3378	I strongly oppose the proposed closure of Oak Grove Elementary. From both a practical and community perspective, it does not fit the goals of the consolidation plan. Oak Grove is one of the few schools already operating above the district’s utilization target. Enrollment has grown steadily for several years, reversing any temporary pandemic-related decline, and is projected to continue rising. By next year, the school is expected to reach roughly 96% capacity. This is not an underutilized building—it is a school in high demand. Closing Oak Grove would also create new problems the district will immediately need to solve. The two neighboring schools that would receive its students simply don’t have enough room. Sagamore Hills is essentially full already, and Briarlake’s current space is unlikely to remain available. The area surrounding Briarlake is in the middle of major redevelopment, including thousands of planned housing units and significant expansion from CHOA and Emory. These projects will attract families and naturally increase enrollment in the years ahead. Removing seats now only to rebuild them later is not an efficient use of district resources. Beyond capacity and forecasting issues, Oak Grove is an exceptionally strong school academically and culturally. Its students consistently perform at the top of the district, and the school benefits from stability—high teacher retention, strong family engagement, and a long history as a true neighborhood institution. Those are conditions that can’t be recreated simply by moving children to another school. Consolidation would disrupt student progress, break apart established peer groups, and likely lead some	2/23/2026 10:23 AM

	families to seek alternatives outside the district altogether. Given the scale of coming residential and employment growth in the North Druid Hills/Clifton Corridor, this area needs more capacity, not less. The district should revisit its projections using current, post-pandemic data and delay any closure decisions until updated numbers are available. A data-driven approach would focus first on schools with chronic, long-term underutilization—not a school that is thriving, growing, and central to its community.	
3379	Oak Grove Elementary should not be considered for closure. The district's stated goal is to bring elementary school utilization closer to 88%, yet Oak Grove already exceeds that target. It is currently at 89% utilization and is projected to be at 96% next year. Enrollment has increased consistently for the last four years, and based on current trends, the school will likely reach full capacity within the next few years. Closing a school that is growing—and already operating at or above the district's target—is not aligned with the purpose of the consolidation plan. Eliminating Oak Grove would also create immediate capacity challenges in surrounding schools. Sagamore Hills is already at 91% utilization and Briarlake, while lower at 73%, does not have sufficient available seats to absorb Oak Grove's 447 students without triggering overcrowding or major boundary changes. Even Briarlake's current excess seats are likely temporary. The North Druid Hills/Clifton Corridor is experiencing substantial residential and employment growth, including thousands of new units at the Lulah Hills and Corporate Square redevelopments and billions of dollars in expansion at CHOA and Emory. These factors will naturally push enrollment upward across the entire cluster. Additionally, Oak Grove is a high-performing school with a long record of academic stability, strong teacher retention, and a deeply engaged community. Its Content Mastery (94.2) and Readiness (95.3) scores are among the top in the review group. Closing a school with this profile would disrupt student learning and community continuity at a time when no academic or utilization problem exists. Before making an irreversible decision, the district should update its enrollment projections using 2024–2026 post-pandemic data and incorporate confirmed residential and employment growth that has not yet been reflected in current models. This corridor is not declining—it's growing—and closing a near-capacity, high-performing school would remove needed seats just as the area's population expands. A more targeted, data-aligned approach would focus closures on schools with long-term underutilization below 70%, where consolidation can actually improve efficiency without creating new capacity needs.	2/23/2026 10:14 AM
3380	I would like to see clearer data showing how this scenario aligns with the district's stated focus on enrollment trends and utilization at the cluster level. I understand the need to address high school capacity pressures, but sharing full reassignment and receiving school modeling — including transportation and class size impacts — would help families fully evaluate the proposal.	2/23/2026 9:56 AM
3381	Understand the need for consolidation but would hate to see all those schools on the list go away. This is especially true for Oak Grove Elementary school where many parents have contributed a lot of funds to enhance the school outside of what the county is able to provide.	2/23/2026 9:24 AM
3382	I feel like if consolidated is "really" needed that maybe allow those other schools to offer Autism classroom or other neurodivergent classroom settings what allow for schools to have "DEDICATED SENSORY ROOMS".	2/23/2026 9:04 AM
3383	The plans appear well thought out. With such a large surplus I think the district needs to make at least a partial decision an	2/23/2026 9:02 AM
3384	It is extremely stressful not knowing what will be happening to my school and my position. I am a media specialist and if the school closes that means that my job - which I love - goes away. I want to know how I can stay in DCSD. What are my options should our school close.	2/23/2026 9:02 AM
3385	I understand and support the need to address overcrowding at Dunwoody High School. I recognize that Vanderlyn's proximity to the high school places our campus within a broader facilities planning conversation. I also recognize that the district has framed SAP around enrollment trends and utilization. Any proposal should clearly demonstrate how those metrics are being applied at the cluster level. The combined Vanderlyn and Dunwoody High School campus presents an opportunity to explore thoughtful, phased solutions that address secondary capacity while preserving elementary access. The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made. Vanderlyn is a diverse, academically strong, and inclusive community. Preserving stable elementary environments while solving high school challenges aligns with district priorities. I would welcome collaboration between district leaders and both school communities to explore campus-level solutions that address high school	2/23/2026 8:54 AM

	capacity while preserving the Vanderlyn community. However, I am REALLY unhappy with the broad sweeping idea of consolidation. The reason we bought a house in the Vanderlyn district was specifically for the small elementary school community. It felt like a very natural and good fit for our family (we strongly believe in public school, but the sheer number of kids at schools like DES was overwhelming). We find a GREAT benefit in this type of unique small environment that our kids have THRIVED in and after lots of turnover and turmoil like COVID, our kids are thriving thanks to the environment created by truly passionate staff!	
3386	What are the performance levels of the schools possibly being consolidated? What is affecting current decrease in student enrollment? With these questions and answers in mind how would these decisions best affect the students and community?	2/23/2026 8:44 AM
3387	I understand that there may be a lot of empty seats in some schools, but I think the students learn better when the classrooms are not overcrowded.	2/23/2026 8:35 AM
3388	I don't have specific feedback for or against it.	2/23/2026 8:34 AM
3389	It makes sense to consolidate schools as needed even though the transition year will be rough for everyone.	2/23/2026 7:54 AM
3390	I understand the need for the changes. However, will students who are enrolled in Lithonia be able to graduate their school? My children are set to graduate in 2027 and 2028 .	2/23/2026 12:19 AM
3391	I strongly oppose the initial facilities scenario and the proposal to close 27 schools. This plan would disrupt students' stability, force longer commutes, overcrowd receiving schools, hurt vulnerable communities the most, and likely lower property values in neighborhoods that lose their schools. Our schools are community anchors, and closing them feels like abandoning the families who rely on them	2/22/2026 11:52 PM
3392	The consolidations are not supported. Teachers are already overwhelmed and consolidating adds more stress to the high pressure situations of over filled classrooms as is.	2/22/2026 11:10 PM
3393	Las instalaciones están muy sucias y descuidadas, los baños permaneces sucios la mayor parte del año, los salones de clase muy sucios y las persianas en muy mal estado. En fin escuela que de verdad necesita atención para mejorar la limpieza.	2/22/2026 10:34 PM
3394	As a parent zoned for ashford park, if your goal is to retain students in public schools, closing schools like ashford park, which service affluent neighborhoods will accelerate the exodus to private education. Consider the negative ramifications that has long term and the fact that many people purchase property to fit within the quality schools of their choice to best offer education to their children. By disrupting that, you erode the trust of parents further.	2/22/2026 9:12 PM
3395	Pk-3 and 4-6 (not 4/6) is ideal. My older child attended Kittredge for 4-6 and that was ideal.	2/22/2026 9:08 PM
3396	I was disappointed to see that Henderson Mill Elementary was included on the initial facilities scenario list for potential consolidation. As one of the larger enrolled schools in our area, Henderson Mill consistently serves a strong student population and remains a vibrant, fully engaged school community. Our size reflects the trust families place in our instructional program, staff, and overall school culture. Henderson Mill is not only well-enrolled, but also deeply rooted in the community, providing stability and continuity for students and families.	2/22/2026 8:53 PM
3397	We must stay within our budget. However , what will become of abandoned buildings ?	2/22/2026 8:14 PM
3398	Yes feel 6th grade should go back to elementary school.	2/22/2026 7:43 PM
3399	When thinking about why I Atlanta when I moved from Cobb County, I looked at the scores of the schools and what the community had to say. In the end, I picked Oak Grove Elementary for the school that both of my sons "graduated" from. I was in the community before I became a full time teacher. When I heard about the potential of OGE closing, I was surprised. Yes, enrollment went down due to Covid, however, it is increasing with every year. There are a lot of schools in the area on the list as well. I know this is just the beginning of the process.	2/22/2026 7:28 PM
3400	I understand the closures, but could the wide range grades be 7-12 instead of 6-12?	2/22/2026 7:15 PM
3401	Oak Grove Elementary is the heart of our neighborhood. While they experienced a drop in enrollment due to COVID, they have built back their population. It would be a huge mistake to close Oak Grove	2/22/2026 6:55 PM
3402	DCSD needs to pause on all consolidation. We are dealing with the fallout of multi-year Superintendent problems. We need to wait, examine DCSD administration for redundancy and	2/22/2026 5:53 PM

	waste in the central office. We also need to look at all real estate holdings and divest properties that are not being used. We should hire Dr. Sauce as permanent Superintendent and THEN we should look at redistricting and/or consolidations.	
3403	While it is understandable to want to close facilities due to numbers, the lack of understanding regarding impact on communities including inclusion, property value, cost of transportation for children, and future growth city planning is lacking. Closures will by far have a negative impact an all those mentioned and cause stress to a community leading to more school vouchers being used for homeschooling and private schools.	2/22/2026 5:49 PM
3404	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	2/22/2026 5:40 PM
3405	Oak grove is one of the highest performing schools in the state. You should be looking at what we are doing to have such a good school and modeling other after us. You are also including pandemic data in your overall numbers. Our population has been growing rapidly every year with people specifically moving to oak grove neighborhood to attend oak grove elementary. Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. If Briarlake gains: • +50 students → ~83% utilization • +100 students →	2/22/2026 5:40 PM

	~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
3406	In favor of initial facilities scenario as long as services for IEP are not impacted.	2/22/2026 4:02 PM
3407	We're alright with Kingsley closing and have zero issues with the facilities scenarios. We live 1 mile from Dunwoody & Chesnut so I just wonder which school my child will go to.	2/22/2026 3:52 PM
3408	I'm fine with Kingsley closing and have no issues with the facilities scenario.	2/22/2026 3:43 PM
3409	Based on the information I've gathered on the district's website and on the online newspaper, Decaturish, I am only aware of the potential school closures. I am a 3rd grade teacher at Henderson Mill Elementary	2/22/2026 3:17 PM
3410	Adequate.	2/22/2026 3:11 PM
3411	Hello! We are Kinglsey community members here with no current children, but are expecting. We are in extremely close proximity to Kingsley and were excited to have a ES so close by. However, from reading the statistics about enrollment, and seeing how few kids there currently are in the neighborhood, it is starting to make sense to consolidate schools and are more open to the closure of Kingsley ES. The following factors make consolidation more attractive: 1. Less car-dependent infrastructure for students to safely and independently bike or walk to the remaining schools and surrounding resources (e.g. library, park, recreation) 2. Providing more resources to socio-economically underserved areas. We do not support consolidation that benefits privileged families disproportionately more than underserved families. We consider ourselves privileged and would rather help others in need than further our privilege.	2/22/2026 2:43 PM
3412	Class sizes are already far too large. The idea that resources are spread too thin is not the problem. We need to reduce class size, retain these facilities, and reduce the grandiose salaries that our consistently corrupt education board receives.	2/22/2026 1:54 PM
3413	Great school. Should def stay open.	2/22/2026 1:44 PM
3414	I think they are doing amazing	2/22/2026 1:16 PM
3415	Yo	2/22/2026 12:32 PM
3416	Encourage keeping Oak Grove open	2/22/2026 12:30 PM
3417	Understand the situation at macro level and the tradeoffs between cost, size and robust offerings. Would be helpful to understand the expected impact of the scenarios (e.g. expect that school budgets would stay same/reduce/increase as a result of these changes?) It's also difficult to fully understand what's driving the expected lower enrollment in the future for the county -- understanding the why helps ensure that long-term decisions are not made for shorter term or otherwise addressable situations. (e.g. is the student-age population declining overall in the county or is this driven by movements into charter or private schools? If moving to charter or private, why? If it's for smaller school sizes perhaps combining into larger schools will only exacerbate this issue in the future) Additionally, what fact-based information is available about the implications of these trade offs? For example, what is the impact of large school sizes on student outcomes, particularly for young elementary aged students? In these scenarios, are school sizes also driving impact on classroom sizes or are there any expected changes to student-teacher ratios? What are the specific robust program offerings that could be retained through these scenarios and are they consistent across schools or do they vary? The initial scenario at a high level could make sense, but beyond the additional questions above, it is difficult to understand the justifications for specific school closures based on what's been provided. For example, our home school of Evansdale has a fairly stable student population	2/22/2026 12:12 PM

	that even shows projected increases in the future, but it is being shown as a school to close in this scenario. It is also difficult to truly judge the proposal without more details on the implications of where existing students zoned for those schools would end up and what program offerings could be maintained or would be discontinued. For example, language immersion programs have been very popular and hard to obtain seats in (e.g. French at Evansdale, GLOBE) and would we expect those to continue in the future?	
3418	Vanderlyn should not be considered for closure. It is a high-performing, inclusive school with a strong community. Vanderlyn takes students outside its zone through school choice, easing the pressure off the surrounding DCSD schools that are overcapacity. If DCSD is planning to remove that opportunity for families, there needs to be a clear plan for the surrounding schools to improve academics and facilities to accommodate the number of students. The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made. There needs to be a guaranteed placement for ALL Vanderlyn students to attend a school that is an academic equivalent of Vanderlyn. Closing a high-performing school and sending students back to an overcapacity, underperforming school does not align with the DCSD mission of empowering students to reach their full potential.	2/22/2026 11:25 AM
3419	Closing Vanderlyn ES would be extremely detrimental to the north cluster of schools and the reputation of DCSD as a whole. It is an inclusive, high performing school and should be recognized as a success story for DCSD rather than be considered for closure. Vanderlyn ES has a strong community - high parent engagement, regular collaboration with Dunwoody HS and local businesses. I would encourage dcsd to investigate further reasons for lower enrollment, I suspect it is due to the school producing so many high achieving students that then move into magnet programs for 4th and 5th grades. We understand that Dunwoody HS is over capacity and needs to extend the campus, other options need to be explored that do not result in the loss of access to an exceptional elementary school. My students are zoned for Huntley Hills elementary, which is over capacity and underperforming. Vanderlyn eases pressure on surrounding schools that are over capacity through the school choice program. DCSD considering closure of Vanderlyn is not aligned with their stated values particularly humanization - in closing a high performing school, the students are not being seen as the in hardworking individuals they are, they are being seen only as numbers.	2/22/2026 10:24 AM
3420	I don't like the idea for consolidation	2/22/2026 9:34 AM
3421	Strong, stable elementary environments are important for students and communities, and I would like to better understand how this proposal supports long-term cluster planning. I support solutions for high school overcrowding, but it would be helpful to see complete modeling on reassignment, receiving school enrollment and capacity, transportation, and feeder impacts before decisions are finalized.	2/22/2026 8:31 AM
3422	No one should be listening to recommendations from a committee run by Sarita Smith until she and other employees put in place by Horton have been fully investigated and the community feels safe.	2/22/2026 7:30 AM
3423	I think it makes sense to close schools to save money. However, I also struggle to see how the schools will fit everyone. I hope this would allow for more co-taught classes because teachers already struggle with their current class sizes. Also, as a staff member, I worry about the district providing enough staff and office space and office space for the staff to appropriately support the students. My concerns are not in these scenarios but rather in how they would be carried out.	2/21/2026 7:24 PM
3424	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units;	2/21/2026 7:03 PM

	$850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
3425	We wouldn’t be affected based on proposed scenarios.	2/21/2026 6:09 PM
3426	Students are shown to have better outcomes with smaller classroom sizes.	2/21/2026 2:07 PM
3427	There is no problem at	2/21/2026 1:24 PM
3428	Would the kids get as much one one time with their teacher? Would the schools be over crowded?	2/21/2026 1:18 PM
3429	I dont have any complain, it looks good!!	2/21/2026 1:13 PM
3430	Please reconsider closing Oak Grove. As a special needs parent to two children there it has been an incredible experience for us and all the other special needs kids there. Because of Oak Groves reputation as a school for not only upholding IEPs and 504s but exceeding most parents expectations in services they offer our kids may special needs families seek out the school. I know we specifically moved here for Coralwood and Oak Grove. And I know lots of families apply for the lottery hoping to get in if they don’t have the means to move. As a parent who Autistic kid came from a larger public in Dekalb county, Peachcrest, who could offer my nonverbal autistic kid the services he needed (not enough support at school for proper Speech and OT therapy) I know what it’s like to see your kid suffer and not get the education they deserve. And after being a parent of that same kid at Coralwood and Oak Grove I know what the system done right feels like. Because of Oaks Grove’s higher percentage of kids on IEPs and 504s they are able to have 2 teachers in most classrooms, a gen Ed teacher and a special ed teacher (but almost all of the teachers there are special Ed certified, and all are gifted certified) allows them to do true inclusion for special needs kids correctly. And look at how well Oak Grove does on test scores!! We are one of the top performing public elementary schools. You should be looking to replicate Oak Grove not close it. Bigger schools make for worse outcomes in education at the elementary level, especially for kids with IEPs and 504s. Please reconsider closing Oak Grove, it is truly one of the gems of Dekalb County Schools.	2/21/2026 1:08 PM
3431	When I was growing up in Gwinnett county and my mom was a teacher in Dekalb, we heard so much about the problem of overcrowding in schools. It was considered bad for education for class sizes to be too large and the buildings couldn’t hold everyone. Now, I would think the smaller class sizes and smaller schools would be viewed as a positive. One thing I love about my daughter’s school is its relatively small size. I also love that we can walk to our school. Having people drive across town to one central school will make traffic worse too.	2/21/2026 11:19 AM
3432	We purchased our house partially to be able to send our children to Oak Grove elementary. We are recently married and don’t have children yet, but closing the school would be a huge devastation to our community, especially since it is one of the most excellent elementary schools in Georgia.	2/21/2026 10:12 AM
3433	While I would be sad to see McLendon closed because it is so close to us, I understand consolidating is likely the best option to better serve student. At the same time, I am concerned about having an abandoned building in the neighborhood and would like to make sure there is a plan for the empty building.	2/21/2026 9:52 AM

3434	I mainly am concerned with Chamblee cluster which is my area, and we are overcrowded, so I am pleased we are not closing. I hope the Huntley Hills ES will expand to be able to safely and effectively hold all the students that are zoned there.	2/21/2026 5:29 AM
3435	Consolidation of high schools merging together can lead to more issues such as an increase in fights, impact academic performance, decrease school pride, teacher employment, etc.	2/21/2026 1:02 AM
3436	I strongly opposed the proposal to close schools as suggested or any other major changes at this point. Quite frankly, this is a cost cutting attempt disguise as a consultation. It is meant to obfuscate, not to clarify. First, the plan as proposed is not meant to be assessed by parents. It is the work of bureaucrats for bureaucrats. This is evident from the sheer complexity of the proposal and the remarkable level of abstractness. We are told this is "an opportunity to consolidate resources and strengthen programs," but which programs? Which ressources? You proposed to close our school, Evansdale in the name of this potential opportunity. We emailed you and asked if the french program would be continued if the school was closed. We were told that this: "We are talking about building only. The conversation about programs will occur in the fall." No parents cares about "the building" as an abstract entity, or undefined programs or ressources! We care about a building in as much as it is the place where specific ressources (our wonderful teachers like Mrs Young, Devine and Shunnarah) and our great program (the french immersion one) Separating the programs/ressources /functions of building may make sense to data analyst, but not to people who have kids who go to one school. So the "opportunity" you describes sounds like we are asked to risk the reason we moved to this neighborhood (Evansdale and the french program) so that we may get some abstract benefits that you can't define nor guarantee. Secondly, our school is actually overcrowded, so why close this one? Our school has a unique program so why close this one? Once again, because it is close to another one and a convenient one to close for you to cut cost. But people who go to these school have a completely different grid of analysis. Third and final point. This is gigantic endeavor. It is a BIG project. And you make these proposals with an interim superintendant while the last one is being indicted of multiple counts of frauds as of February 12 of 2026, so a week ago. Add to this the multiple stories about the power struggle and the mismanagement of the school board members and the multiple stories of rats, sewage water, mold and other issues with building in the county. So maybe I am a bit cynical, but it seems to me that a modicum of self-awareness would lead the SAP team to realize that they have near zero trust, and before doing such a vast reform, building a bit of trust with the community might help.	2/20/2026 10:45 PM
3437	I strongly oppose the initial facilities recommendations, especially the closure of neighborhood elementary schools. Research suggests that the optimal size for an elementary school is around 400 students, after which performance declines. I would like to see evidence from DeKalb County that larger consolidated elementary schools produce the same results from a educational outcomes and overall student well being standpoint. Indeed, families are choosing not to send their students to the larger elementary schools in the district in favor of school choice. The benefits that you raise are about cost and efficiency and not about the health, happiness and well-being of our students and families--at least at the elementary school level. You may argue that better facilities, more programs, etc. = well-being, but from a parent's perspective it is not the case. Neighborhood elementary schools mean community connections and support for students beyond purely institutional frameworks -- consolidations and closures will destroy this community support. I also think that the scenarios presented are inadequate, and the research presented incomplete. Indeed from a data standpoint, the projections for the Evansdale area seem flatly wrong, even if the complex formulas of proximity and enrollment in the larger area are applied. Finally, how can changes be made with an interim superintendent, however well-meaning, at this particular moment in our national's history and given DeKalb's administrative challenges? We need to support what works right now given the tumult that surrounds us. And our school works. We will apply for non-federal grants, and raise funds if need be. Finally, it is impossible to separate the facilities from the instruction that occurs within them. Please reconsider the proposed closure of the elementary schools on this list, especially Evansdale Elementary School.	2/20/2026 10:27 PM
3438	I understand, empty seats stop funding. However, where will the amazing teachers at Rock Chapel and other schools go? What about the children that have created bonds with teachers and students?	2/20/2026 9:34 PM
3439	We love our school and do not want the elementary schools to split off. It would disrupt so many families	2/20/2026 9:12 PM
3440	Beyond sad and concerned to see Evansdale slated for closing. It is a high-achieving school,	2/20/2026 8:17 PM

	it draws people to buy in the area (thus benefiting the county), and it is a major community asset. In a recent home purchase in this neighborhood, access to Evansdale was listed as a major component in the valuation. Neighborhood elementary schools are important safety features for students and parents. The school has a diversity of attendees that is important for emotional and social development of children. Separately from just this one school being targeted for closure, the sheer number of schools closing is alarming. The text refers to 25, but 26 are highlighted. That is an extraordinary number -- over a third of the existing elementary schools. I have to wonder if closing this number of the neighborhood schools that tend to provide "community" for parents will have the opposite effect desired here and will potentially push people to choose counties other than DeKalb when making a home purchase.	
3441	Well situated	2/20/2026 7:21 PM
3442	Vanderlyn Elementary is more than just a school — it is the heart of a deeply connected, tight-knit community. Many families, including ours, made the significant decision to purchase our home specifically because of Vanderlyn's reputation, culture, and neighborhood cohesion. Closing the school would not only disrupt our children's education, but would also fracture a community that has formed around it. For our family and many others, this decision would likely mean withdrawing our children from the DeKalb County School District altogether. I strongly urge the district to consider the long-term community impact and retain Vanderlyn as a cornerstone of Dunwoody.	2/20/2026 5:49 PM
3443	Killing our well functioning school with support of the community would be very disappointing.	2/20/2026 5:41 PM
3444	My school is near capacity and fits my community needs very well. I object to closing oak grove elementary, because the alternative would likely lead to an overcrowded school substitution.	2/20/2026 5:20 PM
3445	I don't believe it to be a good idea to consolidate younger children with the older children.	2/20/2026 4:41 PM
3446	While I too believe schools with less than 300 students should be consolidated, I'm very concerned that the majority of of the schools are on the southside and it's not because the kids don't live that way, but because we've bused or dropped them off on the North side in hopes of better schools and opportunities for our kids…just a think about.	2/20/2026 2:30 PM
3447	The consolidation logic makes sense but its not clear on what impact that will have to students in those districts.	2/20/2026 2:26 PM
3448	I'm not opposed to consolidation but do hate to see neighborhood schools close	2/20/2026 2:14 PM
3449	I think this is an awful idea and would place too many students in one classroom and not enough attention will be paid to the students learning or safety.	2/20/2026 2:03 PM
3450	Vanderlyn a cornerstone of the community. One of the reasons we purchased our home. Closure and rezoning means potentially lower rated school and a bigger school that is not as close and community minded	2/20/2026 1:04 PM
3451	I'm baffled by the proposal to close Ashford Park as there is clearly a need from a student perspective. The proposal to expand other elementaries clearly doesn't take into account the "community" of the Ashford park neighborhood. This community has been built over decades and is forged by being neighbors, walking to school, friendships. This all enriches the student experience. These families have bonded over Ashford Park and Chamblee middle/highschool and grown together. Sadly, that fabric can crumble quickly with the loss of a school. There has already been talk about either moving out of district or sending to private. I hate to see this happen to our community and Dekalb county schools. This could hurt the achievements of Dekalb schools beyond repair.	2/20/2026 12:51 PM
3452	Closing Oak Grove Elementary does not align with SAP goals, as it is not under capacity and is in fact increasing in enrollment. Moreover, the closest schools to which OGES students would be redistricted to do not have the capacity to absorb Oak Grove students, which would result in over crowding, increased use of trailers, and increased instability for all the students impacted, which has been proven to reduce academic performance.	2/20/2026 12:25 PM
3453	I do not understand how this scenario is feasible when surrounding schools do not have capacity to absorb all the students from the schools that are marked to close. I do not think it is fair to close an overcrowded school and then potentially move other students out of their local school to make room for students from the closed school. I also do not like the idea of 1000+ student schools at the elementary school level. I understand the cost savings, but I	2/20/2026 11:14 AM

	think it is worth the cost to have smaller class sizes and smaller, more intimate schools. Instead of consolidating so many schools, can we look at reducing class sizes? Dekalb County has a waiver from the state and all their class sizes are way over the state max. This has always bothered me. If we want students to benefit from the programs and services offered, then we need the classes to be small enough for them to effectively utilize the program/service. I'm referencing gifted classes so large that students do not get the more focused attention they need. Or co-taught classes so large, the students with IEPs are not getting their needs met. Or special ed teachers with case loads so large, they cannot give students enough individual attention to meet their needs. I'm seeing this in Chamblee Middle School. Consolidating schools in the Chamblee cluster seems like it will only compound the problems in this area. I have lived in this neighborhood for 20 years. I have been paying into the local schools long before I had kids and I was happy to do so because I wanted to support these schools where my kids would attend. I'm worried about being redistricted away from our elementary school in order to make room for students from Ashford Park if it closes. I'd like to see ways to build additional buildings or enlarge the schools we love instead of cut students out. I can't see how closing Ashford Park helps any of the issues facing our cluster.	
3454	This only works if there is a plan to reduce overcrowding in classrooms that will remain open. While our school has 'empty seats' in terms of building capacity, our classrooms are maxed out in terms of student-teacher ratios. We are looking at reducing the number of teachers per grade next year , which will only increase the number of students in a classroom. The classrooms at Dunwoody ES are small and kids are crammed together because of limited classroom space when the strategic waiver is being utilized.	2/20/2026 11:05 AM
3455	Obviously, making the best use of facilities and resources is important. I would hate to lose Evansdale Elementary. It is an institution in our neighborhood. It is a polling center. The walking path and soccer field are used by the community. If it is no longer an elementary school, it really should be used as an early-learning or community center. Would hate to lose it altogether.	2/20/2026 10:44 AM
3456	I am disappointed that a plan to merge the schools into newer state of the art facilities is not presented as part of the future state.	2/20/2026 10:43 AM
3457	I strongly oppose the proposed closure of Ashford Park Elementary School. The rationale being offered does not align with the reality of this school or what our community is seeing on the ground. Ashford Park Elementary is at full capacity and performing well. Closing a thriving, fully utilized school disrupts students' learning, fractures a stable community, and undermines the momentum that families, educators, and staff have worked hard to build. If this proposal is driven primarily by dollars and cents, (which I don't understand since I pay $14K a year in school taxes), I urge the district to reconsider. Closing a successful neighborhood school often backfires: families relocate or choose other options, enrollment declines elsewhere, transportation costs increase, and the district loses trust and long-term stability and mainly community and parental involvement which is bigger than any adminstrative efficiency you are trying to achieve. That is not sound planning and it's not putting students first. Before any vote moves forward, I'm requesting that the district provide: A transparent, school-by-school impact analysis (enrollment, capacity, class sizes, staffing, program loss, community loss.) A transportation plan and cost estimate (bus routes, ride times, safety impacts) A receiving-school readiness plan (space, staffing, supports for transition, community and parental involvement.) A clear explanation of why a high-performing, fully utilized school with massive parental engagement is being targeted Alternatives considered (boundary adjustments, phased plans, repurposing space, cost-saving measures that don't displace students) Please keep Ashford Park Elementary School open and focus on solutions that preserve strong community schools rather than dismantle them. I'm asking you to pause this proposal and engage in a transparent process that genuinely accounts for educational outcomes and community impact not only short-term budgeting.	2/20/2026 9:10 AM
3458	Brockett Elementary is a great school with strong community support. The school receives strong support from Mt. Moriah Church that is located next door. They provide the school with a location for their annual plays and volunteers as needed. Brockett Elementary school plays are not your average school plays. These are full on theatre productions that the children, teachers, and staff work very hard on. Walk to School Day at Brockett is another example of an event the whole neighborhood participates in. The kids, parents, and teachers all meet at Mt. Moriah and walk to school together. Brockett's crossing guard is another asset to the neighborhood. Everyone in the neighborhood knows her and loves her, people who don't even have kids at Brockett stop and visit with her. It would be a shame to shut down a school that is deeply rooted in the neighborhood. Besides what would you do with the land?	2/20/2026 8:49 AM

3459	I think it’s a good idea to consolidate where needed, but the expansion schools like Briarlake should get more detail on what that means - new building(s), better resources?	2/19/2026 11:27 PM
3460	We are happy with Vanderlyn school and I would strongly recommend to continue to run this school	2/19/2026 10:26 PM
3461	Traffic patterns definitely need to be looked into. We live near Austin ES and traffic may get worse for us. In general, this question is difficult to answer since our children don’t live/study near one of the schools consolidated. Now when school choice scenarios are rolled out and we learn more details then we definitely have an opinion to share.	2/19/2026 10:11 PM
3462	c	2/19/2026 9:11 PM
3463	I think it would be good to have fewer schools so staff and students can be better allocated. Though, I would still like class sizes to be considered.	2/19/2026 8:54 PM
3464	It seems like the cascading approach amplifies the problems. If there are too many HS, MS, and ES to start with; school conversions add to the excess. I think elementary education is the most critical of the 3 levels and that elementary students are most influenced by proximity to their school. I would focus closure/ consolidation at the HS&MS level and keep ES open to maintain the geographic proximity at the gateway to education.	2/19/2026 8:38 PM
3465	I want three specialized schools for the disabled K through 12 with wraparound services such as counselors ptot everything interventions field trips 1 South 1 in the middle Clarkston area and one North I believe it's one off Clairmont	2/19/2026 8:32 PM
3466	Vanderlyn is a neighborhood school that should not be part of any consolidation. Moving multiple elementary schools into one larger school harms the children at Vanderlyn at classrooms become larger and attention is spread across larger number of students. The community is heavily involved at Vanderlyn; consolidating Vanderlyn would be a very unpopular decision among the Dunwoody voter base.	2/19/2026 8:18 PM
3467	I understand the need to consolidate. Will other adjustments been made to accommodate this process? School choice should be suspended until the district has a better understanding of what actual numbers should look like across the county.	2/19/2026 8:03 PM
3468	I just fear that a new school could potentially be very far from my current home.I don't want to have to travel much further than we do now. Also sad that if wr had another child, evansdale ES may be moved or changed. It is in walking distance, safe neighborhood, tucked away, and feels like elementary school should. The culture there is home-y, warm, inviting.	2/19/2026 7:59 PM
3469	I haven’t looked the map configurations for the scenarios, but my thoughts went to the following:whether school zone lines would be redrawn, whether start times would have to change considering pickup spots would be more and wider or would pickup locations change instead; what resources (that are currently in the schools)outside of human bodies would go to which schools and how would that be determined; when and who would be on the discussions for the rebranding (new name, colors, mascot, etc) of the schools; what budget will be used to pay for the new uniforms of all the athletic teams; would school songs be changed to be more inclusive; would schools start to create a guiding coalition to help in the transition; is there a plan for how to create the “One Team One Dream” for the staff?	2/19/2026 7:49 PM
3470	How is it that there are classrooms in trailers, but decline in enrollment is a problem? So we close some facilities so that students can be crammed back into trailer classrooms? Get rid of all the trailer classrooms in the county first	2/19/2026 7:48 PM
3471	It makes sense to close schools and redistribute students to be more cost effective with our time, talent and money.	2/19/2026 7:30 PM
3472	I don’t like the idea of closing any schools in DeKalb County . I don’t have faith in the county to handle this right. We have a neighborhood school that is thriving just like our community, now you want to uproot a school?	2/19/2026 7:29 PM
3473	The initial facilities scenario (consolidations) has some valid points but I would like to ensure all possibilities have been considered with experts on actionable plans to prevent 27 schools being closed to more than 17 to perserve community and housing markets for what education could be in the next 10 years. Are there options to repuprose 10 schools to gain funding through renting out or leasing with the premonition that if the population of students increases,	2/19/2026 7:08 PM

	those spaces will return to school buildings to support the learning trajectories of our future and current citizens (giving them at least a 3 year notice).	
3474	I don't like it. I love Cedar Grove elementary and middle school. My daughter just graduated from Cedar Grove High in the top 10% of her class. And that all started at the elementary school. So I'm not advocating for the scenario's that are in play.	2/19/2026 6:45 PM
3475	I understand and support the need to address overcrowding at Dunwoody High School. I recognize that Vanderlyn's proximity to the high school places our campus within a broader facilities planning conversation. I also recognize that the district has framed SAP around enrollment trends and utilization. Any proposal should clearly demonstrate how those metrics are being applied at the cluster level. The combined Vanderlyn and Dunwoody High School campus presents an opportunity to explore thoughtful, phased solutions that address secondary capacity while preserving elementary access. The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made. Vanderlyn is a diverse, academically strong, and inclusive community. Preserving stable elementary environments while solving high school challenges aligns with district priorities. I would welcome collaboration between district leaders and both school communities to explore campus-level solutions that address high school capacity while preserving the Vanderlyn community.	2/19/2026 6:37 PM
3476	Very uncertain... the south eastern area already doesn't provide good middle schools for the community.	2/19/2026 6:37 PM
3477	Why BrownsMill? It is a fairly new building. Built in 1990.	2/19/2026 6:27 PM
3478	Oak Grove does no align with the stated objective of addressing underutilization. We are already at 89% utilization and projected to hit 96% next school year. Our residential area along with the area zoned for Briarlake and Sagamore is continuing to show sustained growth. Combining these schools would result in mega elementary schools, which is not conducive to learners. Oak Grove is also one of the highest-performing schools. Why would you close a school that is meeting utilization goals, shows sustained growth and is a high performing school?? We are a community school with strong academics, teacher relationships, community buy in and a strong foundation non profit to help offset costs from the district. Financially would cost A LOT more to create the space at Briarlake or Sagamore to house our Oak Grove students. WE DO NOT WANT OUR CHILDREN LEARNING IN TRAILERS!	2/19/2026 5:24 PM
3479	I agree that it does not make sense to keep operating older facilities with declining enrollment as those costs can be very burdensome on the district and take away from funds for educational programs.	2/19/2026 5:13 PM
3480	I understand what needs to happen and respect the scenario created. I agree that Lithonia HS is close to Miller Grove HS. The history and ties to the community of Lithonia HS must be taken into consideration. I feel that Miller Grove HS building needs to be renamed Lithonia HS and become Lithonia HS. Miller Grove is so new, no one would care if it were closed. But Lithonia HS has to remain a school.	2/19/2026 4:19 PM
3481	Evansdale elememtary es buena escuela con una comunidad maravillosa.	2/19/2026 4:09 PM
3482	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students	2/19/2026 3:57 PM

	over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
3483	Agree that consolidations need to occur--too many facilities with lower enrollment.	2/19/2026 2:46 PM
3484	I support addressing overcrowding at Dunwoody High School and want strong long-term facilities planning across the cluster. Since SAP is framed around enrollment trends and utilization, I would like to better understand how closing Vanderlyn, a highly utilized, top performing elementary school, aligns with those metrics at the cluster level. Before any closure decision, it would be helpful to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications. Vanderlyn Elementary is a vibrant, diverse, and active school. Our testing data shows that our kids continue to thrive academically. We have a highly engaged parent population. The location of the school related to the homes it serves makes transportation easy and it allows kids to build community well outside of the school experience. The building is safe, up to date, and well maintained.	2/19/2026 2:44 PM
3485	Lies!!! All lies Stoneview elementary doesn’t have low enrollment	2/19/2026 2:12 PM
3486	Choose wisely	2/19/2026 1:49 PM
3487	Additions on old buildings are extremely expensive. Has a study been done to ensure that adding onto Briarlake, Sagamore and Laurel Ridge will be cost effective compared with continuing to operate Oak Grove with empty seats, and are those lots really equipped to handle larger facilities and more people? I don’t think they necessarily are. What is the payback period? I happen to believe that population/enrollment will continue to decline past 2030, so putting additions on these schools will result in even more empty seats down the road. Perhaps it makes sense to wait until students can be consolidated without additions.	2/19/2026 12:56 PM
3488	I don't want my kid's school to close. He loves it there and we hope his little brother will, too. It was the 1st STEM school in GA.	2/19/2026 12:43 PM
3489	Do not close Bob Mathis Elementary. Our community is in transition. Young families will need our educational infrastructure to remain in tact.	2/19/2026 11:33 AM
3490	Oak Grove is not underutilized as the data states. Oak Grove is already at 89% utilization and projected to be at 96% for the 26-27 school year. This does not align with district's goal of increasing elementary utilization to approximately 88%. We are there and growing.	2/19/2026 11:23 AM
3491	Oak Grove Elementary seems to be the strongest elementary school in our area with the most parent and community support. Of all of the elementary schools to close in our zip code, this one seems to make the least sense to close.	2/19/2026 10:01 AM
3492	Our area is experiencing an incline in children and students. The district’s goal is to increase elementary utilization to approximately 88%, but Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%).	2/19/2026 7:13 AM
3493	Overall, I recognize that Dekalb county has to address older facilities and capacity planning. My child goes to Vanderlyn. I believe the school, on its own merits, would not be targeted for closure. It is an excellent school, has a great community and delivers one of the best learning experiences in the county. The facility, while old, has been well maintained and has received the benefits of an active parent community which continues to invest in its upgrades and upkeep. I believe the Vanderlyn community is extraordinary and the results it drives should be preserved. I also believe that the elementary capacity still reflects lower volumes that started during the extended closures in Covid (when parents moved kids to private.) Prior to Covid	2/19/2026 7:13 AM

	Vanderlyn was over capacity and the overall cluster could easily add several hundred more students without much trouble. I don't think it makes sense to strip out this much capacity from elementary schools in district 1. As for how this might help capacity at Dunwoody high. I have a daughter who just graduated so I am familiar with the extreme problems there. Closing Vanderlyn doesn't instantly solve the Dunwoody high problem - as a parent I only want to give up a great elementary school if it is absolutely necessary to deliver a better high school. I have lost confidence that this will happen and I need to see the detailed plan to believe one is related to the other.	
3494	I strongly oppose the consolidation of high-utilization schools like Oak Grove Elementary. The district's claim of 20,000 empty seats is a county-wide average that ignores the reality of the Lakeside and Druid Hills clusters, where schools are at or over capacity. Consolidating these schools would destroy neighborhood stability and worsen already dangerous overcrowding.	2/19/2026 4:44 AM
3495	No closing the school	2/18/2026 11:13 PM
3496	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: Sagamore Hills: 413 / 456 (91% utilization) Briarlake: 350 / 480 (73% utilization). The space in the other schools would be insufficient. Additionally, Oak Grove is one of the highest-performing schools in the County. Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	2/18/2026 9:33 PM
3497	The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made.	2/18/2026 9:22 PM
3498	I understand the need for consolidations. I feel like it is important to keep popular/high-enrollment schools though, including Ashford Park. I also feel that it is very important to keep the Chamblee cluster intact, whatever is decided.	2/18/2026 8:34 PM
3499	Good for budget reasons, less SF to maintain. Student teacher ratio, neighborhood self worth, close social interaction and familiar neighborhoods will suffer or be lost with c!osings.	2/18/2026 8:09 PM
3500	Teachers aren't paid enough but her job security. You're how removing that and expect people to still enter this profession	2/18/2026 7:05 PM
3501	Shocked but understanding that schools need to be consolidated	2/18/2026 7:00 PM
3502	I don't know much about the schools listed as we didn't attend, however they see to be some of the higher functioning schools. It might mean that smaller class sizes are good for the students and community.	2/18/2026 5:06 PM
3503	I'm a parent of children at both Vanderlyn Elementary and Dunwoody High School and I strongly oppose closing Vanderlyn Elementary School. Our family has attended multiple schools in DeKalb County including Dunwoody Elementary and Kittredge, PCMS and also a private school in Roswell, GA and by far, Vanderlyn Elementary School has provided the best learning and social environment for our children. The size of the school and the amazing teachers, staff and PTO have combined to provide my children with an exceptional education at Vanderlyn Elementary! I would hate to see this school close, it would be a terrible decision for the families in our area!	2/18/2026 5:00 PM
3504	I am very concerned that losing Evansdale Elementary, as well as several elementary schools in our surrounding area (Tucker), will be devastating to the communities. Two of my 3 children have attended Evansdale. Although we started at Brockett ES, the switch to Evansdale -solely because of the language immersion program - has been such a positively impactful decision for our family. We also had a wonderful experience at Brockett Elementary. It was very community-centered with a very caring staff. We only made the difficult decision to move to Evansdale for the opportunity to have our children study a second language. An opportunity that should be available at Brockett, perhaps a Spanish Immersion program?	2/18/2026 4:57 PM
3505	Surprised that there are 18,000 student vacancies.	2/18/2026 4:41 PM

3506	Muy acogedor? Pero necesita algunas modificaciones el edificio	2/18/2026 4:33 PM
3507	Consolidations make sound economic sense.	2/18/2026 4:27 PM
3508	I see the need to consolidate resources for efficiency and sustainability. I am concerned about the size of the elementary schools in the facilities scenarios as I firmly believe strong communities are best developed and maintained in smaller numbers. In the scenario of elementary closures, I do not understand how the factors considered relate to the closure list. For instance, Evansdale Elementary is well-utilized and high educational adequacy but appears as a potential closure. These factors are opaque and do not align with the reality of the schools presently.	2/18/2026 4:24 PM
3509	It's terrible! We went with school choice to go to Evansdale because of the DLI program which has been great for our child and are looking forward to my daughter doing the same. We also wanted to avoid Smoke Rise at all costs because of the unprofessionalism of that school's administration, would would have considered Livesy but they are not a part of the school choice program.	2/18/2026 3:36 PM
3510	As a DLI parent in Evansdale, the consolidation plan seems helpless. Parents like me would seek out another French program instead of our children being thrown randomly into another elementary school. The numbers issue would remain. The thought of closing our wonderful, close-knit neighborhood school is painful, as well. I am not I favor of this plan. Evansdale has worked too hard to reach its full DLI potential to be closed. Don't close Evansdale!!	2/18/2026 3:23 PM
3511	I do not want Evansdale Elementary to close.	2/18/2026 3:12 PM
3512	It makes sense that resources should be consolidated and low enrollment schools need to close	2/18/2026 2:56 PM
3513	worried Montgomery would become overcrowded if Ashford park closes, would need to add capacity in permanent buildings (not trailers). Worried for Ashford Park families too, if Montgomery that is fine, but the other alternatives are not as strong academically for the community.	2/18/2026 2:22 PM
3514	If you go through with the facilities scenario it will have no effect on my child. I purposely moved to the Chamblee High district for his benefit, so to me the facilities scenario is great.	2/18/2026 1:53 PM
3515	I understand the need for consolidation to improve resources and approve of it. My main concern is that my child will be redistricted away from current feeder pattern. She is at McClendon now, and should then go to Druid Hills Middle and High. I do not want to see her redistricted to a different high school.	2/18/2026 1:26 PM
3516	Converting schools seems more efficient with resources.	2/18/2026 1:15 PM
3517	It is hard to know how to feel with out a plan on what would come next - where would our kids go to school? What would the closed school land become? When would this happen? I also think having more data to share would be helpful - is the over or under capacity seats a one year thing, a trend over 2-5 years, 10 years?	2/18/2026 1:10 PM
3518	It is a lot. Closing too many elementary schools in one area or cluster impacts the overall community. Younger children will be impacted by longer commutes which can impact their overall health and well being.	2/18/2026 12:58 PM
3519	Oak Grove is an excellent facility. It could use further updating of garden and PE space	2/18/2026 12:29 PM
3520	I understand that the county is facing a significant enrollment imbalance which requires thoughtful long-term planning. However, I strongly oppose redistricting plans that would move students out of high-performing schools like Ashford Park solely to balance enrollment or reduce facility costs. Many families, including mine, made significant financial and personal decisions based on school assignments. We chose to purchase homes in specific neighborhoods—often at $1M+ price points—because of the academic quality, reputation, and outcomes of the assigned schools. School performance is directly tied to property values, and altering boundaries in ways that assign students to lower-performing schools would negatively impact both home values and the return on substantial investments families have made in reliance on existing school zones. While equity across the county is an important goal, redistributing students from high-performing schools into lower-performing ones is not a solution that addresses the root causes of inequity. It risks weakening strong schools without meaningfully improving underperforming ones. Instead of diluting access to high-quality education, the district should focus on replicating what works in its most successful schools—	2/18/2026 11:31 AM

	strong leadership, rigorous academic offerings, engaged parent communities, and programmatic excellence. If facilities are under capacity, I would prefer to see consolidation of under-enrolled schools and reinvestment into expanding and modernizing high-demand, high-performing schools. Renovations and additions at schools that families actively seek out would better align supply with demand than redrawing boundaries in ways that undermine confidence in the district. I am also deeply concerned about potential changes to magnet and advanced academic programs. My currently assigned high school, Chamblee High School, offers a large amount of AP courses and that breadth is not available at other schools. These courses play an important role in college preparation and competitiveness. Reducing or decentralizing such programs in the name of equal distribution may unintentionally lower overall academic rigor and harm student outcomes. Expanding access to advanced coursework is a worthy goal, but it should be done by raising standards and investment at other schools—not by reducing offerings at the highest-performing ones. Families who invested heavily in homes within specific attendance zones did so with the reasonable expectation of stability. Significant changes to school assignments should carefully consider the financial and educational consequences for these communities. I urge the district to prioritize: Consolidation of underutilized, underperforming facilities before redrawing boundaries in high-demand areas Expansion and modernization of high-performing schools where demand exists Investment in improving academic quality at lower-performing schools rather than redistributing students Preservation and expansion of advanced academic and magnet programs Long-term planning should strengthen excellence while addressing inequities—not compromise successful schools in an effort to balance numbers.	
3521	I am a parent that had children at Evansdale Elementary. This school has been very important to the community and neighborhood in bringing families together with the goal of giving our children a great learning and social foundation. To close Evansdale would have a very negative impact on this neighborhood.	2/18/2026 11:18 AM
3522	It is very difficult to provide constructive feedback on the current scenarios based on the information provided. What would be helpful: 1) where will kids go once their current school closes, and will that affect where they are currently projected to go for any school that they would currently "feed" into (for example, if Ashford Park closes, where would they go, and would they be in a different middle/high school than currently projected to go to) 2) impacts on bus times and routes; 3) teacher/staff loss estimates under the scenarios under projections; 4) program loss under each scenario (for example, if an ES is currently STEM certified, but then the teachers are split up, will the district be able to maintain current program offerings). 5) evaluation method and data for each of the scenarios as we go through the process (for example, are you using some sort of transportation modeling to determine the "more efficient" transportation routes, and if yes, stakeholders should be provided with access to that modeling platform and the inputs).	2/18/2026 11:17 AM
3523	I am opposed the consolidations as it’ll make commute to and fro schools longer for some individuals	2/18/2026 10:32 AM
3524	I understand the district feels as though this is the only solution however these is nothing presented that details where the students would go once schools are consolidated.	2/18/2026 10:25 AM
3525	Plan does not seem to assess growth that may occur in some areas of county tied to business development. I’m in an area that is building medical facilities that will attract residents with families (Blank hospital and several other medical facilities).	2/18/2026 10:16 AM
3526	Some changes will have to occur given declining enrollment.	2/18/2026 10:01 AM
3527	My concern is closing down schools due to low enrollment. Do we know why enrollment is low?? I think that should be a starting point. Small classroom sizes are supposedly better for learning.	2/18/2026 9:59 AM
3528	I think that shouldn't be closed so many elementary school. Because these school are good. The school that dealkb trying to close need to stay in the community. Because kids learn more better in small school.	2/18/2026 9:35 AM
3529	As a parent of three children attending Montgomery Elementary and Kittredge Magnet School in the Chamblee cluster, I appreciate the district’s effort to address facility utilization and long-term planning through the Student Assignment Project. I understand that consolidation discussions are often driven by enrollment shifts, building capacity, and resource allocation. However, I have several concerns about the initial facilities scenario. First, stability matters tremendously for families. Consolidations can significantly disrupt students’ academic	2/18/2026 9:26 AM

	continuity, peer relationships, and sense of belonging. Our schools are not just buildings — they are established communities with strong family engagement and support networks. Any consolidation proposal should clearly demonstrate how educational outcomes for students will improve, not just how facilities will be more efficiently utilized. Second, transparency is critical. If consolidations are being considered, families need clear data showing: Current vs. projected enrollment by school Building capacity and utilization rates Cost savings (if any) and how those savings will directly benefit students Impacts on class size, transportation times, and program access Without that level of detail, it is difficult for families to fully evaluate the necessity or fairness of consolidation decisions. Third, the Chamblee cluster has strong feeder patterns and community identity. Consolidations that alter feeder continuity or split established neighborhoods could have long-term ripple effects on enrollment stability and family trust in the district. If changes are unavoidable, grandfathering provisions and clear transition plans are essential to prevent siblings from being separated or students from being forced to move multiple times. Finally, I urge the district to weigh non-quantifiable factors such as school culture, PTA engagement, and magnet program integrity. Kittredge's magnet model, in particular, requires thoughtful planning to ensure its mission and accessibility are not compromised by facility decisions. I support responsible stewardship of district resources, but consolidations should only move forward if they clearly enhance student experience, maintain community cohesion, and provide transparent, measurable benefits to families.	
3530	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: Sagamore Hills: 413 / 456 (91% utilization) Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: +50 students → ~83% utilization +100 students → ~90% utilization Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: $1.5B Arthur M. Blank Hospital campus ~4,500 employees (including ~1,000 new jobs) $87.7M Emory Heart & Vascular expansion Ongoing Emory hospital expansion $1.1B in FY24 research awards $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	2/18/2026 9:16 AM
3531	The class sizes are too large at the current elementary schools. It is well known that lower class sizes are beneficial to student learning. I do not understand how closing 25 elementary schools is possible without overcrowding. Many of the ES proposed for closing are within the Tucker area. Why is there a focus in this area? The Tucker area is a thriving and desirable community for which the elementary schools are a reason families choose to live there. Evansdale Elementary has a unique and successful French Imersion program that is an asset to the county and the community. Similarly, Midvale has a great STEM program. Programs like these drive enrollement and school community engagement. Investing in more school choice programs is beneficial to the community. It creates excitement for schools. Shouldn't we instead focus on trying to bring in more residents into Dekalb by creating schools they want to attend?	2/18/2026 8:43 AM
3532	I do not support the proposed consolidations. Closing or combining schools would disrupt	2/18/2026 8:42 AM

	students and families, increase transportation challenges, and potentially overcrowd receiving schools. I encourage the district to consider options that maintain stability and preserve each school community before moving forward.	
3533	Some schools are in a neighborhood, how does that affect increasing numbers? Will you build larger schools in neighborhoods and will they allow it. If old/under enrolled schools close will you build larger schools for those who will be accommodating more students? Have you thought of traffic problems when you consolidate. Chesnut already has traffic issues.	2/18/2026 8:25 AM
3534	It's seems that South DeKalb schools have been targeted in a district that already seems to not serve this area of the county to the best of its ability. Instead of pouring more into our community schools so that caretakers in this area do not feel like they have to look for other options for our kids, you are instead planning to just close them.	2/18/2026 5:52 AM
3535	I have 4 kids and am zoned for Montgomery. 3 will be at Corralwood next year, one of which is in a self contained pk3 classroom, and the oldest is currently in K at Montgomery. I believe Ashford Park has some of the services my child in the self contained classroom would need. With Ashford Park proposing to close, I am curious how exceptional education services would be distributed through the area. Best case scenario for my family would be to have all 4 kids at Montgomery with available resources and therapies available.	2/18/2026 12:10 AM
3536	I believe placing kids in grades 6-12 in 1 school significantly increase the possibility of bullying & exposure to older behaviors. Not to mention 6th graders (11-12) are still children while 12th graders are nearly adults. Emotional maturity, physical size, social awareness differ drastically. Safety & discipline concerns. Just to name a few things.	2/18/2026 12:10 AM
3537	I am not very familiar with the schools on the south side of the county, but in cluster 1 we have been dealing with overcrowding and trailers for years. Kittredge had to move farther south to an inconvenient location in order to accommodate overcrowding at the Dunwoody elementary schools, and yet you are looking at closing two Dunwoody elementary schools, so that's confusing to me. It seems like that will increase the overcrowding in that area, which has already been an issue. I don't have a lot of insight into other school closures, but I'm hoping/trusting you are making those decisions with transportation time in mind. Traveling very far to school is extremely difficult when navigating around traffic!	2/17/2026 11:32 PM
3538	Adverse impact	2/17/2026 9:28 PM
3539	I don't have an opinion on a specific closure but agree 100% you must make hard decisions. You can't make everyone happy but that is not your job. Your mission as leaders is to LEAD our county and use our dollars and resources wisely. Please do not back down.	2/17/2026 9:21 PM
3540	Looking at the list of schools and the map of potential school closures, it looks like a sledge hammer approach to district wide issue. A complex solution of which has alot of moving parts, costs a ton of money and has implications of rebuilding and destroying well established communities. There is an eb and flow to population. By the time this kind of plan could be implemented, the demographics could look different. The consolidation of schools will increase traffic in areas where it's already impossible to navigate during peak school hours and roads can't be expanded. A more surgical approach to expand certain schools that have the land and close a few would make more sense. Put the money that a massive approach such as this into our existing infrastructure that is consistently neglected because dekalb county funds are constantly abused.	2/17/2026 9:14 PM
3541	My primary concern is that the scenario proposing closure of Oak Grove ES appears heavily driven by capacity considerations without sufficient weighting of educational stability, school performance, and community impact. Oak Grove ES represents an established, high-functioning learning environment. Closing a stable elementary school introduces significant academic and social-emotional disruption for young students, which may outweigh projected facility efficiencies. DCSD should balance facility utilization with student-centered factors including: • Student stability and continuity of learning environments • Academic performance and school effectiveness • Transportation and commute impacts for elementary students • Community and enrollment consequences • True lifecycle and transition costs Capacity metrics alone should not determine closure decisions, particularly for schools that are performing well and meeting community needs. I support strategic consolidations where there is a clear educational benefit and minimal student disruption. However, I do not support closing Oak Grove ES given its strong educational environment, established community role, and the potential negative impacts on students and families.	2/17/2026 9:07 PM

3542	Based on Vanderlyn's metrics, I am truly confused as to why it is listed for closure other than that it is a smaller neighborhood school. Based on the information on the SAP page, the district does not want small schools believing they cannot have robust programs or cannot operate at low cost. This sends a very "we are only worried about our bottom line message." FCA: Vanderlyn 75.5% - Closing a school with acceptable facility condition creates avoidable capital inefficiency. Investment already made in the building is lost or underutilized Building adequacy: 74.72% - The building is already adequate for educational delivery. Closure would shift students into buildings that may have similar or worse adequacy constraints Utilization: 85.7% - Vanderlyn's ~86% utilization reflects efficient use of capacity and does not align with typical underutilization-based closure criteria; please provide cluster-level utilization comparisons and post-reassignment projections. Capacity: 552, Enrollment 473 - Keeping schools with flex capacity is strategically safer than running all schools near max capacity. Closing a stable enrollment school does not solve long-term district enrollment shifts. At this stage, it is difficult to fully evaluate consolidation scenarios without additional detail about student-level impacts. Before consolidation decisions are finalized, it would be helpful to see projected reassignment plans showing where students would go, projected enrollment and class size at receiving schools after reassignment, and expected transportation time changes. Consolidation decisions are not only facility decisions — they are student experience decisions — and understanding those impacts is important for families to provide meaningful feedback. I would also encourage the district to clearly define which capacity metrics are being used in evaluation (program capacity vs operational capacity), and to provide cluster-level data rather than districtwide averages. District averages may not reflect real seat availability within specific feeder patterns.	2/17/2026 8:55 PM
3543	I think that consolidating the schools with low student numbers makes sense, UNLESS it creates OVERCROWDING, where students won't receive true small groups for remediation/enrichment. Larger class sizes create a disadvantage for not only the students but also the teachers. I do not think consolidation is good in the lower-income areas where typically students perform lower and need more attention during instruction. If the goal is to increase scores and student performance, numbers should stay low in class size so that teachers can teach academics and not worry about behaviors.	2/17/2026 8:32 PM
3544	It makes no sense for Evansdale to be on the list. It is rarely truly underused and is support by the community and parents of active students at a very high level. It is a community asset.	2/17/2026 8:21 PM
3545	I have concerns on which schools will combine. How that will effect students who walk to school.	2/17/2026 8:13 PM
3546	Shut the elementary schools, close any high schools AFTER the current freshman class graduats	2/17/2026 8:02 PM
3547	We could combine elementary schools in the Some Mountain area. There is no reason the area should lose Stone Mountain elementary and Stone Mill elementary at the same time. Hambrick is not the best facility, nor is it in the best neighborhood located on Central Drive. Also, I only see high schools in the South end of the county that are proposed to close. Would it not Make more sense to consolidate rather than close them because they are performing low?	2/17/2026 7:10 PM
3548	I do not support the loss of so many schools including those that are over capacity. This is not the solution to a larger problem and will place nothing but a bandaid over the issue. When I see the plan for the transformation of Lithonia high school and middle school I am nothing but disappointed. This space needs to be expanded, not consolidated.	2/17/2026 6:21 PM
3549	There is no doubt that Oak Grove Elementary should remain open. It is viable, efficent and effective.	2/17/2026 5:47 PM
3550	Like the idea but have lots of questions. There is currently over crowding at Peachtree Middle school. I think it would be helpful to include ideal class sizes for each grade. What would this plan accommodate? Peachtree's class sizes are too big with high 20s low 30s per class.	2/17/2026 5:27 PM
3551	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73%	2/17/2026 5:22 PM

	utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
3552	Bad. I do not like them. They don't make sense. Oak Grove doesn't fall into the stated objective of "utilization". Moving around this many children from a thriving school environment just doesn't make sense for the children or the community. Oak Grove is in an area experiencing growth, shutting down a school near capacity with a thriving community makes 0 sense.	2/17/2026 5:04 PM
3553	Oak Grove Elementary School is an excellent school. The students perform well both academically and socially. Most parents live close to the school and know each other. It was and still is a nice community. Many parents are actively involved. I sincerely doubt that the Oak Grove Elementary School will see a drop in student enrollment. Recently, more young parents with children moved into the neighborhood. For some of them, Oak Grove Elementary was a major reason.	2/17/2026 4:50 PM
3554	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those	2/17/2026 4:16 PM

	data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
3555	It is clear to me that falling enrollment is a critical issue facing the DeKalb County school district. No one is well served by schools that cannot be maintained due to a lack of funding. I disagree that consolidation on this scale is the correct path forward. My children have thrived at Brockett Elementary not only due to the dedicated teachers, staff, and administration, but also the small school within close proximity of our home. The close proximity allows us to attend many school events. Combined with the small size, this provides a path for parents and students to develop close relationship with educators and other families. Consolidation as described in the initial facilities scenario would push family-school participation out of reach for us. On the SAP website, trade-offs are outlined between small school size, robust program offerings, and low operating costs. Rather than focusing on consolidating small schools, operating costs may be an area to explore. Are there additional state or federal grants that could be utilized to cover higher operating costs? Could some facility maintenance be provided by community volunteers/donations of services from local businesses? Are there more parents like myself who are willing to raise and donate funds to keep our small schools open? A small task force could be created to research how to secure greater funding for our district. If it appears viable, a team could be designated to engage the community and raise funds. I implore you, please keep small elementary schools in DeKalb County. Families need to be engaged with their school, which is not possible for many in large schools far from our homes. Brockett Elementary in particular is a special school. Our family made the decision to stay in DeKalb County so that our three children could all attend this incredible tight-knit school. We would be devasted to see Brockett closed and will put in the work to keep it going.	2/17/2026 4:03 PM
3556	I’m concerned about the transition and people pulling kids out of public school. I do think it’s a great idea for more theme schools, early learning and changing from neighborhood schools. It makes sense to consolidate.	2/17/2026 3:54 PM
3557	It is difficult to understand the expenses and plans of expanding the schools neighboring the closing schools to incorporate the students. How could the district facilitate so many of these schools expansion over the course of the 6-8 year timeline provided? Seeing quantitative numbers with the school closings with the anticipated capacities of the remaining schools will better visualize the overarching plan DCSD is exploring. There are some concerns with neighborhoods with increasing population growth trends, such as in the Tucker area, as several elementary schools feeding into both the Tucker and Lakeside clusters are proposed to close. How can Livsey and Idlewood, Briarlake and Hawthorne absorb all of these additional students? What would happen to the students attending the schools that are slated for expansion during the inevitably significant construction period?	2/17/2026 2:40 PM
3558	Chesnut is land locked. How in the world will you expand this school? It makes more sense to move forward with the Kingsley expansion and use Chesnut for Peachtree Middle classes rather than the current trailers.	2/17/2026 2:03 PM
3559	I was shocked at the number of elementary schools listed in the consolidations. I believe it to be a bit more aggressive and as far as additional bus routes that are going to be needed to get students to the newly delegated school. I would like to consider adding 3 year old classes to the district.	2/17/2026 1:36 PM
3560	High schools becoming middle schools and middle schools becoming elementary schools could be necessary	2/17/2026 1:32 PM
3561	lithonia impact too severe	2/17/2026 1:16 PM
3562	It would be detrimental to kids and our community to close Ashford Park. Please do not do this. Our school is physically being expanded and renovated and the parents involvement in the school is some of the best in the nation.	2/17/2026 1:03 PM
3563	I am wonering for the high schools are we taking into account the amount of students who drop out, and for the other schools, the very high transient/homeless population of students we have.	2/17/2026 12:26 PM
3564	Las instalaciones están en malas condiciones, muy sucio tanto, cafetería, salones de clase y	2/17/2026 11:53 AM

	baños. Es importante cuidar la presentación de la escuela ya que por eso muchos alumnos se enferman frecuentemente.	
3565	I believe they are okay, I'm concerned about community	2/17/2026 11:25 AM
3566	Not a good idea, because the focus is on buildings... not students. This doesn't solve the cause of the declining enrollment. The problem is the Dekalb County Commissioners has only focused on SENIORS. creating more facilities and housing for Seniors. Not creating an environment and community for families. Also, the elementary schools carry most of burden and from my research, the elementary schools are also bringing in more money for athletics. Closing neighborhood elementary schools can disrupt young children the most, this can also increase transportation time for them. In other districts, school closures has lead to 45-60 mins additional commute times, increased absenteeism. And it reduces flexibility for FUTURE GROWTH!	2/17/2026 10:39 AM
3567	Ashford Park Elementary is integral to the Ashford Park Community. Please do not close this incredible school.	2/17/2026 9:19 AM
3568	Dekalb Schools have gone from an excellent system in the 1970s to a laughing stock currently. The board and county office have run schools into the ground despite high tax revenue. The schools are overcrowded without any discipline, instruction, or accountability.	2/17/2026 8:54 AM
3569	As a local resident, who is considering having children soon, this plan makes me want to leave the area. I worry what will happen with the empty schools - what is the plan to keep them safe and repurpose them, rather than leaving them empty? What will happen to all the jobs in the community for those across the schools? These concerns need to be addressed before moving forward, if at all.	2/17/2026 8:36 AM
3570	The information provided about the "whys" of elementary closure is inadequate compare to the reasoning behind high/middle closures. AP is the most over crowded elementary school, nearby schools are operating at over-capacity, where do you propose these 725 students go?? How do you justify closure when you are currently spending money renovating? And what does it say about your county when more and more are moving away and going private not because they want to, but because the board antics and corruption, give them no positive options.	2/17/2026 8:35 AM
3571	Schools should not be consolidated.	2/17/2026 8:09 AM
3572	We love Oak Grove - the community, teachers, staff, and environment all make for a wonderful experience both for our child and for us! There is a string sense of community involvement and development amongst everyone who attends.	2/17/2026 7:55 AM
3573	Consolidate as many facilities as possible and reevaluate every 3-5 years	2/17/2026 7:46 AM
3574	Do not close OAk Grove Elementary. The school is a hidden Gem. The school does everything right they teach phonics. They hire extra teachers out of their own foundation money to help with reading. They encourage field trips, international days, literacy parades school dances. It has been the best experience of my child's life.	2/17/2026 1:12 AM
3575	What kind of excuse is this????? Your resources are going to "empty seats" redirect them with the taxes we pay. I want my taxes to pay for OPEN, FUNCTIONAL, AND ENRICHMENT, of Dekalb Schools. Dekalb is a metro atlanta county experiencing rapid growth. Closing TWENTY-SEVEN SCHOOLS, while law enforcement and teachers ALREADY complain about teens not having enough resources to invest in their education & extra curriculum. As a dekalb resident for GENERATIONS. WHOS FAMILY IS FULL OF SUCCESSFUL DEKALB COUNTY GRADUATES & CURRENT SCHOLARS, WHO WOULD LIKE TO CONTINUE GENERATIONAL SUCCESS IN THIS COUNTY, THE SCHOOL BOARD NEEDS TO IMMEDIATELY REVOKE THESE BS "DISCUSSIONS" and properly fund our damn schools	2/17/2026 12:57 AM
3576	I'm worried about the impact of Ashford Park ES closing. My fear is a large majority of those students will end up going to private school rather than to an elementary school that has historically not been as strong. I fear the parent involvement that is a big part of Ashford Park Elementary's success will not relocate to a different ES, instead it will follow the students to a private school.	2/16/2026 11:35 PM
3577	Makes sense to consolidate and improve the current facilities to create a better learning environment. Get rid of all trailers and inadequate infrastructure.	2/16/2026 10:37 PM
3578	I do not understand how you think closing 3 of the best performing elementary schools in the district (Livsey, Evandale, and Oak Grove) is good for the surrounding DeKalb County	2/16/2026 10:04 PM

	communities. Is this part of your plan to destroy the strong communities in the northern part of DeKalb? Our kids can walk or ride to their schools, with few needing to bus. These are community schools with strong parental engagement. Do not do this or I and my families will do everything we can to vote you out of office.	
3579	I think capacity numbers tell one element. I think for folks to feel fully informed, we need data by school for number and percentage of unfilled seats, how many students are in each homeroom/grade classroom and how many the district expects. There has also been very little data about the type of programming schools currently lack and formal commitment to how any operating cost savings would go to schools - which schools and which programs/students benefitting. Impact analysis on remaining schools, traffic and infrastructure. Sagamore will not have a larger parking lot or added drop off and pick up areas. Safety and community are at risk. My child has benefited tremendously from being in a small community based school. Its small size and positive family feedback was a HUGE reason we did not choose private school. If our school experiences dramatic growth in classroom size and overall numbers, it's very likely we would look to private school for our children. Is there data on prek programs and ultimate enrollment. Turning away preK students in the lottery must result in transitions to private prekindergarten and with it a higher likelihood of private elementary and schooling in general. Personally our children are much more likely to attend dekalbs large middle and high schools only because of our smaller elementary drawing us into the public school pipeline. I worry greatly plan this will worsen enrollment issues.	2/16/2026 9:59 PM
3580	I understand that the scenarios aren't final, but it would be helpful to understand the specific metrics behind proposed closing/expansion.	2/16/2026 9:09 PM
3581	Makes no sense. A lot of money and time have been put into the schools that are marked closing. Many of these schools have trailers because there is not enough room. How are they not filled to capacity?? Having to drive far to elementary or making the kids take a bus that would take a significant amount longer than it already does is a waste. My daughter rides the bus in the morning and it takes 30 minutes to get to school. That means getting on the bus at 6:30am. What time would these kids have to wake up to go to an even further school?	2/16/2026 8:51 PM
3582	Neighborhoods want to make sure that the schools stay in tack, ensuring consolidation doesn't lead to students get bused further away, having to wake up earlier than already necessary. Teachers want to work in the community they are currently assigned to and their commute needs to be taken into consideration. Programs need to be marketed so that there is a reason to support the changes. Clarity needs to be provided as to where the consolidations will be moved to. It is hard to determine where the closed schools will be moved to based on the diagrams provided.	2/16/2026 8:43 PM
3583	Based on potential enrollment numbers it makes sense.	2/16/2026 8:39 PM
3584	I totally disagree and it appears that most of the schools. that are not affected with the scenarios are schools that in the northern part of Dekalb County.	2/16/2026 8:36 PM
3585	The traditional school configuration of K–5, 6–8, and 9–12 reflects natural developmental stages and has served students well over time. While enrollment efficiency is important, it should not outweigh what is developmentally appropriate for students. Wide age gaps within the same school—such as elementary students with middle schoolers or middle schoolers with high school seniors—raise valid concerns about social, emotional, and academic alignment. At the same time, creating very narrow grade bands can unintentionally place strain on families. Splits such as PK–3 and 4–5 may increase the number of transitions students experience and make it difficult for siblings to attend school together. This can significantly complicate daily logistics for parents and caregivers.	2/16/2026 8:00 PM
3586	Just broadly looking at the closure map, it does present a very stark picture of our lowest income county residents having to travel further for school, and our higher income residents receiving both expansions and fewer closures.	2/16/2026 7:45 PM
3587	Less students means better student to teacher ratios and better outcomesof individual needs being met. If you consolidate schools, you're overcrowding classrooms to save money. That's not right. And the staff loses jobs.	2/16/2026 7:34 PM
3588	Some additional research needed. Oak Grove elementary has growing statistics and with many of the neighborhoods around getting younger demand will go up.	2/16/2026 6:26 PM
3589	It's a financially responsible step that would ensure all students are learning in solid, brick-and-mortar buildings with working AC, reliable heat, and roofs that don't leak. At the same time,	2/16/2026 5:11 PM

	some of the schools on the closure list are in areas where other schools are already overcrowded. I hope any buildings that close will be repurposed for programs and will continue to serve students and local communities.	
3590	I would be against closing Oak Grove Elementary as it is nearly 89% full with projections to rise to 96% with continued housing development. I would not be in favor of grades 6-12 at the same school for the most part.	2/16/2026 4:55 PM
3591	Still not sure what is happening	2/16/2026 4:47 PM
3592	I believe the benefits of consolidation may outweigh the drawbacks. Aging school buildings can create real challenges for both teachers and students, especially in a rapidly advancing world where modern, interactive learning environments are essential. Schools should strive to be engaging and dynamic spaces that inspire students to stay involved and motivated. At the same time, we must consider the potential impact of larger class sizes, which can make individualized attention more difficult. One possible solution could be increasing the number of teacher assistants to help ensure that every student feels supported, seen, and heard.	2/16/2026 4:19 PM
3593	I'm concerned about overcrowding schools and increased class sizes with so much consolidation.	2/16/2026 4:07 PM
3594	Oak Grove Elementary is a shining example of an elementary school done right. Closing it would be a mistake.	2/16/2026 4:07 PM
3595	Your plans increase enrollment at schools that are already at capacity. I will personally work to vote every one of you out if you close these schools.	2/16/2026 4:06 PM
3596	Concerned about the capacity.	2/16/2026 3:53 PM
3597	I feel that the approach is to stuff as many children into a school as possible and to close successful schools with good test scores and place them in failing schools based solely on numbers. Dekalb County should be ashamed of themselves.	2/16/2026 3:30 PM
3598	Concern about the closing of some good schools.	2/16/2026 3:27 PM
3599	The initial facility scenarios seem largely justified and sensible at least in District 2.	2/16/2026 3:25 PM
3600	Well it's good	2/16/2026 3:18 PM
3601	Please keep ashford park elementary as is	2/16/2026 3:08 PM
3602	Strongly oppose the closing of a well loved school deeply rooted witihin the community.From the data available Oak grove is near capacity expected to be at 96% capacity as per projections for the next few year. Consolidation will only remove functional capacity rather than eliminate excess capacity. Closure would further cause Oak grove students to primarily shift to Sagamore or Brairlake which would mean an expansion of these schools need to be done before adding more students to it , which would only add more chaos than helping a smooth transition in a good teaching environment.	2/16/2026 3:07 PM
3603	Strongly oppose the move to close Oak Grove elementary(OGE). OGE is the heart of Oak grove community. Oak Grove meets the utilization goal and is a high performing stable school. Closing a high performing school questions the real goal of a school district. Does the school district care about quality? Oak Grove Elementary is a long-standing neighborhood school that has served multiple generations of families in the Oak Grove community for decades. Its stability and continuity are reflected in strong academic performance, high teacher retention, and consistent enrollment demand. High performing schools are not made in few months or years. This requires a strong community as well. Strong academic culture is made over many years and decades. Closing such a school would be destructive to students and community. Oak Grove's 2025 Performance Content Mastery: 94.2 (4th highest among the 26 elementary schools reviewed; Top-tier performance within DeKalb County) Readiness: 95.3 (2nd highest in the review group). The district's consolidation model targets approximately 88% elementary utilization. Oak Grove is already operating above that level and continues to grow. 2025: 447 students (89% utilization) 2026 projected: 487 students (~96% utilization)	2/16/2026 3:06 PM
3604	I think that schools should be combined and staff should be combined to allow for more effective learning opportunities.	2/16/2026 2:55 PM
3605	Consolidating is fine, so long as students can get proper instruction and transportation.	2/16/2026 2:54 PM
3606	I hate to see Midvale ES on the list. Midvale is a great neighborhood school that prepares	2/16/2026 2:50 PM

	students for life through the IBPYP. I don't think there's another elementary school in that cluster that is IB Certified.	
3607	I would prefer Oak Grove stay open	2/16/2026 2:48 PM
3608	no feedback	2/16/2026 2:46 PM
3609	no feedback	2/16/2026 2:34 PM
3610	This seems to be a regular cycle and is a fairly expensive option to keep repeating.	2/16/2026 2:34 PM
3611	These scenarios make sense, although I am concerned that in closing/repurposing high schools, already at/over capacity schools (such as Lakeside) will incur an excess of students.	2/16/2026 2:34 PM
3612	Keep Oak grove the same	2/16/2026 2:32 PM
3613	Oak Grove should not close - amazing teachers, great academic performance, great test scores, great teacher retention	2/16/2026 2:29 PM
3614	It would be a big mistake to consolidate Oak Grove Elementary when it is a great school, it has done amazing work with our children and continues to grow in size	2/16/2026 2:22 PM
3615	I don’t agree with the school closures.	2/16/2026 2:16 PM
3616	I think it's great so far. I would love to see how school attendance zones are determined.	2/16/2026 2:11 PM
3617	Inappropriate and not best serving students	2/16/2026 2:10 PM
3618	The plan seems to make sense based on the projected resources. I know that this process is supposed to be separated from the redistricting, but I believe some minds could be eased and we could provide more informed input if there was insight into redistricting.	2/16/2026 2:08 PM
3619	I understand the need to consolidate buildings, based on decreased enrollment. However, the human element needs to be considered, not just seeing students/teachers as "numbers." Alos, certain buildings may need to be reimagined/redesigned to cater to the different populations. For example, if a middle school building will house elementary school students, the restrooms would need some changes. The building configurations would need to be taken into consideration, as well.	2/16/2026 1:57 PM
3620	I absolutely 100% disagree with closing small neighborhood schools to make larger clusters of schools. I worked in larger schools. You lose the ability to really connect with students and help with their needs. My child is in a large middle school and he has become lost in a sea of children. He has an IEP and he isn't being served as well as he had in elementary when it was only 400ish students. Larger schools do not perform well. I think that you can retain smaller schools and just use them more effectively. Also, larger schools like Fernbank Elementary were built, and they weren't able to fill the space, while smaller schools were crowded. STOP building larger schools that ultimately will have many classrooms that are empty.	2/16/2026 1:16 PM
3621	KMS is essential to the DeKalb and Atlanta community. It has educated and trained top work force for Georgia and lead to strong economic growth that we all benefit from. Oak Grove Elementary serves as an award winning school in the community that has built the history of the neighborhood and community. Talented alumni of Oak Grove are the leaders in all areas in Georgia today which can not be ignored. We need to keep these two schools operating as is if not better invested for the greater good of all.	2/16/2026 1:08 PM
3622	It makes me sad to lose some of these schools. I understand the challenge, but these schools are also part of the community. Ashford Park is our local school and it has been wonderful for our family. If that were to close, where would the children in this neighborhood go?	2/16/2026 1:06 PM
3623	I strongly urge the district to reconsider consolidating Midvale Elementary School. We are the only IB and STEM elementary school in the area and the only IB elementary school within the Tucker cluster. Families intentionally choose our school because of this unique programming, and consolidation risks losing these valuable programs. Our school has excellent staff, supportive families, and strong community involvement. Our size allows us to build meaningful relationships and provide individualized support to students. Losing this unique school option would have a significant impact on students, families, and the Tucker cluster community.	2/16/2026 12:52 PM
3624	I do understand the possible consolidations, my question is, how will you repurpose Cedar Grove MS?	2/16/2026 12:45 PM

3625	Don't close the schools.	2/16/2026 12:32 PM
3626	I believe that one of a school's primary responsibilities is to build communities. The scenarios presented where schools close and/or become monstrosities in modest communities and shifting attendance zones away from a child's home take away from this very belief.	2/16/2026 12:30 PM
3627	While I understand the trends and information provided. The information fails to mention the root causes of decreased enrollment in DCSD. While consolidating schools might seem like a logical idea it fails to address the success of individual schools and specific programs. In my case my daughter is thriving in Evansdale French DLI program	2/16/2026 12:23 PM
3628	I think it makes sense to consolidate schools, especially if they just don't have enough kids.	2/16/2026 12:07 PM
3629	How am I supposed to provide any meaningful feedback if you do not provide the reasons to close certain schools. You say that Ashford Park Elementary is overutilized/too crowded but then you want to close Ashford Park Elementary but not give reasons? You need to provide reasons and supporting data. I live within a 10 minute walking distance from Ashford Park Elementary and I want my current 2 year old to attend Ashford Park when he is older. I do not want you to close Ashford Park Elementary but I'm agreeable to keeping an open mind. But you did not provide any reasoning or supporting data for the closure of Ashford Park Elementary so I cannot provide any feedback other than DO NOT CLOSE ASHFORD PARK ELEMENTARY BECAUSE IT IS ONE OF THE BEST ELEMENTARY SCHOOLS IN THE COUNTY.	2/16/2026 11:41 AM
3630	I think Midvale should not be consolidated because it is an IB school. IB schools lose certification when they are consolidated with other schools that are not IB certified. If Midvale is closed, we will not have a school in our community. When schools are consolidated, the students may lose the nurturing they were formerly receiving. This could have a negative impact on student success.	2/16/2026 11:36 AM
3631	If my children's classroom's student-to-teacher ratio increases, I am not in favor of consolidation. Smaller class sizes are ideal learning environments. I do not want a ratio greater than 10:1.	2/16/2026 11:24 AM
3632	I think this would be terrible for the community. This neighborhood is full of young families. Closing Oak Grive would destroy property values.	2/16/2026 11:14 AM
3633	In the Tucker cluster, it makes far more financial sense to expand Brockett or Midvale and close Livsey. Midvale could be expanded onto the current field and still have room for a playground. They could also build a new footprint entirely on the field and then tear down the current building to make playground and much needed parking. Brockett also has a footprint much more condusive to expansion. The Livsey property is not condusive to an expansion without excessive cost to make the site viable. The school is tiny, there is no direct access to the front door, parking is very limited, and they already have multiple grades in trailers, and have for years.	2/16/2026 11:05 AM
3634	Makes complete sense for operational expenses.	2/16/2026 11:02 AM
3635	I agree with consolidation to reduce the strain of overload classroom sizes that some teachers has to deal with.	2/16/2026 10:55 AM
3636	I am a teacher at Lithonia High School, and I'm concerned that the school may be closed down in the future. This high school serves 1600 students and is in the heart of the city of Stonecrest, which is growing rapidly. Lithonia High School should either be expanded or a new larger build should be built for the high school.	2/16/2026 10:51 AM
3637	Henderson Mill Elementary is a fantastic STEAM certified school which is a big reason that I chose it. Regardless of where the consolidation pushes my child I would hope that STEAM certification will be present for that school as well. I could have my child attend private school but for the education I know Henderson Mill has with the STEAM certification I chose not to. If Henderson Mill is closed what will the school be repurposed as? For it to be an empty behemoth that can be trashed would be a very sad thing for the community. I really love Henderson Mill and all the opportunities it offers, but mostly the education and wonderful quality of teacher it has.	2/16/2026 10:46 AM
3638	I believe the district’s consolidation planning should focus on efficiently using resources while ensuring strong support for students’ learning and well-being within DeKalb County School District.	2/16/2026 10:34 AM

3639	I think that the focus should be on not consolidation but fixing up Chesnut, and not closing Kingsley or Ashford park.	2/16/2026 10:31 AM
3640	While I understand combining and consolidating schools and changing usage dynamics. I'm not sure best practices for the whole is being considered	2/16/2026 10:20 AM
3641	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion.	2/16/2026 10:04 AM
3642	I do not understand the specific reasons for proposing to close Evansdale Elementary, the only French dual language immersion (DLI) program in DeKalb County, which is well-established and has shown to enable students to more effectively gain proficiency in a foreign language than traditional models, leading to greater cognitive skills and higher performance on standardized tests, among other benefits. Evansdale has a very high Great Schools rating, including compared to other nearby elementary schools (e.g., Pleasantdale), and has a highly engaged parent community and strong PTO. Proposing to close Evansdale because of the age of the facility without regard for its thriving DLI program, successful outcomes, and passionate parent community is inadequate and short-sighted. As a parent, community member, and DCSD stakeholder, I want to hear the SAP panel affirm the ongoing existence of the French DLI program (and other DeKalb DLI programs), and its continuity through middle and high school as currently implemented. If you want for me and parents like me to be on board with this shake up, then we need to hear you all affirm that these successful programs WILL continue regardless of where they're located.	2/16/2026 10:02 AM
3643	Brockett and Evansdale are a tight knit community that has served the community for the longest and graduated generations of household. There are literally educators who returned to serve to give back what they received. A school like Evansdale that is predominantly Hispanic and the ONLY FRENCH school in Dekalb should hold its legacy and remain standing. It is challenging enough that our Hispanic population is experiencing major challenges due to ICE - this has caused (and still causing) major displacements and instability for family where the school may be their only safe haven. Evansdale should remain standing, so should Brockett.	2/16/2026 10:01 AM
3644	Disheartened. I understand the financial side of things but as a teacher, I don't believe that larger elementary schools is necessarily best for students.	2/16/2026 9:54 AM
3645	Are there excess seat because people are going to private school? It would be great to know that. That would mean instead of closing some schools, work on the academics. For example, Kingsley was once very good, bit through poor leadership it lost its charter, STEAM program and has a lackluster gifted program. Any thought to making these schools with opportunity to serve a smaller amount of students into academic institutions that bring the kids back?	2/16/2026 9:54 AM
3646	I strongly oppose the proposal to convert the high school into a middle school and reassign high school students to other campuses. While consolidation may aim to address budget or enrollment shifts, the educational and operational risks appear significant.	2/16/2026 9:46 AM
3647	I don't believe we should close schools.	2/16/2026 9:45 AM
3648	I worry that as the COVID exodus from public school is not as prominent and new families return to public school, we will be in an overcrowding situation again in the Dunwoody cluster. Dunwoody high school is overcrowded which does not seem to be addressed in any of these scenarios.	2/16/2026 9:43 AM
3649	It makes sense that DeKalb will have to consolidate schools due to the declining birth rate. Maybe at some point, the district will take better care of the school facilities and teachers too. We speak specifically from our title 1 school experience, rat infestations, no fire sprinklers etc etc	2/16/2026 9:40 AM
3650	Do not close Kingsley. Kingsley is a small school where teachers know students throughout the school, not just in their class. It creates a sense of community that supports learning through a shared trust.	2/16/2026 9:39 AM

3651	Closing of Kingsley does not help our community. The community is small yet mighty. We have loving and caring teachers who drive instruction with data. Our community feels supported by our school.	2/16/2026 9:37 AM
3652	Thank you for the opportunity to provide feedback on the proposed consolidation plan. I appreciate the district's focus on improving facility utilization and long-term planning. However, based on the data presented, closing Oak Grove Elementary does not appear to align with the stated goals of the initiative. Oak Grove Already Meets and Exceeds the Utilization Target The district has identified approximately 88% utilization as the target benchmark. According to the October 2025 Enrollment Report, Oak Grove is already operating at 89% utilization (447 students enrolled in a 504-seat capacity), exceeding the stated goal. Furthermore, projections shared at the February 2026 PTA meeting indicate enrollment is expected to reach 487 students in 2026—approximately 96% utilization. Enrollment trends demonstrate sustained recovery and growth following the temporary pandemic decline: * 2023: 389 students * 2024: 428 students * 2025: 447 students (89% utilization) * 2026 projected: 487 students (96% utilization) This is not a pattern of underutilization, but of steady upward growth. At the current pace, Oak Grove is likely to reach or exceed full capacity within the next two to three years. Closing a school that already exceeds the utilization target does not resolve underutilization; instead, it removes capacity from a corridor that is approaching full enrollment. Capacity Constraints in the Lakeside Cluster If Oak Grove were to close, its 447 students would need to be absorbed primarily by Sagamore Hills and Briarlake. With only 173 seats of combined availability between those two schools, they cannot absorb Oak Grove's enrollment without significant boundary shifts, overcrowding, or facility expansion. This proposal appears to relocate where capacity must be built rather than eliminate the need for it. In addition, there is documented residential development within 2–4 miles of the Oak Grove neighborhood that is expected to increase student enrollment across all three schools. This growth does not include the continued housing demand associated with expansion by CHOA and Emory. This area is not experiencing structural decline; it is experiencing concentrated growth. Academic Performance and Stability Oak Grove is one of the highest-performing schools in the review group: * Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) * Readiness: 95.3 (2nd highest) It is a sought-after school with strong academic outcomes. Research consistently shows that non-voluntary elementary school moves can reduce short-term academic performance due to cohort disruption and loss of continuity. When stable neighborhood schools close, some families leave the public system for nearby private or charter options. This reduces enrollment and funding without eliminating facility needs. Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top academic tier does not directly address the district-wide utilization gap.	2/16/2026 9:34 AM
3653	Oak Grove Elementary school is at capacity with the number of students. The teachers and level of education provided is excellent. I do not see any reason why would this school be a candidate to be closed down.	2/16/2026 9:30 AM
3654	Evansdale has a unique French/STEM program that warrants our smaller enrollment size. We are creating multilingual learners. Knowing another language is integral to becoming a global citizen, which today's youth will increasingly need. Starting at a young age (elementary school) is essential to learning a new language.	2/16/2026 9:29 AM
3655	I think everyone in the financing department should be FIRED. Dekalb county must do better in budgeting the district's money. They also need to require a CLAUSE in the superintendent's contract that states if they are fired, get arrested, or quit then the contract is null and void. Teachers need a significant raise so we can actually live in this economy.	2/16/2026 9:28 AM
3656	My initial thought is that this looks like the right thing to do.	2/16/2026 9:28 AM
3657	Mold in the building, leaks, a lot of empty classrooms and teachers call out of work a lot. There are always substitutes there that don't teach so children are not learning. The state test scores are very low for it to be a "Theme" school	2/16/2026 9:27 AM
3658	I think it makes sense.	2/16/2026 9:22 AM
3659	Closing Oak Grove elementary is a horrible idea. The school is high performing, almost at capacity and it's the reason we moved to this neighborhood. We will move to the suburbs if the current plan to close it is implemented.	2/16/2026 9:22 AM
3660	I feel that it negatively impacts the entire community that surrounds these schools. Schools such as Kelley Lake ES have been beacons in the communities in which they reside.	2/16/2026 9:16 AM

