driver for people moving into the area. Families specifically choose this community to access the school’s proven academic excellence and leadership, making it a cornerstone of local property values and stability. • Our school is the heartbeat of a uniquely engaged neighborhood. Through the PTA and Oak Grove Foundation, parents provide massive volunteer hours and financial support that significantly offsets district costs, creating a high-functioning partnership that should be	3/8/2026 10:12 AM

	modeled, not dismantled. • Unlike the underutilization challenges cited elsewhere, Oak Grove is nearly full, operating at ~85% capacity with a projected 96% by 2026. With a waitlist of over 200 students (including 100+ kindergarteners), the demand is sustained and growing. • Disrupting a high-performing, self-sustaining school contradicts the SAP's goal of improving academic quality. The district should prioritize addressing true underutilization while preserving successful, in-demand schools that have the overwhelming support of the families who moved here for them.	
648	We are greatly enjoying Oak Grove and the community there.	3/8/2026 10:11 AM
649	The facility scenario and SAP and HPM's proposal of it was supposed to be on simply whether the facility was to close or not. The SAP meetings have devolved into stating, now, what those facilities may be used for in the future. That is scope creep. It' also important to understand that the decisions being made carry a lot of weight to a family's personal plans around moving, signing up for open enrollment. For this reason, it's critical that SAP tells the community WHY a school is not on an expansion list, or WHY an ES is being converted into an MS. The district should, if anything, expand the open enrollment option for parents to allow them to have their kids attend the more convenient school, which may not be the school SAP decides to move that neighborhood. In the far NE, FountainBleau neighborhood, the three remaining schools (AES, DES, Chesnut), are all equally far away. There's also no discussion around the Magnet schools (Kitteridge) and their future. Communities should have enrichment schools like Kitteridge or Woodward within an acceptable driving distance to any part of the county. A school more than 30 minutes from communities (on a good day) is unacceptable; if schools like Kingsley are set to shutter, they need to consider converting those into magnet schools. The consultant HPM, needs to do a better job at conveying the WHYs to the communities. Answers to the FAQs change frequently and the consultant is doing a poor job demonstrating they are capable of handling the needs of a school district like this one. HPM reps stating something works because it was done well "for a rural school district in Iowa", if anything, decreases my confidence that they are considering the needs and educational demands of our district, which couldn't be any more different than their cited precedence.	3/8/2026 10:07 AM
650	The student to teacher ratio will be too high.	3/8/2026 10:05 AM
651	I like that LRES will stay open.	3/8/2026 10:04 AM
652	I understand you built Pleasantdale and need to fill it. And dismantling and closing schools in the neighborhoods closest to it is the only way.	3/8/2026 10:01 AM
653	Oak Grove elementary being on the draft list for possible closure is a mistake.	3/8/2026 9:55 AM
654	DCSD should continue not close schools. Neighborhood schools are critical to learning. Community is critical to learning. Closing schools simply because of population metrics is anti-education. In fact, outcomes get better with smaller classrooms. DCSD receives over 1B annually in tax paid revenue. If anything needs to be closed, it is administrative offices.	3/8/2026 9:55 AM
655	In my opinion the release of the consolidation plan has caused confusion and frustration.	3/8/2026 9:54 AM
656	Oak Grove does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake’s current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake’s enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory	3/8/2026 9:48 AM

	employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
657	Terrible idea to close Evansdale. It’s one of the few high performing elementary schools and loosing it would be a terrible hit to our neighborhood and community.	3/8/2026 9:47 AM
658	Please don’t close Btockett Elementary School. Thank you.	3/8/2026 9:43 AM
659	Absolutely not. All a bunch of mess. Our younger kids should not have to be downsized out of their neighborhood schools or mixed in with teens. We shouldn't have to trade off anything on the triangle.	3/8/2026 9:43 AM
660	You can’t consider buildings without considering the school. Closing a school significantly over capacity (Ashford Park, 830 enrollment) is not the same need as what is happening in the southern aspect of the district. Would love to see an evaluation of why there is such a disparity between quality of education and school ratings across the district (Chamblee vs Cross Keys). APES building is for sure terrible- but in order the building to be repurposed it will have to be renovated. So close the school- still have to spend the money to fix the building. The lot is big enough to rebuild onsite while keeping the current building in use. APES is a pillar of the community. Save our school, please.	3/8/2026 9:42 AM
661	I just don’t agree with school closing down. And combine the school together	3/8/2026 9:41 AM
662	Oak Grove Elementary has been a fantastic school with a very active parent group and foundation. Elementary school-aged number of children ebb and flow in a neighborhood as demographics and movement patterns change. These are typically cyclic patterns, and therefore, a medium to long-term forecast is needed before making such an important decision. It takes a significant number of years to build a school at the quality level of Oak Grove Elementary. It would be a huge loss, not only to the community, but to the entire county, if it was closed.	3/8/2026 9:41 AM
663	Dear Members of the DeKalb County Board of Education, We were very surprised and deeply disappointed to learn Oak Grove Elementary (OGE) is listed for closure. Our child has attended OGE since pre-K, and our family has been very involved with the school community. We have also had children at Globe Academy and St. Martin’s Episcopal School, so we have had direct comparisons on what makes a strong school and culture. OGE continues to stand out. OGE has exceeded our expectations for a local elementary school. Teacher dedication and parent involvement are outstanding. Our child is thriving academically and socially in this environment; changing or closing the school will dilute the community engagement and erode the culture that supports students’ learning and well-being. Closing OGE would harm students, families, and the broader community. We respectfully ask the Board to reconsider this decision and explore alternatives such as adjusted redistricting, targeted budget reallocations, partnerships, or other cost-saving measures that preserve OGE. We also request an opportunity to meet with Board members or staff to discuss options and share community input. Thank you for your consideration. Sincerely, John Michael Doyle	3/8/2026 9:40 AM
664	I understand the need based on the country being under the capacity. What happens if we had a sudden influx of kids? Either from other counties or out of state?	3/8/2026 9:39 AM
665	Oak Grove does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. 668	Consolidation does not serve the children and overloading classes will reduce the quality of the education. It will also reduce the home values in Oak Grove Elementary) and the idea of combining six through 12th grade is really unrealistic as far as the development of the children.	3/8/2026 9:32 AM
669	I'm against it. We should invest in renovating the schools, not closing them.	3/8/2026 9:30 AM

670	I don’t think Evansdale should close. We moved here because it is a good school.	3/8/2026 9:27 AM
671	We moved into this area because of Evansdale and the school district and have come to love the community that has come with the neighborhoods.	3/8/2026 8:58 AM
672	nice	3/8/2026 8:53 AM
673	I cannot make an informed decision. What you have released so far is 25% of a plan. If a school closes WHERE DO THE CHILDREN GO??Obviously no one wants their child's school to close. This round of feedback completely pointless. The implications could be good or bad depending on the details.	3/8/2026 8:48 AM
674	At present Oak Grove Elementary meets the district's utilization target at about 89% with a projection of about 96% next year. Since Covid enrollment is increasing.	3/8/2026 8:47 AM
675	Neighborhoods should stay together. Splitting up kids who live in the same neighborhood and have built bonds should not be split.	3/8/2026 8:45 AM
676	Unwell don’t want my kids school to be closed	3/8/2026 8:45 AM
677	Oak Grove is paramount to the neighborhood and community. The county should keep it open and invest funds in upgrading the facilities at all schools.	3/8/2026 8:42 AM
678	I do not like the idea of having so many students at one school, takes away from the community feel. Also to many students in one classroom would not be effective for the teachers or the students learning	3/8/2026 8:39 AM
679	I am concerned about the potential closing of Oak Grove Elementary	3/8/2026 8:39 AM
680	Areas where enrollment is low should be the focus of the financial efforts and studies. New facilities that would be conveniently located to families in the attendance zones of underutilized schools could be concentrated into one centralized location/facility. They do not need to be mega schools, they would just fill seats to a comfortable capacity while cutting down on the financial drain of multiple under-attended, overrun schools. To close schools in clusters that the county has already invested their resources in for building improvements would have a negative impact in numerous ways. 1. It would be a waste of funds that could be put towards educational improvements, program enhancements, and support for teachers which could in turn encourage teacher retainment. 2. In many areas such as Tucker, young families are moving into affordable neighborhoods and are invested in their community and the smaller neighborhood schools. 3. Smaller schools that see each individual child and their needs builds our children’s confidence and morale to enable them to succeed in higher education. A mega-school with thousands of children is a model where each child is just another seat in a building. My child walks into Midvale everyday and is greeted by name by everyone from the staff member in the carpool lane to the principal. In turn they know each staff member, develop relationships with adults through out the building, and are able to go to someone at any time, with any concern whether it be curriculum questions or emotional/social support.	3/8/2026 8:37 AM
681	The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made.	3/8/2026 8:30 AM
682	I worry about how the forecast of future enrollments was completed. Do we know what factors have been driving the declining enrollment? In understand the need to close under utilized schools but I worry about over extending existing schools as I feel our current school is at an ideal (although not maximum) enrollment. I don't think the goal is to reach maximum capacity of schools as that doesn't allow room for error in the forecasts.	3/8/2026 8:29 AM
683	I understand and support the need to address overcrowding at Dunwoody High School. I recognize that Vanderlyn’s proximity to the high school places our campus within a broader facilities planning conversation. I also recognize that the district has framed SAP around enrollment trends and utilization. Any proposal should clearly demonstrate how those metrics are being applied at the cluster level. The combined Vanderlyn and Dunwoody High School campus presents an opportunity to explore thoughtful, phased solutions that address secondary capacity while preserving elementary access. The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made. Vanderlyn is a diverse, academically strong, and	3/8/2026 8:28 AM

	inclusive community. Preserving stable elementary environments while solving high school challenges aligns with district priorities. I would welcome collaboration between district leaders and both school communities to explore campus-level solutions that address high school capacity while preserving the Vanderlyn community.	
684	I cannot give an opinion on this scenario without being able to 1) independently vet and analyze the anticipated construction costs vs administrative savings of this plan, which SAP has not provided, 2) evaluate the plan of where these students will go, which SAP has also not provided, and 3) evaluate how the District will reinvest any savings into improving student outcomes, which SAP has not provided. Without this information, I cannot form an opinion on this scenario. I understand the need for a consolidation plan of some sort, but this isn't something I can comment on or form an opinion on yet. I'd like to learn more about K-8 options in Area 1, but Chesnut and Peachtree right next door to each other doesn't lend itself to that as an option in our area. See below re: why differing grade bands throughout the district (including special programs) is an inequitable approach to public education.	3/8/2026 8:28 AM
685	It is irresponsible to close schools when the remaining schools operate with mobile classrooms. You dont have excess of seats, but you want to create one. Closing some of the best schools, such as oak grove, is a travesty. Keep neighborhood schools on the neighborhood.	3/8/2026 8:26 AM
686	This is extremely confusing to react to, especially considering that some of the school buildings that house magnet programs were completely left off the plan. That said, while I understand the need to close and consolidate some of the schools, it seems that there has been quite a bit of growth in the northern end of the district. This plan seems quite confusing given overcrowded schools such as Ashford Park are being recommend to close. Without building new facilities, where exactly are you planning to send the nearly 800 students while keeping to your promise of not breaking up communities? I also think it's odd that you are proposing to close schools, but will just leave them in place. Wouldn't it make more sense in some cases to sell the properties and use the funds to build new schools/facilities in areas where growth is happening versus putting money into keep existing buildings/land?	3/8/2026 8:25 AM
687	Do not close Evansdale Elementary. Has very strong neighborhood support and identity. Has room for expansion.	3/8/2026 8:24 AM
688	Evansdale elementary enrollment is expected to increase. It is a great school with unique language immersion opportunities.	3/8/2026 8:22 AM
689	I am deeply angered by the proposed plan to close Evansdale Elementary school. Both of my daughters attended Evansdale and it is the bedrock of our neighborhood. Several of my neighbors specifically moved to this area so their young children could attend Evansdale. Your plan to close Evansdale is deeply disruptive and would ruin all the hard work we have done to build & foster an environment where good teachers want to stay (due to adult volunteering, plentiful teacher appreciation programs, financial support for teacher improvement programs, & parent donations to school foundations). Your idea of consolidating schools has fundamental flaws, particularly for elementary students. Consolidation for efficiency is a concept that works for factories, not the education of young children. Young children need small, supportive communities where they are known widely and held accountable. Large schools allow kids to be lost (academically, emotionally) and make it harder for parents & volunteers to positively support the school (volunteer ship gets diluted when mixed with schools that have less parent involvement and a distant school would make it harder for parents to attend as frequently). Furthermore, Evansdale is a growing school. Why close it? Clearly, it is a model of what's working in your district. KEEP IT OPEN. Let them continue the good work they started.	3/8/2026 8:20 AM
690	Oak Grove does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
691	Vanderlyn should remain open. It is a high performing school and will be the only smaller elementary school in our area. That is very important to some children who need the smaller environment. People buy houses in that district to assist their children who need a smaller school	3/8/2026 8:06 AM
692	I do not want Oak Grove Elementary closed or repurposed. It’s community fixture, we’re excited to send our kids there, and one of the main reasons we moved to the area.	3/8/2026 8:00 AM
693	I think that school closures in the initial scenario make sense even though many families feel strongly about their local schools. Redistricting is never easy on families, but some schools must close. I do think that this plan will result in over-crowding at some schools that will be detrimental to everyone. DCSD has the infrastructure to have every student in an appropriately maintained school building and yet this plan continues to rely on portable classrooms in aging schools.	3/8/2026 7:49 AM
694	I do not think DCSD is capable of executing such a complex development program. I understand the reasons why, but paying a consultant $6M / year to study it and then executing it are two different things.	3/8/2026 7:42 AM
695	I understand the financial considerations and in general support the efforts to consolidate schools. With a terrible building, Kittredge’s building should have also been on the list for upgrades, expansion, or consolidation if that program is expanding or moving elsewhere.	3/8/2026 7:33 AM
696	Large schools treat students like cattle and not people. Yes older schools may need to be renovated or expanded, but children are thriving in smaller class sizes and unique programs.	3/8/2026 7:30 AM
697	It doesn’t make sense to me why high performing, over enrolled elementary schools are proposed to be closed. Closing a school like that does not mean those students will go to the other public school assigned to them - I think a lot of these students will go to private school and you’ll see families move where there are schools with an established success/higher rating. Schools like Ashford Park and Vanderlyn have strong communities, parent support/PTO, and engagement in day to day activities for students. If these families/kids go to another school these support networks wont be recreated, even after 10-20 years because these schools have decades of support layering upon each other. I attended over enrolled schools from 3-12 grades and I’ve seen over the past 30 years that the best scenario was to renovate those schools - yes, the cost seems like a barrier since there are newer facility schools in the district, but you cannot recreate a successful, thriving school with just a facility. It’s about teacher satisfaction, parent engagement, community involvement, etc which in my experience with another school district, just doesn’t translate over when a decision that is not community driven is taken. Lots of students walk to Ashford Park Elementary and the community was built around it - lots of families/students for play at the Ashford Park facility after school or hang out/meet up along Dresden and it’s a strong culture on inclusion. Again, I think you should target underenrolled, lower performing schools and if a school is doing well, to rethink including them on the list of closures because these schools may need a solution that is not cookie cutter closure.	3/8/2026 7:09 AM
698	Closing Evansdale to expand Livsey Elementary is ridiculous. Have site studies or traffic	3/8/2026 6:38 AM

	studies even been done yet? The traffic on Chamblee Tucker Rd is ridiculous already, and you want to add more? People already use the subdivisions as cut throughs. My daughter was already hit once. As with everything else about this process, you are putting the cart before the horse. You cannot answer any questions about new feeder systems or where the DLI program would go. Evansdale is projected to increase in student size, and you want to cram everyone into Livsey. You have given only one piece of the puzzle, and it is useless. I can't give an opinion one way or the other.	
699	The community is very against the closure of Vanderlyn. Families choose to move to Dunwoody specifically for Vanderlyn; if the Dunwoody elementary schools are consolidated into fewer mega-schools, these families will choose to live in other surrounding counties or areas. Over time, the Dunwoody community will suffer by from the closure. We understand the financial pressures of keeping smaller buildings running. However, we argue that distributing funds elsewhere, such as for the hiring of more parapros, will impact less Dunwoody students and residents than keeping Vanderlyn open. Less people benefit from parapros or other ancillary services than the amount of people benefit from having a top-notch neighborhood elementary school with the resultant high home values. Additionally, transitioning the Vanderlyn facilities to Dunwoody High School will be a shame; elementary kids benefit from smaller school sizes more than the high school students benefit from an extra intramural field or ancillary building. Please find other space solutions. Last, if you consolidate elementary schools and enlarge Chestnut, the traffic on North Peachtree will be even worse. Please find other cost-cutting solutions. You will have many angry community members if you close Vanderlyn, and property values and community engagement will suffer in the long-term. Personally, we will move if Vanderlyn is closed.	3/8/2026 4:55 AM
700	I understand on an economic level. However, I don't agree with thr consolidation on an elementary school level. Due to too many kids in one building.	3/8/2026 3:25 AM
701	Thank you for the opportunity to provide feedback on the initial facilities scenario that includes potential school consolidations due to low enrollment across the district. While I understand the need to address declining enrollment and the efficient use of district facilities, it is important that consolidation decisions carefully consider the impact on students, families, and school communities. First, student stability and continuity of learning should be a top priority. School closures and consolidations can be disruptive for students, particularly in early grades where relationships with teachers and peers play a critical role in academic and social development. If schools are consolidated, it will be important to provide transition supports that help students adjust to new environments. Second, the district should carefully evaluate capacity and class size at receiving schools. Consolidation should not lead to overcrowded classrooms or reduced access to instructional resources. Receiving schools must have adequate space, staffing, and materials to maintain high-quality learning environments. Another key consideration is the impact on families and transportation. Consolidating schools may increase travel time for students and create additional logistical challenges for families. Transportation plans should be reviewed to ensure students are not experiencing significantly longer bus rides, especially younger learners. Additionally, the district should consider the role schools play as community anchors. Many schools serve as important centers for neighborhood engagement and support. When schools close, communities can feel a significant loss. Transparent communication and community input should continue to guide decision-making throughout the process. Finally, it will be important to ensure equity across clusters and neighborhoods. Consolidation decisions should be guided by clear data, including enrollment trends, facility utilization, and long-term population projections, while also ensuring that certain communities are not disproportionately impacted. Overall, if consolidation becomes necessary, thoughtful planning, clear communication, and strong transition supports will be essential to minimize disruption and ensure that students continue to receive high-quality educational opportunities.	3/8/2026 1:18 AM
702	Truly crazy to make a decision without having a plan in place for the specifics on where students will end up should their school be closed	3/8/2026 1:11 AM
703	Evansdale's property size would accommodate expansion better than nearby schools which have been recommended for expansion. There are aspects of the property which lend themselves well to expansion—2 playgrounds, a separate playing field, and several parking lots —allowing room for additions while still having recreation and parking space. There is an expected increase in the student body size, reinforcing the need for expansion. Evansdale should be renovated and expanded.	3/8/2026 12:15 AM
704	Consolidations help use school buildings more efficiently, save resources, and allow facilities	3/7/2026 11:58 PM

	to support more activities and programs for students and staff.	
705	I believe that the PK-5 would be the most beneficial for students and staff as it would require less buses and larger cohorts for for enhanced programs. And more importantly its familiar.	3/7/2026 11:58 PM
706	I understand there are 20,000 empty chairs. My concern is over crowded students. This year my daughter started her year on trailers outside of school building. Then there was a change and her class was move inside the building which I am very happy about that because I was worry all the time about students safety. Like a shooting scenario the trailers would resists to bullets. Or a tornado. Also is an open area , anyone can attend kidnapping or skip school. I prefer students to always stay inside the building is always safer. Maybe attend moving students to more empty schools?? But let me tell you, Chesnut Elementary and Peachtree Middle have always been crowded and have trailers outside!! Please safety is TOP PRIORITY FOR US PARENTS!	3/7/2026 11:50 PM
707	Ashford Park has a significant amount of overcrowding. I think the logical thing to do is move students, however when you move students to different school the parent involvement will drop.	3/7/2026 11:36 PM
708	Makes sense for the enrollment projections	3/7/2026 11:28 PM
709	I have a lot of concerns about the Tucker cluster schools being proposed for consolidation. Primarily, Chamblee Tucker rd in front of Livsey Elementary recently underwent a road diet, which has made the area much safer for pedestrians. Adding capacity to the school would almost certainly mean re-widening the road here, which would not benefit nearby neighborhoods. Additionally, many families move to this area specifically for the smaller community schools, and pushing these families elsewhere will not help the district’s low enrollment problem.	3/7/2026 11:26 PM
710	I was surprised by the presentation and did not realize that many of our schools were below capacity. I am disappointed that there are not expansion plans slated for the Southern region of the county. Per the plan the majority of the expansions seemed to be planned for the northern arc and more congested areas.	3/7/2026 11:22 PM
711	I am shocked at the consideration of the school closures. This school as been around for a long time and is part of history and the community. As a matter of fact me and my siblings all went to Redan elementary.	3/7/2026 11:18 PM
712	More information about how the changes would be rolled out is very important to share as decisions are made. Some of these changes would be more palatable if implemented over years. Both of my children are in the Kittredge/Chamblee magnet program for high achievers. I am not sure if students from Doraville United or other elementary schools will displace the high achievers' magnet program from Chamblee, as facilities are being considered separately, but it is difficult to assess facilities and programs separately when they are so closely tied to one another. Only capacity is mentioned in the presentation, so where will the magnet and language immersion programs go? We know that many families zoned for Chamblee would stay at Chamblee if the magnet program left, which would cut a cohort in half and leave the program vulnerable. I hope there is an option to phase any huge changes in, maybe starting with a cohort beginning the program. Also, I hope traffic and school lot characteristics are being considered seriously. Evansdale has a huge lot and takes up a full block, with no busy streets surrounding it. This seems like the ideal location for expansion and yet it is on the chopping block, while at least one other school on a much busier street is slated for expansion and is in no better shape. As a community member, I am very concerned about this plan and the impact on traffic.	3/7/2026 11:13 PM
713	You can’t consider only the facilities without considering the affected programs.	3/7/2026 11:08 PM
714	As the parent of a child that will attend school in a few years, I am concerned with where my neighborhood will be placed.	3/7/2026 11:02 PM
715	I against consolidations because my children’s class sizes seem manageable at this time. If additional students are moved into their schools, class sizes will increase and cause a strain on the teachers and the learning process.	3/7/2026 10:56 PM
716	I do not want Oak Grove Elementary to be consolidated. I want it to continue to exist independently.	3/7/2026 10:56 PM
717	As a parent of two children who attended Oak Grove elementary, I consider Oak Grove the	3/7/2026 10:55 PM

	heart of our community. I would like to see the school continue to operate and extending the geography to reach capacity.	
718	I believe that more elementary schools could be consolidated	3/7/2026 10:55 PM
719	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026-27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2-3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion.	3/7/2026 10:53 PM
720	Under no circumstances do I believe Evansdale should Close. The reason my husband and I bought a house so Close to the elementary school was so that we could walk our kids to school and be part of a community. Schools do more than educate kids, they are the basic building block of all communities. The one advantage Dekalb schools has over other systems is their size. Elementary schools should not be large where kids can get lost in the numbers. If Dekalb must close a school, it should not be Evansdale. They have a diverse population that makes it special! Their lot size is large enough to build/expand to make room for More students while Still accommodating parking and accommodating an increased traffic pattern. How much money will actually be saved by closing schools after money is spent to enlarge schools, money is spent to maintain the upkeep of the closed buildings, and all the other costs associated with closing the schools (transportation, etc)? Please share this complete figure in the next round of discussions. The county went about this all wrong. They should have started cutting cost at the county level and gotten rid of any and all unnecessary personnel. It appears that Dekalb has many positions which were created under Horton that are unnecessary to student learning. As a matter of fact, with the added oversight Evansdale and other schools in our region actually had scores drop. Additionally, maybe there shouldn't be a county office. Perhaps those positions should have a home base in the schools so that they are not far removed from the daily going one of a schoolhouse. Additionally, the county should sell The building they bought for an administrative office while SAP was having meetings about school closures. I believe that property was purchased for 6.5 million.	3/7/2026 10:35 PM
721	I do like that measures are being considered to operate the school's most efficiently with our tax dollars. Each neighborhood though has its own community and should be taken into account as these decisions are considered. My neighborhood, Oak Grove, feels like a community and everyone strongly supports the school and the neighborhood.	3/7/2026 10:32 PM
722	Evansdale has a larger lot size than other schools slated for expansion (>10 acres). Evansdale's lot can accommodate additions in the back and still have plenty of parking space. Evansdale has a large field and multiple playgrounds and parking lots. Evansdale is uniquely situated to accommodate traffic due to taking up two sides of a neighborhood block. Evansdale enrollment is projected to increase by 2030	3/7/2026 10:28 PM
723	Evansdale elementary school	3/7/2026 10:26 PM
724	Heartbroken, I would be , since four of my children received education at Evansdale Elementary . My fifth child is currently attending Evansdale Elementary. So , my affinity with this school is justified , particularly when I consider the dedicated teachers who give their all to produce a useful generation.	3/7/2026 10:22 PM
725	Schools identified for closure and upgrades generally make sense. Shifting the county to larger schools is a good idea because it allows resources, PTAs, and other support systems to be more efficient. Small schools with small PTAs are tough. I am in favor of closing Ashford Park. The acreage is too small, and the portables at school are unsustainable. Uncertainty around assignment of students in the area has plagued redistricting processes and decision making for decades. I am in favor of expanding Huntley Hills and Montgomery to make them more efficient. However, evaluating building decisions without any information (even high level) about boundaries or programs is unwise. As identified early in the SAP process, all three (buildings, boundaries, and programs) are interdependent. The next round of scenarios needs to include some guidance on how to think about boundaries and programs.	3/7/2026 10:21 PM
726	The County is not fully considering all aspects when selecting schools for closure. Evansdale	3/7/2026 10:19 PM

	is an important cornerstone for our community. Many of the loved features of the community would fall apart without the community school as an anchor. Evansdale has a unique location that accomodates traffic and has a large lot of 10.1 acres.	
727	I support all of the consolidations and closures	3/7/2026 10:15 PM
728	Oak Grove is already at goal for enrollment and projected to trend toward 100% over the coming years with continued development in the area bringing more families into the neighborhood feeding Oak Grove as well as the surrounding neighborhoods feeding the schools that would be consolidated along with us. While consolidation may make sense in other areas due to declining enrollment, consolidating a school that is growing as well as performing as one of the best in the district is not a good idea.	3/7/2026 10:12 PM
729	I do not agree with school consolidations that result in closing schools. While consolidation is often viewed as a cost-saving solution, it can create significant challenges for students, families, and communities. Schools are more than just buildings; they serve as important spaces where students develop relationships, feel a sense of belonging, and receive consistent support. When schools close, students may lose that stability, which can negatively impact their academic and social development. In addition, consolidations often lead to larger class sizes and overcrowded learning environments, making it more difficult for teachers to provide individualized attention. Students may also face longer transportation times, which can increase fatigue and reduce time for learning and extracurricular activities. School closures can also weaken community connections. Neighborhood schools often serve as central gathering places, and their loss can affect community identity and engagement. For these reasons, districts should consider alternative solutions that support students while maintaining strong school communities.	3/7/2026 10:09 PM
730	We own a home in the McLendon district but my wife is a CSD teacher and our children attend her elementary school (K and 2nd). We watch as our neighbor move away as their families grow due to the small size of homes in the area, as well as reputation of the school. This leaves the school fed with students from only by a few surrounding apartment complexes. It would be nice to be able to have a community school like we get to witness at CSD Glennwood with wall and ride days, community circles, but I just don't think there are enough children in the area to justify it. I think the children that do currently go to McLendon will benefit more from being integrated with other SES students than they will be hurt by the added distance of changing schools.	3/7/2026 10:07 PM
731	I am 60 and grew up in DeKalb. Oak Grove Elementary has always been an anchor for this community and on of the star programs of the DCSS. Breaking it up would not only shut down a great school, but also take away a focal point of this community.	3/7/2026 10:04 PM
732	I don't think it makes complete sense and it would hurt people who don't have transportation to get to a school that's further away	3/7/2026 9:55 PM
733	To close a true neighborhood school that is walkable , serves the community and is highly functioning is sad to send the kids to a further away, to a bigger school (difficult at the age of 4-10 at a volume of middle/high school) - there is quality in a true neighborhood school that your 3rd party and strictly numbers misses (speaking about Ashford park)	3/7/2026 9:52 PM
734	If the purpose of the SAP is to deal with the issue of under-utilization, Oak Grove Elementary School doesn't fit the bill. It is already at 89% utilization and given the popularity of the neighborhood and school, that will continue to grow. Oak Grove's closure would put more pressure on Briarlake and Sagamore Hills to take in these 400+ students and there are not enough seats at either school to accommodate all of them. Plus, the neighborhoods and areas around each of these elementary schools are growing substantially and will account for more organic growth within these schools in the coming years. Oak Grove is also one of the highest-performing schools on the list of potential closures--in Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) and in Readiness: 95.3 (2nd highest). Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/7/2026 9:50 PM
735	Consolidation and closure is worse for students and families than current	3/7/2026 9:42 PM
736	none	3/7/2026 9:37 PM
737	I'm very concerned about the concept of 6th graders in a school with 12th graders. It is also problematic to close so many neighborhood schools and lose the connections and community	3/7/2026 9:35 PM

	they foster. In the North DeKalb area, closing schools like Oak Grove will serve to push more families out of county schools into private schools.	
738	Kelley Lake has an amazing staff and serves the community in a great way. Both Cedar Grove Middle and High has great history and serves a community that is rich in culture.	3/7/2026 9:30 PM
739	Do not close Oak Grove Elementary. It is a very popular school in our community and preferred by many families.	3/7/2026 9:23 PM
740	absolutely necessary. make the hard decisions to close facilities thar are outdated and underused and sell the properties. do not sit on the closed properties as seems to be the case with so many school districts.	3/7/2026 9:23 PM
741	It makes sense to me logically.	3/7/2026 9:20 PM
742	Evansdale is an important school for our community that provides stability and support for students and families. Closing this school would disrupt the community.	3/7/2026 9:20 PM
743	Traffic is unbearable. We need small neighborhood schools where kids can safely walk to school. No more chauffeuring kids all over town to attend this magnet or that charter school. It's insane.	3/7/2026 9:13 PM
744	I agree strongly with consolidation of facilities to save overhead costs - especially very underutilized facilities. Saving those operating costs can divert those funds into more worthwhile things like better technology in remaining open schools and improving the older facilities that remain open. DeKalb has a LOT of old buildings that are honestly very "dumpy" compared to much newer school construction in Gwinnett, Cobb, Forsyth etc. The disparity is comical but sad too. This is clearly part of why our attendance is going way down in DeKalb schools - people are moving to counties with nicer newer larger schools with more opportunities (more class offerings, nicer athletic facilities, newer technology in the buildings). Should we instead of asking - how do we save costs be asking how to we get people to want to send their kids to Dekalb county schools? This should be a very important question SAP is asking itself along with the others. Now, that said - one of the elementary schools in scenario 1 slated to close is Oak Grove elementary. Not only is it not underutilized, it usually has a waiting list. It's a small community school where lifelong friends are made, both parents and their students. Lots of people walk to school and people love this school- they are moving to our County TO go to this school instead of moving away for others or choosing private. This has been true for as long as I can remember. For At least 20 years this school has had a great reputation and great teachers. It would be a big mistake to close it.	3/7/2026 9:10 PM
745	Terrible idea to close our consolidate schools	3/7/2026 9:09 PM
746	Closing Ashford Park is a poor decision particularly given a $25M "investment" there now. I've heard similar things are happening at other schools- hundreds of millions in taxpayer waste. No justification has been provided for this. Keeping the Ashford Park (Ashford Park/Drew Valley neighborhoods) together is important. More important is keeping them in Chamblee cluster alignment going forward. If that means moving the community to John Lewis (with those on the opposite side of Peachtree shifting to Montgomery) and moving John Lewis into Chamblee, that would be the best solution for continuity.	3/7/2026 9:07 PM
747	I support solutions for high school overcrowding and strong long-range planning across the cluster. The combined campus seems like it could allow for phased or creative solutions, so I would like to better understand why closure is being considered at this stage. Seeing complete modeling on reassignment, receiving school enrollment and capacity, transportation, and feeder impacts would be helpful before decisions are finalized. I would also like to understand the specific definitions of low operating costs, small school, and robust programming.	3/7/2026 9:07 PM
748	Vanderlyn operates at full capacity with excellent performance. Enrollment continues to go up here. How are these enrollment projections made?	3/7/2026 9:06 PM
749	We are not happy with the specter of closing these schools for many reasons, both personally as well as for our community.	3/7/2026 9:03 PM
750	We were told in one of the webinars that the County's consultant was compelled to use a broad brush approach applied to all schools consistently for the first scenario in order to avoid the appearance of bias towards any given school. In that same meeting, we were told that the data for outcomes is "all over the place" and that what works for one school may not work for another. So which is it? We've also been told that the stated justification for the proposed	3/7/2026 9:01 PM

	closures is underutilization. While that may be true on average across the district, it is not true for Oak Grove Elementary. In fact our school apparently meets the stated utilization goal and is projected to exceed that goal next year. We have experienced significant enrollment growth each year since the pandemic. Our district is also experiencing tremendous growth between the new hospitals and private developments. So why would you close a school that meets or exceeds your own stated metrics? If it is simply about capacity, then let us look at an expansion plan for OGE. The school has a current capacity of about 500. And based on my own analysis as a land planner with 25 years of municipal experience, it appears that the property could quite easily support an expansion of another 200 to 250 students. Let us explore that alternative before making any final decisions for closure. Closing OGE would be a huge mistake!	
751	Very much opposed. We need to maintain the small community schools with small classroom sizes to facilitate optimal learning environment , especially for the elementary students.	3/7/2026 8:53 PM
752	I think it is not right because the more the students , the bigger the classes. It is better how they are now. So they can learn better and the test scores can grow and the schools can reach a high level .	3/7/2026 8:52 PM
753	I would like to hear more but I think I'm generally for any proposal to streamline resources and improve serving our students.	3/7/2026 8:45 PM
754	I understand and support the need to address overcrowding at Dunwoody High School. I recognize that Vanderlyn's proximity to the high school places our campus within a broader facilities planning conversation. I also recognize that the district has framed SAP around enrollment trends and utilization. Any proposal should clearly demonstrate how those metrics are being applied at the cluster level. The combined Vanderlyn and Dunwoody High School campus presents an opportunity to explore thoughtful, phased solutions that address secondary capacity while preserving elementary access. The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made. Vanderlyn is a diverse, academically strong, and inclusive community. Preserving stable elementary environments while solving high school challenges aligns with district priorities. I would welcome collaboration between district leaders and both school communities to explore campus-level solutions that address high school capacity while preserving the Vanderlyn community.	3/7/2026 8:40 PM
755	Evansdale is the center of a very close knit community. It is walkable for my grandchildren. We help with childcare after school so this is an important issue for most of the families. Some renovations would be nice but please do not close this school. Every community member opposes the school closure.	3/7/2026 8:37 PM
756	Our three daughters attended Evansdale Elementary and had a wonderful experience there. The school is an anchor in our community. Our neighborhood is extensive and needs an elementary school to accommodate the many families who live here. It would be a huge hit to our community to close Evansdale. Two of our daughters participated in the French magnet program. One daughter went on to minor in French and spend a semester abroad in France due to her early exposure to the language. Many young families have moved to our neighborhood recently with the objective of having their kids at Evansdale when they are old enough - Evansdale is core to the fabric of our community and can't close! We hope that administrators are focused on the quality of the education that students are receiving - if our school system is top-notch, families will not be considering private schools which will boost public school enrollment.	3/7/2026 8:35 PM
757	We are very concerned about the possibility of Vanderlyn closing. The neighborhood thrives as the school is the heartbeat of the community. As evidenced by the old Shallowford school closure, the land just sits there vacant with no purpose. It is worrisome what will happen to the property if closed and the specifics are unknown!	3/7/2026 8:34 PM
758	Keep Oakgrove elementary	3/7/2026 8:34 PM
759	Oak Grove does not align with the stated objective of addressing underutilization as it presently at 89% utilization.	3/7/2026 8:29 PM
760	Change is difficult, especially when it involves new and extra transitions of children. It is disorienting and can have a negative academic effect. The rollout of the changes, whatever they are, should be gradual, well-thought and communicated far in advance, and exceptions	3/7/2026 8:26 PM

	should be made in special circumstances to avoid disrupting more sensitive situations. There should be a system of options so people do not feel herded into the unknown.	
761	I enjoy my children being a part of a smaller school community and consolidation will take away from that. Not to mention a drop in test scores with uprooting children from a known environment. Hawthorne is a wonderfully small school where all of the teachers know my children well. In a larger environment, school becomes overwhelming and intimidating	3/7/2026 8:23 PM
762	It fiscally needs to happen but it creates gaps in neighborhoods.	3/7/2026 8:21 PM
763	Good	3/7/2026 8:20 PM
764	Keep Evansdale open, the community needs it - it was one of the main reasons we chose to live here	3/7/2026 8:20 PM
765	I understand the need in some places, but it doesn't make sense to lose Oak Grove Elementary. It is a key part of the community and a reason why people move to this area of DeKalb. The county should actually invest in this school versus ignoring it like it has for years.	3/7/2026 8:20 PM
766	Oak Grove does not align with the objective to close a school	3/7/2026 8:15 PM
767	Oak Grove Elementary does not align with the SAP's stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%, and Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/7/2026 8:01 PM
768	Ashford Park Elementary should not be closed. It is an excellent school that is over enrolled. The comment that it cannot be "expanded" does not make sense. Although the footprint of the school cannot be increased obviously another floor can be added on. I am completely against closing this high performing community school.	3/7/2026 8:01 PM
769	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130	3/7/2026 7:57 PM

	available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
770	Not happy about it	3/7/2026 7:56 PM
771	We need to know where the Ashford Park kids are going in order to give feedback. The school is far over capacity and none of the surrounding schools have room for the number of children that will be displaced if it closes. Ashford Park is deeply integrated in the chamblee cluster and community and needs to remain there.	3/7/2026 7:56 PM
772	Excelente	3/7/2026 7:47 PM
773	As a neighborhood member of the Evansdale community and possibly an upcoming parent of the school we very much prefer for the school to remain open and for the facilities to be updated. Empty buildings and larger schools would not be our preference.	3/7/2026 7:42 PM
774	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years.	3/7/2026 7:41 PM
775	Evansdale has and remains a strong school for the community and has potential to expand	3/7/2026 7:36 PM
776	Evansdale elementary school is an important neighborhood school that provides stability and support for students and families .closing this school would disrupt the community and create unnecessary transition for young children. I encourage the district to explore other solutions before considering closing Evansdale Elementary	3/7/2026 7:34 PM
777	It seems that the consolidation scenario is designed around a 600 student quota for elementary schools. However, it is unclear to me how this 600 student number was arrived at. Additionally, I agree with the sentiment expressed by others that the initial scenario and SAP recommendations ignore the human element. The proposal is supposed to address some several issues but how those are addressed is not well expressed and, frankly, the current recommendations appear hasty. 1. School utilization forecast The SAP website says two reasons for the adjustment are: "Declining student enrollment and underutilized schools" and "Schools that are severely over- or under-capacity". My children's school, Oak Grove elementary, is not severely under- or over-capacity. According to the SAP data metrics website, it is currently at 88.7% utilization. And I believe that number will likely trend up over the coming years. The SAP data metrics website appears to forecast declining enrollment at Oak Grove elementary in the next few years. However, this contradicts my experiences and recent trends. I see many young families with elementary-aged, or younger, children moving into the area. In fact, for many families, Oak Grove played a part in their decision to move to the area. Additionally, the historical data on the same SAP data website shows that Oak Grove	3/7/2026 7:32 PM

	enrollment is currently trending upwards: 363 in 2022, 389 in 2023, 428 in 2024, and 447 in 2025. It appears recent historical data doesn't support the forecasted downturn in enrollment. I would appreciate it if more info was shared on the forecast model so we can understand what assumptions are built into it and assess their validity. 2. Commute Times The SAP proposal also says scenarios are designed to address "the need for more efficient transportation routes". I do not understand how consolidating elementary schools will make transportation more efficient. Morning and afternoon traffic at elementary schools is notoriously terrible. Less elementary schools means larger coverage areas per school and consequently longer commute times. Large enrollment numbers will mean more drivers congesting roads as they wait to drop-off and pick-up their children. Additionally, more buses will be needed to service larger schools and most schools have a limited number of bus drop-off spots. 3. Costs The SAP adjustments are driven by the need to "consolidate resources and strengthen programs " [taken from SAP website]. I understand the reasoning that less schools means more money can be invested in each school's upkeep. But the financial costs of expanding schools to accommodate more children seems high. How long will it take the county to pay off any debt it incurs for such construction? How does that compare with current operating costs for schools proposed for closure. 4. Don't fix it if it isn't broken Oak Grove elementary is consistently among the best in the Dekalb County. What sense is there in closing a model school that is nearing capacity?	
778	Don’t do it	3/7/2026 7:23 PM
779	I think the initial scenarios are smart. The Dunwoody cluster has a number of elementary schools that are clustered together. It makes sense to collapse those schools.	3/7/2026 7:23 PM
780	Don’t close Oak Grove Elementary	3/7/2026 7:20 PM
781	We are disappointed to see Ashford Park elementary listed for closure, but even more disappointed there has been no care taken to provide a plan for where these children go instead. Ashford Park elementary is the hub of the Brookhaven Fields and Drew Valley neighborhoods and is the entire reason we bought a house where we did. While a school building certainly doesn't make a school, a community does. We are extremely concerned about the possibilities of 1) splitting up the Ashford Park elementary community; and 2) that community being removed from the Chamblee cluster, where it has long invested.	3/7/2026 7:20 PM
782	Pienso que son muy buenas	3/7/2026 7:12 PM
783	This neighborhood fully supports these schools. Attendance is rising in our area.	3/7/2026 7:11 PM
784	I am opposed to the school consolidations. Evansdale elementary is poised to increase enrollment to over 600 students by 2030, at over 10 Acres its lot size is bigger than neighboring schools that are recommended for expansion, it has large play field, multiple parking lots, the grounds can accommodate additions in the back of the school.	3/7/2026 7:11 PM
785	The poor teacher-to-student ratio significantly compromises the quality of education. With too few educators available to provide adequate instruction and support, students are less likely to grasp the material effectively. In the long term, the United States may fall behind other well-developed countries if current challenges within the education system—such as teacher shortages and insufficient resources—are not addressed. If these issues continue, the U.S. education system risks lagging behind that of other developed nations, potentially affecting future competitiveness.	3/7/2026 7:10 PM
786	I don’t not want my children’s school to close. Dekalb should change some smaller schools into Early Learning Centers instead of closing. Why are the counties schools losing so many students to charter and homeschool. Why are so many children out selling waters.	3/7/2026 7:06 PM
787	These two schools are magnet schools in DeKalb county for CDC and CHOA employees….	3/7/2026 7:01 PM
788	It really doesn’t seem to make sense. The scenario is closing some great schools in Ashford Park and Oak Grove that have immense community and parent support. The kids from those schools have nowhere to as surrounding ones are already above capacity. Ashford park is receiving a big and expensive redo starting this summer. The building will be nice and new. I don’t get why you then close it.	3/7/2026 6:58 PM
789	I am opposed to the consolidation plan. Neighborhood schools need to stay open. Evansdale has a great school and grounds, can accommodate staff and students, with great playgrounds and parking, enrollment is growing and expected eclipse 600 by 2030. The school is set up in a great way.	3/7/2026 6:57 PM

790	Please keep Oak Grove Elementary in our neighborhood, it has served us well over many decades and is needed by many young families moving in to our neighborhood	3/7/2026 6:56 PM
791	It is important for the district to examine the viable condition(s) of existing structures and how those buildings can support the proposed facility models as we move forward.	3/7/2026 6:53 PM
792	I do not understand the benefit of converting Cedar Grove HS to a middle school, while closing Cedar Grove MS. CGMS is a newer building than CGHS.	3/7/2026 6:49 PM
793	Please do not close our neighborhood school Oak Grove Elementary that has been a vital part of our neighborhood for many decades. This school provides an excellent education for our kids and test scores prove this. Our neighborhood really values Oak Grove Elementary School.	3/7/2026 6:48 PM
794	Although we understand the issues caused by declining enrollment, we have been informed that Oak Grove Elementary is operating near capacity and has over 200 students on the waitlist, including more than 100 kindergarteners. Oak Grove is an amazing community of kids, parents, and teachers working together to create both a solid educational foundation for our children and an engaged neighborhood. We respectfully ask that Oak Grove ES be removed from the list of potential closures.	3/7/2026 6:47 PM
795	Avoid. Keep ogrove seperate. Its historic	3/7/2026 6:44 PM
796	Bad idea. More teachers per student is better	3/7/2026 6:36 PM
797	I'm very much against the consolidation. Our neighborhood elementary school is seeing increased enrollment, has great facilities to accommodate students and staff, great space for playgrounds, and already has great parking	3/7/2026 6:33 PM
798	The release of information regarding the SAP has been confusing and misleading at times. The process should take place slower with even more opportunities for feedback from the community.	3/7/2026 6:29 PM
799	Do not like it. Evansdale is within our neighborhood. It has a big footprint. It should be renovated.	3/7/2026 6:27 PM
800	I want to keep Evansdale open.	3/7/2026 6:26 PM
801	This school is essential for the children living in this community	3/7/2026 6:22 PM
802	We would really prefer to preserve Ashford Park as its own entity and elementary school in order to serve our 3 1/2 year-old daughter. We've heard such great things about the school so we are very upset about any kind of closing. Of course we also bought our home and pay the taxes we do eight years ago in hopes to be a attend attending Ashford Park	3/7/2026 6:21 PM
803	Oak Grove is a strong school and the heart of the community.	3/7/2026 6:19 PM
804	I do not want my child's school to close. Charter school are taking students from the district. Smaller schools should become early learning centers.	3/7/2026 6:19 PM
805	Due to closures it seems that Doraville United will feed into Chamblee which will overcrowd the school and provide less room for magnet students. I don't agree with moving the magnet program out of Chamblee.	3/7/2026 6:13 PM
806	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M	3/7/2026 6:12 PM

	investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap	
807	I think it would be good	3/7/2026 6:11 PM
808	Targets the wrong schools for closing. The closings will necessitate massive construction projects that create noise and distraction for students and neighborhoods.	3/7/2026 6:07 PM
809	We do no want closure of Mclendon elementary	3/7/2026 6:05 PM
810	Looking at the student population and the usage data, it makes total sense to make changes that make DEKALB schools much more efficient and effective	3/7/2026 6:00 PM
811	Oak Grove is an excellent school and I have observed my grandson excelling at this location. Oak Grove is one of the highest performing schools in the group.	3/7/2026 5:59 PM
812	I do not believe that Evansdale should be on the closing list. There are several reasons I feel this way. The location of Evansdale within the neighborhood is ideal, it is on a main road (Evans), but not directly, so school doesn't affect normal traffic patterns and kids aren't exiting directly onto a busy street. In terms of the site itself, there are multiple parking lots, a field, and playgrounds already available, plus the overall lot size is bigger than others that are on the list for expansion, which would allow for building expansion if necessary. Additionally, the French program carries through Evansdale, Henderson MS, and into Lakeside. My daughter is in the Lakeside French program now. The French program with the teachers and students (between all 3 schools) is vital to the community and I believe should continue to exist and be a part of the Lakeside cluster. The families in the Evansdale neighborhood have been very involved in the life of each of the schools that we feed up through and strongly feel that we should remain at Evansdale and feed up into Henderson and Lakeside, rather than potentially moving to Tucker or Sequoyah clusters. In terms of plans for Livsey to be expanded, just a few years ago there were discussions that it should be closed as it was so small. It doesn't make sense to me that 4 other elementary schools in the area (Evansdale, Henderson ES, Oak Grove, and Midvale) would now close and somehow Livsey could accommodate a good portion of those students. Additionally, now that Chamblee Tucker is only 2 lanes, it would mean additional traffic which is already a challenge around the school and leading up to Tucker HS.	3/7/2026 5:55 PM
813	Vanderlyn was a tremendous elementary school for our youngest - excellent, challenging instruction from very invested teachers (just the right student/teacher ratio) I am very worried about combining elementary through 8th grade - the developmental differences are so profound that safety will be a concern… I am less worried about the number of transitions and would prefer K-3, 4-5, 6-8 and 9-12.	3/7/2026 5:50 PM
814	Estoy satisfecho de todo no tengo mas palabras que desir gracias	3/7/2026 5:41 PM
815	Oak Grove already meets the utilization goal	3/7/2026 5:40 PM
816	Do not close local elementary schools just to house students in maxed out classrooms. There is more than just cost at risk - teachers, students and staff will suffer. Making decisions about building without considering programs and boundaries is short sided.	3/7/2026 5:39 PM
817	I think it’s necessary to provide schools with more resources but am not convinced that consolidating facilities is the answer. Wouldn’t this increase class sizes? I would need a lot	3/7/2026 5:32 PM

	more detail into how resources would be fairly and equitably divided across facilities to support this scenario.	
818	Kingsley is very poor to this community. That is one school should keep open.	3/7/2026 5:28 PM
819	In the event of low enrollment rates at certain schools, the consolidation of 27 facilities may be necessary. This could entail transitioning some high schools to middle schools and vice versa. The ultimate goal, hopefully, of this consolidation is to concentrate resources on the students within the remaining schools.	3/7/2026 5:22 PM
820	While I appreciate the needs of the district to ensure that facility use is maximized, I'm not sure that creating mega elementary schools, particularly in land-locked neighborhoods like Hawthorne is the right play. Is DCSD working with the County and local municipalities to understand current and future residential construction? For example, the overcrowding seen at some schools could have been foreseen and addressed by understanding that many multi-family units were on the horizon. What happens if we close and consolidate facilities and more residential units are constructed, shifting the needle from under capacity to over capacity?	3/7/2026 5:19 PM
821	I think in the south end of Dekalb where enrollments are down, the consolidations to bigger more new schools makes sense. The north end closures with no guide makes it difficult to give feedback on initial scenarios.	3/7/2026 5:14 PM
822	Oak Grove Elementary should remain open. It is the strongest of the 3 surrounding it with parent involvement, a strong Foundation that raises over $100K annually to support the school. The school is the heartbeat of this neighborhood and should remain open.	3/7/2026 5:12 PM
823	Please don't close Oak Grove Elementary. We love the small school atmosphere and believe it provides better learning that a big consolidated school.	3/7/2026 5:10 PM
824	It is stupid to close Ashford Park, which is a high performing school. It is stupid to close Kingsley and Vanderlyn where the capacity in needed. It seems like you are proposing to close schools in the north just for political reasons.	3/7/2026 5:06 PM
825	I agree with the decision to consolidate schools to conserve resources due to the decline in enrollment.	3/7/2026 5:06 PM
826	The goal is 88%. Oak Grove is already at 89%. SAVE OAK GROVE ELEMENTARY.	3/7/2026 5:02 PM
827	More teachers are needed to provide high quality education for American students - fewer schools limits opportunities, is short-sighted, and a long term loss of money	3/7/2026 4:56 PM
828	There is confusion when it has been stated that buildings are in need of repair and so it's a funding issue, and yet your bullet point number one says it is a capacity issue. The inconsistency leads most people to believe that this poll does not offer any valid consideration and feedback and that the county has already made up their minds and decisions. Prove to us otherwise. Evansdale need remain open given its lot size, capacity, French track, and quality condition	3/7/2026 4:56 PM
829	Keep Evansdale open.	3/7/2026 4:55 PM
830	Oak Grove Elementary is chocked full of students and has been a neighborhood treasure for many, many years. it is also one of the highest rated schools in the county. If you want the county to continue growing, closing its highest rated elementary schools is not the way. School quality and student test scores are a primart motivator for folks wanting to move into the county.	3/7/2026 4:52 PM
831	I was a student of Brockett	3/7/2026 4:49 PM
832	Please don’t close oak grove elementary. It is a center of the community and has been a point of pride for this neighborhood.	3/7/2026 4:47 PM
833	Keep high schools 9-12 Consolidate elementary and middle pk-8	3/7/2026 4:46 PM
834	Oak Grove does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73%	3/7/2026 4:42 PM

	utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
835	Basing a change this dramatic on financial issues alone is irresponsible and self-serving. These changes will have significant impact on the lives of children, families and communities. A comprehensive and transparent audit should be conducted of present state AND future impact of changes, and the results shared with the public before ANY sweeping changes should be made. A comprehensive and transparent audit of current state of Dekalb County school administrative staffing and costs, mishandling of funds, expenses, etc should also be completed and shared with the public. If these audits are not performed and shared, this effort should be stopped immediately. Now specific to Oak Grove Elementary: the data is clear that this school is not in decline but flourishing, is almost at capacity with over 200 on a waitlist. Highly engaged active community with exceptional parent volunteer rates. Oak Grove is NOT underutilized. To close this school would be devastating and fragment the community. Doing this in the name of "equity" is absurd. If data shows that some schools in different areas of the county need to be closed then that should be considered. But to close flourishing schools in the name of equity to keep things fair is ludicrous and unfair in and of itself. A hard and honest assessment of the administration should be taken now before any changes are made within the school system's physical infrastructures.	3/7/2026 4:40 PM
836	I moved to Drew Valley at the end of 2024 with the intention of having my family attend the local public schools, as I loved the strong sense of community and great schools. I believe in keeping our trajectory in the Chamblee MS and HS cluster, and the pathway of closing the Ashford Park Elementary School facility as a neighborhood school, and shifting the Ashford Park Elementary attendance zone to the current John Lewis Elementary facility, and preserve our (current attendance zone) Chamblee Cluster alignment.	3/7/2026 4:39 PM
837	I think the smaller model of neighborhood schools contribute greatly to the success of the school.	3/7/2026 4:33 PM
838	I do not like the consolidation plans as this would close Evansdale elementary and this school is vital to the fabric of the community	3/7/2026 4:24 PM
839	The teachers are great and they really care for our students. The staff is also very good. Overall, this school is great.	3/7/2026 4:24 PM
840	Evansdale is a prime candidate for expansion	3/7/2026 4:22 PM
841	The current consolidations are fine based on the data.	3/7/2026 4:22 PM
842	Don't close the school, expand, there are options such as portables	3/7/2026 4:21 PM
843	we would like to keep Ashford Park open. it's important to the communit	3/7/2026 4:21 PM

844	Careful consideration should be given . ie: what will the closed schools be use for and how will that impact that community	3/7/2026 4:19 PM
845	Please don't close Oak Grove. So many of us moved here for this school that is so important to the community.	3/7/2026 4:18 PM
846	Its a great school	3/7/2026 4:18 PM
847	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/7/2026 4:17 PM
848	I am against this plan for consolidations! My children went to Evansdale and it is what makes this community strong.	3/7/2026 4:16 PM
849	Please consider keeping Kingsley ES open and closing Chesnut instead. There is a lot of congestion already at Chesnut.	3/7/2026 4:15 PM
850	Just because it looks good on paper doesn't mean it's the correct solution. You are missing the big picture: schools with trailers can't accommodate more students. Busing students further increases costs and makes the school day too long for kids. Our neighborhood growth is outpacing what these incorrect numbers. Strong communities are going to be ripped apart, disguised as efficiency.	3/7/2026 4:15 PM
851	need more info before feedback	3/7/2026 4:11 PM
852	I moved to this area for the school cluster. The schools needs to be renovated. Not closed.	3/7/2026 4:05 PM
853	Do not close Oak Grove Elementary! It is not underutilized. It is a pillar of the community, providing accessible and walkable educational opportunities to students in the neighborhood. Please do NOT close OGE.	3/7/2026 4:02 PM
854	Please don't close our school.	3/7/2026 4:02 PM
855	Your scenario would almost certainly increase class size and decrease safe, walkable access to our beloved local school	3/7/2026 4:01 PM
856	Don't close Ashford park, remodel. Highest priority is staying in Chamblee cluster. If move, John Lewis is desired location. All Ashford park kids take over it	3/7/2026 3:56 PM

857	Results are questionable.	3/7/2026 3:54 PM
858	This project is too large to undertake as one big project. Based on the information provided, the concern should have been addressed before now. The decline in enrollment did not just happen. Seems like someone (staff and board members) has just woken up and now is trying to solve all the problems in one swoop. Also I have looked at some of the schools. Seems like the decisions to close certain schools may not be the best choices—for example. Livsey is a smaller school and has 8 trailer classrooms. The land at and around Livsey is not appropriate for expanding—and I cannot imagine how bad traffic would be to drop off/pick up students on a busy portion of Chamblee-Tucker Road. On the other hand, Evansdale is a larger school and has more land (10.1 acres) available for expansion. Traffic when dropping off/picking up students would be better than at Linsey. You probably think since I have children/relatives at Evansdale I am just saying this. My husband and I walked to Livesy and counted trailers, looked at land around it, looked for traffic patterns, etc. Expanding Livsey would be problematic and would not serve the community or its students well.	3/7/2026 3:53 PM
859	I oppose the closure of Evansdale Elementary	3/7/2026 3:50 PM
860	Oak Grove does not align with the stated objective of addressing underutilization. The school district's goal is to increase utilization to about 88%; Oak Grove is already at 89% (447 students / 504 capacity). Enrollment has increased for 4 consecutive yrs. At the current rate, Oak Grove is likely to reach or exceed full capacity in 2-3 yrs. If Oak Grove closes, students would need to be absorbed into Sagamore Hills or Briarlake. But these two schools do not have the capacity to absorb 447 Oak Grove students. Also, the area around Briarlake is experiencing measurable residential growth that is likely to increase Briarlake's enrollment. Please note, if enrollment models rely on pandemic-era data (2020-2022), the assumptions obtained from the model will be distorted. Projections should reflect the 2024-2026 recovery years. In addition, Oak Grove is one of the highest-performing schools in the review group. Closing this high-utilization, growing, and high-ranking school would not at all remedy the utilization gap.	3/7/2026 3:45 PM
861	I understand the need to consolidate with a shrinking student base but it feels like the solutions offered so far are not well thought through.	3/7/2026 3:33 PM
862	My primary concern is the the absence of information regarding potential impact to the Chamblee middle and high school magnet program. This program has been extremely beneficial to my student and I would hate for it to be eliminated with the increase of students from Doraville Elementary. The availability of this program has kept us in dekalb county rather than moving or going to private school. I know other parents who have made similar decisions.	3/7/2026 3:31 PM
863	Initial scenario were presented with no clear understanding of ending results of school closing. It is understood that changes need to happen but their no resolutions presented to help ease the blow of local school closing. Also I think it is very unfair and selfish that Dekalb employees are the last to know or last to find out major changes happening within the county. Employees receive information after it has already been release to the media. The direction Dekalb is moving in is very unfortunate and will soon lose many employees.	3/7/2026 3:30 PM
864	I think Oak Grove is an important part of our community that would be greatly missed if closed	3/7/2026 3:20 PM
865	I can see that value of consolidation, but concerned about class sizes and schools getting too big.	3/7/2026 3:20 PM
866	I am concerned about the closing of the Evansdale Elementary school. It is a wonderful neighborhood school with an amazing french immersion program. The closing of this school would have a negative impact on all the children that attend.	3/7/2026 3:19 PM
867	Oak Grove Elementary is a part of the local community and is a big draw for neighborhoods and real estate. And it continues to be very highly rated. Consolidating with Sagamore would be a bad decision, an opinion shared with both schools' families.	3/7/2026 3:15 PM
868	We moved to the area specifically because of the high quality education offered by Oak Grove ES and the extremely involved community that supports it. I'm shocked that closure of this school is being proposed as it represents a central hub around which our community is built. My belief is that OGE is one of the most valuable assets for this area and a jewel of the Dekalb school system. It's centrally located, represents a very high quality school environment, and anchors the community. Please do not close or repurpose it to save a couple dollars in the short term. Take into account the stability this school provides in the area. Closure will have an enormous, long term negative impact on the surrounding community.	3/7/2026 3:13 PM

	Closure is a destabilizing force that will ripple out to all families. I propose you maintain or expand the campus instead, building on its long history of inclusion, quality education, and community building.	
869	Leave Oak Grove & Lakeside alone	3/7/2026 3:11 PM
870	Keep the neighborhood schools. They mean do much to the communties	3/7/2026 3:06 PM
871	I understand the need for our public schools to be used efficiently. I am just writing to say that Oak Grove Elementary should be the LAST school you close, not one of the first. Oak Grove is the reason we moved to this neighborhood. It is the heart of our community.	3/7/2026 3:06 PM
872	Consolidating small community elementary schools such as Oak Grove Elementary would negatively impact children and families. Neighborhood schools allow families to walk to school, participate in school activities, and remain closely connected to their local community. Young children in Pre-K through Grade 5 are still developing neurologically and socially. They benefit most from smaller, family-oriented school environments where they are known personally by staff and feel a strong sense of belonging. A community-centered school model supports emotional security, learning readiness, and healthy development. Preserving smaller neighborhood elementary schools helps ensure children grow in environments where they feel seen, supported, and valued.	3/7/2026 3:05 PM
873	I'm concerned about school quality and preserving schools with academic excellence and parent/community support.	3/7/2026 3:03 PM
874	Please maintain the small community elementary schools.	3/7/2026 3:01 PM
875	Evansdale has and remains a strong school for the community and has potential to expand.	3/7/2026 2:57 PM
876	Muy bueno, pero el edificio necesita reparaciones	3/7/2026 2:52 PM
877	Terrible idea Keep Oak GROVE OPEN!!!	3/7/2026 2:50 PM
878	Evansdale has and remains a strong school for the community and has potential to expand.	3/7/2026 2:50 PM
879	Oak Grove and Henderson Mill do not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: •Sagamore Hills: 413 / 456 (91% utilization) •Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: •Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. •Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: •+50 students → ~83% utilization •+100 students → ~90% utilization •Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: •$1.5B Arthur M. Blank Hospital campus •~4,500 employees (including ~1,000 new jobs) •$87.7M Emory Heart & Vascular expansion •Ongoing Emory hospital expansion •$1.1B in FY24 research awards •$270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: •Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) •Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/7/2026 2:50 PM

880	Don’t close Oak Grove. It is the core of a caring educational community.	3/7/2026 2:48 PM
881	We would hate to see our small community schools, like Oak Grove Elementary, close their doors after decades of serving children and families. These are tight-knit schools with active, involved parents. Many in the community can walk to school. We already have large middle and high schools filled to capacity to the point they are using multiple trailers. This is where your focus should lie.	3/7/2026 2:45 PM
882	Please don’t get rid off school please find another option than closing. It will leave an eyesore in the community	3/7/2026 2:43 PM
883	I do not agree with having fewer elementary schools by making big super schools for elementary schools.	3/7/2026 2:40 PM
884	The consolidations seemed to be more on the south side of Dekalb County where a large diverse population is located whether it be Latino or Black.	3/7/2026 2:32 PM
885	I am writing this statement today not only as a concerned resident but as a proud alumna of Midvale Elementary—the very school where, at eight years old, I met my best friend. We grew up riding bikes through these streets, anchored by a school that knew our names and our families. Today, my life has come full circle: my best friend and I have both returned to this neighborhood to raise our young children in the same "village" that shaped us. However, I am deeply troubled by the district’s current "Student Assignment Project" proposal, which considers closing or merging up to 27 local schools, including Midvale. This proposal threatens to dismantle the heart of our community. The justification for these closures—low enrollment and "underutilization"—is a contradiction of our daily reality. This year alone, Midvale was forced to turn away at least two full Pre-K classes worth of students. While my daughter was fortunate enough to win one of the few lottery spots, dozens of our neighbors were left behind. You cannot claim a school is empty while simultaneously denying entry to the very children who could fill it and sustain our public system for the next decade. I completely reject the proposal of mass closure and merging of our neighborhood schools for the following reasons: * Neighborhood Schools are the "Connective Tissue": Small schools like Midvale allow for the walking and biking culture I enjoyed as a child and want for my daughter. Merging these into distant "mega-schools" destroys student independence and parental engagement. * Artificial Capacity Gaps: Turning away Pre-K students creates the very "low capacity" the district now uses to justify closures. Instead of closing schools, we should be expanding Pre-K access to fill them. * The Risk of "Slipping Through the Cracks": Larger, merged environments often lead to diminished individualized attention. Research shows that displaced students frequently face declines in achievement and engagement during the trauma of a school closure. * Community Stability: Our schools are the anchors of our property values and neighborhood safety. A vacant school building is a scar on a community, not a "fiscally efficient" solution. * Our children have the "test of their lives" ahead of them in this great big world. They deserve to start that journey with the security of a neighborhood school—not a lottery win or a long bus ride to a merged facility. Please choose to invest in our families by keeping our local schools open	3/7/2026 2:23 PM
886	It appears to be well thought.	3/7/2026 2:22 PM
887	Oak Grove Elementary serves the surrounding community in many ways. Residents of all ages share the vision for education of Dekalb County by supporting the school and it’s staff.	3/7/2026 2:20 PM
888	We are not in favor of consolidating the schools. Out community values small schools.	3/7/2026 2:18 PM
889	I feel like this will cause classrooms to be overcrowded and will cause students to not get the proper attention to their learning needs.	3/7/2026 2:16 PM
890	I don't disagree that schools should be reviewed, but DCSD is wrong to include schools that are well utilized and top performing on the closure list. My grandchildren attend Oak Grove elementary school. The school, teachers, and parents are incredible. You cannot pick up these kids and move them to another school without negatively impacting students and outcomes. I do not support a project of this size when I see several schools performing very well and with good utilization on this list. Oak Grove is a wonderful school that should be a model for other schools.	3/7/2026 2:05 PM
891	Henderson mill elem along with three other in the area that is too many changes in one geographic location	3/7/2026 2:00 PM
892	You are focusing on too many schools at once. Even if you decide not to weigh student	3/7/2026 1:57 PM

	outcomes (which is wrong in my opinion) Oak Grove should not close, and you should focus your efforts on areas that are severely under enrolled or over capacity. That is not the case with Lakeside cluster elementary schools. Oak Grove has one of the highest special ed student populations, and is still one of the top schools in the district. It will be almost at capacity next year. You will lose funding for special ed if you break up these students, as you need a critical mass to obtain this support.	
893	I would strongly object to the closure of Oak Grove Elementary School.	3/7/2026 1:52 PM
894	I understand and support the need to address overcrowding at Dunwoody High School. I recognize that Vanderlyn's proximity to the high school places our campus within a broader facilities planning conversation. I also recognize that the district has framed SAP around enrollment trends and utilization. Any proposal should clearly demonstrate how those metrics are being applied at the cluster level. The combined Vanderlyn and Dunwoody High School campus presents an opportunity to explore thoughtful, phased solutions that address secondary capacity while preserving elementary access. The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made. Vanderlyn is a diverse, academically strong, and inclusive community. Preserving stable elementary environments while solving high school challenges aligns with district priorities.	3/7/2026 1:52 PM
895	I respectfully urge the board to reconsider any proposal to close Evansdale Elementary and instead evaluate the opportunity to expand and invest in the school. First, Evansdale's projected growth should be an important factor in this decision. According to the SAP dashboards, Evansdale is one of the few elementary schools where enrollment and utilization are expected to increase. Closing a school that is projected to grow seems counterproductive when the district will likely need the capacity in the near future. Second, Evansdale serves one of the most diverse and high-performing student populations in the area. The school's demographics reflect a truly inclusive community: approximately 50.4% Hispanic/Latino, 22.2% White, 16.1% Black or African American, 7.3% Two or more races, 2.9% Asian or Asian/Pacific Islander, and a small percentage American Indian or Alaska Native. Evansdale demonstrates that a diverse school community can also be academically strong, and that is something worth preserving. Third, Evansdale's site offers a practical advantage that should not be overlooked: the lot size. While the facility score may be lower than some other schools in the Lakeside Cluster, the property itself is substantially larger than the sites at Sagamore Hills and Livsey, which are currently proposed for expansion. Because of this, Evansdale could realistically absorb portions of the Henderson Mill attendance zone and expand from its current 500-seat capacity to a 600+ seat school with a relatively modest building addition. This would provide additional capacity where growth is expected without the need for major site constraints. Location and traffic patterns are also important considerations. Evansdale's position along Evans Road offers better traffic flow potential than alternatives such as Livsey, which sits near the busy Chamblee-Tucker corridor. Expanding Evansdale would likely create fewer transportation challenges for families and staff. Additionally, Evansdale's proximity to Henderson Middle School provides a meaningful benefit for many families. For some students—particularly those from lower-income households—the ability to walk to both their elementary and middle school is an important accessibility factor that should not be lost through consolidation. For these reasons, I strongly encourage the district to consider expanding Evansdale rather than closing it. Investing in Evansdale would preserve a diverse, growing, and high-performing school community while making efficient use of an existing site that has room to grow. Finally, I would encourage the district to consider hosting cluster-specific meetings in the future. Many families would benefit from deeper engagement that focuses on the needs and dynamics of individual school communities. I also think that this plan is being rushed. Round 1 is ending weeks after communicating to the community that this plan existed. The entire process for the decision making is planned for less than a year. This process should be slowed down to ensure that the best plan is set forward. Thank you for your time and for considering the long-term impact of this decision on students, families, and the broader community.	3/7/2026 1:50 PM
896	Do not closet top performing schools like Oak Grove. It is well utilized and expected to be at almost full capacity next year. Focus on áreas and schools thay actually have empty seats.	3/7/2026 1:49 PM
897	The current SAP scenarios present enrollment and facility data, which is important baseline information. They omit critical analyses required for responsible closure decisions. Specifically, they're lacking: 1. Academic Performance Comparison - Which schools are succeeding academically despite lower enrollment? 2. Financial Sustainability Analysis - Which schools	3/7/2026 1:47 PM

	generate sufficient revenue to justify their operational costs? 3. Community Stability Assessment - Which closures will cause family attrition and accelerate enrollment loss? 4. Receiving School Capacity Review - Are consolidation targets actually better-performing and adequately equipped? Without these four analyses, we're unable to distinguish between the schools that should close (low performance, high cost, low community stability) and schools that should be retained (adequate performance, break-even finances, strong community roots). Please complete these data analyses before making irreversible decisions that may have costly consequences. The real costs of incomplete decisions can easily leave DeKalb with even worse financial, academic, and community outcomes. Precedents have been set in other school districts across the country; in Denver, Portland, and Jefferson County, all made closure decisions without complete data. As little as five years later, they had to reverse course or shift their strategies. Corvallis in Oregon paused closures when community requested academic data. We're asking DeKalb to learn from their experience. Once the data is complete, planning the consolidations as a tiered or phased schedule will allow us to pace our decisions appropriately and adjust accordingly. Transparency, complete information, and defensible decisions based on evidence is what will create buy-in from the communities as we work to stabilize enrollment.	
898	I don't know if this is the answer to disconnect communities within their neighborhoods. Children get to attend schools close to their homes especially at Toney Elementary. I believe we should try and save as many of the smaller schools so the children to stay close to home as well as teachers and staff do not loose their jobs.	3/7/2026 1:43 PM
899	Keep Brockrt elementary open	3/7/2026 1:36 PM
900	Approve of consolidating schools overall. Specific concern is the expansion of Livsey Elementary instead of expanding Midvale. The concern is due to the small land parcel and the high traffic main road that Livsey is located on. Midvale has a large field and less traffic and seems more appropriate to expand.	3/7/2026 1:31 PM
901	Please keep Brockett Elementary open. It is so needed for our kids.	3/7/2026 1:30 PM
902	Brockett	3/7/2026 1:28 PM
903	- Building feedback: Need to test for the following things and make any information public: indoor air quality; outdoor air quality; and model for changes to outdoor air quality at each facility with increased traffic and reasonably foreseeable temperature increases over the next 50-100 years. Also need to evaluate 100 year flood plains for each of the facilities under reasonably foreseeable climate scenarios (better yet, talk to the Massachusetts planners and use their flood planning years - I think they're at 300?). Test water quality in all buildings you are trying to keep open. Especially important due to the age of the buildings: do evaluation to determine the costs of remediating any of the property (hazardous materials, asbestos, lead paint, etc) and factor that into the costs. Georgia Environmental Protection Division should be able to help with the technical side; Georgia Environmental Finance Authority can help with funding. - Need to evaluate and make public both the facilities that have specialized equipment, and all buildings' ability to be renovated to incorporate specialized equipment (both for programs/accessibility) - Very building adjacent: need to run transportation models to see if the areas can handle the increased transportation, and discuss with local governments that will be impacted if they can make any needed changes in an adequate time frame. Further, to avoid increasing pollution due to longer commutes, factor in costs to replace any fossil fuel school busses with electric ones.	3/7/2026 1:23 PM
904	Chamblee cluster should stay as is. There are children maturing and are in a cohort that should be kept together.	3/7/2026 1:18 PM
905	The consolidations may not be a bad idea but should initially occur in the neighborhoods with low student attendance. I do not think that Middle Schoolers should ever be consolidated with High Schoolers.	3/7/2026 1:17 PM
906	Please do not close oak grove	3/7/2026 1:15 PM
907	Evansdale elementary is an integral part of our community and it cannot be closed.	3/7/2026 1:14 PM
908	I am totally opposed to closing Oak Grove Elementary School. It is an excellent school and a center for the Oak Grove Community and neighborhood.	3/7/2026 1:14 PM
909	Oak Grove is already at 89% utilization with a projected 96% utilization for next year. If it were to close, Sagamore and Briarlake schools would not be able to absorb all of Oak Grove's	3/7/2026 1:01 PM

	students. I believe Oak Grove should not close. Oak Grove Elementary has strong faculty retention, strong community support, and a strong PTA. It is a central community hub and promotes strong community cohesion. Housing in the Oak Grove neighborhoods has always been in high demand because of the excellence of its public schools. The demand for spots in this cluster is only going to increase with new developments such as Lulalu Hills and Corporate Square. There needs to be academically strong public schools in this cluster and Oak Grove has consistently provided this.	
910	Theas schools are good i want to them and i got treated good	3/7/2026 12:55 PM
911	M	3/7/2026 12:55 PM
912	Small neighborhood schools are my preference.	3/7/2026 12:48 PM
913	I think 6 through 12 is a bad idea	3/7/2026 12:42 PM
914	Concerned that this would lead to over crowding. Affect the housing market. Faculty would loose their jobs.	3/7/2026 12:40 PM
915	I'm against closing down the schools.	3/7/2026 12:36 PM
916	Please do not close Evansdale! At 10.1 acres, Evansdale's lot is bigger than neighboring schools recommended for expansion. It has a large play field, 2 playgrounds, and multiple parking lots. It is uniquely situated to accommodate increased traffic, as it takes up 2 sides of the neighborhood block. Evansdale's enrollment is projected to increase to over 600 by 2030. The parent, teacher, and community volunteers provide the unique resources needed for our French immersion program. Moving the program would destroy this vital community. French teachers at Evansdale, Henderson, and Lakeside have put down strong roots in our community! Older students mentor the younger ones. It is imperative to keep this program at Evansdale and within the Lakeside cluster to keep the program strong. The French immersion program is one of the main reasons I kept my two boys at Evansdale instead of moving them to Kittredge/Chamblee. Evansdale was an amazing school for my two boys and we don't want to see it go anywhere!!!	3/7/2026 12:36 PM
917	Considering the amount of land it sits on Evansdale should be renovated and expanded.	3/7/2026 12:15 PM
918	I believe that some schools being constructed located will be terrible for parents and students	3/7/2026 12:08 PM
919	All of the elementary schools are on two lane roads and in small physical lots. I don't see how the plans ease traffic and help at all.	3/7/2026 11:59 AM
920	As a parent whose child attends Oak Grove Elementary School through the lottery program, I strongly encourage DeKalb County School District to carefully consider the impact of consolidating high-performing schools that families actively seek out. Oak Grove's strong reputation and engaged community are exactly the kinds of schools that keep families invested in public education. For families like ours who chose this school because of its academic standing and environment, consolidation could remove an important opportunity that helps retain students within DCSD rather than losing them to private or charter schools. I hope future scenarios prioritize preserving successful schools while addressing underutilized facilities elsewhere in the district.	3/7/2026 11:58 AM
921	I understand that DeKalb County School District must address underutilized facilities and align resources with current enrollment. However, consolidations should prioritize under-enrolled or underutilized campuses rather than closing stable, high-performing neighborhood schools. Schools like Oak Grove Elementary School play an important role in retaining families within the public school system. When strong neighborhood schools are closed or consolidated, families often choose private or charter options instead, which can accelerate enrollment decline across the district rather than solve the capacity problem. In addition, consolidating successful neighborhood elementary schools can significantly increase transportation times, traffic congestion, and class sizes while weakening long-established community connections. These schools function as important community anchors and support strong parent engagement, which directly benefits student outcomes. As DCSD considers consolidation scenarios, I encourage the district to prioritize strategies that maintain thriving neighborhood schools while addressing underutilized facilities through programmatic changes, magnet opportunities, or grade band restructuring where capacity is significantly underused. Protecting schools like Oak Grove Elementary School will help maintain public trust and support long-term enrollment stability for the district.	3/7/2026 11:54 AM

922	Please do NOT close our neighborhood Oak Grove Elementary School. My parents moved to this area because of this school. Oak Grove Elementary was the best of the schools I went to including Henderson Middle School and Lakeside High School. The school is vital to our neighborhood and kids education. Oak Grove Elementary is at 95% capacity and the test scores strongly indicate a very good school.	3/7/2026 11:49 AM
923	While I understand the district's need to address underutilized facilities, I urge careful consideration before consolidating schools that are stable, high-performing, and deeply embedded in their communities. Schools like Oak Grove Elementary School serve as community anchors and attract families to the district. Closing such schools may accelerate enrollment loss rather than solve it.	3/7/2026 11:47 AM
924	Concern about empty school buildings and overcrowding other schools	3/7/2026 11:45 AM
925	Although Dekalb may be able to provide to 110K students, schools are already packed at 90+K. From my experience, being a graduate myself from DCSD, teachers are already struggling to adapt curriculum to every students unique learning needs/interests. Some students accel in specific subjects quickly, while others need continued support. If by consolidating, Dekalb would be cramming more students into a school, and add even more students into classrooms already full, then I do not support this idea. Consolidating resources means Consolidating students, whom already have very large class sizes. According to one flyer, "Save Evansdale", the schools enrollment is projected to GROW 600+ students in the next 4 years (by 2030). Where will all of these students go? If schools are already crammed, there isn't room to close schools and add additional students to already-full classrooms. Additionally, students will have to bus to further locations! This longer commute not only adds the amount of time students will have to spend on busses, but also add risk to students who are old enough to drive. High school students driving cars may have to drive further, thereby adding cost of gas and also risk of wrecks by driving further. Moreover, students who are unable to afford a car will have to wake up even earlier to catch a bus that has to drive further. For students who work jobs to help their families or save for college, waking up even earlier for a further bus drive will impact their education. If they don't get enough of sleep, they won't be able to focus in class. Or they won't be able to work as many hours at night in order to go to bed earlier in order to wake up earlier (which effects how much money they can save for college, as well).	3/7/2026 11:37 AM
926	I am counting on maintaining a strong academic tradition in our neighborhood by keeping Oak Grove Elementary school open.	3/7/2026 11:36 AM
927	Expansion projects will upgrade capacity by 250 students to each building. Will ES to MS and MS to HS conversions include upgrades as well? There are no upgrades/expansions in the Southwest, Southeast, or Central regions only in the North. Will the dollars spent to upgrade or convert facilities be spread equally between all 4 regions, or will dollars spent be focused primarily on expanding northern schools?	3/7/2026 11:34 AM
928	I think that the use of the most recent census data to determine the upcoming boom in the population due to children from the ages of 0-3years old that are not being considered.	3/7/2026 11:34 AM
929	Evansdale is over 10 acres that is interior to a subdivision. It would be an ideal expansion site.	3/7/2026 11:32 AM
930	I understand the district's need to better utilize facilities and concentrate resources due to declining enrollment. However, consolidation should be approached carefully to ensure that class sizes remain manageable and that schools receiving additional students have the staffing, space, and support services needed to maintain quality instruction. It will also be important to consider transportation times, especially for younger students. Any consolidation plan should ensure that special education services, intervention support, and counseling resources are not reduced but strengthened so that all students continue to receive the support they need.	3/7/2026 11:31 AM
931	Evansdale needs to be renovated and expanded. • At 10 acres, Evansdale's lot size is bigger than neighboring schools recommended for expansion. • Evansdale is unique in that it has a large, separate play field, two playgrounds, and multiple parking lots. The site can accommodate additions in the back of the school and still have ample play and parking space. • Evansdale is uniquely situated to accommodate increased traffic, as it takes up two sides of a large neighborhood block. • Evansdale's enrollment is projected to increase to over 600 by 2030. • Neighborhood parent, teacher, and community volunteers provide needed resources and personnel for French students. Moving the program would destroy this vital community. • French teachers at Evansdale Elementary, Henderson Middle and Lakeside High Schools have	3/7/2026 11:31 AM

	put down strong roots in our community. Older students mentor the younger students. It is imperative to keep this program at Evansdale and within the Lakeside cluster to keep the program strong.	
932	Closing small high-performing schools like Oak Grove will harm the children and parents who make education a priority. It should not simply be a question of prioritizing dollars over families.	3/7/2026 11:29 AM
933	See item 8 below	3/7/2026 11:29 AM
934	Our kids attended Evansdale elementary, Henderson middle, and now at Lakeside high. Evansdale unique French immersion program which is supported by excellent French teachers at Lakeside would be a terrible loss. Also, Evansdale sits on a huge lot, with more room to expand than others, and has more area for outdoor activities. If anything, you should be expanding, not eliminating Evansdale. Also, kids will have to be bussed further, meaning earlier star and later end, which is a wast of their time and can cause problems with parental work schedules. Schools need to be local, especially elementary schools, but really all of them. LOCAL parents need to have input on LOCAL schools. Last, your going to be destroying home values throughout the county. Nobody is going to want to buy a home without neighborhood schools. It's already too spread out. The elemtary schools are the main saviors. Henderson middle should probably be 2 smaller schools, and Lakeside is bordering on being too large, but is still fine though definitely needs some restoration.	3/7/2026 11:24 AM
935	Keep Oak Grove, Sagamore, Lakeside, and Henderson.	3/7/2026 11:22 AM
936	I would like to see Ashford Park stay open and functioning as an elementary school.	3/7/2026 11:22 AM
937	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/7/2026 11:16 AM
938	Expanding evansdale seems like a better idea than expanding Livsey. Livsey is on a dangerous busy street. Evansdale has more property to expand.	3/7/2026 11:12 AM
939	Limit closing. Consider district history. Consider staff quality	3/7/2026 11:10 AM
940	Oak Grove should not close or consolidate	3/7/2026 11:09 AM

941	Oak Grove Elementary school should not consolidate or close	3/7/2026 11:09 AM
942	I understand and support the need to address overcrowding at Dunwoody High School. I recognize that Vanderlyn's proximity to the high school places our campus within a broader facilities planning conversation. I also recognize that the district has framed SAP around enrollment trends and utilization. Any proposal should clearly demonstrate how those metrics are being applied at the cluster level. The combined Vanderlyn and Dunwoody High School campus presents an opportunity to explore thoughtful, phased solutions that address secondary capacity while preserving elementary access. The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made. Vanderlyn is a diverse, academically strong, and inclusive community. Preserving stable elementary environments while solving high school challenges aligns with district priorities.	3/7/2026 11:08 AM
943	I understand and support the need to address overcrowding at Dunwoody High School. I recognize that Vanderlyn's proximity to the high school places our campus within a broader facilities planning conversation. I also recognize that the district has framed SAP around enrollment trends and utilization. Any proposal should clearly demonstrate how those metrics are being applied at the cluster level. The combined Vanderlyn and Dunwoody High School campus presents an opportunity to explore thoughtful, phased solutions that address secondary capacity while preserving elementary access. The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made. Vanderlyn is a diverse, academically strong, and inclusive community. Preserving stable elementary environments while solving high school challenges aligns with district priorities.	3/7/2026 11:06 AM
944	I understand the need to address underutilized buildings, but consolidations should be done carefully to minimize disruption to students and communities. The district should ensure receiving schools have the resources, staffing, and capacity to support additional students and maintain strong feeder patterns.	3/7/2026 11:05 AM
945	This is a tremendously bad and dangerous idea for dekalb public schools. I've seen many redirecting efforts but the logic and data supporting this one are completely in correct. Moreover, why this would cause is a significant number of people to pull their kids out of dekalb public schools and go private or elsewhere. There is a way to be more efficient without losing the small school elementary school culture central to Dekalb.	3/7/2026 11:04 AM
946	I don't support the initial facilities scenario. It would put too many children into one school and they would loose a lot of support and individual help.	3/7/2026 11:00 AM
947	Enrollment seems to be at a comfortable level for students and faculty. I'd like to better understand student to teacher ratios and recommendations from third party sources.	3/7/2026 10:55 AM
948	Redistrict every attendance zone southward to fill in the empty seats in south DeKalb	3/7/2026 10:51 AM
949	It is imperative that school closings and redistricting students is minimized to retain community cohesion.	3/7/2026 10:47 AM
950	I am not in favor of the proposed consolidations. I understand the concern about resources, but we specifically moved to Tucker to avoid having our children in a large elementary school. Our Zoned school at the time (peachcrest) had over 900 students and I did not feel this was the best learning environment for my child. I appreciate the personalized attention and smaller class sizes that she has benefited from at night Evansdale Elementary, which she attended through 2nd grade, and now Brockett elementary	3/7/2026 10:47 AM
951	The initial facilities were good and had basic spaces needed for students and staff.	3/7/2026 10:47 AM
952	Do not consolidate. Monster schools are not good for kids, neighborhoods or traffic.	3/7/2026 10:46 AM
953	Please don't close OAK GROVE. Very important for community.	3/7/2026 10:45 AM
954	Evansdale's lot size is larger than any of the other neighborhood schools and would be better for potential expansion	3/7/2026 10:45 AM
955	I support the Brookhaven community's strong support of the public school system now and for many, many years to come therefore, I support the following position… keeping the Ashford Park and Drew Valley neighborhoods in the Chamblee MS and HS cluster, and the pathway of	3/7/2026 10:43 AM

	closing the Ashford Park Elementary School facility as a neighborhood school, and shifting the Ashford Park Elementary attendance zone to the current John Lewis Elementary facility, and preserve our (current attendance zone) Chamblee Cluster. I believe it is best to work with the resources we currently have… but this community has been built on decades together and separating the school population at the Dresden line would be detrimental to the relationships that continue to grow here. We understand APES has issues: poor building inspections, being way over capacity for our population and projected future population, and not having the acreage or roadways to expand, and the consulting community suggests keeping APES a community center. Since JLES first opened, additional capital investments have been made to surrounding schools, so that more students (including those that currently attend JLES) have access to new and expanded buildings. Finally, by moving the current APES attendance zone (which currently is zoned to the Chamblee MS/HS cluster, to JLES and moving JLES into the Chamblee Cluster, would be a net zero in attendance for the Chamblee cluster. I would challenge the committee to look at why so many families have chosen other education options. It is a shame that our population continues to grow but our schools are shrinking. I believe this stems a lot from COVID and students feeling left behind or that their school no longer serves their needs.	
956	They are quite nice and provide good education	3/7/2026 10:42 AM
957	I understand the reasoning behind exploring school consolidations and the need for the district to use resources efficiently. I'm not opposed to the concept if it ultimately strengthens the school system overall. However, I do have concerns about the impact on students who may have to travel farther and adjust to being reassigned to new schools and communities. If consolidations move forward, I hope the funds saved are clearly reinvested into supporting the students and schools affected by these changes. Many schools already rely heavily on parent and community support, and it's important that teachers and staff receive the resources they need to manage any increase in enrollment. Maintaining reasonable student-to-teacher ratios should remain a priority so that students continue receiving the attention and support they need to succeed. I would strongly encourage the district to ensure that any consolidation plan includes clear commitments to supporting teachers, students, and school communities during the transition.	3/7/2026 10:42 AM
958	I think closing Evansdale school would be a travesty, just as closing any school that takes access to education away from children is wrong. I am not sure who is behind this or why this is even being considered.	3/7/2026 10:41 AM
959	I am strongly against consolidating elementary schools in the Lakeside cluster. The neighborhood identity, community cohesion, and community support is founded on these schools where the community can take personal pride and responsibility for their strength. In addition, the more personal connection to the elementary schools in the neighborhood is wonderful for this age group. I am extremely against closing Evansdale, rather than expanding and renovating the school. The lot is bigger than neighboring schools recommended for expansion, it can accommodate additions while still maintaining ample play and parking space. Evansdale is uniquely situated to accommodate increased traffic, as it takes up 2 sides of a large neighborhood block. Evansdale enrollment is projected to increase to over 600 by 2030.	3/7/2026 10:41 AM
960	I think smaller schools are better for students and neighborhoods. Savings should be found by cutting back on county administrative costs, not by requiring students to go to larger schools, where they have longer commute times and costs and less individual recognition in the school.	3/7/2026 10:40 AM
961	I want better education experience more S.T.E.A.M Scools. If less facilities will make it happen. Then I am for it.	3/7/2026 10:38 AM
962	Closing Oak Grove Elementary does not align with the district's goal of addressing underutilized schools. The district's target utilization is approximately 88%, and Oak Grove already exceeds that level. As of October 2025, the school operates at 89% capacity (447 students out of 504) and is projected to reach 487 students in 2026–27, or about 96% utilization. Enrollment has increased for four consecutive years, indicating a sustained upward trend that could bring the school to full capacity within the next two to three years. If Oak Grove were closed, its students would primarily be reassigned to Sagamore Hills and Briarlake. However, Sagamore Hills is already at 91% utilization with only 43 available seats, while Briarlake has about 130 available seats. Combined, these schools cannot absorb Oak Grove's 447 students without significant boundary changes, overcrowding, or facility expansion. While Briarlake currently operates at 73% utilization, substantial residential development is underway nearby that is expected to increase enrollment over time. Major projects such as the Lulah Hills redevelopment of North DeKalb Mall and the Corporate Square/Northbend redevelopment	3/7/2026 10:31 AM

	will add thousands of housing units in the surrounding area. Initial phases alone could generate an estimated 55–145 additional elementary students, potentially raising Briarlake's utilization into the 83–90% range, with continued development pushing it closer to 90–95%. The broader Druid Hills and Clifton corridor is also experiencing significant growth, with more than $2.5 billion in recent institutional investment, including the Arthur M. Blank Hospital campus and multiple Emory expansions. This growth is bringing new jobs and increasing housing demand, suggesting that enrollment in nearby schools is likely to rise rather than decline. If enrollment projections rely heavily on pandemic-era data from 2020–2022, they may not reflect the post-pandemic recovery and current development pipeline. Updated projections should account for recent enrollment growth and ongoing residential construction. In addition, Oak Grove is among the highest-performing schools in the review group, ranking near the top in both content mastery and readiness. Given its high utilization, continued enrollment growth, and strong academic performance, closing Oak Grove would not directly address the district's broader challenge of underutilized schools.	
963	Makes sense. How does that impact teacher to student ratio?	3/7/2026 10:25 AM
964	It should not be just numbers!! Do not decide to consolidate to a school merely based on numbers. Don't consolidate to a school who was shown to be in poor condition on the last county wide walk thru schools. We shouldn't abandon school buildings in good condition based on numbers.	3/7/2026 10:21 AM
965	Scenarios are mainly black population areas bring changef	3/7/2026 10:20 AM
966	We support the initial consolidation scenarios but with the following feedback: - While we appreciate the reasons for releasing consolidations first, it is very difficult to opine on the consolidation scenarios without knowing what implications of closing 2 Dunwoody HS cluster elementary schools will have on the redrawing of boundaries. We would be strongly opposed to any scenario which would move us out of our current Dunwoody HS cluster. - We understand that the county is trying to move away from smaller elementary schools for cost reasons, but as Chesnut parents, we love the small, community feel of our school. We do look forward to better resourcing and facilities available for our children. - One of our children will begin attending Kittredge Magnet School next year. We need information as to how these plans will impact her attendance at Kittredge and where she will go for middle and high school would help us better assess these plans.	3/7/2026 10:17 AM
967	I don't not agree with consolidation. The purpose of community schools is to foster community and allow for a more enriched education. Put more money and resources towards the schools.	3/7/2026 10:13 AM
968	I think consolidations are necessary. I am concerned that they will get rid of Marbut's Theme School status. This status allows the focus to be on instruction and eliminate many distractions. The students in that area deserve to have a school that has high behavior expectations.	3/7/2026 10:07 AM
969	You need to leave Oak Grove Elementary. The school is well supported by the community and close to full capacity. If the move to providing school for all pre-K age kids which the legislature has indicated as a priority then more space will be needed and the school will be full.	3/7/2026 10:02 AM
970	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students →	3/7/2026 9:59 AM

	~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
971	By the district's own metrics, Oak Grove does not meet the threshold for underutilization. Its inclusion in Scenario 17 is inconsistent with the stated criteria and should be withdrawn. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake’s current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake’s enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/7/2026 9:58 AM
972	I do not understand why high performing, well-liked schools like Ashford Park Elementary have been selected for closure. I am deeply concerned about the impact of switching schools and/or clusters on the education of children who attend those schools including my child. These schools also benefit from very strong parent and neighborhood communities that would be disrupted by this process, again adversely affecting children’s education,	3/7/2026 9:56 AM
973	Do not close Oak Grove Elementary. BIG mistake - it is THE reason many people did and still do, and likely WILl, move into this neighborhood. It is PART of the community -- and we need community now more than ever1	3/7/2026 9:52 AM
974	I believe small neighborhood elementary schools to be the ideal to ease children into enjoying schooling long term - not being lost in the system	3/7/2026 9:49 AM
975	Great. The district should close schools to be more fiscally responsible. Though, I think the schools that are doing extremely well academically should remain open.	3/7/2026 9:46 AM
976	It is crazy to me that we are spending so much energy and time on the symptom and not on	3/7/2026 9:44 AM

	the problem. The families of Dekalb County have lost faith in a Dekalb County education. If we put this much into fixing that problem, we wouldn't be talking about closing schools.	
977	I think it needs to be done but hate the idea of losing smaller neighborhood schools. Some of the schools definitely need maintenance upgrades	3/7/2026 9:42 AM
978	While I see the need, I want to know about what happens if the kids come back? There are tons of kids in my community that don't want to deal with the county and send their kids to private or homeschool. Also, neighborhood schools are why MANY of us specifically moved to these areas. We just don't believe this is going to help things because of the history of Dekalb and how they've treated the schools, communities and the inequalities throughout the county.	3/7/2026 9:42 AM
979	I feel that small schools have must to offer far as smaller groups when it come to instruction but when the building is FALLING APART we need to make sure that the students are in a safe place where teaching and learning can be successful.	3/7/2026 9:37 AM
980	Please consider removing Oak Grove Elementary from the potential school closure list. Closing Oak Grove Elementary does not align with the stated objective of addressing underutilization. Significant new investment and development in the area has likely not yet been reflected in projections. The documented residential pipeline within 2–4 miles of Oak Grove Elementary includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. The district's stated goal is to increase elementary utilization to approximately 88%. Oak Grove Elementary School is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment at Oak Grove Elementary has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization Oak Grove Elementary is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/7/2026 9:34 AM
981	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units;	3/7/2026 9:32 AM

	$850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
982	Midvale elementary is a beacon of our community. Pre K programs could be expanded to meet the needs of our community as over a hundred students applied for the lottery this year and were denied. Pre K lottery should be looked at carefully.	3/7/2026 9:30 AM
983	Not in favor.	3/7/2026 9:28 AM
984	I believe that schools that are near each other and well under capacity should be consolidated to conserve and maximize resources. Schools that are at 85-90% capacity to over capacity - I need to understand where those students will be absorbe school if surrounding schools are also close to or at capacity as well (but planned to stay open.	3/7/2026 9:25 AM
985	We are glad to see Huntley hills will remain open. Our concerns are class size and keeping Montessori. We love the Montessori program at HHES and we want it to remain at Huntley hills. I'm not sure how you will fit more kids in that school though. My first grader already has 22 kids in his class. My prek student has 20 kids in her class. How are we going to accommodate more kids without more classrooms? Space is going to be an issue.	3/7/2026 9:23 AM
986	Overcrowding, crowd control, overwhelming conditions	3/7/2026 9:20 AM
987	It isproportionately affects student populations with more diverse social economic status and needs. It also doesnt consider school performance.	3/7/2026 9:12 AM
988	Oak Grove has been a pillar of our community for generations. It's the reason families move to the area, and they stay here. Closing that school would be a mistake that would bring down property values and population counts.	3/7/2026 9:06 AM
989	Oak Grove Elementary is a community school. It is the glue that connects families in the community. Many graduates of OGE continue to be friends for life. Many people who attended OGE come back to raise their children in this community because of the elementary school.	3/7/2026 9:06 AM
990	It's my strong belief that students are best served - academically, socially and culturally - through learning in a smaller community school. The results are speaking for themself - Vanderlyn is one of only three high performing elementary schools in the district and that is being driven by that setup. It would really be tragic to see one of the counties few successes be forced to close. To be clear, I think having less programing / resources is an OK trade off to keep it. Personally, I'd even be willing to contribute significant funding (myself) to keep the school.	3/7/2026 9:06 AM
991	The consolidation scenarios do not appear to align with the actual capacity realities in the Chamblee cluster. Ashford Park Elementary is operating at roughly 171% of capacity, making it one of the most overcrowded schools in the district. Closing an overcrowded school does not solve the district's excess seat problem, it simply shifts overcrowding to other schools that are already at or near capacity. Any consolidation scenario should first demonstrate where displaced students would realistically go and how that would reduce overcrowding.	3/7/2026 9:04 AM
992	Terrible plan with no logic behind. Who is behind the idea of wanting to close so many EXCELLENT schools ??? Close Henderson Middle School. These kids are not ready to be shipped off like it is a prison.	3/7/2026 9:04 AM

993	Consolidations are not always the right way to save resources. We can't keep punishing kids in the name of money. Consolidation means straining the resources further by adding more students with little regard for their well being or the staff. Rebalancing seems much more reasonable than shutting down buildings.	3/7/2026 9:03 AM
994	I believe consolidation is a mistake. Bigger schools create less parent and community involvement and a loss of buy-in to what is happening in achools. Consolidated, large schools increase traffic and trip times, leading, again, to less involvement and more inconvenience to the communities Dekalb School System was created to serve.	3/7/2026 9:03 AM
995	none	3/7/2026 8:59 AM
996	In theory, I understand the need for consolidation.	3/7/2026 8:59 AM
997	Evansdale Elementary is an important part of my neighborhood community, and the reason I moved to the area. I want this school to continue as my neighborhood's local school.,	3/7/2026 8:57 AM
998	Oak Grove Elementary should not be closed. The data does not justify this proposed action. Oak Grove is operating near capacity. Enrollment projections used in closure discussions conflict with the principal's office budget enrollment. There is clear evidence of demand with over 200 students on the waiting list including more than 100 kindergartners.	3/7/2026 8:39 AM
999	I am concerned at the potential closing of so many neighborhood elementary schools in my area. It is unclear where my children would end up going to elementary school, and I worry that school would be huge and overwhelming for them.	3/7/2026 8:35 AM
1000	Looks good bc our school isn't affected which would be devastating.	3/7/2026 8:32 AM
1001	No changes to my school so I'm good with it. I assume Oak Grove students would flow into Briarlake so that is good.	3/7/2026 8:30 AM
1002	I am alarmed at the potential closure of Oak Grove ES. This would be detrimental to the fabric of the neighborhood.	3/7/2026 8:23 AM
1003	I am opposed to the closure of Evansdale. I believe that the community supports the school very well and that children that age need to be in a small, protected environment. The school has had French Immersion for many years and this makes the community unique. I would hate to see the school consolidated given the nuances of this program.	3/7/2026 8:21 AM
1004	can the consolidations be cut from 27 consolidations to 12 consolidations (4 elementary facilities 4 middle school facilities 4 high school facilities) can clarifications be provided regarding how the facilities that are closed due to consolidations will be repurposed?	3/7/2026 8:20 AM
1005	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated	3/7/2026 8:15 AM

	growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
1006	I believe that these schools lead to a sense of community. Children attending often live in the same neighborhoods and have the ability to get together outside of school	3/7/2026 8:05 AM
1007	We live in the Evansdale community and moved here specifically for the elementary school and high school.	3/7/2026 8:00 AM
1008	Our family is very concerned about the proposal to close a highly successful, top-performing school in our community. This school has consistently delivered strong academic outcomes and has become an important part of the neighborhood. Closing it would have significant ripple effects that go far beyond the school building itself. First, this decision would negatively impact the surrounding community and local property values. Many families, including ours, made the decision to buy our home specifically because of the schools in this cluster. If the school closes, we have already heard numerous parents say they will move to surrounding counties or choose private school options instead. Our family is one of those families—we would likely choose private school if this closure occurs. That means fewer students and less funding for DeKalb County Schools, which seems to be the opposite of the district's goals. Second, there is a great deal of concern about where students would be reassigned. One of the biggest worries for families is the possibility of being moved to a different cluster, particularly from the Chamblee cluster to the Cross Keys cluster. Like the vast majority of parents, we intentionally chose our home based on the school pathway leading to Chamblee High School. A reassignment to John Lewis Elementary in the Cross Keys cluster would represent a major change from what families planned for when choosing where to live. Finally, if the district continues to consider closing the school, families need much clearer information about the next steps before meaningful feedback can be given. It is difficult to provide constructive suggestions when we do not yet know where students would be reassigned or how those transitions would work. Discussions about facilities cannot happen in isolation without addressing the broader impact on students, families, and the community. To use a simple analogy, most people would not feel comfortable with their company announcing that it is closing but providing no information about what will happen to their job or position. In the same way, families need transparency about where students would go, how clusters might change, and what the long-term academic pathways would look like. If solutions are being explored, the district should consider options that allow this successful school to remain open. Another possibility might be evaluating targeted rezoning options, such as assigning Drew Valley to a school closer to them, rather than closing a high-performing school that serves its community well. We respectfully ask the district to carefully consider the academic success of this school, the impact on families, and the broader consequences for the community before making any final decisions.	3/7/2026 7:49 AM
1009	It may make sense to consolidate facilities by closing some neighborhood elementary schools. However, the criteria for making those decisions is important. For example, Evansdale Elementary is located on 10 acres which allows for expansion. It has a large, separate play field and two playgrounds plus multiple parking lots. It can and should be renovated and expanded - especially given an expected enrollment increase over the next 4-5 years. Additionally, the Evansdale neighborhood should continue to feed into Lakeside High School. This was a key reason for many who purchased a house in this area.	3/7/2026 7:49 AM
1010	Concern with closing Evansdale because it has more usable land for expansion than other nearby schools such as Livsey	3/7/2026 7:43 AM
1011	The focus should be on lowering the teacher student ratio rather than consolidating into larger failing schools.	3/7/2026 7:41 AM
1012	It is confusing to the community to indicate closure scenarios without aligning scenarios for boundaries. Without knowing what would happen with the students at a closing school, it's very difficult to provide feedback. While buildings will need to close, it seems that schools performing very well have something good going on and it doesn't make sense to close those and send students to lower performing schools. Those lower performing schools won't change overnight. The higher performing schools are a result of a combination of the staff and the commitment from the community. That can't be overlooked. Closing some of these schools	3/7/2026 7:34 AM

	will not result in movement to other dekalb schools, it will result in more people feeling like their only option for a solid education for their children is private school.	
1013	It’s a huge undertaking that will require serious consideration and a solid plan. Especially for the future of vacant buildings and the possibility of population growth.	3/7/2026 7:30 AM
1014	Strongly prefer small community schools within walking distance of homes with high-quality staff and student engagement. Our Livsey Elementary is treasured in our community and we've had kids there for 13 years.	3/7/2026 7:25 AM
1015	Need more info on what 8-12 would look like	3/7/2026 7:19 AM
1016	Don't agree with small schools like Ashford Park and Oak Grove are being asked to close given how supported and important they are to their local neighborhood. Please shift Ashford park to John Lewis and keep those families in the chamblee cluster. Keep the magnet program in the chamblee cluster. Allow Sequoyah middle school to join with the new Doraville high school rather than a split feeder into chamblee high school.	3/7/2026 7:04 AM
1017	I think closing local elementary schools are a bad idea. A mega school for younger kids takes away the sense of community and fun in learning that a community school has. You want kids to come out of elementary school with a love of school and learning. Mega schools are just factories that loose all the extra special events that smaller community schools give.	3/7/2026 7:01 AM
1018	Are we considering the structure of the building. Consolidating schools will be easier to swallow if you had new buildings to accommodate the consolidations of certain schools.	3/7/2026 6:57 AM
1019	I'll admit, at first it was shocking that so many schools were planned to close. But as someone who has been at a smaller school, I understand what happens when we are underfunded AND at an old facility that isn't cared for. As a parent in the Dunwoody cluster, I am very surprised we could go from 5 elementary schools to 3 but now I think it sounds right - I think it will be good for the community to not be so spread out and then come together at a very large middle and high school. I want Dekalb to also invest in improving / expanding Peachtree Middle and Dunwoody High - NO more trailers. Extra parking! More resources for staff and teachers.	3/7/2026 6:52 AM
1020	People move into these neighborhoods specifically for these schools. Why in the world would you eliminate those schools? There’s a strong community connection, which is why they are successful. Schools must remain connected to their neighborhoods.	3/7/2026 6:44 AM
1021	Do not like or agree.	3/7/2026 6:35 AM
1022	One of the reasons I Love our school is the small community feel where the kids and teachers all know each other. I am not in favor of combining elementary schools.	3/7/2026 6:35 AM
1023	Do not close oak grove elem	3/7/2026 6:12 AM
1024	Great no issues although I have no children for those parents that have more than one child	3/7/2026 5:38 AM
1025	The class size for students in South Dekalb schools are 23+ per class, whereas the class size in North Dekalb schools is under 20 per class. Yet this is area that gets the schools closures. Less resources in South Dekalb and how are these children expected to have a successful public education? Dekalb schools have never been treated the same in South Dekalb as North Dekalb. If you would put the resources in this area we could have a better success rate. Focus on teaching the skills needed to succeed and stop teaching for the next standardized test.	3/7/2026 4:56 AM
1026	Keep Oak Grove Elementary open. It is valuable to the Oak Grove community and continues to provide excellent educational opportunities for all students.	3/7/2026 3:10 AM
1027	The citizens of DeKalb County have consistently shown a preference for community schools. Homeowners and renters choose locations based on schools. Schools are the hearts of our neighborhoods. Poor planning (hello Pleasantdale) in the past has led to some of the issues being faced today. How about thinking creatively to fill some of the schools? Magnets, additional art centric choices, expanded pre-k, etc. to fill some spots rather than reinventing the wheel. Addressing the declining numbers with improving the quality of education to attract young families and encourage them to stay in the public vs private school system. Specifically some of the choices make little sense. Livsey is overflowing with trailers with zero room for growth on a busy road and is very close to Pleasantdale and is slated to stay open while Midvale and Evansdale have open ground and ample parking away from traffic. And all of theses schools along with others are beloved by the community and add to the value of the neighborhoods and tax base. As a 40+ yr resident of DeKalb with all 3 kids going through the	3/7/2026 1:47 AM

	public school system I know the value the local schools bring to the county. I'll also say for the record why the heck is this even being brought to the table when yet another supervisor has turned out to be corrupt and an interim is presiding over a proposal of this scope? DeKalb School district problems start at the top and whoever does your searches and bottling should be canned, a new supervisor in place before even discussing this. I also have zero faith that the neighborhoods with closing schools will have anything but abandoned buildings left to devalue. This whole thing should be tabled until we have leadership that is stable and can be trusted. And look at the bureaucracy. Move offices to Pleasantdale (what a location on the Gwinnett county line to build a bloated school that borders another county and wonder why it's hard to fill) Whoever makes your lists doesn't know the county.	
1028	Schools are already overcrowded. Less students per school is a good thing.	3/7/2026 12:53 AM
1029	Closing Oak Grove Elementary would be a mistake. Oak Grove is one of the strongest academic elementary schools in this cluster and consistently performs at a higher level than nearby options. Families specifically move into this attendance zone because of the school's reputation and the engaged parent community that supports it. Eliminating Oak Grove would push roughly 400 students into nearby schools that already face space and staffing constraints. More importantly, it risks weakening one of the district's most successful school communities. High-performing neighborhood schools attract and retain families who might otherwise choose private schools or leave the district. Closing Oak Grove would make this area less desirable for many of those families and could ultimately accelerate enrollment loss rather than solve it. If consolidation becomes necessary, DCSD should prioritize protecting its strongest schools and the communities that sustain them.	3/7/2026 12:12 AM
1030	I am a staff member at Towers High School. If I had my preference, I would want Towers to convert to a 6-12 and focus on CTAE; as the parental and student data support that the families would greatly benefit from trade education. Additionally, because the population has historically had low Lexile scores and testing data, if students were in the same environment from 6th grade the proper amount of reading and math intervention could be implemented which would then have a long term positive impact on test scores and overall student success.	3/6/2026 11:47 PM
1031	I think inevitably, consolidations are needed. The initial proposal of consolidations seems strong as it feels that there was intention behind the school choices based on location (and distance to the other nearest school), property size / potential, and student volume. Now if we wanted to keep certain schools open instead, maybe splitting the grade bands to use those buildings could be a smart thing to do AND make more of the public / school community happy.	3/6/2026 11:34 PM
1032	Very disappointed on the possibility of Ashford Park closing. We just started there and the community welcomed us in with open arms. This school is such a jewel and the thought of us losing that is beyond heart breaking. We moved to our house because we would still be in the chamblee cluster and I want my daughter to play volleyball at Chamblee, but we are on the edge and Im worried that we will be moved to to cross keys who doesn't even play in the same class. Im also concerned about how this will impact student teacher ratios. This greatly impacts how children learn and combining schools will impact the quality of our children's education. Consolidating schools especially one that is over capacity to begin with is insane to say that it's just about the building because there is no way you can tear down ashford park and make it make sense for us to go to Montgomery which is 4 miles away. They already have a huge issue with traffic because there is no carpool lane and it runs into a very busy road. I'm very disappointed and truely hope you will reconsider other alternatives.	3/6/2026 11:27 PM
1033	R s	3/6/2026 11:26 PM
1034	Please keep Evansdale open. It's in an amazing location for both single family homes and apartments. And it's easily accessible to everyone in the area.	3/6/2026 11:10 PM
1035	I appreciate the district's planning efforts, but I do have concerns about the number of schools being repurposed. In particular, Laurel Ridge is my son's current school, and I understand there may be an expansion project. I would like clarification on how that expansion would occur—will it take place on the current campus and land footprint, or would it involve relocation or building elsewhere? Additionally, based on the chart, it appears the number of district high school options may be reduced to about three. If that is correct, I am concerned this could significantly limit options and capacity for older students. I hope the district will provide more clarity on how student choice, access, and overcrowding will be addressed if these changes move forward.	3/6/2026 11:04 PM

1036	The objectives of the consolidation are to ensure utilization of schools and the resources. The utilization is at 89% over the 88% target and next school year is anticipated to be at 96% utilization. Unfortunately the two closest schools do not have the capacity to absorb the entire Oak Grove student body. This would require significant infrastructure development or displacing students into portable classrooms. In addition, the scenario does not account for he significant development both in housing and with major employers in the surrounding areas. These developments would lead to the need for additional capacity, not less.	3/6/2026 11:02 PM
1037	I do not support consolidations of schools.	3/6/2026 10:52 PM
1038	Current students and curriculum should be allowed to stay in the schools they currently attend	3/6/2026 10:51 PM
1039	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization	3/6/2026 10:48 PM
1040	The idea that you would close Oak Grove Elementary School is a tragedy. The school is in the heart of a dense healthy neighborhood with many young families. I am devastated to receive this news. I went there. My children went there. Perhaps one day, my children's children could attend Oak Grove.	3/6/2026 10:48 PM
1041	The Student Assignment Project appears to prioritize facility consolidation without sufficiently weighting academic performance and demand for specific schools. Ashford Park Elementary is widely recognized as one of the highest-performing elementary schools in DeKalb and is already over capacity with approximately 776 students in a building designed for around 480. Closing a school that is both high-performing and heavily utilized contradicts the stated SAP objective of aligning resources with enrollment demand. Instead of eliminating capacity where families actively choose to enroll, the district should prioritize consolidation among consistently under-enrolled campuses. The SAP framework addresses declining enrollment but does not sufficiently address the root causes of enrollment decline in DeKalb County. Many families leave the district due to concerns about academic performance consistency, school safety, program availability, and predictability of school assignments. Without addressing these underlying drivers, consolidation alone risks accelerating the outflow of families to private schools, neighboring districts, or homeschooling. A long-term strategy should include: • expanding high-performing programs and replicating successful school models • strengthening cluster continuity • increasing transparency around academic outcomes and safety metrics Without addressing these drivers, closures risk becoming a cycle that further reduces enrollment rather than stabilizing it. The district should prioritize maintaining strong feeder clusters where families already demonstrate long-term commitment. The Chamblee High cluster is one of the strongest academic clusters in DeKalb, and preserving its continuity is essential to retaining families in the public system. Disrupting the feeder pattern between Ashford Park Elementary and the Chamblee cluster risks fragmenting a community of highly engaged families and could accelerate the loss of students to private schools or neighboring districts. A key SAP goal should be retention of high-engagement school communities, not just redistribution of students. Schools like Ashford Park represent more than buildings; they are examples of high-engagement educational ecosystems where parents, teachers, and the community actively invest time and resources. Closing schools with strong parental engagement removes one of the district's most valuable strategic assets. The district should analyze and replicate the practices of highly engaged schools rather than dismantling them. The district should also consider the broader economic implications of closing high-performing neighborhood schools. Strong public schools are a primary driver of property values and	3/6/2026 10:48 PM

	residential stability. Closing Ashford Park Elementary could materially impact property values in Brookhaven and surrounding neighborhoods, which ultimately affects the county's tax base and long-term economic stability. The district should incorporate housing market and demographic retention analysis into SAP decisions. A more effective approach would be to: 1. Consolidate under-enrolled schools where capacity utilization is consistently low 2. Expand or replicate high-performing school models 3. Preserve strong feeder clusters such as Chamblee High 4. Conduct a root-cause analysis of enrollment loss and implement retention strategies This would align SAP decisions with both fiscal responsibility and academic excellence.	
1042	Do not close evansdale. Renovate and expand it as its 10 acres; increasing enrollment to over 600 by 2030 and can handle the traffic from two sides of a neighborhood block. Also it has a large playfield multiple parking lots and playgrounds and plenty of space to expand.	3/6/2026 10:46 PM
1043	i love it	3/6/2026 10:43 PM
1044	Oak Grove Elementary is right down the street from Lakeside High School. The students who might be consolidated would be close to the High School that they would attend. Builds community.	3/6/2026 10:38 PM
1045	At 10.1 acres, Evansdale's lot size is bigger than neighboring schools recommended for expansion. Evansdale is unique in that it has a large, separate play field, two playgrounds, and multiple parking lots. Our site can accommodate additions in the back of the school and still have ample play and parking space. While neighboring schools on major roads clog up traffic, Evansdale is uniquely situated to accommodate more cars, as it takes up two sides of a large neighborhood block. Evansdale's current utilization is 96% and is projected to be over 100% by 2030. Evansdale is in need of expansion and renovation, not closure. Neighborhood parent, teacher, and community volunteers provide needed resources and personnel for French students. Moving the program would destroy this vital community. The French program goes through the Lakeside cluster (i.e., Evansdale, Henderson, Lakeside) and is the only non-charter DLI program in the area. French teachers at Evansdale, Henderson Middle, and Lakeside have put down strong roots in our community. Older students mentor the younger students. It is imperative to keep this program at Evansdale and the Lakeside cluster to keep the program strong. Our STEM certification provides hands-on, project-based learning that fosters critical thinking and problem-solving skills.	3/6/2026 10:38 PM
1046	Vanderlyn cluster is a tight, supportive and engaged community. Closing the school and dividing the children across the cluster would be devastating to our community.	3/6/2026 10:32 PM
1047	Find a way to keep more schools open, with reduced staff. Belonging to a neighborhood school has a great value to that neighborhood. Make the edges of the attendance zones more malleable, so that you can fine tune attendance at some schools.	3/6/2026 10:25 PM
1048	It appears consolidations needs to take place in order to maximize the use of monetary resources.	3/6/2026 10:15 PM
1049	Honestly, I sought to annex into Atlanta because the quality of DCPS is terrible. We wanted to be in Burgess Peterson which we should be zoned for as we are paying APS taxes. IF the school is failing why is the administration still there. You need to hold parents more responsible for their children. If they are not performing drag us in and tell us why.	3/6/2026 9:57 PM
1050	I understand the reasoning to close schools equally across the county, but many of the schools slated for school closure do not make sense. For example, Oak Grove Elementary is operating close to capacity (and projected to be at higher capacity next year), but it is flagged for closure along with 2 other elementary schools in the Lakeside cluster. Are all of her students supposed to go to Sagamore Hills and Briarlake? If these schools are going to expand, what is the plan for traffic patterns and parking for school events? Also school performance does not appear to have been a factor in school closure choice. Why would the county choose to close a high performing school (both academically and for special needs students). The academic reputation and performance will not translate if the students are moved to different schools. It has been alluded that schools need to be 600 students minimum. What is the academic result of having a larger school? One of my favorite parts of OGE (and all the Lakeside Cluster elementary schools) is that the community is very tight. I love walking my child to school every morning and seeing neighbors at every school events. The parents at OGE are very involved, which will be dismantled if the school is closed. Lastly, property values for Oak Grove Elementary are much higher even than the other schools in the Lakeside cluster. Has loss of property tax been considered in the analysis when schools close? In my opinion, this process should be slow and methodical. School closures should	3/6/2026 9:56 PM

	start at the schools that are actually below capacity and are low performing, and then reevaluated if they improved.	
1051	Closing our school would put my kids at a huge disadvantage! Oak Grove has built a fantastic culture of achievement and DeKalb county has not demonstrated the ability to replicate that culture	3/6/2026 9:46 PM
1052	Please don't close my school my friends kids love the school and I don't know how they will get the support they need at some other school	3/6/2026 9:21 PM
1053	The closure of so many elementary schools is not a good idea as it will only hasten family departure from DeKalb County School District for multiple reasons and exacerbate the problem that is trying to be solved, leading to further decline in funding, loss of teachers, and loss of funding to support DeKalb County School District personnel. First, parents seek educational options that are convenient, close to home, and provide a high-quality education. Eliminating schools will increase travel time for parents and make private schools much more attractive as public schools will no longer be closer. Furthermore, the community bonds formed by a local elementary school are critical to support other aims of the County, such as neighborhood social cohesion and collective efficacy, which translate into community care, enhanced property values, and reduced crime. Finally, the proposals do not address the fundamental reasons why parents are choosing to leave DeKalb Schools and will not mitigate the problem in the long term. For example, many parents choose to stay in DeKalb for unique elementary schools, such as Evansdale's French program. These parents volunteer and donate financially to their DeKalb County schools by a disproportionate amount, benefiting DeKalb teachers and schools beyond tax apportioned dollars. These parents will choose other options and DeKalb schools will experience a larger-than-expected loss of external funding and parental engagement and volunteerism.	3/6/2026 9:17 PM
1054	Evansdale ES supports a diverse community of supportive families and should be maintained.	3/6/2026 9:12 PM
1055	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/6/2026 9:10 PM
1056	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–	3/6/2026 9:05 PM

	27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. Oak Grove is also one of the highest-performing schools in the review group: Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
1057	These are one-size-for-all scenarios that fail to take into account the individual schools. This is a BIG DEAL and just washing over the entire district with one approach is inappropriate and short-sighted. Each school must be reviewed in great detail individually before making a change. There are specialized programs in many of the schools slated for closure and often the choices for which building to use do not make sense when you start to look at them individually. Lakeside is overcrowded, Henderson is overcrowded. Why put the elementary kids in overcrowded schools too?	3/6/2026 9:02 PM
1058	It seems smart & financially necessary, though sad for those who may have bought homes near schools which may be closed.	3/6/2026 9:01 PM
1059	I understand that school buildings that are not operating at full capacity should be evaluated. However, each school is unique and enrollment numbers should not be the main consideration point for school closings. For example, Robert Shaw Theme School is an amazing award winning school that should be accessible to more kids, not closed down. I would like to explore options on expanding the lottery zoning for the school and other schools that are on the closing list that are great schools but may have low enrollment due to not being as visible or known about.	3/6/2026 9:00 PM
1060	Why is schools always the first thing to close when you're billing everything else and inviting everyone into Atlanta	3/6/2026 8:56 PM
1061	I think Chamblee cluster should stay together with Montgomery, Chamblee Middle and Chamblee High should stay together.	3/6/2026 8:51 PM
1062	I am very against closing Evansdale Elementary for the following reasons: 1) Lot size: our lot is 10.1 acres, which is larger than surrounding campuses marked for expansion. We have two playgrounds both in front and behind the school, in addition to a large athletic lower field. Either or both of our playgrounds could be moved to allow building expansion. 2) Parking: we have two parking lots in addition to street parking that is not on a major street 3) Traffic: we are not situated on a major road. Our school occupies two sides of a large neighborhood block, which allows us to accommodate increased traffic more effectively than surrounding schools. This allows us to increase transportation to and from school without backing up major roads like Briarcliff (Hawthorne) and Chamblee Tucker Rd (Livsey/Pleasantdale). Both of these major roads already suffer from traffic issues. 4) Transportation: DeKalb already has a shortage of bus drivers. Closing our school would require that students would need to be bused, exacerbating DeKalb's existing transportation challenges. 5) Evansdale enrollment already	3/6/2026 8:49 PM

	exceeds the state's enrollment threshold required to secure funding for essential instruction and support positions. Our enrollment is projected to grow to more than 600 students by 2030, making investment in Evansdale both practical and forward thinking 6) Diversity: Evansdale is among the most diverse schools in the district, which is one of our greatest strengths. Our current student population includes: 50.4% HIspanic/Latino 22.2% White 16.1% Black or AA 7.3% two or more races 2.9% Asian or Asian/Pacific Islander Evansdale has worked hard to celebrate the diversity of our student population and celebrate our Hispanic culture as well as elements of French culture given our French DLI. We have a significant amount of ESOL teachers and resources that have required quite a bit of work to establish. 7) DLI: our DLI depends on staying in the Lakeside Cluster, as it continues into Henderson Middle as well as Lakeside. French teachers at all three schools have built deep roots, providing students with a strong and continuous language pathways. Older studies regularly mentor younger ones, creating a multi-school support system that would be lost if Evansdale is closed. We are a uniquely walkable neighborhood school. Families can safely walk to and from school, a benefit that supports working parents and reduces transportation burdens in addition to promoting student well-being and strengthens community ties. Removing this walkable option would disproportionately affect families who rely on proximity, including many in our HIspanic community. Evansdale is a trusted and accessible hub where students receive language support, cultural affirmation and stability.	
1063	My neighborhood schools are not affected (Montgomery, Chamblee Middle, Chamblee HS). Disappointed to hear popular small schools like Ashford Park and Oak Grove are being asked to close. Please shift Ashford park to John Lewis and keep those families in the chamblee cluster. Keep the magnet program in the chamblee cluster. Allow Sequoyah middle school to join with the new Doraville high school rather than a split feeder into chamblee high school.	3/6/2026 8:43 PM
1064	I do not like the idea of consolidating because I love my kids being able to go to a neighborhood school. Its small environment helps my kids feel safe and the teachers are able to know who we are. It is a gift to have a school like this, especially having moved from a state where most of the elementary schools were large and consolidated. Those schools felt impersonal and less safe. They also had poorer educational outcomes. (oklahoma city schools)	3/6/2026 8:42 PM
1065	Closing a best school so kids can go to lesser rated school	3/6/2026 8:40 PM
1066	I understand the need for consolidation, but I do not understand what toll it will take on students that are moving from familiarity to new spaces. I am wondering what the student to teacher ratio with the consolidation will be. Will there be more resources for afterschool assistance for students that are on the grading spectrum. What will a day in the life of education consist of?	3/6/2026 8:35 PM
1067	I am deeply opposed to the closure of Oak Grove Elementary. My daughter was just accepted into PreK and we chose this neighborhood for the school.	3/6/2026 8:27 PM
1068	My school is very good, the smaller size means I know my teachers and don't feel scared. I would not like to move schools to a very big school,if others schools have problems please help those schools instead	3/6/2026 8:23 PM
1069	Es muy buena escuela es una escuela donde asen sentir a los niños como en casa	3/6/2026 8:21 PM
1070	I do not have enough information to accurately give any feedback.	3/6/2026 8:20 PM
1071	Oak Grove does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake’s current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake’s enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M	3/6/2026 8:17 PM

	investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
1072	I would support consolidation so long as it does not involve trailers. Any solution for expanding schools that involves trailers is not a good solution	3/6/2026 8:17 PM
1073	With the consolidation for Vanderlyn, there is no outline of where the students will be reassigned, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made. Also Vanderlyn is a diverse, academically strong, and inclusive community. Preserving stable elementary environments while solving high school challenges aligns with district priorities.	3/6/2026 8:15 PM
1074	I do not think that Oak Grove elementary should be closed. It is a school that provides crate education for students especially those with IEP‘s.	3/6/2026 8:08 PM
1075	Evansdale seems to be on the chopping block because it's building doesn't meet the ideal. Why aren't you considering new buildings like the recent addition to Dresden. We certainly have the space.	3/6/2026 8:05 PM
1076	not logically planned/communities must not be disrupted	3/6/2026 8:02 PM
1077	We moved to our neighborhood specifically for Vanderlyn. We've heard nothing but great things and have experienced nothing but great things since our children have been attending. It is very disappointing to see it on the list of potential closures/repurposed facilities.	3/6/2026 8:01 PM
1078	I strongly discourage the school board from its proposal to close Ashford Park elementary or to reassign the Ashford Park Drew Valley Neighborhood to a different middle in high school cluster. The communities of Ashford Park and Drew Valley. Enjoy the Neighborhood elementary school significantly. It is a significant point of pride for the community. It is something that brings the community together. Ashford Park has also become a significant part of the growing and thriving community of Chamblee and should remain in that cluster moving forward, baby.	3/6/2026 8:00 PM
1079	I understand the need to consolidate and redistrict schools that have low utilization. In Dunwoody, our elementary schools are in the 70-80s for utilization. We love our smaller, community schools. Have you considered adding additional pre-k 3 and pre-k classrooms to the schools? I applied for the Vanderlyn pre-k lottery and am #24 on the waitlist. That’s a whole classroom worth of kids that want to be at Vanderlyn! Opening up additional pre-k classrooms would help fill the elementary schools with higher occupancies, rather than closing them down. We also worry about already busy local roads becoming so much worse if schools are closed and consolidated in Dunwoody. Have you looked at traffic patterns?	3/6/2026 7:54 PM
1080	Oak Grove is a high performing k-5. Property values are higher in this area because of this. Why would a school top ranking school be closed??!	3/6/2026 7:53 PM
1081	Do not close Cedar Grove High nor consolidate with McNair. I will move my family to City of Decatur. We need to invest in the schools we have. This plan places a very heavy burden on an already distressed South DeKalb and will accelerate the community into becoming a ghetto.	3/6/2026 7:52 PM
1082	DO NOT CLOSE Robert Shaw Elementary School. This is a top tier school that provides an excellent education for students. The school routinely win awards at the county, state, and national levels. Additionally, the school performs above county and state standards. I am vehemently opposed to closing Robert Shaw Theme School. The school also leads DeKalb in	3/6/2026 7:50 PM

	parental volunteer hours; we are heavily invested in our school and our children's future. The school is predominantly made up of East African (Ethiopia, Somalia, Eritrea) students. My African American daughters have benefitted from learning and growing with an international community. The county should be focused on expanding the school not closing it.	
1083	Consolidating schools forces parents and student to travel further to school each day, reducing walk to school opportunities and ease for students to get home. Additionally larger class sizes never results in better performance.	3/6/2026 7:49 PM
1084	I know it is needed but they should keep high performing schools	3/6/2026 7:41 PM
1085	Demographics were not looked at nor zoning for feeder middle and high schools. Jon Lewis is not in the same middle and high district so moving Ashford park student there doesn't make sense.	3/6/2026 7:40 PM
1086	I most of all want my neighborhood school, Oak Grove Elementary, to remain open.	3/6/2026 7:37 PM
1087	You're proposing closing some schools that are overcrowded. That makes no sense!	3/6/2026 7:37 PM
1088	Evansdale is a good solid school that has capacity to expand and has been respected as good for years. Please keep Evansdale.	3/6/2026 7:29 PM
1089	Oak Grove Elementary School (OGES) should not be closed as enrollment has increased for the past 4 years (after the pandemic). There are several large developments planned in our area near Oak Grove Elementary. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment; all of this is very near Oak Grove Elementary School. Furthermore, Oak Grove Elementary is one of the highest performing schools within the group being considered for closure.	3/6/2026 7:29 PM
1090	Evansdale need to be renovated,not closed . The school has two play grounds for the kids , a lot of parking lot .	3/6/2026 7:29 PM
1091	Evansdale is better situated for renovation or expansion than Livsey or any other local schools	3/6/2026 7:28 PM
1092	Please do NOT close Oak Grove Elementary School. This has been a bedrock of our neighborhood for many decades and the main reason we moved to Oak Grove from Morningside. Our kids do well in this neighborhood school and test scores show this. Oak Grove Elementary is at 95% capacity also. Sending young kids to a huge consolidated school away from their neighborhood will definitely negatively impact our kids education.	3/6/2026 7:23 PM
1093	My feedback on the initial facilities consolidation scenario is that it could help the school use space and resources more efficiently. Combining certain facilities might reduce costs, improve coordination between staff and students, and make better use of classrooms and equipment. However, it's important to consider potential challenges, like longer travel times for students or staff, crowded spaces, or disruptions during the transition. Careful planning and clear communication with everyone involved will be key to making the consolidation successful. Overall, if done thoughtfully, it could benefit both the school's operations and the student experience.	3/6/2026 7:21 PM
1094	How will this be funded? DCSD is notorious for kickbacks etc. how do we keep this all legitimate. DCSD did a lousy job this summer updating HVAC and other things at schools. Some schools still need corrections to the construction this past summer. How can we trust all of the construction to be done correctly when even minor things are not done correctly. Neighborhood schools are more than just schools, they are the heart of communities. Therefore closing neighborhood schools in lieu of spending more $ and bigger class sizes makes no sense.	3/6/2026 7:14 PM
1095	Champion Theme is centrally located and is the only current Theme school. That must be maintained or expanded.	3/6/2026 7:10 PM
1096	To be blunt, I'm not a fan of the scenario because it is just a facilities-driven approach. I understand that DCSD and SAP are trying to include community feedback and press the idea that any consolidation plans will have benefits to the students of this district but communities you will be impacting are not receptive to considerations based solely on space and buildings.	3/6/2026 7:10 PM
1097	I have been a resident on Tucker for nearly 30 years. I have seen many revisions to DeKalb County Schools. Unfortunately, I was only made aware of the potential close to Brockett and other area schools from a flyer a neighbor handed me. I am very concerned for the neighborhood children, parents, and the continued growth of our neighborhood. I have heard	3/6/2026 7:09 PM

	concerns and tried to decipher limited information in the web. It reads as if no plan for true financial impacts have been released, no budgets have been planned, no records of community impact, nor what this is actually going to cost. Again, I am deeply concerned based on the hodgepodge of presented information and clear communication to all of DeKalb county's residents!	
1098	Evansdale Elementary is very important to the surrounding community and has awesome teachers and room for expansion.	3/6/2026 7:06 PM
1099	Closing neighborhood elementary schools and middle schools is detrimental to the students and the community.	3/6/2026 7:04 PM
1100	Our neighborhood is called oak grove area based primarily on the great oak grove school - it is the Identity of our community and a key integral part.	3/6/2026 6:59 PM
1101	What will happen to students who are preparing for testing and graduation?	3/6/2026 6:59 PM
1102	Don't close Oak Grove Elementary	3/6/2026 6:58 PM
1103	I disagree with the premise and the plan.	3/6/2026 6:57 PM
1104	Brockett used to be k-7, so it could easily house prek-7th grade	3/6/2026 6:52 PM
1105	If my son's school closes, we will have to drive further, and in the wrong direction from my job, making our morning commute much harder. We also moved here this school year, and it's been a hard transition for my son. If he has to move schools again I fear we will repeat the same tantrums and crying we faced this year, scaring my child and others further.	3/6/2026 6:52 PM
1106	I strongly disagree for Evansdale elementary school because the classroom is already crowded, it's more than 25+ kids in each classroom. The consolidation scenario will not work for this school. There is already a high turnover teachers and a lot of changes in terms of principal and assistant principal Consolidation is the last thing that we need given the many changes that we went through for the past three years. This school has strong PTA and it's close net community. Hi	3/6/2026 6:52 PM
1107	The initial facilities can sustain its student populations as is without minimizing any resources.	3/6/2026 6:50 PM
1108	Closing Oak Grove Elementary would be detrimental to the community. I purchased my home because it's in the Oak Grove Elementary District and my property taxes which pay for the schools are based on the value accorded to my property because it is zoned for Oak Grove Elementary.	3/6/2026 6:45 PM
1109	I do not understand why certain high performing school like Vanderlyn are closing.	3/6/2026 6:45 PM
1110	Not sure why Vanderlyn Elementary would be eliminated when the school is one of the highest performing school in Dekalb. If it needs to be eliminated, the property/land should be used to expand Dunwoody Highschool.	3/6/2026 6:45 PM
1111	Has the growth of Dekalb been considered? As they build new neighborhoods that will increase the number of students. Also wouldn't the chance to lower student to teacher ratio be a good thing	3/6/2026 6:38 PM
1112	I feel they should not just focus on just South DeKalb area, but the whole District. I am sure there are schools in North DeKalb that has small numbers of students in those school as well. Many schools in the South has more students in their schools than the North. Why are you closing the schools in the South.	3/6/2026 6:37 PM
1113	Leave OUR schools alone. The majority of the schools that are being closed are in the predominantly black neighborhoods. You all are closing these schools so that you can build more housing and shopping centers. You all are doing exactly what was done the Jim Crow era. You want to bus our kids to different counties far away from their homes where it will be difficult for the parents without transportation. Go to Cobb County, Conyers, Gwinnett, and Sandy Springs and close their schools.	3/6/2026 6:34 PM
1114	I agree with scenario 1 for Chesnut Elementary expansion. CES sits on the largest acreage of land available to DCSD to expand compared to others elementary schools sites in our cluster. The CES site location any redesign could easily include a reconfiguration of new access is needed as it is a good right of away and still remains within the city Dunwoody limits. Its geographical location creates the MOST equitable access to elementary schools across the the City of Dunwoody . Based on scenario 1, the 3 remaining elementary school would be	3/6/2026 6:22 PM

	geographically spread out to best serve students across Dunwoody (northeastern side of Dunwoody with Austin, central Dunwoody with Dunwoody ES and the southeastern side of Dunwoody with Chesnut. Let's be clear, removing an elementary school from the southeastern side of Dunwoody would adversely affect and potentially impact educational outcomes, for a large number of Dunwoody residents that reside in the thriving multi-family communities of our city. These families are part of the CES community and many of these families engage with their elementary school due to the walkability and public transportation corridor that CES location provides. Most importantly CES proximity to Peachtre eMiddle School further enhances our thriving educational corridor in the Dunwoody cluster by allowing efficiency in shared resources and facility utilization. Sport and support programs among CES, Peachtree and Dunwoody HIgh proof important to keep all the students engaged throughout their development years - also students with sibiling in CES and Peachtree is natural to be in the same cluster. Chesnut Elementary has succesfully deliver exceptional educational service to a diverse population. CES is on of the most diverse elementary schools in the Dunwoody cluster, and is it important to be kept in the Dunwoody cluster. It is also important to expand Dunwoody HIgh School to help alleviate its overcrowding, which would help ensure that all families in the City of Dunwoody could be serve by one high school, which strenghts our entire Dunwoody community. As all Dunwoody cluster elementary schools roll up to the same middle and high school, we want the best opportunities and outcomes for our students even after they have CES. Better utilization of the available land around DHS would best serve all families within the City of Dunwoody.	
1115	If you are for the kids, no school would be closed	3/6/2026 6:06 PM
1116	After reviewing the proposal, I believe it would be beneficial to keep the current school open. Maintaining the existing location helps support stability for students, staff, and the surrounding community. Closing or consolidating the school could create challenges related to capacity, transportation, and disruption to established learning environments. Keeping the school open may better support continuity and ensure that students continue to have access to the resources and support systems already in place.	3/6/2026 6:05 PM
1117	Do not close the district’s best performing schools. If closures or consolidation are necessary, they should only be considered among schools with consistently lower ratings, weaker academic progress, or declining enrollment. Many families make significant financial decisions based on school assignments. That is exactly what we did when we purchased our home in the Oak Grove Elementary district. After waiting years for our child to finally be old enough to attend, it is shocking to see one of the district’s strongest schools included on the closure list. Oak Grove Elementary is clearly one of the best schools in the district. It has caring staff, strong community support, and excellent amenities, including a large library and a spacious, shaded yard that provides a great environment for students. Please reconsider including Oak Grove in any closure or consolidation plan and prioritize protecting schools that are performing well and serving their communities successfully.	3/6/2026 6:03 PM
1118	Your scenario which includes closing Evansdale is misguided. It’s the only school with a French program and it’s close to full capacity. The building is old but not beyond repair. Also, closing this school will not help the district, the school choice parents will probably go to private schools not to a school the deem less appropriate for their children. They chose Evansdale for a reason.	3/6/2026 6:03 PM
1119	I understand and support the need to address overcrowding at Dunwoody High School. I recognize that Vanderlyn’s proximity to the high school places our campus within a broader facilities planning conversation. The consolidations ignores the impact on those who entered school choice lottery to go to a school outside of their zoned school and related impact. The combined Vanderlyn and Dunwoody High School campus presents an opportunity to explore thoughtful, phased solutions that address secondary capacity while preserving elementary access. The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made. Vanderlyn is a diverse, academically strong, and inclusive community. Preserving stable elementary environments while solving high school challenges aligns with district priorities. I would welcome collaboration between district leaders and both school communities to explore campus-level solutions that address high school capacity while preserving the Vanderlyn community.	3/6/2026 5:48 PM
1120	Oak Grove does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89%	3/6/2026 5:47 PM

	utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
1121	Feedback on Initial Facilities Scenario (Consolidations) Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/6/2026 5:44 PM
1122	Has the board examined why there is a decline in students? Are an increasing number of	3/6/2026 5:37 PM

	parents utilizing private schools or homeschooling?	
1123	I support the expansion of Hunt Hills elementary school. Given the amount of land the school already has, the age of the facility itself, and the opportunities that lie ahead within the community, I believe expansion, not consolidation, is the best avenue.	3/6/2026 5:34 PM
1124	Are any charter schools impacted? Can closed schools be commemorated?	3/6/2026 5:31 PM
1125	I am very concerned about the impact of closing OGE to my property causes.	3/6/2026 5:30 PM
1126	Middle School	3/6/2026 5:26 PM
1127	It’s clearly not been thought through. DCSD does this every few years. The lack of research is disheartening.	3/6/2026 5:23 PM
1128	This is unnecessary and irresponsible to even consider closing oak grove elementary school.	3/6/2026 5:20 PM
1129	Oak Grove is a high performing, walkable community treasure! Please do not close a school that is an example of a Dekalb Public School success!	3/6/2026 5:15 PM
1130	Do not close Oak Grove Elementary!!! We serve many students with disabilities and are a true neighborhood school. Our parents are extremely involved and students excel compared to other schools in the district. We do not want mega elementary schools that overwhelm students and stretch resources.	3/6/2026 5:12 PM
1131	We have a student in Oak Grove elementary, and we need Oak Grove without Oak Grove my daughter would not have grown up successful in middle school and my son would not have been successful in elementary. Oak Grove is not just a school. Oak Grove is a community. It’s an amazing place. Our classrooms are not empty. Oak Grove does not deserve to be shut down.	3/6/2026 5:11 PM
1132	Not happy about potential closure of Oak Grove Elementary. It is a really big part of our community.	3/6/2026 5:10 PM
1133	Ashford park should be kept or all moved as one to John Lewis elementary with John Lewis joining the chamblee cluster	3/6/2026 5:10 PM
1134	OGE, is not under capacity as stayed by HPM. Currently it is 90% capacity and will be higher next year. The other local schools do not have available space or empty seats to absorb almost 500 students . It would need so many trailers or millions of dollars to build out to accommodate our students. This is not saving money but spending . There are multiple local expansion bringing families into this area. EMORY, AMBH, Lulah Hills development. Families are choosing to overcome to this area to attend a high performance school. The site DOES have room to expand and build out new classrooms as shown in a Landscape Architect site plan done to evaluate OGE property	3/6/2026 5:09 PM
1135	You are going to do what you want. This is all game.	3/6/2026 5:06 PM
1136	I support the Brookhaven community’s strong support of the public school system now and for many, many years to come I support… keeping our trajectory in the Chamblee MS and HS cluster, and the pathway of closing the Ashford Park Elementary School facility as a neighborhood school, and shifting the Ashford Park Elementary attendance zone to the current John Lewis Elementary facility, and preserve our (current attendance zone) Chamblee Cluster alignment. My 2 children graduated from Ashford Park Elementary, and 1 child currently goes to and my other child will attend Chamblee High School. Our neighbor Drew Valley has been in re-zoning discussions THREE times since I have lived here…please ensure the next re-zoning is a longterm solution. Thank you!	3/6/2026 4:58 PM
1137	Oak grove is an amazing school with amazing teachers who have built a community	3/6/2026 4:57 PM
1138	Oak Grove is an excellent school and if it is shut down the teachers and students will all scatter to different schools. This will split up friends which isn’t fair.	3/6/2026 4:56 PM
1139	Oak grove is a great school with amazing staff and it should stay open.	3/6/2026 4:56 PM
1140	Why? What is the positive except for cutting cost?	3/6/2026 4:55 PM
1141	I agree to small schools and students receiving quality education with smaller intimate class sizes	3/6/2026 4:55 PM
1142	Oak Grove does not align with the stated objective of addressing underutilization. The district’s	3/6/2026 4:54 PM

	goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. 1143	Not happy... Why go through all this effort and not support local small native schools that's what we all want	3/6/2026 4:53 PM
1144	I am deeply concerned over the potential closure of Ashford Park Elementary School. Our school is one of the most over utilized facilities despite the poor facility score. Families move INTO our neighborhood to attend our school specifically. We have had an extremely high teacher retention rate over the last few years, noteably last year only losing 5 teachers, 3 of whom retired and one who decided to homeschool her 6 children. Closing our school would GUT our community. I recognize the county will still have to provide our children wiht a place to go to school - the 3 facilities closest to us are all at capacity and the distance to travel to them would create a traffic nightmare in our neighborhood as well as on surrounding roads. Ashford Dunwoody road is a 2 lane road that cannot handle 200-400 additional cars travelling in the mornings. Busses are not a viable option for many in our neighborhood regardless of where they go to school because they come extremely early in the morning. If my child were to ride the bus to school in the mornings, our pick up time is around 6:05am. No parent who has the choice is going to put their elementary aged child on a bus that early in the morning. The bus ride home is much more useful for the majority of our parent community. One scenario that I feel our community could support if properly implemented is redrawing the boundary lines for Montgomery, Ashford Park, John Lewis, and Dresden. If you shift students who are on Osborne Road between Peachtree Road and Windsor PKWY to montgomery, shift some of the John Lewis Students North to the newly renovated/expanded Dresden, that could open seats for a combination of mostly Ashford Park and some John Lewis Elementary students. You could even possibly use Ashford Park as an Early learning type center Pre K - 2 or 3, and John Lewis as the upper elementary grades. This scenario would be similar to what took place at Sarah Smith Elementary in Atlanta Public Schools. The lines drawn to make up the attendance zone for John Lewis Elementary school looks like a lollypop and needs to be addressed. The caveat with this scenario is that Ashford Park Families have a strong desire to stay in the Chamblee High Cluster so that they can remain at one of the highest achieving schools in the county. This would not dramatically impact enrollment in the Chamblee middle/high schools because it would just be a shift of students from facility to facility.	3/6/2026 4:51 PM
1145	It is unclear why Oakgrove elementary would be closed-it is not underutilized or excess capacity-	3/6/2026 4:48 PM

1146	This is regarding Ashford Park Elementary. I have been involved with a number of school closure decisions across the country in my professional capacity. I have been involved in school closures for under-enrolled schools, underutilized buildings, and underperforming schools. However, I've never seen a closure of an oversubscribed school that has strong parent demand that is also high performing. You have stated on your website: "The goal is to avoid continuing to spend money operating underutilized schools in the future." I understand and support that effort. However, recommend closing an over enrolled school without any articulation of what it means for the significant number of active and engaged parents who are choosing to enroll their students in that school, under the guise of addressing district-wide under enrollment, is a recipe for building mistrust and anger with your parent constituents that elect you and fund your efforts. At a time when enrollment is decreasing in the district for a number of reasons, choosing to close an over enrolled school building will lead to alienating parents, with more of those parents choosing private or charter options, furthering the enrollment decline. I urge you to reconsider your closure decision of Ashford Park Elementary. Instead, I urge you to think about how to rezone the neighborhood to right size the enrollment to school capacity, and to work to rebuild trust with your parent community by being honest and transparent about your motivations for this decision and the implications for what it will mean for the students.	3/6/2026 4:47 PM
1147	Selfishly, I want Vanderlyn to close so that Dunwoody HS can expand. DHS is bursting at the seams. We have multiple portables. The gym cannot house all for grades for a pep rally. We do not have a proper clinic. We do not have adequate office or conference space for our LTSEs, graduation coaches, etc. We do not have adequate storage which causes the fire marshall to reprimand us. We do not have adequate athletic fields (the marching band practices in the parking lot, even when there are cars parked in the spaces). DHS needs an expansion badly. Allowing DHS to absorb the Vanderlyn campus could greatly benefit the entire cluster. You mention that Evansdale (10 acres) would close while Livsey (9 acres) would expand to absorb those students. You mention Brockett would close, but you do not mention it's acreage. I went to Brockett, and I really feel like Brockett has a much larger plot of land for expansion. McLendon's acreage is also not mentioned. How does it's lot size compare to Laurel Ridge?	3/6/2026 4:45 PM
1148	Elementary schools in the Lakeside zone should not be closed. Evansdale in particular is sitting on a very large lot with extensive opportunity to be renovated - something that is extremely overdue.	3/6/2026 4:44 PM
1149	This scenario has some important ideas to consider. Per the video and slide content it seems logical to consolidate the school buildings for cost efficiency overall, to provide sufficient resources for diverse students' essential learning needs and funding to to improve the school buildings that are in need of renovation or repair. This makes more sense if this reform initiative in fact will make school bus (transportation) access to students convenient. Small school buildings that operate with low operating cost and 600 or below 600 students are unable to have Robust Program-learning resources that diverse students need, the schools with low operating cost and around 600 students with Robust Programs does not seem feasible given the fact that many schools need repair or extension. It may be a controversial decision or consolidation agenda. These is my initial feedback: At first, all educators and staff members should receive transfer to other schools. We just cannot afford to loose jobs. Secondly, if this consolidation frees up fund for all schools to have Robust Programs to support the learning needs of diverse students and decrease operation cost, I think this is a sound reform initiative.	3/6/2026 4:41 PM
1150	No, Cedar Grove cluster should not be consolidated. Our schools have the right number of students for the area. The kids are doing well and they shouldn’t have to change their environment for the sake of North Dekalb.	3/6/2026 4:40 PM
1151	Seems like there are lots of potential closures. Are they all really necessary?	3/6/2026 4:38 PM
1152	When I heard that Oak Grove Elementary School might be on the list of schools that could be closed, I was very shocked and concerned. Oak Grove is a good school, and my son is only in first grade. For young children, stability is very important, so changing schools could be difficult for him. I am also worried that the new school might be farther from our home. Transportation could become more challenging, especially with the traffic in our area. Because of these reasons, this news was very concerning for our family.	3/6/2026 4:35 PM
1153	The current facilities are working well within the neighborhoods (30033). They allow for neighborhood involvement and extracurricular events, creating a strong sense of community.	3/6/2026 4:32 PM
1154	It's probably a good idea for some but not all of those schools. Frankly it was hard to	3/6/2026 4:11 PM

	understand which schools were going where but I think I understood what schools you suggested to close	
1155	It is extremely disappointing that DCSD has slated Ashford Park to close without sharing the plan for current students. It is important for our community to stay together and for us to retain our exceptional teachers and staff which makes this school such a success. Many parents will move their children to private school if we are forced to relocate to a substandard alternative	3/6/2026 4:09 PM
1156	VERY worried about closing Oak Grove Elementary. It is NOT under capacity has great scores, IS the community	3/6/2026 4:03 PM
1157	Please do not close Ashford Park Elementary.	3/6/2026 4:02 PM
1158	Please consolidate. There is no reason for half empty s tools that drain already minimal resources.	3/6/2026 3:59 PM
1159	Please transfer students from near-by elementary schools to Oak Grove Elementary School.	3/6/2026 3:51 PM
1160	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top t ier academically does not directly address the district-wide utilization gap.	3/6/2026 3:49 PM
1161	Dekalb must make evidence based decisions in the interest of all students and therefore follow the data that indicate small, hyper local schools being extremely beneficial to students. Austin has 25+ students in each k classroom and so we ought to keep all schools open and if necessary, redraw lines to better distribute students to lower classroom sizes. Resources aren't spread too thing, they're underfunded. That's a huge difference and the intervention needed to address that is different; keep schools open and properly fund them.	3/6/2026 3:47 PM
1162	Do not close Oak Grove Elementary. Its facilities are good and its staff is outstanding.	3/6/2026 3:46 PM
1163	Evansdale Elementary School needs to be renovated and expanded.	3/6/2026 3:46 PM
1164	DCSD should make data driven and informed decisions. The data demonstrate that hyper-local schools better serve students and communities alike. Instead of consolidating, better fund all the schools to keep them all open. The 'underperforming' schools just need more resources and smaller sizes and more funding.	3/6/2026 3:45 PM
1165	Oak Grove is currently well utilized. The district's goal is to increase elementary utilization to	3/6/2026 3:44 PM

	approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years.	
1166	Ashford Park School needs to stay open. It's a good school and has plenty of community support. The families and business support it in every way even providing what the school system can't provide. The Ashford Park community provides for the children in the community if they are unable to provided for financially.	3/6/2026 3:44 PM
1167	Evandale is in a great location for car pickup The traffic pattern is safe and lots of room to play	3/6/2026 3:43 PM
1168	Concerns over plans to renovate and expand Chesnut; timeline to expand and renovate should not be a plan for simply adding trailers to the property and should be a modernization strategy.	3/6/2026 3:39 PM
1169	As a parent, I understand that the district is facing declining enrollment and cannot continue operating the same number of school buildings long term. From a districtwide perspective, it makes sense to evaluate how facilities are being used so that resources can be focused on students, teachers, and academic programs instead of maintaining underused buildings. That said, consolidations can have a significant impact on families and communities. My main concern is making sure that the receiving schools are fully prepared to support additional students without becoming overcrowded. Class sizes, staffing levels, and available programs should not be negatively affected by the consolidation process. Transportation and travel time are also important considerations. If schools are consolidated, the district should make sure students—especially younger elementary students—are not facing significantly longer bus rides or more complicated transportation routes. Schools also serve as important anchors in their communities. When a school closes or merges, it can affect neighborhood identity and family engagement. I would encourage the district to continue involving families and communities in these decisions and to provide clear communication about how students will be supported during any transitions. Overall, my priority is that any consolidation decisions strengthen the quality of education across the district while minimizing disruption for students and maintaining equitable access to strong schools for all communities.	3/6/2026 3:39 PM
1170	Moving students and parents away from their community	3/6/2026 3:36 PM
1171	It's older and can definitely use some renovation. Don't think it's fit for this change.	3/6/2026 3:36 PM
1172	I don't think it's smart. I don't think it's going to solve any problems. I think you need to build more schools not close them. As far as the schools that are empty, repurpose them turn them into data centers. Maybe you could get a Dekalb tech contract to make them into a college location.	3/6/2026 3:36 PM
1173	It will be a tough transition, logistically, for some students and parents, however if the benefits proposed in the consolidation scenario are GUARANTEED it will be for the best. My fear is that the consolidation will take place and there won't be a better allocation of funds and resources, and it will all be for nothing.	3/6/2026 3:31 PM
1174	No one likes change but I support the decision to be proactive. Phasing out aging facilities would also be appropriate.	3/6/2026 3:30 PM
1175	I understand that closures are needed but I am not a fan of large elementary schools. If that is the case, there needs to be onsite mental health professionals that are able to serve any and every child regardless of insurance.	3/6/2026 3:27 PM
1176	I do not think it's a good idea consolidating schools because they will become to big for optimal learning to take place.	3/6/2026 3:24 PM
1177	All facilities need updating if we are to have our children keep up with all American children	3/6/2026 3:23 PM
1178	Yes, I am waiting to see the outcomes.	3/6/2026 3:21 PM
1179	I approve of the closures of all buildings mentioned. The impact would save money on buses, building upkeep, staff and teachers.	3/6/2026 3:20 PM
1180	I think that these are very hard decisions but are necessary. It is not fiscally responsible to maintain these facilities at decreased enrollments. It limits the services that are available to students given that we can't have a full complement of all services at a school that's only half or a 3rd full. Once their neighborhood school to close., it doesn't make any sense to have half empty buildings	3/6/2026 3:19 PM

1181	I am still processing the information.	3/6/2026 3:18 PM
1182	Facilities are great. Well kept up and grounds are fantastic	3/6/2026 3:17 PM
1183	Biggest Priority: Keeping the Ashford Park Elementary community together and being in close proximity to our elementary school.	3/6/2026 3:16 PM
1184	I think we should consider the programs housed at each school. For instance, Midvale elementary is an IB school. If Midvale was closed, there would no longer be an IB elementary school for the Tucker cluster to fulfill the IB continuum. It is a very lengthy process for another school to get certified.	3/6/2026 3:09 PM
1185	Oak Grove already meets the district's utilization target today (about 89%) • The school is projected to reach ~96% capacity next year • Enrollment has been increasing, not declining • Significant new investment and development in our area has likely not yet been reflected in projections • Academic performance, test scores, and teacher retention were not included as closure criteria -Should consider evaluating based on other factors/how were these factors chosen.	3/6/2026 3:08 PM
1186	I am very concerned about the way the SAP timeline and planning is being handled, and the current scenario's impact on my daughter, family, and community. My daughter is currently waitlisted at Evansdale pre-K which the SAP recently announced is part of their current plan for closure. We should be only worried about getting into Evansdale for pre-K and not about the future fate of the entire school and community. The Evansdale to Lakeside path is why we purchased our home and where we are committed to putting in our efforts for our daughter. I understand that class sizes will not necessarily increase with this plan, although this wasn't guaranteed during the meeting. Class sizes definitely matter, but I also don't want my young child immediately being thrown into a large school with an overwhelming amount of students and classrooms. I want her to go to school with those students who are right down the street from her. This allows her to grow friendships and help with group projects and assignments. Livsey is close to our neighborhood. However, the traffic that this would create on Chamblee Tucker would be unbearable. Also, according to your site, Livsey has 9.7 acres, while Evansdale has 10.11. In that case, the rationale that the Evansdale building is too small doesn't apply. Also, Livsey feeds into Tucker High School. This alone should rule out this option. The entire reason to move in this neighborhood for the school district cluster would be removed. The same arguments can be applied if Pleasantdale were being considered, except you also have to add on that this is not in our immediate neighborhood and traffic would be even worse. Also, Evansdale has a French immersion program that continues into Henderson Mill Middle School, and this scenario sends children to a different middle school. I don't even consider Hawthorne to be within my neighborhood. I had to look up where it even is. This is a horrible choice for our neighborhood elementary aged children. It is 4 miles away (Evansdale is <1 mile away from my home). For an elementary school, students should not have to deal with a bus route that would guarantee being stuck in traffic. The bus routes would be long, and the stops would disrupt the entire Northlake area. Main roads are required to get to this location from our neighborhood. Henderson Mill, Briarcliff, and/or Lavista (all busy, main roads) would be unavoidable to get to this school. This would make this already congested area a complete standstill before and after school. This scenario should be ruled out by traffic alone. Currently, Evansdale students don't need to worry about crossing main roads. They could walk to school or be dropped off by parents who would not be out of their way to work because the school is right down the road. Livsey, Pleasantdale, and Hawthorne are not viable options for current and future Evansdale students: increased traffic burden on the entire community and in the case of Livsey and Pleasantdale completely changing our cluster away from Lakeside. Evansdale should remain open. If Evansdale needs to absorb some students from a neighboring elementary then that could be considered as a scenario as there should be capacity to add some students to Evansdale. From the community engagement call, we were told Round 1 is when the buildings and their fate are already decided, and then the following rounds would be discussing logistics of those plans. Which schools are closing is extremely important for those of us with closing schools on the list. That gives less than a month from when community calls and surveys were held. This does not allow enough iterations for community engagement. That isn't even enough time to inform everyone in the neighborhood that this plan even exists. It certainly isn't enough time for parents and community members to meet and gather the correct information themselves. NO final decisions on any steps in this process should be made without taking the whole picture into account, not just aging building. This includes school programs, the community impact, decreased property values, changes to school clusters, and traffic. Buildings can be upgraded with proper use of our tax dollars. What happens when you finally look at the other pertinent information, and it shows a long list of	3/6/2026 3:07 PM

	negatives? For example, traffic congestion for not only the school area but the whole community? If I am misunderstanding this timeline then that also shows poor communication in this process. Only 150 people are making these decisions? Yet there are 90,000 students in the system, not counting the families and amount of people who live in the school district limits itself. A school (Evansdale) that is strong in the community, has valued programs, is located in the actual neighborhood, causes no additional bus stop and dropoff and pickup traffic, and is not under capacity should not be considered for closure in this plan. I really hope that this committee actually listens to the community. Evansdale community is whole-heartedly against the proposed scenario and has valid data and points to present to the committee. We need more chances to see the new, changed plans for the closures and keep providing our input. If a final decision that Evansdale is closed is announced next month, this shows me that Dekalb County School District does not know how to plan and engage the community in every step which would show me that they do not value students and parents. This will affect my decision on remaining or forcing my family to leave DCSD or even Dekalb County. The closure of Evansdale would be detrimental not only to those with children in our neighborhood but everyone as property values will decrease, people will flee, people will not find our neighborhood desirable anymore with this new proposed plan and with an abandoned elementary school right in the middle of a neighborhood. It is also worth noting the corruption of the former superintendent who proposed this idea in the first place. Dekalb County school board needs to work on rebuilding and regaining trust by planning and distributing funds appropriately instead of upending the entire community, creating large elementary schools that are far away from the students' homes and neighborhood. Thank you.	
1187	The facilities should not be consolidated because parents don't want to be left out.	3/6/2026 3:03 PM
1188	I oppose the consolidation scenario. Instead of closing schools, DCSD should use the 'empty seats' as an opportunity to implement smaller class sizes and specialized programming. By creating smaller, targeted schools (e.g., Arts, STEM, or Special Education hubs), the district can provide a higher quality of education that a massive 'factory-style' school cannot offer. School Name,FCA Score (Building Health),Current Status in Scenario Cedar Grove HS,81.39,Proposed conversion to Middle School Lithonia HS,89.42,Proposed conversion to Middle School Towers HS,Not listed,Proposed conversion to Middle School McLendon ES,78.02,Proposed for Closure Evansdale ES,71.48,Proposed for Closure Midvale ES,50.45,Proposed for Closure According to the State of the School Facilities Report, the district has nearly 20,000 empty seats. I propose that rather than closing 26 elementary schools, DCSD should pilot a 'Specialized Small School' model. For example, schools like Kingsley ES or Ashford Park ES—where the community is highly invested—could be converted into Choice Academies with capped class sizes of 18. This would attract families back from private/charter options and address the 'Educational Adequacy' gaps by turning extra classrooms into specialized labs.	3/6/2026 3:02 PM
1189	Need more trades in schools	3/6/2026 3:00 PM
1190	I believe the consolidation scenario is excessive. Community based schools are necessary especially for underprivileged students and their parents who might find it difficult to travel to the school. Although enrollment had diminished in some areas, closing the school will bring forth a variety of problems for the community.	3/6/2026 2:59 PM
1191	It is offensive that so many schools are closing on the south side of DeKalb.	3/6/2026 2:59 PM
1192	We need to consider the schools that need to be consolidated.	3/6/2026 2:58 PM
1193	Robert Shaw Theme School plays a critical role in our community and should not be considered for closure or consolidation. The school serves a diverse population and provides a supportive environment that many families rely on. Closing or repurposing the school would disrupt students' academic progress, separate them from trusted teachers, and create unnecessary transportation and overcrowding issues in other schools. Instead of consolidation, the district should focus on strengthening and investing in schools like Robert Shaw that are already serving families well and building strong community connections.	3/6/2026 2:57 PM
1194	Starting with a 'facilities first' approach is both ridiculous and a slap in the face to the people and programs that MAKE those facilities what they are. This process is bananas. That being said... Oak Grove Elementary does not align with the SAP's stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). HPM's numbers have been wrong on that - so they should probably get better data. Enrollment has increased for four consecutive years and	3/6/2026 2:57 PM

	that trend is sustained and upward. At the current pace, Oak Grove Elementary is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed by Sagamore Hills and/or Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. It was also stated by HPM that schools would be moved together and neither Sagamore or Briarlake could fully absorb OGE without a massive expansion. Neither has the footprint and are in locations to make traffic a nightmare. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills/Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory Hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. If we can actually get away from the facilities talk and look at performance, Oak Grove Elementary is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap. We should be raising schools like OGE up, not shutting them down.	
1195	Vanderlyn has many classrooms at or near full capacity. It would seem that closing it, would move an inordinate number of students to other schools.	3/6/2026 2:54 PM
1196	Totally confused why Oak Grove is in the list of closings. It's a stellar institution and a school of excellence	3/6/2026 2:53 PM
1197	I feel that our schools should operate pretty much the same and just have smaller classroom settings to ensure that our children are getting all they need to be succeessful.	3/6/2026 2:53 PM
1198	I believe the initial facilities scenario involving school consolidations is a wise decision. It makes sense to consider closing older, outdated schools that are in poor condition or located in surrounding areas that are not well maintained. Many of these campuses require significant upkeep, and even basic things like landscaping and lawn maintenance are often neglected, which can affect the overall environment for students and staff. Instead, the district should focus on maintaining and utilizing schools that are newer, better maintained, and already operating efficiently. Keeping the newer facilities open can provide students with a safer, more modern learning environment while also allowing the district to use its resources more effectively. By consolidating schools in this way, the district can prioritize quality facilities and create stronger, better supported learning spaces for students.	3/6/2026 2:53 PM
1199	Yes, consolidations are needed	3/6/2026 2:52 PM
1200	Ashford park is amazing please don't close it, I will prob move if you do	3/6/2026 2:51 PM
1201	identifying risks or better ways to manage traffic and in schools for student safety	3/6/2026 2:51 PM
1202	Closing this many schools at once will create significant disruption for students during some of the most important years for their development. Young children thrive on stability, familiarity, and close relationships. Moving them to new schools, increasing class sizes, and extending transportation times risk negatively impacting the children	3/6/2026 2:48 PM
1203	If it works than complete it.	3/6/2026 2:46 PM
1204	I'm very concerned about these, both the process and the outcomes. I have engaged with	3/6/2026 2:42 PM

	school closure processes before, but this one has been particularly nebulous and confusing. I appreciate that the district is trying to engage families, but they are being asked to weigh on specific issues that they don't have context for, and there is mass confusion about where and when parents can give feedback. It is also unclear to me why a school like Evansdale that appears to be largely at capacity Is being labeled as underutilized. If this is really about creating large elementary schools, which appears to be the vision that most people think the district is guided by, the district will have a lot of work to do to convince people to trust in that vision. As it stands now, most people prefer a midsized school. I understand the value of limiting very small, under enrolled schools, but currently this plan has a real risk of driving more people away from the district. As a parent with a very young child, it is heavily weighing on my thinking about whether we move to a different school system or a charter school.	
1205	Evansdale is a better site to retain a school because it is a large lot with large playing fields and excellent traffic management.	3/6/2026 2:39 PM
1206	I understand that consolidation may be necessary to address enrollment changes and facility use; however, decisions should prioritize student stability, transportation time, and maintaining strong school communities. Consolidations can be disruptive for students, families, and staff, so it is important that transitions are carefully planned with clear communication. Any consolidation should ensure that receiving schools have the space, resources, and staffing needed to maintain quality instruction and support services for all students, including those with special education needs.	3/6/2026 2:37 PM
1207	The initial facilities scenario is indeed a starting point for conversations. We know that everyone will not be happy with the outcome, but the reality of this situation is some schools are underutilized and some are over crowded.	3/6/2026 2:36 PM
1208	I’m truly shocked that Ashford Park might be closed because of the county’s inability to properly maintain the facility. The fact that families might be facing redistricting to a different cluster is honestly beyond terrible, given that the stated problem doesn’t even match this school. Keep these kids together with their classmates, and keep them in the Chamblee cluster. Any viable options need to be predicated on that being a non-negotiable.	3/6/2026 2:35 PM
1209	More thought should go into school performance (ie Oak Grove) and the community that supports it. Very much of a community identity associated with it.	3/6/2026 2:33 PM
1210	Evansdale should stay open. At 10.1 acres, Evansdale's lot size is bigger than neighboring schools recommended for explansion. Our site can accomodate additions that are not possible at other local schools. Evansdale enrollment is expected to increase over the next 5 years.	3/6/2026 2:33 PM
1211	I like the idea, let's rightsize schools based on sound population forecasting. There is no reason to have oak grove and sagamore hills elementary schools that close to each other.	3/6/2026 2:32 PM
1212	I am against the closing of Midvale ES. I think they're doing a fantastic job and serve the community well. I think making Midvale ES into a PK-3 band school would be a good alternative. I have been very impressed by the work they've done with the early grades.	3/6/2026 2:30 PM
1213	The consolidations are necessary and beneficial to the communities affected.	3/6/2026 2:30 PM
1214	I think it is well thought out and makes sense.	3/6/2026 2:29 PM
1215	Lithonia High School is historic school in South DeKalb. The schools around us were built because Lithonia's enrollment grew. Why change the school to a middle school when the school around Lithonia have small enerollments. Why not redraw the lines? For example, our attendance area includes Fairington Rd in which half in MLK and Lithonia, but a Lithonia bus has to cross I-20, near to Miller Grove. Looking at the Cluster Feeder Pattern, Lithonia, Miller Grove, and the MLK clusters have split elementary schools. MLK and Lithonia both don't have a 100% elementary feeder. What are the plans for staffing? Are all certified teacher being moved? I teach an elective course in which most school only employ one. So where will I go?	3/6/2026 2:28 PM
1216	I am concerned about how changes/ modifications will impact traffic. Chesnut is already very busy in the morning and afternoon adding an additional 200 to 300 students will be a huge problem. Also I am concerned that closing two elementary schools in Dunwoody may force some students to be rezoned to schools outside of Dunwoody. We all pay city of Dunwoody taxes so we should be attending school within Dunwoody. Chesnut is over 50 years old and needs to be rebuilt. Expanding and not rebuilding a school building that is that age doesn’t make sense.	3/6/2026 2:26 PM

1217	I understand the need to consolidate but am worried that it's just going to be an excuse to justify bigger class sizes and take away needed staff. I think there would be benefits to pooling resources but because it's all about the bottom line I don't trust DeKalb county to make these decisions in the best interests of the students. There is a lot of trust that needs to be built between Dekalb County school system and the community.	3/6/2026 2:25 PM
1218	The plan looks well thought out, but community impact is a great concern. Schools are often community hubs and this will be greatly felt.	3/6/2026 2:23 PM
1219	I think it is a great idea if is going to save money. Maybe give staff raises (support staff ex. Paraprofessionals)	3/6/2026 2:23 PM
1220	We paid extra for our house because it is zoned for Vanderlyn. Vanderlyn is an incredible school and consistently brings the scores of all of Dekalb up. Closing a high performing school makes absolutely no sense...	3/6/2026 2:22 PM
1221	Thank you for the opportunity to provide feedback regarding the potential grade band scenarios. I believe it is important to carefully consider how any changes may impact students, families, and staff within each school cluster. From my perspective, maintaining clear and consistent grade bands that support student development and smooth transitions between schools should remain a priority. For example, keeping elementary schools within a K–5 structure and middle schools within a 6–8 structure often supports age-appropriate programming and allows schools to focus on the specific academic and social needs of those grade levels. If adjustments to grade bands are being considered within specific clusters, it would be helpful to ensure that schools have the resources, staffing, and space needed to support those changes. Additionally, families should be given clear communication and sufficient time to prepare for any transitions that may affect their students. Overall, decisions about grade band configurations should prioritize student stability, instructional quality, and equitable access to resources across all schools in the cluster.	3/6/2026 2:21 PM
1222	The idea of consolidations is feasible. It makes more sense to combine smaller schools so they can be used to their full capacity rather than have schools with vacant classrooms.	3/6/2026 2:21 PM
1223	I think the scenarios makes sense but we need the second phase of the plan to go from. For example, closing Vanderlyn only makes sense if we can take that land to expand Dunwoody High	3/6/2026 2:21 PM
1224	I support Scenario 1. I do believe the expansion proposition for Chesnut Elementary should be a tear down and rebuild to better utilize the property and update a very out of date building.	3/6/2026 2:20 PM
1225	I think it sounds good, however how does this affect the already established communities at the schools that will receive new kids from closed schools. How does this affect kids who have developed friendships and may possibly be broken because they now go to two different schools. Will students at schools that will be receiving new students from closed buildings be rezoned because of the new students?	3/6/2026 2:18 PM
1226	It is critical to seek public/private partnerships to keep all school buildings in use. Once a school closes, it falls into disrepair and becomes a blight. And stop buying other property we do not need.	3/6/2026 2:18 PM
1227	Don't want it	3/6/2026 2:17 PM
1228	Chestnut elementary is located on a busy street and would be difficult to expand. I think it makes more since to keep Vanderlyn or Kingsley and expand one of those.	3/6/2026 2:17 PM
1229	The lack of data or logic shared behind these decisions was frustrating. I understand at a high level, but when detailed questions were raised, I lost confidence in the decisions based on lack of accurate data behind decisions.	3/6/2026 2:15 PM
1230	I am in support of the current scenario proposed for the Dunwoody Cluster. Chesnut sits on the largest acreage of land available to DCSD to expand compared to the other elementary school sites in our cluster. Chesnut's geographical location creates the most equitable access to elementary schools across the City of Dunwoody. Based on Scenario 1, the three remaining elementaryschools would be geographically spread out to best serve students across Dunwoody [i.e.: northeastern side of Dunwoody (via Austin), central Dunwoody (via DES), and the southeastern side of Dunwoody (via CES)]. Removing an elementary school from the southeastern side of Dunwoody would adversely affect, and potentially impact educational outcomes, for a large number of Dunwoody residents that reside in the thriving multi-family	3/6/2026 2:15 PM

	communities of our city. These families are an important part of the CES community, and many of these families can best engage with their elementary school due to the walkability and public transportation corridor that CES's location provides.	
1231	Community trust will be an issue and the concern of increasing cost may arise. Also, schools that are being consolidated, will the students mesh well with each other.	3/6/2026 2:14 PM
1232	I agree that hard decisions must be made and that empty seats vs overcrowding of other schools needs to be addressed.	3/6/2026 2:13 PM
1233	Hard to see savings if most schools are repurposed still requiring maintenance and utilities as well as more investment for their new purpose. If issue primarily staffing costs do more staff sharing between nearby elementary schools. Note that Oak Grove has much higher than average percent of student capacity filled (89% and growing)	3/6/2026 2:13 PM
1234	The potential closing of Evansdale Elementary is very concerning to us as a family. This is a great neighborhood school that not only has solid academics but also a supportive community. The opportunity for students to engage in a French language program sets the school apart and begins students on a path of global citizenship, which is increasingly important in our county, city and state. Closing Evansdale and combining it with another school will only dilute the academic opportunities and drive down the students' performance. The environment will only become larger and more chaotic causing the chance of our students simply becoming a number to increase. In a disconnected world, Evansdale gives our students a place where they can grow, learn and be known by their school community. Evansdale's language program stands out amongst peer schools and is successful in its approach to challenging our students to reach higher. There is a lot of research around the benefits of early dual language development and how it increases the elasticity of the brain which creates more pathways for learning. So, why make changes to this already successful school? A school that is successful and is not drastically under capacity. I understand the need for the county to make cost savjng changes but this one seems misguided and I hope they will consider holding up Evansdale as a beacon of success and not closing it.	3/6/2026 2:13 PM
1235	I am in support	3/6/2026 2:12 PM
1236	Thank you for the opportunity to review the initial facilities consolidation scenario and provide feedback. While I understand the need to examine building usage and district resources, I believe it is important to carefully consider the potential impact on students, families, and staff before any final decisions are made. School consolidations can significantly affect school culture, student stability, transportation, and access to support services. Many students rely on their school as a consistent and familiar environment, and changes of this magnitude can be challenging for both students and families. Additionally, it will be important to ensure that any receiving schools have the capacity, staffing, and resources needed to effectively support an increased student population while maintaining a positive learning environment. Consideration should also be given to class sizes, student support services, and maintaining strong relationships with the surrounding community. I encourage continued engagement with school leaders, staff, and families throughout this process to ensure transparency and to gather meaningful input before moving forward with any decisions. Thank you again for allowing stakeholders the opportunity to provide feedback.	3/6/2026 2:11 PM
1237	OGE has always gone through waves. We'll have a hike in enrollment by next year. Save OGE	3/6/2026 2:10 PM
1238	I understand and support the need to address overcrowding at Dunwoody High School and that Vanderlyn's proximity to the high school places our campus within a broader facilities planning conversation. I also recognize that the district has framed SAP around enrollment trends and utilization. I would hope that any proposal should clearly demonstrate how those metrics are being applied at the cluster level. The combined Vanderlyn and Dunwoody High School campus presents an opportunity to explore thoughtful, phased solutions that address secondary capacity while preserving elementary access. The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made. Vanderlyn is a diverse, academically strong, and inclusive community. Preserving stable elementary environments while solving high school challenges aligns with district priorities. It is also a place of community, pride, and safety for not only students and teachers, but for their family members/guardians. I welcome collaboration between district leaders and both school communities to explore campus-level solutions that address high school capacity while preserving the Vanderlyn community.	3/6/2026 2:09 PM

1239	Several top performing schools including Vanderlyn are on the closure list. Closing a top performing school does not seem like what would be best for the students . The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made.	3/6/2026 2:08 PM
1240	I love the midvale the way it is. I like that it is a small school and that it is not over populated.	3/6/2026 2:06 PM
1241	ab	3/6/2026 2:05 PM
1242	In the the first scenario, Rainbow is remaining open, with possible programs added. This would be great. It's a community school and we want it to remain open in its current capacity.	3/6/2026 2:04 PM
1243	We love the Livsey school community and small remodel work they have received.	3/6/2026 2:03 PM
1244	I think it's an awful idea. The County is clearly just trying to maximize space at schools (reading between the lines it means less schools with much, MUCH larger class sizes)	3/6/2026 2:03 PM
1245	While consolidations result in financial relief, they come with the considerable downside of taking away many intangibles. These intangibles are best described as "community" which is equally important to a quality education.	3/6/2026 2:02 PM
1246	I am pleased that Sagamore Elementary is currently not one of schools proposed to be closed as we are very pleased with our elementary school experience and hope future student get to experience the same. My ask of this process is to be better understand where any may re-districting of students may occur as a result of the this process as I feel very strongly that if the elementary school that we currently attend remains open, we should still be able to still attend that school.	3/6/2026 1:59 PM
1247	I think that they should keep the schools they want to close and turn them to neighborhood development centers or adult schools	3/6/2026 1:59 PM
1248	I agree that some schools are in need of closure, however, instead of patching up others they need major renovations or to be torn down and rebuilt.	3/6/2026 1:58 PM
1249	It makes sense to reduce little utilized facilities only if the remaining facilities are properly updated.	3/6/2026 1:57 PM
1250	The fact that you’re asking for feedback on this when it’s obvious that absolutely no feedback on the school year calendar was taking into consideration is laughable	3/6/2026 1:56 PM
1251	What will happen to the teachers?	3/6/2026 1:54 PM
1252	There might be some growing pains, since several new middle schools are designed for middle schoolers, and would need to be adapted to the smaller elementary school students.	3/6/2026 1:54 PM
1253	Oak Grove Elementary school was one of the best things that ever happened to my child. Including the aftercare. It's pivotal primary education. However, I do not feel the same way about Henderson Middle School. That school needs more resources and support for students.	3/6/2026 1:51 PM
1254	Our community need to have a strong presence in schools and hood opportunities	3/6/2026 1:50 PM
1255	Me parece que están muy adecuadas y trabajan excelente	3/6/2026 1:48 PM
1256	To close Vanderlyn would be such a loss to this community- I have been a teacher here for 12 years and now my own children attend with me. We are number 1 or 2 in the DCSD. Closing a school that has done the right thing, built a strong community, has parent support and does the right thing is a shame.	3/6/2026 1:45 PM
1257	I think that neighborhood schools should stay in their neighborhoods. Combining schools and communities should not be taken lightly.	3/6/2026 1:45 PM
1258	I think rezoning could eliminate this problem	3/6/2026 1:44 PM
1259	I think the school district should redraw the lines, even if it is not a popular choice. The school district is wasting money keep some schools open.	3/6/2026 1:44 PM
1260	I understand the need for efficiency but I do think it makes more sense to have smaller close knit elementary schools for our youngest students.	3/6/2026 1:44 PM
1261	I would like a better definition of the word robust to see what exactly would improve (vs. using	3/6/2026 1:42 PM

	words that imply it will be better). If you can ensure the school closures will best serve the students, it should be considered.	
1262	If this needs to happen in order for Dekalb to run more efficiently, then it has to be done.	3/6/2026 1:39 PM
1263	Vanderlyn Elementary is performing well and is an important asset to our neighborhood and community. Most importantly, it provides a strong educational structure that benefits the children who attend. Losing Vanderlyn would be a significant loss for families in this area. Vanderlyn also offers a STEM program that schools like Chestnut currently do not provide. Chestnut's performance has been a major factor in why many families, including mine, chose to use school choice to attend Vanderlyn instead.	3/6/2026 1:38 PM
1264	I am pleased that Sagamore Hills Elementary is proposed to remain open and serve this amazing community. Principal Freeman has done an amazing job and we need this school to stay open to continue to reinvigorate the interest in public schools in our area. Need further information on any redistricting scenarios-- how will the communities surrounding us be split and redirected? Will we remain at our current elementary school.	3/6/2026 1:37 PM
1265	None of the facilities consolidation in the scenario impact our family, so from a personal standpoint, I am in agreement with the proposed scenario.	3/6/2026 1:35 PM
1266	unfortunate especially for schools that might have seemingly have small numbers but classrooms are full	3/6/2026 1:35 PM
1267	I like the plan.	3/6/2026 1:33 PM
1268	We are districted to Vanderlyn and purchased this house for this reason 9 years ago. My understanding through conversations with Andrew Ziffer is that Vanderlyn is closing, it's just a matter of time. If that is the case, then the only thing to comment on is timing. If choosing between closing Vanderlyn and Kingsley, the choice is obvious when looking at test scores. I agree with the thought of trying not to redirect students more than once which means you should close Vanderlyn and Kingsley at the same time.	3/6/2026 1:32 PM
1269	While the consolidation of facilities is a positive step, care should be taken to ensure it doesn't negatively impact students, as it may increase their distance from school and this may affect parents for drop off and pickup their children .	3/6/2026 1:30 PM
1270	Oak Grove is not just a school. It's our community. It should not be closed.	3/6/2026 1:28 PM
1271	I agree with Vanderlyn closing and rebuilding Chesnut. The Vanderlyn families historically complain about this.. but it makes absolutely no sense to keep a incredibly old building open that is a stone's throw away from Dunwoody elementary!	3/6/2026 1:24 PM
1272	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%).	3/6/2026 1:24 PM
1273	The smaller elementary schools are so beneficial to our kids and community. I would hate to see any of them being closed down. The big Mega schools are not beneficial to our kids	3/6/2026 1:23 PM
1274	This sounds somewhat positive.	3/6/2026 1:21 PM
1275	Ido not understand why Briarlake and Sagamore are slated for expansion but Oak Grove may be closed when it is clearly the better school in my opinion, having known patents of students in both of those expansion schools i	3/6/2026 1:20 PM
1276	We live 1 block from Evansdale Elementary and are heartbroken that it may be closed. It's a wonderful school in our little community.	3/6/2026 1:19 PM
1277	I'm glad you are going to the community for input. I'm glad you are consolidating schools for best use of revenue and resources. But the plan so far shows no advance planning as you have not considered size of school property, percentages of unused space, possible use of property in the future, and more. Hopefully these factors will be considered.	3/6/2026 1:16 PM
1278	I think that the community should be informed about what were the exact metrics for this initial announcement of closures, specific to each school. Parents and communities should know exactly what is going on with their school.	3/6/2026 1:14 PM
1279	I am not happy that Oak Grove Elementary was included in the closure list. It is nearly at	3/6/2026 1:13 PM

	capacity with students, has a strong PTA and neighborhood support.	
1280	Evansdale needs to stay. There are so many kids in my neighborhood that benefit from having a school so close to home.	3/6/2026 1:09 PM
1281	Evansdale Elementary needs to be renovated and expanded, not closed	3/6/2026 1:09 PM
1282	I'm worried about overcrowding at Montgomery as a result of Ashford Park closing. I'm also worried that many of the very active and engaged parents in the district will pull their children into private schools as a result	3/6/2026 1:07 PM
1283	i have good feed back for this school becuse all.staff very nice	3/6/2026 1:02 PM
1284	I oppose consolidation where it woukd close grade schools with strong and active Foundations. I was Treasurer for the Evansdale Foundation and we have done so much to support that school. What happens to the playgrounds and other permanent improvements we have made to that building?	3/6/2026 12:53 PM
1285	Keep Evansdale open	3/6/2026 12:52 PM
1286	None	3/6/2026 12:48 PM
1287	a school like this should be the best school in the history they give us good food.	3/6/2026 12:47 PM
1288	The School is so lovely and I feel like I belong and the teachers are so lovely the parents love it	3/6/2026 12:47 PM
1289	the building is stabled and it does not fall down.i am treated really good I love this school I never want to leave because my teachers are really nice I love my teacher so much.	3/6/2026 12:47 PM
1290	I have been here for 6 years and it still hasen't fell down	3/6/2026 12:47 PM
1291	the building are nice and clean I am treated good and the building is stable I love my teachers cause they are so nice	3/6/2026 12:47 PM
1292	The school is so clean and the bathroom are so clean we l go	3/6/2026 12:47 PM
1293	The building is very clean.and the people and staff are nice.i	3/6/2026 12:46 PM
1294	the school is very clean and is great to learn in! I love my amazing school please don't close it!	3/6/2026 12:46 PM
1295	The building does not make healthy food that kids would eat, they let the kids suffer from thirst if their lactose and tollerent	3/6/2026 12:46 PM
1296	Brockett is doing very well and it is not having any problems. I love being here and I love feeling like I belong. I also love being in the same school as my sister and having amazing education. I've learned so much here.	3/6/2026 12:46 PM
1297	Our school is clean and nice. Everything is working. I'm grade 4th and I have nothing to worry about because you want to close next year but please don't do that.	3/6/2026 12:46 PM
1298	Students that play sports and stay in Dekalb county are using other addresses to attend other county schools a lot of Dekalb students transferred to Henry county schools but they stay in dekalb	3/6/2026 12:45 PM
1299	I do not want the school to close because I love brockett.	3/6/2026 12:45 PM
1300	The building is clean it doesn't have no cracks the workers always clean the school.	3/6/2026 12:45 PM
1301	The building is good cause the Cafeteria is clean and the food is okay.	3/6/2026 12:45 PM
1302	Everything is good and clean nothing is bad all the think is good.	3/6/2026 12:45 PM
1303	I like to be with my friends and its fun. I like the playground so, why will they chose Brockett to close?	3/6/2026 12:45 PM
1304	the is very clear in we are very good the teacher are very good nice people never	3/6/2026 12:45 PM
1305	our school shows us how things work and everything works here and nothing is broken.	3/6/2026 12:45 PM
1306	Our school has clean walls, floors, and always provides safety for all students. I love coming to school everyday and bullying never happens. All the teachers are respectful, and caring.	3/6/2026 12:45 PM

	This school holds a lot of nostalgia, happiness, and loving people. I learn new things everyday. This is why I shouldn't close down my school.	
1307	IT IS A GOOD PLACE TO LIKE BECAUSE THERE IS NOTHING BAD THAT CAN HAPPEN. AND THERE ARE A LOT OF NICE PEOPLE. AND THE PLAYGROUND IS BIG TO PLAY IN.	3/6/2026 12:45 PM
1308	This building has running water and everyone knows my name which is amazing and everyone is so nice and this school has our colors and our very own Brockett Bobcat and he's always been there for us so please don't shut down the school.	3/6/2026 12:45 PM
1309	The hall way is cleaned and they say hi to you when you enter the school .	3/6/2026 12:44 PM
1310	our school is clean I like it a lot I have so many friends and it has cool new stuff . I have so many friends so many people know me I love it here and Ive be her since pre k and now I'm in fourth grade ect . and I want to see my little family members come her .	3/6/2026 12:44 PM
1311	I like this school because I feel comfortable and many people are nice to me and this school is clean almost every week.	3/6/2026 12:43 PM
1312	The building is full of people who have been here for years now imagine you getting pulled away from your home and its full of our memories.	3/6/2026 12:43 PM
1313	The building is a sterty. she is sweet and the best. I love the food.	3/6/2026 12:43 PM
1314	I have taught in many DeKalb schools in all grade levels for more than 40 years. Please think on consolidations. There are many really good schools that are over crowded. Take the extra students and adjust the attendance lines to help keep a good school and all the staff that makes that school good. Don’t break up a well working school.	3/6/2026 12:39 PM
1315	I am a parent of two Vanderlyn elementary students. While I understand that there are problems regarding both over/under capacity schools in the district, I think DeKalb would be making an incredibly poor choice in choosing to close Vanderlyn, one of the top 40 public elementary schools in Georgia, out of approximately 1,800 schools. Vanderlyn should be held up as a bright spot in the district, especially considering all DCSD has gone through over the past year or two. Aside from some recent capital updates, keeping Chestnut makes little sense. The school is in an incredibly crowded area, en route to 285, and already causes significant traffic problems, adding students there will only increase this burden on the county and cause major traffic concerns. In addition, Vanderlyn is a high performing, community school that raises home values significantly. Should home prices drop, and parents be worried about their children's educational prospects, you will lose a population of parents that are part of the group paying a large portion of DeKalb educational taxes. We are only hurting DeKalb and DCSD in this scenario. DeKalb School Board has made some mistakes in the past year, undoubtedly. Please don't let the closing of Vanderlyn be another one.	3/6/2026 12:37 PM
1316	Understand the need, small elementary schools are so engaging for the community and create a safe area but understand why they may not be sustainable	3/6/2026 12:28 PM
1317	Our community counts on Evansdale Elementary for growth in our neighborhood, culturally and educationally. We do not want to see our kids redistricted!	3/6/2026 12:26 PM
1318	I feel that too many schools are slated to close. For example, Livsey is already on a small lot with trailers and has nowhere to expand into. It will also cause parents to send their children far away to attend school, which could cause additional problems.	3/6/2026 12:24 PM
1319	I would rather HMES not close because it’s the one we’re using and it seems to be doing fine. I am fine with consolidating schools but school quality and teacher-student ratios should not be made worse just for the sake of potential cost savings.	3/6/2026 12:22 PM
1320	The consolidation can be good, if it is done fairly. I think that the schools on the Southside should look like the state-of-the-art schools on the North side of the district.	3/6/2026 12:22 PM
1321	Please do not close our neighborhood school Evansdale Elementary	3/6/2026 12:17 PM
1322	It’s a great school for my kids and others they recommend it	3/6/2026 12:15 PM
1323	In our Dunwoody cluster, I agree with the proposed plan. Having updated/fairly new schools in East/Central/West Dunwoody is an exciting proposal.	3/6/2026 12:14 PM
1324	I am horrified.	3/6/2026 12:12 PM

1325	I don’t think it’s conducive to the growth of the community. Educational wise or economically.	3/6/2026 12:11 PM
1326	The idea that there is the potential that APES could completely close was very disheartening to hear. The parents and community give greatly and the school itself is such a pillar of our community. We would love to see money invested into our school for rebuilding and keeping our families together from elementary all the way through to Chamblee High. Our family would like to see APES remain in the neighborhood, and it to be rebuilt or significantly renovated, and for us all to stay in the Chamblee cluster.	3/6/2026 12:07 PM
1327	I would like to see the district look at schools located in the north and south of the district when considering consolidations.	3/6/2026 12:06 PM
1328	It is so crucial to keep Evansdale elementary it is a great facility that services so many families and students	3/6/2026 12:04 PM
1329	Brockett	3/6/2026 12:02 PM
1330	I have lived in the Evansdale Elementary School area for more than 30 years. Our neighborhood school has many unique qualities - a 10.1 acre campus, sepaparte play fields, two playgrounds, room to expand, nature trails, a projected increasing enrollment, a French program, lots of community involvement, a mentoring program, and a quiet and lovely location away from major traffic lanes. This school should be renovated and expanded, not closed.	3/6/2026 12:01 PM
1331	The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment (currently at 485 students), class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made. I understand our schools proximity to the high school lends itself to more space for the High School, but it’s too far for academic buildings but we are open to redesigning our open spaces for fields that can be used by both schools (elementary during the school day and high school afternoons go sports practices and games). More clarity is needed for where our students go when Austin and Dunwoody elementaries only have space for half to 2/3 of our students. If we’re not contingent on a new Chestnut elementary to be built, where will you fit our students? Our school has space for new car pool lines in front of the school, moving parking to left side of the school and we have the space for additional classrooms to get to the 4 class/grade ideal scenario mentioned in the SAP zoom meeting.	3/6/2026 11:57 AM
1332	It makes sense in theory, but not sure how it will work in practice	3/6/2026 11:56 AM
1333	Are we investing enough in the northern part of the county where population growth and high performing schools are?	3/6/2026 11:53 AM
1334	Oak Grove Road, including the elementary school school, church, and business is the heart of this vibrant and growing community. OGS continues to be sought after and essential for our neighborhood.	3/6/2026 11:53 AM
1335	One thing not addressed but I am curious about is the student to teacher ratio currently and what is projected for each level/scenario, because currently we have more students than teacher/staff needed resources to meet the needs of our students within the communities.	3/6/2026 11:52 AM
1336	https://email.membershiptoolkit.com/ls/click?upn=u001.dP20uh2xUDz7Ju9WhAzXUCyOQdjEHgdSesQM9rGbTsyM0-2B8UV9CO-2Fz9GcFBohmq039ckGYMrOTlHLNHmHQ35-2FLj3oxFWhHdsfPr3qYmy2puCc4434mpEqddWkWSbVUK9l40-2FZMZv31Q9k1z-2BmVtH3w-3D-3DNy51_5M-2ByGy8tG4ZWxoTIfZKNgWBwW-2BI-2Fnl9EZD-2FbUL1RLAy2SrM4DZlFR8-2FheIxqbDWpXPQJw-2FcJvGATA55fsheczxVWIJGkKGZY-2Be9ZRZO4sJ0iKPkEqJ9HK8UsO2mUehyRuyIwJ0C8-2BBmFv6eIgsM15on5THKOwWKbk1mSemc5NHW1aSSPzhdFhBZ5NvWtZn2-2Fc8hkZLo-2BP9f8B-2Ftubx6lSNlINbHanM0Qwaoden0Bvv7QQeI4wmuealwhwyQqKEpBB4FcWEoMxF-2BaylzoWkWggOGH5Rckin6q65D28u0EU-2Fd60ZPH87zgFKfVD5FTxj8OVc38L4-2FfGUXm7hRtc9LGfAsmo8aCsonh0bsYa26SG3VyrmwKtz1HGwJEDTBQzGBs	3/6/2026 11:50 AM
1337	Some consolidations may be needed. Not Oak Grove as this Elementary is very important for this community.	3/6/2026 11:50 AM
1338	I understand and support the need to address overcrowding at Dunwoody High School. I recognize that Vanderlyn’s proximity to the high school places our campus within a broader facilities planning conversation. I also recognize that the district has framed SAP around enrollment trends and utilization. Any proposal should clearly demonstrate how those metrics	3/6/2026 11:49 AM

	are being applied at the cluster level. The combined Vanderlyn and Dunwoody High School campus presents an opportunity to explore thoughtful, phased solutions that address secondary capacity while preserving elementary access. The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made. Vanderlyn is a diverse, academically strong, and inclusive community. Preserving stable elementary environments while solving high school challenges aligns with district priorities. I would welcome collaboration between district leaders and both school communities to explore campus-level solutions that address high school capacity while preserving the Vanderlyn community.	
1339	I'm ok with it	3/6/2026 11:43 AM
1340	Neighborhood schools are vital to our community,	3/6/2026 11:39 AM
1341	The timeline for implementation is not realistic. It seems there is no consideration to traffic patterns or impacts to busing.	3/6/2026 11:39 AM
1342	I understand that schools with low enrollment may need to be closed or combined but I do not like the idea of really large elementary or middle schools.	3/6/2026 11:39 AM
1343	I am aligned with the facilities scenario, as we need to focus on fewer and better schools to make sure our tax dollars are working for our students, and schools are fully-staffed and maintained.	3/6/2026 11:35 AM
1344	Need more details on how mixing grade bands would be located and managed.	3/6/2026 11:34 AM
1345	Consolidations need to take into account distance for students to travel and state of facilities. Mega elementary schools (600+) are not desirable but larger ones that allow more resources would be beneficial if kept under a certain number.	3/6/2026 11:30 AM
1346	I understand the desire concentrate resources but I strongly strongly think this is not the best plan! There is such immense value in a small community school, where children and families are known and not just another number. We love the community at evansdale and see the French immersion program as so valuable. So we also worry about that being lost. We may move if evansdale closes. Please don’t do this! :)	3/6/2026 11:29 AM
1347	Bob Mathis Elementary School has provided students with excellent education for 50 years. We are only 60 students below capacity, however there are other schools that are not on the list that has a much more greater deficit of students to desk ratios	3/6/2026 11:29 AM
1348	I understand closing Stoneview Elementary. The schools building is dilapidated and needs serious renovations along with more community support. However Lithonia Middle and High schools should just be switched as far as the buildings are concerned but not taken out the community. They are both rebuilding and the administrators and staff have been doing a great job being involved in the community and making positive impacts on the students lives.	3/6/2026 11:24 AM
1349	Ashford Park should remain open and in the exact same cluster with Chamblee Middle and Chamblee High School. The school is rigorously supported and is the center of the neighborhood. We would rather have trailers than closing or consolidating with another school.	3/6/2026 11:24 AM
1350	I moved here specifically so my children could to these exact schools. I do not want to move to Sandy Springs.	3/6/2026 11:18 AM
1351	Schools with more students in them don't necessarily turn out students that are better educated. I would argue a smaller population where more students know each other and we teachers know more students fosters a sense of community that is lost when you have such a high population. And the question that should be asked about any of this is is this going to yield students with a better education? I would like information that indicates that consolidation yields not better grades but better education better sense of community, more peaceful environment. I personally can assure you that if the elementary schools are consolidated, I will be looking for alternative means of education for my children. I'm looking for a community, not a college like campus. The resources that would be available to a greater student population if they were consolidated does make sense to me. Every child with any disadvantage should be given every opportunity to supplement their education, but not at the cost of the entire population losing something that is so easily lost, a sense of community.	3/6/2026 11:18 AM
1352	Against	3/6/2026 11:16 AM