3661	Oak Grove is not underutilized. For many years, it was actually overcrowded. It currently satisfies the goal of 88% utilization, and the trajectory is upward. The other schools in the cluster do not have the capacity to absorb the students from Oak Grove without significant expansion. The creation of mega-schools instead of community schools is a poor choice. It requires more busing (which the county already struggles with) to concentrate kids in larger schools where community building is more difficult. A higher quantity of smaller schools is preferable for the education of children...which should be the goal of any school system. Moreover, the schools slated to absorb the students from OGE are themselves growing because of a resurgence of this area including construction of high density projects. This plan leads to larger overcrowded schools.	2/16/2026 9:07 AM
3662	I do not believe that Sagamore Hills should be on the expansion list. Sagamore Hills was built in the 1950's and it truly is designed as such. As a staff members there we have many issues such as not enough parking for staff members and visitors, We do not have enough bathrooms for staff and even students, and the building in truly outdated. Sagamore Hills should be turned into a District Office of used in a different capacity. Maybe if they did slight changes and upgraded the bathrooms in the building it would be a great office for Area 1.	2/16/2026 9:06 AM
3663	Major concerns need to be further addressed. 1. Clarity on school-level rationale. Families need transparent criteria, including facility adequacy, enrollment projections and cost analyses as to why the 27 potential schools are being closed/repurposed. 2. Families need to know how magnet programs, theme schools, STEAM/STEM pathways will shift within this new facility configurations. 3. Transportation Impacts. With 27 school closings, this will impact transportation to new schools causing longer bus routes and more attendance infractions due to tardies/ absences because of longer traffic issues.	2/16/2026 9:05 AM
3664	The only plan that i feel is feasible enough for implementation is combining k-8 and leaving 9-12. This conversion is going to affect many low income households that are already struggling to effective care for, transport, and educate multiple kids. By having kids that need to go further from home, go to multiple different schools in different directions without a stable support system is going to put undue stress on many of the parents, which are likely to be single parent households. These households are likely to use public transportation, can't afford ride sharing, or have a vehicle that is not reliable. I would like to understand the school bus issue more with having a k-8 and 9-12 schools only.	2/16/2026 9:00 AM
3665	People choose schools based on ratings, parent involvement, principal, and school resources. This proposed plan could drastically impact the property value of our homes if there is a major redistricting of the school lines. I can also see this causing a lot of parents to pull out of public school and choose private which would have adverse reaction of keeping our schools full.	2/16/2026 8:58 AM
3666	I do not think this is the answer, nor will it be beneficial to the students, families, or enrollment in the long run. (See feedback below).	2/16/2026 8:57 AM
3667	One of the only advantages an elementary school in south Dekalb has right now is smaller class sizes. I am concerned that this one advantage will be taken away.	2/16/2026 8:55 AM
3668	I’m a bit confused about some of the proposed facilities being proposed to close in my area. I understand Oak Grove has lower enrollment but I’d think it more capacity than some other schools in the area and more updated facilities due in part to it’s Foundation that pays for playground and other improvements. I can’t speak to the closing on many of the schools as many are not near me so I don’t know much about them.	2/16/2026 8:52 AM
3669	It was very upsetting to see Oak Grove Elementary on the list of possible closures. OGE was a huge draw for us to buy a house in this neighborhood, and we have loved the community it fosters. My son, who attends currently, sees his friends and classmates at the playground, the grocery store, and all around so we really value having this neighborhood school. I think the research is clear on the value of small schools as well. OGE is in demand, near capacity and high-performing. I think DCSD risks losing many of these families and students should they close it. I am also concerned about the lack of information about what the district plans to do with the school building in the event of a closure.	2/16/2026 8:47 AM
3670	Seems to be a lot of disruption in South Dekalb and little to no disruption in North Dekalb. This leads to the incorrect perception that south Dekalb contains the problem schools. I don’t like that look. I want to know your plans for increasing the enrollment in Theme schools, which are your highest performing schools in South Dekalb.	2/16/2026 8:46 AM
3671	I think the schools for closures are too close together and will impact transportation and	2/16/2026 8:42 AM

	access way too much.	
3672	I would like our school to stay open. It's a nice building and it's close to my home.	2/16/2026 8:40 AM
3673	Please don't close Oak Grove Elementary	2/16/2026 8:40 AM
3674	I am both surprised and disappointed	2/16/2026 8:39 AM
3675	Oak Grove should be turned into a 4th-6th grade magnet school. The building cannot be expanded. The parking cannot be expanded.	2/16/2026 8:36 AM
3676	Any change of schools within a neighborhood will be a disruption and need an adjustment period for students, teachers and parents.	2/16/2026 8:33 AM
3677	I feel that this is a great consideration. I would hope that all factors are fairly considered and implemented.	2/16/2026 8:30 AM
3678	I would not recommend merging the elementary and middle schools. There are already too many students in 1 classroom. I have about 27-29 students in just 1 home room class. Students, parents, and teachers will be overwhelmed. Not a good move Dekalb	2/16/2026 8:23 AM
3679	The consolidation is a big shock to the community. I have no children at this time but in the future I would hope my children have close proximity to the schools they attend. Fortunately the school near that is on the consolidation list is browns mill elementary. I think that in the event of closures we need reassurance of what the closed schools would turn into. If we are trying to push charter schools thats going to be an issue, if we're repurposing schools for businesses then that would be interesting. Im not necessarily against the consolidation but everyone need assurance of what these closed schools will turn into.	2/16/2026 8:18 AM
3680	N/A	2/16/2026 8:17 AM
3681	Can we see a breakdown of the reasoning behind each school listed on the close list	2/16/2026 8:16 AM
3682	I am vehemently and adamantly against the consolidation of these schools. Small neighborhood schools are the bedrock foundation for community growth and neighborhood support.	2/16/2026 8:10 AM
3683	From a financial standpoint it makes sense. However, I believe a lot is lost when moving away from smaller neighborhood schools. Not just from the education but neighborhood fabric which leads to more stable housing stock and DeKalb be long a better place to do business which will come full circle to improving schools and their budgets over the long term.	2/16/2026 8:08 AM
3684	We strongly oppose the closure of Oak Grove Elementary School. It is stated that it is under-enrolled, but we believe we are still recovering from the pandemic when many families pulled their kids out of Dekalb. Many kids went to private because of loss of confidence in Dekalb. Let's focus on making the district great, not further reducing numbers in a downward spiral. Elementary schools should remain small for the best experience of the kids, teachers, and parents. If we remove all those trailers, is OGE at the capacity for which it was originally intended?	2/16/2026 8:07 AM
3685	SRES served as a test case; ask me how that turned out. If it had been successful, there wouldn't be any concerns. However, you have more children, larger classes, and the same resources. You end up with a building full of kids without parental and family involvement. It doesn't make sense. Children thrive in smaller settings. Spending $10 million on new district salaries and acquiring a $6 million rundown building could enhance families' confidence in their local schools. Instead, they are crammed into a facility with more resources, knowing that these very resources are diluted by the increased number of children. Make it make sense. We want what's best for the kids, and even the teachers, not what's better for the CO and its top-heavy, high-paying positions. Conduct the forensic audit, dismiss the BOE, and perhaps you'll uncover funds that can be redirected and properly utilized to provide our teachers and staff with a living wage. Stop overspending on testing. There's too much testing and technology while teaching is neglected. Let the teachers and students breathe and stop treating them like machines. The decline is evident everywhere, but that's because they keep implementing the same foolish changes.	2/16/2026 8:02 AM
3686	They're ok but do need improvement makeover maybe	2/16/2026 7:58 AM
3687	It makes sense to consolidate.	2/16/2026 7:57 AM
3688	Would be great if Lakeside students would not be in trailers. I worry about security and weather	2/16/2026 7:55 AM

	events.	
3689	Please do not consolidate 6th graders with high schoolers.	2/16/2026 7:43 AM
3690	As a Cedar Grove High School teacher, I do have some reservations about us consolidating and moving to McNair High School, especially since the schools have been rivals for years. Not only am I a DCSD teacher, but I am also a product of the DCSD. While I lived in the McNair area, my parents did not want my brother and I to attend it because of McNair High School's reputation of having limited instructional opportunities and increased behavioral issues. Therefore, I attended Lakeside High School via the M to M program, and my brother attended Cedar Grove High School by my parents using a friend of the family's address. At the time, Cedar Grove was a school of excellence, and McNair was viewed as problematic.	2/16/2026 7:36 AM
3691	I do not support the proposed school consolidations. Schools are the heart of their communities, and closures would disrupt students academically and emotionally while increasing class sizes and transportation burdens. I strongly encourage the district to explore alternative solutions that preserve neighborhood schools and prioritize stability for our students and families.	2/16/2026 7:28 AM
3692	Consultations eliminate 4 elementary schools that are near my house. It's concerning that my children (ages 2 & 1) may not have a local school due to this consolidation. Also, this proposal seems to create larger class sizes which is not effective for learning.	2/16/2026 7:10 AM
3693	when I go to Arabia or miller grove they are cleaner then tucker high. Tucker has mold growing	2/16/2026 7:10 AM
3694	The finances and numbers cannot be the largest factor in making a decision. Class sizes are already too big, even for small schools. Children are unable to learn with limited resources and larger class rooms.	2/16/2026 5:49 AM
3695	I don't believe that these schools should be shut down because there more than just schools there important they hold great memories for not just myself but my family and I sure the entire community.	2/16/2026 1:35 AM
3696	Consolidation does nothing for the amount of resources necessary to equip a facility that will likely double in size. If resources are thin now, they will likely remain thin with consolidation. The budget and resources will not be able to prioritize the students environmental shift and learning. It will cause a significant impact on both the parents and students, as far a district and zoning goes, effecting transportation costs and complexities of education. The initial facilities scenario is extremely vague, lacking the necessary information to make a responsible decision in consolidation favor.	2/16/2026 1:18 AM
3697	Consolidations may be needed and updating or relocating buildings may also be needed. However, the smaller size schools are most beneficial in my opinion. Removing the small neighborhood schools would totally change the advantage of the Dekalb County model for the more human small-scale schools, especially at the elementary level.	2/15/2026 11:32 PM
3698	I know it needs to be done for the sake of improving outcomes for our students and district overall. I have concerns regarding the McNair - Cedar Grove scenario	2/15/2026 10:49 PM
3699	I think it’s a lazy move from the district. I would like more information on why and how resources are spread thin, and why that requires uprooting 27 schools. I think schools that are over capacity can be evaluated so that students are not suffering in overpopulated hallways and classrooms, but shutting down that many schools simply isn’t a long-term solution either.	2/15/2026 10:35 PM
3700	It's a inconvenience to every student that wants a better future for themselves as long with the parents and teachers and any everyone involved with these schools	2/15/2026 10:26 PM
3701	I think that one of the things that makes Dekalb County schools special is that we have small community schools. Our schools are not built on huge pieces of land like in Gwinnett so it makes it impossible to change these schools into huge schools. Nobody wants a towering huge school in the middle of their neighborhood or the traffic that it creates coming into their neighborhood. The Sagamore neighborhood already complains about the traffic from Cliff Valley, so I cannot imagine how upset they will be once more people are speeding into the neighborhood. I think that there is something to be said for a true community school. You definitely won’t save on gas for buses. The schools will be way too large for the footprint of the building. Also, what are you going to do with all of the open buildings. We don’t want empty buildings that are unkept in our community.	2/15/2026 10:13 PM
3702	Closing that many schools seems beyond necessary, what happens to the buildings and land?	2/15/2026 10:10 PM

	If they are to be sold or repurposed, the budget for that will exceed maintaining the current school. What happens when attendance rates increase again? COVID withdrawals account for a huge decrease in Dekalb public schools. Keeping smaller schools provides students with better educational opportunities, the cost to build and expand some schools would be higher than leaving the schools that are at or above a certain enrollment. OGE attendance is full and multiple Dekalb choice students choose this school, would be a huge loss to the community if it were closed. The OGE foundation provides support and resources far beyond most public schools.	
3703	Chestnut is a gem and its small size works. Close Kingsley and split its zone between chestnut and vanderlyn.	2/15/2026 10:03 PM
3704	All three of my children attend these neighborhood schools.	2/15/2026 9:53 PM
3705	DCSD should pause this discussion until more information is provided to the public on the data used to reach the closure list. The Lakeside cluster should be reviewed further. Closing Oak Grove Elementary does not make sense - and the enrollment projections are inaccurate. Enrollment is projected (per DCSC records) to increase for the 4th consecutive year this coming fall. With correct data, the school meets utilization criteria. It is also one of the top performing schools in the district.	2/15/2026 9:39 PM
3706	As my students (2) go to Oak Grove, I am sharing my feedback on the recommendation to close Oak Grove Elementary. Oak Grove currently meets the county's target utilization percentage at 89% and according to projections over the next year or two should continue to increase that utilization percentage (up to about 96%). While the building is old and needs some renovations (for example HVAC updates/repairs; like a lot of Dekalb County Schools that have been neglected), the students are being successful. Further, DCSD has not demonstrated that this plan of consolidating schools will be effective. Beginning consolidation on such a large scale (closing 27 schools) seems ill-advised and a better scenario would be to start with a smaller scale of very targeted areas with solid reasoning and research to show that such consolidation will be successful- both financially, but also in academics and student success.	2/15/2026 9:17 PM
3707	There should be gifted programs, and specific high schools to cater to specific student categories like Innovation and STEM based to prepare the kids for higher level studies.	2/15/2026 9:02 PM
3708	As a mom of two children who we hoped would attend Oak Grove Elementary school - the proposed closure is not only shocking, but heartbreaking. I grew up in the city of Decatur and grew up waking to Westchester elementary - it wasn't until I left Decatur that I realized how rare yet wonderful true neighborhood schools are. My best friend went to OGE and I've always known it was a special place. My son is currently in the 3s class at Shallowford and we hope he and his 2 year old sister are able to experience what everyone has come to know and love about OGE.	2/15/2026 8:58 PM
3709	Oak Grove has always been high performing and this should be part of the decision making process. Why would you close high preforming schools.	2/15/2026 8:13 PM
3710	OGE has a very active parent foundation that supports the school and students with additional funding that provides an enriched environment above what the county offers. When you have an active parent bae you have better schools. When an elementary school get to big you loose that community. Maybe more should be put into building more schools that build a self supporting framework for STEM, afterschool enrichment, teacher continuing education that is not funded only by the county but by the parents whose students benefit from it.	2/15/2026 8:11 PM
3711	DO NOT get rid of Oak Grove Elementary! It's the best with great utilization and test scores. Our family loves it!	2/15/2026 7:28 PM
3712	You say that enrollment is down, but our classes are 20 plus students. Consolidation will make for even more crowded schools.	2/15/2026 6:56 PM
3713	We would be very upset if Oak Grove Elementary school closed. Our kids have had an amazing experience and the school is the heart of the oak grove community. Removing it would be devastating for the area.	2/15/2026 6:56 PM
3714	Shocked to hear of Oak Grove elementary school being on the list, while older classes may have been at capacity I know a number of younger families unable to get in on school choice because of capacity.	2/15/2026 6:50 PM
3715	As a parent of a current and future student, I am highly opposed to the closure of Oak Grove	2/15/2026 6:49 PM

	Elementary	
3716	There is strong community involvement, including an active foundation and PTA, at Oak Grove Elementary. I do not believe the bare metrics paint a full picture. Even though our children would likely be gone from OGE by the time it might close, the school's absence would be felt by all of us in the Oak Grove neighborhood.	2/15/2026 6:47 PM
3717	I feel strongly that OGE should be removed from the list.	2/15/2026 6:45 PM
3718	Strongly disagree with this plan	2/15/2026 6:43 PM
3719	With all the violence with guns and kids bringing them to school, other random people getting into schools will make it more easier to target these situations more I feel. It's already hard enough to govern the safety of kids going to school everyday as it is. Once you package all the schools together, unless you're adding a record hire for security and staff this doesn't make sense. Further hiw many students per class are you aiming for with this merging? Teachers have been dealt the short end of the stick for so long without major financial gain for attempting to teach the youth. The kids have been difficult enough to keep their attention on academics and with this is putting more emphasis on attention and the ability to get the to focus on the subjects. The sports section would even be more of a challenge because now your merging districts and there are only a handful of spots on theses teams this will create major disconnect between the youth and sports because they now have to find a lane where it's not as congested which will spark a huge increase in people moving and finding the best area to stay to make the best situation for their children. This is a bad idea on so many other levels that the thought of it should scare parents and others to the core!	2/15/2026 5:57 PM
3720	Include the wording proposal in the introduction for future changes, especially if the project is still in the planning stage.	2/15/2026 5:42 PM
3721	Oak Grove doesn't have a problem underutilization and it's one of the highest schools in the area	2/15/2026 5:38 PM
3722	not good, My kids come home and they don't know how to spell... Jerry's also been hitting the kids and I don't know what to do?...	2/15/2026 5:20 PM
3723	The Oak Grove Elementary School district is a very important part of this community. Being inside the perimeter with little to grow and expand has been a struggle, but we have supported these schools and will continue to do so as a community.	2/15/2026 5:16 PM
3724	Our grandchildten attend Oak Grove Elementary and have thrived there. Their love of reading, their teachers and special program offers after have been impressive. Keep tis school! The students adore it and it's so important to have a community school like Oak Grove.	2/15/2026 5:01 PM
3725	Do not like the idea of eliminating some very important high schools	2/15/2026 4:38 PM
3726	It seems overkill to close 2 schools in the Lakeside area. I think mega-size schools will not make for a good learning environment.	2/15/2026 4:33 PM
3727	DO NOT CLOSE ANY SCHOOLS, DO NOT COMBINE SCHOOLS!!!	2/15/2026 4:27 PM
3728	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students →	2/15/2026 4:23 PM

	~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	
3729	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	2/15/2026 4:19 PM
3730	It worries me. We used school choice to enroll our kids at Evansdale due to the DLI program. All of this leaves a lot of questions as to what happens if that goes away.	2/15/2026 4:18 PM
3731	I hate this idea. Our schools are good because they aren't overcrowded.	2/15/2026 3:53 PM
3732	As a PTA member and resident of Pendley Hills who is also the Hospitality Chair of our neighborhood community association, not only did my son attend Rowland, we bought our home specifically so we could walk our student to school. Many residents in the area have done the same. Our community association meets monthly in the cafeteria and we have hosted several back to school fundraisers as well as National Night Out events at Rowland. We work with the PTA leading to the most successful Scholastic Book Fair yet this past winter as well as the installation of a Little Free Library in front of the school. With the PTA we have had successful Parent Night Out events as well as several Teacher Appreciation events. The school over the last 10 years of my and my family's residency has seen several improvements with a new playground built by the community and Kaboom!. As a member of the Principal's Advisory Council, we voted to see new security fencing installed to secure the grounds. Our community votes at Rowland and it is not only going to impact our kids and our community as a gathering place, it will impact our community's future with the area being a place of	2/15/2026 3:34 PM

	significant growth and opportunity with the building of The Electric Owl, new apartment and townhome builds planned and begun in the area, as well as the significant improvements planned and being implemented at the South Indian Creek MARTA station. Closing Rowland Elementary would be cutting out a vital portion of our community and how we exist. When we saw the trailers removed from the school grounds post-COVID, we saw this as a blessing for our students and the community. You say small schools stress resources, I say you will stress the resources of the families and students of Rowland if you move forward with closing. We value a small neighborhood school and consolidating elementary schools into a large facility like Bethune is what we saw as our student transitioned to middle school. An age appropriate transition in which he felt ready to be in a large building with a larger population. Smaller classrooms and schools work. Please, let our Rowland Eagles SOAR!	
3733	I think it's a considerate plan and this allows more teachers to have support and hold each other accountable to help the education crisis we're in.	2/15/2026 3:24 PM
3734	Keep everything the same!	2/15/2026 3:22 PM
3735	This is very disappointing as I know my family and many of our neighbors who have young children who will be of age to start school in a few years purposefully moved to the Oak Grove Elementary School district with plans to one day send our children there. We made the decision to spend our hard-earned money to move here and do want to rethink this decision in a couple years if Oak Grove Elementary does in fact close. While I understand that this is being done because of low enrollment, I feel that this could end up with overcrowding.	2/15/2026 3:13 PM
3736	It is not a good solution. As we all know student come from different backgrounds, and also have different spped and techniques of learning. If you go through with consolidation, number of schools will decrease, but the number of students in a school as well as in classrooms increases exponentially which is a formula for the learners getting poor quality education. In my opinion it defeats the purpose.	2/15/2026 2:56 PM
3737	Closing Vanderlyn would be damaging since it is a high performing school, while expanding poor performing schools like Huntley Hills makes no sense.	2/15/2026 2:16 PM
3738	Consolidation is needed, but consideration should be given to community involvement and support at the schools considered being closed.	2/15/2026 1:36 PM
3739	I do not want Evansdale closed. It is a thriving school with a robust DLI program. I am greatly opposed to sending Evansdale kids to Pleasantdale.	2/15/2026 1:11 PM
3740	I agree with the purpose but did not see a measurement on the impact to my community and property values.	2/15/2026 12:41 PM
3741	Satisfactory	2/15/2026 12:08 PM
3742	I think this is a good and efficient effort.	2/15/2026 11:55 AM
3743	We don’t need any school closures. Rather if we do need to close schools make them more stem focused and let them compete with schools in better districts as far as resources. Stop failing kids in areas with high black populations. It looks very suspicious. Secondly feed the children better food options. Poor treat scores are linked to poor nutrition and give them sessions of relaxation stop making their schedule so tense.	2/15/2026 11:45 AM
3744	Consolidate where needed, but grandfather existing students instead of uprooting them. Unless the school is to fully close.	2/15/2026 11:42 AM
3745	I am concerned about the closure of schools to fill schools that are already at capacity. I have seen incredible benefits of a small, close-knit school, and am concerned that many of these benefits will end if school enrollments significantly increase. The benefits of a smaller school and robust options are worth the cost. We should not be cutting taxes that go to the school system.	2/15/2026 11:40 AM
3746	The quality of Oak Grove Elementary School was one of the driving factors for our move to the area.	2/15/2026 11:31 AM
3747	Where will the kids in my community go to elementary school if you close all of the elementary schools in my area? I want to remain in the Lakeside cluster!	2/15/2026 11:25 AM
3748	Appears to be a short term gain for the budget for long-term devastation for children's educations and for neighborhoods to retain invested families. It's incredibly short-sighted and	2/15/2026 11:15 AM

	not taking actual educational needs of children.	
3749	Not addressing current overcrowding needs. Not addressing current building repairs/upgrades. Not addressing housing prices, housing depreciation, and general housing market. Not to mention the horrendous traffic scenarios that already exist.	2/15/2026 11:10 AM
3750	I'm extremely concerned that no solutions were provided regarding where students may end up. Additionally, schools like Evansdale have specialized programs. There isn't clarity if that is a closure or a reorganization (e.g., could Evansdale become wall-to-wall choice STEM and DLI French?)	2/15/2026 11:09 AM
3751	Consolidation isnt a terrible idea. As long as you have an idea of how the neighborhoods will react.	2/15/2026 10:56 AM
3752	Consolidation is important to distribute resources fairly. Some schools are over populated accommodating students in trailers. Also Lacking playgrounds for scholars.	2/15/2026 10:27 AM
3753	I oppose closing OGE in Scenario 1, as it doesn't align with your goals of addressing underutilization (district from 75.8% to 88%) and practicing cost avoidance. Oak Grove's enrollment has grown steadily for the last 6 years, reaching 89% utilization (447 students/504 capacity, October 2025), with projections at 487 for 2026-2027 (96%). The growth is likely driven by major investments in the Druid Hills/North Druid Hills area, including the $1.5 billion Arthur M. Blank Hospital (opened September 2024) and Emory's $87.7 million Heart & Vascular expansion (2024), ongoing J-Wing hospital addition, and $1.1 billion in F&24 research awards - totaling over $2.5 billion recently. We don't yet know the full effects on local schools, but clear growth suggests Sagamore Hills, Briarlake, and Oak Grove may need expansions anyway to accomodate incoming families, rather than closrures that could lead to overcrowding. Start smaller with 4-16 elementary closures (your original estimate) to better meet utilization targets without overreaching, allowing fiscal prudence and time to assess area development. Prioritize truly underutilized schools (<70%) for efficiency and sustainability.	2/15/2026 10:25 AM
3754	I hope the county is also looking at the residential buildings permits to estimate how many students may possibly move into the Lithonia High and Miller Grove School districts	2/15/2026 10:21 AM
3755	I understand the intent. But we moved to our current home because of the school. This is shocking	2/15/2026 10:18 AM
3756	I believe that schools with really low enrollment should be combined with like schools not specialty schools.	2/15/2026 10:16 AM
3757	Oak Grove Elementary is a fabulous school and a cornerstone of the community. If this school closed, it would be devastating to the community. Many students would end up at private school, not another public school.	2/15/2026 10:08 AM
3758	I strongly am against closing Oak Grove Elementary School. Closing it doesn’t align with your goals of addressing under utilization and practicing cost avoidance. Oak Grove’s enrollment has continued to grow the last 6 years, therefore it doesn’t make since to close it.	2/15/2026 10:03 AM
3759	Upon reviewing the initial scenarios, it appears they leave considerable room for interpretation unless one is familiar with Dekalb County's structure. Providing additional clarification regarding population density and land area would enhance understanding. Concerning school consolidations, my observations focus primarily on the Tucker cluster and county-wide considerations: • Tucker – The area is experiencing significant growth. Given both current and projected needs, I support the expansion of Livsey Elementary, as its existing capacity is insufficient for anticipated enrollment. Even with an expansion potentially adding 150–200 seats, there may still be insufficient space to accommodate students transitioning from Midvale (400+) and Brockett (300+), along with new families moving into the area. Therefore, closing both Midvale and Brockett may not be practical. However, closure of Brockett could be considered due to its proximity to Idlewild and the location of Brockett’s northern student population that could be supported by Midvale. Idlewild currently has excess capacity, and projections indicate that Midvale has some potential for growth. Additionally, as Tucker offers the IB track, closing Midvale would necessitate reconfiguring this program. • Recommendations: 1. Expand Livsey as proposed 2. Close Brockett Reassign students to Idlewild (which is underutilized) Reassign northern students (near Lavista) to Midvale 3. Maintain Midvale’s operations to support the IB program For the county as a whole, schools north of the perimeter are likely best served through expansions, given population density constraints that limit new school construction. In contrast, the southern portion of the county, with lower population growth, might benefit from larger schools that can serve broader areas of	2/15/2026 9:56 AM

	unincorporated Dekalb. Resolving the Lakeside cluster will be particularly challenging, as most schools are near capacity and additional space is needed. I don't have much insight into Lakeside cluster.	
3760	As an educator within DeKalb County School District, I strongly support keeping schools open while strategically redistributing enrollment to better utilize available seats. With approximately 20,000 empty seats across the district, there is a clear opportunity to rebalance enrollment without eliminating community schools that serve as vital hubs for families. School closures can disproportionately impact students from low socioeconomic backgrounds, students with IEPs, and families with limited transportation flexibility. Instead of reducing access, we should leverage underutilized capacity to create more balanced, academically strong learning environments.	2/15/2026 9:52 AM
3761	Change is scary. You children to have the best possible experience…	2/15/2026 9:34 AM
3762	I think it's important to make sure that you are not closing those schools that have performed at a high level. Evansdale elementary is a female county success story. A school with a high percentage of minorities that has such good academic achievement, while also being the only DLI/Stem school in dekalb is definitely not one that should be closed. It also has a very engaged PTO and the school community in general is very engaged. This school should not even be considered.	2/15/2026 9:22 AM
3763	I think Chesnut is on a large plot of land and could be rebuilt to hold a large number of students	2/15/2026 9:21 AM
3764	The change is necessary and the decisions will be difficult. Will the renovations to school being combined be communicated to the community before decisions are made. For example, "School A will change to an elementary school and will have the following renovations to better meet the new student population." New classroom cabinets, all classrooms painted, a new playground with a 40-student capacity, roof repair, etc.	2/15/2026 9:21 AM
3765	Closing these schools would drastically impact home ownership pricing, erode community identity, and cause over the over populating of certain schools. I do not like this proposal.	2/15/2026 9:15 AM
3766	I am concerned about the number of elementary schools in the Lakeside cluster slated for closure. I am also concerned about Hawthorne elementary's potential expansion. It would make more sense traffic-wise to expand at Henderson mill or Oakgrove as these schools are not tucked into neighborhoods. Hawthorne also has traffic patterns with lakeside and globe's elementary and middle schools that contribute to traffic issues.	2/15/2026 9:11 AM
3767	While smaller schools are preferred, it is understandable that this is no longer viable with reduced enrollment. Chesnut Elementary is the best school that any of my kids has attended. Mr MacFarlane is an excellent and dedicated principal, and I am confident he would manage an expanded school well.	2/15/2026 9:08 AM
3768	Evansdale Elementary has over 400 kids and is a great way for the neighborhood kids to go to school. It's not on a busy street. Several kids walk to school. Why is this school on the list of schools being considered for closure?	2/15/2026 8:46 AM
3769	I'm not happy with this at all. My son goes to Bob Mathis and most of my family went to this school. In my family we are about traditions and unity.	2/15/2026 8:31 AM
3770	I think the consolidations should only be considered for failing schools.	2/15/2026 8:01 AM
3771	We are heartbroken that our neighborhood school- Evansdale is on the closing list. Beyond that I have a lot of questions related to how this is going to impact our students. I understand the idea behind consolidation from a money perspective, but that can't be the only thing when you are talking about children. To go in and just look at the children as numbers is really sad. Lots of feedback from district people at this point has been we are only looking at numbers right now. But you can't do that with kids. Dekalb has historically had so much corruption financially. I would like to see that get cleaned up before major changes are made to where students are going to end up. We also need stability as a district. We have been through numerous superintendents in a very short period of time. This should also occur prior to moving	2/15/2026 7:03 AM
3772	I think this project is very costly, as it will be reallocating county funds into facilities instead of students. You mentioned the overall number of students in relation to max capacity, but didn't mention the breakdown of numbers per school, which may not show the same varient.	2/15/2026 6:21 AM
3773	I am disheartened. This is my child's first school year at Canby Lane. I have been so well	2/14/2026 11:33 PM

	pleased with Canby Lane. The school and staff have been such a great start for my Kindergartner. I was so worried of how it would be but Canby Lane has shown such great support for my little one. I would be disappointed if Canby Lane was chosen to be closed/repurposed.	
3774	I am pleased Chesnut would remain open. I do have concerns on how it will be able to consume many more students in its present state, or if the plans are to renovate/ expand what type of disruption that would cause. I also would not like it if the districts plan is to increase class sizes.	2/14/2026 10:51 PM
3775	I think the initial facilities scenario is logical and I support it.	2/14/2026 10:51 PM
3776	Solid - do it.	2/14/2026 10:42 PM
3777	Their good	2/14/2026 10:41 PM
3778	This will cause larger class sizes and they are already too big	2/14/2026 9:47 PM
3779	I feel as if there should be other solutions that could be thought of to improve the school attendance.	2/14/2026 9:42 PM
3780	I am pleased to see the status of the schools in my neighborhood but surprised that closure of Oak Grove would be suggested. I am also pleased that Lakeside, where I work in a trailer, will be right-sized to our facility.	2/14/2026 9:11 PM
3781	As long as it doesn't increase class sizes and is in the best interest of the students. As long as it provides more resources for the students, all good.	2/14/2026 8:46 PM
3782	I think there this scenario closes too many schools in one area... South Dekalb. I do not feel that the facilities of McNair Middle are the best for elementary age students...1. Safety- There are so many glass windows. 2. Middle students would continue to benefit due to spaces for programs that align to high school programs.	2/14/2026 8:32 PM
3783	The is not mentioned about p3 or p4 classes or schools. If you're in the business of education...let's have a lens focused on early childhood education.	2/14/2026 8:10 PM
3784	Larger elementary schools might consolidate the need for upkeep and cleaning but I see no benefit to having a large elementary school. Smaller schools develop a stronger sense of community and comfort with "knowing everyone." The issues with the enrollment in DeKalb is not because of run down facilities or not enough inhabitants, the issue is a county that has continually hired extremely poor candidates for superintendent and thus the selection for other leadership. Enrollment is terrible because parents can't trust a school system that hires someone under investigation/rumors of poor conduct/choices during the interview process. We're certainly seeing that fruit now! Another concern is that the DLI program at Evansdale hasn't been addressed. If you close the school, how does that affect the program? Could Evansdale become an expanded DLI school where every class at the school is DLI?	2/14/2026 8:00 PM
3785	Close towes down	2/14/2026 7:46 PM
3786	Seems like a great initial plan for Dunwoody. I wish they would address the need for expansion at Peachtree MS and Dunwoody HS too.	2/14/2026 7:43 PM
3787	Closing Lithonia HS would displace hundreds of students and some families may even need to relocate depending on where their children/child would need to attend. There would be a need for more bus drivers, longer wait times to get to school depending on how far students would need to travel etc	2/14/2026 7:10 PM
3788	While I appreciate the intentions behind these consolidations, it's crucial to consider several factors that could significantly impact our students. One immediate concern is the adequacy of staffing as we consolidate schools. With larger class sizes likely to become the norm, we must ensure that each classroom is adequately staffed to meet the needs of all students. A significant challenge we face is that many students are still recovering from the effects of virtual learning during the COVID-19 pandemic. For instance, students who struggled to engage in online learning, are now noticeably behind in their academic progress. This gap in learning can lead to frustration and disengagement, especially when compounded by larger class sizes. In addition, we must recognize the potential for increased behavioral issues. With more students sharing the same space, we may inadvertently create an environment that exacerbates existing challenges. Many of our students come from diverse backgrounds and may carry emotional and behavioral challenges that need to be addressed with sensitivity and	2/14/2026 6:59 PM

	care. Consolidating students into fewer schools without careful planning could lead to heightened tensions and disruptions in the learning environment. That said, I fully understand that consolidating schools can lead to significant cost savings and allow for more equitable distribution of resources to schools that remain open. This financial aspect can be beneficial to enhancing educational services and facilities at a fewer number of institutions. However, we must balance these financial benefits with the academic and emotional needs of our students. I urge you to continue to consider staffing, class sizes, and behavioral support in your planning process. Our students deserve an educational environment that genuinely supports their growth and development, especially in these challenging times.	
3789	Positive	2/14/2026 6:57 PM
3790	Communities are built through smaller local elementary schools. I understand the desire to focus resources and consolidate things but eliminating active schools with good fund raising via PTSA and foundations will loose money as communities are broken apart. Also, increasing difficulties for parents without transportation & decreased ability to access aftercare or activities before & after school	2/14/2026 6:15 PM
3791	The facilities scenarios do not seem to factor in educational outcomes of students; I do hope this will be considered in the future work - this should be a top priority for DCSD. However, even when reviewing evaluation criteria for facilities only, Oak Grove Elementary School should not fall into the closure category. Oak Grove did experience a dip during COVID, like every school. However, since that time, we have shown a strong and steady recovery. Based on current projections, we are projected to exceed 100% capacity (with 487 students expected for the 26-27 school year). This is based on publicly available data from the district. With projections for the 26-27 school year, both enrollment and utilization have increased consistently over the past five years. See further comments in box 8 on additional growth consideration for Duid Hills/North Druid Hills corridor and affected schools.	2/14/2026 5:42 PM
3792	The elementary school configurations will break apart neighborhood schools and the community that comes with that. Taking away the Champion Middle Theme school option will devastate South DeKalb which has no other high performing Middle schools. It makes sense to consolidate the South DeKalb high schools,but there needs to be serious investments in the culture and buildings for Columbia and McNair. People went to Cedar Grove to escape McNair.	2/14/2026 4:27 PM
3793	I agree that there is a need to reduce the number of facilities in DCSD to provide the highest quality education and resources possible in our district. My children’s current/future schools are not impacted by closures. I would like to further understand how the populations from closed schools could impact my school communities (covered by future phases of this project) to provide fully informed feedback. I did note that Kittredge Magnet was not included on the diagram and am curious why?	2/14/2026 4:20 PM
3794	Concerns about total number of students to teacher ration individual classrooms and mixed population of students in different grade levels during breakfast/lunch and restroom breaks.	2/14/2026 3:44 PM
3795	The mere thought of closing any of the schools within my community is very concerning. I live within walking distance of Evansdale Elementary School. We have a son who just finished school there and is now enrolled at Globe Academy. He is currently on track to attend Lakeside High School after he finishes at Globe Academy. How many language immersion schools are in Dekalb County? The answer is "not many." Meanwhile, Globe Academy has a waitlist every year due in part to its language programs. I would think the county would prioritize investing in a school like Evansdale rather than closing it. Then there are schools like Henderson Middle School and Lakeside High School. Both of these schools are long overdue for investment and EXPANSION. It is embarrassing for these schools to be in the conditions they are in- especially Lakeside. Lakeside is at 123% capacity. Why has Dekalb not invested in facility upgrades? Why are schools in the Lakeside cluster on the list of schools that could possibly be closed or repurposed? What has shared by Dekalb to residents thus far makes no sense to me and based on conversations I have had with many others within my community, nobody else is pleased either. Dekalb needs to INVEST IN and EXPAND the facilities within the Lakeside cluster, not close facilities.	2/14/2026 3:06 PM
3796	Despite decreases, student - teacher ratios and commute times should be considered	2/14/2026 2:46 PM
3797	I think it would be economically feasible but not at the expense of teachers loosing their jobs. Hopefully, no one will be cut.	2/14/2026 2:31 PM
3798	This would be horrible for the students and families. We chose to have our daughter and son	2/14/2026 2:22 PM

	attend Evansdale because it is a small, neighborhood school, offering a French immersive program. We would have never bought a house in Dekalb county had we known Dekalb was planning on shutting down schools and combining students. I do not want my kids to attend a big elementary school that has tons of students. Evansdale is an amazing school with caring teachers where everyone knows each other. If Dekalb decides to move forward with this plan, my family will most likely move out of the county.	
3799	These small neighborhood schools are what makes Dekalb great over other counties like Gwinnett where kids get lost in huge schools. Bigger schools doesn't equate to better schools	2/14/2026 2:12 PM
3800	Got to do what you got to do.	2/14/2026 1:58 PM
3801	I am very aware of funding issues that are the result of low enrollment. At the time of my retirement I was the LTSE at Ashford Park. At that time we had over 700 students. I also believe a great amount of work was done to the building in the last few years. Closing it seems a bit confusing to me. I truly believe adjustments in grade bands is a better approach.	2/14/2026 1:15 PM
3802	Resource allocation is essential for the county to be successful, in my view. With fewer students, resources such as funding, teaching staff, and facilities may be stretched thin. I'm on the fence. I'm a parent who values my child's education, and I'm also an educator who works in DCSD. A long-term plan is essential to consider for sustainability.	2/14/2026 1:15 PM
3803	I think that a large part of the scenarios are great. Closing Lithonia High School would be the best!	2/14/2026 1:13 PM
3804	Seems like a lot of schools to close - what would be the plan for the schools that are closed	2/14/2026 1:12 PM
3805	Generally understand but we should only be closing schools that are under capacity. I would keep any schools that are at 80% capacity or higher open.	2/14/2026 1:07 PM
3806	I appreciate that the district is trying to consolidate resources and respond to current and projected declines in enrollment. I can see the logic and thought that went into this proposal to convert and utilize the space we have while making strategic expansions at the elementary level.	2/14/2026 12:50 PM
3807	It will not personally affect our family, however, community is huge for so many people and if this will include busing students into one bigger school, versus a neighborhood keeping its neighborhood school, it's a detriment to that community.	2/14/2026 12:45 PM
3808	I do not like the idea of closing many small neighborhood schools. These schools allow for increased community togetherness and parental involvement than a large school. Students live close together and grade levels are smaller allowing students to know the entire grade and all the teachers in the school resulting in increased safety for students.	2/14/2026 12:29 PM
3809	Consolidation of resources is helpful, but the physical layout of schools may prevent more students from accessing quality education. For example, use of more trailers to fit into one campus would impact students.	2/14/2026 12:28 PM
3810	Concerned about the erosion of community schools and the loss of high touch personalized learning environments	2/14/2026 12:23 PM
3811	The concern i have: Will this cause over crowding in classes? Why are student population declining? Is it immigration ICE? If they are closed will they be converted to ICE facilities as it is the nee push? I see this is more than declining student population. Billions are now spent on ice facilities not improving schools. What is the real reason. Perhaps incarcerate black and brown citizens? I say no closures.	2/14/2026 12:11 PM
3812	There need to be more consideration about how this might affect specific communities. Some schools have longstanding community value and we appreciate its small size.	2/14/2026 12:09 PM
3813	I think it's a reasonable and balanced plan. There are areas of over capacity schools and under capacity and this needs to be addressed.	2/14/2026 11:56 AM
3814	The scenarios should have included a more detailed timeline. Telling a community their school is closing, but without any additional information, is not the way you build or gain trust.	2/14/2026 11:49 AM
3815	Although I can understand the situation of Resources being spread thin due to lesser student count, it should be seen as an opportunity for growth rather than shrinkage	2/14/2026 11:41 AM
3816	In theory this all sounds good, but what type of environment are we creating for the parents	2/14/2026 11:41 AM

	and students? Is it going to be difficult to get these children to and from school? Does this mean a longer travel time, more time in traffic, more pressure to get school work complete late at night? I am hearing that attendance is down across the county - do these changes exacerbate this issue?	
3817	I see no suggestion of where our kids will go instead. I am worried about the potential of large class sizes and kids being moved to trailers.	2/14/2026 11:35 AM
3818	Very upset about the possibility of Vanderlyn closing. Also, there is not enough information to understand the redistribution of students and new district lines. This will effect our community in so many ways and Dekalb County schools takes zero responsibility or input from the community at the end they base their decisions solely on money which has been severely missed managed historically.	2/14/2026 11:34 AM
3819	My main concerns are accessibility and improvement to DeKalb County School Systems.	2/14/2026 11:23 AM
3820	It is clear from data that schools need to be closed and consolidated; however, it is hard to make any conclusions based on the limited information that is given. For the Schools that close you need to say what happens to those students for any objective opion to be formed. For example, Evansdale Elementary school is recommended to be closed, Midvale in the same general area but in a different feeder is also recommended to be closed. That leaves two elementary schools in the geographic area, Pleasantdale Elementary and Livsey Elementary. If you look at the 2030 projections for attendance Pleasantdale can take 230 1,100 students projected to be attending Evansdale and Midvale in 2030. That means a new Livsey Elementary with a capicity of atleast 1,300 would have to be built to house the rest of the students. That is absurd. These closings are only considering the building and capacity not what happens inside the building. Studies show that there are advantages to smaller elementary schools in terms of academic performance, attendance and behavior. Take a while, go through Dekalb's data to see if there is a school size that works best. What if you looked at Dekalbs data and you see that Elementary schools of around 600 significantly out perform schools greater that 800? Why would you force the students into mega schools? To save a buck? These decisions will affect multiple generations of students. Why the rush to have this done in the fall? Why not study your own data on what works best, make decisions based on that and then present complete plans to the community.	2/14/2026 10:54 AM
3821	I disagree and majority is South Dekalb schools what about North Dekalb Schools. Looks bias.	2/14/2026 10:53 AM
3822	Depends on the demographics.	2/14/2026 10:52 AM
3823	Our schools are crowded, please allocate resources to areas that need them and are growing	2/14/2026 10:03 AM
3824	A timeline for closure of each school should be provided to the community. I’m for closing the schools if it’s done sequentially instead of all at once. This would give a better idea of true impact. Closing schools located in neighborhoods is absolutely ridiculous and should be reconsidered. Columbia elementary should be taken off the list. The neighborhood it occupies thrives because of that school. Please note the increase in home sales in that neighborhood, the rising prices, and the diversity of homeownership.	2/14/2026 9:59 AM
3825	I think that consolidating schools could be a good idea, but should happen sequentially to see how the communities and students are affected.	2/14/2026 9:55 AM
3826	Please retain the geographical neighborhoods. Do not bus students into schools they do not live close to.	2/14/2026 9:28 AM
3827	Ashford Park should not be closed—it is a large school in the middle of a large neighborhood.	2/14/2026 8:55 AM
3828	Concerned with elementary schools becoming too large and reducing the community feel and the attention students need at that age.	2/14/2026 8:51 AM
3829	Im not confident that the impact to the students are the priority over the bottom line number.	2/14/2026 8:40 AM
3830	Transportation and after school programs must not be adversely impacted by consolidations.	2/14/2026 8:38 AM
3831	It’s scary to hear but after knowing the cause, it’s understood. I think every parents’ first thought is “how will this affect me/my family, if at all”. If answers to that are available and can be vocalized to parents sooner than later, that would be great.	2/14/2026 8:29 AM
3832	I have read the entire document and understand the importance of the situation and need. The consolidations are well thought out. I agree with the consolidations.	2/14/2026 8:24 AM

3833	Most concerned about potential size of schools and ensuring if class sizes increase that teachers have the support to manage effectively. It's not clear how our school will be consolidated yet so hard to understand impact on student experience just yet.	2/14/2026 8:21 AM
3834	I think closing local schools is a huge mistake. I understand that resources are spread too thin, however school closures should be the absolute last resort. If anything, more resources should be put into the individual local schools.	2/14/2026 8:20 AM
3835	The closure of a neighborhood school is extremely disruptive to residents. We've chosen to buy homes in these neighborhoods based on our family needs, and these changes radically impact family life and finances. If the issue is that the overall school system is under capacity, is there a path forward in which you adjust the population of each school to right size? Can we remove the trailers at schools and shift those students to schools with adequate facilities? Or can we remove a class or two and reduce staff?	2/14/2026 8:18 AM
3836	N/A at this time	2/14/2026 8:17 AM
3837	Do not consolidate schools	2/14/2026 8:07 AM
3838	I understand the reality of declining enrollment and the need for long-term planning. Operating more facilities than the district has students to fill is a real challenge, and doing nothing is not a sustainable option. As this process continues, I hope the district clearly connects any consolidation decisions to how they will improve the strength of schools and student outcomes. Families are more likely to support difficult changes when they understand how those changes will lead to stronger academic programs, more opportunities, and better support for students. It is important that this process goes beyond buildings and capacity and clearly demonstrates how consolidation would improve access to academic programs, electives, extracurricular activities, and staffing stability across the district. I encourage the district to continue prioritizing transparency, community engagement, and a student-centered approach as scenarios are refined.	2/14/2026 7:46 AM
3839	Consolidation of schools will make schools crowded and overextend staff. The goal should be to make class sizes smaller to benefit students and teachers.	2/14/2026 6:48 AM
3840	Keep Vanderlyn	2/14/2026 6:44 AM
3841	Neighborhoods need neighborhood schools. I'm disappointed and sad that Brockett is slated to close.	2/14/2026 6:22 AM
3842	I. The Core Argument: Closing Lithonia Makes No Sense 📊 Enrollment Reality • Lithonia: 1500+ students • Larger than Towers & Cedar Grove combined • No enrollment decline crisis • In 1996: 1800+ students successfully housed This is not a school capacity problem. This is a facilities modernization opportunity II. Strategic Vision: Move Back to Randall Ave Why Randall Ave Works 1️⃣ Historical Capacity The original campus previously supported 1800+ students. With modernization, it can do so again. 2️⃣ 9th Grade Academy Concept • Downstairs wing = Freshman Academy • Separate entry / identity • Focused transition support • Reduces discipline & traffic issues This model is used successfully across Georgia. Proposed Athletic Plan 🏀 Build a New Competition Gym • Larger capacity • College-style seating • LED boards • Host region tournaments 🏀 Keep Old Gym Use as: • Practice facility • Volleyball • Wrestling • PE overflow • Community events (Modeled after Rockdale County's dual-gym approach.) With additional space: • Indoor practice facility • Turf practice field • Expanded weight room • Sports medicine room • Upgraded stadium entrance • Improved parking & traffic flow This creates a true athletic campus. Reinvestment Instead of Closure • Avoid community backlash • Preserve historic identity • Maintain enrollment stability 🔹 Long-Term Asset Optimization • Modernize existing footprint • Increase property value • Improve safety & traffic flow • Expand community event revenue ——— V. Political Strategy This proposal wins when: 1. Alumni are unified 2. Enrollment data is highlighted 3. Economic impact is presented 4. Community pride narrative is strong Your theme: "We are not shrinking. We are growing. Historic Lithonia Returns Home." That's powerful. VI. Phased Construction Plan (Realistic) Phase 1 (Years 1–2) • Secure funding (SPLOST / bond) • Architectural planning • Begin gym & athletic complex construction Phase 2 (Years 2–4) • Renovate academic building • Build 9th grade academy wing Phase 3 (Years 4–5) • Full campus transition • Stadium upgrades • Branding rollout	2/14/2026 6:03 AM
3843	Lithonia HS shouldn't be closed.	2/14/2026 6:01 AM
3844	Absolutely disagree with the closure or moving/relocation of Kingsley elementary school. If consolidation to bigger schools because class size is dwindling, how will forcing Dunwoody	2/14/2026 5:32 AM

	residents to other out of zoned schools help improve and attract other families to the area? This will directly go against building a community around the school local to the families and attracting more families into that community will be difficult if the school isn't even centrally located. Making huge capital investments on new buildings and combining into other buildings is a big swing to fix an issue which could instead be improved by funding to the teachers and schools to improve the curriculum and programs ran by the schools. With keeping class size lower and improving teacher resources, techniques, and abilities, then you are able to communicate and display these corrections/concepts to attract more families to the area. If you five families to go to school in a different area or rezone completely, I 100% guarantee you will force families to move and attendance will be even drastically lower than your predictions. This is not a school numbers issue, Kingsley has the appropriate amount of kids per class to effectively ensure our kids learn. We need to provide our teachers with more opportunities to ensure this is the case moving forward. We are very happy with our children's progress and learning this year at Kingsley and do not want this to change for our other kids who are going to be new students there in the coming years.	
3845	Please do not close. My kids walk to school. I leave too early to take them	2/14/2026 5:24 AM
3846	I agree that schools with declining/low enrollment should be closed.	2/14/2026 1:42 AM
3847	Why are all the schools closing in the southern part of Dekalb. I would like to see Lithonia highschool specifically saved from this consolidation effort. The school has a very long history in the county. The county made mistake building the new highschool smaller and in a land locked area. The original highschool should have been renovated and the new highschool used as a temp building while work was being done then turned into a middle school. My kids went to Fernbank elementary at the old building. When it was time to renovate Fernbank moved to a local middle school that closed while the work at the original location was going on. After all was finished the elementary school moved back. Why are no options available for older schools with strong history on the south side of the county. Same county different solutions. Something doesn't add up.	2/14/2026 1:06 AM
3848	I don't support the closure of the schools as a former student. It's important to recognize that a smaller student body allows teachers even more flexibility to teach their students and reduces the pressure of large class sizes.	2/14/2026 1:00 AM
3849	I do not agree with scenarios	2/14/2026 12:10 AM
3850	The consolidations tentatively make sense, though I would like more information. In my community the location of the school within the neighborhood is a keystone of the community; closing it would destroy this.	2/14/2026 12:08 AM
3851	My child school is the best school we don't want loss robert shaw elementary theme school is a community school the teacher are amazing the children are learning	2/14/2026 12:02 AM
3852	Ashford Park is at 822 enrollment well over capacity. No reason for this school to be on the chopping block.	2/13/2026 11:28 PM
3853	What are we doing about specialty schools causing some of the empty seats?	2/13/2026 11:21 PM
3854	Please avoid expanding already overcrowded elementary schools	2/13/2026 10:49 PM
3855	I feel that it would be a hard impact with a lot of those schools that's closing down. Honestly, I don't believe crowding a bunch of students in schools is going to be beneficial.	2/13/2026 10:34 PM
3856	Looks good and well thought out. Two questions - what is the projection beyond 2030. As it will take 6-8 years to implement and by then it will be 2034, what do we expect the numbers to be. I guess there's an option to change along the way. I assume the phases will be clarified as we move forward? When will re-districting of the elementary schools be announced as a part of the scenario?	2/13/2026 10:24 PM
3857	IÍm very worried about Ashford park potentially closing especially with no idea where our kids would be redistricting. In addition could have serious impacts on real estate prices in thr Ashford park neighborhood.	2/13/2026 10:07 PM
3858	The factors used in the analysis did not appear to align with the closure recommendations. In many cases the criteria completely contradicted the recommendations which makes it very difficult to assess the decisions. The criteria also did not factor in any current performance criteria or community engagement in the local school which is essential to foster education. I understand the population trend being addressed and consolidation being needed but the	2/13/2026 10:07 PM

	reports I read did not fully address areas where attendance was reduced due to the COVID pandemic where some families permanently moved to private school due to remote learning policies. In our case, we only moved to the district for the elementary school which is now proposed for closure.	
3859	Have not read up on it or followed it	2/13/2026 10:04 PM
3860	It seems as though all of these are on the south side of Dekalb County. It seems as though all of these are on the south side of Dekalb County. There is no money being filtered to these schools.	2/13/2026 9:50 PM
3861	7	2/13/2026 9:39 PM
3862	Is this a typo? "Converting 5 middle schools to middle schools, gives us at least 10 elementaries of excess seats." Should it say converting 5 middle schools to elementary schools? I appreciate that district leadership is thoroughly considering best options.	2/13/2026 9:34 PM
3863	Sad to possibly lose my neighborhood school.	2/13/2026 9:14 PM
3864	Consolidating elementary to middle and middle to high school would already create an overcrowding in black communities and would also lead to higher student teacher ratio.	2/13/2026 9:14 PM
3865	Lithonia High School is historic dating back to the early 1940's; it is a pillar within the African American community! I am deeply troubled by the number of schools located in south DeKalb targeted for closure and/or consolidation.	2/13/2026 9:00 PM
3866	I think it is a shame that smaller elementary schools will disappear. I suppose larger schools make more economic sense, but smaller school communities have a warmth and connection among students and staff that seems vital for those early years.	2/13/2026 8:59 PM
3867	Lithonia high school does not need to close the amount of children in the community. Our community has enough kids to operate a school within its community. Lithonia has been apart of this community for years. We value Lithonia and care for our children in this community. They should not have to do over crowding at Miller Grove.	2/13/2026 8:50 PM
3868	The best school I had chosen for my kids and the best staff members.	2/13/2026 8:48 PM
3869	I’m not in favor of eliminating Vanderlyn Elementary. It’s one of, if not the top elementary schools in the county. It is a tremendous asset to our community and it would be shameful to shut it down.	2/13/2026 8:40 PM
3870	Kingsley should not close. Chesnut should be overflow for Peachtree.	2/13/2026 8:36 PM
3871	With this possible scenario, every elementary school in my zoned high school district would close their building. Only one remaining open is a magnet school which requires a lottery. Several of the schools listed have had renovations, have many amazing supportive programs and improving their stats across the board. We’d all be smooshed together and our district is a large area . Transportation will be an issue and ultimately causing attendance problems. Many jobs lost in all these school. Also, what is the plan for the middle school if the middle school is now one giant elementary school? Because McNair HS was not named to close or consolidate. If you look on a map, there will be a huge gap area of no elementary schools. The schools directly impacted are title 1 global majority schools.	2/13/2026 8:30 PM
3872	Hate this idea.	2/13/2026 8:26 PM
3873	use of existing Middle schools to become Elementary schools makes sense given their proximity to their Elementary school feeders. making some High schools 6-12 may be problematic given the adult-like behavior of many High schoolers and the vulnerability of some early-age middle schoolers. a K-8 model might be more successful	2/13/2026 8:26 PM
3874	There is such value to smaller Elementary schools, particularly for the youngest students. Please do not close all of the small neighborhood schools. These are the places that teach kids to love learning and to be in a community. I am dismayed about the closing of multiple DLI track schools with no mention about whether or how DLI learning will continue. Your own research shows such powerful evidence for how amazing these programs are. Please don't end the DLI programs.	2/13/2026 8:24 PM
3875	There are multiple proposed closures to elementary schools in our area including Evansdale, Henderson Mill, and Midvale. Closing all 3 removes close and accessable elementary school for a huge number of families in the Embry Hills/North lake area. Looking at the projections for	2/13/2026 8:22 PM

	2030, both Evansdale and Henderson Mill are projected to be above capacity which begs the question, why close full schools and all in the same area of the county. These schools also are majority Hispanic and title 1, and closing them would force more affluent families into private education, further segregate the children and neighbors along racial and economic lines. I ask that this be reexamined, taking into account the number of closures in a given area and not based on a target number.	
3876	Consolidations can decrease the student to teacher ratio. The students will fall behind. Also kids from different neighborhoods and rival schools like the highs will not be accompanying to being together Bullying will increase and learning will suffer	2/13/2026 8:16 PM
3877	Concerned about closing Ashford Park Elementary. It is a thriving neighborhood elementary. Please make any changes for new students coming in only, so that students already in schools and programs don't have to change course.	2/13/2026 8:05 PM
3878	The consolidation disproportionately impacts African American communities!	2/13/2026 8:03 PM
3879	Making the high schools 6th-12th grade if consolidation goes forward may be the way to go. Taking away the high schools would be detrimental to alumni as well as communities in my opinion. Or do pk-8th, then 9-12	2/13/2026 8:02 PM
3880	I am not happy about the consolidation I feel like this big of a change will impact the kids and the parents	2/13/2026 7:59 PM
3881	I do not like hearing this. I have worked in two large schools one in Gwinnett and the other in Clayton county and I did not like it. I enjoy working at a small school. It's more like family than being just another number.	2/13/2026 7:56 PM
3882	Consolidation is only good if the quality of teaching increases	2/13/2026 7:54 PM
3883	Close the necessary schools to make DCSD a good district.	2/13/2026 7:53 PM
3884	Other consideration	2/13/2026 7:44 PM
3885	This could be a great thing and a bad thing. I would love for things to stay the same but I always recognize that change could be good as well. I have a rising middleschooler so I'm concerned about where she would actually end up.	2/13/2026 7:39 PM
3886	I'm against it	2/13/2026 7:27 PM
3887	Consolidations are not a good idea. How will this impact the student to teacher ratio? Schools are often the center of a community, has this affect been considered? Transportation?	2/13/2026 7:25 PM
3888	I understand the need to address under enrollments and projections for further decline. However, larger elementary schools decrease how well a student is known to teachers and administration. At the elementary level, it is critical for students to be seen and known to gain an appreciation for the system. Teachers able to focus on smaller classes have the energy and capacity for dynamic lessons that teach the greatest lesson of all, to love learning.	2/13/2026 7:19 PM
3889	I strongly believe consolidations is a bad idea. Teachers should have a ratio of 1:20 if possible. It will not benefit students having 30 students to 1 teacher. Im sure if researched, the ratio has a lot to do with academic success and student readiness. Keep the schools open and lessen the ratio for our children. Our children deserve a quality education. Teachers are human. We can't expect them to make miracles happen with 1 to 30 ratio.	2/13/2026 7:05 PM
3890	I think it makes sense, though it breaks my heart. I think it is very thoughtful	2/13/2026 7:04 PM
3891	This is a school that is located in the ashford park neighborhood. It would be detrimental to close down the school for the community.	2/13/2026 6:59 PM
3892	Currently I live down the street from Columbia elementary . The school seems pretty at capacity to me as there is not enough parking and the parent pick up lane is always wrapped around the block . I really like living in a neighborhood with an elementary school but there are limited sidewalks which hinders access and walkable . I think this deters people with kids to walking to school . Also I am not understanding how putting more kids in a class room (and over crowding it based on projected numbers which we all know don't mean anything) is going to improve the schools . I want these kids to get the best education possible and if you plan to put 20+ kids in each classroom I don't know how that would improve test scores .	2/13/2026 6:51 PM
3893	Lithonia has a rich history and a legacy that runs deep in our community. The school has	2/13/2026 6:50 PM

	produced notable alumni who still live in the area and continue to give back — some even working within the school itself. Lithonia High School alumni host one of the largest reunions to date, which shows the strength of its tradition and the pride people carry for the name. While I understand the district's consideration of downsizing facilities to create better efficiency, closing Lithonia High School should not be an option at this time. Lithonia has finally found a group of coaches and leaders who are fully committed to the students and to rebuilding the culture — particularly within the football program. There is momentum. There is belief. And there is progress being made. I agree that the current Lithonia facility may not be the best long-term option to house its population. However, we must preserve the name, legacy, and identity of Lithonia High School. One potential solution would be transitioning Lithonia students to Miller Grove High School and renaming the school Lithonia High School. The facility names could remain the same — for example, the gymnasium — while also creating a Championship Hallway that honors the basketball titles and other historic achievements of Miller Grove HS. If the goal is to maintain strong alumni involvement and community investment, then preserving the Lithonia name is essential. Legacy matters. Identity matters. Community pride matters. Lithonia High School is more than a building — it's a tradition.	
3894	the school is perfect for my child.	2/13/2026 6:30 PM
3895	Where would Vanderlyn and Kingsley students go to school? Chestnut Elementary will need to be added onto and I do not mean more trailers. It appears to me that Dunwoody High school needs to be added onto so we could get the students out of trailers.	2/13/2026 6:15 PM
3896	Ridiculous proposal - really ? There must be a gross mismanagement of funds to consider closing so many schools and expand others. Montgomery has trailers in the parking lot yet you all want to expand enrollment? Cary Reynolds which is close by serves the needs of distant dunwoody residents. You need to find better consultants to creat the plan or review prior to making them public.	2/13/2026 6:13 PM
3897	The single most important factor that led us to move to our neighborhood was the small, community oriented elementary school. I understand that some consolidation may be necessary, but the scenario as presented appears to veer away from this model drastically by closing so many elementary schools— this is extremely concerning.	2/13/2026 6:02 PM
3898	If you close Vanderlyn, you should use the land to expand DHS. Maybe a 9th grade campus??	2/13/2026 5:49 PM
3899	I support making changes that makes the schools better for students and teachers. Overcrowding and lack of students are both a problem. Dekalb has historically not been able to make good decisions based purely on student success. The decisions have always seemed to be very politically motivated.	2/13/2026 5:43 PM
3900	I feel that the consolidation of so many schools is not necessary. The middle and high school levels are extremely over crowded and also need major repairs to buildings. The current scenario for grade level is best, but the could be a consolation of schools due to under enrollment. I also feel that some money needs to be poured into the facilities in South DeKalb as there are many ongoing issues in buildings. Staff also needs more training than what is currently in place	2/13/2026 5:33 PM
3901	It is unacceptable that all the community schools are closing, as this will significantly harm the students and leave the schools even more underfunded.	2/13/2026 5:28 PM
3902	Oak Grove Elementary finally has minority leadership, and NOW it's on the chopping block. That smells like racism. Please leave our school alone. We have almost 500 students and we are growing. Why close the schools that are doing things right?!	2/13/2026 5:22 PM
3903	They are nice	2/13/2026 5:21 PM
3904	It appears that the majority of the school closing will be in predominately Black neighborhoods. What will happed to those students	2/13/2026 5:20 PM
3905	Great idea. Consolidating some of the lower population schools means the resources/student number will go up, and teacher classroom sizes can potentially go down. Declining populations means we have to adapt, and I think that is a worthwhile adaptation.	2/13/2026 5:13 PM
3906	The middle school is needed due to lagging test scores. 6-8	2/13/2026 5:05 PM
3907	When we discuss the initial facilities scenario for consolidations within DeKalb County School District, we must approach the conversation with wisdom, clarity, and care for every child, family, and educator impacted by these decisions. Consolidation is never just about buildings.	2/13/2026 5:04 PM

	It is about communities. It is about children who walk those hallways each day. It is about teachers who have invested their time, heart, and skill into shaping young lives. A facilities consolidation plan must first answer this question. Does this decision improve student outcomes.	
3908	I am concerned with the closing of Ashford Park Elementary school and consolidation of region 1 schools. Our enrollment is growing daily. Some grade levels are at 28-29 students per class. Why close a school that isn't experiencing an enrollment decline? John Lewis is less than 5 minutes from our building and twice the size of APES but with fewer students. Are students ultimately going to be rezoned to JLES as part of this consolidation plan? What space / school is currently large enough to absorb APES' current enrollment? Further more, many schools in the closure list are undergoing renovations or just received rennovations. How is the district going to recoup this financial loss while also spending more money to expand /convert schools as part of this consolidation plan? I understand the need to be efficient with our budget and trim down on excess, but in the process we are loosing money as well.	2/13/2026 5:01 PM
3909	I'm concerned that you've overlooked a central quality issue for DeKalb schools. I've pulled both of my children because I couldn't find a quality middle school.	2/13/2026 4:52 PM
3910	Grow the Pre-K program into those rooms. There's a waiting list that's insanely long. It can adjust YoY to accommodate.	2/13/2026 4:49 PM
3911	I think this is a good ideas because it frees up resources to schools that can use it	2/13/2026 4:36 PM
3912	I think adding more students would not be the solution, if it's a struggle to educate the number of students already there. I don't see how that solves an education problem, if that's the problem that we're trying to solve.	2/13/2026 4:33 PM
3913	Focus on the quailty of the education and not the number of students attending.	2/13/2026 4:32 PM
3914	As an original member of the 30345 community, growing up here and returning after college to raise my children, I see the need to consolidate elementary schools. The facilities are old and it just makes more logical sense to rebuild or renovate some and tear down others. Renovating every building just doesn't make sense.	2/13/2026 4:32 PM
3915	I do not believe schools should be consolidated. Classrooms can benefit from fewer students.	2/13/2026 4:22 PM
3916	The consolidation of certain schools is a good possibility as long as there are an abundance of children in the area that are in need.	2/13/2026 4:19 PM
3917	The communication about the scenarios is confusing and disappointing. Listing school closures without a more comprehensive discussion about where the kids will go is counterproductive. The decisionmakers need to provide much more detail in order to get meaningful discussions going. As it stands, the outright closure of Ashford Park (which does not impact our family) seems like a bad choice that is both inconsistent with the community needs and shortsighted. Ashford Park is overcrowded - that problem must be addressed and solutions may not be popular. It may mean some revision of boundaries. It may mean needing to invest in parts of the district where there is the greatest demand for seats. There are multiple options. There were no scenarios that discussed alternatives. Shutting down a high-performing school that has a ton of community investment with no clear plan about what comes next is not the right call for kids today or future generations. The Chamblee cluster has multiple elementary schools. For those of us who live in Brookhaven, while our kids may go to different schools, these are still people our kids play sports with, go to religious services with, socialize with, and are part of a tight knit community. Obliterating a key component of our community--which is what you've proposed with Ashford Park--does not advance the SAP goals or serve the needs of the community. Andrew Ziffer needs to advocate for his constituents and stand up for what is right for this district--even if it is unpopular with the SAP. What has been proposed so far for the Brookhaven area needs significant work.	2/13/2026 4:18 PM
3918	Henderson Elementary should stay open facilities are much nicer	2/13/2026 4:16 PM
3919	I completely understand why this is being considered but as a teacher who works at Stone Mountan Elementary, our classrooms are packed. I'm not quite sure why we would want to displace these students into other schools that are already crowded. Aren't smaller classes the goal??? The students thrive when there is more one on one help from their teachers. Why would we want to pack more classrooms?	2/13/2026 4:11 PM
3920	KEEP EVERYTHING THE WAY IT IS NOW!! NO NEED FOR CHANGE!!	2/13/2026 4:03 PM

3921	A lot of the schools are on the South end of the district. When would we get more information on which schools would actually be considered for closing and which ones would be repurposed? How would the student placements be decided? What happens to the teachers and school workers if their buildings close?	2/13/2026 4:00 PM
3922	Kingsley Elementary should remain open- its setting, tucked into a neighborhood for student safety, adequate land and smooth traffic flow, are assets. Previously approved capital improvement projects, such as HVAC, should proceed so our learners have comfortable facilities.	2/13/2026 3:54 PM
3923	I think that you are doing so to get as many Title one funds concentrated as possible. It's a behavior that the school district has practiced for decades. It also has not helped achievement levels whatsoever.	2/13/2026 3:46 PM
3924	It is a great plan , that dekalb should implement	2/13/2026 3:32 PM
3925	I support the consolidation of the schools as long as we get a better timeline of events as well as a plan for building a new facility.	2/13/2026 3:23 PM
3926	I am concerned that the proposed consolidation does not fully account for the academic, social, and emotional impact on students. School closures disrupt learning continuity, increase class sizes, and place additional strain on receiving schools. Our school is more than a building. It is a stable learning environment with established relationships between teachers, students, and families. Consolidation may negatively affect student performance, engagement, and attendance due to longer commutes and overcrowding. I respectfully request that decision-makers consider alternatives such as phased restructuring, enrollment recovery strategies, or community partnerships before closing a school that serves as a critical support system for families.	2/13/2026 3:17 PM
3927	Worried. My child is I.E.P what will that look like. I feel this process will loose these kids in this program	2/13/2026 3:14 PM
3928	I understand the issues that we are facing, but I think that we would lose out on the close knit neighborhood communities that are formed with our current elementary school structure. I think it is important that people know their neighbors, and are familiar with the people in their schools. This will be much more difficult if the school is housing 3-4 times as many students. Especially when the children are young and need consistent support. My son has an IEP and teachers that he has now have told me they worked remember him from 1st grade. I do not think that would hold true in a larger setting. Elementary school is so foundational, I would be concerned that some students get lost as the class sizes (not just classroom, but the amount of students in each grade) grow. McNair DLA is also a STEM school. They have great programs, and I would hate for the that to change during the merging.	2/13/2026 3:13 PM
3929	All of the elementary schools are overcrowded as is, i am deeply concerned how we would manage the capacity when we remove so many schools in the local community	2/13/2026 3:06 PM
3930	Las instalaciones están en buen lugar y agradable	2/13/2026 3:03 PM
3931	QUW NO CIEREN LA ESCUELA DONDE PERTENCE MI SOBRINO	2/13/2026 2:51 PM
3932	As someone who use to work at Brockett, I was actually hoping to see it on the list when it was published. It was my third teaching job and I cried when I walked in for the first time because of how awful the building was. My teacher chair was always damp because of the moisture in the building. There were live and dead cockroaches everywhere and in the three years I was there I had an Aug/Sept without AC and a winter without heat for several weeks and it was under 50 in my room. The building did not feel safe or secure, there was not enough storage, the parking lot was too small for teachers to park and without a fence we always had random people on the playground including dogs running around. We are now in a smaller district with larger schools and it is so much easy to maintain higher standards.	2/13/2026 2:49 PM
3933	I agree that school communities should merge to better serve the most students, extend/expand resources and programs available and allow for the possibility of additional staff/tailored programs where needed. That said, my worry would be “mega schools” that can be so large and populated for little kids that it can be overwhelming, hard to navigate, and perhaps less familiarity between staff and students.	2/13/2026 2:48 PM
3934	Ashford Park Elementary should not be closed — it should be expanded and renovated. This school is currently operating at approximately 145% capacity. That is not a failing school or an	2/13/2026 2:45 PM

	underutilized facility — it is a thriving, high-demand, high-performing school that families actively choose to live near because of its reputation and community strength. Closing a school that is significantly over capacity contradicts the stated goal of “maximizing efficiency for school utilization.” If anything, Ashford Park represents the opposite problem: too many families want to attend because it is successful, stable, and deeply integrated into the Ashford Park neighborhood. Ashford Park Elementary is more than a building. It is the heart of the community. It anchors property values, supports neighborhood stability, fosters walkability, and strengthens local engagement. Families in this area specifically invest in homes here because of this school. Removing it would have significant ripple effects on: • Property values • Neighborhood cohesion • Student social networks • Transportation logistics and traffic patterns • Long-term enrollment stability Instead of closing Ashford Park, the district should consider: 1. Renovation and modernization of the existing facility 2. Expansion to match enrollment demand 3. Boundary adjustments if needed — but not elimination 4. Strategic investment in a school that is clearly successful Closing a highly utilized school sends a discouraging message to families who have invested in this community. It risks overcrowding neighboring schools and increases busing demands — which reduces efficiency rather than improving it. If the district’s goal is efficiency, long-term enrollment planning, and strong academic outcomes, then supporting and improving Ashford Park Elementary is the logical path forward. Ashford Park is not a struggling school that needs to be consolidated. It is a vibrant, over-capacity, community-centered school that deserves investment — not closure. Please consider renovation and expansion before considering elimination.	
3935	initial facilities	2/13/2026 2:38 PM
3936	I am strongly against the initial scenario. I understand that student enrollment is down and consolidation needs to take place, however, I don't think that closing all of these schools and sending our kids to larger mega-elementary schools is the answer. Evansdale elementary is a great neighborhood school, and the children all benefit from being in a smaller school (though I wouldn't even consider Evansdale small as there are 3-4 classes in every grade). I am concerned that if these smaller schools are closed and kids are sent to a bigger school they would get lost in the mix. I know my kids would not benefit from being in a place where they don't know all of the teachers and other students in their grade. There would be no more sense of community, an important developmental factor for our children in the digital age. I am also concerned about special programs at these schools. The French DLI program has been so beneficial for my children. Studies have shown that learning a language earlier in life has great benefits. No information has been shared as to what would happen to these programs. And I know quite a few people who moved to this neighborhood specifically so their children could study French in school.	2/13/2026 2:32 PM
3937	All schools remaining after consolidation should have same grade band and offer same courses with same levels of difficulty. Exceptions would be technical and vocational high schools located in each district that are reasonably accessible via school buses or parental transportation.	2/13/2026 2:32 PM
3938	I believe that the Toney Elementary school should be combine with Kelly Lake so the student can stay in the neighborhood. Toney Elementary has had some remodeling where they have sensory room for the school and a stem lab.	2/13/2026 2:31 PM
3939	Tucker has enough empty buildings. We do not need to add several school buildings to that. Also, having schools that are walkable from home is important for families and communities.	2/13/2026 2:20 PM
3940	The scenario in North Dekalb does not adequately reflect the actual situation for our school Oak Grove Elementary. It is a highly walkable community school (something desired in community input) with steadily rising enrollment in a highly sought after district and housing market. Closing this school will cause home values and in turn tax revenue from this affluent area to drop, significantly impacting the overall budget of DCSD. The ROI of keeping open and investing in this high performing school would be much greater than shuttering the school and damaging the community around it.	2/13/2026 2:17 PM
3941	This is not a good scenario at all. This will have a system wide negative impact just to account for less than 20,000 students drop in enrollment. I think we have to be very carefully at this time as it can have a reverberating effect scroll all metro atlanta schools systems. I am happy we are being proactive but I think this is overkill.	2/13/2026 2:16 PM
3942	I would hate to see any of these schools close	2/13/2026 2:15 PM
3943	No	2/13/2026 2:09 PM

3944	Dekalb county grew with the expansion of Atlanta, then as Atlanta expanded further, people moved to outer counties. The trend in population now is to move back closer to the city as density increases. Once a school is decommissioned, it is often lost to the community and given up for infill projects. Once urban populations reach the stage in which the school seats are needed again, the physical locations will be much harder to source. In addition, local schools are community anchors that are needed to form communities. Closing schools in an area where population is getting denser is shortsighted, and should be voted down in general. In my neighborhood specifically, Oak Grove elementary is one of the finest schools in the state and produces outstanding students. People that can afford to send their children to private schools move here instead to be able to send their children to a public school. That is why my family moved to this neighborhood. The schools in this neighborhood increase property values dramatically. Closing them will lead to lower property values and reduced county revenue.	2/13/2026 2:01 PM
3945	I am curious how the magnet schools (DSA and DAA) figure into this as they are not listing here. We have heard about the possibility of moving Druid Hills into the DSA building. Is this related? I see that McLendon grade school is an option for closing, but am under the impression that it is a top performing school. (I may be misinformed.) Would it not make more sense to close schools that are lower performing so that students could be routed to the schools that are better able to serve them?	2/13/2026 1:50 PM
3946	Based to much on just two Bs: bucks and butts (in seats), with no regard for school performance or place in the community. It makes zero sense to close a high-performing school that is sought after. Closing such schools hurts the community, reducing community support for a larger, more distant school located on a residential street that can't handle the new traffic, harming sense of pride and place, and lowering home prices, which in turn reduces property tax to support DeKalb schools overall. For the life of me, I'll never understand the thought process that went into proposing closure of Oak Grove Elementary, a school that works and that draws families with children to the area, especially at a time of increasing generational turnover and redevelopment. Look at real estate ads. Presence in the Oak Grove attendance zone is the #1 selling feature for the area. Perhaps if we stop paying architects to draw up plans for additions and new schools that are later scrapped and for Superintendents who don't last in the office but remain on the payroll for years, we'd have enough money to maintain and improve more of the schools that we already have.	2/13/2026 1:38 PM
3947	The schools may not teach a lot of real life ideal situations but they have a lot of programs to help with a lot of the kids future !	2/13/2026 1:24 PM
3948	In my opinion closing schools will cause children to get lost in the shuffle. Of the schools listed most are in my area. Its disheartening to see availability of certain Magnet and gifted programs be taken from us. Some of the schools are understandable. However there is NO WAY that most of the schools affected should be the schools near the county line.	2/13/2026 1:17 PM
3949	I support the consolidations as proposed, only on the condition that existing staff at those facilities are also given the option to remain employees at those facilities at their current pay level. Forced layoffs should not be a part of this plan.	2/13/2026 1:16 PM
3950	I understand consolidation needs to happen, but please consider impacts to surrounding communities when school populations grow. Also consider commute times. While it may be a small distance to travel we know how Atlanta traffic works and I worry parent involvement and student enrollments will be impacted. If additional students are being added to current schools busing capacity also needs to be considered.	2/13/2026 1:16 PM
3951	They seem fine to me. I know that's easy to say because the schools my children are going to weren't on the list. I was wondering why Vanderlyn is on the list to close over Kingsley. I don't know a lot about enrollment just that Greatschools says Kingsley is 3/10 and Vanderlyn is 8/10. Just curious but it doesn't matter too much to me.	2/13/2026 1:07 PM
3952	The methodology seems to be logical based on facilities only. The closing of underutilized schools certainly makes sense. I also understand why a school like Ashford Park is on the list due to the condition/age of that school, but not knowing what will happen to that community makes it hard to say if I fully support it. I feel like I'm being asked to give feedback with about 10% of the data but looking it from a facilities only perspective I agree. This just isn't a facilities only decision.	2/13/2026 12:55 PM
3953	If it makes sense	2/13/2026 12:48 PM

3954	Do not close Vanderburg Elementary	2/13/2026 12:47 PM
3955	It's alright.	2/13/2026 12:40 PM
3956	I do not agree with the closing of all these schools. I think it will affect transportation for those students that live further from the new school that they will be zoned for.	2/13/2026 12:35 PM
3957	Can you share more data and information? How was the proposal made based on data-based info? Particularly, I see a few schools that are not on the list also have low attendance and low prediction for coming years. How was the prediction made? Data-based? If so, can you share? Quite interesting that Oak Grove attendance has been rising in the last few years after pandemic; but it’s predicted the attendance will drop significantly starting this year. How? I see more families with kids moved in recently. Again, please share and publish data.	2/13/2026 12:31 PM
3958	How will the remaining facilities be updated to accommodate growth and the modern classroom? What kind of investment can we expect?	2/13/2026 12:31 PM
3959	I wish there was information about where the students from the current schools would go. There are many self-contained special education classrooms that are closing in multiple schools and would require support/specialized consideration for the school facilities.	2/13/2026 12:26 PM
3960	No clear details on criteria for "scoring" schools and use of "Live-In" data. And no info on how projections for future "Live-In" data is derived. Provide clearly visible enrollment numbers on each bar in bar graph for each year in the graph so we can see them. The line graph with sharp drop of to 2030 does not seem to coincide with bar graph data 🤷🏽‍♀️. No possible scenarios provided for student population shifts resulting from consolidation of high schools nor elementary schools. No personnel loss projections provided for consolidation of schools or school closures (total job losses).	2/13/2026 12:13 PM
3961	Don’t close em	2/13/2026 12:09 PM
3962	What is the reason for the decline in student enrollment. If our current schools aren't meeting the demand of education needed for our children we should first be examing the why and how of that scenario. Closing schools and changing the name will make no difference if we're using the same system, structure and curriculum. We'll get the same results. My son will "hopefully" attend Cedar Grove Middle. We live next door. Its a good school. Why don't we focus on marketing to families the benefits of bringing their child there instead of closing a good school because it has 100 less students. In a lot of cases, less students equals smaller classes, which equate to one on one attention and better student outcomes.	2/13/2026 12:09 PM
3963	I have some concerns about building large elementary schools with 900 students. At a time when the County is losing students to smaller charter and private schools, leaning into smaller neighborhood schools seems a better approach to retaining families. The fact that there are elementary schools within walking distance of each other, which seems to be more an issue in the Northern part of the county, this is due to density of neighborhoods and more in-fill development. I am not supportive of building mega-schools that are only accessible by car / bus given the environmental impact. Without seeing what new catchment areas look like with the proposed consolidation, it’s hard to provide more feedback. But, the idea that the declining enrollment is creating challenges with building maintenance suggests DeKalb has a track record of strong building maintenance. That is not correct. At Lakeside High School, one of the few high schools with a swimming pool, a leak in the pool was identified and reported to the DCSD in 2003. It was finally repaired in 2025. That is embarrassing and why people roll their eyes at the leadership and management of DCSD. As a result, talk of closing facilities and rebuilding / renovating others is not credible without a comprehensive plan to finance this.	2/13/2026 11:59 AM
3964	This is a dumb idea.	2/13/2026 11:52 AM
3965	Although I applaud the closures of many schools in order to more effectively utilize funds, it is difficult to ascertain where students of the proposed closed schools would instead be sent. This is especially difficult at the elementary level where some neighborhoods have rich cultures of walking kids to and from school. By closing some neighborhood-centric elementary schools, there is the likely increased cost of bus transportation of students across greater distances as well as more time for students to spend in transit rather than engaging with after-school activities. Further, if schools consolidate grade bands, I fear that the increased bus time will lead to higher bullying rates among a greater swath of ages. There is additional information needed to study these dynamics and the proposed impacts on the well-being of the children affected rather than simply the bottom line.	2/13/2026 11:52 AM

3966	Oak grove should absolutely not be closed. It’s one of the better schools in the district	2/13/2026 11:51 AM
3967	I am zoned for Ashford Park, but work in other DeKalb Schools. Ashford Park is slated to close, which is sad since we bought a house in this zone so that we could attend this school. Livsey is slated for expansion, and Evansdale is slated to close. I think that smaller, community centered schools are better for students and families.	2/13/2026 11:50 AM
3968	In my opinion, the upcoming scenario for consolidation do not necessarily reflect with the true value of parents that remain in the areas of the potential closure.	2/13/2026 11:45 AM
3969	The proposed closure of Oak Grove would be fine with us as a Sagamore Hills family as long as we could be assured that Sagamore would not be over-crowded as a result, and we will be provided with substantial more funding to support the influx of some of the Oak Grove families. I assume not ALL of the Oak Grove students would come to Sagamore. That would be far too many students in our school.	2/13/2026 11:42 AM
3970	I don't think neither of these schools are on the list to close so I don't think it pertains to me, but both schools are great and well kept. I do think they could use more teachers though.	2/13/2026 11:39 AM
3971	Ashford Park elementary services a community that continues to grow and bring in families with young children. Our family picked this area partially due to Ashford Park and the track record. I do not understand why a growing community would have resources removed rather than being added	2/13/2026 11:37 AM
3972	I like the idea. Seems much more economical.	2/13/2026 11:34 AM
3973	I think these make sense to help allocate budgets more equitably.	2/13/2026 11:31 AM
3974	Oak Grove Elementary is an exemplary school within the system and has been for decades. The school has longstanding ties to the surrounding neighborhoods. Closing such a well-performing school seems ill-advised for a school system that wants to prevent further shrinkage of enrollment.	2/13/2026 11:20 AM
3975	OakGrove Elementary School has one of the highest test scores in the entire county. Dekalb county has very few elementary schools that score high on the map test across the board for all grades. Closing this school is totally short sighted and show that dekalb does not care economics, excellence, grades, teachers, parents, or students at high performing schools. How about you close schools that are low performing regardless of population and give those kids a shot at going to a better school. Does Dekalb County realize that if they shut a high performing school, that the property taxes will go down and will generate less revenue. How about the county employ an economist to figure out how property taxes impacts where the school are highest rated? Maybe take some inputs from doctors, lawyers, engineers, scientist, and teachers in why people live in an area. How about we examine where pre-k consistently has 2 classes and still has a wait list of kids trying to get in?	2/13/2026 11:15 AM
3976	I read the materials and I know students are the priority in these consolidations but what about teachers and staff? It seems like less teachers and staff will be needed which means people will lose their jobs or be forced to retire. I get money has to be used effectively but it always seems someone has to lose their job so a school district can be better run. What about reductions at the district administrative level and the loss of their facilities? I don't see them in this scenario. Dekalb County is a bit top heavy in roles and leadership seems to be constantly leaving or found to be misusing funds.	2/13/2026 11:14 AM
3977	I don't like the idea of getting rid of neighborhood schools. Getting rid of schools that have been built or renovated in the past 10 years is a waste of taxpayer funds. What will the school site be used for? Will the building be torn down or will it just sit there for years and look dilapidated? If the county sells the land, what will the money be used for?	2/13/2026 11:11 AM
3978	Regarding Oak Grove and Henderson Mill closures: why would anyone want to move to these areas anymore if the schools are being closed? The effect on the community is tremendously negative if students only attend private schools.	2/13/2026 10:58 AM
3979	It's concerning that all those facilities will go away. Also, when these consolidations happen, it's not clear what state the current schools are in from a building quality standpoint. Increasing the capacity will also increase wear and tear. If you're moving more students into a building that needs a lot of work, it doesn't sound like a smart move.	2/13/2026 10:55 AM
3980	I understand that consolidations may have to happen. I would feel bad for the families that have to make changes, but I understand that this would be necessary.	2/13/2026 10:54 AM

3981	Shocking to hear that numbers are so low across DeKalb Co. schools attendance. Where will the kids go if the schools close? Will schools become overcrowded and teachers/staff etc become overwhelmed?	2/13/2026 10:51 AM
3982	The closure of APES is concerning as a future parent. This change would happen during the middle of my children's time at the school. Losing a neighborhood school would be hard on the community and repurposing the school to serve a smaller grade band may be more advisable.	2/13/2026 10:49 AM
3983	I think this idea is a bunch of horse manure. These schools are necessary in their locations. We do not want to see more data centers built there.	2/13/2026 10:45 AM
3984	I never understood why they built a new Lithonia in Redan while also building Stephenson, MLK, and Arabia Mountain and closing Shamrock, Henderson, and Briarcliff. I understand starting with elementary for reasons, but this seems very shortsighted and not correcting years of bad planning while claiming to. I'm just not buying it.	2/13/2026 10:40 AM
3985	I strongly oppose the proposal to close Ashford Park Elementary. This school is not only a high-performing, vibrant learning environment, but it is also the heart of a cohesive and engaged neighborhood community. Closing an in-neighborhood school—especially one that is currently over capacity because families actively choose it—does not make sense from either an educational or community perspective. Ashford Park provides stability, walkability, and a sense of belonging that directly contribute to student success. Removing a successful neighborhood school disrupts students, weakens community connections, and diminishes the very qualities that make this area desirable for families. Consolidating students into other schools will increase travel times, reduce neighborhood engagement, and potentially overcrowd schools that are not set up to absorb such shifts. Rather than closing Ashford Park, the district should explore ways to support and expand high-demand schools—through capacity enhancements, boundary adjustments, or phased investments—so that families can continue sending their children to the school that anchors our community. I urge the district to reconsider this consolidation proposal and prioritize solutions that preserve strong neighborhood schools like Ashford Park. Keeping this school open is essential for maintaining community cohesion, supporting student well-being, and honoring the voice of the families who live here.	2/13/2026 10:34 AM
3986	This would create a negative impact on students by over crowding a small footprint school	2/13/2026 10:30 AM
3987	I am in disagreement with closing current schools. I think Dekalb county should update all school buiclings. Keep schools on the smaller side, espcecially in elementary schools- Although we are “ under enrolled”, i believe the past larger number was actually overcrodong our schools. my kids classes were always very large	2/13/2026 10:29 AM
3988	Kingsley should not close. This school has has funds allocated through (two) SPLOSTs since 2020 for renovations. Staff, families and community members have been told since 2024 that these renovations will be completed in summer of 2026. They have had to put up with less than ideal building conditions, in addition to many changes in administration, etc. Kingsley is tight knit community, with room to grow. This school should NOT be closed. If anything, you should add on to this building and make it larger and move students TO the school.	2/13/2026 10:23 AM
3989	I don’t really like it	2/13/2026 10:19 AM
3990	Looks good	2/13/2026 10:17 AM
3991	These schools are what draws families to Dekalb. The smaller neighborhood schools draw parents to all parts of the county. I feel this is greed on the part of administration to do what they want with the monies saved. The school board and the administration of Dekalb do not seem to care about what's best for the school children, their education and the wants of the parents.	2/13/2026 10:13 AM
3992	I have attached two link citing the benefits of smaller class sizes in education, and with a decrease in enrollment, I think this provides an opportunity to decrease class sizes across the county and improve personalized instruction to all DCSD students. https://www.aft.org/sites/default/files/media/2014/fs_classsize_2010.pdf https://www.aasa.org/resources/resource/small-classes-big-possibilities The justification to close schools is rooted in money, but before considering closing schools, DCSD needs to consider cutting in effective programs and employees. DCSD has a documented history of absorbing ineffective principals and admin into AIC office positions, why? This is an poor use of resources, DCSD could have cut their loses and allocated funds from an administrative	2/13/2026 10:09 AM

	salary to resources to support a school/classroom. A perfect example being the situation at Smoke Rise Elementary regarding the PAC meeting incident. Correct me if I am wrong, but was this Principal not enveloped and "prompted into a position in the AIC building? https://www.decaturish.com/news/dekalb/dear-decaturish-something-is-wrong-at-smoke-rise-elementary-and-we-need-help/article_677009c1-bab9-58ee-b62b-92d69f561f23.html	
3993	I think this is a very good first attempt. I do have concerns on LRES expansion and how that will work while kids are attending as not to be so disruptive, but I do think it is necessary and has the land available to have an addition. I DO NOT THINK EXPANSION SHOULD INCLUDE PORTABALES (at least not long term).	2/13/2026 10:08 AM
3994	The school and this community are so well knit together. My kids love the school and I think it's unfair to have to change their environment and community for this project. These kids build friendships and connections with teachers who make such a a difference for them in these schools that follow them through the system that can get lost.	2/13/2026 9:58 AM
3995	1) While you clearly state your principles online as the criteria in the decision process, you then proceed to directly ignore them when making decisions. You state in your closure plan that "Elementaries that are appropriately placed and well utilized have proposed facility additions. " Ashford Park Elementary is placed right in the heart of the community in which it serves, is a very high performing school, and well utilized. However, instead of 'a proposed facility addition', you have made the decision to shut this school down. 2) These decisions appear to have been made with little understanding of the local communities and the resultant impact. The head of SAP, Sarita Smith, has been in our school district for less than two years and has little understanding of local relationships and communities . HPM which is conducting the demographics research also has no local context which is reflected in their erroneous demographic projections (related to the Ashford Park area - with the amount of construction in our district area, especially with large houses replacing smaller, older properties, there is absolutely no way projected the in-boundary school age children population will decline in the near term.) 3) Most importantly, I am perplexed how you can expect to make facility closure decisions without concurrently making the student realignment decisions (or at least sharing this information). These decisions are inextricably linked - meaning you can't close down a school without a reasonable idea of where the children from that school will go as the 'receiving' school has to have certain characteristics -- sufficient capacity, be in close proximity, etc. Purporting to separate the two decisions and not providing any transparency as to where the new school boundaries will be placed under the school closure plan is disingenuous at best. You claim that you want to have a transparent and open process, but this 'party line' is the exact opposite. You cannot expect true parent and community feedback without providing families further information about how they will be directly impacted. You continue to lose credibility with the community on a daily basis with these statements	2/13/2026 9:47 AM
3996	Over the years, school capacity across the district has increased significantly. In recent years, however, student enrollment throughout the county has steadily declined despite this. As a result, the district and our committee are working to address the issue through a consolidation plan designed to respond to declining enrollment, aging facilities, and schools that are either over or under enrolled. The proposed consolidation plan supports the goals of the Student Assignment Project by promoting fiscal responsibility and streamlining resources to better serve students. It allows the district to close or repurpose under-enrolled schools while maximizing the use of funds in larger, more efficiently utilized facilities. By restructuring school clusters and prioritizing the allocation of resources and funding, buildings can be used more effectively. I believe the inventory of vacant buildings presents an opportunity for strategic use. For example, these facilities could be repurposed to house expanded school choice programs in standalone buildings. Additionally, schools in need of significant repair or renovation could be demolished, with the land banked for future district use or leased to outside entities to generate revenue. One important consideration within the current consolidation plan is the potential closure of high schools. The committee should carefully weigh community feedback when evaluating whether specific high schools close. It is also critical to consider the continuation of academic programs, such as International Baccalaureate, Advanced Placement, and Career Technical and Agricultural Education courses, to ensure students continue to have access to these opportunities.	2/13/2026 9:40 AM
3997	I have mixed emotions with this. On one hand I think the district could benefit from closing down some of the schools with low enrollments and performance scores. But only if that money is put back into the education system to improve the resources and learning curriculum for the remaining schools.	2/13/2026 9:36 AM

3998	I do not like the fact that Ashford Park Elementary is closing. Despite poor, outdated facilities this school has thrived. That should be celebrated by the school district, not closed down.	2/13/2026 9:33 AM
3999	Wise choices to place more resources back into schools to support students more effectively.	2/13/2026 9:27 AM
4000	I like the look from the high school level and moving down to elementary school level for adjustments.	2/13/2026 9:21 AM
4001	I oppose the proposed consolidations and school closures. Closing neighborhood schools creates major disruption for students and families—longer bus rides, harder logistics for working parents, loss of stable relationships/support systems, and added stress during key learning years. Consolidation also risks overcrowding at receiving schools, larger class sizes, and less access to programs and services (especially for students who rely on consistent supports). If enrollment is declining, the district should prioritize alternatives that keep schools open: targeted program expansion (magnets/dual language/STEM/arts), strategic boundary adjustments, controlled choice, co-locating Pre-K and community services, and leasing underused space where appropriate. If any consolidation is still considered, it should require clear, school-by-school data (utilization, costs, transportation impact, academic impact), a transparent equity analysis, and a plan that guarantees students are not harmed by longer commutes or reduced services.	2/13/2026 9:21 AM
4002	Do not close our schools. Too many people will be without jobs and students will be displaced. Please don't close the schools.	2/13/2026 9:16 AM
4003	I am a parent of two young children who will attend DeKalb County schools in the next 1-3 years. The proposed closure of Oak Grove Elementary is concerning to me. The proposal does not outline specific reasons why each ES has been chosen (the way it does for MS and HS), so I am frustrated with the opaque recommendation. By all accounts, this is a thriving school, well supported by parents and the community.	2/13/2026 9:15 AM
4004	While I understand that you are in a very difficult position balancing cost vs robust opportunities, I am extremely disappointed that Vanderlyn is being proposed to close. I think the small community school environment is better for learning in the elementary grades where enrichment and activities are less important. I would prefer the scenario that enables the county to allocate more funds to student teacher ratios in the elementary grades and teacher compensation.	2/13/2026 9:11 AM
4005	I do not like the idea of 27 schools shutting down. We should be shutting down one school and upgrading another to consolidate schools and make sure each school has a proper number of kids. This will leave middle schoolers with their age group, as 6-12 is not a good idea for many reason.	2/13/2026 9:06 AM
4006	RIDICULOUS! My biggest concern is the impact this would have on class sizes. Smaller schools allow for smaller class sizes, which allows for better engagement and personalized interactions between students and teachers. There is tons of research that supports this. Closing manageable neighborhood schools would be catastrophic for stakeholders. Students, parents, and teachers would suffer heavily due to massive changes. I can only imagine the amount of teachers that would be fired because there wouldn't be a need for all of them after consolidating. Furthermore, the bus situation would be a NIGHTMARE! There aren't even enough buses or bus drivers to support the schools as they function now.	2/13/2026 9:05 AM
4007	Taking elementary schools out of neighborhoods is bad for everyone - families, neighbors, property values, community connectedness	2/13/2026 9:03 AM
4008	I’m glad we will have conversations and the community will be involved	2/13/2026 8:58 AM
4009	I think you are underestimating public backlash and the amount of kids that would unenroll, we specifically choose where we live because of the school district our house was in. If you close the school and redistributed Kingsley ES away from Dunwoody Schools, we would go private or move. Kingsley ES closing, but is dependent on how you would redistrict we would want redirecting to chestnut elementary school for any neighborhoods east of winters chapel and north of Peeler Rd.	2/13/2026 8:56 AM
4010	I'm concerned about the idea of expanding Montgomery Elementary for the following reasons: - Traffic during dropoff is already horrendous. With more students, I only imagine it would get worse, so I'd like to hear about any plans to make buses more of an option (currently pickup for us is too early) or to manage traffic on Ashford Dunwoody road. - I do not want class sizes to balloon or for the shared facilities (library/cafeteria) to become overrun or have more limited	2/13/2026 8:55 AM

	availability. Currently kindergarteners eat at 10am because the cafeteria cannot accomodate kids as is. - If this happens I'd like to actually see resources expand. For example, I'd expect more language offerings and more after-school access.	
4011	My neighborhood school is Ashford Park Elementary. The facility is crumbling, it's severely overcrowded — BUT, people want to be there and people move to this neighborhood because of it. I guarantee you, if you try to "spread out the success" of AP to John Lewis or somewhere else.....people will just send their kids to private schools. People are very wealthy here and have little patience for DeKalb shenanigans moving their kids around. What AP parents want is a renovation, add a second floor....But I know that costs money. This school, the parents, have money. Let them help fundraise for it! Why isn't that allowed? They want AP to stay on the site of AP, just with a bigger building that can accommodate the boom of children in the neighborhood. You will lose them ALL to private schools. Isn't curbing declining enrollment in DCSD part of the goal here?	2/13/2026 8:55 AM
4012	I support public schools and both my children attended Ashford Park Elementary, Chamblee Middle and Chamblee High School. We love the community schools and my children maintain friendships with their schoolmates even after graduation.	2/13/2026 8:53 AM
4013	Closing Vanderlyn, a highly rated, high performing school and shifting students to lower performing schools would cause families to leave dekalb schools altogether. Vanderlyn is a thriving community.	2/13/2026 8:52 AM
4014	I think it is hard to close schools in any area with a plan for new buildings and staffing to help in the schools where an entire schools students have to go. The area schools are closest to most of the students. there is history/legacy of school that will be eliminated. I recommend that the schools that in the area closest to the closure receive funding prior to the closures focused on building/nice temp trailers with construction time lines for new buildings within 3 years and staffing incentives for staff being transferred to other locations. This will require multi level involvement including staff and student advisors to help make the best choices.	2/13/2026 8:46 AM
4015	I think these scenarios make sense considering low enrollment, but I think first considerations should be how do we increase enrollment.	2/13/2026 8:45 AM
4016	While consolidation may appear efficient on paper, it risks overlooking the root causes of current challenges. Enrollment declines should not be viewed solely as a facilities issue. Instability in district leadership and frequent staffing misalignments have had a greater impact on student engagement and family confidence than building capacity. Consolidation without addressing instructional quality, staffing alignment, and program offerings may further disengage students and families rather than stabilize enrollment.	2/13/2026 8:43 AM
4017	I would not like these consolidations.	2/13/2026 8:42 AM
4018	Oak Grove Elementary is a cornerstone to the community and where my family plans to send our children. The reputation of the school was a huge reason we decided to purchase a home in the area, and consolidating/closing the school would impact the longstanding reputation and community engagement. We would consider moving out of the Dekalb district entirely if OGE closes.	2/13/2026 8:40 AM
4019	It makes sense to optimize the school capacity and improve education at the same time. Reduces costs and offers better education for all DeKalb communities.	2/13/2026 8:40 AM
4020	My feedback on the scenarios is that these schools should not be touched. The county can implement better rules, classes, and overall engagment in schools.McNair High School is not more adequate than Cedar Grove High School. Our students deserve a second chance. I am co 28, and we deserve to be able to come back and see our Alma Mater.	2/13/2026 8:36 AM
4021	Dekalb is a huge county. It makes no sense to close all of these schools. I think it’ll discourage children to want to attend school.	2/13/2026 8:33 AM
4022	We need new facilities for North and South Dekalb area.	2/13/2026 8:28 AM
4023	Consolidation of elementary schools go against Dekalb long standing policy regarding neighborhood and walkable elementary schools. It lessens community impact at a critical point in student development and increases greenhouse gas emissions by reducing the number of students within walking/biking distance of schools.	2/13/2026 8:25 AM
4024	Why would Dekalb want to shutdown their highest performing/rated elementary school. Where would the 700 kids go with the surrounding elementary schools to capacity. Makes no sense to	2/13/2026 8:21 AM

	me. We moved to Ashford Park specifically for the Ashford / Chamblee schools. If we are reassigned to Cross Keys we would be forced to move to Roswell/East Cobb or look into private schools.	
4025	Concerns regarding the closure of both Columbia and Canby lane elementary. This seems like a significant impact/ crowding on the Columbia/Snapfinger ES cluster. I don't see a school listed in the area for potential expansion if Snapfinger's building has significant facility issues and B. Obama Elementary is a new school but not within walking distance to the areas students. I would like to see the plan or process mapping for which ES students are being reassigned.	2/13/2026 8:21 AM
4026	Surprised to hear about expansion since trailers are already being utilized for Montgomery Elementary. I am curious to find out more information about plans to increase the footprint of the existing schools to accommodate the higher number of students.	2/13/2026 8:17 AM
4027	Oak grove is an excellent school and should never be closed. It consistently exceeds expectations and performs better than most in the county.	2/13/2026 8:12 AM
4028	Why not sell the building that is supposed to be for district and place those people back in the classroom as teachers or support. Smaller class sizes even if you have to consolidate but make it the last option to consolidate.	2/13/2026 8:12 AM
4029	I am completely on board with needing to close some schools and consolidate. However I would like to see what the cost is to expand some of the other schools in order to accommodate more students and what that effect is on traffic in that area since some of those schools on the expansion list only have one way in/out and are already causing lots of traffic/parking issues. Is the "expansion" of those schools just going to be more trailers or actual building space? With making larger elementary schools, please remember to keep class sizes as small as possible or use the extra money saved to add more teacher assistants. Also, since schools are being closed to save money, I think it is absolutely prudent that administration office spaces also be closed/consolidated and have the administrative offices move into the closed schools so that we aren't paying so much for office space.	2/13/2026 8:07 AM
4030	Closing McNair DLA is a short-sighted idea, given the boom that East Atlanta is experiencing. There’s more babies and young children than ever in the area and you’ll be depriving families of a school. Furthermore, closing two other schools in the cluster shows the complete lack of consideration that the county system has for areas that are majority black, and it’s yet evidence of how you are perpetrating racist behaviors that will hurt a growing and beautiful community.	2/13/2026 8:02 AM
4031	I understand the scenario, and I can see how this would save the District can save money.	2/13/2026 7:42 AM
4032	The scenario where McNair Middle becomes an elementary school is asinine. The physical structure of the facility does not seem conducive (or safe) for small bodies. Additionally, closing EVERY elementary school in our area except for Barack Obama and having them go to one place reeks of trying "herd" students with no regard for relationships and culture that have been created in some neighborhood school. This school was already disrespected last year when the principal, Dr. Taylor, was moved in the summer with NO INPUT from the community. It appears the county is trying to destroy this school and despises the parents and students that populate it.	2/13/2026 7:35 AM
4033	Cascading schools is definitely the right approach, along with shutting down the most under performing schools I want to see what is the plan for Kittredge, are they not getting more space? DCSD is currently under performing the state average, what I see is a plan to make us average. DCSD needs to think bigger than simply closing the under performing schools. We must also come up with ways to enhance our top performing schools and expand them to more kids. I want to live in a district with great schools, not just decent ones.	2/13/2026 7:35 AM
4034	VES is a high performing neighborhood school that families (like mine) seek out in their long-term housing decisions. Please do not close our high performing neighborhood school in which students and teachers work incredibly hard everyday. if changes are necessary, I would hope they plan to allow currently enrolled students to remain and complete their education there. It is obvious that continuity and stability are good and disruption is bad. And, socially, VES is important for young families in the community! It provides opportunities for students to engage with kids in other grades after school on the playground, and helps support a strong neighborhood network. Shouldn’t we preserve at least one high-performing neighborhood school option for families in the district?	2/13/2026 7:34 AM

4035	I see this was well throughout and considered. I want the district to best utilize its resources. That said, consider the community aspect and traffic patterns. Children should be close enough to schools to walk and attend school programs. If parents have to drive over 10 minutes that cause access issues. ITP and OTP is real. If parents need to cross over 285 to get their children to school, it increases commute time and adds to the already hectic traffic. Children will be late or attendance issues will increase.	2/13/2026 7:29 AM
4036	none	2/13/2026 7:16 AM
4037	no comment	2/13/2026 7:05 AM
4038	I'm against the closure and consolidation of schools. Why overcrowd schools. Teachers are able to teach better in smaller classrooms and students get more one on one attention.	2/13/2026 7:03 AM
4039	The basic idea of closing schools and consolidating them makes perfect sense. That's not what was presented here. I don't understand the cost/benefit analysis for closing this many schools AND also expanding others. I would like to see a scenario presented that focused on minimizing facility costs by using existing schools and not adding any expansions, which we all know will be very high cost construction that will take a long time because it always does.	2/13/2026 7:02 AM
4040	honestly i think its a great idea. The redan area has poor academics and unruly children behavior. My kids used to go to gwinett and they were top students. Ever since the switch they are different. they come home saying things they dont normally say and the school never takes acountability and always blames us and threatens us with social workers.	2/13/2026 7:01 AM
4041	The scenarios make sense to me. They seem long overdue.	2/13/2026 7:00 AM
4042	Please do not close Ashford Park!	2/13/2026 6:51 AM
4043	Oak Grove Elementary is one of the best elementary schools in the county thanks to the support of the OGE foundation. The current proposal considers closing schools like OGE and ashford park. By consolidating these schools, you will have more students leave Dekalb county schools for private education. Your resources would be better served by improving the middle schools and high schools which would encourage students stay in county schools instead of leaving for private school.	2/13/2026 6:40 AM
4044	Moving facilities and shuffling communities to other areas would solve the open seats issue. Administration, faculty/staff, and building/facility maintenance, would need to be addressed and in place well before making moves.	2/13/2026 6:36 AM
4045	School closures are going to lead to crowded schools, thusly creating safety concerns. Will there be an SRO assigned at every school location? Also in reference to all the new chief and support positions that have been created, will these positions also be consolidated? If enrollment is down, why is the number of non-school based support positions up? The consolidation should start at the district offices.	2/13/2026 6:28 AM
4046	I strongly oppose the proposal to close 30 schools on the south end. This decision disproportionately impacts predominantly Black communities and raises serious equity concerns. Our tax dollars are meant to give all children a fair chance to succeed. Closing neighborhood schools, overcrowding northern schools, and busing students across the county does not support that goal. I also do not agree with merging schools into K-9 or K-12 models without clear evidence that it benefits students academically or socially. Financial mismanagement by past leadership should not come at the expense of our children or our community. I urge the board to reconsider and prioritize equitable solutions.	2/13/2026 6:26 AM
4047	I do feel it is a evenly diverse scenario. Many of the schools are in minority areas such as South DeKalb. Property values will suffer. Also who regularly take their kids to school will loss that valuable time with their children. All kids don't ride the bus. This could create over teacher burn out as well. Many teachers live outside the district, their commutes will be affected. Saving more is great but not at the expense of the overall community. Repurpose fuels instead. Start more Stem/Steam	2/13/2026 6:25 AM
4048	Need more information on other school potential rezoning Need additional information on how Hawthorne will be expanded to include 2 additional schools. There is little to no room/space for expansion and unlike Henderson or Oskgrive the school is in the middle of a residential area vs oblong a main road. Traffic getting in and out of the neighborhood will be extremely challenging during school hours	2/13/2026 6:17 AM
4049	Consolidating not closing is the best approach. As it would allow families and learning	2/13/2026 6:07 AM

	communities to remain together and supported without implementing a complete transition through closure which may cause disruption and deep loss of engagement.	
4050	I recognize the district is facing enrollment and budget challenges, and I respect the effort to search for solutions. However, based on the information presented, I do not support the proposed consolidation or reconfiguration scenarios at this time. My concern is that the proposals appear to prioritize building efficiency over the developmental, emotional, and community impact on students.	2/13/2026 6:06 AM
4051	When closing schools, what will happen to all the staff? Will they be moved to the existing schools and create a smaller class size? Also if enrollment is so low and money is so tight, is district office need to be cut? That is a huge portion of money that doesn't directly touch kids. All the contracts and people. We need a real audit before you talk about closing schools.	2/13/2026 5:57 AM
4052	Not knowing what school/ distance my child will end up being is unsettling	2/13/2026 5:49 AM
4053	I think it's to many school to fast. The traffic patterns would change dramatically. We already don't have enough parking at the school when they have an event b/c the school it P-8.	2/13/2026 5:49 AM
4054	I like the school and it is a great community	2/13/2026 5:47 AM
4055	This is a great idea	2/13/2026 5:43 AM
4056	I worry about established school communities being negatively impacted and class sizes growing too large for elementary students.	2/13/2026 5:36 AM
4057	Ashford Park elementary is a fixture of the community in the area. It likely needs a remodel and expansion, but its location is central to the community with no other options close by. It has also created more opportunities for students to walk or bike to school (the bike bus to Ashford Park) which encourages kids to be more active.	2/13/2026 5:04 AM
4058	Don't close the school	2/13/2026 4:54 AM
4059	I'm sad and surprised to see Ashford Park Elementary on the list but I do understand the facility is out of date and cannot currently serve its high volume of students. I'm eager and hopeful this means there's a plan to keep this current school community together wherever that might be. We are a tight knit community that have worked together to build an amazing neighborhood school. If we all stay together we will make wherever we land another amazing school.	2/13/2026 4:48 AM
4060	I believe that our students deserve to have well-kept facilities with amazing educators who are trained to teach them. The initial facilities scenarios especially pertaining to the multiple grades in one building seems more like a safety issue than anything else. Converting high schools into middle schools seems like we are trying to load off schools (real estate) for financial gains.	2/13/2026 4:43 AM
4061	The best school.	2/13/2026 4:42 AM
4062	Livsey site expansion seems expensive due to the current land features. Parking is already challenging. I'm surprised to not see "selling property" as an option for what to do with land when schools are closed. My concern with the sale of land would be that additional housing development would be likely, which would most likely add students to the area where a school was closed. I do appreciate the conversation of consolidation and better utilizing our resources. I am very interested in better transportation routes.	2/13/2026 4:20 AM
4063	GOOD IDEA!! EXCITED ABOUT THE COMBINATION OF OLE TIME TRADITIONAL EDUCATION	2/13/2026 3:02 AM
4064	They could be improved at peachtree middle	2/13/2026 2:23 AM
4065	I dont feel any closures should happen as an influx of chuldren could happen at any time.	2/13/2026 1:35 AM
4066	I understand the buildings are all old and need major repairs and that many schools are under enrolled- however, my favorite thing about Briarlake is the size. It is such a small, sweet community where we truly work together and make big impacts and know our neighbors because of the community built at the school. Combining schools would make the school way too big and lose the community aspect. I think you would lose a lot more seats with mega schools.	2/13/2026 1:29 AM
4067	It feels as though the south of Dekalb will feel the negative effects of these consolidations the	2/13/2026 12:30 AM

	most.	
4068	Incompetent	2/13/2026 12:21 AM
4069	I've lived in Decatur near Towers High School for around thirty years. Towers has been a major problem for decades because that area of Glenwood Road has been underperforming for decades due to the drug crisis and lack of social services. Instead of converting it to a middle school why not add more social services to that area. Changing it to a middle school is only like a band aid for a chronic problem.	2/12/2026 11:58 PM
4070	I don’t like the consolidations, this will make it harder for the kids in the neighboring subdivisions.	2/12/2026 11:50 PM
4071	Considering school closures and consolidations on capacity alone is short sighted. Reconfiguration must consider educational quality being provided which is not the same at each school. Vanderlyn Elementary is providing my child with a very high quality education in my opinion. She may receive a similarly high quality education at, say, Dunwoody or Austin ES, but I don't believe she would get the same quality of education at Chesnut. And certainly not at Kingsley (which is also scheduled for closure) Closing Vanderlyn rather than Chesnut, for example, which is a lower rated school is not sensible simply because Chesnut is running over capacity. Further, the plan is incomplete if it does not include details about transfers of teachers, and students, to other schools and to which specific schools.	2/12/2026 11:43 PM
4072	This worries me. My kids love their school and teachers. They're very happy and feel safe there. It's not a huge school, but it's one with a strong sense of community and commitment to the students.	2/12/2026 11:32 PM
4073	Ashford Park Elementary School should not be closed.	2/12/2026 11:19 PM
4074	1. I am VERY concerned that closing Evansdale and consolidating with another school will lead to crowded classrooms. Small class sizes are proven to be better for students and should be the district's top goal. A huge reason that parents are sending their children to private schools is for smaller class size, so by closing schools, you will perpetuate the problem of empty seats. 2. We are in the DLI French Immersion program, which we chose in part because of its proximity to our home. We are concerned about where that program will be moved. 3. Also, one of our children is not school-aged yet, and I want them to be able to attend school with their sibling and not be forced to start somewhere different. As an aside- I taught in DeKalb back in 2011 when several neighborhood schools closed and redistricted students to Snapfinger ES. We had around 1,000 students. It was overcrowded and overwhelming to be a teacher in that building. As a specials teacher, I saw classes with 32 kids and hardly had the space/seats to fit them all, let alone remember all their names. Behavior problems spiked, and students struggled socially as they tried to integrate into a school that wasn't "theirs". All of this is to say that I have seen this precise scenario play out from the inside, and it is not in students' best interest. Class size matters, and community pride matters.	2/12/2026 11:17 PM
4075	It is hard to close schools but it must be done. Perhaps explaining how central office staff will also decrease will make the closures more palatable.	2/12/2026 10:59 PM
4076	The initial scenarios seem to make sense, off the cuff.	2/12/2026 10:50 PM
4077	From our apartment community more than 50 students studying in vanderlyn elementary school	2/12/2026 10:48 PM
4078	Ashford Park needs updating. Overall, the school is good but there are too many kids in the classrooms and not enough attention to the children with learning diabilities such as adhd. They only teach one way and expect all students to learn that way.	2/12/2026 10:47 PM
4079	I think it’s way too many elementary schools to close. We don’t have the infrastructure to create more traffic for people traveling further to go to school.	2/12/2026 10:43 PM
4080	First, I want to express appreciation to the district for taking on these decisions and for the work that has clearly gone into the process. School boundary and program changes are never easy, and I’m grateful that the district is engaging in long-term planning. Clear, consistent communication from district leadership, including Dr. Sauce and Andrew Ziffer, has been especially important, and continued transparency around data, timelines, and decision-making criteria will help families feel informed and supported. I think the plan to close Kingsley and Vanderlyn makes sense (although I know the Vanderlyn choice will be unpopular). I noticed some schools (that I didn't think were magnet/specialized) like Cary Reynolds and Montclair	2/12/2026 10:41 PM

	weren't included - what is the plan for these schools? For a school like Montgomery with potential expansion plans - how will the district address on waiver-size classes/trailers until those expansion plans are complete?	
4081	I feel it dis portioned with other districts in the same county. North Dekalb county is not going through these drastic changes in their school districts	2/12/2026 10:38 PM
4082	Midvale is such a sweet, wonderful neighborhood school. What is the plan for consolidation if Midvale disappears? Livsey already has a village of temp trailers and pushing for overcrowding doesn’t seem like a suitable solution.	2/12/2026 10:26 PM
4083	My children attend a school choice lottery program, the DLI French program. I am concerned about the future of the DLI programs, the specialized teachers that may lose their jobs, and the community that has been a cornerstone of my children’s education. By consolidating schools my children would not have their same sense of community, for instance, every single teacher in the building knows my children by name and that they are siblings. This has been so helpful to my son with a 504. He has thrived in with the small cohort and individual attention he has received from staff.	2/12/2026 10:25 PM
4084	I oppose the closure because it would be harmful to students and the surrounding community. Closing Cedar Grove Middle School would disrupt students during critical developmental years, increase strain on receiving schools, weaken neighborhood stability, and disproportionately impact a historically under-resourced community. The long-term academic, social, and economic consequences outweigh the short-term financial savings.	2/12/2026 10:24 PM
4085	I honestly think both schools are doing great job with both of my children and to close either schools would have a bad impact on the children educational outlook/ future.	2/12/2026 10:20 PM
4086	Too many schools on the South end in close vicinity are closing. What about transportation, class sizes, not to mention with all the schools closing where will the teachers and staff be placed? Yes bigger school (middle) for elementary however the teachers are still left out of a job.	2/12/2026 10:17 PM
4087	This is useless plan if dscd as space for 110k students and has 92k currently enrolled, that is. It a big enough gap to close schools as more people are moving into the neighbors in the schools your trying to close.	2/12/2026 10:11 PM
4088	I think that McLendon ES made sense post-WWII when all of our single family homes were bursting with kids, but they're not anymore. I think it's a luxury to have an elementary school to walk to, but if the County can improve the allocation of resources by consolidating schools, that is the more prudent path forward.	2/12/2026 10:09 PM
4089	Peachtree has some deferred maintenance	2/12/2026 10:07 PM
4090	Consolation could be good if this means more resources for old school improvements and/or teachers that still want to be in the profession.	2/12/2026 10:01 PM
4091	It is very hard to share feedback on this because it fails to answer essential questions that cause the most concern: where will students who are districted for these schools go (not other schools but exactly which ones) and what happens to the properties that will no longer be used. These neighborhood schools are just that and leaving them vacant is a major issue for a variety of reasons. I regularly pass vacant and an unused and uncared for DCSD property on Chamblee Dunwoody road and North Druid Hills. What happens to these schools right in the middle of neighborhoods. Also, the traffic impact of expanding Chestnut and increasing enrollment at Dunwoody Elementary will be significant. It's interesting to close the two schools off of the main roads but increase enrollment in those on main roads. Finally, some of these changes seem like they will increase segregation instead of diversity and I wonder how that impacts our students -- I think negatively.	2/12/2026 9:54 PM
4092	This seems to make sense but it is important to consider why schools are less than capacity and what can be done to encourage parents to enroll their kids in public schools.	2/12/2026 9:49 PM
4093	APES is an excellent school that shows growth in student enrollment in grades K-3. It is unclear why it is selected for consolidation.	2/12/2026 9:44 PM
4094	I struggle to understand how this scenario aligns with DCSD being "a vibrant and forward-thinking PreK-12 public school district committed to empowering every student to reach their full potential. Guided by its bold vision to prepare students for success as lifelong learners and responsible global citizens, the district strives to provide an exceptional educational	2/12/2026 9:44 PM

	experience for all." This scenario sends the message that DCSD is not forward-thinking, does not empower students to reach their full potential, and that ALL students do not matter. This scenario focuses on maximizing facility usage rather than focusing on improving student outcomes, closing the achievement gap between demographics, and providing an exceptional educational experience for ALL. The consolidations scenario presented sends the message that DCSD would rather focus on disinvesting in communities that have low enrollment rather than investing in those schools to revitalize not only the schools, but the communities. Schools are more than just buildings, they are communities. The decrease in student enrollment on the southside of DeKalb is a symptom of DeKalb leaders continuing to invest more on the northside at the expense of communities on the southside. I believe DCSD should look no further than City Schools of Decatur to understand how investing in underperforming schools can revitalize schools and communities. In the early 2000s, City Schools of Decatur made the purposeful decision to invest in their school system. Twenty-five years later, City Schools of Decatur has become one of the top school systems in Georgia and transformed the City of Decatur into one of the most vibrant and sought after communities in Metro-Atlanta. DeKalb can do the same by investing in our schools to ensure that ALL students, on both the southside and northside, have the opportunity to succeed in their own communities. INVESTING in underperforming schools will prove that DCSD believes its own vision statement that ALL students matter.	
4095	There is no summary showing the difference between the "do nothing" and this initial scenario. Even in terms of reducing excess seats there's no summary chart -- and there should be! Any scenario will cause lots of upheaval and there needs to be a believable "bang for the buck" metric to show the level of improvement with this scenario AND with future scenarios that will evolve (supposedly) through the community meetings. Without any sort of summary metrics - cost, seats, FCA, ESA - it is impossible to compare scenarios with each other and with the "do nothing" scenarios.	2/12/2026 9:42 PM
4096	Closing multiple schools in the same area causes class overcrowding and parents have hard time finding transportation to schools outside of the area	2/12/2026 9:36 PM
4097	I would like to better understand where the elementary and middle school students from the sites proposed for closure will be going to.	2/12/2026 9:36 PM
4098	I am awaiting the results of “your” study to inform me and then might be in a position to answer this question.	2/12/2026 9:34 PM
4099	I do not agree. The future is based on stability and consistency when it comes it high school graduates. It could raises a flag with families, college plans, and internship with companies. Schools are like homes, when it a stressful movement from one place to another the children suffers in the end. All lives will have to be adjusted, daycare facility, Marta transportation, Gas station, after school programs, family job relocations, health and life insurance, implements of new family support systems, forced early retirement and payout pensions and even push a high rate of juvenile delinquency. Because they will be taken out of areas that they know or putting them in areas they don't like. Not only that but it will strongly suggest job cuts or job refusals due to relocation. My opinion that This is just not a good plan to move forward on for the 3 high schools. This proposed strategic plan is not going to benefit anybody. This will cost DeKalb School District more in the long run than just shutting down or converting schools due to lack of enrollment. Just because current budget is made from numbers from last year or recertification of a tax cut, it doesn't mean numbers aren't meant to change. Seriously, Do not allow low enrollment change someone future and actual livelihood. A well develop plan should be created by those who are immediately impacted so it could create empathy. Lack of care and doing it based on a need for budget cuts will cost this county millions of funding.	2/12/2026 9:30 PM
4100	It is a massive waste of time and an even bigger mistake to replace all of these students. In a general sense these classrooms aren't big enough to double or triple the amount of students nor does teachers get paid enough to take on such a mass of students. More students equals less individual time to ensure students are grasping the topics taught. As well as the problem of hallway traffic, messy short lunch periods, and an overall harder task to keep all students safe.	2/12/2026 9:27 PM
4101	Ashford park has trailers and is already over crowded	2/12/2026 9:26 PM
4102	I strongly oppose the closure of Evansdale Elementary. It is a high-performing French Immersion and STEM magnet that serves as a vital "walker" hub for our neighborhood. Closing a school that families can walk to increases district transportation costs and removes a	2/12/2026 9:25 PM

	community anchor, likely driving local families toward private vouchers (SB 233), which I also do not support.	
4103	I feel equipped only to speak about the schools near me and/or that I am zoned for. HS: I'm glad Lakeside and n. Druid are staying. They are both good schools and have good neighborhood involvement. ES: Sagamore is a great school and by closing oak grove I think you will both keep the academic excellence of the school, unite more of the leafmore neighborhood elementary kids and get an elementary school off a more main road in the area.	2/12/2026 9:20 PM
4104	The proposal makes sense to cascade because of feeder pattern and populations with higher private school enrollment.	2/12/2026 9:17 PM
4105	I am against school consolidations because they can lead to overcrowded classrooms, reduced individual attention for students, and disruptions to academic progress. Stability is important for student achievement, and frequent structural changes can negatively impact learning outcomes.	2/12/2026 9:16 PM
4106	I actually think it’s a really good plan and it addresses the low enrollment issue. Some communities may lose their schools, but it’s for our children—nothing should be too sacrificial for them.	2/12/2026 9:05 PM
4107	We do not agree with the consolidations of school especially Oak Grove. This is a great school with high performing students. Closing this school will lot be good for the community or homes in the area. Everybody buys homes in the area because of Oak Grove and the value the school brings.	2/12/2026 9:01 PM
4108	While I understand the need to address district-wide enrollment decline, consolidation decisions must account for localized growth patterns — particularly in Northern DeKalb, where elementary enrollment remains stable or increasing. Applying system-wide “excess seat” calculations to areas experiencing growth risks overstating available capacity. Planning capacity does not always reflect functional capacity. Many elementary schools already operate under scheduling constraints driven by state-mandated instructional minutes, special program space needs, and shared-space limitations (cafeteria, gym, etc.). In some cases, sections are compressed during specials simply to meet legal requirements, resulting in larger instructional groupings. Consolidating elementary schools in areas with growing enrollment may lead to: Increased class sizes, Reduced scheduling flexibility, Strain on shared spaces, And diminished support for diverse learner needs. Before advancing consolidations in Northern DeKalb, the district should clearly differentiate between overall district decline and neighborhood-level enrollment trends, and provide transparent modeling of functional capacity — not just theoretical seat counts.	2/12/2026 9:01 PM
4109	I am concerned about huge schools that the personal touch gets lost and younger kids getting overwhelmed	2/12/2026 9:00 PM
4110	You shut down these schools and the kids might stop going altogether	2/12/2026 8:55 PM
4111	We need our schools in these neighborhoods.	2/12/2026 8:55 PM
4112	Keep Brockett ES.	2/12/2026 8:54 PM
4113	I do not support the initial facilities scenario. Closing schools in my area would create significant challenges for families, particularly those who may already face transportation or scheduling barriers. Increased travel distances could make it harder for parents to get their children to school consistently and on time. In addition, neighborhood schools often serve as important community anchors, and removing them could have negative effects on both students and the surrounding community. I believe the district should carefully reconsider these closures and explore alternative solutions that maintain access, stability, and support for families and students.	2/12/2026 8:48 PM
4114	Instead of shifting high schools to middle schools, middle schools to elementary, and closing elementary schools why not just close the highschools and save the money of shifting everything down? Higher teacher to student ratios would be preferred to consolidating schools and overcrowding class rooms. Also smaller schools lead to more of a community feeling which makes monitoring things like bullying much more manageable	2/12/2026 8:42 PM
4115	Schools should not be consolidated because many parents lack reliable transportation to shuttle drop-off locations and may be unable to afford additional costs associated with theme	2/12/2026 8:42 PM

	schools. Furthermore, gentrification in the area can negatively impact the existing community and its cultural identity.	
4116	I understand the concept of consolidating our schools to better use our resources.	2/12/2026 8:42 PM
4117	Redistricting would be better than closing Ashford Park- it's a top performing neighborhood school. Keep the kids that live in the neighborhood to that school.	2/12/2026 8:39 PM
4118	South Dekalb has been struggling for too long. Now with new developments and investment we are considering closing and reallocating schools which should be invested in to bring it to par with north dekalb/City Schools of Decatur - McNair Middle has gotten praise from the ACEC for being an outstanding STEM program and we're ripping this STEM opportunity from kids hands.	2/12/2026 8:35 PM
4119	If we close down these schools I would like to see more opportunity for magnet schools. It's great that we have one in our district, but it seems wasteful and negligent to not have more seats when there are so many deserving students based on the requirements for entering the lottery. This is one of the reason kids are leaving the public school system. Providing our students more opportunities to grow, learn and challenge themselves to become a high achiever shouldn't be limited to a select few who were lucky enough to be selected in a lottery.	2/12/2026 8:33 PM
4120	I understand why this is the idea but I hope that we'll be able to stay at Ashford Park.	2/12/2026 8:29 PM
4121	Vanderlyn should be closed and give land to Dunwoody HS.	2/12/2026 8:24 PM
4122	Some of the initial reports make no sense and appear to have no real logic behind them.	2/12/2026 8:23 PM
4123	I'm most concerned that by closing schools you are making the remaining schools more dense. Without an increase in funding and teaching staff, this will lead to larger and worse teacher student ratios which is directly tied to student performance. Why is that not a primary focus of this discussion? I'm also concerned that you are closing the school closest to us, which will then cause us to not only need to change schools, but also put more burden on our commutes.	2/12/2026 8:23 PM
4124	Very concerned about possible changes. We chose this neighborhood for APE and the community support the school has. We wanted to buy into a tight knit community where all our children's friends would be located close by. We wanted to be able to walk our children to school and allow them to get greater outdoor exercise as there is less and less physical fitness offered in schools. We wanted this to continue to Chamblee Middle and Chamblee High, both of which have a great track record for producing exceptional students. If API needs upgrades then we would be more than happy to be taxed to fund these. Our children enjoy the playgrounds and play areas at and around the school. Imagine not being able to use those or participate with their friends there, if the school was abandoned or zoning divided up her peers.	2/12/2026 8:22 PM
4125	Some schools probably need to be closed. Get rid of some of those salaries at Central office and that will help your budget.	2/12/2026 8:21 PM
4126	The need to reduce capacity makes sense, but I'm concerned about closing neighborhood schools that are well utilized only because of issues with the facility. Closing schools where sufficient investments weren't made to keep the facility competitive shouldn't be doubly penalized by facing closure because of it, especially when the neighborhood has continued to send their children at a high rate.	2/12/2026 8:20 PM
4127	Keep Ashford Park open	2/12/2026 8:15 PM
4128	First of all why does this survey have monkey in its name	2/12/2026 8:11 PM
4129	I understand the fiscal necessity of consolidation given declining enrollment and 20,000+ excess seats. However, as a parent of DLI French students at Evansdale Elementary—which is proposed for closure—I need to understand what happens to school choice programs, particularly the French Dual Language Immersion pathway. Evansdale is not just a neighborhood school; it is one of only two elementary schools in the district offering French DLI, serving families from across DCSD who committed to a multi-year language pathway beginning in kindergarten. Closing Evansdale without a clear, codified plan for where the DLI French program will continue—and how students will be guaranteed pathway continuation through middle and high school—would represent a breach of the commitment families made when they entered the lottery. I urge the district to treat DLI and other school choice programs as essential infrastructure, not optional programming, in any consolidation plan. Specifically: Where will French DLI be housed? Will it be in a facility accessible to families in the Chamblee cluster? Will AP/IB French be guaranteed at the receiving high school?	2/12/2026 8:06 PM

4130	I think it is a very good start with the exception of Livsey ES as an expansion school. Based on my knowledge & experience in this Region as well as the Regional logistics Brockett ES or Midvade ES would be much better candidates for expansion and Livesy ES should be closed!	2/12/2026 7:55 PM
4131	we just moved here and this school has been so resourceful for me and my children	2/12/2026 7:54 PM
4132	While I can see the need for elementary. I'm concerned with what will become of high school communities that have rich long traditions like Lithonia High	2/12/2026 7:54 PM
4133	Horrible to close a sought after elementary school. People pull their kids out of this cluster because of the unfavorable middle school, Henderson. If you put effort towards improving the middle school, no one would pull their kids out. The middle school is also so far away from the other schools. We moved into the area because of Oak Grove Elementary and Lakeside High. Closing Oak Grove will lead to young families, who pay education taxes, moving out of the district.	2/12/2026 7:50 PM
4134	Vanderlyn Elementary is a vibrant, diverse, and active school. The building is full of kids engaged in a variety of experiences in the classroom as well as specials. Our testing data shows that our kids continue to thrive academically. We have a highly engaged parent population. The location of the school related to the homes it serves makes transportation easy and it allows kids to build community well outside of the school experience. The building is safe, up to date, and well maintained. The staff has worked to maximize use of the space, and while we are close to capacity, the building never feels over-filled. We believe that the classes, clubs, and extracurriculars at Vanderlyn align well with the programming provided at our feeder Middle School (Peachtree), and we hope that the SAP will consider that the Vanderlyn community is happy, active, supported, and high performing when considering their recommendations for the project	2/12/2026 7:49 PM
4135	They don’t take care of existing school let them run down then build new ones. DeKalb used to be a great school systems and now it is awful. They have hired non qualified superintendents at the tax payers pocket book. If they can do something right that would be great.	2/12/2026 7:49 PM
4136	Midvale is such a wonderful school. Teachers have requested to transfer there. We also have so much new construction in Tucker there is no way this won’t be a deterrent to young families moving into the area	2/12/2026 7:48 PM
4137	Tough decisions are going to have to be made, I think it is easy to panic without further clarity of where the children of closed schools will be going and new boundaries.	2/12/2026 7:46 PM
4138	I think it’s ok to consolidate elementary schools, to reduce overhead. However, transportation to and from schools should be considered strongly. Our current bus system doesn’t work. Kids are on buses too long and you can’t seem to hire additional drivers. Consolidating schools also mean students are traveling much farther to get to school.However, expanding facilities to include grade 6 through 12 I believe exposes younger children to things older children experience in their daily lives, too young.	2/12/2026 7:44 PM
4139	Vanderlyn should remain open as it one of Dekalbs top preforming schools.	2/12/2026 7:44 PM
4140	I do not believe closing an extremely successful and great school that students and parents all love is by any means a good idea. If there are schools that are troubled, seek the solution to explain the cause and fix them. A bandaid solution is simply masking an issue. We can solve these problems in other ways. We should REPLICATE the ideas from the successful schools to the failing ones and make them even more desirable.	2/12/2026 7:40 PM
4141	While the reduction of facilities is long overdue, one thing we should consider is the specialized programing that some schools have as well as their unique strengths and relationships with the communities. For example, how will this impact a school's athletics or fine arts programs -- especially those that are highly regarded? In addition, there will still be a large amount of schools left open. Have we considered even more consolidation to push student populations even higher at some schools (2,000+ high school; 1,500+ middle schools, etc)?	2/12/2026 7:30 PM
4142	Closing Ashford Park elementary doesn’t make sense if you look at the number of families that live in the area and that you’d be creating a gap and potentially overcrowding other schools in the system. You’d also be bifurcating an extremely strong community who probably funds a higher majority of the school taxes (to support other lower income communities).	2/12/2026 7:26 PM
4143	Pk-5/6-12 is the most crucial learning ages.	2/12/2026 7:25 PM

4144	This doesn’t help overcrowding at Dunwoody high school at all	2/12/2026 7:23 PM
4145	Seems reasonable	2/12/2026 7:21 PM
4146	We moved into Ashford Park specifically for Ashford Park Elementary. It makes sense to close schools that are not at full capacity, but AP is. Redirect some of the overflow of schools from outside the Ashford Park neighborhood to other nearby elementary schools. AP is consistently a high performing school because many of us in the neighborhood choose to send our children to public schools versus private.	2/12/2026 7:20 PM
4147	Neighborhood schools should not be closed. Smaller schools yields more individualized instruction and is better for students.	2/12/2026 7:07 PM
4148	Keeping magnet schools/programs on edge by not releasing our scenarios is not fair to those students/parents/staff.	2/12/2026 7:07 PM
4149	While the arguments for consolidation are clear, it is particularly hard to consider losing our small, intimate, neighborhood elementary school. I cannot imagine that the same feeling of community and our close ties to the staff and other families will be the same in a school with nearly 1000 students. I worry that consolidation, particularly of small PK-5 neighborhood elementary schools, will further drive parents who are on the fence about private vs public education further towards the more intimate environment provided by private programs, further decreasing enrollment in public schools.	2/12/2026 7:04 PM
4150	Consolidations could work and may support some of the staffing concerns. Hopefully, special education services would consider in each consolidated plan.	2/12/2026 7:04 PM
4151	Give me my twins spots in Austin Elementary or Dunwoody Elementary those 2 are the best Elementary schools. i don't want to go to Chesnut or send kids to trailers like The peachtree middle school	2/12/2026 7:01 PM
4152	Where are the numbers coming from. How can we fact check the company hired to figure out capacity? Curious how Austin will take more students when there is not one location at the school the entire study body can gather. The cafeteria only has one lane and students eating on the stage to accommodate so many classes. The specials classrooms are not fit for such class sizes nor is there room for additional specials (when adding over 5 HRs per grade). And the parking lot can not accommodate any kind of school function and parents have to park a mile away and walk (even with young kids).	2/12/2026 6:59 PM
4153	As a former principal of a school that is on the list for potential closure, I am concerned that our small, neighborhood schools are going to be pushed aside for academic industrial complexes where students and staff are numbers on a roster, not children and adults with needs and special gifts that become the fabric of our small school communities.	2/12/2026 6:57 PM
4154	Understand what is happening and the consideration given	2/12/2026 6:54 PM
4155	This seems like a logical approach. Would any of the excess buildings be utilized as other facilities for DCSD or sold?	2/12/2026 6:50 PM
4156	Keep homes that are IN Ashford, STAY in Ashford ES!	2/12/2026 6:48 PM
4157	I can appreciate the need to begin evaluating scenarios to lower the number of empty seats in the district. I also understand the need to look at facilities before looking at districting. That being said, in some areas of town, major roads (often poorly managed for dangerous driving) will shape decisions for districting unaligned with residential neighborhoods. It is especially important to review these concerns on the front end so that the district does not simply trade one problem for another.	2/12/2026 6:44 PM
4158	Closing Ashford Park Elementary is a huge mistake. It is a neighborhood school that students can walk or bicycle to and it relies less on school buses due to the close proximity to the students and parents. Parents are more involved because it is a true neighborhood school. It is worth renovating it and keeping it in the neighborhood	2/12/2026 6:44 PM
4159	Consolidations are always difficult. Students may have longer commutes. I am a big proponents of smaller, more local elementary schools. We would hate to see Ashford Park ES go away. It is highly rated and a big draw to families looking to purchase a home. Children should be able to ride a bike or walk to their school.	2/12/2026 6:41 PM
4160	Terrible idea! The schools you want to close are at or close to capacity. Please don’t mislead	2/12/2026 6:38 PM

	people by saying they are half full.	
4161	I would not be happy if Ashford Park ES closed. The school is in my neighborhood and highly ranked. It’s a big draw for people to move here.	2/12/2026 6:36 PM
4162	No comment	2/12/2026 6:35 PM
4163	I am glad my elementary school isn't closing	2/12/2026 6:35 PM
4164	I understand the need for consolidating and it makes sense. My biggest concern is what will happen to the schools that are closed, especially those in the middle of neighborhoods like McLendon. If the building is abandoned or torn down, it could reduce property values and we don’t want a new housing development on the property. I suggest renovating all schools proposed for closure that are in neighborhoods like McLendon so that there can be more schools dedicated to DLI, like Globe, or to focus on IEP/504/disabled children, like Coralwood. There is a huge need for DLI, for example, and most parents I know are highly interested in DLI but get waitlisted or go private to get it. Same for 504/IEP. If a school is not in the middle of a neighborhood, like Briarlake for example, and is on a main road, it makes more sense for those schools to be torn down and to sell those properties as they are less likely to impact neighborhoods like where McLendon is located. If renovating a school like McLendon is not an option and it must be torn down, please turn it into a public park for neighbors to enjoy.	2/12/2026 6:35 PM
4165	Agree with facility closures	2/12/2026 6:31 PM
4166	The high school scenarios make sense for now but would like to see other scenarios besides the South end being consolidated	2/12/2026 6:29 PM
4167	It needs to be closed...it is old, dilapidated, unkept and just needs to be torn down....not acceptable.	2/12/2026 6:26 PM
4168	I'm fine with it as long as the Ashford Park student body stay in tact. John Lewis seems logical to me. New facility and in the same neighborhood. Why can't we transfer all Ashford Park Elementary students to that facility?	2/12/2026 6:19 PM
4169	We moved to this area for oak grove elementary and lakeside high and have multiple friends who moved into the area fo the elementary school. Closing a sought after elementary school would guarantee good families leaving the area.	2/12/2026 6:16 PM
4170	Has any survey been conducted to determine why the current number of students is declining? Could the school population increase in coming years to require more schools which would cost more money?	2/12/2026 6:04 PM
4171	It does not look like any metrics that we determined were used, which concerns me. Additionally speciality programs were not taken into account.	2/12/2026 6:01 PM
4172	Any scenario except the high schools. I think the high schools should remain untouched. I think closing the 3 high schools listed or any high school will have a negative impact on academics, community support, sponsors, attendance, alumni engagement and athletics.	2/12/2026 5:57 PM
4173	school is not bad but the environment could be better	2/12/2026 5:50 PM
4174	It has many people upset. Vanderlyn is a high performing school with a great community. Relationship. Many people move to the are in order to attend Vandelryn. We should stay together as a school all we need is a new building. Vanderlyn can be relocated, such as where the current playground is and build up not out.	2/12/2026 5:46 PM
4175	It is unfortunate, but financially necessary.	2/12/2026 5:45 PM
4176	Ashford Park has more parental and community involvement than most, if not all schools in the district. Splitting up our students and teachers would absolutely diminish this close knit, student and teacher supportive community that has been built.	2/12/2026 5:26 PM
4177	No it's stupid	2/12/2026 5:22 PM
4178	I think we should keep Henderson Mill open! This is an amazing school that helps children in need	2/12/2026 5:20 PM
4179	I worry about the enrollment size of the elementary schools in a former middle school space. Elementary schools of 2,000 kids isn’t ideal and would be a major shift in how we do school.	2/12/2026 5:20 PM
4180	I agree with making middle school elementary and middle school high schools.	2/12/2026 5:17 PM

4181	This is a terrible idea. The children need somewhere to learn and wasting the facilities that aren't being converted is a terrible idea and indicative of a county that prioritizes profit and AI centers over our children. Closing schools has a damaging affect on the students, the community as well as the teachers.	2/12/2026 5:16 PM
4182	Everyone loves the Ashford Park elementary school community. It would be helpful to see a plan that largely keeps the community together while addressing overcrowding and facility maintenance concerns. It would also be beneficial to finally do something - we've been discussing redistricting for over 15 years with very little movement.	2/12/2026 5:16 PM
4183	All scenarios are awful. Closing schools because you don't want to pay to repair them is disgusting. God forbid these teachers have a decent ratio of students in their class instead of cramming in 30 for 1 teacher. Deplorable.	2/12/2026 5:14 PM
4184	I hate to see two local schools that I know of be closed. The fact that kids can walk to their neighborhood school is something that should be cherished & protected.	2/12/2026 5:12 PM
4185	Many of the buildings need to be closed due to age and repair needs. I'm curious about how the neighborhoods will be grouped.	2/12/2026 5:04 PM
4186	Would need to know more about redistricting. Also would like to see facilities expanded, particularly sports fields at Dunwoody High. Would like to see the removal of temporary classrooms at both Peachtree Middle and at Dunwoody High	2/12/2026 4:57 PM
4187	I understand the reasoning and it makes sense in the short term. I am not car how it fluctuates for potential growth.	2/12/2026 4:53 PM
4188	I do not think McNair Middle School is a good place to put elementary school. The facilty is not adequate space to place elementary school students. The multiple levels and glass walls do not make a good setting sor elementary school. The library is housed in 4 rooms.	2/12/2026 4:51 PM
4189	I find it difficult to provide an informed feedback without transparency. Before the next round of feedback, please share more details. • How will students currently attending closed schools be assigned to new schools, and will families have any choice in the matter? • What will happen to transportation times and bus routes? Will any students have significantly longer commutes? • The superintendent mentions "fewer course offerings, limited access to electives and AP classes" as a concern. How will consolidation actually improve these offerings rather than make them worse? • Will all programs from closed schools transfer to receiving schools, or will some be eliminated? • How will the district ensure that students don't lose access to specialized programs (career/technical education, arts, special education services, etc.)? • The scenarios mention converting high schools to middle schools and middle schools to elementaries. Will the receiving schools have adequate space, or will they become overcrowded? • What's the timeline for any facility upgrades mentioned for "appropriately placed" elementaries, and will those upgrades be completed before student consolidations? • The superintendent acknowledges that schools hold "legacy, memories, traditions, and a sense of belonging." What support will the district provide to communities losing their schools? • How will the district help preserve school traditions or identities if they're being consolidated rather than closed outright? • Will specialized services and staff move with students, or will there be gaps? • What are the actual projected savings, and how long will it take to recoup costs associated with transitions? • Will there be costs to families (transportation, fees, etc.) that weren't mentioned? • What happens to school employees? Will teachers and staff be reassigned, and what support will they receive? • If enrollment projections are wrong, can the district reverse these decisions, or will closed buildings be gone for good? • What triggers the 6-8 year implementation timeline, and could it accelerate or slow down?	2/12/2026 4:51 PM
4190	Not sure if that would be better than the current scenario as the elementary junior high and high School in my area all scores are in the 2 to 3 range in the overall School scoring system	2/12/2026 4:45 PM
4191	Makes sense	2/12/2026 4:45 PM
4192	Don't like it.	2/12/2026 4:44 PM
4193	I would like to see the high school's consolidated, but with the interest of preserving the history of the schools.	2/12/2026 4:40 PM
4194	I understand the need for some school consolidation but do not believe Oak Grove Elementary should be closed. It is at the heart of a close-knit community and at 89% capacity. I do not have the hard facts, but I understand that some of the typically developing children at	2/12/2026 4:39 PM

	Coralwood School (also in the Oak Grove community) might be zoned for the Oak Grove District but have parents who find the smaller, more individualized classes preferable. These parents might prefer to send their children back to Oak Grove before seeing it closed. I would also prefer that some or all of Coralwood fold into Oak Grove, rather than see Oak Grove close. Years ago, Oak Grove held a lottery for pre-K classes, as it only had one. Could we add more pre-K classes now? I would also favor a return to the PK-8 model before closure.	
4195	Closing Ashford Park would be detrimental to the Ashford Park, Brookhaven Fields and Drew Valley community. Despite the school being overcrowded and the building in terrible need of updating and expanding, the community and parental involvement at AP is high. Redistricting would be better than closing. With all of the new townhomes being built in the area, borders should be drawn to decrease the overcrowding. The facilities need a massive overhaul but where would the students go while that happens. The other options in the immediate area are not as strong of a community and not as strong academically. AP scores are exceptional and the other schools in the area do not measure up. People buy homes in the area to send them to AP. This would drastically affect the homeowners in the area, not just the families and students being impacted.	2/12/2026 4:35 PM
4196	I think there are other ways to combat the issue rather than closing schools in the black district and expanding the schools in white districts	2/12/2026 4:31 PM
4197	I think it is critical to keep Ashford Park, Drew Valley and Brookhaven Fields communities together at the same schools. There is a tight community in those 3 particular places	2/12/2026 4:30 PM
4198	see below	2/12/2026 4:30 PM
4199	While I understand the district may be facing budgetary or enrollment challenges, consolidating schools would have significant negative impacts on students, families, and the broader community. First, larger consolidated schools often result in overcrowded classrooms, reduced individual attention for students, and increased strain on teachers and staff. Smaller schools provide more personalized learning environments where students feel supported and known. Consolidation risks diminishing that sense of connection. Second, longer transportation times are a major concern. Extended bus rides can negatively affect students' academic performance, participation in extracurricular activities, and overall well-being. For younger students especially, long commutes can be exhausting and disruptive. Third, local schools serve as community hubs. Closing or consolidating them can weaken neighborhood identity, reduce parental involvement, and negatively impact local property values. Schools are more than buildings—they are centers of community life. Additionally, transitions caused by consolidation can be emotionally difficult for students. Changing schools, losing familiar teachers, and adjusting to new environments can affect academic stability and mental health.	2/12/2026 4:30 PM
4200	I don't like middle school and high school mixed in one school together. The age gap is to big and i would fear for the safety of the younger kids, unless they were separated through the whole day and not able to cross paths.	2/12/2026 4:29 PM
4201	As a parent at a school with declining enrollment and declining building conditions, I support consolidation of schools. It has been disheartening to watch the surrounding Dunwoody elementary schools flourish while Kingsley struggles with limited resources, little investment from the county, and losing families to school choice and private schools. I am hopeful that consolidating schools and resources will result in more equitable education and community engagement for all schools.	2/12/2026 4:29 PM
4202	I am mortified. We chose our home because of the amazing community at Oak Grove. We stayed at the school, instead of going private, because of the community & the amazing staff. They are succeeding. Killing neighborhood schools that are growing after a pandemic makes no sense. We will not keep our children in your schools if you do this. WE WILL answer every reporter's questions, petition, and point out every misstep in this process. Stop punishing the schools that are thriving.	2/12/2026 4:28 PM
4203	Are you out of your minds? Closing Oak Grove Elementary? Even based purely on attendance, it makes no sense. Oak Grove has only 90 students in the attendance zone enrolled elsewhere —almost all at magnets. Meanwhile, the top five schools that are losing students to other options are all left open: Avondale Murphy Candler Princeton Doraville United Chapel Hill All of these schools have over 300 students each who should be attending that have elected for other options.	2/12/2026 4:26 PM
4204	What purpose is there in closing an over-utilized school? Closing Ashford Park ES reeks of	2/12/2026 4:24 PM

	back-door redistricting out of Chamblee HS and MS.	
4205	Bob Mathis is a staple in the community and has consistently shown gains in student achievement. This school deserves expansion not closure.	2/12/2026 4:14 PM
4206	Instead of spending money on doing background checks on parents addresses, use the money to better the under performing schools. Y'all could've used that money to better fund, better train, better hire educators in the under performing schools. Instead y'all invested in a program that helps regulate where students should go. Do y'all know why parents aren't sending their children to DeKalb. Because the schools are terrible in the not so white communities. Y'all spend more money to make those community schools better.	2/12/2026 4:13 PM
4207	Initially fine. I worry about traffic on N Peachtree Road for Chesnut but also realize maybe it can be diverted. I 100 percent agree with Vanderlyn closing. Under capacity, old, limited parking. I just wish that land can be used for Dunwoody HS which needs it.	2/12/2026 4:10 PM
4208	1. I think the current plan is WAY too aggressive in closing schools and is too dependent on a declining attendance trend that may or may not continue. Also in digging into the trend data for individual schools, some of the trends look off (eg. Austin) where enrollment is trending upwards for the past 4 years and is for some reason predicted to decrease by 150 students in the upcoming years. This seems unrealistic. 2. Overcrowding in Dunwoody and Chamblee middle and high schools is not addressed at all. 3. Years that the schools were closed for in person learning due to Covid should be thrown out of the trend data. Many people that could afford it left due to the fact that Dekalb county chose to stay virtual for so long compared to other districts and the reopening date was pushed back numerous times. People are starting to come back (at least in Dunwoody) so I think planning to close 2 elementary schools in Dunwoody is unrealistic and premature. I could possibly understand closing 1 elementary school, but 2 seems CRAZY! 4. School expansion plans also need to be shared as part of this discussion.	2/12/2026 4:09 PM
4209	This makes a lot of sense to me—I appreciate the repurposing of newer buildings to accommodate lower grades. I would like to better understand boundaries and how the students at closed elementary will be distributed, as well as the educators. Will teachers be retained and not absorb more responsibilities than reasonable.	2/12/2026 4:08 PM
4210	I'm not in favor of closing Oak Grove Elementary. It uniquely serves the community and has done so for decades. Children should not attend an elementary school that is not in their community. We need real leadership, not fake leadership.	2/12/2026 4:02 PM
4211	Don't close Ashford Park. It's at max capacity and serves the neighborhood.	2/12/2026 4:01 PM
4212	I'm concerned about the behavior of students from rival schools suddenly put in the same school.	2/12/2026 4:01 PM
4213	Here is the revised version with "my children" throughout, while keeping the 504 reference specific to one child: As a parent of Midvale Elementary students, I am devastated to hear that Dekalb County is considering closing our school. Midvale is beloved in our community—not only by parents, but by local businesses, churches, and the various nonprofit organizations that our Midvale family supports. My children get to experience a school setting that parents dream of when they're registering their kindergartners for the first time. Families get to walk their kids to school. Every teacher, staff member, and administrator knows the name of every child. The kids are welcomed with hugs, high fives, and individualized greetings each morning. My children leave every day happy, excited, and eager to tell me what new things they did in class. Most importantly, they're learning. And they're enthusiastic about it. One of my children has a 504 plan, and the care, attentiveness, and individualized support he has received at Midvale have been extraordinary. The staff truly understands his needs and works collaboratively with our family to ensure he is both supported and challenged. That level of thoughtful, consistent care is not something we take for granted—and it is one of the very reasons our family would choose to remain in Tucker. As a Midvale parent, I never worry for my children when I leave them in the care of their school and teachers. In our country today, that is something most of us would give anything to honestly say. Many of us moved to this area specifically for the experience of a small community school. Midvale Elementary is the standard by which Dekalb should be ranking all other elementary schools. PLEASE—listen to your constituents—do NOT take Midvale away from us and from our children.	2/12/2026 4:01 PM
4214	Concerns would be: - quality of schooling must be same/better than current - community - keep friends and school culture together - traffic - changes negatively affecting drive	2/12/2026 4:00 PM

	time/distance from home	
4215	I am concerned that there is no clarity on how Chamblee cluster, which is over capacity now and forecasted, can meet needs by having one of the elementary schools close. We need Nancy Creek to be a Chamblee cluster elementary school, and even then we may be overcapacity as a cluster. I'm also concerned about a magnet program continuing to operate in Chamblee MS and HS, which are overcapacity or near. We don't have room to attract or serve students from other regions. The programs should reside in schools that have capacity for more DCSD students.	2/12/2026 4:00 PM
4216	I strongly oppose the closure or consolidation of Brockett Elementary. Elementary schools are foundational to a child's academic, social, and emotional development, and closing or consolidating schools at this level creates unnecessary disruption during the most critical years of learning. Our school serves as a stable, trusted community hub for families, educators, and students. Consolidation would increase travel time, disrupt established relationships with teachers and peers, and place additional strain on students and families. Any facilities plan should prioritize maintaining neighborhood elementary schools and minimizing disruption for young learners.	2/12/2026 3:58 PM
4217	I think that the choices for consolidation are going to cause overcrowding in the elementary schools. At Oak Grove, my son's second grade class is almost at capacity and I can't imagine combined that with other schools. I think the quality of education is going to go down if we continue to increase class size. I think it would be helpful to know how you decided to close certain schools. To not have an understanding of why you chose to close Oak Grove over other schools feels confusing when Oak Grove is rated so high and so full! This decision feels about money and not about what is best for educating our students.	2/12/2026 3:58 PM
4218	I think there's a different way to approach this. Vanderlyn has been around since 1973. It is an excellent school and will be full again. DeKalb County messed up royally during COVID, and many students transferred to private schools. There is an uptick in kids going back to public schools, and the space will be needed. Then there will be overcrowding again as it was pre-COVID.	2/12/2026 3:58 PM
4219	I think taking away neighborhood schools does a disservice to the neighborhood and community. A lot of the schools slated to close have very involved parents and serve the community they are in. Taking 3 schools and merging them into 1 school takes the neighborhood feel away and will only lead to more overcrowding/larger class size and eventually lower enrollment in areas that can afford private school. Also are property values and taxes taken into account at all?	2/12/2026 3:57 PM
4220	I am not in favor of consolidations and combining elementary neighborhood schools into larger mega schools. I want the focus to be on small community schools and small class sizes within those - any program comes secondary to that. Smaller admin structures and immediate interaction is also better	2/12/2026 3:55 PM
4221	I do not like it.	2/12/2026 3:53 PM
4222	It would be a huge mistake. Small community schools are valuable to our community. Small class sizes are important to learning and make it manageable for teachers. One large school would make traffic a NIGHTMARE!	2/12/2026 3:51 PM
4223	Some class sizes at McNair are already excessive, often due to teacher retention issues. I worry these issues could be exacerbated by bring in more students, especially ones from a school identified as academically inadequate.	2/12/2026 3:50 PM
4224	The proposal omits very essential data around cost of building and expansion. Are larger schools so much more efficient that an operational cost savings would pay back the capital expenditure in less than 20 years? I doubt it, but this is an integral piece of information and any estimates or modeling on that aspect have been entirely omitted. Suggest rolling out those decisions only that yield immediate cost savings (consolidating two close elementary schools with 50% enrollment). For our neighborhood specifically, Sagamore already has a traffic pattern problem at drop off (line chasing its tail) though a neighborhood street. Oak grove also has a problem combining traffic of that magnitude to sagamore would be a disaster. My daughter has attended both and they are both strong schools, Sagamore getting better managed currently. The facility condition has not impaired her learning experience. It's the classroom environment, class size and quality of teaching that matters. If facilities meet a minimum standard (comfortable climate, no health hazards, clean) then let's allocate limited funds on items that	2/12/2026 3:48 PM

	enhance learning experience and performance -teacher salary, books, computers, science equipment, arts, STEM and technology (both of which we lost in the last 2 years) NOT trying to achieve a facility condition index of 100/100.	
4225	This is not equitable. The closings — while district-wide limit school expansion purely to North DeKalb! It can't be that this "study" didn't think it would be equitable to expand a school or three in South DeKalb but to propose expansion of 10 schools in the North! Systematic — or blatant Racism at best.	2/12/2026 3:47 PM
4226	My concern is the Champion Theme school and where it would be moved. It would be beneficial that another school could be converted into another themed middle and high school during this change.	2/12/2026 3:46 PM
4227	I think the consolidation is a great idea. It will increase resources by eliminating unnecessary low attendance schools. It will be better on resources, teachers, and even school transportation. Many times students have to wait 2 or 3 loads before getting on a bus bc the drivers have to go to this school and tha school.	2/12/2026 3:41 PM
4228	I think the consolidations are fairly accurate. My only concerns are adequate staff for each building. Also, if funding increases for schools who will take on all of the schools who closed.	2/12/2026 3:38 PM
4229	How will the following facilities factors be resolved with an address change: Class sizes and safety Accessibility and instructional quality?	2/12/2026 3:31 PM
4230	We dont need to be punish because we are in a poor neighbor	2/12/2026 3:30 PM
4231	If this is done carefully and with purposeful follow through, it would help improve resources and funding to more of our schools and kids. But if done poorly, it could push more people to leave the school system. Family's don't like change and won't go along with haphazardly put together ideas	2/12/2026 3:29 PM
4232	Get rid of middle school and offer online for some older students. Go back to Pre K - 7th and 7th to 12th with 10,11,12 option for online; and College level.	2/12/2026 3:27 PM
4233	We need to keep our small neigh orgood schools. Small schools. Small classrooms and small teacher to student ratios make the biggest difference to an quality education. Being able to walk to schools to enhance a community feeling and overall parent involvement in the bettering snd funding of our students education is very important and beneficial to the child's ability to learn and grow socially. Our small elementary schools are cherished by families in neighborhoods and it is part of why they bought or rented a house in the neighborhood. It makes property values go up which in turn makes tax dollars go up to provide fu ding for these schools. Bigger schools with more kids ia the wrong direction. The reason enrollment is down is because more smaller charter or private schools have popped up across the county in a effort to have a smaller classroom and better learning environment. Midvale Elementary, the schools my son attends, has a huge increase in parent involvement because more families have moved into the neighborhoods because they could not afford a house in let's say Decatur or intown Atlanta. Cut your spending in other areas.	2/12/2026 3:27 PM
4234	It's very sad to think about so many elementary schools closing. I understand the need, but I think parents would benefit from seeing examples of other districts where this plan of "mega elementary schools" has worked. We would also feel better if you were able to show that consolidation would lead to benefits like smaller class sizes. For example my daughter is in a class of 29 students. That's high for 4th grade, and her school has three classes of 4th graders. And yet, we're one of the schools set to close. Feels like you are closing schools that are already operating at highest capacity and doing well, which feels like being punished.	2/12/2026 3:22 PM
4235	Please don't close Robert Shaw.	2/12/2026 3:20 PM
4236	Leave it as is	2/12/2026 3:18 PM
4237	I hope that the schools which are in need of the most repair, would be the 1st to be considered for this scenario.	2/12/2026 3:12 PM
4238	Consolidations should consist of 2 schools into one building and not 3-4 schools into one.	2/12/2026 3:10 PM
4239	I'm very surprised to see a recommendation that two elementary schools should be closed in the Dunwoody cluster. This approach seems to shift away from a community model where parents are very engaged to a much larger attendance zone. Not a fan of closing Vanderlyn specifically. It's one of the very best schools in the district.	2/12/2026 3:08 PM

4240	It all makes sense, generally speaking. Something must be done to realign school operations for more optimal funding efficiency.	2/12/2026 3:01 PM
4241	This is not solving any of the problems DeKalb County has. We have had a dysfunctional board unable to fulfill basic responsibilities for years. Why are there not more charter schools? Why are they not improving school quality to stop declining enrollment? Why does the board keep choosing corrupt superintendents? Why are they spending more on Administrative facilities when school populations are declining?	2/12/2026 3:00 PM
4242	To close an elementary school that is centered in a neighborhood where many of the kids attend is a big disruption to the community. The community continues to advocate to leave our neighborhood of kids clustered together.	2/12/2026 2:58 PM
4243	I wonder if we're considering long-term solutions for short-term trends in some of these instances. A lot of young (not yet school aged) children in my community who will not be well served travelling farther to more crowded schools in another few years.	2/12/2026 2:55 PM
4244	Seems to be data driven and thoughtful.	2/12/2026 2:54 PM
4245	Need to know what schools will consolidate into Livesy. Will any boundaries be redrawn for zoning?	2/12/2026 2:53 PM
4246	Consolidation of brockett elementary would not benefit the community or students who attend and will be attending. If we close the school in the community students and parents will have to commute to further to attend this new school location. Class sizes will be larger curbing dedicated learning. Concerns that the new cluster will not be as well rated as brockett elementary is currently.	2/12/2026 2:51 PM
4247	I believe it is necessary to consolidate schools and channel resources where they are most effective to benefit all students. However, it may be a hardship to some students who have transportation issues.	2/12/2026 2:43 PM
4248	Absolute nonsense	2/12/2026 2:40 PM
4249	I think it’s drastic to close so many schools	2/12/2026 2:39 PM
4250	I understand consolidation is a way to manage costs but it destroys our sense of community. Closing schools and bussing kids to other schools with capacity, but not in their community is not the right solution.	2/12/2026 2:37 PM
4251	It makes sense	2/12/2026 2:36 PM
4252	I like the idea of merging the ES and housing their classes at the former MS. I dislike the idea of closing the entire cluster.	2/12/2026 2:34 PM
4253	Understandable that some schools need to close. It needs to be clear how you will expand remaining schools to accommodate more students. Class sizes are large enough in some of the schools that remain and it is hard to determine how those schools will expand. For instance, where will the Oak Grove ES schools go? Will you give parents a choice? Will Briarlake and Sagamore expand and how? These scenarios don’t show how transportation efforts will change. The neighborhoods are congested enough with bus traffic in the mornings. Still missing so much information.	2/12/2026 2:30 PM
4254	I hate the idea of losing small neighborhood schools, especially those that are full!	2/12/2026 2:26 PM
4255	The district wastes resources when buildings aren’t near capacity. I think low enrollment is due to people moving out of communities and then those choosing theme/magnet schools	2/12/2026 2:26 PM
4256	Briarlake is already overcrowded. It cannot absorb additional students. There is no space in the building and there is no room on the property for additional trailers without taking away playground area. Lakeside HS doesn't have enough classrooms for the teachers they already have. Many of the teachers at LHS float around the building all day.	2/12/2026 2:24 PM
4257	Keep the schools the same. There's no need to repurpose them.	2/12/2026 2:24 PM
4258	Terrible options. We live in Brookhaven Fields and we want to remain in the Ashford Park School Disctrict. It is a great school and Dekalb’s model to tear down one of its best rated schools is a terrible idea. Why wouldn’t you want to grow your best schools and support them?	2/12/2026 2:20 PM
4259	I don't understand how closing Ashford Park when it is the most overcapacity school in the	2/12/2026 2:20 PM

	district solves its overcrowding problem. There are no elementary schools in the vicinity that could absorb the student body, and there are no proposed middle schools in the vicinity that would be able to be converted to an elementary school.	
4260	Consolidation is a good idea in theory. However, my concern is this will lead to overcrowding as a means to conserve "resources", rather than including a commensurate raise or hiring of more staff (e.g. parapros for Kindergarten) to help in classrooms. The teacher/student ratio is more important to me than the overall number of students at any location.	2/12/2026 2:17 PM
4261	School closures will always be sad, but enrollment numbers and limited budget require creative solutions.	2/12/2026 2:16 PM
4262	Utilizing facilities the most cost effectively that is the safest option would always be best.	2/12/2026 2:16 PM
4263	Oakgrove Elementary is a great learning center and a community hub for activity.	2/12/2026 2:16 PM
4264	This is very disappointing. We are a family with young twins who believe in the public school system. We moved to Ashford Park because of the elementary school and would start in 2029. Ashford park is full of young parents whose kids will likely attend Ashford Elementary in 3-5 years so this proposal does not make any sense. The county needs to do a community poll of each affected neighborhood, otherwise how could they possibly know the amount of kids that are coming up. How is the forecasted enrollment implemented? Without explanation, this data is suspect.	2/12/2026 2:11 PM
4265	While your tradeoffs make sense, abandoning neighborhood schools to make megal 800-900+ elementary schools does not necessarily mean good educational outcomes. You will push more families to consider options either outside DeKalb (like private) or leaving the county completely.	2/12/2026 2:09 PM
4266	Closing a very popular and highly rated elementary school in Ashford Park would be a mistake. It is difficult to see the logic in closing the highest rated elementary school in the area. It is over capacity for a reason- parents want to send their kids there and move into the neighborhood in order to do so. If the plan is to send all of Ashford Park residents to Montgomery or Huntley Hills, that would be an even bigger mistake. The travel from Ashford Park to Montgomery or HH is too far for an elementary school. The only option if Ashford Park is closed would be to send all of Ashford Park kids to John Lewis. But that would inconvenience many current John Lewis families because many of them would need to leave to for a different school in order to make room because John Lewis doesn't have that much excess capacity.	2/12/2026 2:07 PM
4267	Consolidating makes sense as long as transportation is considered.	2/12/2026 2:07 PM
4268	Seems reasonable, but it seems like it would be good to have include those elementry that are being closed for capacity and those being consolidated.	2/12/2026 2:06 PM
4269	I hope that with closures and redistricting, we can alleviate the capacity issues at Peachtree Middle and Dunwoody High.	2/12/2026 2:05 PM
4270	I think it's a terrible plan. Close Vanderlyn and send those students to DES and Kingsley. Then use that property to expand Dunwoody High School. Spend the money wisely.	2/12/2026 2:05 PM
4271	This seems like a fabulous way to hurt poor kids and reduce access to nearby schools to the most vulnerable student populations.	2/12/2026 2:01 PM
4272	It is not a viable option to me. Most of the high schools in the Southeast quadrant of DeKalb County came from splitting up Lithonia High School. How is it fair to close the original school and not one of the later formed schools?	2/12/2026 2:00 PM
4273	Ashford Park Elementary is a central part of the community, well-supported by both parents and community members alike and over-capacity in its current state. DCSD should consider expanding capacity vs. closing this high-performing, community-supported school.	2/12/2026 1:54 PM
4274	Consolidation should be at Henderson Mill Elementary-better school and has design which will impact neighborhood less. Hawthorne is dilapidated and outdated; increasing capacity here will have negative effect on surrounding Residents	2/12/2026 1:54 PM
4275	I am pleased to see recognition for our school to expand.	2/12/2026 1:54 PM
4276	Choosing to close Oak Grove Elementary is very poorly made decision. This school is A rated, one of the top performing schools in the area. It has a huge amount of parent involvement,	2/12/2026 1:52 PM

	high scores in all areas and is the reason many families move to this location. If schools need to be merged, choose less successful schools , ones that need help to improve , not destroying a beacon of well run, well supported education	
4277	As long as the consolidations affect the scholars and teachers positively, I'm for it.	2/12/2026 1:50 PM
4278	As a parent of three DeKalb county school scholars that has attended numerous meetings, I don't see the need for these survey's. No change has come to my neighboring schools that are in my home district. I fall to understand why timing for owed changes are hard for DCSD. All of these are the exact same promises year after year after year. Stop blowing smoke.	2/12/2026 1:45 PM
4279	Ashford Park ES is a top performing elementary school, full of students, well situated within a community that utilizes the public school rather than private options. I understand needing to consolidate schools with low enrollment or low performance however APES does not meet that criteria. This is a school that should be protected. Many families with young children such as ourselves specifically chose to buy a home in Ashford Park for the quality of the school and the walkability.	2/12/2026 1:43 PM
4280	I can't understand how the community can provide any meaningful feedback on consolidations without us being made aware of plans for redistricting or new buildings. The way that people feel about a school closing is entirely dependent on what the alternative solution is. These scenarios are largely useless to the community at this stage.	2/12/2026 1:43 PM
4281	Closing Oak Grove and Henderson Elementary will overwhelm Briarlake Elementary and cause innumerable neighborhood traffic problems. Briarlake and LaVista are not built to take that many cars/buses/students at once, no matter how much you might expand the school itself.	2/12/2026 1:42 PM
4282	I am against the closure of Oak Grove Elementary school. It is a beloved neighborhood school with fantastic teachers and parents who support the school. We do not wish to be consolidated with Sagamore or Briarlake.	2/12/2026 1:41 PM
4283	As a Para, I think some school buildings need to be from k-12, to cut a lot of building work, building cost, bus transportation and it helps students stay in a or their community for years. Since a lot of buildings are older and needs work, those buildings need to be improved and be for students with certain extra needs/ (sped) to make schools safer. Not leaving a student left behind, but it's putting my depth and the know-how with those particular students to work and guide much better, in an environment/atmosphere for their future and beyond.	2/12/2026 1:40 PM
4284	I believe I consolidating but no closing the school for the area	2/12/2026 1:37 PM
4285	The Ashford park neighborhood is filled with families with young children. My family moved here because of the reputable school. It would be detrimental to this community to close such a high ranking school.	2/12/2026 1:33 PM
4286	it is kind of confusing and only shows which potential schools you may be closing. It does not give any information about redistricting those schools or how it could potentially impact my kids.	2/12/2026 1:33 PM
4287	Vanderlyn is a gem of a school. It is not underutilized. It has great leadership, teachers, and a very involved PTO. The building is older but in good condition. There is a good community there. It performs well. Vanderlyn is one of the top schools in our Dunwoody cluster and should not be closed down.	2/12/2026 1:33 PM
4288	I think it would be okay if it lessens the student teacher ratio in the building.	2/12/2026 1:24 PM
4289	It seems a little drastic especially to take on all at once. Maybe if about half of these reccommendations took place that would be closer to what’s actually needed. I also find it curious that Oak Grove is on the list given that they are part of the school choice option which is meant to fill empty seats. I feel like what determines an “empty seat“ at Oak Grove is very subjective. It also seems like there are huge disparities within the district as far as class size. Perhaps re-drawing the maps a little bit could adjust and correct for class size discrepancies as well as staffing issues. Because it is also curious that schools that are underpopulated somehow are also still understaffed.	2/12/2026 1:24 PM
4290	Overcrowding. Teacher to student ration increase impacting student resources and learning.	2/12/2026 1:23 PM
4291	I strongly oppose the proposed closure of Vanderlyn Elementary. It is a high-performing, stable school that families actively choose and support. Closing it risks driving families out of DCSD	2/12/2026 1:21 PM

	and worsening long-term enrollment and funding challenges. I urge the district to preserve Vanderlyn and pursue other solutions to address capacity concerns.	
4292	It makes sense, but it is heavily concentrated in one area.	2/12/2026 1:19 PM
4293	I understand the need for these changes. It would also be nice to understand if it's possible that redistricting will happen which could mean that we change from our existing school to another school.	2/12/2026 1:18 PM
4294	Please link to data sets that were used to determine that Champion MS is the least educationally adequate middle school that would deem its conversion.	2/12/2026 1:15 PM
4295	There are some schools that are in need of closing due to enrollment and building issues. However, I wonder why so many of them are on the south end. I know the buildings are older, but what does this look like for the schools remaining open.	2/12/2026 1:12 PM
4296	I appreciate the district’s transparency in explaining the purpose of the Student Assignment Project and the challenges related to declining enrollment, facility conditions, and operational efficiency. I understand the need to use resources responsibly and plan for long-term sustainability. At the same time, I encourage the district to weigh the educational impacts of consolidating or closing elementary schools like Midvale. Smaller, community-based elementary schools often provide stronger relationships, more individualized attention, and better support for early learners. These benefits can be harder to achieve when students are placed in much larger settings or experience additional transitions. The SAP materials note that multiple transitions between PK–12 can disrupt academic progress and that different grade configurations present tradeoffs. From an instructional and developmental standpoint, I believe minimizing transitions for early-grade students should remain a priority. I support the district’s goal of aligning capacity with enrollment, but I hope the committee will consider solutions that preserve well-performing elementary schools while addressing underutilization through targeted boundary adjustments or strategic reinvestment. Keeping elementary students in familiar communities may also reduce transportation burdens and support stronger family engagement. Thank you for providing multiple avenues for community feedback. I appreciate the opportunity to participate and hope these considerations are helpful as scenarios are refined.	2/12/2026 1:11 PM
4297	Closing Ashford Park Elementary School would be a mistake for the Brookhaven community. It represents one of the few highly rated schools in the metro Atlanta area and is the reason why many young professionals specifically move and pay the high premiums for housing in the Ashford Park neighborhood. Closing this school would be a punishment for community members that are otherwise uplifting this area.	2/12/2026 1:05 PM
4298	I understand the need if there is 10k of empty seats, however not sure the correct school was choosen to close in Oak Grove Elementary. Briarlake has a nightmare of an intersection, on a very busy road, where traffic is already VERY backed up. Adding additional 50-100 families could great an absolute gridlock in terms of functionality of the school.	2/12/2026 1:04 PM
4299	I could not be less impressed or excited about this idea. The idea of shutting down Oak Grove Elementary, a pillar in the Oak Grove community whose enrollment has been steadily increasing since it was devastated by COVID, is a non-starter. We moved to the Oak Grove area solely because of this school and this community, and I personally know dozens of families who did the same. There are teachers at Oak Grove who were students there themselves. You would be hard-pressed to find a more shining example of what an elementary school experience is supposed to be for an American family who wants to keep their child in the public school system. And DeKalb County wants to shutter this adored school and shuttle its kids elsewhere? It amazes me how Dekalb County keeps finding new and creative ways to trip over its own feet (or, in this case, attempt to shoot themselves in their own foot). Absolutely not - you will find that the families and community of Oak Grove will be vehemently and loudly against this plan of action. I will be on the front lines.	2/12/2026 1:03 PM
4300	It appears the analysis was very thorough and comprehensive	2/12/2026 12:58 PM
4301	It feels difficult to evaluate the consolidations in a vacuum - it would be helpful to see how students from closed schools would be reallocated into other schools and what the forecasted capacities would be in those scenarios. It also seems that information about planned timeline for student transition and proposed additions is critical, as both Chesnut elementary and peachtree middle are slated to remain open yet already have issues that would be exacerbated by more students. I assume Chesnut would receive some of the students from Kingsley and/or vanderlyn, yet the logistics of more students for drop off and pick up does not hold. Chesnut	2/12/2026 12:55 PM

	may not be at classroom capacity, but the location of the elementary and middle immediately beside each other and sharing 1 small parking lot off a 2 lane road that already struggles to handle the traffic seems like a recipe for issues. Additionally Peachtree middle is already using portables, would building changes come before more students?	
4302	I do not understand why Ashford Park Elementary School is on the list for possible closure/repurposing. It's a high performing school with a huge student population. Where could you possibly move these students??????	2/12/2026 12:54 PM
4303	STRONGLY oppose closing Ashford Park	2/12/2026 12:51 PM
4304	Ashford Park Elementary is a vital part of the fabric of the Brookhaven Fields, Ashford Park, and Drew Valley neighborhoods. I specifically purchased my home in Brookhaven Fields so that my child could attend Ashford Park. It is a very high performing school with an excellent track record of high test scores and community engagement. I live near the zoning border between Ashford Park and Woodward Elementary along Briarwood Rd. If I am rezoned into a significantly lower performing elementary school due to the closure of Ashford Park, I will either move out of the Dekalb School District or send my child to private school. Rezoning or closing the building is not the solution to overcrowding at Ashford Park. Expand the facility as it is a model school for the District. Most parents in the neighborhoods zoned for Ashford Park simply will not allow their children to attend low performing schools in the surrounding area which will only further exacerbate the problem of declining enrollment. You cannot fill seats in low performing underutilized schools by rezoning a child from a high performing school into it. You simply lose the student.	2/12/2026 12:51 PM
4305	We moved into our neighborhood because we appreciated everything about Evansdale Elementary. I grew up in this area and it has always been a very robust, thoughtful action-based community. Closing the school would greatly impact the lives of so many people. As one of many families who moved to the area and have been mentally preparing their children for the remainder of their time at Evansdale time and younger children who are getting ready to go to Evansdale, this would be detrimental in so many ways. Also worth noting is traffic within the area would be very much impacted and I would expect adjusting traffic patterns would be very costly.	2/12/2026 12:51 PM
4306	While I understand that consolidation may be necessary it seems that many of Tuckers elementary schools are on this list. Will all Tucker kids go to Smokerise and Livsey?	2/12/2026 12:50 PM
4307	Consolidate asap and save the money. Long overdue.	2/12/2026 12:50 PM
4308	I'm sad to see Vanderlyn go away, and I'm hopeful that we'll be rezoned for another nearby elementary school that's just as high-performing and community-focused. My son is six months old, so I'm optimistic about these changes.	2/12/2026 12:49 PM
4309	I do not like the idea of closing Vanderlyn Elementary School. I understand that operating more schools increases costs, however, every classroom at Vanderlyn is currently utilized with most classes holding between 22-25 students. All students are in the physical building, which is much better than asking elementary aged students to learn in trailers or other modular classrooms. To me this is optimal for this age group. To consolidate these students into other schools would mean larger class sizes, the potential for an increased student to teacher ratio, and possibly having students have to navigate between a physical building and modular classrooms.	2/12/2026 12:48 PM
4310	I believe that it is a terrible idea. I believe that schools will be over crowded and the integrity of learning will be diminished.	2/12/2026 12:47 PM
4311	I am concerned that my property value will decrease due to Kelley Lake, Flat Shoals and Bob Mathis Elementary due to close in my neighborhood.	2/12/2026 12:44 PM
4312	These scenarios make sense. For the Dunwoody cluster, Vanderlyn is small and outdated, and the high school could desperately use that land for expansion.	2/12/2026 12:42 PM
4313	I feel as if the schools should stay the same, HOWEVER, the schools that are not performing well academically and financially should be considered for closure. That would be better reasoning.	2/12/2026 12:42 PM
4314	I am not happy about the idea of Evansdale closing. I have been working here for over 10 years now and the thought of this make me want to leave to another county such as Gwinnett.	2/12/2026 12:41 PM
4315	At this point I don't believe it will benefit the children in my zip code. They will be packed	2/12/2026 12:39 PM

	together in classrooms, and less resources and good teachers for our children	
4316	I am not supportive of closing down Vanderlyn ES because there isn't enough capacity at Dunwoody ES (next logical choice) to absorb the students. See facts below: Vanderlyn ES estimated utilization in 2030 is 78.5% against a capacity of 552 which implies a demand of 433 students. Dunwoody ES estimated utilization in 2030 is 71.2% against a capacity of 960 which implies a demand of 684 students and 277 open seats. These 277 seats are obviously not enough to absorb all of Vanderlyn ES 433 students. Where would the 433-277 = 156 students go? Austin ES is ~ 3 miles away and would significantly worsen quality of life.	2/12/2026 12:39 PM
4317	I agree with consolidating some school But 27 schools is a lot. That will take a big hit in the community. I can see 3-5 schools	2/12/2026 12:38 PM
4318	I find that the initial rollout lacks transparency. The data that the district used to determine where students and future students live, what current school capacity looks like, and how these scenarios are projected to impact future capacity and class room sized should be shared with the broader public (with the exception of any personally identifiable information). It is difficult to have trust in a process without data transparency. I hope this data and an analysis on future school capacity will be released in the future.	2/12/2026 12:35 PM
4319	N/A	2/12/2026 12:34 PM
4320	I agree the consolidations are needed. Families are going to be unhappy, but it must be done for the future of our district. Many families are concerned only with their scenario and not for the larger picture.	2/12/2026 12:34 PM
4321	The Chamblee cluster has amazing community involvement and support, it's a high achieving cluster, and should remain as is. Our elementary schools, especially Ashford Park, need significant renovations, not closures or redistricting.	2/12/2026 12:33 PM
4322	I would oppose the closure of oak grove elementary	2/12/2026 12:32 PM
4323	I think this makes sense. Hopefully the plan would be to demo Vanderlyn and add parking. I am totally unclear how you'd expand Montgomery. Traffic on Ashford Dunwoody is already a nightmare without adding more students.	2/12/2026 12:31 PM
4324	Considering the scenario begins with the closure of not only our neighborhood school, but its MS as well (Henderson Mill) it borders some land between obscene and incoherent. Evansdale is a successful diverse school serving neighborhoods with multiple language families, a DLI program in French, and support for significant Amharic-speaking families. Parent/Guardian engagement is very high, and capacity is above 90%. Inclusion in these closures boggles the mind. At no point are student success outcomes included in this consideration - it's something akin to real estate holdings rather than what actually demonstrates a data-driven & public duty informed approach to what actually helps our students succeed. Our kids are not cells on spreadsheets, but have nuanced outcomes that are tied to much more data than simple facility use deltas.	2/12/2026 12:31 PM
4325	If Bob Mathis is closing, I believe it should be considered to create another school similar to Coralwood on the South side, keeping audiology and preschool diagnostics and expanding PreK access. This could also be a location for some pilot Autism pre-k and kindergarten classes. Also, Snapfinger Elementary is an old facility in need of upgrades. This may be a good building to close instead of others unless substantial renovations are planned. Also, when considering capacity, please take into account the need for office space for school support personnel such as counselors, school psychologists, LTSEs, MTSS, ect. Many buildings do not have adequate office space for these staff.	2/12/2026 12:28 PM
4326	I think small Elementary schools are beneficial and we should try to attract more parents to choose DCSD over private schools rather than close neighborhood schools. Combining middle or high schools seems more feesable to me becuase children are older and capable of being on the bus for longer amounts of time.	2/12/2026 12:19 PM
4327	I have mixed feelings about the proposed closures. While some of these schools are underutilized and some of the lowest performing schools (and probably need to be closed/consolidated to provide a better education for students) others are very high performing schools that are in areas where the population is growing. My concern is other families like me who benefit from the high performing schools (Midvale Elementary) will be forced to switch to non DCSS options, further increasing the issue that is claimed to be fixed by this plan.	2/12/2026 12:15 PM

4328	Oak grove elementary has some of the highest performance standards/ student outcomes in the county. We should not close a school that is one of the strongest, unless we want to lower the bar across the board, which I'm sure is not the intent here. There is a reason empty seats get filled with school choice. Consolidation makes more sense for lower performing schools.	2/12/2026 12:15 PM
4329	What will happen to the staff of the schools that are proposed to close and consolidate?	2/12/2026 12:13 PM
4330	dont close towers make it a magnet school	2/12/2026 12:08 PM
4331	I understand the necessity, but smaller school communities lead to better student outcomes	2/12/2026 12:07 PM
4332	Support	2/12/2026 12:06 PM
4333	I am confused by the comprehensiveness of the scenarios given that Druid Hills Middle School is completely missing from the middle school stack in the colored bar table of scenarios. From the other information, it appears that DHMS will remain unchanged, but how is it not included in the list of schools? Ultimately, we need to find ways to ensure our district has the funds to maintain the programs and facilities that support our children efficiently and comprehensively. If closing under-utilized schools helps support the ultimate goal, then I am in favor of the plans. Also, whoever edits and reviews the content posted on your website - even with the oxford comma (which I support), you should not use it before an ampersand (&).	2/12/2026 12:04 PM
4334	With the closing/expansion of schools in the Chamblee and Lakeside clusters, where will these students go during construction?	2/12/2026 12:03 PM
4335	Schools are overcrowded now. Rehoboth elementary closed and now Mclindon.	2/12/2026 12:02 PM
4336	I am very upset as a high tax paying resident that my wonderful neighborhood school Vanderlyn will be closed. I am a recent home buyer here and not only will it be significantly disruptive to my children's journey but will impact my home value. I will then need to consider moving or private school.	2/12/2026 11:57 AM
4337	Would not close Vanderlyn. This Perimeter area continues to grow and once you close it, the schools left will be overcrowded within a few years.	2/12/2026 11:55 AM
4338	It seems logical at first glance, but I think a map would help me understand whether too many schools are being closed in one area which would result in long bus times and non neighborhood schools.	2/12/2026 11:54 AM
4339	It works	2/12/2026 11:51 AM
4340	Your logic makes little to.no sense for our school. Ashford Park is overcapacity not under capacity so closing it makes no sense. With John Lewis not adding capacity and only having less than 200 open spots, Montgomery over capacity already with 200 spots you'd have to plan to be doubling Montgomery in order to absorb the AP kids. Which in and of itself destroys one of the best school communities in the district and increases bus time for the youngest kids.	2/12/2026 11:50 AM
4341	I think this makes sense because the county has to do something. When my girls were little, we moved to be sure we could stay in the district for one elementary school thinking changes were coming soon. Now, 14 years later, the county is still in the same place having made no progress. It's easy for me to say close schools, shift enrollment, etc. since my children will not be impacted, but I support a process of reducing buildings that require maintenance with tax dollars that could be better spent on educating our young.	2/12/2026 11:48 AM
4342	Love it! Closing facilities will allow focus on improving education quality and ratings for residents. As we consider building our family, our current plan is to move out of Dekalb into a better school district bc of the lack of confidence in this underpopulated and under resourced district.	2/12/2026 11:46 AM
4343	Without more specifics, I'm deeply concerned about closing Ashford Park ES. There is obviously a lot of demand here since it is at 150% capacity. I get closing some schools that are underutilized but APES is overutilized. Where are the kids going to go? Under this plan, I fear we will just have other schools over capacity and our kids will still be in trailers and modulars. Wherever they do attend, will it have the same resources (e.g., gifted, chorus, band, orchestra, Chromebooks) as APES currently has?	2/12/2026 11:46 AM
4344	DO NOT CLOSE ASHFORD PARK. IT IS THE BEST SCHOOL IM BROOKHAVEN AND FHE REASON MANY FAMILIES MOVE HERE.	2/12/2026 11:45 AM