1353	Oak Grove Elementary is why we purchased our home. Oak Grove, Shamrock, and Lakeside were integral to our family between 1986 and 2004. Our experience as parents, and now as community members, is that Oak Grove Elementary continues to be a high-performing neighborhood school that is vital to this community. If data does not confirm that OGS is underutilized and in decline, it should be removed from the list of closures.	3/6/2026 11:15 AM
1354	Unbelievable	3/6/2026 11:14 AM
1355	I'm legitimately curious how Montgomery and its feeders would take the closure of Ashford Park Elementary. It seems like these facilities are aged and outsized for the gentrification in the area, but I have no idea how DeKalb could reconcile this with dated facilities.	3/6/2026 11:06 AM
1356	Robert show theme traditional school is the best they created good personality students and also all the staff members are responsible	3/6/2026 11:02 AM
1357	The consolidation need is understood. The strategy to retain high school and middle school buildings over elementary also makes sense. It's sad to see the school we're zoned for (Oak Grove) be closed given its high ratings, but it makes sense that some schools will have to be closed. I don't know the reasoning for Oak Grove in particular, so it'd be nice to be given a summary for each scheduled-to-be-closed school on why it was chosen (with strong data, of course.)	3/6/2026 11:00 AM
1358	I think it would be a detriment to all involved to combine school. I believe small local school are an asset to our community and give children the opportunity to thrive.	3/6/2026 10:58 AM
1359	Please do not close down Ashford Park Elementary. Yes the building needs to be updated, but shutting it down and dividing up our wonderful community is not acceptable.	3/6/2026 10:56 AM
1360	I think it is a horrible plan. There is nothing better than having my children attend a small neighborhood school. They know everyone and feel safe and loved. I know everyone. It is easy to get plugged in. It is easy to have a sense of community. Kids are seen and treated as individuals. Perhaps dekalb should spend time figuring out why enrollment is down and fix that problem instead. Parents are scared to send their kids to school (ICE), dekalb schools are rated poorly so parents opt for private. How about you work at a government level to fix the actual issues instead of consolidating all these incredibly precious schools.	3/6/2026 10:55 AM
1361	The Oak Grove Community is strong and involved and the students deserve to benefit from the community engagement. It's a tough reality for any school to have to close, and the parent engagement should be considered.	3/6/2026 10:53 AM
1362	It’s one of the dumbest things I’ve ever heard and would likely cause a decrease in enrollment as fewer families trust the district with making the right decision for their children.	3/6/2026 10:53 AM
1363	I have no students in the school system, so I can’t answer this question..I’m a member of the Evansdale Community and just a concerned member of the community.	3/6/2026 10:52 AM
1364	Please don't concentrate closures in low income areas like mine (McNair Discovery Learning Academy). These schools have the potential to improve with more consolidated resources. Forcing lower income students to travel farther for education will exacerbate existing inequalities.	3/6/2026 10:47 AM
1365	We are a new Midvale family and we are in awe of this school. As a family of four, we have experienced a “merged” elementary school in DeKalb. Now that we’ve seen both sides, we will fight for the better option. My daughter started at Midvale this year in second grade. She had been at Smoke Rise Elementary since PreK. After the Idlewood merge, it became a “mega” school with 1,200ish students. It changed drastically after the influx of students. My son is currently in PreK at SRES. We do not want a giant school for our kids, and it seems like that’s where we may be heading at Midvale. It feels like the kids at SRES are numbers now. There isn’t a sense of community, and the concept of “all the teachers know the kids’ names” doesn’t exist there. The school is far too large for that. Administration isn’t proactive with issues, because they are simply trying to keep up, and keep their heads above water. The teachers don’t seem happy; they seem overwhelmed with huge class sizes and an unsupportive administration. Kids only get to do music class and art class every nine days, when it used to be once (sometimes twice!) a week. I don’t want that future for my children. When my eldest started at Midvale, it was a breath of fresh air for her, and for her father and me. At SRES, we were so used to the negativity, the lack of outside time (they go days without going outside!), the focus on testing, and the weak admin, that we didn’t know that elementary schools aren’t all like that. Midvale Elementary School is exactly what an elementary school should be. The	3/6/2026 10:46 AM

	teachers are warm and kind, and they know the kids by names. They focus on the individual child, they provide adequate outdoor time, and the principal and VP are caring and involved. The staff is kind and involved because they have the space to be. They aren't overwhelmed. These small schools are what make Tucker GREAT. The data doesn't lie — look at the numbers of families who have left SRES since the merge was announced. Almost every SRES family I know applied for School Choice because they no longer want to be a part of this unhappy mega school that has no community. We want better for our children. Please do not close Midvale. Keep it small. I've seen both sides, and I'm here to say that the smaller, neighborhood schools are far better.	
1366	We need to KEEP Evansdale kids going to Evandale. The school's enrollment is supposed to increase to over 600 by 2030. There is LOTS of parking It has 2 playgrounds. There is lots of room for expansion	3/6/2026 10:44 AM
1367	I think Redan Elementary should be closed. It's an awful school. It doesn't follow state standards.	3/6/2026 10:43 AM
1368	We moved into our current home recently so that our daughters could both go to Evansdale. We feel like the opportunities presented by Evansdale more align with the priorities in education we want for our children. Having Evansdale consolidated into another school and program could change the opportunities available.	3/6/2026 10:43 AM
1369	We would love to keep our small school.	3/6/2026 10:42 AM
1370	I disagree with this plan. The walk ability of elementary school students is key for lifestyle and parent involvement. Too big leads to more kids left behind	3/6/2026 10:38 AM
1371	I am happy with current situation.	3/6/2026 10:38 AM
1372	No consolidation	3/6/2026 10:36 AM
1373	I don't agree with the possible closure of Evansdale. It will greatly affect our community and home values as well as new families moving into our neighborhoods.	3/6/2026 10:32 AM
1374	I am all for consolidating the elementary schools.	3/6/2026 10:30 AM
1375	We are currently in the Ashford Park school district, and we also have a child in the Kittredge magnet program. Our main priority is ensuring that there is no decrease in academic quality or opportunities for our kids both in the magnet and not in the magnet program. My biggest concern is not elementary school. If we were redistricted to Montgomery or John Lewis, along with other Ashford Park students, while we would be sad to lose our cherished neighborhood school, I know that our kid would be doing fine. What I am more concerned about is ensuring the academic quality and opportunities at a middle and high school level. Chamblee High School has built, over many many years, a school that has the academic and extracurricular opportunities that its student population needs. It would not be easy to replicate that quickly at another school. The combination of the magnet program and the students that go to the school have provided the demand for the academic rigor and opportunities that Chamblee High school has responded to and provides. I am very concerned that if we were redistricted to another high school, the academic and extra curricular opportunities would not be available. It takes time to build that up. Additionally, my children have been in the German Immersion program, which was built to go hand in hand with the German programs at Chamblee Middle and Chamblee High school. This has been built over many years and I don't think it would be good for the community, the schools, the students, to lose that continuity. Additionally, I am very concerned about what happens with the magnet program. Kittredge is the top elementary school in GA - it is a gem in Dekalb county that has been a lifesaver for us. I want to ensure its survival. But not just Kittredge - for the magnet program through high school. These kids also require rigorous academic opportunities and extra curricular opportunities that go beyond what a typical high school provides. It would not be simple or possible to just pick up the magnet program and move it to another middle or high school. It has been built into those schools for years. To summarize, our highest priority is being able to continue to access and be assigned to top caliber academic opportunities in middle and high school. We are ok if we lose Ashford Park Elementary school (although that would make us sad), but we have many concerns and worries about being redistricted out of the Chamblee cluster or the magnet program moving to a different school. If those things were to happen we would seriously consider private school. I also think many others in our situation (Ashford Park zoned and magnet kids) are facing the same decisions. If rezoned, many many many parents would consider private school, which would exacerbate the issue of low enrollment and empty seats.	3/6/2026 10:29 AM

1376	I know that it's a very big and messy problem with a lot of complicated variables. I am confident that no individual community wants to see their school closed, but I believe you've tried to balance a lot of things and come up with a reasonable path forward.	3/6/2026 10:27 AM
1377	Please don’t close Evansdale. It would make the schools in the area much too crowded. It’s an awesome school serving our children.	3/6/2026 10:14 AM
1378	Oak Grove does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake’s current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake’s enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/6/2026 10:08 AM
1379	Safe communities are built around good schools, and good schools only happen when leadership is listening to the communities needs	3/6/2026 10:07 AM
1380	I think they are fine. I think Ashford Park needs to move to John Lewis. Those families think they are too good to do so, but it makes sense to me.	3/6/2026 10:05 AM
1381	The plans don’t address teaching itself or ways to get parents back into the school system. You need more, not less.	3/6/2026 10:05 AM
1382	The proposed consolidation scenario raises concerns regarding Evansdale Elementary because the school represents far more than a typical neighborhood school. Evansdale is a high-performing school with distinctive academic programs, strong student outcomes, and deep community investment that make it an important asset to the district. Evansdale is home to one of DeKalb County’s most distinctive academic offerings: a French dual-language immersion program that attracts families from across the district through a school-choice lottery. Students spend approximately half of their instructional time learning in French, allowing them to develop meaningful language proficiency and global competency. The program has also earned international recognition through the LabelFrancÉducation designation from the French Ministry of Foreign Affairs, which recognizes schools around the world that demonstrate excellence in bilingual French education. Importantly, the immersion pathway does not end at Evansdale. Students continue their language progression at Henderson Middle School, where Evansdale parents and teachers helped establish the continuation of the program, and then into advanced French coursework at Lakeside High School. This creates a long-term academic pathway that supports sustained language proficiency and represents years of collaboration between families, educators, and the district. Disrupting Evansdale would therefore impact not just one school, but a multi-school academic pipeline. Evansdale	3/6/2026 10:05 AM

	has also demonstrated strong academic growth and achievement. The school was recently named a Georgia Title I Reward School, placing it among the top-performing Title I schools in the state for student growth. This recognition reflects the significant progress students and teachers have made and highlights the effectiveness of the school's instructional model. In addition, Evansdale offers robust STEM programming that encourages inquiry-based learning, innovation, and real-world problem solving. Students regularly participate in robotics competitions, technology fairs, and project-based science initiatives, earning recognition in district and regional competitions. The school's success is reinforced by extraordinary community engagement. The Evansdale Foundation and a highly active PTA provide substantial financial support and volunteer involvement that enhance classroom resources, enrichment opportunities, and student programs. This partnership between the district and the community contributes directly to the school's strong outcomes and represents a valuable asset for DeKalb County. Given Evansdale's strong academic performance, internationally recognized immersion program, established K–12 language pathway, and deep community investment, I encourage the district to carefully consider the broader programmatic value the school brings to DeKalb County as it evaluates consolidation scenarios. Schools that combine unique academic offerings, strong performance, and strong community partnerships should be thoughtfully considered before being included in consolidation proposals.	
1383	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/6/2026 10:03 AM
1384	Look at what facilities have the largest acreage and renovate the building,and add new construction which would be vertical have that school be the hub of a shared community	3/6/2026 10:02 AM
1385	I believe it is a huge mistake to close down smaller elementary schools to consolidate into larger new schools for many reasons. Smaller schools allow the students to thrive and feel seen by all staff at the school while they are just developing their social skills and personality. Combining schools into mega schools, allows students to get lost in the mix and feel small or insignificant. These smaller local elementary schools are also better for their community, letting parents feel confident walking their children to school and having it not be on a large main road. Letting the children and parents build a sense of community by being close by to the school provides a valuable opportunity that is lost in large 1200+ student elementary schools. The current plan also seems to single out and attack the wealthier areas of DeKalb	3/6/2026 9:59 AM

	which currently bolster the taxes and parent involvement for the schools. Overall this is a great plan to drive good families out of the DeKalb school system if that is the goal.	
1386	Alll those schools were clean and durable	3/6/2026 9:58 AM
1387	Every elementary school in my cluster is on the list to close (Evansdale/Henderson/Lakeside and Midvale/Tucker/Tucker), as well as all school of choice options. I chose to live in Tucker and want to support local schools and your proposal is taking away every option that I have for my son. I don't want to put my child in private school. I also don't want to drive my son to an elementary school that is several miles away or have him stand out in the dark early in the morning waiting for a bus. Stop taking away our options. Also, where are the DLI programs moving to? If our child is currently enrolled, will they get a spot at the school where the program is moved too? What if my child is in the DLI program thanks to schooling choice, would I have to reapply and be in a lottery again? All the years of DLI would be for nothing if it's taken away by 2030. This change is detrimental for our students.	3/6/2026 9:55 AM
1388	Save Evasdale	3/6/2026 9:53 AM
1389	Where will the students go this fall?	3/6/2026 9:52 AM
1390	My concern as a family zoned for IB schools, that if the district closes or tries to reconsolidate our schools, or moves our school out of the cluster, we would lose the continuity of our IB programme. IB is certified on a school by school basis and takes around 5 years minimum to compete, so we would likely lose our elementary IB continuity. That programme is crucial to having a successful HIGH SCHOOL IB experience. I am concerned that the closure of an elementary school between AES and the Druid Hills cluster implies that we are not going to be in this cluster any longer and move to the closest more Southern cluster that does not have an IB school. I really think this programme is instrumental to how AES, DHMS, and DHHS function, and would love to stay in that cluster for this reason.	3/6/2026 9:52 AM
1391	Obviously do not want to see Evansdale closed. There's plenty of land available there to expand	3/6/2026 9:51 AM
1392	Under enrollment at DCSD is a valid issue. The project to assess the current state is needed. However, the way it was done seemed to not been the best. The first widespread communication was a list of closures, not sure if this was meant to shock the public into paying attention. A more gradual approach would have been to share and interpret the data and then community feedback for the next step. The second issue is how does the public know that the data was gathered accurately? For example if currently there are buildings in a school campus that are not competent for occupation, and the data took into account those buildings in assessing occupancy rate, that data is flawed. Who is checking the numbers? are the local administration involved, who is accountable for the making sure the numbers really reflect true occupancy and capacity of the campuses? Finally, I think the biggest issue is trust. This year DCSD has had major controversies, including the indictement of the superintendent to the lack of transparency regarding school board members unemployment filings. These has led to a lack of trust from the public, and it needs to be addressed before school closure decisions are made	3/6/2026 9:51 AM
1393	I think it is fine to close and consolidate	3/6/2026 9:48 AM
1394	The closure of Evansdale Elementary will devastate this community and this neighborhood. I am firmly opposed to it and will lobby against anyone who supports it. I do not care at all that there is more space than necessary and that it is inefficient. Fix the corruption and mismanagement and irresponsible use of funds in the Dekalb School Board before you address this issue, and maybe you'll have the moral standing to make the argument you are trying to make. Right now you certainly do not.	3/6/2026 9:48 AM
1395	Not great.	3/6/2026 9:47 AM
1396	Evansdale, and other smaller schools have been the cornerstone of making the surrounding community as strong as it had been for 60 plus years. As a former teacher at this amazing school for 25 years, I can attest to the strength of its small but mighty population in allowing all of the school community to be a part of decisions and work for the success of Evansdale.	3/6/2026 9:47 AM
1397	This seems to happen every time a realignment comes up. Evansdale has traditionaly been a high-performing elementary school, well above the mean. The property is over 10 acres and could readily accomodate a remodeling / addition and still leave more than enough space for parking, playground, and athletic field. It sits on the corner of Evans Wood Dr and Evansdale	3/6/2026 9:47 AM

	Dr. Two road frontages makes it possible to create good traffic flow through neighborhood. Further, the school has served as the anchor that has kept our neighborhood stable and safe for decades. It was the deciding factor when we elected to buy our house here.	
1398	My child will be in the DLI French program this year starting in kindergarten. I would hate to have our local school consolidated or closed. This gives very little options for us.	3/6/2026 9:45 AM
1399	Please don't close Evansdale. It's unique as a STEM AND language immersion school	3/6/2026 9:44 AM
1400	Would hate to see Evansdale Elmentary closed.	3/6/2026 9:42 AM
1401	Closing Evansdale, the only language immersion school in the Lakeside district would be a travesty. Closing Oak Grove would also be sad. The enrollment would be better if the quality of the education was better. People leave because they feel like they have to send their kids to private school to get a decent education. I don’t think the numbers referenced are accurate and decisions are being made on faulty data.	3/6/2026 9:41 AM
1402	Dekalb needs to keep our neighborhood schools, specifically the elementary schools. They are a large part of what makes neighborhoods attractive in the first place. A sense of belonging and community.	3/6/2026 9:41 AM
1403	Close all the schools and the district	3/6/2026 9:37 AM
1404	I need the school to remain open because my daughter is going to be going to that school next year. I cannot afford to keep taking her to John Luis because it is just too far from my home as I work.	3/6/2026 9:34 AM
1405	I'm a product of Dekalb. Elementary and High School. I do appreciate the Elementary k-8th and High School 9-12th	3/6/2026 9:32 AM
1406	I don't think they should consolidate. We need smaller classes instead of more stident in one classroom.	3/6/2026 9:29 AM
1407	All facilities operate at a deficit now. Additional funding can be raised by volunteer groups. Top performing schools also create a sense of community. This is a community school.	3/6/2026 9:27 AM
1408	I understand the need to make changes due to the numbers, however, the smaller schools are why people live in this area. Briarlake, and other smaller nearby elementary schools are fantastic, and have excellent community involvement. I believe that closing schools in this area wouldn’t help, it would just push families to private schools.	3/6/2026 9:24 AM
1409	Ashford Park Elementary should not close. It is a very supported and successful school and is the heartbeat of the neighborhood.	3/6/2026 9:19 AM
1410	I think we need small schools so we should not be considering closing these schools.	3/6/2026 9:19 AM
1411	I'm going to speak as being a parent of a student who just started at Vanderlyn Elementary School in Dunwoody. I understand and support the need to address overcrowding specifically at Dunwoody High School and I also recognize that Vanderlyn’s proximity to the high school places our campus within a broader facilities planning conversation. However, Vanderlyn is a diverse, academically strong, and inclusive community. I think preserving stable elementary environments while solving high school challenges aligns with district priorities. Vanderlyn in particular it one of the stronger elementary schools in the district with high enrollment, high community/parent involvement, and is rated as one of the top in the district which is why I'm a little surprised to see it on the list. The combined Vanderlyn and Dunwoody High School campus I believe presents a rare opportunity to explore thoughtful, phased solutions that address secondary capacity while preserving elementary access. While the current proposal lists Vanderlyn for closure, it does does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decisions are made.	3/6/2026 9:18 AM
1412	I think it makes sense, however there would need to be significant changes in Chesnut administration to support a bigger school and bigger teacher staff. I don't think the current admin could handle it properly.	3/6/2026 9:16 AM
1413	I have a hard time supporting a plan to close a facility like Ashford Park Elementary, that is severely over-capacity, without a clear plan of where the students will go. Unless there are nearby schools with sufficient capacity for all students, then it is obvious that they would be split up into multiple schools. I don't necessarily have a problem with that, however I would like	3/6/2026 9:16 AM

	to know where the students will go, and how that will affect the schools they are moved to, and if the Middle and High school clusters would be affected by these changes.	
1414	Oak grove should remain an elementary school	3/6/2026 9:14 AM
1415	I'm concerned with making big consolidation decisions based on forecasts that may have varying (or unproven) degrees of accuracy or contingency for unforeseen factors like major industry or job growth driving inward migration. I also think smaller neighborhood schools are usually better run and easier to influence as parents and invested stakeholders. So I'm concerned with closing so many of the small elementary schools.	3/6/2026 9:13 AM
1416	I appreciate the district's effort to address declining enrollment and empty seats across DeKalb County Schools, but I have significant concerns about the initial consolidation scenarios and their potential impact on students, families, and school communities. For Montgomery Elementary in particular, these concerns include: • Montgomery is a high performing, high engagement school with stable enrollment, and consolidations risk disrupting a school community that is functioning well and consistently attracting families. Any scenario that shifts students into or out of Montgomery should account for the strong academic culture, PTA involvement, and neighborhood identity that families have built over many years. • The proposed consolidations could lead to larger class sizes, longer commutes, and overcrowding in receiving schools like Montgomery. Without clear details on how staffing, class size, special education services, and student supports would be maintained, it is difficult to understand how instructional quality would be protected during and after consolidation. • The community needs transparent, school level data to understand why certain buildings were targeted and how decisions were (and will be) made. Montgomery families need to see clear rationale—based on facility conditions, enrollment projections, and cost benefit analysis—before supporting any closure or consolidation that affects our school. Before moving forward with closures, the district should explore additional options such as program enhancements, magnet expansions, boundary adjustments, or phased changes that minimize disruption. Families need more time, more detailed modeling, and more clarity to provide meaningful feedback.	3/6/2026 9:13 AM
1417	I was shocked to see Oak Grove Elementary on the list because it doesn't fit any of the criteria that were set forth as categories for closure or consolidation. Given it's current and rising occupancy, the proposal doesn't suggest there's actually enough vacant seats at the neighboring schools to absorb their current students. Beyond all the data, which should be driving your decision and I'm sure you're seeing from many others, the choice to close a high-performing, thriving school with strong neighborhood support, brilliant teachers, and incredible parent support is a poor decision in managing the limited resources of the district. To close schools and create overcrowding in an area of the district that is growing both in homes, families, and new housing construction across a variety of economic strata from rental/apartment housing to new homes is short-sighted to say the least.	3/6/2026 9:13 AM
1418	I understand the need for possible consolidations and closures due to low enrollment. My concern is that we do not want to swing the pendulum in the opposite direction of overcrowding. Have you considered the possibility of increased enrollment with more housing construction and people moving to the areas.	3/6/2026 9:12 AM
1419	Evansdale has a large lot and has land bigger than other neighboring schools recommended for expansion.	3/6/2026 9:10 AM
1420	I support DeKalb finally taking fiscally responsible steps. However, the plan is too vague for informed feedback. Specifically for Dunwoody area: (1) Vanderlyn is to be closed for High School expansion, but Dunwoody High is on on the expansion list. The lack of alignment is confusing. (2) The plan to close both Vanderlyn and Kingsley, even with Chesnut expansion, assumes zero growth. When magnet and private school families return to our local schools, they'll be immediately over capacity. What is the plan then?	3/6/2026 9:10 AM
1421	Students do better with small safe schools. Gifted Students do not get a fair share of the financials.	3/6/2026 9:09 AM
1422	Provide teacher more money	3/6/2026 9:06 AM
1423	While I understand the financial need to close some schools and to consolidate to better use taxpayer dollars and better serve our students, putting so many schools on the list of closure without giving any feasible options for where those students might go once the schools are closed and how that would impact neighboring schools is a miss for the parent community's sense of confidence in Dekalb County handling student placement well. As an Ashford Park	3/6/2026 9:03 AM

	parent in particular, I understand that the building is aging and changes need to happen given our extremely over-enrolled school. However, closing the most overcrowded school in the county without giving options for how this will be remedied is unacceptable. I am hoping all current Ashford Park students will continue to remain in the Chamblee Cluster first and foremost. Additionally, if it would work to move all of the students to John Lewis and remain in the Chamblee Cluster, I am in favor of that solution. I am also in favor of gaining funding to create a new school on Ashford Park's current property so that this thriving school and community can continue to be served.	
1424	Oak Grove capacity continues to expand and will meet capacity in just a short time. It is and should remain a contribution to the well being of the community. It shound not be dissolved.	3/6/2026 9:03 AM
1425	I understand the need to consolidate and as long as children are not stuck on a bus for long periods of time commuting think the consolidation is a good idea	3/6/2026 9:02 AM
1426	Oak Grove is already at 89% utilization thus exceeding the proposed consolidation objective goal of 88%. Enrollment has increased for 4 consecutive years. It is projected to reach 96% utilization for 2026-27. Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not address the district wide utilization gap. THIS SCHOOL SHOULD BE USED AS A MODEL, NOT AS A TARGET FOR CHANGE!	3/6/2026 9:02 AM
1427	We do not want Midvale elementary closed or grouped with any other schools	3/6/2026 8:58 AM
1428	The current proposal does not appear to impact our family's cluster. Broadly, the proposal to consolidate facilities makes sense, and I appreciate that the project is keeping student experience (commutes, program access, etc.) a top priority.	3/6/2026 8:58 AM
1429	I'm concerned that a majority of the school closures are on the S.E. side of the county.	3/6/2026 8:57 AM
1430	I feel school with low enrollment should be consolidated in order to save money regardless of the community they are in.	3/6/2026 8:53 AM
1431	I don't support closing Redan Elementary This decision overlooks community growth, while increase travelling and crowding . The district should strengthen programs rather than closing schools.	3/6/2026 8:51 AM
1432	I agree that this is necessary, however, attention should be paid to the elementary schools that are traditionally high performing and not disrupt those communities.	3/6/2026 8:50 AM
1433	Closing schools with low enrollment/many empty seats may save facility money but what about teacher and student experience/ environment? How much will you invest to ensure speciality schools are not dissolved by horizon schools??	3/6/2026 8:47 AM
1434	Some consolidation seems appropriate and necessary, but the scope of the initial round feels too broad. There are myriad other ways to address the issue, including discontinuing the class size waiver and placing teachers in these schools with appropriate/smaller class sizes. We can also reevaluate the growing number of positions that are not within a school house - the Area curriculum coordinator positions, for example.	3/6/2026 8:45 AM
1435	I know only Oak Grove. Oak Grove facilities are good. Let's keep Oakgrove. It is the gem of this neighborhood.	3/6/2026 8:44 AM
1436	It is hard to give feedback when you only showed what would happen to the affected High School and Middle schools, but not the elementary schools. You suggested closing elementary schools but did not say which school(s) those students would potentially go. One school, Ashford Park, that was suggested as a closure will have parents in an uproar. Closing that school will affect property values and some families spent over a million dollars to live there for their children to attend Ashford Park. Not telling where those students would relocate doesn't allow proper review and feedback.	3/6/2026 8:39 AM
1437	OGE has 23% of students with disabilities. We are at 89% (due to pandemic) utilization and projected at 96% next year. Prior to COVID, we had trailers and have the ability to expand permanently on our lot. OGE is the community and may may families come to our area for the schools. We now have the new CHOA down the street and a lot of growth! We should be the model for other schools and not on the chopping block. Our history is deep, parent support is strong, and community even stronger!	3/6/2026 8:38 AM
1438	My concern is the effect it will have on the students in the area. 2. How will this change impact	3/6/2026 8:37 AM

	our property value?	
1439	I think the data for remodeling Druid Hills does not align.	3/6/2026 8:35 AM
1440	I think it’s ridiculous and a waste of taxpayer money. You’ll spend just as much if not more closing and remodeling as well as shifting and revamping all rebuilding to be modern and up to code. Your initial estimates are never accurate (ex Druid Hills High) Why not just consolidate middle and high school and let elementary schools be? Develop community and strong skills for once vs disrupting lives.	3/6/2026 8:33 AM
1441	Please don't close Ashford Park: please provide an addition, if necessary. Why would you close the county's most popular elementary school? Do you want to drive more kids to private education, especially with the way you are preferencing Dunwoody schools and removing opportunities for those in Brookhaven?	3/6/2026 8:32 AM
1442	If it increases the classroom sizes not so sure its a great idea.	3/6/2026 8:31 AM
1443	Overall I think the school is great, has history within its walls. However, I feel instead of closing the school try doing to renovations. The school could most definitely use an upgrade!	3/6/2026 8:31 AM
1444	I see the need	3/6/2026 8:30 AM
1445	I purchased my home based on the school that my child will attend. It saddens me deeply to think that the school we looked so forward to going to may not be possible to attend. I pray that Midvale Elementary does not close.	3/6/2026 8:28 AM
1446	With declining attendance, consolidation makes sense. However, given the significant overcrowding in North DeKalb schools, it would be more practical to direct Dunwoody High School’s overflow to Vanderlyn Elementary rather than closing the school. Vanderlyn could serve grades 8–9, while Dunwoody High School could focus on grades 10–12, allowing capacity to be better balanced across the cluster.	3/6/2026 8:27 AM
1447	I live right by McNair DLA. Most of the parents I know in this neighborhood have kids that arent yet school age. Quite a few of us have just started families within the last few years and I know other young couples who are considering it. I'm worried if upcoming students are being counted in which schools to close in addition to current enrollment.	3/6/2026 8:24 AM
1448	It would be so detrimental to students, classroom, ratios, teachers, neighborhoods, and community dynamics to consolidate schools.	3/6/2026 8:20 AM
1449	Oak Grove does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake’s current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake’s enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-	3/6/2026 8:16 AM

	performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
1450	Considero que es correcto hacer consolidaciones para aprovechar todos los espacios.	3/6/2026 8:16 AM
1451	I understand and support the need to address overcrowding at Dunwoody High School. I recognize that Vanderlyn's proximity to the high school places our campus within a broader facilities planning conversation. I also recognize that the district has framed SAP around enrollment trends and utilization. Any proposal should clearly demonstrate how those metrics are being applied at the cluster level. The combined Vanderlyn and Dunwoody High School campus presents an opportunity to explore thoughtful, phased solutions that address secondary capacity while preserving elementary access. The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made. Vanderlyn is a diverse, academically strong, and inclusive community. Preserving stable elementary environments while solving high school challenges aligns with district priorities. I would welcome collaboration between district leaders and both school communities to explore campus-level solutions that address high school capacity while preserving the Vanderlyn community.	3/6/2026 8:13 AM
1452	Too many children in one space	3/6/2026 8:12 AM
1453	I understand the need to use all funds responsibly, but I don't have enough information yet to make an informed decision.	3/6/2026 8:09 AM
1454	I am a parent and also an educator in GCPS. I have worked in a variety of buildings in my 11 year career at the elementary level. A concern I have is elementary buildings being so large that they lose the community closeness of all the adults and students knowing each other. While in high school, the students are independent enough to be fine without such a close tight knit community. With early scholars that are 4-6 years old it is absolutely vital that schools are small and not too overwhelming. This is when these small children are learning to navigate their educational careers for the first time and it is imperative that the environment stay warm and close knit.	3/6/2026 8:02 AM
1455	Why are the schools on the southside being consolidated when it is one of the fastest-growing areas?	3/6/2026 8:02 AM
1456	There is no need to close Oak Grove Elementary School which is at 89% capacity. The small size of both Sagamore Hills and Oak Grove Elementary Schools make the schools appeal to local residents. Combining them with others into one big elementary school is not what residents want. In fact, that will lead more families to send their children to private schools/schools outside the DCSD system. If you want children to continue to attend their local neighborhood schools, help the schools be responsive to the needs of the community. The planned effort will drive more students away, making the problem of attendance even worse.	3/6/2026 8:01 AM
1457	Mistake should not close. It is a really good neighborhood school. I liked all the teachers and that's is a small school. It was not overwhelming like the bigger school.	3/6/2026 7:58 AM
1458	Do not take budget from Dunwoody or Austin	3/6/2026 7:58 AM
1459	Arabia mountains high school is one of the best high school to attend.. d.A.T.E is one of the best technology schools to attend..good education.	3/6/2026 7:58 AM
1460	Consolidating schools may disrupt families lives due to the adjustment. Everyone doesn't have access to reliable transportation, for those that may have to travel further once the changes are made, extending the time to arrive to and from school. Additionally programs and service may need to be offered to allow parent to get their children safely to and from school.	3/6/2026 7:58 AM
1461	I believe Ashford park should be moved to John Lewis if closure of the building occurs and remain in the Chamblee charter cluster.	3/6/2026 7:56 AM
1462	Please also look at school performance, offerings, and school choice desirability when considering which school facilities to shutter.	3/6/2026 7:54 AM
1463	We recently moved into the area so our children could attend Oak Grove Elementary, and they are truly thriving. The school has been an incredibly positive experience for our family, and our	3/6/2026 7:52 AM

	decision to move here was strongly influenced by the school's high performance and the strong educational foundation it provides. I do want to share my personal perspective that it is difficult to understand how a school with such strong academic outcomes would be considered for closure rather than continued investment. Oak Grove is clearly a place where students are succeeding. Additionally, we transferred from a neighboring school, and the level of parent involvement at Oak Grove is unlike anything I have seen before. The community is deeply engaged and committed to supporting the school and its students. I sincerely hope that, as these decisions are considered, the district takes into account not only capacity and financial factors, but also the academic success, community strength, and positive impact Oak Grove has on its students and families.	
1464	Good	3/6/2026 7:44 AM
1465	No it's not fair to students or teachers	3/6/2026 7:42 AM
1466	I am highly opposed to consolidating schools and closing OGE. Oak Grove Elementary is an exceptional school with healthy enrollment and notably positive impact socially and academically on students.	3/6/2026 7:41 AM
1467	The scenario makes sense.	3/6/2026 7:39 AM
1468	Closing an overcrowded school in the north of the county seems contradictory to the overall goal. There does not appear to be a plan of what to do with the Ashford Park students. The expansion is noted for elementary schools north of there, and Montgomery is already overcrowded. Huntley Hills and Montgomery are far from the AP residents and moving the students that far from home will erode the community.	3/6/2026 7:38 AM
1469	I am concerned about the potential closing of Midvale Elementary School due to it being the only Elementary IB Program in the Tucker Cluster and would reduce the IB options in the district. IB authorization is site specific and can't simply be moved. Midvale also performed better than all of the Tucker cluster elementary schools on the CCRPI. You'll see more families walking their kids to school at Midvale than in other areas. The community support for Midvale will be hard to replicate elsewhere.	3/6/2026 7:29 AM
1470	I believe the district will do what is best for students and that it is great that it is being transparent in this process.	3/6/2026 7:28 AM
1471	As a staff member, I wanted to know which schools were going to be combined. As a parent, I am concerned about my son graduating from high school. He is now a freshman.	3/6/2026 7:24 AM
1472	I understand the need to reassess attendance but population changes (growth and movement across the Dekalb area) are not something we can accurately predict.	3/6/2026 7:20 AM
1473	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary	3/6/2026 7:16 AM

	increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
1474	I understand that there is low school utilization in some parts of the county and that there are schools in great need for repairs and updates, but I do not think that we should be discounting the power of historic neighborhood schools. Many people take the community's school when choosing where to live and we do them a disservice by closing their school and assigning their child to further away school. In terms of choosing diverse programs, small schools, and low operating costs, I would prioritize programs and school sizes and reexamine many of the district's expenses and lower operating costs elsewhere.	3/6/2026 7:05 AM
1475	I just do not want to see an unfortunate teacher / student ratio in any schools if there is too much consolidation. Tucker high was built for under 1400 students and in the 16 years it has been open, the numbers haven't even been close to that!	3/6/2026 7:04 AM
1476	Please do not close Midvale elementary school. It will negatively impact both the community and our students.	3/6/2026 7:01 AM
1477	While I understand the need to address under-enrollment across the district, my concern is that some schools are already operating at or near capacity. My classroom reached 31 students this year in a building that is already small. Consolidation plans should ensure that students are redistributed in a way that balances enrollment and does not further increase class sizes at already crowded schools.	3/6/2026 6:56 AM
1478	I think that if resources are being spread too thin then combining schools does makes senses. Yet, most of the elementary schools that are closing holds history to Dekalb county communities. Like Toney elementary , my siblings and myself all went to Toney and I would want my children to do the same. I went on college (HBCUs) tours by being a student at Toney. I don’t want to see the school close at all but if it’s means better opportunities for the children in the future then it’s what’s best as a whole	3/6/2026 6:56 AM
1479	Concerned about the lack of a traffic survey when backing this decision. Schools located on or near busy roads are staying open, while schools that are in safer locations are being closed. That doesn’t make sense	3/6/2026 6:52 AM
1480	I do not know if what you all are promising is what you will do as far as it is beneficial to the communities	3/6/2026 6:51 AM
1481	I understand that costs need to be cut. Running schools is expensive and with certain schools not filled to capacity put strains on the budget because the price doesn't change because students aren't attending. It makes since to have those discussion. Money used to fund a school with low enrollment and attendance can be used on a school where more students can benefit.	3/6/2026 6:46 AM
1482	There may be a need to close some schools but it seems like most of the schools that are on the list are on one end of the county. I currently work at one of the schools on the list and while our numbers have dropped some, we still have a great amount of students and packed classrooms. If schools are put together, will the classroom sizes grow, will there be more than one teacher in each classroom.	3/6/2026 6:45 AM
1483	The Cedar Grove Cluster closings are concerning. I was a student at CGHS when they rezoned and brought several McNair HS students to CG. It was a war zone. These are rival communities. They may be close in proximity but the communities are different. Additionally, the Ellenwood community takes a huge hit to property taxes losing 2 schools to closings. CGHS has brought significant recognition to DCSD with numerous State Championships in football in recent years. The school has been a staple. Lastly, It appears that the decision to close CGHS vs McNair HS (which is in an area that is being gentrified) is biased. McNair’s location will soon benefit white populations. Close McNair HS, keep Cedar Grove HS. The Cedar Grove community is being asked to close essentially all 3 of its schools. That is not the way to build community, and support for our district.	3/6/2026 6:43 AM
1484	“I support targeted school consolidations where data show low utilization and high facility	3/6/2026 6:41 AM

	costs, provided the District implements protections for students and staff. Please commit to (1) equitable transportation with reasonable ride times, (2) maintaining or lowering student–teacher and student–counselor ratios, (3) preserving existing programs during transitions, and (4) transparent, campus-level data to guide decisions. Savings from consolidations should be reinvested in instruction, counseling, and student supports at receiving schools.”	
1485	I think the district is too large to come up with one scenario that fits all of Dekalb needs. We moved to Oak Grove area where our son attended for the smaller school and community. Families will not be wanting to move to this area if schools are closed and start to become overcrowded further impacting tax revenue.	3/6/2026 6:36 AM
1486	The whole premise of more students in one school means enhanced programming is somewhat true but completely misses on a widely known fact that smaller class sizes is better for students. This also does not address the fact that higher performing schools are being consolidated into lower performing schools, so the trade off of being in a smaller class of higher performing kids into bigger classes + some additional enhance programs (maybe 1 hour out of the day) makes no sense. Also saying enrollment is down across the county while not looking at where it is down vs up is mathematical irresponsible. Ashford Park is expanding and big performing. It would make no sense to close it.	3/6/2026 6:28 AM
1487	Please consider consolidating more of the elementary schools that are in close proximity (such as Toney, McNair, and Kelley Lake) and just relocating one of those buildings that's built for elementary aged students.	3/6/2026 6:19 AM
1488	appreciate the opportunity to provide feedback, the school has demonstrated strong outcomes, including recognition as a National Title I Distinguished School, indicating that it effectively serves students who may face socioeconomic challenges. Closing a successful school risks disrupting academic progress, staff relationships, and student support systems that contribute to these results.	3/6/2026 6:12 AM
1489	Based on the initial scenario there will be a major disruption to the communities in the Southern part of our district. We need to carefully examine the negative impact this scenario will have and plan ways to mitigate. Be thoughtful about the holes it will leave and how we can fill those holes with things that will protect the value of the communities and provide services the communities need.	3/6/2026 6:01 AM
1490	With closure of Brocket and Midvale ES, very concerned Livsey ES won't be able to physically absorb the additional student count. The Livsey campus is already loaded with trailer classrooms.	3/6/2026 5:41 AM
1491	I believe that grade level should be cluster appropriate to age levels. Having younger children mixed in with older children can interfere with a child emotional and social State.	3/6/2026 5:40 AM
1492	They are doing great	3/6/2026 5:32 AM
1493	I don't mind my kids going to school with Cedar Grove kids, but I'm worried about class sizes getting big again.	3/6/2026 4:52 AM
1494	I have concerns about the number of Tucker schools proposed for possible closure. Many Tucker families have sought homes zoned for their neighborhood elementary school. My family purchased a home in the Livsey district to send our children to a small community school, not a large mega school where I am concerned my children would get lost, particularly during the years of such a massive transition. I have concerns about traffic in and around the Livsey neighborhood, as well as the space on school grounds for parking, which is already a challenge for Livsey families during school events.	3/6/2026 3:19 AM
1495	Consolidate and update	3/6/2026 3:16 AM
1496	Schools on the south end should be preserved	3/6/2026 2:32 AM
1497	Oak Grove does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: Sagamore Hills: 413 / 456 (91% utilization) Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats.	3/6/2026 1:06 AM

	Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: · +50 students → ~83% utilization · +100 students → ~90% utilization Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: $1.5B Arthur M. Blank Hospital campus ~4,500 employees (including ~1,000 new jobs) $87.7M Emory Heart & Vascular expansion Ongoing Emory hospital expansion $1.1B in FY24 research awards $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
1498	I think that the scenarios are a terrible idea. They are purportedly fixing a problem of underutilization, but Oak Grove Elementary (OGE) is not underutilized — it is estimated that next year's enrollment will be 96% and there is a long waiting list for Kindergarten. Furthermore, the area around OGE is experiencing significant growth with research, healthcare, and is expected to bring more younger families to the area. Oak Grove is a desirable school. Many families, including ours, moved to the area because of OGE.	3/6/2026 12:21 AM
1499	Don't close ashford park	3/6/2026 12:11 AM
1500	I think that as long as it is not impacting the kids and a negative way and has positive results and give better grades and learning for our kids it is a good idea	3/6/2026 12:10 AM
1501	Within the last 2 years, every house sold in our neighborhood has been bought by a young family. We've gone from 2 children to 10 in the 14 houses in our cul-de-sac and 4 or 5 of the remaining houses are likely to sell within the next 2 years. Loss of a neighborhood school will negatively impact property values and discourage additional young families.	3/6/2026 12:05 AM
1502	I'm okay if ALL schools have high performing teachers and great facilities,	3/6/2026 12:02 AM
1503	Oak Grove is a wonderful school and I appreciate the small size. It helps my child feel safe and secure and known. We walk her to school every day and cherish that experience. Her teaching team is incredible and she is thriving there. Closure would affect her education, her well being, our peace of mind, and our property value.	3/5/2026 11:50 PM
1504	I hope that there will be a balance between cost effectiveness and community. Small schools offer a lot of value.	3/5/2026 11:40 PM
1505	I understand the need to fill seats and increase transportation to lessen commute. I do enjoy the rich diversity and the class size my child currently has though the school could use some updates. Given that, I would love for her to stay where she is with updates to the school. I would be in favor of raising class size moderately to increase improvements to schools by closing others that are under capacity.	3/5/2026 11:32 PM
1506	I don't have a lot of feedback at this point as neither DSA or DAA are addressed in the initial scenarios. I can say that we chose to purchase our home based on wanting our students to attend these 2 schools.	3/5/2026 11:24 PM
1507	Ashford Elementary has been a success story with an active neighborhood involvement - splitting it up or moving to a different high school cluster could destabilize the neighborhood and cause parents to want to move or go private	3/5/2026 11:20 PM
1508	Disappointing to shutter schools but if it consolidates resources and opportunities for the new structure that's good. The benefits of the new consolidation will need to be greater than the current situation. We can't just shutter schools and not provide a carrot to incentivize buy-in	3/5/2026 11:14 PM

	from the community. We have lost way too many families during and post-COVID as many in our community have an easy option to go private and leave DCSD	
1509	My concern with consolidation is the impact it could have on the Cedar Grove community. Our schools are more than buildings—they are anchors for students, families, and community engagement. Closing schools or moving students further away could increase transportation time and make it harder for students to participate in extracurricular activities and stay connected to their school community. If the goal is to better use resources and increase opportunities, the district should consider building strong programs within existing schools instead of busing students out to other programs. Some students already leave the cluster to participate in programs like Champion. Those resources could be used to strengthen programs within Cedar Grove schools, which could help attract and retain students while keeping them in their community. Before consolidating schools, the district should explore solutions that strengthen programs and maximize the use of the buildings we already have.	3/5/2026 11:13 PM
1510	As DCSD evaluates consolidation scenarios, I encourage the district to look beyond building capacity and enrollment projections and also consider the operational realities of very large elementary schools. Our family has been part of the Druid Hills cluster for many years, with children having attended elementary, middle, and high schools within the cluster. This perspective has allowed me to see how enrollment trends and facility decisions impact students over time. Our zoned elementary school, Fernbank Elementary, currently serves roughly 915 students in a building with a reported capacity of approximately 950. Even at this level, the strain on shared spaces and daily operations is noticeable. For example, with only one cafeteria, lunch periods must start early and run late to accommodate all students. Shared instructional spaces such as the library and computer lab are frequently unavailable because they must also be used for testing when the building is otherwise full. Arrival and dismissal bring more than 1,000 individuals to campus within a short window each day, creating traffic congestion and safety concerns that staff and volunteers work hard to manage. While consolidation can appear efficient in terms of facility utilization, larger schools can create downstream operational challenges related to supervision, scheduling, traffic safety, and equitable access to shared learning spaces. Future scenarios should evaluate both building capacity and functional capacity, including the ability of shared instructional resources such as cafeterias, libraries, playgrounds, and technology spaces to serve the projected student population.	3/5/2026 11:12 PM
1511	I believe that consolidation has become necessary for the longevity of the district. Currently, schools are understaffed, resources are minimal, and underserved children are not receiving the support they need to keep up with their peers in the classroom.	3/5/2026 10:53 PM
1512	If consolidation is to occur, the process must be done right and there must be clear communication ad full data transparency. So far, DCSD has already failed on the rollout of this proposal. There are glaring signs that the data being used for this discussion are flawed. Your contractor HPM states this is a first-of-it's-kind project for the CONSTRUCTION firm. Do they have the experience and knowledge to carry out the demographic research presented and used? Frankly, no. Using our beloved OGE as an example, this year's enrollment is 447 or 89% utilization, passing your 88% utilization minimum. Our 2026 enrollment is 487 or 96% utilization, not 415 or 82% as projected on their dashboard. Our utilization is higher than the two elementary schools in our area proposed to expand and stay open. We also have a 100 student waitlist for our school, higher than both briarlake with 71 and sagamore with none. Why is our school being closed instead of being used as a data point to understand successful schools that are sought out by home buyers and parents using school choice? Our building adequacy score is also higher than the two schools remaining open. Even with most recent improvements since initial assessments, looking at the raw data informing scores, the improvements made would not result in surpassing OGE. The OGE district is also seeing influxes of families due to the recent $2.5B institutional investments in the Druid Hills / Clifton corridor, including the new CHOA Arthur blank hospital. Our area and school is not experiencing structural decline. It is experiencing concentrated growth. My last data concern is this, where are the data for cost-savings with implementing the SAP vs improving existing schools? Currently, Dresden is undergoing a 76M expansion to consolidate 2 ES, ballooning from the initial 42M budget presented for ESPLOST voting. Is this what we can expect for the SAP implementation? Shouldn't we delay this process and use Dresden as a use-case to learn about consolidation impacts? I believe we need to slow this process down and work in phases, starting with the least enrolled schools. Get us data, be transparent about it, and let us feel like we can trust DCSD once again.	3/5/2026 10:43 PM
1513	leave Brocket Elementary as it is nowhere close	3/5/2026 10:35 PM

1514	Evansdale Elementary school is an important neighborhoodschool that provides stability and support for students and families . Closing this school would disnupt the community and create unnecesary transations for young children. I encoutage the distric to explore other solutions. Before consedering closing evansdale Elementary.	3/5/2026 10:34 PM
1515	doesn't make sense to close one of the schools in the most populated area and also schools that are high performing such as Ashford Park.	3/5/2026 10:33 PM
1516	Understand the need to evaluate, but not certain as to why the school enrollment is declining when population growth in the Atlanta area is growing.	3/5/2026 10:32 PM
1517	Very concerned about proposed closure of Oak Grove Elementary, a previously named Blue Ribbon School and neighborhood school of excellence. From recent data, OGE is currently at 89% capacity and projected to reach 96% next year, so already at/above 88% target enrollment. The neighborhood population is expanding due to the addition of AMB Hospital and large residential complexes being developed in the area, so OGE would likely reach or exceed full capacity within 2-3 years. The 2 other neighboring elementary schools (Briarlake and Sagamore Hills) would not be able to absorb all of the OGE students, leading to severe overcrowding issues. Beyond this, OGE is one of the highest-performing elementary schools in the county.	3/5/2026 10:31 PM
1518	La escuela se encuentra en buen estado	3/5/2026 10:30 PM
1519	Strong, stable elementary environments are important for students and communities, and I would like to better understand how this proposal supports long-term cluster planning. I support solutions for high school overcrowding, but it would be helpful to see complete modeling on reassignment, receiving school enrollment and capacity, transportation, and feeder impacts before decisions are finalized.	3/5/2026 10:30 PM
1520	Our school is already over capacity with kids having to learn in trailers. I want to understand better how this plan will get our children out of trailers and into a proper school building.	3/5/2026 10:28 PM
1521	The logic is consolidations is very hard to understand - hard to distinguish the algorithms used for choosing schools to close. It seems to create more issues than solve. For instance, Ashford Park Elementary is essential to the community and closing it is a crucial mistake.	3/5/2026 10:27 PM
1522	I do not at all agree with the consolidation of schools.	3/5/2026 10:26 PM
1523	Based on the background information provided, I understand and agree with the facilities scenario.	3/5/2026 10:26 PM
1524	Closing Ashford Park Elementary School would be a mistake. Many families move into the area specifically to send their children to APES. It is a high-performing school that feeds many children into Kittredge Magnet School. It also currently has a German Immersion program, which is attractive to parents wanting the opportunity for their children to acquire a second language in the early years. While it is claimed that the school can't be expanded, it seems like this is not the case, as another local school was renovated on a much smaller lot. Another possibility to explore might be a vertical expansion.	3/5/2026 10:21 PM
1525	Consolidation may make sense for underutilized facilities provide students remain in or near their home district. It does not make sense to close top performing schools with a history of success of those that are at capacity (especially if performing at or above county averages)	3/5/2026 10:15 PM
1526	Parents bought houses with the assumptions of certain schools being in district. You are messing with property values and therefore with likely the most valuable asset they own.	3/5/2026 10:14 PM
1527	Opposed to changing status for Oak Grove Elementary	3/5/2026 10:13 PM
1528	Projected enrollment indicates an increase in students. New housing is being built now These closures do not seem to reflect the reality of an increasing population	3/5/2026 10:11 PM
1529	I'm OK with the consolidations as long as the funding is used appropriately across the schools, especially those that are more in need	3/5/2026 10:10 PM
1530	It's an excellent school, with very good teachers, and our children are happy there.	3/5/2026 10:07 PM
1531	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–	3/5/2026 10:02 PM

	27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
1532	It lacks clarity or rationale which makes it hard to understand why schools were chosen for closure or regrouping or expansion.	3/5/2026 10:01 PM
1533	Do not consolidate	3/5/2026 10:00 PM
1534	It is a bit confusing because saying that the school has low enrollment but classes are sitting at 22+ students. For Stoneview alone it services about 12 apartment complexes alone so there's always going to be a high transient rate. Students will forever transition in and out hence to why enrollment fluctuates. The school is 60 years old and could stand to have some improvements that was promised over 5 years ago. Closing this school wouldn't help the community and creating a school where the students would be consolidated wouldn't help either being that for the last 3 or 4 years we have not had enough buses to transport the students causing 2nd loads so this would be another issue that is creates.	3/5/2026 9:56 PM
1535	How will this affect the special education programs and their locations?	3/5/2026 9:54 PM
1536	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory	3/5/2026 9:54 PM

	employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
1537	Lakeside has always had a reputation of being an excellent academic school, but I feel it is overcrowded. I would like to see it have less students.	3/5/2026 9:52 PM
1538	I appreciate the thoughtfulness of this process. While the county must allocate its resources the best way it can, it is important to remember that our children's education must be priority #1. Any potential sacrifice of children's wellbeing --which includes the need for young elementary school children to thrive in smaller environments where they are known well -- needs to be considered very carefully with a strong inclination to not make changes to elementary schools unless it is absolutely necessary.	3/5/2026 9:49 PM
1539	It seems that 4 of the elementary schools on the closure list are close to our neighborhood (Evansdale, Midvale, Henderson Mill, and Brocket) - leaving only one smaller school building (Livsey) near us. I am wondering how far our neighborhood kids will have to travel to get to school.	3/5/2026 9:48 PM
1540	There is no rationale for closing Oak Grove Elementary: 1. Oak Grove Elementary is NOT Underutilized: OGE ~428/504 (~85%). 2026 projections show OGE potentially near 96% utilization. Conclusion: Utilization does not justify closure. 2. Enrollment Trends Show Growth in Younger Grades Kindergarten projections are increasing. Conclusion: Projections suggesting decline appear inconsistent with observed grade-level growth patterns. 3. Demand Exists (Waiting Lists) Kindergarten waitlist ~103 K, 228 total Strong school choice inflow (~80+ students). Conclusion: OGE is not a school families are abandoning — it is one families seek. 4. Financial Logic Is Questionable Closing OGE requires expansion elsewhere. Expansion requires ESPLOST. Renovation costs likely millions (estimated at Repurposing still requires capital investment.) Property value drops could reduce district tax base. Conclusion: The financial rationale is weak or unclear. 5. 600-Seat Minimum Is Driving Policy Multiple references to a 600-seat target. OGE max capacity 504. Conclusion: The “micro school” elimination goal appears structural, not data-driven. 6. Boundary Planning Lacks Transparency Boundaries not released alongside closure proposals. Community asked for feedback without complete information. Conclusion: Stakeholder engagement feels incomplete and reactive.	3/5/2026 9:48 PM
1541	Consolidations are necessary.	3/5/2026 9:45 PM
1542	please do not close Ashford Park Elementary School	3/5/2026 9:44 PM
1543	Regarding consolidations in the Dunwoody Cluster: While I understand the efficiency of modernizing facilities, any consolidation must prioritize traffic mitigation and maintaining a 'small-school' feel within a larger building (such as the 'school-within-a-school' model). Specifically for schools like Vanderlyn, the walkability and neighborhood connection are vital. If consolidation is proposed to solve overcrowding, the district must ensure the new facility doesn't just provide 'seats,' but also maintains the high level of specialized support and safety that our smaller elementary environments currently offer. Furthermore, consolidation should not happen without a simultaneous plan to address the capacity bottleneck at Peachtree Middle School	3/5/2026 9:44 PM
1544	It’s upsetting for Ashford park Elementary school to be part of the list for potential closure/consolidation. It will negatively affect our students and community. Ashford Park ES is a high performing school and should remain open.	3/5/2026 9:35 PM
1545	Highly concerned with the list reflecting Midvale, Evansdale and Henderson Mill but keeping Livsey. Livsey has the smallest footprint and is currently overcrowded. Where do the students go in these neighborhoods? This feels like poor judgment	3/5/2026 9:34 PM
1546	The information about the facilities scenario on your website is vague. There is no evidence	3/5/2026 9:34 PM

	cited to back up any of the claims of benefits. It is also not clear what "robust" program offerings mean. There is more to a positive and beneficial education that program offerings - smaller schools allow for more individualized attention, are easier to manage and for parents to be involved with, and provide a more positive community feel. Students in smaller schools are also less likely be be bullied. All of that is backed by evidence. I understand tradeoffs need to be made to manage finances, but there has to be another option than consolidating schools. My husband and I moved to this neighbohood because we wanted our future child to attend Midvale - we had heard great things about it from parents who had their children there. If that school closes, we may consider moving to another country so our child can have the ability to walk to school and get to know the staff, teachers, and other students well versus being stuck in traffic and potentially struggling to find his way in a mega elementary school. We pay high property taxes and would like to keep our elementary school. See evidence here: https://pmc.ncbi.nlm.nih.gov/articles/PMC5126019/ https://www.brookings.edu/articles/why-local-leaders-should-champion-community-schools-to-improve-student-family-and-neighborhood-well-being/ https://learningpolicyinstitute.org/product/community-schools-outcomes-factsheet	
1547	The overarching questions that I have is regarding the assumption of continual drops in enrollment. What information was used to make this projection. And is this due to residence patterns across DeKalb County and if so, where are these patterns concentrated? A better understanding of that will help me share feedback on future scenarios.	3/5/2026 9:33 PM
1548	I worry about closures nearby will cause my school to overcrowd or be redistricted. Then it's just impacting every school.	3/5/2026 9:30 PM
1549	I'm not a fan of closing any schools, but closing a neighborhood elementary school like Evansdale is a huge mistake. It overloading other schools around the neighborhood and the single lane roads within our neighborhood, which will be used as a cut through. Also, devalues the neighborhood if the school closes to become a vacant lot within it.	3/5/2026 9:29 PM
1550	I am concerned about schools become larger - I know it is more cost effective, but it wouldn't be what I feel is best for my child.	3/5/2026 9:28 PM
1551	If fewer schools will translate to more resources for each of the schools than i am in favor - however since Austin is untouched in this scenario, it doesn't seem like it will impact us (which we are okay with).	3/5/2026 9:26 PM
1552	I think we need to focus on reducing class sizes instead of reducing the number of school buildings. Children will receive a better education if they are in smaller classes and have more attention from their teachers. I think no schools in areas that are overcrowded should be considered for closure. I think we should look at adding on to schools, like Montgomery Elementary, to increase capacity and reduce class sizes. Maybe a new building could be added along the side of Montgomery where the trailers are currently sitting. This could house 4th and 5th grade and the art and music classes. Dekalb county has a waiver from the state and does not follow the state guidelines for class sizes. How much “under-capacity” would the school system be if classroom seats were calculated by the state guidelines instead of the overages used now?	3/5/2026 9:24 PM
1553	The scenarios and information presented is very complicated and should have been presented in a much more user friendly style. This is great for individuals who are fully aware of the process but way too much information presented to be easily absorbed. Tends to make one think this was intentional so that parents would not be able to provide meaningful input. How was future housing included in the scenarios i.e., are the homes being built on Rock Chapel Rd. (124) zoned for Rock Chapel Elementary. Why is Rock Chapel Elementary slated to move to Lithonia MS (which will convert to Elementary school) instead of Princeton Elementary which is closer and a newer school . This is especially true for those who live at the top of the cluster. Can the clusters be redrawn?	3/5/2026 9:24 PM
1554	I do not support closing or consolidating our schools. Our schools are an important part of the community and provide stability for our children. Closing them would disrupt students’ learning, force longer travel times, and take away resources from families who depend on their neighborhood schools. Instead of closing schools, the focus should be on investing in and improving them so all students have a safe and supportive place to learn.	3/5/2026 9:21 PM
1555	This makes for very large facilities and many students, and it is very concerning that this will impact the quality of their learning and education, class sizes, and overall educational experience.	3/5/2026 9:17 PM

1556	It would be helpful to clarify how schools will expand when there is limited land available. Will they build up?	3/5/2026 9:16 PM
1557	I understand the need to consolidate for fiscal responsibility and resource management issues projected due to decreasing enrollment. This process for allowing public feedback when such sweeping change, even over 6-8 years effects so many students, families & staff.	3/5/2026 9:15 PM
1558	makes sense	3/5/2026 9:14 PM
1559	Next to repeatedly taking money away from students due to the payouts, recruiting firms and attorneys fees associated with poor superintendent hiring decisions, this is the worst decision I have seen the school board make since I moved into Dekalb County almost 25 years ago.	3/5/2026 9:13 PM
1560	It is upsetting to imagine that Midvale Elementary could potentially be closed or consolidated with other schools. A large part of why we moved to this specific area of Tucker is due to the positive feedback from parents about Midvale Elementary. I understand that there is a desire to compile schools to have full classrooms. Yet instead of thinking of the financial benefit for the school district, I would want to see research from other school districts that explained how those changes impacted the students themselves, the traffic patterns, the housing prices, etc. Midvale has great programs for our students, every child is known by most of the adults in the entire school, parents are able to participate and volunteer often, parents are able to walk to drop-off and pick up their children from school - these are the benefits we cherish and why we moved to this area. I fear that making these drastic changes could result in even lower enrollment due to families leaving the district for other forms of education.	3/5/2026 9:12 PM
1561	If there needs to be consolidation, start with a smaller number first. They also need to impact all areas within DeKalb instead of so many schools closing in a small radius.	3/5/2026 9:10 PM
1562	My feedback as a teacher is to select facilities that have big enough classrooms that foster different set ups for the teachers and students to work in a collaborative fashion and in different centers.	3/5/2026 9:09 PM
1563	While I understand the fiscal rationale behind consolidation, I have genuine equity concerns about this initial scenario. The majority of schools identified for closure are located in predominantly Black and Brown communities. Before moving forward, the district must honestly grapple with what this means for those students and families. Closing neighborhood schools in these areas creates additional barriers that go beyond reassigning students to new buildings. How will students get to and from schools that are farther away? What happens to students who want to stay for tutoring or after-school activities but have working parents who cannot provide transportation? Travel time and safety are real concerns that must be addressed with concrete solutions before any closures are finalized. It is also worth asking: what is the current condition of the receiving schools? Many buildings across the district are already overcrowded and in a state of physical decline. If students are being moved into facilities that are not adequately maintained or resourced, we have not solved the problem; we have simply relocated it. The district should commit to a clear plan for facility improvements before families are asked to accept these changes.	3/5/2026 9:09 PM
1564	My family moved to Brookhaven Heights more than 10 years ago largely because of Ashford Park Elementary. It's the only highly rated public elementary school in our immediate area and truly the heart of our community. Like many families here, private school isn't financially realistic for us, and one of our children has an IEP. The support and stability he receives at Ashford Park are critical to his success. If capacity is an issue, we ask the district to find a solution that serves the families in this community without breaking apart something that is clearly working. Ashford Park is special, and it deserves to be protected.	3/5/2026 9:08 PM
1565	Please explain why and how 84% occupancy of Dekalb schools translates to closure of over half the elementary schools? Math ain't quite mathing. Also, why are we doing modern redlining? You're closing mostly majority minority schools. Care to explain why this is anything other than the obvious racism (also don't at me I'm a white mom ok)	3/5/2026 9:06 PM
1566	Montgomery ES is a welcoming and great school. The school building looks in really good condition and the school it self is fantastic for families and children.	3/5/2026 9:04 PM
1567	It's a joke. Why would you get rid of your highest performing and most involved schools? Bigger schools do not equal better schools. We specifically moved to Oak Grove for the school. My parents went there, it's a fantastic school where I want my kids to grow up. If the school is closed, my kids will be going to a private school, as will a lot of these students in the proposed schools. You will have even more empty seats. My parents, myself, and my kids	3/5/2026 9:01 PM

	were/are DeKalb county schools students. I continue to be embarrassed by the dysfunction, corruption, and poor thought being put into every decision made my DeKalb. I went to school during M to M, as well as in high school when there was school consolidation. The dysfunction and chaos from those times will always stick out, and the education changed with each scenario. Please, for the love of God, leave our well-performing schools alone. There's also no way our current cluster would not be overcrowded.	
1568	I think it is important to keep the high achiever at Kittredge together through high school and keep Montgomery and Ashford park feeding into chamblee so the neighborhoods kids and families can stay united.	3/5/2026 9:01 PM
1569	Closing Oak Grove Elementary does not fit with the proposed objective of addressing underutilization of sites. Oak Grove already is at 89% utilization with 447 students and 504 capacity with increasing enrollment projected for 2026. If closed Sagamore Hills and Briarlake would have to absorb all these students. Sagamore Hills is already at high utilization. Briarlake and Sagamore together could not absorb all the students leading to overcrowding and need for site expansion requiring extra expenses. Briarlake will likely experience increased growth due to the coming of multifamily homes at Lulah Hills and other additions given the growth in the area. It appears the Dekalb may be relying on regressive data during the post pandemic time. Oak Grove has rebounded from that regression and come back strong with increasing enrollment for multiple years in a row. Finally OGE is one of the highest performing schools with strong parental support and involvement. It is unclear to me why the Dekalb school administration, who should value learning and achievement, would choose to close a high performing and well utilized elementary school.	3/5/2026 9:00 PM
1570	A small community based school allows for better growth and structure from student to parents. This increase education engagement back through the community	3/5/2026 8:59 PM
1571	I think if they all can be save let's find a way to keep all the schools open, and if possible.	3/5/2026 8:57 PM
1572	I understand the need to consolidate as there are empty seats at many schools, but I disagree with the idea of closing Oak Grove Elementary school. 1. It does not align with the stated objective of addressing underutilization. Dekalb's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization and projected at 96% (487 students) in 2026–27. Enrollment has increased for four consecutive years. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. 2. If Oak Grove closes, consolidation would occur with primarily Sagamore Hills and Briarlake. Between these schools, there are only ~ 173 seats available - far fewer than the current 447 students that Oak Grove has enrolled with expected increases. 3. With at least 450 students, the school would still receive state funding. With 447 students this year (and 100 on the waiting list for Kindergarten), this number is highly attainable. 4. Oak Grove (and especially Coralwood) offer incredible help to students with disabilities. Many families move to the neighborhood to attend these schools and benefit from and appreciate the exceptional care they are able to receive within a smaller school setting. This should be the model from which other schools can learn! 5. Oak Grove is also one of the highest-performing schools in the review group. Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap. I attended Oak Grove from 1985 - 1993 and moved back to the neighborhood so my children can attend, like many families that I know.	3/5/2026 8:57 PM
1573	We bought our home in Brookhaven Heights over 10 years ago specifically so our children could attend Ashford Park Elementary. It is the only highly rated public school in the immediate area, and it truly is something special. Our family loves this school and the community that surrounds it. Like many young families, private school is simply not financially feasible for us. We also have a child with an IEP, so the thought of Ashford Park closing and our child being moved to an underperforming school, particularly one where Spanish is the primary language spoken, would be extremely detrimental to his education and support system. Ashford Park is truly one of a kind. We grew up in the Alpharetta, Johns Creek, and Milton areas, and even those elementary schools do not compare to the sense of community and care that exists at Ashford Park. I have never seen a community come together for its children the way this one does. The staff is incredible, and the environment they've created is truly magical. If Ashford Park were forced to close, one possible solution would be to move existing Ashford Park students to the John Lewis location and move John Lewis students to the new Dresden Elementary School. However, our strong preference, and the preference of many families, is that renovations simply continue at the existing Ashford Park Elementary location. Remaining in the Chamblee cluster is also very important so the strong sense of	3/5/2026 8:56 PM

	community we've built at Ashford Park can continue to support our children as they grow and move through the school system. This school means so much to so many families. Please don't break up the special community that has been built here over the years.	
1574	I understand the need for consolidation and appreciate that it will eventually allow better use of limited resources. My concerns are how this impacts families with current and future students that already live in certain school zones. Transportation to and from school is always a challenge for parents and this will likely make things additionally difficult. I'm envisioning even more traffic on roads around consolidated schools that are already overcapacity, turning a 10 minute drive into 40 minutes. How will traffic flow and bus routes be addressed to limit this burden on families? As a family with young children that will be in an expanded school, what will the disruption of expansion look like?	3/5/2026 8:54 PM
1575	It makes sense to consolidate some schools in order to better use our resources.	3/5/2026 8:51 PM
1576	Please do not close oak Grove elementary. Not sure why it is on the list when there is a waiting list for others to get in the school. The school is a key reason we moved to this neighborhood and a lot of other families as well. This neighborhood is largely built around the school.	3/5/2026 8:49 PM
1577	It is concerning that the majority of proposed closures are in the southern area of the county.	3/5/2026 8:45 PM
1578	How have traffic patterns been assessed as part of the potential consolidation? I'm particularly worried about traffic in the neighborhood around Hawthorne Elementary School since it is tucked away in the neighborhood, not on a main road like many of the other schools. The Globe school on Briarcliff and Shallowford already negatively impacted neighborhood traffic and shifting more students into this small area doesn't seem promising for residents.	3/5/2026 8:45 PM
1579	Some consolidation makes sense. There needs to be a buffer in attendance in areas or more density or growth to plan for future. Neigh orthodox elementary schools are more ideal than massive more centralized options. Please leverage vanderlyn property for highschool to get rid of trailers and maybe for a freshman center.	3/5/2026 8:42 PM
1580	My child has been a student at Redan Elementary for the last three years. I have nothing but great things to say about Redan. The teachers are wonderful and have the students best interests in mind. My child has learned a lot these past couple years and I look forward to see what's to come.	3/5/2026 8:42 PM
1581	I doubt it will be good for my children's learning experience.	3/5/2026 8:41 PM
1582	Oak Grove is a very good school with good teachers. It is 90% full, I don't understand why it's on the list.	3/5/2026 8:39 PM
1583	I would agree to having elementary schools consolidated if they have neighboring attendance zones. I do not want my child attending a school that is in a completely different area of our home.	3/5/2026 8:38 PM
1584	I wish that there was more information regarding why the schools were selected. Although the schools are spread out... it feels like communities in the southern portion will be impacted to a greater degree. My child's school is not on the list.... but things can change and my anxiety, and that of my child is very high.	3/5/2026 8:36 PM
1585	Evansdale needs to be renovated and expanded. At 10.1 acres, Evansdale's lot size is bigger than neighboring schools recommended for expansion. Evansdale is unique in that it has a large, separate play field, two playgrounds, and multiple parking lots. Our site can accommodate additions in the back of the school and still have ample play and parking space. Evansdale is uniquely situated to accommodate increased traffic, as it takes up two sides of a large neighborhood block. Evansdale's enrollment is projected to increase to over 600 by 2030.	3/5/2026 8:36 PM
1586	The schools we are districted for are not impacted which is good. We moved to this neighborhood specifically for Montgomery Elementary, Chamblee middle and Chamblee HS	3/5/2026 8:35 PM
1587	I think Ashford Park facilities need to be improved. However, I do not think the school should close. I think clustering of the PK-3 at Ashford Park and 4-5 grades (John Lewis) is a good idea.	3/5/2026 8:33 PM
1588	Strongly oppose	3/5/2026 8:30 PM
1589	I am against this consolidation and strongly against Oak Grove closure. Oak Grove	3/5/2026 8:30 PM

	Elementary is a well-utilized school with strong enrollment and community support. Closing a school that is functioning effectively would disrupt many families without addressing broader district needs.	
1590	I support reviewing facilities and enrollment to improve resources but want community stability and reasonable commute distances. I also want to be sure schools don't become over crowded or this impacts schools negatively that are performing well. Small classroom sizes are not a bad thing and allow more specialized 1:1 attention	3/5/2026 8:29 PM
1591	Object to the closing of the schools in my area. Empty buildings brings crime and possibly homelessness to the area	3/5/2026 8:27 PM
1592	Please show me the research that states larger schools with larger classes promotes greater academic growth and community support. Please show me research that shows that increasing the overall number of students within buildings, that absolutely cannot handle the proposed capacity in buildings as you have inadvertently alluded to, is beneficial to academic growth. Please show me the number of administration AND support personnel (counselors, behavior specialists, resource officers, etc) that you will be employing in these supersized, consolidated schools because behaviors will increase. Your If.. Then Statements are idealistic at best. If you cannot implement the desired outcomes in smaller schools now, what evidence do you have that proves that this would actually work then? I understand declining enrollment exists. Children are costly in this economy. Can you not, as a district, provide more pre-k classes as incentive for families to move into the surrounding areas? Can you not be more transparent about your financial moves as you have not only hired AND paid out a recent superintendent that was known to have pending charges? Can you not create trade-based, more magnet and stem based middle and high school programs incentivizing families to move into the area?Can you maybe not purchase a multimillion dollar building WITHOUT your taxpayer input? If you cannot demonstrate consistency and transparency now, your history as a district proves these hypothetical statements and dream scenarios cannot be assessed with validity and weight. Elementary schools do not need to be consolidated. They are LIFELINES to communities. Reduce the number of personnel in each building and practice larger classes sizes in controlled environments first, and THEN come back to tell me that your model works on a larger scale. Consolidations are JUST as costly. The return of investment is dubious at best. You are removing some of your higher performing schools at the detriment of the students and your credibility.	3/5/2026 8:27 PM
1593	I think this initial plan would consolidate buildings, but it does not address teacher capacity, classroom capacity and the ability for elementary school students to have the specialized attention that they may need at that early stage of development. Also, it seems that elementary school is the only grade band where more schools than necessary are being closed and zero excess seats would remain should capacity change. Also, I don't see a robust discussion around charter schools, and how those schools would be affected as far as their funding and potential enrollment changes. Lastly, I think the closure of Henderson Mill elementary school is a mistake as the surrounding community supports this school.	3/5/2026 8:23 PM
1594	I don't agree with all closings.	3/5/2026 8:23 PM
1595	Prefer Scenario 1	3/5/2026 8:22 PM
1596	Concern is seems to be more kids will be travelling longer distances. Also, some schools listed as being able to accommodate more kids are already functioning with trailers.	3/5/2026 8:18 PM
1597	I have a hard time figuring out why Ashford Park would be a closing school. It's a desirable school and lots of people live in the district to attend AP. It would not only disrupt current communities but also severely affect the property values in the area to close it altogether.	3/5/2026 8:17 PM
1598	As a resident of Midvale area, I value Midvale as a walkable neighborhood asset. Our community thrives because of its schools, and we do not want to see this site converted into district offices. Further, we do not want to see our children spend hours during the school week on buses when they have a walkable option. History shows that when neighborhood schools are shuttered, they rarely sit empty for long. If Midvale is closed, it is highly likely the site will be repurposed into administrative office spaces or district storage. We would trade a vibrant center of learning for a sterile office complex, permanently altering the DNA of out neighborhood. Midvale is currently the only elementary International Baccalaureate (IB) school in the City of Tucker. Closing this school is not just a logistical change; it is a significant blow to our city's competitive edge for the following reasons: 1. Loss of a Unique City Asset The IB Primary Years Programme (PYP) is a globally recognized "gold standard" in education.	3/5/2026 8:16 PM

	Because IB authorization is tied to the specific school site, closing Midvale means Tucker loses its only elementary IB option. This puts our city at a disadvantage compared to neighboring areas that offer these specialized programs. 2. Impact on Property Values and Growth Midvale is more than just a 'school building' it is a cornerstone of our community's "walkability" and appeal. We have seen time and again that strong schools build strong communities. Even if you never step foot inside the classroom, the existence of a thriving, high-demand school like Midvale directly bolsters our local property values. Families move to Tucker specifically for the Midvale IB program. Decoupling this high-demand educational pathway from our city will inevitably make Tucker less attractive to prospective homebuyers, potentially stagnating local property values and slowing the community growth we have worked so hard to achieve. 3. Economic and Community Vibrancy Midvale is a thriving school with a school choice waitlist. In a time when many are opting out of public education, Midvale is a success story—a place families are "running to." Further, Emory and CHOA are growing, drawing more individuals to the area when neighboring cities are saturated. Losing such a cornerstone institution undermines the stability of our local neighborhoods and the overall "live-work-play" appeal of Tucker.	
1599	Unlike other schools, Evansdale enrollment has continued to expand I believe. I'm told that it's expected to continue to do so to over 500 students in the next five years. The present facility has unused lot size which would allow expansion, even though it already has a play field and two playgrounds.	3/5/2026 8:14 PM
1600	The broad brush and single factor (moderately declining enrollment) approach to naming closing facilities doesn't make sense. A independent consulting firm and DeKalb County schools need to show much more depth in terms of quantitative cost-benefit analyses for these proposed actions. Not just focused on declining population but what the impacts would be to home values and other related quantitative factors. Then a real decision support scoring model should be developed before throwing out a list of closures like was done. Also, the consulting firm that was used has a conflict of interest in that they would benefit from approximately $2B of capital construction projects. Their history with numerous other cities attempting to approach this with their "cart before the horse" methodology is not transparent nor grounded in true cost-benefit economic analysis and rife with conflicts of interests. Finally, anything that D. Horton brought in should be tossed since he was under criminal investigation when hired (in Skokie, IL), is now under further criminal investigation, and then continued the cronyism and hiring of self serving contractors (and his friends) that indicate malfeasance. This process should be thrown out, a new competitively bid RFP with detailed specifications sent out to truly independent consultants before proceeding any further.	3/5/2026 8:11 PM
1601	Thankful that Stephenson High School is NOT on the list, nor Stephenson Middle and Elementary.	3/5/2026 8:10 PM
1602	Simply need to rebuild or relocate. The staff and principal is amazing, loving and committed.	3/5/2026 8:02 PM
1603	I am not in support of the consolidations in regards to academically great elementary schools being closed. Close/change the lower performing schools 1st	3/5/2026 7:59 PM
1604	Closing redan elementary is a slap in the face to this wonderful community	3/5/2026 7:59 PM
1605	Do not close Evansdale. Facilities need expansion. I would have to move as I will not put my child in Tucker cluster schools. The French program is a treasure.	3/5/2026 7:57 PM
1606	Closing Ashford Park Elementary School on the basis of declining student enrollment is not accurate. While I understand the school would need capital improvements to address current issues, that does not necessarily require school closure.	3/5/2026 7:57 PM
1607	I would not recommend grades 6-12 in one building. I would like to keep middle school students separate. Breaking up elementary to upper and lower grades may be a good idea.	3/5/2026 7:55 PM
1608	Not happy with consolidations. This will affect property values.	3/5/2026 7:55 PM
1609	I don't want our school to close. It is great and already has diverse offerings. I am way more interested in the quality of education and teachers than the district operating budget. When I see students and their needs barely a focus it is a huge red flag for me. Secondly this survey is way too technical in terms of information and questions to think you are actually reaching parents and students in your district in a fair and open way.	3/5/2026 7:55 PM
1610	I think this number could be reduced. Some closures are expected but 27 are too many. We worry about having huge elementary schools.	3/5/2026 7:54 PM

1611	The scenarios are too lacking in information to provide sufficient feedback. Ashford Park is one of the highest performing schools in the district. It is an important part of our community--even though our kids do not attend the school, we know many families there. For our part, the recent discussion sections have begun alluding to some significant impact on Kittredge Magnet. Yet, this disclosure was made in the course of a question and answer without any formal acknowledgment. The communication must be better. I can say without hesitation that Kittredge has been an impactful and important experience for our child. The experiment that began with Kittredge decades ago has now become the crown jewel of education in our area. It is equal parts maddening and sad to hear rumors that the SAP is considering changes that would fundamentally destroy what generations have built. The Board and the SAP must do better than to listen to the outsized voices (including some from the Montgomery community) that are more focused on retribution for the fact their child was not admitted than actual change for good.	3/5/2026 7:54 PM
1612	Please don’t close oak grove elementary!!!	3/5/2026 7:45 PM
1613	Na	3/5/2026 7:42 PM
1614	Concerned about the effect it could have closing up to 27 schools and classroom sizes being large for young age groups.	3/5/2026 7:42 PM
1615	It is a much needed change, too many unneeded old buildings are draining our resources, and empty seats with more expected is terrible from a financial perspective.	3/5/2026 7:42 PM
1616	I am a strong supporter of community schools. Evansdale Elem is the center of our Evansdale community. I have supported the school and community 45 years. Families buy homes in this area because of the uniqueness of the Evansdale which is rated 8 of 10, among the best in the community, functioning 96% of capacity. Evansdale is centrally located in this community; it is a neighborhood school and easily accessible without traveling main thoroughfares (Chamblee-Tucker Rd. or Pleasantdale Rd). It is also accessible for parents/children who wish to walk to and from school.	3/5/2026 7:40 PM
1617	The district has been through so much change since 2020, and especially the last two years. There are so many issues within the county that this seems like an incredibly irresponsible project to continue with the current state of the district.	3/5/2026 7:39 PM
1618	We support if this helps keep the school and open to more applicants	3/5/2026 7:38 PM
1619	I want to make sure that consolidations are done fairly. It feels like only some parents have a voice in DCSD, that is unfair. I also worry that certain schools will not be consolidated and stay very small 300-400 students while other schools will be consolidated. I feel the community already had a small group of parents force DHHS to stay in a location that is not ideal for a high school. I don't trust the process- in the end the rich white families will get what they want.	3/5/2026 7:37 PM
1620	Please consider 2 phases - Phase 1 - schools with low utilization (<50%) to be considered for consolidation. Phase 2 - consideration of efficacy of scale for LOW performing schools. North Dekalb continues to grow and the schools have been successful as a point of reference.	3/5/2026 7:36 PM
1621	The proposed facilit scenario seems reasonable. Combining cultures (e.g., community rivalries - Columbia/Towers) at the high school level will require special consideration, education, security and planning.	3/5/2026 7:36 PM
1622	Consolidating schools across different zones may increase commute times, create additional transitions for students, and weaken the connection between neighborhoods and their local schools. Strong neighborhood schools help build community engagement and provide stability for students throughout their early years. While operational efficiency is important, I encourage the district to prioritize solutions that minimize student transitions, maintain predictable feeder patterns, and preserve neighborhood school continuity whenever possible.	3/5/2026 7:34 PM
1623	Do NOT close Oak Grove Elementary! It is a wonderful and a great asset to the community! Also do NOT touch Henderson Middle or Lakeside HS. These are the best performing schools in the county.	3/5/2026 7:30 PM
1624	It’s a lot of schools. Mainly in the south half of the county. You’ll need more bus drivers.	3/5/2026 7:27 PM
1625	I think it is generally hard for any group to approve a plan that obviously does not provide all relevant information. For example, where the children of closed schools will be relocated to. If enrollment keeps falling why does it seem that District level employee numbers keep increasing? The county overall seems to be extremely top heavy with too many coordinator	3/5/2026 7:25 PM

	positions and not enough teachers, therapist (virtual speech therapy is ridiculous) and school level employees.	
1626	This scenario needs more research.	3/5/2026 7:24 PM
1627	Laurel Ridge is slated for expansion, but is located within a residential neighborhood and not on a main road. Increasing enrollment would put a burden on the neighborhood and the school footprint.	3/5/2026 7:22 PM
1628	The presentation wasn't easy to follow because of the weird formatting on some of the slides. It would be easier to visualize the changes if before and after maps of the new zones and the school locations were included	3/5/2026 7:21 PM
1629	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: Sagamore Hills: 413 / 456 (91% utilization) Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: · +50 students → ~83% utilization · +100 students → ~90% utilization Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: $1.5B Arthur M. Blank Hospital campus ~4,500 employees (including ~1,000 new jobs) $87.7M Emory Heart & Vascular expansion Ongoing Emory hospital expansion $1.1B in FY24 research awards $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/5/2026 7:20 PM
1630	We think it's a bad idea. Neighborhood schools are important	3/5/2026 7:13 PM
1631	I think that the committee made the right recommendation.	3/5/2026 7:12 PM
1632	I understand the reasoning but think it's important to keep Champion since it is a theme school.	3/5/2026 7:12 PM
1633	My concern is how will classroom sizes be impacted. The school my children attend already have large class sizes and I feel that they aren't getting the individual teaching that they would if they classroom had less students. 32vs21 makes a big difference. Also bussing for these families who schools will be closed/consolidated is a question. Will these children have to wake up early to be bussed across the county.	3/5/2026 7:12 PM
1634	No consolidation the classes get to have less students for to teach more effectively.	3/5/2026 7:10 PM
1635	Closing schools means closing communities. Small schools =smaller classes. (Aside from Fernbank- please do not touch Fernbank!)	3/5/2026 7:08 PM
1636	If schools have trailers then schools shouldn't be reduced and/or combined	3/5/2026 7:06 PM
1637	I am concerned about the children that will have to be bused	3/5/2026 7:05 PM
1638	My children have been at Henderson Mill Elementary School since Pre-K. The class sizes are	3/5/2026 7:01 PM

	large as it stands now so the fact that the reported numbers are putting our school on the chopping block is unacceptable. The community of HMES in VERY diverse and you would be ripping apart a beautiful “gem” of a school and community in choosing to collapse our school. My eldest, now in 3rd grade is just beginning to come out of her shell and pushing a student like her into a MASSIVE school for her to become another number all for the sake of getting more money because dekalb has poorly managed the money in the past is a SHAME. Shame, Dekalb county school board. She is viewed as a child, not just a number, at our beautiful little school and you will be doing a disservice to SO many children like her if you choose to collapse these schools on your “scenarios”. This is not NYC. The idea of making giant schools is absurd to put into action especially in this heavily neighborhood focused school area around HMES.	
1639	I’m a teacher and parent of a child who attends Livsey. I’m concerned about the surrounding elementary schools in Tucker possibly closing. Will Livsey go from low enrollment to over-crowded? Also, Livsey has needed expansion for decades. If it hasn’t happened all of these years how is it possible now? I assume there is no room to expand? There’s limited parking and children are in trailers.	3/5/2026 6:57 PM
1640	Closing Evansdale is not a practical or good idea. Below are reasons why I feel this way. 1) Evansdale’s larger lot size for expansion, including two parking lots and street parking 2) French program: this program draws people to our community. It is non/transfertable (we think, though there has been no clarification with the county) and it continues into HMS, which argues for staying in our same cluster 3) traffic capabilities are better (as opposed to Livsey/Hawthorne) 4) lack of clarity of the data used and decision making to make these decisions, not to mention that this plan was hatched by Horton, who has been charged with fraud; general distrust of the board and the process. The fact that there has been no communication regarding what would happen with this plan is very unsettling. No one will approve a plan for closing our kids school when there is no good plan for the future 5) high probability that enrollment will drop if we lose our local elementary school as some people will go to private school/alternative options rather than send their child to a “mega school” that is further away	3/5/2026 6:56 PM
1641	As long as the consolidation benefits the students, that all that matters	3/5/2026 6:55 PM
1642	I think it is smart to save money.	3/5/2026 6:54 PM
1643	I have been in the neighborhood for 20 years and have had four children go through Oakgrove Elementary and it will be really sad to see it gone. It’s a great small, smaller community school and the neighborhood has flourished around it.	3/5/2026 6:54 PM
1644	It seems a bit confusing… in my area Decatur/ Lithonia area school seem full. And anyone who misses 9or more days has to answer for it.	3/5/2026 6:54 PM
1645	The needs of the children is priority one.	3/5/2026 6:54 PM
1646	They definitely could do alot better but it's a new school im giving grace.	3/5/2026 6:53 PM
1647	As a student, I have lived through DeKalb construction projects, which gone on forever and end with facilities that remain in awful condition. I do not understand why you would close some of the highest performing schools in the county to shove kids into mega schools of 800+ students, which assumes completion of construction that won't be completed or will never happen. Stuffing kids into schools doesn't improve educational quality. I have had up to 32 kids in my third grade classroom, which made it impossible for anyone to learn, and impossible for the teachers to do anything but fight the loudest, most disruptive students. Students didn't even have desk chairs but were sitting on the floor.	3/5/2026 6:53 PM
1648	I have serious concerns about school consolidations that would close or significantly alter successful neighborhood schools like Montgomery Elementary. Montgomery appears to be a well-utilized, strong-enrollment school (roughly 680–730 students in recent years), which suggests it is not an underutilized facility driving excess capacity in the district. Closing or consolidating such a school would undermine stable, walkable attendance zones and disrupt students who are already in an appropriately sized, academically strong environment. I support targeting consolidations toward genuinely under-enrolled, low-adequacy buildings where there is clear excess capacity nearby, rather than “one-size-fits-all” consolidations that could harm high-functioning schools and communities. Any consolidation plan should clearly publish the data behind decisions (enrollment, capacity, educational adequacy scores, and facility condition) so families can see why specific schools are or are not being proposed. In addition	3/5/2026 6:52 PM

	to our home school, Montgomery, our family is also directly affected by decisions about choice programs because my eldest will be attending Kittredge Magnet School. Any consolidation or boundary changes should clearly state how high-achieving magnet programs like Kittredge (grades 4–6, about 550 students, top 1% performance in Georgia) will be protected and supported, including building assignments and transportation, so that current and future students are not harmed by facility shifts. I strongly value continued access to this rigorous magnet option for qualified students from across the county.	
1649	Keep Montgomery Elementary open!	3/5/2026 6:50 PM
1650	We are not supportive of the country’s recommendation to close Ashford Park Elementary. It is more than a building. This school is an important part of community and in many opinions is the model school for how education should be handled - community focused, engaged teachers and staff and a supportive community.	3/5/2026 6:48 PM
1651	This would not be a good idea. What about students being able to go to the schools in their neighborhoods? Making Elementary schools have larger student sizes increases discipline problems and widens learning gaps, not close them. We know that the current strategies to close learning gaps are not effective, so imagine if you have bigger school sizes with an overwhelming amount of students not being able to catch up to the others that are on grade level. WHY ARE MOST OF THE SCHOOLS THAT ARE CLOSING IN THE SOUTH PART OF THE DISTRICT? After proposing this, why won't people see that the population being affected the most are not in Area 1. With 1 or 2 Elementary schools with good scores closing, are you telling us that there are not other schools in Area 1 & 2 that dont have small schools sizes that would be a better fit to consolidate? It feels very targeted to keep certain populations of Dekalb students into positions where they will have a harder time succeeding. It is a very well known fact that DCSD, and the board cater to the population in Area 1 than other areas. Why can't we see a plan where schools are consolidated ACROSS THE COUNTY, rather than (seemingly) targeted areas and populations. When changes are made, they are usually don't to the disadvantage of the students in other areas.	3/5/2026 6:45 PM
1652	I feel like Redan Elementary should not close, I feel like it’s going to takeout kids safe place away.	3/5/2026 6:44 PM
1653	All the closing of school is in the vicinity of my house. What school would she go to? How long would she have to be on the bus? Kids in the bus for longer periods of time usually gets mischievous.	3/5/2026 6:41 PM
1654	I disagree with the consolidation. It will not give adequate support to students.	3/5/2026 6:38 PM
1655	would have liked to see more than just a single option. Although we dont go to the school, we dont understand closing high- performing school like ashford park. why is enrollment declining in the first place? are families going to private school bc of the quality of education provided publicly?	3/5/2026 6:38 PM
1656	Oak Grove Elementary is a centerpiece to this community. I went there, my children went there. It provides so much for this community in terms of the neighborhood and community feel. From the teachers that live in our neighborhoods to the parents that move here specifically for OGE, this area thrives because of it. Please keep OGE here and funded. It sets such a strong foundation for our children to launch from.	3/5/2026 6:37 PM
1657	I understand consolidation is a necessary. However, closing historically high ranking schools should take very serious thought. The school is high ranking in achievements for a reason. Closing these schools and leaving schools open that are not high ranking academically is not the smartest thing to do. Schools are a big party of the community. Vanderlyn Elementary has been part of the community of Dunwoody for a long time. Closing Vanderlyn and leaving Chestnut open is ridiculous.	3/5/2026 6:37 PM
1658	I like how these scenarios has been presented and I understand why. DeKalb Co has too many school buildings. And while enrollment seems to on the decline, hopefully we do not overestimate that decline. As long as construction is completed before any school is closed, I am supportive of the idea. High School students must be given to chance to be grandfathered at the high school they are at now.	3/5/2026 6:32 PM
1659	If it improves academics, teacher support, building support, and districtwide success, then it would be a good move.	3/5/2026 6:31 PM
1660	This puts too much stress on the consolidated school. The closures effect most low income	3/5/2026 6:31 PM

	areas. Why not focus more on educating small classroom sizes? Maybe the children will then learn rather than being rushed to the next lesson without getting the 1st.	
1661	Please expand and renovate evansdale elementary!	3/5/2026 6:30 PM
1662	I feel that elementary schools thrive with smaller class sizes. I'm concerned that consolidating several schools into a very nice middle school would mean larger classes. Further, a larger building can be intimidating to our littlest learners.	3/5/2026 6:28 PM
1663	Evansdale Elementary should be renovated, not closed. The lot size is bigger than other schools planned for expansion. It had separate playing field, 2 playgrounds, multiple parking lots. Enrollment is projected to increase to over 600 by 2030.	3/5/2026 6:28 PM
1664	Consolidated schools will likely end up changing boundaries within communities in a negative way. Community areas should go to school as a community, not be divided by seemingly arbitrary boundaries that don't make sense for a community. Ashford Park should have a school where all of the community of Ashford Park can go to school with their community. Not just certain areas of Ashford Park, the whole community, should be able to go to school together.	3/5/2026 6:28 PM
1665	I'm alarmed because it is potentially closing Ashford, Park where my children attend school. We all love Ashford Park. It has great parent-participation and a highly dedicated staff.	3/5/2026 6:28 PM
1666	Neighborhood local schools provide children and parents a greater opportunity to feel a part of a community. Evans dale school is almost at capacity and it makes more sense to renovate the facility. It is a large piece of property that could be expanded.	3/5/2026 6:26 PM
1667	I think the schools should stay how they are. They should be separate until they are mature enough for middle and high school.	3/5/2026 6:25 PM
1668	I am concerned that the county is considering closing 2 out of 5 of our neighborhood elementary schools. I find it interesting that they want to expand chestnut ES given that the current school population already negatively affects the traffic on North Peachtree Rd that the school sits on. I would think it would be best to consider closing a single school at most in our district as the whole point is having a close community school environment to build lasting educational relationships and friendships. When schools get too large it negatively impacts the social welfare of the children.	3/5/2026 6:22 PM
1669	I understand the overall goal of the SAP. What I don't understand is how Ashford Park Elementary fits into the stated goals of SAP. While the building itself is in need of improvement, there is a need for elementary school capacity in our area.	3/5/2026 6:22 PM
1670	I don't like it	3/5/2026 6:19 PM
1671	We are hoping that our local school stays open- this area of town. The schools are in all good shape and the smaller schools create a better environment for learning.	3/5/2026 6:19 PM
1672	I'm concerned about over crowding and want to know/be a part of how sagamore is going to expand and make sure construction is appropriate for the neighborhood in design and complexity. I also concern about what the change would mean to traffic patterns in each neighborhood	3/5/2026 6:19 PM
1673	No opinion	3/5/2026 6:16 PM
1674	Sounds okay but concerned about younger kids being at schools with older kids.	3/5/2026 6:11 PM
1675	I do not agree with consolidating of Cedar Grove HS and McNair HS because thd students will not mix well because alot of neighborhood beef. Also McNair is a low performing horizon school and Cedar Grove is not. Id his happens there will be to many dicipline problems qnd teaching and learning will suffer.	3/5/2026 6:11 PM
1676	I agree with the consolidations of schools due to the drop in enrollment.	3/5/2026 6:05 PM
1677	This is a beloved, proven-effective, vibrant elementary school. Every child in the neighborhood, for the past 29 years that I've lived here, have had a great experience at Brockett. Do not close this school and destroy it's good standing.	3/5/2026 6:05 PM
1678	I believe children thrive, and smaller school settings. I do not believe they do well in mega schools. My children are both special needs and require a more intimate environment than what is being offered.	3/5/2026 6:01 PM