4345	I am totally against champion theme school closing. What other options are you offering to parents	2/12/2026 11:39 AM
4346	I think the beauty of neighborhood elementary schools encourage and allow parent involvement in a small environment. I am not in favor of consolidating and closing Oak Grove Elementary. My older child goes to Sagamore Hills because of special education placement. While it is a great place, my younger child is currently thriving at Oak Grove Elementary. The community supports that school in incredible ways, and the community is supplementing much of the programming that the district cannot afford on its own. Keep it!	2/12/2026 11:38 AM
4347	I am very concerned with the proposed closure of Henderson Elementary - the only STEAM certified elementary school in the county - and the lack of information about where those children will be placed. The smaller building creates a close-knit community with teachers who know all the students. Not only that but the other nearby elementary school, Midvale is on the closure list too. This puts the children in the neighborhood off of Leslie Dr much farther from home too, instead of at the school in our community. This scenario needs to take into account more than enrollment numbers for the past couple years and look at school performance, programs and what closing historic schools will do to those close-knit communities.	2/12/2026 11:37 AM
4348	Hard to understand/follow and especially understand the impact to the children currently attending the schools that will be closed or repurposed for a different level school	2/12/2026 11:36 AM
4349	Oak grove closing would be such a loss to this community. We walk to school daily and walk to all activities. Moved here for this school.	2/12/2026 11:35 AM
4350	I definitely think the public needs to know how these properties would be used to enhance the DeKalb experience. Will these closed schools be repurposed into DeKalb county schools as fields, parking lots, training centers, etc? Or with they be sold? If they are sold, the community should be consulted, not just board room meeting at DCSD headquarters	2/12/2026 11:34 AM
4351	Short sighted	2/12/2026 11:28 AM
4352	Ashford Park ES is one of the strongest elementary schools academically in the district and highly desired by families. It is a farce to suggest closing a school this successful. AP school community pays a disproportionately high amount into the DCISD tax base and has been continually shafted by a district that drains us of money and doesn't upkeep the facilities or invest in us. This initial recommendation fuels the need for Brookhaven to petition the state to start our own school system. Enough is enough. The only workable solution is a new APES on the existing site that can accommodate all students.	2/12/2026 11:28 AM
4353	The cascading use plan makes sense to me. I have concerns about moving young students to larger buildings including safety and social-emotional well-being. I have concerns for the communities impacted by school closures. What are the demographics of these communities? Are the closures equitable? Has the SAP committee considered a plan for integrating schools that builds new communities rather than just absorb some communities into others? Land banking seems like a waste of money, so I want to know how much that costs (upkeep, taxes, etc.) and why selling the land isn't a better option.	2/12/2026 11:28 AM
4354	Do NOT close Vanderlyn. If you do, parents should have a choice of which elementary school our students can atend.	2/12/2026 11:26 AM
4355	As a teacher at Columbia and Toney, I can see that enrollment numbers are small and many rooms in the buildings are under-utilized.	2/12/2026 11:24 AM
4356	I have concerns about Oak Grove Elem being closed and consolidated with Briarlake and Sagamore. While I understand the logistics and location, I do think this would have long term negative ramifications. For example, when comparing Briarlake and OGE, the former is on the corner of 2 busy intersections, a safety risk for children. It would also seem like a better solution for a local office hub if repurposed. Second, the OGE community is vibrant and philanthropic, likely having one of the higher economic per capita in the area. These changes might encourage these families to pursue other private school options.	2/12/2026 11:23 AM
4357	If a school is high performing, I believe that particular school should be spared from closure, despite having lower enrollment numbers. Higher enrollment numbers/consolidation may mean saved dollars, but it might not be what's best for certain students and fb a tua community affected. Please also consider that there are parents such as me that are willing to drive all the way from Lithonia to Dunwoody, just to take my daughter to a school that she can flourish in (such as Vanderlyn). Smaller class sizes, a community feel, more intimate instruction and	2/12/2026 11:20 AM

	relationships, and high test scores and performance are equally just as important. For me, Vanderlyn is an intentional selection, even when comparing to other Dunwoody schools. If the school was not performing well, had low enrollment, etc, then I would understand; however, if that's not the case, then exceptions should be made. Specifically, Vanderlyn is a great school and should remain open for the reasons above. The building is extremely old, and I understand the facility rating is also a factor; why not invest in the school to bring it up to par. At the very least, I would propose expanding vanderlyn as a last resort before considering the school for closure.	
4358	Dunwoody needs neighborhood schools and smaller schools are better.	2/12/2026 11:15 AM
4359	Terrible - do something meaningful instead of blowing shit up!	2/12/2026 11:14 AM
4360	I am slightly concerned regarding expansion of Chesnut elem. Are students going to be onsite during construction or sent to Kingsley during expansion and then brought back when construction complete and then Kingsley would be closed?	2/12/2026 11:14 AM
4361	The potential closing of Midvale Elementary is concerning. The staff and administrators have been exceptional. We have chosen to keep all 4 of our children in Dekalb public schools mainly because of our experiences and involvement at Midvale Elementary.	2/12/2026 11:13 AM
4362	Seems to me that consolidating eliminating elementary schools saves money but has young kids feel like a number rather than developing their individual skills	2/12/2026 11:10 AM
4363	Not just attendance but performance should be taken into consideration. Closing high-performing schools seems counterproductive to providing quality education	2/12/2026 11:08 AM
4364	I understand the cascade, but I wish there was a little more clarity for where the students go if their school is closed. The school names are in alphabetical order and it doesn't give any idea of where we would go.	2/12/2026 11:08 AM
4365	I'm confused about where the Ashford Park students would be housed	2/12/2026 11:01 AM
4366	The biggest concern I have is maintaining the culture of the elementary school community we have come to love. It's diverse, the teachers really know all of the students, we have strong integration of the school with the community and the school thrives in terms of achievement. We don't want to lose any of that to increased size.	2/12/2026 11:01 AM
4367	Ashford Park Elementary is not empty (trailers everywhere). Therefore, it is clearly a desired school if trailers are needed to support overcrowding. An expansion would be more appropriate, particularly with community support.	2/12/2026 11:01 AM
4368	I think it's insane to close a local dli level school with the only French immersion program for elementary school students anywhere nearby. Our school level attendance seems to be good and would be better without ICE threatening our Hispanic community.	2/12/2026 11:00 AM
4369	I can understand why facilities were listed as needed to be closed. Robert Shaw Theme being listed seemed like that could be salvaged, as none of themes give the option for the community at large to apply as the last tier of enrollment. People should be given the option to choice into those schools and provide their own transportation before the theme schools are closed. I also want to know more information on what will happen to the closed school buildings. I don't want our area in the south blighted by abandoned school buildings. Will they be torn down and in what time frame?	2/12/2026 10:57 AM
4370	Why? You cram more kids into schools and they feel like a number. A lot of these schools already have trailers. This whole concept makes zero sense other than money. It doesn't seem to show any concern for the kids, families or communities.	2/12/2026 10:56 AM
4371	Closing Vanderlyn would be a serious mistake, it is the heart of the community, a top ranked elementary school in Georgia and its small class sizes are the key reason it's such a strong elementary school. If this decision is mishandled, it could quickly undermine confidence in leadership.	2/12/2026 10:53 AM
4372	Best schools have been chosen for consolidation. Closing and merging has been distributed so that no one community is unfairly impacted. Opens possibility for use of small schools for 3/4 preK programs.	2/12/2026 10:52 AM
4373	Please do not combine higher performing schools with lower performing schools. Combine the two lower performing schools and work on improving their reading and testing levels.	2/12/2026 10:47 AM

4374	I understand that changes need to be made, but what gives me pause is that for many families who choose to settle in my immediate area, Lakeside district, the smaller elementary schools are a big part of that decision. We take the tradeoff of the schools performing lower than other counties for the the smaller, more community experience.	2/12/2026 10:47 AM
4375	I trust the committee and appreciate the information how it has been broken down for all stakeholders.	2/12/2026 10:45 AM
4376	I think closing oak grove would be a terrible idea. I also cannot see expanding Sagamore. The foot print is not there without building up the school to a second story otherwise you would loose the entire field and we already have 2 dilapidated trailers that get moldy over the summer. Sagamore has been a wonderful elementary school for us for 7 years now and younger 2 are still there. Also nervous on how the neighborhood would be able to handle expanding the school with traffic, cafeteria space, busses etc	2/12/2026 10:45 AM
4377	stand-alone building for DSA	2/12/2026 10:40 AM
4378	Not a good idea to close so many schools which have strong communities and academics (Vanderlyn, Oak Grove, Ashford Park, Evansdale, Henderson Mill)	2/12/2026 10:36 AM
4379	Do not close Vanderlyn	2/12/2026 10:35 AM
4380	I am concerned that DeKalb would be considering to close a school (Vanderlyn) with such excellent outcomes and incredibly engaged parents. It suggests the district is prioritizing profit over education. I understand that you have to think about the district in its entirety, and the best use of resources, but it feels as if a school like Vanderlyn with such wonderful outcomes and parent/student satisfaction should not be on that list, but rather be a paragon of what school should like when so much has gone so wrong in the DeKalb school district as of late.	2/12/2026 10:35 AM
4381	We relocated to Tucker in 2023. The ability to walk our girls to school at Brockett was one of the selling points for us. We moved from a high performing, high enrollment (900+) school and I can honestly say my children are better supported in this smaller environment. Previously we were just a number. At Brockett our entire family has been welcomed with open arms and we have more community and familial support than we ever had living 10 years in our previous community. I attribute this to the ability make connections with other families in the neighborhood while waiting for dismissal and walking together in the mornings. The majority of staff are on first name basis with all of us. I fear we will lose this if consolidated with other elementary schools in our cluster. From a neighborhood perspective, I fear the impact the school closure will have on property values. While proposed repurposed uses have been provided, these things take time and the thought of having a large property sitting empty concerns me.	2/12/2026 10:35 AM
4382	It sounds like cost savings, in order to better utilize resources given a declining enrollment, is the primary goal of this whole process. As such, for school buildings that will be vacated/closed, why wouldn't an option to sell those buildings be considered? Of the 5 possible actions listed for closed schools, none included selling or renting the facility, which I would think would provide the most expeditious return on investment for DCSD.	2/12/2026 10:31 AM
4383	Do not shut Ashford Park. The community and support the school has received since returning from COVID is growing rapidly.	2/12/2026 10:30 AM
4384	I agree with the initial facilities scenario's closing the schools and repurposing to improve enrollment and programs	2/12/2026 10:29 AM
4385	I appreciate that thought is being put into to reduce the amount of schools and to repurpose space where it is needed more. I am specifically looking forward to the possibility to expanding Dunwoody HS into the Vanderlyn ES space. My kids will be attending Dunwoody HS in the next 4-6 years and the safety concerns due to overcrowding are loud and clear.	2/12/2026 10:26 AM
4386	There have been trailers at Briarlake for years. Is this what's meant by "adding space"? Unless you add an entire second story to the building, there is nowhere to add more kids.	2/12/2026 10:26 AM
4387	While we are grateful for the work being done to improve the quality of education across Dekalb county, we were extremely disappointed and frustrated to see the potential closure of Ashford Park Elementary school. We stretched to be able to afford a home in our neighborhood specifically so our children could attend APES. It is a school with fantastic academics and parent/teacher engagement, as well as is home to 800+ students. Not only would it be an extreme loss to our community, but would disadvantage our children who attend such a great	2/12/2026 10:25 AM

	school. It would also hurt our family and many other families financially who bought homes specifically in this district, only for our property values to tank following the redistricting. This decision not only will cost our children their education, but will cost our family extremely financially as well.	
4388	This initial scenario seems to focus heavily on one side of DeKalb county. Which has historically lacked the same benefits as those in North DeKalb. While I understand the intent of this is to redistribute resources so that students can have better access to resources, I believe in the information you share - we should be informed of what the data points look like in certain areas so we can understand why more emphasis may be placed on a particular area than others.	2/12/2026 10:25 AM
4389	Shutting Oak Grove Elementary is very distressing. This is an excellent school where my children have thrived. The idea of them having to change schools is totally unfair to them and will negatively impact my property value.	2/12/2026 10:23 AM
4390	It would be helpful to see what school you would go to if your school was selected to close. For example, Ashford Park is selected to close, I think I would have feedback if I knew where you were proposing we go? I live close to Montgomery but my understanding is that school is over-capacity as well.	2/12/2026 10:21 AM
4391	Closing schools in neighborhoods with a strong sense of community (like Oak Grove) will have serious impacts on the neighborhoods in question.	2/12/2026 10:21 AM
4392	I think the county needs to reconsider some schools, Some very high performing schools are on the list.	2/12/2026 10:16 AM
4393	The older outdated buildings need to mo e into a modern building.	2/12/2026 10:15 AM
4394	Do not close Ashford Park Elementary please	2/12/2026 10:13 AM
4395	The idea to close Ashford Park seems out of alignment with the stated goals of the SAP. If you're saying that many elementary schools have excess capacity yet AP is over capacity it seems it would make more sense to redraw the boundary in lieu of closing it completely. The same amount of students would still be in the district and just funnelled to other schools like Montgomery or Huntley Hills creating even more of a traffic bottleneck on Ashford Dunwoody or Peachtree.	2/12/2026 10:13 AM
4396	I am disappointed to see Ashford Park included on the list of schools proposed for closure. As both a county administrator and a resident of the Ashford Park neighborhood, I understand that our parent community can be very vocal. However, I hope this decision is being made based on student needs, logistics, and long-term planning rather than perceptions of the community. The location of Ashford Park is uniquely well-suited to serve the families on this side of Peachtree Industrial. In the current proposal, John Lewis remains open while Montgomery and Huntley Hills are expanded. These are the three closest schools to the Ashford Park neighborhood, and I understand the logic of rezoning Drew Valley to John Lewis. However, I have significant concerns about how Ashford Park families would be rezoned to Montgomery and/or Huntley Hills. Both of these options require students and families to cross Peachtree Industrial and travel along already congested roads during peak morning traffic times. Additionally, both schools are located near I-285, where traffic backups are already common. The increased number of buses and parent vehicles navigating these routes raises real concerns about safety and traffic flow. Travel to Montgomery would also require navigating past two private schools, adding further congestion during arrival times. Travel to Huntley Hills would require cutting through multiple neighborhoods, which presents additional safety considerations for both residents and students. I respectfully ask that the safety, traffic impact, and practicality of these routes be carefully considered as part of the decision-making process.	2/12/2026 10:11 AM
4397	While I understand the need to consolidate seats of under utilized seats, I feel like a lot of outside influences on enrollment in areas of Dekalb are being ignored. Somewhat like building a massive hospital and then worrying about the infrastructure to support the hospital after the fact. To that end, things like the new CHOA hospital will have impacts on enrollment in Dekalb. Demand for homes and home values has increased in the areas surrounding the hospital and I would expect this to continue. We can't predict everything but it needs to be considered when making decisions on the seats available in a given area before closing buildings and potentially creating overcrowding in the schools that are being kept open. Closing so many elementary schools in the Lakeside cluster does nothing to address the already overcrowded state of	2/12/2026 10:10 AM

	Lakeside. It just also creates an overcrowding in the elementary schools as well. Its like we want the kids to get accustomed to sitting on the floor in elementary school so its not a shock when they get to high school. I'm very concerned that the "expansion" of schools that aren't closed will come in the way of learning cottages (trailers) that will put many children at a disadvantage than if we had just kept another school open while we figured out what we were doing.	
4398	It is extremely hard to weigh in on consolidations when the information is not clear how the consolidation will happen. I understand that this is still under review but I had to go to a 3rd party website to find that my child's elementary school is on the list for expansion. While I am not against this in theory, I would like more information how the expansion will occur and affect the children currently attending the school.	2/12/2026 10:07 AM
4399	Please close schools with less than 900 students and bus them to newest schools.	2/12/2026 10:05 AM
4400	How does this help overcrowding at the high school level?	2/12/2026 10:03 AM
4401	With the suggested option of condensing schools, where will the new found resources be allocated to?	2/12/2026 10:03 AM
4402	Clarkston High School is an old building that really needs to be completely dismantled and rebuilt. It's falling apart! Students and staff deserve so much better.	2/12/2026 10:03 AM
4403	In the chamblee cluster, this scenario provides more questions than answers. To close Ashford Park, where would those students go? There is not an elementary school in distance that has capacity to keep that neighborhood together in any capacity. You would have to break up the neighborhood into 5 different elementary schools. In addition, you are actively spending $20MM+ on the building for improvements. In addition, what about the school on E Nancy Creek Drive? I don’t see this building listed anywhere. I understand proposing closing schools where they are under capacity and there are neighboring schools that can absorb them. But to close a high functioning elementary school with no capacity around them — this seems very far fetched. Throwing proposals out there like this just causes mass hysteria. Further - at the middle and high school level - no one can be pushed to Sequoyah Middle & Cross Keys until at least 2030 when the new high school in Doraville is complete. So is it proposed to push Ashford Park to 5 different elementary schools, including some that feed Sequoyah & CK, but then pull them back to CMS & CHS until 2030? That also would be a disaster. This doesn’t seem well thought out AT ALL.	2/12/2026 10:03 AM
4404	I would like the district to carefully consider the needs of Preschool Special Education programs as part of the SAP planning process. Currently, Coralwood Center is the only location in the county offering true inclusion and co-teaching as well as small group classes from Preschool (age 3) through Kindergarten. Families who do not live near Coralwood do not have fair access to this same type of high-quality, inclusive early-learning opportunities, which creates an equity gap for our youngest learners. I ask that there be plans to create additional inclusive preschool special education centers in other regions of the county so that all families can benefit from this specialized programming. Several schools slated for closure or repurposing could be transformed into preschool special education centers. Possible regional options include: - North DeKalb: Ashford Park, Kingsley, or Vanderlyn - Stone Mountain Area: Stone Mill, Stone Mountain Elementary, Redan, or Woodridge - Central DeKalb: McClendon or Robert Shaw - South DeKalb: Bob Mathis, which is especially appropriate because it already houses the Preschool Diagnostic South Office and the Audiology Clinic—services that many of our young learners require. Expanding inclusive preschool centers across the county would ensure that families outside the Coralwood zone do not continue to be the only ones benefiting from this unique programming. This would improve access, reduce travel burdens, and ensure more equitable early intervention and support for children with special needs. I sugeest that the Coralwood program be relocated to a larger building so that more students can benefit from its unique Preschool –Kindergarten inclusion model which is the only place that Dekalb provided inclusion from Preschool 3 all the way through Kindergarten in one building. Other students must bounce around from one place at P3, then co-taught PreK somewhere else and then on to Kindergarten at a third location. Coralwood currently provides one-of-a-kind services in the district and is a model for the state, but space limitations restrict how many children can enroll. Because the district is considering school closures or repurposing buildings, it be possible to move Coralwood into a larger site—such as Midvale or Brockett—so the program could serve significantly more students in inclusive and small-group settings from P3 through Kindergarten. If it is not feasible to move Coralwood into a bigger building, the Coralwood model should be duplicated else where in the county.	2/12/2026 10:02 AM

4405	Not sure how Ashford Park Closing could be absorbed into Montgomery & Huntley hills. Montgomery renovations are desperately needed but expanding capacity seems problematic for Ashford Dunwoody road to handle. Also Chamblee middle & high are at capacity is my understanding so expanding capacity at Montgomery seems concerning. Also, what is plan for old Nancy Creek / Kittredge site? Serves same area ideally but not used for this area currently.	2/12/2026 10:01 AM
4406	I can understand the need to close schools. I work at Evansdale and the school is small, which from my perspective, is one of its strengths. It also has a long history and is clearly beloved by its community and features special programming that should be maintained. At the same time, I recognize that the building is old. I would like a move that respects the programming and community of the school while offering a potentially better facility. My children also attended Montgomery ES, which I see is slated for expansion. It is a lovely school and the county should consider the needs of this community, too. I know that building also needs updates and that parking in particular is an issue already at Montgomery.	2/12/2026 10:01 AM
4407	Small schools are always better for the students. The students always come first. I have worked in huge schools and I have worked in small schools. The outcome is always better for the small schools.	2/12/2026 10:00 AM
4408	I support the overall proposal. I am however concerned about where students who attend Henderson Mill ES will be placed.	2/12/2026 9:56 AM
4409	1) Concern that some of the closures, particularly at the elementary school level greatly impact are most underserved students and English language learners 2) The scenarios do not show what school students would be moved to and how this would affect transport times, community etc 3) Evansdale has French immersion program. What will happen to that program if Evansdale closes. 4) Scenarios do not include movement of student support services. 5) What will happen to all of teachers and staff with the closures? 6) Enrollment is expected to continue to decline even after scenarios are put in place. what is long term plan to account for that or address why people are leaving the district 7) What are the proposals for the buildings that closed with no school that will be moved into that building?	2/12/2026 9:56 AM
4410	After review, I think the options presented to make sense and consolidating/closing to provide better care for the students is the best next step.	2/12/2026 9:55 AM
4411	I do not understand how the data justifies closing 3 feeder elementary schools to Lakeside High School. It is over capacity, and the largest high school in the district. None of the elementary schools has an excessive number of open seats, and Briarliake Elementary School has trailers to address the overcrowding.	2/12/2026 9:55 AM
4412	I Have no feedback on the initial facilities scenario.	2/12/2026 9:55 AM
4413	As a Vanderlyn parent, I’m disappointed to see it on the list. It is an incredible, community school that provides such a wonderful experience for these kids. It seems like the elementary school level reconfiguration aims to increase the kid count per class. If that is the case, unless the classes would be given more than 1 teacher, that would be detrimental for the kids and their ability to learn/absorb.	2/12/2026 9:54 AM
4414	You're telling me that the same person who wrote "Forecasted enrollment shows that by 2030, we will have 20 elementaries worth of excess seats. Converting 5 middle schools to middle schools, gives us at least 10 elementaries of excess seats. This scenario closes 25 elementaries." is the same person proposing to close Ashford Park ES. Someone needs a math lesson.	2/12/2026 9:53 AM
4415	My daughter attends Vanderlyn and has thrived tremendously. I am concerned that altering this will not only affect her but also all of the students in the school which is relatively small but appropriately enrolled.	2/12/2026 9:52 AM
4416	Closing Ashford Park Elementary would have a deeply negative impact on our family and on the Brookhaven community as a whole. Ashford Park is more than a school building—it is a cornerstone of our neighborhood, a gathering place for families, and a critical factor in why many of us chose to live, invest, and raise our children here. The proposed closure would disrupt students’ academic continuity, increase commute times, and fracture established relationships between students, teachers, and families. These disruptions disproportionately affect young learners, for whom stability, familiarity, and community connection are essential to success. Any short-term financial or logistical efficiencies gained through closure would come at the expense of student well-being and long-term educational outcomes. Additionally, Ashford Park Elementary plays a significant role in supporting Brookhaven’s broader	2/12/2026 9:51 AM

	community health. Strong neighborhood schools directly impact property values, community engagement, and local economic stability. Closing a well-supported school undermines trust in the district and sends a concerning message to families who have consistently shown up for their school through enrollment, volunteerism, and advocacy. I respectfully urge the district to reconsider this recommendation and to engage more deeply with families, educators, and community members before moving forward with a decision of this magnitude. We ask for transparency around the data used, exploration of alternative solutions, and a genuine commitment to preserving neighborhood schools where possible. Ashford Park Elementary deserves thoughtful investment not elimination. Our children, families, and community deserve better than a decision that prioritizes short-term restructuring over long-term impact.	
4417	I believe the school cluster grade bands should stay the same as it is now. Prek-5, 6-8, 9-12. Also, all schools should put ESOL kids in one class and all non ESOL kids in a separate class. It's not fair to either class to be integrated when they don't share the same language and the the students are the ones who suffer. For example when my oldest son was in kindergarten at Kingsley he was in a class full of ESOL kids and he spoke fluent English. He was put in the back of the room at a table by himself because the teachers were solely focused on teaching English to the ESOL kids. That's not ok, fair or right to do this to any child. I've heard the same scenarios at Peachtree Middle and Dunwoody high as well.	2/12/2026 9:50 AM
4418	From a broad brush-strokes perspective, the general approach of closing some and converting others seems appropriate. However, some of the schools listed for closure are some of Dekalb's highest performing and most crowded. If the criteria for closing an elementary school is 1)underutilization due to excess capacity in the area along with cascading use or 2) low educational adequacy and is in close proximity to schools with excess capacity or planned additions, then I don't understand why schools like Ashford Park Elementary would be considered for closure. It consistently performs high academically, has some of the lowest teach turnover in the county, and is currently in the midst of a $24 million expansion project to make room for all the students currently enrolled and expected in the coming years.	2/12/2026 9:50 AM
4419	Ashford Park Elementary School has provided my children with an amazing education and German Immersion. It would be a disservice to move them out after having several years in the program. It would be unfair to the children.	2/12/2026 9:49 AM
4420	My initial feedback brings up more questions. I understand this district is facing difficult financial realities. I recognize that declining enrollment creates real budget constraints. I also understand that you cannot make decisions that please everyone. But WHY is enrollment declining? Is the decline primarily demographic? How much is due to families choosing private, charter, or homeschool options? How has the recent state voucher program impacted our enrollment projections? What will be the average increase in bus times? How will we support students during transitions? How will staff retention be handled? How do we prevent further enrollment loss due to community disruption? Even if that funding is outside this board's control, how are we advocating at the state level for policies that stabilize public systems? If families are leaving for specific reasons, closures address the financial symptom — not the cause.	2/12/2026 9:47 AM
4421	Consolidation is necessary in this time of declining enrollment. There are many buildings that are in atrocious condition.	2/12/2026 9:42 AM
4422	I noticed that the schools that would be impacted are schools that are within South DeKalb County and the schools statistically have students who derive from under resourced homes and could benefit from schools that are within their community that parents and students can get to and minimizing class size benefits students.	2/12/2026 9:40 AM
4423	DO NOT CLOSE ASHFORD PARK ELEMENTARY. If the school is over capacity, how does this help at all? This is an amazing school that is part of our community. Where will all of those kids go?? We were told the school would be renovated not closed. This is very deceptive.	2/12/2026 9:39 AM
4424	I am definitely happy that Sagamore Hills is not currently in the consideration for closing, because we love walking our son to school and look forward to doing the same with our daughter once she is enrolled at SHES. We also love our principal, Ms. Freeman, who has done an incredible job turning the school around. SHES has an incredible community of parents and neighbors, a lot of whom went to SHES 20+ years ago, and still support the school even though their kids have long since graduated.	2/12/2026 9:38 AM
4425	I understand there are many moving pieces and various issues that may be unresolved, but the presentation of this information is very confusing and I work in education in a nearby	2/12/2026 9:38 AM

	district. Also, I did not see Druid Hills Middle on the chart?	
4426	I am very concerned about the proposed consolidation scenario, particularly as it relates to elementary schools. Smaller, neighborhood-based schools provide a sense of community, safety, and personal connection that is incredibly important for young children and families. Moving toward larger, consolidated facilities risks losing that close-knit environment. My biggest concern is class size. If consolidation leads to classrooms of 30+ students, that directly impacts instructional quality, individual attention, classroom management, and overall student experience. Early elementary education especially benefits from smaller class sizes and strong teacher-student relationships. Neighborhood schools also serve as community hubs. Families walk to school, parents volunteer, and children build lasting friendships within their local area. Consolidating schools may increase transportation times, reduce parent involvement, and weaken those neighborhood connections. While I understand the district must consider enrollment trends and facility usage, I strongly urge decision-makers to prioritize educational quality, manageable class sizes, and preservation of community-based schools when evaluating consolidation options. I would also appreciate clear projections showing anticipated class sizes, transportation impacts, and how student support services would be maintained in larger consolidated settings. Please carefully consider the long-term academic and social impact on students before moving forward with consolidations.	2/12/2026 9:37 AM
4427	I understand the need for APES to move to a new location due to space and size constraints, but I want confirmation the students/district line will stay the same and the students will not be broken up or moved to a lower performing school. If the school is closing, why is the county investing $20M+ renovation that is not going to change the building quality or the fact that it would close on this proposal.	2/12/2026 9:36 AM
4428	I don’t love it. Vanderlyn is a great school that provides an amazing education. Closing a top performing school doesn’t make logical sense. You should replicate their success instead.	2/12/2026 9:36 AM
4429	I need more information on how elementary schools will be consolidated. For example, which specific schools would be consolidated into a new building or in a repurposed middle school building? I do support Henderson Mill ES being closed. Long overdue. What considerations are being given in regard to support staff and itinerant employees with facility planning? We are constantly without workspace in the buildings I work in. There are so few offices and storage spaces. That needs to be taken into consideration along with "seats for students." There is a lot of talk about supporting mental health for students these days, and yet there are no confidential or private spaces for professionals to work with them.	2/12/2026 9:36 AM
4430	I support consolidation as long as the accountability to support and supply the needs of all learners does not falter. Specifically, that the allocations of funds are not disproportionally distributed to certain clusters only. In addition, overcrowded educational institutions pose multi-faceted concerns and should be addressed proactively.	2/12/2026 9:35 AM
4431	If you close Ashford Park ES (already over 100% capacity), where will our kids go? All of the surrounding elementary schools are also over 100% capacity (Montgomery, John Lewis, etc.). In addition, you just started a $25M renovation <6 months ago. This makes absolutely no sense, especially in an area with an expanding young family population. We love being in a smaller community surrounding the school where a significant portion, us included, bike or walk to school.	2/12/2026 9:34 AM
4432	Consolidating resources is important. One thing that's not clear to me -- you've identified specific buildings to transition down the chain, like Towers going from a HS to a MS, but have you considered buildings you could move up the chain? It strikes me that we have some fairly large elementary and middle school buildings that might make more sense as middle or high schools, depending on location.	2/12/2026 9:33 AM
4433	Ashford Park Elementary School is an amazing community based place and this school does need to be expanded but absolutely should not be closed	2/12/2026 9:31 AM
4434	As an Ashford Park parent, my biggest concern is about where my kid will go if the school is closed, and I'm a bit disappointed that at least a few scenarios weren't suggested. I'm very concerned about the community being split up because we've made friends and this is such a big time of development for my child. I'm also concerned about the testing scores at some of the surrounding schools and how redistricting could affect my child's education. I could be open to closing the school as long as the community as a whole stays together in whatever building you choose to move us to.	2/12/2026 9:31 AM

4435	I understand the problem statement you all are presenting. Can you read the three criteria below and explain how that would mean Ashford Park Elementary would be on the close list? That is nonsensical. -Elementaries in areas with underutilization close due to excess capacity in the area along with cascading use. -Elementaries that are appropriately placed and well utilized have proposed facility additions. -Elementaries that have low educational adequacy and are in close proximity to schools with excess capacity or planned additions are proposed to close.	2/12/2026 9:29 AM
4436	Closing Ashford Park Elementary, one of the strongest academic schools in the county with high demand and a very strong culture is an absolute non-starter within this community. I have looked at the data and there is not enough capacity in surrounding schools to support this closure and if the recommendation does not include a new building to house the students in the existing Ashford Park boundary lines this will break up a very strong school community that has performed exceptionally.	2/12/2026 9:28 AM
4437	I understand there's lots of empty seats, but I would rather see redistricting and updates to the older buildings before spending money to build bigger schools. 900 students at one elementary does not build community and provides less opportunity for parent involvement (so many parents, not as many PTA spots). Also, a few very high performing elementary schools are on the closure list. They're high performing because of the neighborhood that surrounds these schools, small class sizes, parent involvement and low teacher turn-over. When my child moved from their high performing 300 seat elementary school to an overcrowded low performing middle 1200 seat school, the teachers were burnt out and dismissive and there were so many issues with student behavior. The larger school also lacked enough resources as far as school counselors and other specialist. The school also made it hard for parents to get involved and volunteer. At our elementary school we had a foundation that helped pay for the specialist and they knew each parent by name. We switched to a small charter for my son's middle school because of this. So in summary, do not close the smaller high performing elementary schools. Update the buildings and redistrict. Keep current those currently zoned for their current school as-is but add from lower performing areas and bus those students in. The families that purchased houses in their current zoned area paid hundreds of thousands. more to be sure they were zoned for this elementary school. Use excess funds to pay for more specialist at each school so this does not have to be paid for by foundations. Many of the lower performing schools do not have foundations, so lack reading specialist, etc. Also, I'm not sure I understand how this plan will address overcrowding at some of the high schools. Our high school is not on the list for expansion and we have 10 trailers and no parking. Students do not get lockers because they do not have enough for each student. What is the plan for the high schools that are not on the list? Even if the elementary schools are closed and bigger elementary schools are built, this wil not change the enrollment numbers at the high school level, even if enrollment numbers go down.	2/12/2026 9:28 AM
4438	The initial scenario to close Ashford Park is a terrible idea. The "purpose" of SAP is to balance the enrollment of schools. APES is overcrowded because it is a great school with a great community - it got overcrowded because people wanted to move here specifically for the school (including my family). I understand that other schools in north Dekalb are also overcrowded - where will the APES students go? How do you propose to close a school without sharing information on where these students will go? Montgomery and Huntley Hills expansions do not help these students - they are too far away from the neighborhoods that feed APES. The correct scenario is to utilize the space at APES to expand to meet capacity - growth in the Brookhaven area isn't slowing down...but will significantly if Ashford Park is closed/rezoned. There will be a mass exodus from Brookhaven and Dekalb County if this happens. We care about our children and are heavily involved in the school (AP Foundation is arguably one of the top school fundraising groups in the state and funds many extras for the school that DCSD does not)...it appears that SAP and DCSD does not care to do what is best for our children.	2/12/2026 9:27 AM
4439	It took me 45 minutes to drive to school yesterday. Traffic past the park/marist or traffic past the hospital/285 is too much. Expanding montgomery - how? It's a 2 lane street with no parking options and can't handle the traffic as it is today. Where would all of the kids from Ashford Park go?	2/12/2026 9:26 AM
4440	Kingsley should not be closed as it's already slated for upgrades and would be foolish to invest money into the building then close it. A better option would be to close Vanderlyn and redistrict those children into Kingsley.	2/12/2026 9:22 AM
4441	Closing Ashford park would be a huge detriment to our community.	2/12/2026 9:22 AM

4442	I would like more detail, such as notional boundaries. I realize that given the sensitivity of the changes, this can be a lightning rod for distracting fights over who goes where. Instead of using sharp lines on the map, perhaps show the potential boundaries as regions of overlap that are perhaps 20 houses wide (or what have you).	2/12/2026 9:22 AM
4443	What a joke these recommendations are. Specifically, why would you close down Ashford Park Elementary School when it is over capacity? Where do you plan to place over 800 students? There is going to be an elementary school desert in the Ashford Park region with surrounding schools already over capacity as well. Not to mention, there will be a mass exodus of families, leaving this area or going to private institutions, l causing a drastic drop in property values and property taxes that now the county cannot count on. While I understand, closing and consolidating other schools that are currently under enrollment, it does not make any sense whatsoever to close Ashford Park Elementary School that is currently over capacity. You should think of the long-term repercussions that will happen as a result of disc closure. As a community, we stand stronger together, and this will not happen in silence, and there will be much noise regarding the closure of Ashford Park Elementary School.	2/12/2026 9:22 AM
4444	Facility scenarios are sound, however Druid Hills Middle School is not on the list at all. Will it remain or close/repurpose?	2/12/2026 9:21 AM
4445	This scenario seems to really adversely affect the Tucker/unincorporated Decatur/Embry Hills area. Midvale, Evansdale, Henderson Mill, and Brockett are all on the list to be closed. Currently we have good class size and student/teacher ratios and if all these schools are pushed into schools like Livsey that already relies on trailers to serve its students, what sort of quality will remain? Henderson MS is a good example of a huge geographic area being pushed into one school and the result is a huge student body and poor quality instruction.	2/12/2026 9:20 AM
4446	You should sell some of the facilities that are shutting down and use that capital to repair/repurpose existing facilities.	2/12/2026 9:19 AM
4447	The School Board continues to disappoint the community and ignore parent and stakeholder feedback. They are leavning open problematic and negligently run schools like Smoke Rise with Tatum. Increasing the number of kids she is leading, and running double the amount of educations. This has caused many to utilize school choice and leave for more well led schools, many of which are now on a closure list.	2/12/2026 9:17 AM
4448	I think it makes sense to close or repurpose underutilized schools, however care needs to be given to move children to like schools with similar community feel and neighborhoods.	2/12/2026 9:14 AM
4449	They are closing high performing schools. This makes no sense	2/12/2026 9:14 AM
4450	Seems like you are taking a stick of dynamite to blow up a problem that requires a chisel. You would be closing 3 of the schools close to me, meaning my future child would be spending extra time on a school bus instead of walking to and from school. Also you would be leaving an eyesore in my neighborhood if you simply tear down the elementary school and close the activity field. It is also unclear why you want to make such drastic changes. Is the budget failing? What other options have you considered (such as reducing administrative bloat)?	2/12/2026 9:14 AM
4451	This makes sense from a population and facility standpoint. It is disappointing, I like the idea of neighborhood schools. Brocket, midvale, evansdale for example. These schools are nestled in these highly residential areas, I like the community aspect of that. However I know that even now families often choose to leave these to school choice into a better performing school the next neighborhood over. But within our family's peer group, these are schools that families want to choice into. *im not personally impacted by these decisions yet, we are at smoke rise now, but are zoned to start Briarlake next year. I'm also concerned about transportation- more buses, longer routes. And more cars at the existing smaller schools.	2/12/2026 9:14 AM
4452	I think finding ways to repurpose schools is a great idea but I do not want the closing of schools to make other schools over-crowded.	2/12/2026 9:13 AM
4453	I understand the need for consolidations if it will improve our facilities, staff retention, improve the schools function all together	2/12/2026 9:13 AM
4454	it makes sense to close some of the schools. I'm struggling to understand closing Oak Grove ES since I understand it is full	2/12/2026 9:12 AM
4455	My first concern is the range of ages of students in the building	2/12/2026 9:12 AM
4456	I think for the longevity of Dekalb - some big and bold decisions need to be made. We have	2/12/2026 9:11 AM

	got to get rid of or repair these ancient buildings so learning can happen. We have to stop gerrymandering boundaries and stop cow towing to the loudest parents. This is what BEST for ALL students in Dekalb. I also think the magnet and lottery programs should be dissolved. Provide these services WELL in large schools. Simplifying things will also make providing bus services MUCH easier.	
4457	If there is a proposal to close Oak Grove Elementary and all or a portion of those students move to Sagamore Hills, is there a concern that the entire school move away from the Lakeside Cluster? Sagamore Hills has always been a focus of resdistricting and parents will not want their students removed from the Lakeside Cluster.	2/12/2026 9:10 AM
4458	My girls went to Sagamore so I'm relieved that this proposes expanding it. I don't envy y'all this process - gonna get complaints from lots of people about the elementary schools especially. It is so special to have these small neighborhood elementary schools - but I do understand the need to consolidate.	2/12/2026 9:10 AM
4459	Why is DCS spending 20 million dollars on Ashford Park Elementary renovations to only close it down in a few years? Such an irresponsible decision.	2/12/2026 9:10 AM
4460	Tucker's small neighborhood schools are an incredibly important peice of our culture, home values, and overall sense of community in Tucker. Over the years we have seen this group of schools consistently targeted for consolidation. What the paperwork and numbers and analysis can't show, is the development of our children and community that these schools drive. Tucker is an extremely diverse socio-economic area and many families do chose to send their children to private school and have the means to do so. But those of us who do not chose to send our children to private school do it because we LOVE the neighborhood schools and the sense of community they foster. If you consolidate the Tucker elementary schools, you should be aware that many families that chose public today, will chose private in the future, because we don't want our children in a 1000 person elementary school. We have the means to go private and we will if we're faced with 1000 person elementary schools.	2/12/2026 9:09 AM
4461	I think moving schools to PreK- 3, then 4-5, then middle grades, and high school grades could be be beneficial for teachers and students.	2/12/2026 9:08 AM
4462	I like the scenario where the grades are combined; however, I would go Pre-K-6 and 6-12	2/12/2026 9:08 AM
4463	I agree that consolidating resources is the most viable path toward long-term stability. By addressing the surplus of seats now, the district can stop "subsidizing empty space" and instead reinvest those millions into competitive teacher salaries and advanced student programming. This scenario moves the conversation from simply maintaining old buildings to actively building a modern educational footprint that matches the district's actual population.	2/12/2026 9:08 AM
4464	It would be devastating to see Vanderlyn Elementary close. The surrounding schools don’t have capacity to accommodate all Vanderlyn students and adding trailers is not an acceptable or safe method of handling the additional inflow of students should Vanderlyn close down. Additionally, Vanderlyn is a high achieving school and increasing capacity at surrounding schools could impact achievement scores among all schools.	2/12/2026 9:08 AM
4465	My student attends Vanderlyn ES via School Choice. What would happen to those that successfully enrolled into Vanderlyn ES via this process? Are the students being assigned via current enrollment?	2/12/2026 9:07 AM
4466	The initial plan prioritizes consolidation of resources over community continuity and while the central and southern districts have population density issues that require the changes, the north would be better served with a different strategy that recognizes the demographic differences.	2/12/2026 9:07 AM
4467	Yall must be some of the dumbest motherfuckers in existence. The fact that you would consider closing high performing schools in order to funnel kids into lower performing schools is quite shocking. The entire education system in the United States is centered around the idea of COMMUNITY SCHOOLS!!!	2/12/2026 9:07 AM
4468	I actually disagree with consolidations. I feel like smaller schools are better for children. I also believe that kids are more comfortable with kids the are from their small communities. For instance if you have a group of kids that English is there 2nd language and not spoken at home, they will do better being with peers in the same scenario. Blending many communities and placing them in larger schools allows for too many children to become unseen. I truly think	2/12/2026 9:07 AM

	you all are missing the point. I understand that money is an issue and that seems like a bigger problem, a problem because our county is simply too large and needs to be broken down.	
4469	If you choose to close ashford park it shows how corrupt and biased you are. A thriving school needs to stay open for our kids futures.	2/12/2026 9:06 AM
4470	I worry that advancing major changes like the proposed scenarios while leadership challenges and community trust issues remain unresolved puts the district at risk of directing significant resources away from more urgent needs. Rebuilding trust and strengthening core operations first would create a healthier foundation for any future change. I understand the three primary tradeoffs being discussed: programs, school size, and cost. If choices have to be made, my priority is clear. First is maintaining manageable school and classroom size. Second is programming. Third is cost. I place cost last because I do not currently have confidence that district funds are being managed as effectively as they could be. I continue to hear about underutilized administrative space and past financial decisions that raise real concerns in the community. Until there is stronger transparency and accountability, it is difficult to support changes justified primarily by projected savings. What matters most to my family is that our children are known. At a smaller school, teachers recognize students, relationships form naturally, and families feel connected to each other. Larger, consolidated schools may look efficient on paper, but they can feel impersonal in practice. Students are more likely to get lost in the shuffle, and daily logistics like carpool become harder for working families. While additional programming can be valuable, it is less important to me than preserving an environment where students feel visible, supported, and part of a real community. I also want to acknowledge my bias. My family is part of the Midvale community, and I am strongly opposed to closing Midvale. The district has recently invested in the facility, including the addition of an elevator, while other schools such as Livsey are still relying on portable classrooms. It is hard to understand the logic of closing a school that has just received significant upgrades. I am also concerned about where Midvale students would be reassigned. What options would keep students close to their neighborhoods and maintain reasonable transportation times for families? I worry that advancing major changes like the proposed scenarios while leadership challenges and community trust issues remain unresolved puts the district at risk of directing significant resources away from more urgent needs. Rebuilding trust and strengthening core operations first would create a healthier foundation for any future change.	2/12/2026 9:06 AM
4471	Neighborhood elementary schools serve a larger purpose than just educating the students. It provides a safe environment where students feel connected to the adults in the building and the students who live close by. Specials teachers and administration are able to learn the names of students and build relationships with them, which means way more in the greater scheme of things than saving money. While things have not always been perfect at Oak Grove Elem., my daughter feels safe and seen there. Creating mega elementary schools will cause students to feel less connected and less important, which will hurt their education and love of learning.	2/12/2026 9:06 AM
4472	Worst idea closing APES. It does not fall under the closure descriptions listed by your committee: not underutilized or underperforming	2/12/2026 9:05 AM
4473	We love the smaller, neighborhood feel of our school + the enrichment with STEM & French. Right now we feel like our kids get everything and with the consolidation while I understand the resources aspect I'm not sure I understand why Evansdale is on the list. Our kids need as much individual attention as they can get especially the younger they are and consolidating feels like a dip in education.	2/12/2026 9:05 AM
4474	I do agree that facilities do need to be upgraded. I do not believe that elementary schools should have more than 3 classes per grade. I do not think that class sizes should exceed 20 students. Briarlake should continue to function with the hearing impaired students regardless of consolidations. The integration and exposure for all our students to kids of different abilities is an amazing and beneficial life skill for all.	2/12/2026 9:05 AM
4475	Completely disagree with vanderlyn closing. Focus the funds elsewhere, but do not close vanderlyn	2/12/2026 9:04 AM
4476	I do t understand the reasoning behind this logic. Closing vanderlyn and putting them in DES (an already overcrowded school) would create a larger problem. Kids with IEPs and 504s will get lost in the shuffle	2/12/2026 9:04 AM
4477	For Ashford Park: Closing a neighborhood school that's at almost 200% capacity seems ill	2/12/2026 9:04 AM

	advised. There is no plan for where these students will go, knowing most of the neighboring schools are at capacity. Without knowing where the boundaries will be, it is hard to understand the decision about closing APES.	
4478	Ripple effects aren’t clear: I need a clearer explanation of how each scenario would affect neighboring clusters, boundaries, transportation, staffing, and program access over time. Disruption from transitions: Closures/conversions can increase school moves and instability, which is especially harmful during middle school years. Transportation burden: “Efficiency” can still mean longer commutes, less time for learning/extracurriculars, and more daily stress for families. Bigger schools ≠ better learning: Larger enrollment may add course options, but it can reduce belonging, increase behavior challenges, and strain student supports if not carefully designed and staffed. Spreadsheet-driven decisions miss reality: Capacity data doesn’t capture school culture, safety, teacher workload, or the day-to-day learning environment—those factors must be weighted heavily.	2/12/2026 9:04 AM
4479	The Vanderlyn community is very upset by the thought of losing our school. We are all very happy with the school and do not want to be rezones. Most if not all of us moved into this zone JUST FOR VANDERLYN! Please reconsider making any changes to Vanderlyn as it would greatly disrupt our community and children's educations.	2/12/2026 9:03 AM
4480	We moved here for our small neighborhood school. If it closes to be consolidated into a larger school we will leave and seek other educational opportunities. Dekalb has in no way proven they can offer educational support properly and I do not imagine that will improve as schools get larger. Smaller class sizes with a community feel and invested staff are the benefits I see at our small school. The county getting more involved and trying to run huge elementary schools will not be efficient and benefit the students. I worry most for those children who have learning differences. Should we talk about how child centered the decision to cut recess time was.	2/12/2026 9:03 AM
4481	I don't agree. I believe that having smaller schools is a plus in the communities involved.	2/12/2026 9:02 AM
4482	Wondering why Cedar Grove high is on the list at all	2/12/2026 9:01 AM
4483	Have you considered what you will do with DeKalb HS tech north programs at Cross keys.	2/12/2026 9:00 AM
4484	Our neighborhood school is a vital community anchor in a growing area. Enrollment is already at or above capacity, and closing it would increase crowding, reduce walkability, and disrupt families. The building needs investment, not removal, and consolidation would harm both students and the long-term health of our community. Our community has a strong connection to the public school system, but there were always be a strong pull towards private/independent schools in our community. I believe it is within the role of the school district to create, deliver and constantly improve the public school offering not as a deterrent to alternatives directly, but to have the strongest possible education offering in the community - because schools really are the center of community, connection and engagement across all that we do together.	2/12/2026 9:00 AM
4485	I'm really impressed with the thought that went into this. It's logical and well explained and the graphic is great for understanding the plan (but Druid Hills MS is missing from all of them!!). I also appreciate the information on why these choices were recommended. In general, I think this is a great idea because from what I can tell it consolidates resources across all areas of the county while keeping kids largely in their existing clusters. I have loved a small ES experience, but I know that a lot of the ESs are way too small to be efficient, and combining two small ones seems like a win-win if it keeps everyone in their same MS/HS cluster. It minimizes transitions for the kids and keeps them with their friends and communities. That is about the best possible school closing scenario! It looks like the same is true for the proposed MS/HS closures. It looks like these plans are not cutting to the bare minimum projections for 2030, which I think is extremely smart. These projects are likely pretty good because they aren't far out, but who knows what will happen in a decade. I assume this will take at least 10 years to implement with all the (presumed) construction, and by then something else could happen that nudges enrollment back in the other direction more than expected. I think leaving some capacity is protective for the longer term. I have a few questions (that I will ask later, but here for thought). Presumably these ES consolidations will require bigger buildings in at least some cases. The 5 MS buildings that are transitioning to ES buildings are pretty straightforward - I assume they could be ready to go with minimal construction or remodeling. But what about the others? Where is the money coming from? What happens to the kids at those buildings in the meantime? Do you move everyone at the rebuilding ES to the other one for a (very crowded) year and then move everyone back when it's built? What sort of options	2/12/2026 9:00 AM

	do you plan for students who are impacted? Can students who are redistricted choose to stay in the school they are currently in until the end (5th/8th/graduation) if they provide their own transportation (assuming the school isn't closed, of course)? That seems like a very easy way to head off a LOT of the complaints. The big issue often isn't that parents are freaking out that their school is closing, it's that their kid is going to be moved away from their friends and community (and the parents are going to be split up from the people who help them with carpools and emergencies). Knowing that they have the option to stay in that school until transition/graduation would, I suspect, really help parents think about the larger picture without panic.	
4486	Absolutely horrible idea. This only makes things worse. It would be catastrophic.	2/12/2026 8:59 AM
4487	These look like good solutions to consolidate resources and improve failing schools	2/12/2026 8:59 AM
4488	This is incomplete... is there any rezoning for schools that are not closing? What about Kitteredge?	2/12/2026 8:58 AM
4489	I have no strong opinions about the facilities, more about the curriculum. I am adamantly against special interest schools such as Kittridge that do not allow all students to experience equitable educational opportunities and believe these need to be closed. With increased enrollment due to closures at other schools, it should be easy to justify offering the same curriculum across the board.	2/12/2026 8:57 AM
4490	It's unclear to me why you would close a school like Ashford Park which has incredibly strong community support. Why would you close schools that are overcapacity as opposed to expanding the school or rezoning. Especially with Ashford Park, we would probably be rezoned for Montgomery which is already over capacity too.	2/12/2026 8:57 AM
4491	I am very sad to discover Vanderlyn on the closure list. I know it is an older building and a small school but it is the heart of our neighborhood. Children thrive there. I find it hard to believe there will be so few children there in 2030 when we have had a huge turnover in our neighborhood alone with plenty of babies in the neighborhood currently. It's also hard to swallow a closure scenario without knowing what that means for the students. There aren't enough seats locally in Dunwoody to accommodate two whole schools closing. Will a large school be built instead to combine the two closing schools? Where would the children be redistricted to otherwise? Many, including this family, purchased a home specifically zoned for VES. Moving two schools into a bigger school I think would be more palatable than redistricting. I know property values are not a concern to DCSD specifically but it will affect families. If redistricting to lower performing school, I suspect those with the means will move their children to private. When more high achieving students are moved out the denominator will affect the overall performance. Vanderlyn Elementary is a vibrant, diverse, and active school. The building is full of kids engaged in a variety of experiences in the classroom as well as specials. Our testing data shows that our kids continue to thrive academically. We have a highly engaged parent population. The location of the school related to the homes it serves makes transportation easy and it allows kids to build community well outside of the school experience. We walk to and from school every day. My kids participate in several after school activities at the school. The building is safe, up to date, and well maintained. The staff has worked to maximize use of the space.	2/12/2026 8:57 AM
4492	Closing Ashford Park and breaking the feeder from there to Chamblee Middle and Chamblee High is really short sighted and eliminates a top 5% elementary school. It took the community 15 years to bring Ashford Park from middling to excellent. If you are trying to kill property values and break up a cohesive student cohort, you couldn't do worse than this.	2/12/2026 8:56 AM
4493	I agree with combining elementary when needed to larger updated space. More critically, I think Dunwoody High desperately needs space to expand and the Vanderlyn site presents that much needed optio .	2/12/2026 8:56 AM
4494	The initial facilities scenarios provided seem to be clear and well-thought out. I agree and can see the benefits of consolidations.	2/12/2026 8:56 AM
4495	While I understand the need for operational efficiency, the impact to instruction and behavioral health to have 900+ students in an elementary school would be detrimental. The district also needs to immediately address what happens to some of the special programming - our home school (Evansdale) is home to the French Dual Language Immersion program. Where does that program go if Evansdale is closed?	2/12/2026 8:55 AM
4496	It's difficult to project future enrollment because of the very liberal school transfer procedures;	2/12/2026 8:55 AM

	feeder patterns should be removed from the conversation and geographical placement of schools considered; some schools (Livsey for example) are on less than required acreage so I don't understand the decision to rebuild for additional capacity.	
4497	It looks like all closures are in the same general area. I'm on the other side of the county, so I'm not very familiar with that area, but it looks like mostly the south-eastern part of the county will be affected. I have to assume the Board and others in charge of this decision have run the numbers and are not just making access to education more difficult for a certain population.	2/12/2026 8:54 AM
4498	Our family chose to settle in the Vanderlyn Elementary community because it represented the kind of school environment we believed our child deserved. From the moment we arrived, it became clear that Vanderlyn is more than a school. It is a place where families are woven into the life of the building, and we have been proud to take part in that. We contribute in the classroom, support events throughout the school, and stay connected through the PTO, which gives us opportunities to help shape the school's future. Principal Clayton has been an important part of this experience. His commitment to welcoming new families and actively recruiting students has strengthened the sense of community and ensured that the school remains vibrant. For us, Vanderlyn has become not only a place of learning but a genuine home. Vanderlyn also stands out for its academic strength, which is precisely the kind of excellence DeKalb County should strive to preserve. The school continues to post strong performance numbers, including an 81 percent proficiency rate in math and 74 percent in reading, supported by a 12 to 1 student teacher ratio that allows for more personalized instruction. As the district moves through the Student Assignment Project, leaders have made it clear that the current list of possible closures is only an early stage meant to generate conversation, not final decisions. With that in mind, it is important to recognize that closing a high performing, community-anchored school like Vanderlyn would be counterproductive. Schools that are academically strong, deeply supported by families, and led by engaged administrators already embody the goals the district is aiming for. Protecting a school like Vanderlyn is an investment not only in its students today but also in the long-term stability and success of the wider community.	2/12/2026 8:53 AM
4499	At first it's hard to imagine how the building closures will impact local communities. Ashford Park is going to be a topic of discussion as so many people live in the area for that school or bought their house for that reason. Much like we did to attend Montgomery. It would be good to see the scenario post closure/repurposing to better understands what could happen if a particular school closes.	2/12/2026 8:53 AM
4500	Regarding Ashford Park - I don't see how this solves the overcrowding problem. It's just going to overcrowd the surrounding schools - John Lewis and Montgomery. Why not rebuild Ashford Park. This is one of your top performing schools with a community that supports it and your suggestion is to close it?	2/12/2026 8:53 AM
4501	You have schools marked on this list for eventual closure and merging which have higher scores than schools you have already performed a merge with. Your latest architectural plans instituted for the elementary level are not designed to accommodate the projected enrollment at those schools. Gyms, auditoriums and cafeterias are all too small to handle the high numbers of enrollment during the school day and for any events for parents to attend.	2/12/2026 8:52 AM
4502	I think it's fine overall if it helps spread resources, but please keep Oak Grove!	2/12/2026 8:51 AM
4503	I have serious concerns with closing Ashford Park and the effect this will take on future cascading. Where will students move to for Elementary School? What would that mean for High School. This is an excellent school with above average parent involvement and closing this school would have a huge negative impact on the children affected.	2/12/2026 8:51 AM
4504	I understand the need to consolidate resources, but I'm deeply concerned that creating "mega" elementary schools with 900+ students in each will greatly reduce the individual care each child receives. Our three children attended Brockett Elementary School, which has a diverse population (including many ESOL students) and an excellent staff who has created a space tailored to meeting the specific needs of this community. Losing the ability to send our kids to neighborhood schools would be a great loss to then entire community and connection built within our communities.	2/12/2026 8:51 AM
4505	It's a bit outlandish to consider closing 28 schools. I understand closing some and adding more to under enrolled schools but not schools at capacity. As a family that attends Ashford park, we love our school and its community. It's full of amazing teachers and admin that work hard to teach our children while maintaining a safe, loving, and educationally enriched	2/12/2026 8:51 AM

	environment. I know the building is old which is why updates are being made. If the county chooses to close Ashford Park, it would be in the best interest of the county to relocate the ENTIRE neighborhood to another school together. Otherwise, you will have a significant drop in enrollment and your negative trend of under enrollment will continue. Families in this neighborhood will choose private school over an underperforming school any day. We have the means and will do what's best for our children.	
4506	Vanderlyn Elementary should remain open because it is one of the district's strongest academic assets. The school consistently delivers high student achievement, with proficiency rates of 81 percent in math and 74 percent in reading, placing it well above many surrounding schools. Its 12 to 1 student teacher ratio allows for individualized instruction that supports a wide range of learners. The Student Assignment Project aims to balance enrollment and increase access to high quality educational programs, and closing a school that already demonstrates exceptional performance would work against those goals. The district has emphasized that these closure considerations are only early conversation starters, which underscores the importance of strong community feedback during this phase. Vanderlyn is also a deeply rooted part of the Dunwoody community. My family moved specifically to be in the Vanderlyn district, and since then we have made it our home. We volunteer in our son's classroom, support schoolwide events, and are heavily involved in the PTO because we want to help strengthen the school for future generations. Community involvement is already one of Vanderlyn's strengths, and initiatives like the annual VanderDash continue to raise funds that support meaningful improvements for students and staff. Principal Clayton has also done an excellent job recruiting new families to the school and ensuring that Vanderlyn remains a welcoming and vibrant community. Closing a high performing and community anchored school would disrupt not only student learning but also one of the district's most engaged and supportive school communities. Vanderlyn represents exactly the kind of strong neighborhood school DeKalb should be committed to preserving	2/12/2026 8:51 AM
4507	I am concerned that these were not explained in a clear way. I have a PhD and I found some aspects of the explanation unclear. Overall, the scenarios seem logical. But most people's feedback will stem primarily from whether their child's school is affected. It's not obvious to me that the schools my children currently or will attend are affected, so my feelings aren't strong around this. I agree that DCSD should explore how to best allocate its resources and overall, see no problems with these plans--save for explanation to the public.	2/12/2026 8:50 AM
4508	I am not thrilled to hear that the elementary school in my area-Midvale and the school my child currently attends are slated on the close or repurpose list. Oak Grove is an amazing school and parents have put a lot into that school via facilities and extra after school class activities. I am sure there are other schools that are not performing well that could be or should be closed instead of a school that provides excellent education.	2/12/2026 8:50 AM
4509	Do not understand the closure of Ashford Park. A true neighborhood school. John Lewis was built to reduce overcrowding and now we're just moving it from one school to another. There was no attempt to alleviate the growth in APES.	2/12/2026 8:47 AM
4510	I am not happy with this at all. Closing the school our children attend, which is a high performing school that factored into our decision to buy our home, would likely cause us to withdraw from DCSD altogether. I'm assuming many other families feel the same. Additionally, this would cause financial hardship due to the loss of value our home will have if we are zoned to a different, poorly performing school.	2/12/2026 8:46 AM
4511	Go for it, but you need to address the traditional inequity between the "good" schools in DeKalb and the "bad" ones.	2/12/2026 8:45 AM
4512	Chapel Hill ES has an aging issue.	2/12/2026 8:45 AM
4513	More clarity around where kids would be moved from schools that will potentially be closed/repurposed would be helpful. Through the lens as a Kingsley parent, I understand the building is old and has several major issues that need to be addressed. When combined with low enrollment numbers, its obviously a candidate to have changes made. But losing the small neighborhood school is certainly a blow to many families.	2/12/2026 8:45 AM
4514	I have concerns with younger kids in middle grades mixing with high school student. I think the facilities should remain the same for each grade level.	2/12/2026 8:44 AM
4515	While I understand the need to consolidate, what happens to specific programs within elementary schools scheduled to close? We are part of the Dual Language Immersion program	2/12/2026 8:43 AM

	at Evansdale, a school scheduled to close, so what happens to that program? It is meant to continue into Henderson Middle and then we were excited for our child to have the advance French options available at Lakeside. What are the plans for such a program if Evansdale closes? There is no other equivalent beyond the Globe Academy, which doesn't have enough spots.	
4516	I think it would be a mistake to close a school rated as high as Vanderlyn when other schools in the area don’t perform as well.	2/12/2026 8:42 AM
4517	I'm confused as to how some of the facility choices were made - for example, Hawthorne's building is basically falling apart, but that will stay and Stone Mountain, which is still considered brand new, will close? That seems like a waste. For Briarlake to expand, there will have to be a sizable addition or new building built, so what would the property lose? Green space, the playground, already severely limited parking? I understand that Coralwood is not considered in this scenario, but given the smaller audience served and the huge plot of land, could Coralwood not move to another building and have one of the expanded schools at that location?	2/12/2026 8:41 AM
4518	Too many school closures	2/12/2026 8:40 AM
4519	For my area of town, the proposal to close Oak Grove but keep Sagamore and Briarlake Elementary makes no sense. Those two schools have no room to expand and Briarlake is on a very busy street - impacting student safety and the inability to expand/negatively impact the community with construction. While Briarlake received a HVAC system last year, that does not make it a better school to support over Oak Grove. Oak Grove just improved its playground and added turf, the foundation is extremely active and classes are full at the lower grade levels. Transitioning these types of resources to a school with up to double the amount of students would not be impactful and give the same resource experience Oak Grove students are familiar with today. People move purposefully to be zoned for Oak Grove Elementary away from Briarlake and other DeKalb schools. Additionally, no information was provided on how students would shift to other schools and how those schools would accommodate the increase - if this puts students in trailers, the committee is failing to provide a strong future for DeKalb schools.	2/12/2026 8:40 AM
4520	I appreciate the due diligence thats being taking with this initiative. Consolidations are necessary to maximize our resources and to build a better Dekalb.	2/12/2026 8:40 AM
4521	My children went to Oak Grove ES (early 2000s) and the community still raises considerable funds for the Foundation. I'm concerned about it on the list, partially due to housing value drop. However, the bldg is now old. Is the building age a factor?	2/12/2026 8:40 AM
4522	Looks well thought out and reasonable.	2/12/2026 8:39 AM
4523	This is a terrible plan, DeKalb. I love working at a school where I know all the students. It provides safety and community that you can’t get from a giant elementary school. Instruction is better because we can effectively utilize small group instruction, especially for support staff. What will happen with all of our jobs in this case? There has to be other solutions.	2/12/2026 8:39 AM
4524	I am concerned about closing 2 schools in the Dunwoody cluster and the capacity issues that would arise at Dunwoody ES and Austin ES. Chesnut is already over capacity, so there are even more students that will need to be absorbed.	2/12/2026 8:39 AM
4525	Consolidations are important but need to be sensitive to the relationship between the school and the community when the school is above capacity.	2/12/2026 8:38 AM
4526	Going from 5 elementary schools to only 3 in Tucker seems extreme. Especially if the only upgrade is to Livsey, which would absolutely need to happen first. Idlewood was supposed to get an upgrade, and that seems to have been taken off the table. Smoke Rise is now over capacity, and I don't see upgrade projects on the docket for them. So it's confusing how this would work. The Tucker community is growing. If you look at the housing forecasts/needs done by the city council you would see this. Once some older residents age out, these homes will very likely be filled with young families.	2/12/2026 8:38 AM
4527	Good to keep Chesnut open and to expand the school	2/12/2026 8:38 AM
4528	ES are the main reasons a lot of kids are pulled out from MS/HS. Parents rather homeschool instead of incessant calling on them by schools and forcing diagnosis on the kids. This must	2/12/2026 8:38 AM

	be reviewed. A lot of parents are opting out of schools after ES for peace of mind. Then try again in HS.	
4529	Montgomery is already way too large and classrooms are at capacity (27-30 in a k5 and 1st grade class with one teacher is too large. How will closing these 29 elementary schools help adjust resources to overcrowded areas? Is there a way to put more facilities or a new smaller zone near the 1,000 student Montgomery?	2/12/2026 8:37 AM
4530	First, thank you for the work that has been done and the thoughtful communications. Much better than what has been presented in the past. In isolation the proposed closures make sense however, I'm struggling with how this is being discussed in pieces. These decisions don't exist in a vacuum. We know closing schools is necessary, but this will also change boundaries, move programs, and affect families in ways that can't be fully assessed without seeing the full picture. Timelines matter too—saying this will take six to eight years to fully implement isn't enough without more specific milestones. It's hard to weigh the proposal when we don't know where the train is actually going. I would like more information to be presented outside of just the facilities so we can truly give feedback. It seems a bit sneaky to only provide in phases. I would ask that no building closures be voted upon until more information is presented.	2/12/2026 8:37 AM
4531	I don't know what the term "educationally adequate" means and if this is applied only to school facilities or to student outcomes also. I think consolidations are a good idea. I think redistricting is the hard part	2/12/2026 8:36 AM
4532	Please DO NOT close Ashford Park Elementary. This school has a very strong community and is very successful. And you are about to spend millions of $$ into renovating it - why would we do that and then not continue to use it as a school?!	2/12/2026 8:36 AM
4533	Closing the elementary schools in the Dunwoody cluster feels particularly short-sighted. Just a few years ago these schools were overcrowded with far too many portables. Enrollment dropped due to covid, but has been increasing most years since then. The forecasts of stagnant and declining enrollment just feel wrong, and doesn't represent what we're seeing locally.	2/12/2026 8:36 AM
4534	The school board are IDIOTS, the idea of closing one of the highest academic elementary school like Ashford Park which is currently over capacity is just unthinkable, its a land grab as the land if very $$$	2/12/2026 8:35 AM
4535	This seems like a severe overstep, which will abandon a large number of facilities and force more people into alternative school scenarios. As a child on an IEP, it makes me fearful for retaining the relationships and proper accommodations for my child	2/12/2026 8:35 AM
4536	OGE is the only reason my husband and I relocated to Dekalb County. Our 2 children are thriving at Oak Grove because the teachers and staff are the most dedicated team our kids have experienced. The small classroom sizes contribute to quality of instruction. And the OGE parents are involved and committed to uplifting the staff, in order to keep our students as our collective priority. We operate as a family at Oak Grove by helping each student in the way he/she needs. By closing OGE, many families will withdraw and move to other districts or go to private schools. This will deprive the county of hundreds of thousands of dollars in school-specific support. And it'll strip away the comfortable home away from home that my children have come to love, and where they're excelling beyond our expectations. Closing OGE would be an astronomical misstep.	2/12/2026 8:34 AM
4537	great	2/12/2026 8:32 AM
4538	Seems like a bad idea. I understand that declining birth rates is leading to an anticipated decline in student enrollment. However, Atlanta is projected to be a migration destination over the next several decades due to climate displacement, with projections anticipating population booms. Resource allocation being thin due to too few students seems like a solvable problem with allocation as opposed to consolidation.	2/12/2026 8:32 AM
4539	The biggest thing that I care about is the potential for Oak Grove Elementary School being closed. It and Sagamore Hills Elementary School are both near capacity. I am guessing that if it is closed, kids will get pushed to Briarlake and Sagamore Hills. There is potential that some kids at Sagamore Hills could then get redistricted to other schools that are in the Druid Hills cluster. That would be a very poor outcome for our family. The Leafmore neighborhood is a Lakeside neighborhood and we are within a mile of the high school. Our kids should stay at Sagamore and be able to head towards attending Lakesdie.	2/12/2026 8:32 AM

4540	While I understand that there are opportunities to consolidate. Closing Ashford Park ES is not the solution. John Lewis is also at or close to capacity. John Lewis is also in the lowest tier performing schools in the district. You would be moving kids from a successful environment and reduce the opportunity to excel. Also John Lewis would qualify for the voucher program which I would use to ensure my kids get the best possible outcomes.	2/12/2026 8:32 AM
4541	Horrible call. There has to be alternate solutions other than consolidating multiple schools into one. I do not want my child going to elementary school with 1000+ students. I love that all the teachers know her. Briarlake has a wonderful, small community culture that should not be expanded.	2/12/2026 8:31 AM
4542	I am concerned about the closure of Bob Mathis and how that will negatively impact Preschool Diagnostics and the Audiology department. Where will these departments be moved to/housed? I do not live in Dekalb and already have a long commute to work. By shutting down some schools, it has the potential to impact my location of work for preschool diagnostics and therefore give me a longer commute to work. That will make me really consider resigning my contract and continuing to work for Dekalb. I'm also wondering what will happen to these schools that are going to be closed. What will happen to the property and property value of the houses? I love the small, neighborhood elementary schools! I worry that creating larger schools will lead to more teacher burn out, especially if the schools have poor/weak administration.	2/12/2026 8:31 AM
4543	I am devastated to hear Vanderlyn may be closing. We have been very happy here and it is a great resource for the community.	2/12/2026 8:30 AM
4544	Families (WE) have invested SIGNIFICANT amounts of money to live in an area where the ES is a highly rated school, with teachers & community that care about our kids, & a feeder MS/HS that meet our expectations. Closure of Ashford Park is a significant NEGATIVE impact to the community.	2/12/2026 8:30 AM
4545	looks good to me	2/12/2026 8:28 AM
4546	I think this is all a big mess. What happens when schools become overcrowded? Smoke Rise Elementary school is already maxed, and the leadership at that school is horrible. You all make these decisions based on financials, but are not looking at the broader picture. Class sizes matter in the education space, and it is ridiculous that you all are ok with teachers having 28-30 kids in their class, without any additional supports. This is not equitable, and I don't see how it is sustainable long-term. Families are going to begin to make a mass exodus from public schools, and teachers will continue to leave the district in droves because they are overwhelmed. You all need to consider more than just numbers, and look closely at the leadership running some of these schools. Smoke Rise is a big mess, and no matter how much parents complain, you all continue to be tone deaf in addressing the problems. Closing more schools, adding more students to fewer buildings is only going to further make the problems we see now even worse. Our children and teachers deserve better than what they are getting. Also, you all seem to be very quiet about how these changes impact existing magnet school programs. It would be good to be able to see all the scenarios at the same time, so families may plan accordingly because we don't trust DCSD to make the best decisions for our children. Families opt into school choice because their home schools are not allowing students to thrive, and the more you remove options, the more seats will continue to be vacated. I for one wish that my tax dollars follow my children, whether that be in public schools or private schools.	2/12/2026 8:28 AM
4547	For our family we have had children at Austin and Vanderlyn Elementary. We moved to Vanderlyn because of the poor experience at Austin. Of all the ES in Dunwoody Vanderlyn has the reputation for the most family and community focused, you won't be able to recreate that culture. I would consider closing Austin first, then Chestnut of Kingsley, but Vanderlyn would be the last on the list. A school is much more than just a building and facilities, it is a culture and that culture has the greatest impact on learning.	2/12/2026 8:28 AM
4548	not completely enough information on how the consolidation happens. For instance, my children went to Evansdale. The 5 ES schools close are Pleasantdale, Evansdale, Livsey, Midvale and Henderson Mill. 3 out of 5 would close which seems like Pleasantdale gets Evansdale but what about the rest? Livsey is small, how do the ES translate to MS and HS/	2/12/2026 8:28 AM
4549	Impacting property values in Ashford Park, these families will likely move or send to private further exasperating the educational divide in DeKalb county. Can Ashford Park be expanded? what is the root cause of why the student Population is declining? Possibly because the	2/12/2026 8:27 AM

	school district is not run properly? Address the root cause don't just impact the high performing school where the bulk of your tax dollars are collected. why are the poor performing schools doing poorly? Reward those who care about education and address the gaps in poor performing areas.	
4550	What would happen to the empty buildings? Newly built schools are huge while the older buildings aren't. Move some students from nearby schools to the larger schools where needed.	2/12/2026 8:27 AM
4551	Initial takeaway is that this makes sense. But my question would be will there be any effort to keep students in their current high school zone (if the HS remains), even if their elementary school may close or change.	2/12/2026 8:27 AM
4552	It feels reasonable. I imagine a lot of families will be nervous, but I'm keeping in mind that this will be a a slower transition and not all at once.	2/12/2026 8:26 AM
4553	This is very concerning considering Ashford Park as a school has excellent test scores and huge parent involvement. It is an extremely tight knit community and closing the school rather than investing in expanding would cause a lot of families to go private. People move to Ashford Park and Drew Valley for the school.	2/12/2026 8:26 AM
4554	We absolutely love the neighborhood elementary school. From a safety perspective, it is not located on a busy street & it is easily walkable. The school has a TON of parent involvement & most people have moved to the area in order to specifically attend this school. It would be crushing to the community to close it.	2/12/2026 8:26 AM
4555	I do not agree with closing ashford park elementary, given that whole overcrowded and old, it still maintains the highest of educational standards. Where would these children be moved to? What about the children in the German program?	2/12/2026 8:26 AM
4556	I strongly oppose the closure of Vanderlyn Elementary. Vanderlyn is a community school which is embedded within local neighborhoods its serves. It's important to the students, families, teachers, staff and administration it includes and serves. It also continues to produce positive outcomes for students. Closing it and moving it students would remove a bright spot in this county's system. I'm convinced any closure would produce worse outcomes for all stakeholders.	2/12/2026 8:25 AM
4557	These scenarios don't outline how buildings will be updated/reused. For example, Vanderlyn is on the list, but that only benefits the community if Dunwoody High is districted to expand into that space. Also, knowing where those students will go (get split up versus move in a block) makes a big impact the community impact.	2/12/2026 8:25 AM
4558	I don't understand the proposal to close Midvale, Henderson Mill, and Brockett Elementary Schools. Where will students in this area attend? Livsey already has trailers outside. This suggests insufficient capacity, not excess. This area is getting younger as older residents sell their homes. There is no way that Livsey will be able to support the demand.	2/12/2026 8:24 AM
4559	I believe that what needs to be done will be done. But there is clearly no consideration or priority for preserving the communities on the southside of the county. Entire clusters of schools being closed while entire pockets of the county are untouched on the north end gives the perception that the district is only prioritizing certain demographics.	2/12/2026 8:24 AM
4560	I do not agree with or believe this should be done. Multiple elementary schools exist for a reason. Tearing these communities apart would have negative long term effects in the communities and neighborhoods. Making kids leave a place where they are already comfortable learning and forcing them into a new environment will have negative impacts on their learning as well as friendships.	2/12/2026 8:24 AM
4561	Just make sure all consolidations are fair and equitable	2/12/2026 8:24 AM
4562	Terrible. My daughter has thrived at Vanderlyn, and the IEP resources have been great, and with dyslexia ADHD and speech issues, she's been able to get a 98%tile in math and reading. The community is amazing, everyone helps everyone. Small is what works for my daughter, but the school is filled to capacity, and has the highest academic ratings of all the dunwoody elementary schools. If we got redistricted, we would change to private school, and I have a son that wouldn't start (currently 3). It would be bad for Dekalb, dunwoody, and Public schools to shut the top academic and full school.	2/12/2026 8:23 AM
4563	I think it's a good place to start, however it would be nice to know for each school that's to be consolidated or closed where their students would be going. Also, the staff that are working at	2/12/2026 8:23 AM

	these proposed closed facilities what will happen to them?	
4564	We absolutely cannot close oak grove elementary. It is a beacon of our community and a beloved school. It is a reason people buy homes in this part of Dekalb county and would be a huge miss for the county to eliminate the school. There would likely be a mass exodus of families paying taxes in this county and supporting this school district. Oak grove elementary is a distinct reason of why people buy homes in this area (that contribute taxes to the county) and closure of this school would diminish that.	2/12/2026 8:22 AM
4565	The fact that you want to close oak grove elementary and move it to another land locked school of sagamore. Or a school on a major road of briarlake and lavista is completely incomprehensible. I bought my house specifically for this school and there is so much latent and foundation involvement in this school that it is totally unnecessary and ridiculous to even consider closing it. You will see property value decrease and probably enrollment decline more as people consider private schools because they are upset over your choices.	2/12/2026 8:22 AM
4566	I understand consolidations need to be made; however, I believe Vanderlyn Elementary should NOT be closed anytime soon. Many families, including my own, move into the school district because of the neighborhood feel of the school. It is a cornerstone of our community. In addition, enrollment is certainly high enough that other elementary schools should be considered for closure first before VES. We also have very high test scores and wonderful teachers. If you were to even consider closing or repurposing VES, please do so over a long period with clear timelines for families to adjust their plans.	2/12/2026 8:22 AM
4567	Some of the closed elementary schools don't seem to be in proximity to middle schools being converted to elementary schools. Where are the students from Ashford Park Elementary going to go? Montgomery is over full already and none of the closed schools are near ashford park so those kids would just end up crowding an already crowded school.	2/12/2026 8:20 AM
4568	My biggest worry is the horrific construction that has taken place at schools the past several years and the idea of building on to other schools. New HVAC systems that were installed are so loud that they surpass the acceptable and safe decibel level. New plumbing that is still resulting in ceiling tiles collapsing and flooding onto the floor. Ceiling tiles that are caving in because wires are snapping. This is such a waste of money, and I do not trust new construction to be safe for staff and students.	2/12/2026 8:19 AM
4569	As part of OGE community, I am shocked by this. My family Bought a house specifically to go to Oak Grove Elementary, I am not happy with this. It is one of the best elementary schools in the district!	2/12/2026 8:19 AM
4570	Oak Grove is too important to the whole neighborhood to close. It is the institution that binds everything together.	2/12/2026 8:18 AM
4571	The links in the email do not link to any page with scenarios. It sends me to the Dekalb schools home page. I can’t find it on the SAP page. Can you resend?	2/12/2026 8:18 AM
4572	Listing elementary that are proposed to close and not specifying plan for those schools that would be impacted is not a plan. If things the best “plan” the SAP members could come up with then perhaps the selection process was not adequate.	2/12/2026 8:18 AM
4573	The scenarios make sense. This has been long overdue. People will push back hard, but the boe needs to move forward and class schools for the long-term financial stability of the district.	2/12/2026 8:17 AM
4574	Elementary schools with large populations do not lead to good educational outcomes and contribute to a loss of community. Behavior problems increase when there is a loss of community.	2/12/2026 8:17 AM
4575	Closing multiple schools in the Tucker area seems poorly thought out. At Smoke Rise we were merged with Idlewood and it has been less than ideal. Our children arrive home almost an hour later because of the volume of kids on the bus. My oldest child could not participate in the holiday program because there are so many students they only allowed K-2 to participate. Traffic for drop off in the morning has increased exponentially. It has been a nightmare.	2/12/2026 8:17 AM
4576	First, I appreciate the intent of the proposal. That said there are two key areas that were not considered when proposing the closure of these 27 schools: 1. Performance Data - Communities are not transportable. Great schools are not created overnight. Making these decisions without utilizing any performance data is extremely misguided. We need to preserve the highest performing schools in Dekalb. Performance isn't just test scores. It's also about	2/12/2026 8:17 AM

	teacher retention and student choice - what % of eligible students in the zoned area are choosing to go to a school. When closure decisions are made strictly based on facilities data key data sets are being ignored and great schools and cultures (as well as teachers and students) will be lost. 2. Change Management/Volume of Closures - The volume of changes being recommended here and the long timeline (10 years plus) are not going to optimize to the stated metric of reducing student turnover. This could be bitten off in smaller chunks and still achieve the same outcomes. Looming school closures while other schools are being expanded will lead to teacher and student departures as well as degradation of outcomes for Dekalb students.	
4577	Very opposed to closing Oak Grove Elementary.	2/12/2026 8:15 AM
4578	Looks like this is very well and strategically planned comprehensive plan based on current data and projections.	2/12/2026 8:15 AM
4579	Consolidations are reasonable if this doesn't increase class sizes. I understand that some schools have the space, such as my current school.	2/12/2026 8:15 AM
4580	I do not think Rowland should close. This is a nice school that serves the community well.	2/12/2026 8:14 AM
4581	I believe this could work but we need to also know which schools our children will attend before hand.	2/12/2026 8:14 AM
4582	I think potentially closing Oak Grove would not be in the communities best interests.	2/12/2026 8:13 AM
4583	My initial feedback is the following. The people in the decision-making of hiring Superintendents who are under federal investigation are deciding on what's best for DeKalb parents, faculty, and students.	2/12/2026 8:13 AM
4584	My child attends Kingsley and I understand the need to close the school due to high maintenance costs. But from what I see, they will either be shifted to Chestnut or Hightower, which are very old buildings as well. If we must close Kingsley, I would hope our neighborhood (Fontainebleau) gets shifted into the Chestnut district as its logistically easier than Hightower. Getting to hightower in the morning from our neighborhood would be a nightmare. It would also keep us in the Dunwoody community with friends and not another city (Hightower).	2/12/2026 8:13 AM
4585	This is absolutely insane! These are schools tucked into neighborhoods. The schools are already crowded and the neighborhoods cannot handle twice the number of kids. You will destroy the neighborhood, the school experience, and the area which brings in large tax dollars. People will move out and therefore crash the taxes that go to these schools - drop dramatically.	2/12/2026 8:13 AM
4586	Lager mega elementary schools do not benefit students. Keep smaller neighborhood schools.	2/12/2026 8:12 AM
4587	I like it	2/12/2026 8:12 AM
4588	Heartbreaking to see our school, evansdale on the list. We are just kindergarteners this year, and our experience at the school has been fantastic. We have planned the next decade around having our youngest come through the same programs. The school is a hub of the community, and a rich cultural melting pot. I couldn't imagine having to lose that	2/12/2026 8:12 AM
4589	Whatever benefits students and teachers the most	2/12/2026 8:10 AM
4590	As an APES parent, the initial proposal takes a high performing school and moves it into a cluster of very low performing schools. Instead of actually focusing on the problems of low performing schools, it feels like the district is watering down the peaks and valleys to bring th numbers up.	2/12/2026 8:10 AM
4591	The closing of ASHFORD Park doesn’t make sense. It is a top school with amazing parental involvement. Rezoning makes more sense.	2/12/2026 8:09 AM
4592	I do not want Oak Grove elementary to be closed. It is a wonderful school with a close community of parents, students, teachers, and support staff. It is high achieving and parents support many of the programs through the Oak Grove Foundation. There is also high risk of people moving out of the area of the school closes.	2/12/2026 8:08 AM
4593	I don't understand closing 2 elementary schools to overcrowd 2 others in our area. Dunwoody cluster	2/12/2026 8:08 AM
4594	Do not lose Midvale. It is a nice small neighborhood school that many families love.	2/12/2026 8:07 AM

4595	This is very well thought-out and makes sense in laymen's terms.	2/12/2026 8:06 AM
4596	I'm happy with the ideas shared about the consolidation ideas	2/12/2026 8:05 AM
4597	No plan has been given on what will happen to the DLI program at evansdale and Ashford Park should those schools be closed	2/12/2026 8:03 AM
4598	This is a DISGRACE. Closing schools means displacing students. It means ripping apart communities. It means rather than being in walking distance, kids will have to travel even further to attend school.	2/12/2026 7:59 AM
4599	It makes sense, but the details are where the devil is	2/12/2026 6:59 AM
4600	SAP Member- the initial scenario should not move forward. Excessive focus was placed on closing the entry point school, Elementary. We must remember that elementary is the community building school and the foundational entry point for learning. Focus should be on eliminating seats at the MS/HS level.	2/12/2026 6:40 AM
4601	Why are elementary schools with enrollments over 450 being considered for closure, if 450 is the magic number to maximize state funding? A bigger school isn't necessarily a better school. Can you quantify the savings associated with closing a school and busing students to a nearby school? DCSD has built many schools with capacities of 900-1200 elementary students. Have you identified the positive and negative impact of larger schools on students - attendance rates, academic achievement, graduation rates, parental involvement, school climate, graduation rates, discipline, mental health, etc…? It seems your assumption is that bigger is better, when in fact, many stakeholders like the smaller neighborhood schools. Even BOE members have chosen smaller schools/programs (DSA) for their children.	2/11/2026 11:19 PM
4602	At first, I was shocked that Ashford Park, which is in the overcapacity Chamblee cluster, was suggested to close. After reflection, it seems logical that a 70-year old school with only 480 seats, situated on a tiny 7 acre lot , with a low FCA score, is no longer serving the community, nor cost-effective to enlarge. I suggest that Ashford Park zone be redrawn to entirely be served by John R Lewis, and the JRL's current boundaries be corrected to be served Dresden, Montclair, and even Woodward. John R Lewis would then be zoned for Chamblee Cluster, keeping the communities nearly entirely together with the nearest school to them. This enables each neighborhood to have a closer, more walkable elementary school option, and immediately address the most overcapacity elementary school in Dekalb; this elegant solution could be enacted for the 2026/27 school year at no cost. It is key that messaging be that Ashford Park community remains together, and remains within Chamblee cluster. It's not about the building, it's the fear that if they lose it, they will be torn apart and/or put into Cross Keys or new Seqouyah cluster. Nancy Creek should be brought back online and serve as a upper/lower until Montgomery ES is enlarged to better serve the 12 acre lot.	2/11/2026 10:43 PM
4603	I agree with the baseline scenarios and believe that we should move forward expeditiously	2/11/2026 10:08 PM
4604	I'm concerned about the number of "consolidations" in south DeKalb as opposed to north DeKalb. It almost seems like south DeKalb's sacrificing for the sake of north DeKalb.	2/11/2026 9:41 PM
4605	It's a decision, unfortunately there will not be a completely perfect situation, only one that best fits the facts and needs of the district.	2/11/2026 9:39 PM
4606	I think they largely make sense and align to the guiding principles. I am concerned about implications to boundaries to the Dunwoody cluster given the capacity issues. However, I understand we'd need to expand Chesnut before closing Vanderlyn and Kingsley. I've also heard parents at Hightower may actually have a preference to move to the Doraville cluster, which would alleviate the crowding at Peachtree and DHS.	2/11/2026 9:29 PM
4607	The initial scenario is not surprising based on the data gathered over the course of time. Just a few questions on some of the choices.	2/11/2026 8:25 PM
4608	I think it is an ideal that can work. The thought could really work in the actual building as it relates to resources. It has to happen I believe. I would not argue this process.	2/11/2026 8:23 PM
4609	I am curious about one cluster in particular. McNair/ Cedar Grove.	2/11/2026 8:20 PM
4610	I think that more information needs to be provided on the Luster form because all of the expanded schools are located in the north and the schools in yellow are in the south. The question is will the schools in the south that are yellow be renovated. If so, this is a good start. Additionally, I think there needs to be more than one scenario.	2/11/2026 8:17 PM

4611	It makes sense to consolidate schools, the way we will be able to say if it make sense is to see where programs will lie. These consolidations allow for so many different options to shift programs and expand programs.	2/11/2026 8:16 PM
4612	It will be better received with additional context as to what school the Ashford Park students will be transitioned to. it’s not right he said that’s why he wants to be back from community. I’m didn’t answer a question.	2/11/2026 8:14 PM
4613	I see the logic but I am curious about how this will affect boundaries of attendance zones.	2/11/2026 8:13 PM
4614	At first review, it seems equitable across the district and makes sense for each cluster.	2/11/2026 8:05 PM
4615	While it will be challenging for families whose schools may be consolidating or closing it’s a bit jarring. But I live in a cluster where the scenario calls for the HS to be converted to a MS and I think that is a good thing. I do however have some concerns that SE and SW parts of the county have the greatest concentration of consolidations and closures in this scenario. I know it’s a population issue but how this is socialized (for whatever the final scenario is) will be very important so that parents do not feel marginalized.	2/11/2026 8:05 PM
4616	These consolidations make sense to me and it appears great effort was made to not disrupt clusters if possible. I also appreciate that closures and consolidations appear to be spread through the district and not centered in certain areas.	2/11/2026 8:04 PM
4617	It is concerning that our school will expand without knowing the details as our school is very old and needs a lot of construction updates.	2/11/2026 8:03 PM
4618	I’m concerned about what may be considered segregation.	2/11/2026 7:58 PM
4619	A mix. I’m relieved my schools will probably be ok but I’m concerned that the most impacted areas (areas with most closings/consolidations) are mostly communities of color (and maybe also mostly working class?)	2/11/2026 7:56 PM
4620	I like the spirit of this and understand the need for some closures/consolidation. My main QUESTIONS would be: For the areas where they're suggesting expanding an elementary school and closing another... 1) Is there room to expand these elementary schools? Some of the ones mentioned are tight on land.. will they go up? how will they manage parking? traffic? Some are on majorly busy roads with already massive traffic issues (e.g. montgomery ES). 2) What was the decision criterion for the closing of schools? It's unclear and feels like it would need to be more clearly stated to more fully reviewe these plans.	2/11/2026 7:50 PM
4621	My initial reaction is somewhat mixed. My concern is what will the consolidation scenarios do for classroom sizes within the presented within the initial facilities scenarios. I would want to maintain lower classroom sizes for all potential outcomes.	2/11/2026 7:34 PM
4622	It was very informative and a great perspective on understanding the reasons for consolidation.	2/11/2026 7:28 PM

Q5 Please share you feedback on the potential grade band scenarios, please be specific to the schools or clusters you are referencing along with the grade bands.