1679	Traditional grades should be as it is. Middle school should not mix with elementary	3/5/2026 5:59 PM
1680	Oak Grove Elementary is an excellent school and is nearly at capacity, so it should not be closed anytime soon. The teachers are great there and students are happy. My son's grandmother can walk to pick him up each day and they walk to the nearby church playground. Moving him to another school would ruin that for them. Please leave it alone.	3/5/2026 5:59 PM
1681	I’m just wondering about transportation when it comes to older kids being with younger kids if the K through an option is chosen or if the six through 12 option is chosen.	3/5/2026 5:56 PM
1682	Hard to assess, without knowing the potential impacts on neighboring schools.	3/5/2026 5:55 PM
1683	I am against the consolidation.	3/5/2026 5:55 PM
1684	If consolidating schools is best for robust programsand lower costs I support that. However, I would like for community input especially for the schools directly impacted to be fully considered and prioritized.	3/5/2026 5:51 PM
1685	I strongly oppose the proposed consolidation scenario that would close Evansdale Elementary School. Evansdale is uniquely positioned to serve our community and should be considered a long-term asset rather than a closure candidate. First, Evansdale’s physical site offers clear advantages. The school sits on a comparatively larger lot that allows for future expansion, and it already has two parking lots plus available street parking. These features provide flexibility that many nearby schools lack and make Evansdale far better suited to handle enrollment growth than schools with constrained sites. Second, Evansdale hosts a French immersion program that attracts families to the community. This program is a major draw for enrollment and continuity, particularly because it feeds directly into the French program at Henderson Middle School. Disrupting that pathway by closing Evansdale or moving students outside the cluster would undermine a program that already works well and strengthens the local public school option. Third, Evansdale has stronger traffic capacity and circulation compared with nearby schools such as Livsey Elementary School or Hawthorne Elementary School, where traffic congestion is already a concern. Consolidating students into sites with weaker traffic infrastructure would create daily safety and logistical issues for families and staff. Finally, I have significant concerns about the transparency and credibility of the process used to develop these proposals. There has been a lack of clarity about the data and assumptions behind the scenarios. Given that the original facilities planning work was developed under leadership that is now associated with fraud investigations, there is understandable community distrust. Major decisions like school closures require a process that is transparent, data-driven, and broadly trusted.	3/5/2026 5:50 PM
1686	Disruptive to communities	3/5/2026 5:50 PM
1687	There are facilities that should be consolidated and closed. They haven’t had the support and funds needed for hears. The ones that are thriving should undergo an expansion, not a closing. Oak Grove and Coralwood are supported by communities and foundations that add financial and community support to those schools. They should not be closed, but renovated to hold more students who can benefit from being in those facilities.	3/5/2026 5:49 PM
1688	Oak Grove Elementary is not underutilized; it is a high functioning school and vital to the local community	3/5/2026 5:49 PM
1689	Please leave vanderlyn open	3/5/2026 5:48 PM
1690	I’m not in favor of the consolidations	3/5/2026 5:45 PM
1691	The school is old and rundown. Needs to be tore down and built back up more modern.	3/5/2026 5:44 PM
1692	The proposal is a pure racist targeting of white (north county and high performing, high parent involvement, high school foundation donation) schools. Close lowest performing schools and bus kids into the higher performing schools via a voluntary school choice program. This is not rocket science.	3/5/2026 5:43 PM
1693	Some schools are not updated	3/5/2026 5:43 PM
1694	The school district should work with the county to adapt closed school buildings for quality-of-life uses: parks, recreation centers, athletic venues, entertainment spaces, affordable housing and community gathering spaces that foster connection rather than isolation	3/5/2026 5:43 PM
1695	The changes seem concentrated in already underserved and overlooked communities. These	3/5/2026 5:39 PM

	communities also have dense populations through multi family housing that rely on the proximity of community schools. Meanwhile those schools that are not impacted are characterized by single family homes and are unaffected by these changes. This is an equity issue .	
1696	I do not like the idea of closing local schools, such as Oak Grove, Laurel Ridge, or Henderson Mill. I do like the idea of K through two schools that focus on teaching students to read.	3/5/2026 5:38 PM
1697	Vanderlyn has been around the community from as long as 60 years and more importantly has been doing well in giving great education, maintaining blue ribbon and with all Gifted Teachers. I believe such brilliant staff and campus should be carry forwarded in its same shape as long as possible.	3/5/2026 5:38 PM
1698	interesting, however, my concern is overcrowding of classrooms in the schools to obtain efficiency..... Vacant schools not being monitored(safety) revisiting current budget for cuts to prevent closures	3/5/2026 5:37 PM
1699	Would like to see the overloaded schools addressed as a priority with investment, new buildings and be able to leave them open. They are vibrant communities who have been formed around those schools. Closing them when the students are clearly there seems short sighted.	3/5/2026 5:36 PM
1700	I am not thrilled at the consolidations because it may become a distraction and inconvenience for both students and parents	3/5/2026 5:36 PM
1701	Many of the Tucker area ES are closing. Is this proportional to other surrounding communities?	3/5/2026 5:36 PM
1702	We need to know what will be done to the closed schools.	3/5/2026 5:34 PM
1703	I believe so many facilities will lead to transportation burdens for some parents and students. It will be a barrier for participating in extra curricular activities. It will also break the bonds of community and support for some students, who will have to attend schools further away where they have to develop a new support system for the academic success.	3/5/2026 5:33 PM
1704	Class sizes were not included in any of the information. Peachtree Middle is too crowded with class sizes in the low 20s to high 30s. I think it would be ideal to have class sizes for all grades in the mid 20s at most.	3/5/2026 5:31 PM
1705	We are not for closing Oak Grove Elementary. This school is a pilar of the community and has been for many years. In a dysfunctional and under performing school system, Oak Grove is the exception. Perhaps concentrate your short comings on the areas of the county that test poorly.	3/5/2026 5:31 PM
1706	Easy for me to say because Laurel Ridge isn't getting drastically affected, but it makes sense to consolidate. I think the major question is, what do the 'improvements' and expansions look like for certain sites. Some context as to why those sites were chosen to be expanded, while others closed, would probably help people	3/5/2026 5:30 PM
1707	Ideal preference would be to redistrict all current Ashford Park students to John Lewis facility based on capacity and keeping school community together. Relocate John Lewis (smaller community) to current APES facilities based on capacity and enrollment.	3/5/2026 5:28 PM
1708	I do not think closing high performing elementary schools is in the Best interest of the county. I understand enrollments may be down at this time, but the county is continuing to grow. The better question is, why are parents choosing private school instead of their neighborhood school, even if it is a high performing school? How can we encourage Dekalb families to support their public schools rather than choosing to send their students to private school?	3/5/2026 5:27 PM
1709	Community involvement is very important, especially at the elementary age. Closing Midvale would would not allow students to learn at a early age what responsibility to community should be as well as being small enough to really get to know staff and other parents.	3/5/2026 5:26 PM
1710	It appears that DeKalb is prioritizing "super" elementary schools and if that is the priority, it should be highlighted. I'm concerned about super elementary schools. I don't feel it is the right option for young children.	3/5/2026 5:26 PM
1711	If there was a limit of virtual school option and a freeze on charter school openings this discussion wouldn’t be needed.	3/5/2026 5:24 PM
1712	As both a parent and district employee, I understand the need for the district to evaluate	3/5/2026 5:23 PM

	facility usage and make responsible decisions regarding consolidations. However, it is important that these decisions prioritize student stability, manageable class sizes, and minimal disruption to learning environments. Consolidations should be carefully planned to ensure receiving schools have the resources, staffing, and space necessary to support additional students. Clear communication with families and staff will also be critical to maintaining trust and ensuring a smooth transition if changes occur.	
1713	I do not like the fact that most closures are taking place in the South part of district	3/5/2026 5:21 PM
1714	Midvale should not close. They have an IB program and the school is part of this community. Many kids walk to school daily which would not be able to happen if it closes.	3/5/2026 5:21 PM
1715	Repurposing some schools to be used as middle schools or elementary schools are good idea. It could also be repurposed for different use like specialized program like IB for high schoolers, having a 9-12 IB school, with in grades 9-10 students prepare for IB and in 11-12 is the actual IB.	3/5/2026 5:19 PM
1716	Why are there still trailers at schools if you need to cull the schools?	3/5/2026 5:15 PM
1717	What happens to the teachers? The video did not discuss job security.	3/5/2026 5:12 PM
1718	I feel like it is a good idea and I overall support it but I feel that some things were contradicted with the potential closure of my affected facility. Midvale recently had HVAC upgrades so I don't understand how it was determined they should be impacted. I think Midvale should remain open and perhaps be consolidated with another elementary school or have the grade band expanded. Midvale also is one of the few IB/STEM schools in the area. It would be a disservice to close it.	3/5/2026 5:12 PM
1719	Favor consolidation of grade level not closing schools	3/5/2026 5:05 PM
1720	We should not close Oak Grove it is a great school and it would uproot children's lives to close it	3/5/2026 5:03 PM
1721	At this time, I don't have any major feedback as both schools my children attend are either not slated to be closed/consolidated or not listed.	3/5/2026 5:01 PM
1722	This school is a pillar of our community. Closing it would not only remove a vital local resource but also limit children's ability to learn close to home in an environment where they feel safe, supported, and connected.	3/5/2026 4:59 PM
1723	Redistricting and consolidations/repurposing are long overdue. Peachtree Middle could be used as a high school to alleviate crowding at Dunwoody High, and elementary schools could become K-8.	3/5/2026 4:59 PM
1724	Closing schools in the midst of so many new homes and apartments being built is a major mistake. Ensuring that children have the best tools, teachers and an effective teacher to student ratio and well functioning school building should be the priority. I don't see how achieving these goal will be met by closing so many schools in communities that are already experiencing high drop out rates and lower test scores.	3/5/2026 4:57 PM
1725	Miller Grove Middle School should remain open because it continues to demonstrate strong academic, artistic, and community value. The school's Connections Department, including Family and Consumer Sciences, drama, and band, provides students with well rounded learning experiences that many schools cannot replicate. These programs cultivate creativity, leadership, and practical life skills that directly support students' success in high school and beyond. Additionally, Miller Grove serves a highly inquisitive and motivated group of rising sixth graders who deserve access to a stable, supportive learning environment. Closing the school would disrupt their academic progress, separate them from trusted educators, and remove opportunities that are not easily replaced elsewhere. Maintaining Miller Grove Middle School ensures continuity, preserves high quality programs, and upholds the district's commitment to meeting the diverse needs of its students.	3/5/2026 4:54 PM
1726	I think the initial evaluations use poor or insufficient data. For example, the data on adequacy and the amount of students that a school can serve seem to include trailers such as at Dunwoody high School and Peachtree middle. They should not! Also. I think we must always consider race, ethnicity and socioeconomic status in terms of impact. For example, Kingsley at this point is predominately Hispanic. Will the kids generally have to travel farther to get to school if Kingsley closes? Finally, I think it's important to look at neighborhood traffic patterns. For example, increasing the footprint of Chestnut, which is right by Peachtree Middle, would	3/5/2026 4:46 PM

	add to what is already a very congested Street for the morning and afternoon commute. It also seems unsafe to increase the footprint of any school that's on an arterial or semi-arterial, particularly if it's an elementary school. Any decision to increase the footprint of a school should take into account neighborhood setting such as nearby arterials. And I am suspicious of the analysis that suggests that some schools can grow into a bigger footprint based on their acreage. It does not make sense to me why we would close some buildings for shortfall and expand others. I would also ask if there are data that support having 900 students in one k-8.school, other than operational efficiency, versus smaller neighborhood schools in terms of what is best for the children educationally? Also are there just less children or are a lot of children going to private school who might not have in the past? Is there any way to do an analysis of the impact of school vouchers?	
1727	Evansdale exists in a very stable, middle to upper middle community area. High school taxes that support an 8/10 level school. Splitting it up makes absolutely no sense. Renovation and expansion is the more practical use of the tax dollars this area pays. The stability of home ownership has greatly increased the property values and part of that has to do with the stability of the school and its academic standing. Closing the school will destroy that aspect. It then will affect the stability of the neighborhoods around the school and in time change the tax base.	3/5/2026 4:43 PM
1728	In my opinion, Evansdale Elementary should be renovated and remain in operation rather than closed. The school offers several unique advantages that make it an invaluable asset to our community. First, Evansdale sits on a large property with significantly more land than many neighboring schools. This generous lot size allows the campus to comfortably accommodate current and future needs, including increased enrollment and traffic. The school already has ample parking and space for safe drop-off and pick-up, which many other schools struggle to provide. Second, the campus provides excellent outdoor resources for students. It includes two well-maintained playgrounds, nature paths with running trails, and open green space used for activities such as soccer and outdoor learning. Importantly, the school is set back from major roads, creating a quieter and safer environment for children. Another key strength of Evansdale is its long-standing and highly successful French immersion program. For years, this program has attracted dedicated students and families who value language learning and cultural education. The surrounding community strongly supports the program, with active neighborhood and parent-teacher volunteers who help sustain and enrich it. Evansdale's location is also strategically important. It is close to Henderson Middle School, which continues the French immersion pathway. Maintaining Evansdale within the Henderson–Lakeside cluster would preserve this educational continuity and allow students to continue developing their language skills through middle and high school. Closing Evansdale would mean losing not only a well-located campus with excellent facilities, but also a thriving academic program supported by an engaged community. Renovating the school and keeping it open would protect these strengths while ensuring the campus continues to serve students for many years to come. For these reasons, I strongly urge decision-makers to renovate Evansdale Elementary, keep it within the Henderson–Lakeside cluster, and preserve the successful French immersion program that so many families rely on.	3/5/2026 4:42 PM
1729	The county should look that this as an opportunity to reduce classroom and school sizes.	3/5/2026 4:37 PM
1730	I am very concerned about the size of the consolidations being made if the children are all being placed together in one facility. Also, the quality of learning with bigger class sizes.	3/5/2026 4:30 PM
1731	Any consolidation and/or closing is difficult. I would strongly urge the district's central office to commit to consolidating wasteful administrative layers alongside any future cuts that impact schools and communities directly. The proposed consolidations are logical and match the demographic reality in DeKalb and many other districts around the country. The central administration at the district level is full of extraordinary administrative bloat at great cost; this is a good chance to right-size across the board.	3/5/2026 4:24 PM
1732	Seems reasonable	3/5/2026 4:20 PM
1733	Understand the scenarios when looking at the age/condition of buildings, enrollment, and cost of operations for smaller enrollment buildings.	3/5/2026 4:18 PM
1734	Just one school, Evansdale, is projected to expand to 600 students within 4 years. It makes no sense to close it. Plus, Evansdale's French program is unique to, and deeply rooted, in the Lakeside cluster. Older students mentor younger ones, and all benefit from this unique program.	3/5/2026 4:16 PM

1735	Consolidation seems unnecessary. Nothing wrong with smaller classroom sizes. Allows for better one-on-one with teachers.	3/5/2026 4:12 PM
1736	They need more space but they do work with what they have.	3/5/2026 4:11 PM
1737	Groupings are good but the north end should be impacted as well	3/5/2026 4:01 PM
1738	Oak Grove enrollment is above the stated goal of 88%. Oak Grove is 89% utilization with a projection of 96% for 2026/27.	3/5/2026 3:58 PM
1739	It appears that a large number of highly ranked elementary schools are slated to close, sending students a significant distance to the remaining school in the area.	3/5/2026 3:57 PM
1740	Like most parents and students who would be affected, my children and myself have built relationships and rapport with the administration at both locations. A change could cause a disruption in these relationships, as one of my students does require an IEP. As well as travel, work schedules, and activities after school would also be affected.	3/5/2026 3:54 PM
1741	Not happy to find out about this through the news first before the district started being more transparent about SAP.	3/5/2026 3:52 PM
1742	I feel that it is necessary so that we can provide the much needed resources for our children.	3/5/2026 3:51 PM
1743	Evansdale Elementary School is a desirable school, sought out by many who move to this area. Enough footprint of land to expand the facility.	3/5/2026 3:51 PM
1744	I am wary of any school closures happening, especially when it comes to smaller neighborhood elementary schools (like Evansdale or Henderson Mill). I think closures should be avoided as much as possible, because it closes the possibility of that school operating again and would greatly change the character of the neighborhoods where these schools are. I am more open to the repurposing of existing buildings to fit specialized learning needs. While I understand it would reduce maintenance costs, I am concerned for what larger, more condensed school populations would do when it comes to the overall quality of life surrounding school. I would imagine that fewer open schools would mean longer commute times for more students, and greater traffic volumes to the locations of these larger schools. I guess from my perspective, it is worth the maintenance cost of keeping smaller "less full" schools open. For full transparency, I attended Livsey ES from PK-3, and private schools from 4-8 grade and 9-12 grade. One of the reasons private school was chosen for me was because of the increase in class sizes in public schools. Smaller class sizes greatly benefited my educational experience and there is a lot of evidence out there to support that. I am concerned that school consolidation would lead to larger classroom sizes, and I would like to know how this would be handled. If consolidations were to occur, I am also concerned for the overall air quality inside of buildings. I would want to know the plans for making sure HVAC systems are updated and plans for implementing air cleaning/air purifying measures in classrooms to help protect students and staff from airborne diseases, dust, etc. (The less likely you are to get sick, the less likely you are to miss school, which also has a huge impact on quality of education).	3/5/2026 3:50 PM
1745	I realize that the consolidations are needed, but feel that one of the smaller schools (Oak Grove) imbedded in our community has a history of excellence when it come to teachers and administrative staff. the school is a very valuable asset to the community.	3/5/2026 3:44 PM
1746	Na	3/5/2026 3:41 PM
1747	I appreciate the thought processes and analytics being used to identify schools that should be folded into other locations.	3/5/2026 3:40 PM
1748	Not happy with most schools in south territory being closed/consolidated	3/5/2026 3:35 PM
1749	I see that it may be necessary financially but it is disruptive to students and families, teachers and learning.	3/5/2026 3:35 PM
1750	Brockett is a wonderful school that serves Tucker. The community is close knit and so many people being able to walk or bike to school is so enriching for students and families. Why not expand Brockett as there is a huge portion of undeveloped land behind the school. It seems that the expansion schools are for the more wealthy demographics vs helping communities grow.	3/5/2026 3:32 PM
1751	Why are there no expansion projects on the south side of the county? You want the south dekalb students packed in classrooms and then wonder why behavior is at an all-time high.	3/5/2026 3:27 PM

	How does the north side differ? Why are our children ALWAYS left out? I know you will say, "Oh they didn't come to the meetings", of course not. History has proven even when the south dekalb parents showed up, our children still suffered. Our voices were never taken seriously. Only on the other side! Check the history.	
1752	Keep clusters and communities that are working/performing together.	3/5/2026 3:23 PM
1753	N/A	3/5/2026 3:20 PM
1754	I understand they need to happen, but finding some of the ideas not ideal.	3/5/2026 3:20 PM
1755	I am strongly against closing oak grove elementary school. It is such an amazing school with great teachers and wonderful community. I have two children who attend the school, one is gifted and another with special needs. We intentionally bought our house in this zone because of how well the school supports students with disabilities in addition to it's great reputation and high academic performance. Having my kids move to another school due to the school closing would create significant distress and issues for both my children. Please reconsider this plan.	3/5/2026 3:10 PM
1756	Oak Grove Elementary should not close. This would be an outrage negatively affecting housing prices, community dynamics, and educational standards. Oak Grove is on track to have 97% enrollment in 2 years. We should not plan to create overcrowded, huge schools, but small community elementary schools where kids have enough teacher support to truly thrive. Kids need smaller class sizes in a post-COVID world where so much learning was lost. Raise taxes and improve the small, community elementary schools, but make them k-6th grade.	3/5/2026 3:09 PM
1757	thank you for your hard works for my kid	3/5/2026 3:08 PM
1758	I see many great schools on the list for consideration of closure.	3/5/2026 3:01 PM
1759	That is a significant amount of closures even if it is over a 6-8 year span. I am concerned about students and faculty members.	3/5/2026 3:01 PM
1760	The school kind of look maintained on the outside but inside, it’s super messy. Ceiling are fall off, some of the staircase don’t have a handle for kids to grab on for support and restrooms are missing doors or have big gaps that you can see someone.	3/5/2026 3:01 PM
1761	I believe chestnut is best located to help dunwoody with its future growth endeavors	3/5/2026 2:56 PM
1762	Do not look forward to school consolidations.	3/5/2026 2:55 PM
1763	The lack of consideration of the magnet programs in the initial round of scenarios is deeply concerning. Additionally, while I recognize the need to right-size the District for anticipated enrollment, it seems that inaccurate or missing information was used to formulate some of the initial recommendations. Further, limited consideration was given to the capacity of sites to actually expand (example, limited lot space at Sagamore and Briarlake to accommodate the planned expansions that would be needed to absorb the closure of Oak Grove). As a property owner, I am also concerned about the impact of closing Oak Grove on my property values. The District has stated that 600 student elementary schools are the goal, but no data has been presented to support superior educational outcomes for students in that size school. The District has lost all trust of community stakeholders, and to push forward with this process on a short timeline while the District is under the leadership of an interim superintendent feels tone-deaf.	3/5/2026 2:50 PM
1764	I understand the need for consolidations. I think keeping students as close to home or their origianlly zoned school as possible would be ideal.	3/5/2026 2:45 PM
1765	Proceed with caution. We moved to Dunwoody when enrollment was down, and empty nesters were moving out. Young families flooded the area and DeKalb was not prepared for it.	3/5/2026 2:45 PM
1766	In general, the initial facilities scenario seems reasonable. However, the potential closure of Ashford Park Elementary raises concerns. While the facility is small, closing it displaces nearly 900 students. There doesn't seem to be a reasonable path forward to keep the community together and move those students anywhere. If all the students, staff, and faculty could pick up and move to John Lewis Elementary, that could possibly work. But then where do those >800 students get moved to? And would it be as nice of a facility as they currently have? If JLE isn't an option, no other elementary schools are located a reasonable distance away from APE to get redistricted to. Traffic in the area is terrible, so driving to Montgomery or Huntley Hills would be insurmountable for anyone who lives below Peachtree. My preference would be to keep all of the APE community together and go to JLE -- with our teachers and	3/5/2026 2:45 PM

	staff. But if we can't do that, then I suppose making APE a grade band of K-3 could work, then we all go to JLE for 4-5, but only if JLE can be rezoned to the Chamblee Cluster. The top priority is staying in the Chamblee Cluster. If we move buildings, we would strongly implore DCSD to have the teachers and staff follow the students. We have invested so much time and money into APE teachers and would like to stay with them for the long haul. We know they love the APE community, so we should also factor that into any plans as we wouldn't want to deter teachers from staying on board with DCSD.	
1767	I feel like the drop in enrollment has to do with the vouchers being offered by the state to attend private schools and it is unfair to take taxpayer funds to cover these costs. Additionally I also feel as a magnet school parent that many families have to make challenging choices when they live near failing schools. I am afraid this will disproportionately affect our black and brown children in particular regions of our school district.	3/5/2026 2:45 PM
1768	Do not agree with the process!	3/5/2026 2:41 PM
1769	I understand the need for consolidation of facilities where we have empty seats.	3/5/2026 2:37 PM
1770	Ashford park elementary is located within a community that is historically built around the school and neighboring park. The community would rather see the school remain open, with grade structure changed if needed, instead of closing it. Closing it will hav significant ramifications for decades within this community.	3/5/2026 2:30 PM
1771	I strongly urge that Vanderlyn Elementary remain open and not be consolidated. Vanderlyn is not just a school. It is a community where children, parents, and teachers know and care for one another. Our kids are seen, valued, and supported every day. They know their teachers, their classmates, and the school staff, which creates a safe and nurturing environment where they can thrive both academically and emotionally. This sense of belonging is what makes Vanderlyn so special. While it is smaller than many other schools, that is exactly why it works so well. Children here are not just a number. They are part of a family. Our students consistently succeed, with Vanderlyn ranked number four in DeKalb County and in the top five percent of elementary schools in Georgia. Consolidating with another school would disrupt these deep, meaningful connections and the supportive environment that helps our kids grow. Vanderlyn is a place where students feel loved, encouraged, and inspired every day. Preserving this school is preserving a community that makes a real difference in the lives of our children.	3/5/2026 2:29 PM
1772	My fear is the result will be overcrowding in the schools that remain. Will the average kids per class go up or down or stay the same? I have not seen any data on that.	3/5/2026 2:27 PM
1773	Toney Elementary school has helped my son grow where he has been tested for being gifted and placed as a safety patrol officer. The amount of students to the teacher ratio works out for children to thrive. Redan High school has a great career path and my daughter has excelled with high honors and extracurricular activities there like soccer and beta club.	3/5/2026 2:26 PM
1774	Ashford Park ES is one of the oldest buildings and in need of renovation, yet has a strong teacher/parent relationship and produces high scoring students. Perhaps change APES to a PK-3 school and creating new space nearby for the 4-5 grade students.	3/5/2026 2:25 PM
1775	Make it more convenient for parents/guardians to navigate to and thru multiple sites. Have ALL information; apps, websites, ONE centralized locations. I.e, infinite Campus, DOJO, ParentTech, and any others that are required for parents/guardians utilization/access. It is extremely confusing and complicated for those who aren't tech savvy. Also NOT making the large amounts of homework and requirement nor part of the students grades. This school and possibly many others are NOT, viewing the students & parents lifestyle. Not all have a 2 parent household. Guardians also could be grandparents struggling to do the best they can. It is highly noticeable, if you are NOT part of thier cult/ organization/ Fraternity and Sorority Life you are be littled and treated horrible. The board, if they are truly concerned with these comments and concerns should be recommended to be investigated.	3/5/2026 2:25 PM
1776	Based on recent discussions, it appears the proposal affecting Vanderlyn is primarily driven by high school facility needs, rather than elementary enrollment trends or building condition. Given the planned opening of Sequoyah Middle and High School, it is important to understand whether current overcrowding pressures at Dunwoody High School are expected to persist over the next several years. Additionally, Vanderlyn's closure is contingent upon Chesnut's expansion, yet no cluster-level reassignment modeling or post-reassignment utilization data has been shared. Prior to any closure decision, families need to see clear boundary modeling,	3/5/2026 2:24 PM

	receiving school enrollment projections, and transportation impact analysis. We are open to collaborative, facility-aligned solutions, but decisions of this magnitude should follow transparent modeling, not precede it.	
1777	I can completely understand that the schools are not at capacity and the result is that the budget is being spread to cover empty seats. I don't want my kids going to schools that are very far from their community or being on a bus for over an hour to get to a school that's not in their community. The majority of the schools on the list are in South Dekalb county.	3/5/2026 2:21 PM
1778	Difficult to close community schools. Understand the pressures to consolidate but small elementary schools that feed middle and high schools hold the community together. Kepp the small elementary schools.	3/5/2026 2:21 PM
1779	I am concerned that some of the proposed elementary schools will become very large, and that the level of support available to students may decrease if staff-to-student ratios are reduced. Positions such as MTSS specialists, LTSEs, counselors, assistant principals, and special education resource teachers already carry significant caseloads, and those caseloads could become unmanageable in much larger schools. For example, a school with 1,100 elementary students and only two counselors, one MTSS specialist, one LTSE, and one assistant principal may reduce operational costs, but it may not provide the level of support our students need. While the stated purpose of consolidating schools is to allow more funding to go toward student supports, consolidation also reduces overall costs. I am concerned that part of those savings may come from consolidating positions, which could ultimately result in fewer supports available to students.	3/5/2026 2:20 PM
1780	I understand that the district is facing financial challenges, and difficult decisions must be made to address capacity and enrollment concerns. My primary concern, however, is the potential impact of relocating an entire school community in order to accommodate another school with higher enrollment. Moving one school to make space for another could be very disruptive for students, families, and staff. For example, Ashford Park Elementary has outgrown its current facility. In addressing that issue, it raises questions about whether another school, such as Dresden Elementary or John Lewis Elementary, would be relocated to make space for Ashford Park. If that were the case, there are several important considerations. Would a school like John Lewis be renamed to Ashford Park? What would happen to the current students and families from Dresden and/or John Lewis? These types of changes could significantly affect school identity, community ties, and continuity for students. Because of this, it would be helpful for the district to clearly communicate how such decisions might be made and what plans would be in place to support the affected school communities.	3/5/2026 2:19 PM
1781	I agree with the recommended consolidations	3/5/2026 2:15 PM
1782	I do not feel the need for it school to consolidate I love it close-knit community	3/5/2026 2:12 PM
1783	I'm concerned that there will be students of lower socio-economic status who are disproportionately impacted and have to travel far to go to school.	3/5/2026 2:11 PM
1784	I am glad to know that Chesnut will remain open. Expanding will cause havoc to transportation patterns.	3/5/2026 2:10 PM
1785	I do not support the shutting of schools and combining them. The elementary school already has a big population. My kindergartener has anxiety about how many people are in the school daily. If the schools are combined to be bigger, my child will not thrive and we would look at other options. This is why we like the DLI language option. It creates a smaller community within the bigger community to allow for our child to be more comfortable. The DLI program needs to continue to exist. If the schools get bigger, I imagine the public school system will lose more numbers. I do not want my high school cluster to change. I bought my house in the high school zone I wanted and don't want it to change.	3/5/2026 2:06 PM
1786	I feel that Ashford Park should have been addressed sooner rather than deciding to close it. I have high school students none that went through APS and this demographic has been gaining momentum for years way before the other new school was build down the road. It seems that this was always going to be a long term space issue. The same with CMS - there is no place for trailer to increase the footprint for more student.	3/5/2026 2:03 PM
1787	I sympathize with the need to consolidate. Are we also considering spreading students out for decreasing class size and maintain employment, or will consolidation also mean larger class sizes and less teachers? For instance, I'm at Chamblee HS where we have trailers and floating teachers.	3/5/2026 1:59 PM

1788	Overcrowded classrooms can negatively affect instruction, student learning, behavior, and teacher effectiveness. Reduced Individual Attention, Increased Behavior Challenges, Limited Differentiation and Small-Group Instruction, Space and Safety Concerns, Challenges for Students with Disabilities.	3/5/2026 1:57 PM
1789	I think the consolidations is a good idea and makes sense to support current enrollment.	3/5/2026 1:57 PM
1790	I don't care for it at all. I think that small children should be in small schools where they can develop some independence. I also think that moving schools out of neighborhoods will complicate transportation and attendance and parental involvement will plummet even further.	3/5/2026 1:54 PM
1791	Schools are more successful when they are seen as a part of the neighborhood. Consolidation into larger schools with more neighborhoods is a more institutional approach to education instead of a local community approach. Ultimately we want families to be invested in their neighborhood schools to improve the educational opportunities of the students.	3/5/2026 1:53 PM
1792	I am not in favor of consolidating our schools. I believe that this community values smaller neighborhood schools with smaller class sizes, and less students. This benefits children both academically and socially.	3/5/2026 1:52 PM
1793	I am disappointed that this scenario involves closing and consolidating elementary schools. You mention the triangle of Low Operating Cost, Robust Programming, and Small School Size, and the challenge of having all three. I understand this, and I understand that one must prioritize. However, right now your scenario prioritizes robust programming over small school size. And I would argue that for elementary children, a small, community school should be of higher priority than robust programming. At a young age especially, children need close community, a sense of belonging and safety, and a lot of hand-holding. This is much harder at a larger school. Furthermore, it would seem based on research that the ideal elementary school size is 300-400 students (https://educationnorthwest.org/sites/default/files/SizeClimateandPerformance.pdf). Your current scenario ignores the research and the anecdotal evidence of thousands of families with elementary aged children. You also mentioned the importance of having children close enough to their schools to be able to have a short bus ride. If you close and consolidate neighborhood elementary schools, more children will have to have longer drives to their schools instead of shorter ones. This doesn't make sense. And finally, families choose elementary school districts based on their small neighborhood schools. I have heard of families taking their children out of the Pleasantdale and Smoke Rise elementary schools in favor of smaller neighboring schools. We have families who have school-choiced into our school, Evansdale, for that exact reason. If DCSD no longer prioritizes small neighborhood elementary schools, I foresee that the families who can afford it will leave DCSD for other school districts, or for private schools. And DCSD will continue to decrease in value and attractiveness to families moving to Atlanta. Please prioritize small school size over robust programming when it comes to elementary school! This means investing funding into good quality 400-capacity elementary schools within smaller catchment areas, the way we currently have things, and not consolidating elementary schools into fewer and larger buildings.	3/5/2026 1:49 PM
1794	I am not in favor of consolidations because I believe that our community values smaller schools. I am not in favor of schools larger than 600 students especially for elementary school. I think our community values the smaller neighborhood schools, I know that I appreciate knowing almost all of the students and parents in my child's class. I think there is benefits socially and academically to have smaller schools and smaller class sizes.	3/5/2026 1:45 PM
1795	Closing schools, especially elementary schools is not food thing for kids when they are young learners, please see my comment about the grade band scenarios. It is a related answer.	3/5/2026 1:44 PM
1796	While I understand the district is facing challenges related to declining enrollment and underutilized facilities, I am concerned about the proposal to close neighborhood elementary schools such as Evansdale Elementary School. Evansdale is an important part of the local community and provides a stable, supportive environment for young students. Elementary schools play a unique role in building strong relationships between students, families, and educators. Closing a school like Evansdale would disrupt these relationships and force young children to transition to unfamiliar environments, which can negatively impact their sense of security and learning experience. In addition, Evansdale serves as a central hub for families in the community. Many families chose to live in this area because of the school, and removing it could weaken community engagement and neighborhood stability. Before considering closure, the district should explore alternative strategies such as adjusting attendance boundaries,	3/5/2026 1:43 PM

	strengthening programs that attract enrollment, or investing in the schools that already have strong community support. I strongly encourage the district to prioritize maintaining established neighborhood schools like Evansdale when evaluating consolidation scenarios.	
1797	The logic appears to be sound. Obviously something needs to be done about the situation. It appears that certain elementary schools will be consolidated. I think people will be fine with it as long as the school remains top-notch e.g., Austin elementary.	3/5/2026 1:42 PM
1798	I am for consolidating some elementary schools to mcNair middle school and Mcnair middle to Mcnair high school.	3/5/2026 1:36 PM
1799	They all make good points	3/5/2026 1:25 PM
1800	The school closing should be based on how old the schools are and community accessibility.	3/5/2026 1:25 PM
1801	Not sure what to think because my child is young, however security is a concern, increase in school shootings, and bus transportation which is in my opinion is highly dysfunctional. Larger more compact school leads to less one on one attention. More overwhelmed teachers.	3/5/2026 1:23 PM
1802	I think this was done without enough thought. This phase is only concerted about “buildings” but you cannot separate programs, students, and buildings. I do not want mega schools in elementary school. It is not appropriate for young children to be in a big school where they don’t know people.	3/5/2026 1:21 PM
1803	I believe small (neighborhood) elementary schools are an excellent model. Children are less likely to get lost in the shuffle and families are more likely to engage.	3/5/2026 1:19 PM
1804	Evansdale elementary kids should not be relocated outside of the neighborhood. It is a walk to school community.	3/5/2026 1:19 PM
1805	Me afecta por qué mis hijos asisten a brockett	3/5/2026 1:15 PM
1806	Would like to know more of the particulars as to selection of the schools. Ex: OakGrove because of facility age or maintenance needs vs enrollment.	3/5/2026 1:15 PM
1807	Oak Grove Elementary does not align with the stated objective of addressing underutilization. The districts's goal is to increase elementary utilization to approximately 88%. Oak Grove is at 89%, utilization (447/504 capacity 10/25) & projected at 487 students in 2026-27 (96%). Enrollment has increased for 4 consecutive years. At the current pace, Oak Grove is likely to reach or exceed capacity within 2-3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills (91% utilization) & Briarlake (73%) . Sagamore Hills has only 43 available seats, Briarlake approx. 130 available seats. Together they can't absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. The surrounding corridor is experiencing a lot of growth with the Old North Dekalb Mall being redeveloped & Corporate Square/Northbend redevelopment. The new children's Arthur Blank hospital, Emory Heart & Vascular expansion, and ongoing Emory Hospital Expansion is bringing new residents and families to the area. New homes are being built. There are over 200 students on the waitlist, including more than 100 kindergarteners. Oak Grove is one of the highest performing schools in the review. Closing a school that exceeds utilization targets, is growing, doing so well academically, and has so much input from parents and the community as well as good teachers should not undergo any changes.	3/5/2026 1:15 PM
1808	It is my understanding that Oak Grove Elementary, a proposed closure, is already exceeding district utilization targets, is experiencing sustained growth, and is one of the highest performing schools in this district. It also appears from the presentation that enhanced efficiency is a large guiding principle behind these recommendations. I would argue that the years many of us parents have spent building community around a school for the development and well being of our children and the community at large, our work should matter just as much. Recommendations for Kittredge have not yet been made, so I cannot provide feedback yet.	3/5/2026 1:14 PM
1809	Same grade band is a requirement for safety of students. Other counties have theft issues, assault issues mixing bands of students. Kingsley needs to stay open providing east Dunwoody a normal school for elementary grades.	3/5/2026 1:11 PM
1810	Makes sense	3/5/2026 1:09 PM
1811	Closures of so many schools will result in busing children unreasonable distances, placing increased burden on parents and caretakers. Ultimately seems to be affecting the poorest in	3/5/2026 1:07 PM

	the community most, as their schools close first.	
1812	I do not like the initial facilities scenarios and feel that schools consolidations would work with clusters of students (PK-2) (3-5) (6-8) and high school.	3/5/2026 1:04 PM
1813	Why is enrollment down? It seems like many of the elementary expansions are in the northwest part of the county with several closures in the southwest part of the county, are we underserving that area in this scenario? Why are we basing closures today on forecasts for 2030? I'm also concerned about expanding Laurel Ridge - where would that expansion occur? Would they take down the woods behind the school? How will the neighborhood feel about that? Is this impacting magnet schools or programs?	3/5/2026 1:02 PM
1814	I understand and am in favor of the consolidation scenario in that it may help provide better resources for the students. Right now as it relates to sports, our sports teams (aka mostly the parents) are having to raise thousands of dollars so our kids can play school sports, because of how thin the funds are spread. This keeps many students from being able to partcipate and spreads parents' finances thin.	3/5/2026 12:59 PM
1815	it seems like the ratio of teachers and students is already bad and this will exacerbate the situation. many of these schools have established communities that will be disrupted by this process	3/5/2026 12:58 PM
1816	Thoughtful consideration for first round of discussions	3/5/2026 12:56 PM
1817	Stop with the threats. We have seen this over and over again. Learn how to manage your money and stop wasting it on huge contracts to corrupt executives. The board sucks and so does the management.	3/5/2026 12:55 PM
1818	I strongly support this scenario. As an educator at Lithonia High School, I see firsthand the significant space limitations we are currently experiencing. Class sizes regularly exceed 30 students, and many teachers must share classrooms because there is not enough space for each teacher to have their own room. In addition, the student population often feels overcrowded throughout the building. Redistributing students and staff to a nearby school with greater capacity could help alleviate these challenges and create a more effective learning environment for both students and teachers.	3/5/2026 12:55 PM
1819	The school my children attend is only affected in the current scenario through potential expansion and I would appreciate clarity on what that means for our community. We're excited to have additional students and families join us because we treasure our school, it's community, and it's academic outcomes, but don't know what this holds for the property - a new build? Trailers? More details regarding what expansion actually looks like would be appreciated for people to provide informed feedback.	3/5/2026 12:51 PM
1820	It is nice to see that DCSD is appearing to be cognizant of some areas where money is being wasted. After watching the video and looking at the 2025 budget on the DCSD website I think that the data might show some areas need to be addressed different than they have. I have no problem for consolidating but it seems like the North part of the district shows more growth in the buildings that the 2025 budget doesn't show for enrollment.	3/5/2026 12:50 PM
1821	I think that the consolidations are acceptable as long as older facilities are updated to accommodate larger and/or different populations or to improve the quality of life and educational experiences for populations already served.	3/5/2026 12:49 PM
1822	I understand the need to close some facilities due to cost and low enrollment, however, closing elementary schools which help mold the youths primitive years can hinder their overall growth.	3/5/2026 12:47 PM
1823	Oak Grove does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization	3/5/2026 12:47 PM
1824	Please please please do not close Evansdale. My spouse and I specifically bought a home on Townley Circle to start a family. We LOVED the elementary school being nestled in our	3/5/2026 12:46 PM

	neighborhood. For my future children to get to walk to school was going to be a dream. The school also adds so much value to our neighborhood.	
1825	Seem good	3/5/2026 12:45 PM
1826	It’s good initiative I think is a good idea.	3/5/2026 12:44 PM
1827	It is clear that buildings need to be consolidated- I hope that we can keep communities together.	3/5/2026 12:44 PM
1828	I am not opposed to the closing of some schools. It seems that they are already overcrowded.	3/5/2026 12:42 PM
1829	Do not close Evansdale. Evansdale should be expanded and renovated. The schools has ample land and space for expansion, is projected to have increasing enrollment numbers and is in need of updates.	3/5/2026 12:41 PM
1830	I support addressing overcrowding at Dunwoody High School and want strong long-term facilities planning across the cluster. Since SAP is framed around enrollment trends and utilization, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. Before any closure decision, it would be helpful to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications.	3/5/2026 12:41 PM
1831	I would love for Ashford Park to stay in the current location but be updated and upgraded. The close, tight knit neighborhood feel is a positive for the entire community. However, most importantly, I would like the current student body population to stay together and feed into the Chamblee Middle School and Chamblee High School cluster	3/5/2026 12:37 PM
1832	Schools due for closure: predominantly serving lower SES or disadvantaged communities? How will system ensure they are supported in new schools?	3/5/2026 12:34 PM
1833	I understand why this plan is being enacted. I think your presentation did a good job of providing me with the base facts.	3/5/2026 12:33 PM
1834	Evaluating any scenario based solely on "buildings” with zero concurrent discussion of programs, community impact or current student achievement is unrealistic. Facility cost can not be discussed in isolation - these facilities are intrinsically linked to the communities they serve. Traffic and housing market considerations, construction costs, already in-process school improvements, existing school achievements and community developments ALL play a role and must be examined holistically. The idea that facility cost should be leading the charge shows such a deep misunderstanding of/disrespect for the essential role elementary schools play in community sustainability. This process has not been transparent - the attempts at soliciting community feedback have felt disingenuous, poorly timed and communicated, and rushed. The lack of stable DCSD leadership, the absence of community-invested ownership of this process (ie: meetings run by outside consultants), and an all-time low level of trust in the current board are all reasons to slow this process down. If a project of this generational magnitude is to have any chance of success, there must be buy in from the community. And DCSD has not earned the trust necessary for that at this time.	3/5/2026 12:22 PM
1835	I think it is a good idea.	3/5/2026 12:20 PM
1836	detrimental to the communities where the children are	3/5/2026 12:18 PM
1837	I know we have been asked to only discuss buildings, but I really cannot talk at all about the building until I know where the 800+ students will be displaced. Ashford Park elementary school is one of the highest performing elementary schools in the county. It is without a doubt the reason the property values in the elementary zone are so high. If you look just outside the zone, property values are significantly lower. I truly believe that changing too much, separating too much of our community will negatively impact the schools ratings and the property values in the area, thus bringing in less tax dollars to the county. Ashford park as a building is a pillar in our community. This community is so very special to us. I know the physical building has its limitations and is not "ideal" but I truly believe my children will receive a better education here, even with it being overcrowded. If there must be a change, I believe the school should remain an early education center. Potentially expanding the preK programs and housing Prek-1st, then the rest of the Ashford Park zone in 2nd-5th could go to John Lewis. The population North of Peachtree street could be rezoned for Montgomery after their expansion but I truly value this community and would like for as many of us as possible to stay together. We would also need the cluster to remain together at Chamblee middle and Chamblee high. If you change this	3/5/2026 12:17 PM

	community too much, I truly believe you will lose great teachers, the school ratings will go down and you will not receive as much money from affected property value depreciation. Spending 25 million dollars on our current renovation and then not using the building for student education feels like a gross misuse of tax dollars.	
1838	Please do not foreclose Oak Grove Elem. It has been a last staple of this community and it means a whole lot to our neighborhood.	3/5/2026 12:16 PM
1839	The consolidations seem to be happening in mostly Black or low-income neighborhoods.	3/5/2026 12:15 PM
1840	We moved here specifically for Brockett Elementary. This only seems money driven and irrational	3/5/2026 12:14 PM
1841	Based on recent discussions, it appears the proposal affecting Vanderlyn is primarily driven by high school facility needs, rather than elementary enrollment trends or building condition. Given the planned opening of Sequoyah Middle and High School, it is important to understand whether current overcrowding pressures at Dunwoody High School are expected to persist over the next several years. Additionally, Vanderlyn's closure is contingent upon Chesnut's expansion, yet no cluster-level reassignment modeling or post-reassignment utilization data has been shared. Prior to any closure decision, families need to see clear boundary modeling, receiving school enrollment projections, and transportation impact analysis. We are open to collaborative, facility-aligned solutions, but decisions of this magnitude should follow transparent modeling, not precede it.	3/5/2026 12:12 PM
1842	I do not agree that Oak Grove is under utilized, we are not far from capacity sms have school choice applicants that could get us there if principal let them in. Also, the school has a healthy budget not from state/city but from parents	3/5/2026 12:11 PM
1843	Ashford Park is a community gem and should be improved instead of closed.	3/5/2026 12:09 PM
1844	Initial impression was that Elementary Schools that have less than 60.6% underprivileged students (DeKalb County School District average) are being closed to merge with Elementary Schools that have a higher percentage of underprivileged students.	3/5/2026 12:07 PM
1845	Son perfectas	3/5/2026 12:05 PM
1846	I think the plan is pretty well thought out and makes sense to consolidate to maximize the use of your resources while causing the least amount of disruption possible. The one thing I would like more information on is about the elementary schools, as this is the largest change. I work primarily with refugee and immigrant youth and would like to know if you have looked at the demographics of all of the schools you plan to close or reallocate to see what percentage may be English language learners or need more support due to disrupted education. I'm glad to see Clarkston HS and Indian Creek ELM remain largely the same but want to make sure that other who may not be in this school will still have meaningful access to programs that can address their linguistic and cultural needs. I just worry if they are going to be spread out to schools that will be less equipped to help them. On the other hand, if the consolidation efforts come with a more intensive program for helping ELL students that could be a boon and help to get kids on the right track and avoid some of the issues in school persistence.	3/5/2026 12:03 PM
1847	It seems they are based only on money, not the benefits of the students.	3/5/2026 12:03 PM
1848	I strongly oppose any scenario that would close or consolidate Oak Grove Elementary. Oak Grove is the heart of a thriving and highly engaged community. Families do not attend Oak Grove by default. They actively choose it. Our school consistently posts some of the highest academic performance results in the area, reflecting the strength of our teachers, leadership, and deeply involved parent base. From a capacity standpoint, Oak Grove does not reflect the underutilization challenges cited in the district's broader analysis. We currently operate at approximately 85% utilization, with projections approaching 96% by 2026. In addition, our waitlist exceeds 200 students, including more than 100 kindergarteners. These numbers demonstrate sustained and growing demand. Closing or consolidating a school that is high performing, nearly at capacity, and in strong demand would undermine one of the district's most successful community school models. Oak Grove benefits from exceptional volunteer engagement through our PTA and the Oak Grove Foundation, with parents contributing significant time and financial support. This partnership strengthens student outcomes and reduces strain on district resources. If the goal of the Student Assignment Project is to improve resource alignment, academic quality, and long term sustainability, Oak Grove should be viewed as a model to strengthen, not a candidate to disrupt. I urge the district to reconsider any scenario that negatively impacts Oak Grove Elementary and instead prioritize solutions	3/5/2026 12:02 PM

	that address true underutilization while preserving high performing, in demand schools that families overwhelmingly support.	
1849	It doesn't make sense to me to consolidate schools that are already overcrowded, especially without considering redistricting, attendance boundaries, and the traffic implications that will ensue. Additionally, it is not clear exactly what benefits will be achieved here. Vague notions of "consolidate resources and strengthen programs" are not clear enough - what resources/programs will be made stronger? Is there research that shows that the underlying facility assumptions are true (elementary schools must have at least 700 students or whatever the rubric was)?	3/5/2026 11:59 AM
1850	Consolidating schools to save funds can work, however change is difficult for people.	3/5/2026 11:58 AM
1851	Al ingresar se siente una calidez tanto de docente como administrativo. Lo que te hace sentir buenas vibra un ambiente totalmente familiar, dudas que tenía al inicio todas fueron disipadas con el tiempo. Me dio la confianza de siempre poder preguntar sin ningún temor lo mismo que con mi hija.	3/5/2026 11:55 AM
1852	Large elementary schools will be detrimental to our communities and ruin what makes DeKalb County special and a great place to live.	3/5/2026 11:54 AM
1853	The committee has developed a comprehensive plan based on the needs of the community.	3/5/2026 11:53 AM
1854	My feedback on consolidated Robert Shaw elementary school with other schools are a bad idea.	3/5/2026 11:51 AM
1855	Its very confusing. Huntley hills is old and needs work. There isn't enough teachers too many kids and economically needs to be more 50/50. Get rid of title 1 doesn't help. Ashford park and Montgomery schools school be all mixed in. Huntley hills gets low grades because it's isnt economically equal. People should be able to place there kids in better schools that are close to where they live. Montessori should only be prek-2. Third -5th should be traditional learning. Montessori should include traditional concepts. Kids are not set up for unnecessary at Huntley hills. ES students shoukd be at different schools at its slows down learning for other students.	3/5/2026 11:51 AM
1856	I do not want to make changes that would make class sizes bigger or reduce the feeling of a community school. I am very pleased with the sizes of the classes currently and I feel the school community is very strong and getting stronger.	3/5/2026 11:44 AM
1857	I feel that it is unfortunate that there’s potential for the closing or consolidation of facilities due to decreasing enrollment and DeKalb County. Have to get an important thing to consider, is the root cause for the decreasing enrollment and how the remedy is going forward.	3/5/2026 11:43 AM
1858	I live in a neighborhood where children can walk to Brockett Elementary. As original homeowners age out of our neighborhood, young families are moving in. We have several families in my cul-de-sac with babies and toddlers. The number of children going to Brockett Elementary will increase in the next 5 years.	3/5/2026 11:43 AM
1859	Oak Grove elementary is an integral part of my community and education.	3/5/2026 11:40 AM
1860	Actually the best elementary school ever. It is what I found my best friends, felt safe as a child, and had the best teachers ever	3/5/2026 11:36 AM
1861	This appears to be a large undertaking. I have trouble seeing how you can use all the facilities that will be vacant in a meaningful way. I also am concerned for longer bus rides. For example, our grandchildren do not ride the bus in the morning to school now because they would have to get up 30-45 minutes earlier and be on a bus. They do ride it home. With these changes, I do not see how bus rides would be shorter when they have further to go.	3/5/2026 11:30 AM
1862	None	3/5/2026 11:30 AM
1863	I was surprised to see Ashford Park listed as a school to close. This school had been previously identified as overcrowded. I used to have a child attend this school and it was crowded. This school has a very strong parent community. It does not seem like it would be a good idea to close this school.	3/5/2026 11:26 AM
1864	The initial plan for consolidation makes sense to me.	3/5/2026 11:21 AM
1865	I feel like many elementary schools on in the Chamblee Cluster are in very poor condition. There should be a concerted effort to improve schools throughout the county. That being said, closing high schools and repurposing them as middle or elementary school is a good idea.	3/5/2026 11:21 AM

	Other considerations could be made into repurposing high schools to house magnet programs so that they can run through middle or high school if there are available facilities.	
1866	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/5/2026 11:20 AM
1867	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. 	reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
1868	Oak Grove Elementary is an excellent school with a decades long history of success. It is vital to this community and I am against closing it.	3/5/2026 11:14 AM
1869	The facilities are old and could use updating. With the help of the PTA the school has made updates to accommodate. The school is amazing, the teachers and staff are great.	3/5/2026 11:13 AM
1870	I don’t think that putting young kids as pre-K and elementary school with middle school students is a good idea. I also think that Middle School and high school students sharing a facility is going to effect the academic schedule and after school activities. I think it will give less opportunities for the students.	3/5/2026 11:13 AM
1871	Process is long overdue	3/5/2026 11:12 AM
1872	As a parent, teacher, and coach in DeKalb I understand that money is being wasted on buildings that are being underutilized. I'm an Art teacher in a building with only 1 actual art classroom, but 3 art teachers. We float and share sinks. We make it work, but it does take away from what we can offer our students. I am also a coach needing transportation to matches for my players, but bus drivers are stretched so thin I always have to have a plan B in case our bus doesn't show up on time. We don't have the facilities to have our JV program at the school. I'm a parent with kids at the school where we make things work, but know we shouldn't have to "make things work" with what we have and the opportunities they are missing out of, because money is spread thin to keep underutilized schools open. From a business standpoint, it's a no brainer, but from an emotional standpoint, I understand the hurt that families face who could lose their school and the potential that we lose more families due to these changes.	3/5/2026 11:12 AM
1873	n-a	3/5/2026 11:09 AM
1874	Concerned. Vanderlyn is a key part of our community and offers children the ability to attend schools that are nearby and high quality. The additional commute will put a strain on families and students.	3/5/2026 11:08 AM
1875	It makes sense to close schools, but in the end I believe that you (DCSD) will screw it up due to your unbelievable ineptitude, bureaucracy, and cronyism. You'll take years to make a decision because you lack foresight and courage. It will cost taxpayers millions of dollars. DCSD is more concerned about keeping themselves employed and fleecing as much money out of the taxpayers as possible by awarding contracts to incompetent yet connected contractors. There is ZERO accountability. Please don't think I'm MAGA, because I am NOT! I'm fatigued, disheartened, and saddened by your inability to properly run a school district. Even basic necessities like a properly running HVAC system (ex. Chamblee High or Kingsley Elem.) are ignored or delayed. I'm tired of you. I've stopped caring.	3/5/2026 11:08 AM
1876	Oak Grove does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake’s current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake’s enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than	3/5/2026 11:07 AM

	$2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
1877	I think that trying to make facility decision without taking other factors, such as redistricting into account seems irresponsible. The buildings are important and utilization is important but how communites and families will be affected by closing buildings and redistricting makes the picture different. Closing high performing schools does not make sense from an educational standpoint.	3/5/2026 11:06 AM
1878	Do not close oak grove elementary	3/5/2026 11:03 AM
1879	I think this is a terrible idea. You are going to overcrowd certain schools with this consolidation. You are proposing to close some schools that are highly rated and help drive property values in those areas because people want to live in those areas. I think you need to reevaluate what you are trying to accomplish. Focus on the portions of DeKalb that are underperforming . Midvale just underwent a building expansion for ADA which I'm sure cost the taxpayers a significant amount of money and now you are talking about closing it. Residents do not want empty school buildings sitting in the middle of their communities. Do better DCSD.	3/5/2026 11:03 AM
1880	Great!	3/5/2026 11:01 AM
1881	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/5/2026 10:56 AM
1882	I agree that the current building for Ashford Park Elementary School is not sufficient for the student population or long term goals for Dekalb County Schools. However the community involvement at the school is strong and that leads to increased program offerings at the school	3/5/2026 10:55 AM

	and academic achievement. Keeping the student body and community together is best for the students. If is not feasible to build a new school at the current location due to lot size, students should be moved to a building that can accommodate the entire Ashford Park population rather than splitting them up into several different schools. John Lewis opened in 2019 to relieve over crowding at Woodward, Montclair and Dresden. Since then 2 new schools were built (Doraville United and Dresden) A lot of students are driving further to attend John Lewis than their closest elementary school. Dekalb should look at redrawing boundaries in the area now that there are 2 newer/larger schools. Also when John Lewis was built, the neighborhood where it is located was once part of the Ashford Park Elementary School attendance zone and Chamblee Cluster. There were also conversations during the redistricting process in 2018/2019 that Ashford Park may eventually close and those students would be sent to John Lewis. Moving Ashford Park students to the John Lewis building would be a solution. I also think John Lewis should be moved to the Chamblee Cluster with a feeder to Chamblee Middle and High since the current Ashford Park Elementary School feeds into Chamblee. I know that this part of the process is mostly focusing on buildings and not zones. However the schools in the North are full or over capacity. It is not a simple as closing 1 school and combining 2 schools into one. I don't believe that we can close schools in this area, especially an over populated school, without a plan on where to send those students.	
1883	If you close one school close them all and allow parents to home school and get compensated for teacheing their own child. It will pro be best since that this is all about money... if you stop school choice we wouldnt have this problem. Yes school choice was a way of better learning but now it no difference kids are kids and they are going to do whatever they want it doesn't matter the school. Take school choice away and it will fix the empty seats kids go to their own neigjborhood school.	3/5/2026 10:54 AM
1884	I’m OK with focusing funds & reducing locations. However, I do not believe it makes sense to close Vanderlyn which has amazing scores and full student population. It’s also an asset for the Neighbourhood.	3/5/2026 10:49 AM
1885	strongly support keeping Evansdale Elementary School open. My granddaughter currently attends Evansdale and is part of the Dual Language French program, which is a valuable and unique educational opportunity for students in the district. Programs like this promote bilingualism, cultural awareness, and global competency, which are essential skills for the future. Consolidating or closing Evansdale could disrupt students’ academic progress and weaken a program that benefits many families. I believe the district should prioritize preserving successful academic programs and maintaining stability for students and families.	3/5/2026 10:49 AM
1886	I understand the purpose and support the need to consolidate. The goals of utilization are fair. Our concern is when a school is a pillar of a community and it is closed....it will affect our community without a clear understanding of what is next for our families	3/5/2026 10:46 AM
1887	I have concerns about expanding elementary schools and closing others. First, statically elementary students are more successful with smaller schools. Second, for many of the elementary schools you want to expand there is no room for expansion. These schools are located in neighborhoods with homes on most sides. Finally with these buildings being in the middle of neighborhoods, using them as office buildings, specialty education, etc. could put the neighborhood at an uneasiness. People don't typically want strangers in their neighborhoods. If they are demolished, the construction and effects of that on the neighborhood can be negative. Not only causing noise pollution but also environmental.	3/5/2026 10:39 AM
1888	I hate the idea of mega schools instead of smaller, neighborhood based elementary schools. Young kids will do better in smaller schools. The traffic impact for the neighborhoods with mega schools and the commutes for the families who are farther away will be horrible.	3/5/2026 10:36 AM
1889	My initial feedback regarding the proposed school consolidations is that I am concerned about the potential for overcrowded classrooms in several schools. When student populations increase without a proportional increase in space or staffing, it can impact the quality of instruction, classroom management, and the overall learning environment. It is important that we carefully consider how consolidation may affect class sizes and ensure that students and teachers still have the space and resources needed to be successful	3/5/2026 10:35 AM
1890	I think that the consolidations are a bad idea right now. The district isn't even a year out from a failed superintendent - the parents I'm talking to don't have any faith in district leadership and already considering pulling their kids from the district to put them in private school (as a we). Another half-baked, knee-jerk major project from the district is not what we need right now. We need a district that hears parents and is will to establish trust. Having been on the PAC during	3/5/2026 10:34 AM

	the pandemic, I know first hand that a non-trivial chunk of the decline in enrollment is driven by parents pulling their kinds because they don't trust the district (I'd warned the principle that this was happening, she didn't believe me and said that enrollments would bounce back - she was wrong). Assuming that is still true (and my read is that it is), this change would result in fewer students, fewer jobs, and - because these are the same families that are generally driving up the districts performance - the district will fall even further behind the national average in SAT/Scores and Proficiency Rates (which are already pretty abysmal at 31% in reading and 24% in math). I don't understand why the district won't focus on education instead of just finances. Seems like more fallout from Horton's failed tenure as superintendent: thinking about finance and the good of the district over thinking about students and their education.	
1891	Oak Grove is a growing area with a strong community and high performing schools. It would be a big mistake to close any school in this area.	3/5/2026 10:32 AM
1892	Midvale as well as some of the other schools in the Lakeside and Tucker cluster should not close. Theses elementary schools are successful BECASUE they are small and work for the community.	3/5/2026 10:31 AM
1893	I support the scenario 1 proposed.	3/5/2026 10:31 AM
1894	I disagree with the consolidation. In my professional opinion, elementary students benefit from smaller classroom sizes. They are able to receive the academic attention they need to grow and close the achievement gaps.	3/5/2026 10:28 AM
1895	I’m not on board with school closing in our south DeKalb area. However I do appreciate the other scenarios that were presented to us such and do consider closing schools that are uninhibited for students and staff	3/5/2026 10:27 AM
1896	Our tax dollars have to be efficiently used. The school system has told us that the allocations of seats per students is inefficient. It is very obvious!	3/5/2026 10:24 AM
1897	The impact of school closures will disrupt community & families. An immediate impact on housing will disturb hone value & a direct effect on schools population decreasing even more.	3/5/2026 10:21 AM
1898	I think consolidation is a bad idea because from what I understand, it would put very small children (preK) in the same building with much older children (middle school) . This is bad because already in the elementary school there is a huge gap in age and little kids are exposed to language and knowledge that is highly inappropriate for their age. This could only get worst if elementary and middle school would consolidate. Little kids need to be in little schools.	3/5/2026 10:20 AM
1899	Evaluating any scenario based solely on "buildings” with zero concurrent discussion of programs, community impact or current student achievement is unrealistic. Facility cost can not be discussed in isolation - these facilities are intrinsically linked to the communities they serve. Traffic and housing market considerations, construction costs, already in-process school improvements, existing school achievements and community developments ALL play a role and must be examined holistically. The idea that facility cost should be leading the charge shows such a deep misunderstanding of/disrespect for the essential role elementary schools play in community sustainability. This process has not been transparent - the attempts at soliciting community feedback have felt disingenuous, poorly timed and communicated, and rushed. The lack of stable DCSD leadership, the absence of community-invested ownership of this process (ie: meetings run by outside consultants), and an all-time low level of trust in the current board are all reasons to slow this process down. If a project of this generational magnitude is to have any chance of success, there must be buy in from the community. And DCSD has not earned the trust necessary for that at this time.	3/5/2026 10:20 AM
1900	I think Montgomery is a great school building to expand.	3/5/2026 10:18 AM
1901	I understand the need for consolidation within our district due to the low enrollment. However, I am concerned about the employment of teachers since the schools will be downsizing.	3/5/2026 10:15 AM
1902	There is no need for consolidations	3/5/2026 10:14 AM
1903	They should not be done. Why not make the school system better with smaller class sizes.	3/5/2026 10:11 AM
1904	I support the district in the process, as difficult as it is. I think Vanderlyn Elementary should be shut down and those kids send to Austin or Dunwoody. Dunwoody High needs that space!	3/5/2026 10:09 AM
1905	I feel the Redan should stay open, because its one of the oldest schools in the area.	3/5/2026 10:07 AM

1906	None	3/5/2026 10:06 AM
1907	Neighborhood elementary schools are what makes Dekalb County different from those that have mega schools. If those schools are properly run (even if incrementally more expensive), it is a huge boost to housing values and thus property taxes. Additionally, poor leadership (or even appearance of it) has caused families with the means to go to private schools or home schooling and thus removes students from DCSD. Therefore, keeping as many well-run schools open will boost numbers.	3/5/2026 10:05 AM
1908	The facilities scenario for consolidation seems like it would still benefit some areas and not all. Small class sizes are ideal for some learners and increasing sizes for teachers isn't ideal.	3/5/2026 10:00 AM
1909	I am unable to see the proposed plan - the county should make it easier to understand the proposed scenarios. My feedback is the magnet program should continue to be mapped to Chamblee Middle and High School. Also, Oak Grove Elementary School should remain open as it's central pillar of the neighborhood.	3/5/2026 9:59 AM
1910	The scenarios do not seem well thought out, through, or sensible. HPM should not be involved in this process period. Start from scratch.	3/5/2026 9:59 AM
1911	Vanderlyn is a high performing school with very involved families. It is the reason why so may move into the area, so it could lead to a decrease in local property values and disrupt the stability in the area.	3/5/2026 9:54 AM
1912	Oak Grove Elementary is the core of the community. A top tier school that is centrally located and easy to access. A consolidation to another location would be very disruptive.	3/5/2026 9:53 AM
1913	Very dissapointed in the elimination of community schools which have been in exsistence for years as well as a lack of closures in the north end of the county.	3/5/2026 9:53 AM
1914	Great	3/5/2026 9:53 AM
1915	Understood the need to address declining student numbers. I think the process needs to account for (a) the quality of schools proposed to be closed and (b) the impact of those closures on the related communities. My sons both attended Oak Grove Elementary and Lakeside High. Oak Grove is a key part of our community and should not I believe be closed. Actual usage is trending upward from the Covid trough, and is higher than projected amount used in the analysis.	3/5/2026 9:53 AM
1916	Consolidation at the elementary level may make sense given the small size of some area schools. Although our specific high school, Lakeside, is overcrowded and needs relief to resolve parking issues and maybe they could actually use the lockers!	3/5/2026 9:52 AM
1917	I would encourage the district to be very cautious about consolidating schools. Stability for students and families is extremely important, especially for those already established in a cluster. Consolidation can create overcrowding, longer commutes, and disruption to established school communities. If consolidation is considered, the district should prioritize minimizing disruption for current students and maintaining strong neighborhood school clusters.	3/5/2026 9:50 AM
1918	There is definitely a need for a redistribution of students and there are buildings that are not up to standards. Closing some schools and moving students to better/newer schools is a good solution. However, just listing school closures without any information about where those students would be moved to is leading to more questions that answers.	3/5/2026 9:49 AM
1919	I do not agree with it schools will become over crowded and farther in travel	3/5/2026 9:47 AM
1920	While I understand that there is a resource issue, consolidation, especially at the elementary school level would be to the detriment of the schools. For elementary school aged kids, having smaller schools allows for a stronger, closely knit community. I feel safe sending my child to Brockett. She is known and at least knows of most the staff and administration. If schools consolidate, there is less opportunity to build strong connections, and I fear the teachers and staff would be overwhelmed with the volume of students.	3/5/2026 9:45 AM
1921	Fire middle management and consultants. Us savings to serve children	3/5/2026 9:43 AM
1922	Consolidation makes sense for schools that are significantly under capacity. Ashford Park Elementary is over capacity, has strong parent & community support - so it should not be considered for consolidation.	3/5/2026 9:42 AM

1923	My main concern with closing Vanderlyn is that sending students to another elementary school is going to cause horrendous traffic issues. The traffic down Mount Vernon is already very congested, as well as the school traffic to Austin which backs up on Roberts Dr./Chamblee Dunwoody Rd. Although close in proximity, there is not a good path for Vanderlyn families to get to Austin without adding to the already bad traffic. Also, Vanderlyn is a special school with excellent teachers and students are thriving in that small school environment. It would be a shame to close Vanderlyn.	3/5/2026 9:42 AM
1924	I don't think it bad because our community is changing greatly more Caucasian are moving in our area and if they do have children they do not put them in our local schools.	3/5/2026 9:41 AM
1925	I understand the consolidation because of aging facilities. However, I think one of things that make our elementary schools great is having small neighborhood schools. I know my children enjoyed that environment.	3/5/2026 9:40 AM
1926	It would be a massive mistake to close down Oak Grove Elementary. The school is community-minded, oriented, and focused. The utilization of the school is at near capacity, and makes no sense to merge with other schools. It's not a broken school. Please don't break our children by breaking the school.	3/5/2026 9:40 AM
1927	I think Yal SHOULD NOT CLOSE THE SCHOOLS	3/5/2026 9:35 AM
1928	I do not agree with the consolidations.	3/5/2026 9:33 AM
1929	As much as our family has loved the small ES model in the Lakeside cluster, I knew that it was no longer sustainable operate that many buildings with fewer and fewer students. The reduction in enrollment in an already small actually created its on challenges in resourcing and programming. I support the initial scenario with the caveat that I'd need to see how all the students from closed schools will be reassigned	3/5/2026 9:32 AM
1930	Two elementary schools near me are marked for closing even though they are over full. Our local elementary school is marked for expansion although it is already very full with mobile units.	3/5/2026 9:31 AM
1931	Henderson Middle & Lakeside High are the largest in DeKalb County, so I think it would be foolish to close them. Evansdale Elem is a Magnet program with a French Program and is at a high capacity with sufficient land to add more trailers if needed (other schools don't have this option).	3/5/2026 9:30 AM
1932	I understand why the consolidations are necessary, but have concerns about the equity in the process.	3/5/2026 9:30 AM
1933	Congratulations on putting out a plan to get rid of trailers. That has never been done before.	3/5/2026 9:28 AM
1934	Very negative! There has been substantial population growth in the Ashford park / chamblee cluster in the last decades. These schools are performing at a high level with significant parental involvement and community fundraising support of the schools. Closing Ashford park and changing the middle school trajectory away from chamblee to underperforming middle and high schools is illogical and does not create a good long term fix. Money should be invested in Ashford park's physical campus to support the needs and keep the community and most importantly the kids and their friendships connected. Sending Ashford Park students to a cluster where English as a second language is the majority would be a travesty. Spanish speaking students deserve a quality education as well but a classroom environment mixing dual language speakers will NOT be effective and school performance will suffer. Look at the models used in Europe when American families live overseas. They go to "American schools" for their educations with other English speaking kids and are in time assimilated into the local culture as they are more able to particulate in the local language and be positive contributors.	3/5/2026 9:25 AM
1935	Very educational	3/5/2026 9:24 AM
1936	I do not want Midvale Elementary to close or consolidate. This is an IB school with an IB track from Pre-K through high school. The only one in this cluster.	3/5/2026 9:24 AM
1937	I do not want Miller Grove Middle school to become an elementary school.	3/5/2026 9:20 AM
1938	I believe the current facility structure is working well for our community. Brockett Elementary serves students in the K–5 grade band and offers the International Baccalaureate Primary Years Programme, which provides a strong and consistent academic foundation for young learners. The current setup allows students to remain in one supportive environment	3/5/2026 9:20 AM

	throughout their elementary years, which helps build stability, strong relationships with teachers and staff, and a sense of community among families. The facility is already structured to support the needs of elementary-aged students and the IB learning model, which focuses on inquiry, collaboration, and whole-child development.	
1939	I think it is completely misguided to make decisions based just on building condition and proximity to other facilities without discussing programs. I strongly disagree with the idea of closing schools to consolidate into mega schools of 800-1000+ students. If DCSD truly invested into the neighborhood schools, families wouldn't leave for charter or private schools and then the schools would not be underenrolled. Mega schools are a terrible idea for student success, for community building, for traffic, etc.	3/5/2026 9:17 AM
1940	I like scenario one, expanding chesnut elementary and closing vanderlyn in order to hopefully one day expand dunwoody high school	3/5/2026 9:16 AM
1941	I am very concerned with the proposed closing of Evansdale. We have a strong school community with caring teachers, parents and community members. We have an amazing diverse population of students that work hard everyday to be successful in the classroom. We also have a great DLI French program that all 4 of my children are currently a part of a the school. I feel that the opportunity for them to learn French at an early age has been amazing for their language and brain development.	3/5/2026 9:16 AM
1942	I DO NOT support closing elementary schools. Younger children benefit most from personal attention they get in small schools and small class sizes. I DO support the consolidation of middle schools and high schools. In middle and high school, classes are more specialized and so it makes sense that adolescents could still get a personalized experience even in a larger school and benefit from enhanced programming.	3/5/2026 9:15 AM
1943	I think it generally makes sense	3/5/2026 9:13 AM
1944	I understand the idea behind it and support the changes.	3/5/2026 9:11 AM
1945	I think Ashford Park Elementary School should not be closed.	3/5/2026 9:11 AM
1946	I do not agree.	3/5/2026 9:11 AM
1947	i think its a great idea, concerned with transportation. Few schools mean more kids bussed and the time to and from school will be extended. Already have late buses nearly every week at Princeton elementary.	3/5/2026 9:05 AM
1948	I'm confused how Ashford Park is undergoing a multimillion dollar renovation and that would not be enough to accommodate the needs. This is a large piece of property in the middle of a residential neighborhood so of course we would love to see our children stay at this location. If that cannot be done, can the school be reimagined on this property ? We bought this house (Tobey Road) bc of the elementary school being in the neighborhood. If the AP cluster gets moved to John Lewis Elementary, I would want the community and teachers to be there too. It doesn't seem right to break up a strong school and its performance without brining the teachers along. Can the entire AP community be accommodated at John Lewis?	3/5/2026 9:05 AM
1949	I think consolidations of elementary schools are a horrible idea. People move to (and buy houses in) areas for the elementary school.	3/5/2026 9:03 AM
1950	I would like to see fewer consolidations and I would not like for middle and high schools to be combined. There is such an age discrepancy among middle and high school students that I do not believe they should be housed together.	3/5/2026 8:58 AM
1951	Great neighborhood school	3/5/2026 8:54 AM
1952	I think you all need to reconsider combining the South DeKalb elementary schools into one building.	3/5/2026 8:53 AM
1953	Why isn't Druid Hills Middle School listed?	3/5/2026 8:52 AM
1954	I believe everything should stay the same I believe it will cause a lot of issues merging students together. I do believe that there are buildings that should be torn down and upgraded.	3/5/2026 8:52 AM
1955	As a parent, you try to make the best choices for your children. Our home school is Dunwoody Elementary School, but through school choice, we chose Vanderlyn because there is something special there that can't be replicated in a big school. We toured several schools and the sizing of Vanderlyn creates a family dynamic, which has been proven in the education	3/5/2026 8:52 AM

	Vanderlyn kids are receiving. Speak to the families and listen to the community. Vanderlyn is one of Dekalb's top elementary schools. Don't make a short sighted decision based on money.	
1956	I do not agree with shutting down so many schools and believe it will grossly hurt our communities, schools and children.	3/5/2026 8:49 AM
1957	I am not opposed to the facilities scenarios.	3/5/2026 8:49 AM
1958	No , closing of the schools, causing problems of traffic and transportation along with mixing older kids with elementary is not good.I oppose this.	3/5/2026 8:47 AM
1959	Do not close Evansdale. Figure out another plan. Also, do not close the schools on the south side of DeKalb. Figure out another plan.	3/5/2026 8:47 AM
1960	I am a fan of closing some of the schools listed as the schools are suffering - Stone Mountain Elementary being one of them. But others such as Brockett Elementary are thriving and shouldn't be touched.	3/5/2026 8:45 AM
1961	Great. Larger schools can provide more opportunities for students. (larger group of people to find friends, full-time staff for support at elementary schools(ie: OT, speech, band) and also a larger school can offer a wider variety of classes.	3/5/2026 8:45 AM
1962	I support scenario 1 which includes the expansion of CES.	3/5/2026 8:36 AM
1963	Your plan to close Kingsley Elementary in favor of creating a megaschool at Chestnut does not seem feasible. The entire front side of the building at Chestnut needs to be replaced and Chestnut does not appear to have adequate space for expansion. Kingsley has a wide open area for expansion and only needs a new HVAC, which you have repeatedly delayed for almost a decade.	3/5/2026 8:34 AM
1964	I understand that some schools need to be consolidated. It doesn't make sense to consolidate schools that are high performing and to send kids to schools that are already at capacity.	3/5/2026 8:32 AM
1965	I think if a facility is not being used to an effective capacity, then there should be consolidations. I think it would be more appropriate looking at schools that are over capacity and how those could be moved so that overall schools are more balanced. For example, Cross Keys and Chamblee high schools are over their building capacities. It doesn't make sense to be closing facilities and keeping other schools over their capacities.	3/5/2026 8:32 AM
1966	As a current teacher, I want you to know that class sizes are big enough as is. Teachers have to share rooms because the infrastructure of the school does not support each individual teacher having their own classroom. Schools are already packed and I am against packing them in with even more students and even more teachers when the current facilities cannot house those already there.	3/5/2026 8:31 AM
1967	The plan presented by DCSD seems to be focusing on building management without taking in consideration students and family wellbeing. Large elementary schools of 1000+ stufents is not what we want for our children. Parents will pull their students of DCSD even more. Things are going to fast , we feel rushed and not heard	3/5/2026 8:29 AM
1968	I believe Lakeside has way too many students for the space and staff we have. Redistricting to achieve a more even student distribution would benefit Lakeside specifically.	3/5/2026 8:26 AM
1969	Ashford Park Elementary is an wonderful school and a center of our community. It provides an excellent education and environment for nurturing growth. While my child attends GLOBE, we participate in Ashford Park Elementary support events with our neighbors and friends, and benefit from the culture the school enables. Given the current 100%+ enrollment, and the full enrollment of other elementary schools nearby, I can't imagine a realistic scenario where closing this excellent school improves the education and community experience of the children in the neighborhood. No evidence has been provided regarding why a 900 student enrollment is required to be "operationally efficient", and no justification has been provided as to why Ashford Park Elementary could not be expanded to approach that enrollment, as our neighborhood continues to grow with young families attracted by the school.	3/5/2026 8:25 AM
1970	Specifically affecting the Laurel Ridge ES and neighboring School communities, I do not support the plan to close what looks to be 3 nearby elementary schools to then increase enrollment at Laurel Ridge by building expansio. I think the Board and County have spent enough money renovating buildings to make them somewhat functional to now need to increase capacity so 3 nearby schools can close doesn't sound economically reasonable. It	3/5/2026 8:24 AM

	seems more reasonable to keep at least 1 of these schools, which 1 or 2 looked to be on the higher performing list, to then mitigate the need for additional construction. Having a plan to increase existing facility use that is being underused by now creating construction to increase capacity doesn't seem correct. This part of the plan should be revaluated.	
1971	I think it makes sense to consolidate schools so that larger schools can offer more to their students. I have a special education student who was not well-served at his school for grades 1-3 (Oak Grove), which I attribute to the small size of his grade. The special ed support teachers and staff were inexperienced, and the principal and vice principal were not effective. I feel like there are too many schools and not enough strong leadership to go around. I hope that fewer, larger schools would alleviate this.	3/5/2026 8:24 AM
1972	Don’t close neighborhoods schools as they have less bussing cost , Ashford Park is a highly ranked school with over capacity of study close it .close low preforming schools with low attendance	3/5/2026 8:23 AM
1973	I feel that Rock Chapel should remain open. We have an amazing staff that are committed to the community and the students.	3/5/2026 8:22 AM
1974	I agree with said consolidations IF they will appropriate schools MORE per pupil funding.	3/5/2026 8:20 AM
1975	I am concerned that the school board has not thought through the logistics of closing so many schools and combining into super schools or splitting across districts. If evansdale is closed, the community could be split into two different districts. This would lead to a fracture in the community that would be detrimental to involvement. I have spoken with several other parents who agree that they are seriously considering private schools if evansdale is closed. This is counter to the whole problem that the school board sees: an absence of filled seats within the schools. In fact, I see these empty seat growing larger as more parents opt to get out of the public school program due to the poor communication and distrust of the school board and DeKalb county. Additionally, Livsey elementary, for example, is located on chamblee Tucker. This is one of the busiest roads during rush hour and leads to several cut-throughs through our neighborhood that have almost led to accidents with children. By consolidating so many students at this one school location, I anticipate traffic becoming unbearable, and actual accidents occurring on a regular basis. Have traffic patterns been considered in all of these scenarios? When considering Evansdale, we have two parking lots for parents, and the ability to park and walk your child to school from various neighborhood roads. This is lacking from Livsey elementary, and I do not see how this would be resolved. Evansdale also contains a larger acreage than the proposed schools that it would be split between. Why not consider this school as an option for consolidation? There is already enough distrust with the school board given that the superintendent was arrested and now there is an interim. In addition, some school board members will be leaving come the end of the year. This is the worst time possible to try to assert yourselves and create new scenarios. We asked the school board to step back, and actually consider all of the different scenarios without throwing out blindly those schools that they feel are inadequate. If buildings are in disrepair, then come up with a plan to fix them rather than shuttering them and forcing larger schools in inadequate areas. There is even more feedback I have regarding specialized programs at schools, specifically the DLI program at Evansdale. There needs to be an option for communities to come together and discuss with the school board. Their schools should not be shuttered. The school board should make an effort to visit with the communities of every single proposed school closure to understand the school's benefit and value.	3/5/2026 8:15 AM
1976	prioritize Chamblee Cluster. Keep Ashford park together on the path to Chamblee middle and HS. Our community is stronger together.	3/5/2026 8:13 AM
1977	None	3/5/2026 8:11 AM
1978	I am concerned that the closure of Vanderlyn will negatively impact the scores and academic achievements of this communnity. Vanderlyn has proven that a smaller school can be robust in learning achievements.	3/5/2026 8:09 AM
1979	Needed but not oak grove	3/5/2026 8:07 AM
1980	I was very disappointed to hear that Ashford Park was on the initial list of closures. APES is a fantastic neighborhood school with great community support. That said, the building is small and old and thus I understand it initially being included in the closure list. My preference would be that the immediate neighborhood of Ashford Park be zoned for the school (re-zoning some further away parts of the neighborhood) to manage the overcrowding at the school today. I	3/5/2026 8:06 AM

	would also like the school to get the $25M of funding for fixes/enhancements currently slated and then for the school to remain in the Chamblee cluster as it gets renovated (while still being open). Getting enrollment down to 600-700 with renovations would continue to make APES a great, community-supported school in the heart of the neighborhood. If it is untenable to maintain the current building in a slightly re-zoned manner my next choice would be the pathway voted on by the Ashford Park Education Foundation. This would mean closing the Ashford Park school (or re-purposing) and shifting the entire school attendance zone to the John Lewis facility which is close by. As long as this would preserve the Chamblee middle and high school cluster this option would work as a compromise. Ashford Park is such a great neighborhood and strong community which supports DeKalb public schools. The kids there have formed tight bonds and it is very important for their development to be able to maintain those friendships with classmates that are also neighbors. Removing the Ashford Park neighborhood from the Chamblee cluster would do real long term damage to the area which serves as a big tax base for DeKalb county. Thank you for your consideration.	
1981	I think it’s not a safe idea at all.	3/5/2026 8:05 AM
1982	This process was designed by a corrupt administration and approved by an incompetent board. Remove both first before permanently impacting the system.	3/5/2026 8:03 AM
1983	Excited for the recommended changes!	3/5/2026 8:01 AM
1984	6-9	3/5/2026 7:59 AM
1985	Do not close Brockett Elementary. This is an amazing school community.	3/5/2026 7:58 AM
1986	Very disappointed with the closing of Ashford Park. Our community has poured in money and support over the years to make this school great. I understand the building restrictions associated with this property, but many feel this will break apart the community and remove parts of us from the Chamblee HS cluster. Closing the school, splitting up the current Ashford Park Community and removing from the Chamblee cluster will cause people to move and/or find another alternative for school. You will lose the best resources and kids that help these schools to thrive.	3/5/2026 7:58 AM
1987	We are really horrified that Robert Shaw is slated to be closed. This is a wonderful, high performing school that serves a community that faces a lot of inequities. Our daughter has been welcomed and cared for so well there. Her teachers are phenomenal and the support staff have been wonderful in easing her transition to school. This school is a much needed gem and is NOT the school to close.	3/5/2026 7:55 AM
1988	It makes no sense to close Ashford Park Elementary. Its high performing, over-enrolled, and instead of closing, the county should be investing in its high performing schools	3/5/2026 7:54 AM
1989	Oak Grove is a wonderful school with a great sense of community. A top performing school. Closing it is detrimental to our community.	3/5/2026 7:53 AM
1990	Ashford Park is a great community school. I think it is important for our community to stay within the Chamblee cluster.	3/5/2026 7:49 AM
1991	I understand it needs to be done to maximize the use of tax dollars. With immigration enforcement and the cost of living going up, more students will be lost, and revenue will be decreasing, sadly.	3/5/2026 7:48 AM
1992	Children need the best and positive experiences starting their education. Keeping the elementary level the same is important for them and surrounding neighborhoods.	3/5/2026 7:48 AM
1993	This is so insulting. If you want to save money, put some of these useless county office people back in classrooms! Dekalb parents are so SICK of mismanagement of funds in this county.	3/5/2026 7:45 AM
1994	Do not close Oak Grove Elementary.	3/5/2026 7:42 AM
1995	Why should schools be condensed down adding mores students into one classroom and or buildings. Students are already not learning well and adding additional students will not be beneficial. While non consolidated schools will have smaller classroom sizes.	3/5/2026 7:40 AM
1996	There are a lot of students in my son’s class already. I feel it will be overcrowded and overwhelming for teachers and staff.	3/5/2026 7:35 AM
1997	I am not opppsed to Ashford Park closing, but do fear where the students would go. I am in	3/5/2026 7:34 AM

	favor of our students going to John Lewis, but only if they stay in the Chamblee cluster.	
1998	I do not believe closing Oak Grove is in the best interest of the community surrounding Oak Grove.	3/5/2026 7:33 AM
1999	The clusters and building large schools in the cross keys cluster does not make economical sense. The elementary schools in this cluster are under capacity in old buildings. So building a 1400 seat elementary when the existing 600 seats cannot be filled makes no sense. This cluster has a historically transient population. However, schools such as Ashford Park, Vanderlyn, and Kingsley have a steady and growing population. The investment needs to go in new buildings in these clusters.	3/5/2026 7:33 AM
2000	Agree with closing vanderlyn and kingsley, more equitable	3/5/2026 7:28 AM
2001	I think it's short sighted to make judgments based on a 5 year estimate. I think the scenario overlooks and ignores the educational and social benefits of the size of some of these schools. I think the plan will also negatively affect housing markets in some communities - which will further the issues the you have now.	3/5/2026 7:27 AM
2002	I wish you were more focused on why enrollment is down and why families are opting for private school or homeschool (e.g., dissatisfaction with screens in school, not enough recess, too much testing, etc.) BEFORE jumping to the conclusion that you need to close all these schools	3/5/2026 7:20 AM
2003	Closing or consolidating schools should not be considered as long as there are students enrolled in them. Schools are essential community spaces, and reducing them disrupts students, families, and neighborhoods. According to the district's own projections, enrollment will shift in the coming years, your plan is for 6-7 years. By then, the students currently in elementary school will have moved on to high school. Closing schools now to address a temporary shift in enrollment may create new capacity problems later and unnecessarily disrupt current students.	3/5/2026 7:15 AM
2004	I understand why this needs to happen and the cost saving with the decline in enrollment. My hope is it happens gradually starting with older high school kids. The elementary kids have formed their relationship and learning the basic fundamentals to life/learning/friendship. I believe it will disrupt their learning/trust and they will have to start over. Such as in kindergarten. Most of the elementary kids have been in the same school since 4 years old and that's all they know. They're already nervous about middle school. I just believe elementary schools should be off the table. Start with Middle/High School kids are more adaptable by this age.	3/5/2026 7:11 AM
2005	Consolidating schools will cause overcrowding and less reasonable class sizes.	3/5/2026 7:07 AM
2006	Great	3/5/2026 7:03 AM
2007	I think this is crazy and will make crime rate go up in dekalb county	3/5/2026 7:02 AM
2008	I am not sure how some of these schools are going to be expanding students and if that is going to involve renovations. It seems like a lot of students being added to schools that already have limited space physically.	3/5/2026 6:53 AM
2009	I understand the need to update districting lines as well as school allocation to meet the needs of a changing population, however closing this many schools and creating mega schools is not the right approach. Children need a smaller learning environment where all teachers and faculty know their students. This is something lost in these bigger schools. Further Midvale is absolutely one of the highest achieving elementary schools and would be a total travesty to have that school taken away. Recent renovations has already taken place and Midvale and if there absolutely had to be an expansion Midvale has the space and a large field to do it. Midvale and other surrounding schools MUST stay small for the sake of communities and parental support. If resources are a bigger issue I'd be willing to pay more in taxes to allocate to the resources needed to provide for our changing population. I am such a big supporter of the public school system and want to see it thrive. We can do better.	3/5/2026 6:52 AM
2010	Dunwoody High School is over crowded and out of space. Trailers have been used for years to deal with the overflow but the facility is too small for the number of students enrolled.	3/5/2026 6:51 AM
2011	Brockett is in my neighborhood and is an important part of our community.	3/5/2026 6:45 AM
2012	Facilities always need to be updated.	3/5/2026 6:45 AM

2013	I don’t think you should close Oak Grove Elementary. It is a very good school that is currently at full capacity. Families move to Dekalb County to be part of this school based on its reputation. If you close it, it will have a negative impact on the housing market and will displace many families.	3/5/2026 6:40 AM
2014	We need more teachers different learning aspect, bring in more opportunity for the kids as far as home economic learning about credit	3/5/2026 6:31 AM
2015	I believe that the schools selected for Dunwoody for closure and expansion are great choices.	3/5/2026 6:21 AM
2016	As a long term Dekalb resident, Why in the world would you close a top 10 Elementary School in Dekalb. Why wouldn't you study why that school is successful and take it to other schools? It makes no sense.	3/5/2026 6:19 AM
2017	the student participation is going to drop the teachers are going to leave there are already to many kids in one class and they are worried about having ieps and what others are saying not only that it is inconvenience the parents that are products of the community and the community as a whole now we have to worry about how they are going to get there what about parents with two or more children. its not a good idea.	3/5/2026 6:19 AM
2018	I think it’s going to bring a lot of violence with students and over crowded classes	3/5/2026 6:19 AM
2019	Base	3/5/2026 6:16 AM
2020	Muy buenas instalaciones	3/5/2026 6:02 AM
2021	Ashford Park Elementary School has grown because of the tremendous support and partnerships the school has developed with the Brookhaven community. Closing this school does not alleviate the district's need to close underpopulated schools.	3/5/2026 5:49 AM
2022	I believe moving to larger schools, while more efficient, does not make schools more effective, especially in the primary grades. A model of smaller neighborhood schools provides a culture that meets the needs of younger students.	3/5/2026 5:27 AM
2023	I don’t agree at all. Ok many school closures effecting black and brown children. This will lead to overcrowding.	3/5/2026 5:22 AM
2024	I understand that it is prudent stewardship of public funds to anticipate consolidation in light of decreased enrollment. A school facility not being fully utilized due to decreased enrollment must be addressed.	3/5/2026 5:20 AM
2025	I do not understand why Evansdale Elementary is targeted to close. It serves several nearby communities and it does bot have empty seats.	3/5/2026 5:17 AM
2026	It seems as if the schools are closing more in the south end of Dekalb. Why are those children being asked to be uprooted from the community in which they reside. Also working parents have to drive further to attend school events or just to pick their children up from school.	3/5/2026 5:09 AM
2027	No comment	3/5/2026 4:39 AM
2028	I want to understand why most of the school are in African American communities	3/5/2026 4:25 AM
2029	I do not think that the approach that DCSS is taking is correct. Education needs to be the first consideration. DCSS needs to look at the cost of Central Office, etc. Tremendous waste has occurred in the last quarter century with corrupt superintendents. Neighborhood schools are crucial in education.	3/5/2026 4:08 AM
2030	My concern with consolidation is higher student to teacher ratio, these kids are already struggling with the number of students in a classroom now, the impact will be detrimental to their learning. my second concern is safety of having babies (PK) with older kids can cause safety concerns.	3/5/2026 2:22 AM
2031	I feel as though the school is overcrowded and not enough attention is put on the students	3/5/2026 1:47 AM
2032	Do not combine middle school with high school students.	3/5/2026 12:52 AM
2033	Schools in nearby neighborhoods should not be closed, according to predictions. Other activities (school breaks, summer school), should be provided on school breaks.	3/5/2026 12:52 AM
2034	The initial scenarios start from the premise that facilities should drive decisions, but that approach ignores the real issue families are raising: trust and educational quality. Closing	3/5/2026 12:36 AM

	neighborhood schools to consolidate students into larger buildings may reduce operating costs, but it risks worsening the very problems that are already driving enrollment decline—large class environments, weaker school communities, and declining academic outcomes. Families are leaving the district because they want stability, accountability, and strong instruction, not larger and more impersonal campuses. Before pursuing closures and “cascading use,” the district should focus on improving instructional quality, restoring effective teaching practices, and rebuilding community confidence. Without addressing those root issues, consolidation will likely accelerate the loss of students rather than solve it. Our family specifically has already decided to send our children to private school (although they‘ve attended our local Dekalb public schools since Pre-K, for over 8 years but we‘ve had enough).	
2035	The Tucker cluster for the most part has a great group of elementary schools so my concerns are not of the mindset that we should remain open, while others close. I’m sure my kids would receive a quality education at either Midvale or Livsey. We have friends at both. With that said, I can’t emphasize enough the value a neighborhood school plays in the overall health of a community. When the opportunity to purchase a home within walking distance of Brockett became available a few years ago, we jumped at the chance. The benefit of being able to walk as a family to/from school each day has had so many benefits for our family- the quick walk helps my daughters mentally prepare for the day and burn a little energy so they are able to focus when they get to school. The walk home has a similar effect allowing them to do the same after sitting in a classroom all day. We have some of our best family bonding during these 10-15 minutes. Furthermore, these walks have enabled us to build our own community by meeting and engaging with neighbors and other Brockett families that we likely wouldn’t get to know as well. We came from a school in Florida that had over 700 kids and despite my efforts to engage through volunteering with the PtA and in the classroom, we were not able to build a similar community and support system. Instead we were treated as a number. The initial argument for closing schools is the cost of upkeep, however we’ve been told that the buildings will be repurposed and used to house other programs run by the district. As such, one would assume that the district would still be faced with the costs to maintain these buildings. This contradicts the districts primary argument for closing schools. Finally, along those lines, I worry about the impact on our property taxes closing schools will have. If special attention and care is not given to what happens to the closed buildings, thee is a high chance that these abandoned buildings will encourage graffiti, breaking and entering, and trespassing.	3/5/2026 12:32 AM
2036	Disappointed on the potential school closure of McLendon Elementary. Wondering where we will be rerouted.	3/5/2026 12:29 AM
2037	I support scenario 1	3/5/2026 12:09 AM
2038	Consolidation proposal is ok.	3/5/2026 12:09 AM
2039	Too many elementary schools on the list and too many in South DeKalb. I do not like the idea of pushing more students whom many are already failing into larger environments where they will continue to be left behind and underserved.	3/4/2026 11:55 PM
2040	We would not like our school Ashford park elementary to be closed down. The school community, students and teachers are doing a great job and it would be a shame to close it down. The strength of school is too big to be consolidated to other schools without affecting the learning integrity and progress which students are achieving at this school.	3/4/2026 11:49 PM
2041	Seems great	3/4/2026 11:41 PM
2042	A lot of homes are being built all around dekalb county with a lot of new homes. What happens in the future if our population booms due to the affordability within the county and proximity to the city. Are we limiting our ability to scale in response to real estate expansion?	3/4/2026 11:39 PM
2043	Small, neighborhood elementary schools have been shown to positively impact learning outcomes. Perhaps we should consider reducing programming in an effort to preserve small schools. I also think that the proposed ES closures in Tucker should be re-examined with an eye to current crowding, space to expand, community investments, ending the IB program at Midvale (which would auto automatically be eliminated since authorization is site-dependent) and momentum in academic success, as comparing Midvale to other Tucker ESs.	3/4/2026 11:33 PM
2044	This is absurd and careless. You expect me to trust decisions made my criminals and those that harbored them?	3/4/2026 11:25 PM
2045	Would like to see redistricting in tandem with the closer scenario 1.	3/4/2026 11:18 PM

2046	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/4/2026 11:07 PM
2047	The school is not good with telling the truth to parents that is not good at all.	3/4/2026 11:04 PM
2048	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that	3/4/2026 11:04 PM

	exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
2049	I think its a bad idea to close majority of the elementary schools in Tucker to create a mega elementary school that will have huge class sizes and not enough support for each individual student.	3/4/2026 10:53 PM
2050	School closures or consolidations can have significant ripple effects, including: Disrupting established school communities and relationships among students, teachers, and families Increasing travel time and transportation challenges for families Affecting specialized academic programs and extracurricular opportunities Potentially increasing class sizes in receiving schools If consolidations are necessary, I encourage the district to prioritize the following considerations: 1. Protecting Academic Programs Schools with strong academic programs, magnet programs, or specialized offerings should be preserved whenever possible to maintain educational quality and choice for families. 2. Minimizing Student Disruption Where consolidations occur, the district should aim to keep students within their existing clusters or feeder patterns to maintain continuity through middle and high school. 3. Community Impact Schools often serve as anchors within neighborhoods. Before closing or consolidating a facility, the district should consider the broader community impact and explore options for repurposing buildings in ways that continue to benefit the community. 4. Transparent Data and Communication Families should be provided with clear data on enrollment trends, facility utilization, and financial impacts so that the rationale behind consolidation decisions is transparent and understandable. Overall, I support thoughtful, data-driven planning that ensures district resources are used efficiently while also prioritizing student outcomes, stability, and strong school communities.	3/4/2026 10:44 PM
2051	I think it is smart to use the cascade method.	3/4/2026 10:43 PM
2052	I am okay with consolidation of elementary schools in my area but DO NOT want kids in my neighborhood being bussed over to Hightower elementary.	3/4/2026 10:38 PM
2053	Since I am not directly impacted, I don’t have any feedback.	3/4/2026 10:37 PM
2054	It doesnt make sense for resources to be scarce the capacity available is 110K and you have 92K student? Was this a typo? If not, then there is a concern on how are the resources are being used	3/4/2026 10:37 PM
2055	Robert Shaw has made some building improvements and we really like seeing the changes	3/4/2026 10:31 PM
2056	Kittredge building is awful. They need a new building	3/4/2026 10:21 PM
2057	While understanding that SOMETHING has to happen, the Ashford Park community was SHOCKED by the initial scenario to close the school. We have such high performing kids and well-equipped teachers and outstanding overall PERFORMANCE. Why would you break that up? This APS community is amazing - from the neighborhood, to the school administration and staff to the kids who walk the halls there. We are hopeful you will LISTEN to our feedback as we to stand together as a community and come up with a scenario that is even BETTER than what we currently have. Keeping this community together is KEY! Keeping this school in its current cluster is KEY! Ashford Park Elementary is thriving...we are lucky that our public school is as amazing as it is and we do not want that to change. If you do, you will loose WAY more families in this area to private school. The uncertainty the DCSD has put on this community trying to slice and dice us up, the rumors the indecision has been horrible. There are so many discussing just leaving DeKalb bc of all the unknown. Don't you care about the schools that are doing WELL? Don't you care about the positive outcomes of your students? All that said, this community can survive this as long as you allow us to stick together. We would be willing to sacrifice our sweet APS to just stay the course to CMS and CHS. Our Ashford Park community put out a survey to our extremely involved parent community. The results were eye opening - by a large majority, we stand behind "giving up" our existing elementary school so that this community can stay together and stay within the Chamblee Middle School and High School Cluster - WE NEED TO KEEP OUR COMMUNITY TOGETHER.	3/4/2026 10:21 PM
2058	Evansdale is the only elementary school in DeKalb worth keeping open. Livsey is a close second. Lakeside is the only high school worth keeping open, too.	3/4/2026 10:20 PM
2059	Shutting down Kingsley doesn’t make any sense whatsoever. Vanderlyn and Austin are overcrowded and some students could shift to reduce the burden on those schools and fill the need better for Kingsley.	3/4/2026 10:20 PM

2060	I don’t see how the children will benefit from over sized class rooms in buildings that are similarly aged	3/4/2026 10:18 PM
2061	Oak Groce’s utilization and capacity data do not support closure. The district’s stated goal is ~88% elementary utilization. Oak Grove is already at 89% utilization (447/504) and projected at 96% (487 students) in 2026–27. Enrollment has increased for four consecutive years, showing sustained growth. At the current pace, Oak Grove may reach full capacity within 2–3 years. Closing a school already meeting or exceeding utilization targets does not address district-wide underutilization. If Oak Grove closes, students would primarily be absorbed by Sagamore Hills and Briarlake: • Sagamore Hills: 91% utilization (413/456) → only 43 available seats • Briarlake: 73% utilization (350/480) → ~130 available seats Redistributing students here would likely create new capacity pressures rather than improve efficiency. Oak Grove is operating near capacity. Enrollment projections used in closure discussions conflict with the principal’s official budget enrollment. There are over 200 students on the waitlist, including more than 100 kindergarteners — clear evidence of demand. Families are choosing Oak Grove. Oak Grove is our community. This is not a passive community - it is an active partner in public education.	3/4/2026 10:14 PM
2062	I understand and support the scenarios	3/4/2026 10:13 PM
2063	I agree with the Dunwoody scenarios.	3/4/2026 10:10 PM
2064	Oak Grove is one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap. Oak Grove does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake’s current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake’s enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity.	3/4/2026 10:10 PM
2065	Neighborhood schools are what public schools attractive. If you take the community out of the school, parents will not be invested and it will have nothing left to make it attractive, ultimately losing more kids to private.	3/4/2026 10:08 PM
2066	As a parent in the Robertshaw Elementary School cluster within the DeKalb County School District, I am concerned about how consolidation may impact our children and families. Robertshaw is more than just a building—it is part of our community. Closing or merging schools would disrupt relationships, routines, and the sense of stability our children rely on. Young students especially need consistency to feel safe and supported. I am also concerned about larger class sizes, longer bus rides, and whether receiving schools will have enough resources to properly support all students. If consolidation is necessary, I ask the district to	3/4/2026 10:08 PM

	prioritize student stability, clear communication, and a smooth transition plan that protects academic quality and emotional well-being. Thank you for considering parent voices in this decision.	
2067	I don’t see the rationale behind closing both Kingsley and vanderlyn or even expanding chesnut. In particular vanderlyn makes little sense. And how on earth do you close ashford park which is so in demand and so full?	3/4/2026 10:05 PM
2068	I think that closing 2 schools would overcrowd the other schools. Kingsley should stay open since they have a higher rate of students attending.	3/4/2026 10:04 PM
2069	Agree that some schools need to close and students move to underutilized buildings. Concerned that no information was given for how that would impact faculty and staff though. Seems like some people may lose their job, especially media specialists and counselors.	3/4/2026 10:04 PM
2070	Parents didn’t feel heard at the last meeting. I’m concerned what it will do to traffic on Womack and Chamblee Dunwoody. Surely others feel the same in their districts and busy streets.	3/4/2026 9:59 PM
2071	Feel closing schools and building onto other schools is going to cause overcrowding and wasted money to build onto these school on small plots of land	3/4/2026 9:56 PM
2072	Oak Grove should not be closed. It’s been a high performing school for years. The consolidation plan includes expanding Briarlake, which is already over capacity. An area that used to be a ball field became a parking lot years ago. Trailers have been added to accommodate more students. The school site is not large enough to expand, nor are the other nearby schools like Sagamore. Keep Oak Grove, Briarlake and Sagamore as they are. If needed, rezone kids from Briarlake and Sagamore to make them all the right size without trailers.	3/4/2026 9:50 PM
2073	We love Oak Grove elementary. It is part of the community. We would be devastated if it close. It’s such a staple in the neighborhood so many children have grown up there and so many children in our neighborhood attend.	3/4/2026 9:50 PM
2074	Very concerned about how it will be feasible to find a new school for all of the 700+ Ashford Park kids if the building is closed. There are 3-4 schools in close proximity (John Lewis, Dresden, Montgomery, Doraville United, but dividing this community doesn't geographically make sense. The commute to Montgomery would be very stressful(trust me I used to sometimes take that route to work during morning drop off time and it's already horrible). Sending more kids that way would be unsustainable to the community. Shifting some of our kids to other nearby schools, John Lewis and Dresden, gives me concern that they are lower performing schools. and worried my kids wouldn't get their needs met there (my oldest is currently in the gifted program). In the presentation at noon last Thursday, the HPM guy acknowledged that there is risk in change (ie risk of people not being happy with the change). In our area, there is a serious risk for losing so many families to other options if we are rezoned into a poorly performing school which would leave the schools underutilized and break apart our amazing community. If the Ashford Park building must get closed, I would ask that we are able to stay within the zone of Chamblee HS, are able to move somewhere together as a community (ie not change the current boundaries that tie our student corhort together). If you would consider keeping the school open with goal to reduce overcapacity, you could consider sending kids north/northwest of Peachtree to Montgomery (they would keep access to a well performing school). In this option it would also be important to keep Ashford Park in the Chamblee cluster with rezoning.	3/4/2026 9:49 PM
2075	Ashford is overcrowded we need to expand the school not closed!	3/4/2026 9:47 PM
2076	Dear DCSD Reps, Evansdale Elementary has been a shining star in my life this year. After years of anticipation, my child started Kindergarten there this year. Every time I enter the school, I feel the pulsing heart of our community. I know you can't place numbers on the value of community, so I do have feedback that is specific and targeted as requested, but I also want you to understand how much more than a dot on a map our school is for my community. The diversity, the cultural exchange at school events, the incubator environment that provides elementary age students a place to feel safe while preparing for success in middle and high school. I do feel like there was a missing piece of community engagement earlier in this process, but as it is, here is my feedback on the initial scenario presented: 1. Evansdale Elementary is above the threshold for attendance set by the district. In fact, enrollment is projected to increase by 2030. 2. Evansdale Elementary School sits on a large lot (10+ acres) and is an excellent option for renovation and expansion as it does not sit on a busy street. 3.	3/4/2026 9:45 PM