#	RESPONSES	DATE
1	As a middle school counselor, it is absolutely imperative to keep certain age groups separated. I am strongly against k-8 schools. My current school is 6-8. The difference between a 6th grader and an 8th grader is huge. They should be kept apart. Same with 6-12. There is no way that I want my 6th grader around an 8th grader...let alone a high school child. No way.	3/9/2026 11:33 AM
2	I believe that PK-8 models can be effective where schools have to be consolidated and transportation distance is challenging. I also believe that the PK-3 / 4-6- / 7-8 / 9-12	3/9/2026 10:54 AM
3	I do not understand this scenario enough to give a adequate response	3/9/2026 8:37 AM
4	I don't feel there should be any grade band from pre k to 5 of Redan school	3/9/2026 7:09 AM
5	We support keeping the current Ashford Park families within the Chamblee High School cluster, and, again, we encourage as much continuity as possible within high achieving populations.	3/9/2026 6:38 AM
6	Keep it simple.	3/9/2026 6:00 AM
7	The present grade bands for our community, needs to remain the same. Canby Lane Elementary, Mary Bethune Middle and Towers High School!	3/9/2026 4:07 AM
8	N/a	3/9/2026 2:58 AM
9	Keep elementary schools as they are. Ideally some middle schools will continue separately from high schools	3/9/2026 2:09 AM
10	I believe elementary should remain elementary K-5. I do not believe that 6-8 grade should go to school with high school students.	3/9/2026 1:31 AM
11	I feel like little kids do not need to be in the same school as no grown adults kids I don’t think 12 11/ 10th graders need to be around six 7/5 graders that’s absolutely insane	3/9/2026 1:17 AM
12	keep the traditional grade bands for Evansdale and the Lakeside cluster	3/9/2026 1:17 AM
13	no particular issue if the grades are properly separated in school, on the bus, and in sports	3/9/2026 12:31 AM
14	Not sure how to answer this but middle school needs to be with high school in my opinion so that they will mature behavior wise.	3/9/2026 12:27 AM
15	The Dunwoody Cluster would benefit from having larger feeder schools within proximity to both the Middle School and High School. You see this quite often in Fulton County, for example. You can still keep a traditional grade band model, or even consider separating the older elementary grades (3-5 or 4-5).	3/9/2026 12:21 AM
16	Maintaining the traditional model is preferred to limit the number of transitions for students, will continue to keep developmental levels together, allow for robust programming and the ability to build and maintain relationships. The more grade bands, the more spread out siblings may be which will likely reduce parent engagement as parents are spread out between schools and have to juggle potentially conflicting event calendars	3/9/2026 12:13 AM
17	Before you consider changing the grade banding of schools, please look at research which indicates whether such changes benefit students in their learning performance, in their sense of community, in their character development, and so on. I am not against changing of grading principles changing a lot of small schools into very small K through 12 schools that would make sense But it needs to be prefaced with someone doing the work to look at research that indicates the impact such changes have on students	3/9/2026 12:11 AM

18	the grade level that is currently in use at bob mathis works well for our community	3/9/2026 12:04 AM
19	I think it is outrageous that we would even consider putting pre-k through 8th grade in the same school. I do not want my 4 year old being put around a 14 year old.	3/9/2026 12:03 AM
20	I think the bands should remain the same.	3/9/2026 12:01 AM
21	Do not want our neighborhood school to be repurposed for some other use. Evansdale has a large property suitable for expansion off the back while leaving plenty of parking and playground area.	3/9/2026 12:01 AM
22	I feel like the best option for our school would be rearranging the grade bands. The PK - three, four - five grade band option for our elementary school feels like it would have the best opportunity to keep our community connected while still accommodating the overcrowding issue at Ashford Park.	3/9/2026 12:00 AM
23	The idea of putting 6th graders with 12th graders or PreK with 8th graders is so upsetting on so many levels and I am stunned this is being proposed as an legitimate option. What will the 6-12 school be called, a high school? To my knowledge, 6 and 7th grades have never been part of high school level education. And what will the prek to 8th grade school be called, an elementary school? I went to school in Dekalb when elementary school was 1st-7th and high school was 8-12th. I cannot imaging still being considered an elementary student in 8th grade. As for trying to divide into 4 grade bands, that seems so chaotic and disruptive and will mean the children will have very few years to feel attached to their schools, something that is really important at the elementary school level when children are growing and developing so quickly. They need stability and changing schools so often will not provide that. Also if our neighborhood elementary school-Evansdale-closes we will lose the wonderful French DLI program our child and hundreds more have benefited from over the past several years and since it was implemented 10 years ago. It will also keep future students from benefiting from this program.	3/9/2026 12:00 AM
24	I believe the traditionnal system our child went through worked well. I would not mix a too wide an age gap (elementary to high). Cluster: Oak Grove Elementary, Henderson Middle, Lakeside High School.	3/8/2026 11:59 PM
25	I suppose I prefer the traditional model we have in place now (OGE, HMS, LHS). This seems like a question very few of us are qualified to answer though. If you're not in education directly or maybe something education adjacent, I don't know how you're supposed to answer this. Feels like you're just asking it so you can say you got public feedback.	3/8/2026 11:59 PM
26	Elementary grades	3/8/2026 11:57 PM
27	I don’t think grade banding is a good idea because of the different social emotional stages children are in based on there age. I don’t believe that 6-8th graders should be in school with 9th-12th graders. I feel like it increases odds of bullying and lessened safety for students.	3/8/2026 11:57 PM
28	We like the current grade band cluster from Evansdale to Henderson Middle to Lakeside.	3/8/2026 11:57 PM
29	Although I am a product of Dekalb County Schools and attended a K-7 elementary school, I would not reccommend the K-8 grade band. I lived in the city of Cleveland, Ohio with K-8 grade bands and there were limited opportunities for students in extracurricular activities, clubs, and courses. Mixing older (6-8) students and younger students did not work well with excitement and trepedation of younger students beginning school and the hormones, resisting, and testing of the older students.	3/8/2026 11:57 PM
30	I am not opposed to grade bands if they make sense, are in the best interest of the children in regards to education, smaller class sizes, remainjng close to their community and are age appropriate	3/8/2026 11:57 PM
31	I’m not super in love with the grade band scenarios either- developmentally, in the age of social media, having a 6-12 campus or a PK-8 campus poses social development issues. Additionally, the impact this may have on educator certification will be an issue especially if the district isn’t offering to pay for teachers to modify certifications. I am not opposed to the PK-3/4-5.	3/8/2026 11:56 PM
32	see 6 and 7	3/8/2026 11:52 PM
33	I prefer the current grade bands with Ashford Park being PK-5 feeding into 6-8 at Chamblee Middle and 9-12 at Chamblee High	3/8/2026 11:51 PM

34	Putting elementary school kids with older kids (ie middle schoolers) is a terrible idea. Grade bands should remain K-5 (potentially with pre K), 6-8, and 9-12. More grade bands is ok though.	3/8/2026 11:50 PM
35	Instead of closing multiple elementary schools, the district should explore converting some buildings into grade centers such as PK–2 or 3–5 schools etc. This could help balance enrollment and reduce underutilized buildings.	3/8/2026 11:50 PM
36	I personally prefer the traditional banding because I think it's segments kids at appropriate groups for their fades of childhood and adolescence. In other words, my concern would be putting kids that are too young with kids that are too old in the same building.	3/8/2026 11:48 PM
37	Stability is the priority for the Lakeside cluster, where high utilization and regional growth make consolidation impractical. Oak Grove and Sagamore Hills are nearing capacity at 96% and 91% respectively; meanwhile, Briarlake (73%) lacks the overhead to absorb Oak Grove's enrollment without significant strain. Given the cluster's proximity to a major healthcare and research expansion, its population is poised for growth rather than decline. Consequently, the traditional PK–5 model should remain, while grade reconfiguration efforts should be redirected toward clusters facing long-term underutilization.	3/8/2026 11:45 PM
38	I am glad to hear that mixing of age groups as inappropriate are being taken into consideration. I can see K-8 if there a lot or almost total separation. I can see 6-12 working also, again, if there is a lot of separation between the upper and lower ages. I work all levels and am shocked at the inappropriate language and behaviors that I see coming from students in grades 7-12.	3/8/2026 11:44 PM
39	I oppose bundling multiple grades together. I oppose putting K-8 and 6–9 together, even if divided by partitions.	3/8/2026 11:43 PM
40	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 11:42 PM
41	Any scenario that requires potential additional bus drivers and routes seems unrealistic to me. I believe the traditional grade band option is working for the Lakeside cluster, but my son graduated a number of years ago.	3/8/2026 11:41 PM
42	All clusters- The grade bands K-6, 7-12 or PK- 8, 9-12 would be my selection.	3/8/2026 11:38 PM
43	Im not understanding why this is needing to take place.	3/8/2026 11:37 PM
44	I love the idea of at least 6 th still in elementary	3/8/2026 11:35 PM
45	It is unclear why the district is considering moving away from the traditional PK–5 / 6–8 / 9–12 model in clusters where the current structure is working well. In our area, the elementary, middle, and high school progression is well established and understood by families. Schools appear to be operating effectively within the existing grade bands, and there has not been a clear explanation of what specific problem this change is intended to solve. Shifting to a different grade band structure would create significant disruption for students and families, including additional school transitions, new transportation patterns, and the need to reconfigure facilities that were designed for their current grade levels. These changes can also disrupt school culture, teacher collaboration, and established community relationships that have developed over time. Before pursuing grade band changes, the district should clearly demonstrate the educational or operational benefits compared to the current PK–5 / 6–8 / 9–12 model. If schools in a cluster are functioning well under the existing structure, maintaining stability should be prioritized. Significant structural changes should only be considered where there is a clear, data-supported need and a demonstrated benefit for students.	3/8/2026 11:34 PM
46	.	3/8/2026 11:32 PM
47	History has shown that PK-8 cohort works because it was the existing model prior to the creation of the "middle school" model. That being said, whatever model is chosen, the district must not sacrifice educational programming and student developmental needs at any grade level.	3/8/2026 11:30 PM

48	We are in the Tucker cluster. The current grade bands seem appropriate, as would PK-6 / 7-8 / 9-12. The elementary school band going through 5 or 6 allows the students to become comfortable and confident in their school and allows for more children in a single family to go to the same school in the early years (minimizing schedule conflicts for children who cannot be alone). Middle school is an awkward and emotional time for many students. Having a smaller band at this time can help avoid additional pressure being in a cohort with high schools students. Additionally, smaller schools provide more familiarity and sense of community.	3/8/2026 11:30 PM
49	I have always preferred pk-2, 3-5, 6-8, and 9-12. Putting middle school and high together is a disaster waiting to happen.	3/8/2026 11:29 PM
50	I am OPPOSED to grade bands that span grades 6-12. While there might be some ways of keeping the younger students, aged 10-12 years, apart from older students, who might be as old as 18-19 years, in school facilities, buses will be high risk settings. As a physician and experienced parent/guardian, I am concerned that the younger students will be particularly vulnerable to bullying, drugs/vaping, and even physical assault on buses without adequate supervisory staff. A bus driver can't prevent an 18 year-old from assaulting a pre-pubescent child while that driver is responsible for a huge vehicle in traffic that can be intense and at high speeds. I have asked about bus safety for this grade band both during an online SAP session and through a question at Cross Keys; the question has gone unanswered. This tells me that the question of bus safety for this broad grade band has not been considered. I am appalled.	3/8/2026 11:29 PM
51	Traditional PK–5 grade bands remain appropriate in the Lakeside cluster. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 11:24 PM
52	Specific to the Lakeside High School cluster the grade band scenario boundary the same.	3/8/2026 11:23 PM
53	Traditional grade bands should remain. Some age groups should not be in the same building with older students.	3/8/2026 11:22 PM
54	If it is come down to band some schools, the District need a plan for transportation, schedule etc	3/8/2026 11:20 PM
55	I believe that the grade bands should stay in the traditional format. Unless the lower grades are completely separate from the higher grades I feel like there could be a safety issue. And this is for all clusters and all schools.	3/8/2026 11:19 PM
56	Elementary, middle and high school students have different needs and don’t need to be in the same buildings. Transitioning is normal and beneficial to students in some ways and shouldn’t be avoided at the cost of age-specific environments and safety of younger children especially. Parents having to drive/pick up children from different schools is the norm and not a drawback to be considered.	3/8/2026 11:18 PM
57	You referenced the PK–2 and 3–5 grade band model used by City Schools of Decatur. However, this model is currently being reconsidered and should not be presented as an option. Similarly, the proposed 6th–12th grade configuration presents significant challenges, particularly from a developmental standpoint.	3/8/2026 11:18 PM
58	It is unclear why the district is considering moving away from the traditional PK–5 / 6–8 / 9–12 model in clusters where the current structure is working well. In our area, the elementary, middle, and high school progression is well established and understood by families. Schools appear to be operating effectively within the existing grade bands, and there has not been a clear explanation of what specific problem this change is intended to solve. Shifting to a different grade band structure would create significant disruption for students and families, including additional school transitions, new transportation patterns, and the need to reconfigure facilities that were designed for their current grade levels. These changes can also disrupt school culture, teacher collaboration, and established community relationships that have developed over time. Before pursuing grade band changes, the district should clearly demonstrate the educational or operational benefits compared to the current PK–5 / 6–8 / 9–12 model. If schools in a cluster are functioning well under the existing structure, maintaining stability should be prioritized. Significant structural changes should only be considered where there is a clear, data-supported need and a demonstrated benefit for students.	3/8/2026 11:18 PM
59	I believe the younger children need to remain k-5. Middle schools should remain 7-8 and High School should remain 9-12. Children are being exposed to too many things way to early. Younger children mimic older children. If the school system is already having major concerns at each grade level why would a proposal be given to place easily impressionable children with older children who may demonstrate unfavorable behaviors. I think that's a bad idea.	3/8/2026 11:18 PM

60	I do not think grade bands should change. K5 / 6-8/ 9-12. But you have provided NO actual data or information other than a pro / con list. So how can I provide any educated response to this? Its no more than a guess? Evansdale/Henderson/ Lakeside. I dont agree that adding more bands is a good idea adding more changes the kids have to jump from and even more buildings that need to be accounted for? Talking about cost of small schools and you want to add more -w/ only 4th / 5th grade? But the idea of cramming K-12 into only 2 bands -however you split it - (K5/6-12 or K8/6-12)... is also unnervingly out of touch. Especially in such a large district. Some small rural community - I can see maybe that is a need. But throwing all those ages in one school is just developmentally not appropriate. The bands as they are make sense as kids grow and change, physically, academically and extra curriculars. You start cramming everybody into fewer schools you are getting less community.	3/8/2026 11:14 PM
61	The current grade bands should stay in place	3/8/2026 11:13 PM
62	Grade band modification is not the solution. It will only lead to more school populations being divided.	3/8/2026 11:13 PM
63	Towers needs to stay a high school	3/8/2026 11:12 PM
64	Traditional seems preferred but all of these seem doable to me if it allows parents to stay with their current school group / community. 6-12 seems the hardest due to very difficult developmental stages, for example, on the bus.	3/8/2026 11:08 PM
65	I believe there should be fairness and equity in grade bands across clusters.	3/8/2026 11:08 PM
66	Traditional PK-5th grade bands work best for highly utilized schools clusters like the Lakeside cluster	3/8/2026 11:05 PM
67	I believe grade bands should remain intact if students from Ashford Park Elementary are reassigned to John Lewis Elementary	3/8/2026 11:05 PM
68	The traditional elementary schools like Redan Elementary is a school that is doing well with all their students. It is more like family from the pre-k -5 grade. The traditional way is what we need in the elementary schools. It works for the age group.	3/8/2026 11:05 PM
69	Family engagement opportunities are higher with the current grade banding (PreK-5, 6-8, 9-12) for siblings to stay together. This often leads to stronger community >> better attendance >> higher scores >> more funding. This also allows for the tiered transportation that is currently in place and keeps students close to their schools.	3/8/2026 11:05 PM
70	The proposal closes Evansdale Elementary. A neighborhood school that brings diverse communities together, offers the only STEM FRENCH option in the county and fuels the heartbeat of our neighborhood. Closing it with be asenseless and devastating loss. Evansdale brings together families from a highly diverse demographic and socioeconomic background, but in a community setting with all the acceptance equality and support that we should be modeling for the next generation. I soulless mega school is NOT the way to go, and if anyone had asked before they spent our tax dollars on new wear mhouse schools, we would have told them. In fact we did. Repeatedly. In 2019 the last time this money before community and childhood proposal was wheeled out!	3/8/2026 11:03 PM
71	There is not enough information available to the public to weigh how this can occur. You state that you are looking at buildings only and not programs. How can you look at grade bands and not programs?	3/8/2026 11:02 PM
72	Leave the current grade bands as is. Changing the bands does not fix the issues with the school system. If the consultants are wrong the kids suffer. Other counties don’t need to change their age bands to improve student learning. Why do we feel like this is the answer for our kids?	3/8/2026 11:01 PM
73	I think this is preferable to closing schools altogether. Evansdale could expand to serve grades 1-6	3/8/2026 10:58 PM
74	I am against changing from the traditional grade banding the district currently operates under: PK-5, 6-8, 9-12. The challenges far outweigh the benefits and they would be a significant change for families which would be a big obstacle to overcome.	3/8/2026 10:57 PM
75	no strong preference for grade bands, so long as students at the school are able to perform well	3/8/2026 10:56 PM

76	Given that the school cluster comprised of Briarlake Elementary, Sagamore Hills, and Oak Grove elementary have high utilization with expected continued growth resulting from significant development and redevelopment projects in its surrounding area, the traditional PK-5th grade band makes the most sense.	3/8/2026 10:56 PM
77	PreK-2 and 3-5 grade bands are fine. I don't think 6-8 should be in the same building as K-5. Parents of kindergarten students may not be comfortable sending them to a school with teenagers. I think K-6 would be fine, but 7th and 8th graders need to be in a separate school. Middle school has a different climate. The climate of an elementary school will conflict with the climate of a middle school and vice vera.	3/8/2026 10:51 PM
78	I do not support grade band configurations that would require Evansdale students to attend large consolidated “mega-schools” outside their neighborhood or outside the existing Evansdale–Henderson cluster pathway. Maintaining the current K–5 structure at Evansdale Elementary best supports both community stability and program continuity. Evansdale’s French immersion program connects directly to the program at Henderson Middle School, and preserving that pathway is important for both academic continuity and maintaining enrollment. In addition, creating larger consolidated grade-band schools risks driving families away from the public system altogether. Many families chose this neighborhood specifically because of the presence of a strong, local elementary school. If Evansdale is closed or replaced with a large, more distant school, it is very likely that some families will pursue private schools or alternative options, which could ultimately reduce enrollment rather than stabilize it. For these reasons, I strongly encourage the district to maintain neighborhood elementary schools like Evansdale within their current clusters, preserve existing program pathways such as the French program feeding into Henderson Middle School, and avoid grade band scenarios that rely on large consolidated schools.	3/8/2026 10:47 PM
79	Lakeside and Henderson Middle has had overcapacity.	3/8/2026 10:47 PM
80	The first grade band most appealed to me. While the appeal of younger, qualified students gaining access to higher level classes (something I believe my children should have) is appealing, I think the likely negative impact on the students’ well being outweighs this. These kids need environments designed specifically for their age group — I think it can lead to negative peer pressure or exposure to behaviors they are not prepared for, peer pressure, change a schools’s culture and more.	3/8/2026 10:46 PM
81	I strongly support keeping the traditional grade bands in the Lakeside cluster as they are: pre-K through 5th grade in elementary school, 6th through 8th in middle school, and 9th through 12th in high school. The children need stability without having to change schools, teachers, or friends every few years. Maintaining these grade bands allows younger students to look up to and learn from the older students, while also giving the older students responsibilities to help and support the younger classes, which promotes their growth and development. I do not support breaking the grades up into different grade bands. Changing the structure would disrupt students’ learning, social connections, and sense of community. Keeping the current grade bands ensures continuity, supports strong relationships with staff, and allows children to thrive academically and socially. Oak Grove Elementary, along with the surrounding schools in the Lakeside cluster, should maintain these traditional grade bands to provide the stability, mentorship opportunities, and supportive environment that students, families, and the community rely on.	3/8/2026 10:46 PM
82	Na	3/8/2026 10:45 PM
83	My first preference is a traditional PK–5 (Midvale); 6 - 8 (TMS); and 9 - 12 (THS). If this option is not selected, my alternate preference is a PK–8 model with a combined Midvale ES; Livsey ES; and part of the former Evansdale ES. My suggestion is for the Midvale ES to serve as the facility for a combined PK - 8 school of this nature since it is the most centrally located of these three schools and has the site acreage (level grade) that is best suited for expansion.	3/8/2026 10:44 PM
84	From my perspective as a parent in the Lakeside cluster, stability should be a priority for our schools. Oak Grove is projected to reach about 96% utilization next year, and Sagamore Hills is already at about 91%. Briarlake is currently around 73%, but if Oak Grove were to close, Briarlake would likely need to absorb a significant portion of Oak Grove’s students. That would change the picture quickly. It’s also important to consider the broader context of this area. The Lakeside cluster is not a region experiencing decline. On the contrary, it sits next to one of the largest healthcare and research growth corridors in Georgia, with major expansion happening around Emory and Children’s Healthcare of Atlanta and thousands of jobs being added. These kinds of investments typically bring families and long-term population growth. Given these	3/8/2026 10:43 PM

	conditions, the traditional PK–5 elementary structure continues to make sense for a cluster that is already highly utilized and located in a growing area. If the district is considering structural grade reconfiguration as a tool to address underutilization, it may be more appropriate to focus those changes in clusters that are facing long-term and significant enrollment decline, rather than in areas like ours that are showing stability and growth.	
85	N/a	3/8/2026 10:41 PM
86	I can see benefits to having K-7 or K8 schools in clusters where the buildings/enrollment make sense but I am not familiar with all the clusters. I do not see that being possible in the Lakeside cluster as the high school is already well over capacity. If I were the parent of several small children, I would not want the elementary grade bands split up into K-3 and 4-5...that could put me in a situation where I had 1 child in k-3, one in 4-5 and another in 6-8... why create 2 schools to juggle for parents of young kids by dividing K-5?	3/8/2026 10:37 PM
87	Grade band decisions should be guided by what best supports student development. In the Chamblee cluster and surrounding Brookhaven community, families are accustomed to the traditional PK-5 / 6-8 / 9-12 structure, which provides clear transitions and strong identity for each school level. If grade bands are changed, the district should carefully consider how that affects feeder patterns and community confidence. Families are much more likely to support elementary boundary changes when they feel confident about the middle and high school pathways that follow. (ie.... if you close Ashford Park and move students, they should still feed into Chamblee High) From a classroom perspective, elementary teachers also benefit from schools that focus on a consistent developmental age range. Elementary schools serving PK-5 students allow teachers to collaborate around early literacy, language development, and foundational skills. These are particularly important in schools serving high numbers of English learners.	3/8/2026 10:34 PM
88	I stand with the traditional grade band scenario.	3/8/2026 10:33 PM
89	The proposed schools briarlake and Sagamore Hills will not have capacity for Oak Grove students.	3/8/2026 10:32 PM
90	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 10:31 PM
91	The lakeside cluster is located near Emory, CHOA and the CDC, in a fast growing area in terms of employment and is showing no signs of decline. Maintaining stability and ensuring the traditional PK-5 grade bands are kept are the best choice for the area where reconfiguration should focus in priority on consistently underutilized clusters	3/8/2026 10:30 PM
92	The Lakeside cluster stability should be prioritized. The cluster is not experiencing structural decline. Structural grade reconfiguration should focus first on clusters with long term, significant underutilization.	3/8/2026 10:29 PM
93	I believe the clusters should share the same grade bands, and they should remain traditional K-5,6-8 and 9-12.	3/8/2026 10:28 PM
94	No opinion.	3/8/2026 10:28 PM
95	We are in the Chamblee cluster.	3/8/2026 10:27 PM
96	I believe that by grouping PreK-3, 4-5, 6-8, 9-12 there is a greater likelihood that important early literacy and foundational skills can truly be focused on and that within each band the particular social development of children in those ages can be better addressed. Outliers will always be present, but focusing great attention on a small grade cohort will give teachers the opportunity to give specific help to those that need it.	3/8/2026 10:26 PM
97	Keep traditional age bands except for unique scenarios requiring a split campus	3/8/2026 10:24 PM
98	There is absolutley no reason for 17 and 18 years olds to be in the same school and facilites at 11 and 12 years olds.	3/8/2026 10:24 PM

99	The grade band scenarios are not clear and I would have to learn more. Generally I support smaller age ranges in a facility.	3/8/2026 10:24 PM
100	It would be an absolute failure to increase the grade band where 6th and 7th graders would share a campus with high school aged teenagers. The discrepancy in normal age related development makes it inappropriate for these age groups to be in such close proximity.	3/8/2026 10:24 PM
101	I think the classes should remain separate. I would need to hear more information on how the creation of the bands would benefit the students.	3/8/2026 10:23 PM
102	I grew up attending dekalb county schools when elementary was k-7. And high school was 8-12. It was not conductive to early education needs of children and child development. I am not supportive of expanding the grade bands. Decades of research support shorter grade bands.	3/8/2026 10:22 PM
103	My only feedback here is that you should meet the needs of the community and student population.	3/8/2026 10:22 PM
104	Unsafe and inaccessible. There is not amount of security that the school can provide in a public system that could support risking the safety of students in todays environment.	3/8/2026 10:21 PM
105	Our grade names need to be kept the same, as it is what is best for children’s development.	3/8/2026 10:21 PM
106	I personally don’t want to see high school 9-12 grade kids with middle schoolers and also 7-8th grade kids with K-5 kids mixing much more mature kids with naive and susceptible children easily influenceable	3/8/2026 10:20 PM
107	I think each cluster and community will have different needs and that is ok!	3/8/2026 10:19 PM
108	I’m more in favor of keeping siblings in the same school for as many years as possible. The current PK-5 ES band is most appropriate. Involvement of parents in volunteering and in fundraising is best served when a child attends the same school for those seven years. As for the MS HS bands, the disparity of those growth years make combining them very precarious. An eleven year old should not be in school with eighteen year olds.	3/8/2026 10:18 PM
109	Many of our students are multilingual learners (ELLs). A 6-8 model is often better for these students as it allows for three years of consistent English language development before they hit the high-stakes credit requirements of 9th grade. Moving 9th grade out of the high school building (into a 7-9 model) could help ease the social transition but might isolate students from high school extracurriculars and AP opportunities.	3/8/2026 10:16 PM
110	I like that Oak Grove Elementary School is PK–5. I want to stay in my school until I go to middle school. My friends and I know our teachers and classrooms, and I learn best when things stay the same. My little sister is in pre-K at Oak Grove, and I want to be at school to help her and be a big brother to support her. I also look up to and learn from the older kids, and they help us. As I get older, I like helping the younger kids too. If the grade bands changed or we had to go to different schools, it would be harder to learn from the older kids and to help the younger kids. Please keep the grade bands the same for Oak Grove, Sagamore Hills Elementary School, and Briarlake Elementary School. Staying in the same schools and grade bands will help all the kids learn, grow, and support each other.	3/8/2026 10:16 PM
111	I understand that we are working within a portfolio of established or pre-planned facilities (some slotted to break new ground, be expanded, or upgraded), and also that our budget is not unlimited. Within these constrained resources, my advice is to figure out the grade band scenarios that would best serve the students likely to attend those schools. While consistency is certainly the best case when it is feasible, it is abundantly clear that we are not operating in a best case scenario right now. We should not hold consistency across the district above other factors that would produce better outcomes for students.	3/8/2026 10:16 PM
112	La escuela Brockett es de la comunidad y no la tienen que quitar	3/8/2026 10:15 PM
113	I don’t think this is a good solution. Students benefit from being around peers their same age and development stage. Such a a wide range of ages could create potential problems and risks.	3/8/2026 10:15 PM
114	I support maintaining the traditional PK-5, 6-8, and 9-12 grade configuration. This structure is familiar to families, aligns with clear developmental stages, and is currently working well for our community. Before considering a shift to alternative grade band models, I would want to see compelling academic, operational, or financial data demonstrating clear benefits that outweigh the disruption to students and families. Stability and continuity are especially important during	3/8/2026 10:15 PM

	broader consolidation discussions. If schools like Ashford Park are performing well, maintaining a consistent grade structure supports that success.	
115	Accessibility and safety can not be achieved with grade bands in Dunwoody.	3/8/2026 10:11 PM
116	With regard to grade bands, the goal (from my perspective) would be to maximize student education and extracurricular opportunities while being mindful of staffing challenges (within the building and the transportation department). Maturity varies greatly with age and that is also important to consider.	3/8/2026 10:10 PM
117	Pk-6th/7th-12th	3/8/2026 10:07 PM
118	The board needs to do what is best for each community. We at Ashford Park are asking to be kept as one community that can grow from Pre-K through high school. Please do what is best for the students, friends, neighbors, and the lifeblood of the community. The savings generated by cutting a bus route is not worth the loss of a community.	3/8/2026 10:06 PM
119	The Lakeside Cluster would most benefit from maintaining the traditional PK-5, 6-8, and 9-12 grade band structure. This preserves a clear feeder pattern, with Hawthorne Elementary remaining a PK-5 school in the Lakeside Cluster, feeding directly into Henderson Mill Middle School and Lakeside High School, where it is geographically and programmatically aligned. This structure is especially important for Hawthorne, a Title I school serving a high-needs population, including students from nearby apartment communities, English language learners, and students with disabilities. Hawthorne's success is closely tied to its co-taught inclusion model, which is well-established and effective at the elementary level. There is significant uncertainty around how this model would function beyond 5th grade, and extending it into higher grades risks jeopardizing the specialized supports that exceptional and special needs students currently receive.	3/8/2026 10:05 PM
120	I believe this entire process needs to be paused due to corrupt Horton's involvement, incorrect data and lack of community input. Evansdale does not have anyone on the SAP and is therefore not represented. The French Immersion program is an essential part of the Evansdale community. Do not incorporate us into Pleasantdale or Sequoia. The fact HPM is running this and stands to profit off of this project is disgusting and should kill this entirely.	3/8/2026 10:05 PM
121	Now is fine.	3/8/2026 10:05 PM
122	I think grade bands may have to change based on school location and allocation changes. I understand that the Chamblee cluster may have to make adjustments.	3/8/2026 10:04 PM
123	Grade bands - my children attended school when it was K-7 and 8-12. Have heard bad things about middle schools.	3/8/2026 10:04 PM
124	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK-5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 10:03 PM
125	Absolutely no grade bands should be considered. Adapting and becoming comfortable in a school environment is difficult enough and we should not add another transition for our children to cope with. I also would see far too many liability issues with combining students of different maturing levels onto one campus especially with the access to technology they have these days. Safety should be the number one priority and changing grade bands would likely create significantly more unsafe scenarios in our schools.	3/8/2026 10:03 PM
126	Do not change grade bands in the Chamblee Cluster.	3/8/2026 10:03 PM
127	My children are in the traditional grade cluster. I think it's important to keep children grouped together based on age and maturity. There is too much of an age gap for some of these suggestions.	3/8/2026 10:02 PM
128	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located	3/8/2026 9:59 PM

	adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK-5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	
129	I believe this entire process needs to be paused due to corrupt Horton's involvement, incorrect data and lack of community input. Evansdale does not have anyone on the SAP and is therefore not represented. The French Immersion program is an essential part of the Evansdale community. Do not incorporate us into Pleasantdale or Sequoia. The fact HPM is running this and stands to profit off of this project is disgusting and should kill this entirely.	3/8/2026 9:59 PM
130	The grade levels need to stay where they are at. Making the potential adjustments put the children at risk which is a far greater loss than a win. This would be a terrible loss for the children, while the county sits back and worry about budget cuts. There needs to be another way!!	3/8/2026 9:59 PM
131	The current grade bands seem to work. However, I'm not opposed to altering the grade bands to help with the issue of low student enrollment. When I was a student in DeKalb, elementary school was K-7 and High School was 8-12. Such a scenario would reduce the number of buildings needed.	3/8/2026 9:58 PM
132	I do not feel the grade bands would benefit to change for the Ashford Park/Chamblee MS/HS cluster. We have a robust group of students along the continuum who benefit from the classic school grade separation allowing for sibling crossover, efficient transportation, and sufficient programs. We need to alleviate the crowding at our elementary school while maintaining families to their current cluster.	3/8/2026 9:58 PM
133	The benefits of the current, traditional structure far outweigh the challenges. The challenges pose new logistical hurdles, without additional staff preparedness, and may potentially require more resources to ensure smooth transition through the proposed alternative scenarios.	3/8/2026 9:58 PM
134	I think there are concerns having 6th graders in the same school as 12 graders. Same with prek together with 8th graders. But if handled appropriately I don't see a problem with either.	3/8/2026 9:58 PM
135	I thought the experiment with a 4th / 5th grade academy in Dunwoody went well. I would be in favor of increasing number of grades at a school to drive up attendance numbers of reducing number of grades at schools that are overcrowded.	3/8/2026 9:56 PM
136	I am not in favor of making grade bands larger especially for middle and high school	3/8/2026 9:54 PM
137	Traditional PK-5 in the current Lakeside cluster (Sagamore Hills, Oak Grover and Briarlake) is part of the strong community we have built with upper grades supporting younger students in many events. This in itself is a development aspect that is great for the kids. Given the utilization the school expects next year and the growth nearby, it does not make sense that Oak Grove is in these discussions. They should instead focus on the clusters that are underutilized and don't expect growth long term.	3/8/2026 9:54 PM
138	Preferred Grade Band for the Lakeside Cluster and Hawthorne Elementary: ✅ Traditional PK-5 / 6-8 / 9-12 The Lakeside Cluster would most benefit from maintaining the traditional PK-5, 6-8, and 9-12 grade band structure. This preserves a clear feeder pattern, with Hawthorne Elementary remaining a PK-5 school in the Lakeside Cluster, feeding directly into Henderson Mill Middle School and Lakeside High School, where it is geographically and programmatically aligned. This structure is especially important for Hawthorne, a Title I school serving a high-needs population, including students from nearby apartment communities, English language learners, and students with disabilities. Hawthorne's success is closely tied to its co-taught inclusion model, which is well-established and effective at the elementary level. There is significant uncertainty around how this model would function beyond 5th grade, and extending it into higher grades risks jeopardizing the specialized supports that exceptional and special needs students currently receive. Alternative grade bands such as PK-3 / 4-5, PK-8, or 6-12 would introduce additional transitions, fragment services, and potentially undermine Hawthorne's unique and successful support model. The traditional PK-5 / 6-8 / 9-12 configuration best supports stability, equity, and appropriate services for vulnerable students across the Lakeside Cluster and specifically those at Hawthorne (poverty level 52%; 19% special education students). Perhaps pilot K-8, 9th grade academy's or other structures pre-K thru 3 inclusive schools like Coralwood and measure outcomes before rolling out County wide.	3/8/2026 9:54 PM
139	Every cluster should have a unique grade band that meets the needs of the population and optimizes the existing facilities. We live in the Chamblee cluster thus the grade bands should	3/8/2026 9:53 PM

	be created to allow teachers and students to maximize their greatest potential. If this means adding more bans then please do so. We want what is best for our kids and not cost savings measures.	
140	keep oak grove elementary school open	3/8/2026 9:51 PM
141	If there are already more challenges than benefits, why would we change to any other model? What are the three tiers of transportation? How would that benefit the students? The benefits listed are pointless and only "sounds" good, but not practical, like many other things in Dekalb Schools.	3/8/2026 9:51 PM
142	8th graders with 12th grader is too much age and maturity difference. clusters should be standardized so the school experience is predictable and standardized	3/8/2026 9:50 PM
143	I feel like the current grand band in the chamblee cluster is the best option. There are so many different needs for the younger kids vs the older kids. Middle school is difficult enough without the influence of older kids. Elementary needs to remain separate from middle school, 5 year olds do not need the pressure of being influenced by teenagers	3/8/2026 9:50 PM
144	The traditional PK-5, 6-8, and 9-12 is fine. An alternative that might be better than the other proposed one is PK-6, 7-9, and 10-12. Changing the way that is being proposed is disruptive and will decrease the quality of the education for the students in our neighborhood.	3/8/2026 9:49 PM
145	Keep as is	3/8/2026 9:48 PM
146	I believe it is both emotionally and educationally appropriate to keep the traditional PK-5, 6-8, and 9-12 bands intact - the maturity gap alone increases safety, emotional, and behavioral risks especially for the younger elementary age groups. Elementary students are still developing basic emotional regulation and impulse control. They are very vulnerable and need environments scaled to their size, mobility, supervision needs. Middle and high schoolers are navigating puberty, identity formation, and social risk-taking. Mixing these groups increases exposure to behaviors younger children are not developmentally ready to process. National school safety data shows higher rates of physical altercations in middle and high schools compared to elementary schools.	3/8/2026 9:48 PM
147	I support maintaining the traditional grade band structure of PK–5 for elementary, 6–8 for middle, and 9–12 for high school within the Lakeside High School cluster. For the Lakeside cluster—Oak Grove Elementary School, Sagamore Hills Elementary School, and Briarlake Elementary School—stability should be prioritized. Oak Grove is projected to reach approximately 96% utilization next year, Sagamore Hills is already at about 91%, and Briarlake is at 73% but would likely need to absorb a significant share of Oak Grove's enrollment if consolidation occurs. This cluster is not experiencing structural decline; it sits adjacent to a major growth corridor driven by expansion from Emory University and Children's Healthcare of Atlanta, with thousands of jobs and ongoing campus investment. Frequent grade-band changes or shifting students between schools every few years would create unnecessary transitions and instability for children. Stability in school communities is critical for social development, continuity of instruction, and long-term academic growth. Structural grade reconfiguration should be focused on clusters with sustained, significant underutilization—not high-utilization, growth areas like this part of the DeKalb County School District.	3/8/2026 9:48 PM
148	No preference. The analysis seems reasonable to me.	3/8/2026 9:47 PM
149	Keep k-5	3/8/2026 9:47 PM
150	Oak grove elementary has a good reputation and closing it hurts Dekalb county schools and its reputation if it's closed. It's beneficial having good reputation for future enrollment and engagement.	3/8/2026 9:47 PM
151	Support Lift & Shift. Too many families have kids at multiple grades so creating grade bands thus different schools makes life more challenging for parents and waters down the school culture.	3/8/2026 9:46 PM
152	The age difference alone should suggest that 6 graders should not be intermixed with a young adult and be expected to act in a child's place.. You cannot expect a child who just left elementary school to feel a sense of security(mentally and physically) when they are in a transition phase..you cannot expect the upperclassmen to dive into their "high school experience " of moving into adulthood when they will be forced to be around children who still in a growth and development stage..	3/8/2026 9:46 PM

153	Open to any grade band scenario which allows the Ashford Park school community and faculty to stay together.	3/8/2026 9:46 PM
154	My preference is to leave Oak Grove unchanged.	3/8/2026 9:45 PM
155	From an elementary perspective, it is extremely important that younger students remain in age-appropriate environments designed specifically for early childhood learning. Schools serving PK–5 allow educators to focus on foundational academic skills and social development in a setting designed for younger children. Moving to configurations such as PK-3 / 4-5 splits or PK-8 models can disrupt this continuity and create unnecessary transitions. Frequent transitions between schools can be difficult for students and families and may negatively impact academic stability and community cohesion. Maintaining a PK-5 elementary structure allows students to grow within a consistent school community while preparing them for middle school. If changes must occur, they should prioritize minimizing transitions and maintaining developmentally appropriate school environments.	3/8/2026 9:45 PM
156	Support shift. Creating grade bands to keep families together is best. Different grade bands creates harder situations for families. The grade bands need to work for each community.	3/8/2026 9:45 PM
157	The grade bands will need to vary based on schools and student population.	3/8/2026 9:44 PM
158	I do not agree with making any grade band changes for Oak Grove ES/Henderson MS/Lakeside HS	3/8/2026 9:44 PM
159	The grade bands (traditional) have been most effective as stands. While change is often necessary, when it applies to children and their education, it’s best to keep with the mode that has produced results so successfully	3/8/2026 9:42 PM
160	3 clusters should be fine	3/8/2026 9:42 PM
161	The potential grade band scenarios are far fetched and I do not believe they offer a value.	3/8/2026 9:41 PM
162	Dunwoody should be kept with the traditional clusters. Our town cannot support significant changes to the school infrastructure as proposed with these new clusters. Before moving forward, families need cluster-specific reassignment modeling, receive school utilization projections, and a clear explanation of why expansion or shared-campus options were not prioritized.	3/8/2026 9:40 PM
163	I do not think a 6th grader should ever be in a school with 12th graders. I personally think brining back the kids to the elementary schools makes more sense. Pre k -8 th.	3/8/2026 9:40 PM
164	Dunwoody should be kept with the traditional clusters. Our town cannot support significant changes to the school infrastructure as proposed with these new clusters. Before moving forward, families need cluster-specific reassignment modeling, receive school utilization projections, and a clear explanation of why expansion or shared-campus options were not prioritized.	3/8/2026 9:40 PM
165	The decision on grade band scenarios should be driven by the outcome of the actions taken on that cluster.	3/8/2026 9:36 PM
166	Sixth graders being in the same school with eighth graders is already a tough situation. Putting 6th graders in the same school with 17 and 18 year olds is a pretty ridiculous scenario for many reasons - safety, logistics, resources being spread thin.	3/8/2026 9:36 PM
167	I am totally against a grouping/banding of 6-12 in one building together. The age group of 6th, 7th, and 8th grades should remain on their own and not be with older students in a high school setting. While teaching high school myself, I've personally observed students allowed to remain past the age of 18 for whatever reasons. There are many dynamics in a school building and for safety reasons, younger students need to be with others in their age range.	3/8/2026 9:36 PM
168	For the Lakeside cluster, the current grade band scenario provides needed stability.	3/8/2026 9:35 PM
169	The grade bands should remain intact and the same.	3/8/2026 9:34 PM
170	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in	3/8/2026 9:34 PM

	a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	
171	My best choice will be to use the second band. However, I am sure most parents would prefer having all of their in the same location.	3/8/2026 9:33 PM
172	I do not have enough information on how a change in grade bands would affect my children's school placement and education given we were only provided with a list of 27 schools to close.	3/8/2026 9:33 PM
173	Evansdale's French program is unique to the lakeside cluster. Neighborhood parent-teacher and community volunteers provide needed resources and personnel for French students. Moving the program would destroy this vital community. French teachers at evansdale Henderson Middle and lakeside high schools have put down strong roots in our community. Older students mentor the younger students It is imperative that this program stay at Evansville and within the lakeside cluster to keep the program strong.	3/8/2026 9:32 PM
174	In my opinion, maintaining the traditional model or incorporating PK–3 / 4–5 configurations is preferred in the Oak Grove, Sagamore, Henderson, Lakeside cluster. Reverting back to K-8 or 6-12, creates age disparities that will impact the learning environment and put undue stress on the teachers.	3/8/2026 9:32 PM
175	The traditional model of grade bands works best. Do NOT put 6-12 graders together. That is way too large of an age difference to be safe and to work well.	3/8/2026 9:31 PM
176	Strong Academic Achievement Evansdale is not a struggling school — it is a high-achieving school. In fact, it has been recognized as a Georgia Title I Reward School for student growth, showing that the school is delivering strong academic results. Named a Georgia Title I Reward School. This places Evansdale among the top-performing Title I schools in Georgia for academic growth. Demonstrates the school is improving student outcomes and academic progress. 5) Robust STEM Programs and Opportunities Evansdale provides strong STEM programs and opportunities that encourage innovation, problem-solving, and real-world learning. Evansdale combines language immersion with STEM learning. Students participate in: National robotics competitions. Technology fairs. Science projects and inquiry-based learning. Students regularly receive district and regional recognition. 6) Exceptional Community Support Evansdale has an exceptional partnership between families and the school through the Evansdale PTO (a merger of the community-created Foundation and a highly active PTA). Evansdale benefits from a remarkable level of parent engagement. The Evansdale Foundation provides funding for enrichment programs and classroom resources. The PTO is highly active and provides volunteer support. Community involvement directly enhances student learning. 7) Stability in the Lakeside Cluster Evansdale is a key part of the Lakeside cluster pathway that many families rely on when making long-term educational decisions. Evansdale is an important part of the Lakeside school pathway. Families often choose where to live based on: Evansdale → Henderson → Lakeside. Frequent redistricting proposals create uncertainty for families and the broader community.	3/8/2026 9:31 PM
177	I prefer the Traditional PK–5 / 6–8 / 9–12 models configuration, but I also believe that the PK–3 / 4–5 configurations might allow for increased focus on foundational literacy.	3/8/2026 9:30 PM
178	For Oakgrove elementary grade banding by including 6th grade or even up to 8th may be considered.	3/8/2026 9:30 PM
179	I agree with the consolidation, if it means more resources for our students within the district.	3/8/2026 9:27 PM
180	A K–3 grade band could be beneficial if it helps reduce class sizes in the early grades. It is concerning for a kindergarten classroom to have as many as 26 students with only one teacher responsible for them. Research has repeatedly shown that smaller class sizes in the early elementary years play a significant role in long-term academic success. While paraprofessionals can provide helpful support, they do not address the underlying issue of overcrowded classrooms.	3/8/2026 9:26 PM
181	If the schools had the capacity, it seems like a better idea to have 6th graders stay with elementary school, 7th and 8th together. 9-12th together.	3/8/2026 9:26 PM
182	I prefer to not grade band and add another transition for the students.	3/8/2026 9:26 PM
183	No change for Oak Grove Elementary	3/8/2026 9:25 PM
184	I am more in favor of maintaining the traditional grade bands or the more graduated like K-3, 4-5, 6-8, 9-12. I think that the difference between 6 and 9th graders is so large that it would not	3/8/2026 9:25 PM

	be great to have them at the same schools. I think it might shorten the time kids can be kids, instead of teenagers.	
185	I would support a K–3 grade configuration if it results in smaller class sizes. Having a kindergarten teacher responsible for 26 students is neither safe nor effective. Research repeatedly shows that smaller class sizes, especially in the early elementary years, have lasting benefits for student learning and development. Paraprofessionals can certainly help, but they do not address the fundamental problem, which is that classes are simply too large.	3/8/2026 9:24 PM
186	Tucker cluster - need to maintain and support a thriving community of elementary and Midvale is a community staple. The well-rounded education, campus, parent teacher organization (PTO) thrives and is something to be admired by other schools. TMS and THS could greatly benefit from what's happening at Midvale - the community and the students matriculating.	3/8/2026 9:24 PM
187	N/A	3/8/2026 9:23 PM
188	I would prefer to take middle school out, and go back to simply elementary and high school.	3/8/2026 9:22 PM
189	I believe grades 9 to 12 should remain separate from lower grades, however across the district I think there could be variation as long as higher grades eg 7-8 are in separate wings/floors than lower grades.	3/8/2026 9:21 PM
190	I support a K–3 grade band if it leads to smaller class sizes. It is unacceptable and unsafe for one kindergarten teacher to have 26 students. Research has consistently shown that class size has long-term impacts on student success, especially in the early elementary years. While paraprofessionals are helpful, they do not solve the core issue: classes are simply too large.	3/8/2026 9:20 PM
191	Prek through 5 is a lot of grades to have at one school. I would favor having more students per grade with smaller grade bands. There's a huge gap between a prek student and 5th grade student, and as a parent I'm wary of them sharing bathrooms, playgrounds, lunchrooms etc.	3/8/2026 9:19 PM
192	Larger facilities seem terrible for younger students- k-5 or k-8; my daughters class (Hawthorne Elementary in the Lakeside cluster) was over crowded at the beginning of the year; they were able to add another teacher to alleviate some of this crowding. It would also be helpful to redistrict and rebalance. Increasing the facility size, in my opinion, should be done with cautious consideration- adding more students and more classrooms to an overcrowded school does not seem like a great answer-but increasing the footprint and removing the trailers at the school, provided the students can remain, more or less, "under the same roof" would be desirable. I think anything that can be done to remove trailers from our schools and replacing them with more permanent structures could be a reasonable solution to schools targeted for expansion, like Hawthorne. This would allow for students and teachers to still feel like part of the school community while providing an expansion/upgrade and not disturbing in too great a degree the communities that these schools are part of.	3/8/2026 9:19 PM
193	I went to private school that had grades 1-8 in one location & then 9-12 at another. I thought that worked well. The traditional grade bands here have worked fine for our daughter as well.	3/8/2026 9:19 PM
194	I understand that DeKalb County School District is exploring potential grade band changes as part of the Student Assignment Project. In the Chamblee Cluster, I believe grades 9–12 should remain together at the high school level at Chamblee High School. High school students have unique academic, extracurricular, and social needs that are best supported in a traditional 9–12 high school environment. For younger students, I would be open to alternative grade band structures within the K–8 range, such as K–5 / 6–8 or K–4 / 5–8, as long as developmental stages and transitions are carefully considered. It is important that younger elementary students remain in environments designed for early childhood development, while middle grade students have programming that supports increasing independence and academic challenge. Any grade band adjustments should also consider minimizing the number of school transitions for students and preserving strong existing school communities such as Ashford Park Elementary School. Thoughtful planning around developmental stages, transportation, and community impact will be critical if the district chooses to modify grade bands.	3/8/2026 9:19 PM
195	Please do not shut down Oak Grove elementary	3/8/2026 9:18 PM
196	absolutely no 6-12 band	3/8/2026 9:18 PM
197	You could consider moving the schools in this section of Dekalb County (30345) and possibly all sections of Dekalb County back into the grade band scenarios that they were built for (1-	3/8/2026 9:18 PM

	7/8-12), or something similar (i.e. K-8, 9-12). Schools should be in as close proximity to students' homes as possible.	
198	I believe that traditional bands are better for our students emotionally and maturity wise.	3/8/2026 9:17 PM
199	As a family zoned for Ashford Park Elementary School in the Chamblee cluster, we strongly prefer grade band structures that preserve the current developmental progression and cluster pipeline. Specifically: We support the current K-5 / 6-8 / 9-12 model. This structure works well for the Chamblee cluster. The transition from Ashford Park Elementary (K-5) to Chamblee Middle School (6-8) to Chamblee Charter High School (9-12) provides a clear, well-established pathway that families can plan around. Students benefit from age-appropriate school environments at each stage, and the three-school pipeline creates natural transition points that support social and academic development. We are open to a K-2 / 3-5 / 6-8 / 9-12 model as an alternative, provided it keeps the Chamblee cluster intact. A primary/elementary split can work well developmentally and could potentially address capacity concerns at Ashford Park without disrupting the broader cluster pathway. Any K-2 or 3-5 school serving the Ashford Park attendance zone must maintain a guaranteed feeder relationship into Chamblee Middle School (6-8) and Chamblee Charter High School (9-12). We oppose any K-8 configuration for schools in the Chamblee cluster. A K-8 model would disrupt the established middle school transition, potentially reduce access to the specialized programs and staffing that Chamblee Middle School provides, and could undermine the coherent pipeline into Chamblee Charter High School. The academic rigor and AP preparation that begins in the middle school years is a critical part of what makes the Chamblee cluster pathway valuable — a K-8 model risks diluting that. In summary, any grade band restructuring affecting Ashford Park Elementary and the Chamblee cluster should preserve the integrity of the K-5 → Chamblee Middle → Chamblee Charter pipeline, whether through the current model or a K-2/3-5 split. A K-8 model is not an acceptable alternative for our community.	3/8/2026 9:16 PM
200	Keep the band the same elementary middle and high. It will impact students.	3/8/2026 9:14 PM
201	We do not support alternative grade band scenarios. As a father to 2 daughters, I would feel extremely uncomfortable with them being in a school with much older children. For their safety and social well being.	3/8/2026 9:14 PM
202	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 9:13 PM
203	There is no need to change just so you can change more. All of this needs to be suspended until a permanent Superintendent is in place!	3/8/2026 9:13 PM
204	Elementary, middle and High School	3/8/2026 9:12 PM
205	I do not like the idea of changing from the traditional grade bands.	3/8/2026 9:11 PM
206	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 9:11 PM
207	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 9:10 PM

208	Keep Brockett open. My son is in 1st grade. Why do these kids need to start from ground zero.	3/8/2026 9:08 PM
209	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 9:07 PM
210	I strongly support maintaining traditional grade bands (separate elementary, middle, and high schools). This structure is working well in our area, and there is no clear need to combine significantly different age groups into the same building. Kindergarteners and eighth graders are at very different developmental stages, just as sixth graders and twelve graders are at different stages. Younger children benefit from environments specifically designed for early childhood learning, play, and supervision, while older students require settings tailored to adolescent academic and social needs. Keeping these groups separate ensures that facilities, programming, and supports remain age-appropriate and aligned to students' developmental stages. In addition, expanding grade bands into a single, larger school would significantly increase traffic in and around the campus. The Atlanta area already experiences congestion, and concentrating more students, buses, and carpool traffic at one site would negatively affect both the school community and surrounding neighborhoods. Maintaining traditional grade bands preserves developmentally appropriate learning environments and helps manage infrastructure impacts like traffic. I encourage the district to continue building on a structure that is already serving our community well.	3/8/2026 9:06 PM
211	The grade clusters should be as follows: Pre-K-8 and 9-12.	3/8/2026 9:06 PM
212	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 9:05 PM
213	For PK-3, the teacher to student ratio is especially important to ensure kids get the best experience and learning path. A more hands on approach at a young is needed.	3/8/2026 9:03 PM
214	The schools that would absorb oak grove "briar lake" and sagamore don't seem to have capacity or better facilities.	3/8/2026 9:02 PM
215	In my opinon, grade banding is a mistake. As someone who attended a middle school that was also in a high school building I can tell you it was logistically difficult. Having that diverse range of ages together is also inappropriate.	3/8/2026 9:02 PM
216	For The Oak Grove/Sagamore/Briarlake cluster, stability should be prioritized. The schools are not experiencing structural decline. Redistributing students from one cluster school to another would lead to that school's over-utilization, exceeding 100% capacity.	3/8/2026 9:02 PM
217	Please prioritize small school size over robust programming when it comes to elementary school! This means investing funding into good quality 300-400 capacity elementary schools within smaller catchment areas, the way we currently have things, and not consolidating elementary schools into fewer and larger buildings. Elementary aged children should not share a building, drop off, cafeteria, restrooms, etc with middle or even high schoolers. We chose our neighborhood for the small, community elementary and subsequent path to Lakeside.	3/8/2026 9:00 PM
218	Grade band outside of the traditional model are not necessary. I do not support commingling younger students with much older students. Dekalb County Schools tried grade bands many years ago and moved away from them. We should not try them again.	3/8/2026 9:00 PM
219	I am not in favor of grade band scenarios that group younger students (I.e. 6th graders with 12th graders). There is too much of a difference (socially, mentally, developmentally, emotionally) between those ages. DeKalb county had this over 20+ years ago and it didn't work so they went to the elementary, middle, high school model.	3/8/2026 9:00 PM

220	My children are currently in Ashford Park Elementary in the Chamblee luster.	3/8/2026 9:00 PM
221	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 8:59 PM
222	I am not necessarily partial to any of the grade bands. If closures in my current district and cluster result in my children being forced into a lesser performing school/cluster while also breaking up the many friendships and community aspects I will have no choices other than to leave DeKalb county all together or go to a private school.	3/8/2026 8:57 PM
223	Oak Grove Elementary would do well as a PK-8 school. The main reasons parents pull their kids in 3rd through 5th grade is because they are scared of Henderson. The parents put them in Kitteridge or private school and then come back to Lakeside. If OGE were PK-8 the families would stay. Parents from around the county are choosing to put their kids at OGE because it is an excellent school, and that why the enrollment has been increasing since the pandemic.	3/8/2026 8:57 PM
224	Oak Grove is projected at 96% utilization next year	3/8/2026 8:54 PM
225	Feedback on Potential Grade Band Scenarios For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization. Q	3/8/2026 8:50 PM
226	I am not opposed to having grade band scenarios.	3/8/2026 8:49 PM
227	The traditional band system does work	3/8/2026 8:48 PM
228	I do not object to potential grade band changes amongst clusters. I believe the data should continue to drive these decisions, with updates being made to keep communities and municipalities together.	3/8/2026 8:48 PM
229	I strongly support maintaining traditional grade bands (separate elementary, middle, and high schools). This structure is working well in our area, and there is no clear need to combine significantly different age groups into the same building. Kindergarteners and eighth graders are at very different developmental stages, just as sixth graders and twelve graders are at different stages. Younger children benefit from environments specifically designed for early childhood learning, play, and supervision, while older students require settings tailored to adolescent academic and social needs. Keeping these groups separate ensures that facilities, programming, and supports remain age-appropriate and aligned to students' developmental stages. In addition, expanding grade bands into a single, larger school would significantly increase traffic in and around the campus. The Atlanta area already experiences congestion, and concentrating more students, buses, and carpool traffic at one site would negatively affect both the school community and surrounding neighborhoods. Maintaining traditional grade bands preserves developmentally appropriate learning environments and helps manage infrastructure impacts like traffic. I encourage the district to continue building on a structure that is already serving our community well.	3/8/2026 8:47 PM
230	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 8:47 PM

231	My feedback on grade band scenarios is grounded in the importance of preserving the integrity of the Chamblee cluster feeder pattern: Ashford Park Elementary → Chamblee Middle School → Chamblee High School. Keep the Chamblee cluster intact The Chamblee cluster represents a well-established, high-performing feeder pathway. Any grade band reconfiguration that disrupts this pipeline — whether by reassigning Ashford Park students to a different middle school, converting Chamblee Middle to a different grade configuration, or closing Ashford Park and scattering its students across clusters — would undermine years of community investment and continuity for families in this area. Grade band model is secondary to cluster cohesion I do not have a strong objection to any particular grade band structure, provided that the Chamblee cluster remains intact. Whether the district continues with the traditional PK-5 / 6-8 / 9-12 model or explores variations, the priority should be that students who start at Ashford Park have a clear, stable pathway to Chamblee Middle and Chamblee High. What I am asking the district to protect The Chamblee cluster should be treated as a cohesive unit in all future scenario planning. Decisions about any one school in this feeder pattern — particularly at the elementary level — should be evaluated for their downstream impact on the full K-12 pathway, not in isolation. Closing or reconfiguring Ashford Park does not just affect elementary students; it disrupts the enrollment pipeline and community cohesion of the entire cluster. My recommendation Retain Ashford Park Elementary as the elementary anchor of the Chamblee cluster, transition to John Lewis for 4-5 grades, and maintain the existing feeder pattern through Chamblee Middle and Chamblee High, and evaluate any grade band changes with explicit consideration of cluster-level impact.	3/8/2026 8:47 PM
232	Please keep Evansdale Elementary intact and a member of the Lakeside High School community.	3/8/2026 8:47 PM
233	Keeping the grade band around Oak Grove Elementary and the Lakeside school area the same is the best option for these children and the future children to come. We need our children to be around children of around the same age. Less distractions mean better learning for every child in these communities.	3/8/2026 8:46 PM
234	I strongly recommend maintaining the K–5, 6–8, and 9–12 grade band structure within the Lakeside cluster, with K–5 at EES, 6–8 at Henderson Middle School, and 9–12 at Lakeside High School. This structure provides a clear and stable pathway for students in the French program and supports continuity of instruction across grade levels.	3/8/2026 8:45 PM
235	I am open to flexible grade bands based on cluster needs.	3/8/2026 8:44 PM
236	Current scenarios do not meet our goal of keeping the Ashford Park students together and in the Chamblee middle and high school cluster. Under the current scenarios we do not feel our children will be provided the best education	3/8/2026 8:44 PM
237	Our goal is to keep our Ashford Park students together in the Chamblee cluster for the best educational experience for children. I don't believe a great band approach serves this purpose.	3/8/2026 8:44 PM
238	Closing a school that already exceeds the district's utilization target, shows sustained enrollment growth, and demonstrates strong academic outcomes does not directly address the district's stated challenge of underutilized facilities. Oak Grove is projected to reach 96% utilization next year, while Sagamore Hills is already at 91% utilization. Briarlake is currently at 73%, but it would need to absorb a significant portion of Oak Grove's enrollment if consolidation were implemented. Given the limited available capacity across the cluster, closing or reconfiguring Oak Grove would likely create overcrowding or require substantial boundary changes. This cluster is also not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansion corridors in Georgia, with thousands of jobs added and continued institutional growth. These economic drivers are likely to support ongoing residential demand and stable or increasing student enrollment. For these reasons, traditional PK–5 grade bands remain appropriate for this cluster. Grade band restructuring should be prioritized in areas of the district experiencing sustained and significant underutilization, rather than in a cluster where schools are already near or above the district's target utilization.	3/8/2026 8:43 PM
239	Keep the traditional.	3/8/2026 8:40 PM
240	I understand that changing the bands may help with optimizing facilities. However, I believe bands should be consistent within each cluster.	3/8/2026 8:40 PM
241	I understand as long as teacher salaries and step increases are unaffected	3/8/2026 8:38 PM
242	The current grade divisions are appropriate. Most students attend the same school throughout	3/8/2026 8:37 PM

	their elementary years, which allows teachers to truly get to know them and become familiar with their learning styles, strengths, and individual needs.	
243	Oak Grove is projected to reach 96% utilization next year, while Sagamore Hills is already at 91% utilization. Briarlake is currently at 73%, but it would need to absorb a significant portion of Oak Grove's enrollment if consolidation were implemented. Given the limited available capacity across the cluster, closing or reconfiguring Oak Grove would likely create overcrowding or require substantial boundary changes. This cluster is also not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansion corridors in Georgia, with thousands of jobs added and continued institutional growth. These economic drivers are likely to support ongoing residential demand and stable or increasing student enrollment. For these reasons, traditional PK–5 grade bands remain appropriate for this cluster. Grade band restructuring should be prioritized in areas of the district experiencing sustained and significant underutilization, rather than in a cluster where schools are already near or above the district's target utilization.	3/8/2026 8:36 PM
244	Makes sense.	3/8/2026 8:34 PM
245	I attended elementary school and high school without a middle school dedicated solely to that really hard period of growth and development and I really struggled. I think having smaller classes and smaller school communities allows young people to be able to feel like they belong.	3/8/2026 8:34 PM
246	N/A	3/8/2026 8:33 PM
247	I am extremely uncomfortable the possibility of having 6th grades mixed with high school seniors. I'm not overly enthused about having kindergarteners and 8th grades in the same school either. I see the impact that 5th grades have on kindergarteners and I think that band being any larger than that is a mistake.	3/8/2026 8:33 PM
248	Traditional grade bands are more beneficial to all students.	3/8/2026 8:33 PM
249	I believe elementary should stay until 5th. Middle school should be 6th-8th and high school 9-12. This does not put older children with younger children. This model is more representative or development and maturity of children.	3/8/2026 8:31 PM
250	I do not support having any county school with a pre-k - 8 band or a 6-12 band. You have presented no data to show student outcomes improving for those bands. To say there would be transportation issues is to so minimize an issue as to ignore it entirely. The developmental needs of those ages is world's apart and presents safety concerns the county wont be able to effectively address. I am not opposed to a pre-k-3 band but then the stated purpose of fewer "transitions between schools" aside. Changing schools at the traditional model time is not an inconvenience and it is what parents with multiple children expect. I do not expect my 12 year old to pass a senior between class changes, or be in a shared club. Nor would I allow it. If there are to be new bands, the only acceptable one would be to divide elementary school in half.	3/8/2026 8:31 PM
251	I have attended every PTO / Foundation and PAC meeting for the last three years, my wife and I volunteer at the school frequently and our son has received a high quality education and strong relationships and friendships with classmates. I attend other Parent meetings, interact regularly with those representing APES on the SAP committee and attended the Cross Keys Meeting. Ashford Park has been an excellent school for our son and all students to learn and grow!	3/8/2026 8:31 PM
252	I am aligned to split elementary schools into multiple grade bands to prevent the schools from being too large and intimidating to kindergarteners as they start. I worry about the large school format being overwhelming for the students that are attending and for them to get lost in the process.	3/8/2026 8:29 PM
253	The grade bands should be elementary with grades k-5, middle school with grades 6-8 and high school with grades 9-12.	3/8/2026 8:27 PM
254	Evansdale- Henderson Muddle - lakeside high	3/8/2026 8:26 PM
255	Discipline is the key. With out it you are creating a disaster.	3/8/2026 8:25 PM
256	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if	3/8/2026 8:23 PM

	consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	
257	Grade band k-8 is could be productive to improve the middle school experience for all constituencies - students, parents and school staff and faculty.	3/8/2026 8:22 PM
258	Good	3/8/2026 8:20 PM
259	It could work	3/8/2026 8:18 PM
260	Maintain traditional approach.	3/8/2026 8:18 PM
261	The pK-3, 4-5 band would be the best solution for Sagamore Hills Oak Grover cluster. Sagamore Hills already uses trailers and is at capacity. Utilizing both buildings and avoiding costly trailer rentals seems like the best idea for our area. Henderson Middle used to be an old high school and is so vastly large I cannot imagine changing that school. If there was a way to break away from Henderson and have hour middle school closer to our area that would be a great improvement.	3/8/2026 8:18 PM
262	Don’t have enough info or data to make much of an informed comment about grade bands. However, I feel strongly that 6th graders should not be with highschool kids.	3/8/2026 8:17 PM
263	Sagamore and Oakgrove ES could be split into PK-3 / 4-5 as the schools are in close proximity and serve simialar neighboorhoods	3/8/2026 8:17 PM
264	A school with K - 8 or 6 - 12 would be entirely too large. Additionally, it makes no sense to have 6th graders and 12th graders, or 8th graders and kindergartners, attending the same school.	3/8/2026 8:15 PM
265	Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 8:14 PM
266	Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 8:12 PM
267	I am writing to express strong opposition to any proposal to close Evansdale Elementary School or remove Evansdale from the Lakeside High School community as part of the district’s school consolidation and redistricting process. Evansdale is a vital institution within the Lakeside High School cluster, and closing it would overlook several important factors related to facilities, community investment, and future enrollment growth. First, Evansdale is well positioned physically to support long-term use and expansion. The school sits on approximately 10.1 acres, a lot size that is larger than many neighboring schools and provides ample room for future growth. The campus is unique in that it includes a large, separate play field, two playgrounds, and multiple parking areas. Because of this layout, additions could be constructed at the back of the school without sacrificing play space or parking. In other words, the site has the capacity to accommodate modernization and expansion rather than closure. The school is also well situated to manage transportation and traffic flow. Evansdale occupies two sides of a large neighborhood block, allowing for safer and more flexible traffic patterns for buses and carpool lines. This physical advantage would be difficult and costly to replicate elsewhere. Additionally, enrollment projections indicate that Evansdale’s student population is expected to increase to over 600 students by 2030. This projected growth suggests that closing the school now could create capacity problems in the near future and force the district to reopen or rebuild facilities later at much greater expense. Another critical factor is Evansdale’s unique role in the Lakeside cluster’s French language program. Evansdale’s French program is supported by a strong network of neighborhood parents, teachers, and community volunteers who provide valuable resources and assistance for students. Moving the program away from Evansdale would disrupt this vital community infrastructure that has taken years to build. The French language pathway connecting Evansdale Elementary, Henderson Middle School, and Lakeside High School has deep roots in the community. Teachers in this program have developed long-standing relationships with students and families, and older students often mentor younger ones within the same cluster. Maintaining this continuity is essential to preserving the strength and success of the program. Finally, enrollment projections themselves should be carefully examined. Forecasting future student populations is inherently uncertain, and current models may underestimate the number of children who will attend Evansdale. In many communities, projections fail to fully account for	3/8/2026 8:12 PM

	apartment developments, immigrant families, and newly arriving households who may not appear in traditional forecasting models. These populations often bring additional students into neighborhood schools over time, which can make projected enrollment numbers significantly lower than the reality that unfolds. Evansdale Elementary had this issue the last time Dekalb redistricted as 120 more students than estimated showed up for the school year because the student estimates had significantly underestimated our area and large amount of families with children continuous moving into our area. Closing a school based on projections that may undercount future students could create unintended consequences for the district, including overcrowding in neighboring schools and the loss of an established community hub. Evansdale Elementary has the land capacity, community support, and projected growth to remain a strong and sustainable school within the Lakeside cluster. Rather than closing it, the district should consider renovating and expanding the facility so it can continue to serve current and future families. Thank you for your time and for considering the long-term impact of this decision on students, families, and the broader community. Sincerely, Matt Murphy Please keep Evansdale Elementary intact and a key member of the Lakeside High School community.	
268	I will not offer any view of the grade band scenarios, other than to say that this process of consolidation and revisions to the community school policies needs to be suspended until oversight and accountability of a full time Superintendent.	3/8/2026 8:11 PM
269	I like the grade bands we have now.	3/8/2026 8:09 PM
270	Why band grades? When did having grade levels based on age stop working? Inventing a solution to a problem that doesn't exist	3/8/2026 8:08 PM
271	I do not like the idea of these extra-large schools, possibly spanning 6 grades in the same building. I like that Ashford Park feeds into Chamblee MS & HS, my student has enjoyed meeting new friends from the other feeder schools.	3/8/2026 8:08 PM
272	For the Lakeside Cluster—specifically Oak Grove Elementary and Henderson Middle School—the district should commit to keeping the traditional PK-5 and 6-8 grade bands. The alternative scenarios being discussed (like PK-8 or 6-12) would create massive campuses that dilute community involvement and resources. The current PK-5 model at Oak Grove delivers top-tier academic results because of its manageable size; altering this grade band would break a proven model that is already working. We have seen the impact of the mega school at Henderson middle and are not satisfied by the impersonalized and overwhelming structure of the school vs oak grove. The kids are lost in a sea of chaos.	3/8/2026 8:06 PM
273	Many grades do not need to be in one school together. There are so many stages of development. It is not helpful and can honestly be hurtful and damaging for young kids to be in the same school as older kids.	3/8/2026 8:04 PM
274	Alternative grading ,mastery based grading or performance based assessments.	3/8/2026 8:02 PM
275	I am open to further discussions around various grade bands being used throughout DCSD and/or each cluster. I do not think that all clusters should necessarily be required to use the same. Additionally, I think that different grade band scenarios should be looked at if it helps keep communities and legal municipalities together as they are today. However, I cannot yet speak with confidence about which grade band scenario should be specifically used by each cluster at this time.	3/8/2026 8:02 PM
276	It doesn't matter but please diversify so there is only 1 child of a specific race in the school. Equally distributed by race/ethnicity within reason.	3/8/2026 8:00 PM
277	For Dunwoody Elementary, the Pre-K–5 grade band works well because students benefit from staying in one environment for early development.	3/8/2026 7:55 PM
278	In the Lakeside cluster, maintaining a traditional PK-5 elementary structure would provide continuity for students and families and align well with the existing middle and high school pathways. Evansdale Elementary feeds into Henderson Middle School and Lakeside High School, and maintaining the traditional PK-5 / 6-8 / 9-12 configuration supports clear academic progression. If grade band adjustments are considered, it is important that they preserve program continuity, including Evansdale's French language program, which continues through the Lakeside cluster. Any grade band configuration should prioritize keeping established program pathways intact and minimizing unnecessary disruption to students.	3/8/2026 7:55 PM
279	N/A	3/8/2026 7:54 PM

280	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 7:52 PM
281	Keep as is	3/8/2026 7:52 PM
282	Pre k-5 is ideal for evansdale	3/8/2026 7:51 PM
283	I do think that Vanderlyn should be closed due to age and condition of facility. The land should be used for Dunwoody High School fields and parking.	3/8/2026 7:51 PM
284	Eh Just don't put the older kids with the younger kids.	3/8/2026 7:51 PM
285	I prefer the traditional grade bands uniformly implemented in each cluster.	3/8/2026 7:50 PM
286	I think it may be good idea to join middle schools to high schools.	3/8/2026 7:50 PM
287	I would prefer the traditional model. Breaking it up into different bands may create additional strains on buses and will require more administrative costs.	3/8/2026 7:49 PM
288	I agree that grade band restructuring may make the system look more efficient on paper. But in reality, it can create major disruptions for families and communities—especially when it is paired with school closures. The current grade bands are not the problem. What our schools truly need are meaningful investments that improve the learning experience for our children. We need smaller class sizes so teachers can give students the attention they deserve. We need better pay and stronger benefits so the district can recruit and retain talented educators and staff. We need modern technology, healthier and safer facilities, and the supplies teachers and students need to succeed. Our children deserve learning environments that inspire them—schools with vibrant classrooms, exciting playgrounds, nutritious meals, and opportunities that make them excited to come to school every day. These students are the future of DeKalb County. They deserve more than efficiency plans and closure proposals. They deserve investment, vision, and commitment. So instead of showing us plans to close schools, show us your plans to strengthen them. Show us how you will make DeKalb County schools places where children love to learn and where families want to enroll.	3/8/2026 7:47 PM
289	Evansdale is the perfect size for prek-5	3/8/2026 7:46 PM
290	I like the 4-8 grade band at WMS, but that might be because it's such a small school.	3/8/2026 7:45 PM
291	NA	3/8/2026 7:41 PM
292	What I love most about OGE is its tight knit community. There is no need to change the grade bands.	3/8/2026 7:39 PM
293	Please keep the grade bands the same and do not close Oak Grove Elementary.	3/8/2026 7:31 PM
294	Grade bands should not change at all. The some of the costs are heavily weighted including the possibility of 3, 4, and 5 year olds sharing spaces and programs with older students (12-15 year olds). Likewise, the could be many consequences to 11 year old 6th graders sharing programs and spa es with 18 or 19 year old seniors. A separate band for 4th and 5th grade students would cause unnecessary transitions that would be difficult to mananage for 8-11 year olds. One thing to consider would be to house multiple grade bands in the same facility (elementary and middle or middle and high) with clear program and occupancy and staff distinctions. This model exists in districts such as Clayton County Schools. Admin, teachers, counselors, social workers, and school psychologists could communicate more effectively especially concerning issues that impact whole families such as chronic absenteeism. Collaboration between staff could also have many more benefits. Support staff and special education services such as Speech, OT, and PT could also be utilized more efficiently with this model. Parents with students across multiple bands could find relief and greater opportunities to participate in school activities.	3/8/2026 7:31 PM
295	For the lakeside cluster - our current grade bands are appropriate. The community continues to grow and the current structure supports our growth.	3/8/2026 7:27 PM

296	Grade level bands should remain the same. The only change that I would suggest is keeping 6th grade in elementary or keeping 9th grade in middle school. Younger students should NOT be with older students in a K-9 or K-12 situation.	3/8/2026 7:26 PM
297	I am unfamiliar with any research on grade bans scenarios. I do know that research has shown that children thrive and achieve better outcomes when they are from smaller schools. It is easy for a quiet child to get overlooked in a large school.	3/8/2026 7:25 PM
298	The goal is for our children to read and write. Core curriculum and learning should be the primary focus. When the student-teacher ratio is low, learning improves. Pre-K and K should be grouped out of elementary school. Focus on 1st - 8th and 9th - 12th.	3/8/2026 7:24 PM
299	I like the idea of splitting grades apart provided good transportation options are available for families with children at multiple schools.	3/8/2026 7:24 PM
300	City of Decatur is the model - how is Dekalb really doing? Other metropolitan counties worldwide are the model - how is Dekalb really doing?	3/8/2026 7:22 PM
301	You didn't provide information on specific schools or clusters so how should we be able to reference them? Seriously	3/8/2026 7:22 PM
302	The grade band would be great for the Miller Grove cluster if it is Pk-5/ 6-12.	3/8/2026 7:20 PM
303	I am kind of confused about the grade bands and school clusters. But as for Rock Chapel and Redan, I am wondering where will those students go? Will they be bussed to Lithonia Middle that is moving? If so, a K-8 Facility might work as long as there is enough space. Because again, We can't send the students all over to Princeton and Stephenson Elementary.	3/8/2026 7:19 PM
304	There is not enough information to provide that kind of feedback. I clicked all around the website and I did not see any information how a grade band scenario will play out for the Lakeside cluster. If you genuinely want to get input you would have shared this information. As you didn't , this survey is not to be trusted	3/8/2026 7:16 PM
305	Sixth graders do not belong in a school with 12th graders. My God ,they are children. With 8th graders in with 12 graders was bad enough, then we wonder is happening to the children.	3/8/2026 7:13 PM
306	NA	3/8/2026 7:07 PM
307	Please keep the traditional grade bands	3/8/2026 7:05 PM
308	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 6:53 PM
309	Wider grade bands would contribute to more personnel issues.	3/8/2026 6:52 PM
310	The idea of a High School 6-10 is unacceptable. I attended Dekalb County Elementary School K-7 and High School 8-12. 8th grade in High School exposed children to much older high school students. Middle school allows children to be children and not be exposed to significantly older students that have achieved puberty.	3/8/2026 6:49 PM
311	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 6:45 PM
312	The Lakeside cluster should be steeped in stability.	3/8/2026 6:44 PM
313	N/A	3/8/2026 6:42 PM
314	Kittredge was a wonderful experience for us and all kids deserve the quality of teachers and	3/8/2026 6:38 PM

	resources it provided.	
315	Elementary schools need to stay small pre-k through 5th	3/8/2026 6:38 PM
316	Grouping students into grade bands based on similar age ranges, levels of emotional development, and learning maturity can create a more supportive and developmentally appropriate learning environment. It also reduces exposure to behavior models that younger students may be more likely to imitate. For these reasons, I support the PK–3 / 4–5 / 6–8 / 9–12 grade band structure for my cluster, as it better aligns students with peers who are at comparable developmental stages and supports their overall academic and social growth.	3/8/2026 6:38 PM
317	Putting middle schoolers who are currently physically assaulting one another with older high schoolers is an excellent way increase the number of violent offenses in public schools. K-8 would be potentially better but, given public schools record of not protecting students I imagine this will just increase violent incidents with smaller children.	3/8/2026 6:35 PM
318	I understand the need for making changes, but Oak Grove Elementary is the heart of the community, and it would be devastating to lose it.	3/8/2026 6:30 PM
319	It works very well (and is recognized by potential home owners) to have pre-k through 5th at Evansdale, 6-8 at Henderson Middle, and 9-12 at Lakeside	3/8/2026 6:29 PM
320	I believe the review and change of grade cluster may be beneficial in supporting students and families, meeting needs of students, and establishing a school culture and environment to better meet the growing behavioral and academic needs.	3/8/2026 6:29 PM
321	This seems like a complicated decision with no guarantee for alleviating anything.	3/8/2026 6:21 PM
322	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 6:16 PM
323	Traditional grade bands	3/8/2026 6:15 PM
324	My concern with changing the grade band scenarios is the impact to siblings in different grades and how it could drive a burden to their parents.	3/8/2026 6:15 PM
325	The families in our cluster have transportation issues, and so having students at multiple schools can be a challenge.	3/8/2026 6:10 PM
326	Keep them as they are. I am in area 2 in the Lakeside cluster.	3/8/2026 6:09 PM
327	I prefer the traditional grade ban option. What is more important is to keep Evansdale in the Henderson Middle and Lakeside cluster.	3/8/2026 6:05 PM
328	Grade banding threatens to dilute parent involvement as some families will have to travel farther to attend school.	3/8/2026 6:05 PM
329	PK-5 / 6-12 scenario is used in a lot of other countries with good success. Having attended various schools with this model, I can speak from experience that it works well for allocating teaching resources across grades (e.g., a music teacher can easily teach 7th and 9th grade) and socialization of children. While keeping grade bands the same can help with efficiencies and uniformity, I don't believe that it's a strict requirement.	3/8/2026 6:05 PM
330	Oak grove will continue to get more students as these new families children become school age.	3/8/2026 6:04 PM
331	Need 3 bands given how drastic kids develop over that time and how differently they develop. Don't need to combine into 2 bands. Current baseline works best.	3/8/2026 6:00 PM
332	Ideal is to maintain standard K-5, 6-8, and 9-12 grade bands unless specific scenarios require and communities support them.	3/8/2026 5:58 PM
333	There is not enough information about how it will be structured.	3/8/2026 5:56 PM
334	I don't agree with the PK-8 grade bands for elementary schools as I believe it causes social	3/8/2026 5:56 PM

	stagnancy with the students and long term is not in their best interest. I think students changing schools and meeting new students at each school provides a better, more engaging social environment at the school. I think the grade bands should either stay as they are or go with the PK-3/4-5 scenario.	
335	I’m not sure about this. I think sixth graders are too young to be in a high school environment.	3/8/2026 5:51 PM
336	APES (my child's school) currently feeds into Chamblee Middle School which feeds into Chamblee High School. I do not endorse the type of grade band scenarios that have been mentioned. I believe in middle schools are the ideal step for children between elementary school and high school. I believe the maturity level of students greatly differs in the grade bands (elementary, middle and high school) currently setup in my child's school cluster and believe mixing the two will inevitably lead to social interactions between grades that do not currently exist that may be detrimental to the typical and proper social development of children. I believe the DSCD should strive to implement these three distinct stages of school in each school cluster throughout the district. I also believe that, if it made sense, more segmentation (more schools with smaller grade bands/less grade levels) is a more acceptable approach than consolidation into fewer schools with greater grade bands/more grade levels).	3/8/2026 5:51 PM
337	See above Evansdale elementary. Henderson Middle School need to stay the same	3/8/2026 5:48 PM
338	Unless I'm mistaken, specific grade banding was not proposed for specific schools. The 6th-12th band and the PK-3 w/ 4-5 bands seem to be the best	3/8/2026 5:44 PM
339	I prefer k-6 and 7-12 grade bands. Some middle school courses at Chamblee Middle already align with HS curriculum (and GPA) and academically this will keep things more in line. If a school like Kittredge were to be embedded, this would allow school like Ashford Park to keep more of it's community intact. It would also be less disruptive for Kittredge students to be switching schools from ES to MS for just 2 years.	3/8/2026 5:39 PM
340	We are open to grade band changes but not at the cost of closing our neighborhood school.	3/8/2026 5:36 PM
341	The Southside schools of the district where resources are low	3/8/2026 5:28 PM
342	Grade band 6- 12 is not desirable and detrimental to the younger students	3/8/2026 5:22 PM
343	6th graders don’t need to be in the same building as 12th graders	3/8/2026 5:22 PM
344	We experienced k-8 at The Museum School of Avondale Estates and were very pleased with the arrangement. The familiarity and comfort that students, families, and faculty build with each other is special. The ease of not having separate drop-offs for different schools is nice for families of multiple k-8 children. Having only one transition felt easier and more impactful for the students. That being said, I do agree that without excellent leadership and vigilant involvement, it could be an issue having multiple ages together in one building. The Museum School of Avondale Estates does a fantastic job of managing the different ages and stages well.	3/8/2026 5:21 PM
345	Due to the vast developmental difference between younger and older children, pairing PK–8 students with 6–12 students presents serious hazards to equality, safety, and healthy development. Younger pupils may suffer as a result of this mix, and older students may face unreasonable demands. Being around much older peers might expose younger children to adolescent behaviors too soon, impeding optimal developmental exploration when they are still forming their identity and emotional regulation. Equity requires that every age group have access to appropriate settings and resources, which can be difficult in a combined PK–12 system.	3/8/2026 5:20 PM
346	Referring. very confusing	3/8/2026 5:20 PM
347	I do not believe 6-12 grade should exist in any scenario	3/8/2026 5:17 PM
348	I am happy with the traditional grade bands. However, if it meant that APE could stay open with a PK-3 grade band, then we’d be ok with that scenario.	3/8/2026 5:15 PM
349	I believe that sticking with prek-5, 6-8 and 9-12 is most appropriate. Each of those has such different dynamics based on their age that being in an environment with similar age groups is extremely critical for their development.	3/8/2026 5:13 PM
350	Some elementary schools used to go to 7th or 8th grade. This might be a better alternative than facility scenarios because maintain sense of community. It worked before.	3/8/2026 5:13 PM

351	Ideal grade bands should have elementary run PK- 6, Middle School 7-8 and High School 9-12, It should be consistent for the entire system.	3/8/2026 5:12 PM
352	I would like the current Chamblee cluster and grade bands to stay as they are.	3/8/2026 5:11 PM
353	Lakeside cluster — as long as you keep the attendance lines the same in this cluster, you can do research to determine which band works best.	3/8/2026 5:10 PM
354	I do NOT think you should put 6th graders into a high school setting. They are just too young. If you change the bands to 1-6 for elementary and 7-12 for a combined middle and high school, then it would be fine.	3/8/2026 5:09 PM
355	The preK-8 seems like a good option for low enrollment areas of the county. Whereas, the PreK-3, 4-5 configuration would better serve high enrollment areas of the county. I believe a hybrid approach based on the varying needs of the county is a good approach. One size does not fit all.	3/8/2026 5:08 PM
356	It is a terrible idea to have PK or K students attending the same school as 8th grade students, and a terrible idea for 6th grade students to attend the same school as a 12 grade student. There is a reason why the traditional grade levels have been lumped together. The only scenario outside of traditional that would appear to make sense would be PK-3 / 4-5 / 6-8 / 9-12.	3/8/2026 4:57 PM
357	We are in the Kingsley/Vanderlyn etc cluster. I do like the option of closing Vanderlyn and rezoning students across the other elementary schools to increase their capacity. This would include growing Kingsley	3/8/2026 4:56 PM
358	Leave the grades alone in Lithonia. You don't want High school issues among your middle schoolers, sex too soon, or improper exposure. 6-8th needs to remain separate from elementary kids, to refrain from bullying downward, and to avoid bullying downwards from High Schoolers to Middle Schoolers.	3/8/2026 4:56 PM
359	I want to see the Ashford Park community stay at the Chamblee Cluster because it’s a high performing school. I don’t want to see Kittredge closed or the magnet ‘sunsetted’ because that’s not in the students best interest.	3/8/2026 4:55 PM
360	Ashford park through chamblee cluster	3/8/2026 4:54 PM
361	Not exactly sure of the question, but if the buildings will remain in the possession of DCSD, they could possibly be leased to schools looking for charter solutions, which may also attract more families, and boost enrollment of nearby public schools.	3/8/2026 4:53 PM
362	Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth.	3/8/2026 4:53 PM
363	We have multiple young children who attend Ashford Park	3/8/2026 4:42 PM
364	We do not need grade bands.	3/8/2026 4:39 PM
365	I am familiar with the CSD grade bands and believe they create beneficial environments for both students and staff. The PK-2, rather than the proposed PK-3, is preferable because students begin taking the GA Milestones in third grade.	3/8/2026 4:39 PM
366	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization and current overutilization.	3/8/2026 4:37 PM
367	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands	3/8/2026 4:35 PM

	of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization-gap.	
368	The current grade bands appear to be quite functional for the area, students involved and local school structure and capacity.	3/8/2026 4:34 PM
369	I prefer the traditional grade bands.	3/8/2026 4:33 PM
370	Maintaining current traditional school bands. These Ashe's are in very different stages of life and maturing and have different needs across the board including academic, timing of school, extra curricular, social needs, etc. in the Dunwoody cluster, our schools have grown to be family friendly, diverse, and accessible- especially Chesnut Elementary and Peachtree Middle. They provide excellent walk ability and shared resources and collaboration between the schools.	3/8/2026 4:28 PM
371	Oak Grove Elementary is the best school ever. It shouldn't close.	3/8/2026 4:25 PM
372	Oak Grove Elementary is the greatest school in the nation	3/8/2026 4:25 PM
373	Oak grove elementary is the best school ever	3/8/2026 4:25 PM
374	I think grade bands should be created based on the needs and input from school communities.	3/8/2026 4:25 PM
375	Oak grove elementary is the best school that has ever existed.	3/8/2026 4:24 PM
376	Research has shown that students who are the oldest in their school) (k-8) during middle school years are more successful I went to Dekalb in the 8Os and 90s with no MS K-7 and 8-12…no transition wasn't appropriate 18 year olds don't need to be in school with 12 year olds It's not developmentally appropriate	3/8/2026 4:24 PM
377	PreK-8 would be great, if logistically feasible.	3/8/2026 4:23 PM
378	I understand the concept, but don't believe it is relevant to my area.	3/8/2026 4:22 PM
379	The neighborhoods served by Oak Grove, Henderson Middle and Lakeside High School are experiencing economic growth through construction of the new Arthur Blank Hospital and the expansion of the Emory healthcare system. New home construction is occurring in the area. These schools need to remain open to handle the growth.	3/8/2026 4:21 PM
380	Traditional PK-5 grade bands remain appropriate in a high utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term , significant, underutilization.	3/8/2026 4:20 PM
381	This would propose major problems due to the significant differences in ages not to mention different levels of maturity	3/8/2026 4:14 PM
382	With limited flexibility on cutoffs, I support a traditional grade band of elementary, middle and high school that is consistent across the district. I hold this opinion as a "military brat" who frequently moved schools and districts, a former 7th and 8th grade teacher, and now parent. The needs of the populations in these age groups are varied and can be most appropriately addressed by programs, schools sizes and buildings specific to them. At the same time, I think minimal transitional years during schooling are beneficial and that the experience of advancing from band to band is an important psychological milestone for students. I think the traditional three grade band structure, provides a happy medium for such. In instances where campuses are geographically in close proximity, I believe an upper(4-5) and lower(k-3) elementary split can work, provided there is no increase in grade level size or shake up of student populations between the two buildings. I would also support Pre-K classes being housed on their own campuses as opposed to with elementary students.	3/8/2026 4:14 PM
383	This will definitely cause Major issues due to the maturity level difference of the younger students being in the same facility of older students	3/8/2026 4:13 PM
384	Está bien	3/8/2026 4:12 PM
385	I don't like the idea of 6-12 high schools.	3/8/2026 4:08 PM
386	I strongly support the Traditional PK–5 model for the Lakeside cluster. Smaller, community-based K–5 schools like Evansdale are the backbone of parent involvement. My family chose Evansdale specifically for its intimate community feel and its French Immersion program—qualities that are often lost in larger PK–8 configurations or 'super-schools.' Furthermore, 'split'	3/8/2026 4:07 PM

	models (PK–3 / 4–5) would be disastrous for language immersion programs that require year-over-year continuity in the same building. To retain families in the DeKalb system, the district must prioritize configurations that maintain stable, localized school communities rather than moving toward large-scale consolidation that increases travel time and decreases parent engagement.	
387	Current PK-5 grade bands remain appropriate because it is in a high utilization, growth corridor. Structural grade reconfiguration should first focus on those with current and likely future underutilization.	3/8/2026 4:06 PM
388	I think the bands should stay as is. With the consolidations, do you feel the bands are needed to house fourth and fifth graders in a separate facility to provide more space for grades PRE-k-3 and to decrease schools being overpopulated? If so, it may be okay to do the PRE-K-3 and 4and 5th? Will this cause any conflict with parents who drive their children to school commuting from one school to another?	3/8/2026 4:06 PM
389	Could work for certain areas	3/8/2026 4:04 PM
390	It is fine the way it is. Or go to K-78and then 9-12 high school	3/8/2026 4:02 PM
391	I think K-8 is a bit of a stretch because of the age and maturity level of students' in 5th-8th grade	3/8/2026 3:59 PM
392	Keep Brockett Elementary Open	3/8/2026 3:56 PM
393	I believe each cluster should be considered for what the needs are for that specific cluster. Trying to force a "one size fits all" approach is not only naive it is not realistic. Why not leverage Oak Grove Elementary as a 4th and 5th grade academy for the LHS cluster?	3/8/2026 3:56 PM
394	I think it isn't a great idea. I'm glad this isn't going into effect until later as I'm worried about student safety.	3/8/2026 3:52 PM
395	No specific feedback.	3/8/2026 3:52 PM
396	I am very cautious about the K-8 or the 6-12 grade bands due to having such young kids with the older kids. My experience is that the younger ones were intimidated by the older kids and the older are held back having to accommodate the younger ones.	3/8/2026 3:49 PM
397	We are in an overcrowded area.	3/8/2026 3:45 PM
398	The lakeside cluster of schools is positioned in a growth area tied heavily to heath are giants in the region. It makes no sense to impact an area with stability in the population and expected increases in attendance.	3/8/2026 3:42 PM
399	I dislike the grand band scenarios that cluster 6-12 together. Developmentally, there's a very large difference between an 11-year old 6th grader and a 17-year old 12th grader. Not to mention the pressures that come with puberty, bullying, social media, being around the other gender, etc. Grouping middle and high school together is a recipe for disaster.	3/8/2026 3:31 PM
400	As a parent of a 7th grader at Henderson middle, I am opposed any redistricting for Lakeside Cluster. I bought my home specifically so my child could attend Lakeside.	3/8/2026 3:31 PM
401	I don't agree with the grade bands; we have done this in DeKalb before the current middle schools were built	3/8/2026 3:29 PM
402	I do not believe changing grade levels would be beneficial. But if needed PK-3rd, 4th-7th, 8th-12th. Young middle school students would not mesh well with high school students.	3/8/2026 3:28 PM
403	The current PK–5 grade band at Ashford Park Elementary is the most effective model because it fosters a stable, consistent learning environment where students can grow from early childhood through their formative primary years without the disruption of unnecessary transitions. This continuity allows teachers to deeply understand each student's developmental trajectory and maintains a cohesive school culture where older students serve as mentors to their younger peers. While a K–8 model is an intriguing alternative that could offer even greater long-term stability, it is practically unfeasible given our current infrastructure. Transitioning to a K–8 configuration would require a massive facility to accommodate the diverse needs of nearly a decade's worth of students; Ashford Park's current footprint simply cannot support such a significant expansion without compromising the very community intimacy and green space that make it so successful.	3/8/2026 3:28 PM