	Redirecting current Evansdale families to the proposed expansion schools (Livsey, Hawthorne) greatly impacts traffic in areas that are already gridlocked during school drop-off and commute times. In fact, Tucker recently reduced lanes on the primary route to Livsey Elementary to reduce traffic volume, but the now two-lane road is at a standstill from the time school is out through early evening. There will be more than the school communities impacted by this shift. 4. The French DLI program continues to grow and has taken root in our community. The French teachers have been stellar and we need Evansdale to remain in the French pathway in the Lakeside cluster. What a unique experience Dekalb offers for students here, so much work has gone into setting it up for success and sustainability. 5. Our school has been passed over several times for capital improvements, yet this is now being counted against us. We have a strong support system at the school who are passionate about finding funds and will be happy to work with Dekalb to find partners in funding for any needed improvements. This community of parents and supporters just want to be heard. We share a passion for the success of children and the ways that schools create an identity for a community. We want face time with decision-makers and not to worry that our concerns being painstakingly entered into this survey are just entering the void. Will anyone read this? Please consider real engagement with our communities before moving forward. I thank you for your time and consideration.	
2077	We need oak grove - such a great achiol	3/4/2026 9:43 PM
2078	Smaller classroom sizes is also beneficial to students learning. Please make sure all cons are also being considered that impacts education.	3/4/2026 9:39 PM
2079	Wanted to express concern over the potential closing of our community elementary school, Oak Grove Elementary. My sister and I were students in the 2000's-2010's, our parents built their house across from Lakeside High School so they could send their children to this school district. Though I understand upper grades of Oak Grove Elementary struggle meeting numbers due to the presence of local charter and private school institutions like The Globe, Cliff Valley, Kittredge Academy, Woodward, GAC, etc. , there is surely not a lack of resources or financial support from the community or PTA. Oak Grove, situated within the proximity of Sagamore, Hawthorne, and Briarlake elementary schools, is higher socio-economic area, with many parents working at emory healthcare, the centers for disease control, and children's healthcare of atlanta— which has opened their new campus in fall of 2024 even closer to our community, bolstering new construction projects, housing, and economic opportunities in our neighborhood. The Oak Grove community is lucky to benefit from being so close to the I-85 corridor, with access to key points of industry and education around the atlanta area. Generations of oak grove eagle alumni care about the forward progress and prosperity of the school, and it would crater our small but prosperous community if the institution were to be shuttered. To keep upper grade elementary students at oak grove, increasing rewarding, mentally stimulating activities and programs would be beneficial. More gifted program opportunities, more 4H field trips within the state to promote immersion and hands on experiences with our state's ecological diversity, and access to quality for the STEAM program like at Henderson mill elementary school. Increasing unique opportunities, learning and bonding experiences for students will heighten their propensity to stay within the school system through their graduation. Also, heightening the quality of safety, security, and learning at the feeder middle school (Henderson Middle School) will increase parents comfort levels and they will be more willing to let their children finish their time at Oak Grove instead of searching for alternative options for their student's middle school transition. There are surely more opportunities for further funding for extracurricular activities, learning resources, and student support within our community that have yet to be harnessed. We strongly ask that you reconsider the proposition to close Oak Grove Elementary, and appreciate your attention to the matter.	3/4/2026 9:39 PM
2080	I don't like idea please keep school open	3/4/2026 9:38 PM
2081	I'm unsure about it	3/4/2026 9:37 PM
2082	The neighborhood schools are what make DeKalb special. My kid has thrived at Oak Grove. He has had access to lots of programs and activities. The principal knows his name and cares about him. His former teachers still look out for him and check on him. Small schools create community and culture that builds up to the high school.	3/4/2026 9:37 PM
2083	I'm in favor of it but understand the concerns of parents who would be directly affected. I also believe that concentrating resources would be helpful, but class size is most important to me.	3/4/2026 9:29 PM
2084	I'm shocked that Oak Grove Elementary is in the list. Its enrollment is growing and expected to be at 96% next year. I give school tours and there are so many in the waitlist hoping for a	3/4/2026 9:26 PM

	spot. It is one of the top schools in the county. The parent involvement is amazing. The scores are high. The neighboring schools (Briarlake and Sagamore) do not have enough space for all the students.	
2085	I would like to understand what research has been done to identify the reasons for declining enrollment. What review of curriculum, staff, school calendar, and school resources have been reviewed in this process? I also do not see a definition of the term “educational adequacy” - if this is a primary reason for potential school closures, what does it mean and why do certain schools have lower educational adequacy? What is the root cause?	3/4/2026 9:22 PM
2086	I do not think more students should be added into a school together.	3/4/2026 9:21 PM
2087	I believe if cedar grove get minor changes to it to hold 6-12 it would be good to me. If the money can save up, it can be use for transportation, nutrition services	3/4/2026 9:20 PM
2088	I would prefer that the two tier system be PK-6 and then 7-12. Seems the right kind of balance all around and how schools used to be organized. Please consider teachers who are parents and how possibly teaching at a different school from the one your children attend could also stretch and place stress on that staff member who must deal with multiple campuses regarding transportation and extracurricular activities.	3/4/2026 9:18 PM
2089	Horrible idea	3/4/2026 9:17 PM
2090	If it benefits the students and staff then I’m all for it	3/4/2026 9:16 PM
2091	Why not expand some of the strong neighborhood schools. Evansdale has land and the space to expand.	3/4/2026 9:16 PM
2092	The closure of Vanderlyn gives me concerns that you will be over crowding both Dunwoody Elementary and Austin Elementary. The data provided shows that Vanderlyn sits at ~85% capacity, with Dunwoody and Austin both between ~78-82% capacity. You are proposing to move ~450+ children to schools that “may” be able to handle the load. This type of move if it doesn’t work out perfectly has an outsized impact on children - compared to older students that may have to balance moving between a main school building and other buildings (trailers or other). I’m also generally concerned with the projections purely based on what I see happening in my neighborhood. I have two children who will be attending Vanderlyn, with no less than 7 homes within a block of me turning over from families who’s children are grown to families with additional prospective, future Vanderlyn attendees (infants and toddlers). Couple that with a broader movement to Dunwoody and the usual movement of empty nesters out to young families and my concerns about the potential closure of Vanderlyn placing too much stress on 2 other schools is exacerbated.	3/4/2026 9:16 PM
2093	Please do not close Ashford Park Elementary!! This school is a staple in the area and a wonderful place for kids to learn. We have lived in Ashford Park for half a decade and the school is the heart of the neighborhood and so important to the health of the neighborhood and surrounding area. Please do not close the school but consider building it out further, investing in a place that invests in future generations.	3/4/2026 9:16 PM
2094	I think it all depends on how the consolidations are handled. I understand the need, but I also believe that access to schools needs to remain equitable across all regions. We live in a low income area and our elementary school is one of many schools in low income areas that are being considered for closure. I think that it would be catastrophic for communities that are already at a disadvantage (economically, socially) to be further estranged from educational opportunities and so if consolidation is the most viable solution, the process of rezoning needs to be handled carefully and with broad, diverse community input. I fear that schools in more affluent areas will be the ones kept open because their test scores are higher, the community has more time/energy to spend combatting closure, etc. This would be, in my view, a worst case scenario and would only further exacerbate the structural inequities that are part of ATL’s infrastructure.	3/4/2026 9:14 PM
2095	I am concerned that school consolidations would lead to “mega schools” which would take away individuality and would decrease effectiveness of instruction.	3/4/2026 9:12 PM
2096	While I do understand that measures need to be taken to make our district more cost effective, I do not believe that many of the round 1 scenarios are in the best interest of the students across the district. While many south end schools are underutilized and need consolidation, that is not the case with the north end schools. The north end of the county is growing at a	3/4/2026 9:12 PM

	much faster rate that your data suggests and the county needs to look at growing facilities in area 1 not closing any of these schools.	
2097	Transportation becomes the main issue in this scenario. How are families that are currently able to walk to school or get on a quick bus able to get to school if it is not local? Are there plans to keep the unused buildings / facilities updated in case enrollment increases again?	3/4/2026 9:10 PM
2098	Horrible plan	3/4/2026 9:09 PM
2099	I support the plan as long as the potential traffic issues will be adequately addressed.	3/4/2026 9:09 PM
2100	Crowding and Capacity: Concerns exist regarding whether consolidated sites can adequately handle the influx of students without significantly increasing class sizes.	3/4/2026 9:09 PM
2101	Need to keep the best rated schools. Older and small schools looked at to repurpose	3/4/2026 9:08 PM
2102	It makes more sense to redistrict than it does to close some school and expand others. The savings could be more effectively used for renovations.	3/4/2026 9:04 PM
2103	It seemed ok. I think it is important to consolidate schools because it allows more funds to go to education and less to facilities maintenance. Closing poorer performing schools and schools with less students nearby makes sense.	3/4/2026 9:04 PM
2104	As a teacher in a building that is over 60 years old and slated for replacement, I believe the health and safety of our students and staff should be the first determining factor on school closures.	3/4/2026 9:04 PM
2105	It is not a good idea to close these high performance schools. These schools that have very good milestones results, uplift our community, keep students in public schools and increase property values. The schools in the area on the expansion list, need more infrastructure support beyond just. expansion. Huntley Hills lacks reliable HVAC and plumbing. The school needs to be rebuilt from the ground up. I also don't quite see why both Montgomery and HH need to expand. these two schools are both close together. If anything it makes more sense for either HH or Montgomery to close and keep AP.	3/4/2026 9:03 PM
2106	While equity is an important goal, simply moving students from one school to another does not guarantee improved outcomes. Investments should be targeted toward school improvement, not penalizing successful schools and families	3/4/2026 9:03 PM
2107	I appreciate the thoughtful scenarios	3/4/2026 8:57 PM
2108	I would like the DeKalb County School Board to recognize that there are real children and families affected by these changes. Previously, I served on the principal advisory committee before the onset of Covid. I have four children; currently, two are enrolled at Vanderlyn, one is a graduate of Vanderlyn, and one is a hopeful future student of Vanderlyn. My seven-month-old daughter was diagnosed with stage four cancer at the beginning of Covid. The DeKalb County School Board opted to remain closed longer than any other school district, even after a safe and effective vaccine became available. My family was forced to enroll our third grader in private school, which was extremely costly and stressful, as I had to work as a Covid frontline physician to afford two years of private education so that we could take my daughter to chemotherapy, surgeries, and appoinments. Now that my daughter is in kindergarten and can attend Vanderlyn, she is flourishing. She is now a wheelchair user, and we reside directly across the street from the school, making accessibility crucial for her self-esteem and ability to thrive. We specifically chose not to relocate to Fulton County because of our proximity to the school. Forcing a disabled wheelchair user to attend a large school with busy hallways on a special-needs bus, which, due to county regulations, is separate from the other buses, is not in my daughter's best interest. In fact, compelling children to attend large mega schools at this age is not in the best interest of any elementary school child. Furthermore, there are 450 children attending Vanderlyn at 86% capacity. There are insufficient spots at Austin and Dunwoody Elementary combined, so where do you intend to place our children? I would be amenable to the expansion of Vanderlyn, as we had significant enrollment numbers prior to Covid. I am awaiting a response from someone at the School Board who will consider what is best for our children rather than what appears favorable on a numerical chart. Our children are not merely numbers.	3/4/2026 8:53 PM
2109	Facilities are great! Elementary school still feeling new. Great gathering spaces. I will there were more analog clocks instead of digital in hallways. Peachtree gifted programs isolated in trailers which is nice	3/4/2026 8:48 PM

2110	Please, do NOT close Oak Grove Elementary	3/4/2026 8:47 PM
2111	I do understand the need to consolidate resources because of the lack of students. In some cases, I feel it is smart to do so for example closing some elementary schools with lowerenrollment and moving those students together to one school. However, as a veteran teacher, my concern is overloading classrooms. In some school districts were 32 is a normal size for an elementary classroom. I feel is too large to have successful learning 25 to 27. Students is an optimal number for elementary.	3/4/2026 8:47 PM
2112	I think that before the decision to close schools is made the district needs to consider rezoning. Also another scenario to consider would be to make elementary schools K- 7, high schools 8-12, and put all pre-k students in their own schools.	3/4/2026 8:44 PM
2113	I don’t like it! Coralwood helps so my many children with disabilities. The teachers and staff at both Coralwood and Midvale are amazing at their jobs and great with our children.	3/4/2026 8:43 PM
2114	Ode estudia mi ijo es la escuela 🏫 mejor i esta serca de mi por lo tato es lamejorqe ay	3/4/2026 8:42 PM
2115	More info will need to be collected to make a decision.	3/4/2026 8:41 PM
2116	I do not like the idea of consolidations. The schools all have communities that have been built and developed over many years around the school community.	3/4/2026 8:41 PM
2117	I think the school system should concentrate on areas where schools that are under enrolled and have been for the last 10 years have cost DCSD approx $1B or more in lost state funding. The enrollment projections do not take residential and rental development in many areas where school closure is proposed. Closing schools in District 1 will result in a further decrease in enrollment when dissatisfied parents leave DCSD for private options and take the schools choice money with them. The cost will be monetary and will result in collapsed community identities across the the north end of the county.	3/4/2026 8:38 PM
2118	DHS is considerably overcrowded and landlocked.	3/4/2026 8:35 PM
2119	I think Vanderlyn should be closed and the land given to Dunwoody High School. The kids at Vanderlyn should be distributed between Austin and Dunwoody Elementary.	3/4/2026 8:34 PM
2120	I'm all for consolidating facilities. It would be ideal to be able to put resources into fewer buildings but you actually have to maintain the schools you keep.	3/4/2026 8:34 PM
2121	The consolidations are strategic and supported.	3/4/2026 8:34 PM
2122	I’m concerned about crowding at Montgomery as we already have trailers	3/4/2026 8:33 PM
2123	I live right next to Kingsley and just started sending my daughter there for Kindergarten. My biggest concern is the HVAC system. It was supposed to be fixed this year and then just before the SAP was announced, they cancelled the project? So are we supposed to wait 6-8 years, my child's entire elementary career, without a working HVAC system? It's horrible that she has to learn and teachers have to work in these conditions, especially when it was about to be fixed! I would rather you just close the school next year than continue with a broken HVAC! Planning for the aging of buildings is something that will always have to be considered. Unless the building will be torn down soon, I don't understand why the project to fix the HVAC was withdrawn and where that money is going to go now. It is situations like this that push parents to remove their kids from the public schools and lead to the declining enrollment in the first place. Crowding kids into fewer schools is not going to fix that.	3/4/2026 8:33 PM
2124	I support this change if it benefits the greater good.	3/4/2026 8:29 PM
2125	Oak Grove does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove us already at 89% utilization(447 students / 507 capacity) and projected at 486 students in 2026-27(96).	3/4/2026 8:29 PM
2126	Best for the students l	3/4/2026 8:28 PM
2127	I think it’s great that buildings will be newer and remodeled, but I don’t think students learn effectively when elementary schools have over 500 students. Keep schools small. I don’t understand how empty seats cost money since there is not a child in that seat you aren’t spending any additional money on that child other than facilities. If the county can afford 6 million in office space, they can afford to keep schools small. Admin can work remotely. We also need more speciality schools so parents don’t have to enter a lottery for a charter school.	3/4/2026 8:28 PM

2128	We moved to our current residence for the SOLE purpose of having our children attend Oak Grove elementary. Putting the school on the chopping block is heartbreaking.	3/4/2026 8:27 PM
2129	I think closing several elementary schools seems like a necessary. Even in my area of dekalb county, where schools are at higher capacity, buildings are too small (all have trailers) and buildings are in disrepair. Transitioning middle schools to elementary schools and etc. seems like a good plan.	3/4/2026 8:26 PM
2130	This is a bad idea.	3/4/2026 8:26 PM
2131	Keep Ashford park open!	3/4/2026 8:25 PM
2132	I believe schools should be closed only if resources only if consolidated resources is used to maximize performance in areas of underperforming schools.	3/4/2026 8:25 PM
2133	Close vanderlyn for DHS expansion	3/4/2026 8:22 PM
2134	Keeping the neighborhood model of elementary schools and smaller schools/ classrooms is preferred to create a sense of community.	3/4/2026 8:22 PM
2135	Fear of overcrowding	3/4/2026 8:20 PM
2136	Please do not close Midvale Elementary School - we love our community and our small school. Consolidating Midvale with other schools will negatively impact our students and their experience.	3/4/2026 8:17 PM
2137	I understand the need for school closures and the desire to reallocate funds to meet greater needs and opportunities. However, I'm not in favor of this decision because my daughter attends McLendon and has truly thrived there since being selected through the lottery. We are zoned for Idlewood, and it simply did not meet her needs. While I realize my perspective is personal, I want my daughter on the Druid Hills career pathway. Since I cannot afford to live in that area, McLendon has provided her with the best opportunity to access that path and succeed.	3/4/2026 8:14 PM
2138	Evansdale Elementary has a bigger lot size and facility for students, faculty and community especially for extra curricular events. Better parking and safety in a neighborhood that can accommodate increased cars during events. People move to this neighborhood because it's community with Evansdale school. That means more families and more children that will attend Evansdale.	3/4/2026 8:13 PM
2139	I believe it is a terrible mistake to alter one of the greatest things about the DeKalb County School System - neighborhood schools. I believe that the closure of neighborhood schools will lead to an exodus of young families and accelerate the declining enrollment.	3/4/2026 8:12 PM
2140	it's hard to believe 2 two refenced schools which are nearly at capacity and have wail list for new students are considered for closing to meet requirements of other local schools.	3/4/2026 8:11 PM
2141	Data-driven	3/4/2026 8:11 PM
2142	Ridiculous to close Ashford Park when it's been the shining star of DeKalb County schools for many many years. It has tremendous community support, great faculty, and what should be most important, is delivering a high quality academic experience to the students.	3/4/2026 8:09 PM
2143	I don't like it. I think it will make class sizes larger.	3/4/2026 8:08 PM
2144	Please don't close Vanderlyn	3/4/2026 8:04 PM
2145	I think the consolidations will significantly have a negative effect on the county, parents, and neighborhoods. The proposed closures are based in neighborhoods and meet the needs of those residents' children. These closures will 1) negatively impact the ability for parents to work if they have to drive further than a few miles to their current zoned school; 2) negatively impact the home values of the homes surrounding the schools. Dekalb county does not maintain the currently closed schools, an example of this is the old Globe school on Haywood Drive, trash is everywhere and there is no upkeep of the building or surrounding land. The impact to schools forced to get larger will significantly negatively affect the residents in those areas. With a significant increase in car volume for drop off - those roads will become unsafe for walkers and bikers and likely lead to student injuries. It will create significant congestion for residents in those neighborhoods to commute to work. These are neighborhood schools and the roads surrounding them were designed for local residents. All of this will increase costs to Dekalb county and lower home values. And there is no plan put forward for how the shuttered	3/4/2026 8:04 PM

	school buildings will be used and will likely sit shuttered for years. Dekalb County residents do not want our tax dollars spent in this fashion. It is not cost effective and it will not improve the education of our students or the communities of shuttered or expanded schools.	
2146	I support data driven decisions and am fed up with rich parents pushing back to undermine decisions that help the whole system.	3/4/2026 8:02 PM
2147	I worry that closing small community elementary schools, like Midvale, only push those kids into already overcrowded schools with trailers. That also increases student size and teacher to student ratios, which are already too big.	3/4/2026 8:02 PM
2148	I am deeply heartbroken at the possibility of Kingsley closing. When I joined Kingsley, I did so with the full intention of making it my “forever school”. Over time, this school has become far more than a workplace — it is a community built on trust, relationships, and continuity. Generations of families have entrusted us with their children’s education, well-being, and sense of belonging. Parents return year after year with younger siblings because they believe in the culture and care that define Kingsley. The connection between staff, students, and families here is truly special and unlike anything I have experienced elsewhere in my career. It is a community that has been intentionally cultivated and is worthy of preservation and investment. While I understand the broader logistical considerations that may be influencing this decision, I see firsthand the daily impact of this school on our children and families. The uncertainty has been deeply unsettling for our community. On a personal level, this potential closure affects not only my professional future but also my family’s stability. As both a teacher and a parent at Kingsley, I have been working diligently balancing two part time jobs to establish long-term roots in this area because of how strongly I believe in this school. The possibility of closure creates profound uncertainty about the path forward for my child and for me. I respectfully urge the district to carefully consider the lasting impact this decision would have on the students, families, and educators who call Kingsley home.	3/4/2026 8:01 PM
2149	Why are most of the schools slated to be closed considered Horizon schools? How will students who are behavioral challenged be affected. How does look for class sizes and teachers?	3/4/2026 8:00 PM
2150	No clue what this is	3/4/2026 7:59 PM
2151	Oak Grove has been a great school and the students have high test results there. I don’t believe it should close.	3/4/2026 7:59 PM
2152	I feel that Oak Grove is an amazing school and i don’t believe it should close.	3/4/2026 7:59 PM
2153	I strongly oppose the closing of Ashford Park Elementary. I strongly recommend a new construction building on the same site. Alternatively, move the Ashford Park Elementary zone IN ITS ENTIRETY to Kohn Lewis Elementary. Move the current John Lewis students elsewhere.	3/4/2026 7:58 PM
2154	I agree to Scenario 1 for the Dunwoody cluster.	3/4/2026 7:57 PM
2155	The initial facility if great, but it could desperately utilize upda.	3/4/2026 7:56 PM
2156	Ashford Park elementary is overcrowded with terrible facilities. All of the students should be consolidated into John Lewis elementary beautiful new school.	3/4/2026 7:55 PM
2157	Some consolidations may be needed. Or maybe it is better to repurpose some Schools.	3/4/2026 7:55 PM
2158	If Oak Grove closes students would need to be absorbed by Briarlake & Sagamore Hill .Sagamore only has 43 seats available. Briarlake has approximately 130 seats available. Together they cannot absorb 447 Oak Grove students, without significant boundary shifts, overcrowding or facility expansion.	3/4/2026 7:55 PM
2159	I think Kingsley elementary should remain open and close Chesnut. The traffic on N Peachtree is terrible with the middle school. Chesnut land could be used for sports facilities. Would vanderlyn land be used for Dunwoody high school? Will Hightower elementary be rezoned for Doraville? This would help with overcrowding at middle and high school.	3/4/2026 7:49 PM
2160	I like utilization of cascading for HS to MS and MS to ES. I like that Sagamore Hills remains and would be expanded, its in a nice central area to many neighborhoods. It could also use some updates and security	3/4/2026 7:49 PM
2161	I understand why it needs to happen but how does it affect the teachers?	3/4/2026 7:48 PM

2162	In theory it makes sense to consolidate, but family size does tend to fluctuate. I think right now people are keeping their families small because costs are so high. Also, there is a higher amount of people leaving the country than coming in. This is due to the current political climate, which is likely to change with a new administration.	3/4/2026 7:44 PM
2163	I am agreeing with the school scenarios.	3/4/2026 7:41 PM
2164	DO NOT CLOSE THIS SCHOOL.	3/4/2026 7:40 PM
2165	N/a	3/4/2026 7:39 PM
2166	I agree that some consolidations are necessary for funding and adequate/modern more updated facilities. But politics should not play a role as to where students should attend school.	3/4/2026 7:39 PM
2167	These recommendations were ill-advised at best. The exact financial goals of this exercise / SAP have not been shared explicitly. The inputs were inaccurate and drove false outcomes. Furthermore, releasing any scenario without fully vetting with the local SAP members / board members was tremendously short sighted and bordered on mass incompetence. The feasibility of closures does not explicitly share where that student body goes and what the different allocation pathways / options are. Finally, the firm selected to do this work is a construction management advisory company. You are impacting student learning, communities, and financial outcomes that the “leadership” in DeKalb nor the consulting firm have the ability to comprehend. TLDR: this process and quality of the recos are a joke.	3/4/2026 7:39 PM
2168	Concerned about all of the closures in South Dekalb	3/4/2026 7:37 PM
2169	Please don't close Ashford Park.	3/4/2026 7:34 PM
2170	schools will be too big.	3/4/2026 7:33 PM
2171	Initial thought: why put a school on the list to close when you are doing $20M in renovations?	3/4/2026 7:32 PM
2172	Rowland Elementary is a school where the students are thriving. The students are excelling in test scores. The teachers love the students and vice versa. It is a sense of community. I would hate for that community to be broken apart. My child is thriving in an environment where reading is the focal point to make these students successful. It would be a disservice to close both schools in an already underserved part of Dekalb.	3/4/2026 7:31 PM
2173	Brockett is a neighborhood school with a growing population. The small size allows teachers and students to feel safe and protected. By moving our kids to a bigger school would break that since of community.	3/4/2026 7:29 PM
2174	I don’t understand consolidating if Ashford Park is currently overcrowded and needs updates to accommodate its current student body.	3/4/2026 7:26 PM
2175	I understand the purpose for them, the proposed consolidation for Kingsley and Vanderlynn. I think it poses challenges to the families of those immediate school communities. I’m curious to see what that means for the chestnut Austin and Dunwoody Elementary School communities that will likely absorb those students I believe all of the boundaries for those elementary schools in that cluster will shift. I’m also interested in what it will mean for the chestnut facilities specifically given that it’s been marked for an enhancement.	3/4/2026 7:25 PM
2176	Students should go to closest school, enabling them to take part in school extracurricular activities.	3/4/2026 7:24 PM
2177	Oak grove elementary is the backbone of our community. Generations have attended. Please please do not close it	3/4/2026 7:23 PM
2178	i feel it's a good idea.	3/4/2026 7:21 PM
2179	I believe that Flat Rock Elementary serves best as an elementary school.	3/4/2026 7:19 PM
2180	Please keep.magnet schools ope	3/4/2026 7:18 PM
2181	Strongly oppose making massive 900 seat Elementary schools. Understand closing some schools but building more out while closing nearly full ones is insane.	3/4/2026 7:17 PM
2182	I don’t agree. But understand. I believe we can be more creative with a solution	3/4/2026 7:15 PM
2183	Some sort of consolidation effort is needed, but I have little confidence that DCS can	3/4/2026 7:14 PM

	successfully pull it off. 20k empty seats didn't happen overnight. This has been trending for quite a while. The presentation seems to be biased away from small schools with no regard for the community unity they provide.	
2184	Please keep Oak Grove ES an elementary school!	3/4/2026 7:13 PM
2185	Sought after school with a wait list of 100 students.	3/4/2026 7:12 PM
2186	Some Ok but this is too many	3/4/2026 7:11 PM
2187	I have very serious concerns about the thought of closing McClendon and expanding Laurel Ridge given the fact that the Lula Hills development alone is expected to have 2000 housing units added to the area. It is concerning to me that a smaller school like Laurel Ridge would be over expanded and become a large school like Fernbank when so many parents selected to live near McClendon or Laurel Ridge with the intention of having a smaller neighborhood school.	3/4/2026 7:11 PM
2188	I support addressing overcrowding at Dunwoody High School and want strong long-term facilities planning across the cluster. Since SAP is framed around enrollment trends and utilization, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. Before any closure decision, it would be helpful to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications.	3/4/2026 7:11 PM
2189	I think closing vanderlyn would make sense to use on the Dunwoody high campus.	3/4/2026 7:08 PM
2190	Vanderlyn should be closed so Dunwoody High School can use that land.	3/4/2026 7:08 PM
2191	Oak Grove is a strong, high-performing school serving a strong, close-knit community. It should not be divided.	3/4/2026 7:06 PM
2192	Don’t put kids into old school buildings that are not up to date or in neighborhoods with high crime rates	3/4/2026 7:06 PM
2193	I support the Scenario 1 proposed plans as they relate to Chestnut Elementary School and the elementary schools in the Dunwoody cluster. CES sits on the largest acreage of land available to DCSD to expand compared to the other elementary school sites in our cluster. ● As traffic on North Peachtree has been questioned as a potential issue, we feel it important to share that due to the CES site location, any redesign could easily include a reconfiguration for new access point(s) off Peachford Rd. This is something the PAC has previously advocated for to improve overall school safety and traffic conditions. ● CES’s geographical location creates the most equitable access to elementary schools across the City of Dunwoody. Based on Scenario 1, the three remaining elementary schools would be geographically spread out to best serve students across Dunwoody [i.e.: northeastern side of Dunwoody (via Austin), central Dunwoody (via DES), and the southeastern side of Dunwoody (via CES)]. ● Removing an elementary school from the southeastern side of Dunwoody would adversely affect, and potentially impact educational outcomes, for a large number of Dunwoody residents that reside in the thriving multi-family communities of our city. These families are an important part of the CES community, and many of these families can best engage with their elementary school due to the walkability and public transportation corridor that CES’s location provides. ● CES’s proximity to Peachtree Middle School further enhances our thriving educational corridor in the Dunwoody cluster by allowing efficiency in shared resources and facility utilization. ● The CES community deserves to be served by a facility similar to the other schools in our cluster. CES has the lowest Building Adequacy Score (67.4%) of all Dunwoody cluster schools. The Building Adequacy Score is a measure of how well a facility aligns with desired standards by school type. Meaning, DCSD can continue to fix issues at our ageing building, but the building itself no longer best fits the needs for delivering exceptional educational services to our students. ● CES knows how to successfully deliver exceptional educational services to a diverse population. CES is one of the most diverse elementary schools in the Dunwoody cluster, and we believe it is extremely important that CES continue to execute what it knows how to do for these families. As evidence of this, CES is a GA Distinguished School and in the top 5% of all Title 1 schools in the state of Georgia. I support expansion opportunities for Dunwoody High School to help alleviate its overcrowding, which would help ensure that all families in the City of Dunwoody could be served by one high school, which strengths our entire Dunwoody community. As all Dunwoody cluster elementary schools roll up to the same middle and high school, we want the best opportunities and outcomes for our students even	3/4/2026 7:04 PM

	after they leave CES. Better utilization of the available land around DHS would best serve all families within the City of Dunwoody.	
2194	I believe that Scenario 1 provides the greatest benefit to families in my neighborhood.	3/4/2026 7:04 PM
2195	It does not impact my children or anyone I know well, so I don't have a negative response to current scenario.	3/4/2026 7:04 PM
2196	You all are speaking on the closures but not where the children will go if all these closures happen, and it's all the major schools in mostly one district it's not widespread throughout DeKalb County.	3/4/2026 7:03 PM
2197	Closing Ashford Park would be a devastating mistake. The Ashford Park community is one of the best and strongest. We moved here for this school. We never would have bought our home here had the school not been here. Closing this wonderful neighborhood school would have dire consequences. We strongly believe this school can be renovated. The land might be smaller than other schools, but it can absolutely be done. Ashford Park should be rebuilt before other schools are expanded. We have seen examples of other schools on the closure list being rebuilt. It feels completely backwards that a school overflowing with families would be closed down. This neighborhood loves its school. Dekalb county is trying not to have empty seats. Closing Ashford Park would lead to a massive amount of families leaving the dekalb public school system.	3/4/2026 7:03 PM
2198	No consideration has been given to the communities involved or to the quality of some of the schools involved.	3/4/2026 7:02 PM
2199	My children attended Oak Grove Elementary and its small size is appropriate for the age group of children. They had an excellent experience with teachers and a had a strong feeling of community there. They developed good fundamentals for the future. Young children need to go to school close to their home and benefit from parent volunteers. They can meet neighbors and form lifelong friends. Oak grove has always ranked well in academics. It is well attended. There is no reason to close it or any of the surrounding elementary schools.	3/4/2026 6:59 PM
2200	I do not agree with closure.	3/4/2026 6:58 PM
2201	Consolidations make sense.	3/4/2026 6:58 PM
2202	It is not a wise decision we need neighborhood schools	3/4/2026 6:58 PM
2203	Clean, bathrooms old and dirty	3/4/2026 6:58 PM
2204	I hate to see a beautiful SchoolMint like McNair Middle be repurposed it was meant for students. McNair Middle could be K-8.	3/4/2026 6:51 PM
2205	Please do not close Oak Grove Elementary. It is the reason many people have moved or will move into the neighborhood.	3/4/2026 6:48 PM
2206	It appears that the southern end of the county is more impacted than the northern end. This continues to perpetuate the practice of hurting our children in terms of resources (school facilities, resources, faculty, etc.)	3/4/2026 6:47 PM
2207	There is value in children attending schools in their neighborhood. When you close neighborhood schools, you are cutting out the very foundation of a neighborhood. Parents, teachers, churches, police officers, small businesses, etc. is what holds neighborhoods together. It's not fair to the children to bus them to other children's neighborhoods. It's not fair to the parents who have to go outside their neighborhoods, not by choice but because someone thought their school didn't make the cut to exist. When that child needs the be picked up early, due to illness, etc. remember parents have to go farther and will not be able to just be there in 5 minutes. If the child miss the bus then it would be a lot harder to get the student to school if the school is farther away. I'm not sold on the root cause of the problem, as presented. I think more work needs to be done to show enrollment per grade level. The district needs to root cause why parents are pulling their children out of school and at what grade is the mass exit occurring. I can see this being an endless cycle because the district hasn't truly determined the root cause of the issue at hand. The major elephant in the room is taxes. Will the school tax line item decrease because of these measures? If the answer is no then I'd rather work with the inefficiency than continue to pay sky high taxes while at the same time hurting parents, children, and teaches.	3/4/2026 6:47 PM
2208	The cascading concept may not be the only framework for decision making. It seems to	3/4/2026 6:47 PM

	introduce problems that then require changing grade band scenarios. Some questions: 1. How have decisions been made in the past about closing schools and deciding which schools deserve maintenance and building improvement? 2. Why has academic performance of existing schools not been considered? 3. Why have teachers not been considered in the decision process? Some changes may mean losing the best teachers. 4. To what extent are the various scenarios locking in past errors in school facilities planning?	
2209	DeKalb County will jeopardize the number of students that attend its schools, as many parents in high performing schools (like Oak Grove Elementary) whose children are moved to other schools in this consolidated scenario will move their kids to private school, therefore threatening DeKalb County's academic performance. Oak Grove also receives significant philanthropy from the families in the neighborhood - this will also be threatened. Oak Grove and other schools in this plan have a longstanding ties and links to their neighborhoods.	3/4/2026 6:45 PM
2210	I live in the community serviced by Oak Grove Elementary school. Losing this wonderful community school would be devastating for the community.	3/4/2026 6:44 PM
2211	Where will the smaller children go if the scenario closes all the schools in the area? Why take the kids so far away from home??	3/4/2026 6:43 PM
2212	Closing oak grove elementary doesn't seem to make sense. From what I can tell, it's a high achieving school with strong community support and in close proximity to its students and high school. The other closures seem to be focused on low adequacy and far proximity, which makes more sense to me.	3/4/2026 6:43 PM
2213	The initial scenario is a travesty... timing of the release with the February break, lack of transparency around meeting purpose/timing, rushing of timeline into Phase 2, use of entirely inaccurate data, suggesting closing schools without providing any plan (and budget) re where all these students would go, lack of attention to actual school performance, initiation of potentially massive changes with a temporary superintendent, hiring a firm with a clear conflict of interest who stands to benefit from construction... the list could go on. People buy homes for the elementary schools. We stayed during COVID for OGE. To close one of your best elementary schools... there is no rational argument to do so.	3/4/2026 6:43 PM
2214	It's hard to evaluate without a proposal of what happens to the closed elementary schools. Why would overcrowded Ashford Park be closed? Where is there capacity to absorb those students?	3/4/2026 6:41 PM
2215	In Dunwoody, if this proposal is driven by high school facility needs rather than elementary inefficiency, and if future enrollment shifts may relieve this pressure, closure should not be assumed as the default solution. The Dunwoody cluster cannot be evaluated using the same framework as clusters with multiple under-enrolled campuses.	3/4/2026 6:40 PM
2216	you can just copy paste this: I support the Scenario 1 proposed plans as they relate to CES and the elementary schools in the Dunwoody cluster. CES sits on the largest acreage of land available to DCSD to expand compared to the other elementary school sites in our cluster. ● As traffic on North Peachtree has been questioned as a potential issue, we feel it important to share that due to the CES site location, any redesign could easily include a reconfiguration for new access point(s) off Peachford Rd. This is something the PAC has previously advocated for to improve overall school safety and traffic conditions. ● CES's geographical location creates the most equitable access to elementary schools across the City of Dunwoody. Based on Scenario 1, the three remaining elementary schools would be geographically spread out to best serve students across Dunwoody [i.e.: northeastern side of Dunwoody (via Austin), central Dunwoody (via DES), and the southeastern side of Dunwoody (via CES)]. ● Removing an elementary school from the southeastern side of Dunwoody would adversely affect, and potentially impact educational outcomes, for a large number of Dunwoody residents that reside in the thriving multi-family communities of our city. These families are an important part of the CES community, and many of these families can best engage with their elementary school due to the walkability and public transportation corridor that CES's location provides. ● CES's proximity to Peachtree Middle School further enhances our thriving educational corridor in the Dunwoody cluster by allowing efficiency in shared resources and facility utilization. ● The CES community deserves to be served by a facility similar to the other schools in our cluster. CES has the lowest Building Adequacy Score (67.4%) of all Dunwoody cluster schools. The Building Adequacy Score is a measure of how well a facility aligns with desired standards by school type. Meaning, DCSD can continue to fix issues at our ageing building, but the building itself no longer best fits the needs for delivering exceptional educational services to our students. ● CES knows how to successfully deliver exceptional educational services to a	3/4/2026 6:40 PM

	diverse population. CES is one of the most diverse elementary schools in the Dunwoody cluster, and we believe it is extremely important that CES continue to execute what it knows how to do for these families. As evidence of this, CES is a GA Distinguished School and in the top 5% of all Title 1 schools in the state of Georgia. I support expansion opportunities for Dunwoody High School to help alleviate its overcrowding, which would help ensure that all families in the City of Dunwoody could be served by one high school, which strengths our entire Dunwoody community. As all Dunwoody cluster elementary schools roll up to the same middle and high school, we want the best opportunities and outcomes for our students even after they leave CES. Better utilization of the available land around DHS would best serve all families within the City of Dunwoody.	
2217	We hope to keep the school as a whole party and move to the current John Lewis Elementary School facility.	3/4/2026 6:37 PM
2218	Undecided	3/4/2026 6:36 PM
2219	I believe the consolidation is about more than just low enrollment. It seems like the majority of the schools being closed are in African American neighborhoods.	3/4/2026 6:36 PM
2220	I think expanding Chesnut is a great idea and I think current Chesnut families shouldn’t be moved to another school!	3/4/2026 6:33 PM
2221	I don't like the idea of closing elementary schools and moving kids to an already crowded school. My son has learning needs which is already hard enough in a class of 24 kids. It's going to be harder to learn in a class of 28 or more kids, test scores will go down, and enrollment will drop further.	3/4/2026 6:33 PM
2222	One of the most crowded schools (Ashford Park) in the county is one you want to close? We need more seats in this area, not less. Some of the schools with majority empty seats should be the ones to close and consolidate. The crowded schools need more in the area.	3/4/2026 6:32 PM
2223	While I understand you're starting with just facilities. It's hard not to think about how this is going to impact students - especially those who have more support needs (neurodivergent, IEP, 504, physical disabilities, cognitive disabilities) Having larger schools seems to always lead to these children having a harder time getting needs met.	3/4/2026 6:31 PM
2224	I am not a fan of the consolidation of our elementary school. The class sizes currently feel perfect without any fear of overcrowding. The teachers are able to better develop meaningful relationships with their students. If the plan is to add 250+ students to elementary schools under 500 students, then overcrowding and class sizes will certainly become an issue.	3/4/2026 6:31 PM
2225	The traffic is going to be catastrophic with this plus the mall.	3/4/2026 6:27 PM
2226	I am in support of the proposed facility changes	3/4/2026 6:27 PM
2227	Laurel ridge seems to be a healthy size unsure what expanding would do to the surrounding playground and woods and things	3/4/2026 6:23 PM
2228	Oak Grove Elementary is an essential neighborhood school, creating connections between children, families & other community members. I strongly support keeping Oak Grove open.	3/4/2026 6:22 PM
2229	Do not close Oak Grove Elementary. They are serving the needs of the community and have a waitlist for enrollment.	3/4/2026 6:20 PM
2230	Robert Shaw is a very prominent school and it is very important to keep it up and alive. This school has raised, taught and educated families, children and communities. In doing so, they have created leaders, doctors, nurses and more that I know personally and now my child is attending Robert Shaw Theme School. This school is immensely important and valuable to parents, teachers and students. This would break the hearts of the community and students as well as parents who have attended Robert Shaw and now having their own children attending this school.	3/4/2026 6:17 PM
2231	The cascading use makes sense in addition to consolidation.	3/4/2026 6:15 PM
2232	Some do not make sense. Ashford Park is a newer building with a large population. Oak Grove has rising enrollment. It could not possibly be combined with Sagamore without significant expansion there. Plus it is one of the highest performing ESs.	3/4/2026 6:14 PM
2233	I'm sad that the district has made decisions that make it an unpopular choice for parents but understand that adjustments need to be made.	3/4/2026 6:13 PM

2234	I think the consolidations do not consider the impact of neighborhood schools especially in the southern end of the county where the majority of changes will take place. I think that the changes will negatively impact students because it only considers building numbers and not the demographics/social economic/races affected. It's very tone deaf to the idea that there are "two Dekalbs" separated by race and finances.	3/4/2026 6:13 PM
2235	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. As a new resident moving into the community, I plan to send my children to Oak Grove Elementary, contributing to the increasing trend. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/4/2026 6:12 PM
2236	I do not support the proposed school consolidation scenario. I am concerned that closing or combining schools may negatively affect students, especially African American children and other vulnerable groups, by disrupting learning environments, community connections, and access to resources. I believe the district should explore other options that maintain school stability and promote equity for all students.	3/4/2026 6:12 PM
2237	Worry about having kids in classes in trailers	3/4/2026 6:11 PM
2238	This is ridiculous to close so many schools in the same zones.	3/4/2026 6:10 PM
2239	Schools need to be closed	3/4/2026 6:09 PM
2240	Not enough information has been given. You suggest closing schools based on small capacity and others can be expanded. Overcapacity schools that draw in new high- achieving students and successful teachers should not be punished. Why expand a school like Montgomery ES over Ashford Park? The parking situation is not much better and the constraint of a massively transited road is not a positive to prospective parents.	3/4/2026 6:08 PM
2241	Please don't close the school we drive out of our way to attend	3/4/2026 6:07 PM
2242	I am in agreement that Kingsley and Vanderlyn should close and Hightower should leave the cluster. It makes sense. Chesnut should be made bigger and the vanderlyn campus should be used for expansion at Dunwoody high school	3/4/2026 6:05 PM
2243	My grandchildren attend all the schools I've checked. This will effect there education and not in a good way.	3/4/2026 6:05 PM

2244	I do not feel that combining the elementary schools into one building at McNair Middle. KLES has traditionally performed well due to the small community feeling. The staff has been more than welcoming and they know each and every student.	3/4/2026 6:03 PM
2245	Closing Ashford Park is not well thought out. The school is bursting and is over capacity. It is full of parents who are involved in the neighborhood. The foundation provides where the county cannot. A combining with John Lewis could be a better option with a lower and upper school. Splitting Ashford Park between lower performing schools will only send more families to private and ultimately hirt the middle and high school. Chamblee High school is one of the top performing high schools in the County and that does not need to be sacrificed.	3/4/2026 6:03 PM
2246	I'm not convinced that the initial facilities scenario has been planned with the community in mind. I understand that we are trying to conserve resources and do what's best for all students, but combining community/neighborhood schools into mega elementary schools is not the answer.	3/4/2026 6:03 PM
2247	I think they could use some improvements to the green areas and some of the facilities.	3/4/2026 6:03 PM
2248	Where will the students go? How will the staff being divided, especially the elective teachers? Some students are fully involved in certain programs at their school and the teacher is the glue that keeps the student involved.	3/4/2026 6:01 PM
2249	I think Chesnut is perfect for expansion. It's on 11 acres of land and those kids should feed right into peachtree middle	3/4/2026 6:00 PM
2250	Oak Grove elementary was such a special place to me. So many memories and great teachers. I would hate to see this wonderful school, not be available to future students. June June 8 is the 12th see Easton play have you ever played in Cooperstown? We can only play that when you're 12 you should go play that you should go play this summer cause you can you can you can still do it Coopertown if we're gonna go see Easton play and then we're gonna go to baseball Hall of Fame and we're gonna go see Niagara Falls	3/4/2026 5:59 PM
2251	N/a	3/4/2026 5:56 PM
2252	I strongly disagree with Ashford Park being on the list, especially with no logical plan on where those students would go. The domino effect of closing Ashford Park on the community, home values, the educational opportunities for students, public school enrollment (many kids would go private or move), and Dekalb tax revenue would be immense. I acknowledge that the building itself is old and overcrowded. It seems a better plan would be to change the $25M renovation to a more robust rebuild that would expand capacity or to shift the Ashford Park zone to the current John Lewis Elementary facility while maintaining the Chamblee cluster alignment. I would be open to either of these pathways. My top priority would be keeping our trajectory to Chamblee MS and HS.	3/4/2026 5:56 PM
2253	I am fine with it	3/4/2026 5:49 PM
2254	See below	3/4/2026 5:49 PM
2255	I think it makes sense where utilization is very low, but I strongly do not believe that creating mega schools for elementary age students is what is best for the kids or families.	3/4/2026 5:46 PM
2256	I don't support it without more explanation around how it will reduce inequity.	3/4/2026 5:43 PM
2257	It's a shame, but understandable in terms of operating a large school district. However, it's concerning as to the cause of the lack of enrollment.	3/4/2026 5:43 PM
2258	While closing elementary schools near me would probably negatively impact my home value, I agree that change needs to be made. I encourage changes to be thoughtful, though, and consider long term impacts.	3/4/2026 5:41 PM
2259	It's not clear how money will be saved or diverted with school closures. The whole premise of the plan seems flawed	3/4/2026 5:40 PM
2260	This this scenario has lots of negative impact. The traffic around the new bigger schools will be huge worse than it already is! People like us who bought our homes in a neighborhood based on the schools we have decreased property value if we no longer have those schools students will have to travel further, and it will be a bigger burden on all the parents.	3/4/2026 5:39 PM
2261	Keep Oak Grove Elementary.	3/4/2026 5:39 PM

2262	The proposals are based on suspect and arbitrary data. Mr Richter at HPM has a history of making the same types of proposals over and over again, with little proof of success. Proposing to close high-performing schools with significant parent and guardian involvement (not to mention significant financial investment through the school foundation) makes little sense. Oak Grove may need some basic improvements to things like HVAC but to close it completely and instead expand Sagamore Hills would harm the communities in both districts. Oak Grove's enrollment is steadily growing.	3/4/2026 5:39 PM
2263	I understand the need to close schools that do not have the acreage to expand, however, Vanderlyn is the #2 elementary school in the district. I worry that closing it means losing that ranking in thr state-wide data. Ashford Park is exploding and desperately needs tk be redone/right-sized it it doesn't get closed.	3/4/2026 5:38 PM
2264	I understand the need to operate facilities efficiently. I think it's very important we keep the schools we feed into for middle and high (Ashford park to feed Chamblee middle/high). I could support if we move to a very close by school (like John Lewis for AP) but major shifts stands to harm the quality of education and the property values in the area. I fear the lack of attendance will get worse and many will wind up opting for private options instead given the affluent area.	3/4/2026 5:38 PM
2265	No concerns	3/4/2026 5:37 PM
2266	Our school has a very high utilization rate but is proposed to being closed. It is also high performing and I worry that closing it will disrupt that.	3/4/2026 5:37 PM
2267	The initial facilities consolidations look OK	3/4/2026 5:30 PM
2268	I think traditional elementary cluster k to 5 should be separated. There is too wide of a range of physical and developmental gap.	3/4/2026 5:29 PM
2269	My initial thought as a educator in a parent is that it has lessened the classroom sizes and made them smaller, which is a good thing for instruction, even though it may not be cost-effective for the county it's good for the children	3/4/2026 5:26 PM
2270	I feel that the property values of the vacant properties (from the last round of closures and consolidations) could provide addl revenue to keep schools at lower class sizes.	3/4/2026 5:26 PM
2271	one concern is what happens if the housing market rebounds and there's an influx of students in the future. will the kids be reshuffled again? will additional schools be constructed?	3/4/2026 5:26 PM
2272	I am disappointed in learning that Ashford Park Elementary is on the school closure list BUT I understand that it is a very old and small school. I honestly would be ok with relocating the school staff/students to another location and would be ecstatic if they could all stay together as a community. We have staff/educators who have been at the school for many, many years because the parents work really hard to support them. They are excellent teachers who genuinely care about our children. ABOVE ALL ELSE!!, I want the community to remain in the Chamblee high school cluster. My husband and I moved to Brookhaven before we were married and purposely purchased our home here in 2011 before having our first child in 2013 mainly because we firmly believe in public education and wanted our children to attend Chamblee high school. If we thought that we could possibly be redistributed to another cluster we would have purchased in Chamblee.	3/4/2026 5:26 PM
2273	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone	3/4/2026 5:25 PM

	(approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
2274	This entire plan is LUDICROUS! Does Dekalb County think employees are totally BLIND to how many worthless county office people they have been hiring (while the schools are constantly short handed). Are they purposely TRYING to run off all of our great teachers to other counties? Not to mention the families that are leaving in droves because of total mismanagement. Evansdale is a very successful neighborhood school and needs to remain OPEN!	3/4/2026 5:25 PM
2275	Keep Vanderlyn!!! Vanderlyn is an amazing elementary school and is in a great location on a shared campus with Dunwoody High!	3/4/2026 5:24 PM
2276	It seems like certain areas of Dekalb were targeted.	3/4/2026 5:24 PM
2277	Consolidating schools to cram kids like sardines into these buildings may be good for the budget but it is not good for the kids. Please remember that your job is not to manage a real estate portfolio but to manage the education of children. What is best for the kids may not always be what is best for the pocketbook but what is best for the kids needs to outweigh the pocketbook. I understand budget constraints and needing to work within those; at the same time, punishing neighborhood schools for buildings that you have neglected and then cramming them into buildings that may have enough "seats" but do not have enough ROOM - carpool, lunchroom, playground, auditorium for performances, etc. is not okay. Evansdale already has lunch starting at 10:15am because there isn't enough room in the lunchroom regardless of how many "seats" are in the school. and to be clear I'm not advocating for closing Evansdale, I am advocating for leaving these smaller, neighborhood schools as they are and investing in the building updates they need. Smoke Rise combining with Idlewood has been a disaster and families are fleeing that school in droves because it does not have the infrastructure to support the "seats". Please stop looking at seats and dollars and start thinking about the entire experience for the children attending these schools.	3/4/2026 5:23 PM
2278	Oak Grove does not align with the stated objective of addressing under-utilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students/ 504 capacity, October 2025) and projected at 487 students in 2026-2027 (96%). Enrollment has increased for four consecutive years. 2282	I feel that the potential closing of APES is not the correct path. I certainly agree that the facilities are old however the need and location of the school is right in line with the neighborhood and the families that the school supports. I feel that updates can be made to the existing school on the existing property while the school stays in operation that will serve the community for many years to come.	3/4/2026 5:20 PM
2283	Closing high successful elementary school with high parent involvement does not seem to make sense - please keep Oak Grove Elementary open - fantastic neighborhood school - kids walk and ride bikes - loyal longtime teachers	3/4/2026 5:19 PM
2284	There seems to be a concentration of closures in the south dekalb area. I would like a plan that includes keeping South dekalb area active.	3/4/2026 5:19 PM
2285	I think it's time.	3/4/2026 5:19 PM
2286	Very unhappy with how this was done. Schools are a lot more than buildings. Making these decisions without considering the impact on the programs in the schools, the communities, even traffic patterns is not logical.	3/4/2026 5:18 PM

2287	I strongly oppose the DeKalb County School District's (DCSD) proposal to close 27 schools as part of the Student Assignment Project led by HPM, without first exhaustively exploring alternative cost-cutting measures. This hasty approach risks unnecessary disruption to communities, especially when evidence shows consolidation often fails to deliver promised benefits. First, the academic literature on school consolidations is clear: it does not reliably support significant cost savings or improvements in student achievement. Studies, such as those from Arkansas and Mississippi, reveal null or modest financial gains at best, often offset by hidden costs, including increased transportation costs and administrative inefficiencies. Academic outcomes fare even worse, with research indicating short-term disruptions and no long-term boosts in proficiency or graduation rates. In DCSD's context, with enrollment declines tied to broader trends, closures could exacerbate inequities without addressing root issues like chronic absenteeism or low reading scores. Moreover, HPM's plan is fundamentally flawed in its projections. It primarily relies on declining birth rates while ignoring major drivers of DeKalb County's population growth, such as immigration and in-migration from urban areas. The county has seen a 1% annual population increase, fueled by diverse families and economic opportunities, which could reverse school enrollment drops. The proposal also neglects traffic patterns, potentially worsening commutes and absenteeism, and overlooks ongoing multi-family housing projects that will add hundreds of school-age children in high-growth zones like Doraville and Stonecrest. Instead of closures, DCSD should prioritize non-disruptive savings: energy-efficient upgrades (saving 10-20% on utilities), optimized transportation routing (cutting 5-15% from budgets), shared services with neighboring districts, and streamlined procurement. These could yield $50-100 million annually without uprooting students. I urge the board to demand a comprehensive, inclusive analysis before proceeding—our children's education deserves better than a shortsighted plan.	3/4/2026 5:18 PM
2288	I am disappointed in the list of closures as most are, I think the lack of information on where students would be rezoned to is making the situation more stressful and frustrating	3/4/2026 5:18 PM
2289	Strong, stable elementary environments are important for students and communities, and I would like to better understand how this proposal supports long-term cluster planning. I support solutions for high school overcrowding, but it would be helpful to see complete modeling on reassignment, receiving school enrollment and capacity, transportation, and feeder impacts before decisions are finalized.	3/4/2026 5:15 PM
2290	Worried about the closing date of primarily schools on southside of county and bussing minority students across the district. I wish we could put money into these schools since north side of county has several foundations to support. Don’t like the idea of 900-1,000 students in elementary schools. Keep as many 400 neighborhood schools as possible	3/4/2026 5:15 PM
2291	Too many schools being considered for closure. I am concerned about overcrowding and the ability to handle more students in the future. I do agree that Laurel Ridge could be expanded to accommodate more students in the immediate area.	3/4/2026 5:14 PM
2292	We have many children in our neighborhood who attend Oakgrove Elementary and our 3 children went to this school. Excellent school with very well qualified teachers who provided a great learning experience for our children.	3/4/2026 5:14 PM
2293	It would be a mistake to close Oak Grove Elementary	3/4/2026 5:12 PM
2294	I would like to know what will happen to the staff if this happens at these schools	3/4/2026 5:12 PM
2295	Please dont close our neighborhood schools, and please allow the matriculation to stay static	3/4/2026 5:11 PM
2296	I think the initial facilities scenario makes sense. It seems to be balanced and take into effect the realities of demographic changes. It affected schools throughout Dekalb County.	3/4/2026 5:11 PM
2297	It seems reasonable but I am not sure of all the ways this impacts parents/students/ the community	3/4/2026 5:05 PM
2298	Closing Ahsford Park makes little sense given the ongoing improvements and community engagement	3/4/2026 5:04 PM
2299	I am open to what the district plan is.	3/4/2026 5:03 PM
2300	If the district’s objective is to right-size elementary schools toward the 600-student efficiency benchmark, Vanderlyn should be evaluated as a candidate for expansion rather than closure. The school is already operating efficiently and, given its shared campus, presents an	3/4/2026 5:02 PM

	opportunity to explore coordinated facility solutions that support Dunwoody High School's needs while preserving elementary access.	
2301	I understand the need.	3/4/2026 5:01 PM
2302	If consolidation allow for more teachers that are better incentivized, smaller classroom sizes (less than 25 students to a class), and a higher quality of maintenance at the schools then I am for it.	3/4/2026 5:01 PM
2303	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top t ier academically does not directly address the district-wide utilization gap.	3/4/2026 5:00 PM
2304	Public messaging around SAP has emphasized whole-school transitions, yet discussions indicate Vanderlyn students would likely be split between neighboring schools, if closed. This is not comparable to combining two half-capacity schools and would create significant feeder disruption and transportation impact. If this proposal is driven by high school facility needs rather than elementary inefficiency, and if future enrollment shifts may relieve this pressure, closure should not be assumed as the default solution. The Dunwoody cluster cannot be evaluated using the same framework as clusters with multiple under-enrolled campuses. Before moving forward, families need cluster-specific reassignment modeling, receive school utilization projections, and a clear explanation of why expansion or shared-campus options were not prioritized.	3/4/2026 5:00 PM
2305	I am not in agreement on consolidations. DeKalb is the biggest county in metro Atlanta we need more quality schools not consolidations.	3/4/2026 5:00 PM
2306	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is	3/4/2026 4:58 PM

	73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top t ier academically does not directly address the district-wide utilization gap.	
2307	I don't feel the schools should close at all this will affect the kids at the schools	3/4/2026 4:56 PM
2308	keep Oak Grove Elementary school open	3/4/2026 4:54 PM
2309	This set of scenarios reinforces inequities that already exist within DCSD. Closing schools in areas with lower enrollment, leads to fewer families moving into the area, leading to event lower enrollment. Turning McNair Middle into an Elementary School would be a major resource loss for the community - on top of being incredibly expensive to retrofit for elementary students. Getting MMS was a major community battle. The former building was falling apart before students got the new building - and it was built with the promise of access to the best of the best - labs, technology rooms, courtyards for outdoor classrooms, dance class space, etc. To take that from the community and turn it into an Elementary school (when our community already has a brand new elementary building) is disrespectful. If space is an issue - consider limiting the number of out of neighborhood students attending Obama. If that is not a consideration, it makes me wonder what the actual goal here is. It seems like the district finds ways to take the best of our community and offer it up to others. Only to leave us with leftovers.	3/4/2026 4:54 PM
2310	I agree that some of the elementary need to close. Also we need more middle schools. I think if children live within a 3 radius that they should continue attending the schools in their radius.	3/4/2026 4:53 PM
2311	I am in favor of closing some schools, particularly the oldest, most aging facilities in our district. But rather than being repurposed, they should be razed. Don't throw any more money at these aging facilities!	3/4/2026 4:50 PM
2312	Specifically for this north cluster I understand why you want to close schools However I don't see how building mega schools will help children as compared to smaller localized neighborhood schools (specifically elementary).	3/4/2026 4:49 PM
2313	I understand the financial strain but am not a fan of having such a wide range of ages (older teens and young kids) together under one roof. It seems unsafe as their needs and maturity levels are so different that it would lend to having un-supportive environments. As an example, Bullying is such a big problem and I can't imagine what a senior in high school could do to a little 6th grader. Just an example. But just developmentally thinks it's great that they are all not together.	3/4/2026 4:48 PM
2314	I am impressed with the level of effort that went into this initiative and with the amount of information that is available for families, staff, and community members to view. Absent any other data, I don't see major issues at this time. However, I do think that in order to be okay with closing 2 of the 5 elementary schools in our city (I know cities are independent of the school system), I would want to know why one was proposed over another, how the system plans to accommodate the expansions, and specific plans for the closed school buildings.	3/4/2026 4:46 PM
2315	it is fine, but you need to increase the size of Dunwoody High School. It is VERY	3/4/2026 4:44 PM

	overcrowded.	
2316	I strongly oppose the closure of Vanderlyn Elementary. This is a community school that serves the needs of the immediate neighborhood. A consolidation with other schools would negatively impact the student experience.	3/4/2026 4:43 PM
2317	I like the consolidations. While it will be sad to see our elementary school closed (Vanderlyn), I am hopeful that the space and facilities can be used for the ever-growing needs of Dunwoody HS.	3/4/2026 4:43 PM
2318	The traffic going to and from Sagamore Elementary is already problematic. It will need to be addressed prior to increasing enrollment at that school.	3/4/2026 4:42 PM
2319	I'm in favor of the consolidation as long as building improvements can be made. Specifically for my area (Montgomery, Chamblee MS, and Chamblee HS), Montgomery needs major upgrades and expansion to remove portable classrooms. Ideally, it would be great to utilize both the 1663 East Nancy Creek Drive school (the current Dunwoody Elementary-which is not in Dunwoody) and Montgomery School campuses as a Primary (PK-3 school) and an Intermediate (4-5th grade school). Move the "Dunwoody Elementary" students from 1663 E. Nancy Creek Drive to Kingsley Elementary in Dunwoody. Closing Ashford Park and repurposing into a Rec Center or another park would be great!	3/4/2026 4:41 PM
2320	The county should be making best possible use of resources and the current numbers support some type of restructuring. The more data the process can gather and share with stakeholders the better the solution. And there won't be a pain-free solution, so all stakeholders being happy should not be a consideration.	3/4/2026 4:40 PM
2321	Oak grove elementary should stand. Very important for the community	3/4/2026 4:39 PM
2322	Don’t care for it as small classrooms support better learning.	3/4/2026 4:38 PM
2323	Consolidation might make sense of there are under utilized schools, but resources and space would be required at the repurchased facilities and future population projecting would have to confirm the change would be necessitated in a decade at least.	3/4/2026 4:38 PM
2324	Oak grove elementary should stand. Very important for the community	3/4/2026 4:36 PM
2325	Closing Oak Grove Elementary will not accomplish the goals stated by the SAP objectives. OGE already maintains a higher utilization score than the schools targeted for closure. OGE's projected student body numbers for next year are 487 students with only a capacity of 504. In fact, OGE already gained extra points to hire another teacher to create a 4th 3rd grade classroom because so many students come and stay. Likewise, trying to send OGE kids to Briarlake and or Sagamore seems ill advised. Neither school is equipped to handle absorbing that number of kids. Having lived in the immediate vicinity of these schools for more than 10 years at this point, I have seen a tremendous amount of new construction and have witnessed the growth of the area. To stunt that growth would negatively impact Deklab as a whole. Likewise, closing OGE does not make sense as it is one of the district's highest performing schools.	3/4/2026 4:35 PM
2326	Consolidations do not make sense to me especially the elimination of Elementary schools in Dunwoody which has always been over populated. The only thing that would make sense is if Vanderlyn was repurposed to support a very over crowded Dunwoody High School and become a 9th grade academy. those students could easily move. However, the closure of Kingsley to an already over populated Chestnut and soon to be over crowded Dunwoody Elementary makes zero sense for a very very crowded community.	3/4/2026 4:34 PM
2327	Please do not close Oak grove elementary. It is a wonderful community / neighborhood school and many families choose to move here and send their kids to this public school rather than residing outside of DeKalb county. We need the tax revenue from areas like oak grove to help all of DCSD.	3/4/2026 4:32 PM
2328	Some of the facilities being closed need to be temporarily used so that schools slated for being added on to can be completely replaced rather than patching up the older sections of the buildings and adding on. For example, in Dunwoody if you close Kingsley and / or Vanderlyn, but want to expand Chesnut. You should relocate students to Kingsley and Vanderlyn, while you completely demolish and build a brand new Chesnut. We patch together too many facilities in DeKalb that should have been replaced with brand new buildings a long time ago. Our	3/4/2026 4:31 PM

	facilities are in an embarrasing state of disary compared to facilites in other metropolitan Atlanta school district.	
2329	It will be too many students for the teachers to handle. There needs to be reassurance that doing this will be a good benefit for the kids. Also look at the cost of living in the surrounding areas of the schools!!!! The costs are way to high for families to maintain! That's the reason why you have the decline in numbers!	3/4/2026 4:30 PM
2330	Briarlake is already incredibly crowded and adding more students to an already crowded school is not beneficial to anyone.	3/4/2026 4:29 PM
2331	I find it disappointing that you are targeting good performing schools like Vanderlyn and Kingsley. Why close schools that are showing good performance/improvement? It is also disappointing to be doing improvements on schools and then close them. That is a waste of money. Also, you note that Chesnut will be expanded to cover the shift in students, but Chesnut already has too many trailers (as do many schools).	3/4/2026 4:29 PM
2332	I believe redistricting should happen first before closures are considered. Redistricting is at least 10 years overdue. For example, we would not have overcrowding at Dunwoody High School today if the district had been courageous about cluster changes. There have been around 8000+ open high school seats at times.	3/4/2026 4:27 PM
2333	If all you're doing is closing schools and moving students, you will not restore public support for DeKalb School System.	3/4/2026 4:27 PM
2334	Elementary schools should be an extension and not a mega school. Additionally, there will be layoff's.	3/4/2026 4:25 PM
2335	Having children busses for minute than 20 minutes in elementary school is a terrible idea. At a high school level, how will those without transportation participate in after school programs?	3/4/2026 4:23 PM
2336	Keep the same	3/4/2026 4:22 PM
2337	Maintaining a good balance of staff to students and space to students seems important. Consolidating seems unnecessary and possible harmful to the students. Oak Grove Elementary is a historically high performing school and should certainly remain open. In addition, closing such a school can have negative economic impacts on property values in the area.	3/4/2026 4:21 PM
2338	It's hard to judge this sccenarion when you all are only providing a fraction of the information or plan that would be needed to truly evaluate it.	3/4/2026 4:18 PM
2339	I agree with some of this but it will affect the students negatively by separating them from their friends and families.	3/4/2026 4:16 PM
2340	• Oak Grove already meets the district's utilization target today (about 89%) • The school is projected to reach ~96% capacity next year • Enrollment has been increasing, not declining • Significant new investment and development in our area has likely not yet been reflected in projections • Academic performance, test scores, and teacher retention were not included as closure criteria.	3/4/2026 4:15 PM
2341	Oak Grove school is very high-performing and important to DeKalb County. Oak grove school is a draw for potential employees moving to the Atlanta area - CDC and Emory faculty applicants typically ask about the public school systems in the area. .Closing or consolidating, the school would be a mistake.	3/4/2026 4:14 PM
2342	I do not agree with closing so many schools. I would never have wanted my kids to go to a large elementary school. I think closing the small neighborhood schools will decrease enrollment further.	3/4/2026 4:14 PM
2343	I do not think the schools should be closed or consolidated. Otherwise, it will cause too many students in a school and possible social eruptions (fighting/negativity due to combining various gang environments).	3/4/2026 4:14 PM
2344	I am sad to think about Oak Grove Elementary school closing. It is part of the community. I attended Oak Grove myself from 1969-1974. I intentionally moved back into this area for the community.	3/4/2026 4:12 PM
2345	Very happy you say nothing is set in stone. It appears that the vast majority of your excess space is in South Dekalb. This is because you have focused all your money there building	3/4/2026 4:09 PM

	beautiful schools and ignoring the northern end of the county that was and, in some cases, still is very overcrowded. For example, the plan does absolutely nothing to address the overcrowding at Dunwoody High. Also, the plan to close small schools in favor of large schools is a mistake. The best things come in small packages. This applies to neighborhood schools. I raised 3 children in Vanderlyn Elementary and I taught for 11 years in a huge school in Gwinnett County. Smaller is better.	
2346	I am very concerned about class size and amenities in the current plan. We selected our home in order to have a local community school - one that we coukd walk to, one with small class sizes, one with amenities and activities for my children. The current plan does not address this concern. Dumping everyone into Livsey will not create a community atmosphere.	3/4/2026 4:09 PM
2347	I would like to strongly advocate for maintaining Evansdale Elementary as a standalone school imor for expansion . Evansdale is not an under-enrolled school according to the State of Georgia’s enrollment benchmarks. Additionally, it is a Magnet school with a thriving Dual Language Immersion program that serves as a signature offering for the district. Our DLI model attracts and retains families, supports multilingualism, and contributes to academic achievement and global readiness for students. Evansdale is also recognized as a 5-Star School Climate school, reflecting a strong culture of safety, belonging, and high expectations. The family-centered environment, combined with consistent school improvement efforts, has resulted in strong community trust and engagement. We have sustained positive momentum through continuous improvement practices and a deeply committed staff. Our diversity is also what makes us unique and special. Closing Evansdale would not only disrupt a high-performing, specialized program, but would also diminish a school community that is stable, supportive, and aligned to district priorities. Evansdale represents a model of how magnet programming, strong culture, and community partnership can coexist successfully within a neighborhood school setting. I respectfully urge the district to carefully consider the academic, cultural, and community impact of any consolidation decision. Preserving Evansdale protects not just a building, but a thriving educational ecosystem that is serving students and families well.	3/4/2026 4:09 PM
2348	I do not support closing any of the local elementary schools. Smaller, community-based schools provide significant value for children at that age, fostering strong neighborhood connections and helping families and students build relationships early on. I would encourage the district to carefully evaluate any proposed changes through the lens of what is best for students and educators, rather than focusing primarily on enrollment counts or capacity metrics. While future family movement is inherently difficult to predict, prioritizing educational quality, community stability, and the overall student experience may better position DeKalb County to retain and attract families over the long term.	3/4/2026 4:08 PM
2349	Ok	3/4/2026 4:05 PM
2350	Quite drastic announcement without any explanation of "how" the initial scenario would be accomplished.	3/4/2026 4:05 PM
2351	I think closing so many schools on our side of town would be a great disservice.	3/4/2026 4:05 PM
2352	Oak Grove does not align with the stated objective of addressing under utilization. The District's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students/504 capacity, October 2025) and projected at 487 students in 2026-2027 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2-3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: Sagamore Hills: 413/456 (91% utilization) Briarlake 350/480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2-4 miles includes: Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units: $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. Corporate Square/Northbend redevelopment: Approximately 2,000 Planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55-145 additional elementary student over several years. If Briarlake gains: +50 students - 83% utilization +100 students - 90% utilization Continued build out - potentially 90-95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid	3/4/2026 4:03 PM

	Hills/Clifton corridor has experienced more than $2.5 billion in institutional investment, including: $1.5B Arthur M. Blank Hospital campus ~4,500 employees (including ~1,000 new jobs) $87.7M Emory Heart & Vascular expansion Ongoing Emory Hospital expansion $1.1B in FY24 research awards $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020-2022), those data pints distort current treads. Projections should be recalibrated to reflect 2024-2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: Content Mastery: 94.2 (4th highest among 26 reviewed schools: Top 10 countywide) Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth , and ranks in the top tier academically does not directly address the district-wide utilization gap.	
2353	My first impressions: In favor of the proposed consolidation scenario. While it may mean Chesnut Elementary expands in student size and facility size, I see this as an opportunity to eventually bring more programs/resources to the school with more space available and better logistics.	3/4/2026 4:02 PM
2354	High performing neighborhood elementary schools in Dunwoody should NOT be closed.	3/4/2026 3:58 PM
2355	I appreciate that change must happen. The status quo isn't sustainable and schools must close. I am grateful to all the work that went into to this process.	3/4/2026 3:57 PM
2356	-With Evansdale Elem. on the closure list, I am concerned about being redistricted from Henderson Middle /lakeside high to tucker middle and high school. We moved to the area for this school district and want our kids to attend Lakeside High School, not Tucker High. Also concerned about the commute to a new school. -concerns for changes in home values as area schools close and assigned schools are changed or redistricted from Lakeside to Tucker -what would the new district maps look like? -major concerns about TRAFFIC PATTERNS on already busy single-lane roads - Chamblee tucker road (livsey elementary and tucker high) and Henderson Mill Rd (Henderson Middle and Henderson Elementary) are already congested with zoned families approaching the school for drop off and pick up. With more families from wider distances coming to the schools, the traffic will be impossible to navigate on these single lane roads. -What happens to the French DLI program at Evansdale Elementary and the building itself within the neighborhood?	3/4/2026 3:57 PM
2357	I believe Oak Grove Elementary should remain as it is, not part of a consolidation.	3/4/2026 3:53 PM
2358	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26	3/4/2026 3:52 PM

	reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
2359	movement of staff student rezoning support services, connections courses, AP courses, extracurricular	3/4/2026 3:44 PM
2360	While I understand the need for consolidation, the closing Oak Grove Elementary would not be positive for this community.	3/4/2026 3:38 PM
2361	The initial facilities scenario are not in the best interest of families, faculty, and staff in some areas. Our school meets capacity. Closing schools that are under numbers should be examined more closely rather than others that are at capacity. Closing our school to move us to another school and make a larger school doesn't consider the community and the impact for the future. Families move into specific areas because of schools. Changing those schools could potentially make numbers plummet even more.	3/4/2026 3:38 PM
2362	N/A	3/4/2026 3:33 PM
2363	I am not in favor of closing three elementary schools: Henderson ES, Midvale ES, and Brockett ES, in the Tucker area. Tucker is a growing community and these schools will be needed in the foreseeable future.	3/4/2026 3:33 PM
2364	Has enough thought been given to all possible future scenarios, not just contraction of student quantities, but also expansion (additional students). Need more evaluation not just of student quantities per school and possible scenarios, but also school infrastructure, commutes, etc.	3/4/2026 3:32 PM
2365	I do not think schools should be closed. That will put more children into classes and they are already crowded	3/4/2026 3:29 PM
2366	I think it's absolutely ridiculous. Mega schools is clearly what we are going towards. Research shows this is not good and it hinders the ability to make meaningful connections with students. We still have a lot of students. My room is full and elementary schools should stay 600 or less.	3/4/2026 3:27 PM
2367	The charm about Dekalb county is the small schools. Overcrowded schools, more classes, etc. is not student focused.	3/4/2026 3:26 PM
2368	HMES should stay open for or children.	3/4/2026 3:22 PM
2369	I don't want my school to close	3/4/2026 3:22 PM
2370	What does it look like? How will that effect class size?	3/4/2026 3:22 PM
2371	Henderson Mill Elementary should not be closed.	3/4/2026 3:22 PM
2372	I rather keep the school population small	3/4/2026 3:22 PM
2373	N/A	3/4/2026 3:22 PM
2374	Do not close Henderson Mill ES!	3/4/2026 3:22 PM
2375	Please do not close oak grove elementary school	3/4/2026 3:22 PM
2376	I understand that the district is trying to address declining enrollment, underutilized facilities, and the need to invest resources more efficiently. However, I strongly encourage the district to reconsider closing or repurposing Oak Grove Elementary. Oak Grove is an important neighborhood school that provides a stable, close-to-home learning environment for students and families. Closing the school would likely increase class sizes at nearby schools such as Sagamore Hills and Briarlake and could reduce the sense of community that smaller neighborhood schools provide. Many families value the ability for students to attend a school within their immediate community, and that connection contributes to family engagement and student success. While the building adequacy score is listed as a concern, closing the school may not be the only option. Renovations, targeted improvements, or partial repurposing of space could be explored while keeping the school open. In addition, Oak Grove could potentially serve specialized programming or expanded early learning initiatives while maintaining its role as a neighborhood school. The district's goal of strengthening academic programs and reinvesting resources is important, but maintaining strong community schools like Oak Grove should remain part of that strategy.	3/4/2026 3:22 PM

2377	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/4/2026 3:21 PM
2378	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: Sagamore Hills: 413 / 456 (91% utilization) Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Oak Grove is also one of the highest-performing schools in the review group: Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/4/2026 3:21 PM

2379	I don’t want Henderson Mill ES closed	3/4/2026 3:21 PM
2380	I have none.	3/4/2026 3:20 PM
2381	Facilities need work.	3/4/2026 3:19 PM
2382	Consolidation of facilities is going to hurt/ negatively impact the schools that are already struggling with academic performance. Utilizing these other buildings and making classroom sizes smaller should be the focus or intent moving forward to have the opportunity for success.	3/4/2026 3:19 PM
2383	Oakgrove is safe for kids and families and heart of community neighborhood.	3/4/2026 3:16 PM
2384	Some buildings need to close to make sure the class sizes go down.	3/4/2026 3:15 PM
2385	Please do not expand Briarlake elementary. The area is already crowded enough and traffic is terrible.	3/4/2026 3:14 PM
2386	Poorly planned out and lacking actual needs and wants of your taxpayers. Most of us in Dekalb chose our home area based on school zone. Where is the money coming to consolidate schools? Who hired the firm to study this and who hired the construction firm planned? Friends of the fired CEO's perchance? There is so much mistrust from the board's mishandling of affairs, that most people in the community will not support this because of recent events. I have heard that those in the roundtable discussions over the past year have not been heard and that the county is doing what it wants, per usual. I have been a parent for over 20 years in this district and these discussions have torn communities apart. You need to separate each region as each region has its own needs and stop trying to fit us all into the same plan at large. The northern side is overcrowded because it is more desired, so why would you consolidate and shatter strong community support. Why not expand growth here? If the southern portion needs consolidation, look as to why. Graduation rates... Also, let's cut these top-heavy administration roles and admin only facilities before closing 50-year-old community schools. You will tank property values, and parents will continue to pursue private or move into other counties that have more reliable outcomes. Let's take a step back and focus on each region and let's break into those needs. You are doing a disservice to close successful schools in the name of equity, because the tax dollars will come down and that will hurt all of Dekalb County schools. Let's hire a trustworthy CEO and give them a year or two under their belt before investing millions of dollars into mega schools that our small neighborhoods don't support and physically cannot support. Have traffic studies been done? Has the expansion of 285 and that mess been considered? This is why each region, or cluster, needs its own plans so that Dekalb can be better as a whole. With what I have seen so far presented, I have no faith in the plan. The company even called Lakeside High, "Lakewood", in one of their presentations. That is shameful that they can't even get that right. If you asked local families to give their time and input, which you did, then those are the experts that you should be listening to, because they know their micro community best. We should be aiming for the best and highest outcomes of each region, not a one size plan fits all. And, if this has to do with budget, then you should look at the top-heavy admin costs, not to mention the lawsuits and the ex CEOS that are still in our pocketbook. Be good stewards of our tax money. Make each region desirable based on the needs of each region by actually using input from folks in those regions and stop trying to build mega schools in small historical neighborhoods where they don't fit and aren't desired. Also, you really need to start high school later across the board. Studies show that teens of high school age naturally stay up later and they need their sleep. My high schooler isn't tired until after 11 pm but has to get up at 6:30 to catch a 7 bus to get to school that starts at 8:10 that is less than 4 miles away. You readjusted school hours by 10 mins later, but the buses are still coming at the same time. High school should start close to 9 and middle at 8:30 and elementary no earlier than 8. And lastly, you can't even maintain new facilities after they are built, so building new is not the answer. How about checking for residency throughout the school year in the overcrowded regions. There are so many other options, but closing successful desired schools is an unwise choice. Why do we have to address the county all at once? Seriously, consolidate the schools that are underenrolled or figure a way to boost their enrollment before throwing out the baby with the bath water. You have some facilities that are magnet and charter schools that you haven't even considered, as well. And what will become of the empty schools? Blight? Abandoned? Or will they become more admin offices?	3/4/2026 3:14 PM
2387	I am unsure but trusting	3/4/2026 3:11 PM
2388	I hope that the numbers of school closings changes. Larger numbers equal larger class sizes	3/4/2026 3:08 PM

	that will not be beneficial to students.	
2389	Do not close Oak Grove Elementary!	3/4/2026 3:06 PM
2390	I do not agree with closing the school. Less students in a class room will allow teachers to truly focus on the students individually. The resource that are being provided are not enough even at this capacity. Bringing these schools together would make it worse and the schools will now have another excuse not to be able to afford more for the students. Parents are already asked to come out of their pocket a lot to help now.	3/4/2026 3:06 PM
2391	Oak Grove Elementary is a high performing school. Let’s close schools that are not performing well, they can only be better served by change.	3/4/2026 3:06 PM
2392	I think some consolidating schools will add more stress to teachers and classrooms will become more crowded	3/4/2026 3:05 PM
2393	Could be upgraded. The gym is old and outdated. Roof leaks so when it rains there are puddles in the gym	3/4/2026 3:04 PM
2394	I feel that community schools would work better because the consolidation plan could lead to overcrowding.	3/4/2026 3:03 PM
2395	Closing Oak Grove Elementary does not align with the project's stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization and projected growth for next year is at 96%. Enrollment has increased for four consecutive years. Sagamore Hills and Briarlake do not have the capacity to absorb displaced Oak Grove students without severe overcrowding, which would be hugely detrimental to our students.	3/4/2026 3:03 PM
2396	N/A	3/4/2026 3:02 PM
2397	When multiple ES's are consolidated, the school's current student performance should be considered. For example, the schools with higher performance in terms of benchmark testing and other measures should be kept and expanded. This will preserve the school culture and parent involvement, which will benefit all existing and newly brought-in students.	3/4/2026 3:02 PM
2398	Not aware	3/4/2026 3:00 PM
2399	Not looking forward to consolidations of schools.	3/4/2026 3:00 PM
2400	Do not like it.	3/4/2026 3:00 PM
2401	I understand the logic of the consolidations.	3/4/2026 2:59 PM
2402	The initial facilities scenario seem to focus only on closing schools in the south DeKalb area.	3/4/2026 2:59 PM
2403	As the district considers consolidations, it’s essential to protect and strengthen the original open-campus model that served DCSD for decades. Open Campus is not “just another program"; it is a needed school structure for students who are not succeeding in a traditional setting due to attendance barriers, life responsibilities, or academic/behavioral setbacks at their home school. The flexible class format and clearer attendance expectations create a pathway for students to re-engage, regain consistency, and earn credits toward graduation. Consolidation plans should preserve Open Campus as a districtwide support option, not reduce its access or dilute its structure.	3/4/2026 2:59 PM
2404	I understand changing population numbers but I think shutting down one of the best elementary schools in Dekalb is short sighted. This elementary school is also not losing large amounts of students.	3/4/2026 2:57 PM
2405	I believe it would be a benefit.	3/4/2026 2:57 PM
2406	I think it is great plan, in order to better use what we already have.	3/4/2026 2:56 PM
2407	There are apparently some buildings that are not low in enrollment that are closing.	3/4/2026 2:56 PM
2408	Too many schools are being considered, I feel we need some newer schools in the district.	3/4/2026 2:56 PM
2409	Im very upset to see Oak Grove Elementary on the list of proposed eliminations. This is a highly rated school and the primary reason we moved to this area.	3/4/2026 2:54 PM
2410	Seems like it might overburden smaller schools and create hardship for those living further	3/4/2026 2:53 PM

	away from new locations.	
2411	I have no school age children	3/4/2026 2:52 PM
2412	While it may not be cost efficient, I prefer smaller schools.	3/4/2026 2:52 PM
2413	I think this consolidation will negatively impact out community.	3/4/2026 2:51 PM
2414	I think consolidations is a terrible idea. Many students fell behind due to COVID-19 and no program were put in place for catch up educationally. So smaller class is great for every student.	3/4/2026 2:51 PM
2415	It seems counter-productive to me. Community schools should be community schools. We already have issues with people not believing in their community schools and going private. This makes that worse. You're giving people more of a reason to leave the public school system if there's not a school in their community to choose from or if their school is incredibly over-crowded. For Evansdale specifically, I think it's crazy that it's on the close list when we just went through the pre-K lottery process and we're 13th on the wait list. So there are at LEAST 13 families worth of students who are being turned away and you're saying with this closure proposal that enrollment is declining. We're trying to go to our school and we can't.	3/4/2026 2:50 PM
2416	I am Cedar Grove alumni, so that part made me sad that the name/legacy would not even exist anymore, but I understand	3/4/2026 2:50 PM
2417	Redan ES is a special place with students and families that need a smaller total population for the students and the families.	3/4/2026 2:50 PM
2418	The initial facilities are perfect for the school	3/4/2026 2:49 PM
2419	The Cedar Grove ES and HS are right next to each other. I don't believe this would be the best option to consolidate due to many students having siblings and parents right across the street from each other. I do believe the consolodations may be for the best but realistically we (parents, students, and staff) are the ones witnessing the day to day environment of our schools. We are always promised support but it never pans out the way the district intends. Elementary classrooms are already overcrowded with one teacher for every 25-38 students. While possible this is extremely stressful for all parties. Students cannot realistically received education they deserve this way.	3/4/2026 2:49 PM
2420	Consolidation makes sense only for schools that are under capacity. Schools that are at or over capacity should not be considered for closing as they serve their communities efficiently.	3/4/2026 2:49 PM
2421	none	3/4/2026 2:48 PM
2422	I believe that the county needs to consolidate most of the schools so we can have more teachers and paras.	3/4/2026 2:48 PM
2423	I understand that in order for Dunwoody high school to expand they will need to close Vanderlyn and consolidate that school.	3/4/2026 2:47 PM
2424	I agree with the choice.	3/4/2026 2:46 PM
2425	I feel that if needs to be carefully thought out. Also, consideration should be given to staff to transfer to schools that are convenient to their location and grade preference. Involve teacher input early for selecting schools they would prefer to teach with when changes are finalized.	3/4/2026 2:46 PM
2426	Schools should be merged if the enrollment is low and the receiving school has room and staff to accommodate another school population	3/4/2026 2:46 PM
2427	Need improvement	3/4/2026 2:44 PM
2428	Close some elementary	3/4/2026 2:44 PM
2429	Not too sure about this as well.	3/4/2026 2:44 PM
2430	Its very discouraging news that Ashford Park is being considered for closure. One of the reasons we chose to buy a home in our current neighborhood was because of the school and being part of such a great community. Closing the school will affect property values and have a negative impact in the community.	3/4/2026 2:44 PM
2431	Very thorough	3/4/2026 2:43 PM

2432	I am concerned about students and families that have invested years into magnet programs and how these schools (Chamblee and KMS) will be effected	3/4/2026 2:43 PM
2433	I do not believe in consolidating in schools. It is my belief that community schools work better.	3/4/2026 2:43 PM
2434	Agree	3/4/2026 2:42 PM
2435	Ashford Park could go to Montgomery Elementary and Kittredge	3/4/2026 2:42 PM
2436	I think small class sizes are finally here and the teachers/staff can control the students	3/4/2026 2:42 PM
2437	This would not be a good thing. Our kids will.suffer	3/4/2026 2:42 PM
2438	Community schools have been a major part of the positive learning environment that Dekalb Schools has been able to maintain for an extended period of time. Creating large, overpopulated area schools would hinder the academic success of the district and education experience for students.	3/4/2026 2:42 PM
2439	It has students having to go to new schools with bigger classrooms	3/4/2026 2:41 PM
2440	n/a	3/4/2026 2:39 PM
2441	I like the Pre k through 8th grade scenario. I believe, as a teacher, that elementary teachers could learn a lot from working together with middle school teachers, and coaches on what students should learn to prepare for the middle school curriculum.	3/4/2026 2:38 PM
2442	I realize that the attendance us low but I am concern that so many schools are closing in low income black area.	3/4/2026 2:37 PM
2443	This school is essential in helping my student graduate on his time and at his pace.	3/4/2026 2:37 PM
2444	The idea to expand/renovate/rebuild Chesnut makes a LOT of sense for many reasons: cost per student, district balance (geographically balanced with Austin and Dunwoody Elem), opportunity to move ingress/egress off North Peachtree Rd., just to name three.	3/4/2026 2:36 PM
2445	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake. These two schools do not have the capacity to absorb OGE students. Displacing OGE students to Sagamore Hills and Briarlake will require overcrowding, boundary shifts, and facility expansion . Additionally, the residential growth in this 2 to 4 mile radius over the next several years is significant. Several current, projects including Lulah Hills (North Dekalb Mall redevelopment), Corporate Square/Northbend redevelopment support that this area is growing and prove that OGE will continue to meet utilization goals. Furthermore, the Druid Hills /Clinton corridor has experienced more than $2.5 billion in institutional investment reinforcing the point that we are experiencing growth in this catchment area. Oak Grove is also one of the highest performing schools in the review group • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/4/2026 2:36 PM
2446	Keep it convenient to get to schools. Some concern with age ranges 6-12 grades given the different needs of those students.	3/4/2026 2:33 PM
2447	I believe financial resources from real estate could be maximized through sales and property exchanges while adding onto the overcrowded schools and providing resources to those under attended schools if logistics becomes an issue.	3/4/2026 2:30 PM
2448	I would appreciate knowing where students will be sent if a building is closed for which we are zoned for.	3/4/2026 2:28 PM
2449	I think the scenario is a good talking point but, believe more research is required. When schools are closed students are shifted but not teachers. What happens is increase in class sizes but I believe a good repurpose would be to create autism and iep based classes to better service all students.	3/4/2026 2:23 PM
2450	I think planning around attendance and boundaries is a good idea to help ensure schools are	3/4/2026 2:23 PM

	not overcrowed or under enrolled.	
2451	Appreciate thoughtfulness, but no additional feedback to share.	3/4/2026 2:23 PM
2452	I am against bigger schools/classes. My child needs the small class sizes (less chaos) He may have mild sensory issues and hyperactivity which currently the smaller class sizes help in this regard. Although my child is not on the bus route yet we did consider using the bus (if convenent), consolidations will ablsolutely lead to longer bus ride times which would be even more inconvenient. As a morning drop off currently there is always the drop-off traffic which will not decrease with the consolidations.	3/4/2026 2:22 PM
2453	Nun	3/4/2026 2:21 PM
2454	I truly believe that the schools should stay how they are, it is more of a benefit to the kids to be able to have small classroom sizes.	3/4/2026 2:21 PM
2455	Small elementary schools make Dekalb special and allow the youngest students to get the attention and services they need. Please keep our neighborhood elementary schools!	3/4/2026 2:20 PM
2456	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/4/2026 2:19 PM
2457	First we were told Ashford Park will be rebuilt then two months later we were told it will be closed. It's a high performing school. My kids like attending the school. If it's closing- are we moving into a new building? People bought houses specifically for the schools they are zoned for so this is not fair	3/4/2026 2:17 PM
2458	I think all is plausible, but all the scenarios would require transportation investment, and ensuring that all schools receive the same resources.	3/4/2026 2:15 PM
2459	Based on the data provided it seems like enough data hasn't gone into the recommendations. Continue to expand data points that will help better refine final recommendations. I'm concerned that expanding Chesnut may look good on paper but not in reality. The traffic bottlenecks that already exist are large and unless an expansion is prepared to handle rerouting existing traffic patterns for school dropoff / pickup it isn't a great option. Kingsley or a different (new) location may be better suited to solving the problem. Location and condition of the buildings should be included.	3/4/2026 2:14 PM

2460	Concerned about the safety and community implications from a push to increase school sizes. Smaller schools are anchors for community fostering safer more nurturing environments for children. Helps when the principal can know every child’s name.	3/4/2026 2:13 PM
2461	With the expansion of Briarlake Elementary school, we would not want the class size to be larger than it is now. We would also request that Coralwood stay open and with its sibling preference for the lottery.	3/4/2026 2:11 PM
2462	I would be ok with Ashford Park closing, as along as education quality, sense of community (keeping kids and parents together), and feeding to Chamblee MS/HS are maintained. If Ashford Park will close, all students from AP should go to John Lewis, and make sure that all AP students can continue on to Chamblee MS and HS.	3/4/2026 2:09 PM
2463	I am 100% opposed to the closure of Ashford Park. It does not make sense to close one of the highest performing schools in the district that is definitely NOT under-capacity. And, while the Montgomery Elementary facility definitely needs a refresh, increasing the capacity to absorb APES would leave little green space. I am also opposed to any scenario that involves redistricting APES students to John Lewis ES and then to the Chamblee cluster. That would likely entail moving the magnet program to Cross Keys, a move that would negatively affect magnet and Chamblee community students alike.	3/4/2026 2:08 PM
2464	Do not want consolidation	3/4/2026 2:04 PM
2465	The proposal for facilities involves closing the elementary school (APES) where my children attend. We strongly oppose closure, as the elementary school is an integral part of Ashford Park's success as a community. While there are many constraints with the current facility, the quality of teaching and education is top notch. Our children have a sense of community in their school. We would love to see the facilities expanded and updated (reconstructed if necessary). Because there is a current enrollment of over 800 students, the demand is in the community for quality school facilities in the Ashford Park community, and the investment is well worth it. If construction on current facility is taken completely off the table, my priority will shift to keeping the Ashford Park cluster as intact as possible and keeping our area within the Chamblee Middle School/Chamblee High School cluster.	3/4/2026 2:03 PM
2466	looks to be fine based on enrollment and diversion to other close-by schools.	3/4/2026 2:02 PM
2467	I don't like it. Sounds like overcrowding and taking kids out of their neighborhoods.	3/4/2026 2:01 PM
2468	While I appreciate the county's desire to use resources effectively, I seriously question whether consolidation is the best way to serve our students and families. Consolidation would result in larger class sizes, fewer staff serving more students, and the increased likelihood of overcrowding--all of which might lead more families to leave the public school system. My son has attended Midvale Elementary since we moved to Tucker four years ago. We moved to Dekalb from Cobb County specifically so that he could attend a school like Midvale: a small and supportive neighborhood school with a culturally and economically diverse student body. After two years of isolation during the pandemic, we were nervous about sending him to school, but we immediately fell in love with Midvale. From his first month, every teacher and administrator has known his name, welcomed him joyfully, and created space for him to thrive. He has some learning disabilities, and the existence of small, co-taught classrooms has allowed us to stay in public school. Closing Midvale and redirecting most of our students to Livsey seems destined for disaster, as it would destroy the familiar and supportive environment of both schools. I imagine that parents at other schools on the potential closure list feel similarly. Rather than closing schools, I would urge the county to consider following the Midvale model elsewhere. Make use of the existing buildings and teachers to give all students this experience. Based on conversations with friends who teach in South Dekalb, my understanding is that not all Dekalb County students have access to the same kind of educational experience. In some schools, students are overcrowded, staff are burnt out, and the result is an unpleasant and unsuccessful experience for the entire community. Rather than replicate that experience across the county, why not take advantage of the available resources to better support all our students? I am also an educator, and I have seen what happens when an administration tries to save money by increasing class sizes and school enrollments. The results are disastrous for both teachers and students. These shifts will drive more families to leave Dekalb County schools, whether they move to other counties or enroll their children in private school. Consolidation will take the county in the wrong direction rather than embracing and replicating the success of neighborhood schools like Midvale.	3/4/2026 1:59 PM
2469	I don't have one	3/4/2026 1:58 PM