404	I'm not a fan of the different grade bands - the difference in maturity level and lifestyles is too great to mix certain grade levels together. Im happy how it is now.	3/8/2026 3:23 PM
405	Staying traditional pre-k-5th, middle, and high school.	3/8/2026 3:22 PM
406	If my suggestions above were implemented, the following questions become unnecessary	3/8/2026 3:19 PM
407	I would like the Ashford Park cluster to stay on Chamblee Middle and High School track.	3/8/2026 3:19 PM
408	No to banding elementary schools in south Dekalb	3/8/2026 3:17 PM
409	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 3:15 PM
410	I don't feel safe about the grace bands. I don't feel comfrterable sending my 6th grader to school with an 18 or 17 year old.	3/8/2026 3:13 PM
411	I don't have a strong opinion on the grade bands. My only thought on the second option is that it's a lot of moving around and transitions for kids.	3/8/2026 3:08 PM
412	unsure	3/8/2026 3:07 PM
413	When considering grade band scenarios, please think about how many times a student has to more to a new school. While I want my children to have great classes and teachers, I'm concerned that if the schools are far away siblings will be split up into different buildings. It is hard for parents to travel to many different schools every single morning.	3/8/2026 3:06 PM
414	I do not see changing grade bands to be a worthwhile endeavor, but don't have a strong feeling.	3/8/2026 3:04 PM
415	I disagree with the proposed grade band	3/8/2026 3:02 PM
416	I like the traditional setup, having younger kids with their grade levels and middle school with middle.	3/8/2026 3:02 PM
417	No preferences on schools	3/8/2026 3:00 PM
418	For the Lakeside cluster, including Oak Grove Elementary, the traditional PK–5 elementary grade band should remain in place. Schools in this cluster are not experiencing the level of sustained underutilization that would justify restructuring grade bands into configurations such as K–2 and 3–5 or other split models. Maintaining the PK–5 structure is particularly important for elementary-aged students. A single elementary school allows students to build long-term relationships with teachers, administrators, and peers while maintaining continuity in academic support and school culture. Splitting grade levels across multiple campuses would create additional transitions for young students and increase logistical challenges for families with multiple children. Additionally, grade band restructuring in this area could contribute to larger, more centralized "mega schools," which often reduce the sense of community and parental engagement that are key strengths of neighborhood elementary schools. The Lakeside cluster, including Oak Grove Elementary, has strong community support and high levels of family involvement, which are important contributors to student success. If the district is considering alternative grade band structures, those changes should be prioritized for clusters experiencing long-term, significant underutilization. In higher-demand areas such as the Lakeside cluster, maintaining the PK–5 model better aligns with current enrollment trends, supports community stability, and preserves the successful educational environments that families rely on. For these reasons, I recommend maintaining the PK–5 grade band structure for Oak Grove Elementary and other elementary schools in the Lakeside cluster.	3/8/2026 2:57 PM
419	Traditional grade band would best serve the Evansdale community.	3/8/2026 2:50 PM
420	The grade band 6-12 would be a disadvantage to our children. 11 -13 year olds should not be attending schools with 17 year olds. If safety is a concern for DeKalb, this should not be done. The parents in our community do not feel safe with the 6-12 grade band. This is in reference to the Cedar Grove Cluster.	3/8/2026 2:48 PM
421	Whatever grade band you choose, Keep Oakgrove in the same place. You tried messing the	3/8/2026 2:47 PM

	district 15 years ago, and it failed.	
422	I believe this should be guided by scientific studies and not convenience of school building availability. I believe research shows that smaller grade bands give greater opportunity for interventions for students. Larger grade bands offer more monetary effectiveness. This deicion should be student centered.	3/8/2026 2:47 PM
423	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 2:46 PM
424	I think the current grade bands make sense. While it would be nice to have fewer transitions, the extremely large schools that would be required, and the grouping of children of significantly different ages, is a significant cost. If the district does reduce to two bands, my preference would be K-5 and 6-12 (or even better, K-6 and 7-12, though I did not see that proposed).	3/8/2026 2:46 PM
425	Tucker should remain middle grades	3/8/2026 2:45 PM
426	Traditional PK-5 grade bands remain appropriate in a high utilization growth corridor Structural grade configuration should focus first on clusters with long term, significant utilization	3/8/2026 2:45 PM
427	Not sure buildings are big enough to facilitate grade bands change	3/8/2026 2:45 PM
428	Traditional grade bands would best serve Evansdale Elementary.	3/8/2026 2:44 PM
429	It is difficult to give feedback on potential grade band scenarios when we don't understand at which schools and/or programs that they will be applied to. Again, the lack of clarity and consistency creates more questions than reassurances.	3/8/2026 2:43 PM
430	I do not have strong views about alternative grade-band models in general. I will say that Oak Grove's current model clearly works, and I would hesitate to try to fix what's not broken. I would be open to changes if there is actual evidence showing they would improve things for the students and their educators. To my knowledge, however, no such evidence has been offered. In response to a concerned parent's question during one of the February SAP webinars, a spokesperson for the consulting firm dismissed the very idea of basing decisions on empirical studies because, in his view, such studies can be biased toward whatever preordained outcome one prefers. I find that attitude deeply objectionable and concerning. Someone who despairs of the possibility of making decisions on the basis of facts has no business imposing his will on our public school district.	3/8/2026 2:40 PM
431	I belive the traditional grade bands make the most sense developmentally for our children. I also think combining students into giant schools is not a good idea, and will harm our student's education and sense of belonging to a community.	3/8/2026 2:40 PM
432	Neighborhood parent teacher and community volunteers provide needed resources. We also have a vital French program.	3/8/2026 2:35 PM
433	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 2:31 PM
434	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 2:31 PM
435	I do not support grade band scenarios that would shift Evansdale students into different	3/8/2026 2:30 PM

	clusters or break the existing K–5, 6–8, and 9–12 Lakeside feeder pattern. Evansdale, Henderson, and Lakeside function as a cohesive pipeline—academically, socially, and through programs like French that rely on continuity across all three schools. Any scenario that reassigns Evansdale to Tucker or Sequoyah, or alters its grade band, would disrupt that stability and fracture a long-standing neighborhood community. I strongly prefer maintaining Evansdale as a K–5 school within the Lakeside cluster, aligned with Henderson Middle and Lakeside High.	
436	See below	3/8/2026 2:27 PM
437	From my understanding oak grove would be combining with sagamore, except sagamore does not have the seats or building space to accommodate such a huge influx of students. My colleague who is at sagamore is saying they are proposing putting trailors in the field for the new students which would essentially takeaway their outdoor space for sports. If this happens, I will be putting my daughter in private school which I didn't want to do because I wanted her to be part of the community she lives in but myself and the other professional parents will be highly considering it if this goes through, again reducing total enrollment.	3/8/2026 2:26 PM
438	Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 2:24 PM
439	The Ashford Park grade band should remain unchanged. If the students are reassigned to John Lewis Elementary School, the grade bands should remain intact.	3/8/2026 2:22 PM
440	The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made.	3/8/2026 2:20 PM
441	Considering the expansion of healthcare in George and the jobs being added the traditional pre-K through fifth grade remains appropriate. Structural grade reconfiguration should focus first on the clusters with long-term underutilization.	3/8/2026 2:19 PM
442	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 2:19 PM
443	I'm unsure what the options are in this scenario.	3/8/2026 2:18 PM
444	It is best to avoid grade bands that are wider than the traditional grade bands (PK-5, 6-8, 9-12). There are significant safety risks associated with combining preteens and young adults in the same school (6-12), and with combining preschoolers and adolescents in the same school (PK-8).	3/8/2026 2:18 PM
445	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 2:17 PM
446	I'd like the grade bands to remain the same. Consolidating grade bands removes the ability for students to develop and mature one stage at a time. Again, what does the data say about this? Please take feedback from experts on development stages.	3/8/2026 2:16 PM
447	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in	3/8/2026 2:16 PM

	a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	
448	Traditional PK-5 grade bands remain appropriate in a high utilization growth corridor. Structural grade reconfiguration should focus first on clusters with long-term underutilization.	3/8/2026 2:12 PM
449	Stability should be prioritized for the Lakeside cluster. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briar Lake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment is consolidation proceeds. This cluster is not experiencing structural decline. It is located next to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional pre-K through five grade bands remain appropriate and a high utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 2:07 PM
450	Not a fan of grade band width stick with traditional system that in place now. Putting too many grade levels in one school. Hard to adjust when moving from elementary to high school. Better to transition to middle then to high school. Noticing closures are more affecting the South Dekalb area than others.	3/8/2026 2:06 PM
451	Evansdale Elementary: best if renovated or expanded. It has 10.1 acres, bigger than any neighboring schools. Has unique and large playgrounds and multiple parking lots. The site can accommodate additions in the back while still having ample play and parking space. The school also does well with traffic as it takes up two sides of a large neighborhood block.	3/8/2026 2:06 PM
452	Porque razón quieren cerrar la escuela	3/8/2026 2:04 PM
453	At 10.1 acres, Evansdale 's lot size is bigger than neighboring schools recommended for expansion. Evansdale is unique in that it has a large, separate play field, two playgrounds, and multiple parking lots. our site can accommodate additions in the back of the school and still have ample play and parking space. Evansdale is uniquely situated to accommodate increased traffic, as it takes p wo sides of a large neighborhood block. Evansdale's enrollment is projected to increase to over 600 by 2030.	3/8/2026 2:00 PM
454	Protecting young elementary students and small schools are priorities for me. Kindergartners do not belong in school with 8th graders.	3/8/2026 1:58 PM
455	For lakeside leave the cluster as is. Oak grove. Sagamore. Briarlake. Enrollment is high at our school Oak Grove.	3/8/2026 1:57 PM
456	I believe that each cluster should have the same grade bands. The traditional PK-5, 6-8, 9-12 would be the best for learning within their age groups.	3/8/2026 1:57 PM
457	Great band scenarios should also be optimized for best learning environment for students of all ages not necessarily for operational efficiency	3/8/2026 1:57 PM
458	Younger students should not be grouped with students that are significantly older	3/8/2026 1:56 PM
459	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 1:56 PM
460	K-8	3/8/2026 1:55 PM
461	If grade bands are adjusted, it should be done in a way that maintains stability for elementary students and minimizes transitions. For the Oak Grove cluster, maintaining a traditional elementary structure helps preserve continuity and community stability while enrollment continues to grow in the area.	3/8/2026 1:54 PM
462	N/A	3/8/2026 1:42 PM
463	I think smaller schools are better for the community and for students. I realize they are more expensive to operate but there should be a balance of both.	3/8/2026 1:38 PM
464	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized.	3/8/2026 1:33 PM

	Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	
465	I think Oakgrove Elementary should remain PK-5. At one time, thee were no middle schools, but it was determined that have middle schools had advantages.	3/8/2026 1:30 PM
466	I disagree that grades should be together. I think that schools should stay as the traditional way Pre-K-5, 6-8, and 9-12. The reason why I believe this is because students in Pre-K or other grades lower than middle school grade could get bullied or they can get hurt.	3/8/2026 1:29 PM
467	I like the grade bands as they currently are. If you consolidate the grade bands, I think 6th graders are too young to be in the same school with high school seniors.	3/8/2026 1:28 PM
468	I prefer the traditional tier system	3/8/2026 1:27 PM
469	The current banding tiers for best with the social emotional stratification while not expanding the need for buildings as the second choice does with an expansion of tiers. Grouping 6th and 7th graders with high school students is too likely to result in adverse outcomes with the current administrative capabilities of the high school.	3/8/2026 1:27 PM
470	Magnet program at Chamblee should remain there- it is a proven successful program that should remain in its place, elevating DCSD prestige in the area and delivering consistently top results	3/8/2026 1:25 PM
471	I don't see data, supporting evidence, or anecdotal evidence that suggest alternative grade bands would improve educational outcomes or resource allocation.	3/8/2026 1:25 PM
472	I initially moved here from rural areas in Georgia where we model Pre K - 2, 3-5, 6-8, and 9-12. It works fabulously. The focus on student foundational academics is a lot more successful.	3/8/2026 1:22 PM
473	If split and different from today, then k- 7 and 8-12 might wok, but overall I'm concerned about how well the district would be able to effectively manage the transition and the emotional and physical risk factors that might be introduced.	3/8/2026 1:19 PM
474	If changes need to be made, I like prek-3, 3-5, 6-8, 9-12, otherwise I prefer current for a smaller school.	3/8/2026 1:19 PM
475	The idea of 6-12 is a little shocking - such a large age gap and degree of maturity.	3/8/2026 1:18 PM
476	Using grade band alternatives to maximize the utility of facilities should definitely be considered. I do not have strong feelings on any of the alternatives under discussion	3/8/2026 1:17 PM
477	The Lakeside corridor is consistently the top performing in DeKalb. It's not based on sociopath economics but in excellent leadership.	3/8/2026 1:15 PM
478	I like the traditional bands. However, I am not opposed to K-8 where it makes sense. I think there is too much transition with some of the other grade band scenarios.	3/8/2026 1:12 PM
479	This would need to be done very carefully. There is such a vast difference between the physical and emotional maturity when combining a wide range of grades/ages. The reference to private and Catholic schools doing this with grades seems apples to oranges. Private schools can more quickly remove students who appear to be a problem. Also, the private schools tend to be much smaller, have more control over student acceptance, and I believe most in my area end or only start around middle schools years (e.g., something like K-middle school, and then have to change schools somewhere in middle school through high school.). This applies to all clusters.	3/8/2026 1:10 PM
480	I have no real feedback to shifting grade bands, this should be whatever is most efficient.	3/8/2026 1:09 PM
481	No matter the school or cluster, having 6th and 7th graders with high schoolers is a bad idea. I'm concerned about older kids preying on younger ones.	3/8/2026 1:09 PM
482	I like the pk-5, 6-12 grade band probably the most and as an alternative I think the pk-2, 3-5, 6-8, 9-12 grade banding that the dunwoody cluster uses can also work well here.	3/8/2026 1:08 PM

483	This comment is more general and would apply to any school or cluster: I think there are significant safety and resource reasons to avoid combining such a wide range of ages/developmental phases in one condensed area. - Shared spaces (e.g., cafeteria, gym, bathrooms, hallways) would require additional monitoring to ensure the safety of the smaller kids. - Libraries would need to be expanded to house the variety of materials needed for such a wide range of learning. - Teachers for the arts subjects (e.g. music, drama, visual arts) would require a much wider range of skills and materials than they would if allowed to focus on a smaller age range; I would also worry that the music, drama, and physical education of younger kids would suffer because of time constraints and split focus with higher visibility activities for older kids that generate money for the school (e.g., sports, marching band, theater productions). - Hundreds of high schoolers driving through parking lots with classes full of Kindergartners passing through them is a recipe for disaster.	3/8/2026 1:07 PM
484	I hope the fact that Doraville United will be going to Chamblee Middle and then High doesn't mean the district end up eliminating a county-wide, cross-district magnet program from Chamblee. These very successful program is one of the best programs DCSD has to offer, and it delivers results every year. KIttredge, and the Chamblee middle and high, are top performers. Facilities and teachers are already built for these students' success. Magnet programs are elevating this district's performance and appeal among public education options in metro Atlanta. Maintaining strong academic pathways for motivated students should remain part of the district's long-term vision, regardless of how facilities and boundaries evolve.	3/8/2026 1:04 PM
485	I think grading banding is fine. Upper and lower elementary or middle schools is fine.	3/8/2026 1:00 PM
486	High achiever magnet program 4-6 is a tested and true program at Kittredge with fantastic results. The kids need to be mature enough to handle a schedule in which kids move classrooms for different subjects, and fourth is the perfect grade to start this. A 7-12 high achiever magnet jr high/high would be great at a school that is large enough to have different wings, which Henderson Middle has.	3/8/2026 12:56 PM
487	I don't know what this means	3/8/2026 12:49 PM
488	Hawthorne, Vanderlyn and Oak Grove should remain pk thru 5th grade.	3/8/2026 12:48 PM
489	I am vehemently opposed to a 6-12 grade high school. Sixth graders should not be mixed with older teenagers. The influence and treatment by older students would be bad for the younger students.	3/8/2026 12:46 PM
490	I think why the bands may help with resources they ultimately would be a disservice to the students who should be the first consideration!	3/8/2026 12:46 PM
491	Grades 6 through 12 is a very large age group. That's a lot of older influence for the younger kids, for good or bad.	3/8/2026 12:44 PM
492	Stability for the Lakeside cluster-Oak Grove, Sagamore Hills and Briarlake-should be a priority for the district. Achievement and testing is so important, why would you close Oak Grove when it is one of the highest performing schools in Dekalb County?	3/8/2026 12:43 PM
493	If there has to be a grade band. In my opinion, this is the more sensible option PK-3 / 4-5 / 6-8 / 9-12	3/8/2026 12:37 PM
494	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 12:36 PM
495	I advocate keeping traditional age bands. My concern with the grade bands is that you are gathering students from a wide area. This will likely include some students from an area where parents have high involvement and some students from an area where parents have low involvement. This will dilute overall efforts and might drive the high involvement parents to charter and private schools. Furthermore, when you gather people from a wide area, it will be harder for parents to volunteer and attend functions due to distance. You will have less parent involvement.	3/8/2026 12:34 PM

496	Keep the younger kids away from the older kids as long as possible.	3/8/2026 12:30 PM
497	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 12:29 PM
498	Not a good idea. Mixing different age groups and learning developments can be chaotic. Especially for children who are gifted but not in gifted classes.	3/8/2026 12:29 PM
499	I recommend keeping Oak Grove Elementary at PreK-5.	3/8/2026 12:24 PM
500	I understand the general drive to have bigger schools to drive economies of scale but believe that smaller, community based schools are more effective. Having had a child go through each Henderson Middle and Chamblee Middle, I noticed a big difference in the ability of the staff to oversee operations at Chamblee, which was much smaller at the time. It's a big bold initiative and think such a major shift should be done in one cluster first to see if it works to improve student outcomes rather than rolled out district-wide all at once	3/8/2026 12:24 PM
501	Grade Bans to me are not needed	3/8/2026 12:16 PM
502	Evansdale Elementary	3/8/2026 12:13 PM
503	I would like to see Pk-8 at Austin.	3/8/2026 12:05 PM
504	I think the Lakeside cluster should be PK-K, 1-6, 7-8, 9-12. Henderson Middle is underutilized due to parents sending their children to Globe and private school and will be more so if Pleasantdale leaves the cluster. Henderson Middle should be used for the Dekalb 7-12 high achiever magnet school. Use Henderson Mill as a PK-K, the remaining schools for 1-6, and remodel the former Globe/Heritage site for the junior high, 7-8. It has great proximity to Lakeside and can make use of its fields.	3/8/2026 12:00 PM
505	The bands should be based on what is best for the kids, ie what is best for peer groups for the kids!	3/8/2026 11:58 AM
506	Oak Grove Elementary School for PK-5	3/8/2026 11:57 AM
507	Developmentally I think that the grade bands need to be reconsidered. As a middle school educator there is a huge shock for elementary school students entering middle school in sixth grade. Additionally, there is a huge maturity growth that occur occurs between seventh and eighth grade. So I would propose a pre-K a three band a 4 to 7 band and an 8 to 12 band. Additionally, I believe that early childhood matters greatly impact the rest of a child's educational career so we need to do whatever is necessary to make sure that we support those primary years from a programming level. We can't afford as a community to ignore those needs due to our financial needs. I believe it will come back to bite us in the long run if that is ignored.	3/8/2026 11:57 AM
508	I am open to some of the scenarios presented, and would prefer this tactic if it can limit school closure and consolidation.	3/8/2026 11:53 AM
509	I prefer the existing grade band split (K-5,6-8, and 9-12), but believe these bands could be changed on a school/cluster basis if that makes the most sense given the physical resources of the cluster.	3/8/2026 11:51 AM
510	Grade bands could make sense in elementary school but not combining middle and high school grades	3/8/2026 11:45 AM
511	I am in favor of a K-3 grade band if it frees up funding to reduce class sizes. It is outrageous and NOT safe that ONE kindergarten teacher can have 26 students. The research is overwhelming that class size has long lasting effects on success and the biggest impacts are in lower elementary grades. Adding a paraprofessional helps but it does not solve the fact that classes are TOO BIG. REDUCE CLASS SIZES!	3/8/2026 11:44 AM
512	I don't love changing the current grade bands unless there is a big financial savings associated with it.	3/8/2026 11:40 AM

513	Evansdale French program is unique to the lakeside cluster so it’s critical that Evansdale stays with Lakeside high school.	3/8/2026 11:37 AM
514	I would prefer to keep the traditional grade bands	3/8/2026 11:35 AM
515	I feel the traditional band is the best.	3/8/2026 11:34 AM
516	Segregation of age groups into bands that support growth emotionally is important, however I am a product of a different band division than my children and would allow that decision to be made by professionals.	3/8/2026 11:31 AM
517	The 6-12 grade band does not seem to be ideal. But pre-k -4, 5-7 and 8-12 may work, with some separation within campuses of older and younger students at the high school level.	3/8/2026 11:30 AM
518	I prefer to keep them as is PK-5, 6-8, 9-12. I think there is value in having multiple grades in a school so younger students can look up to older students and older students can mentor younger students. It allows for some stability and familiarity in our students lives.	3/8/2026 11:30 AM
519	We do not. Red to be mixing such young children with HS, will dilute both experiences	3/8/2026 11:29 AM
520	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 11:28 AM
521	Bands with fewer grades will cause longer commutes for parent and children and loss of community. 6-8 is a difficult time already for students and moving them in with high schools can make these years even more challenging.	3/8/2026 11:26 AM
522	As a whole, I oppose the proposed PK-8 grade band configuration within the county. This model is fundamentally incompatible with the developmental needs of elementary-aged children and the specific needs of our community. 1. Developmental Incompatibility: There is a profound gap between the social-emotional needs of a Pre-K student and a 14-year-old in 8th grade. Forcing these distinct age groups into a single campus creates a 'one-size-fits-all' environment that serves neither well. Younger children deserve a space specifically reserved for childhood, free from the social pressures and complex peer dynamics of early adolescence. 2. Inefficiency of the 'Mega-School' PK-8 Model: DCSD data indicates that a PK-8 model requires upwards of 900 students to be operationally viable. This would create exactly the type of 'mega-school' environment that research shows is detrimental to student achievement and parental engagement. 3. Safety and Logistic Concerns: A PK-8 configuration introduces significant safety risks, particularly regarding busing and shared common spaces. Mixing adolescents with preschoolers in hallways or during transitions is developmentally inappropriate and places an undue burden on staff to manage vastly different behavioral expectations. Different ages have different core needs to be successful. In addition, a staff member should not be teaching or being an administrator to that wide band of age span. Staff operate better under smaller grade parameters. Teachers have their sweet spot for ages, ones that they can teach and focus more attention and energy on that particular grade. Conclusion: I urge the district to maintain a traditional PK-5 elementary model. This allows our schools to remain specialized in early childhood development and ensures our children can remain 'kids' in a safe, age-appropriate setting before transitioning to a dedicated middle school environment."	3/8/2026 11:23 AM
523	Transitions are important for development and preparation for college and adulthood. I’d like my kids to go to separate schools for k-5, 6-8, and high schools.	3/8/2026 11:21 AM
524	I find it interesting that the system is now deciding to go back to grade band scenarios that existed years ago. Perhaps if the system would adopt “if it isn’t broken then don’t fix it”, we might not be where we are now today.	3/8/2026 11:20 AM
525	We have school shootings in high schools across our country, almost daily, and we want to mix middle and high school students without addressing gun laws and violence? Don’t make our families pay with their lives. And differing grade bands across the district restricts mobility for public school students.	3/8/2026 11:20 AM

526	Leave Oak Grove Elementary as is.	3/8/2026 11:18 AM
527	I noticed that no thought was given to a K-7 and 8-12 like it was when I was in school. I feel that worked well and I would be interested to know the pros and cons of that.	3/8/2026 11:16 AM
528	Prek-5	3/8/2026 11:14 AM
529	Traditional PK-5 bands remain appropriate in a high utilization growth corridor.	3/8/2026 11:09 AM
530	Given this school's proximity to Emory University, I think enhancing the facilities to strengthen the Pre-K programs and placing a strategic focus on early childhood education (lower grades)	3/8/2026 11:08 AM
531	N/aa	3/8/2026 11:04 AM
532	The mixture of younger and older children should be rethought due to bullying. The hallway congestion would not be good for our mobile and emotional students.	3/8/2026 10:57 AM
533	The PK-5 elementary structure continues to be developmentally appropriate for younger students. Elementary schools are most effective when they are designed around the academic, social, and emotional needs of younger learners. While I understand the district's need to consider building capacity and resource distribution, maintaining a PK-5 elementary structure paired with a dedicated 6-8 middle school allows schools to focus on age-appropriate supports and programming. Preserving that structure may help ensure that elementary students learn in environments designed specifically for their developmental stage.	3/8/2026 10:55 AM
534	I prefer K-6 7-9 10-12 Having seniors at the same schools with classes lower than sophomores creates more issues.	3/8/2026 10:54 AM
535	All grade levels!	3/8/2026 10:41 AM
536	The current grade bands (PreK-5, 6-8, 9-12) seem a time tested way to keep groups with similar physical and emotional maturities together. Especially in high school, discipline and crowd control can be issues when their mix includes younger less mature kids. PreK-8 or 6-12 would not be choices I would favor, including from personal experience years ago.	3/8/2026 10:39 AM
537	I support the Brookhaven community's strong support of the public school system now and for many, many years to come therefore, I support the following position… keeping our trajectory in the Chamblee MS and HS cluster, and the pathway of closing the Ashford Park Elementary School facility as a neighborhood school, and shifting the Ashford Park Elementary attendance zone to the current John Lewis Elementary facility, and preserve our (current attendance zone) Chamblee Cluster.	3/8/2026 10:35 AM
538	Based on estimated building capacities and current enrollment, Lithonia High School is already operating near 100% capacity with approximately 1,500 students. Redan High School currently serves around 1,000 students with an estimated capacity of about 1,400. If Lithonia students are reassigned to Redan High School, the combined enrollment could approach 2,500 students, which would represent nearly 180% utilization of the building. Such a level of utilization could lead to severe overcrowding, increased class sizes, and strain on facilities. Careful evaluation of building capacity and classroom availability is essential before implementing this plan.	3/8/2026 10:35 AM
539	I think having three grade levels is ideal, elem/middle/high but if having to consolidate doing 6-12 is better than having the kids switching every 2 years.	3/8/2026 10:33 AM
540	In theory and based on studies, I understand the benefit. However, this could present logistical transpiration challenges for all stakeholders.	3/8/2026 10:30 AM
541	I don't understand.	3/8/2026 10:27 AM
542	I think different grade band scenarios are great, but I prefer options where kids change schools fewer times rather than more times. Changing schools and learning entirely new buildings and routines is stressful for kids and takes away time and attention from actual learning.	3/8/2026 10:23 AM
543	I would prefer either keeping the grade bands together or slicing them into smaller groupings.	3/8/2026 10:19 AM
544	No comments on this right now	3/8/2026 10:17 AM
545	The traditional bands and the PreK-3 & 4-5 bands are most appealing to our family and seem most likely to continue the strong community feel and individualized focus we currently experience at Laurel Ridge.	3/8/2026 10:17 AM

546	n/a	3/8/2026 10:13 AM
547	If moving away from traditional grade bands that exist, you should never make them wider. 6-12 together or pk-8 together is preposterous. Research shows 6–12 models expose 11-year-olds to the social pressures of 18-year-olds (substance use, social media, and dating) prematurely. Conversely, in PK–8 schools, rules designed for toddlers often "infantilize" 8th graders, stifling the independence they need before high school. Middle schoolers will become "second-class citizens." Budget and facilities in 6–12 schools typically prioritize high school athletics and AP labs, while PK–8 schools often lack the specialized science and elective spaces found in dedicated 6–8 middle schools. A major concern is physical and power imbalance created by sharing hallways and buses. Research suggests 6th-graders in 6–12 environments report higher anxiety and bullying incidents, while the district's own SAP slides admit that these models "require additional staff certifications" and modifications to ensure safe, age-appropriate. Students who stay in a PK–8 environment for nine years often struggle more significantly with the massive shift to a 9–12 high school because they haven't had the "practice" transition of a standalone middle school, leading to a steeper drop in GPA during freshman year.	3/8/2026 10:12 AM
548	I would prefer smaller schools so children have more individualized attention.	3/8/2026 10:11 AM
549	I see merit to making broader grade bands for a school, such as a K-8 school. If this has been proven to be a successful model for primary education, allowing for greater educational opportunities for those in otherwise transitional grades (5th and 6th), then it needs to applied universally throughout the school district, not just for one specific area. Students in areas in the south should be given the same opportunity to attend these schools as students in the north. It should not be based on which community/city in the district speaks the loudest. To some extent, the Sequoyah HS/MS should be seen as a test run for the 6-12 scenario and I hope it is treated as such. There are opportunities to do something similar with other facilities (such as Vanderlyn, adjacent to DHS, or empty and decrepit real property next the CHS).	3/8/2026 10:07 AM
550	The schools aren't built to hold that many kids under one roof	3/8/2026 10:05 AM
551	High School students need to be separate from other grade levels.	3/8/2026 10:04 AM
552	Banding worked back in the 90's and in smaller schools, but I don't see a scenario in these current times where I would want kinder mixed with 6-8th grade behaviors.	3/8/2026 10:01 AM
553	I do not have enough information about the proposed clusters or grade band scenarios to provide specific feedback. Additional details about how schools would be grouped and what grade bands are being considered would be helpful.	3/8/2026 9:55 AM
554	I have always believed that k-7 for elementary and 8-12 for high school is the optimum configuration. DCDS should have never changed to the 3 tier system.	3/8/2026 9:55 AM
555	I believe the k-5, 6-8, and 9-12 bands are best for all clusters	3/8/2026 9:54 AM
556	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 9:48 AM
557	Traditional grade bands keeps each stage of development a child goes thru in their own group. For so many reasons, 6th graders and seniors should not be in the same school, PERIOD.	3/8/2026 9:43 AM
558	Moving 5th to middle school would be okay or 8th to high school - don't love younger kids being in the same space as much older. Need to consider how this impacts bus routes and families with multiple drop offs.	3/8/2026 9:42 AM
559	It's not the item	3/8/2026 9:41 AM
560	Referring to grades pre-K to 5, are you with the most important time in children's education.	3/8/2026 9:41 AM
561	I dont like the idea of 6 graders with 12th graders. (Between bullying and social media) I feel like it exposes the younger kids to too much adult content.	3/8/2026 9:39 AM

562	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 9:39 AM
563	I do not think that Brockett Elementary is large enough to bring in other grades.	3/8/2026 9:34 AM
564	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 9:34 AM
565	Combining six through 12th grade is a really bad idea. Sixth graders have very little to do with high school students.	3/8/2026 9:32 AM
566	Oak Grove could accommodate more PK. We have neighbors who want to attend but don't get in so turn to private and may never return to public.	3/8/2026 8:47 AM
567	I think splitting up elementary school grades is more ideal than having middle schoolers and high schoolers together.	3/8/2026 8:45 AM
568	Unsure	3/8/2026 8:45 AM
569	Combined middle and high school would be more ideal if it was 8 to 12 not 6 to 12. Cluster Dunwoody.	3/8/2026 8:39 AM
570	Keep as is	3/8/2026 8:39 AM
571	For the Tucker cluster specifically I believe Livsey Would be a perfect facility to house pre-k through kindergarten. There is a demand for more pre-k classes in the Tucker cluster and a school in a neighborhood where traffic patterns during drop off and pick up cause a strain a smaller band could help. It also utilizes a facility that is not slated to close for a demand(more pre-k spots) that is in our cluster. This could open up the opportunity for elementary schools to band as 1-6, middle school 7-9 and high school 10-12. Smaller schools should hold smaller grade bands. Sixth grade should be with lower grade levels. 6th graders are very much still young children and are not emotionally, socially, or hormonally ready to be with older adolescents.	3/8/2026 8:37 AM
572	Vanderlyn is a diverse, academically strong, and inclusive community. Preserving stable elementary environments while solving high school challenges aligns with district priorities. I would welcome collaboration between district leaders and both school communities to explore campus-level solutions that address high school capacity while preserving the Vanderlyn community.	3/8/2026 8:30 AM
573	My main concern of rebranding is related to over enrollment and whether the buildings/facilities can handle the extra grades and numbers of classrooms needed. Will having more grades in a school further reduce unstructured play time outside (aka recess), which is already too short? Will the school day be extended?	3/8/2026 8:29 AM
574	One of SAP's guiding principles is to promote equitable education outcomes throughout the district. Yet missing from HPM's scenarios is how their plans will promote equitable education outcomes and access, and HPM leaving open some grade band differences throughout the district is so far away from SAP's guiding principles that honestly it's offensive it's even a suggestion. Grade band decisions should be based ONLY on what is best for educational outcomes. If long-term decisions about grade bands start changing from area to area and start being made in response to which communities yelled the loudest about their schools being closed in 2026, you've drifted unacceptably far away from the point. If there is data to show that K-8 is the best educational scenario (which I would like to see more of and would like to see options for in Area 1), then it should be used throughout the district. But if the data shows that K-5 and 6-8 are best for learning, then that's what the district should implement	3/8/2026 8:28 AM

	everywhere. Educational decisions should be based on what's best for children, period, not based on what will quiet a community. For once in history, DCSD needs to grow a backbone and put education first.	
575	Oak grove to lakeside Henderson is too far. Create neighborhood schools! Brielle, oak grove, ssgsmore-> lakeside for middle and high.	3/8/2026 8:26 AM
576	It's not entirely clear in terms of what has been put forward what exactly you'd like us to react to. I do have serious concerns about 6-12 scenarios. The development of students in those grades is just so vastly different, it seems odd to house them all under one roof. I'm also curious why a PK-6 / 7-8 / 9-12 model was not included in any of the evaluations. Having experienced sixth grade at Kittredge and 7-8 at CMS, keeping sixth grade in elementary and giving students one more year of growth and development in elementary has seemed like a win for our family and students.	3/8/2026 8:25 AM
577	Rethinking grade bands a good idea. Especially at middle school and high school levels	3/8/2026 8:24 AM
578	No commnt	3/8/2026 8:22 AM
579	My concern with the grade bands is that you are gathering students from a wide area. This will likely include some students from an area where parents have high involvement and some students from an area where parents have low involvement. This will dilute overall efforts and might drive the high involvement parents to charter and private schools. Furthermore, when you gather people from a wide area, it will be harder for parents to volunteer and attend functions due to distance. You will have less parent involvement. In my experience, the schools with the most parent involvement have the higher scores on GreatSchools.net. This is at risk with your new plan.	3/8/2026 8:20 AM
580	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/8/2026 8:09 AM
581	Honestly, everyone knows the way the grade bands are now just work. History has proven that. I am referring to the Dunwoody cluster	3/8/2026 8:06 AM
582	I think that having K-8 in one school is a bad idea. The age range is too much. I would not want my PK or K student on the same bus or in the same building as an eighth grader. Although it is not listed, I think 4-8 or a traditional PK-5 and 6-8 best serves the needs and capability of students. The schools in the North are over crowded and will get more so with the listed school closures.	3/8/2026 7:49 AM
583	I'm fine with K-8 or 6-12, either would be better than middle school.	3/8/2026 7:42 AM
584	I would love to see Kittredge 4-8 like Wadsworth. Kittredge was incredible for both of our daughters and Chamblee Middle has been so bad that we are considering private schools. The magnet program works so much better standalone than embedded until high school where the focus is on AP and gifted classes.	3/8/2026 7:33 AM
585	You need to stop trying to reinvent the wheel and keep traditional grade banding.	3/8/2026 6:38 AM
586	With limited knowledge and understanding about how things will go, it is difficult to give true, thoughtful feedback. I do have concern about the grade band scenario with high school being 6-12. Having a 6th grader on the same bus with a 12th grader causes fear and concern.	3/8/2026 5:59 AM
587	I don't see the point of changing the grade bands. That's more buildings to fund, more transitions for the kids, and more hassle for families to get kids to school on time traveling to multiple schools so soon.	3/8/2026 3:25 AM
588	Maintaining strong vertical alignment of curriculum, consistent communication with families, and adequate academic supports will be essential to ensure a smooth transition for students and staff. Across all clusters, it will be important to consider transportation logistics, staffing allocations, and the availability of specialized support services (ESOL, Special Education, interventionists). These factors will play a key role in the success of any grade band restructuring.	3/8/2026 1:18 AM

589	Keep Traditional K-5 / 6-8 / 9-12 in stable clusters on all schools	3/7/2026 11:58 PM
590	Would require more buses and modifications that would be too complicated to change from PK-5.	3/7/2026 11:58 PM
591	We should keep our ELEMENTARY PREK -5 , MIDDLE 6-8 and high schools 9-12. Our children have different milestones and different ways of seeing life.	3/7/2026 11:50 PM
592	I agree with the poll results for Ashford Park and prioritizing the Chamblee cluster.	3/7/2026 11:36 PM
593	6-12 is not acceptable - developmentally that is just too wide of a band for larger population schools	3/7/2026 11:28 PM
594	No strong opinions on grade bands, but I don't think that 6th graders being in the same school as seniors is a recipe for success.	3/7/2026 11:26 PM
595	I was a former student of DCSD and now a parent. I recall when the expansion and development of middle schools. I do not think it would be advantageous to cluster middle school kids with high school kids.	3/7/2026 11:22 PM
596	I'm not understanding the grade band scenarios	3/7/2026 11:18 PM
597	I have concerns about scenarios banding grades 6-12 together. My children attended Kittredge, where 6th graders share a school with 4th and 5th graders, and this model has worked well for my family and others in the program. I think 6th and 7th grade students show a range of development, but most should NOT be grouped with high schoolers. Grouping Pre-K through 3, 4-6, 7-8, and 9-12 would be ideal. This might not be possible given space and bus limitations, but 6th graders and most 7th graders should not be grouped with high schoolers. Pre-K through 3, 4-7, and 8-12 would be a close second choice for me. Clinton, MS, uses small bands with great success, as each school has more geographic and socioeconomic diversity. I know the school system is smaller and not directly comparable, but the principles are important to keep in mind.	3/7/2026 11:13 PM
598	Having 6-12 at the same school is ludicrous.	3/7/2026 11:08 PM
599	I'm concerned with what seems like the district's attempt to "average." Placing good students in worse clusters and/or placing worse-performing students in good clusters. This will negatively impact overall school performance and have negative effects on property value.	3/7/2026 11:02 PM
600	Lakeside, Henderson, Oak Gtove	3/7/2026 10:55 PM
601	I believe the traditional PK-5 / 6-8 /9-12 works well because of the students' age groups. I believe that having too wide a range of grades in school would be too much for the teachers, staff, and students.	3/7/2026 10:55 PM
602	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK-5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/7/2026 10:53 PM
603	It's worth looking into, but I would like to see how it works in other school districts.	3/7/2026 10:32 PM
604	Don't do it	3/7/2026 10:28 PM
605	Great school	3/7/2026 10:26 PM
606	I am satisfied with status quo	3/7/2026 10:22 PM
607	I think grade bands needs to be consistent within clusters. I am generally in favor of K-2, 3-6, 7-9, and 10-12 bands. Lumping middle school aged kids with high school seems to be a mistake (6-12).	3/7/2026 10:21 PM
608	Younger grades, 5th and below should stay in a smaller school scenario.	3/7/2026 10:19 PM
609	Traditional pre-k to 5 bands makes the most sense in a high utilization growth corridor.	3/7/2026 10:12 PM

610	In reviewing the potential grade band scenarios, it is important to carefully consider how changes would affect both students and school communities. For example, moving to a K–2 and 3–5 elementary grade band model within a cluster could allow schools to better specialize in instruction that is developmentally appropriate for younger versus upper elementary students. However, this model may also require students to transition between schools earlier, which could disrupt continuity and relationships with teachers and peers. Similarly, shifting schools in a cluster to a 6–8 middle school grade band may provide students with more targeted academic programs and extracurricular opportunities designed specifically for adolescents. At the same time, districts must consider transportation, building capacity, and the social-emotional impact of additional school transitions. Overall, when evaluating grade band scenarios, districts should prioritize student learning, stability, and community input to ensure the changes truly benefit students within each cluster and school community.	3/7/2026 10:09 PM
611	Not well informed about this issue.	3/7/2026 10:07 PM
612	I think it makes more sense to do prek-8 /9-12 because as a bus driver for dekalb, a lot of parents aren't home to receive the children and it would help if an older sibling was present.	3/7/2026 9:55 PM
613	Make ashford parks zone smaller so the adequate number of kids attend is better than making it prek-2	3/7/2026 9:52 PM
614	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant under-utilization.	3/7/2026 9:50 PM
615	none	3/7/2026 9:37 PM
616	Combining large span of grades in one facility is potentially emotionally and physically dangerous for younger students.	3/7/2026 9:35 PM
617	I do not like the idea of extending grade bands to include 8-12th. I think that there is a vast difference in the maturity levels of 8th graders versus seniors.	3/7/2026 9:30 PM
618	pk-8 with 9-12 for high school is better scenario. Would allow i believe for smaller pk-8 schools rather than the current large middle school format.	3/7/2026 9:23 PM
619	I think the grade bands should be organized according to age appropriate development.I would prefer the 6-8 and 9-12 grade bands, no preference on the PK-5 grades.	3/7/2026 9:20 PM
620	Traditional Pk-5/ 6-8/ 9-12	3/7/2026 9:20 PM
621	Middle schools have failed us. Go back to the original DeKalb model of K- 7 8-12 model particularly in the Lakeside cluster and systemwide. I think it will be better for our students, their families, our teachers and our communities.	3/7/2026 9:13 PM
622	I generally prefer pre-k to 5 in one building then either 6-12 or 6-8 and 9-12 in 2 buildings That's just how I feel after living 51 years of life and raising 3 girls in DeKalb county.	3/7/2026 9:10 PM
623	No evidence or benefit to change the grade bands - better for kids to mix	3/7/2026 9:09 PM
624	Keep the Ashford Park community (Ashford Park/Drew Valley) in the Chamblee Ms/Hs cluster. If you move buildings, fine, but this community should not have the programs of Chamblee taken away - they simply don't exist at Cross Keys. You need to look cluster by cluster at buildings and programs and figure out what makes most sense for each cluster. You could also make upper/lower campuses using Ashford Park and John Lewis if needed and close another school that's failing. Move the magnet out of Chamblee to make space if you have to.	3/7/2026 9:07 PM
625	I oppose any grade band placing 6th graders with 9–12 students. The developmental gap between 11–12 year olds and 17–18 year olds raises safety, behavioral, and supervision concerns, including exposure to older student influences and increased traffic from student drivers.	3/7/2026 9:07 PM
626	Keep Magnet programs in the same cluster	3/7/2026 9:06 PM
627	I'm not sure this would affect these particular school.	3/7/2026 9:03 PM

628	Based on the data, it appears that our Lakeside cluster is performing well. So it would seem to make sense to keep the grade band the same, i.e. pk-5, 6-8, 9-12. If it ain't broke, don't fix it. At the same time, keeping consistent with what we were told in the webinar, different grade bands may work better for other school clusters. But there appears to be no reason to change ours.	3/7/2026 9:01 PM
629	Opposed. This will introduce unnecessary transitional stress for children in key developmental periods.	3/7/2026 8:53 PM
630	I don’t agree with grade banding because student in the higher grades can bully the ones in the lower grades. I think they should stay how they are .	3/7/2026 8:52 PM
631	I can only speak in generics because my son graduated in '14. Regardless of the cluster, the concept used in the example is understandable. Utilizing the space to serve both middle and high school students is an ideal situation. Keeping the HS and MS communities separate is necessary and doable but they too present their own challenges depending on the layout of the building. To answer the next question, how would differing grade bands affect students who move from one school to another? I'm trying to imagine pros and cons but need to hear input from existing parents to understand their concerns.	3/7/2026 8:45 PM
632	Priority should be given to maintaining traditional grade level divisions where possible. Older students with younger students than in current divisions would not be prudent and should be avoided where possible.	3/7/2026 8:40 PM
633	No opinion on this issue.	3/7/2026 8:37 PM
634	We are open to incorporating more grades into Evansdale - we are just adamant that the school remain open. We think it's important for kids to remain together as much as possible - Evansdale kids have gone on to Henderson Middle and Lakeside High School which has enabled them to bond with other kids in nearby neighborhoods. We urge you to maintain this track.	3/7/2026 8:35 PM
635	Oak grove elementary	3/7/2026 8:34 PM
636	If Oak Grovecloses they will be absorbed by Sagamore Hills and Briar lake. They are not able to absorb that number as they are near capacity themselves.	3/7/2026 8:29 PM
637	In my experience as a parent of 4 children, now adults, who grew up in Dekalb County, I see the middle school as the weakest link. I grew up in Chicago with a K-8 model, and th presence of younger children seemed to have a positive effect on the 6-8th grade students. As mentors, leaders, and with the expectation that they had to act older, it seemed to calm the wildness we see in middle schools now. I favor K-8 for these reasons. I believe 9-12 should remain for the purpose of setting college prep/ career prep goals. But I think high schools should be smaller. Let’s use Middle school buildings to cut high school sizes.	3/7/2026 8:26 PM
638	I believe combining more grades to allow for sixth graders to be in a school with twelfth graders again is just overwhelming and makes the learning environment intimidating. Children need to be comfortable in their learning environment and having peers much older especially as teenagers can be uncomfortable. I enjoy the smaller schools with fewer grades.	3/7/2026 8:23 PM
639	Students need to be around multiple age peers.	3/7/2026 8:21 PM
640	Good	3/7/2026 8:20 PM
641	6th graders do not belong with high school kids, it’s making them grow up too fast and putting them in an uncomfortable situation	3/7/2026 8:20 PM
642	Oak Grove is projected at 96% utilization next year. Sagamore is at 91% Briarlake is at 73%. We are very close to numerous hospitals and research expansions. The will be thousands of jobs as these campuses get larger	3/7/2026 8:15 PM
643	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in	3/7/2026 8:01 PM

	a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	
644	I would prefer to keep the current grade bands the same.	3/7/2026 8:01 PM
645	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/7/2026 7:57 PM
646	Evansdale should stay as is	3/7/2026 7:56 PM
647	2 grado evansdale elementary	3/7/2026 7:47 PM
648	Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth.	3/7/2026 7:41 PM
649	I do not agree with a 6th to 12th grade band. Younger students do not need to be mixed with older students.	3/7/2026 7:36 PM
650	Evansdale elementary works best with the traditional PK-5 structure.Elementary students benefit from being in school designated for younger learners an from having stable relationships with teachers and staff The traditional pk-5/6 -8/9-12 model should remain for the Evansdale cluster.	3/7/2026 7:34 PM
651	I believe the traditional grade banding (PK-5/6-8/9-12) is the best among the proposed alternatives. I'd like to know how any new grade banding would be accomplished. Will grade bands in house in the same schools? Or split among buildings?	3/7/2026 7:32 PM
652	I think it makes sense to expand Kittredge to a 4 through 8 school. You can increase the diversity of KMS by going back to door-to-door busing. You could explore raising the class sizes back to 23 students per homeroom to create more access to the program. I think a central location within the school district would make sense for KMS.	3/7/2026 7:23 PM
653	It is difficult to evaluate "grade band" scenarios when none has been proposed for Ashford Park. All we have been told is the school is set for closing.	3/7/2026 7:20 PM
654	Especial mente creo que el cuarto grado de la escuela evansdale elementary es muy buena, ya que mi hija aprende mucho	3/7/2026 7:12 PM
655	I am against any type of non-traditional grade band. 6th graders don't need to be attending school with 12 th graders, it is inappropriate from a development standpoint.	3/7/2026 7:11 PM
656	Do not support the potential grade band scenarios. Almost the entire world are using the current grade band that means the current grade band works and it's working well. Whatever advantages you introducing the potential grand band scenarios are just assumptions, there is no data to support. And as a parent, I don't want my kids to be involved in the uncertainty education life.	3/7/2026 7:10 PM
657	I don't not want over crowded classes.	3/7/2026 7:06 PM
658	Ashford park is a successful school and a key part of chamblee high and middle school it makes sense to leave it in this cluster as you can pretty much walk to Chamblee high from my house. I don't see where these students go. I have heard it mentioned that with the new Dresden elementary the John Lewis students could be moved there for capacity and then Ashford park kids could be moved to the John Lewis building. I don't understand why we just don't keep it as it is. I also don't see where cross keys middle school comes from. Seems like we are forgetting about them too.	3/7/2026 6:58 PM
659	I am opposed to any type of non-traditional band scenario. 12th graders should not be attending the same school with 6th graders. It is not appropriate.	3/7/2026 6:57 PM
660	Oak Grove Elementary has a record in the neighborhood as achieving a high standard of	3/7/2026 6:56 PM

	education it would be a great loss of this highly skilled institution.	
661	As for our family's experience in regards to Oak Grove Elementary; a traditional model K-5 is best suited to nurture the development of younger students. A model that would blend those aforementioned grades with older students (6/8) would not work well. Transportation would also be an issue (budding the littlest children with middle school age kids would not be an ideal environment).	3/7/2026 6:53 PM
662	I am in favor of the traditional bands because teenage students should not be in the same building as 4-year-old children. Unless advanced security measures are in place, there are possibilities of teenaged students interacting with pre-school-age children in nefarious ways.	3/7/2026 6:49 PM
663	We believe that PK-5 should remain in place for Oak Grove ES, 6th-8th grade at Henderson Middle, and 9th-12th at Lakeside HS. It is important for kids to have more opportunities to be in a leadership position at a young age. If you collapse to 2 schools (PK-8, 9-12), then you delete the ability of kids to learn these leadership skills at 5th grade. There is also such a huge mental, physical and social difference between 4 year olds and 13/14-year olds. They should NOT be in the same building as middle schoolers start to become exposed to many bad influences (drugs, alcohol, smoking, sex) that younger children should not be around.	3/7/2026 6:47 PM
664	Grade Bands are not a good idea. 12th graders shouldn't be attending the same school as 6th graders. It is not appropriate from a developmental standpoint.	3/7/2026 6:33 PM
665	I don't see a need to change the current grade bands.	3/7/2026 6:29 PM
666	I prefer the traditional model at Evansdale, K-5 and then feed into 6-8 at Henderson Mill and 9-12 at Lakeside.	3/7/2026 6:27 PM
667	As a pediatrician, I feel that putting 6 to 12 grades together would be a huge difference. A 10 and 11-year-old and six grade is quite different from a 17 to 18-year-old and they're senior year and I don't foresee that benefiting anybody	3/7/2026 6:21 PM
668	McClendon elementary should remain open	3/7/2026 6:19 PM
669	I would like for Kittredge to remain 4 to 6. Chamblee Middle as 6 to 8 with the magnet program and Chamblee high as 9 to 12. I think all students in the Chamblee High magnet should be able to complete their studies at Chamblee High even if the magnet program is moved. I think Dekalb is trying to move the magnet program just like you moved Kittredge out Chamblee and over to Druid Hills.	3/7/2026 6:13 PM
670	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/7/2026 6:12 PM
671	I have a resident for an extended period and had children in the system when there were no middle schools. There were two bands of 1-7 and 8-12. It did not work. The intimidation and stress for 1st and 2nd graders in the first was unhealthy and was not trauma-informed. It was the same for 7th graders going to school with 11th and 12th graders.	3/7/2026 6:07 PM
672	6 through 12 seems to make sense. It definitely gives the opportunity for students that are advanced in the eighth grade to get enhanced instruction.	3/7/2026 6:00 PM
673	PK-5 grade bands are appropriate.	3/7/2026 5:59 PM
674	See above for Dunwoody schools	3/7/2026 5:50 PM
675	Estoy satisfecho de todo no tengo mas palabras que desir gracias	3/7/2026 5:41 PM
676	Stability in the cluster is important. Changing the bands will not add stability.	3/7/2026 5:40 PM
677	I am a product of DeKalb County elementary 1-7 grade band and 8-12 grade bands, however, and that seemed to be better than the middle school concept.	3/7/2026 5:31 PM
678	No opinion on the grade band	3/7/2026 5:28 PM

679	I'm concerned about the McNair cluster of behavior of the older students. Perhaps the school could be converted to a 6-9th school instead.	3/7/2026 5:22 PM
680	Open to ideas here that better utilize existing facilities rather than tearing them down and building mega elementary schools. When I attended DCSD, we didn't even have middle schools - it was K-7 and 8-12.	3/7/2026 5:19 PM
681	Ashford Park elementary Within the Chamblee cluster- I want them to stay K-5 elementary, 6-8 middle, 9-12 highschool. The age ranges and transitions make sense	3/7/2026 5:14 PM
682	These are also stupid. Elementary, middle, and high is the standard and works well.	3/7/2026 5:06 PM
683	I prefer traditional. I do not feel comfortable with middle and high school students attending the same school unless the building is divided and faculty/staff can distinguish between the two grade bands.	3/7/2026 5:06 PM
684	PK-5 grade bands remain appropriate.	3/7/2026 5:02 PM
685	No comment	3/7/2026 4:56 PM
686	There's good behaviors and I call tell on how staff and teachers work hard.	3/7/2026 4:49 PM
687	I think we should review the grade clusters to what makes the most sense.	3/7/2026 4:47 PM
688	Not sure	3/7/2026 4:46 PM
689	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/7/2026 4:42 PM
690	See above comments - same regarding the grade band restructuring scenarios.	3/7/2026 4:40 PM
691	I believe that the current grade band set up (K-5, 6-8, 9-12) is the best scenario for children due to the amount of transitions and for the families.	3/7/2026 4:39 PM
692	Need academies such as 6th, 7th, 8th and 9th grade to ensure students receive the needed supports to be prepared for the next level of academia.	3/7/2026 4:33 PM
693	I'd be in favor of maintaining small neighborhood schools, specifically at the elementary level, by pursuing the primary Pk-3rd/intermediate 4-5 grade band model	3/7/2026 4:33 PM
694	The grade band scenario seems illogical and many have families have children that are not in subsequent grades and would be terribly inconvenient to try and drop them all off…this is further breaks down community bonds as the children may not be attending a school in their neighborhood for multiple years	3/7/2026 4:24 PM
695	Please do not do large grade bands (PK-8 or 6-12). Vaping is already a massive problem, particularly in the Cross Keys cluster where it is proposed. Also there is the very real scenario of predatory behavior, either violence or sexual, that will be directed towards the younger students. Gang recruitment relies on young children for drug running as to evade harsh sentencing. Teen pregnancies are already a problem at Sequoyah and Cross Keys. Please do not exacerbate this problem by putting all of these students under the same roof to save money and time with buses. This is not fair to our students.	3/7/2026 4:22 PM
696	If this makes sense for our community, K - 3rd.	3/7/2026 4:21 PM
697	if it is in the best interest of the kids	3/7/2026 4:21 PM
698	Re: Cedar Grove Elementary, and Cedar Grove High School. This will be great for the students and the community	3/7/2026 4:19 PM
699	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands	3/7/2026 4:17 PM

	of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	
700	I am against these grade band scenarios. I think we should go back to elementary schools going through 7th grade and high school being 8th - 12th grade. It worked great!	3/7/2026 4:16 PM
701	This introduces risks such as violence against younger children, bullying, and being exposed to inappropriate behavior that is not age appropriate.	3/7/2026 4:15 PM
702	K-6	3/7/2026 4:11 PM
703	The traditional bands seem to make the most sense. I would not change them.	3/7/2026 4:02 PM
704	Please continue with traditional grade cluster	3/7/2026 4:02 PM
705	There is nothing wrong with the current, traditional grade cluster.	3/7/2026 4:01 PM
706	Pre-k through 3	3/7/2026 3:56 PM
707	Evsndale Elementary is a stand out in the county. We have plenty of acreage for expansion.	3/7/2026 3:54 PM
708	6th and 7th graders do NOT need to be with 11th and 12th graders. I have taught in high school, and I can tell you this would be problematic. Older students would bully and take advantage of younger students. I saw first hand what happened at a high school where 9th grade females dated 12th grade males. Let’s just say the population increased. Though the outcome may not be the same for younger children as it was for 6-12 grades, PreK-8 is too much difference in maturity. Based on my experience, PreK-8 would put the younger students at risk for bullying and being taken advantage of by older students. To sum up my concern in 6-12 and PreK-8…safety.	3/7/2026 3:53 PM
709	Based on need but it isn’t good for the development of young children to be in schools with students that are too mature.	3/7/2026 3:50 PM
710	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is at 91%. Briarlake is at 73%, but would need to absorb much of Oak Grove's enrollment if consolidation proceeds. The cluster is not experiencing structural decline. In fact, it is located near one of the largest healthcare and research corridors in Georgia, with thousands of jobs being added. And traditional PK-5 grade bands remain appropriate in this high-use, high-growth area.	3/7/2026 3:45 PM
711	Why in the world would you split our kids between the Tucker cluster and the Doraville cluster? Our kids need to stay in Lakeside and dividing them between two clusters will cause a host of issues.	3/7/2026 3:33 PM
712	Bob Mathis educate many exceptional ed students in grades Pre-k -5. Parents specifically move to this area because they know the staff at Bob Mathis truly care about their students. Students in Pre-k - 5 will be affected by this change.	3/7/2026 3:30 PM
713	I'm not sure how changing the grade bands would improve educational goals	3/7/2026 3:20 PM
714	I also like the idea of changing the grade levels to just two. Eliminate middle school?	3/7/2026 3:20 PM
715	Elementary school should be K-5, Middle school should be 6-8, and high school should be 9-12	3/7/2026 3:19 PM
716	Leave Oak Grove & Lakeside alone	3/7/2026 3:11 PM
717	Faster learners do better when grouped with others at their level, but then what do you do when they have already mastered the material in their band? I do not see a sustainable plan.	3/7/2026 3:06 PM
718	Repurposing an elementary school such as Oak Grove to serve younger students (Pre-K–Grade 3) may help keep the school operational, but large student populations remain a concern. Children under age 11 are still developing emotionally, neurologically, and socially. Schools with 900+ students can feel overwhelming and overstimulating, even when limited to younger grades. Large environments make it more difficult for children to receive individualized attention and develop a sense of safety and belonging. Regardless of grade band structure, elementary-age students (Pre-K–Grade 5) should have the opportunity to attend small, community-centered schools with student populations ideally not exceeding 500. Decisions about facilities should prioritize developmental science and the well-being of young learners, not just building capacity.	3/7/2026 3:05 PM

719	I do not agree with a 6th to 12th grade band. Younger students do not need to be mixed with older students.	3/7/2026 2:57 PM
720	Programa de DLI excelente programa con oportunidades para desarrollarse con habilidades bilingües	3/7/2026 2:52 PM
721	I do not agree with a 6th to 12th grade band. Younger students do not need to be mixed with older students.	3/7/2026 2:50 PM
722	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization	3/7/2026 2:50 PM
723	Keep Oak Grove. Smaller schools provide relationships and connections in education.	3/7/2026 2:48 PM
724	Cedar Grove High School 7-12	3/7/2026 2:43 PM
725	The traditional pre-k to 5th/6-8/9-12 works well but I so think that is what should stay.	3/7/2026 2:40 PM
726	The potential grade bands of k-3 and 4-5 would be difficult for large families.	3/7/2026 2:32 PM
727	I do not care for Pk-3-8 being in one building.	3/7/2026 2:31 PM
728	Our children need to stay in their neighborhood communities with peers close in age.	3/7/2026 2:23 PM
729	The grade band scenarios presented appear to meet the needs of our boys and girls.	3/7/2026 2:22 PM
730	We are not in favor of grade bands	3/7/2026 2:18 PM
731	None	3/7/2026 2:05 PM
732	See above for Henderson mill elem and Henderson middle.	3/7/2026 2:00 PM
733	No strong opinions	3/7/2026 1:57 PM
734	I would welcome collaboration between district leaders and both school communities to explore campus-level solutions that address high school capacity while preserving the Vanderlyn community. My daughter has been at Vanderlyn and my son will be starting there in two years. We've had an amazing experience, and would love to stay there and eventually have the at Dunwoody High School and work together with our dunwoody school community. For elementary school, with my daughter's need on her IEP, a Vanderlyn School closure would mean we would transfer her (and then her brother) to private school. The schools as large as what is being proposed is not going to work for our family at the young ages of elementary years. I believe this is the reason many people look to the Vanderlyn districted homes. This long term would also drive people out of not just the Dekalb school system, but the town of dunwoody as well.	3/7/2026 1:52 PM
735	I believe that the grade bands should remain as is.	3/7/2026 1:50 PM
736	Keep as is.	3/7/2026 1:49 PM
737	The current grade bands for the Lakeside cluster (PK-5 / 6-8 / 9-12) are the best for developmental and academic reasons, along with the distance from school for tiered-transportation and keeping siblings together to have higher family engagement opportunities.	3/7/2026 1:47 PM
738	If this is the idea of combining grades based on classroom numbers. I do not agree with this. As well as do not agree with joining full elementary schools with high schools … that is too many age brackets within one schools. Kids should stay kids as long as they can and high schoolers are just beginning to understand adulthood therefore … high school should be its own building and school always!	3/7/2026 1:43 PM
739	None	3/7/2026 1:31 PM
740	Mis Sobrinos van a esa escuela	3/7/2026 1:28 PM
741	The Magnet program should stay at Chamblee. The scores are improving and the progress	3/7/2026 1:18 PM

	should continue.	
742	Oak Grove Elementary Traditional PK-5/6-8/9-12	3/7/2026 1:17 PM
743	Elementary, middle, high	3/7/2026 1:15 PM
744	Evansdale elementary is an integral part of our community and it cannot be closed.	3/7/2026 1:14 PM
745	The grade bands need to remain as is. Pre-K - 5th, Middle School 6-8 and High School 9-12. Absolutely don't need middle schoolers with high schoolers.	3/7/2026 1:14 PM
746	Yo soy de la comunidad por que los nietos míos pertenecen a la brochett	3/7/2026 1:02 PM
747	Oak Grove, Sagamore, and Briarlake should remain Pre-K through 5. Grade bands should reflect local enrollment trends and utilization levels rather than a uniform district-wide model. I am a former DeKalb County teacher (17 years) and have seen firsthand the advantages of the PK-5 band.	3/7/2026 1:01 PM
748	Tucker high helps alot as well as the middle and elementary	3/7/2026 12:55 PM
749	N/A	3/7/2026 12:42 PM
750	McNair DLA	3/7/2026 12:40 PM
751	Keep traditional grade bands	3/7/2026 12:36 PM
752	I have was passionate thoughts about this topic so haven’t thought about it as much.	3/7/2026 12:36 PM
753	Traditional PK-5 /6-8 / 9-12	3/7/2026 12:15 PM
754	I don’t see the point or how it addresses overcrowding.	3/7/2026 11:59 AM
755	As a parent whose child attends Oak Grove Elementary School through the lottery program, I hope the district maintains Oak Grove as a K–5 elementary school in the Oak Grove cluster. Families seek out Oak Grove because of its strong academic standing and supportive school community, and programs like the lottery allow students from other zones to access that opportunity within DeKalb County School District. Changing the grade band or restructuring successful schools like Oak Grove could reduce those opportunities and push families to look outside the district. Grade band changes would be better used to help utilize under-enrolled facilities elsewhere while keeping high-performing elementary schools stable.	3/7/2026 11:58 AM
756	Oak grove is very important to our community. Lakeside is over crowded.	3/7/2026 11:56 AM
757	In the Oak Grove Elementary School cluster, Oak Grove should remain a K–5 neighborhood elementary school. Maintaining stable elementary schools supports community engagement and helps retain families in the public school system. Grade band changes should instead be used to better utilize under-enrolled facilities elsewhere in DeKalb County School District while protecting strong neighborhood schools.	3/7/2026 11:54 AM
758	Concerned re developmental differences between 6th and 12 graders causing younger students to grow up too soon and be exposed to developmentally inappropriate stimuli.	3/7/2026 11:53 AM
759	Maintaining neighborhood elementary schools should remain a priority when considering grade band changes. In the Oak Grove Elementary School cluster, keeping Oak Grove as a K–5 elementary school is important for both community stability and enrollment retention. Oak Grove is a well-established neighborhood school with strong family engagement and consistent demand from local families. Rather than altering grade bands at successful elementary schools, DCSD should prioritize using grade band changes to better utilize under-enrolled facilities elsewhere in the district. For example, converting larger underutilized campuses into specialized programs, magnet schools, or alternative grade configurations (such as K–2 / 3–5 or 6–12 models) could increase enrollment and program opportunities without disrupting thriving neighborhood schools. Maintaining traditional K–5 neighborhood elementary schools like Oak Grove Elementary School supports families, reduces transportation burdens, and preserves the community anchors that attract families to the district. Grade band restructuring should focus on maximizing unused capacity while protecting schools that are stable, high-performing, and central to their communities.	3/7/2026 11:47 AM
760	Doesn't affect me as all my kids will be in high school or out of high school by the time this happens. I don't like the band model that Decatur City Schools has. It would have been a nightmare when my kids were younger at multiple schools	3/7/2026 11:45 AM

761	I think changing grade bands would negatively effect the environment of the school. Changing schools to be grades 6-12 would mean the school would be catering to ages 11-ish to 18. This is a very large age range, and the resources that a 12 year old needs is different from the resources a 18 year old needs. In particular, high school students talking in the hall will likely expose middle schoolers to ideas/conversations that they wouldn't have had in their own middle school. If grades were to be combined, doing K - 8 would probably be better than combining 6-12. High schoolers have different worries and conversations and activities that middle schoolers don't have. High schoolers need resources to deal with some real-world challenges and figure out what they want to do for the rest of their lives. The age groups are at very different stages in their lives.	3/7/2026 11:37 AM
762	The traditional is best if at all possible.	3/7/2026 11:36 AM
763	I am against mixing elementary, middle, and high school aged students. Please keep traditional grade band scenarios (PK-5, 6-8, 9-12) Kids need to be around kids their own ages. There are too many risks of older students taking advantage of younger students when mixed in buses and in buildings.	3/7/2026 11:34 AM
764	Schools were successful when they went from Elementary (K-7th) and then went directly to high school (8th-12th). This way the educators from the middle school can be better utilized and create better transition to high school.	3/7/2026 11:34 AM
765	When considering grade band changes, the district should prioritize developmental appropriateness and student support. Elementary students benefit from environments designed specifically for younger learners, including smaller settings and age-appropriate facilities. If grade bands change within clusters, schools should ensure that students still have access to strong academic programs, extracurricular activities, and specialized services. In clusters where facilities are being repurposed, careful planning will be needed to ensure smooth transitions for students, staff, and families.	3/7/2026 11:31 AM
766	PK - 8 and 9 - 12 would be better than PK - 5 and 6 - 12.	3/7/2026 11:31 AM
767	The division of elementary, middle and high schools makes sense. The younger children should not be exposed to all aspects of the older children.	3/7/2026 11:29 AM
768	See item 8 below	3/7/2026 11:29 AM
769	The current grade bands are good. In smaller clusters, I could see maybe k-8 in a single school, but keeping 9-12 separate is critical as those kids are emotionally and socially at a very different level than younger kids and have very different needs.	3/7/2026 11:24 AM
770	Keep Oak Grove, Sagamore, Lakeside, and Henderson.	3/7/2026 11:22 AM
771	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/7/2026 11:16 AM
772	I selected this neighborhood because of the cluster. I would be very disappointed of the cluster changed.	3/7/2026 11:12 AM
773	Oak Grove should not close or consolidate	3/7/2026 11:09 AM
774	I support the Traditional PK-5 / 6-8 / 9-12 grade bands	3/7/2026 11:08 AM
775	I support the Traditional PK-5 / 6-8 / 9-12 grade bands	3/7/2026 11:06 AM
776	Grade band changes should support clear feeder patterns and balanced enrollment. Models such as K–5, 6–8, and 9–12 can strengthen middle school programming, but the district should also consider what already works well in certain clusters before making changes.	3/7/2026 11:05 AM
777	This will crush elementary schools in dekalb. People will leave and they will lose a lot of what makes them great—small meaningful schools.	3/7/2026 11:04 AM
778	I feel the traditional grade band works my school cluster (Lakeside). Keeping this grade bad is important because it keeps the children's developmental stages aligned.	3/7/2026 11:00 AM

779	I would like to understand the impact if any of different grade band scenarios on students learning outcomes before offering any specific feedback.	3/7/2026 10:55 AM
780	McNair Middle is designed for 6-8. It is a beautiful building that serves its population well. McNair HS was one of the first renovations in the county thanks to Sarah Copelin-Wood and Deirdre P. Pierce. It houses 3 stand alone buildings which is compatible with several scenarios.	3/7/2026 10:51 AM
781	Evansdale elementary is uniquely positioned for expansion. It should be renovated and expanded to absorb other nearby schools under consideration for closure.	3/7/2026 10:47 AM
782	I do not favor a 6-12 grade band scenario as the difference in maturity between middle and high schoolers is too great. I do not favor smaller bands for elementary school as this means children would have to change schools more frequently while they are still very young and I believe the consistency and support of a traditional elementary school is important for them.	3/7/2026 10:47 AM
783	Grouping k-5 in elementary and 6-8 in middle school works well because most students in these groups are all around the same age depending on their grade.	3/7/2026 10:47 AM
784	Do not close Evansdale.	3/7/2026 10:46 AM
785	I have no real opinion on the grade bands	3/7/2026 10:45 AM
786	Many schools across the country have moved to a PK-4, 5-8, 9-12 model. I think it would make sense to examine this option for some clusters.	3/7/2026 10:43 AM
787	Tucker middle school band is very good	3/7/2026 10:42 AM
788	I believe grade band decisions should be flexible and reflect the specific needs of each school and its surrounding community rather than applying a one-size-fits-all approach across the district. Different schools and clusters have different enrollment levels, facilities, and community dynamics, so the grade configuration should make sense for that particular environment. When evaluating grade band scenarios, it will be important to consider factors such as building capacity, transportation impacts, and how transitions between schools affect students and families. Stability for students and manageable transitions between grade levels should be a priority. I would encourage the district to work closely with each school community when determining grade bands to ensure the structure supports both the students and the educators in that cluster. The goal should be to create configurations that best serve the academic, social, and logistical needs of each individual school community.	3/7/2026 10:42 AM
789	I believe there is tremendous benefit of keeping the traditional grade bands. There are significant developmental differences and needs. Smaller schools with developmentally similar students allows for a better learning environment, and allows students the space to focus on their developmental needs/ goals without extra pressure from older students. I know there are important financial decisions to be made, but I believe the school environment and student needs should be our absolute number one priority.	3/7/2026 10:41 AM
790	It would be devastating to our Evansdale neighborhood to lose the school and have our students redirected to Pleasantdale and Sequoyah, when Henderson Middle is so close. I like the idea of K-7 or 8, then 8-12 for high school. That’s the way it was when I went through DeKalb County Schools in the 70’s and it was no problem. I think it’s more important to keep communities together, rather than have larger populations by grade.	3/7/2026 10:40 AM
791	I think grade band would be better for kids. As long as it truly creates better education experience.	3/7/2026 10:38 AM
792	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/7/2026 10:31 AM
793	Champion Middle, where would the new location be and would they continue as a theme school?	3/7/2026 10:25 AM

794	I think middle school is good, giving kids time to mature before they start school with 17 & 18 y/o. BUT it isn't imperative.	3/7/2026 10:21 AM
795	Taught in school with k-7. Not a good fit, especially these days and times	3/7/2026 10:20 AM
796	No comment	3/7/2026 10:13 AM
797	I'm still unclear how the grade band clusters will work.	3/7/2026 10:07 AM
798	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/7/2026 9:59 AM
799	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/7/2026 9:58 AM
800	I need more information to understand the implications. For example, what would attendance boundaries be?	3/7/2026 9:56 AM
801	Whatever this is, don't close Oak Grove Elementary School. Again, it would be short-sighted.	3/7/2026 9:52 AM
802	I think changing the grade bands is bad for students social development and bad for the district fiscally by needing more buses and buildings.	3/7/2026 9:46 AM
803	Moving schools every two to three years does not allow the school team to get to know the kids long term or create a sense of community. K-8 and 9-12 would be my preference.	3/7/2026 9:44 AM
804	Dunwoody cluster: could the district go to a junior high school concept ?	3/7/2026 9:42 AM
805	This needs to be county-wide. Part of the issues are related to differences between clusters and programs. Eliminating a third transition would be helpful. 3 years at the middle school level just doesn't work. Get rid of it and do a variation of k-6 or 8 and 7 or 9-12. Cluster the grades within the school to keep kids close to age levels together.	3/7/2026 9:42 AM
806	I am referencing to the area 3 cluster. I love the school that I am teaching at but I want our students to have the same opportunities that the schools on the north side of Dekalb County Schools receive.	3/7/2026 9:37 AM
807	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Traditional PK–5 grade bands remain appropriate in this high-utilization cluster. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/7/2026 9:34 AM
808	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/7/2026 9:32 AM
809	I believe that students of Midvale elementary would go to Livsey. Lively is already at capacity and trailers are already being used. This would not serve the needs of the community.	3/7/2026 9:30 AM

810	I think it’s ok to split up some of the elementary grades in order to keep communities together and within the same high school cluster to alleviate overcrowding (Ashford Park)	3/7/2026 9:25 AM
811	I’m concerned what grade bands would do to Montessori! If you are going to change the grade bands, how are you going to keep Montessori for pre-k to 5th?! Also we have three children and this seems like a lot of drop off and pick up for our family. Three different schools is a lot when they aren’t staying at the same school as long as planned.	3/7/2026 9:23 AM
812	Too many grade bands prevent students from forming sttong relationships with other students and trachers when theyre constantly transitioning.	3/7/2026 9:12 AM
813	I’m not really sure on this topic	3/7/2026 9:06 AM
814	Grade band changes should prioritize stability for students and communities. In the Chamblee cluster, maintaining the traditional PK-5 / 6-8 / 9-12 structure best preserves neighborhood schools and existing feeder patterns. Any changes should be based on local enrollment patterns and facility capacity rather than applying the same model across all clusters.	3/7/2026 9:04 AM
815	I believe it would work better to consider expanding Oakgrove Elementary so grades 6-8 can remain at the school and not need to transfer to middle school. Close Henderson Middle School , not Oakgrove Elementary	3/7/2026 9:04 AM
816	Pre-k-8th makes no sense. 4 year olds with 13 year olds? Again-why would one put 6th graders in the same building as 12 graders? If fewer schools to maintain is the goal, why have 4 bands.	3/7/2026 9:03 AM
817	I would need to see data from private schools about these grade bands. I was am 8th grader when high school went 8-12 at lakeside and that was young to be mixed in with am high schoolers. But we survived. Where is 6-12 being done effectively. Is there something else?	3/7/2026 9:02 AM
818	none	3/7/2026 8:59 AM
819	I don't agree with having 6th through 12th-grade students in the same facility during the same hours.	3/7/2026 8:59 AM
820	I favor the traditional model	3/7/2026 8:57 AM
821	I like pre-K-5th, middle school 6-8, and then highschool 9-12	3/7/2026 8:32 AM
822	There aren’t changes to my cluster.	3/7/2026 8:30 AM
823	If nothing can be done then I do think it would be helpful to add middle to the elementary age-PK-8 vs any is the other scenarios. Henderson Middle is a difficult and challenging transition for many and this would assure kids get support needed around the social and emotional issues that happen.	3/7/2026 8:21 AM
824	n/a	3/7/2026 8:20 AM
825	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/7/2026 8:15 AM
826	Children attending Oak Grove Elementary are around other students without there being a huge learning or emotional gap. Lakeside students are dealing with a whole range of different issues and should not be around younger students	3/7/2026 8:05 AM
827	Evansdale elementary is growing and has plenty of land for expansion.	3/7/2026 8:00 AM
828	The grade band scenario of 6-12 is a terrible idea. Developmentally speaking, you cannot put middle school and high school together. Peer pressure, social media pressure, mental health, brain development should be considered!	3/7/2026 7:58 AM
829	If pursuing grade banding, for the Evansdale/Henderson Middle/Lakeside school district, a scenario that should be considered is PK-6 and 7-12. Or PK-8/9-12.	3/7/2026 7:49 AM

830	Prefer traditional	3/7/2026 7:43 AM
831	It’s a different approach. I don’t have much of an opinion on it	3/7/2026 7:30 AM
832	More concerned more about small size, walking-distance to homes & quality of staff than grade bands within schools.	3/7/2026 7:25 AM
833	Keep elementary, middle and high schools separate	3/7/2026 7:04 AM
834	We need to stay with the traditional.	3/7/2026 7:01 AM
835	9-12	3/7/2026 6:57 AM
836	I am not sure how I feel about them right now.	3/7/2026 6:52 AM
837	I would prefer the county to close Henderson Middle School and have Oak Grove Elementary follow the Pk-8/9-12 band.	3/7/2026 3:10 AM
838	My children are 26, 22,22 so I’m not as tune as in years past. But having one pre-k was never enough. How about adding additional pre-k options? Fill seats and help more kids get off to a good start. The idea of Pre-k -3 and so on is interesting. It may create challenges for families with multiple kids. I’m also not sure how this would help fill seats and not have kids going long distances. My kids were in the Evansdale/Henderson/Lakeside cluster and there is a definite benefit to parents to have the younger kids in particular close to home. My current residence is Midvale/ Tucker MS/ Tucker HS and before that I’ve lived in Decatur (not city of) and Doraville. In all cases I’d say we are old fashioned and like the small neighborhood based schools.	3/7/2026 1:47 AM
839	Elementary children should not be in schools with teenagers	3/7/2026 12:53 AM
840	I do not have strong views on the grade band scenarios. My primary concern is preserving Oak Grove Elementary.	3/7/2026 12:12 AM
841	Alternatively, if Towers converted to a 6-12 environment it would allow for students to matriculate in a stable environment that would allow for positive improvements regarding: IEP/RTI protocols, social emotional support, intensive English support, fidelity in reinforcing GaDoe vertical alignment, and athletics/extracurricular involvement. Most importantly, students can evolve in a community that knows them, and graduate with a sense of pride.	3/6/2026 11:47 PM
842	When I went through school in NC, I went through several schools because of the grade bands: PK-4, 5-6, 7-8, and 9-12. I felt that having them separated in that way helped cater the learning and overall environment / atmosphere to each social level that the grades presented. I even like the idea of PK-3 (from the options presented) because younger kids are around younger kids. What I’ve experienced with my son starting school AND going to volunteer at his school is that the older kids can be mean or bad influences to the younger kids. This separation could be very beneficial!	3/6/2026 11:34 PM
843	I think the 6-12 scenarios do not support students with their development.There is too much of a development gap between a 6th grader and a 12th grader and it will hurt the students.	3/6/2026 11:27 PM
844	Robert Shaw elementary	3/6/2026 11:26 PM
845	I support maintaining the traditional grade band model of PK–5 for elementary, 6–8 for middle school, and 9–12 for high school. This structure is familiar for families and aligns with students’ developmental stages. Consolidating some elementary schools should address concerns about under-enrollment and prevent resources from being spread too thin. Keeping younger and older students in separate school environments can also help reduce potential bullying concerns that may arise in broader PK–8 or 6–12 configurations.	3/6/2026 11:04 PM
846	The current age banding of k-5, 6-8, and 9-12 is appropriate.	3/6/2026 11:02 PM
847	I do not support altering existing grade bands. Elementary schools should be grades PK through sixth grade, middle schools seventh and eighth grade. High schools ninth through 12th grade. If grades do need to shift in order to accommodate students at existing neighborhood schools, please consider PK – second grade, third through fifth grade, sixth through eighth grade, and ninth through 12th.	3/6/2026 10:52 PM
848	We have a child that is in middle school who rides the bus with high schoolers. The wide bands do not seem ideal. Keeping 6th grade with elementary and 8th maybe a more workable solution.	3/6/2026 10:51 PM

849	I don't feel like stakeholders have been provided enough information regarding this to provide meaningful feedback.	3/6/2026 10:48 PM
850	The current grade band at Oak Grove and Lakeside Highschool is appropriate. I can’t imagine combining as low as 12 year olds with high school students. They are not experiencing the same things as children and young adults. High School should remain 9th-12th. I do not want my 12 year old to be exposed to student dating which commonly happens in high school.	3/6/2026 10:48 PM
851	See consolidated feedback above.	3/6/2026 10:48 PM
852	Evansdale elementary should stay in Henderson middle school and lakeside high school. The french immersion program begins in elementary and is unique and lakeside students tutor the elementary kids. This is an important part of our community.	3/6/2026 10:46 PM
853	im all for it	3/6/2026 10:43 PM
854	I have no comment	3/6/2026 10:38 PM
855	I do not feel that I have enough information to provide a educated opinion on grade bands; however, based on my professional experience, K-8 schools can be problematic.	3/6/2026 10:38 PM
856	I think that Kindergarten through Second Grade should be in schools by themselves. Third through Fifth should be in their own schools.	3/6/2026 9:57 PM
857	I personally like that schools are PreK-5th. I think this helps with local traffic patterns tremendously. If families have students spread out between many schools this lends to a lot of driving at drop off and pickup. I understand that the bus is a great options, but this does not work for many families due to work schedules.	3/6/2026 9:56 PM
858	The band scenarios will have a large impact on children's development and well-being, particularly if poorly implemented. It is not clear what the existing educational research shows of such changes such as combining 6-12 on student safety and performance. DeKalb County may take upon itself unwanted liability if selected practices are not supported by evidence and best practice and adverse outcomes result.	3/6/2026 9:17 PM
859	Grade bands can be adjusted based on demographics to maintain schools.	3/6/2026 9:12 PM
860	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/6/2026 9:10 PM
861	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/6/2026 9:05 PM
862	I don't think the grade bands are correct. Do an 8th grade academy or a 6th grade academy. Henderson needs some wiggle room. It's got a terrible reputation, at least partially from procedures that have to be in place to control and contain such a large student body.	3/6/2026 9:02 PM
863	We’re in Evansdale/HendersonMiddle/Lakeside cluster. I’m in favor of the 2-band scenarios due to only one transition & fact that students get to spend more years together. At same time, it could be challenging to have the wide maturity/developmental differences between the oldest & youngest in 2-band scenarios.	3/6/2026 9:01 PM
864	Due to hormones and development, I do not wish to have middle schoolers (6-8) in the same building as elementary school students. I am not in favor of K-8 schools.	3/6/2026 9:00 PM
865	From my understanding, McNair high and Cedar Grove is on the chopping block. What about the kids that live in those areas in all the homes that are being built? Where are they going?	3/6/2026 8:56 PM

866	I believe that k-8 in one school should not move forward.	3/6/2026 8:51 PM
867	First of all, I don't think that we have been provided with enough information on grade band scenarios to make recommendations. It is clear the benefits/drawbacks that these scenarios may provide in terms of child development and family logistics. But, it is not clear enough how these grade band scenarios will affect building utilization and operating costs. I would like more information in that respect before making recommendations. That being said, from a purely developmental standpoint, I would be in favor of the PK-3/4-5 scenario. Particularly if this would allow more people to access their local/walk-able elementary schools, albeit for a shorter period of time. I think it would allow a greater focus on literacy. I also think that this model would potentially allow more access to preK and improve access to early childhood education. Universal access to free preK and early childhood literacy would be a wonderful gain for DeKalb. It also would likely increase enrollment in public schools overall bc if a kid is enrolled in a preK program and has a good experience, parents may stay in the system (vs. leaving for private/charter options). The grade level bands that put 6-12 graders together is very concerning. Putting 6th and 7th graders with high school kids will allow a mixing of kids of different developmental ages that may cause some trouble...increased exposure to drugs, vaping, alcohol, sex, etc. In no way do I want my 11-13 year old daughter in school with 16-18 year old boys. Sorry, nope.	3/6/2026 8:49 PM
868	Keep elementary, middle and high school students separate.	3/6/2026 8:43 PM
869	I strongly dislike the idea of grade banding elementary schools to pk-8th or doing a 6-12 grade band. I think that is much too big of an age span and will put the youngest children at a higher safety risk. It will also withdraw from the personal feeling of a school by creating a much larger student population. If the grade banding happens, I will like try to move or try to put my kids in private school. I do not think grade banding will be beneficial for property values.	3/6/2026 8:42 PM
870	Keep Oak Grove open	3/6/2026 8:40 PM
871	I am not comfortable with having 6-12 graders in the same educational setting, but I am willing to gather a better understanding of the situation as it relates to the need.	3/6/2026 8:35 PM
872	Generally I don't like the idea of really little kids mixing with middle and high or high and middle mixing.	3/6/2026 8:27 PM
873	Current grade school is good. I would not want to be with the high school age kids . I would not want to change school every couple years	3/6/2026 8:23 PM
874	Que la escuelas sean de 5/8 grados	3/6/2026 8:21 PM
875	I believe every effort should be made to keep as many schools as possible open. Schools serve as "capable guardians" with staff and police increasing safety in the community.	3/6/2026 8:20 PM
876	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/6/2026 8:17 PM
877	I care about how grade bands support the students. I worry about kids moving every few years, or giant gaps in kids ages in th same school. I understand the need to maximize the facilities, but not if it isn't positive for the students.	3/6/2026 8:17 PM
878	I would welcome different grade bands in the Dunwoody cluster. I'd love to see our elementary schools go to 6th grade, have middle school be 7th-9th grades and high school 10-12th grades. This would help with the overcrowding in the high school especially.	3/6/2026 8:15 PM
879	Closing Oak Grove elementary Will affect the broader school district. People move into this area for this particular school. People will move out which will and turn housing prices to drop. The entire county relies on the property taxes from this area.	3/6/2026 8:08 PM
880	Middle school is hard enough. Why add in little kids or older teenagers.	3/6/2026 8:05 PM
881	grade distribution should stay as it is, K-5, 6-8 and 9-12	3/6/2026 8:02 PM

882	I prefer the traditional option. I do not like the idea of middle school kids being with high school kids. It does not feel safe for the younger ones.	3/6/2026 7:54 PM
883	I'm not opposed to it. I was a part of Dekalb's final cohort that attended elementary school thru 7th grade and started high school in the 8th grade (Clarkston HS class of 2005). All of the benefits outlined in the proposal makes sense.	3/6/2026 7:50 PM
884	It’s not clear at all where Brockett Elementary school students will go.	3/6/2026 7:49 PM
885	Looking at elementary school plus school quality	3/6/2026 7:40 PM
886	Would like to maximize student numbers in order to offer more courses, enrichments, and sports and clubs.	3/6/2026 7:37 PM
887	I recommend no more than 3 grade bands as larger schools become too challenging and it is harder for younger students to co-exist with Srs in high school.	3/6/2026 7:29 PM
888	Oak Grove Elementary school is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds.	3/6/2026 7:29 PM
889	Evansdale should stay with lakeside cluster .	3/6/2026 7:29 PM
890	1. [School/Cluster Name – e.g., Lincoln Elementary Cluster] – If grades K–2 were consolidated at Lincoln Elementary and grades 3–5 at Roosevelt Elementary, it could allow for more focused resources and specialized instruction at each site. However, careful attention should be given to transportation logistics and maintaining a consistent school culture across campuses. 2. [School/Cluster Name – e.g., Jefferson Middle/High Cluster] – Grouping grades 6–8 at Jefferson Middle and 9–12 at Jefferson High could streamline curriculum alignment and staffing. It may also allow middle school students access to more age-appropriate facilities. Consideration should be given to class size balance and extracurricular opportunities. 3. [Cluster-wide considerations] – Across all clusters, ensuring transitions between grade bands are clearly communicated to families and supported with academic and social guidance will be essential. Additionally, review of enrollment projections, building capacity, and potential impacts on teacher assignments will help identify the most effective configurations.	3/6/2026 7:21 PM
891	DCSD has already had k-6 and 7-12. It did not work. A sixth grader or even 7,8 need not be in school with 10-12 graders.	3/6/2026 7:14 PM
892	Don't like the grade bands scenarios. Keep same structures.	3/6/2026 7:10 PM
893	Being in the City of Tucker, I take pride in our community, our expansion, and our growth through our city council and community service initiatives by many churches and organizations. Tucker as well as other clusters should be examined separately, what are the needs of Tucker and the families here in the Tucker cluster?	3/6/2026 7:09 PM
894	Oak Grove ES is such a special place and a cornerstone of the community. I taught there for 9 years and cannot imagine the impact closing the school would have on the Lakeside cluster.	3/6/2026 7:08 PM
895	Children in Middle school are developmentally different than high schoolers. They need their own schools. People buy their homes to belong to neighborhood schools for many reasons.	3/6/2026 7:04 PM
896	How will this affect the communities at large etc. taxing; home owners insurance. Taking away certain schools...how will that impact property value? Why are more schools on the south side closing than those in the North?	3/6/2026 6:59 PM
897	Oak Grove Elementary	3/6/2026 6:58 PM
898	Agan, I disagree with the entire concept. There are other issues more pressing for DKSchools to address.	3/6/2026 6:57 PM
899	My son is in kindergarten. But if grade band scenarios around us are changed, and he has to attend school with middle-school aged children or older, I would most likely pull him out of public school. I believe it puts the younger students in danger to send them to the same school as much older students.	3/6/2026 6:52 PM
900	Evansdale Elementary School. There are already 28+ kids in Co taught classroo on 4th grade. It’s already crowded, especially for kids who have disabilities. They don’t receive the specialized teaching and small groups they deserve and needed so much for them to learn and grow. I believe consolidating this school will impact not only kids who have disabilities but also	3/6/2026 6:52 PM

	will impact black and brown communities. Parents who are privileged are able to pull their kids and put them in private school using voucher.	
901	The potential grade band - 6 grade through 12 grade is misalignment based on social skills, development, safety, and maturity/behavior. This grade band is a set up for devastation.	3/6/2026 6:50 PM
902	While I am okay with the k-8 band, I think the 6-12 band could be very problematic. I do not believe it is wise or health for 17-18 year olds to be in the same building as 11-12 year olds. Do these younger kids need to be afraid to go to the restroom due to drugs and other activity that occur on a regular basis in dekalb county highschools.	3/6/2026 6:45 PM
903	Don't like the option of PK-3/4-5 configuration. The best scenario would be the tranditional-what we have in place now or PK-8 schools if it needs to change. We do not need 6th graders in the same building as 12th graders. So that scenario is terrible.	3/6/2026 6:45 PM
904	I think we are closing too many elementary schools especially in North Dekalb County	3/6/2026 6:38 PM
905	I definitely think you all should not do a 6-12 grade band, because I do not you should allow the younger children be in the same school as the older children. I think a PK-1, 2-8, and 9-12 will be great grade bands. That allow the younger children to still get recess and burn off some that energy they have run off each day. Students will learn better.	3/6/2026 6:37 PM
906	N/A	3/6/2026 6:34 PM
907	I like the ideas of different grade band scenarios but not sure creating a another band which creates more "changes of school" is financially beneficial. Would be good that longer times of after school care be offer for lower grades PK-1	3/6/2026 6:22 PM
908	Closing or merging it with another school could create problems like overcrowding, transportation issues, and disruption to students’ routines.	3/6/2026 6:05 PM
909	n/a	3/6/2026 6:03 PM
910	The information given on grade bands is unclear. I can not make a determination with the given resources.	3/6/2026 6:03 PM
911	I understand and support the need to address overcrowding at Dunwoody High School. I recognize that Vanderlyn’s proximity to the high school places our campus within a broader facilities planning conversation. The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closures are made. Vanderlyn is a diverse, academically strong, and inclusive community. Preserving stable elementary environments while solving high school challenges aligns with district priorities. I would welcome collaboration between district leaders and both school communities to explore campus-level solutions that address high school capacity while preserving the Vanderlyn community.	3/6/2026 5:48 PM
912	Feedback on Potential Grade Band Scenarios For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/6/2026 5:47 PM
913	Feedback on Potential Grade Band Scenarios For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/6/2026 5:44 PM
914	I'm not thrilled with the idea of 6th and 12th graders in the same facility. Too wide an age span.	3/6/2026 5:37 PM
915	How can chestnut be expanded? Is there a physical plan for how this will be done?	3/6/2026 5:31 PM

916	Henderson Mill Middle	3/6/2026 5:26 PM
917	There's no point in this because the board doesn't listen and just spends way too much money on consulting fees. There different plans through the years have never been useful or well thought out.	3/6/2026 5:23 PM
918	I prefer the traditional grand band scenarios (pre-k-5, 6-8, 9-12). I would not want my 6th grader in the same building as a 12th grader! Having an upper elementary school of 4-5 would be okay as well and could help better transition to middle school years.	3/6/2026 5:12 PM
919	I believe that we should keep everything traditional and keep it as it was. This community is a community that does not like change in schools.	3/6/2026 5:11 PM
920	Ashford park should be kept or all moved as one to John Lewis elementary with John Lewis joining the chamblee cluster	3/6/2026 5:10 PM
921	The grade bands in current use work for this population and area. Students demand continuously growing last 5 years post Covid. Low numbers for covid years being used by HPM are very negative affecting the actual truth in an effort to feed the narrative HPM wants which is to close small school and build unwanted mega schools	3/6/2026 5:09 PM
922	See above	3/6/2026 5:06 PM
923	Chamblee needs to be the same grade band.	3/6/2026 4:58 PM
924	I vote to continue the current school	3/6/2026 4:57 PM
925	Continue the present grade band.	3/6/2026 4:56 PM
926	I think it should stay how it is it's a great school	3/6/2026 4:56 PM
927	I agree to banding young students, such as (PK-3-4-5/6-8/9-12) together in a school building due to negative exposure at an early age. We need cohesiveness and structure throughout the county.	3/6/2026 4:55 PM
928	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/6/2026 4:54 PM
929	I think that in the chamblee cluster, specifically Ashford Park, we could handle prek-3 at one location, and 4-5 at another. Ashford Park has been losing a large number of students after 3rd grade for a few reasons. Our school is possibly the largest feeder to the Kittridge Magnet Program. Last year I think we sent 25 students. We also lose a large number of students to private schools for a number of reasons such as - easier to apply at expansion years for certain schools, certain pre-requisite testing not required for grades below 5, religous reasons, mistrust with dekalb county on things like boundary lines and school support. Ashford Park is an example that could/should be studied on why this happens. We have 6-7 classes for K-3, and then it drops down to 3-4 classes for the upper grades because our enrollment drops.	3/6/2026 4:51 PM
930	My preference is traditional but also could see prek-8 and 9-12 as a good solution	3/6/2026 4:48 PM
931	Mr. Leopold mentioned making Cross Keys 6th-12th because it would no longer have a middle school. Having 11-12 year-olds in the same building as 19-21 year-olds is terrifying. Sarita Smith stated that Sequoyah would have a 6th-12th model, but those still have two separate buildings. Having 6th grade in the same building as HS does not seem like a good scenario. Not a fan. I am more apt to accept an 8th-12th grade band, like we used to have, and changing MS to 5th-7th, and ES to PK-4; however, I would like to see that across the board. We tend to have high failure rates among 9th grade. I feel that having 8th grade in HS could reduce those failure rates.	3/6/2026 4:45 PM
932	Grade banding does not sound like a poor decision. However, I think there should be a cut off line. The building or areas of a building need to be separated. For example, Area A is for high school students and Area B is for middle school students. There are three high schools and 6 middle schools. Suggestion: Could not we just move the middle schools to high schools?	3/6/2026 4:41 PM

	Question? Are the 6 middle schools accumulatively larger than 3 high? I like the Grade Band idea if existing employees are transferred to the high or middle schools.	
933	I think the band clusters is a problem waiting to happen. That's a huge gap from 6-12. Why should our students be confined to a new neighborhood and with students who are much older than them. I think that will increase bullying, teen pregnancy and other problems which can lead to students dropout.	3/6/2026 4:40 PM
934	It would be ok to consolidate with bands such as k-2, 3-5, etc as long as they stay within a community and aren't bused everywhere.	3/6/2026 4:38 PM
935	My suggestion is to use map visualization to help analyze school capacity and empty seats. For example, the district could create a map that shows school locations, district boundaries, the number of schools in each area, and how many empty seats each school has. With this kind of visualization, it would be easier to see where schools are clustered and where enrollment is lower. This could help the district identify a central school within a district that could serve more students efficiently if consolidation is necessary. Using data visualization and analysis could help decision-makers plan school capacity more effectively and reduce wasted resources. I am a data visualization analyst. Happy to answer questions related to it. My email is weidan.hwd@gmail.com.	3/6/2026 4:35 PM
936	The traditional grade band has been working well for Oak Grove elementary, Henderson Middle and Lakeside High. These schools are well attended.	3/6/2026 4:32 PM
937	Our school (Tapestry Charter) is not on the list, thank goodness, but we live down the street from Evansdale Elementary and I can tell you that school is the reason we moved to this neighborhood. It is a great school that means a lot to this community and has land around it to make expansion easy. It is NOT a school you should close	3/6/2026 4:11 PM
938	It is important for kids in Ashford park to feed into Chamblee middle and Chamblee high. We purchased our home to be in these school zones	3/6/2026 4:09 PM
939	1	3/6/2026 4:03 PM
940	Not sure the value in changing from today. Do not see the pros.	3/6/2026 4:03 PM
941	Ashford Park Elementary should not be closed and should continue to be part of the Chamblee cluster.	3/6/2026 4:02 PM
942	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/6/2026 3:49 PM
943	I like a traditional high school experience and I have concerns around little kids being around much bigger kids.	3/6/2026 3:47 PM
944	It works as is.	3/6/2026 3:46 PM
945	With 10.1 acres, sports fields and multiple parking lots, allowing additions to the back of the school while maintaining ample play and parking space. Grade band scenarios such as combining an enlarged Evansdale with other elementaries or with Henderson middle would maintain the strong neighborhood connections and the long standing Lakeside school district.	3/6/2026 3:46 PM
946	A four year traditional high school should be maintained as-is. If 6th grade wants to be absorbed into ES then they should be adequately separated from the pre-3s and pre-4s and kindergarten students.	3/6/2026 3:45 PM
947	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized.	3/6/2026 3:44 PM
948	We want to keep our cluster of Ashford Park, Chamblee Middle and Chamblee High school in tact.	3/6/2026 3:44 PM
949	I think the PK-5, 6-8, 9-12 is working for the Montgomery/Chamblee Middle/Chamblee High Cluster.	3/6/2026 3:42 PM

950	I understand that the district is exploring different grade band scenarios as part of the cascading use approach, where elementary schools may merge into former middle school buildings and middle schools may move into former high school facilities. From a districtwide perspective, I can see how this could help the district use buildings more efficiently and strengthen academic programs if schools are more appropriately sized. However, my main concern with changes to grade bands is how they affect students' transitions and stability. Frequent school transitions can be challenging for students socially and academically. If grade band changes are considered in specific clusters, I would encourage the district to prioritize models that reduce the number of transitions students experience while still balancing enrollment across schools. For example, if an elementary cluster were to shift from a traditional PK–5 elementary model to something like PK–2 and 3–5, the district should clearly explain how that would benefit instruction and student development. While there could be advantages to grouping younger students together, it could also create additional transitions for families and may affect relationships students build with teachers and peers. I would also like the district to carefully consider the impact on feeder patterns in each cluster. Families often rely on clear and consistent pathways from elementary to middle to high school. Any changes to grade bands should maintain strong feeder patterns so that students continue progressing through their community schools whenever possible. From a long-term perspective, I support exploring grade band options if they help ensure schools are appropriately sized and able to offer stronger programs and resources for students. My priority is that any changes ultimately improve the educational experience while minimizing disruption for students and families across the district.	3/6/2026 3:39 PM
951	I feel grade band is not conducive some kids learn faster, maturity levels are different, etc. Just no.	3/6/2026 3:36 PM
952	No I do not. It's often better for safety, academic focus, and social development if clusters or "pods" in a school are grouped by similar grade bands rather than mixing very wide ranges like 6–12 in the same cluster.	3/6/2026 3:36 PM
953	I think pre-K through fourth, fifth through eighth, and ninth through 10th	3/6/2026 3:36 PM
954	I'm not sure how this scenario helps the issue with the aging buildings that are currently in need of repair and renovation.	3/6/2026 3:31 PM
955	My main concern is age banding. 6-12 graders in one building or one campus is not appropriate. Younger students are vulnerable and older students would be distracted by immature behavior.	3/6/2026 3:30 PM
956	I love grade bands and clusters in general. I graduated from a school district who had clusters. I understand DCSD is too large for the clusters I am familiar with but smaller elementary schools are better. (K-1, 2-3, 4-5, 6, 7-8, 9, 10-12) Those are the clusters where I am from. I know the sixth and ninth graders back home have truly benefited being in their own school for various reasons, but again, I know these scenarios will not work for a district as large as this one.	3/6/2026 3:27 PM
957	Need to be the same	3/6/2026 3:23 PM
958	The traditional model seems to work best.	3/6/2026 3:20 PM
959	no comments at this time	3/6/2026 3:18 PM
960	Grades are great. Traditional and fit for our area. Class size is perfect as is number of students. Big, but not overwhelming	3/6/2026 3:17 PM
961	Don't feel strongly about grade band scenarios. Primary concern is keeping the Ashford Park Elementary community together.	3/6/2026 3:16 PM
962	Think pros and cons should be weighted for scenarios. 6-12 scenarios seem like it would present challenges for younger kids in that program. Seems like it should be weighted more heavily.	3/6/2026 3:08 PM
963	I don't think that changing the current grade bands would be helpful. The grade bands with less grades (example 3-4) would make it hard to connect schools and harder for students and parents to adjust.	3/6/2026 3:07 PM
964	"I am specifically referencing the [Insert Your Cluster, e.g., Lithonia or Lakeside] Cluster. I strongly advocate for the PK–8 model over the traditional middle school conversion scenario. For schools like [Insert School, e.g., Midvale or McLendon], which are currently flagged for	3/6/2026 3:02 PM

	closure due to ~60% utilization, the district should instead pivot to a specialized PK–8 'Boutique' school. By expanding the grade band to include Middle School years in these smaller buildings, the district can: Maintain smaller class sizes (under 20 students) which are impossible in 'Mega-Schools.' Provide targeted needs programs (e.g., Montessori or STEAM) that require the intimate environment these facilities provide. Furthermore, if the district moves forward with the 6–12 model for high schools like Lithonia or Cedar Grove, I request that the 'excess' capacity (currently at ~30%) be used to create specialized Career Academies rather than simply filling seats with general population students. Smaller, targeted cohorts within these large buildings would better serve student success than massive, consolidated environments. One glaring piece of data in the 2026 report is Ashford Park Elementary at 171% capacity. If you are in that cluster: Argument: Point out that while some schools have "empty seats," others are dangerously overcrowded. Grade Band Solution: Suggest a PK–3 / 4–5 split for the Chamblee/Brookhaven area to spread that 171% load across the buildings slated for closure nearby, rather than closing them and making the "Mega-Schools" even larger.	
965	Consolidating middle schools and high schools could be troublesome due to potential behavior issues in the same complex. Middle school students should be separated from high school students for a variety of reasons.	3/6/2026 2:59 PM
966	Grade bands would at least save some of our elementary schools. K through three school and a four through five school. The middle school is not appropriate to become an elementary school.	3/6/2026 2:59 PM
967	Gather community feedbacks,	3/6/2026 2:58 PM
968	For the Robert Shaw cluster, the traditional PK–5 elementary structure works best for students and families. Elementary-aged children benefit from staying in a school environment specifically designed for younger learners, with age-appropriate teaching methods and support services. Changing grade bands or merging schools could disrupt the stability that students need during their early academic years. Maintaining the current structure allows students to build strong foundations before transitioning to middle school.	3/6/2026 2:57 PM
969	For the Lakeside cluster (Oak Grove, Sagamore Hills, and Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/6/2026 2:57 PM
970	There was already a 4tha and 5th grade elementary with Dunwoody Elementary was created. Not sure why this was converted to a k - 5 and take students away from other local schools.	3/6/2026 2:54 PM
971	NA	3/6/2026 2:53 PM
972	I feel that grade clusters need to be tradiontal with the addition of 3 and 4 year olds added to elementary school settings.	3/6/2026 2:53 PM
973	I believe the potential grade band scenarios could be a positive step if they are carefully planned around the needs of each school cluster. Organizing schools by grade bands can help create more focused learning environments and allow teachers to better specialize in the developmental needs of students at each stage. For example, grouping elementary schools as Pre-K through 5th grade, middle schools as 6th through 8th grade, and high schools as 9th through 12th grade provides a clear and structured transition for students as they progress through the school system. In clusters where enrollment is high or facilities are newer and better maintained, maintaining these traditional grade bands would likely work well and allow schools to operate efficiently. However, in clusters with older buildings or declining enrollment, it may make sense to adjust the grade bands or consolidate certain grade levels to make better use of the facilities that are in the best condition.	3/6/2026 2:53 PM
974	Whatever you decide.	3/6/2026 2:52 PM
975	Ashford park needs to stay	3/6/2026 2:51 PM
976	at Rainbow elementary organization, curriculum and staffing is excellent and this plays a big rpart in grade band scenarios	3/6/2026 2:51 PM

977	I am referencing Evansdale Elementary school and I have significant concerns about the proposed grade band scenarios. While the intention may be to maximize facility use but separating elementary grades into different schools (such as K-3 and 4-5) creates unnecessary disruption for young children and families. The proposed grade banding will also increase transportation time and traffic for families with multiple children and create larger, less personal learning environments. The district should prioritize keeping neighborhood schools intact with a traditional K-5 structure whenever possible.	3/6/2026 2:48 PM
978	No sure	3/6/2026 2:46 PM
979	In many clusters, a traditional PK–5 / 6–8 / 9–12 model may continue to work well because it aligns with current curriculum structures and student developmental stages. Elementary students benefit from remaining in a stable environment through 5th grade, while middle school provides a transition period before high school. However, some clusters may benefit from PK–8 models, especially in communities where maintaining strong relationships and continuity for students and families is important. A PK–8 structure can reduce transitions and provide more consistency for students during their early academic years. The district should evaluate each cluster's enrollment numbers, building capacity, and community needs before implementing a single model across all schools.	3/6/2026 2:37 PM
980	I believe that the grade bands should remain the same. K-5 , 6-8 , 9-12	3/6/2026 2:36 PM
981	I would like to see PK3-3 in one building and 4-5, 6-8,9-12 in separate buildings.	3/6/2026 2:36 PM
982	If changing the grade bands keeps all Ashford Park students together and as part of the Chamblee cluster, it's an option (among others) worth considering.	3/6/2026 2:35 PM
983	I was educated in DeKalb Co with K-7. / 8-12 in an era when these schools were ranked very high nationally and went on to Ga Tech and a very successful career. So, I know it can work.	3/6/2026 2:33 PM
984	Whatever is done you must keep the prek - 5 grades away from the rest of the students as these kids are so impressionable and the 6 graders and older are not good role models for the younger kids for the most part (honestly, they don't know how to be good role models and are not taught the proper skills to do so). This is a generalization which is how you have to approach this strategy or else you create to many models that are not sustainable long-term.	3/6/2026 2:32 PM
985	I think the PK-3/4-5/6-8/9-12 bands are a good idea. I think combining older students with very young kids is not a great idea.	3/6/2026 2:30 PM
986	The possible consolidation of both Lithonia and Miller Grove High Schools (grades 9-12) would benefit from this merger, but I know it will face strong resistance. A strong administration, a strong faculty and staff, and a strong community/business partnerships will need to be resilient.	3/6/2026 2:30 PM
987	I do not feel that high school and middle school should be combined. I worry there would be more issues considering the maturity levels of high school aged vs 6-8 grade level kids and having them in one building or campus is not ideal.	3/6/2026 2:29 PM
988	Grouping kids with a large age range within one school is not safe for younger children. There is a lot of that occurs in bathrooms, halls and cafeteria at the high school that a 6th, 7th or 8th grader should not be exposed to. This is the same for k-5 being exposed to middle school behavior. Also the reduction of middle and highschool extracurricular activities to create larger one school grade configurations is not fair to the students. All high schools should have enough older students to form talented football, baseball, softball and volleyball teams. Creating school clusters that are not consistent could affect property values.	3/6/2026 2:26 PM
989	I think it is best to keep K-5 separated from 6-8 UNLESS it's in a smaller school. But the proposals seem to be leaning more towards larger schools. I think these two grade clusters need to be kept separate to minimize bullying behavior between older and younger children and I think with a wider age gap it's harder to monitor.	3/6/2026 2:25 PM
990	The grade band scenarios need more research in my opinion. If implemented, area needs and demographics have to be considered.	3/6/2026 2:23 PM
991	Bob Mathis is a small school , If closing the school and combining us with another school would allow us to have more resources then I think it is a great idea.	3/6/2026 2:23 PM
992	We know enrollment is down, so decisions should be based on that.	3/6/2026 2:22 PM

993	Thank you for the opportunity to provide feedback regarding the potential grade band scenarios. I believe it is important to carefully consider how any changes may impact students, families, and staff within each school cluster. From my perspective, maintaining clear and consistent grade bands that support student development and smooth transitions between schools should remain a priority. For example, keeping elementary schools within a K–5 structure and middle schools within a 6–8 structure often supports age-appropriate programming and allows schools to focus on the specific academic and social needs of those grade levels. If adjustments to grade bands are being considered within specific clusters, it would be helpful to ensure that schools have the resources, staffing, and space needed to support those changes. Additionally, families should be given clear communication and sufficient time to prepare for any transitions that may affect their students. Overall, decisions about grade band configurations should prioritize student stability, instructional quality, and equitable access to resources across all schools in the cluster.	3/6/2026 2:21 PM
994	Grade band scenarios should only be changed in middle and high schools.	3/6/2026 2:21 PM
995	I am only in support of the traditional bands - k-2, 6-8 and 9-12. This makes the most sense age wise and works well.	3/6/2026 2:21 PM
996	I like the idea of PK-2 if that means we could keep younger children from disruption resulting from the testing that takes place starting in 3rd grade. Also, if the buildings available in the cluster are smaller and could be repurposed in this way, a PK-2 scenario would make sense. I could support a PK–8 school scenario if the building was a newly built building (i.e. if Chesnut is rebuilt) that was designed to support and separate the grade levels within the building appropriately. I also like the idea of a PK-6 and 7-12 scenario if the building was built to separate younger kids from older kids. The PK-3, 4-6, 7-12 scenario could also make sense academically since coursework tends to get more rigorous in 4th grade.	3/6/2026 2:20 PM
997	I do not know if 6-8 are socially and mentally ready to be clustered with 9-12.	3/6/2026 2:18 PM
998	The Stephenson band and the Lithonia band scenarios: New construction on 124 (at Lithonia Industrial) and across from the middle school suggest that the demographic data used by DCSD is out of date.	3/6/2026 2:18 PM
999	I like the idea of PK-8/9-12. I think Pk-5 in one building and 6-8 in one building but pk-8 being on the same campus.	3/6/2026 2:17 PM
1000	I think older students model the way for younger students, so splitting into smaller grade bands would limit that element. Plus it would likely put more families with multiple drop offs/school attendance, causing increased traffic and bus routes.	3/6/2026 2:15 PM
1001	Dunwoody Cluster My preference is for the traditional grade bands.	3/6/2026 2:15 PM
1002	the current scenario disproportionately concentrates grade band disruption in the southeast corridor (Lithonia, Stonecrest, Cedar Grove, McNair, Miller Grove areas) while the north of the county sees primarily facility closures without the added complexity of grade restructuring.	3/6/2026 2:14 PM
1003	I believe these should be based on need and population.	3/6/2026 2:13 PM
1004	-	3/6/2026 2:12 PM
1005	While I understand that adjusting grade bands can help balance enrollment and maximize building capacity, it is important to carefully consider how these changes will impact students, families, and school communities. In reviewing the potential scenarios, maintaining stability for elementary-aged students should remain a priority. Elementary schools serve as foundational learning environments where students build strong relationships with teachers, peers, and support staff. Significant grade band changes that move students between multiple schools at early grade levels may disrupt that stability. If grade band changes are considered within specific clusters, it will be important to ensure that schools receiving additional grade levels have the appropriate classroom space, staffing, and support services to accommodate those students effectively. Additionally, transportation, family logistics, and the social-emotional impact on students should be key considerations. For example, if a cluster were to shift to a K–2, 3–5, and 6–8 model, careful planning would be necessary to ensure smooth transitions for students and families and to maintain continuity of academic and behavioral supports. Overall, I encourage the district to prioritize minimizing student transitions, maintaining strong school cultures, and ensuring that schools have the resources necessary to support any grade band changes effectively. Thank you again for providing stakeholders the opportunity to share feedback during this process.	3/6/2026 2:11 PM

1006	I believe offering PreK for the City of Dunwoody would be an incredible and invaluable service to offer our community. This would utilize Vanderlyn's facilities, it's incredible and established staff, and would allow new and upcoming families to join the already high parental involvement.	3/6/2026 2:09 PM
1007	keep the same	3/6/2026 2:06 PM
1008	I feel schools should remain separated. Once before the elementary schools went to 7th grade and it did not work with older students in the building with younger children. The same would apply with younger children mixed in with upper grade high school students.	3/6/2026 2:04 PM
1009	The school has one pk and goes up to 5th grade. I think it works great in this smaller community setting.	3/6/2026 2:03 PM
1010	I don't agree with what is being proposed of the grade bands. It doesn't make much sense, especially in terms of teacher certification being elementary, middle, and high. Just because you have elementary and middle school together (or middle and high together) doesn't mean those teachers are certified to teach outside that grade band. It doesn't make sense from that standpoint along. Much less, from an overcrowding standpoint (which is likely what will happen to the schools where this is being considered).	3/6/2026 2:03 PM
1011	I don't feel strong that current grade separation needs to change unless it presents a financial benefit to the county that would allow for reinvestment in the schools. However, if were to choose based on our current location I believe separating PK to 3 and 4 to 5 into separate bands in order to potentially allow Sagamore to serve as a facility for one bracket and Oak Grove Elementary for the other I can also see a benefit of combining 6-12 if that allows us to have a middle school facility closer to where we live. Kids in our neighbor who attend Henderson spend a significant portion on their day on the bus. I personally attended a school that was 6-12 growing up and did not believe it negatively impacted me academically.	3/6/2026 1:59 PM
1012	Leave as it is due to age gaps	3/6/2026 1:58 PM
1013	I don't have children so I cannot reference specific schools or clusters. However, as a teacher, having grade bands such as K-2 or PK-3 would hopefully allow for more focus on foundational skills of Reading, English Grammar, Writing, Math, Science, and Social Studies.	3/6/2026 1:57 PM
1014	See answer to number 4	3/6/2026 1:56 PM
1015	I do not believe mixing high school and elementary is a good idea.	3/6/2026 1:54 PM
1016	I think middle grades can be a difficult group, behavior wise. It would be wise to separate the 6th graders from the rest of middle school. This would allow 6th graders time to mature and cause fewer issues in middle school.	3/6/2026 1:54 PM
1017	Given the research on various developmental phases for children, I would not change the grade bands.	3/6/2026 1:51 PM
1018	Lithonia/Stephenson cluster, we need to keep the schools open	3/6/2026 1:50 PM
1019	Tengo un niño en 3 grado y uno en 8vo grado las escuela y las instalaciones me parecen excelentes escenarios de aprendizajes	3/6/2026 1:48 PM
1020	I have always believed that grades pk-5 should be learning to read grades 6-8 should be reading to learn and 9-12 should be application of reading	3/6/2026 1:45 PM
1021	Grade band is good I say send 7 grade back to elementary middle should be 7-9	3/6/2026 1:44 PM
1022	Having the k-3 band and 4-5 band did not work before and I do not see it working again.	3/6/2026 1:44 PM
1023	I prefer the wider elementary grade bands. Pk-5. So that students are switching schools as much and parents of younger kids can have their children at the same school for longer. I'm not sure if having 8th graders and pk students together is great though the schools could be designed so that different aged students don't have a ton of contact. Same idea with having 6th graders with 12th graders. That large of an age difference/development differences in the same building could lead to issues.	3/6/2026 1:44 PM
1024	consider community input	3/6/2026 1:42 PM
1025	N/A	3/6/2026 1:39 PM
1026	—	3/6/2026 1:38 PM

1027	I do not think elementary kids should be grouped with middle school age- so I would recommend breaking up elementary school further - so instead of closing elementary schools, you could group PK-3 in one school and 4-5 in another. We would like a closer middle school. Henderson serves to wide of an area.	3/6/2026 1:37 PM
1028	I am a strong advocate for the traditional grade banding because I feel that developmentally, those ages should be in the same schools. If there was to be a change with grade banding, my second choice would be PK-3, 4-5, 6-8, 9-12. I DO NOT want any combination of 6th graders being in the same facility as seniors as it opens up a much higher percentage of the younger grades being influenced by highschoolers (drugs, alcohol, sex, bad choices, etc).	3/6/2026 1:35 PM
1029	none	3/6/2026 1:35 PM
1030	McNair High School 8-12	3/6/2026 1:33 PM
1031	N/A	3/6/2026 1:32 PM
1032	Regarding the potential grade band scenarios, I am against any closures at Robert shaw theme school Keeping the current grade levels is important to ensure our children can continue their education in a familiar and accessible environment."	3/6/2026 1:30 PM
1033	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized.	3/6/2026 1:24 PM
1034	I like the idea of consolidation as long as the younger students are separated from the older student.	3/6/2026 1:21 PM
1035	Robert show them school is a high rated school. It is better empowered the school to accept more students than closing it.	3/6/2026 1:21 PM
1036	We would love Evansdale Elementary to remain open as a traditional elementary school. It’s wonderful.	3/6/2026 1:19 PM
1037	I think all county schools should be traditional - 1 K-5, 6-8, and 9-12. Sports, credits, social development are best handled in this configuration.	3/6/2026 1:16 PM
1038	I have no opinion on this subject as of yet.	3/6/2026 1:14 PM
1039	The traditional PK–5 / 6–8 / 9–12 model currently serving Oak Grove Elementary and its cluster works, and it should be preserved. Dismantling it in favor of PK–8 or 6–12 configurations creates more problems than it solves for elementary-age families in this cluster. The district's own materials acknowledge that additional school transitions can cause academic disruption — yet several of the proposed grade band changes would actually increase the number of transitions young children experience, or abruptly combine very different developmental stages in the same building. Middle school is a critical period in a child's development. A dedicated 6–8 environment gives students the focused support, social structure, and age-appropriate programming they need before entering high school. Folding those grades into a PK–8 or 6–12 campus risks diluting that experience, particularly when smaller cohort sizes mean fewer elective offerings, sports teams, and extracurricular opportunities — which the district itself identifies as a challenge of these configurations. For families in the Oak Grove cluster, the priority should be stability and developmentally appropriate school environments — not restructuring grade bands to accommodate facility decisions that haven't even been finalized yet. Grade band changes of this magnitude should not be driven by building logistics. They should be driven by what is educationally best for students. I strongly urge the district to maintain the traditional PK–5 / 6–8 / 9–12 structure for this cluster and address facility needs through investment, not reorganization.	3/6/2026 1:13 PM
1040	Lakeside cluster	3/6/2026 1:09 PM

1071	prek - 5th	3/6/2026 12:43 PM
1072	It has taken DeKalb years to change from 1-7/8-12 set up to pK-5/6-8/9-12 set up. Why change it again? How much money will it take to make more divisions? How much time will this take? Then somebody will want to change it again, just when we get settled into a new division.	3/6/2026 12:39 PM
1073	Cluster: PK-8/9-12 Dekalb county has very low middle school scores, combining with elementary school would solve for the small school size change in demographic and possible improve middle school experience. Additionally it is a grade model used by several private schools. Any cluster that creates 6-12 grade in the same building will be horrifying for parents, traumatizing for kids and no amount of resources will make up for this. The cognitive development of these age groups is too desperate and non-congruent for learning.	3/6/2026 12:28 PM
1074	The typical grade bands have worked for years, why uproot these kids simply because the building costs need to be minimized?	3/6/2026 12:26 PM
1075	The traditional format is best. I was in elementary school before the transition to a middle school format and I remember 8th graders being bullied by the older high schoolers. We need to keep children with a closer age-group. Smaller classes are also beneficial to learning as teachers gave give better, more specialized instruction.	3/6/2026 12:24 PM
1076	I don’t think 6-12 is a great idea. I honestly think 6-9 and 10-12 makes more sense developmentally due to the differences in behavior, priorities, and learning at different ages.	3/6/2026 12:22 PM
1077	I think the grade bands need to remain the same.	3/6/2026 12:22 PM

1078	Pk-7 and 8-12. Is the only band that makes sense. It’s a scenario that has worked and was working before it was decided to implement middle schools. This scenario can eliminate multiple buildings and it’s beneficial for students growth and development.	3/6/2026 12:11 PM
1079	I would like to see the current grade bands remain the same and consistent across the district, in addition to the charter schools.	3/6/2026 12:06 PM
1080	Brockett	3/6/2026 12:02 PM
1081	I think Evansdale provides lots of potential for renovation and expansion and much flexibility for grade bands.	3/6/2026 12:01 PM
1082	Dunwoody has already tried adjusting grade bands so I don’t think it makes sense in the northern community for anything other than Pk-5, 6-8 and 9-12.	3/6/2026 11:57 AM
1083	I believe sixth graders could return to the elementary schools.	3/6/2026 11:56 AM
1084	I did not understand this part	3/6/2026 11:56 AM
1085	I think unconventional grade bands could be a great way to keep neighborhood communities together	3/6/2026 11:53 AM
1086	I appreciate hearing about the proposed grade band scenarios for example pre-k3 to 2nd grade 3rd to 4th or 5th a middle school and the idea of potential middle to high school being combined together perhaps the middle campus and upper campus but again I think there should be some separation just because of the developmental needs of students and the rampant Mental Health social emotional needs within our communities that parents don't have the resources to address but plays a pivotal role and show up daily in the classroom and potentially on campus as a whole.	3/6/2026 11:52 AM
1087	Way it is is best so kids are best able to feel comfortable going to School and can deal With others best.	3/6/2026 11:50 AM
1088	Kept as is.	3/6/2026 11:39 AM
1089	Be sure to consider appropriate start and end times and parents needing to shuffle between multiple locations. I don’t want my 11 year old 6th grader on the same campus as an 18 year old 12th grader.	3/6/2026 11:39 AM
1090	I am in favor of the PK-8 grade band scenario. This would allow my children to attend the same school for a longer amount of time, reducing the transportation needs of having two in two different places, as well as strengthening relationships and forming a deep sense of community and belonging. My only concern would be making sure the younger children and older children have limited interactions, as that is quite the developmental age gap.	3/6/2026 11:35 AM
1091	I like the idea of communities in the south of the county combining their HS and MS to allow their community to stay together. Sports facilities need to be taken into account for a 6-12. The traditional band would provide the most access to all of our students in terms of classes, electives, extracurriculars which would be the best for our students.	3/6/2026 11:30 AM
1092	Not sure what grade bands are still	3/6/2026 11:29 AM
1093	Bob Mathis Elementary School is located in the heart of South DeKalb County is known for its sound educational programs and the strong community that supports the school. We have a medical fragile unit and diagnostic area that serves the whole region.	3/6/2026 11:29 AM
1094	I would not put 6-7 with upperclassman, because they are not mentally ready.	3/6/2026 11:27 AM
1095	There should be no grade bands.	3/6/2026 11:24 AM
1096	We want the school to remain pre-k -5 at Ashford Park, grades 6-8 at Chamblee Middle, and grades 9-12 at Chamblee High School.	3/6/2026 11:24 AM
1097	a 5-8 or 5-9 grade band and 9-12 or 10-12 grade band is better than a 6-12 school band. in my opinion Middle school and high school don't really belong in the same building.	3/6/2026 11:20 AM
1098	The problem with grade band scenarios is that it relies on implementation and I don't think that DeKalb county has the resources or knowledge to support this idea. I think a test run of both consolidation and grade banding could come up as results of these surveys. Perhaps you could find an area in which it would work. I do not think that my children's district is appropriate for this. There are also other barriers and complications that could arise unforeseen by those	3/6/2026 11:18 AM

	wishing to implement and I don't believe that they will have strategies to handle those complications.	
1099	Unbelievable	3/6/2026 11:14 AM
1100	Vanderlyn,Austin, DES	3/6/2026 11:13 AM
1101	Around the school is big community so this school is very important for this community please don't closed this school	3/6/2026 11:02 AM
1102	Grade banding concerns me for the sake of exposing younger children to significantly older children. I can imagine a world of splitting middle similar to Kittredge (where 6th stays with elementary) and 7 and 8 go to HS. Thinking back to my childhood, middle school is when I got exposed to other kids doing drugs, having sex, etc., and those exposures should be kept away from elementary-aged children. I strongly do not think elementary and MS should be banded together (with the exception of 6th). Having 4 bands (PK-3, 4-5, 6-8, 9-12) seems reasonable as long as the long term objects of DCSD are met. Traditional model works well for folks moving in/out of the county, but that's secondary I suppose.	3/6/2026 11:00 AM
1103	I am against the grade band scenarios.	3/6/2026 10:58 AM
1104	I would prefer traditional for Chamblee cluster but am open to other grade bands for other schools.	3/6/2026 10:56 AM
1105	I do not think any changes should be made. This plan is the stupidest plan I have heard.	3/6/2026 10:55 AM
1106	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/6/2026 10:53 AM
1107	I don't support any of the proposed grade bands	3/6/2026 10:53 AM
1108	Can't answer …	3/6/2026 10:52 AM
1109	N/A	3/6/2026 10:47 AM
1110	- One of the suggested schools, Livsey, is on Chamblee Tucker which has only ONE lane of traffic in each direction. Tucker changed CT and traffic is horrible.	3/6/2026 10:44 AM
1111	As mentioned earlier, I moved my family into the area for Evansdale Elementary. Any band school program that would cause Evansdale to close and my children to be reassigned to a school a further distance from our home would negatively impact the wellbeing of our children. Potentially adding on unnecessary travel time would undoubtedly affect my children's schedules prior to and after school. The time we would have planned to nurture them and provide additional at home development would be dismantled.	3/6/2026 10:43 AM
1112	Best to leave things alone	3/6/2026 10:38 AM
1113	I am happy with the current situation.	3/6/2026 10:38 AM
1114	No consolidation no band	3/6/2026 10:36 AM
1115	I don't agree with combining schools to make a 6-12 school. That is too much of a gap to be mixing together. We would be affected through Henderson middle and lakeside high school.	3/6/2026 10:32 AM
1116	I think k-6 should be elementary 7-9 middle and 10, 11, and 12 for high school	3/6/2026 10:30 AM
1117	We do not have strong opinions on the grade band scenarios. I think there are many creative possibilities. Once again, the main priority is middle and high school academic opportunities - to ensure that they are not diminished for us (Ashford Park zoned and magnet family). You could potentially make Kittredge a 4-8 and I think that would be fine, as long as it then fed into a high school magnet program that is in a high school with the academic opportunities (such as Chamblee High).	3/6/2026 10:29 AM
1118	I don't like changing grade bands. As a parent of multiple kids, my life is a lot simpler when kids spend more years at the same campus and with the same schedule. Plus, a relatively	3/6/2026 10:27 AM

	smaller student body at the same grade level is better for the kids' social lives, as they end up having more repeated classmates each year.	
1119	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/6/2026 10:08 AM
1120	Smaller classrooms give better 1:1 engagement with learning and developing healthy relationships, less bullying, and are safer due to smaller population.	3/6/2026 10:07 AM
1121	Evansdale is not simply a neighborhood elementary school. It is home to a district-wide French dual-language immersion program, strong STEM programming, and a highly engaged community supported by the Evansdale Foundation and an active PTA. Schools that combine unique academic offerings, strong performance, and deep community investment should be carefully considered before being included in consolidation scenarios. When evaluating potential grade band scenarios, it is important to consider the impact on schools with specialized academic programs and established feeder patterns. Within the Lakeside cluster, Evansdale Elementary currently operates successfully as a K–5 school, and maintaining that structure is important for both program continuity and student development. Dual-language immersion programs depend on long-term instructional continuity from kindergarten through upper elementary grades. Disrupting that structure risks dismantling a program that has taken years to build and that offers a unique academic opportunity within the district. Evansdale's French dual-language immersion program is designed as a multi-year progression beginning in kindergarten and continuing through fifth grade. Students then continue their language learning at Henderson Middle School, a program Evansdale parents and teachers helped build, and later into advanced French coursework at Lakeside High School, where the community again helped advocate for the continuation of the pathway. Students build language proficiency year after year through consistent exposure and curriculum alignment. Breaking that progression into multiple schools or different grade bands (for example K–2 and 3–5 models) could significantly disrupt the immersion model, which relies on long-term continuity of instruction and teacher collaboration. In addition, Evansdale has developed a strong STEM-focused learning environment, and its teachers and leadership have built a cohesive academic culture around the K–5 model. Splitting grade levels across multiple campuses could weaken that program continuity and create unnecessary transitions for students. From a community standpoint, Evansdale is deeply connected to the Lakeside cluster pathway, which many families rely on when making long-term educational decisions. Frequent structural changes or grade band shifts could create uncertainty for families who have chosen to live in this area specifically because of the established school progression. If grade band adjustments are considered across the district, I encourage the district to prioritize stability for schools with specialized programs and strong academic performance. In the case of Evansdale and the Lakeside cluster, maintaining the current K–5 structure would best support program continuity, student success, and community stability.	3/6/2026 10:05 AM
1122	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/6/2026 10:03 AM
1123	Pk-8	3/6/2026 10:02 AM
1124	No feedback.	3/6/2026 9:59 AM
1125	McLendon was definitely a great asset to my child's education. The staff was amazing.	3/6/2026 9:58 AM
1126	Na	3/6/2026 9:53 AM
1127	No comment	3/6/2026 9:52 AM

1128	As to grade bands, it is important for IB to remain consistent. If it became a fernbank/AES cluster with an IB high/ middle, that could be an amazing program, however the alternation of the high school to a middle/ high or moving it to a different building makes it need to be re-evauated. That would lose what we have on place and children would lose the chances for an IB Diploma.	3/6/2026 9:52 AM
1129	Would love to see the end of Middle School. Grew up in this system. Elementary was 1-7 and High School was 8-12. Way better than having middle school	3/6/2026 9:51 AM
1130	Although standardization would be good operationally, certain clusters could benefit from a more customized grade band. DeKalb county is very diverse, and school clusters should cater to the students, not the other way around	3/6/2026 9:51 AM
1131	Fine.	3/6/2026 9:48 AM
1132	I am not ok with the mixture of elementary students with middle school and especially highschool students.	3/6/2026 9:47 AM
1133	In reference to the Evansdale, Henderson Middle, Lakeside grade bands, this model has worked for many years.	3/6/2026 9:47 AM
1134	The sixth grade can and should be returned from Henderson Middle School. Projections are for an increase of ~600 elementary students in the next four years.	3/6/2026 9:47 AM
1135	I would not want my child to be going to school where they have middle school and high school combined or even elementary and middle.	3/6/2026 9:45 AM
1136	No opinion, as long as Evansdale remains	3/6/2026 9:44 AM
1137	I have not looked into it enough to understand the grade bands.	3/6/2026 9:41 AM
1138	The current grade band scenario needs to stay the same. The current grade band was put in place for a reason! I am in the Evansdale/Henderson/Lakeside district.	3/6/2026 9:41 AM
1139	Close all the schools and the district	3/6/2026 9:37 AM
1140	Whatever works best	3/6/2026 9:36 AM
1141	N/a	3/6/2026 9:34 AM
1142	I do not agree with closing of the schools in the South side of the region. However, how do you merge the non-performing students and the students with behavior problems with those schools that are performing well with minimum behavior issues. Specifically speaking of fighting, bullying, and just plain bad behavior. Parents go out of their way to make sure that their kids are in safe performing environments and for a decision be made to uproot and dismantle those environments for kids that are doing well and in safe environments is diabolical. It only takes 1 bad apple to spoil a bunch and you are planning to put a bunch of bad apples into a bunch of decent apples. I don't like it.	3/6/2026 9:32 AM
1143	Grade bands wouldn't work since the students are way different and need unique attention to develop.	3/6/2026 9:29 AM
1144	Dependent upon the grade level division.	3/6/2026 9:27 AM
1145	If this were to change. I think grade bands would be more appropriate at elementary level, rather than middle and high school. IE pk-2 in one school and 3-5 in another.	3/6/2026 9:24 AM
1146	I think for areas that are struggling with enrollment numbers where it makes sense to have Middle Schools convert to Elementary Schools, and High Schools remaining as High Schools, going to either the PK-5/6-12 or PK-8/9-12 grade band scenarios makes sense and would help with some of what was outlined in the proposal. In the Dunwoody area cluster, I think it makes more sense to keep us either as a Traditional PK-5 / 6-8 / 9-12. The majority of our elementary schools have good enrollment, and due to the current sizing of both the middle and Dunwoody High Schools, it would make sense from an enrollment/sizing standpoint.	3/6/2026 9:18 AM
1147	I don't understand the potential grade band scenarios that Dekalb is considering. All I see if the explanations for what those different scenarios could look like.	3/6/2026 9:16 AM
1148	I think that if the grade bands are being considered for change based on maximizing use of the facilities that are available, then it is being looked at wrong. The changes that kids go through as they grow and learn, both social/emotional and educational, is huge in their school years. I	3/6/2026 9:16 AM

	cannot imagine having 11/12 year olds (6th grade) in the same facility as 17/18 year olds (12th grade), especially when it comes to school-wide functions, and interactions between students on a regular basis. They have completely different needs at those ages and stages of life, and I don't believe the school would be providing an appropriate environment for these students in that scenario. The same goes for a PK-8 scenario - 3/4 year olds, who sometimes are hardly potty-trained at that age, should not be in the same facility as 13 year olds. The 6-8 grade years are already hard, and are a transition between elementary and high school. I still think these are the appropriate transition years between grades. If anything, I think you could expand to do PK-4, 5-8, 9-12.	
1149	Oak grove elementary	3/6/2026 9:14 AM
1150	I’m less concerned with grade bands. I think children benefit from diverse, multi age environments so long as there is adequate guidance and supervision.	3/6/2026 9:13 AM
1151	I have significant concerns about how the proposed grade band scenarios would affect Montgomery Elementary and the broader Chamblee cluster. These concerns include but are not limited to: • Montgomery functions well as a K–5 school with strong academic performance, high family engagement, and a cohesive school culture. Any shift to a different grade band (such as K–6) would require major changes to staffing, space allocation, and programming. It is not clear that Montgomery’s building can support these changes without compromising instructional quality or student experience. • Grade band changes could worsen capacity challenges in the Chamblee cluster. Schools like Chamblee Middle and Chamblee High already face enrollment pressure. Moving grade levels between schools—whether shifting 5th graders up or adding 6th graders to elementary schools—could create overcrowding unless the district provides clear, school level capacity modeling. • Families need transparent data to understand the impact of each scenario. The district has not yet provided enough detail on how grade band changes would affect class sizes, staffing, transportation, access to electives, or special education services at Montgomery or within the cluster. Before moving forward with any grade band changes, the district should provide detailed, school specific modeling and explore alternatives that minimize disruption—such as targeted boundary adjustments or program expansions. Families need more clarity and more time to evaluate the long term implications for Montgomery and the Chamblee cluster.	3/6/2026 9:13 AM
1152	As someone who works regularly with children across the PK-12 age spectrum in a religious context, I strongly do NOT support banding 6-8 and 9-12 together. The needs and developmental realities of those age groups vary greatly and it is important that 6th graders have a place that meets their developmental stage rather than being thrust into a high-school like setting before they are ready. As a parent with kids a couple of years apart, I prefer a setting where elementary school stays together PK-5 for our family's wholeness, but I am open to a PK-3/4-5 split.	3/6/2026 9:13 AM
1153	I like the traditional grade bands (PK-5, 6-8, 9-12). I do not want my grands (lower elementary in school with 7th and 8th graders) or 6th graders in school with high schoolers. Children are already exposed to too much at an early age. I think these additional scenarios bring about additional safety concerns. We are fully aware of problems within many of the middle and high schools (behavioral, fights, drugs, sex, etc.). Will the elementary students be completely separated with no contact with the middle school students on the same campus, and same for middle and high school students?	3/6/2026 9:12 AM
1154	Please keep grade band consistent between schools, unless they are specialized programs. It's critical for sports, academic competitions, teacher training, and avoiding "school envy".	3/6/2026 9:10 AM
1155	birth rates r low at this time. Start 0-3 daycare to fill seats.	3/6/2026 9:09 AM
1156	Toney elementary my son is first grade doing well and it where my girlfriend went love the teacher and staff.	3/6/2026 9:06 AM
1157	I do not believe that grade bands have been explored for the Ashford Park community, but if that is an option, that is something I am open to considering.	3/6/2026 9:03 AM
1158	The grade band structure has worked superbly and we understand it is a model program	3/6/2026 9:03 AM
1159	Oak Grove’s traditional, PK-5th grade bands are appropriate and highly productive for the education of the children.	3/6/2026 9:02 AM
1160	We like the traditional way of grouping grades that is already in existence and do not want that changed.	3/6/2026 8:58 AM

1161	The existing bands seem to be working fine for the Druid Hills cluster.	3/6/2026 8:58 AM
1162	You are combining clusters that may not be feasible to combine. you are closing schools that havehistoricallygreat sports programs that help our students get good scholarship opportunities for college	3/6/2026 8:57 AM
1163	I feel the grade band should be consistent in all clusters.	3/6/2026 8:53 AM
1164	Grade Band changes should focus on students stability. Moving students will cause families disruptions, longer commutes, and less family involvement. Young kinds benefit from consistency and community support near with schools.	3/6/2026 8:51 AM
1165	I'm in favor of isolating, the high school students away from the younger kids. Otherwise, I think grades PK through eight could be combined, but only if necessary.	3/6/2026 8:50 AM
1166	I would like to see more research and statistics on the grade bands.	3/6/2026 8:45 AM
1167	Oak Grove. Grades PK-5	3/6/2026 8:44 AM
1168	Our lakeside cluster is not experiencing structural decline. We are als adjacent to a large healthcare and research expansion with continued growth. Traditional pk-5 is most appropriate.	3/6/2026 8:38 AM
1169	Cedar Grove High. Where will these students be placed..	3/6/2026 8:37 AM
1170	I think grade band scenario is a good idea. Grades Prek-5th and 6th-12th eliminates the need for a "middle school" keeps children within the same environment would better help them! I grew up with this grade band scenario and uniform	3/6/2026 8:35 AM
1171	Only consider middle and high school shifts. Keep elementary schools the same.	3/6/2026 8:33 AM
1172	Fine, if you are not taking away opportunities to learn and grow. Most policies seem to make things easier for the educator, often stifling the learner. The kids graduating from DeKalb schools need to be able to compete with others from around the country. Do not inhibit your students.	3/6/2026 8:32 AM
1173	In regards to schools in the Columbia middle school area again one of my main concerns is decreasing class size.	3/6/2026 8:31 AM
1174	Grades band is fine. Wish academics were a bit more…	3/6/2026 8:31 AM
1175	Chamblee and Champion Theme should not be merged. You need these school offerings on both sides of the county.	3/6/2026 8:30 AM
1176	We do not want Midvale elementary to be grouped into any other school. It is a phenomenal school on its own and has a lot of support from our community.	3/6/2026 8:28 AM
1177	With declining attendance, consolidation makes sense. However, given the significant overcrowding in North DeKalb schools, it would be more practical to direct Dunwoody High School's overflow to Vanderlyn Elementary rather than closing the school. Vanderlyn could serve grades 8–9, while Dunwoody High School could focus on grades 10–12, allowing capacity to be better balanced across the cluster.	3/6/2026 8:27 AM
1178	A little unsure of schools with ranges like 6-12. Think kids would need to he separated well but it could work	3/6/2026 8:24 AM
1179	Grade bands can be helpful but schools should be able to decide what serves the needs of their students best.	3/6/2026 8:20 AM
1180	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/6/2026 8:16 AM
1181	La escuelas de Dresden y Henderson podrían tener más alto nivel de enseñanza.	3/6/2026 8:16 AM
1182	I don't feel comfortable with 6th graders being with 12th graders.	3/6/2026 8:09 AM

1183	Laurel ridge expansion- I want to ensure that the school doesn't become too large and overwhelming for young students who are just starting their educational careers.	3/6/2026 8:02 AM
1184	The band of the clusters is not feasible in DeKalb, as it is a part of the Atlanta Metro area. While this scenario is accessible in a small city, this is a metropolitan area.	3/6/2026 8:02 AM
1185	Elementary students benefit by being in K-5 bands. The older students learn leadership skills. The younger students have role models in the upper grades. Both are important for learning and development.	3/6/2026 8:01 AM
1186	Keep the same	3/6/2026 7:58 AM
1187	Arabia mountain high school, 9-12 edward l Bouie-k-5th leadership preparation academyk-8th grade champion theme middle school.. 6-8th	3/6/2026 7:58 AM
1188	With my children being close in age, I feel expanding the high school cluster to 6-12 would reduce the amount of travel time between schools not just for my family but for others.	3/6/2026 7:58 AM
1189	Depending on facility capacity scenarios I could see moving from traditional to non traditional bands.	3/6/2026 7:56 AM
1190	I prefer traditional grade bands. If consolidation is needed, K-8 is good. I'm in the Midvale ES district	3/6/2026 7:54 AM
1191	Good	3/6/2026 7:44 AM
1192	Children should be around children of the age and stage in puberty	3/6/2026 7:42 AM
1193	Leave it as is.	3/6/2026 7:41 AM
1194	I'm not sure what grade bands are. If it is k-3, 4-5, and middle school, I think it is a good idea. It will provide more support and opportunities for growth and learning	3/6/2026 7:39 AM
1195	The k-8 scenario is not ideal for student growth. There is risk of teachers and administrators pigging holing students based on their early childhood behavior. Students need to be able to grow and change and having a few staff to assess them helps support that growth.	3/6/2026 7:38 AM
1196	I did not see grade band changes proposed for the Tucker Cluster.	3/6/2026 7:29 AM
1197	Not so sure putting 6th graders in a building with 12th graders is a good idea. The age range is too great.	3/6/2026 7:28 AM
1198	none	3/6/2026 7:24 AM
1199	I think banding grades beyond the current setup is a bad idea. Not just from the standpoint of differing intellectual levels but also maturity. Changes to traditional grade banding creates more potential issues than benefits.	3/6/2026 7:20 AM
1200	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/6/2026 7:16 AM
1201	I don't have a strong opinion on the grade bands.	3/6/2026 7:05 AM
1202	I believe the PK–3, 4–5, 6–8, and 9–12 grade band model could be beneficial for clusters because it groups students by developmental stage and allows schools to focus on more targeted instruction. A PK–3 model supports early literacy and foundational skills, while a 4–5 school can serve as a transition into upper elementary expectations before middle school. Keeping 6–8 together maintains a traditional middle school structure, and 9–12 allows high schools to remain focused on preparing students for graduation and postsecondary opportunities. When considering this model, the district should also review enrollment and building capacity within each cluster to ensure that student redistribution does not lead to overcrowding or increased class sizes at schools that are already operating near capacity.	3/6/2026 6:56 AM
1203	I think base off maturity I think middle and high school should be separated. Having 7 grades in one school seens like the schools will be over populated!	3/6/2026 6:56 AM

1204	I have no opinions on this	3/6/2026 6:52 AM
1205	Is your plan to merge the littles with the big kids?	3/6/2026 6:51 AM
1206	As long as schools are fully staffed from custodial to administrators with great detail on security and behavioral health counseling, special needs and reading tutorials for students who need extra help, I am all for it. Just want to make sure students are able to adjust and thrive in these scenarios. Perhaps they can go back to textbooks.	3/6/2026 6:46 AM
1207	I do not think that grades 6-12th should be in a building together. I feel that the traditional way of grade bands should stay. It seems that the schools will get over crowded faster and there will still be a need for new construction of buildings.	3/6/2026 6:45 AM
1208	Theme schools/specialty schools are ok for grade band scenarios. ES should be reimagined… PK-2 and 3-5. Too many principals put their strong teachers with 3-5th. The foundational years of Pk-2 are what build solid 3-5th students. Let's ramp up student learning supports for our ES. Next, 6-8 should stay or go back to 7-8 (making 3-6th). Lastly, leave traditional high schools alone with 9-12th. It's hard enough to monitor the inappropriate and illegal behaviors/relationships. We don't want to have 13 yo in the building with 18/19 yo. We would be setting ourselves up for serious consequences.	3/6/2026 6:43 AM
1209	I belive that grade-band reconfiguration will strengthen programs and improve building use.	3/6/2026 6:41 AM
1210	I think 6-12 grade is way too many grades together that will not be able to provide for the the educational and emotional developmental needs of the students. It will impact teacher morale further as well. In addition the larger grades will impact extracurricular activities, especially in areas like Oak Grove and its feeder schools where students are involved in a lot of sports.	3/6/2026 6:36 AM
1211	I understand the traders of all situations and open to any combination.	3/6/2026 6:28 AM
1212	Please continue to research ages, developmental stages of students, and maturity levels. Also, research patterns of behavior and academic progress if we make these major shifts in grade bands.	3/6/2026 6:19 AM
1213	Maintaining a K–5 grade band at schools like Robert Shaw Theme School helps provide stability, stronger relationships with teachers, and a consistent school culture.	3/6/2026 6:12 AM
1214	I'm open to different grade band scenarios based on the rationale behind them and the needs of students. Although I'm not usually a fan of a one size fits all approach, if grade bands look different across clusters we need to look at what happens when students move around within the district and the impact different structures will have on the students.	3/6/2026 6:01 AM
1215	The idea of having 6th through 12th in the same facility might work in a rural setting, but not in an urban setting. We need to keep age groups together to protect our youth maturity development & mental health	3/6/2026 5:41 AM
1216	fairrington elementary school. grade 3.	3/6/2026 5:32 AM
1217	The grade bands look fine to me.	3/6/2026 4:52 AM
1218	Based on my current understanding, I do not have strong feelings on adjusting grade bands.	3/6/2026 3:19 AM
1219	As is	3/6/2026 2:32 AM
1220	or the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/6/2026 1:06 AM
1221	Oak Grove has higher utilization than the 2 nearest schools that are not on the proposed closure list (Sagamore and Briarlake), and so the arguments about underutilization are disingenuous. Further, the area is expected to experience significant growth from new hospitals, research centers, and large housing developments. Different age bands might make sense in a community in which school are underutilized, but that is not the case for OGE.	3/6/2026 12:21 AM

1222	That would be nice	3/6/2026 12:11 AM
1223	The great bands might be difficult to get used to and how is it going to affect the student's mentally and emotionally uprooting them	3/6/2026 12:10 AM
1224	The children in our neighborhood can walk to Oak Grove Elementary School. Across from the school is Oak Grove United Methodist with a neighborhood-centric preschool. Lakeside High School is at the end of Oak Grove Road. Children can grow up here with a sense of belonging to a whole-life community. They grow up with an anchor that gives them confidence to explore the world.	3/6/2026 12:05 AM
1225	Oak Grove does not align with the stated objective of addressing underutilization. The district's goal is to increase elementary utilization to approximately 88%. Oak Grove is already at 89% utilization (447 students / 504 capacity, October 2025) and projected at 487 students in 2026–27 (96%). Enrollment has increased for four consecutive years. The trend is sustained and upward. At the current pace, Oak Grove is likely to reach or exceed full capacity within 2–3 years. If Oak Grove closes, students would need to be absorbed primarily by Sagamore Hills and Briarlake: • Sagamore Hills: 413 / 456 (91% utilization) • Briarlake: 350 / 480 (73% utilization) Sagamore Hills has only 43 available seats. Briarlake has approximately 130 available seats. Together, they cannot absorb 447 Oak Grove students without significant boundary shifts, overcrowding, or facility expansion. While Briarlake's current utilization is 73%, the surrounding corridor is experiencing measurable residential growth that is likely to increase Briarlake's enrollment organically. Documented residential pipeline within 2–4 miles includes: • Lulah Hills (North DeKalb Mall redevelopment): Up to 1,800 residential units; $850M+ investment. Phase 1 includes 303 multifamily units delivering beginning late 2027. • Corporate Square / Northbend redevelopment: Approximately 2,000 planned units; $605M investment. Phase 1 includes 390 apartments and 142 townhomes. Phase 1 activity alone (approximately 835 units) could conservatively generate 55–145 additional elementary students over several years. If Briarlake gains: • +50 students → ~83% utilization • +100 students → ~90% utilization • Continued buildout → potentially 90–95% utilization This does not include additional LCI corridor infill or ongoing housing demand driven by CHOA and Emory employment expansion. In addition, the Druid Hills / Clifton corridor has experienced more than $2.5 billion in institutional investment, including: • $1.5B Arthur M. Blank Hospital campus • ~4,500 employees (including ~1,000 new jobs) • $87.7M Emory Heart & Vascular expansion • Ongoing Emory hospital expansion • $1.1B in FY24 research awards • $270M in salary increases This area is not experiencing structural decline. It is experiencing concentrated growth. If enrollment regression models rely heavily on pandemic-era data (2020–2022), those data points distort current trends. Projections should be recalibrated to reflect 2024–2026 recovery and documented housing pipeline activity. Oak Grove is also one of the highest-performing schools in the review group: • Content Mastery: 94.2 (4th highest among 26 reviewed schools; Top 10 countywide) • Readiness: 95.3 (2nd highest) Closing a school that exceeds utilization targets, demonstrates sustained growth, and ranks in the top tier academically does not directly address the district-wide utilization gap.	3/5/2026 11:50 PM
1226	It mentions the benefits of K-8 and 6-12 schools for allowing advanced students to move ahead. Perhaps consider having K-8 and 7-12 schools to increase flexibility in the middle school years when some students are still benefiting from the nurturing elementary atmosphere while others are ready for more intense, structured academics.	3/5/2026 11:40 PM
1227	I do not have any specific feedback for grade band scenarios. My child is currentl in 2nd grade.	3/5/2026 11:32 PM
1228	We had a very positive experience with DAA's K-7 (then K-8) grade bands and see that as a viable option for consolidations.	3/5/2026 11:24 PM
1229	Normal grand bands make sense but depending on capacity can be adjusted	3/5/2026 11:20 PM
1230	K-8 is not a good option. The needs of that spectrum of children is far too broad. It's unfair for the teachers, administrators and facilities. In some cases, we can't just sacrifice quality education for pure efficiency. That said, if it comes down to the choice of a community school with a different band structure vs closing (thinking of south dekalb especially) community is more important.	3/5/2026 11:14 PM
1231	A 6–12 configuration at Cedar Grove could be a strong way to better utilize the facility while maintaining the identity of the Cedar Grove cluster. If this model is considered, the district should also explore bringing a theme or specialty school model to the newly revised Cedar Grove community to attract and retain students. A strong academic theme such as STEM,	3/5/2026 11:13 PM

	health sciences, or career pathways could help increase enrollment while providing meaningful opportunities for students within their own community. The district should also consider how the nearby elementary school campus could support expanded programs or shared resources. Additionally, both older buildings will require necessary repairs and long-term investment. The community needs assurance that the district will commit to maintaining these facilities and not move forward with a plan only to later determine it is too costly to preserve them and close them altogether.	
1232	Maintaining developmentally appropriate grade groupings is important for both students and school operations. The traditional PK–5 / 6–8 / 9–12 structure works well in many communities because it allows elementary schools to focus on younger students while middle schools are designed to support the academic and social needs of adolescents. In the Druid Hills cluster specifically, where some elementary schools are already relatively large, any grade band changes should be carefully evaluated to ensure they do not unintentionally increase elementary enrollment levels beyond what shared infrastructure can reasonably support. Schools that are already near capacity should not be expected to absorb additional enrollment without corresponding expansion of shared instructional spaces and arrival/dismissal infrastructure. If grade band changes are considered, it would be helpful for the district to analyze impacts on building usage, shared learning spaces, transportation patterns, and student transitions within specific clusters.	3/5/2026 11:12 PM
1233	Assuming building capacity is adequate with current facilities, I believe the PK-8 and the 9-12 grade bands are most beneficial. Current test scores suggest that our children are falling behind in literacy and are underprepared for high school coursework. I'd like to see more resources offered to students prior to high school with intent of preventing current trends in our high schools - poor graduation rates, poor enrollment in advanced classes, and poor college acceptance. Developmentally, students in grades 9-12 are distinct from students in lower grades. By grade 9, students are more self-sufficient, are beginning to consider future plans, and have more responsibilities outside of school than their younger siblings. Different resourcing is needed for this age group, though resourcing is equally important for both grade bands.	3/5/2026 10:53 PM
1234	I would like to consider pre-K centers that take pre-K out of our schools, making elementary K-5. At Oak Grove Elementary, we have a waiting list of over 100 students for Kindergarten. Removing the pre-K classroom might be a way to add and fill an additional class of Kindergarten students. To me, this would give us more classroom space for growth	3/5/2026 10:43 PM
1235	Schools around Brockett Elementary should remain as they are.	3/5/2026 10:35 PM
1236	Evansdale Elementary works Best whith the tradicional PK -5 structure Elementary students benefit from being in school designed for younger learners and from hacing stable relationships whith teachers and starpt. The tradicional pk-5/6-8/9-12 model schould remain for the evansdale clouater.	3/5/2026 10:34 PM
1237	I am less concerned about the bands as I am the condition of current schools and the opportunity for students who have been identified as gifted to be better clustered to foster their growth.	3/5/2026 10:32 PM
1238	Stability should be prioritized. There is no structural decline in the OGE area; in fact, it is in an area experiencing tremendous growth. Traditional PK-5 grade bands remain appropriate in a high-utilization growth-oriented corridor. Structural grade reconfiguration should focus first on clusters with long-term significant underutilization.	3/5/2026 10:31 PM
1239	Debería de tener más salones para pre kinder	3/5/2026 10:30 PM
1240	Traditional grade bands work well foremost kids. Combining sixth grade with 12th grade and one school is probably not a good idea. Special program schools for gifted students are a great idea and the county should offer additional spots in these schools.	3/5/2026 10:28 PM
1241	Again, the current system works. What should be done is the overcrowded schools should be re-mapped, the under attended schools potentially closed or re-districted. Issue solved.	3/5/2026 10:27 PM
1242	Middle school students do not need to be housed with high school students. And middle school students also do not need to be housed with younger elementary students.	3/5/2026 10:26 PM
1243	I like the option to include the PK-3, but still separate it from K-5/ 6-8/ and 9-12.	3/5/2026 10:26 PM
1244	I do. Not like the border grade band scenarios that differ from Norms as it makes it more	3/5/2026 10:15 PM

	challenging for many students to adjust and the learning environment is affected when students move between schools. It also breaks up families with multiple children creating transportation and coordination issues for parents. Kids younger than 8th grade should never be placed with high schoolers due to liability and differing maturity levels.	
1245	Combined Elementary and Middle schools would offer families a solution that keeps schools as local to the community as possible.	3/5/2026 10:14 PM
1246	My oldest son attended this school from 1st grade until 5th grade and I am very satisfied. Now my youngest daughter is in first grade and she is doing very well!	3/5/2026 10:07 PM
1247	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/5/2026 10:02 PM
1248	Potential bands would be more harmful than helpful. It's took much going on in this community to allow k-5 students to be in the same building as 6-8 students. Also if it was to be upper and lower elementary how would that help the students that depend on their 4th and 5th grade siblings. How will teachers ensure that the younger students stay safe? What type of certification would teachers need if schools are k-8? How would this community honestly benefit this?	3/5/2026 9:56 PM
1249	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/5/2026 9:54 PM
1250	We have lived in DeKalb for many years and remember when elementary schools were k-7. I have never liked the middle school concept and would rather see high schools 8-12. This gives students a year to experience high school before their grades are used to apply to college.	3/5/2026 9:52 PM
1251	I don't have specific feedback about this.	3/5/2026 9:49 PM
1252	Due to developmental differences, I feel strongly that 6-8 grade students should not be in the same school as 9-12th grades.	3/5/2026 9:48 PM
1253	Mega schools harm communities. Smaller schools benefit children, and grade band scenarios should reflect that.	3/5/2026 9:48 PM
1254	Cedar Grove cluster closure is necessary.	3/5/2026 9:45 PM
1255	I strongly support the K–8 scenario for the Dunwoody Cluster (specifically referencing Vanderlyn Elementary and Peachtree Middle). In a high-pressure, hyper-competitive academic environment like Dunwoody, the K–8 model offers a necessary 'nurturing' buffer. It allows our students to 'stay kids' longer, fostering higher self-esteem and providing unique leadership/mentorship opportunities (e.g., 8th graders mentoring Vanderlyn K-2 students) that are lost in the traditional 6-8 setting. Key Considerations for our Cluster: • Decompressing Peachtree Middle: Transitioning to K–8 would alleviate the extreme overcrowding at Peachtree Middle by allowing students to remain in their smaller, community-based elementary buildings like Vanderlyn. • Transportation & Safety: To address the age-gap concerns, I recommend staggered start/end times to ensure K-2 students and 6-8 students aren't sharing the same buses. • Extracurricular Access: While I value the 'participation-over-competition' feel of K–8, the District must ensure that passion-based activities (like the Dunwoody High feeder band or competitive sports) remain accessible. I suggest a 'Cluster-Wide' approach where K–8 students can still participate in centralized Dunwoody-area programs to maintain the high standard of specialization our community expects. Ultimately, I prefer a model that prioritizes the social-emotional well-being and safety of the student over the 'pre-high school' intensity of a traditional middle school.	3/5/2026 9:44 PM

1256	Ashford park elementary students need to remain within the Chamblee MS and HS cluster	3/5/2026 9:35 PM
1257	I personally will pull my children from DCSD public school if you move forward with a 6-12 grade band. Middle school years are already tough Developmentally to lump them in with High Schoolers feels reckless and not in the best interest of the children	3/5/2026 9:34 PM
1258	Again, no evidence cited for the potential band scenarios stated.	3/5/2026 9:34 PM
1259	What new investments are required for 6-12 grade bands to work within one campus?	3/5/2026 9:33 PM
1260	I think we have to group similar ages as much as possible. Protect innocent minds (6th graders should not be near 12 graders)	3/5/2026 9:30 PM
1261	For safety and developmental concerns, please keep the grade bands as they currently are.	3/5/2026 9:29 PM
1262	I don't really know that I care about the grade bands so much as I do the size of the schools	3/5/2026 9:28 PM
1263	Middle School has always been my biggest concern of the DCSD public school system. We are zoned for Peachtree MS and it seems to receive adequate but not great remarks. I would be in favor of expanding the Dunwoody HS to 6-12, however i know that school is already facing capacity issues with the amount of trailers and land locked parcel. I would strongly advocate for expanding the Dunwoody HS campus.	3/5/2026 9:26 PM
1264	I think Montgomery could be successful with an upper and lower school, possibly building a new building on the current property for 4th and 5th grade or by utilizing the old Nancy Creek Elementary school building and having a 3-5th grade upper school and a pre-k through 2nd lower school.	3/5/2026 9:24 PM
1265	School referencing - Rock Chapel Elementary. Not enough information presented to support the potential grade band of PK3 and 4/5 . However this might not be as important if the average age difference between children in families in DeKalb county is following the national trend of 4 years. In the presentation the clusters are not clearly defined.	3/5/2026 9:24 PM
1266	I believe the current structure works best for students and families. Frequent changes to grade bands can be disruptive for children and create unnecessary transitions. Keeping schools stable helps students build relationships with teachers, staff, and their community. Decisions about grade bands should prioritize what is best for students' learning, safety, and consistency.	3/5/2026 9:21 PM
1267	I think it is important for students to be placed in a traditional cluster with other students who are closer in age, rather than such a wide range of ages and grades.	3/5/2026 9:17 PM
1268	For chamblee cluster: please keep high school and middle school separate. For elementary, one potential suggestion that seemed good was to send grades 4-5 for all chamblee cluster elementary schools to the Nancy creek elementary facility. Please keep Montgomery open	3/5/2026 9:16 PM
1269	I wondered if you had considered a PK-6 scenario with a split at 7-12? This is more developmentally appropriate to children's neurological and social emotional growth. It could lessen stress on students and increase mental health. I agree that less transitions and reduced commute time is also of supreme importance to student & family health. Speaking as a teacher in a school choice program, a PK-8 model for our choice program would be ideal to guaranteeing effectiveness of the educational alternative. This may be true for other school choice programs as well. I'm sure that will be addressed in future discussions in later phases/scenarios. But grade band organization does have an impact. For instance, a PK-2/3-5 organization would absolutely NOT work for our choice program & educational model.	3/5/2026 9:15 PM
1270	not evaluated	3/5/2026 9:14 PM
1271	I think it is terrible. Why would you completely blow up the system? 6th graders have no business in a school with 12 graders. Kids need to be with kids similar in age. They are already exposed to way too much in the internet era. This will only make it worse. The recommendations for changing grade band clusters are nothing more than a distraction and a company who you paid money to for recommendations justifying the money you wasted paying them.	3/5/2026 9:13 PM
1272	My children are currently in 2nd grade and Pre-K at Midvale Elementary. I would not send them to a larger school that would have them in the same school as an 8th grader. From a mental health and a safety perspective, I do not think elementary students should be with middle school students, nor middle school students with high school students. There are complete developmental differences in those ages. I understand that some students could take higher	3/5/2026 9:12 PM

	level classes if those grades are combined, yet it seems like that need could be met in other ways.	
1273	No school should have a band of 6-12 since the younger kids do not need to be around kids that old.	3/5/2026 9:10 PM
1274	At this stage, I think in need more information about the pros of moving to a K-5 and 6-12 band. I think from a social-emotional perspective there could be more risks with having two groupings vs the elementary, middle and highschool	3/5/2026 9:09 PM
1275	I believe the most promising grade band model is PK-3 / 4-6 / 7-9 / 10-12. This structure better reflects how students actually develop socially and academically, and avoids the abrupt transitions that can be disruptive, particularly for students in under-resourced communities who may have less support at home during periods of change. That said, the district needs to be transparent about whether this model is logistically and financially feasible at scale. If it cannot be implemented equitably across all clusters, we risk creating a two-tiered system where some communities benefit from thoughtful grade banding while others are left with whatever is most convenient.	3/5/2026 9:09 PM
1276	Keep thing the same	3/5/2026 9:08 PM
1277	I really just don’t understand how this is supposed to work. And logistically. Some of you are experiencing your first day on earth or have never had kids in school or maybe have never attended school (which would explain the math not mathing) or is it the Texas education? (Yes I know about the shady Texas firm)	3/5/2026 9:06 PM
1278	The band teachers are a really good and profesional, they encourage the children to be involved in the activities.	3/5/2026 9:04 PM
1279	Stability should be prioritized in my current Oak Grove, Briarlake, Sagamore cluster. They’re all close to capacity, and studies show the traditional bands work best.	3/5/2026 9:01 PM
1280	PK-5 grade and 6-8 grades appear to be the best way to continue in the OGE and Henderson section. My children have thrived at OGE and my middle schooler has transitioned to Henderson's STEM program well with an excellent academic base from OGE.	3/5/2026 9:00 PM
1281	I feel this would create an environment that would force the younger children to try to be more "grown" to try and hit in with older kids.	3/5/2026 8:59 PM
1282	I do not have any prior knowledge of the band scenarios.	3/5/2026 8:57 PM
1283	I do not think they are needed in our cluster as most of the schools are near the upper end of utilization.	3/5/2026 8:57 PM
1284	The PreK-5 and 6-12 grade bands make more sense to me. I would prefer that my middle school aged children have access to advanced classes more than elementary age. It also seems like it would better facilitate sports and other extracurricular programs that have more similarities between MS and HS than ES. I would like to be presented with more data on the longer term educational and social impacts of the different scenarios before making a firm decision	3/5/2026 8:54 PM
1285	Regarding the grid bands, that could work as long as the younger grades are adequately, separated from the upper grades.	3/5/2026 8:51 PM
1286	I prefer the current clusters	3/5/2026 8:49 PM
1287	I would not feel comfortable with 6th grade students in the same building as 12grade students 6-12. That development span is too wide at a critical times.	3/5/2026 8:45 PM
1288	Some consolidation makes sense. There needs to be a buffer in attendance in areas or more density or growth to plan for future. Neigh orthodox elementary schools are more ideal than massive more centralized options. Please leverage vanderlyn property for highschool to get rid of trailers and maybe for a freshman center.	3/5/2026 8:42 PM
1289	This should be based on the students ability to learn. One style doesn’t represent all.	3/5/2026 8:42 PM
1290	I don’t think this is the best option.	3/5/2026 8:39 PM
1291	Grade bands should remain the same. Changing the grade bands in PK-5 disrupts the social-emotional well-being of students who are already established in their school. There is comfort	3/5/2026 8:38 PM

	in anticipating how the next academic year will proceed because the teachers/building/procedures remain the same or very similar year to year. Students attend school with others who live in their neighborhood. If the grade bands change, bus routes may change to accommodate a larger attendance zone. This would mean the bus rides will be longer. I would not want my child riding on a bus for more than 20-30 minutes one way. Pick-up times already start around 6:30 AM. It is a foolish expectation to make young children wait for a school bus any earlier than what is already established. In the winter months, it is still dark outside at 6:30 AM. I am also opposed to splitting elementary into PK-3 and 4-5 grade bands. Again, having PK-5 in the same building allows students to have continuity in their academic journey. Siblings could be in different grade bands more often compared to PK-5, and this adds stress to parents/guardians to juggle two different schools and the schools' policies, expectations, etc. There is also increased logistics of school drop-off and school pickup and after-school care when siblings are in different locations. Two of my children are in after-school together, and I get a discount on the 2nd child's fee. If they were in different buildings, I doubt a discount would exist, and that is an extra expense for me as a parent. I am vehemently opposed to having a grade band of 6-12. I do not want 18-year-old students attending school with 11- and 12-year-old students. I do not want my 6th/7th/or 8th-grade student exposed to the academic, social, and behavioral challenges of older adolescents. The challenges that would arise from having children in different developmental stages cannot be monitored appropriately when a facility has hundreds of students present.	
1292	There is a reason why the standard grade bands have been in place for a long as they are. In large settings children need to be grouped with terror suicidal peers and away from older student who may negatively influence younger students because they don't have the social construct to understand what they are witnessing.	3/5/2026 8:36 PM
1293	I’m ok with Lakeside High School having a 6-12 grade band	3/5/2026 8:36 PM
1294	I think Ashford Park (PK-3) and John Lewis (4-5) would be a great idea. It would help with redistricting and drawing the lines more fairly in the community.	3/5/2026 8:33 PM
1295	I oppose any change	3/5/2026 8:30 PM
1296	Please maintain the current grade band structure. It is working fine. Let's not change it.	3/5/2026 8:30 PM
1297	I prefer the transitional grade band but if it has to change then the band K-8 that has the minimal amount of transition for kids. I do believe the traditional band is most appropriate whenever considering all factors	3/5/2026 8:29 PM
1298	No comment	3/5/2026 8:27 PM
1299	A K-8 model and 9-12 is better for student success however with overcrowding of elementary schools in this plan I do not think many elementary school buildings could support it. So taking into account buildings I think a one transition model of k-6 and 7-12 would be more developmentally appropriate.	3/5/2026 8:23 PM
1300	You suggesting closing schools but did not provide any suggestions to say where the students affected will attend schools. Presenting part of the picture does not portray a clear picture.	3/5/2026 8:23 PM
1301	I think separating PK-3 from 4-5 makes sense and would give better option for kids to be staying close to home for early primary education. Grouping middle schoolers with high schoolers is too much of a age disparity to be safe and effective.	3/5/2026 8:18 PM
1302	Montgomery is over crowded but I don’t think changing the grade bands would be great. A big draw to my family is keeping siblings together in the same building. My kids are 2 years apart so if they split grades more then they could easily be in different schools for years.	3/5/2026 8:17 PM
1303	Regarding the Tucker cluster, I believe (PK-5/6-8/9-12) grade bands are developmentally, socially, emotionally, and behaviorally appropriate . I have personal experience with a "Mega school," coming from one of the largest high schools in my state. Regardless of class size and student to staff ratios, many children fell through the cracks and were "lost" in the system. Suicide rates skyrocketed due to lack of social-emotional support and the "no tolerance" approach to bullying failed our students. There were simply too many children in the building to safely and acutely monitor the interactions between students. Developmental stages are just that - bands of children similarly aged with similar developmental needs. Having elementary school children in the same building as middle school or even highschool students is inappropriate.	3/5/2026 8:16 PM

1304	No opinion	3/5/2026 8:14 PM
1305	All of this is not grounded in truly quantitative approaches and methodology. Please see my comment above.	3/5/2026 8:11 PM
1306	Allgood Elementary should be rebuilt or closed	3/5/2026 8:02 PM
1307	The 6-12 age/maturity/peer influence is too wide and would cause more stress on the admin when it comes to conflicts.	3/5/2026 7:59 PM
1308	Redan Elementary does not need to close. Our Community has produced lots of scholarships over the years. Stop trying to destroy legacy. Our children are not dollar signs they are human beings that need care, attention, structure, and love. I refuse to let this happen	3/5/2026 7:59 PM
1309	N/A	3/5/2026 7:57 PM
1310	It too long ago, Evansdale began teaching French. This would no doubt be seriously affected.	3/5/2026 7:55 PM
1311	I don't know what this means but generally smaller grade bands the better.	3/5/2026 7:55 PM
1312	I am fine with any of these as long as middle schoolers (6-8) are not mixed in with high schoolers (9-12)	3/5/2026 7:54 PM
1313	Grade band scenarios can be a positive. But it is impossible to provide specific feedback for Chamblee without a more concrete plan as to how that would play out in practice. I (and many other parents at Kittredge) would oppose a band scenario that destroys the fabric of the school by breaking it apart. For Chamblee as a whole, banding can be a positive if used in a thoughtful matter.	3/5/2026 7:54 PM
1314	Na	3/5/2026 7:42 PM
1315	The grade bands should reflect the community, but being in a urban area grade bands should be small	3/5/2026 7:42 PM
1316	I HATE this idea. DES did the 4th/5th when it first opened and again when we returned from COVID and they sent them to Nancy Creek (my son was in that group). It was a nightmare logistically (required more specials teachers, an entire extra lunchroom staff, etc. and it meant I had two drop off places for carpool). Also, it broke up our neighborhood school community. I also dislike grouping 6th-12th. The MS vs HS kids need totally different environments and my rising 6th grader would be terrified going to a school with much older high school students. It opens up potential for the younger students to be exposed and affected by too many bad HS issues.	3/5/2026 7:42 PM
1317	The present grade band scenarios is fine. I see no reason to change them.	3/5/2026 7:40 PM
1318	We support if this helps keep the school and open to more applicants	3/5/2026 7:38 PM
1319	I am not sure the grade bands matter too much to me. I do think that we know DCSD is transient and kids should be able to easily adapt to any school environment.	3/5/2026 7:37 PM
1320	Less important than the organizational plan. Pre-K	3/5/2026 7:36 PM
1321	Any scenario that expands the grade, age, and developmental level in one facility has to be carefully considered and managed. Transition will likely be difficult for all involved.	3/5/2026 7:36 PM
1322	I prefer a PK–8 grade band model where possible because it allows students to remain in the same school community with their neighborhood peers for a longer period of time. Maintaining continuity from elementary through middle school can help strengthen relationships among students, families, and teachers, and can support a stronger sense of community within neighborhoods. A PK–8 structure also reduces the number of school transitions students experience, which can be beneficial during important developmental years. Fewer transitions may help students maintain stability in friendships, routines, and academic support systems. If PK–8 models are considered, I encourage the district to prioritize keeping existing neighborhood clusters together so that students can remain with peers from their local communities while still providing strong academic and extracurricular opportunities.	3/5/2026 7:34 PM
1323	I don’t like it.	3/5/2026 7:27 PM
1324	I agree more with a k-2 and 3-5 grade band over a 6-12. Or something like city of Decatur with a 4/5 academy. However, I think this overlooks the need for more preschool special education classrooms for all levels from regional to cotaught that are desperately needed.	3/5/2026 7:25 PM

1325	Traditional grade school clusters seem to be appropriate.	3/5/2026 7:24 PM
1326	The 6-12 clustering is concerning to me. I worry about putting two developmentally different adolescent groups together in 1 large school.	3/5/2026 7:22 PM
1327	Please include maps with proposed changes. I think grace bands could vary based on each zone and available facilities vs enrollment.	3/5/2026 7:21 PM
1328	or the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/5/2026 7:20 PM
1329	Good ideas	3/5/2026 7:12 PM
1330	I think it's important to keep middle school separate from high school for many reasons. There is no reason a student should leave middle school at 11/12 years old and enter a school with 16/17/18 year olds. The middle school years allow children to develop and grow in many ways before entering high school.	3/5/2026 7:12 PM
1331	The grade band idea is a big no for me. I can't put in words of how many safety concerns I can think of when thinking of the thought of 6-8 graders attending the same school with 9-12 graders.	3/5/2026 7:12 PM
1332	Elementary definitely does not need to be with older students. They have alot of different things in every level going on. The safety of younger kids would be better. They have alot of gangs in dekalb county schools let keep these kids isolated from the older crowd as long as we can. They mind is on different things they are on different levels.	3/5/2026 7:10 PM
1333	I only support a k-2 and 3-5. Even that option is hard for parents with kids in both levels. Middle school is designed for hormones and high school is designed for growth. Too many grades in a school with older kids means more opportunities to mimic age-inappropriate behaviors.	3/5/2026 7:08 PM
1334	Schools work better with age differences, elem middle and high schools. However if schools should be eliminated we should return to the 80s/90s of elem and high school instead of overloading schools	3/5/2026 7:06 PM
1335	Don't change the grade bands. Not as safe for the children to have 6-12 together for example	3/5/2026 7:05 PM
1336	No comment.	3/5/2026 6:57 PM
1337	The grade band clusters need to stay the same or get smaller. A sixth grader and a 12th grader are very different and should not be placed in the same school for developmental as well as safety concerns. I believe the same thing for a pre-K child going to school with an 8th grader. That is much too big a gap.	3/5/2026 6:56 PM
1338	Grade band is fine as long as proper segregation is in place	3/5/2026 6:55 PM
1339	It may be best for discipline purposes to go with the grade band scenarios.	3/5/2026 6:54 PM
1340	It's unfortunate, the little kids do NOT need to be with the olders, for this reason most middle school shield the 6th graders on there own halls and everything to allow them to calmly settle in.	3/5/2026 6:54 PM
1341	Not sure.	3/5/2026 6:54 PM
1342	Uncertain.	3/5/2026 6:53 PM
1343	More separation of kids by age makes sense because older kids, even older elementary kids, have cell phones and are watching inappropriate content and using harsh language that little kids shouldn't be exposed to.	3/5/2026 6:53 PM
1344	For the Montgomery / Chamblee cluster, I believe stability and simplicity in grade bands should be a key priority. Frequent transitions (for example PK–3, 4–5, 6–8) can create social and academic disruptions and increase transportation complexity without a clear academic benefit	3/5/2026 6:52 PM

	for students. Given that Montgomery currently serves PK–5 and is functioning well with that configuration, I favor maintaining a traditional elementary structure (PK–5) for our school and cluster rather than splitting elementary grades across multiple campuses. If the district considers PK–3 / 4–5 in other parts of the county, I would strongly recommend that Montgomery's cluster remain PK–5, 6–8, 9–12 so that students can build long-term relationships with staff and peers in one elementary building. Any grade band changes should be justified with clear academic evidence and not driven solely by facility or capacity convenience. Because my child will attend Kittredge Magnet, I am especially concerned that any grade band changes preserve a clear, predictable pathway between home elementary schools and the 4–6 magnet program. Proposals should explain exactly how magnet entry grades (4–6 at Kittredge) align with new grade bands, so that students do not experience unnecessary extra transitions or lose access due to shifting configurations. Maintaining stability for a countywide program like Kittredge is essential to academic continuity and family planning.	
1345	The grade band scenarios are complex. I think it is important to keep children of appropriate maturity in environments that allow them to have access to age appropriate support. Having a school house grades K-8 would be challenging.	3/5/2026 6:48 PM
1346	How will you ensure that students can succeed if they are not reading it 3rd grade and moved to to a new school with a grade band of 4th-5th? I think that having a grade band of 4th-5th grade will help prepare students for the GMAS and Middle School, but how will that help if students being sent to these schools can't read at a 3rd grade level? What can you ensure will help those students when the current strategies are not working (and you know it is not)?	3/5/2026 6:45 PM
1347	There should be no grade band	3/5/2026 6:44 PM
1348	I think it should stay the same. Putting older kids with the younger can issues such as bullying. I also don't want to expose my kid to older kids behavior.	3/5/2026 6:41 PM
1349	The grade band should remain as it currently is.	3/5/2026 6:38 PM
1350	no feedback, open to different solutions.	3/5/2026 6:38 PM
1351	When o grew up here I went from OGE straight to LHS. Worked great for me! I feel that reallocating resources based on those needs are better suited than closing schools in the heart of neighborhoods. I am referring to OGE and LHS.	3/5/2026 6:37 PM
1352	The maturity of age levels and placing older student with small children is not a good thing to do.	3/5/2026 6:37 PM
1353	While I like the idea of PK to 8 due to high achievers given higher grade instruction, I do not think we should combine middle school kids with younger elementary kids without being worried about their safety.	3/5/2026 6:32 PM
1354	I feel that it would benefit and depends on the needs of the area in which it could impact the most.	3/5/2026 6:31 PM
1355	The classrooms are already crowded. The gifted students will no longer be poured into therefore falling more behind with the rest. Why is it best for a 6th grader to be in the same school as a 12th grader? Talk about a rise in drug usage, teenage sex and pregnancy.	3/5/2026 6:31 PM
1356	I'm ok with adjusting the grade bands	3/5/2026 6:28 PM
1357	Grade bands for Chamblee HS and MS should not be as wide as proposed. 6th graders should not go to school with high school kids. This doesn't take a lot of insight to understand that in a public school environment kids need to be with others their age.	3/5/2026 6:28 PM
1358	PK-3/4-5/6-8/9-12 scenario may help spread the students throughout the schools, which ideally addresses overpopulation and avoids closures.	3/5/2026 6:28 PM
1359	Studies have shown that putting middle school children alongside high school students is not advantageous to either group. They are in two different worlds and it is very difficult for the middle school child.	3/5/2026 6:26 PM
1360	Redan Elementary 3rd Grade & PreK	3/5/2026 6:25 PM
1361	I think the bands should stay the same	3/5/2026 6:25 PM
1362	I am specifically discussing the Dunwoody cluster elementary schools.	3/5/2026 6:22 PM

1363	I’m open to reimagining the way students are best served, while efficiently meeting those needs.	3/5/2026 6:22 PM
1364	I don't know	3/5/2026 6:19 PM
1365	No opinion	3/5/2026 6:16 PM
1366	K-8 together	3/5/2026 6:11 PM
1367	Cedar Grove HS needs to remain a high school Cedar Grove Elementary is a great school.	3/5/2026 6:11 PM
1368	I do not agree with 6th graders being combined with high schoolers	3/5/2026 6:05 PM
1369	I'm fine if Brockett becomes a K-7 or K-8 grade band school. I welcome it.	3/5/2026 6:05 PM
1370	Sixth graders should not be with senior highschoolers. That age gap is entirely too broad.	3/5/2026 6:01 PM
1371	None	3/5/2026 5:56 PM
1372	Montgomery Elementary School would be well served by moving to PK-3 and housing 4-5 at another nearby school (it already loses a lot of 4-5 to Kitteridge, which I don’t prefer as a parent - having to decide whether our children will be separated from their friends for 2 grades, in the interest of potentially are more challenging curriculum, is not a fair choice to make parents engage in). This would allow current MES and the new 4-5 MES to absorb some of the Ashford Park kids potentially, and retain Sexton Woods kids.	3/5/2026 5:55 PM
1373	I do not think the grade band consolidations will work. The students in middle and high schools are vastly different socially and developmentally and need to stay separate to ensure appropriateness and the best environment for students to grow.	3/5/2026 5:55 PM
1374	I only support the traditional grade ban models. Mixing multiple age groups has some negative consequences: Developmental differences: Elementary students and middle school students have very different developmental, social, and academic needs. Combining these age groups can make it difficult to design environments and expectations that appropriately support both stages. Loss of the middle school model: Grades 6–8 are typically structured to support early adolescent development through increased independence, electives, and team-based instruction. Embedding these grades in a K–8 setting may dilute practices designed specifically for middle school learners. School climate and supervision: Housing very young children alongside adolescents can create challenges related to school culture, supervision, and maintaining age-appropriate spaces and expectations for all students.	3/5/2026 5:51 PM
1375	I do not support grade band configurations that would require Evansdale students to attend large consolidated “mega-schools” outside their neighborhood or outside the existing Evansdale–Henderson cluster pathway. Maintaining the current K–5 structure at Evansdale Elementary best supports both community stability and program continuity. Evansdale’s French immersion program connects directly to the program at Henderson Middle School, and preserving that pathway is important for both academic continuity and maintaining enrollment. In addition, creating larger consolidated grade-band schools risks driving families away from the public system altogether. Many families chose this neighborhood specifically because of the presence of a strong, local elementary school. If Evansdale is closed or replaced with a large, more distant school, it is very likely that some families will pursue private schools or alternative options, which could ultimately reduce enrollment rather than stabilize it. For these reasons, I strongly encourage the district to maintain neighborhood elementary schools like Evansdale within their current clusters, preserve existing program pathways such as the French program feeding into Henderson Middle School, and avoid grade band scenarios that rely on large consolidated schools.	3/5/2026 5:50 PM
1376	Brockett elementary has been around since 1961. Well established and part of a great community	3/5/2026 5:50 PM
1377	For safety, these schools need to stay separate. The size of buildings snd capacity should not dictate the expansion of school grade bands.	3/5/2026 5:49 PM
1378	Vanderlyn	3/5/2026 5:48 PM
1379	Brockett would serve best as a Pre-K -5th or 3rd. We have recently received numerous upgrades with E-Splost funds and brand new fixtures.	3/5/2026 5:45 PM
1380	The proposal is a pure racist targeting of white (north county and high performing, high parent	3/5/2026 5:43 PM

	involvement, high school foundation donation) schools. Close lowest performing schools and bus kids into the higher performing schools via a voluntary school choice program. This is not rocket science.	
1381	I don't have any issue	3/5/2026 5:43 PM
1382	It makes sense to have K-2 elementary to focus on foundational literacy skills, 3-5 or 3-6 upper grade elem schools, and the. Middle and high schools.	3/5/2026 5:38 PM
1383	I think the idea of 6-12 would be more useful as transition during grade 6 would be a better one without any other transition until completion of high school	3/5/2026 5:38 PM
1384	Bands gives community an option for their district base on their population, culture and needs.	3/5/2026 5:37 PM
1385	If grade bands alleviate over and under enrollment I think it’s viable.	3/5/2026 5:36 PM
1386	Honestly coming from California middle school was 7th and 8th grade. Elementary was from k-6	3/5/2026 5:36 PM
1387	It’s hard to be an engaged parent if your children is split across different bands. The less bands is ideal to allow parents to consolidate their engagement to a central location.	3/5/2026 5:36 PM
1388	I think we should keep 3 tier clusters. I dont I dont think students will thrive with so many grades mixed in.	3/5/2026 5:33 PM
1389	Current grade band seem appropriate with K through five then six through eight and nine through 12	3/5/2026 5:31 PM
1390	Don’t sacrifice education and student safety for saving a few dollars. This school system has wasted money for years. Look in the mirror and cut your salary in half.	3/5/2026 5:31 PM
1391	Main preference is to keep Ashford Park community in tact and keep the current trajectory for Ashford Park students to funnel into Chamblee Middle and then Chamblee High.	3/5/2026 5:28 PM
1392	The "non-traditional" grade bands are all concerning to me. It is not appropriate for kindergartners to be riding the same bus as eight graders, nor is it appropriate for 6th graders to be riding the same bus as 12th graders.	3/5/2026 5:27 PM
1393	I am very concerned about these scenarios impact the City of Tucker and the Tucker Cluster. The draw of DeKalb county and Tucker are small elementary schools, with walkability to the schools. There is no information about re-drawing boundaries and other information on how this will impact the city. Converting a small elementary school that houses 300 students into a mega-school with 1000 students will have huge impacts on the surrounding neighborhoods, traffic, etc. Plus having empty buildings in the middle of neighborhoods is not wanted and has impacts on housing and other factors.	3/5/2026 5:26 PM
1394	Grade bands should stay as they are.	3/5/2026 5:24 PM
1395	grade band adjustments should be considered carefully to ensure they align with student developmental needs and instructional effectiveness. Certain grade configurations, such as keeping elementary students together through 5th grade and maintaining a strong middle school transition period, can support social and academic development. The district should also consider transportation impacts, program availability, and how changes would affect existing school communities within each cluster. Input from families, teachers, and staff in the specific clusters being affected will be important before final decisions are made.	3/5/2026 5:23 PM
1396	Cedar Grove Cluster	3/5/2026 5:21 PM
1397	Same	3/5/2026 5:21 PM
1398	I like the current grade band scenario of pk-5, 6-8, and 9-12. But having a pk-3 and 4-5 could be modified to be a 4-6, and then having a junior high school grade ban of 7-8 or possibly 7-9 which could prepare students specifically for their high school academic path.	3/5/2026 5:19 PM
1399	I think a change in grade band may be beneficial, we have to ensure curriculum aligns with said changes.	3/5/2026 5:12 PM
1400	I support grade band expansion. T think that PK - 6 / 7-9 / 10-12 grade bands would work to help restructure and balance the district.	3/5/2026 5:12 PM
1401	K-6 7-12	3/5/2026 5:05 PM