2470	Concerns based on overcrowding in the schools that will now face growth based on school closures-	3/4/2026 1:58 PM
2471	I have a STRONG preference for keeping schools small and with good programs. Low operating costs should not be a concern. All schools are already run on a very tight budget. I have yet to see a school that doesn't feel cramped due enrollment. Ashford Park has had to add lots of outdoor classrooms to accommodate kids, and now it's going to close? Makes zero sense.	3/4/2026 1:57 PM
2472	Closing Evansdale and removing the Evansdale school out of the Lakeside feeder community will drastically reduce property values. This in turn will reduce revenues far more than it will cost to improve the school. Closing Henderson makes more sense as the children can more to Hawthorne and Evansdale. Put the Evansdale lines back to 2013 and fill the seats back at Pleasantdale.	3/4/2026 1:57 PM
2473	I encourage the district to carefully consider the impact on students, families, and staff. Maintaining stability, reasonable class sizes, and strong school culture should remain a priority throughout this process.	3/4/2026 1:55 PM
2474	It’s good fit for school for high achiever students.	3/4/2026 1:55 PM
2475	I feel like there has been no information given as to what the actual plan is. Close Ashford park, and then…. There is no information as to where students would move to, if there are cluster changes planned, or how this idea changes the German program. There has also been zero information shared about plans for kittredge.	3/4/2026 1:53 PM
2476	I understand them. It seems that reasonable considerations and care were take to develop the scenarios.	3/4/2026 1:52 PM
2477	Consolidations look good.	3/4/2026 1:51 PM
2478	I think neighborhood elementary schools are vital for children and community. I don’t think closing elementary schools and overcrowding others with be emotionally helpful to children and their families.	3/4/2026 1:51 PM
2479	The magnet program needs to stay in place with separate schools as this is what makes the program unique and productive. Without all students operating in the same mindset, the benefits of the program will be lost.	3/4/2026 1:47 PM
2480	These consolidations feel tough to navigate, but a necessary step to make sure the long-term stability of the district stays intact.	3/4/2026 1:46 PM
2481	Don’t close oak grove. It is a school at close to full capacity.	3/4/2026 1:45 PM
2482	Some of the elementary schools on the closure list (e.g., Ashford Park), are severely over capacity. Closing a neighborhood school that is over-utilized does not make sense. If the building and land are not sufficient for an expansion, then perhaps consider repurposing the building for a pk-2 band and redistricting so that grades 3-5 can be combined with a nearby underutilized building.	3/4/2026 1:43 PM
2483	I deeply value the strong, close-knit, and supportive community that has been built at Ashford Park Elementary over the years. My top priority is maintaining the current boundaries and district lines for the Ashford Park Elementary attendance zone so that this community can remain intact. My second priority is ensuring that this attendance zone continues within the Chamblee Middle and High School cluster. With those priorities in mind, I would like to offer two potential solutions for consideration: 1. Expand Ashford Park Elementary on its current site. While I understand there may be challenges related to the existing land footprint, exploring expansion options could allow the entire attendance zone to remain together while preserving established boundaries and feeder patterns. 2. Reassign the Ashford Park attendance zone to the John Lewis Elementary facility. Under this approach, students currently attending John Lewis Elementary could be reassigned to neighboring schools with available capacity. The full Ashford Park attendance zone could then move together into that building, and then John Lewis Elementary could be moved into the Chamblee Middle and High School cluster. This would preserve both community continuity and feeder alignment. I appreciate the complexity of district planning decisions and hope these options can be considered as ways to maintain stability, continuity, and community connections for Ashford Park families. Thank you for your thoughtful consideration.	3/4/2026 1:42 PM
2484	We bought a house in Tucker so my kids could go to Brockett Elementary! We wanted them to	3/4/2026 1:42 PM

	be in a nice small neighborhood school environment. I am vehemently opposed to this scenario! No matter how pretty you write it out it all ends with either moving the kids to a different location or moving more kids into Brockett. In both cases classrooms will become overcrowded and both students and teachers overwhelmed.	
2485	na	3/4/2026 1:41 PM
2486	It is ridiculous Midvale is even on this list. In addition, I can't figure out why almost every elementary school is our area is on the list. Nothing about this initial plan makes sense.	3/4/2026 1:39 PM
2487	I'm not sure how this scenario affects other neighborhoods since I'm not in them, but as a family that has been part of the Chesnut community for 10 years, the idea of losing a school within walking distance feels very sad. I understand that changes need to be made, but this is truly disheartening.	3/4/2026 1:38 PM
2488	Very concerned. How does this impacts our taxes? Also, low enrollment maybe due to limited offering. Students are enrolling in other districts that provide better educational services. Do the scenarios offer better educational offering such as gwinett or choice? If not, suggest including how these changes will educational benefit parents and children. We dont need raggy used books from other counties.	3/4/2026 1:37 PM
2489	I firmly value the strong, close-knit, and supportive community that has been built at Ashford Park Elementary over the years. My top priority is maintaining the current boundaries and district lines for the Ashford Park Elementary attendance zone so that this community can remain intact. My second priority is ensuring that this attendance zone continues within the Chamblee Middle and High School cluster. With those priorities in mind, I would like to offer two potential solutions for consideration: 1. Expand Ashford Park Elementary on its current site. While I understand there may be challenges related to the existing land footprint, exploring expansion options could allow the entire attendance zone to remain together while preserving established boundaries and feeder patterns. 2. Reassign the Ashford Park attendance zone to the John Lewis Elementary facility. Under this approach, students currently attending John Lewis Elementary could be reassigned to neighboring schools with available capacity. The full Ashford Park attendance zone could then move together into that building, and then John Lewis Elementary could be moved into the Chamblee Middle and High School cluster. This would preserve both community continuity and feeder alignment.	3/4/2026 1:36 PM
2490	Middle and high school grades are fine to be consolidated. Elementary grades are an important age group for development and should retain individual focus.	3/4/2026 1:29 PM
2491	As a former student of Oak Grove, it was a priority to move my family to this neighborhood for the educational and community environment that Oak Grove Elementary provides. Oak Grove is a high achieving school with strong support from the community. The school is not underutilized with class sizes for my children are currently at 24+. That is a significant student to teacher ratio. Additionally, school systems across the nation are building back from the COVID enrollment crisis. This takes time and Oak Grove is clearly recovering well with projected utilization next year at 96%. Finally, Oak Grove parents are not willing to compromise the education of their children. If enrollment is a driving concern for DeKalb, they should consider that a significant number Oak Grove parents are prepared to send their children to private schools in the area to preserve the educational standards that Oak Grove meets. This already happens with students slated to attend Henderson Middle School. Consolidation and closure will not increase enrollment. It will decrease enrollment in districts that rely on these high achieving schools to boost their performance scores.	3/4/2026 1:27 PM
2492	I greatly value the strong, connected, and supportive community that has developed at Ashford Park Elementary over the years. My highest priority is preserving the current boundaries and district lines for the Ashford Park Elementary attendance zone so our community remains whole. My second priority is ensuring that our attendance zone continues within the Chamblee Middle and High School cluster. With those priorities in mind, I would like to suggest two possible solutions for consideration: 1. Expand Ashford Park Elementary at its existing location. Although I recognize there may be constraints related to the current site, exploring expansion opportunities could allow the entire attendance zone to stay together while maintaining established boundaries and feeder patterns. 2. Transition the Ashford Park attendance zone into the John Lewis Elementary building. In this scenario, students currently assigned to John Lewis Elementary could be redistributed to nearby schools with available capacity. The full Ashford Park attendance zone could then relocate together to that facility, and John Lewis Elementary could be reassigned into the Chamblee Middle and High School cluster. This approach would protect both community continuity and feeder alignment. I	3/4/2026 1:26 PM

	understand that district planning decisions involve many moving parts, and I appreciate the work involved. I hope these suggestions are considered as viable ways to preserve stability, consistency, and the strong community connections that Ashford Park families value.	
2493	Based on the number of empty seats - with more expected in the future - plus the associated operational costs, I support consolidating and repurposing buildings. I would urge the district to carefully research how to maintain strong school communities within larger school enrollment populations. How will school leaders and staff be trained to build strong climate and community with possibly double the students?	3/4/2026 1:24 PM
2494	Please consider keeping Ashford Park families in the Chamblee cluster. This school cluster is a high priority for families who live here.	3/4/2026 1:23 PM
2495	n/a	3/4/2026 1:22 PM
2496	I deeply value the strong, close-knit, and supportive community that has been built at Ashford Park Elementary over the years. My top priority is maintaining the current boundaries and district lines for the Ashford Park Elementary attendance zone so that this community can remain intact. My second priority is ensuring that this attendance zone continues within the Chamblee Middle and High School cluster. With those priorities in mind, I would like to offer two potential solutions for consideration: 1. Expand Ashford Park Elementary on its current site. I appreciate the complexity of district planning decisions and hope these options can be considered as ways to maintain stability, continuity, and community connections for Ashford Park families. Thank you for your thoughtful consideration.	3/4/2026 1:20 PM
2497	The impact of closures in North DeKalb will set the County back in enrollment and continue to breakdown the trust within the System. These communities have poured money into the school as the county has poured money into other communities to rebuild or upgrade the schools. To mitigate the overall impact of all closures, I would like to see the attendance zones of the elementary schools maintained. I think this can be done by combining the Ashford Park and John Lewis schools to make an upper and lower campus like we see at Sara Smith. If this cannot be done, then I would propose moving the Ashford Park cluster into John Lewis.	3/4/2026 1:19 PM
2498	I am in support of closing facilities to make better use of resources. Why pay to operate buildings and classrooms at reduced capacity?	3/4/2026 1:18 PM
2499	I think the facilities scenario is a good idea. I like that former middle schools will be new elementary schools.	3/4/2026 1:12 PM
2500	Oak Grove is not underutilized and is the core of our community.	3/4/2026 1:11 PM
2501	It’s difficult to provide accurate feedback on the initial scenario, not knowing how our children will be impacted. Ashford Park is recommended for closure, but I don’t know what that means for the current students and faculty. I’m not completely opposed to Ashford Park closing as long as the current student body can remain together and within the Chamblee cluster.	3/4/2026 1:10 PM
2502	We are parents with a toddler and are destined for Mcnair DELA and we would not send her their due to low test scores and lack of diversity. Likely would send her to private school if they are just going to consolidate all of the low income, low test schools into one consolidated school as it seems is the current plan. We would prefer the option of school choice.	3/4/2026 1:06 PM
2503	I strongly oppose the closure of Vanderlyn and consolidation with DES/AES. I realize that DCSD suffers from undersubscription in public schools but it was the *quality of Vanderlyn* that caused us to pull our child from private schools and put them into Vanderlyn. I am familiar with another two families at Vanderlyn (and three at Kingsley) who have done the same in the past two years. All of these families appreciate the high quality of education at Vanderlyn. If you consolidate schools that are doing a good job in areas in which parents can afford to send kids to private school, you are incentivizing pulling more kids OUT of public school and putting them into private school --- leading again to more undersubscribed schools. Please take as an	3/4/2026 1:02 PM

	example the public-to-private attrition rate in our cluster between elementary school and middle school (Peachtree MS). Weakening the quality of public schools through consolidation incentivizes parents to withdraw from public schools, which then further weakens the public schools in an area. Please don't add to this cycle by eliminating an extremely high-performing school with strong district buy-in like Vanderlyn. You should be directing your energies toward improving/consolidating underperforming schools, not messing up what is already going well. In contrast, Dunwoody cluster *bleeds* children from public to private in middle school - please fix what is wrong, don't destroy something that is already working well.	
2504	Not good. We need our schools.	3/4/2026 1:00 PM
2505	This change will ultimately increase the student to teacher ratio as the classroom size will increase based on the recommendations shared. Students performance decrease in larger classroom settings.	3/4/2026 1:00 PM
2506	I understand you are starting with facilities, but what is the research behind closing a high-performing school and having to improve the academics and culture of a school as opposed to improving a facility? I would think a high-performing school would more adequately take in more students and bring them up to a higher level than improving a buidling but then having the much harder work of improving a school.	3/4/2026 12:59 PM
2507	Oak Grove is at capacity with a waiting list. PLEASE do not consolidate or close this great, historic, community resource.	3/4/2026 12:56 PM
2508	Closure of Ashford Park ES and/or shifting APES out of the Chamblee HS cluster is detrimental to the district. Closure of one of the top performing schools in the state & utilizing it for anything other than a student education facility will impact: - DCSD attendances (families will move out of district to attend better schools). Financial impact to the district, test score decreases for the district. - Community bonds built around APES in Ashford Park/Drew Valley. People buy homes for elementary schools. This area's property values will fall, decreasing property taxes> allocated funding for schools. - Parent & student-led community input - PAC/PTA/PTO - these are parent-led organizations. These will be impacted with the parent leaders who choose to opt out of DCSD education for their children, either to private school or alternate districts. - Test score dilution across the district. Why close a top performing schools, to reallocate students into 3 different schools - only to bring all schools to a mediocre average?	3/4/2026 12:52 PM
2509	I don't like the idea of 6 to 12 together. Children are already immature in childish and don't have experience of real life situation. And because people have been more traumatized now. They never before. And people are using cell phones in schools and taking pictures of people in an unauthorized manner. The thought of the younger students with the kids that are getting ready to graduate from high school.All in one building makes me nervous. I would rather the high school's come together and high school buildings and fill those up To accommodate high schoolers. Let the elementary kids go to the middle school building.And let the middle school building go to the high school buildings.	3/4/2026 12:47 PM
2510	NA	3/4/2026 12:44 PM
2511	Too many elementary schools in close proximity slated to close: Henderson Mill, Evansdale, Oakgrove, and Midvale.	3/4/2026 12:38 PM
2512	I don't think it's fair	3/4/2026 12:38 PM
2513	Keep oak grove open and MODERNIZE it!!!	3/4/2026 12:36 PM
2514	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. •	3/4/2026 12:35 PM

	Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
2515	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: $1.5B Arthur M. Blank Hospital campus ~4,500 employees (including ~1,000 new jobs) $87.7M Emory Heart & Vascular expansion Ongoing Emory hospital expansion $1.1B in FY24 research awards $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/4/2026 12:35 PM
2516	While understanding the data and concerns for overcapacity at Ashford Park Elementary, there are 2 main concerns based on conversations I have had with other parents. 1. It is the communities main concern that you are proposing completely shutting down a school that is a significant part of our neighborhood/community. I believe that the school should remain operational and we look to utilize John Lewis and APES for grades PK/K-5 with a portion of those grades split between each to balance attendance. 2. Redistricting APES to the Cross Keys cluster from Chamblee. Most families either already have children within Chamblee Middle/HS and the data shows that the testing/educational ratings in this cluster are much higher than in the Cross Keys cluster. Therefore this would only work if both schools - APES and John Lewis - are districted through the Chamblee cluster. If not, then I think you will see a significant portion of APES families going private.	3/4/2026 12:33 PM
2517	I think it's going to hurt a lot of people- families and teachers. If we'd done a better job	3/4/2026 12:29 PM

	allocating resources, the county would not be in this position. Reduce the over-inflated salaries at the top and save our community schools!	
2518	The location is convenient and it's close to my transportation needs.	3/4/2026 12:27 PM
2519	Like most Ashford Park parents, I was shocked by the announcement of a potential school closure in our neighborhood. Ashford Park has spent years building up one of the most incredible parent organizations to support our school, our teachers, and our community. In addition, many parents move into the Ashford Park neighborhood (including Brookhaven Fields, Drew Valley, etc.) with the understanding that their children will eventually grow into Kittredge/Chamblee Middle/Chamblee High School students. Being a part of that larger cluster is just as important. If a closure is imminent, then the most important thing is to keep 1) the Ashford Park elementary student/parent community together, and 2) keep it part of the Cluster. If moving all the students to a better, newer facility like John Lewis is the solution, then so be it, as long as John Lewis can be brought into Chamblee Cluster as a replacement for the loss of Ashford Park. If the Chamblee Cluster is not included in this conversation, then you're going to lose a lot of very incredible students (and their families) to private schools, charter schools, and other districts, which I don't believe Dekalb County or the neighborhood wants. We moved here for a purpose, we all want to see the growth and success of the schools, and we hope that you will do everything in your power to keep the Ashford student population together AND as part of the larger Chamblee cluster. Thank you	3/4/2026 12:27 PM
2520	It would be a travesty for Oak Grove to close given the high scores achieved by the school.	3/4/2026 12:26 PM
2521	I recommend that any consolidation plan prioritize minimizing student displacement, maintaining access to academic and support services, and clearly communicating how resources and staff will be reassigned to ensure a smooth transition for affected schools and clusters.	3/4/2026 12:20 PM
2522	I fully understand the complexity of the decision at hand. While the entire community was surprised that Ashford Park was set for closure, after more information I can understand the limitations our facility has both in terms of the building and the land. Where I am having trouble is what is a plausible next step. All other schools within the closure list have viable options where in our scenario there is none. The most important thing to me as a parent is the community that has been built around our amazing neighborhood school. The friendships that have formed for both students and parents to ensure our children have a fulfilling educational experience. This community appears to be one of the strongest in the county and to dismantle that seems counterproductive to the goal of public education. We have proven to be adaptable with our space and still achieve some pretty incredible things. I hope as the board and consultants continue to evaluate that a strong focus put on keeping our community together and within the Chamblee Middle and High Cluster. While we would love our beloved building we would be able to continue to grow through our strong bonds with dedicated parent involvement.	3/4/2026 12:19 PM
2523	Oak Grove is already utilized at 89%! And it’s projected to grow to 96% capacity next year. My grandchildren attend OGE and they’re thriving! The students that come out of OGE are extraordinary, as are the teachers & staff. There’s a waitlist for school choice to get into OGE because the community understands how exceptional it is. Why would you close a school that is over-performing? Our whole community would be flipped upside down, this affects more than just one school. This is my grandchildren’s future you’re threatening.	3/4/2026 12:16 PM
2524	Reduced classroom size is likely to persuade families to utilize DeKalb County public schools in place of private schools. This is a worthwhile consideration against consolidations.	3/4/2026 12:15 PM
2525	Lakeside Highschool needs to be upgraded.	3/4/2026 12:14 PM
2526	I think that closing Redan elementary school would be a disservice to our children. This is an amazing school and the leadership is top notch	3/4/2026 12:14 PM
2527	Oak Grove Elementary is an integral part of the community. It is operating near capacity, with the principal's official budget enrollment differing from the enrollment projections (perhaps due to timing of when the projection data were collected??). Oak Grove parents - of which I was one for 6 years - volunteer and financially support the school at extremely high rates. Closure or absorption into Sagamore Hills ES and Briarlake ES would fracture the community and increase traffic/ reduce walkability, disrupting support systems.	3/4/2026 12:13 PM
2528	Ashford Park Elementary would like to stay in the Chamblee cluster.	3/4/2026 12:09 PM
2529	The data is incorrect as to the numbers of students attending our school. It is much lower than	3/4/2026 12:02 PM

	the actual numbers. As such, the consolidation suggestions are erroneous and hold now merit. In addition, Vanderlyn is a major part of our community and a huge benefit and attraction for families wanting to move to Dunwoody. It makes no practical sense to try and consolidate elementary schools in the Dunwoody area.	
2530	I feel like we should be figuring out why so may families aren't staying in Dekalb county schools and focus more on what we can do to bring back the numbers	3/4/2026 12:02 PM
2531	I would hope that consideration would be given to test scores of existing schools. It would be a mistake to close schools performing at a high level.	3/4/2026 12:01 PM
2532	I think the Ashford Park School facilities are extremely old and need to be updated. I am fine with moving to a newer facility, but my biggest concern is being redistricted to a different middle and high school (would prefer to stay in the Chamblee cluster).	3/4/2026 11:54 AM
2533	I propose keeping Ashford Park Elementary and making renovations to keep the school functioning in its current capacity, as a neighborhood school.	3/4/2026 11:54 AM
2534	I think that the schools shouldn't be closed do this the school zoning and families not having transportation.	3/4/2026 11:45 AM
2535	Evansdale is falling apart. Close it.	3/4/2026 11:41 AM
2536	The Ashford Park elementary building has been falling apart for many years, and the growth in student population has been in the double digits for a long time. The school renovation or expansion should have happened many years ago and right now it doesn't seem to be a viable option while accommodating the full student population. My top priority is to keep our student community within the Chamblee Middle and High cluster, while keeping our student and staff community intact. We can move as a whole to another building, but please do not break us apart. Ashford Park is special for being embedded within the community, and splitting us will be damaging to the students, parents and staff.	3/4/2026 11:38 AM
2537	appreciate the bold and necessary planning even if it is painful	3/4/2026 11:36 AM
2538	There are to many in the classrooms now. Consolidating the schools and adding more students to a classroom will be a disaster. The teachers are already overwhelmed. It really should not be no more than 20 students in a room... or less. Sometimes it is best to consider the education, the students well being, and most importantly, the teachers and staff. We are loosing are good teachers because of the behaviors, so to add more would be a catastrophe.	3/4/2026 11:31 AM
2539	Extremely concerned with any scenario that eliminates Ashford Park ES and does not provide a viable alternative or with any scenario that moves our families out of the Chamblee cluster. Ashford Park is an outlier on the list of closures. Negative economic impact to our neighborhood will be massive if there is no longer a viable public school scenario that keeps us in the Chamblee cluster.	3/4/2026 11:30 AM
2540	Dont Close Oak Grove	3/4/2026 11:28 AM
2541	Do not close Oak Grove Elementaru	3/4/2026 11:27 AM
2542	Would hate to see Brockett Elementary be closed or repurposed as it is a long standing school with excellent teachers/supporters.	3/4/2026 11:26 AM
2543	Disappointed that they didn't seem to reflect input from our SAP committee members. Felt like this feedback process was more lip service and that you wanted to appearance of community feedback more than actual feedback. Wish you would just be blunt about what you're trying to do and be honest.	3/4/2026 11:26 AM
2544	I believe Ashford Park needs to stay together in any scenario. Whether it be remaining at APES, all students and staff transition to John Lewis where we should have been this whole time or make APES and John Lewis and Upper and Lower School for the surrounding neighborhoods. Our neighborhoods (Skyland, Drew Valley, Brookhaven Fields, Ashford Park) continue to grow with more and more children. The idea of splitting up these neighborhoods and bussing kids to other areas of the district is insane when we have two elementary schools right here. I think you will keep a lot of kids in the public school system if you were to have an upper school and lower school. If a solution isn't made that keeps our kids at these schools and in the Chamblee Cluster, I do feel you are going to see families moving out of these neighborhoods. The big reason this area is flourishing is because there is an incredible elementary school (APES). If that goes, so will the families. I know we would highly consider	3/4/2026 11:26 AM

	moving if the county splits us up and we are no longer in the Chamblee Cluster. We are in Drew Valley.	
2545	Feel that the smaller community schools make the area special	3/4/2026 11:23 AM
2546	We are currently in an overcrowded school that just started several capital improvements. The school is a big part of our neighborhood. I feel it is unreasonable to pull the plug on Ashford Park months after spending $40M+ on upgrades.	3/4/2026 11:22 AM
2547	Agree	3/4/2026 11:21 AM
2548	I specifically moved to this neighborhood for the great school and would be devastated if it were to close. I would definitely send my kids to private school rather than whatever the reassignment is.	3/4/2026 11:21 AM
2549	I understand the goal but would like more data around what the end state scenario would look like.	3/4/2026 11:21 AM
2550	Oak Grove was instrumental in me becoming the person I am today and is a necessary feeder school to Lakeside High, one of the best in the county.	3/4/2026 11:18 AM
2551	I dislike the proposed closing of Vanderlyn since I love the school and staff.	3/4/2026 11:17 AM
2552	I think closing Ashford Park would be a huge mistake.	3/4/2026 11:16 AM
2553	Ashford Park Elementary is a core part of our neighborhood as a whole and has been an excellent place for my 3 children to learn and grow with a diverse student population and excellent instruction. Outside of that - the biggest priority is ensuring that we are still zoned to Chamblee MS and HS.	3/4/2026 11:15 AM
2554	What is most important to me is staying in the Chamblee cluster, preserving the German Immersion program/other school choice programs, and ensuring our teachers and staff at Ashford Park have secure jobs in the Chamblee cluster.	3/4/2026 11:15 AM
2555	Poorly done. No mention of educational quality or achievement. Not clear how schools chosen for closure. no evidence to support possible recommendations.	3/4/2026 11:14 AM
2556	I do not believe it makes sense to close Ashford Park Elementary. Reallocation perhaps, but total closure, no.	3/4/2026 11:14 AM
2557	Don't agree with the planned closure of Ashford Park Elementary. Should we look to move some students to other schools sure but the other schools in the area don't have the capacity to absorb the full closure of Ashford Park. Furthermore the school is a key component of the neighborhood and the community is committed to the Chamblee High School cluster.	3/4/2026 11:10 AM
2558	I am not in favor of school consolidations	3/4/2026 11:09 AM
2559	Disappointed that nearly full or full schools were included. Schools not supported by their community should be consolidated or closed . Not successful schools with community support. One size fits all 900 kids schools everywhere would cost more than a Billion dollars. Just the interest on that Billion dollars would cover the extra admin overhead and building maintenance. Look to the central office, outside legal, contract employees for cost savings first and then the local schools	3/4/2026 11:08 AM
2560	I do agree that there does need to be a consolidation, maybe think about making the class sizes smaller.	3/4/2026 11:05 AM
2561	Cedar Grove Middle School and Champion can both reside at Cedar Grove Middle because this building is well kept and built in 2001.	3/4/2026 11:02 AM
2562	The consolidations of the initial facilities scenario is that it is probably needed to better utilize resources and personnel. However, it needs to be equitable across the county.	3/4/2026 11:00 AM
2563	I strongly oppose the proposed closure of Vanderlyn Elementary. Smaller community schools like Vanderlyn are the lifeblood of our neighborhoods — they foster strong parent engagement, walkability, and a sense of belonging that larger consolidated schools cannot replicate. Closing Vanderlyn would be a grave mistake that prioritizes spreadsheet efficiency over the real educational and community benefits these schools provide. Instead of closure, DCSD should invest in maintaining and strengthening schools like Vanderlyn that already have strong community support and proven outcomes. The district should explore creative solutions —	3/4/2026 11:00 AM

	shared resources, magnet programs, or community partnerships — before dismantling schools that families have built their lives around.	
2564	We just moved to Avondale from GLOBE Academy and they are finally getting the IEP support they need. Consolidating schools is going to be hard on families with students that have special needs. I just spend thousands of dollars hiring an advocate to rework their IEPs for the new school. I don't want to start all over again.	3/4/2026 10:59 AM
2565	I fear that this will lead to overcrowding of students. I also fear that there will be good teachers that will not have placement.	3/4/2026 10:56 AM
2566	Terrible idea to close Ashford Park Elementary	3/4/2026 10:50 AM
2567	The whole idea of this I completely disagree with. The benefit of our school is its small size. I do not want me child going to a school with twice as many students. It is such a benefit to the kids and teachers to have smaller schools	3/4/2026 10:48 AM
2568	I think it is a good idea to consolidate to save resources. However, I do not agree with 6-12 students being in the same facility. The only way that could work is if the 6-8 and 9-12 are totally isolated and cannot in anyway interact with one another.	3/4/2026 10:48 AM
2569	I understand the need, but it has to be done properly.	3/4/2026 10:43 AM
2570	The county and state should be funding the schools properly instead of closing and consolidating them. Consolidation is short sighted and will cost more money in the future when we inevitably need to expand again.	3/4/2026 10:42 AM
2571	Closing Vanderlyn, one of the top rated and highest performing schools in the state is a terrible idea. The community involvement will dwindle and it will lead to a mass exodus of the families in the area.	3/4/2026 10:37 AM
2572	I think you may wish’s to consolidate some of the buildings, but not the total number recommended. Also you need to look at what what will serve the south end and central sections of Dekalb.	3/4/2026 10:37 AM
2573	Im concerned where Bethune's student would go for middle school.	3/4/2026 10:34 AM
2574	Right now just observing.	3/4/2026 10:32 AM
2575	I have heard 3 different reasons for Vanderlyn closing. From virtual meeting we were told it’s the FCA score. On the rationale page the reason is listed as DHS overcrowding. When speaking to board members we are told Sequoyah HS is supposed to alleviate overcrowding and the HS needs field space. We need clear and unified messaging about why Vanderlyn is on the list for closure so we can collaborate on ways to keep the school open while meeting whatever other goals. I know that SAP is only looking at facilities currently but people move to this school zone, paying more than other parts of town, specifically for their kids to attend VES. Closing a well utilized sought after school that is extremely well performing makes no sense. I know there’s this arbitrary 600 student goal, but our enrollment is over 450 so we get all the extra state funding already (principal, nurse, librarian, specials teachers). And prior to Covid our #s were in the 600-700s. People pulled out their kids during Covid. SAP says the money will follow the students into new classes, and that may be true for some parts of the county, but I assure you, with the demographic in this area a fair amount of families will pull out for private schools. Not because the other schools are necessarily worse but because it’s unknown. Because of our involved PTO we are able raise a decent amount of money for the school to help with improvements, teacher training etc. PTO pays for field trips of all students who can’t pay so all students are able to go. This school creates such a special community in the neighborhood. There’s no way to move VES entirely to another school. You will be splitting up students and friends and breaking up a community.	3/4/2026 10:31 AM
2576	I do not believe Oak Grove Elementary should be closed. It's a fantastic community of families and teachers. We took our children out of GLOBE and into Oak Grove Elementary and our child is thriving now.	3/4/2026 10:30 AM
2577	I don't feel the schools should consolidate. Each school should benefit the needs for the students. High school students have way more activities that they need there own space for.	3/4/2026 10:29 AM
2578	I do not agree with the consolidation plan. I think smaller elementary school located within the neighborhoods where the children live offers a nuturing, calm and familiar environment. I	3/4/2026 10:26 AM

	believe large schools with thousands of children in attendance is chaotic and does not provide a structured learning environment for children of these ages.	
2579	I appreciate the need to appropriately use resources and am definitely in favor of cutting back on spending when it makes sense to do so. That said, I think when we are looking at capacity and utilization, we may want to revisit what class size is ideal for each grade level. Having 25-26 students in a class is not ideal for anyone--teachers or students. This leads to teacher burnout and student needs being overlooked. I would really like for Dekalb to reconsider recommended class size before closing schools. We selected Vanderlyn Elementary School via school choice last year for my second grader. We were at Chesnut, and I was PTA president for two years there. The school leadership was unorganized, and the good teachers were unhappy and leaving. I am so happy to have my son at Vanderlyn now, a well-run school where he is thriving and learning. The community is supportive and happy, and the teachers are wonderful and many have been there for years. If you close Vanderlyn and redistribute this community to other schools, that will result in many families (with well performing students and how contribute financially to the school) selecting private school alternatives. Vanderlyn is one of the top performing schools in Dunwoody, and closing it seems to be convenient as it is so close to Dunwoody High School. However, this may not be not a wise decision given the impact on the community and reflecting on the school's performance. Looking at the long term, if we want high performing children and invested families to attend Dekalb county schools, that starts with providing good elementary school options. If there are only three huge schools in the Dunwoody area, I imagine you'll see a shift toward private school selection by families with the means to do so. I also believe teachers will opt to leave for areas in which they have smaller class sizes and more support. I respectfully ask that you reconsider closing Vanderlyn Elementary School.	3/4/2026 10:26 AM
2580	Oak grove represents a living and breathing community. It must not be closed or consolidated.	3/4/2026 10:26 AM
2581	Fine by me, as on long as our Henderson Middle school students can still go to Lakeside	3/4/2026 10:24 AM
2582	As a community member with no children, I was floored to see Oak Grove Elementary on the potential closure list. I grew up in Gwinnett (public schools) and have lived in DeKalb in the Oak Grove district for 10 years. The school's reputation preceded it when we were in the process of buying our house ("you're moving to the Oak Grove district? Wow!" In a good way.) You can't drive through the area and not know what our elementary school is ... It's even more identifiable by our surroundings than Lakeside HS is. OGE's foundation does amazing work, and everyone in our area knows it. It is a gem of the DCPS system and a major identifier for our area. Our community would feel completely different if it were gone.	3/4/2026 10:22 AM
2583	I understand the need for consolidations but it's easy for me to say since my child's school isn't effected.	3/4/2026 10:21 AM
2584	I think that	3/4/2026 10:19 AM
2585	It’s concerning to think about the small, cohesive elementary schools getting too big and unwieldy. I’m also concerned that enormous middle schools like Henderson will just get more enormous, causing degradation in quality, which is already a major concern currently.	3/4/2026 10:16 AM
2586	Do not close Brockett Elementary. It is a great school with all the resources it needs.	3/4/2026 10:14 AM
2587	Please do not close my school, Oak Grove Elementary. My brother and I currently go to school here with all our friends and we love our school.	3/4/2026 10:14 AM
2588	Consolidations seem necessary based on the provided information.	3/4/2026 10:12 AM
2589	Think its a lot of information to take in. Understandably adjustments must happen	3/4/2026 10:11 AM
2590	I strongly oppose the closure or consolidation of Vanderlyn Elementary. While I understand the county’s need to evaluate facilities and budgets, the proposal focuses heavily on operational efficiency while overlooking the significant academic and social benefits of smaller elementary schools. Research from the Learning Policy Institute highlights that smaller school communities support greater student engagement, improved attendance, and stronger teacher collaboration, all of which contribute to student success. The National Center for Education Statistics has also reported that large schools can negatively affect student participation, school climate, and individual attention, particularly for younger students who benefit from more personalized environments. Vanderlyn Elementary is already a top-performing school in DeKalb County and in the state of Georgia, demonstrating that its current model works. Closing or consolidating a successful school risks disrupting academic progress, community	3/4/2026 10:09 AM

	stability, and student well-being. Efficiency and cost savings should not come at the expense of educational quality or community stability. Vanderlyn's success demonstrates the value of maintaining strong, neighborhood-based elementary schools.	
2591	Vanderlyn should not be consolidated, repurposed, or closed. It is a foundational part of the DCDS school community. It consistently produces high achieving students and classrooms are full. Enrollment at VES is not an issue.	3/4/2026 10:08 AM
2592	Vanderlyn is an amazing school, with a strong parent community and good teachers and we cannot get rid of it. So many kids walk from the surrounding neighborhoods.	3/4/2026 10:05 AM
2593	I am currently serving as the Media Specialist at Stoneview, and I would like to express my concerns regarding potential rebuilding or closure discussions. I transitioned into this role after spending five years in the classroom and earning multiple advanced degrees to become a certified Media Specialist. This career path represents a significant professional investment and long-term commitment to supporting literacy and student achievement. While I understand that facility improvements or rebuilding efforts may be necessary and beneficial for our students and community, I am concerned about the potential impact on my position if the school were to close. I believe the Media Center plays a vital role in fostering literacy, supporting instruction, and enhancing the overall academic environment at Stoneview. My hope is that any decisions made will consider the value of maintaining strong instructional support roles, including the Media Specialist position, to ensure continuity and continued student success.	3/4/2026 10:01 AM
2594	Closing Oak Grove and other consistently high achieving schools is "fools gold". It might look economically wise but it will degrade the quality of DeKalb County Public Schools and draw into question the wisdom of the School Board. It is recommendations like this along with a record of having 6 Superindents in the last 7 years that has made DCPS a laughing stock in the State and across the country. Support high-achieving schools, don't close them.	3/4/2026 10:01 AM
2595	This makes sense to me.	3/4/2026 9:59 AM
2596	We do not want to lose our elementary school. We love Brockett, moved to Tucker for Brockett and our youngest was just accepted into pre-k at Brockett!	3/4/2026 9:59 AM
2597	Although there are more elementary seats than students, closing Chesnut (not on the list) should be considered over closing Vanderlyn or Kingsley. Primarily the traffic near that school is very heavy due to its proximity to 285 and Peachtree Middle School. Closing Vanderlyn or Kingsley would cause many more students to have to ride a bus, who now walk to school. Even students who currently ride a bus, will have to ride much further. If Vanderlyn and Kingsley are both closed, there will be no elementary school in the northeast portion of Dunwoody.	3/4/2026 9:54 AM
2598	Please think of the kids	3/4/2026 9:53 AM
2599	Disappointed in closing Vanderlyn. We love the school, the teachers, the staff, the environment and the spirit of the school community.	3/4/2026 9:49 AM
2600	I think y'all are doing a good job	3/4/2026 9:45 AM
2601	No closure, no consolidation. Keep Oak Grove elementary school just as it is.	3/4/2026 9:45 AM
2602	Run down and no color in the school. School feels like a prison. No excitement for the kids to learn.	3/4/2026 9:42 AM
2603	You cannot close oak grove elementary as it will ruin our community and our housing value. Renovate it but it would be disastrous to close it.	3/4/2026 9:40 AM
2604	There are decisions that do not make sense. Based on the metrics at the cluster level, I would like to understand how closing a highly utilized elementary school aligns with those metrics. Before any decisions are made, it would be highly recommended and helpful for the community to see detailed reassignment modeling, receiving school capacity (including lunch areas and outdoor play areas), ensuring class sizing doesn't go up/class size projections, transportation impacts, and feeder pattern implications.	3/4/2026 9:37 AM
2605	I believe consolidation is the wrong path to take. Community involvement and ease of access will be lost as this plan primarily focuses only on financial benefit.	3/4/2026 9:35 AM
2606	It seems that all scenarios will create classrooms that are larger in size than they are now.	3/4/2026 9:33 AM

	This will produce worse outcomes from an educational and social development perspective. If schools can be consolidated while increasing teacher hiring and keeping class size low, I would be ok with it.	
2607	We need more schools. There aren't enough seats available during the lottery process.	3/4/2026 9:32 AM
2608	Good	3/4/2026 9:30 AM
2609	I believe it is critically important to keep our community connected within Ashford Park Elementary School, as well as among the students and programs that will continue into the Chamblee Middle and High School cluster, including Kittredge Magnet School. A strong sense of community is what helps our county thrive, and maintaining those connections benefits students, families, and schools alike.	3/4/2026 9:30 AM
2610	Smaller schools with less than 400 students should be considered for consolidations first. Some of the schools with older buildings should be considered to consolidate with schools with newer buildings.	3/4/2026 9:29 AM
2611	I do not want my school to be consolidated and closed. I do not want my high school and middle school to be even more overcrowded than they already are.	3/4/2026 9:27 AM
2612	Stoneview Elementary School is in need of a refresh. The facility is outdated and old. Despite the efforts to clean and maintain the building, the facility is old and not ascetically pleasing. Consolidating Stoneview is a positive for the students, the community, and the district. Consolidating the school will create access to resources the students currently do not have- decent desks, restrooms that smell horribly.	3/4/2026 9:19 AM
2613	I am concerned about Briarlake becoming a very large school. It is such a special lovely small school which we love.	3/4/2026 9:18 AM
2614	Closing 27 schools seems excessive for a deficit of 10000 students. I also have concerns that by consolidating schools, classroom size will expand dramatically which will limit the resources available to students per classroom and strain teachers who are already dealing with no with large class sizes.	3/4/2026 9:17 AM
2615	Too much consolidation	3/4/2026 9:15 AM
2616	I feel great about the school the process in the morning from drop off until pick up. The only thing I have concerns about is that when the children are in the playground, anybody can jump the fence or come through the backstreet into the playground openly and that is dangerous..	3/4/2026 9:14 AM
2617	I believe some consolidation needs to happen	3/4/2026 9:13 AM
2618	Redan Elementary should not be closed as it serves the community well.	3/4/2026 9:13 AM
2619	I support addressing overcrowding at Dunwoody High School and want strong long-term facilities planning across the cluster. Since SAP is framed around enrollment trends and utilization, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. Before any closure decision, it would be helpful to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications.	3/4/2026 9:13 AM
2620	The proposal closure of Ashford Park Elementary School is a surprise. This school is a standout in terms of student performance, student community, teacher community and parent community. Closing this school and dispersing kids to multi other school breaks something that is working very well. This community is growing and full of young families and should remain in tact (no separation of current school zone boundaries) to continue the strong performance and parent involvement.	3/4/2026 9:12 AM
2621	I think it all makes a lot of sense. I want my tax dollars used more effectively and believe that larger, more centralized schools are better than smaller, more distributed schools.	3/4/2026 9:12 AM
2622	If the district's objective is to right-size elementary schools toward the 600-student efficiency benchmark, Vanderlyn should be evaluated as a candidate for expansion rather than closure. The school is already operating efficiently and, given its shared campus, presents an opportunity to explore coordinated facility solutions that support Dunwoody High School's needs while preserving elementary access. We respectfully request comparative modeling that evaluates closure versus expansion scenarios within the Dunwoody cluster, including cost, utilization, and long-term flexibility, before final determinations are made.	3/4/2026 9:12 AM

2623	I don't believe Vanderlyn should close as we are a high performing, close knit, community based school. Many of our families purchased houses in this area specifically so that their children could attend Vanderlyn.	3/4/2026 9:10 AM
2624	Great idea, we need to cut costs so resources can be properly shared and purchased for students. Staff compensation can also increase!	3/4/2026 9:10 AM
2625	Vanderlyn is a high impact community school where children are in a small and safe environment where community is priority	3/4/2026 9:09 AM
2626	Oak Grove Elementary is an extremely important school for us, and I strongly oppose its closure or consolidation. I have two children in 1st and 3rd grade that love OGE and are thriving every year. OGE is our favorite school in the world! Oak Grove has a very strong academic reputation, experienced teachers, and a supportive parent community that contributes significantly to student success. Closing this amazing school would disrupt a well-functioning learning environment and negatively affect many students and families. We intentionally moved to this area in 2021 because of the quality and reputation of Oak grove elementary school. Instead of closing OGE, the district should view it as a model for other schools. Besides there is confirmed data that the school is already at 89% utilization and projected at 96% next year. Enrollment at Oak Grove Elementary has been increasing over past years and not declining. Eliminating a high-performing and well-supported school does not seem like the best strategy for strengthening the district overall. Please explore alternative options that preserve successful neighborhood schools like Oak Grove elementary while addressing broader facility needs. Maintaining stability for students and families should be a top priority.	3/4/2026 9:08 AM
2627	Our schools are great, and our staff has a deep understanding of the kids and the programs/services needed to help them thrive. I would not like to see anything changed.	3/4/2026 9:06 AM
2628	I am extremely concerned that the initial scenarios prioritize facility capacity OVER programs and community demand (utilization) for schools. I am a Vanderlyn and Dunwoody High School parent and attended the SAP community session for our Dunwoody cluster. I heard that DCSD funding will FOLLOW students. I believe closing Vanderlyn, which is a highly desired and in-demand elementary school, will erode our community's trust in DCSD and result in families pulling their children from DCSD for private schools (as was done during the pandemic). This will further exacerbate declining enrollment trends in our county as students (and funding) exit DCSD. To ensure the continued success of the Dunwoody cluster, I would like to understand the reasoning behind closing Vanderlyn -- particularly since SAP emphasizes enrollment trends and the efficient use of space. I believe the proposal to expand Chesnut does not take into account traffic patterns in our community. Chesnut is located in a HIGH traffic area. My child attended Peachtree Middle School for 3 years, which is located on the same road and in close proximity to Chesnut. These schools are located on a road that is the primary path for families throughout Dunwoody to enter I-285 and is EXTREMELY busy in the morning and afternoon. Expanding Chesnut to accommodate additional students would result in multiple roads being blocked in this community in the morning and afternoon.	3/4/2026 9:06 AM
2629	Do not close sagamore, oak grove or midvale	3/4/2026 9:05 AM
2630	I support addressing overcrowding at Dunwoody High School and want strong long-term facilities planning across the cluster. Since SAP is framed around enrollment trends and utilization, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. Before any closure decision, it would be helpful to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications.	3/4/2026 9:03 AM
2631	Concerns about space, over crowding in schools, losing tight community	3/4/2026 9:00 AM
2632	Strong, stable elementary environments are important for students and communities, and I would like to better understand how this proposal supports long-term cluster planning. I support solutions for high school overcrowding, but it would be helpful to see complete modeling on reassignment, receiving school enrollment and capacity, transportation, and feeder impacts before decisions are finalized.	3/4/2026 9:00 AM
2633	Elementary school students will lose their community ID.	3/4/2026 8:58 AM
2634	First of all, open-ended feedback is impossible to track and is a terrible way to receive feedback in a scenario like this. Will facility expansion mean that trailers are parked in the back of the buildings? Many current buildings are in total disrepair and are falling apart. Will	3/4/2026 8:57 AM

	these buildings be fully repaired before being inundated with new students? This should be priority #1.	
2635	Very worried about our home value in dunwoody.	3/4/2026 8:55 AM
2636	do not consolidate or close facilities	3/4/2026 8:55 AM
2637	After reading the materials and attending a Q&A session, I have no faith that this process is being undertaken with full transparency or thoroughness. The scenario was prepared without full understanding or data regarding traffic patterns, impact to enrollment, student outcomes in larger vs smaller schools, where students will be moved to, how 'expanded' schools will be expanded and with what budget, impact to staff and teachers, consideration of special programs like magnets, etc. It is impossible to fully evaluate any plan that ignores these and other factors. This feels like a rushed, incomplete, incompetent process. Further, there is a tremendous amount of eroded trust in DCSD due to a constant stream of bad press, corruption and poor leadership at the very top. It is a terrible idea to implement a scenario that will rock communities without first reestablishing trust and demonstration of BASIC COMPETENCE at the district level. I have no issue with closing schools if the numbers require it. But I do have many issues with the way this process is playing out.	3/4/2026 8:54 AM
2638	I think the initial facilities scenario is a great idea. I know that new facilities and better school based building for learning would boost morale and test scores.	3/4/2026 8:53 AM
2639	Larger schools at elementary level are not ideal for development or learning. No consolidation recommended	3/4/2026 8:53 AM
2640	I think more could be supportive of Vanderlyn closing if you could show that DHS would have capital behind an expansion to alleviate DHS over crowding. If not, then why close a high performing school and go through redistricting? If Vanderlyn is just going to be an empty building on a vacant lot you are doing more harm than really any good. And another thought - could Peachtree Middle be expanded to accommodate all Dunwoody high school students? And then DHS becomes the middle school. And Vanderlyn stays open. Seems like there's more land over there to expand the middle school into an high school and even Seacrest Stadium.	3/4/2026 8:53 AM
2641	may require longer commute times for students, which can increase absenteeism and create transportation challenges for families.	3/4/2026 8:51 AM
2642	I believe this to be necessary	3/4/2026 8:48 AM
2643	Vanderlyn Elementary functions as a true neighborhood school with high walkability and strong peer proximity. Many families walk daily and students regularly interact outside of school, creating a stable social environment that supports learning and community engagement. Consolidation would convert a low-transport, neighborhood-based model into a bus-dependent system, increasing transportation costs and reducing daily physical activity for students. Vanderlyn also benefits from exceptional parent involvement and community investment, including direct neighborhood contributions to school resources and playground improvements. Preserving high-functioning neighborhood schools like Vanderlyn should be prioritized when evaluating consolidation scenarios.	3/4/2026 8:47 AM
2644	I do not believe closing Vanderlyn ES would be beneficial to not only the students but also the community.	3/4/2026 8:45 AM
2645	Please do not close Vanderlyn. It is a great school with a thriving community. My son is happy there. Why would you close the school that is academically one of the best in the state? We are very upset that it is on the list.	3/4/2026 8:40 AM
2646	The deciding factor in purchasing our home was its close proximity to Oak Grove Elementary, in which we can walk to school. I am very disappointed to learn that it may close, at the same time that our property taxes skyrocket, and it has us considering if we should leave Dekalb.	3/4/2026 8:40 AM
2647	I disagree with closing Vanderlyn as it is one of the top schools in Dunwoody. Why would you close one of the top performing schools. The focus should be placed on the underperforming schools.	3/4/2026 8:40 AM
2648	Please do not hastily close or consolidate schools without getting more contextual data from schools directly	3/4/2026 8:39 AM
2649	Consolidation will lead to overcrowding and increasingly larger student to teacher ratios.	3/4/2026 8:38 AM

	Increasing the ratios puts more strain on the teachers and less attention to the students. Less attention means lower performances and increasing likelihood of parents/communities no longer utilizing public schools, which is already at risk of happening for Dunwoody middle school children. With class sizes ballooning past the ideal 18 students/teacher, we are likely to see a drop off in student performance, kids qualifying for gifted, and putting them in advantageous positions to succeed at the middle school and high school levels.	
2650	Very upset. We relocated our family to the oak grove elementary school. We absolutley love the school and the teachers. Will be devastated if it is closed.	3/4/2026 8:37 AM
2651	I agree that consolidations are necessary. I am concerned about the appropriate allocation of materials, staff, resources between Areas/ Regions. I am also concerned that these proposals do not take into account the special education regional classrooms that are not a part of the attendance zone and therefore are not accounted for when looking at seats available, etc.	3/4/2026 8:36 AM
2652	I fully support long-term facilities planning aimed at resolving the overcrowding at Dunwoody High School. However, to ensure the continued success of the Dunwoody cluster, I would like to understand the reasoning behind closing Vanderlyn Elementary, which is a high-utilized elementary school—particularly since the SAP emphasizes enrollment trends and the efficient use of space.	3/4/2026 8:30 AM
2653	A lot of neighborhood school that closed down you don't think about the parents that do not have a car or do not have access to transportation to drop their kids off that hurts a lot being disabled sucks too because if you don't drive and you don't have anybody to drop your kid off what do you do	3/4/2026 8:30 AM
2654	I feel the merge has to be worth it, the building environments need to be above standards and not just putting students from one ran down place to the next just to keep numbers of enrollment high	3/4/2026 8:30 AM
2655	While I understand the need for consolidation I believe you need to look at the county as a whole. We have high performing schools, like Vanderlyn, that can have increased capacity and room for expansion, if needed. It’s shortsighted and detrimental to the community to consider shutting down an active, vibrant school with high parent involvement and voluntarism to accommodate expansion of a high school that is also performing well. Breaking clusters of kids up as they grow and mature in an increasingly difficult culture is not what’s best for the kids and some scenarios have kids moving schools twice in 4-5 years. Your role is to support the growth and education of kids and you’re not doing that by taking the easy path of shutting down a high performing, caring, involved school.	3/4/2026 8:30 AM
2656	Large elementary schools may save money but have detrimental effects on education and community building. Smaller, neighborhood schools remain preferable	3/4/2026 8:27 AM
2657	The northern district does not have the same issues as South Dekalb. Many of the families in the Dunwoody Cluster chose private school during Covid because of Dekalb's choice to stay closed. Pair that with the trust issues with the hiring practices and choices of the many superintedents Dekalb has had over the years. We need to get to the root cause of choosing private. A school like Vanderlyn works well. It is a high performing school with the ability to take more students from Kingsley or other schools.	3/4/2026 8:27 AM
2658	While I understand the district’s need to address facility utilization and long-term planning, I have significant concerns about the proposed consolidation scenarios that include closing Vanderlyn Elementary. Vanderlyn is a high-performing neighborhood school with strong academic outcomes and a highly engaged parent community. Closing or consolidating a school that is functioning well risks disrupting student learning environments and dismantling a community asset that has taken years to build. School closures also have broader implications beyond facility capacity, including increased transportation times for young students, larger class sizes, and reduced opportunities for family engagement when students are no longer able to attend school within their neighborhood community. These factors can negatively affect both student outcomes and the overall strength of the surrounding community. If consolidation is being considered, it is important for the district to clearly demonstrate the long-term educational and financial benefits, including transparent data on projected enrollment trends, transportation impacts, class size changes, and the expected reinvestment of any savings into student programs. Without this level of clarity, it is difficult for families to understand how closing successful neighborhood schools would ultimately benefit students.	3/4/2026 8:24 AM
2659	I am disappointed Kingsley might get shut down. It's a wonderful school with a great	3/4/2026 8:24 AM

	community and caring teachers. Our family very much values the walkability of the school given the location inside the neighborhood; it's not on a busy road and there are (generally) sidewalks. To close such an intimate school, where the teachers know all the students names would be a tragedy. I am frustrated by the lack of fore-thought and planning, too. Closing schools isn't a long term solution. It sounds like the county wants to push more kids from Vanderlyn and Kinglsey into Chestnut (already over capacity), Dunwoody ES (doesn't have capacity for even half of one of those schools) and maybe Austin (also doesn't have excess capacity). So from the data the county is providing it would appear they are suggesting to take 5 schools with reasonable capacity and merge them into 3 schools which will be way over capacity. It reads like they are trying to make the worst environment for the kids. Never mind that "capacity" here means classrooms are actually far too full and teachers are overwhelmed by the number of students in their care. If the argument is that this consolidation is an effort to save money on admin staff well it sure looks like the excess/misappropriated admin staff are all at the county level. The county seems like they are incapable of fostering a quality academic environment and yet they keep hiring. Specifically there is no teacher coaching (ideally something handled by the schools but coordinated by the county). When teachers are observed the central admin staff who do the observations are very short and they don't give feedback. Another example is that central office seems to fail to purchase classroom supplies on time. All of that to say that if you want to get rid of admin costs focus on the home office staff and make that efficient in a way that is helpful to the individual schools and those teachers. This process being started by Horton also casts serious doubts on it's merits. I am having trouble trusting anything he initiated given his track record. Maybe fix the damage he's done before even thinking about closing schools. ---- Fix the HVAC at Kingsley so these kids can learn in a quiet, calm classroom. Don't centralize the schools and actively overcrowd them. Get rid of school choice so families who should go to this school do and can help it get better. Don't give up on these kids.	
2660	I’m not in favor of closing Oak Grove School. It’s the heart of our community.	3/4/2026 8:21 AM
2661	I don’t agree with the closure of certain schools, Vanderlyn in particular. It is one of the most prestigious schools in the district	3/4/2026 8:20 AM
2662	This exercise is not supported by the taxpayers at large and we have made this clear. However, it seems to still be a potential scenario for unknown motivations. The data cited by the planning committee is not accurate and the school assignments are not thoughtful. It feels like a very rudimentary assessment as if you are only capable of understanding or digesting basic data where this is a complex issue.	3/4/2026 8:19 AM
2663	I understand the necessity to consolidate	3/4/2026 8:18 AM
2664	The scenarios are correct in that resources are spread too thin and classes are not full. However, these scenarios do NOT address the root of the problem. Why have families been leaving the county? The problems start at the top. Management needs to be fixed at the top in order to see positive changes at the school level. MANY families have left due to poor management and decision making at the county level. Why are these scenarios occurring now when these schools have all been around for many, many years?	3/4/2026 8:18 AM
2665	The initial facilities are great.	3/4/2026 8:17 AM
2666	We would be very disappointed if Vanderlyn Elementary closes. We recently moved to the area and purchased a home in the neighborhood right down the street from Vanderlyn specifically for this school. We felt that Austin and Vanderlyn were the best fits for our family and are left with a lot of uncertainty that if Vanderlyn to close, where we would be redistricted. This is leading us to consider moving in advance of this decision to a more stable district because we have only one child in school now but have 2 younger kids - one starting K in the Fall - for whom we want to minimize disruption. We also worry a lot about excellent teachers leaving Vanderlyn due to this possibility and uncertainty and the downstream impact on current/ future education.	3/4/2026 8:16 AM
2667	Very concerned that Dekalb would consider closing one of their top elementary schools.	3/4/2026 8:14 AM
2668	Do not close Oak Grove Elementary	3/4/2026 8:11 AM
2669	It won't be good for our students, family. Our school is a great school with very few vacant seats	3/4/2026 8:09 AM
2670	I am not against the scenario of school consolidation. I am, however, not in favor of Redan Elementary being one of the 27 schools slatted for closure.	3/4/2026 8:09 AM

2671	My concerns and provide feedback on the proposed plan to close multiple schools within the southside of DeKalb County. I do not fully understand the reasoning behind this decision. From my perspective, closing these schools would be a significant disadvantage to our children, the community, and the stakeholders involved. It is particularly troubling with regard to Redan Elementary School, which is the second oldest school in the district. Closing it feels like erasing an important part of our history. I strongly believe that this matter deserves further discussion and reconsideration. We need to ensure that all concerns are carefully addressed and that the impact on the community and students is thoroughly evaluated before moving forward.	3/4/2026 8:05 AM
2672	I understand the reasoning for some of this but I don't believe closing Oak Grove Elementary would be a good decision for my community. It is a high achieving school with significant family involvement, both volunteering and financial. Larger schools and classrooms can also be intimidating for younger children and make learning more difficult. The county cannot spend millions on external construction firms and external advisory firms while disregarding the true constituents of the county. If it does, it will likely result in many residents moving out of the county, moving their kids to private schools, and lowering property values.	3/4/2026 7:58 AM
2673	I think we need to focus on the Impact, and different alternatives highlighting positive scenerios that are working to inforce better choices.	3/4/2026 7:57 AM
2674	I am concerned about how the closure of Oak Grove Elementary will impact the size of Sagamore Hills Elementary School. The proposed scenario will expand the size of Sagamore significantly requiring more traffic from buses, parent drop off / pick up, school activities, etc. DeKalb's historical preference was to place elementary schools inside residential neighborhoods, and Sagamore Hills is situated inside a neighborhood due to this previous planning policy. The significant increase in school traffic resulting from the closure of Oak Grove and the expansion of Sagamore Hills will create dangerous and cumbersome traffic patterns within the residential neighborhood. Additionally, the school age populations in both of the Oak Grove and Sagamore Hills areas appears anecdotally to be exploding. We see new young families and couples looking to start families move constantly. My expectation is that school enrollment will exceed projected growth and both schools will be needed.	3/4/2026 7:57 AM
2675	My daughter attends Oak Grove Elementary due to school choice. Oak Grove is a great school with great teachers. It is small class sizes and we need that for our daughter to succeed. Smaller class size works. If she would not been able to attend Oak Grove we would have left Dekalb County Schools and put her in private	3/4/2026 7:56 AM
2676	It feels like many of the proposed schools for closure do not have complete data and/or do not make sense for closure considering attendance/enrollment rate (current and future).	3/4/2026 7:54 AM
2677	That is horrible, you are gutting school that provide essential services in our neighborhood. This is so Dekalb County.	3/4/2026 7:45 AM
2678	If there is room in the school, why are we waitlisting pre-k….	3/4/2026 7:26 AM
2679	Instead of closing schools due to empty seats, we should use the empty seats to provide more opportunities for our students to have more one on one time. Many children learn better in small settings, so instead of looking at this as a bad thing, we should use the space to help students learn more.	3/4/2026 7:19 AM
2680	Vanderlyn ES is an important school to the community and closing it would negatively impact the community	3/4/2026 7:05 AM
2681	Close school that need worn out and would take more money repair. Or repurpose into non-educational facilities.	3/4/2026 7:02 AM
2682	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to	3/4/2026 6:54 AM

	increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top t ier academically does not directly address the district-wide utilization gap.	
2683	I strongly believe that elementary school students, typically in grades K-5, should not be exposed to older students in grades 6-8 within the same school building. Maintaining a clear separation between these age groups is essential for fostering a safe, nurturing environment tailored to the developmental needs of younger children. In today's world, where children have unprecedented access to the internet and social media, they are already bombarded with influences that can accelerate exposure to mature or inappropriate content far beyond their years. Combining elementary and middle schoolers under one roof exacerbates this issue by introducing direct, daily interactions with preteens and early teens who are navigating puberty, increased social pressures, and more complex behavioral dynamics. This setup risks younger kids adopting negative habits—such as profanity, bullying, or risky behaviors like experimenting with vaping or social exclusion—through observational learning and peer imitation, a phenomenon well-documented in developmental psychology as behavioral contagion. Research shows that transitions to middle school environments, where older students dominate, are linked to spikes in aggression, rule-breaking, and emotional distress among younger adolescents, and extending this exposure downward to elementary ages could amplify these problems for even smaller children. Children in K-5 are at a critical stage of building foundational social skills, self-confidence, and a love for learning, often in a more playful, structured setting with closer adult supervision. Middle schoolers, on the other hand, face heightened hormonal changes, identity exploration, and peer-driven independence, which can lead to cliques, teasing, or more overt conflicts. Studies on school configurations highlight that K-8 models—where elementary and middle grades share a building—often result in poorer outcomes compared to separate elementary schools, including increased behavioral infractions, lower attendance, and higher dropout rates later on. For instance, sixth graders in middle schools are twice as likely to face discipline issues than those remaining in K-8 setups, suggesting that the presence of older peers disrupts the protective bubble needed for younger ones. Varying maturity levels mean that while some elementary students might handle interactions maturely, many others—especially those developing more slowly—could experience stress, anxiety, or a dip in academic motivation from feeling overwhelmed or intimidated. This isn't just about bad habits; it's about preserving the innocence and focused growth of young minds without the added pressure of navigating a shared space with kids who are essentially in a different life stage. Furthermore, consolidating schools in this way overlooks the long-term developmental trajectories of children. Evidence indicates that the shift to a middle school context can interrupt positive trends, such as the natural decline in ADHD-related symptoms or aggressive behaviors that occur in stable elementary environments. Younger students might internalize negative role models, leading to emotional problems like hyperactivity or withdrawal, which persist into adolescence. In high-poverty or diverse districts, where consolidation is often proposed for cost savings, this mixing can worsen disparities, as school-level factors like concentrated disadvantage fuel antisocial behaviors. Instead of consolidation, we should prioritize keeping elementary schools as standalone havens, investing in smaller class sizes and age-appropriate programs that shield kids from premature exposure. The potential for picking up detrimental habits isn't hypothetical—it's backed by patterns seen in transitional disruptions, where academic engagement drops and behavioral issues rise. Ultimately, true individual growth happens when children are	3/4/2026 6:52 AM

	allowed to mature at their own pace in environments designed specifically for them, not diluted by the challenges of older peers. Do your research Dekalb ! You failed me and others	
2684	I strongly oppose the proposed consolidations. Schools are not simply facilities to be rearranged for convenience or cost savings — they are established communities that provide stability, safety, and support for our children. This decision will have significant academic, emotional, and social consequences for students. Disrupting their environment, relationships, and routines is not a minor adjustment; it is a major upheaval that deserves far more weight than what appears to be a facilities-driven solution.	3/4/2026 6:40 AM
2685	I believe the older facilities with the less capacity of elementary students should be combined to a larger school.	3/4/2026 6:26 AM
2686	I like the smaller school senerio.	3/4/2026 6:10 AM
2687	The school is such an integral part of our community and our children's lives. We are generations at Oak Grove elementary and have had nothing short of an incredible experience.	3/4/2026 6:00 AM
2688	Consolidating elementary students into middle school buildings is not the best strategy in my opinion. I was apart of a school consolidation when they closed 2 schools and merged them with Snapfinger Elementary, and it was a challenging experience for scholars and staff. Snapfinger went from a viable school to a failing school overnight. Staff were disgruntled and students from different neighborhoods did not get along. We had NO SUPPORT with transitioning students and staff to this building. Teachers were at odds because of the merge and administration wasn't prepared with the necessary tools to bridge the gaps in personalities and instruction.	3/4/2026 3:52 AM
2689	Here are several concerns regarding the proposed closure of Ashford Park Elementary: 1. A Facilities-First Approach That Ignores Enrollment Reality The facilities-first strategy appears to optimize for buildings rather than students. Closing APES—the district's most utilized elementary school at 171.3% capacity—in order to "balance" enrollment is fundamentally illogical. * No Viable Capacity Nearby: District data show that neighboring schools—John Lewis (83%), Doraville United (99%), Dresden (85%), and Montgomery (128%)—collectively have only about 270 available seats. There is no realistic physical capacity within reasonable proximity to absorb APES's 822 students. * Portable Classroom Contradiction: Relocating APES students would immediately require receiving schools to install additional portable classrooms—the very issue the district claims it aims to reduce. This does not solve overcrowding; it merely redistributes it while dismantling one of the district's strongest academic communities. 2. The "Renovate-to-Close" Financial Contradiction The proposal highlights a troubling disconnect between Operations and Planning. In April 2025, the Board approved a $23.5 million contract with Winter Construction for major capital improvements at APES, including HVAC and cafeteria upgrades. This is not hypothetical funding—it is active spending, with crews currently on site. Continuing to allocate approximately 15% of the capital budget to a facility designated for "disposal" in 2027 represents serious fiscal misalignment. If the school closes, the district will either: * Renovate a building only to shutter it shortly thereafter, or * Incur substantial contract cancellation penalties. Either outcome means taxpayers fund improvements that will never benefit students. 3. The Tradeoff Scenario Does Not Apply to APES The "Tradeoff" model used to justify closing APES does not align with the school's economic reality. District financial models assume a $400,000 median home value. In contrast, Ashford Park's median home value is approximately $913,098. As a result, each APES household contributes roughly $8,319 annually in school taxes—about 2.3 times the district average. Residents are effectively paying at levels comparable to private school tuition while supporting the public system. This fundamentally undermines the argument that smaller schools are inherently inefficient: * A Revenue-Positive School: Given the significant valuation differential, APES likely operates with a revenue-to-cost ratio exceeding 1.0. In practical terms, the school generates sufficient tax revenue to cover its operating costs and potentially contribute surplus funds to the broader district. * The False Economy Risk: Closing APES in pursuit of cost savings disregards its role as a net revenue contributor. Moreover, destabilizing a high-value neighborhood school risks softening property values—the very tax base that subsidizes district-wide operations. What is currently a net donor community could become a financial liability.	3/3/2026 11:45 PM
2690	Quality Education and Community Schooling are inseparable. Comprising this synergy through consolidation, displacement, and increased school sizes is a flawed strategy.	3/3/2026 11:36 PM
2691	Oak Grove elementary is a great school with a good occupancy rate. It should not be considered for closure.	3/3/2026 10:11 PM

2692	I understand that declining enrollment and under-utilized buildings require difficult decisions. However, consolidating schools should be approached with careful consideration of how these changes affect children, families, and neighborhood communities. Schools are more than facilities — they are places where students build relationships, families connect, and communities grow. Large consolidations can unintentionally create overcrowded schools, longer travel times, and disruption for students who benefit from stability. I hope the district prioritizes transparency, community input, and thoughtful planning if consolidations move forward. It would also be valuable to consider creative uses for facilities that preserve educational opportunities and community services rather than simply closing schools.	3/3/2026 10:07 PM
2693	My child is a lottery student, and has been since her first day of kindergarten at Midvale. Midvale gave her such an incredible foundation, and I cannot imagine it not being available to future students.	3/3/2026 9:46 PM
2694	Adequate feedback cannot be given when simply saying our school will close, without saying where these children will go. While I am disappointed to see APES being considered for closure, I am more concerned at where the over 800 children will be moved to. There is not another elementary school close that could accommodate even half of this school, which suggests the kids will be split up amongst many schools, which again are not close by.	3/3/2026 9:46 PM
2695	HPM emphasizes that choices are driven by data such as declining enrollment and building conditions. But…their numbers are wrong and only support their cut and paste plan. If we had instead used the almost $8M we paid HPM and instead invested in our schools, we'd be in a much better place.	3/3/2026 9:33 PM
2696	This will absolutely lead to over-crowding of both the classrooms and the surrounding neighborhoods, which were not designed to accommodate huge numbers of students. Hawthorne in particular is situation within a neighborhood, not adjacent to main road but actually inside the neighborhood. The neighborhood will not suddenly be able to accommodate huge numbers of students coming in and out.	3/3/2026 9:27 PM
2697	I don't like that we appear to be going to a large enrollment model for elementary schools. My fear is that the county will increase school size and student-teacher ratios in order to increase efficiency. Unfortunately, this could have a negative effect on student outcomes. One big question I had after my review was how will the county expand schools to integrate students from closing schools (e.g., Laurel Ridge potentially taking on students from McClendon)? Is the county going to add trailers or consider building expansions. If the county is going to simply add trailers to schools across the county, that is not desirable. It is also very difficult to envision the different scenarios without seeing the updated attendance zones. we need to see these earlier in the process.	3/3/2026 9:23 PM
2698	We have paid HPM nearly $8M. This is financially irresponsible!	3/3/2026 9:20 PM
2699	It's clear there are many under-enrolled schools that need to be consolidated. It is a frequent board complaint and board discussion that there are disparities of programs and courses offered at some schools and not others. If we right-sized schools, then it's obvious that more students could have access to more programming/coursework options. The issue is that many of our under-enrolled schools are in south DeKalb. So, you have put out scenarios that close schools that aren't under-enrolled and propose spending money making smaller/full buildings larger and more-full without showing how the money spent on that idea actually saves money in the long run. This leads me to believe that many of your north DeKalb scenarios are manufactured to make it look like you addressing enrollment issues equitably across all parts of the district. In my opinion, no matter where a severely under-enrolled school exisits, that's where you should focus your efforts on consolidation and attendance zones. And while it might be inconvenient politically that the vast majority of these schools are in south DeKalb, the end results is massive improvements in opportunity for this portion of the district. And THAT is the definition of equity. I don't anything about marketing, but you aren't selling this from that perspective at all, and you should. Next, what we seem to have in north DeKalb is an attendance zone problem rather than an under-enrollment problem. You've got massive overcrowding at certain schools which requires a look at attendance lines, not closing buildings.	3/3/2026 9:19 PM
2700	We want to keep an excellent school in our neighborhood which already provides the facilities needed for a good school and with a sizeable population.	3/3/2026 9:18 PM
2701	Baffled at the recommendations. With Midvale specifically, you're recommending to close an IB certified neighborhood school with tons of community involvement. The facilities just	3/3/2026 9:15 PM

	underwent major renovations. To close the school despite all this makes me very skeptical about intentions more generally.	
2702	Devon Horton started this process and has been indicted on 17 federal counts tied to alleged embezzlement, wire fraud, and tax fraud. So, who, involved in this, is corrupt or financially benefitting?!	3/3/2026 9:12 PM
2703	It’s terrible. Don't close my school.	3/3/2026 9:07 PM
2704	I don't disagree that some schools may need to be consolidated, but the ones suggested do not make sense to me. Closing Midvale is not in the best interest of our students or community; and the fact that Kittredge is considered as even remotely something that might need to be shifted is hard to understand. IB Feeder Pattern: Midvale serves as the only IB Elementary feeder school in Tucker. Closing it would disrupt a pathway that families intentionally choose and value. This is not equitable. Closing Midvale would slash the district's K-5 program offerings by 30%. Because IB authorization is granted through specific schools, you cannot relocate this program to a new school without recertification which will take time. Capacity Concerns: Livsey reportedly has capacity for approximately 300 students, while Midvale currently serves around 430 — and that does not account for students from Brockett Elementary School, which is also on the proposed closure list. Livsey already utilizes trailers for overflow. Where will the additional students go? Livsey does not appear to have room to expand.	3/3/2026 9:05 PM
2705	I like the proposed consolidations. It makes sense to close smaller schools that are in close proximity to larger schools.	3/3/2026 9:00 PM
2706	Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility	3/3/2026 8:56 PM
2707	Oak Grove does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake’s current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake’s enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that	3/3/2026 8:47 PM

	exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
2708	Great idea to expand Sagamore Hills Elementary! This would be amazing for the community!	3/3/2026 8:35 PM
2709	I understand some schools may potentially need to close based on enrollment across the board in Dekalb County. However, enrollment doesn't always reflect the strength and importance of a community school and how the closure of said school could negatively impact the local community. Specifically, in regards to the potential closing of Oak Grove Elementary, the two other schools in the local district, Sagamore Hills & Briarlake, are not large enough to accomodate all of the OGE students so both schools would be looking at expansion, which is expensive and grossly over the targeted 600 number. Not to mention, we have concerns about traffic patterns in these already stressed neighborhood communities. Funneling a few hundred more students to each of these schools would be an excessive amount of buses and cars. Additionally, research has shown that students perform better and families have better experiences at small elementary schools versus large elementary schools. There are also concerns that the data concerning numbers is not actually correct. The company who the county is partnering with on preparing a plan for the future was hired under the previous superintendent, Horton, who resigned after being federally indicted. It is also my understanding that the same company led another school district into severe debt with a plan similar to what was proposed for Dekalb County. This company also has dealings in construction and could benefit from any planned expansions. Lastly, Oak Grove Elementary has a higher building score than the other elementary schools in the Oak Grove area.	3/3/2026 8:30 PM
2710	Thanks for sharing the initial facilities consolidation scenario. It looks like a good step toward improving efficiency, but I'd like to know more about how it will affect each school, staff, and students, as well as the expected timeline for these changes.	3/3/2026 8:27 PM
2711	None	3/3/2026 8:22 PM
2712	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/3/2026 8:18 PM
2713	We are so distraught at the thought of this actually becoming a reality. We know Brockett is a wonderful school, with great teachers and has been the most beautiful community for our children. We moved here specifically to be near Brockett Elementary over other schools	3/3/2026 8:17 PM

	districts. This can not go through as this seems to only be about money & not the children or the community it affects.	
2714	I do not like it because Brockett is a great school in great condition with great teachers and a pillar of the community. These moves seem to only benefit DCSD's pocket book.	3/3/2026 8:16 PM
2715	Dunwoody Elementary took on a huge number of Vanderlyn students. You could send some of them back to Vanderlyn instead of closing such a good school.	3/3/2026 8:10 PM
2716	I don't see the logic in closing Oak Grove Elementary which is one of the best ranking Elementary schools in DeKalb and the state. It simply doesn't make sense to penalize achievement in the name of consolidation. It feels like an effort to lower standards when you should be looking to raise them.	3/3/2026 8:02 PM
2717	Our children would benefit from smaller class sizes rather than trying to overload our schools. We do not want our children to go to school in trailers because of this restructuring plan.	3/3/2026 8:00 PM
2718	I am against the consolidation.	3/3/2026 7:56 PM
2719	We have received a great education .	3/3/2026 7:42 PM
2720	Y'all have wasted millions of dollars on felonious salaries. Stop closing the schools and running off families and students. You are all corrupt and incapable of managing a mop bucket.	3/3/2026 7:35 PM
2721	Unfair evaluations Data lacks integrity	3/3/2026 7:34 PM
2722	Evansdale would be one of the schools better to expand than close mainly because of the amount of land!	3/3/2026 7:34 PM
2723	Consolidations mean increasing the size of schools - not optimal. Smaller is usually better	3/3/2026 7:33 PM
2724	Brockett Elementary School was why we moved to Tucker in 2017. Without this important part of our community I think we would lose so much of what makes Tucker a wonderful place to live.	3/3/2026 7:09 PM
2725	Do not close Oak Grove Elementary. It is very important to the community.	3/3/2026 7:06 PM
2726	I think that brockett has more land than the proposed livesy school for any additional expansion is needed as well as a better location in general for the surrounding area to attend. I believe that brockett would be a superior location.	3/3/2026 7:06 PM
2727	It make sense, though I think in your pyramid example compromising resources with lower cost and enrollment does not necessarily lower quality. Take the recent realization that in classroom computers are detrimental to learning.	3/3/2026 6:55 PM
2728	I think the district has bit off more than it can chew with proposing 27 school closures. It seems much more responsible to start small and do a few schools at a time to manage logistics and not become overwhelmed with change. I also think it's a BAD look to close that many schools when we are dealing with the aftermath of Dr. Horton's shady business. We have an empty 6.5 million dollar building and upwards of 100 central office positions that need to be eliminated or relocated into schools. Placing the burden of this district's financial irresponsibility on students, families, and staff demonstrates continued recklessness.	3/3/2026 6:55 PM
2729	This feels like taking a chainsaw to the district. It feels short sighted. Schools are critical to children, communities, and property values. No one wants a 1,000 child elementary school to be the norm. Thats simply too many children crammed together. There is value is smaller classes, less classes. They cant even get proper gym or recess time with all those kids. This plan is terrible and detrimental.	3/3/2026 6:48 PM
2730	To consolidate OGES would 1. Reduce the value of our home. 2. Reduce the opportunities afforded OGES students through its PTA and foundation. 3. Interrupt a continuum of tradition in our family and others. 4. Reduce the impact on grade level scores as OGES has some of the highest in the district. 5. Increase the number of students who will need busing to the new situation. 6. Eliminate the dedication of OGES parents on behalf of their children.	3/3/2026 6:44 PM
2731	I am not a fan of the possible closure. I would want to keep Oak Grove Elementary as is K-5	3/3/2026 6:41 PM
2732	Oak grove elem is not underutilized many income families move here specifically for this school, wait list for pre k and school choice. This is a community school	3/3/2026 6:37 PM
2733	Consolidations are not good for all communities	3/3/2026 6:34 PM

2734	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/3/2026 6:23 PM
2735	I am devastated about the news about these consolidations. We absolutely LOVE Midvale Elementary School and a big reason we stayed living in our home in Tucker is because we love Midvale so much. Please DO NOT close Midvale Elementary. My son is thriving there and we love the staff and small community feel. Everyone knows each other, staff, students, and parents. I feel safe sending my son to school everyday in a small school setting because I know how valued and kind everyone is on the staff.	3/3/2026 6:19 PM
2736	Schools need to be closed. That is hard, but doing nothing is much worse, just less obvious.	3/3/2026 6:08 PM
2737	It's necessary to provide high quality services, and buildings need to be on large plots of land like Chesnut is.	3/3/2026 5:57 PM
2738	Elementary-aged students require a nurturing, structured, and highly personalized environment. In a school with nearly 1,000 young children, it becomes significantly harder to ensure that each student is truly known by their teachers and administrators. At the elementary level, relationships are foundational. Students are developing academically, socially, and emotionally. They benefit from close teacher engagement, consistent routines, and a strong sense of belonging conditions that are far more difficult to maintain in an oversized campus. Large elementary schools can also create logistical and safety challenges. Managing arrival and dismissal, lunch periods, recess, and emergency procedures becomes more complex as enrollment grows. Overcrowding can strain shared spaces such as cafeterias, playgrounds, and libraries, reducing the quality of daily experiences for students. Additionally, mega schools often weaken the sense of community that smaller neighborhood schools provide. Families may feel less connected, parental involvement may decline, and students can feel overwhelmed in an environment that feels impersonal at a young age. Smaller schools foster stronger partnerships between educators and parents, which directly supports student success. While growth and efficiency are important considerations, scale should never come at the expense of quality. Elementary education lays the foundation for lifelong learning. Our youngest students deserve environments where they are seen, supported, and valued not lost in the crowd.	3/3/2026 5:51 PM
2739	As a community member I have seen how good Brockett Elementary has been. Please do not	3/3/2026 5:48 PM

	close it. Many students walk to school and that would truly inconvenience them.	
2740	On the whole I am supportive. But I do want to make sure DCSD is looking at where density is being added in the current McNair area, along 2nd Avenue- there are two multi family developments between Glenwood and Flat Shoals. And I will not that McNair Discovery is a large building- I don't know its capacity but it Looks like it is definitely more than the 450 to 500 size. I can see closing Flat Shoals and Kelley Lake- they are much smaller. I also do like the grade band potential approach, and am very much in favor of more early care and learning centers.	3/3/2026 5:43 PM
2741	I understand the concerns regarding consolidation but Oak Grove should not be on the list. We are already at 88% and we are projected to be going up to 96% within the next 12 months. Enrollment continues to increase and is expected to reach full capacity within literally 2 to maybe 3 years. Closing this school would be a mistake and we - as parents and home owners - beg you to reconsider. Together there are 130 available seats at Sagamore Hills and Briarlake, and yet we are being told we should put our current 447 kids in those 130 seats. Briarlake's numbers are the lowest at 73%, but this is projected to increase substantially. Lulah Hills is in phase 1 of 303 multifamily units, expected to increase to 1,800. Corporate Square is in phase 1 of 390 (up to 2k planned) units. No projection is perfect but all the statistics gear towards showing Briarlake will increase to above 88%, Sagamore as well, and of course Oak Grove is already in excess of it. Relying on pandemic-era data is misplaced and the rising Druid Hills/Clifton corridor investments should be used to rebut this incorrect data. Oak Grove is one of the highest performing schools (the 4th highest in the 26 listed and top 10 in county) such that discussing closure of ours would be ethically wrong and in direct contrast to the ultimate goal.	3/3/2026 5:28 PM
2742	Oak Grove Elementary does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to 88%. Oak Grove is currently at 89% and projected at 96% for the 2026-27 school year. If OGE closes, the students would need to be absorbed primarily by Sagamore Hills (currently 91%) and Briarlake (73%). These two schools could not absorb the Oak Grove students without significant expansion. Oak Grove is one of the highest performing schools in the county. Closing a school that exceeds utilization targets, demonstrates sustained growth and ranks in the top tier academically does not address the district-wide utilization gap.	3/3/2026 5:09 PM
2743	it should not be done. see my previous answer.	3/3/2026 5:02 PM
2744	Strong, stable elementary environments are important for students and communities, and I would like to better understand how this proposal supports long-term cluster planning. I support solutions for high school overcrowding, but it would be helpful to see complete modeling on reassignment, receiving school enrollment and capacity, transportation, and feeder impacts before decisions are finalized.	3/3/2026 4:50 PM
2745	While I understand Ashford Park's lot size is smaller and it's only built currently for 480 and we are basically double that and most overcrowded school in the county, which was driving force to put it on list of closures (small school/lot size), we also back in Fall 2019 when they did Dekalb Master Plan study, were identified as the school/facility that was in top need of expansion per that analysis and they suggested it to have a new school within 5 yrs. Obviously, that plan was never executed at this point, but Ashford Park could be built into a two story school on the current lot to accommodate the ideal 800 size elementary. It would not be cheap to do a total teardown, rebuild or easy, but it is possible logistically. How do we go from being identified as most in need to shutting the whole thing down and abandoning what was originally put in that study, which has now been yanked off the Dekalb website? Even the current lunchroom expansion and site improvements havent progressed now because of this scenario of if we plan to shut it down no pt expanding the cafeteria that cant fit all the students, which just isnt fair after it was promised. John Lewis is nearby and newer/larger, but helped to alleviate crowding on other surrounding schools when it opened Fall 2019 and redistricting was done then when it opened. It didnt start out that way, but it is almost now at capacity too--if we were to move the entire current Ashford Park student body based on boundaries today to John Lewis, we would obviously all fit, but where do current John Lewis kids then go so the other schools they originally came from dont go right back to same overcrowded problem? It's really hard to assess closing APES this without knowing how boundaries shake out too. Also, if moving to John Lewis elementary, where would be the feeder middle and High? It's confusing as the map shows John Lewis feeding into THREE middle schools of Chamblee Middle, the new combo Sequoyah Middle/HS, and Druid Hills middle. Neither Sequoyah or Druid Hills are geographically anywhere near us, CMS would still	3/3/2026 4:40 PM

	be the closest and least headache commute wise. Then it has HS being Cross Keys based on that new cluster. At the moment CMS is not overcrowded and has capacity with current attendance boundaries and our oldest is thriving there just as she did at Ashford Park. So again hard to vote on facilities till we know how we are all going to be split across potentially 3 different middle schools and/or what is happening with boundaries that goes along with this?? Also, Ashford Park is one of the top performing elementary schools in county so I would want to ensure all these shakeups dont drive away key teachers and staff and programs/offerings that are part of that successful learning and they move with the students, but obviously not a guarantee if a teacher decides not to. We obviously bought our house to be part of the Chamblee cluster as it was a tight nit community and the schools performed well as every homeowner looks at when evaluating where to buy. If we were to change clusters, I do believe it would have a negative impact on our home's value and closing Ashford Park down I think would also impact that negatively. Lastly, with any new facility and boundary scenario, I would want to be sure the resources, programs, teaching staff, etc accommodates the changing student body's needs ---will programs be revamped at remaining facilities from what they are today? For instance, I have two gifted track children---right now CHS has WAY more AP classes than Cross Keys and while there is a gifted program at each HS, it is just not the same accelerated offerings that meet my children's needs. The communities staying together is important to me too as they are so integrated right now through things as simple as afterschool programs, YMCA sports programs, etc with kids from surrounding schools in their current cluster like Montgomery and Huntley Hills. In fact, for our oldest since transitioning to CMS, 95% of her new friends she has made have come from Montgomery as that is part of the beauty of merging with multiple elementaries in middle and meeting new people--I fear she loses all her relationships at a pivotal, tumultuous, puberty years by forcing us out of Chamblee cluster (if that is next for boundaries scenario that goes with facilities). And yes while friendships and relationships arent the be all, end all in education, it is another thing that is linked to student and parent satisfaction with where they attend. Overall, I need the full picture including boundaries to give my full POV on this initial facilities scenario.	
2746	The schools in zip codes 30033 and 30345 are essential to our thriving community in which we engage and have a sense of belonging.	3/3/2026 4:39 PM
2747	I don't think top performing schools in population dense areas should be closed. Through the Comprehensive Master Plan (2021), Ashford Park Elementary was planned to be rebuilt. Why did that change? Given the performance of the school (top performer), capacity challenges in the area of the county (constrained), availability of real estate to build new schools in the area (limited and/or expensive), we should be rebuilding Ashford Park	3/3/2026 3:56 PM
2748	Overall, I was glad to see that closures were not clustered in just one part of the district (SW DeKalb for instance). I think the diagram that is circulating is difficult for the average user to understand. I needed the School Specific Rationale document to be able to understand why each site was recommended for closure etc. I think the district made an attempt to be forward thinking when it came to communications but missed the ball. It's also alarming to me to present facility-based scenarios not STUDENT-BASED. Yes, closures matter. But where each child will end up (and the promise of that being in a higher-quality setting) was addressed enough. It makes the district come across as caring about operational efficiency first, and students later (or even last).	3/3/2026 3:47 PM
2749	Oak Grove has been a pillar of the community for many years and having been a student there, it would be a huge disadvantage to the children growing up there to have to go elsewhere.	3/3/2026 3:46 PM
2750	I’m in favor of consolidation and reducing costs acrosss the board. Allowing very student to receive equal access to education.	3/3/2026 3:31 PM
2751	I think smaller neighborhood schools are better for learning. I don't like having the older kids lumped in with the younger ones is a smart thing to do. A 6th grader does not need to be in a school with High School aged kids, and an elementary aged kid doesn't need to be exposed to the hormonal changes that a middle school child is going through. Middle schoolers definitely need to stay separate from the little ones and the influence of HS kids. Keep all 3 facilities separate.	3/3/2026 3:19 PM
2752	We live in the current Midvale ES zone and have one child in kindergarten and one child who will be in prek at Midvale in August. Midvale ES is an essential part of our community. Having a small, dedicated community has led to our school having a deep and intimate understanding of our young children’s needs. Truly every voice at Midvale is heard, and I fear that once we are consolidated with Livsey, our community will lose a vital support. Many of our families walk	3/3/2026 2:53 PM

	their children to school. All of us who currently walk our children to school will lose that option if our children are moved to Livsey. Being able to walk to our local elementary school was an enormous incentive when we purchased our home in 2020 (we live 0.2 miles from Midvale) and our property will lose that unique value if Midvale is closed.	
2753	Evansdale Elementary is vital to our community. Its closure would negatively impact many students who live and go to school in close proximity.	3/3/2026 2:40 PM
2754	As a parent whose three kids attended Evansdale, Henderson Middle and Lakeside High School, I feel that it is very important to keep these schools open. Kids to better, learn better, and succeed in the future when they are able to make friends in their neighborhood schools. Also smaller classes make learning - and teaching better - for both kids and teachers.	3/3/2026 2:36 PM
2755	We LOVE Ashford Park and moved here in 2025 specifically for the school.	3/3/2026 2:33 PM
2756	I think closing would a high-performing elementary school in Ashford Elementary and forcing children in the neighborhood to move to an elementary school in a different high school cluster than the current Chamblee (i.e. John Lewis > Cross Keys) would likely destabilize the neighborhood and negatively impact the view of	3/3/2026 2:30 PM
2757	If we have to close the Ashford Park facility as a neighborhood school, it would be wonderful to keep our incredible community together and shift the Ashford Park Elementary attendance zone to the current John Lewis Elementary facility, and preserve our Chamblee cluster alignment.	3/3/2026 2:27 PM
2758	I am strongly against the closure and consolidation of Brockett Elementary. I work for the district office of Gwinnett County Public Schools and consciously chose Dekalb because of the neighborhood school model. I am concerned about the preparedness of our Dekalb County administrators who are used to small, neighborhood schools. Leading a school of thousands of children requires a specific leadership and communication skill sets and also requires much higher standards for safety and security. This will put our students' progress AND safety at risk. My 1st grader has been at Brockett since pre-kindergarten and every single staff member has known his name since his very first semester as a four year old. He is confident and knows he is seen and loved which has fostered a positive learning environment and love for, not only learning, but for our community. He can walk to school and to his classmates houses. This is the experience I signed up for when buying property in Dekalb County. To take that away from our neighborhood would be devastating. Please listen to your community members and keep Brockett Elementary school a part of our community, as it has been for the last 65 years. Our children and community deserve it.	3/3/2026 2:26 PM
2759	This needs to be done for what is best for the overall taxpayer. We don't need half empty schools, but also don't need buildings sitting vacant.	3/3/2026 2:23 PM
2760	I understand the situation. I just ask that you REALLY think about this. Could it be a phased approach? Over several years?	3/3/2026 2:11 PM
2761	In talking about buildings, I understood that the criteria for school closures prioritize underutilized buildings, the ability for a school to be absorbed through cascading use and the fact that facilities with excess capacity are nearby. However, Ashford Park doesn't meet any of these requirements. The only district-owned facility within three miles that could hold our almost 900 student population would be the nearby John Lewis. But it's currently part of the Cross Keys cluster. My priorities for my children are to keep them with the Ashford Park community and be a part of the Chamblee cluster. I would need more clarity on how the district plans to address these two priorities. The only solution I can fathom is either A) expanding the current Ashford Park facility to meet our capacity needs or B) moving the entire Ashford Park community to John Lewis and keeping it in the Chamblee cluster.	3/3/2026 1:55 PM
2762	We are a very large district. Looking at the entire district in one way and applying information that is true for one region, but not true for our region is useless. In our region (North) enrollment is growing. We also have limited locations to house large schools, which means we either have to build on the space we have, even if the lot is not the ideal size, spend money on purchasing a larger plot that might be impossible to find, or have more but smaller schools to cover the area. But removing a school (Ashford Park Elementary) with a large number of students with no plans to replace it leaves us with a problem that is not going to disappear. If the plan is to expand other schools that are 4 miles away from the next closest school (John Lewis) we will be going against the district's strategic plan to Deliver safe and efficient transportation services to all students.	3/3/2026 1:53 PM

2763	I feel like the north has different challenges from the south. North Dekalb schools are packed to the brim; consolidating/closing schools doesnt' solve our overwcrowding	3/3/2026 1:25 PM
2764	Sagamore should be an expansion school, although it seems like too many schools are being shut down. Not sure thats the right amount	3/3/2026 1:22 PM
2765	It sounds horrific. People do not want mega schools and enrollment will decrease.	3/3/2026 1:19 PM
2766	Evansdale Elementary school should not be closed. The current proposal is unclear but it is my understanding they aim to close this building and send the children to other schools in various feeder programs. This is nonsensical given that Evansdale's lot size is larger than the other neighboring elementaries who are currently planed for expansion. Evansdale also contains two parking lots and street parking that is not available at other neighboring schools. 2) The Evansdale French program draws people to our community. It is non/transferrable. If the students are divided into other schools they will not be able to transfer into the appropriate middle school (Henderson middle). 3) traffic capabilities are better (as opposed to Livsey/Hawthorne) 4) lack of clarity of the data used and decision making to make these decisions, not to mention that this plan was hatched by Horton, who has been charged with fraud; general distrust of the board and the process 5) high probability that enrollment will drop if we lose our local elementary school as some people will go to private school/alternative options rather than send their child to a "mega school" that is further away	3/3/2026 1:19 PM
2767	I'm specifically concerned about the potential closing of Evansdale elementary. This school serves as a connector and hub for the surrounding community. Many of us moved to the area specifically because of the community in and around the school. Moreover, the school has pretty consistent numbers due to the French program. Evansdale also sits of property that can handle expansion and increased traffic especially when compared to the next closest elementary school - Livsey. Further their is a lack of clarity about what data are being used to make decisions. Lastly, as sad as this reality is, there is a high probability that enrollment will drop if we lose our local elementary school as some people will go to private school/alternative options rather than send their child to a "mega school" that is further away.	3/3/2026 1:08 PM
2768	1) Evansdale has a large lot size for expansion, including two parking lots and street parking 2) What about the DLI program? This program draws people to our community. It is non/transferrable and it continues into HMS which is established and working, seems short sided and resource intensive to move an established track. 3) I don't buy the traffic control consideration, Evansdale has good traffic flow in an area without high traffic volume for example Chamblee Tucker! 4) Livsey has mobile classrooms already so adding more kids make NO sense….and where would additions be place on a small area! 5) There is an enormous lack of clarity of the data used and decision making to make these decisions, not to mention that this plan was hatched by Horton, who has been charged with fraud! This has caused general distrust of the board and the process! Let's work on trust and educational improvements not this unnecessary use of funds and focus on leadership, recruiting good educators and listening to the educators for the sake of the children! 5) There is a very high probability that enrollment will drop even further if we lose our local elementary school as some people will go to private school/alternative options rather than send their child to a "mega school" that is further away or to a feeder middle and high school NOT at the same caliber as other high schools! Now is NOT the time to be closing schools!	3/3/2026 1:01 PM
2769	I'm okay with schools closing to redirect resources accordingly. If you really want to see where the student population is - do away with school choice and the credit for private schools.	3/3/2026 12:44 PM
2770	SHOCKING. Efficiencies language is dangerously similar to private equity language. Efficient for whom and at what cost to quality. Outcomes will not yield increase in quality of education or care at individual levels.	3/3/2026 12:32 PM
2771	I think you need to look at each school cluster better. Midvale Elementary does NOT need to be combined with Livsey Elementary. Livsey is already bursting at the seams and has multiple trailers out. My daughter's first grade class has 24 kids in it. Why on earth would you combine these two schools? Just because they're "not quite" full? I get it for the south dekalb high schools that are half empty-- but a lot of these facts seem to be speculative. "It is projected that..." etc.	3/3/2026 12:26 PM
2772	Please do not close Evansdale. The property itself has room for expansion, including a second parking lot that could be used to extend the current building. Further, the DLI French program is the only one in the district and draws families to the community. These DLI students continue at Henderson Middle and Lakeside, which will create problems if Evansdale is removed from	3/3/2026 12:26 PM

	the Lakeside Cluster. Additionally, Evansdale is located in a neighborhood and has better traffic capabilities compared to schools such as Livsey and Henderson Mill. There is a high probability that enrollment will continue to drop if we lose our neighborhood school as people will seek other schooling options.	
2773	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/3/2026 12:25 PM
2774	Oak Grove is one of the best schools in the county	3/3/2026 12:15 PM
2775	I am strongly against the closure of Evansdale Elementary for a number of reasons. Evansdale's larger lot size is suitable for expansion, including two parking lots and street parking. This is not the case for nearby schools, like Livsey, which is already operating with the support of trailers. The traffic capabilities are also better at Evansdale than proposed expansion schools. Evansdale's French DLI program draws people to our community. It is unclear if this program is transferrable and it continues into Henderson Middle School therefore it makes sense for it to remain in the same cluster so students who have been part of this program since Pre-K can continue on the same track. This is a major lack of clarity of the data and processes being used to make these decisions, not to mention that this plan was originally created by former Superintendent Horton, who has been charged with fraud which leads to more distrust of the board and the process. There is a high probability that enrollment will drop if we lose our local elementary school as some people will go to private school/alternative options rather than send their child to a "mega school" that is further away.	3/3/2026 12:14 PM
2776	It would be a shame to close Evansdale. We have a strong community. My elementary aged kids would likely transition away from Dekalb public schools if Evansdale closed.	3/3/2026 12:12 PM
2777	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant	3/3/2026 12:09 PM

	boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
2778	Closing Evansdale elementary school is a terrible idea	3/3/2026 12:05 PM
2779	We absolutely cannot close down Evansdale, it is too valuable to our community. Also people bought houses in our district to specifically be in the lakeside high school district. It is completely unfair to have our children not attend lakeside and would be extremely detrimental to our property values and the learning of our kids.	3/3/2026 12:03 PM
2780	It's terrible. Evansdale Elementary is a cornerstone of its community and must remain open as is.	3/3/2026 11:58 AM
2781	It's terrible for child and community development. Large high schools (and even middle schools) are okay but elementary is not where it is appropriate to do that. It undermines community support that is crucial for early childhood development and their teachers.	3/3/2026 11:43 AM
2782	I understand the buildings are old but I would like for the school board to consider the community at large and how it will be impacted with losing schools to the community. I did not like the level of communication and the quick timeline for feedback. This committee has been meeting for years and the feedback opportunity is REALLY lacking. Was traffic and travel for young kids taken into consideration and traffic patterns for our community as a whole.	3/3/2026 11:35 AM
2783	Have Robert Shaw stay opened by adding Prek-3 year olds and extending the grade levels to 8th grade.	3/3/2026 11:34 AM
2784	Keep Evansdale open	3/3/2026 11:33 AM
2785	Keep Evansdale open	3/3/2026 11:32 AM
2786	Terrible!!! Keep Oak Grove elementary. Stop the wasteful spending!!	3/3/2026 11:17 AM
2787	I am disturbed by the methodology and logical fallacies upon which I believe these scenario is based. Looking solely at facilities ignores the *programming* offered by these schools. Midvale, for instance, is one of only four IB elementary schools in the district, another of which is on the closure list. Language programs are at risk, too. Why is the narrative about "empty desks" instead of "lower classroom size," which was what the district was striving toward for years? I also question the use of projections — do they take into account the upcoming "Covid bump?" Do they take into account the recent addition of new housing developments? For Midvale alone, a 63-home development just completed down the street, with dozens of new children having moved in. I disfavor the current consolidation plan, particularly for elementary schools. I want the smaller schools with advanced programming for qualifying students.	3/3/2026 11:15 AM
2788	I understand that we have extra capacity, But this means smaller classroom sizes, which benefits students. I would prefer to go the other way and requisition additional resources than close our schools. Districts that have invested in students and in schools are growing not	3/3/2026 11:10 AM

	shrinking. My wife and I just bought a house in walking distance from Midvale so that our kids could be part of a neighborhood school and community.	
2789	There are too many scenarios given without identifying plans for specific schools. Ashford Park has 850 students currently and is projected to have over 900 next year. Where will all of those students go?	3/3/2026 11:08 AM
2790	The Ashford Park Elementary building has been neglected for many years and it's a shame the county solution to something that should had been addressed years ago is to close our school. FINE, if you want to close our school, DON'T SPLIT OUR COMMUNITY. We would be ok with moving to the John Lewis building, as long as we stay in the Chamblee Middle and High cluster. We will not accept it if as a result, we move to a lower performing cluster (Sequoya Middle, Cross Keys High).	3/3/2026 11:05 AM
2791	I am concerned that closure and repurposing proposals were presented without clear information about where students would be reassigned. That uncertainty makes it difficult for families to understand the full impact of these decisions. While facility capacity and building condition are important factors, they should not be the sole drivers of consolidation decisions. School communities, culture, staff collaboration, and student outcomes are built over time and cannot simply be relocated or merged without consequence. Academic performance and program quality should be central considerations in any evaluation process. It is also challenging to provide meaningful feedback on building closures alone without understanding the broader community, programming, and feeder pattern implications. These decisions affect elementary, middle, and high school alignment and should be considered as part of a comprehensive plan. Finally, it would be helpful to see clearer financial analysis, including alternative scenarios that may rely more on reassignment and full use of existing facilities rather than new construction. Greater transparency around the options considered would help the community better understand and engage with the proposed direction.	3/3/2026 11:03 AM
2792	The whole SAP project and process should stop immediately and all scenarios discarded. The district must focus on structural and personnel improvement and deal with facilities management once the former has been addressed and improved. Fixing the symptoms of a systemic district failure instead of the structural failures will keep us in this constant doom cycle. The whole SAP project is tainted from the beginning. Devised by a disgraced and corrupt superintendent and his associates, the whole project has no support and buy in from your customers, the community and the students you SERVE. This is why it must stop immediately. The major problem lies from the school board all the way down to the principals. No need to repeat how the board failed or the former super did, but the principal of my current school is a prime example of incompetence (Smoke Rise ES). For example, the drop off procedure was a complete failure the first week of school, even though they had all summer to prepare. We regularly receive last minute, as in day of or day before, communication about no after care and events that we may need to prepare for. The principal's failures this year have been regular and unacceptable. The current superintendent's letter in Decaturish was utterly out of touch and myopic. He focused on data, which is one of many factors affecting public schools, which is an emotional one as well. His argument about dollars and numbers show how he has been in academia for far too long and doesn't bother stepping outside of his bubble to truly understand how a district is intertwined with the community it SERVES. I'm writing in opposition to the current facilities scenario, and the whole corrupt and flawed SAP project in general. It also makes no sense whatsoever. Midvale ES, which is on the list, has over 90% utilization rate and over 80% facility condition. It underwent a major HVAC renovation. Why is it on the list? Many young families are moving into the neighborhood it serves, and your project wants to add more trailers to Livsey, which already has many unsightly trailers already. Sense is not common nor present in this project. As the editor of Decaturish wrote, and many of us echo and think exactly alike, the school board and district leadership need a complete renewal, to strive to regain the trust and confidence of the community it SERVES, and leave the facilities management after the community has been pulled in as part of the process. I will be contacting the state legislature along with other neighbors to stop this project from continuing the doom cycle the district is so intent on preserving. State management is better than the known incompetence you are demonstrating.	3/3/2026 10:54 AM
2793	Oak Grove does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills	3/3/2026 10:52 AM

	and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
2794	I think it seems fine.	3/3/2026 10:52 AM
2795	Initially I was upset for the communities that would be broken apart. These schools are the heart of the neighborhood and to think many would be closed, left to decline, be eyesores in the areas they're left unused. But why? Have thoughtful option been critically considered? Look into why families are not sending students to these amazing schools. Could the vacant spaces be used as admin office, DeKalb school offices?	3/3/2026 10:51 AM
2796	I do not want these consolidations to impact my child's school. Sagamore is proposed to becoming a mega school which I would not like living near nor would I think my child would flourish in a large environment	3/3/2026 10:50 AM
2797	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. 2799	My honest opinion I do not like at all	3/3/2026 10:43 AM
2800	I am strongly against the closure of Midvale ES. This community school is well run and beloved by the local area. Sending all Tucker ES age students to Livesy will result in overcrowding and will therefore increase the number of middle income families seeking alternative options. We need to keep class sizes as small as possible!	3/3/2026 10:42 AM
2801	I believe schools in the north should be effected equally!	3/3/2026 10:18 AM
2802	Midvale should be kept open along with most of the elementary schools that are listed for closing. Making mega elementary schools does not benefit anyone- students, teachers, staff or community. We love our neighborhood school. It is a school of choice which means students from other places in the county want to attend school there. Why close?!? Also the county just spent tons of money updating the building for ADA compliance.	3/3/2026 10:05 AM
2803	I think that moving elementary schools away from small communities is a major mistake. The difference in the administrations ability to meet needs of students is actually less in bigger schools, eg the middle school vs elementary experience. A small school ensures that everyone is known and I would wager that the evidence supports this theory. Furthermore, this will cause even more families to flee Dekalb schools, limiting federal resources for enrolled students. This approach of only looking towards facilities is a mistake.	3/3/2026 10:05 AM
2804	Oak Grove should not close. The school is projected to have more than 89% usage. Even more importantly, no neighboring schools have the capacity to absorb all students from Oak Grove without massive overcrowding.	3/3/2026 9:55 AM
2805	WE NEED SMALL NEIGHBORHOOD ELEMENTARY SCHOOLS. We moved to this area so our kids could walk to school and go to school with their neighbors. We have heard a lot about	3/3/2026 9:55 AM

	cost savings and efficiency, but ZERO about the impact on our kids' education and the very fabric of our communities. PLEASE CENTER CHILDREN AND COMMUNITY.	
2806	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/3/2026 9:39 AM
2807	We strongly oppose the proposed consolidation involving Ashford Park Elementary. Ashford Park is a high-performing, deeply rooted community school that serves as the heart of our neighborhood. Consolidation would disrupt academic continuity, negatively impact student well-being, and undermine the strong sense of community that families have intentionally invested in. Our school is not just a building — it is a stable, thriving environment where students, teachers, and families are deeply connected. Disrupting that ecosystem risks declining morale, enrollment shifts, and long-term instability that may outweigh any projected short-term operational efficiencies. Additionally, many families chose to live in Brookhaven specifically because of Ashford Park. Consolidation could erode trust between the district and the community and create unnecessary uncertainty for students during critical developmental years. We urge the district to explore alternative cost-saving or capacity solutions that preserve Ashford Park's autonomy and protect the educational experience our children currently receive.	3/3/2026 9:37 AM
2808	Evansdale has an ama French immersion program that is not provided anywhere else in the district that goes through Henderson middle School. Also Evansdale has a huge lot including a field, 2 parking lots and a wooded area to expand.	3/3/2026 9:28 AM
2809	I think we shouldn't be relying on a plan put together by someone who is now under a fraud investigation. Frankly this needs to be thrown out and started over based on this fact alone.	3/3/2026 9:23 AM
2810	Many neighbors move their families here to attend Evansdale, including my family. There isn't another school that is walking distance in our neighborhood	3/3/2026 9:17 AM
2811	I do not agree with the proposed consolidation due to Midvale being the only IB certified elementary school in the area. It would not help the community if this school were to close and be consolidated into Livsey, furthermore adding on to commutes and traffic, and not having the "family-oriented" community school feel that we as parents have known to grow and love.	3/3/2026 9:17 AM
2812	It depends on where the consolidations will occur. What is the projection on S. DeKalb versus N. DeKalb closings?	3/3/2026 9:08 AM

2813	The consolidations as proposed do not take into account that the Oak Grove Elementary is already at full utilization as defined by the committee. During Covid many parents chose to send their students to private schools because Dekalb failed to provide in classroom experience for too long. These families have now returned to the schools and the population is growing in this area. Consolidations would negatively impact learning and would cause overcrowding and unnecessary disruption. The old adage of "if it ain't broken, don't fix it" applies here. Oak Grove is one of the highest performing schools in the county. The parents are engaged and supportive. The beauty of the smaller school is that the students receive the highest quality learning. Dekalb schools were designed in the neighborhood model for a reason. These smaller schools enhanced the learning experience for the students, brought the parents together in a shared mission of success, and retained dedicated, loyal faculty. I am guessing that there are developers who are chomping at the bit to have the land where the proposed school closures would take place. At some point, the needs of the students should take priority over the all mighty dollar. These developers have no regard whatever for the long range well being of our county infrastructure. High density building in neighborhoods just brings more traffic and stress on the already overburdened infrastructure. It will also lower the property values of the existing homes and cause flight from Dekalb and its schools. Instead, let's cut some of the county offices and sell that land. There are too many people not serving children in this county. The overhead in the county offices is staggering. Start with streamlining our administration. Make students the priority. Make learning the priority. Make smaller class sizes the priority.	3/3/2026 8:59 AM
2814	IB Feeder Pattern: Midvale serves as the only IB Elementary feeder school in Tucker. Closing it would disrupt a pathway that families intentionally choose and value. This is not equitable. Closing Midvale would slash the district's K-5 program offerings by 30%. Because IB authorization is granted through specific schools, you cannot relocate this program to a new school without recertification which will take time. Capacity Concerns: Livsey reportedly has capacity for approximately 300 students, while Midvale currently serves around 430 — and that does not account for students from Brockett Elementary School, which is also on the proposed closure list. Livsey already utilizes trailers for overflow. Where will the additional students go? Livsey does not appear to have room to expand. Facilities & Expansion Potential: Midvale has a large field behind the building that provides ample room for expansion if needed. In contrast, Livsey already relies heavily on trailers situated near a busy road, raising both safety and infrastructure concerns. Academic Performance: Midvale has the highest CCRPI score in the Tucker cluster. Why would we disrupt a school that is demonstrating strong growth and achievement? Midvale also has a school choice waitlist. More families want to come to Midvale because of IB access and the community feel. Walkability & Community Access: Midvale is highly walkable for many Tucker families. Relocating students to Livsey Elementary School would eliminate that accessibility for many households. Additionally, increasing car and bus traffic on already busy roads, eliminating safe walking routes, increasing daily transportation costs for the district, and creating longer commute times for young children. Impact on Public Education & Equity: Consolidating schools for financial reasons while the district supports charter schools and private school vouchers undermines public education. It drains resources, increases inequity, and creates a mixed message for families — encouraging them to leave public schools while consolidating remaining students into larger buildings sends a contradictory message and weakens trust in the district’s commitment to providing a high-quality, equitable education for all students. Community Involvement: The PTO at Midvale has paid for many enhancements to the facility over the years, including a new playground, and upgrades to the media center and auditorium. The district has also just paid for new upgraded bathrooms, elevators, and increased security at the entrance. Will these investments just be thrown away? Georgia Pre-Kindergarten spots: What will happen to the Georgia Pre-Kindergarten spots at each of these elementary schools, and how will you account for the lost opportunity for this education to the children in our community? Midvale may have a reputation for being quiet and compliant, but our community cares deeply about this school and its future. Our parents are involved and are supportive. We are paying attention, and we expect a transparent process that genuinely considers community voice, long-term educational outcomes, and the well-being of our children.	3/3/2026 8:47 AM
2815	Please do what you need to do in order to bring the district to a better financial and academic place. You will never make everyone happy, but I appreciate that you are seeking feedback.	3/3/2026 8:23 AM
2816	Moving away from small community schools is not the answer. Eliminating the IB program is a mistake that eliminates an essential program choice for families.	3/3/2026 8:23 AM
2817	Don't close schools that are over capacity if they are performing and figure out how to expand	3/3/2026 8:13 AM

	them. If you close a school built by a thiving community you will break something that is working and tear people apart.	
2818	I understand the need to evaluate consolidations based on enrollment and facility usage. However, I would like the district to carefully consider the impact on students and families, including transportation time, class size, and maintaining strong school communities. Stability is very important for elementary students, and minimizing disruptions should be a priority.	3/3/2026 8:12 AM
2819	Midvale is a highly utilized, efficient, top-performing school in a growing corridor. Closing it would remove functional capacity, trigger expansion at receiving schools, and disrupt the educational continuity of hundreds of students — without correcting any academic deficiency or genuine underutilization. The plan driving this closure was originated by a superintendent now facing 17 federal felony counts. The director overseeing it came from the same district where his alleged scheme operated. The consultant was engaged under his administration. The board has already ordered a forensic audit of his contracts — but has not confirmed that audit covers the SAP process itself. The data does not support this closure. The process that produced it has not been verified as clean. The community — across multiple schools and neighborhoods — is unified in opposition. There is no version of responsible governance in which this board votes yes before answering these questions.	3/3/2026 8:11 AM
2820	Closing Oak Grove and expanding the other schools in the area (Sagamore and Briarlake) will cause worsening traffic as those areas already get very backed up in the morning. This will mean either the students have to be dropped off extra-early to accommodate the long line, or new roads will be needed to bypass those areas for the traffic going to the interstate. Given the significant expense associated with the latter, and the decreased sleep's affect on children in the former scenario, the proposed expansions would be difficult to manage and ultimately more expensive than keeping Oak Grove open.	3/3/2026 8:11 AM
2821	I have concerns on the planned school closures for Oakgrove Elementary. After the proposed elementary closures, the county hopes to raise utilization from about 75% to 88%. Oak Grove is already at 89% today (447 students in a 504-capacity building) and is projected to reach ~96% next year (487 students shared at the Feb 9 PTA meeting). So I am not clear as to why Oakgrove is even listed in this group for closures. Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: Sagamore Hills: 413 / 456 (91% utilization) Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: +50 students → ~83% utilization +100 students → ~90% utilization Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: $1.5B Arthur M. Blank Hospital campus ~4,500 employees (including ~1,000 new jobs) $87.7M Emory Heart & Vascular expansion Ongoing Emory hospital expansion $1.1B in FY24 research awards $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/3/2026 8:06 AM
2822	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and	3/3/2026 8:04 AM

	upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
2823	Keep Austin ES, Peachtree MS, Dunwoody HS as is for grade bands	3/3/2026 7:43 AM
2824	I am not of fan of 900 kid elementary schools.	3/3/2026 7:27 AM
2825	Oak Grove has grown consistently over the past 4 years, and is projected to continue to increase. Check your data.	3/3/2026 7:00 AM
2826	While I understand the broader enrollment challenges at the elementary level, my primary concern is the long-term impact of proposed closures and consolidations at the high school level. The current scenarios do not clearly outline how these changes will expand or enhance academic opportunities for students, particularly in South DeKalb. Without a parallel plan to increase access to advanced programming, closures risk deepening existing disparities between the north and south ends of the county.	3/3/2026 12:17 AM
2827	I and many in my community are very deeply concerned about the possible closure of Oak Grove Elementary School. My two children are students there in Kindergarten and 3rd grade. My third grader has been there since Pre-K. It is an incredibly high performing school and to many the heart of the community. It would be a terrible shame to see this school closed or rolled into another school. The parental engagement and support through the PTA and Foundation are phenomenal. PLEASE DO NOT CLOSE THIS AMAZING SCHOOL!	3/2/2026 11:14 PM
2828	Do not close Oak Grove Elementary. The data HPM used in their analysis and recommendations was flawed at best.	3/2/2026 11:01 PM
2829	I am very pleased that the County shared a list of facilities to be considered for closure. This process is taking way too long.	3/2/2026 10:47 PM
2830	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to	3/2/2026 10:20 PM

	increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
2831	I don't agree with Ashford Park being divided up into various schools across the district and having students commute over 2-3 miles away. What makes APES so strong is the neighborhood and community that surrounds it. Our classrooms are at 29:1 ratio and only growing!	3/2/2026 9:43 PM
2832	Closing all of these small community schools would be detrimental to so many of these neighborhoods. I am specifically worried about Midvale, of which I am a current parent and a last alumna. Midvale is currently the only elementary International Baccalaureate (IB) school in the City of Tucker. Closing this school is not just a logistical change; it is a significant blow to our city's competitive edge for the following reasons: 1. Loss of a Unique City Asset The IB Primary Years Programme (PYP) is a globally recognized "gold standard" in education. Because IB authorization is tied to the specific school site, closing Midvale means Tucker loses its only elementary IB option. This puts our city at a disadvantage compared to neighboring areas that offer these specialized programs. 2. Impact on Property Values and Growth Families move to Tucker specifically for the Midvale IB program. Decoupling this high-demand educational pathway from our city will inevitably make Tucker less attractive to prospective homebuyers, potentially stagnating local property values and slowing the community growth we have worked so hard to achieve. 3. Economic and Community Vibrancy Midvale is a thriving school with a school choice waitlist. In a time when many are opting out of public education, Midvale is a success story—a place families are "running to." Losing such a cornerstone institution undermines the stability of our local neighborhoods and the overall "live-work-play" appeal of Tucker.	3/2/2026 8:30 PM
2833	The two elementary school merging is not a bad idea. Although, I'm wondering how it will look. Will the schools receive a new name or continue one of previous name. Also, I could not find information on who Robert Shaw would merge with if the scenario would happen. Will a specialty school merge with a regular elementary? Will the theme school program still exist?	3/2/2026 8:25 PM
2834	I agree that we have several elementaries within the Dunwoody cluster that serve fewer students within aging buildings. We have other schools that are under capacity. It makes sense to close certain schools and move students to capacity elsewhere. I agree with moving Hightower to another cluster to ease capacity at Peachtree Middle and Dunwoody High.	3/2/2026 8:21 PM
2835	No consolidations. Schools need to be smaller not larger, especially in elementary school.	3/2/2026 8:19 PM
2836	I think closing our school will not be good for the community and for the high-achieving students who attend it. The only downside to Vanderlyn is that the building is old, but it is very well-maintained. The parents and staff form a relationship that benefits the whole child. We do not look at what we can gain outside of it, but build lasting relationships. I used to attend Vanderlyn when I was a child, and a teacher there, whom I ended up working with as an adult at Vanderlyn, was the reason I wanted to become a teacher. Teachers like her are rare, and we have a good number at our school who push students to succeed, but that also comes with supportive parents and a strong community. So, only wanting to close Vanderlyn down	3/2/2026 8:11 PM

	because of the building's age seems a bit unfair. I feel like Vanderlyn is on this list because the high school is planning to build a stadium for home games and needs parking.	
2837	I agree that closing certain Dunwoody schools makes sense to consolidate enrollment in larger, newer facilities. Kingsley and Vanderlyn are close enough to other Dunwoody Elementary schools that families will still have "neighborhood" schools.	3/2/2026 8:06 PM
2838	I am open to consolidations of facilities generally, but provided that current school communities are kept together.	3/2/2026 8:04 PM
2839	Open to consolidations especially if it keeps the current school community together	3/2/2026 8:04 PM
2840	I am concerned. To get good feedback you need to let people know especially in areas with closing schools where kids will be routed. This is because people, are rightfully, concerned about home values if they get routed to a CRAPPY school or a school with a terrible reputation! Consider focusing on getting the districts reputation fixed before closing schools (this could include hiring great leaders, listening to educators, and hiring qualified people).	3/2/2026 7:58 PM
2841	Oak Grove Elementary School should not be included in this list. It is a thriving community with exceptional staff / teachers that make this sought after - Closing OGE will overcrowd other elementary schools that are already overburdened. Closing OGE will result in a lower property value for home owners and property tax revenue for dekalb county as many move to the neighborhood only for the schools. Instead, OGE should be renovated like Fernbank ES.	3/2/2026 7:45 PM
2842	There should be accountability for school consolidation as needed. There are schools that desperately need to be rebuilt. Selling off properties that are not showing student numbers to pay for them should be rethought. Every American has to make wise choices with their paychecks, and they should teach their children. Why would we allow mishandling of tax payer funds with education?	3/2/2026 7:42 PM
2843	I think that it is short sided. Closing Midvale would hurt this neighborhood greatly.	3/2/2026 7:34 PM
2844	Midvale is the heart of our community. When I think about what I want a school to look like for my kids, I think of Midvale. Our smaller elementary school is vital to ensure that quality education is provided to my kids in a nurturing environment. Please keep the smaller schools and do not close Midvale.	3/2/2026 7:33 PM
2845	I would like some of the closed school to be resource center. I also would some of school to use for Autism students from kindergarten through high school as well as moderate intellectual delay kindergarten through high school.	3/2/2026 7:22 PM
2846	Brockett has a long history in our community. Closure will impact community confidence and property value. Children currently walk to school and I love seeing them and meeting neighbors. I feel a sense of pride continuing this school in my neighborhood of forty years.	3/2/2026 7:15 PM
2847	Consolidating Vanderlyn, a consistently well rated and high scoring school, into another elementary school will dismantle the eco-system of proven academic success that has taken years to create. It has taken years of established school culture to create such an amazing learning environment and the SAP scenarios being proposed would disrupt that ecosystem as well as the stability of the education of the children at Vanderlyn .	3/2/2026 7:14 PM
2848	Do not close AP there are enough families to use the facility. It is a true neighborhood school. Make AP the lower or upper school and use John Lewis for the other then move into Chamblee cluster	3/2/2026 7:11 PM
2849	It is very hard to give feedback when we don’t know what a particular school closing means. If Ashford Park is closed, we would expect to stay in the chamblee high school cluster with the same community of students we currently go to school with.	3/2/2026 7:09 PM
2850	Ashford Park should not be rezoned. Build a 2-3 story new school building where the playground, trailers and gym are. Once it’s built, tear down the old school and make it the playground. You can do this while kids are still attending so it will not disrupt the community. This area pours everything we have into Ashford Park school. It is highly coveted and to close it down would be a disservice to the community. People move to this area specifically for Ashford Park, Chamblee Middle, and Chamblee High. You will see a big shift in kids going to private school if Ashford Park is rezoned to Cross Keys High and/or closed.	3/2/2026 6:55 PM
2851	Bad idea for schools that are performing well.	3/2/2026 6:43 PM

2852	I agree with the scenarios of closing/consolidating facilities. Ashford Park is an old building that needs to be closed, remodeled, and repurposed. The building can not continue to sustain the community without some change. I am on board with making it a K-3 school or splitting the students to the surrounding schools to stay in the cluster.	3/2/2026 6:16 PM
2853	While some level of consolidation may be necessary within DeKalb County School District to address enrollment or budget challenges, Midvale Elementary School should not be among the schools considered for closure. Midvale's International Baccalaureate program and STEM certification make it a unique academic asset, providing rigorous, globally focused, and innovation-driven learning opportunities that cannot be easily replicated elsewhere in the district. Eliminating a school with proven specialized programming would disrupt student achievement, reduce equitable access to high-quality options, and undermine years of instructional investment and community engagement. If consolidation must occur, it should prioritize preserving high-performing, specialized schools like Midvale that strengthen the district's overall educational offerings.	3/2/2026 6:15 PM
2854	Initial scenario: this was a waste of money to hire a 3rd party company to assess facilities usage with no regard for the nuance of programming, town/neighborhood traffic and community aspects of individual clusters in Dekalb. Midvale Elementary specifically (and Livsey as well) does NOT want to be shifted to the other side of our town, nor do we want to be combined into a "super" school wit 600+ seats. We are a trhriving neighborhood school and a large reason many parents choose to stay. And because of this, many families will "endure and sacrifice" by keeping our students at Tucker Middle and Tucker High, because of the tight knit small community we're afforded at our smaller neighborhood elementary schools. Fix the incompetencies at Dekalb 6th grade and up schools and people would stop leaving DCSD in droves....don't mess with the one good thing you have in neighborhood elemntary schools. And stop wasting money on uneducated third party assessments, superintendents we don't even hire salaries and criminal superintendents and maybe we'd have a little more wiggle room in the budget. MIDVALE PARENTS DO NOT WANT A LARGER SCHOOL. WE ARE HERE BECAUSE OUR CHILDREN ARE SEEN AND KNOWN INDIVIDUALS GIVEN A CHANCE TO GROW IN CONFIDENCE BEFORE THEY'RE THROWN TO THE WOLVES IN THE MIDDLE AND HIGH SCHOOLS THAT ARE TOO BIG AS WELL. GIVE THEM THE CHANCE TO LEARN AT A DEVELOPMENTALLY APPROPRIATE PACE AND SPACE IN THE SMALLER ELEMENTARY SETTING.	3/2/2026 6:13 PM
2855	I understand the pressure the county is feeling. I want to hear feedback from the communities impacted to find a way to minimize the impact.	3/2/2026 5:38 PM
2856	I'm concerned with possible overcrowding if 33% of ALL elementary schools are closed. Midvale was close to capacity this year.	3/2/2026 5:14 PM
2857	We have loved all 4 of our kids experience at Oak Grove elementary! It is an amazing school and helped us to stay in the area to support this amazing school.	3/2/2026 4:48 PM
2858	While it seems to be purely financially driven, I am not happy with some of the proposed scenarios that would close high performing overcapacity schools in high-performing areas without any proposed alternatives.	3/2/2026 3:53 PM
2859	Closing these schools will be the nail in the coffin for Dekalb County. Everyone knows that if the county had not mismanaged money and had to pay numerous failed superintendents, this probably would not have happened (or at least not to this extent). The main appeal of Dekalb over neighboring counties is the smaller schools that have a "family" feel. Evansdale has a tight community, a strong staff, and definitely the "family feeling."	3/2/2026 3:47 PM
2860	I believe the consolidations need ot be efficient in their intent and impact. For example, it may be useful to reconsider how we separate students according to grade band, specifically allocating buildings or schools to support whole-child based on what grade bands are housed in certain buildings (e.g. Pre-K, Transitional Kindergarten, Traditional Kindergarten, 1st, 2nd and 3rd; Transitional 3rd, 4th....Consider Intermediate school comprised of grades 5-6, Junior high which includes grades 7-8, 9th grade Academy and then High School) In this way, youa re able to support those students who otherwise are impacted by social promotion with the additional academic supports needed before moving to the next grade. There is also the chance to address some concerns with developmental differences with some grade levels in certain grade bands.	3/2/2026 3:41 PM
2861	There has not been enough or appropriate research into this scenario specifically catered to our county. There has also not been enough research dating back to past DeKalb initiatives	3/2/2026 3:28 PM

	were such consolidations were had and then revoked (for example when middle schools were re-introduced back to the school districts). There is more overcrowding in DeKalb county so the county also needs to understand why there are pockets of underutilized seats (and if such under populated schools are due to the lack of support by the county where it's needed). There has also been no transparency as to where the students would go when their school is closed. There is no trust into the findings for this scenario. More time, research, and transparency is required before we move forward.	
2862	The initial facilities scenario takes into account ONE characteristic and makes a recommendation based on that ONE characteristic. The initial feedback could have started with test scores as the ONE characteristic and the same emotional response would have been given. In looking at ONLY facilities, the Ashford Park ES building is greatly lacking due to inadequate upkeep of the building (that falls on the county who never provided the school with updates it was supposed to receive; this is also an issue across the board in the county) and the school does not currently fit the county's expectation of how many seats an elementary school should have. In saying this, closing the school, redistricting the area, and expanding other local schools *could* remedy the current issue. It does not, however, address the issue that DCSD is infamous for ignoring the upkeep of facilities. What is to say this won't happen again in 10 years? (This conversation did happen 10 years ago about Ashford Park) How is DCSD addressing the fact that one of the highest performing schools in the county is up for closure because the building isn't up to standards? Yet there is an elementary school less than a mile away that has a building up to standards, and academically they're struggling. The issue in closing Ashford Park is the financial investment that will be needed to expand surrounding schools in addition to putting the Ashford Park community into schools that don't currently demonstrate the ability to academically support our students. John Lewis won't fit all 838 Ashford Park students (yes, that is the current enrollment) and expanding Montgomery ES (which is currently over populated) only assists with their over population and not with the addition of more students. It also does not address the academic standings in those schools compared to the academic standing of Ashford Park. Again, coming up with a scenario based on ONE characteristic, isn't helpful. There aren't "empty seats" in this area and continuing to use that argument won't work in this district. We want more seats, we need more seats, and now we're being told our school is going to close and we're going to be put in schools with lower academic standing. This is why only looking at ONE factor doesn't work. A comprehensive assessment is needed - utilizing current and accurate information - for people then to be able to provide feedback. Expanding Montgomery ES sounds amazing. Where is that capital coming from? What does the surrounding neighborhood think of that? Can the road infrastructure in that area withstand a larger school population and therefore more traffic? A comprehensive assessment is needed for effective feedback to be provided. Looking at this merely as shuffling seats around only addresses space - it doesn't address academics which is the most important factor.	3/2/2026 3:26 PM
2863	The decision to close a successful, sought after school is a disappointment and detriment to the community.	3/2/2026 3:21 PM
2864	Midvale is an IB School and it has been for many years. Students leave Midvale, go to Tucker Middle, and then Tucker High School and are able to graduate with an IB diploma, which is looked highly upon when applying to colleges. If Midvale closes, the IB program that we have worked so hard on for years will be gone. It is not transferable to another school. Losing an IB elementary school that Dekalb has paid for, teachers and administrators have worked diligently on, and parents being unable to choose an IB Elementary school for School Choice would be detrimental to the Tucker Cluster.	3/2/2026 2:49 PM
2865	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. •	3/2/2026 2:48 PM

	Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
2866	We have been charged super high taxes for years for Oak Grove school district, people move here just for that. What in the world are you thinking? Horrible idea, will be fought till the end. Dekalb has seen a huge spike in home values and thus a huge increase in revenue for schools. This was an unexpected increase but you say you dont have the money? What would you have done if this money had not come your way???	3/2/2026 2:31 PM
2867	I understand the need for consolidation due to empty seats. The Dunwoody cluster is not the same as South DeKalb cluster. Families buy homes in Dunwoody because of Vanderlyn Elementary school. We respectfully request comparative modeling that evaluates closure versus expansion scenarios within the Dunwoody cluster, including cost, utilization, and long-term flexibility, before final determinations are made.	3/2/2026 1:58 PM
2868	Many of the suggested consolidations make a lot of sense given current enrollement rates and proximity of under-enrolled schools to each other to allow for the combining of populations. However, the idea of "consolidating" a school that is OVER enrolled in an area with little to no capacity makes no sense. The state of the Ashford Park facility is a direct reflection of the school board failing to maintain the building over time - much like the issue with over enrollment at the school is a reflection of ignoring the need for expansion. The data being used to consider the future enrollment of APS is also incorrect and does not reflect the growth we continue to experience as a school. If the data you are using to make these determinations and decisions is not correct, how will the decisions you make address the core issues?	3/2/2026 1:16 PM
2869	Vacant buildings are not an issue on the northside. Schools on the northside are thriving even with bad buildings.this is due to parents and the communities leaning in with no district support. (Example parents paid for the Ashford Park Playground). Dont change buildings on the people who have build successful schools. Lean in and find solutions in support of the communities that are achieving vs tear them apart.	3/2/2026 12:56 PM
2870	It would be a great loss to our community and to our home values to close Oak Grove Elementary, which continues to score high in all aspects. Oak Grove is a draw to CDC and Emory families who move to Atlanta and add to our economic and academic communities.	3/2/2026 12:37 PM
2871	Why are majority of the schools are in predominantly mostly black areas? Moving schools farther away from their neighborhoods causes more problems and opening up for pedophiles when students misses the bus and have to walk home, not mentioning if they know their way home. Especially elementary students, may have entered the wrong bus or gotten off at the wrong stop.	3/2/2026 12:35 PM
2872	I strongly disagree with including Oak Grove Elementary as a potential school for closure. Our oldest is thriving in kindergarten at OGE, yet we would strongly consider pulling our 2 children from DCSD completely and putting them in private school should this move forward during their elementary school tenure. Decisions affecting the Oak Grove, Sagamore Hills, and Briarlake cluster should be postponed pending updated enrollment projections that incorporate post-pandemic trends and verified residential and employment growth in the Clifton Corridor. In addition, any planning decisions should explicitly consider the educational impact of increasing elementary school size. I do not support consolidation strategies that result in significantly larger schools, as smaller neighborhood schools provide meaningful academic, social, and community benefits for young students. **Consolidation Carries Academic and Enrollment	3/2/2026 12:21 PM

	Risk** Research consistently shows non-voluntary elementary school moves reduce short-term academic performance due to cohort disruption and loss of continuity. Larger school environments can also dilute individualized attention, weaken community ties, and reduce opportunities for leadership and participation among students. Additionally, when stable neighborhood schools close, a portion of families leave the public system entirely for nearby private or charter options. This reduces enrollment and funding while not reducing facility needs. **Oak Grove Already Meets the Utilization Goal** The district's consolidation model targets approximately 88% elementary utilization. Oak Grove is already operating above that level and continues to grow. 2023: 389 students 2024: 428 students 2025: 447 students (89% utilization) 2026 projected: 487 students (~96% utilization) Oak Grove is not underutilized and is likely to reach capacity within the next several years. Closing it would remove functional capacity rather than eliminate excess capacity. Increasing the size of already full schools is not a neutral tradeoff—it fundamentally changes the student experience, particularly in elementary education where scale matters. **Closure Does Not Solve Capacity. It Moves It.** If closed, Oak Grove's students would primarily shift to Sagamore Hills and Briarlake. Sagamore Hills: 91% utilization Briarlake: 73% utilization Combined available seats are far below Oak Grove's enrollment, meaning boundary changes, portables, or expansion would still be required. Planned residential development near Briarlake (North DeKalb Mall redevelopment, Corporate Square, corridor infill) is expected to naturally increase utilization over time. Consolidation would likely result in larger, more crowded schools rather than right-sized ones. For many families, the appeal of Oak Grove is its strong academics combined with a manageable, community-oriented scale. That balance should be preserved. **Major Employment Growth Has Not Yet Entered Enrollment Data** Within several miles of the school cluster, the Clifton Corridor has recently added more than $2.5 billion in institutional investment, including: Children's Healthcare of Atlanta Arthur M. Blank Hospital campus (opened 2024) Emory Healthcare and research campus expansion Thousands of daily employees in medical and research roles Because these projects opened recently, their household migration effects are still emerging and may not yet appear in district projections. Removing school capacity at the start of a growth cycle introduces planning risk and reduces the system's ability to support major regional employment hubs. It also increases the likelihood that remaining schools will be forced to grow beyond sizes that are optimal for elementary learning environments. **Oak Grove Is a High-Performing, Stable School** State CCRPI performance indicators place Oak Grove among the top elementary schools in the review group: Content Mastery: 94.2 Readiness: 95.3 The school combines high performance, strong demand, and stable enrollment—conditions typically preserved rather than dismantled in long-term capacity planning. Preserving high-performing schools at an appropriate scale should be a priority, not an afterthought. **Conclusion** The Oak Grove cluster does not exhibit the structural underutilization the consolidation plan is designed to address. Instead, it shows increasing demand in a rapidly developing employment corridor. Closing a near-capacity, high-performing school before updated projections incorporate current growth conditions risks creating future overcrowding, unnecessary capital expense, and permanent enrollment loss. Just as importantly, it risks pushing more students into larger, less personal school environments that many families actively seek to avoid. Postponing closure decisions in this cluster until updated data is available better aligns with long-term planning, fiscal efficiency, educational stability, and the preservation of appropriately sized elementary schools that serve their communities well.	
2873	The closing of Ashford Park without a true study into a possible expansion doesn't make sense in an area that needs seats. The excuse of 7 acres vs. larger sites doesn't let us know if an expansion doesn't work. 7 acres is plenty of site area for a larger school. The neighborhood would readily vote to approve if a height or setback variance is needed.	3/2/2026 12:05 PM
2874	After reading the initial facility scenarios, it is evident that consolidation needs to happen however it is hard to understand without looking at zoning. My children currently attend Ashford Park Elementary and we are severely over capacity. While John Lewis Elementary is under capacity and Dresden Elementary getting a brand new facility. It seems we could incorporate rezoning into the scenarios so as to preserve schools that have a strong tie to the community. The Ashford Park facility may be old but it has brought so much draw to the neighborhood and the parent involvement is unmatched. It would be devastating to lose this community asset.	3/2/2026 11:46 AM
2875	We love the schools in our area and we would be deeply saddened if they closed. We would love to see re-districting in that we feed into Henderson Middle and it is not close to us at all.	3/2/2026 11:42 AM
2876	beauty of evansdale is the community it provides for parents and the children. so important for the kids to grow and have suppport	3/2/2026 11:35 AM

2877	1) keep chamblee cluster trajectory to chamblee middle and chamblee high 2) keep the AP ES attendance zone together	3/2/2026 11:31 AM
2878	I am very unclear on what the scenario is as they are grouped as "closure/repurpose" - the repurposing definition is not clear and it's difficult to provide feedback when you do not know what the school will be repurposed for. We moved to the Brookhaven area for the schools, and were disappointed by what Montgomery elementary offered. One child is at Kittredge now and we are thrilled to have an option for a Magnet school. If it were to move to another school for the later grades and not be in the Chamblee Middle/High, we would be extremely disappointed and potentially look at other options for schooling. We have already moved our younger child to a private school out of Montgomery but would like to come back into Kittredge when that child is in 4th grade. If the later grades are not in good facilities or what we would consider safe, we would likely not bring that child back into the system.	3/2/2026 11:04 AM
2879	I understand and support the need to address overcrowding at Dunwoody High School - having had 2 children already go through Peachtree Middle and DHS. I would like more information about how closing Vanderlyn aligns with this. Vanderlyn is an amazing school with very active families and is convenient to our neighborhoods and has amazing teachers and staff. It would be helpful to see how closing our school would affect - where our kids would be reassigned, class size and transportation.	3/2/2026 11:00 AM
2880	Why choose to close facilities that are projected to see an increase in usage by 2030?	3/2/2026 10:56 AM
2881	Redistrict Drew Valley into John Lewis Elementary. Redistrict north of Peachtree Rd. to Montgomery. Keep Ashford Park in the Chamblee cluster.	3/2/2026 10:34 AM
2882	It makes sense.	3/2/2026 10:30 AM
2883	I am disappointed by the selection of many of the schools on the list. Henderson Mill ES is a wonderful community school. Our son loves being there for Pre-K and is excited about kindergarten next year. The school is clean and well maintained. It is impossible to understand how Hawthorne and HMES could be combined--I do not want my child in trailers or in classes with 30 children in elementary school.	3/2/2026 10:13 AM
2884	It’s not fair and will cause a lot of parents problems with finding a new school for there child/ transportation.	3/2/2026 10:06 AM
2885	I feel like these scenarios did not take into account neighborhoods, traffic patterns, current renovations, and a whole host of other factors.	3/2/2026 10:01 AM
2886	I do not agree with this. I believe this will decrease the quality of public education. It's a good thing that the schools aren't packed full so teachers can provide more individual instruction.	3/2/2026 9:57 AM
2887	I understand the need to create some more efficiencies by closing some schools. However: 1) I find peculiar the idea that a purportedly data-driven plan is being presented but then community feedback is actively being solicited. No one wants their schools to be closed. This begs the question of whether a) plans will be adjusted based on who is the loudest, not based on data, or b) the feedback will not actually be considered. 2) It is hard for the district to sell the need for efficiencies when it wastes money so obviously, whether through "rallies" that don't serve any real purpose, purchase of new office buildings, or the prior superintendent's giving $45,000 to a buddy to speak at a convocation. 3) I would be willing to sacrifice some efficiencies to have smaller neighborhood elementary schools. Having a smaller neighborhood school creates a sense of community. I also am worried about traffic from larger schools, and the eyesore/nuisance of closed buildings that the county retains. 4) I am frustrated that no dialogue is being had about WHY enrollment has dropped. I understand we are on a demographic cliff but surely other factors, including COVID closures, are at play. Query whether this process will accelerate enrollment decline as neighborhood schools close and folks just generally feel a lack of certainty about what school their children would attend. Finally, I want to put in a plea that if and when any redistricting occurs, that a student who is already attending a school that remains open may choose to continue their education at that school. This seems especially important at the high school level, where students may already be involved in certain extracurriculars or have an academic plan based on assumptions about course offerings. College admissions value continuity and commitment for extracurriculars.	3/2/2026 9:42 AM
2888	While I hear the reasoning behind the choices that were made I am not sure I truly understand the choices that were made.	3/2/2026 9:36 AM
2889	Since SAP is framed around enrollment trends, utilization, and long range planning, I would like	3/2/2026 8:45 AM

	to understand better how closing a highly utilized elementary school aligns with those metrics at a cluster level. I support addressing capacity needs at Dunwoody High School, but would like to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder patter implications before any closure decision.	
2890	Focus seems to be on numbers only and not the educational successes or goals of each area. Why would you close schools with high academic achievement that has directly improved that community over years. The achievement has been made with no investment from the board, parents have been pouring their time and resources into these schools. Don't take that away from them!	3/2/2026 8:39 AM
2891	Don’t like this idea for our area. Oak Grove Elementary is a wonderful school and many families rely on this in the Briarcliff Woods/Oak Grove areas.	3/2/2026 8:35 AM
2892	First of all, I believe it was a mistake to release these scenarios without giving possible next steps for the students who could potentially be displaced. I understand that the district wants to start with buildings, and I do see the wisdom in that. But to tell parents their school could be closing without giving them possible solutions has stirred up concern and distrust in the district and this process. In Dunwoody, unfortunately, it is pitting communities against each other because of passion for schools and potential for consolidation. It is sad to watch my community be divided and I fear that our families from Kingsley will not feel welcomed if we merge with another school. I'm disappointed in the way this was rolled out and I hope that the human factor is considered more heavily in future scenarios. How are we expected to give feedback on only a portion of the plan? With that said, I understand the plan as it has been presented and think I am in support of the suggestions that have been made for my cluster. I see that Dunwoody has too many elementary seats, old buildings that are in need of repair and need for relief in the middle and high schools. The overall plan is good and makes sense, although it may be unpopular. What I need more information on and am advocating for is how will Kingsley fare in the interim. We were told leading up to the release of the scenario that we were on track to begin HVAC replacement and modernization beginning the last day of school- a project that has repeatedly been delayed and that our students deserve and need for a safe and functional environment. Now we find out that the project is on pause and we would be closing sometime in the next 6-8 years. Our HVAC cant last that long and the bandaids offered by the district are loud and disruptive to the classrooms. We have a large under served community at our school, who need extra support and engagement from the district, not less. If the building is not going to be kept open or repurposed by the district, I understand not completing the project. I would also ask that no further investment be made into the building, seeing as there are seats for our children in the rest of the cluster. my children are thriving at Kingsley, as are many others. But the majority of students and our teachers would likely be better served and supported by another school in the area that has more access to programs and resources than we do. I ask that you consider those children and the impact that this interim period will have on them. The district should not allow them to fall behind in the time it takes to complete a new school for them to move into. These failures at Kingsley have gone on long enough and the time to make it right is now, not in 6-8 years. Families are leaving Kingsley and choosing school choice or private school, some are even moving within the city of Dunwoody because of the unknown. We are facing an uphill battle for support and involvement in this time, and I fear that irreparable damage has been done to Kingsley enrollment and involvement by releasing this scenario without the full picture. Please don't let an arbitrary commitment to "no changes until 2027" keep you from doing what is best for students who need a safe and supportive learning environment with admin who will advocate for them.	3/2/2026 7:59 AM
2893	Makes sense to me.	3/2/2026 7:32 AM
2894	Will the Evansdale DLI program keep the LabelFranÉducation seal if the program is moved to another school? This is a seal that is very prestigious and takes years to achieve. Would the seal transfer to another location if the students from that program are redistricted? If the Evansdale Elementary School closes, how will you ensure that all students in that program are together and able to continue their DLI language track. If Evansdale Elementary closes where will students in the DLI program continue the French DLI program and how will that affect the French program at Henderson Middle? At the moment, the DLI feeder school track goes from Evansdale Elementary to Henderson Middle and then culminates at Lakeside HS. If Evansdale is redistricted between a Tucker High School Cluster and Lakeside Cluster the students redistricted to Tucker currently do not have a DLI track or French AP options at Tucker High School.	3/2/2026 7:07 AM

2895	I'm upset that you are looking to close schools in my area. I attended 30034 area and love the fact that my grandchildren are following my lead.	3/2/2026 5:43 AM
2896	It is unclear how programs will move with buildings. What will happen to the staff? Are we creating more homes and families who are out of work? We need to know the actual plans to have an intelligent response.	3/2/2026 5:20 AM
2897	It is unclear to me how Oak Grove Elementary appeared on your initial closure list. The school is top-notch with very high test scores, very involved parents / PTSA, and nearly at capacity with students and continues to grow as more families continue to move into our area bringing more children, with one of the reasons being Oak Grove Elementary. Closing Oak Grove makes no sense as the other two closest Elementary Schools in our area (Sagamore Elementary and Briarlake Elementary) are also near capacity so where would you send kids? You create longer days for these young children on longer bus rides and stress parents who drive their kids by forcing them to drive outside their neighborhoods where they bought their home to be near Oak Grove Elementary. You should focus on consolidating those elementary schools that are way below capacity and/or not meeting academic standards set by the county/state. If you close Oak Grove Elementary I would expect a huge reduction in my real estate tax (of which 70% goes to DeKalb County Schools) since I would not be receiving the benefit of a local elementary school and the taxes I pay would be going to schools outside my area. In addition the value of my home would go down due to no elementary school in my area.	3/1/2026 11:59 PM
2898	This process is a sham and DeKalb County Schools has not been transparent. I cannot believe that you've proposed closing two schools in the Dunwoody cluster and multiple top performing schools across the county. This process is a joke and you should be ashamed of the recommendations. Start over! You clearly cannot do big things well. Address 2-3 schools at a time.	3/1/2026 10:34 PM
2899	Recommend considering Oak Grove for PK-8 school.	3/1/2026 10:04 PM
2900	I think Vanderlyn Elementary should become part of Dunwoody High School. They need the parking and classrooms. Please keep Dunwoody residents at Dunwoody High School.	3/1/2026 10:02 PM
2901	I understand the need for consolidation. However, this should not come at the expense of our students. Smaller schools like Oak Grove foster community and the ability to tailor to the needs of the students. OUr Oak Grove experience has been absolutely wonderful. For the lakeside district, I would like to see better/different options for middle school.	3/1/2026 10:01 PM
2902	The information is not presented in a way that makes it easy to understand.	3/1/2026 9:42 PM
2903	If the district's objective is to align elementary schools with the 600-student efficiency benchmark, Vanderlyn should be considered for expansion rather than closure. The school is already operating efficiently and, given its shared campus, offers a strategic opportunity to explore coordinated facility solutions that address Dunwoody High School's needs while maintaining access to elementary education. We respectfully request that the district conduct and share comparative modeling of both closure and expansion scenarios within the Dunwoody cluster—including projected costs, utilization rates, and long-term flexibility—prior to making any final determinations.	3/1/2026 9:18 PM
2904	This is a horrible idea! The district should not be closing any school - but determine how to effectively utilize resources within the district.	3/1/2026 8:50 PM
2905	I understand the foundational problem statement: the district's capacity far surpasses its enrollment and therefore, some facilities must be consolidated to improve utilization. This is a reasonable and legitimate conclusion and I applaud DCSD for attempting to rectify this imbalance. That said, I do not understand the strategic planning process levied against this problem statement, and I have lost faith in the integrity of the data being used to shape these scenarios. I'll explain these concerns individually. This survey is asking for "feedback on the initial facilities scenario", which is a list of schools recommended for closure and a separate list of schools recommended for consolidation. The list does not provide any directional indication of what will happen to the students enrolled in any of the affected schools, how these initiatives will be funded, a timeline on which these changes could be made, ("6-8 years" is too broad to provide clarity in any way) or a suggested sequencing for how these projects will unfold. (All at once? By region? Depends on financing?) The community is being told those answers will come later. Why is the district hard-launching this plan with a myopic view on facilities and not creating holistic scenarios that help families understand new attendance zones and the budget necessary to make these changes? You are asking us to react to the	3/1/2026 8:35 PM

	status of our buildings while ignoring what these changes might bring to our families' lives or how they will be paid for. Is that really the most impactful question to be asking stakeholders right now? Are facilities really the first building block? Why is the district not following a more accepted strategic planning process that begins with an over-arching vision, divides impact into phases, presents comprehensive scenarios, and works through a change management process to engender goodwill and alignment? The shock value of seeing headlines that the district will close 27 schools was enough for the project to lose significant public support from the start. This was avoidable, and an unforced error. Who is the advising the district on this approach? Which leads to my next concern. The data presented to-date is incomplete and inaccurate, and many families (mine included) has lost faith in the integrity of this process. There have been numerous examples brought to life this week: - 600 students seems to be emerging as the new benchmark for elementary school capacity in the future but no data has been presented to explain the rationale behind this number or where it came from. In one SAP meeting, the district actually seemed to back away from this number while HPM asserts it's the principle they're operating under. But why? Who made this decision, and which data was it based on? - Our school's enrollment and projected utilization are not accurate in the SAP materials; - Our school is ALREADY operating at 89% utilization and is projected to have a higher percentage next year. Yet SAP materials incorrectly cite a lower number. If this is truly about consolidating under-utilized schools, why is an over-utilized school on the list? The data does not explain why. - SAP volunteers have responded to Facebook posts from parents and explained that "acreage" is the reason some schools will stay open (i.e. Sagamore) while nearby (well utilized) schools (i.e. Oak Grove) will close. The argument seems to be predicated on the belief that Sagamore could physically expand while OGE cannot. Except, when you explore the topographical footprint of Sagamore, you will realize quickly that the cannot actually expand the way the data says, unless an eminent domain argument is made, which is a different scenario. Why was "acreage" the only data point offered?	
2906	Shutting down Ashford Park Elementary, a thriving and overcrowded community, makes no sense.	3/1/2026 8:09 PM
2907	I am not certain how shutting down our school, Ashford Park Elementary, helps our overcrowded area and high achieving community. If an expansion to Ashford Park is not feasible, (has a feasibility study been prepared to confirm this?) I believe a grade band of K-3rd for the full Chamblee cluster would benefit the community.	3/1/2026 8:01 PM
2908	I don’t see how closing AP in an already overcrowded area solves the issue. You will be using excessive funds to expand two other schools. See solution below regarding grade bands. This will keep the AP community together and high performing.	3/1/2026 7:51 PM
2909	Makes sense	3/1/2026 7:09 PM
2910	I highly disagree with the consolidation.	3/1/2026 6:31 PM
2911	I feel that facilities with special programs should not close. They should be updated and expanded.	3/1/2026 6:17 PM
2912	Some of the schools proposed to close have special programs eg Evansdale dual language gifted program. Also, closing multiple schools adjacent to each other (Evansdale, Midvale, etc) would have a huge community impact versus consolidating neighboring schools into each other.	3/1/2026 6:14 PM
2913	I believe keeping elementary schools smaller where everyone in the building knows each student by name is important to create the best experience for the beginning years of education	3/1/2026 6:07 PM
2914	I am concerned with so many of the schools closing being located in South Dekalb county. While I understand that there is low enrollment, I also think more than that, that if schools are closed in our areas, it will become even more of a challenge to encourage new people to move into our community.	3/1/2026 4:29 PM
2915	I think it is a good thing that the school district is making these changes in order to invest money in ways that make sense and reach the most amount of students. In my neighborhood, I am most concerned about overcrowding, especially with Lakeside High School, where my child will start next year. While I don't want any school to have an excess of empty seats, I don't want to make class sizes bigger or overcrowd the schools that are left. I hope that the savings from shutting down schools will allow the district to better invest in the schools that are left, pay teachers more, and have better facilities and better extracurriculars and arts	3/1/2026 4:11 PM

	opportunities. I am also very concerned about the Dekalb School of the Arts, where my daughter attends. I feel strongly that this school should remain a stand-alone school, not embedded into a larger school. The small and tight-knit community is part of what makes this school the highest ranked school in the district and one of the best in the state. Their school building is in terrible condition. I would like to see the district use the savings from school consolidation to finally invest in this amazing school and find it a better, newer school building with dedicated arts facilities. The students, teachers, and administrators at this school will thrive with more funding and attention and become even more renowned and successful.	
2916	I am very much against the proposed closure of Vanderlyn Elementary. We recently moved into our neighborhood specifically because of Vanderlyn. If it closes and we are rezoned, we will move out of Dekalb County. I also disagree with consolidating elementary schools into less, larger schools. It is important for elementary students to have smaller schools with smaller buildings; larger schools are overwhelming at this age. Vanderlyn is a beloved, supported neighborhood school, and the surrounding neighborhoods will suffer/not be as desirable if it is closed. If you close Vanderlyn, we will campaign against the current school board.	3/1/2026 4:04 PM
2917	Oak Grove Elementary closing does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. This is a growing area, not declining.	3/1/2026 3:51 PM
2918	Strong, stable elementary environments are important for students and communities, and I would like to better understand how this proposal supports long-term cluster planning. I support solutions for high school overcrowding, but it would be helpful to see complete modeling on reassignment, receiving school enrollment and capacity, transportation, and feeder impacts before decisions are finalized.	3/1/2026 3:11 PM
2919	Schools in high income areas that close will lose students to private schools, student commutes will increase - not good, smaller facilities need less repairs	3/1/2026 2:57 PM
2920	I am writing to express my deep concern about the proposed SAP reduction and school consolidation plan. I do not have confidence in this proposal—not only because of what it would mean for our neighborhood school, Midvale, but because of the broader impact it would have on communities across the district. Many parents throughout DeKalb County share these concerns. This plan does not exist in a vacuum. It comes after years of instability in district leadership, repeated superintendent turnover, and declining enrollment that has eroded public trust. Closing neighborhood schools without first repairing that trust feels premature and counterproductive. If Midvale were to close, my family would seriously consider leaving the district. We love Tucker and our home, but large-scale consolidation risks accelerating enrollment loss rather than stabilizing it. Families choose districts where they feel heard, valued, and confident in leadership. Right now, many of us do not feel that confidence. Before moving forward with closures, I urge the Board to focus on foundational steps: Acknowledge and take responsibility for the leadership instability and communication failures that have contributed to declining enrollment and community distrust. Prioritize long-term leadership stability by hiring and retaining a superintendent and rebuilding credibility in district governance. Pause or withdraw this proposal in its current form and engage in a genuine, collaborative planning process with communities. This challenge is systemic. It cannot be solved by reducing buildings alone. If residents are this passionate about neighborhood schools, imagine the positive impact that same energy could have if meaningfully invited into the solution. Families want to partner with the district. In my own neighborhood, I believe parents would mobilize in extraordinary ways to support and strengthen our school. I recognize that significant effort went into this proposal, and I respect the work behind it. However, moving forward without broad community buy-in will only deepen distrust and accelerate the very enrollment issues the district is trying to solve. Given the magnitude of this decision and its long-term consequences for families, I will be formally communicating my concerns to the Governor and our state legislative delegation as both a parent and a member of the State Bar of Georgia to ensure there is clear visibility into the community impact and the leadership failures that have contributed to this moment. I urge the Board to reconsider this approach and commit to rebuilding trust first. Sustainable solutions require community partnership—not just consolidation.	3/1/2026 2:31 PM
2921	The district has shared that DCSD is operating significantly below total system capacity and	3/1/2026 1:57 PM

	that consolidation may allow resources to be concentrated more effectively. I understand that long-range planning requires difficult decisions and that no final decisions have been made. At the same time, any proposed consolidation, particularly one involving Vanderlyn Elementary, should clearly demonstrate how enrollment trends, utilization rates, and resource allocation metrics are being applied specifically within the Dunwoody cluster. While Dunwoody High School capacity is an important issue, the scenario should provide transparent cluster-level modeling, including receiving school enrollment projections, class size impacts, transportation considerations, and feeder pattern implications before a closure decision is advanced. The Vanderlyn and Dunwoody High School campus presents a unique opportunity to explore thoughtful, phased, or reconfiguration solutions that address secondary capacity while preserving stable elementary access. I respectfully request that additional data and alternative cluster-level solutions be shared prior to any consolidation decision.	
2922	The PK-3, 4-5, 6-8, 9-12 makes the most sense in consolidation.	3/1/2026 12:06 PM
2923	We are really excited to send our kids to Ashford Park, love the community there and would be heartbroken if the opportunity was taken away.	3/1/2026 10:39 AM
2924	Disagree with closing schools performing at 8/10 and up and keeping open poorly performing schools based on real estate measures. Is the district a real estate agency or a school district? Seems the focus is on buildings, not education. You will see more parents move out of Dekalb or take the 6500 per students with these proposals.	2/28/2026 10:47 PM
2925	I am writing to express serious concern regarding the proposed closure of my Robert Shaw Theme School in DeKalb County. Although the school may be smaller in size, it is truly “small but mighty.” Its academic performance speaks for itself, with consistently high test scores and strong student achievement outcomes. The school has recently been recognized with the prestigious John Hancock Award, further affirming the excellence of its students, educators, and leadership. Beyond academics, this school holds deep historical and community significance. It is named after the African American man who donated the land during segregation, creating educational opportunity in a time when access was unjustly limited. That legacy is woven into the identity of the Scottsdale community and represents a powerful story of resilience, investment, and hope. Closing the school would mean losing not only a high-performing academic institution, but also a meaningful community landmark. Additionally, this is a school choice program with a waiting list each year. By definition, it is not underutilized. Families actively seek out this school because of its theme, culture, and proven results. Eliminating a sought-after theme school will not reduce demand for education, it will simply redirect families to charter or private schools. That outcome would be counterproductive to the district’s long-term enrollment and financial stability. Overcrowding elementary schools is not a sound strategy for cost savings. Larger class sizes and increased campus populations can negatively impact student experience, teacher effectiveness, and overall school climate, particularly for our youngest learners who thrive in supportive, structured environments. This school is academically strong, historically significant, in demand, and deeply rooted in the community. For these reasons, it should remain open.	2/28/2026 10:29 PM
2926	Lithonia high school has been consolidated once before. The current middle school used to be the highschool until the build the current high school that i graduated from in 2007. Our football team just made it further than any team has gone in the last 20+ years and it would be tragic to see that come to an end. That school is in the middle of our community and watching it become something else again or completely remove would be a shame. I believe seats not being filled is due to the how the district allocates its funs and how our city is handling the needs of our students. I now more students are being schooled from home or being place in other school districts like Gwinnet. I believe our government is failing our schools not the community.	2/28/2026 8:47 PM
2927	I do not agree with closing Ashford Park Elementary. It’s the reason many of us chose to live in this area. It’s what our community is routed in. To maintain said community, would love to further consider expansion to maintain current population. Also a priority for the Chamblee cluster to stay in tact.	2/28/2026 6:57 PM
2928	It is understandable that schools need to close based on enrollment - but Oak Grove enrollment is above 80% and projected to exceed 90%. It should not be on the list for closure.	2/28/2026 5:24 PM
2929	I strongly oppose the proposal as shown. While I know that this may not be your intention, this plan indeed seems more likely to further erode enrollment in public education in DeKalb, and completely erode public confidence in your administration. First, this is a ridiculous ask in the current context of the county. The Dekalb County school board has been an absolute disaster	2/28/2026 4:03 PM

	in the last decade. For the sake of brevity, let's just mention the Druid Hill High School renovation fiasco, and the fact the current plan has been devised under a superintendent currently in court over accusation of fraud. Add to this the fact that the reason Evansdale has such a low facility score is well... you! You have consistently refused to invest in this schools despite high level of attendance, and one of the unique program in the state (French DLI). So you created the problem (not enrollment or demographics) and want us to trust you in fixing it. So if you want me to talk to you about "buildings," my answer is no, I can't trust you on this now. However, if you are interested in building... trust, that I would be open to. What measures have you taken to make the board more functional? What measures have you taken to ensure that leadership is not involved in fraud? Have you investigated how this plan came to be? Because based on reports in newspaper, it appears to have been railroaded over the SAP committee, and many board members are not in favor of this. So until you have taken step to restore trust with the public, a district wide major reorganization is not something you should engage in. Second, the plan proposed is not meant to be understood by parents. It present "scenarios" from the point of view of the district only. I can see on the map that my school, Evansdale, would be closed. And Livsey and Hawthorne would be expanded, but it doesn't tell us where our kids would go, and if they would change cluster, so how can I evaluate this? Had you have a proposal made that could be easily understood by parents of each schools, with clear options to choose from, then perhaps we could have a real conversation. But in this format, we have to do you job (digging in numbers) to figure out alternatives instead of having a few offered to us. Third, you premised this entire operation on the decline in enrollment, mentioning various reasons without much consideration of which is key, and/or how confident you are about these projections. Because they are that, projections, and not fact. Obviously, one of the reasons is the pressure from private/charter schools. Yet, your plan does not engage with this decline, just accepts it as a fait accompli unworthy of discussion. Considering how this project could help Dekalb better compete with private/charter schools is critical, not a side point. And based on the scenario in our cluster, it appears that you want to close well-attended small school to create mega-schools like Smoke Rise and Pleasantdale. What is the most likely result? Another round of exodus to private school. I can tell that parents in our neighborhood are already starting to make plans for this because they lost faith in you. In conclusion, I think this plan is ill-advised and poorly conceived. I would encourage the county to rethink it deeply according to a few criteria. What are you going to do to stabilize the county school administration so as to ensure that any plan can be enacted efficiently and in a well-organized matter? How do you intend to build the trust with parents that the last decade has completely eroded? Devising a plan that could be easily understood by parents and that would offer real choices would be a good start. Finally, how is this plan supposed to help enrollment and not lead to another decline, and then another round of closing? Without this critical piece of information, how do we know that your plan will not make the problem worse?	
2930	Please keep these points in mind and consider expanding Evansdale Elementary. Please note that the neighborhood is very supportive of the school and wishes to see it thrive. GROWTH: According to SAP dashboards, Evansdale is among the few elementary schools where school utilization/ population is supposed to grow. DEMOGRAPHICS: We are also among the most diverse schools in our area (White 22.2% Hispanic/Latino 50.4% Black or African American 16.1% Two or more races 7.3% Asian or Asian/Pacific Islander 2.9% American Indian or Alaska Native (Unsure when data was collected but it seems aligned with our experience) that has high performance. LOT SIZE: Our facility score is low, especially within the Lakeside Cluster, but our lot size is substantial (larger than schools proposed for expansion). BUILDING SIZE: The building is 500 seat. We could expand to become a 600+ seat school with less investment. TRAFFIC: If Evansdale does expand, its location along Evans suggests that traffic would be better than some alternatives ie. Livsey (Chamblee Tucker). PROXIMITY to Henderson Middle School. For many families, including low income families, the elementary school and middle school are walkable. SPECIAL PROGRAMS: The French Immersion Program is a very important part of the school culture. It draws higher income/ more well resourced families to the school and insures parent involvement. Given the large number of Spanish speakers at our school it also encourages acceptance of many cultures (indeed our spirit wear has Evansdale United (Spanish, French and English) displayed. I also am very supportive of STEM programs which have appear to have gotten less support at our school in recent years. These programs keep people in the public school system. Without them the demographic issues experienced elsewhere would continue.	2/28/2026 3:24 PM
2931	I am a parent at Brockett Elementary. Small neighborhood schools are valuable to the community. Once they are gone they will never come back. Being able to walk to school is unheard of these days and we cherish this. My son is flourishing at Brockett ES. This is the wrong move, there has to be another way. Please reconsider and do not close the Tucker	2/28/2026 3:11 PM

	cluster. The DCSB has already shown poor judgement and negligence on the hiring of corrupt superintendents. The SAP committee was developed under the most recent Horton corruption and is led by some that were brought here by him. It's time to go back to the drawing board. Consider developing a committee to focus on how DCSD can retain students. Ask why this is happening and how leaders can improve student and parent satisfaction with the public school system.	
2932	Oak Grove is not underutilized as stated. It is at 89% and projected to be much higher next year. If Oak Grove closes it will need to put students at Sagamore which is already at 91% capacity, And Briarlake. There is not enough room for those two schools to absorb the Oak Grove Students. 130 available seats at Briarlake cannot hold the 447 students that would be coming from Oak Grove. Te area around Briarlake is expanding rapidly with new subdivisions being built and they will naturally go up on enrollment because of that. There are documented residential developments: Lula's Hills with up to 1,88 residential units being built. Corporate square will have around 2,000 planned units within 2-4 miles of Oak Grove. Just phase 1 alone could generate between 55-145 additional students within the next couple of years on the conservative side.	2/28/2026 3:05 PM
2933	I understand the intention to close under-utilized schools to improve the facility cost, but Oak Grove Elementary School (OGE) is not underutilized. OGE is currently at 89% and is projected to have 96% utilization rate in 2026-27, above the DCSD's goal of 88%. If budget reduction is required, the district should begin with the schools that are significantly underutilized.	2/28/2026 2:41 PM
2934	The Oak Grove plan doesn't support the stated objective of addressing underutilization. The district's target is to raise elementary school utilization to around 88%, but Oak Grove is already at 89% and is projected to reach 96% in 2026–2027. Oak Grove is also one of the highest performing schools in the review group.	2/28/2026 2:18 PM
2935	Ashford Park needs to shift as a whole community, at least the Ashford Park and Drew Valley area. The side over by Windsor Parkway could shift to Montgomery if that school is built bigger. John Lewis would then need to be zoned for the Chamblee Cluster so overall our community can stay together for middle and high schools	2/28/2026 1:58 PM
2936	Removing Ashford Park - while it is old and in need of repairs - without providing clear guidelines around where children would go is troubling. Montgomery and John Lewis are the closest options and Montgomery is already over crowded. John Lewis is an underperforming school that will also quickly become overcrowded. It would be best to keep the APES community together and providing clarity around where the children would move. I am not tied to the physical building but the quality of education.	2/28/2026 1:25 PM
2937	Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those	2/28/2026 1:23 PM

	data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
2938	My general concerns relate to 1) school performance and 2) the broader community impacts (economic and social) of closing schools. While I recognize that factors like "declining birth rates" are legitimate macro factors that are often generalized, more immediate measures that impact school enrollment include inter-attendance zone out->transfers. I think including and understanding the reasons for such transfers offer greater clarity about specific, school level factors that impact enrollment. There are more micro indicators, such as student performance and behavior (e.g. OSS) that are more manageable /can be fixed before rushing to school closure as the fix.	2/28/2026 12:28 PM
2939	I am opposed to closing Vanderlyn which is I understand is only slightly over capacity when there is no clear plan for where the students would go. Especially if the driving factor in this is parking for a stadium.	2/28/2026 12:13 PM
2940	Closing a school that exceeds utilization targets, demonstrates substantial growth, and ranks in the top tier academically does not directly address the district wide utilization gap. Also if Oak Grove closes, students would need to be absorbed primarily by Sagamore and Briarlake. They do not have the capacity to do so without significant boundary shifts, overcrowding, or facility expansion.	2/28/2026 11:46 AM
2941	I think schools that have enrollment that is high and projected to rise should be kept open. People are supporting these schools and have chosen to live in a neighborhood that is near these schools.	2/28/2026 11:43 AM
2942	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the currentpace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. 2956	While consolidation seems warranted we moved into a neighborhood specifically to be walking distance to an elementary school (McLendon). We are concerned what will happen to the	2/27/2026 6:47 PM

	building if it closes and the county doesn't take quick action to redo the space. We also want to make sure the county is accounting for the potential growth that may come from the Lulah Hills development, which will hopefully bring more young families to the area. If McClendon is close to this development, might it not help absord some of the people that move in?	
2957	While we understand the need for consolidation, as a household that moved into a neighborhood specifically to be walking distance to an elementary school (McLendon), we are disappointed to see a potential building closure. I think closing some of these smaller schools may disincentivize young families from moving into DeKalb. In general, a lot of these smaller schools are part of the fabric of the neighborhoods--in the case of McLendon, literally situated in the center. Specific to McLendon, we also want to make sure the county is accounting for the potential growth that may come from the Lulah Hills development, which will hopefully bring more young families to the area. Our biggest concern with a potential closure is that the county think deliberately about the closed buildings. We do not want to see an empty building sitting for years. If it is to close, we'd rather see a park, early learning center or community center--or more affordable housing--come in.	2/27/2026 6:41 PM
2958	I would like to say Oak Grove Elementary is a terrific school and a linchpin of the community. Please reconsider these initial plans, and keep OGE open.	2/27/2026 6:12 PM
2959	I support addressing overcrowding at Dunwoody High School and want strong long-term facilities planning across the cluster. Since SAP is framed around enrollment trends and utilization, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. Before any closure decision, it would be helpful to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications.	2/27/2026 4:44 PM
2960	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization. This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	2/27/2026 4:44 PM
2961	Keep my oak Grove, ms Kennedy the goat and that place is awesome. I did my Eagle Scout project there and the Leafmore neighborhood will riot if oak grove is closed	2/27/2026 4:18 PM
2962	Oak Grove Elementary is the bedrock of our neighborhood and literally the center of our community. Families choose to live here because of the strength of Oak Grove Elementary, and that stability has supported community engagement, property values, and long-term	2/27/2026 4:16 PM

	investment in the surrounding area. From a utilization standpoint, Oak Grove does not fit the district's stated objective of addressing underused facilities. The target is approximately 88% elementary utilization. Oak Grove is already at 89% (447 students / 504 capacity as of October 2025) and projected to reach 96% next year (487 students). Enrollment has increased for four consecutive years. The trend is steady and upward. If Oak Grove were closed, students would primarily be reassigned to Sagamore Hills (91% utilization, only 43 available seats) and Briarlake (73% utilization). Those schools do not have sufficient available capacity to absorb Oak Grove's 447 students without significant disruption, boundary changes, overcrowding, and traffic. It is also important to consider the broader growth pattern in this corridor. Major residential projects are underway within a few miles, including Lulah Hills (up to 1,800 units), the Corporate Square/Northbend redevelopment (approximately 2,000 units), new apartments at both corners of Briarcliff/Clairmont. Even early phases alone could generate meaningful new elementary enrollment. In addition, the Druid Hills/Clifton area has seen billions of dollars in institutional investment, including the new Arthur M. Blank Hospital campus and ongoing Emory expansion. This is an area experiencing growth and reinvestment, not long-term decline. Closing Oak Grove is antithetical to this clear growth pattern in a great part of DeKalb County. If enrollment models rely heavily on pandemic-era data, they may not reflect the current upward trend or documented housing pipeline. Forecasts should incorporate the most recent enrollment recovery and known development activity. Oak Grove is one of the highest-performing schools under review, with top-tier academic indicators in Content Mastery and Readiness. Closing a school that is meeting utilization targets, demonstrating sustained enrollment growth, and performing at a high academic level does not appear to advance the district's stated goals. For many families, Oak Grove is the anchor of our community, it is a top performer, and has a utilization rate above the threshold.	
2963	Please close schools. We need more money for programs for students, not for facilities that are too expensive to run.	2/27/2026 3:56 PM
2964	Oak Grove is consistently a high achieving blue ribbon school With a strong Foundation and community. It would be a travesty to close. Additionally the proximity to LAKESIDE high school walkable makes this desirable to our stake holders	2/27/2026 3:50 PM
2965	i think you have a hard decision in trying to align current resources with intended outcomes you want for your students. I thnk recognizing that one of the biggest costs is facilites is a good first step.	2/27/2026 3:36 PM
2966	if you remove oak grove elementary, my family will go to private school and all the donations we have and will continu to give will be gone. we live here for this school.	2/27/2026 3:32 PM
2967	The biggest issue we have is the enrollment but we dont feed into our neighborhood. Kids and it's sad	2/27/2026 2:54 PM
2968	I feel that too many schools on the southern end of the county are affected.	2/27/2026 2:46 PM
2969	While I support the need to be more efficient with resources by closing underutilized schools that require the highest amount of investment, these decisions can NOT be made without first also considering student population and quality of education. In short: the current plan of closing Vanderlin and Kingsley would result in the remaining 3 elementary schools in the area being OVERCAPACITY by more than 20% (3,497 students vs. 2,904 capacity – where would the additional 593 students go?). Furthermore, academics must be considered when making final decisions, which can be judged not only by test scores, but looking at where parents are CHOOSING to send their children. Vanderlin is only 1 of 3 schools (out of the 27 being considered) that has MORE PARENTS CHOOSING TO SEND their child here than elsewhere. Almost 13% of the students come from parents choosing to send their child to Vanderlin with a net of 45 additional children attending the school (excluding zoned children who attend a magnet school or no/other DCS). This speaks volumes. Due to the reasons of overcrowding in the area and the fact that Vanderlin has proven itself as a school where parents want their children to be, it does not make sense to keep this school on the list of proposed closures.	2/27/2026 2:28 PM
2970	I don't like the idea of consolidating schools. Smaller schools are better for kids	2/27/2026 2:26 PM
2971	It's hard to comment on an area I don't live in but makes sense on paper.	2/27/2026 2:06 PM
2972	I feel like it makes sense to consolidate schools that are under capacity and close in location.	2/27/2026 2:00 PM
2973	Initial scenarios in the Dunwoody cluster regarding closure of Vanderlyn specifically do not take into account the amount of redistricting that will have to happen to accommodate the	2/27/2026 1:40 PM

	Vanderlyn students. You would have to split them up 2-3 ways. DES and AES cannot hold even half of the Vanerlyn kids.	
2974	I am not ignoring the fact that some adjustments are needed but there is zero just in this process and based on the recent meetings I have attended it feels like decisions have already been made. We are being told our school will close and then what. We will be moved from a high performing school and cluster to a low one at the whims of a group who was brought in by a man indicted on criminal charges of fraud. Why should we trust any of this process. Nothing has been transparent. When asked for hard data it cannot or will not be provided. When asked the status of the same program in Chicago also was denied an answer but when searched found mountains of evidence that parents and teachers alike were not only unhappy but the district was having to spend more money to fix it. Again with the shortsightedness. I ask for transparency and data to support the proposed changes are what is best for our children. There has also been no mention of the German program and what is to become of that. This, to date has been an unmitigated failure in my opinion, decidedly lacking in transparency and with the people in charge continuing to pay lip service while appearing to already made up their minds.	2/27/2026 1:32 PM
2975	I do not believe the scenarios make sense; the criteria for choosing to close a school does not match for APES. The scenarios also look as if they're closing so many schools in the north that it will cause traffic patterns to be overly congested and moving too many students further than 1 mile away.	2/27/2026 1:27 PM
2976	Ashford Park is an exceptionally old building. If a new, larger school cannot be built on that land, I am fine with being transferred to John Lewis if all of Ashford Park and Drew Valley are moved to that school and we stay in the Chamblee Cluster for middle and high school.	2/27/2026 1:16 PM
2977	This is an incredible community school that feeds our community deeply. It would be an epic tragedy for this school to be closed. Oak Grove already meets the district's utilization target today (about 89%). The school is projected to reach ~96% capacity next year. Enrollment has been increasing, not declining. There has also been significant new investment and development in our neighborhoods and surrounding areas that has not yet been reflected in the conversations / projections leading me to believe that were not considered. Academic performance, test scores, and teacher retention were not included as closure criteria and are all outstanding. Please do not close OGE. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion.	2/27/2026 12:45 PM
2978	These scenarios need a more thoughtful approach. Dunwoody residents and students should remain zoned for Dunwoody schools, and elementary consolidation should not move forward without addressing overcrowding at Peachtree Middle and Dunwoody High. Once the new Sequoyah and Cross Keys facilities are completed in 2026–27, Doraville ES students should transition into the Doraville cluster to relieve pressure on Dunwoody. While I understand the goal of creating three larger elementary sites, selecting Chestnut raises major traffic and community-impact concerns. Keeping Kingsley open and absorbing Vanderlyn students into nearby schools would meet capacity targets without creating new problems. In the meantime, essential repairs—such as the already-approved Kingsley HVAC work—must continue to ensure safe learning conditions for students and staff.	2/27/2026 12:27 PM
2979	I believe more data needs to be collected as Vanderlyn is a highly respected school which impacts our property values.	2/27/2026 12:23 PM
2980	Vanderland is fine. Leave as is!	2/27/2026 12:19 PM
2981	Apprehensive, we are anticipating and looking forward to our children attending oak grove elementary.	2/27/2026 12:16 PM
2982	I am here to share our experience that is leading to unenrollment, which to me is the key issue that needs to be resolved. The system is no longer meeting the needs of the families and we are being pushed out do to being unable to get basic accommodations for our children. This is happening to us right now and this week I had to start making calls to tour private schools that I cannot actually afford. I so desperately want public school to work for my child and believe it could. There is too much red tape... my child is ASDII PDA 2e. She is unique and needs a unique learning plan so she can access academics within the regular school day hours. Well, I have been expressing my concerns for her reading since PreK first parent meeting and my concern for her being ASD. This was dismissed by school, but we knew our child best. After	2/27/2026 12:16 PM

	diagnosis and second opinion confirmation we started the process with the school. She didn't qualify by your standards for an IEP but clearly, she needs more supports. I have been able to work with the school on accommodations and we are currently back in what us ND parents call the MTSS holding tank, praying for an IEP so we can support before failure vs waiting to fail. It's time to modernize the offerings and have more individualized learning plans for all students, where all of the kids have a block for specialized learning... this takes the stigma out... kids no longer what to be pulled out of class, you have to find a way to do it within the classroom setting. Having sensory trailers outside the school feels like there is care and attention on the matter but a gross understanding of what integrating sensory needs into the schools means... brain break stations, stemming areas, filter the darn lighting, stop treasure boxes and behavior charts posted in classrooms, don't just have flexible seating in the classroom let the kids actually use it when they needs it vs having to ask permission, that defeats the purpose... give the kids more autonomy over how they want to learn the given curriculum. We get stuck in our ways, but to keep kids engaged requires novelty and more play-based learning. Omit homework for younger grades to help prevent burnout and needs for homeschooling or unschooling, which then leads to unenrollment, time outside of school should be used cultivating other life skills. We all have much to teach these kids for them to become whole humans. Also, I understand that kids have to be in school to learn, but school refusal is real and there are simple things the school could do to help with this. Thank goodness my child has a wonderful teacher this year, she is what gives me hope for positive change in the school system. I desperately want my child to remain in public school, but at this time I don't think they will be able to meet her where she is... a complex child whose great gifts come with equally great struggles. I am always open to sharing our lived experience in hopes that it could further collaboration between parents and DCSD.	
2983	Since SAP is framed around enrollment trends, utilization, and long-range planning, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. I support addressing capacity needs at Dunwoody High School, but would like to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications before any closure decision. Vanderlyn currently has 475 students. There are only 283 spots between Dunwoody and Austin Elementary school. Where are our children going to go to school?	2/27/2026 12:14 PM
2984	Do not close Oak Grove Elementary. This school is a vital part of the community and a great resource for families, and a primary driver for families who chose to live in this neighborhood and the school's vicinity.	2/27/2026 11:54 AM
2985	Concerned regarding why the large amount of empty seats? Program and facility quality or unequal quality I feel contributes to south side school vacancies	2/27/2026 11:53 AM
2986	Please Do not close Oak grove elementary as more and more people Are Moving into this area for CDc and Emory. We need to fix oak grove up to house all the students in this area to encourage parents to send their kids here instead of private school	2/27/2026 11:45 AM
2987	Consolidations does not affect my current situation as my child is currently in an over capacity school.	2/27/2026 11:34 AM
2988	Consolidations was not suggested for my child's school so far. It is difficult to comment on another community's situation as I don't live there daily and know their schools.	2/27/2026 11:30 AM
2989	There are very few empty seats in the schools my children attend; they are currently using trailers to offset their overcapacity numbers. Sone schools, like Lakeside, drastically need a wholesale expansion of their facilities, with gyms that fit the entire school population for events and emergencies, sports fields and stadiums to reduce transportation costs and bring more funds to the schools themselves, and security fences around schools to better protect students. Closing and redistricting should occur where there are empty seats, and new construction should be for those schools with critical facilities needs. Additionally, safeguards need to be in place to ensure that, if a larger elementary school is built, we keep specials teachers to no more than 300-400 students each. An elementary school with 1000 students should have two teachers each for art, general music, and PE.	2/27/2026 11:29 AM
2990	From what we've been told, there is room in existing schools to welcome Kingsley students. Reassigning them starting next year would give families clarity, stability, and access to safer facilities and stronger resources right away. Making this move now would allow the district to avoid additional short-term investments in Kingsley's aging infrastructure. From a fiscal standpoint alone, delaying a decision increases the likelihood of spending funds on repairs for a school that may ultimately be closed or rebuilt. If rebuilding will truly take six years, most	2/27/2026 11:27 AM

	current Kingsley students will be in Peachtree Middle School by then. Reassignment now would allow them to finish elementary school in a consistent, supportive environment, without facing multiple moves. It would also be helpful to understand what boundaries would look like within the Dunwoody cluster for the three elementary schools. It's hard to see the bigger picture when focused on where my children could potentially end up.	
2991	You have absolutely botched this process from the jump. It was started under the leadership of a man facing fraud charges. That alone undermines all credibility. You're talking about facilities with absolutely NO consideration for the children and the families inside them. There is NO consideration being given to how these schools integrate into the fabric of their communities. It's okay to talk about closing schools, and what to do with aging infrastructure, but it has to be within the CONTEXT of the students. the STUDENTS must be put first. Instead you've started with concrete and stone. Student success starts with fostering what is working, like Evansdale Elementary's French STEM DLI program. It has been a huge success for these kids, instead we start with "oh well we're going to close Evansdale". This leaves families in a scramble who have made decisions, and often sacrifices to attend this specific, desirable program. It's so incredibly disrespectful to talk about buildings before programs, before children.	2/27/2026 11:19 AM
2992	I support the consolidation of facilities. However, I am against putting a halt to planned improvements to the HVAC system at Kingsley. Our students and facility have to suffer because of funds that should have been spent a decade ago to improve the system. Last year, they wasted a WHOLE day of learning time due to a system failure (when the whole school had to be relocated to Peachtree Middle for the day). It is unacceptable to expect our children to be successful when they're sweating in the warmer months and freezing when it's cold. Absolutely insane!	2/27/2026 11:13 AM
2993	I am deeply concerned about the plan to close Vanderlyn. Vanderlyn is a pillar of the community and a major reason that so many of us chose to move to Dunwoody. It is consistently regarded as one of the best elementary schools in the state. I acknowledge the need to consolidate schools. However, it would make *much* more sense to build a new school on the empty portion of Vanderlyn's land. There is a very large parcel of unused land on its property, including a huge open field, small playground and a very old gym. This could *easily* be the site of a brand new Vanderlyn (similar to what happened at Austin in recent years) and big enough to serve as a consolidation school for Vanderlyn, Kingsley, and some students from Chestnut or Dunwoody Elementaries that need to be moved. After the building on new Vanderlyn on this empty lot, the current Vanderlyn could be demolished to make room for Dunwoody High School expansion or parking as the city appears to want. This is a very workable solution! In addition, the traffic at Chestnut is very very bad, and forcing families from the more north Vanderlyn or Kingsley neighborhoods to commute to the Chestnut area will be a disaster for commutes. Chestnut also has substantially less room available to build on than Vanderlyn's vacant space. Please reconsider, strongly, the closure of Vanderlyn, a critical institution for our community. Thank you!	2/27/2026 11:07 AM
2994	Horrible, not fully thought through, terrible for communities	2/27/2026 10:40 AM
2995	Strong, stable elementary environments are important for students and communities, and I would like to better understand how this proposal supports long-term cluster planning. I support solutions for high school overcrowding, but it would be helpful to see complete modeling on reassignment, receiving school enrollment and capacity, transportation, and feeder impacts before decisions are finalized. Has Dekalb considered building more floors on Dunwoody High School to accommodate student size.	2/27/2026 10:36 AM
2996	Would like to keep neighborhoods intact and all attend the same school. I.e. Sexton Woods neighborhood should continue to go to Montgomery>Chamblee HS>Chamblee HS	2/27/2026 10:35 AM
2997	I'm concerned about the class sizes. Additionally, how will the class options, such as foreign language, arts, etc be impacted that some schools have and others do not.	2/27/2026 9:44 AM
2998	I understand and think it’s important to consider and evolve as needed. I’m open to it and appreciate the transparency with the process.	2/27/2026 9:40 AM
2999	Horrible idea	2/27/2026 9:29 AM
3000	We are not happy that Oak Grove Elementary is on the list to potentially be closed. Our kids went there and loved their experience. It is a sweet neighborhood school and should be at 96% utilization for the next school year. Many other local elementary schools are much lower and are not being considered.	2/27/2026 9:03 AM

3001	Both of our children have had amazing experiences at Vanderlyn Elementary School. We moved to our house and neighborhood specifically to be in the Vanderlyn district. It is also a safe route for our children and has minimal traffic, alleviating any safety concerns that would arise from them attending a different school.	2/27/2026 8:21 AM
3002	I do not like the idea of large elementary schools - I am not sure how large one would be if they consolidated into a middle school. Or a middle school the size of a high school. Wouldn't the commute be much farther for some students as well?	2/27/2026 8:15 AM
3003	Please leave Oak Grove Elementary open! It is beloved by our community and the many students that attend. The Oak Grove Elementary community is close knit with incredible staff and we don’t want to lose this community.	2/27/2026 8:04 AM
3004	If Kingsley remains open, what is the district’s plan to ensure students have safe, fully functional learning environments, including reliable HVAC? How will the district provide proactive and timely communication when building conditions or student routines are impacted? What transparent academic outcome data is being used to support proposed school consolidation decisions? What verified financial projections, timelines, and measurable savings justify consolidation, and how will those figures be publicly shared? What administrative or consultant cost savings have already been realized, and why are neighborhood school closures being considered before those efficiencies are demonstrated? How does the district plan to avoid leaving students in operational limbo while long-term facility and assignment decisions remain unresolved? How are community impacts — including student travel time, neighborhood stability, and family disruption — being weighed alongside cost efficiency? How does the district plan to expand Chestnut, Hightower, Peachtree & Dunwoody? If Kingsley is closed, what will they do with the land? If Vanderlyn is closed what will they do with the land?	2/27/2026 7:40 AM
3005	Oak Grove is one of the best schools in Dekalb county and should not be closed.	2/27/2026 6:50 AM
3006	I think that the closing of Oak Grove Elementary School, and the expansion of nearby Sagamore Hills and Briarlake Elementary Schools will cause terrible disruptions to our community. The traffic around all three schools is already a challenge on our winding one-lane roads for drop-off and pick-up. There is very limited parking space at all three schools too, not just for child drop-off/pick-up, but also for events at the schools. I live on Fairoaks Road, which has absolutely horrendous traffic back-up already. If children get moved from Oak Grove Elementary School to Briarlake Elementary School, the traffic flow will be unmanageable on my street, which is a major connecting road for the two schools. My husband and I work in the medical field, and we have already made accommodations to leave the house extra early in the mornings and return later in the evenings, to get to our essential job duties at Emory Hospitals and at The Southeast Permanente Medical Group. Changing the traffic flow further will absolutely worsen our commute and our daily lives.	2/27/2026 6:22 AM
3007	The proposal does not account for the fact that our two other local schools, Briarlake and Sagamore, don’t have the capacity to absorb Oak Groves students, especially since their enrollment has been increasing.	2/27/2026 6:13 AM
3008	It is unacceptable that the largest portion of consolidated schools are in the south side of the district. I support consolidated a smaller number of schools with the intention of capping elementary schools in the 700-800 student range .	2/27/2026 6:07 AM
3009	Oak Grove does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake’s current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake’s enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students	2/27/2026 4:08 AM

	over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
3010	Our two daughters went to Brockett all seven years and then graduated from Tucker High - on was Valdictorian. Both are now college professors Wake Forest and Agnes Scott. The proximity of Brockett was the main factor in our choosing Tucker. Where would students in the Brockett go? How much would transportation and busing costs increase? Brockett has land space and is easily expandable. This is a safe, stable community with excellent school support.	2/27/2026 1:17 AM
3011	Consolidating elementary schools together should prioritize schools that already feed together into the same middle and high schools. Lakeside cluster schools should stay together. Rezoning schools should be last resort. Buildings should have a theme and focus: stem, DLI, project based learning, etc	2/26/2026 11:08 PM
3012	Strong, stable elementary environments are important for students and communities, and I would like to better understand how this proposal supports long-term cluster planning. I support solutions for high school overcrowding, but it would be helpful to see complete modeling on reassignment, receiving school enrollment and capacity, transportation, and feeder impacts before decisions are finalized.	2/26/2026 11:06 PM
3013	I think the decision making process is senseless and has zero reasoning behind it. Ashford Park is one of the best performing schools in all of Dekalb county. There is room to expand the school in its current footprint. Furthermore, there is zero plan presented that speaks to where all the displaced children will ultimately end up.	2/26/2026 10:28 PM
3014	Oak Grove is the heart of the community and it would be detrimental to the community and students if it were closes	2/26/2026 10:27 PM
3015	Tough decisions but needs to be done; looks very reasonable	2/26/2026 10:17 PM
3016	I reject the notion that performance should not be considered. High performing schools should be protected, studied and replicated. It was stated that updates (i.e., Oak Grove Elementary's heating and ac) will be made anyway as the buildings would be used for other purposes. If correct enrollment data was used (what is included in your report is wrong) then there is no reason Oak Grove should be on this list. Our enrollment has continued to increase each year since covid. Put money into fixing our schools basic up keep and keeping our teachers (increase pay at least to match APS) and enrollment will increase. Oak Grove has land next to the school and an unusable blacktop that Dekalb has not maintained. This could be taken out and an additional wing could be added. We also have 100+ students on our school choice waitlist.	2/26/2026 10:13 PM
3017	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles	2/26/2026 10:05 PM

	includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
3018	I would like to see clearer data showing how this scenario aligns with the district's stated focus on enrollment trends and utilization at the cluster level. I understand the need to address high school capacity pressures, but sharing full reassignment and receiving school modeling — including transportation and class size impacts — would help families fully evaluate the proposal.	2/26/2026 10:00 PM
3019	Oak Grove Elementary is a school with extremely active parents (PTA) and Oak Grove Foundation with significant investment. The parents are hyper-active, dedicated, and have resources. If you need more resources (e.g., funding) to help make Oak Grove more viable, the parents would likely help via the existing Oak Grove Foundation or otherwise.	2/26/2026 9:55 PM
3020	Why are we closing nearly full schools and overcrowding?	2/26/2026 9:24 PM
3021	As a staff member at McNair High School and a proud Cohort 1 Ignite graduate, my decision to enter the residency program was deeply rooted in my own high school experience. I chose this path because of the love, mentorship, and unwavering support I received from my former teachers. Their impact shaped not only my academic journey but also my commitment to serve students in the same way. The legacy of Lithonia High School is unbreakable. It represents years of excellence, dedication, and community pride. It is disheartening to feel that the district may not fully recognize the generations of success and commitment that have come out of Lithonia. Schools like Lithonia are more than buildings — they are pillars of identity, tradition, and opportunity within our community. Additionally, I have serious concerns about the potential merger of Cedar Grove into McNair. Overcrowded classrooms directly impact instructional quality, teacher retention, and student achievement. The prospect of significantly increased class sizes is discouraging, and it would heavily influence my decision to remain in the district. I also have family members and friends who graduated from these schools and take immense pride in their legacy. For many of us, these institutions are personal. They represent history, sacrifice, and community achievement. At this point, any consideration of closing high schools feels deeply troubling. I strongly believe the district should prioritize keeping all high schools open. If restructuring must occur, thoughtful adjustments at the elementary and middle school levels may be more appropriate. High schools carry the legacy of the county. Closing any of them would not only disrupt communities but risk losing traditions and histories that cannot be replaced.	2/26/2026 9:20 PM
3022	The proposed plan to close so many schools in such a short time based on a projection analysis seems to have a high risk of not being able to adapt to future changes in enrollment trends. The County needs to be more transparent with the projections for impacts to the students and what inflection points are being considered. Is there any scenario that would cause a pause, slow down or reversal of this plan? Would it make more sense to trial a plan in the most affected school district before rolling out closures county-wide?	2/26/2026 9:14 PM
3023	Closing two Dunwoody Elementary schools with good enrollment makes our county less desirable for Atlanta area young families. The message Dekalb County is sending out is very focused on resources and saving money and lacks transparency or focus on maintaining the strong school systems Dekalb County is known for. Young families like my own move to	2/26/2026 9:08 PM

	Dunwoody every year for the school system, especially the elementary schools. As we see the crowding and use of many trailers at the high school and middle school, it is concerning that the County projections highlight the problems of low enrollment and potential underutilized space. Do these projections consider removing the reliance on trailers when considering the capacity of such overcrowded schools? Overcrowding and reliance on trailers should not be the expected norm. To gain support of the community in Dunwoody, this plan has to focus on maintaining strong education for the children not just disrupting their school, community, and education to save money. Expanding Chestnut Elementary school will be disruptive to the community without substantial traffic flow redirections/construction in that area. Already the middle school and Chestnut drop-off and pick-up causes major traffic delays in the corridor to 287 during rush hour. Adding hundreds more children would require a major re-routing of traffic.	
3024	I like the idea. School choice lottery shows 3-4 schools all families pursue ans get waitlisted. Parents aren't interested in a failing low resource school. The consolidation should benefit more families.	2/26/2026 8:52 PM
3025	Understood that some schools need to be considered for closure due to low attendance. However, Oak Grove has been the foundation and pillar of the community for almost 70 years. People, like us, have moved into the neighborhood specifically for the exceptional education and community involvement that reside here.	2/26/2026 8:38 PM
3026	I think smaller schools are warmer more productive environments for supporting students	2/26/2026 8:24 PM
3027	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	2/26/2026 8:15 PM
3028	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
3029	It is unclear to me how closing two schools in Dunwoody will impact our children. How will class sizes be impacted? Does the model allow for increases or steady state enrollment or does it require continuous decreases at the current rate? I am concerned that the choice to close two Dunwoody Elementary schools with good enrollment levels will exacerbate overcrowding in the middle and high school and lead to yet another school in our town reliant on trailers. Stable elementary schools are important for our children's education. Disrupting so many children's early education seems to be a very risky endeavor.	2/26/2026 7:28 PM
3030	Ashford Park is a close and special community, not just a school building. Closing APES would only be an option if the community as a whole was maintained at another school, with comparable level of schooling quality, and similar distance from home. With all that in mind, either expanding APES to keep the community together, or moving the school population as a whole to John Lewis Elementary, would be suitable options. Both options ensure our community stays together, and all can continue together to Chamblee MS and HS.	2/26/2026 7:14 PM
3031	We love Midvale as a neighborhood school.	2/26/2026 6:58 PM
3032	Care and consideration should be given to schools that have shown improvement in these trying times. Redan Elementary is the little school that could, it is growing steadily and it should be allowed to grow.	2/26/2026 6:58 PM
3033	I found the initial facilities scenario confusing and not inclusive of incorporating and considering critical data that goes into rating the success of schools and programs.	2/26/2026 6:55 PM
3034	There is value in the smaller elementary school. Smaller schools do not equal less value. For students with special processing or sensory needs, smaller schools are more nurturing and steady than larger schools. Smaller schools have a lot to offer and are a better fit for my children and their needs. I would think it would be true for many families, especially families with children who have 504 plans or IEPs. Small schools allow more teachers and staff to meet and know them more deeply and personally. It is less overwhelming.	2/26/2026 6:38 PM
3035	Smaller class sizes have been a meaningful benefit to our children at Coralwood. Consolidating away other schools, particularly high performing ones like Oak Grove, could potentially reverse that trend (encourage larger class sizes). Meanwhile home assessments for the tax base remains stable. Consolidating small, low performing schools might be the best option.	2/26/2026 6:32 PM
3036	Please do not close Oak Grove Elementary.	2/26/2026 6:25 PM
3037	While we are sad of Vanderlyn elementary is being considered for closure, a win/win scenario for homes currently zoned for vanderlyn would be to combine K-8 under one building in the new Austin elementary school building if possible. It addresses peachtree middle being a concern for parents zoned at a high performing elementary school district	2/26/2026 6:24 PM
3038	Incompetent. Absolutely destroying the Ashford Park & Drew Valley neighborhoods. Go back	2/26/2026 6:22 PM

	to the drawing board and do better.	
3039	Disappointed	2/26/2026 6:18 PM
3040	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	2/26/2026 5:57 PM
3041	Concerned of overcrowding and larger class sizes at neighboring schools if Vanderlyn closes.	2/26/2026 5:42 PM
3042	Upgrades done are very good	2/26/2026 5:38 PM
3043	Consolidating elementary schools is inappropriate. Young children don't need to be in bigger classes or placed in larger buildings such as middle schools or even made to use trailers. They need smaller classrooms and in a building meant for comfort and safe learning.	2/26/2026 5:12 PM
3044	Closing a school that has been a pillar of our community is changing the very fabric of it. Our elementary school is an anchor for the Oak Grove area.	2/26/2026 5:10 PM
3045	Ashford Park ES is a strong and connected community. I am concerned about the closure as it relates to separating the school community and potentially assigning our students to separate schools and or assigning to a new cluster.	2/26/2026 5:09 PM
3046	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
3047	I am worried about destroying the community at Ashford Park Elementary that is a school and community that we chose to live in based on the quality of the school.	2/26/2026 4:07 PM
3048	My initial concern with the consolidations is the different cultures that exist within the high schools currently. Although students have friends that attend different schools, there are rivals that exist as well. Students could possibly be forced into uncomfortable environments. Close proximity means nothing when you take into account how many different neighborhoods exist within the area.	2/26/2026 4:01 PM
3049	I think schools should not be consolidated because it will make it more difficult for students to commute to different schools. It is also important to have a nearby, community school with lasting teacher-parent connections.	2/26/2026 3:49 PM
3050	I understand the benefits to cascading use. What I don't understand is the priority being lower cost. The priorities from the triangle graphic provided should be small schools (lower student teacher ratios) and robust programs. Budget should be used efficiently, but not at the sacrifice of children being even more packed in to classrooms with fewer staff. I don't think any of this should move forward without data on projected student teacher ratios vs current.	2/26/2026 3:40 PM
3051	Opposed to Oak Grove closing, as the staff is phenomenal, and new kids are growing up in the neighborhood every year.	2/26/2026 3:35 PM
3052	I applaud the Planning Dept for taking a thorough look at capacity, enrollment and facilities. This plan is well thought out.	2/26/2026 3:33 PM
3053	I appreciate that we're using the same metrics for facilities consolidations and closures across the district to ensure equity. I would like to see more information on timelines and how the closures will be operationalized. For example, I have a child who is eligible for Pre-K next year, and theoretically would be going to Chesnut. In the 5-7 year timeline, his education could be greatly disrupted by the shifting and rebuilding, and it's really difficult to give more feedback. However, in general, I believe that the district will have to make some difficult decisions about closing schools.	2/26/2026 3:32 PM
3054	I think moving the kids from Hightower elementary into the Sequoyah cluster makes way more sense to free up much needed space at Peachtree Middle and Dunwoody High. Hightower is in Doraville, as is Sequoyah middle. It makes way more sense from a proximity and community aspect.	2/26/2026 3:16 PM
3055	Strong, stable elementary environments are important for students and communities, and I would like to better understand how this proposal supports long-term cluster planning. Since SAP is framed around enrollment trends and utilization, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. I support solutions for high school overcrowding, but it would be helpful to see complete modeling on reassignment, receiving school enrollment and capacity, transportation, and feeder impacts before decisions are finalized.	2/26/2026 3:02 PM
3056	Strong, stable elementary environments are important for students and communities, and I would like to better understand how this proposal supports long-term cluster planning. Since SAP is framed around enrollment trends and utilization, I would like to better understand how	2/26/2026 2:59 PM

	closing a highly utilized elementary school aligns with those metrics at the cluster level. I support solutions for high school overcrowding, but it would be helpful to see complete modeling on reassignment, receiving school enrollment and capacity, transportation, and feeder impacts before decisions are finalized.	
3057	Makes sense to consolidate but leave some room for growth.	2/26/2026 2:58 PM
3058	Not knowing what the impact on students would be if a building is shutdown makes it difficult to assess the impact in a vacuum. Specifically for Ashford Park Elementary, I believe closing the building would make a lot of sense if the current attendance was kept intact and moved to John Lewis Elementary. Further, I would be supportive if John Lewis Elementary was moved to the Chamblee Cluster to continue the continuity of the community in this cluster. These changes would ensure that the goal of removing a building could be achieved without adversely impacted the existing community. I actually believe Dekalb would receive significant support from the existing community with this type of move given the high quality of the John Lewis Elementary building.	2/26/2026 2:53 PM
3059	At first it seems shocking, that there would be a scenario to close the highest performing and most sought after school such as OGE. The outlay is very shortsighted.	2/26/2026 2:51 PM
3060	Oak Grove Elementary School needs to remain open. It is currently needed to support the area now and in the future.	2/26/2026 2:46 PM
3061	We love Oak Grove Elementary. My son is getting such a great education and experience there. He's excelling and being challenged. They've noticed and are addressing his speech needs. His aftercare and enrichments are wonderful. The principal all the way to the janitorial team are a delight and operate the school so well. I'm looking forward to my daughter having the same experience. I would be heartbroken if she didn't get the same opportunities. Our elementary school, Oak Grove, is a community and family that we are committed to and thankful for. Please do not close this school!	2/26/2026 2:43 PM
3062	I understand however very high performing walkable schools in community settings are invaluable and should be kept. If more grades need to be added that is fine.	2/26/2026 2:42 PM
3063	The major concern I have is what happens if and when the pendulum swings the other way. I understand wanting to right size and operating at 83% capacity certainly isn't optimal, but I'd much rather have it at 83% than 100.1%. What happens when charter schools close and we need more buildings and teachers and computers and footballs? The ebbs and flows of population are impossible to predict, and I'd hate for DCSD to make a decision today that they'll regret in 10 years. I read recently that six DeKalb County schools were removed from federal improvement list after years of progress. Certainly there's a long list of factors at play that helped the county achieve this feat, but I wonder how much reduced class sizes played a part. It would be a shame to get our classes up in the 32-35 range and lose the progress we've made. Of course, this decision is primarily about fiduciary responsibility. When it comes to economic change, everybody's got a magic lever they want you to push. Generally, though, when it comes to economic change, you don't push any one lever; you want to push a little on them all. I wonder if there's a combination of things we can do to help ease that burden. Is there a world where instead of 27 schools being affected, 10-15 are affected. We can raise property taxes slightly. We can make cuts in other areas.	2/26/2026 2:42 PM
3064	My daughter is a student at Livsey Elementary and we love our tight knit community. I don't think she would do well with 400 more children at her school. She does well in a small classroom size, where she gets one and one time with her teachers.	2/26/2026 2:34 PM
3065	Oak Grove is one of the primary reasons I moved into the district. It's a high quality public school with strong community support and closure of this school would be detrimental to the community overall. I also think it would materially impact the attractiveness of the area and lead to further reductions in public school attendance in the following years as parents likely choose private alternatives as a result.	2/26/2026 2:25 PM
3066	The impact of cascading wasn't discussed enough, as it clearly meant that the use of FCA/adequacy/utilization data to choose closure candidates was replaced by the impact of the choice in cascading. LOVED that there aren't any sacred cows in this initial scenario. But I think there will be a whole lot of them in the second round as powerful communities and Board members weigh in.	2/26/2026 2:21 PM
3067	I have heard that Livsey prides themselves on their small community feel as well as appropriately sized classes which is why we chose to buy a house in this particular school's	2/26/2026 2:16 PM

	zone.	
3068	I am very concerned that closing multiple Elementary schools in our area would compound the overcrowding at surrounding schools. From a parent's perspective, all schools are at capacity for class sizes in our town and all school buildings are in need of improvements. Especially those who have already been expanded with outbuildings. (Peachtree Middle School and Dunwoody High School) It would be good to hear about alternate scenarios for creating new additional larger buildings to accept the consolidation of students from multiple Elementary schools prior to closing individual buildings. It also would be very beneficial to know potential re-zoning boundary lines to better understand how the students will be dispersed. Will all Vanderlyn go to Austin Elementary? I believe that expanding existing elementary buildings using temporary outbuildings to house the new influx of students is in no way an acceptable solution. We chose to live in Dunwoody and specifically in our neighborhood because it is zoned for Vanderlyn. We chose that school not for its cinderblock walls, but for what was inside those walls. The teachers and staff really make that school exceptional.	2/26/2026 2:15 PM
3069	I fully understand the need to reorganize and reshape the school district to meet future demands and allocate resources more effectively. However, my primary concern with the initial facilities scenario is that it overlooks a critical factor: the quality of education for students. Schools are more than just buildings—they are communities with unique cultures that directly influence educational outcomes. Even with significant effort, replicating or improving a school's culture is a challenging task. For instance, Dunwoody High School consistently outperforms Peachtree Middle School, despite serving the same students. Numerous initiatives have been implemented to address this disparity, but meaningful improvement remains difficult to achieve. This highlights the importance of preserving and leveraging high-performing schools. In your proposed scenario, the plan to close Vanderlyn Elementary—a high-performing school—and expand Chesnut Elementary—a lower-performing school—appears to prioritize location over performance. While Chesnut's location in southern Dunwoody may seem advantageous, the focus should be on maintaining and expanding access to high-quality education. By keeping Vanderlyn open and expanding its capacity, the district could ensure that more students benefit from its strong academic culture and close proximity to Dunwoody High School. This proximity fosters a unique bond between the two schools, creating a supportive environment that benefits students at both levels. Ultimately, prioritizing performance over location would allow Dunwoody to maintain three high-performing schools, ensuring the best possible educational outcomes for its students.	2/26/2026 1:47 PM
3070	I think changing schools would be for the best. The school have a lot of damages and broken things here which isn't good for a learning environment.	2/26/2026 1:44 PM
3071	Closing schools to increase the size of elementary schools seems detrimental for our kids future. Less one and one attn, less parent involvement. OGE is a top preforming elementary school in the county, also MOST people move to this area for the school. The county is taking no consideration at the property values this will effect, driving more people to move OUT.	2/26/2026 1:30 PM
3072	Have you considered leaving 6th graders in elementary school & having 7-12 grade? For 6-12 grade model, how would you keep preteens separated from teens, like separate floors or wings?	2/26/2026 1:28 PM
3073	I understand the need to address high school capacity pressures and support thoughtful cluster-wide planning. At the same time, because SAP is presented as being driven by enrollment trends and utilization, I would like to see clear data showing how this scenario aligns with those measures. Sharing full reassignment and receiving school modeling, including transportation and class size impacts, would help families evaluate the proposal.	2/26/2026 1:25 PM
3074	While in agreement that there should be some consolidations, I believe it is important to consider communities and neighborhoods. Proximity to homes, commute times to schools and keeping schools in the current same clusters that most of us moved to a neighborhood because of.	2/26/2026 1:17 PM
3075	I do not like this. I feel like the scenarios do not make sense.	2/26/2026 1:12 PM
3076	I am surprised so many elementary schools in the Tucker area are being considered for closure. We have heard for a long time about the idea of consolidating Livsey and Midvale, which makes a lot of sense. It seems the other closures will have a disproportionately negative impact on Tucker as a community.	2/26/2026 12:59 PM
3077	I am concerned by the proposed restructuring, or elimination of the Cedar Grove cluster. From	2/26/2026 12:47 PM

	what I have read, these initial proposals are based solely on the building and enrollment. A lot of improvements have gone into the Cedar Grove HS building in recent years. What improvements have been made to the McNair HS building? Aside from proximity, what considerations have been made for the McNair building's capacity and parking to accommodate the additional students, staff, and parents/community for instruction and programs? What has been done to increase the educational adequacy of Cedar Grove HS cluster from elementary to high school. Is this a building issue or a qualified staffing issue? The Southwest DeKalb cluster currently has 4 elementary schools that feed into it, 2 in seemingly the same neighborhood. Therefore, I am in agreement with closing Bob Mathis ES.	
3078	The necessity to close 27 elementary schools within the county hasn't been demonstrated in my opinion. At this point more community impact study is necessary. Maybe think more about restructuring staffing, classing & use of current facilities in the traditional k-5 6-8 9-12 model.	2/26/2026 12:31 PM
3079	I have no opinion on consolidations. However, given the low building adequacy score (66%) and high enrollment projections (116%) for Huntley Hills Elementary, I would consider a new building for the school. I would be interested in knowing what the "facility additions" will be. If they are trailers, then I am highly opposed to expansion of this school and would prefer restricting the attendance area to keep it smaller.	2/26/2026 12:30 PM
3080	I am concerned about the downsides of larger schools/larger classrooms for personal and academic development. I am also concerned about the loss of ESL support programs, such as at Evansdale, knowing the multilingualism of this district. And I am concerned about the loss of language immersion programs, such as at Evansdale.	2/26/2026 12:20 PM
3081	I don’t really understand how consolidating multiple schools within the chamblee cluster will help with over crowding when most of the schools are already over crowded and the current suggestion to close the most overcrowded ES.	2/26/2026 12:19 PM
3082	rf	2/26/2026 11:52 AM
3083	I understand need to evaluate consolidations due to enrollment trends and budget considerations	2/26/2026 11:44 AM
3084	Oak Grove is a part of the fabric of the Oak Grove community. I went there as a kid. My parents live directly on Oak Grove Rd.	2/26/2026 11:42 AM
3085	It's worth remembering that bigger doesn't automatically mean better. Students have different needs, and many thrive specifically because of the smaller, more connected environments that schools like Vanderlyn provide. These neighborhoods were built around walkable, community-centered elementary schools and that's not incidental, it's foundational to why we chose the communities we did. Vanderlyn may be an older building, but it is well-cared-for and well-run. Our academic performance speaks for itself, and our administrators, teachers, and parent community show up consistently and invest in this school in ways that go far beyond what any metric can capture. Any honest evaluation of school performance has to account for more than square footage or seat counts. What makes a school truly excellent is its culture and the trust between families and staff, the relationships built over years, and the sense of belonging that students carry with them long after they leave. These are not things you can pack up and move to a new address. Closing Vanderlyn to relieve overcrowding at Dunwoody High School, or simply because other schools are undercapacity, would mean dismantling a high-functioning elementary community to solve a problem it didn't create. Vanderlyn appears to be part of this conversation for one reason: its proximity to the high school. That's not a planning rationale, it's a matter of geography. Before Vanderlyn is seriously considered as a solution, we ask that every other option be thoroughly explored and clearly documented. Our community is willing and ready to be part of that conversation but closure should be the last resort not a starting point.	2/26/2026 11:32 AM
3086	I fully support long-term facilities planning aimed at resolving the overcrowding at Dunwoody High School. However, to ensure the continued success of the cluster, I would like to understand the reasoning behind closing a high-utilization elementary school—particularly since the SAP emphasizes enrollment trends and the efficient use of space.	2/26/2026 11:29 AM
3087	I am not please to hear that you all are closing the schools and moving schools around in the South DeKalb area.	2/26/2026 11:23 AM
3088	It's also important to recognize that larger schools aren't always better schools. Not every student thrives in a large environment, and our communities were built around the kind of close-knit, accessible elementary schools that Vanderlyn represents. Many of our families	2/26/2026 11:09 AM

	walk to school. Our building, while older, is exceptionally well maintained. We have strong test scores, dedicated administrators, and an incredibly engaged parent community and PTO that invest deeply in this school every single day. I would be doing a disservice to this process if I didn't urge you to consider everything that goes into making a school truly high-performing — because it isn't just a building. It's culture, trust, relationships, and years of intentional community-building. Those things cannot simply be relocated or recreated overnight. Closing Vanderlyn in order to expand the footprint of another school or Dunwoody High School would mean dismantling a thriving, high-performing elementary community to solve a secondary capacity problem. We ask that you please consider every alternative before putting Vanderlyn on the table. I think it's fair to say our school community would be happy to work with you in that regard.	
3089	I am a strong advocate for long-term facilities planning that solves the overcrowding at Dunwoody High School. To ensure the cluster's success, I'd like to understand the rationale behind closing a high-utilization elementary school, especially considering how the SAP prioritizes enrollment trends and efficient space usage.	2/26/2026 11:08 AM
3090	I support addressing overcrowding at Dunwoody High School and want strong long-term facilities planning across the cluster. Since SAP is framed around enrollment trends and utilization, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. Before any closure decision, it would be helpful to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications.	2/26/2026 10:59 AM
3091	I support addressing overcrowding at Dunwoody High School and want strong long-term facilities planning across the cluster. Since SAP is framed around enrollment trends and utilization, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. Before any closure decision, it would be helpful to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications.	2/26/2026 10:46 AM
3092	Largely Unneeded. Repurposing schools is fine but completely closing so many schools feels excessive, especially if the buildings will not receive secondary purposes or uses. Also a concern for the staff members that may be displaced due to consolidations, closures or relocations.	2/26/2026 10:38 AM
3093	Too many high performing schools that are close to full are closing	2/26/2026 10:00 AM
3094	They are not accurately researched and will leave kids at a disadvantage.	2/26/2026 9:58 AM
3095	The sweeping closing of neighborhood schools seems detrimental to students and families, especially those who are low income. Small class size allows for deeper relationships to develop between teachers, students, and families, which will lead to better educational outcomes. Also, the value of having a school in walking distance, especially for those without reliable transportation (as is the case for many families who attend McLendon Elementary) cannot be overstated. This decision to close so many neighborhood schools will undoubtedly cause distress for families and educators, and will leave families with very few good options for where to send their children (namely charters, large elementary schools that are far away, or private schools). I believe that other areas to cut (for example, administrative positions and spending) need to be explored thoroughly and sincerely before exploring the closing of these neighborhood schools.	2/26/2026 9:28 AM
3096	Since SAP is framed around enrollment trends, utilization, and long-range planning, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. I support addressing capacity needs at Dunwoody High School, but would like to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications before any closure decision.	2/26/2026 9:19 AM
3097	I like the idea of consolidating underutilized and underperforming schools.	2/26/2026 8:58 AM
3098	We loved when our kids attended OGE. The smaller environments gave our kids a boost to learning.	2/26/2026 8:48 AM
3099	This is a scary process for all, I think. Crowding is definitely going to put a strain on the teachers and any paraprofessionals present for our children. Last year, my student encountered having the class restructured due to overcrowding. This disrupted my student because having to learn different requirements for each teacher (the way the information is being taught), changes in routine which was disruptive on it's own, the teacher not having all	2/26/2026 8:46 AM

	the things needed in order to proficiently have a well-balanced class, having to restart friendships (my students community) and wondering why they're having to move. Is very disruptive and causes chaos along the way.	
3100	Your proposal is to close several of the best performing schools at the elementary and middle school level, and roll those students up into other schools. Given that those other schools are lower performing, you would be doing those students affected a severe disservice. Focusing on the real estate and ignoring the students, teachers, and quality of education is short sighted and asinine. If you want what is best for the student, then focus on the student. The focus on the bulding and real estate proves only that the focus is on the budget and not the students.	2/26/2026 8:45 AM
3101	Oak Grove and Lakeside need to remain open. They are important factors for Epilepsy buying property in this area.	2/26/2026 8:38 AM
3102	I understand the need to address high school capacity pressures and support thoughtful cluster-wide planning. At the same time, because SAP is presented as being driven by enrollment trends and utilization, I would like to see clear data showing how this scenario aligns with those measures. Sharing full reassignment and receiving school modeling, including transportation and class size impacts, would help families evaluate the proposal.	2/26/2026 8:34 AM
3103	I am concerned about the actual buildings that are middle schools being used for elementary. For example, McNair Middle School changed into an elementary school. This school is very dangerous and not suitable for elementary students especially the little ones.Most of the classes have glass walls and some of the rooms have garage doors that open to the outside.	2/26/2026 8:29 AM
3104	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	2/26/2026 8:28 AM
3105	I think the plan for our LHS cluster makes sense. People are upset of course about OG potentially closing but I get it. We have so many tiny schools in our area close together and no one wants it to be theirs. Our OG campus is on a hill and I don't even see how you would expand it, update facilities, offer more programming as it is. The campuses of SHES and BES are more suited to this. If our staff is given the opportunity to stay with our population that may potentially move, that would likely calm folks' nerves. I hope we gain more programming out of this consolidation with a higher student population honestly. I won't be at the elementary level by the time this happens so it won't affect our family. But my concerns lie more at the top with	2/26/2026 8:02 AM

	Lakeside being so overcrowded. Please address this within your next wave of communications so that we are the long range plans helping all our school levels.	
3106	It’s scary, but if it will give my children a better opportunity, I’m supportive. The current situation doesn’t allow individual learning and there are too many distractions.	2/26/2026 7:57 AM
3107	I do not see how school consolidation can be anything but bad for our children. Larger classes and further commutes. It's not that we hear amazing reports about Evansdale Elementary, but the closeness of the school helps it feel local and more community empowered. Consolidating schools takes some of that local community feel away since it attempts to cover a larger area for a given school.	2/26/2026 7:09 AM
3108	I recognize the fiscal and operational challenges of maintaining approximately 110,000 seats for fewer than 92,000 students. However, consolidation should not be treated as the default solution without fully accounting for long-term demographic trends, projected population growth over the next decade, and the potential for enrollment rebound in certain clusters. DeKalb County continues to experience residential development and shifting housing patterns. Any reduction in facilities must be weighed carefully against projected increases in population to avoid creating capacity shortages or overcrowding in the future. Closing schools now, only to face rebuilding or redistricting again later, would be fiscally inefficient and disruptive to families. If consolidations are considered, they must be approached with extreme caution and grounded in transparent, long-term enrollment projections. Priority should be given to: • Preserving strong academic programs (IB, STEM, CTAE, fine arts) • Minimizing disruption to established feeder patterns • Avoiding overcrowding in receiving schools • Ensuring equitable access to advanced coursework and extracurriculars • Evaluating how growth projections may impact capacity needs within 5–10 years Any proposal should include clear transition timelines, staff retention strategies, detailed transportation impact analyses, and measurable academic performance benchmarks. Families and educators need assurance that consolidation is improving opportunity — not simply reducing square footage. The proposed 6–8 year phased approach suggests the district understands the complexity of these changes. However, ongoing, transparent communication will be critical to prevent enrollment loss due to uncertainty and to maintain community trust throughout the process.	2/26/2026 7:02 AM
3109	I appreciate the effort to consider our entire county school system like an ecosystem with many, many variables, and to do so publicly in an honest manner.	2/26/2026 6:16 AM
3110	I am not in favor of the current scenario of closing so many elementary schools and busing young children so far from their homes.	2/26/2026 4:18 AM
3111	Robert Shaw theme school continued to be a high performance school. In addition it is a model school to participate the community and students parents as well as other stake holders. The other ineresting issue is this school embraces the students and the community with varieties of culture. It is best in my opinion support and even develop this school to be a best practice facility for others not only for academic purpose but also as an example in multicultural/surrounding community participation.	2/26/2026 12:25 AM
3112	Do not close oak grove elementary	2/25/2026 10:41 PM
3113	Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	2/25/2026 10:28 PM
3114	No. Please leave as is.	2/25/2026 10:16 PM
3115	As a former student of both Evansdale Elementary and Henderson Mill Elementary, I understand the difficult position the district is in regarding enrollment decline and facility usage. I appreciate that long-term planning requires thoughtful evaluation of all options. Both the Evansdale and Henderson Mill communities are strong, stable neighborhoods with long-standing investment in their schools. However, Evansdale has consistently demonstrated a particularly strong academic culture, experienced faculty, and a positive learning environment. My personal experience there reflected a high level of instructional quality and community engagement that should be carefully considered in any restructuring decision. If consolidation between these two schools becomes necessary, I respectfully urge the district to prioritize preserving the stronger-performing academic environment and facility that best supports long-term sustainability. A thoughtful merger that maintains the strengths of Evansdale while accommodating enrollment realities could protect educational quality while achieving fiscal	2/25/2026 10:12 PM

	responsibility. It is important that decisions are not based solely on building capacity, but also on demonstrated school culture, instructional strength, and long-term neighborhood stability. Transparent data on projected enrollment trends and facility investment needs over the next decade would greatly help families and homeowners understand the reasoning behind any recommendation. These schools are foundational to their surrounding communities. Any consolidation should aim to strengthen — not dilute — what is already working well. Thank you for the opportunity to provide input.	
3116	Sagamore and Oak Grove thrive because of their size. I think our students and teachers will suffer due to overcrowding if SHES and OGE are combined.	2/25/2026 9:47 PM
3117	I believe it's unfair to close so many Southside schools and expecting students to be bused.	2/25/2026 9:35 PM
3118	Oak Grove is a closely connected community school with great teachers and one of the highest rated schools in Dekalb county. There's tremendous parent involvement, attentive teachers and faculty, and overall sense of community within the school.	2/25/2026 9:16 PM
3119	We love Vanderlyn. It's a very good school with lots of community involvement and support. We're one of the best schools in the state and should continue forward with that strength, even if we're not 100% full. Vanderlyn is a diverse, academically strong, and inclusive community. Preserving stable elementary environments aligns with district priorities.	2/25/2026 9:04 PM
3120	I'm alarmed about Ashford Park closing when SAP has indicated said that the first consideration for closure is underutilization. I understand that it's an older building and over capacity, but there are several others in the district facing similar challenges that aren't on this list. That said, my No. 1 priority is keeping our community together. My children are currently thriving with friends, activities and the teachers and after-school program coordinators at APES. I'm very concerned that if they're split up from the community that they're education will be affected. We, like many other families, also moved here to be in the Chamblee cluster. So, my second priority is staying within that cluster and maintaining a positive trajectory for my child's education. If we have to move buildings to stay together and in that cluster, that's less of a concern of mine.	2/25/2026 8:05 PM
3121	I'm disappointed that the announcement of closures didn't come with solutions on where to put the students currently enrolled at a school said to be closing. It's difficult to provide feedback if we don't know what some of the alternatives are. That said, my priority is to keep the Ashford Park community together. We've built a supportive network of families and teachers, and I see my child thriving. I also fear that a disruption to that community could greatly impact my child's education and well-being. I also moved here so that my child could be in the Chamblee cluster, and I know a lot of families feel the same way. I fear that if we're taken out of that cluster, families will move away or go to private school, which would affect funding for the district and community we live in.	2/25/2026 7:49 PM
3122	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. 3126	I don't think it is a good idea because it will cause confusions among the students and parents. No one has talked about where and what schools are the high schoolers are going to attend if the high schools are going to be made middle schools and the middle school are going to be elementary schools.	2/25/2026 6:54 PM
3127	I don't like grades to be changed. like the way are now	2/25/2026 6:22 PM
3128	Many of the schools on the list are part of the charm of the school system as they are local facilities that families can easily walk to. Closing them would hurt the neighborhood element that is so cherished.	2/25/2026 6:16 PM
3129	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to 88%. Oak Grove is already at 89%. The projected enrollment for 26-27 would put them at 96%.	2/25/2026 5:58 PM
3130	The City of Tucker has seen community improvements over the last two years. The consolidation of schools will decrease community cohesion, disproportional impact economically diverse communities, and will detract younger families. Studies have shown, 1) Impacts on housing markets -- families with elementary children often prioritize proximity to	2/25/2026 5:49 PM

	schools when buying homes. The neighborhood schools anchor property value, provide more community gathering space, provide more time together like when walking to school, and build community identity. 2) Transportation and Traffic Effects - Transportation cost increases may offset some projected savings from closures. Also, longer bus rides adversely impact on students' cognitive ability, increase stress and fatigue, reduce academic engagement, reduce participation in after-school activities, take away family time, increase absences, and increase traffic burdens to neighborhoods and main city roadways. 3) Smaller neighborhood schools may be under resourced, however, they promote stronger community bonds, stronger teacher-student relationships, greater safety (larger student body leads to an increase in behavior issues and security concerns), less stress, and greater sense of belonging even among diverse groups. It is a tradeoff that our family is willing to make. Our quality of life in our neighborhood and community is better with a smaller, less resource school. I am afraid closures will lead to homeschooling cooperatives to promote continued neighborhood communities or flight to other districts. The City of Tucker would suffer due to increased traffic and loss of continuity in neighborhood communities. (https://www.frontiersin.org/journals/psychology/articles/10.3389/fpsyg.2026.1672841/full) (https://phys.org/news/2025-11-students-school-bus-affect-academic.html) (https://doi.org/10.1016/j.econedurev.2018.12.005)	
3131	The primary concern is maintaining SMALL community elementary schools.	2/25/2026 5:32 PM
3132	No closures needed!! These are neighborhood schools with great scores & community interaction.	2/25/2026 5:23 PM
3133	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	2/25/2026 5:21 PM
3134	I strongly feel that oak grove elementary is a pillar of our community and the reason we moved here. Without this school, we would consider moving out of dekalb and opt for aps or private	2/25/2026 5:18 PM
3135	If the objective is to address underutilization, Oak Grove is not a logical candidate. It already meets the district's utilization target and is projected to rise further based on sustained multi-year enrollment growth. The closure plan also appears to assume capacity that does not exist at nearby schools without disruptive boundary shifts or capital expansion. Given the active residential pipeline and significant job and investment growth in the area, any model that leans heavily on pandemic-era enrollment patterns should be updated to reflect current recovery and	2/25/2026 5:15 PM

	planned development. Closing a top-performing, increasingly utilized school would introduce avoidable disruption while doing little to solve the underlying utilization gap.	
3136	Oak Grove is not an underutilized school, and its enrollment trend points toward full capacity in the near term. Closing it would create an immediate placement problem: the nearest receiving schools do not have enough available seats to absorb Oak Grove's students without major boundary realignments, overcrowding, or new facility investments. At the same time, documented housing redevelopment and major institutional expansion in the surrounding corridor indicate that enrollment pressure is more likely to increase than decline. In that context, closing Oak Grove does not meaningfully address underutilization and instead shifts the district into a new capacity constraint.	2/25/2026 5:09 PM
3137	his is a great school and always has been. This school should stay open That is why we moved to this area	2/25/2026 5:02 PM
3138	Oak Grove Elementary, the neighborhood school that my children attended, does not meet the criteria for closure. It is *not* underutilized. And projections for the incoming years are only greater utilization. Nearby schools are also near or above utilization goals. Sagamore Hills and Briarlake cannot absorb the school population.	2/25/2026 4:55 PM
3139	I am deeply disappointed in the decision to close Oak Grove Elementary. As one of the highest-performing schools in DeKalb County, with strong parent involvement and dedicated teachers, OGE is being unfairly impacted by a broad policy that overlooks its success. Small elementary schools foster stronger learning outcomes and tighter community connections. Many families are already hesitant about larger schools; expanding elementary populations will likely push more families toward private options and discourage new families from moving to the Oak Grove area—hurting property values and weakening community ties. Oak Grove offers a uniquely supportive environment: a principal who knows students by name, teachers who regularly engage with parents, and enriching art, music, athletics, STEM, and literacy programs—many supported by parent funding. It is a thriving school community. Enrollment has increased for four consecutive years and is projected to reach or exceed capacity within 2–3 years. Academically, Oak Grove ranks among the top schools in the review group: • Content Mastery: 94.2 (4th of 26; Top 10 countywide) • Readiness: 95.3 (2nd highest reviewed) Closing a school that exceeds utilization targets, shows sustained growth, and performs at a top-tier academic level does not resolve district-wide capacity concerns and may create new ones. If Oak Grove closes, most students would be reassigned to: • Sagamore Hills (91% utilized; 43 seats available) • Briarlake (73% utilized; ~130 seats available) Together, these schools cannot absorb 447 students without boundary changes, overcrowding, portables, or new capital investment. Closing Oak Grove would remove a high-performing, growing school; fail to address broader utilization gaps; strain neighboring schools; and potentially require additional spending. In a growth corridor, this decision risks creating new overcrowding challenges within just a few years.	2/25/2026 4:54 PM
3140	Our family moved to Oak Grove 10 years ago with the hopes that our future kids would go to Oak Grove Elementary. My son just started PreK at OGE for the 2025-2026 year, so this is our first year taking advantage of this amazing school. That is how impactful of a school OGE is. It is small but mighty. It has tremendous parental support. The foundation pours into these kids, hence the high-performing scores across the board. My husband and I both attended DeKalb County schools for elementary, middle, and high school. Nothing makes us more proud than to have a school like OGE in our county to show us we have made progress. OGE is more than just a school, it's a community that is strong and pours into its youth.	2/25/2026 4:52 PM
3141	Oak Grove is not a school that should be closed. Oak Grove is currently operating at a 89% utilization rate and is projected to be at 96% next year. If Oak Grove closes, students would be absorbed by Sagamore Hills and Briarlake, and those schools do not have the capacity to take in displaced Oak Grove students.	2/25/2026 4:48 PM
3142	Oak Grove does not appear to be an underutilized school: it is already around the district's utilization target and is projected to approach full capacity within the next few years. Closing it would shift hundreds of students to nearby schools that do not have sufficient available seats without significant boundary changes, overcrowding, or facility expansion. Given the documented residential pipeline and major corridor investment that will likely increase enrollment, projections should be recalibrated to reflect current growth trends. In that context, closing a high-performing school like Oak Grove does not directly address the district-wide utilization gap.	2/25/2026 4:40 PM
3143	* Oak Grove already meets utilization targets and is projected to near full capacity soon. *	2/25/2026 4:38 PM

	Nearby schools lack enough open seats to absorb Oak Grove without major boundary changes or expansion. * Local housing and institutional investment suggest enrollment pressure will increase, not decline. * Oak Grove is a top-performing school, so closure adds academic and community costs without solving underutilization.	
3144	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	2/25/2026 4:36 PM
3145	Oak Grove is not underutilized and is growing toward full capacity, so closing it would not meet the utilization goal and would likely force overcrowding and disruption at nearby schools, especially given planned housing growth and Oak Grove's strong performance.	2/25/2026 4:31 PM
3146	Would like to see Oak Grove Elem stay open, its a great school, high level of community and parent involvement, great teachers and great admin. There is a huge amount of value in having a school so close to home.	2/25/2026 4:03 PM
3147	Bad idea	2/25/2026 3:56 PM
3148	I am okay with the consolidations as long as it doesn't negatively impact student learning.	2/25/2026 3:33 PM
3149	I do not believe that the schools proposed to stay open will be able to absorb the schools that are proposed to close. Specifically, Sagamore hills and Briarlake will be over capacity if they need to absorb Oak Grove. Further. Closing high performing schools will drive more people away from DeKalb county and lose money for our school district.	2/25/2026 3:23 PM
3150	Not in agreement.	2/25/2026 3:18 PM
3151	The math for closure in Oak Grove, Briarlake & Sagamore cluster does not make sense, because enrollment is at healthy levels in these schools. Oak Grove is not underutilized and likely will continue to grow, post-COVID. New growth in businesses like CHOA and Emory mean that homes in the cluster area become even more desirable for jobs with parents of school-aged children.	2/25/2026 3:17 PM
3152	We are deeply upset that oak grove elementary is on this list. It's a pillar of our community and the number one reason we moved to this area from outside of dekalb county.	2/25/2026 3:03 PM
3153	I do not want Oak Grove Elementary to be closed	2/25/2026 2:58 PM

3154	1) 2nd round absolutely needs to consider school performance metrics and not solely be building based. 2) justification needs to be provided on how DCSD can afford the many renovation and expansion projects being proposed vs. maintaining the status quo. 3) justification needs to be provided on capacity of architect, engineering, and construction firms to be available to do this large amount of work in the 6-8 year timeframe. 4) justification needs to be provided on how students in a closed school will benefit from moving to a new school. Is consolidated school in renovated, bigger, and better facilities? Does consolidated school have a good performance track record? How will staff transition? How will staff be selected to transition to consolidated school? 5) It's not acceptable to simply move students from one older, poorly maintained school to another older, poorly maintained school. Any movement of students needs to be to better and improved facilities. 6) Projections should include a factor for students leaving the district as a result of this process. 7) Magnet schools like Kittredge should be examined as to whether they should continue. It's unfair to drain students from otherwise well functioning schools to magnets. It's not fair to exclude magnet schools like Kittredge from this first round. 8) something needs to be done to address equity issues in the Lakeside cluster. Some schools are very high income while others are at poverty-level. DCSD should consider 1-2 large, new elementary schools in Lakeside cluster to better resource all students and narrow access gaps. Equity will not change if higher income schools stay together. Northlake mall property should be considered for this new ES. Equity differences are very apparent once you move to Henderson Middle so anything that can be done early in the elementary level to address these gaps would be huge. 9) justification needs to be provided on how DeKalb property owners can financially afford the needed improvements. 10) at some point, DCSD needs to acknowledge that there has been major fiscal and operational mismanagement that has gotten us to where we are today with underenrolled schools. It's not solely due to declining birth rates. In particular, the district's response to COVID, hiring/firing of superintendents, and Board leadership needs to be addressed. 11) explanation is needed to address why Oak Grove ES was selected for closure on a facility basis vs. other nearby ES. Performance metrics should absolutely be considered as Oak Grove is a high-performing school. 12) clarification needs to be provided by the District as to how the community-funded improvements at Oak Grove ES will be addressed. How will parents be made whole if the facility is closed?	2/25/2026 2:55 PM
3155	As a parent at Oak Grove elementary who has also experienced a larger local public elementary school with another child, the model OGE has in place has been exceptional. I do not see a scenario that would provide an improved experience or education for my child. In fact, all alternate options would very likely provide a degraded experience similar to what we experienced with my first child and we would likely leave the public school system.	2/25/2026 2:22 PM
3156	I would like to see clearer data showing how this scenario aligns with the district’s stated focus on enrollment trends and utilization at the cluster level. I understand the need to address high school capacity pressures, but sharing full reassignment and receiving school modeling — including transportation and class size impacts — would help families fully evaluate the proposal.	2/25/2026 2:10 PM
3157	Closing Ashford Park Elementary is a bad idea considering how well integrated the school is in the community, how well the school performs, and how little an alternative would suit the needs of the already at capacity elementary school.	2/25/2026 2:10 PM
3158	Oak Grove does not align with the stated objective of addressing underutilization. The district’s goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: Sagamore Hills: 413 / 456 (91% utilization) Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake’s current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake’s enrollment organically. Documented residential pipeline within 2–4 miles includes: Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: +50 students → ~83% utilization +100 students → ~90% utilization Continued buildout	2/25/2026 2:08 PM

	→ potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: $1.5B Arthur M. Blank Hospital campus ~4,500 employees (including ~1,000 new jobs) $87.7M Emory Heart & Vascular expansion Ongoing Emory hospital expansion $1.1B in FY24 research awards $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
3159	We are probably in this situation to begin with due to bad zoning.	2/25/2026 2:05 PM
3160	Since SAP is framed around enrollment trends, utilization and long range planning, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. I support addressing capacity needs at DUNWOODY HA but would like to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications before any closure decision!	2/25/2026 1:52 PM
3161	As someone who has been very informed during this SAP process the last 20 months, this announcement to close schools caught me by surprise. I understand school systems (former public school teacher) and I understand why you need to close/consolidate under utilized schools- this list is WAY above the projected number of schools you said it feels it came out of left field. This is especially the case for those of us in the Ashford Park school community. Is our school Old? Yes. Are we over crowded and know SOMETHING has to change? yes. But saying you are going to close our school (which is thriving and high performing and chosen over private in our area for some) WITHOUT saying exactly where students AND staff would Go or what our school would be used for (given we just began a 26 million dollar Reno) feels mismanaged, uninformed and careless. I remember at a meeting with Dr Sauce and Sarita Smith in the fall, they both shared that they wanted to build the trust back with the district after Horton was indicted. This is NOT the way to do it. We all feel like the SAP committee at this point is a guise and you all are going to do what you want whether the communities want it or not.	2/25/2026 1:51 PM
3162	Strong, stable elementary environments are important for students and communities, and I would like to better understand how this proposal supports long-term cluster planning. I support solutions for high school overcrowding, but it would be helpful to see complete modeling on reassignment, receiving school enrollment and capacity, transportation, and feeder impacts before decisions are finalized.	2/25/2026 1:48 PM
3163	shi idk	2/25/2026 1:31 PM
3164	• Community Feedback Process The format of gathering community feedback for this first iteration of scenarios has been concerning. The SAP committee and broader community were informed that multiple scenarios would be presented; however, only one option was shared. Providing meaningful feedback is challenging when alternative scenarios are not available for comparison. Additionally, presenting information solely about buildings—without simultaneously addressing boundaries and programs—creates confusion and uncertainty. If a building is proposed for closure, families understandably want to know where students will be reassigned. While some cascading use was identified in the south, the absence of this detail in other areas has increased anxiety. Additionally, I have concerns regarding the structure of the community meetings. Flyers advertised the sessions with the message: “Your voice matters; share feedback on potential school closure and consolidation scenarios.” However, no public comment period was allowed during virtual meetings or the 3/22 meeting at the AIC. Also, restricting comments and questions that are school- or cluster-specific is problematic. If the intent is to gather insight from communities about unique priorities or context that may not be apparent through data alone, stakeholders must be given the freedom to speak to those specifics. Finally, the timeline raises questions about how community input will meaningfully inform the second iteration. The survey collects responses through 3/8, and the revised scenarios are scheduled to be presented to the Board on 3/16. In the HPM video, it was stated that “The community voice is just as important as the data.” Given the short turnaround time, it is difficult to understand how feedback can be thoroughly analyzed and incorporated. If the second iteration does not visibly reflect the majority of community input, trust may be further	2/25/2026 1:24 PM

	strained. _____ • Scope and Utilization The SAP committee was originally advised to expect between 8–24 school closures. The current proposal lists 27 schools. This level of reduction appears more aggressive than previously communicated. If the stated goal is to operate buildings at 85–90% utilization, the current projections do not seem to support that outcome. For example, in the North—specifically within the Dunwoody, Chamblee, Lakeside, Druid Hills, and Cross Keys clusters—if all proposed elementary closures were implemented (assuming expansions increase capacity to 984 seats per elementary school), utilization would reach approximately 106%. This exceeds the target range and raises concerns about long-term sustainability. _____ • Ashford Park Elementary as an Outlier As explained in the HPM video, the criteria for elementary school closure included: 1) Underutilized buildings, 2) Schools that could be absorbed through cascading use, and 3) Schools with low building adequacy located near facilities with excess capacity. By this rationale, many of the proposed closures are understandable. However, Ashford Park Elementary appears to be an outlier. Ashford Park is located in a high-density neighborhood and is currently operating at approximately 175% utilization. Enrollment projections for next school year exceed 900 students, which contradicts the forecasted decline suggested in the HPM model. There is no neighboring school with sufficient excess capacity to absorb 843 students. John Lewis Elementary, located 1.1 miles away, has 817 students in a 984-seat building—leaving insufficient capacity to accommodate Ashford Park's 843 students. Other neighboring schools are more than 3 miles away, which presents significant logistical challenges due to roadway and traffic constraints. Additionally, Ashford Park is currently undergoing a $26 million renovation. If the building were to be repurposed, it would require retrofitting to serve a different student population, raising concerns about whether the current investment represents the most strategic use of funds. _____ • Clarity on Cluster Alignment For Ashford Park families to support the proposed scenario, greater clarity is needed regarding the cluster feeder pattern. Specifically: Where will the 843 students be reassigned? Will the community remain intact or be divided? Will the current student population (not necessarily the building) remain within the Chamblee Cluster? For the majority of families, maintaining alignment with the Chamblee Cluster is a higher priority than preserving the physical building itself. Clear communication about the cluster trajectory would allow the community to make a more informed decision. _____ • Trust and Transparency DCSD faces a trust challenge due to past financial irresponsibility and lack of transparency. As a result, some community members approach large-scale initiatives such as SAP with skepticism. Given this context, presenting only a portion of the overall plan heightens concern. During the 3/24 virtual meeting, Sarita Smith stated: "We're chunking the information. We could have presented it all at once with our plans for buildings, boundaries, and programs, but thought it would be too much to digest at one time." This approach may lead stakeholders to conclude: 1) A comprehensive plan already exists but has not yet been shared. 2) Community input may have limited influence if the overall framework is already determined. 3) The community is being shielded from the full scope of change, which can feel dismissive—particularly to SAP committee members who have invested more than 20 months in this work. At the 1/21 Board retreat, McGinnis noted, "If you come to our communities with half a plan, people will feel like you're trying to pull one over on them." Despite this warning, the current approach risks reinforcing that perception and missing an opportunity to rebuild trust. Moving forward, providing more comprehensive detail—even if the information is difficult—would demonstrate respect for stakeholders and strengthen credibility. Transparent communication, paired with genuine incorporation of feedback, is essential to restoring trust.	
3165	Vanderlyn is a very well performing school with a lot of passionate parent involvement. I think closing Vanderlyn would be a mistake.	2/25/2026 1:12 PM
3166	I think we should make sure communities have schools. Busing kids outside their communities allows for more disconnect.	2/25/2026 1:10 PM
3167	It seems like some grades will not get the same attention they would get in traditional scenario.	2/25/2026 1:07 PM
3168	Pro	2/25/2026 12:37 PM
3169	Elementary schools thrive when there is community. Young children need to develop relationships with their peers to thrive. They cannot do this in a large environment when their cohort may live 10 miles away. My own neighborhood elementary was repurposed years ago (Warren Tech) so we already have to drive a significant way. This is why I used school choice to put my child in a different school (Evansdale), which thanks to absurd lines is actually	2/25/2026 12:36 PM

	closer. Now you want us to drive 5 miles each way along major highways to get my child to school. This is too far to develop community, to forge relationships that will help my child thrive. Do not close small schools. Fix the facilities. Spend less money paying off superintendents. Take the bloat out of admin and use the money for the children.	
3170	It makes sense to consolidate facilities.	2/25/2026 12:07 PM
3171	We are currently zoned for Chamblee MS and HS. The facilities scenario concerns me because ultimately we would like our son to remain zoned for these schools in MS and HS even if Ashford Park were to close. Please note that while distances to neighboring schools are small in this part of the county, traffic is very heavy and it may take quite a while to reach other schools that are nearby, and I am not sure if that is a factor that has been taken into account when proposing a closure to Ashford Park. That being said, time to get to school is much lower on my priority list than staying in the Chamblee cluster.	2/25/2026 11:41 AM
3172	I support addressing overcrowding at Dunwoody High School and want strong long-term facilities planning across the cluster. Since SAP is framed around enrollment trends and utilization, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. Before any closure decision, it would be helpful to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications.	2/25/2026 11:36 AM
3173	I support addressing overcrowding at Dunwoody High School and want strong long-term facilities planning across the cluster. Since SAP is framed around enrollment trends and utilization, I would like to better understand how closing a highly utilized elementary school, which is one of the top performing elementary schools across the district, aligns with those metrics at the cluster level. Before any closure decision, it would be helpful to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications.	2/25/2026 11:33 AM
3174	The amount of new apartment and townhouse construction in NE Dekalb County renders a current decision to close local schools as one that will be regretted in the long run. Also, given that many schools in the county are mediocre at best, perhaps the county should consider leaning into smaller populations to boost instruction and learning outcomes, instead of moving to larger class sizes with attendant negative impacts. The closing of Oak Grove Elementary, an award winning school, would be detrimental to the neighborhood. Dekalb should take time to understand the explosive expansion of private schools in the 30033 are (eg arbor and Clifton schools) — the kids are here, why are their parents choosing private schools and will the proposed plan make this situation better or worse ?	2/25/2026 11:04 AM
3175	Don't close any school and continue to build the communities of DeKalb County	2/25/2026 10:54 AM
3176	There are a lot of consolidations being presented and the current scenario and feedback opportunity does not differentiate between under utilized schools and other schools in this list. I am supportive of efficiently using Dekalb school buildings and resources. If a school building is not full and does not have enough staff support we should consider consolidation. I do feel that we are missing an important perspective here and that is community. Consolidating schools and making kids drive or bus 5 miles to elementary school does not promote community. Dekalb needs to assess their values and where the funding is going more strategically - $72m for a new school building can truly pay for a lot of school nurses and counselors.	2/25/2026 10:38 AM
3177	I understand the cost effectiveness and better utilization of staff and resources, but I feel that moving from smaller schools to consolidating reduces the sense of ownership and pride of students and families which leads to less involvement. Students and families feel overwhelmed by the larger buildings and number of students.	2/25/2026 10:26 AM
3178	Vanderlyn’s inclusion on the planned closure list is wholly out of touch and antithetical to student welfare	2/25/2026 10:24 AM
3179	It’s not to dirty	2/25/2026 10:21 AM
3180	I think it's very difficult to consider the closing of schools without having the knowledge of where those students at the "closing schools" would be diverted to.	2/25/2026 10:20 AM
3181	I fine	2/25/2026 10:13 AM
3182	Good	2/25/2026 10:12 AM

3183	N/A	2/25/2026 10:10 AM
3184	None	2/25/2026 10:06 AM
3185	Not a good idea these schools are TOO small and it’s TOO many kids. Leave it how it is.	2/25/2026 10:06 AM
3186	Great	2/25/2026 10:04 AM
3187	I don’t think merging schools is necessary. Some of the buildings are already small. My school can barely fit the students we have now, so adding more would just stress everybody out. We already have bus issues — most of the buses are packed and can’t hold more people. It would just make everything more chaotic.	2/25/2026 10:03 AM
3188	Currently indifferent, changes may not happen to my school within the time left I am enrolled.	2/25/2026 10:02 AM
3189	idk	2/25/2026 10:00 AM
3190	N/A	2/25/2026 9:59 AM
3191	I feel as if it’s too much to have a lot of students in one school. Unless we are remodeling the schools to make them bigger then sure but if that is not the case then it is not point of doing it bc everything is going to cost money either way it would go.	2/25/2026 9:59 AM
3192	??	2/25/2026 9:56 AM
3193	Based on the provided search results, the initial facilities consolidation scenarios often focus on "bright-sizing" to address declining enrollment, reducing the cost of empty seats, and shifting funding from maintenance to student support. However, these plans frequently face resistance due to concerns over long-term community impact and logistical challenges	2/25/2026 9:56 AM
3194	eh	2/25/2026 9:55 AM
3195	neutral	2/25/2026 9:52 AM
3196	good	2/25/2026 9:46 AM
3197	Its good	2/25/2026 9:43 AM
3198	If Kingsley remains open, what is the district’s plan to ensure students have safe, fully functional learning environments, including reliable HVAC? Why was the previously approved HVAC renovation paused, and why were families not directly informed before this decision was made? How will the district provide proactive and timely communication when building conditions or student routines are impacted?	2/25/2026 9:36 AM
3199	I think it’s a good idea to consolidate underutilized and underperforming schools. But I fear it may make the classroom sizes larger and less manageable for the teachers.	2/25/2026 9:29 AM
3200	I don't think Kingsley ES should close or be a repurpose school because I believe that this building is still in good standards despite the HVAC problems.	2/25/2026 9:15 AM
3201	I do think that some students work better in a small school environment but I understand the financial concerns. My biggest worry is gerrymandering. I would like to see school zones drawn appropriately to create truly diverse communities - staying close to a 50/50 split of economically advantaged and economically disadvantaged. This creates a healthy school and community where students have abundant access to ESOL, gifted, accelerated, special education, etc classes. A school with too little of any (class and/or student population) will not be a healthy school or community long-term; families will have to make tough decisions about leaving. Every single pocket of DCSD needs STRONG access to EACH of these programs in EVERY school.	2/25/2026 9:01 AM
3202	I really just want our cluster to remain the same. My children are at Ashford Park and Kittredge. I am more focused that we keep our community intact through high school. If you need to adjust buildings or locations of any of the elementary schools, I am fine with that.	2/25/2026 8:54 AM
3203	I don't think closing some of the high performing schools on the list is the right decision. You can't recreate a school community and teaching staff overnight. School community is important to student success.	2/25/2026 8:38 AM
3204	With me understanding the reason why but I feel it’s not good to combine students middle school and high school. Consider that the students feel it’s unfair, not to say that students are	2/25/2026 8:02 AM

	better then other but to put kids that has rough backgrounds with other students that have never experienced it’s not good at all.	
3205	I think that we should keep these schools. All the kids that are in high school right now have memories placed in these elementary schools. I think that if DeKalb County could improve some measures in their schools, that the amount of students can increase.	2/25/2026 7:25 AM
3206	It makes sense to close facilities so that you aren't wasting money on running schools that are under enrolled. I do not fully understand the process you are proposing though--especially the part about coverting some spaces to other levels. Why is that happening?	2/25/2026 6:30 AM
3207	I think it would be a mistake to close Vanderlyn. There is such a great community established and our daughter has absolutely loved her first 2 years there. I would like to see clearer data showing how this scenario aligns with the district’s stated focus on enrollment trends and utilization at the cluster level. I understand the need to address high school capacity pressures, but sharing full reassignment and receiving school modeling — including transportation and class size impacts — would help families fully evaluate the proposal.	2/25/2026 5:00 AM
3208	I think this scenario is extremely short sited and a panic reflex to the board and administrators horrible mismanagement of money and resources.	2/25/2026 3:42 AM
3209	As much as you say this is just a conversation starter not a decision, it doesn’t feel that way from the meetings. It is near impossible to get community buy in based on a physical structure alone. Much like church, “we” are the school. Decisions being made without considering the programs, academic performance, demographic population, surrounding neighborhood, etc. will only lead to further decrease in school enrollment. Parents choose a school based on more than the physical building.	2/25/2026 12:04 AM
3210	I do not think this is a good idea.	2/24/2026 11:45 PM
3211	I’m deeply concerned that this haphazard closure scenario appears to prioritize freeing up land over educational quality, student stability, and academic outcomes. The numbers suggest the board plans to reduce capacity in the Dunwoody cluster below current demand—leaving roughly 500 students without seats in permanent buildings—and potentially rely on overcrowded schools or trailers, which undermine learning conditions and are more costly to sustain long term. What’s needed is a clear, accountable action plan that prioritizes adequate, high-quality learning environments before any closures move forward.	2/24/2026 11:31 PM
3212	Please close this fuck booty ass school I beggeth you dekalb 💔🙏	2/24/2026 11:21 PM
3213	I think it's a terrible idea. Closing Vanderlyn would be wrecking the community that supports the highest performing elementary school in the county.	2/24/2026 11:21 PM
3214	Happy to see no changes planned for Hawthorne which is a great neighborhood school.	2/24/2026 11:11 PM
3215	The initial list creates large gaps within the county and will immediately create overcrowding as schools begin to close and consolidate, even if the plan is graduated over many years. The quality of education and school experience will be greatly diminished. While many will not have the option, a large percentage of parents will strongly consider leaving DCSD altogether. This may also lead cities within the county to explore creating their own school districts. And this will hamper the ability to invest in the facilities that remain, leading to a cycle that would take significantly more investment to recover from - a mistake Dekalb County has made many times over. Keeping the facilities that close to be used for other purposes is a bad idea, the county residents do not want to replace our schools with community centers. Any board member supporting the idea is mistaken; the people they represent do not support that. Frankly, the board, DCSD and county leadership has already failed if we are having this discussion.	2/24/2026 11:09 PM
3216	I have serious concerns about any proposal that includes closing Vanderlyn Elementary School. Vanderlyn is the top-performing elementary school in the county, well-enrolled, and strongly supported by families. Consolidating or closing a school that is academically successful and stable does not appear to strengthen the district. Before moving forward, the district should clearly demonstrate the long-term financial savings, the projected enrollment impact, and how overall academic performance will improve. Without that evidence, closing a high-performing school feels counterproductive and short-sighted.	2/24/2026 10:27 PM
3217	I think closing lower performing schools is great but I worry about overcrowding impacting performance at schools that kids will be sent to.	2/24/2026 10:21 PM

3218	Please put Vanderlyn students into Austin especially neighborhoods that are already partially zoned for Austin.	2/24/2026 10:07 PM
3219	Dear Dekalb County School District, We are quite appalled at the Dekalb County School Board's decision to consider closing two of Dunwoody's neighborhood schools. This decision is distasteful on many levels: - Kingsley elementary was a big reason for us to move to Dunwoody, a true neighborhood school, not perfect but balanced and child-oriented. - The prospect of being redistricted into Chestnut is not bad but will cause significantly more traffic on Peachtree Rd. - Much worse, as we live in 30360 we face a real risk of being redistricted into Hightower, a school with a 93% low income population. This will mean anyone in Dunwoody 30360 with sufficient means will seek other school options or leave, decimating home values. At least one neighbor is already considering leaving town over the proposed change. - All this bad news in the face of school taxes rising significantly every year We call for better representation for Dunwoody residents and awareness of how the proposed change will negatively affect our lives and livelihoods. Sincerely, Meghan and Sam Alter 5046 Heatherdale Ln Dunwoody, GA 30360 312-898-2942	2/24/2026 9:51 PM
3220	Hasty, with no public comment and no stated criteria	2/24/2026 9:43 PM
3221	Since SAP is framed around enrollment trends, utilization, and long-range planning, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. I support addressing capacity needs at Dunwoody High School, but would like to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications before any closure decision.	2/24/2026 9:22 PM
3222	Strong, stable elementary environments are important for students and communities, and I would like to better understand how this proposal supports long-term cluster planning. I support solutions for high school overcrowding, but it would be helpful to see complete modeling on reassignment, receiving school enrollment and capacity, transportation, and feeder impacts before decisions are finalized.	2/24/2026 9:09 PM
3223	Our family was very hesitant to send our kids to public school in Dekalb as we had heard a lot of negative chatter in the community but we decided to give it a try knowing we could always pivot and we have loved our Hawthorne Elementary. We love that our school is in the middle of a neighborhood and feels safe, that we can walk there from our home and mostly we love the size. We love that the school is small and we have felt we could really get to know everyone and feel known by the staff. We are grateful that the classrooms don’t feel overcrowded and when it is a larger class or more IEP heavy there’s lot of extra support. We love that we know our principal and she knows us and all the other families in our school as well. Given the consolidation scenarios, I am just not sure how we could maintain so many of those factors that we have loved about our experience at Hawthorne. While I am not personally an educator I am related to several and they all have always said larger schools are worse for kids and students and I trust their combined 75 years of wisdom. (My sister and 3 aunts are in education in Georgia).	2/24/2026 8:58 PM
3224	Since SAP is framed around enrollment trends, utilization, and long-range planning, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. I support addressing capacity needs at Dunwoody High School, but would like to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications before any closure decision.	2/24/2026 8:54 PM
3225	Closing Oak Grove Elementary, a bastion for STEM education, would be a truly devastating decision. I moved into this community specifically so my children can attend Oak Grove Elementary. We would be losing one of our greatest pillars by closing the school.	2/24/2026 8:48 PM
3226	I am strongly opposed to the consolidations. Neighborhood schools and small schools provide more benefits than the additional programs, ESPECIALLY for elementary. Unless it’s very extreme (not the case in Tucker OR Dunwoody/Chamblee) - schools should not be consolidated. If the school is half capacity, sure- look. But otherwise that capacity is fairly arbitrary and larger than most parents want.	2/24/2026 8:28 PM
3227	I believe you will create over crowded classrooms. Smaller setting can produce effective learning	2/24/2026 8:23 PM
3228	I am concerned about the potential closure of Vanderlyn Elementary. While I understand there are many factors that go into this decision (which I outline in my below comments), I feel like it would be a real loss to the community. Vanderlyn is an amazing school because of the	2/24/2026 8:17 PM

	administration, staff and community that has been built. One of the things that makes it so special is the size. Having a small Elementary school has been the only reason we have stayed in public school. My older daughter in 2nd grade has ADHD and anxiety. Having this size school has made it extremely helpful for her to feel comfortable. Both of my daughters are in the gifted program and I am concerned that in a larger school they would not be challenged and would be overwhelmed with the number of people.	
3229	This is too drastic. This process needs to be SLOWED down. It seems rushed and uncaring.	2/24/2026 8:00 PM
3230	I'm ok with consolidating schools as long as students are not bused overly long distances.	2/24/2026 7:23 PM
3231	From our own personal experience of transitioning from a smaller sized school to a school 4x the size, the academic achievement of students begins to decrease as as the class sizes increase and scaled attention from teachers decreases.	2/24/2026 7:08 PM
3232	All of the explanations were based on data that focused on filling up buildings. What about the quality of education? We should make decisions based on THAT data that is relevant to EDUCATION.	2/24/2026 6:56 PM
3233	I support addressing overcrowding at Dunwoody High School and want strong long-term facilities planning across the cluster. Since SAP is framed around enrollment trends and utilization, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. Before any closure decision, it would be helpful to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications.	2/24/2026 6:48 PM
3234	I amd concerned that there are populations in lower socioeconomic groups that will be disproportionately affected. In addition, I amd concerned with the loss of community schools and creation of mega elementary schools. I dont think that creation of mega schools creates a good learning environment.	2/24/2026 6:42 PM
3235	I don't want it to happen	2/24/2026 6:39 PM
3236	Not happy about losing our neighborhood school	2/24/2026 6:34 PM
3237	It's needed...we need to save money, however I think it could also be a good thing to use the facilities for other things etc.	2/24/2026 6:31 PM
3238	Not on board with closing these schools.	2/24/2026 6:29 PM
3239	Ok with consolidation of two middle schools into a high school	2/24/2026 6:25 PM
3240	I am concerned about the sizes of these schools. Oak Grove elementary is the perfect size for elementary age kids. I think we have done a disservice to our kids by making the middle and high schools way too big. It's time to bring the neighborhoods back and stop spending so much money on executive offices for the dekalb county central office staff.	2/24/2026 6:13 PM
3241	Obviously I was incredibly disappointed to see Vanderlyn included on the list given it's standing in the community/neighborhood, diverse student population and historically high academic achievement. Given the criteria for which schools were or were not included, it is hard to see how VES was on there - naturally I understand that ramifications outside the walls of VES come into play (HS overcrowding, etc.), but those remain rather obscure and I would assume that any information re: downstream impact on classroom sizes, student reassignment scenarios, etc. would and should be shared publicly and with parents before any final decision is made.	2/24/2026 6:07 PM
3242	I have a lot of questions	2/24/2026 6:05 PM
3243	I think consolidating makes sense with building repairs needed and declining enrollment. Glad the community gets feedback.	2/24/2026 6:04 PM
3244	I support addressing overcrowding at Dunwoody High School and want strong long-term facilities planning across the cluster. Since SAP is framed around enrollment trends and utilization, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. Before any closure decision, it would be helpful to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications.	2/24/2026 6:01 PM
3245	Concerned about important programs no longer existing, such as DLI	2/24/2026 5:45 PM

3246	The lack of students in seats can be an opportunity to provide more catered curriculums for students and less stress on staff/teachers and admin	2/24/2026 5:44 PM
3247	In instances where the enrollment rates aren't low and the reason listed is just because excess capacity is available doesn't seem to be a valid reason when there are several other schools with lower current/forecasted enrollment rates. Also in case where a school has a low adequacy score but then is indicated to be modified that seems conflicting. Why not just make the modification(s) without closing the school.	2/24/2026 5:12 PM
3248	My child would be entering kindergarten in 2027-2028 school year at McNair, which is considered for closure. My concern is the timeline of final closure and rezoning decisions being made to ensure a proper transition into the school system.	2/24/2026 4:45 PM
3249	How is it that nowhere is it mentioned that smaller elementary schools provide a better school environment and better student outcomes? These studies are easily found. Certainly, larger schools are more cost effective from a facility standpoint. However, for the students themselves, it is hard to make a case for an elementary school with over 500 students. The only thing in your literature that addresses what is best for the students is “Improve support for diverse learner needs through more intentional differentiation and targeted Interventions.” What exactly does this mean, and how does it benefit the students who are being disrupted? If you close Vanderlyn, where will these students go? What about those students who are at Vanderlyn on a school choice voucher? Please provide this information. If one of the reasons for closing Vanderlyn is the needs of Dunwoody High School, please elaborate on how the space would be used. (Parking or more athletic fields is not an acceptable reason!)	2/24/2026 4:41 PM
3250	I support addressing overcrowding at Dunwoody High School and want strong long-term facilities planning across the cluster. Since SAP is framed around enrollment trends and utilization, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. Before any closure decision, it would be helpful to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications.	2/24/2026 4:34 PM
3251	I don’t think you should have schools that 6-12. Keep the sixth graders in elementary school l in longer if need be and do K-6. Or even PK-8.	2/24/2026 4:10 PM
3252	Seems ok?	2/24/2026 4:07 PM
3253	I would like to know how the SAP process is connected to the DeKalb county strategic/economic planning process. The under enrollment in South DeKalb is related to underinvestment in the South communities. While maximizing schools is a good start, it is incomplete without neighborhood economic development. There are also resources like Georgia State that can be utilized as Early College draws to underpopulated areas.	2/24/2026 4:05 PM
3254	I don't agree with closing schools. I am concerned about class sizes becoming to large.	2/24/2026 4:01 PM
3255	We moved a 1.5 miles down the street to specially attend Ashford Park Elementary due to outstanding and dedicated staff and the staff to student ratio. This school has over 700 registered students and continues to exceed state and local testing. It would be a disservice to this neighborhood to close this school and consolidate to a larger population.	2/24/2026 3:53 PM
3256	I am very concerned about the initial scenario proposed by the SAP. Though I have concerns about all of the schools, I will be focusing this survey on the school my children attend, Henderson Mill Elementary School. I've broken my concerns out below: Large Elementary Schools -Based on the data here (https://www.dekalbschoolsga.org/divisions/operations/planning) and with the assumption that HMES would merge with either Briarlake or Hawthorne, we would be looking at approximately 900 students in an elementary school building. -large elementary schools make it very hard for the administration to have personal relationships with students and allow for students to be effectively lost in the system. Our current admin know my son, myself, even my daughter who isn't at HMES yet by name. They know the students and families that are struggling financially, they know the kids who are having issues at home. By almost doubling the size of the student body, there will be kids who slip through the cracks and whose struggles will go unnoticed. -Classroom sizes are already larger than they should be and it is negatively affecting students and teachers (https://www.nea.org/nea-today/all-news-articles/class-sizes-growing-issue-among-educators). While additional classes will obviously be required with such an increase in students, will the class sizes remain the same (20-25 students)? Traffic -With the assumption that HMES is merging into either Hawthorne or Briarlake, we can expect absolutely horrific	2/24/2026 3:44 PM

	traffic issues. Hawthorne is in the middle of a neighborhood. The residents of that neighborhood are going to have to deal with an estimated 200 additional cars (and buses) in the morning and afternoon in an area that is already congested due to Globe Academy. Briarlake is at the intersection of LaVista and Briarlake Road, a very busy throroughfare to residents trying to get either to I-85 or Lawrenceville Highway/285 area. Traffic on Briarlake Rd already gets back up to Twin Lakes regularly. Again, adding an additional 200 cars as well as buses is going to make this area impossible to drive through during the height of traffic Facilities -Any expansion is going to require a massive renovation, if not full tear down and rebuild, of these schools. There is no space at Hawthorne to expand so I'm assuming they would have to build up. Having a multi-story school for elementary is not ideal, especially for the younger students and students with disabilities. -Along with concerns about space in these schools, I'm also extremely concerned about the contractors that Dekalb County is going to hire to complete these renovations. Briarlake just had an entire HVAC replacement where they put the whole HVAC system on the roof. It looks terrible and according to families at the school, was done with shoddy work that was almost not completed in time for school to begin. I do not trust Dekalb County to hire good contractors and am concerned the contractors they do hire will overcharge for poor craftsmanship. Impact on Low income families -one of the best things about having a local, community school is that it is just that: local. Most all students are within walking/biking distance, and buses can easily and quickly get to and from school in a timely manner. Making our children travel further away from their homes to attend school will have the greatest effect on our low income families that do not have consistent transportation. Of course these children can ride on a bus to and from school, but at what time will they have to be picked up to get to a further school on time? Kids are already having to be at the bus stop by 6:10 to be picked up at 6:15 for some neighborhoods. If the additional travel time adds 10-15 minutes due to traffic, we will be having students waiting on a bus before 6 AM and getting dropped off at 4 PM. Also, these families will have a harder time getting to and from school events that they were previously able to walk or bike to. So with these increasing physical distances between students and their schools will come an increased social distance and lack of community. Finally I wanted to touch on the optics of this move. Everyone is very concerned with the decline in # of students attending Dekalb County Public Schools, but what will this move do to that? Families will not want to send their kids to our school in the coming years because they know they will be moved while their child is still in school. Those that have the means will send their child(ren) to private schools or charter schools so that they don't have to deal with the transition. I am sure we will see a drop in enrollment as soon as next year just because of the scenarios being presented. Families do not want to live in a gray area when it comes to their children's education and the "conversation" that has been started with these scenarios is making it hard for families to support the end goal of providing the highest level of education and support for all students at all schools.	
3257	Since SAP is framed around enrollment trends, utilization, and long-range planning, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. I support addressing capacity needs at Dunwoody High School, but would like to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications before any closure decision. Strong, stable elementary environments are important for students and communities.	2/24/2026 3:37 PM
3258	Us parent believe that large structures don't allow our students to thrive in the best way, especially in elementary schools. We believe schools which are performing best should stay open. We believe merging/closing neighborhood schools would worsen traffic, transportations issues, attendance and tardies. We believe a bigger school would also impact parent involvment and volunteering. Save our small elementary school and the DLI program that it offers. We believe the response to the decrease in enrollment should be smaller classes, increase Gifted programs and more custom education. Also increase the preK spot offered	2/24/2026 3:28 PM
3259	I agree w closing and consolidating	2/24/2026 3:27 PM
3260	My older child has just started at Henderson middle school and the number of students in 6th grade (400+) is incredibly overwhelming. My younger child is still at Oak Grove Elementary and one of the best things (about this otherwise excellent school) is the size. I completely disagree that creating fewer "mega" elementary schools puts the interests of the children or staff first. Everyone benefits from the small neighborhood elementary school — especially the students and the community.	2/24/2026 3:24 PM
3261	Poor decision to close Henderson Mill Elementary.	2/24/2026 3:22 PM
3262	Keeping Ashford park in the chamblee HS cluster	2/24/2026 3:17 PM

3263	Since SAP is framed around enrollment trends, utilization, and long-range planning, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. I support addressing capacity needs at Dunwoody High School, but would like to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications before any closure decision. I also want to know what would happen to displaced students from Vanderlyn and Kingsley should they be closed. There aren't enough seats between DES and Austin to absorb them all while over already overcrowded Chesnut expands - I imagine they'd have to rebuild completely and that could take a very long time. The high school wasn't marked for expansion, so I don't understand how closing Vanderlyn would help DHS. If there are thoughts of redistricting Chesnut and Kingsley to Chamblee - those schools are already overcrowded as well. Would school choice students be redistricted with their current home school or would they be returned to their home district?	2/24/2026 3:15 PM
3264	Strong, stable elementary environments are important for students and communities, and I would like to better understand how this proposal supports long-term cluster planning. I support solutions for high school overcrowding, but it would be helpful to see complete modeling on reassignment, receiving school enrollment and capacity, transportation, and feeder impacts before decisions are finalized.	2/24/2026 3:04 PM
3265	It's always my opinion that having fewer students, especially in the primary grades, is ideal.	2/24/2026 3:02 PM
3266	So very many on the list to be closed.	2/24/2026 3:01 PM
3267	I like the consolidation plan if the money saved goes to teacher raises and more support staff. I would like to see what the proposed savings would be and a plan for how we would use this money.	2/24/2026 2:29 PM
3268	Since SAP is framed around enrollment trends, utilization, and long-range planning, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. I support addressing capacity needs at Dunwoody High School, but would like to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications before any closure decision.	2/24/2026 2:25 PM
3269	Kinglsey is loved by parents and students, we moved to Dunwoody for the schoool choices. Don't close it. A simpler option, route Vanderlyn kids to Kingsley, then its closer to capacity since Vanderlyn is right next to Dunwoody Elementary. Do not rezone Dunwoody residents north of Peeler Rd. to Hightower Elementary. You will see a large uproar from the community backlash.	2/24/2026 2:22 PM
3270	As a current Oak Grove parent, and former teacher of 15 years myself in 3 different districts (2 in GA), I understand why OGE is being considered for closure. It is an amazing little school, and I am so thankful for it in all 3 of my kids' lives, but the facilities need updating, and there is no space for expansion. If I was a teaching candidate walking in for an interview there versus the big beautiful classooms I taught in in Roswell, I wouldnt be excited seeing the OGE facility as a potential workplace. I want my area schools to be able to attract excellent teachers by having a better facility and more support. I am actually excited about the possibility of our staff joining forces with either Sagamore or Briarlake to have an even better facility with more programming, address more needs, and offer more support for our teachers. Now I would not want to see our elementary schools become 800-900 seat spaces because teams of 8-9 teachers are a challenge to work on and communicate between. I have had that experience as a teacher myself and it IS hard. But that sweet spot of 500-700 to me, would be ideal. I am also concerned how other OGE parents are acting and talking about how OGE is better than all our area cluster elementary schools, in which our neighbors live. It reflects poorly on the rest of us. I know the value of our cluster and know that all our area elementary schools are good quality desirable places to send our children. Another concern though is how overcrowded Lakeside continues to be. PLEASE do not lose sight of how our older kids cannot use lockers, move in teh hallways or have enough opportunities to shine when there are only so many spots on the team, in the play, in the band, etc... for way too many kids who deserve opportunity. Please don't let the lower school reorganization take your eyes off of our overcrowded high schools and needed facility repairs too.	2/24/2026 2:21 PM
3271	I do no have enough information. You need to share where the closing schools will be re-zoned to before people can make an informed decision. Generally, I am supportive of consolidations, it makes sense. We just need more information on where those kids will be sent.	2/24/2026 2:19 PM
3272	I do NOT support a general movement away from smaller neighborhood schools into vast	2/24/2026 2:16 PM

	mega schools. This plan looks to shutter schools that are small and welcoming, and forcing students to travel to large schools that are not in their neighborhood. I am against this.	
3273	I am concerned about the kids who are enrolled in Vanderlyn via the School Choice Program. What happens to them if the school closes?	2/24/2026 2:14 PM
3274	Strong, stable elementary environments are important for students and communities, and I would like to better understand how this proposal supports long-term cluster planning. I support solutions for high school overcrowding, but it would be helpful to see complete modeling on reassignment, receiving school enrollment and capacity, transportation, and feeder impacts before decisions are finalized.	2/24/2026 2:08 PM
3275	Yes something needs to be done about the dropping enrollment. Closing and combining schools should be the last resort. Maybe redrawing attendance lines with a range of enrollment for elementary, middle, and high schools. Also look at cutting the budget outside of the classroom. Main office staffing should be cut before changing the schools.	2/24/2026 1:55 PM
3276	Since SAP is framed around enrollment trends and utilization, I would like to better understand how closing a highly utilized elementary school, like Vanderlyn, aligns with those metrics at the cluster level. Before any closure decision, it would be helpful to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications. I also understand the need to close schools that are not fully used, but Vanderlyn is at full capacity, and is a thriving school. I fail to understand why you would take an awarding winning school that is not under capacity and close it. I also feel that neighborhood schools are very important to the emotional growth of elementary children, and closing a smaller school to throw children into a large environment seems like a detriment to their emotional growth and stability.	2/24/2026 1:43 PM
3277	Makes no sense. Closing Henderson and expanding Hawthorne which is located in heavily residential area.	2/24/2026 1:26 PM
3278	I understand the necessity of combining some schools and closing Others but many times people buy homes in a certain area for the schools.	2/24/2026 1:13 PM
3279	What i have seen and witnessed (born and raised in South DeKalb county) I went to Flat Shoals elementary (one of the schools being closed) for kindergarten and then from there used the old school choice then known as M to M to go to schools in North DeKalb i.e Kittredgeand Chamblee. As with most things unfortunately, it's not so much as South DeKalb isn't growing as that many parents are choosing to send their children to other schools due to the inequity in our County. There are also parents moving to this area and choosing private school which is another downfall of gentrification. We need equity and possibly the North DeKalb schools wont be as crowded.	2/24/2026 1:01 PM
3280	Closing 2 elementary schools in Dunwoody would significantly shift the school culture in this area. Smaller, neighborhood schools help build a true community where parents are connected with the staff and teachers at the school as well as other parents. Consolidating to larger elementary schools that are further away would lose this sense of neighborhood community that many parents find valuable. Additionally, the traffic on N. Peachtree near Chestnut elementary is already very challenging. Expanding the school and the number of students will only serve to worsen the traffic in this area which is already a safety concern for students attending. Living in Dunwoody, if we are reassigned to Doraville schools, we plan to exit the Dekalb public school system through whatever means necessary.	2/24/2026 12:58 PM
3281	Closing Evansdale along with the French Immersion program would be extremely detrimental to Dekalb County. Learning French has been a vital element in my child's education, and I would like my younger children to have this option as well. It currently takes us 45 seconds to get to Evansdale and so I'm able to be involved by volunteering during the day, being part of the school's PTO, running fundraising efforts and picking up my child. If we were unable to keep our children at Evandale and were forced to go into Pleasantdale Elementary, I would pull my child from DCDS. If we were combined with Henderson Mill, but still in the Lakeside district, we would consider staying.	2/24/2026 12:53 PM
3282	This seems ok, but I think repurposing may be better suited than closing schools in Dunwoody.	2/24/2026 12:46 PM
3283	The current SAP would be detrimental to my family and our Evansdale students and community. We moved into the Evansdale-Henderson Mill-Lakeside neighborhood 10 years ago for the ideal neighborhood and school district setting. My daughter is just about to enter preschool and into the school system. Evansdale is less than a mile from our house with	2/24/2026 12:40 PM

	neighborhood friends also entering this system or already in the system. Our neighborhood has several renovated family homes on the market from families that are retiring or aging out of the community. Younger families will continue to move into these and other homes in the Evansdale area, and it will continue to grow and thrive if Evansdale is not closed. We are responsible parents and would be very involved in making sure our daughter gets the best education and experience at Evansdale, Henderson Mill, and Lakeside. We were planning on enrolling in either the STEM or French immersion program for our daughter. We highly desire an elementary school with a small student to teacher ratio right here in our community. This allows a more personalized and successful education where each student is valued and feels encouraged and safe. The data also shows that Evansdale is projected to increase in enrollment in the upcoming years. The expected increase in enrollment and already established French immersion and STEM programs make it an ideal school to remain open. Our students should not feel like numbers that can be moved into mega schools without the proper infrastructure or planning. Closing of Evansdale would mean an increase in traffic. This would require student drop-off and bus pick-up and drop-offs that cross busy, main roads that will only become more congested. This would decrease parents' ability to participate in school functions. Students should feel like valued future members of the community that will later encourage others to follow in their footsteps to stay in the DCSD. Many research also shows little to no academic improvement for these mergers which would be particularly concerning if merging into a school that already has poor academic standards. This plan would leave Evansdale unoccupied with no immediate plans for use. An abandoned elementary school would not help property values or encourage others to move into the neighborhood ultimately leading to a decrease in safety. People will also leave the county, decreasing home values and tax revenue. If this plan continues for Evansdale closure, we would have no choice but to investigate private school options or moving out of DCSD to obtain the proper education and community for our daughter. Thank you.	
3284	Stone Mountain needs their elementary school. The staff has worked so hard to care for the students and upgrade with help from the community, but the school needs more support.	2/24/2026 12:39 PM
3285	I think the direction to close elementary schools in favor of larger facilities is a mistake and bad for the overall Dunwoody community. I also find it largely unfair that Vanderlyn has been targeted due to being adjacent to the high school. Also, the value of moving into Dunwoody (recently) was for small public elementary schools, this is a very unwelcome development that seriously concerns us with the eventual quality of our children's educational journey amongst change.	2/24/2026 12:38 PM
3286	I strongly support keeping Vanderlyn Elementary open and preserving it as a PreK–5 school. Our family is now sending our fifth child to Vanderlyn, and the impact this amazing (and smaller) school has had on our family and our neighborhood has been profound. Vanderlyn is not just a building to us — it is a special community that has helped shape our children during their most important early years. Every day, I see moms and dads walking their children to school. The kids are happy here. They feel known, supported, and cared for. That is not something that can be easily replaced. One of the greatest strengths of Vanderlyn is that the staff is so special and truly able to support the students in a meaningful way. Because the school community is the size that it is, staff can handle the capacity in a way that allows them to give children the love, support, and education they need at these early ages. That kind of environment matters deeply for young children and for families. Please prioritize solutions that keep Vanderlyn open and maintain it as a PreK–5 school. Preserving this school means preserving the stability, relationships, and strong neighborhood community that help our children thrive. Thank you for including community input in this process.	2/24/2026 12:05 PM
3287	I understand the facilities scenarios and the cascading use. I believe that combining the cultures and academic performance of Laurel Ridge, McClendon and Robert Shaw is a great opportunity. However I am concerned about space.	2/24/2026 12:03 PM
3288	Please consider school performance in your decision to close schools. Vanderlyn is a high performing school and should not close.	2/24/2026 11:55 AM
3289	High school clusters should remain intact whenever possible. Communities are built around their high schools, and redistricting at that level has an outsized impact on identity, feeder patterns, athletics, and long-term stability. If changes are necessary, the district should strongly consider grandfathering current students to avoid abrupt disruption for families who have invested deeply in their schools. Families who prefer to transition should have that option, and siblings should be allowed to follow older brothers or sisters to maintain continuity	2/24/2026 11:50 AM

	and stability. Preserving cluster integrity and minimizing forced disruption should be a guiding priority.	
3290	I think it makes sense to close older/underutilized buildings	2/24/2026 11:36 AM
3291	The actions taken in behalf of the benefit of all students and the community. I will approve and support. Just remember that this situation could be temporarily and all those decisions are taken for the long run.	2/24/2026 11:35 AM
3292	I went to Brockett ES, and it saddens me to see it on the list. But I understand the reasoning. What I don't understand is why Livesy is chosen for expansion when it is on a) a busy road and b) on a smaller plot of land. Expanding Brockett, from a facilities standpoint, makes more sense. But I understand that the Livesy parents would have a cow at having to be bused *all the way* to Brockett. Dunwoody High School needs expansion. The gym cannot hold the entire student body for assemblies or pep rallies. The first all-grades pep rally in 10 years was held in Feb. 2026, and that was only possible because half the senior class checked out & went home, and because they asked students to "volunteer not to go." Students were farmed out to the library & classrooms for study hall instead of going to the pep rally. If Vanderlyn were to close, Dunwoody High School could expand onto the Vanderlyn lot. There could be a 9th grade academy, or an auxilliary gym, or a practice field for the marching band that currently practices in the parking lot (while there are still cars parked in it). Too many parents only focus on the negatives of "my kindergartener's school is closing" and not focusing on what it could possibly mean for their future high school student's experience. I think you should talk about the possibility of expanding Early Childhood Centers into some of the closed elementary schools. For instance, Kingsley & Ashford Park could be converted to ECCs for the Chamblee & Dunwoody clusters.	2/24/2026 11:32 AM
3293	Iam worry about my kids which school going to	2/24/2026 11:27 AM
3294	I have several concerns: - I have seen in a few different areas that for academic outcomes at the schools WAS NOT considreed. there are several schools that are top schools and have waiting lists due to demand that are on the list for closures - schools have been announced for consideration that without having anything concrete about what would happen to the students - the enrollment for our school (oak grove elementary) was incorrect. it makes me concerned about the quality of data being used to create the scenarios -	2/24/2026 11:24 AM
3295	Evansdale Elementary is an extremely important school in our neighborhood!!!!!!!! Parents are very very involved! Putting those students in another school would devastate students & families, especially students who are very well served & thriving at this school! It also has a dual language program which is rare in DeKalb.	2/24/2026 11:15 AM
3296	I am concerned about the many possible vacant school buildings which may become eye sores in our residential communities.	2/24/2026 11:01 AM
3297	Sharing that data without also sharing how dcsd will change curriculum or reduce district overhead is appalling.	2/24/2026 10:44 AM
3298	Generally I support consolidation of schools as long as decent geographical distribution is accounted for. It would not be fair for students in South DeKalb to trek 30 minutes across the county to attend school. I also think the road logistics around schools not considered for closing should be considered - Druid Hills High School, for example, has terrible congestion as it is. There should be a plan for relieving that congestion if it expects to take in more students, especially if bussing is not an option.	2/24/2026 9:52 AM
3299	What works best for the community. Are these students going to have the best opportunities when changing the schools	2/24/2026 9:52 AM
3300	I understand this is the first step, but there is just not sufficient information for the selection of some of these schools to be understood, considered equitable or the best decision for students and their communities. Kingsley Elementary is so close statistically to Chestnut, other than the future attendance projections which do not seem correct. Those schools data and outcome for the community could change drastically based on the boundaries. Instead of a very costly expansion to Chestnut, you could easily adjust the school boundaries to shift more students to Kingsley and have two fully utilized schools that meet the state threshold of 450. Furthermore, there's better land use surrounding Kingsley for expansion.	2/24/2026 9:13 AM
3301	I would like the scenarios to be readjusted. Each school has a purpose and its own individual talents.	2/24/2026 9:09 AM

3302	We moved to Dunwoody for the schools. We are heartbroken to see our kids school, Vanderlyn Elementary on the list for closing. I am concerned that the aggressive closures and shuffling of schools/staff/ administrators that is being considered will disrupt and dilute out our strong schools in Dekalb County. I think test scores and school performance should be taken into account when choosing what schools to close. I think it is too aggressive and quick. US birth rates dipped in 2020 but increased in 2021. I am concerned making such a large change based on a few years of data may put our public schools in a position where they can't go back if needed. I think closing so many schools so quickly will hurt our kids and lead to overcrowding and lower test scores. It a sewer pipe project takes five years in a neighborhood, I don't see how closing over 25 schools can take 6 to 8. Expansion of Chestnut Elementary is disruptive to the community as that school is on a main commuter road right next to 285. The traffic pattern for drop off at that school is chaotic (my kids do not go there but I drive past every morning to get to 285). Adding more students will cause major disruptions. It is also located right next to an overcrowded Middle school. The decision to close schools next to other schools that rely on old trailers does not seem to have the children's best interest.	2/24/2026 9:07 AM
3303	I believe that schools should be consolidated if there is not enough students in the individual schools.	2/24/2026 8:24 AM
3304	The schools do not need to be consolidated. It's good to have less students. Schools being at capacity is bad for learning.	2/24/2026 8:03 AM
3305	School consolidation can significantly impact students' mental health and sense of stability. What concrete plans are in place to increase access to social workers, counselors, mental health specialists, and coaches so that students—especially those with higher needs—are adequately supported?	2/24/2026 7:54 AM
3306	The scenarios fail to significantly consider the academic outcomes of existing schools and how they might be impacted. Oak Grove is the strongest performing school by academic outcomes. The scenarios focus more on logistics than student outcomes. How will the outcomes of Oak Grove students stay the same or improve by consolidating? If there is no plan for that, how can you suggest closing the school?	2/24/2026 12:56 AM
3307	Open to all ideas	2/23/2026 10:37 PM
3308	Currently my children were minorly affected by the recent changes across dekalb. However other children with may have struggled longer with the adjustment based on my observation. But Henderson Mill Elementary staff has done an excellent job is facilitating to the needs for those children. This team is amazing and loves there kids .	2/23/2026 10:35 PM
3309	I am writing to formally express my concerns regarding the SAP structural and safety protocols within our district. In light of the shifting social climate, the persistent threat of school violence, and the developmental challenges posed by the digital age, I believe a comprehensive restructuring of our schools is necessary to ensure the well-being of our students. I propose the following changes to our district's organizational model: I. Grade Level Realignment (Pre-K–12) To foster age-appropriate social environments, the district should adopt a standardized three-tier structure: • Elementary School: Pre-K through 5th Grade • Middle School: 6th through 8th Grade • High School: 9th through 12th Grade The intermixing of junior high students with high schoolers creates an unnecessary risk factor. By strictly separating these populations, we can better manage social hierarchies and implement security measures tailored to specific developmental stages. This separation is particularly vital in mitigating the influence of social media and preventing the introduction of contraband between older and younger age groups. Implementation of "Stair-Step" Bell Schedules We request a transition to a staggered start-time model that prioritizes adolescent health: • High School (Late Start): Biological research indicates that teenagers require later start times for optimal cognitive function and mental health. • Elementary and Middle School: These should follow in a "stair-step" fashion. This allows for more efficient transportation logistics and ensures that younger students are not navigating transit at the same time as older cohorts. Reduction of Class Sizes for Safety and Focus Current classroom densities are unsustainable in the modern social climate. Smaller class sizes are essential for: • Improved Security: Teachers can maintain better situational awareness, making it easier to identify behavioral "red flags" or unauthorized items. • Mental Health: In an era of constant "unwanted attention" from social media, smaller classes provide a grounded, intimate environment where students can focus on academics rather than social performance. The safety of our children depends on our ability to adapt to the realities of 2026. A school system that groups students by true developmental	2/23/2026 10:32 PM

	peers, respects their biological sleep needs, and provides small-group instruction is a system that can better protect them from both physical and social harm.	
3310	I think combining with another local elementary is sensible. My twins are in third grade and while we started the year off with 4 classes, we had to drop to 3 classes because we didn't have enough students. While I love the small class sizes I can see why it's a problem. My challenge is which school we would combine with. Henderson Mill may have classroom space, but parking for school events is a huge hassle. At some schools like Hawthorne, the school is in the middle of a neighborhood, which makes pick up and drop off traffic a nightmare. I'd be more in favor of seeing a new modern facility built to accommodate 5-6 classes per grade level. All our elementary school facilities and schools in this part of the county are equally small, older, and have various access issues. If I knew we were getting new facilities for teachers and students and I knew it wouldn't be a burden on the local neighborhoods, traffic, and community, then I'd be strongly in favor of consolidation.	2/23/2026 10:29 PM
3311	Stoneview needs to close, cause they can't house all of it students & Lithonia high school cause they always is on locked down	2/23/2026 10:23 PM
3312	Oak grove elementary was designated as a school of excellence. Great parental participation	2/23/2026 10:21 PM
3313	No concerns, it is necessary	2/23/2026 10:15 PM
3314	I understand the need to consolidate schools, however, the provided resources need to be evenly distributed amongst all clusters. This injured school experience, educators, extracurricular activities and parental involvement. Champion Theme school in particular, if moved, needs to be moved to a facility that reflects the standard and expectations fostered within their program. Their accessibility, resources and campus should reflect the quality experience they are offering	2/23/2026 10:06 PM
3315	Vanderlyn is old and likely unsuitable for an elementary school. Chestnut elementary is in a terrible location for expansion as its proximity to the highway makes a commuter artery a nightmare to navigate twice a day.	2/23/2026 8:58 PM
3316	Of the schools around Toney I think that Toney has the capacity to hold more students from the smaller surrounding schools that are being considered for closing. It was renovated last summer and has potential to house more students from surrounding smaller schools	2/23/2026 8:54 PM
3317	I think combining schools within the Dunwoody area for elementary makes sense given there are poorly rated schools within the district sitting right next to amazing ones	2/23/2026 8:39 PM
3318	I'm strongly against the consolidation of Ashford Park Elementary School because it's more than just a building and school — it's the heart of our community. The relationships between students, teachers, and families create a supportive environment that can't simply be relocated or replaced. Generations have walked these halls, building traditions and a sense of belonging that strengthens our neighborhood. Closing the school would not only disrupt children's education, but also dismantle a close-knit community that has grown around it.	2/23/2026 8:34 PM
3319	Ashford Park Elementary is a cornerstone of our Ashford Park neighborhood. I don't believe the same community involvement would exist if the school closed and the students were dispersed elsewhere. You have a high performing school because of the involvement, and there is no guarantee you would see that elsewhere. You could lose a high performing school and not move the needle at the other schools. Thus leaving dekalb with fewer high performers.	2/23/2026 8:31 PM
3320	Way too many elementary schools are affected by the consolidation. Smaller class sizes and ratios equal a greater impact on student success.	2/23/2026 8:11 PM
3321	I'm absolutely against this. Evansdale is a wonderful community school with a unique DLI program. They really aren't under capacity and it would be fairly straightforward to shift the zones and send some of the overflow from Livesey to Evansdale to preserve the smaller communities. If we close the proposed schools in my area, you will only push more kids into private schools and make your attendance problem even worse.	2/23/2026 8:08 PM
3322	Scenarios make sense	2/23/2026 8:00 PM
3323	I agree	2/23/2026 7:17 PM
3324	I am not a fan of linger school bus routes and less access to close schools. I think ignoring WHY attendance is decreasing while the population increases is the first fail.	2/23/2026 7:08 PM

3325	Highly disagree with the proposal to consolidate Oak Grove Elementary (and other high performing elementary schools). 1) OGE has a consistent history of academic excellence as a top performing school in the district. The model should be emulated, not super-sized. OGE test scores continue to be top performing within the district. 2) OGE consistently maintains the highest level community engagement, which promotes educational excellence, high property values, and a strong pipeline of students. Closing this school would be an act of intentional negligence that does not serve student best interests (high level academic instruction in a small student ratio environment) or tax payer property values. Closing OGE would create a massive negative impact to property values and tax revenues. Properties in the OGE zone have a value directly tied to the success of the school- all tax payers in this zone would be entitled to damages from the negative impact on their property value due to such an indefensible and irresponsible closure. 3) OGE student population is growing every year post-Covid. With the new $2B of healthcare investment in the direct neighborhood, the cluster will continue to see healthy student population growth. The data does not support a consolidation. 4) Mega-schools don't serve children. 100% of OGE 4th graders are involved in extracurricular and STEAM programming on campus. That level of engagement is simply not possible in a larger school. Henderson Middle is a great example of this- not all who are interested in being involved get in. A larger environment will deny access to learning opportunities for students that are readily available in the smaller school environment. Consolidating students into a larger environment would be neglectful of student opportunities, access and best interests. 5) Building maintenance has consistently been in the Dekalb budget each year and funds have not been managed responsibly, and approved projects and funds have disappeared. The money to maintain these building is and has always been there, but has not been managed. A priority must be placed on building a record of consistent fiscal responsibility at the district level before considering any moves that impact student access to buildings and educational resources. 6) Dekalb County School Board has negligently hired in criminals to lead the district. Despite the consistent history of failed leadership and poor decisions, we still have schools and communities excelling and leading with academic excellence. The Board should be thankful for that success, champion it, and protect it, not break it up, destroy the programs, and further break trust for the sake of a poorly researched and even more poorly managed balance sheet.	2/23/2026 6:54 PM
3326	Very concerned about the number of children that will be affected by this change. It seems there are double amounts of schools in the south end of the district that are proposing to close.	2/23/2026 6:31 PM
3327	I don't have an issue it based on reported open seats and projections for future enrollment.	2/23/2026 6:12 PM
3328	Since SAP is framed around enrollment trends, utilization, and long-range planning, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. I support addressing capacity needs at Dunwoody High School, but would like to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications before any closure decision.	2/23/2026 6:08 PM
3329	I do not understand the reason for consolidating ashford park and how those students will be redistributed. How will Montgomery be expanded if this school is already over capacity?	2/23/2026 5:48 PM
3330	Not happy. Ashord park elementary is an excellent school with a great culture and exceptional parent involvement. Why would you close that	2/23/2026 5:46 PM
3331	Sounds good	2/23/2026 5:29 PM
3332	Brockett elementary school is integral to the neighborhood. Many children walk to school. This may help with life long health outcomes in to mention less traffic, thus less pollution). Please reconsider closing this school.	2/23/2026 4:57 PM
3333	I support efforts to reduce overcrowding at Dunwoody High School and believe that comprehensive, long-term facilities planning is essential for the entire cluster. Since SAP focuses on enrollment patterns and utilization rates, I want a clearer explanation of how closing an elementary school with high usage fits these measures at the cluster level. Before making any decisions about closures, it would be useful to review detailed models for student reassignment, the capacity of receiving schools, projected class sizes, transportation effects, and changes to feeder patterns.	2/23/2026 4:39 PM
3334	I feel a lot of the schools are targeted on the south end of the county.	2/23/2026 4:34 PM
3335	How would shutting down one of the largest populated schools in the South of DeKalb solve any concerns. Why not consider rezoning the area that way the schools with a lessor	2/23/2026 3:54 PM

	population can accommodate for more students. Those schools with a small population, can combine the students and the staff at each school can work together to better serve the students. I believe this will benefit the students, parents and especially staff to remain employed with DeKalb in the same area. Then to have a staff to drive an extra 30 minutes or hour because they are possibly forced to transfer to an area that cause further commute or relocate employment to another county. DeKalb county has already lost some great teachers and other staff; this could cause any staff to discontinue employment with DeKalb and the students would be the ones who will lose out.	
3336	I strongly support my child remaining at her current school. She is thriving academically and socially, and the stability of her current environment is extremely important to our family. Avondale Elementary provides a supportive community and strong educational foundation. I respectfully ask the district to prioritize continuity for currently enrolled students when considering any boundary or assignment changes.	2/23/2026 3:45 PM
3337	dekalb county is too big to generalize for consolidations. areas like brookhaven and dunwoody have shown continue increase on enrollment, so lumping those schools in for consolidation doesn't seem to make sense, especially when nearby schools are already at or close to capacity.	2/23/2026 3:45 PM
3338	Disappointed to see Ashford Park ES on the list of closures, given lack of viable alternatives for those who live in the Ashford Park neighborhood.	2/23/2026 3:31 PM
3339	I believe it's going to become a problem because of the number of students that's in that area and it also the numbers of teachers and the numbers of classrooms that's in a certain building and trying to consolidate that can be an issue do you have to think about safety purposes also.	2/23/2026 3:28 PM
3340	I believe the idea of consolidating schools could be beneficial if it is planned carefully and communicated clearly. Consolidation may help maximize resources, improve facility conditions, and potentially provide students with more academic opportunities. However, I think timing and communication are extremely important. If schools are going to be consolidated, parents and students should be given ample notice so families have time to prepare emotionally, academically, and logistically. Sudden changes can create unnecessary stress and confusion. I am also concerned about the school choice schools that are included on the list. Many families intentionally selected those schools because of their specific programs or themes. It would be helpful to know what will happen to those specialized programs. Will they remain intact, be relocated, or be combined into a new theme school? Maintaining the integrity of those programs is important for students who depend on them. Overall, while consolidation may make sense from a facilities standpoint, transparency and clear planning will be key to making the transition successful for everyone involved.	2/23/2026 2:52 PM
3341	They are honestly scary. The consolidated schools on the southside have many behavior issues independently. Combining some of those schools will only make those issues worse and negatively impact the students that are trying to learn.	2/23/2026 2:46 PM
3342	FIRE more people at the TOP heavy DCSD County office!!!!!	2/23/2026 2:40 PM
3343	1. The redistricting maps should be shared before making the final decisions about which schools to close. It's scary to hear that your child's school might close without having a new plan in place to see where they would go instead. 2. If the best option is to close a smaller school, I would hope the district plans to make the other schools larger FIRST, so students aren't displaced into trailers while they wait for new facilities to be built. 3. Consolidating should not be rushed because the learning environments will suffer if the larger, new schools are not finished before shutting down the smaller buildings. 4. There should be a plan in place for teachers to move with their schools into new, bigger schools. Keeping familiar faces for the students having to move schools would be super helpful in the transition.	2/23/2026 2:36 PM
3344	Redistricting some schools seems extremely wise if looked at from a common sense appproach (ie-location). Closing schools is probably one of the worst things that could happen.	2/23/2026 2:33 PM
3345	I think the consolidations would impact the school community in a negative way. The neighborhood model promotes community assets and personal connections with the school, administration, and other students. Having schools combine would cause an overflow of students into schools that are already lacking on resources. It would overrun the school, and change the dynamics of the school community. There would be a school population where the students are unfamiliar with the other students and teachers. It would also require parents and	2/23/2026 2:21 PM

	students to travel further to these locations rather than the neighborhood schools they have close and accessible at the moment. I think this model would be detrimental to school testing scores because it would be unattainable to keep track of all students in a school that large.	
3346	Applying the same standard at all schools district wide is equitable, but most stakeholders are unaware that 90% of vacant seats exist in BOE regions 3-7. This data must be shared to inform stakeholders that DCSD previously invested in these communities by building larger and newer schools, many of which now have empty seats. Also, stakeholders need to be aware that per pupil expenditures at each school vary widely, depending upon school enrollment size. This is why HPM has said that schools with larger enrollments subsidize schools with small enrollments. HPM and DCSD should share alternative proposals with 4 elementary schools of 600 students per high school cluster.	2/23/2026 2:08 PM
3347	I have a student in 1st grade at Cedar Grove Elementary. I am concerned about what will happen to the students if the school closes. I understand there are two other schools in the area.	2/23/2026 1:45 PM
3348	I do believe that some consolidations could work in some areas, I just do not believe that schools should be consolidated at this time. Schools that have less than a certain number should may be looked at for consolidation, but pushing students together into new super schools just really makes effective education impossible. With larger classroom sizes, it really harms student progress.	2/23/2026 1:44 PM
3349	I love that Midvale is an IB/ STEM school near me. They are a vital part of this community.	2/23/2026 1:37 PM
3350	In my opinion this would suggest over crowding including students and teachers.	2/23/2026 1:35 PM
3351	Too many too big schools that require construction, an operational weakness of DCSD. Esplost projects fall years behind, costs explode, facilities continue to deteriorate. Especially when closing schools that are not under-enrolled or consolidating many schools like in Tucker and Lakeside far beyond what is needed to address empty seats, the construction will not reliably happen in 8 (or 10 or 12) years. It also assumes further esplost revenue when DeKalb families are taxed to death relative to better school systems like Cobb.	2/23/2026 1:25 PM
3352	While I can appreciate the statistics behind this project, the statistics does not include the true picture behind what actually drives these numbers.	2/23/2026 1:20 PM
3353	As a school who is over crowded, yet a high performing school with a HUGE PTO presence in the school and within the community; it is not wise to follow through with this decision. Especially, after already spending funds to renovate Ashford Park the next 2 summers.	2/23/2026 1:11 PM
3354	I have always said DeKalb had too many schools; which was spreading our resources too thin. I am with consolidation. However I feel we are not thinking BIGGER. Too close that many HS of course their would need to be a plan set for a Newer BIGGER HS or upgrading one to house that many students. It would also need to have all the amenities as others that have done such.	2/23/2026 1:06 PM
3355	My primary concern is that my home and child remain in the Druid Hills High School cluster. It is the ENTIRE reason I moved to my home. My secondary concern is with the potential close of McLendon ES. I want to be sure that the county is a good steward of the newly vacant property and takes community feedback into account when determining g what to do with the property. We do NOT want increased traffic on our neighborhood roads and we don’t want the property becoming an eyesore.	2/23/2026 12:59 PM
3356	I think that children learn better in smaller learning environments. Thousands of children in one large facility get overwhelmed. Mega-schools are detrimental to children's health! Smaller schools, better learning. Knowing who the people are in your school is very important. Kids fall through the cracks in large schools! Keep schools small. Pay teachers properly. STOP with the ridiculous, over- testing each year!!!!!!!!!!!!! Seems like a large number of the schools on the chopping block are near (or including) Midvale. Maybe combine one or two together, but don't get rid of all of these, including, Midvale, Brockett (leave Brockett alone!), McClendon, Oak Grove, and Evansdale. Too many in the same basic area to be gutted - NOT OKAY!	2/23/2026 12:53 PM
3357	I fail to comprehend the rationale behind shutting down schools exclusively in the Urban Neighborhoods. When contemplating attendance, have you taken into account the manner in which your staff engages with the students? Have you examined how the District shows preference for one area over another? The distribution of funds, attention, time, programs, and	2/23/2026 12:41 PM

	various opportunities ought to be equitable across the entire district, rather than being concentrated solely in the higher-income segments.	
3358	I do not agree with the closure or consolidation of Cedar Grove High School.	2/23/2026 12:24 PM
3359	Sad to see the drop in enrollment. Eager to see the parent and community involvement	2/23/2026 12:15 PM
3360	The lower grades do not need to be in the same schools with the higher grades. That will increase danger and violence. 6-12 should not be in the same facility it will be come overcrowded and then there won't be any time to make all this space for these kids to be grouped together: also; it will increase child on child assault.	2/23/2026 12:09 PM
3361	I believe it would be disastrous to combine more than two elementary schools. At this age students need some level of individual attention.	2/23/2026 12:07 PM
3362	I support the goal of using resources more efficiently and expanding opportunities for students. However, implementation details will determine whether consolidation benefits students equitably.	2/23/2026 12:06 PM
3363	As a teacher who has been with DeKalb County Schools for four years and at my current school for two, I appreciate the opportunity to provide feedback on the initial SAP scenario regarding potential consolidations. My school is a Title I campus that has historically struggled with low academic performance and significant overcrowding. While the challenges are real, I have also witnessed noticeable positive shifts in culture, student behavior, and staff collaboration during the past two years. These improvements have not been rapid, but they have been steady, and they reflect the commitment of our teachers, students, leadership team, and families. Because of this, I have mixed feelings about the consolidation scenario: Potential Benefits Consolidation could bring access to updated facilities, better learning environments, and more equitable distribution of resources across schools. Overcrowding creates daily instructional and operational challenges; addressing capacity issues could directly improve teaching and learning conditions. A realignment of facilities may help ensure students have access to programs and supports that are currently stretched thin. Concerns Our school is in the midst of a cultural turnaround, and disruptions—such as relocation or merging with another school—may slow or reverse the progress being made. Title I schools often rely heavily on relationships, stability, and community trust; consolidation has the potential to impact all three if not planned thoughtfully. Staff and students deserve clarity on how their voices will be included in shaping the transition. Without that, uncertainty may increase anxiety for both teachers and families. Consolidation can benefit students academically—but only if implementation is strategic, transparent, and well-supported with staffing, mental health resources, and community engagement. Overall Perspective I recognize the enrollment challenges and facility needs across the district, and I understand why consolidation scenarios are being considered. At the same time, I hope the district will continue to weigh not just numerical data but also the human impact—especially in schools like ours that are making meaningful progress despite limited resources. I support solutions that truly help students succeed, but I urge the district to: protect the cultural momentum our school has built, ensure supportive transition processes, and maintain open communication with educators and families at every step.	2/23/2026 12:03 PM
3364	It's a little confusing to understand when you see something like "Towers HS" and then an arrow pointing to the next column to a block that also reads "Towers HS". However, after reading about it, it makes sense.	2/23/2026 12:01 PM
3365	After reviewing the consolidation plan, I recommend Cedar Grove Middle School remain open for several key reasons: 1. Community Impact Cedar Grove Middle serves as a central hub for the local community. Closing it would increase travel distances for students, which can negatively affect attendance, participation in extracurriculars, and family engagement. Many families have long-standing ties to the school, and its closure could disrupt community cohesion. 2. Student Academic Needs Cedar Grove Middle has a diverse student population with specific programs (e.g., special education, gifted services, STEM initiatives) that might not be easily absorbed by other schools. The continuity of instruction is important, especially for students in transition grades (6–8), who benefit from stability during critical developmental years. 3. Capacity and Growth Current enrollment data suggests that Cedar Grove is operating efficiently and may have room to accommodate growth in the area. Consolidating students into other schools could lead to overcrowding, which can impact teacher-to-student ratios, classroom management, and overall learning outcomes. Equity Considerations Consolidation often disproportionately affects low-income and marginalized students, who may face	2/23/2026 11:54 AM

	transportation challenges or barriers to accessing new schools. Keeping Cedar Grove open supports equitable access to education and resources in the local area.	
3366	Definitely against the idea. Our children need their local schools. The proposed areas would greatly suffer and put parents up against obstacles.	2/23/2026 11:52 AM
3367	What are you going to do with the closed school, I understand why they are closing but what are you going to do with the buildings, why leave them empty or tear them down and they can be used for educational purposes or activities, you are taking the money from the property taxes for the schools how are they going to be used if they dont have students	2/23/2026 11:52 AM
3368	If this is what needs to be done, then fine.	2/23/2026 11:47 AM
3369	Seems like a solution but, whatever gets the kids and teachers the best outcome seems like what should be done and I dont know thats it however I dont have any advice for was is either. If there's significant evidence breaking the grades up more helps students then thats good but if it's experimental I dont think thats helpful	2/23/2026 11:45 AM
3370	It has to be done for the best student outcome	2/23/2026 11:42 AM
3371	That's all of the home schools in my district. How will that look for school drop off in the morning/afternoon.	2/23/2026 11:41 AM
3372	I'd rather have higher operating costs, small class sizes, and a robust curriculum.	2/23/2026 11:40 AM
3373	I believe that it is necessary; however, make sure that transportation logistics are realistic for the plans.	2/23/2026 11:40 AM
3374	I think this is absurd and shouldn’t be done.	2/23/2026 11:39 AM
3375	To put it simply, this decision needs to be based on more than financial reasoning. Please take a close look at increasing school enrollments, especially at the elementary level, before deciding that consolidating schools is the right thing to do. Remember that our number one job is to educate children. Does increasing school enrollments help accomplish this goal? If it does not actively contribute to the success of educating students, then something else has to be considered. My small school is not on the list to be closed, but is on the list to be consolidated with other schools, thus increasing our student population. I cannot imagine what that will do to our intimate setting, close relationships with students and parents, and our ability to support the most vulnerable children. I don't claim to have the answer, but I do have the fear of what my school will look like if this scenario plays out. I have no doubt that our teachers will work tirelessly to support their students, but will their efforts be in vain because of the overwhelming number of students in the building?	2/23/2026 11:36 AM
3376	The concentration of identified schools is notably higher in the south than in the north, raising concerns about equity.	2/23/2026 10:31 AM
3377	Losing Vanderlyn would negatively impact the long-term future of Dunwoody High School. Vanderlyn is high-performing and is a pillar in the surrounding community. Getting rid of a high performing elementary school would only hurt Dunwoody High.	2/23/2026 10:25 AM