1402	Dont close oak grove thats my only concern	3/5/2026 5:03 PM
1403	Coming from Massachusetts, we already come from a background of PK-3/4-5/6-8/9-12 scenario so that seems perfectly fine. (Also my kids are past ES)	3/5/2026 5:01 PM
1404	I support a PK–5, 6–8, and 9–12 grade band structure. This model keeps elementary, middle, and high school students in developmentally appropriate learning environments. A PK–5 elementary structure allows younger students to learn in a setting designed specifically for early childhood and elementary development. A 6–8 middle school model helps support the unique academic and social needs of early adolescents, while 9–12 high schools allow older students to focus on college, career, and extracurricular preparation. Maintaining these grade bands also helps preserve the strong community connections that neighborhood elementary schools provide for families.	3/5/2026 4:59 PM
1405	K-8 is generally accepted as a best practice for positive student outcomes. High Schools that are set in neighborhoods should not be more than 1500 students. Get back to neighborhood schools. Although numbers have gone down, they are now similar to numbers in the 1980s when neighborhood schools were the model. There should not be a problem fitting students in buildings if this scenario is embraced.	3/5/2026 4:59 PM
1406	School grade clusters should be consistent across the system, bases on maturity of students.	3/5/2026 4:57 PM
1407	Impact of Grade Band Changes on the Miller Grove Cluster Any shift in grade bands such as moving from a 6–8 middle school model to a 5–8, 7–8, or K–8 configuration directly affects program quality, staffing, and student experience. For the Miller Grove cluster, the consequences are particularly significant because of the school's established programs and the needs of its rising students. 1. Maintaining the 6–8 Model at Miller Grove Middle School Keeping Miller Grove Middle School as a 6–8 campus preserves the academic and developmental structure that best supports early adolescents. This model is especially important for this cluster because: • The school has a strong Connections Department (FCS, drama, band) that is designed for middle grade learners and would be difficult to replicate in an elementary or K–8 setting. • Rising sixth graders in this cluster are highly inquisitive and ready for expanded electives, which are not typically available in elementary schools. • The 6–8 model allows students to transition into a setting with age appropriate expectations, leadership opportunities, and social emotional supports.	3/5/2026 4:54 PM
1408	What do educational data say is best for the kids? For example, our adolescents best grouped together, or kept with primary grades??	3/5/2026 4:46 PM
1409	I don't know what a "grade band scenario". If you are talking about keeping the K-6 elementary, 7-8 middle, and 9-12 high school, that is current to all school systems today. The other variation adding Charter and Magnet schools is dependent on the area. Access to those, to my understanding, is based on qualification of the student and the desire of the parent. It is very important for those students who are more advanced in their ability to learn and progress.	3/5/2026 4:43 PM
1410	Regarding the potential grade band scenarios, I would recommend maintaining the traditional elementary, middle, and high school structure. Keeping students grouped by traditional grade bands allows for age-appropriate academic instruction and social development.	3/5/2026 4:42 PM
1411	The cluster of children if I understand correctly is 6 grade to 12 grade. I am apprehensive of the level of understanding a younger child would have, being placed around those that are much older.	3/5/2026 4:30 PM
1412	While 6-12 grade bands may offer some facilities efficiencies, there is evidence that the arrangement is bad for kids (especially the younger ones). Many private schools go to great lengths to keep middle school separate from high school - give those 6-8th graders a few more years to act like kids. We should afford our public students the same benefits.	3/5/2026 4:24 PM
1413	I have heard adjusting grade bands in the past for Smoke Rise which was part of a previous consultant's recommendation. Instead that seems to have gone away and the idea is being proposed for other locations.	3/5/2026 4:18 PM
1414	I think the traditional grade bands are most effective. It allows students to grow with peers they know, while interacting with a bit older or a bit younger students throughout the band and moving up to the next band. It provides stability and continuity for students as they build on their educational skills.	3/5/2026 4:16 PM
1415	Bands are good.	3/5/2026 4:12 PM

1416	I like the idea.	3/5/2026 4:11 PM
1417	There should be a plan to renovate the middle schools to accommodate elementary students, first grade and Kinder need restrooms adjacent to their classrooms, They go to the bathroom all day long and should not have to walk down the hallway a long way to get to the restroom. At a minimum, They need to be only a certain amount of feet to the restroom.	3/5/2026 4:01 PM
1418	The utilization at Oak Grove is projected at 96%. Sagamore utilization projected 91%. Briarlake at 73% would have to absorb a large number of students.	3/5/2026 3:58 PM
1419	I believe the age gap is too great to have 6-12 grades in one location.	3/5/2026 3:57 PM
1420	I don't see the need for a change in this regard.	3/5/2026 3:54 PM
1421	Evansdale should be expanded not closed. We have a lot of land that could be utilized to expand if other schools need to feed in. I definitely would keep it prek-5 but maybe have prek-2nd on the upper level and 3rd-5th on the lower campus that could possibly be built on our lower field.	3/5/2026 3:52 PM
1422	I believe that the K-8 school choice option would be a viable option for the Lithonia area based upon the decreasing number of elementary aged children in my area.	3/5/2026 3:51 PM
1423	I think the current model of PK-5, 6-8, and 9-12 works fine, however I can see how the PK-8 or 6-12 models could be beneficial. Students would be able to stay in the same building for longer, which means siblings are less likely to be spread between multiple schools, and students and staff would be able to cultivate longer term relationships.	3/5/2026 3:50 PM
1424	The best scenario is to keep elementary (grade 1-6) separate from middle school (grade 7-9) and high school should be (grade 10-12)	3/5/2026 3:44 PM
1425	Na	3/5/2026 3:41 PM
1426	Keep the bands as they are. Absolutely opposed to a PK-8 model. Middle school is a critical developmental period and those students need targeted resources. This argument is mostly articulated by affluent residents who don't want their kids mixing with the diversity that our middle schools bring.	3/5/2026 3:40 PM
1427	This is a better scenario. Students are way more advanced due to technology and this is effecting the teaching learning process. I believe the grade bands will assist in keeping the younger students less influenced by the older peers.	3/5/2026 3:38 PM
1428	Not comfortable with 6th graders in same building with upper grades....yes, you can physically arrange halls/classroom...but kids will find ways to be where they are not supposed to be.	3/5/2026 3:35 PM
1429	I think multi grade buildings helps children learn to interact appropriately with students of other ages.	3/5/2026 3:35 PM
1430	I don’t like the idea of having pre-K/Kdg kids and 8th graders in the same building. The age gap is too large. Having 4 year olds and 14 year olds together could create safety issues. Also, transportation logistics need to be considered when determining different grade band configurations. What time will students begin and end school? Will buses be able to transport students in a timely fashion? This question says to be specific about which cluster we are referencing but this is hard to determine from the potential scenarios map.	3/5/2026 3:23 PM
1431	A 6-12 scenario doesn't seem as good to me. Maybe having 6-9 together might be better.	3/5/2026 3:20 PM
1432	I believe high schoolers should have their own space 9-12. If 6-8 must be with younger grades there needs to be a better community within the system to make it harmonic.	3/5/2026 3:20 PM
1433	I am open to this option but grouping will need to be well though out	3/5/2026 3:01 PM
1434	I think differing grade band scenarios should require having two principals to work with the specific grade levels, especially as you think about principals attending meetings for different grade levels. If the band levels are different there should be a different set up for alignment with the district that is fair and equitable for each grade band.	3/5/2026 3:01 PM
1435	Traditional bands are best for social lurposes	3/5/2026 2:56 PM
1436	Who consolidations will increase classroom size and limits one one and small group opportunities.	3/5/2026 2:55 PM

1437	Prefer current model of PreK-5, 6-8, and 9-12	3/5/2026 2:50 PM
1438	When I went to school in Dekalb, it was 1-7, 8-12. Looking back and seeing what exists today, that could possibly work.	3/5/2026 2:45 PM
1439	I think 6th graders should not be with high schoolers. Maybe starting at 7th could work for that, though. Pre-k-3 seems fine as well, assuming that works, logistically, for the cluster.	3/5/2026 2:45 PM
1440	This question needs to explain the potential grade band scenarios right here. Please remove the jargon for families who do not understand this question.	3/5/2026 2:45 PM
1441	N/A	3/5/2026 2:41 PM
1442	I Do not agree with consolidating middle and high schools. Would the facilities be divide in such a way that the 6-8 grader are not interacting with the older students?	3/5/2026 2:37 PM
1443	Ashford park elementary community is open to the options that allow it to remain open. Elementary school makes sense given community footprint. For example a lot of parents walk or drive their kids to school in golf carts.	3/5/2026 2:30 PM
1444	I strongly urge that Vanderlyn Elementary remain open and that the current K through 5 grade band structure within the Dunwoody cluster be maintained. Vanderlyn is part of the Dunwoody cluster, which includes Austin Elementary, Chesnut Elementary, Dunwoody Elementary, Hightower Elementary, and Kingsley Elementary, all of which feed into Peachtree Middle School and Dunwoody High School. Vanderlyn provides a close-knit, supportive environment where students, parents, and teachers know and care for each other. The smaller size allows for individualized attention, strong relationships, and a sense of belonging that is hard to replicate in larger or consolidated settings. Our students are seen, valued, and encouraged every day, which contributes to their academic and social success. Vanderlyn consistently ranks among the top schools in DeKalb County and is in the top five percent of elementary schools in Georgia. Any scenario that changes the K through 5 grade band or merges students with another school would disrupt the strong community connections and the nurturing environment that are essential to students thriving in the Dunwoody cluster. Preserving Vanderlyn ensures students continue to grow in a safe, supportive, and engaging school where they are known and cared for.	3/5/2026 2:29 PM
1445	I think removing standalone middle schools are in interesting idea especially it is possible to improve the quality of education in those schools (which appears to be low).	3/5/2026 2:27 PM
1446	The traditional cluster work best for my children PK-5 / 6-8 / 9-12	3/5/2026 2:26 PM
1447	PK-8 school is a good idea. Of course there would be separate areas of the facility by grades. I do not agree with 6-12 schools, I would not want my 6 grader going to school with 16, 17, 18 year old students.	3/5/2026 2:25 PM
1448	It turns for the worst starting in 3rd grade	3/5/2026 2:25 PM
1449	I would not want my 6th grader in the same school as an 18 year old senior.	3/5/2026 2:21 PM
1450	Separate elementary from middle and high school. Development differences too challenging to mix those grades into one campus.	3/5/2026 2:21 PM
1451	Overall, if elementary schools will be larger, it may make sense to organize them into lower and upper elementary levels. One possible structure to consider would be PK–2 (learning to read) and 3–5 (reading to learn), which aligns with key stages of literacy development. At the same time, I believe the concerns that have been raised about creating PK–8 and 6–12 schools may outweigh the potential benefits of those models.	3/5/2026 2:20 PM
1452	A streamlined and data-informed approach will be essential when determining appropriate grade bands across the district. Careful consideration should be given to the number of students in each grade level to ensure that grouping decisions are based on accurate enrollment trends and long-term sustainability. In addition, it will be important to evaluate the operational needs of each building, including the staffing required to effectively support students—such as administrators, counselors, and instructional staff. Conducting a cost analysis that compares the operational expenses of running each building with the cost of maintaining a fully staffed school will help guide responsible decision-making. Finally, reviewing the capacity of each facility will ensure that student populations are distributed in a way that maximizes available space while maintaining safe, supportive learning environments. A thoughtful review of these	3/5/2026 2:19 PM

	factors will help the district make well-informed decisions that support both operational efficiency and strong student outcomes.	
1453	I think consolidating into different bands to save funds and facility space is a great idea	3/5/2026 2:15 PM
1454	No feed back	3/5/2026 2:12 PM
1455	I don't like the combo of 6th-12th. I do enjoy pk-8 as that is working well at TMS - with the exception that those kids may want to play sports at other programs at schools that are more robust.	3/5/2026 2:11 PM
1456	I prefer the traditional model although the middle school years are taxing.	3/5/2026 2:10 PM
1457	I cannot imagine 6th graders going to school with 12th graders. This should not happen. There needs to be an effort to keep the communities small. Children get lost in the shuffle in the bigger schools. A class of 24 children is already too big for teachers to be able to provide the best learning environment. Mixing older kids with younger kids is not the best learning environment. Innocence lost, growing too soon.	3/5/2026 2:06 PM
1458	I feel that there is space under utilized with the brookhaven/ chamblee cluster --- to incude the current school, John Lewis, and land along Clairmont that does not see to be high interest for other developers.	3/5/2026 2:03 PM
1459	As to the situation presented in #4, we are not in a place where 6-12 is appropriate; we're not a rural district in Alaska.	3/5/2026 1:59 PM
1460	Combining 5 year old students in a building with 12, 13, or possible 14 year old student is not appropriate or safe. Limited middle school identity. Socialization concerns. Behavior management.	3/5/2026 1:57 PM
1461	I think keeping high schools as high schools w 9-12 is important and helps the middle school children be in a better developmental environment to keep them with middle schools or combined with elementary. I think our traditional model is best for families with multiple children, continuity in the same program/ facility while balancing the trade offs of programing. However, i also think a PK-8 would be acceptable if the traditional model is no longer viable. more transitions and more schools (in the Pk-3, 4-5,6-8, 9-12 version) is incredibly challenging for kids to continually make transitions and doesn't support community building with in the schools.	3/5/2026 1:57 PM
1462	The grade bands don't make sense. If you're banding students, it should be PK-2, 3-5, 6-9, 9-12. 3rd grade is where students switch from learning to read to reading to learn; it doesn't make sense to put them with babies when we're trying to move them forward. This would also allow DCSD to RETAIN CHILDREN IN 2ND GRADE who are not reading instead of asking 5th grade teachers to complete 26 RTI interventions a week in an effort to remedy a problem that we created by promoting non-readers. Or, keep it as PK-5, 6-8 and 9-12.	3/5/2026 1:54 PM
1463	Not in favor of the PreK -5 and 6-12 grade ban. More in favor of keeping age groups as they are with elementary PreK -5; 6-8 and 9-12 graders.	3/5/2026 1:53 PM
1464	I am against changing the grade bands particularly for high school and middle school. These ages should be separate for both socialization and safety.	3/5/2026 1:52 PM
1465	I currently do not have a problem with the way our current grade bands work (K-5, 6-8, 9-12). Unless DCSD can show specific data that reveals significant problems with the current structure I think we should keep it as-is.	3/5/2026 1:49 PM
1466	I am not in favor of changing the grade bands to make them larger, particularly not for middle and high school. I would be in favor of smaller grade bands for instance K-2, 3-5, 6-8, 9-12. But Middle and high schools need to be separate.	3/5/2026 1:45 PM
1467	Changing the grade bands is a better solution than closing schools, especially elementary schools. Young kids need a smaller environment to learn better and consolidation would deter from optimal learning for young kids.	3/5/2026 1:44 PM
1468	I believe the traditional grade band model of PK–5, 6–8, and 9–12 remains the most appropriate structure for the Evansdale cluster. This model is familiar to families and supports the developmental stages of students by keeping elementary-aged children in an environment designed specifically for younger learners. For schools like Evansdale Elementary, maintaining a PK–5 structure allows students to build strong relationships with teachers and staff during	3/5/2026 1:43 PM

	their early academic years. It also provides stability for families and helps maintain a strong neighborhood school community. Introducing additional transitions, such as splitting elementary grades into multiple buildings (for example PK–3 / 4–5) or combining wide grade ranges in a single facility, could create unnecessary disruption for young students and families. Elementary students benefit from consistency, safe environments, and school communities that understand their developmental needs. For the Evansdale cluster, I encourage the district to maintain the PK–5 elementary model and prioritize stability for students and families while evaluating future changes.	
1469	I think grade bands make a lot of sense, especially pre-K through eight in areas with under utilized schools. Where schools are completely over capacity, like in the Dunwoody cluster, breaking up the elementary schools to early elementary, and late elementary makes a lot of sense. None of this solves the extreme overcrowding at Dunwoody high school however.	3/5/2026 1:42 PM
1470	When I grew up Middle school was Grade 4 to Grade 8 High school should remain 9th to 12th	3/5/2026 1:36 PM
1471	6-12 not a good idea. Even at church youth group this rarely works.	3/5/2026 1:32 PM
1472	They seem okay	3/5/2026 1:25 PM
1473	NA	3/5/2026 1:25 PM
1474	Not sure need more information	3/5/2026 1:23 PM
1475	I do not like the idea of changing the grade bands. I have three future students and making more drop offs for parents feels impossible. I do not want middle schoolers (6-8 grade) with high schoolers (9-12 grade). I do not think changing any grade bands is a good idea.	3/5/2026 1:21 PM
1476	I would not like to see 6-12 grade schools. 6th graders should not be with 12th graders on the same campus. I could see 6th grade remaining in the elementary school and having a junior high model of 7-9 and 10-12 schools.	3/5/2026 1:19 PM
1477	I'm concerned PK through 8th grade is too large for a single school and could be overwhelming to young students.	3/5/2026 1:19 PM
1478	3 grade and prek	3/5/2026 1:15 PM
1479	Pre-k-3 of through 5, even 6 could work. The differences in kids' interests, maturity, and developmental stages is of concern putting 6-12 together. Concern that the HS tail will wag the dog in terms of financial expenditures, curriculum, and extra-curricular offerings whether sports teams, music/art/band programs. Of course all these proposed bands have done in other systems or in the past. So it's not a question of is it possible. It's a question of whether it's a win win for students first and then system .	3/5/2026 1:15 PM
1480	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%, Briarlake is at 73%, but would need to absorb a significant share of OGE's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is adjacent to one of the largest healthcare and research expansions in GA, with thousands of jobs added and ongoing campus growth. Traditional PK-5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus on clusters with long term, significant underutilization.	3/5/2026 1:15 PM
1481	For the Lakeside cluster, a high utilization cluster experiencing measurable growth next to one of the largest health care expansions in the state, stability should be prioritized and traditional grade bands remain appropriate.	3/5/2026 1:14 PM
1482	Grades bands should be separated for safety of students. It would be huge mistake to mix elementary school grades with any other upper grades.	3/5/2026 1:11 PM
1483	I like the scenario of having schools with PK-2, 3-5, 6-8 and high school.	3/5/2026 1:04 PM
1484	I'm concerned about 6-12. I think having middle schoolers in the same building will be challenging with their different developmental stages. I went to a K-12 private school, but we were able to separate grade bands with PreK - K in their own space, 1-6 in their own space, 7-8 in Junior High and then 9-12 High School.	3/5/2026 1:02 PM
1485	I do not like the idea of having 6th graders share the same halls as upper classmen.	3/5/2026 12:59 PM
1486	just like possible K-8 scenarios, would like to see discussions on possible early childhood	3/5/2026 12:56 PM

	learning.	
1487	Consultants suck. Every 5 years we get to watch a rerun of Office Space. Dumb ideas refreshed with fresh spices.	3/5/2026 12:55 PM
1488	The Lithonia cluster would benefit from a grade-band approach that intentionally incorporates Social-Emotional Learning (SEL) courses before students reach high school. Currently, SEL appears to be addressed only occasionally at the lower grade levels. As a result, many students enter high school without strong conflict resolution skills or strategies for managing their emotions and personal challenges.	3/5/2026 12:55 PM
1489	As far as grade band scenarios that seems a bit more challenging. We might want to keep the grades the way they are for the time being.	3/5/2026 12:50 PM
1490	I think the PK–3 / 4–5 configuration (and others it may work with) would be beneficial for the Clarkston cluster and other high ESOL population clusters if the configuration does allow for more focus on early literacy and foundational skills. Schools in the area are close together, so this may help make the configuration more plausible since so many students walk to school and there are fewer bus routes.	3/5/2026 12:49 PM
1491	I don’t believe a k-12 is beneficial for the youth. These young kids are exposed to too much and we need to preserve their innocence as long as we can	3/5/2026 12:47 PM
1492	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/5/2026 12:47 PM
1493	I think traditional grade bands work	3/5/2026 12:46 PM
1494	Seem good	3/5/2026 12:45 PM
1495	For me it’s was fantastic I like that the schools is Rockbridge Elementary School.	3/5/2026 12:44 PM
1496	I don't have major feelings about this.	3/5/2026 12:44 PM
1497	If I am reading correctly we would be putting 6 -12 together? That could potentially have some issues with the age gaps.	3/5/2026 12:42 PM
1498	Neighbor community plays a vital role in the already established French immersion program. Moving this program would significantly cripple what is currently an exemplary program.	3/5/2026 12:41 PM
1499	More transparency around modeling assumptions would be helpful in the next round. Specifically, showing projected enrollment, building utilization, and student distribution across the full cluster for each scenario would help families understand tradeoffs and long-term impacts.	3/5/2026 12:41 PM
1500	I personally feel that 6-12 is too wide of an age range to have in school together	3/5/2026 12:37 PM
1501	Traditional	3/5/2026 12:34 PM
1502	I am not an educator. But I am concerned by merging down to two “chunks.” The developmental offenses between a PreK and 5 or 8th grader are significant. The differences between a 6th and 12th grader are significant and likely more problematic.	3/5/2026 12:33 PM
1503	Grade banding is a detail that should not warrant its own stand-alone box on this survey. Where is the research supporting mega-elementary schools as the clear choice for optimal student achievement and development? What other options besides consolidation were considered and what was the methodology for ruling them out? Where are the traffic studies? How will longevity of programs like DLI be achieved/ensured? You can not ask parents to rubber-stamp a plan made by non-stakeholders with a dubious record and ties to prior leadership that worsened DCSD's reputation. Asking the community for feedback without an overall vision is unbelievable.	3/5/2026 12:22 PM
1504	I think it is a good idea.	3/5/2026 12:20 PM

1505	miller grove middle becoming an elementary school	3/5/2026 12:18 PM
1506	See above for more detail but I very much want to stay in the Chamblee middle and high cluster. We had a poll at our school and the majority of parents agree that we should remain in the same cluster and keep our community together. That is our main priority.	3/5/2026 12:17 PM
1507	OK, with change to banding, but think that the lowest grade for high school should be no lower than 8th grade	3/5/2026 12:15 PM
1508	Bad	3/5/2026 12:14 PM
1509	if Brockett School were to close where would the children of our neighborhood go? Most of the houses in our area are being bought by young families with children as we older folks move out. One of the attractive things about this side of Tucker is that we have a good neighborhood school.	3/5/2026 12:13 PM
1510	If the district's objective is to right-size elementary schools toward the 600-student efficiency benchmark, Vanderlyn should be evaluated as a candidate for expansion rather than closure. The school is already operating efficiently and, given its shared campus, presents an opportunity to explore coordinated facility solutions that support Dunwoody High School's needs while preserving elementary access. We respectfully request comparative modeling that evaluates closure versus expansion scenarios within the Dunwoody cluster, including cost, utilization, and long-term flexibility, before final determinations are made.	3/5/2026 12:12 PM
1511	Ashford Park is a community gem and should be improved.	3/5/2026 12:09 PM
1512	For sake of the children, I believe a new option should be considered. PK.K,1,2 3,4,5 6,7,8 9,10,11,12 This grade banding has an average of three years together. Pre K has only one class with a lottery to get in while high school students have more maturity for younger students to deal with older students.	3/5/2026 12:07 PM
1513	Toda la escuela es perfecta con grupos maravillosos	3/5/2026 12:05 PM
1514	I think that for the main part the traditional format is going to be the best option, but in some cases I think that the 6-12 model may work best if grades should be consolidated to avoid closures that would cause significant hurdles to access.	3/5/2026 12:03 PM
1515	Keep it traditional, works great.	3/5/2026 12:03 PM
1516	I support maintaining the traditional PK-5, 6-8, and 9-12 grade configuration. This structure is familiar to families, aligns with clear developmental stages, and is currently working well for our community. Before considering a shift to alternative grade band models, I would want to see compelling academic, operational, or financial data demonstrating clear benefits that outweigh the disruption to students and families. Stability and continuity are especially important during broader consolidation discussions. If schools like Oak Grove are performing well, maintaining a consistent grade structure supports that success.	3/5/2026 12:02 PM
1517	I'm not sure which schools those are being applied to, and what the impact would be on overcrowding of existing schools or better utilization of existing under-enrolled schools.	3/5/2026 11:59 AM
1518	It could work. However, there are some big changes as a child grows and some age groups don't need to be together. If at the same school, then there needs to be separation by buildings or floors.	3/5/2026 11:58 AM
1519	No me agrada, no se tiene la misma atención, distracción tanto de mayor y menor grado porque los problemas son diferentes. Y la atención no se enfoca en un solo grado. Al decir de sobra que en los grados intermedios se encuentra mucho bullyng.	3/5/2026 11:55 AM
1520	No change to grade clusters	3/5/2026 11:54 AM
1521	While the reconfigured schools will provide a more efficient housing system, the developmental needs of the students should be the driving force in this new plan. The physical and emotional needs of the pre=teen adolescent should be considered before the needs of facilities. Elementary age children should not be exposed to these behaviors. Conversely, middle schoolers should not be exposed to teenage students' behaviors. Based on research, a PreK to 6 configuration functions best when considering a child's emotional development.	3/5/2026 11:53 AM
1522	Traditional models are good, PK-5/ 6-8/ 9-12 , because kids are being in the same building with close age group. It's easier for teachers to deal and approach students with the same age groups.	3/5/2026 11:51 AM

1523	Prek - 6/ 7&8/9-12	3/5/2026 11:51 AM
1524	I do not think younger students should be on campus with 9th-12th graders. I like the way it is now across all bands but if it had to change, I could see pre-k-8 as many private schools do because is very hard for families with multiple kids to manage multiple schools. I currently have 1 kid in each school and it's not easy but developmentally I think it's better this way. If it wouldn't be a stress on families, splittig into 4 schools could be good but it's a lot to manage and a lot of transitions for the kids.	3/5/2026 11:44 AM
1525	I am supportive of the traditional, great bands, because I think that children who are at the elementary school level thrive by attending institution with children of all ages. I do think that once a child reaches sixth grade, that that is an inappropriate time for them to go to school and be surrounded with older children. It gives these children the experience of what high school could be like however they are still around children who are at their same intellectual level and relative maturity level.	3/5/2026 11:43 AM
1526	I believe it depends on the needs and preferences.	3/5/2026 11:40 AM
1527	I have serious concerns about including young children with teenagers. I do not see a problem with having (PreK)/K-2 grades and 3-5 grades together. I also have concerns with 6th graders being with 12 graders. There is a big difference in maturity and younger students are likely to be taken advantage of or bullied by older students.	3/5/2026 11:30 AM
1528	None	3/5/2026 11:30 AM
1529	I am open to grade bands in Chamblee or Cross Keys cluster. My child is at Kittredge and if he stays would continue to Chamblee MS and HS. Our home is in the Cross Keys cluster.	3/5/2026 11:26 AM
1530	My main concern is having high school include 6-8th. The amount of things an 11-12 year old can be exposed to with 16-17 year olds is concerning. I believe a better set up would be to go back to having elementary pre-k- 6th and have HS 7-12th.	3/5/2026 11:21 AM
1531	I think our cluster would benefit from having a PK-3 / 4-5 / 6-8 / 9-12. However, the middle grades band attendence lines should be expanded to include multiple elementary school students within the Chamblee Cluster. For example, students in the 4-5 band school should be comprised of students from Montgomery ES, Ashford Park ES, and Huntley Hills ES.	3/5/2026 11:21 AM
1532	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/5/2026 11:20 AM
1533	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/5/2026 11:15 AM
1534	Traditional grade bands are great, however banding 4th and 5th graders is also an option as these grade levels aid in preparedness for middle school.	3/5/2026 11:13 AM
1535	I live in the Dunwoody area. I have seen what happened with Dunwoody Elementary when it was packed with students in trailers. It wasn’t safe during fire drill, tornado drill, and lockdowns. Kids were outside in the trailers. My handicap child didn’t have a bathroom when the lesson was in the trailer. My child had to walk outside in the rain to get to class. At the same time, Austin Elementary had a brand new building inside beautiful Dunwoody Nature Center. Throughout all these years we’ve been living here Austin Elementary is always significantly less crowded compare to Dunwoody Elementary school. If I thought that students will be equally distributed, I may agree with rearranging the schools. But with my experience in the last 20 years in Dunwoody certain schools become overcrowded while other schools benefit from staying the same size. The elementary schools students in Dunwoody need to be	3/5/2026 11:13 AM

	equally divided. Peachtree middle school STEM program was the only best thing in that school and that was taken away. Peachtree Middle school had many principles changes and inconsistency. Peachtree Middle School in Dunwoody needs help. Dunwoody High School is a wonderful high school.	
1536	I'm very undecided on this topic. I need more clarification. It seems most of them have more challenges than benefits.	3/5/2026 11:12 AM
1537	n-a	3/5/2026 11:09 AM
1538	Struggle with the idea of having younger students in the same space as older students. Should be avoided when possible.	3/5/2026 11:08 AM
1539	I think switching grade bands are fine.	3/5/2026 11:08 AM
1540	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/5/2026 11:07 AM
1541	I think the grade bands would depend on that community or cluster and capacity. I don't think they need to be the same but having different models throughout the district could be problematic from a systematic standpoint.	3/5/2026 11:06 AM
1542	It's fine as is	3/5/2026 11:03 AM
1543	Across the board this is a bad idea. Traditional grade bands have been effective for a long time and for good reason. In my opinion 6th grade students should not be around high school aged kids while at school.	3/5/2026 11:03 AM
1544	Great	3/5/2026 11:01 AM
1545	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/5/2026 10:56 AM
1546	I have concerns with the K-8 Grade band and 6-12 Grade Bands due to the wide age range of students. It is not safe to have 5 year old students in the same building as 13 year old students. Same with 11 year old students in the same building as 17/18 year old students.	3/5/2026 10:55 AM
1547	If you all decide on a grand brand go back to what worked from the beginning K-8 9- 12	3/5/2026 10:54 AM
1548	When considering grade band scenarios within the cluster that includes Evansdale Elementary, it is important to protect specialized programs such as the Dual Language French program currently offered at Evansdale. These programs require continuity from year to year and should not be disrupted by consolidation or grade band changes that could negatively impact enrollment or program stability. I encourage the district to consider solutions that allow Evansdale to remain open and continue serving students in grades that support the success and growth of the Dual Language program and the surrounding community.	3/5/2026 10:49 AM
1549	Based on the nature and needs of the middle school learner, I believe there should be a separate middle school-either 6-8, or 4-8.	3/5/2026 10:48 AM
1550	PK-8 then 9-12 is not a scenario I would agree with. My children recently started Middle school and are involved in extra curriculars and sports. I would not want them to be more limited. Especially going into HS where these can be important for their college transcripts. I do like the PK-3/4-5 configuration. Both of my children are in the magnet program and I saw a benefit from them being in a facility with just 4-6 grade. They were able to be more challenged with lower teacher/student ratio. I believe teachers, from what they have told me, feel it works better as well for transitioning from one grade to another. I can also see the benefit of 6-12	3/5/2026 10:39 AM

	campuses. Especially with sports and extra-circulars. Also the vertical access to curriculum I believe is more beneficial at this age. Socially many kids make those connections that last in middle school/high school. So that is a benefit as well if they can stay in the same school.	
1551	I do not want these changes. Focus on fixing the instruction!!!	3/5/2026 10:36 AM
1552	I understand the potential benefits of a 6–12 model, but I do have some concerns about the impact on younger students. Sixth graders are still adjusting to middle school expectations, and sharing a building with high school students could present challenges related to maturity levels, social interactions, and overall readiness. I think it's important that we carefully consider how to protect the learning environment and safety of our younger students.	3/5/2026 10:35 AM
1553	See above comment.	3/5/2026 10:34 AM
1554	They should stay how they are. Adding 6th to elementary seems hard. Those kids are significantly older then the pre-K babies that will be in the building. Everyone in the county should be on the same grade bands!	3/5/2026 10:31 AM
1555	Dunwoody cluster. I support the traditional or a grade band that would allow for more children to be able to participate in the PK lottery.	3/5/2026 10:31 AM
1556	The Redan ES cluster has seen growth. Redan ES has continued to meet students where they are and push them academically to where they need to be.	3/5/2026 10:28 AM
1557	If we are considering the grade band scenario we would need more security and law enforcement in the schools. Make sure the lower grade level kids stay separate for high grade older kids. Some other counties and schools here in DeKalb have done this and seems to work maybe consulting with them on how to tackle grade level students emerging as it will all be new students, parents, and staff	3/5/2026 10:27 AM
1558	When I go into Evansdale there are so many empty seats year round.	3/5/2026 10:24 AM
1559	Attention is being placed on wrong thing, improve schools in every area & most of all academics.	3/5/2026 10:21 AM
1560	No consolidation, no little kids in huge buildings. Even elementary school as it is, has too many grades, in my opinion. $ year olds are practically babies, they should not be in the same spaces as 10 year olds. I would like to see Prek-2nd and 3rd-5th being separated.	3/5/2026 10:20 AM
1561	Grade banding is a detail that should not warrant its own stand-alone box on this survey. Where is the research supporting mega-elementary schools as the clear choice for optimal student achievement and development? What other options besides consolidation were considered and what was the methodology for ruling them out? Where are the traffic studies? How will longevity of programs like DLI be achieved/ensured? You can not ask parents to rubber-stamp a plan made by non-stakeholders with a dubious track record and ties to prior leadership that worsened DCSD's reputation. Asking the community for feedback without an overall vision is unbelievable.	3/5/2026 10:20 AM
1562	No strong opinion.	3/5/2026 10:18 AM
1563	The grade bands are effective if the students are appropriately placed. For example, the elementary schools should be PK3, PK4-2nd, 3rd-5th, 6-8, 9-12.	3/5/2026 10:15 AM
1564	I am not interested in my middle schooler 6th grader being in the same building with high school students	3/5/2026 10:14 AM
1565	k-5	3/5/2026 10:07 AM
1566	none	3/5/2026 10:06 AM
1567	In y area, Oak Grove, Midvale, Evansdale, & Henderson Mill are schools in my area that, unfortunately, a lot of families choose alternatives to these schools. Closing them will force more kids out of the system. (My children went to Livsey, and I am happy it is remaining, it is a big reason why we moved to our home).	3/5/2026 10:05 AM
1568	I'm not really clear on this initiative just yet.	3/5/2026 10:00 AM
1569	Grade bands shouldn't be leveraged if it requires schools to leverage trailers. If there are bands that have high school and middle school together, there should be separtion of facilities.	3/5/2026 9:59 AM
1570	The traditional grade band scenario is the best.	3/5/2026 9:59 AM

1571	Though this would not impact my local elementary or middle school, I am not opposed to grand band scenarios.	3/5/2026 9:54 AM
1572	Not excited about combining sixth through twelve grades. I have seen this scenario before and it is very difficult to sustain.	3/5/2026 9:53 AM
1573	Fantastic education	3/5/2026 9:53 AM
1574	OG Elementary/Lakeside High	3/5/2026 9:53 AM
1575	The traditional grade bands are fine.	3/5/2026 9:52 AM
1576	I support maintaining the traditional grade band structure of PK-5, 6-8, and 9-12 whenever possible. This structure aligns with developmental stages and allows schools to focus on the specific needs of elementary, middle, and high school students. Keeping a consistent structure across clusters also helps families plan long term and reduces confusion during transitions.	3/5/2026 9:50 AM
1577	Grade bands should be: PreK (or PreK3 in some cases) - 5th grade 6th - 8th grade 9th - 12th grade This should be consistent across the whole county.	3/5/2026 9:49 AM
1578	I don’t have enough knowledge to speak on grade bands. Without looking into it, I’m not opposed to widening the grade bands and combining 7th or 8th grade with high school levels.	3/5/2026 9:45 AM
1579	The Evansdale Elementary community has thrived for 50 years. It has scores that are near the top.	3/5/2026 9:43 AM
1580	I'm opposed to having big grade bands like 6-12 since it will expose younger students to older student issues. IE, combining schools Chamblee MS and HS would be a mistake. Smaller bands are fine if it helps reduce overcrowding. IE, splitting Ashford Park + John Lewis Elem into PK-3, 4-5 bands is ok.	3/5/2026 9:42 AM
1581	6th-12th grade is NOT SAFE for the younger students. PK-8th is NOT SAFE for younger students. You have to consider the maturity of the older students in these grade band scenarios and how that could affect the younger students. Children of similar ages and maturity levels should be kept together and separated from others.	3/5/2026 9:42 AM
1582	Not a problem I really don't care for 6th going to 12th.	3/5/2026 9:41 AM
1583	The traditional model of grade band scenarios protects vulnerable middle schoolers from high schoolers. It also allows a transition period for middle schools while they are changing. Lastly, separating 4-5 would make it difficult more difficult on families with multiple children (drop-off/pick-up), separate school activities, etc.	3/5/2026 9:40 AM
1584	Don’t close the schools	3/5/2026 9:35 AM
1585	Bob Mathis should not be closed. Students in that neighborhood should have that school remain open because it is centrally located.	3/5/2026 9:33 AM
1586	For our cluster, I think that the k-8 model makes the most sense. Many families pull there kids out for 6-8 and return for 9-12. I think a k-8 model encourage more of these families to remain in the district. Also, my understanding is that Lakeside and nearby Tucker are already at high capacity so it’s hard to see how a 6-12 approach is feasible or helpful.	3/5/2026 9:32 AM
1587	I'm not against grade bands.	3/5/2026 9:31 AM
1588	I think the current grade bands are best. Younger than 9-12 should not be in a high school. When I came through it was 1-7 & 8-12 and high school was rough on 8th graders with older kids intimidating them.	3/5/2026 9:30 AM
1589	I’m open to grade bands changing to fit developmental needs and student achievement.	3/5/2026 9:30 AM
1590	Any K-8 school would have to be at a school that is currently a middle school because elementary schools don't have enough land for middle school sports.	3/5/2026 9:28 AM
1591	N/A	3/5/2026 9:24 AM
1592	I do not think it’s a good idea to band 6th grade kids with 12th grade kids. The maturity of a 18yr old is vastly different than one of a 12yr old	3/5/2026 9:24 AM
1593	N/A	3/5/2026 9:20 AM

1594	As a parent of a student at Brockett Elementary School in the Tucker Cluster within the DeKalb County School District, I believe it is important that any potential grade band changes be carefully considered for how they will impact students in IB programs. Brockett Elementary currently serves students in the K–5 grade band and implements the International Baccalaureate Primary Years Programme, which is designed to support a continuous elementary learning experience. If grade band scenarios were to move fifth grade to a middle school setting (for example, a 6–8 or 5–8 configuration), it could disrupt the continuity of the IB Primary Years Programme that many families chose when enrolling in Brockett. Maintaining the K–5 grade band at Brockett Elementary would help preserve program stability, support younger learners developmentally, and maintain alignment with the IB instructional model. Additionally, within the Tucker Cluster, maintaining consistent grade band structures across elementary schools helps reduce confusion for families and ensures smoother transitions for students moving from elementary to middle school. Any proposed grade band changes should consider program continuity, student developmental needs, and the unique academic programs already in place within schools such as Brockett Elementary.	3/5/2026 9:20 AM
1595	I think the grade bands should stay as is at the present time. However you all should research the grade bands at City Schools of Decatur and see if that has had a positive or negative effect on the learning of students.	3/5/2026 9:16 AM
1596	I prefer to keep the traditional grade bands OR PK-8 schools. As a parent, it is a major logistical challenge to have different children in different schools and so the pk3/4-5 configuration sounds undesirable. If you were to split the grades up more then I believe you would end up with less parental involvement because working parents like me would find it difficult to go back and forth between buildings around holiday time of year and for special events. I don't love the idea of 6-12 campuses because middle schools kids are at such a different place developmentally from high schools students that I wouldn't want to see them in the same classes together.	3/5/2026 9:15 AM
1597	We pulled our children from middle school in Dekalb County in favor of a private K-8 school. This banding is the right way to go as middle school kids are DIFFICULT and letting them have connections to younger children helps them feel caring and confident. Banding as 6-12 would do the opposite and gear those difficult middle school years to growing up faster (too fast) and trading a time to focus on being a caring and confident community member to a time to focus on moving fast, feeling small and learning bad habits quickly.	3/5/2026 9:13 AM
1598	I believe too many schools are on the list to be closed given DCSD owns these buildings and land.	3/5/2026 9:11 AM
1599	Good for stability	3/5/2026 9:09 AM
1600	6-12 don't prefer that because you will have 11 years old with 17 year olds. 6-8 are still mentally developing and being exposed to HS mentality before they are ready raises real concerns.	3/5/2026 9:05 AM
1601	I don’t want k-8th or high school. Older kids of this age should not be around the younger kids for fear of bullying/accidents etc. I don’t love this idea. K-6th seems fine.	3/5/2026 9:05 AM
1602	Don't close OGE! That school has a waitlist?!!!! Why would you close it? ALso very worried about how this whole project is going down. Seems like another grift...why would we be trying to institute something created by a known grifter????? . Financial irresponsibility: HPM touts this as a $1.5B investment project for them, likely closer to $2B based on Dresden ES expansion costs ($72M project). Legislation moving through state will also impact tax revenue to DCSD, estimate $100M annual reduction. https://hpmleadership.com/hpm-dekalb-county-schools/ 4. Questionable history of HPM and Horton. Jefferson Co KY district (where Horton was deputy superintendent) now at 188M deficit. HPM's work in Evanston, Horton’s former district, was "completely fruitless". Have they ever had a successful outcome for a district? 5. Questionable history of SAP: started by Horton. Led by Sarita Smith, who led SAP in Evanston, IL district now insolvent https://foiagras.com/…/the-curious-case-of-the-missing... 6. Data errors. Decision-making is based on flawed data. Enrollment projections are wrong for OGE. The school will be at 96% capacity in 2026-7 and has a 100 student K waitlist. Other closure schools are fighting the same inaccurate projections. HPM models are wildly flawed; use a one-size-fits-all methodology focused on maximizing facility cost savings excluding student success, school achievement, already approved/completed improvements, and nearby developments (CHOA, Emory Healthcare, Lulah Hills) 7. Oversight issues: list of closures was created alone by HPM. criteria to select schools for closure were not vetted by the board,	3/5/2026 9:03 AM

	acting superintendent, or DCSD SAP staff (revealed in 2/24 board meeting). HPM is a developer tasked with proposing what the capital investments should be. Major COI flags.	
1603	I would not like for middle and high schools to be combined. There is such an age discrepancy among middle and high school students that I do not believe they should be housed together.	3/5/2026 8:58 AM
1604	I believe we should keep the grade bands the same.	3/5/2026 8:52 AM
1605	I believe the traditional grade bands make sense, but feel there can be flexibility to suit different child needs. Kids at each stage have specific needs and that should be the most important deciding factor.	3/5/2026 8:52 AM
1606	Oak Grove is a wonderful community school and shutting it down would be a crime.	3/5/2026 8:49 AM
1607	I do not think it is a good idea to combine grades 6-12.	3/5/2026 8:49 AM
1608	Middle school should be separated from elementary and consistent throughout the district.	3/5/2026 8:48 AM
1609	Not in favor	3/5/2026 8:47 AM
1610	You all have the capacity and resources to figure it out. Do it!!	3/5/2026 8:47 AM
1611	Dunwoody cluster. Traditional model. PK-8 - middle school students will have a difficult time with sports and other enrichment (like language classes for HS credit, etc) 6-12 campuses - I don't want any 6th graders on the bus with 12th graders. No thank you. 4-5 schools - we already tried that in Dunwoody. It was too much driving around in Dunwoody with kids at multiple schools.	3/5/2026 8:45 AM
1612	My preference is traditional, but would be open to PK-3 / 4-5 / 6-8 / 9-12	3/5/2026 8:36 AM
1613	Middle school and high school should definitely not be combined into 6-12. While fiscally convenient, this option fails to consider the wide range of child developmental milestones going on at these ages.	3/5/2026 8:34 AM
1614	It is ok to play with the bands in different ways. However, children from one initial cluster should be kept together as they filter into middle school and high school, for they form lifetime friendships which affect their wellbeing.	3/5/2026 8:32 AM
1615	I think that increasing school bands would cause too many issues. While it doesn't sound like it, 6th graders are insanely different from 12th graders and they should not be on the same campus together. Unless the high school and middle school are ran on completely different schedules and do not overlap, this would cause too many problems with bullying. For example, about 15 years ago, my hometown moved 6th grade back into elementary school because there was so much bullying and difference between even 6th and 8th graders. The results were very positive.	3/5/2026 8:32 AM
1616	N/A	3/5/2026 8:31 AM
1617	Keep the existing grade bands	3/5/2026 8:29 AM
1618	I would prefer that every school has the same grade band, but if different grade bands is necessary to ensure an even distribution of students, I would approve.	3/5/2026 8:26 AM
1619	Traditional grade bands, or K-8 / 9-12 are the least disruptive. 6-12 is a pretty transformational time, I doubt that would be supportive for younger students.	3/5/2026 8:25 AM
1620	I am a supporter of grade banding, especially using buildings for 6-12. I grew up in an area outside GA that used this and it seemed to make sense. Half of building was used for MS and the other side was HS. Since both of these grade bands seem to focus more on classroom switching for specific subjects vs a home room philosophy, the commingling makes sense. Seeing that GA and the county have a number of Magnet, Charter and other Specialized schools I do not see any reason why this shouldn't be explored further to maximize building usage and minimize student) family travel while trying not to disassemble existing school geographies further.	3/5/2026 8:24 AM
1621	I would support a K-3 band and 4-5 or even 4-6 band. There's a huge difference between what a 5-year old and 11-year old need from their school. However, I would be concerned about a 6-12 school for the same reason. I don't think having 6th graders and 12th graders on the same school bus is a good idea, just for example.	3/5/2026 8:24 AM
1622	The AP, Chamblee cluster has great full capacity why fix something not broken	3/5/2026 8:23 AM

1623	I think each cluster should have at least 2 elementary, 1 Middle & 1 High school.	3/5/2026 8:20 AM
1624	None	3/5/2026 8:11 AM
1625	I live in the Dunwoody district. As far as I can tell, there are no rpopsed band shifts for our community. Briefly, a band of 6-12th grade seems like too big of a social/physical gap to have in 1 building. I don't think most 6th graders would be mature enough to transition well to a school with juniors and seniors. As for elementary years, I think PK-3 and 4-5 bans seems reasonable.	3/5/2026 8:09 AM
1626	Prefer to keep the traditional PK-5/6-8/9-12 in the Chamblee cluster	3/5/2026 8:06 AM
1627	I think it’s not safe at all. I just feel like this day and time this will cause so many problems among the different grade levels. I feel if the elementary and middle school is joined togather it’s not a good look on the elementary kids.	3/5/2026 8:05 AM
1628	Don’t cluster 6-12. That sounds terrible. Even pk-8 sounds terrible. Middle schoolers should be isolated until whatever is happening to them subsides. Quarantine the pre-teens.	3/5/2026 8:03 AM
1629	dunwoody	3/5/2026 7:59 AM
1630	Do not agree with putting 6-12 in the same building. Too intimidating for 6th graders who are already facing a huge transition	3/5/2026 7:58 AM
1631	Kids need transition periods, elementary, middle, high. Lets not overcomplicate things.	3/5/2026 7:54 AM
1632	Keep as is	3/5/2026 7:53 AM
1633	I do not believe grade bands will change our situation.	3/5/2026 7:49 AM
1634	For families that have children in K-5, having them split into bands makes it very chaotic for drop-off and pick-up.	3/5/2026 7:48 AM
1635	I'm old school. Believe in keeping younger grades the same. Possibly having grades 4,5,6 and, 7-12 together	3/5/2026 7:48 AM
1636	If it means Evansdale can stay open, we could have grades 3-5 on the lower field and lower grades in the existing building. We have plenty of room to expand.	3/5/2026 7:45 AM
1637	We need to improve the quality rather than manage real estate. This doesn’t address the education provided but instead focuses on cost.	3/5/2026 7:42 AM
1638	The grave bad cluster specifically for Cedar Grove clusters would add middle aged students in 6 grade with mature and older students. Bullying and impressions are at an all time high at this age. Why should they have to transition from their home based school and then placed into a grade band that’s higher than there’s. I see more dropouts and absenteeism happening.	3/5/2026 7:40 AM
1639	Our cluster is so large and the schools are overcrowded, I think the traditional grade band should be in place as we don’t need to add any grades to current schools.	3/5/2026 7:34 AM
1640	I think grade band scenarios could be a viable option.	3/5/2026 7:33 AM
1641	Dekalb needs to invest in improving schools, teacher equity in pay, and providing adequate and equitable schools for all students.	3/5/2026 7:33 AM
1642	Na	3/5/2026 7:28 AM
1643	My kids attend Dekalb Arts Academy and Robert Shaw. Both amazing schools. To me the model for the Arts Academy should be school wide. K-8 is very productive and only makes children change schools once. I don’t feel that a completely different middle school is beneficial at all. The K-8 model also give teachers, students and parents more flexibility transportation and teaching wise.	3/5/2026 7:28 AM
1644	I do not believe every school should have the same grade band configuration. Grade bands should be determined based on the specific needs, enrollment numbers, and capacity of each school and cluster. Each community and school has different circumstances, so a one-size-fits-all approach may not be the most effective. The district should prioritize flexibility so grade configurations can adapt over time as enrollment and community needs change.	3/5/2026 7:15 AM
1645	I understand why this needs to happen and the cost saving with the decline in enrollment. My hope is it happens gradually starting with older high school kids. The elementary kids have	3/5/2026 7:11 AM

	formed their relationship and learning the basic fundamentals to life/learning/friendship. I believe it will disrupt their learning/trust and they will have to start over. Such as in kindergarten. Most of the elementary kids have been in the same school since 4 years old and that's all they know. They're already nervous about middle school. I just believe elementary schools should be off the table. Start with Middle/High School kids are more adaptable by this age.	
1646	Evansdale ES-Henderson Middle-Lakeside High Cluster grade bands should remain the same: Traditional PK-5 / 6-8 / 9-12	3/5/2026 7:07 AM
1647	Great	3/5/2026 7:03 AM
1648	I have kids in elementary and high school and I don’t think middle school kids should be in class with high schoolers and the same for elementary kids	3/5/2026 7:02 AM
1649	7-8 grade band is my preferred allocations. Moving 6th back to elementary can help with the population issues you seek and make more closures at the middle school level where they have even less time in those schools. Keep the younger students together as long as possible.	3/5/2026 6:52 AM
1650	I think combining old schools with new schools is a good idea if the population is down.	3/5/2026 6:45 AM
1651	If any changes to grade bands are considered, it should be combining elementary and middle school and leaving high school separate, so Pre-K through 8th. This was lessen the stigma of middle school.	3/5/2026 6:40 AM
1652	Having 6-12 will be chaotic for the kids you need more teachers, and having that many students from that grade level will not work. You will need a much bigger space.	3/5/2026 6:31 AM
1653	I prefer schools stay PK-5, 6-8, 9-12	3/5/2026 6:21 AM
1654	You should not place 6th grad students with higher level students.	3/5/2026 6:19 AM
1655	doing this cluster to the kids is a terrible idea and to take away middle with all the crazy things going on with the kids why expose them to more than they are ready for gangs gun violence sexual predators over worked teachers and staff for less to no pay extra at all attitudes more fights less learning lower graduation rate will occur that was the purpose in the middle school any way then to come back years later when times are terrible is a terrible idea invest the money to the schools teachers and staff and more encouragement instead of trying to cramp all of them in one school I can't believe Dekalb I have been a product of my whole life.	3/5/2026 6:19 AM
1656	None	3/5/2026 6:16 AM
1657	I do not like mixing age levels on one campus. I believe focusing on core academics is more important than offering a wide range of course offerings gs and after school programs. Has anyone tracked test scores and performance in larger schools vs. smaller schools?	3/5/2026 5:27 AM
1658	I am a product of the Dekalb school system. When I attended, there were no middle schools. Elementary was 1st through 7th, High School was 8th through 12th. It worked beautifully. I believe it should be a consideration in order to utilize facilities already in place, and is a smart choice to maintain school communities.	3/5/2026 5:20 AM
1659	Grade band scenario is ok.	3/5/2026 5:09 AM
1660	No comment	3/5/2026 4:39 AM
1661	No comment	3/5/2026 4:25 AM
1662	I absolutely disagree with closing neighborhood schools. Monies should be found to continue such. This is the strength of DeKalb. Also, certified teachers are essential.	3/5/2026 4:08 AM
1663	I would recommend keeping the same structure but if the structure has to change then keeping the babies together as long as possible by expanding elementary to 6 or 7 grade and high school 8-12	3/5/2026 2:22 AM
1664	I don’t feel like grade bands should change because kids should attend school with kids on their same level. It will make it hard on the teachers with curriculum planning, testing and instructional grouping.	3/5/2026 1:57 AM
1665	Ages should remain spaced out as children should be around other children their ages.	3/5/2026 1:47 AM

1666	Canby Lane Elementary, Mary Bethune Middle School, and Towers High School, should remain open to serve our communities! Children shouldn't have to ride for a longer period of time to get to school(s)!	3/5/2026 12:52 AM
1667	Grade banding raises serious concerns for families in the Evansdale and Henderson cluster. Grouping wider age ranges together creates unnecessary safety, social, and developmental challenges for younger students while also complicating extracurricular participation and school culture. Elementary and middle school years are critical stages of development, and smaller, neighborhood-based schools provide safer environments, stronger relationships with teachers, and more parental engagement. Moving toward larger grade-banded schools risks eroding those benefits while making students feel less connected and supported. Instead of restructuring grades to fit buildings, the district should prioritize age-appropriate learning environments, maintain community-centered schools, and ensure that any changes clearly improve—not compromise—student safety, learning, and well-being.	3/5/2026 12:36 AM
1668	I fully support keeping middle school aged kids with younger kids. This is a difficult age for kids as they experience hormone changes and their brains mature. It would be beneficial for them to remain at a school where the teachers and admin already know them. This provides an opportunity for students to be supported and nurtured.	3/5/2026 12:32 AM
1669	Traditional grade band for Dunwoody cluster.	3/5/2026 12:09 AM
1670	I'm in support of expanding the grade bands. I'm not a fan of middle schools. We attend Fernbank but zoned for Brownsmill.	3/4/2026 11:55 PM
1671	Elementary schools should be left alone, they already have prek, k-5 going on. The middle and high school can be clustered in some scenarios, but not all.	3/4/2026 11:49 PM
1672	If elementary in middle school will combine into one building it would be more cost-effective	3/4/2026 11:41 PM
1673	I want to see more clean demarcation of clusters etc. Stephenson is zoned such that I live four minutes from Stephenson but my home is zoned to Lithonia which is 10 minutes away.	3/4/2026 11:39 PM
1674	I think having 6th, 7th, and 8th graders with senior high school students has the potential to be problematic, given the vast difference in maturity.	3/4/2026 11:33 PM
1675	I have no idea what a grade band is, and shouldn't have to. Additionally, the fact that this survey is not translated to Spanish (at the very least) says everything I need to know about your intent to survey the community and take our concerns and feedback seriously.	3/4/2026 11:25 PM
1676	I would like to see K-6th or K-8th to promote student retention. Many families unenroll 3rd into 4th to secure seats in middle school with area private schools or they get pulled to kitteridge or Tapestry etc.	3/4/2026 11:18 PM
1677	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/4/2026 11:07 PM
1678	A teacher retaliated on my child and I was told that they would do something about it but the teacher still came back two more times and did something what else and she's still there same position same job still able to do these things to kids it's not telling how many times you have did this red flag fired	3/4/2026 11:04 PM
1679	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/4/2026 11:04 PM
1680	my preference is for solutions that maintain stability for students and preserve developmentally appropriate learning environments while addressing capacity needs across clusters.	3/4/2026 10:44 PM

1681	We are not affected by these proposals but I can vouch for benefits of PK-8 and also 6-12. Having only 2 transitions was great, and keeping middle schoolers in a context where they were known was also great.	3/4/2026 10:43 PM
1682	I like elementary going to 6th and then having a jr high 7-8 then traditional high school. This is not an option below.	3/4/2026 10:38 PM
1683	N/a	3/4/2026 10:37 PM
1684	Indifferent. If the grade band is implemented, middle school and HS should be separated within the building.	3/4/2026 10:37 PM
1685	I think looking at different grade band scenarios could help in some situations. It is smart to be looking at all options. For schools that are doing well....and have large waiting lists...find ways to expand. For example - making KMS a 4-8th program.	3/4/2026 10:21 PM
1686	no preference	3/4/2026 10:20 PM
1687	I'm not a fan of the cluster idea at all, simply put, High School kids should not be in the same school as kids that just got out of Elementary schools. There is a reason middle schools exist. I think if it were absolutely necessary, I would think 7th grade down and 8th grade up.	3/4/2026 10:20 PM
1688	Pre K 3 for 3 yo should be offered at all schools.	3/4/2026 10:18 PM
1689	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization. Grade band decisions should reflect local enrollment and utilization trends.	3/4/2026 10:14 PM
1690	Traditional or PK-3/4-5/6-8/9-12 would be best.	3/4/2026 10:10 PM
1691	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/4/2026 10:10 PM
1692	Middle school should not be apart of highschool, if anything middle school should be longer 6-9.	3/4/2026 10:08 PM
1693	I appreciate the opportunity to provide feedback regarding the potential grade band restructuring within the DeKalb County School District. As a stakeholder connected to the Robertshaw Elementary School cluster, I would like to share the following thoughts: 1. K–5 Model (Traditional Elementary Structure) Maintaining a K–5 grade band at Robertshaw Elementary provides stability and continuity for students during their foundational academic years. This model supports: • Strong long-term relationships between families, staff, and administration • Social-emotional consistency for younger learners • Easier transitions into middle school (6–8) For early learners especially, keeping kindergarten through 5th grade together allows schools to build a cohesive academic and behavioral culture. 2. K–2 and 3–5 Split Model If the district considers separating early elementary (K–2) from upper elementary (3–5), careful attention must be given to: • Transition planning between buildings • Transportation impact on families • Maintaining academic continuity While this model can allow schools to specialize in early literacy (K–2) and upper elementary rigor (3–5), it may increase adjustment challenges for students who must transition earlier. 3. K–8 Model A K–8 model within the Robertshaw cluster could offer: • Reduced school transitions • Stronger long-term peer relationships • Opportunities for mentorship between older and younger students However, this structure would require thoughtful facility upgrades to accommodate middle-grade programming, including science labs, extracurricular spaces, and athletic facilities. ——— Key Considerations for Any Grade Band Scenario Regardless of the model selected, I encourage the district to prioritize: • Minimizing the number of school transitions for students • Maintaining	3/4/2026 10:08 PM

	equitable access to resources across clusters • Ensuring transportation routes are practical for families • Preserving community identity within the Robertshaw cluster • Providing clear academic alignment across grade spans Stability, safety, and academic continuity should remain central in any grade band decision. Thank you for considering community feedback during this important planning process.	
1694	In my cluster, grade bands should stay the same.	3/4/2026 10:04 PM
1695	There is no world where I am ok with 6th graders being in the same school as 12th, in this day and time. Kids already know too much.	3/4/2026 9:59 PM
1696	Providing large age group ranges such as k-8 i creases safety and security concerns especially in the area of busing	3/4/2026 9:56 PM
1697	Na	3/4/2026 9:50 PM
1698	We are interested in keeping Oak Grove open for the foreseeable future	3/4/2026 9:50 PM
1699	I would be OK with K-6, but not so sure I like K-8. I don't have specific feedback in terms of which sxchools I would consider consolidating for the grade bands.	3/4/2026 9:49 PM
1700	Oak give 5th grade	3/4/2026 9:43 PM
1701	Add 5 grade to elementary schools. 11 year olds are too different than 5 year olds in the same school. Band 5&6 and 7&8.	3/4/2026 9:39 PM
1702	See response to question 4	3/4/2026 9:39 PM
1703	I think it should be stay the same	3/4/2026 9:37 PM
1704	There is no scenario where there should be 6th graders in the same building as high schoolers.	3/4/2026 9:37 PM
1705	I don't think traditional grade bands are necessarily right, but I also think it is good to separate high school students from younger kids. High school is a fresh start for kids and there's the inevitable teenage shenanigans that would be nice to separate younger kids from	3/4/2026 9:29 PM
1706	I prefer the traditional grade-band.	3/4/2026 9:26 PM
1707	I definitely don’t think 6-12 should be banded together. I also think pk-5 should be kept as is. If you break it into smaller grade clusters at different places, this creates issues for parents	3/4/2026 9:21 PM
1708	If the cedar grove cluster have two school, they need upgrades,more staff,etc	3/4/2026 9:20 PM
1709	As a teacher who teaches in the Chamblee Cluster, having the linear movement from elementary to the middle school to the high school helps to build retention in arts and athletic programs as well helping students keep the same social circles. I would prefer again minimizing transitions between campuses. Why can’t we provide a PK-3, 4-8, 9-12 grade bands? Having the Magnet school throws a monkey wrench in everything because it’s 4-6 grade and then it’s middle school and then high school. It’s too many transitions.	3/4/2026 9:18 PM
1710	Horrible idea	3/4/2026 9:17 PM
1711	My student school is not on the list	3/4/2026 9:16 PM
1712	12th graders do not need to be with 6th graders.	3/4/2026 9:16 PM
1713	N/A	3/4/2026 9:16 PM
1714	I do not think it’s a good idea to expand high school grade bands beyond 9-12. Children younger than 9th grade have distinct social and educational needs from high schoolers and I fear that expanding to include 6-8, for example, would be harmful to the younger students’ development and safety.	3/4/2026 9:14 PM
1715	Grade band consolidation can make sense but would need to be addressed by region IF you are going to have consolidations in the south end of the county. A K -6 grade band might be feasible but once you get to 7th grade and beyond, they do not need to be housed with younger children. I could support a K-3 grade band and then a 4-6 then a 7-12 grade band to optimize building use.	3/4/2026 9:12 PM
1716	N/A	3/4/2026 9:09 PM
1717	Middle school and high school should not be together at one location. Not good situation to	3/4/2026 9:08 PM

	combine	
1718	The reality of providing different grade band options across the county may backfire into unanticipated consequences if not handled carefully. Data may expose that one configuration is much more successful than another and without clinical data support to identify the “real” reason for this success or failure (which costs money), communities may feel the variables are more politically rather than academically motivated.	3/4/2026 9:04 PM
1719	I do not support any of the proposed grade band scenarios that would alter the current K–5 structure of our elementary schools. Specifically, I oppose scenarios that: Convert our K–5 elementary school into a K–2 or 3–5 configuration. Split elementary students across multiple campuses within the cluster. Reassign portions of our attendance zone to underperforming neighboring clusters. Our current K–5 model provides stability, strong vertical alignment, and community continuity. Breaking this into separate grade bands (for example, K–2 at one campus and 3–5 at another) would create unnecessary transitions during critical academic development years. Research consistently shows that additional school transitions can negatively impact academic performance, social development, and family engagement. Within the Ashford Park, our elementary school is high-performing and in high demand. I do not support any of the proposed grade band scenarios that would alter the current K–5 structure of our elementary school within the [INSERT SCHOOL NAME] cluster. Specifically, I oppose scenarios that: Convert our K–5 elementary school into a K–2 or 3–5 configuration. Split elementary students across multiple campuses within the cluster. Reassign portions of our attendance zone to underperforming neighboring clusters. Our current K–5 model provides stability, strong vertical alignment, and community continuity. Breaking this into separate grade bands (for example, K–2 at one campus and 3–5 at another) would create unnecessary transitions during critical academic development years. Research consistently shows that additional school transitions can negatively impact academic performance, social development, and family engagement. Within the [INSERT CLUSTER NAME] cluster, our elementary school is high-performing and in high demand. Overcrowding indicates community investment and desirability — not failure. Changing grade bands to redistribute students does not address the root issue, which is facility capacity and maintenance needs. Additionally: • The proposed grade band shifts appear to be a mechanism to manage utilization rates rather than improve academic outcomes. • Moving students from a high-performing K–5 environment into lower-performing schools within adjacent clusters risks lowering achievement rather than elevating it. • Families purchased homes and invested in this community based on the existing cluster pathway. Significant grade band restructuring undermines that stability and trust. If grade band adjustments are being considered within the [INSERT CLUSTER NAME] cluster, I would instead support: Maintaining the K–5 structure at our current elementary school. Investing in expansion or modernization to address overcrowding. Targeted academic and leadership interventions in underperforming schools rather than redistributing students. Any change to grade configuration should clearly demonstrate how it improves academic performance — not simply balances enrollment numbers. I strongly urge the district to preserve the K–5 model within high-performing clusters and focus on facility investment rather than structural reconfiguration. Overcrowding indicates community investment and desirability — not failure. Changing grade bands to redistribute students does not address the root issue, which is facility capacity and maintenance needs. Additionally: The proposed grade band shifts appear to be a mechanism to manage utilization rates rather than improve academic outcomes. Moving students from a high-performing K–5 environment into lower-performing schools within adjacent clusters risks lowering achievement rather than elevating it. Families purchased homes and invested in this community based on the existing cluster pathway. Significant grade band restructuring undermines that stability and trust. If grade band adjustments are being considered within the Ashford Park cluster, I would instead support: Maintaining the K–5 structure at our current elementary school. Investing in expansion or modernization to address overcrowding. Targeted academic and leadership interventions in underperforming schools rather than redistributing students. Any change to grade configuration should clearly demonstrate how it improves academic performance — not simply balances enrollment numbers. I strongly urge the district to preserve the K–5 model within high-performing clusters and focus on facility investment rather than structural reconfiguration.	3/4/2026 9:03 PM
1720	We should be very careful with grade band adjustments- developmentally appropriate environments are critical and 6th graders are not ready to deal with the same issues as late high schoolers, making administrators jobs harder.	3/4/2026 8:57 PM
1721	Having smaller grade band scenarios does not make sense in our cluster.	3/4/2026 8:53 PM
1722	Band teachers very dedicated and appear to enjoy teaching	3/4/2026 8:48 PM

1723	Please leave everything as it is and do not change anything	3/4/2026 8:47 PM
1724	I don't believe that the traditional middle school student should be in the same school as elementary kindergarten through fifth. I've seen this with my child who went to a private school where they had those grades. And I don't think it was beneficial for either group elementary through fifth grade should be separate from six through eight.	3/4/2026 8:47 PM
1725	I don't believe that the 6-12 grade band should happend do to the various ages of students. 11- and 12-year-olds shouldn't be in the same school as 18-year-olds. The age gap is too drastic.	3/4/2026 8:44 PM
1726	I worry that older kids will pick on the younger kids.	3/4/2026 8:43 PM
1727	Mi. ijo vale Kinder	3/4/2026 8:42 PM
1728	I think the traditional grade bands would be better for our students	3/4/2026 8:41 PM
1729	I'm in the Chamblee cluster. I do not care so much if they have to combine middle and high schools together although I prefer they do not. Elementary schools need to remain P-K-5 grade as I would not want to see small kids with high school age kids together. And I'm pretty sure high school kids do t want small kids around either.	3/4/2026 8:41 PM
1730	DHS could use the space that Vanderlyn has. HAve you also considered purchasing the Georgia State campus nearby and movign the HS there?	3/4/2026 8:35 PM
1731	All clusters should have the same grade bands to keep it consistent.	3/4/2026 8:34 PM
1732	Having a 6th grader with a 12th grader is a terrible idea. Ditto with an 8th grader and a 6yo. As a parent, that would not make me comfortable.	3/4/2026 8:34 PM
1733	I believe the best grade band is PK-8/9-12. This grade band has been proven effective in charter schools and private schools.	3/4/2026 8:29 PM
1734	Oak Grove is projected at 96% utilization next year.Sagamore Hills is already at 91%. Brielle is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. Traditional Pre K -5 grade band remain appropriate in high utilization, growth corridor.Structural grade reconfiguration should focus first on clusters with long term,significant underutilization.	3/4/2026 8:29 PM
1735	Love pk-3, 4-5, 7-8 and 9-12. You can house these schools on the same lot, like middle and high school. Keeps schools small. Also I'm aware that big schools can have small class sizes, but I prefer small schools so it's more of a community. This format does not address high school size. Maybe build more high schools and keep under 1200 students per school. Look at Dekalb graduation rates for proof.	3/4/2026 8:28 PM
1736	Any clustering needs to take into consideration the grouping of developmentally different age groups. 6th graders should not be with 12th graders. The best plana are the ones that maintain traditional high school grades 9-12 and middle school grades 6-8, with banding of elementary school age kids (similar to city of Decatur). Plus that can improve resources for like aged younger children.	3/4/2026 8:26 PM
1737	I want my kids at the same school together for as long as possible. It will be impossible to have drop offs and pick ups at multiple schools for most families. There is only so much time in the day an we don't ant to spend it driving from school to school when they can easily be in the same school. No one wants to sit in traffic (even if it is on a bus).	3/4/2026 8:26 PM
1738	No issue with band consolidation.	3/4/2026 8:22 PM
1739	My biggest concern is making sure my 7-year-old continues to be in an environment that feels age-appropriate and supportive for her development. I worry that clustering more grade levels together could unintentionally expose younger children to situations or influences they may not be ready for just yet. I truly value diversity and understand the importance of thoughtful resource planning. At the same time, I hope that if clusters are approved, there will also be strong structures, guidance, and supports in place to ensure it benefits students in meaningful ways, not just financially, but academically and socially as well.	3/4/2026 8:14 PM
1740	French immersion classes is an important learning and cultural advantage to students. Continuity between Evansdale,Henderson middle and Lakeside schools offers success in that program.	3/4/2026 8:13 PM
1741	Again, a mistake.	3/4/2026 8:12 PM

1742	Data-driven	3/4/2026 8:11 PM
1743	N/A	3/4/2026 8:09 PM
1744	I’m not sure	3/4/2026 8:08 PM
1745	Every school in Dekalb county should have a music class. Every school in Dekalb county middle school or high school should have the opportunity have a band. It doesn’t need to be done by grade. Music is central to all schools and shouldn’t be available to some and not woods	3/4/2026 8:04 PM
1746	This is my last senior and she goes to CHS via the magnet program. But our school was Midvale, Tucker Middle to Tucker High School. I would hate to see Midvale Elementary sit empty. I am all for a different model as I no longer have a child in the district after May.	3/4/2026 8:02 PM
1747	Na	3/4/2026 8:01 PM
1748	ALL-How will this work out? How many classes would be housed in school?	3/4/2026 8:00 PM
1749	No clue	3/4/2026 7:59 PM
1750	N/a	3/4/2026 7:58 PM
1751	I am referencing only the Dunwoody cluster	3/4/2026 7:57 PM
1752	Grade bands are less of an issue to me and agree with educators	3/4/2026 7:55 PM
1753	For the Lakeside cluster(Oak Grove, Sagamor Hills, Briarlake) stability should be prioritized. Oak Grove is projected 96% utilization next year.Sagamore is already at 91% . Briarlake is at 73% , but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. Oak Groce is not experiencing structural decline. Traditional Pre K -5 grade bands remain appropriate in a high-utilization, growth corridor.. Structural grade reconfiguration should focus first on clusters with long term,significant underutilization.	3/4/2026 7:55 PM
1754	I do not like having a school of 6 through 12, I think this could influence younger children with inappropriate activities and grades would be difficult to separate. Bus riding would also be a large concern with those ages.	3/4/2026 7:49 PM
1755	It seems more beneficial to keep elementary as PK-5 and having 6-12 schools. The greatest change in the development of child happens during 6-12 grades.	3/4/2026 7:48 PM
1756	I don’t know enough about the implications of K-8 vs the current structure to comment.	3/4/2026 7:44 PM
1757	The grad bands are conducive to what the needs are now and future projections.	3/4/2026 7:41 PM
1758	N/a	3/4/2026 7:39 PM
1759	I feel that all clusters should maintain the traditional school bands that in place for the Area I schools now. I do believe how ever that some schools could be combined, but politics still keeps the school racially/economically divided in DCSD...	3/4/2026 7:39 PM
1760	Our community of Ashford Park to	3/4/2026 7:39 PM
1761	I am fine with a 6-12 school size, concerned about all of the closures in South Dekalb	3/4/2026 7:37 PM
1762	Please don't close Ashford Park. I have a rising 1st and rising 5th grader.	3/4/2026 7:34 PM
1763	dividing schools into smaller bands is the current model in city of decatur schools. it sends kids to too many different schools and causes parents to have too many schools within their family.	3/4/2026 7:33 PM
1764	Towers HS is one of the schools slated to be transitioned. As a DCSD alum, when I was in school, DCSD emphasized the importance of middle schools thus ending the transition from elementary school straight to high school. I feel like middle schools are still needed as a transitional period to HS.	3/4/2026 7:31 PM
1765	Brockett should remain pre k through 5. Parents trust the school and look forward to grade level events.	3/4/2026 7:29 PM
1766	Don’t like the pk-8 model unless campuses were big enough for multiple areas. Don’t think it is appropriate to have kindergartens with 8th graders. Adds to risk to younger student.”s including	3/4/2026 7:25 PM

	weapons and drugs in schools. Also little kids should not be bussed with middle schoolers.	
1767	I'm not sure how the Dunwoody high school cluster can effectively implement grade band scenarios. I don't see any details specific to that cluster where it makes sense.	3/4/2026 7:25 PM
1768	I don't think having schools with one or two grade level offers enough opportunities to students who either want to take AP or accelerated classes. Also , this may not provide for students that need a less rigorous curriculum.	3/4/2026 7:24 PM
1769	Elementary	3/4/2026 7:23 PM
1770	broader divisions. PK-5/6-8/9-12	3/4/2026 7:21 PM
1771	I do not agree with DCSD schools included grade bands. Local schools such as Flat Rock Elementary should not be altered.	3/4/2026 7:19 PM
1772	Kittredge 4to 6th then chamblee middle and chamblee high magnet program	3/4/2026 7:18 PM
1773	I agree with combining middle and high school in one building Pk-5 and 6-12	3/4/2026 7:15 PM
1774	I'm pleased to see that we're considering going back to K-8 and 9-12 grade bands with NO middle schools. That was a mistake from the beginning.	3/4/2026 7:14 PM
1775	Please keep Oak Grove ES an elementary school!	3/4/2026 7:13 PM
1776	Continue with current grade band in OGES.	3/4/2026 7:12 PM
1777	I would prefer a pk-5 experience for continuity and especially consistency and comfort for those with 504, IEP, or paraprofessionals. Laurel ridge cluster.	3/4/2026 7:11 PM
1778	I would not want my 6-7-8 graders mixing with the high school senior (12).	3/4/2026 7:08 PM
1779	Keep them the same as they are presently. Pk-5, 6-8, 9-12	3/4/2026 7:06 PM
1780	Where do exceptional education students fall?	3/4/2026 7:06 PM
1781	I do not have a negative response.	3/4/2026 7:04 PM
1782	6-12 together is absolutely not a great idea. We have enough with children and social media mixing together grades like that is NOT what's in the best interest for the children.	3/4/2026 7:03 PM
1783	Oak Grove Elementary	3/4/2026 7:02 PM
1784	I believe that the elementary schools are the correct size, and the middle schools should be smaller. Henderson was awful. Too big for the teachers to know the children. The large setting just warehouses them, and the goal did not seem to be education. I took my son out (gifted program) and sent him to private middle and high school to reach his full potential. Coming out of Henderson with As he did not do well on SSAT. With private school, he got a 34 on the ACT and got into Tech. He graduated from Ga Tech in engineering and now has a Masters degree from Tech. I just couldn't leave him at Henderson.	3/4/2026 6:59 PM
1785	I think K-8 would make sense for the Dunwoody cluster. KMS would also make sense to be a 4-8.	3/4/2026 6:58 PM
1786	It is important for elementary schools to remain in at least the k to 6 grade,	3/4/2026 6:58 PM
1787	N/a	3/4/2026 6:58 PM
1788	McNair Middle should be K-8.	3/4/2026 6:51 PM
1789	As mentioned in the previous comments, changing grade bands seems to be a method to compensate problems caused by the cascading process.	3/4/2026 6:47 PM
1790	Oak Grove Elementary and its associated middle school and high school (I.e., cluster) should remain in the traditional format. That setup best prepares students in this area.	3/4/2026 6:45 PM
1791	The McNair Cluster NEEDS its own elementary schools on this side of town. Taking these small children away from their neighborhood isn't fair	3/4/2026 6:43 PM
1792	The current grade bands are fine. The other options seem to add much value compared to the disruption.	3/4/2026 6:43 PM
1793	Stability needs to be prioritized until trust in DeKalb schools is restored. Community schools	3/4/2026 6:43 PM

	are of high value to parents, teachers, and other stakeholders and provide a reason to stay in DeKalb schools.	
1794	I think the existing K-5/6-8/9-12 split is ideal.	3/4/2026 6:41 PM
1795	Public messaging around SAP has emphasized whole-school transitions, yet discussions indicate Vanderlyn students would likely be split between neighboring schools, if closed. This is not comparable to combining two half-capacity schools and would create significant feeder disruption and transportation impact.	3/4/2026 6:40 PM
1796	I am more open to this for areas to have different options but prefer Traditional	3/4/2026 6:40 PM
1797	We still hope to stay in the Chamblee High School cluster.	3/4/2026 6:37 PM
1798	Undecided	3/4/2026 6:36 PM
1799	I agree with the lower grades but I don't think 6th grade students should be with older students.	3/4/2026 6:36 PM
1800	I have never believed in middle schools. When I was in 6 to 8 grade I was part of a high school. Middle School feels like a students are on an island. Just going through puberty, and have no older roles models around. When I was in 6-8 grade we looked up to the 9-12 graders and they helped the teachers in several ways. We learned how to be leaders from them. I recommend the PK-5/6-12 grade band.	3/4/2026 6:34 PM
1801	I would favor a PK-6 or a PK-7 plan, with upper grades in HS. PK-8 grade is 10 years worth of physical and emotional growth, it's too much and I would be worried about the younger children's socialization with children so vastly older.	3/4/2026 6:31 PM
1802	I prefer to keep k-5 together, 6-8 together and 9-12 together	3/4/2026 6:27 PM
1803	I think 6-12 probably makes more sense than K-8 and I'm unsure about the extra transitions for k-3 and 4-5 but I'm sure studies of outcomes in other school districts would show better data than my gut instincts	3/4/2026 6:23 PM
1804	N/a	3/4/2026 6:22 PM
1805	Oak Grove Elementary should not be closed or consolidated.	3/4/2026 6:20 PM
1806	Robert Shaw is a very prominent school and it is very important to keep it up and alive. This school has raised, taught and educated families, children and communities. In doing so, they have created leaders, doctors, nurses and more that I know personally and now my child is attending Robert Shaw Theme School. This school is immensely important and valuable to parents, teachers and students. This would break the hearts of the community and students as well as parents who have attended Robert Shaw and now having their own children attending this school.	3/4/2026 6:17 PM
1807	I understand the grade band scenarios but would be more in favor of the models for pk-8 vs 6-12. Our experience at Kittredge with 4-6 has felt, in a good way, like an extra year of elementary school.	3/4/2026 6:15 PM
1808	I think remerging middle and high schools would be a good thing. Middle school is one of the worst inventions on human history	3/4/2026 6:13 PM
1809	I do not believe that middle and high school students should be grouped together in any scenario. Those are 2 vastly different developmental times in children's lives and should remain separate. Grade banding k-8 also often leaves middle schoolers at a deficit, as more attention is placed on elementary.	3/4/2026 6:13 PM
1810	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/4/2026 6:12 PM
1811	I am concerned about potential grade band changes because they may disrupt students' learning continuity and community connections. I believe any grade band scenario should carefully consider the impact on the specific schools and clusters involved, especially schools	3/4/2026 6:12 PM

	that serve large populations of African American students. I would prefer that the district avoid changes that could create instability and instead focus on maintaining consistent, equitable access to quality education across all grade levels.	
1812	The Pre-k to 3rd Grade and 4-5	3/4/2026 6:11 PM
1813	Peachtree Middle School it's overcrowded how the reorganization will help move the current trailers out????	3/4/2026 6:11 PM
1814	None all schools need to stay open smaller class sizes is what dekalb always needed, so the kids can really learn, this is actually good enrollment is low so those who are there can grow academically! Stop being cheap and greedy Dekalb County Schools!!	3/4/2026 6:10 PM
1815	I agree with the proposals	3/4/2026 6:09 PM
1816	Again, more information is needed to make an informed decision here. Sounds good in theory, but how would the actual grade bands look across the boundaries. We don't know the boundaries so how can we comment	3/4/2026 6:08 PM
1817	Please don't shut down Vanderlyn	3/4/2026 6:07 PM
1818	Why do we need grade bands? The whole purpose of our children getting an education is so they can make a difference in this life. Putting way to many children in a class room leaves more children to fall through the cracks.	3/4/2026 6:05 PM
1819	I can see how determining cluster grades could be optimal in some ways. However, I worry about younger children and students being exposed to things that they do not need to be exposed to. Sixth through 8 is too young for high school	3/4/2026 6:03 PM
1820	I am open to different grade band scenarios.	3/4/2026 6:03 PM
1821	I have two children, one in pre-K and the other in 7th grade at different schools, and I think I would like them to be in the same building.	3/4/2026 6:03 PM
1822	Justin find it weird that transition Lithonia HS will be a middles school with all the schools around it has a smaller enrollment.	3/4/2026 6:01 PM
1823	N/a	3/4/2026 5:56 PM
1824	I do not have a strong opinion here	3/4/2026 5:56 PM
1825	I am fine with all options that work for a specific cluster	3/4/2026 5:49 PM
1826	Should separate middle school from high school to prevent bullying	3/4/2026 5:49 PM
1827	The smaller school building built in the 60s which work well with neighborhood infrastructure were designed for k-7. 6th grade seems to young yo being high school.	3/4/2026 5:46 PM
1828	I do not think 6-8 should share space with 9-12. I have major concerns about safety.	3/4/2026 5:43 PM
1829	If the district were to change the grade bands for instance Prek-5/6-12 or Prek-8/9-12…I think a hybrid approach by creatin a 6–8 academy wing, Separate entrances/bell schedules, Dedicated middle school admin, Physical separation within the building.	3/4/2026 5:43 PM
1830	I have often thought that including K-5 in a single school didn't make sense as children in grades 4-5 are already reaching puberty. From a social perspective I agree with changing grade bands.	3/4/2026 5:41 PM
1831	Grade bands can be very beneficial to the students, with age appropriate curriculum and social engagements being the focus.	3/4/2026 5:40 PM
1832	Grade bands are very tricky. Kids develop at different rates and to put older kits with younger kids can be quite dangerous. They will be riding buses with each other with very little supervision and I fear that a lot of bullying and abuse will happen.	3/4/2026 5:39 PM
1833	6-12 grade students should not be in same school setting.	3/4/2026 5:39 PM
1834	For the lakeside cluster dekalb should prioritize stabilization.	3/4/2026 5:39 PM
1835	I am happy with the K-5, 6-8, and 9-12 grade bands.	3/4/2026 5:38 PM
1836	I guess if grade bands had to change, I'd be open to that so long as the approximate cluster	3/4/2026 5:38 PM

	stayed together. Moving Ashford Park out of the Chamblee cluster could shift even more students out of the DeKalb educational system. Many would opt to go private and home values could plummet. The schools in this area are the reason many move here, including ourselves.	
1837	No concerns	3/4/2026 5:37 PM
1838	I would be for upper and lower elementary. I would not be for K to 8 or 6-12 scenarios.	3/4/2026 5:30 PM
1839	In terms of actual grade bands and schools, I work in the Clarkston high school cluster in smaller classroom. Size is definitely help in that population where we have a lot of multilingual learners and allows for us to give the students more direct and explicit instruction.	3/4/2026 5:26 PM
1840	The 6-12 band could possibly work if classrooms are specifically identified as 6-8 areas of the school a(i.e., lower level classrooms) and the same for 9-12.	3/4/2026 5:26 PM
1841	in any cluster, high school should be 9-12. we shouldn't have 6th graders in the same school as 12th graders. we also shouldn't have 8th graders in the same school as 4th graders.	3/4/2026 5:26 PM
1842	I have heard the idea of potentially transferring the Ashford Park Elementary school cohort to the John Lewis school once another elementary school has been completed. I think this is a fine idea as long as they continue on the Chamblee track. Keeping the grade band as is.	3/4/2026 5:26 PM
1843	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/4/2026 5:25 PM
1844	Traditional model of PreK - 5 preferred. Evansdale should remain OPEN!	3/4/2026 5:25 PM
1845	The "traditional" grade bands were established for a reason. Adding new bands and making kids switch schools every couple years, or combining bands and having huge age gaps between the students, are not beneficial to the kids. Elementary schools work with larger age ranges because the students stay in their classrooms most of the day. Middle and High Schools are divided into smaller age groups because they switch classes all through the day and this keeps the age gap between the oldest and youngest students smaller. Again, please think about the CHILDREN and their daily experience in these schools.	3/4/2026 5:23 PM
1846	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73% but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK-5 grade bands remain appropriate in the high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant under-utilization.	3/4/2026 5:23 PM
1847	I do feel that elementary (k-5) should be its own cluster. While I am open to 6-12 etc it needs to be thoroughly thought out and the facilities need to be accommodating to keep some separation for the lower grades from the upper grades.	3/4/2026 5:21 PM
1848	Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/4/2026 5:20 PM
1849	I feel that there is a strong connection to the Chamblee High cluster and would really like to see this continue!	3/4/2026 5:20 PM
1850	I like ES, MS, and HS grade bands.	3/4/2026 5:19 PM
1851	Since neither Peacthree nor Dunwoody has any room to move any students around, there are no other options. But Dekalb MUST remove the portables and get the capacity under control. It	3/4/2026 5:18 PM

	is inexcusable that both Peachtree and Dunwoody have been left to languish in a dysfunctionally crowded state while schools sit half empty in other parts of the district.	
1852	In 2019 we already provided a senario where prek-3 would be at john Lewis then 4-6 at ashford park. Moving 6th into AP would then free up space that is badly needed for Chamblee	3/4/2026 5:18 PM
1853	I need more info about how this would work in our cluster to have an informed opinion	3/4/2026 5:15 PM
1854	Briarlake / Oak Grove / Sagamore / Henderson Mill / Hawthorne could feed into several smaller PreK- 2nd and 3rd-5th schools!?	3/4/2026 5:15 PM
1855	I would like to know what will happen to the staff if this happens at these schools	3/4/2026 5:12 PM
1856	We are ok with grade bands.	3/4/2026 5:11 PM
1857	I do not think that there should be major changes to the grade bands. I do see some instances where a 1-2 grade academy might make sense. For example, in the case of Peachtree Middle School having a separate 6th grade building/school. I think clusters should have the same grade bands because otherwise parents will find ways to blame the differences on inequity.	3/4/2026 5:11 PM
1858	Again, this seems to make the most sense to me, but I'm not sure what the full benefits are of having different bands.	3/4/2026 5:05 PM
1859	Having 6th graders with older high school kids is not a good idea developmentally.	3/4/2026 5:01 PM
1860	Any scenario of having 6th grader and 12th graders together is not developmentally appropriate. If 6-8 would share a campus with 9-12, then it would need to be completely separate building spaces.	3/4/2026 5:01 PM
1861	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/4/2026 5:00 PM
1862	Grade scenario band classes is helpful for instruction.	3/4/2026 5:00 PM
1863	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/4/2026 4:58 PM
1864	My kids is in 2nd and kindergarten this close will affect them	3/4/2026 4:56 PM
1865	I support considering potential grade band adjustments in the Kelley Lake/ DLA/ Flat Shoals area. Specifically, I can see making one of the smaller schools a PK3-2 building, and putting the other students in one of the other smaller buildings. (Leaving the Middle School as a Middle School)	3/4/2026 4:54 PM
1866	I am referring to Dunwoody schools.	3/4/2026 4:53 PM
1867	I think I prefer traditional. I definitely would not want to see the pre-K- 8! Traditional middle schoolers should not be in school with preschool and primary grade levels.	3/4/2026 4:50 PM
1868	For 30338 cluster you could build a ninth grade academy -use vanderlyn land.	3/4/2026 4:49 PM
1869	Chamblee high school	3/4/2026 4:48 PM
1870	I don't have a strong opinion on the bands. I think the less transition the better, which is why I lean toward PK-8.	3/4/2026 4:46 PM
1871	No feedback.	3/4/2026 4:43 PM
1872	Also Henderson Middle is actually quite far from the Oak Grove Cluster Elementary Schools. I	3/4/2026 4:42 PM

	would like to see consolidation options which might address this issue. If we have more facilities, could we do a consolidation which would not required children from the Sagamore ES to commute over 20 minutes to MS?	
1873	See above: Montgomery Elementary on Ashford-Dunwoody -- PK-3rd grade Dunwoody Elementary on E. Nancy Creek -- 4th-5th grade (and special needs?) Or, something similar with room for growth. APS has done similar splits with success. It also creates a natural transition for students going into 4th grade whether at Kittredge or E. Nancy Creek (everyone is making a change to something new). I would also be in favor of renaming either Chamblee MS OR Chamblee HS to alleviate confusion.	3/4/2026 4:41 PM
1874	Prefer the traditional grad band	3/4/2026 4:39 PM
1875	No specific feedback but if there are ways to do it without closing entire facilities I would be open to listening.	3/4/2026 4:38 PM
1876	Schools need to remain grade banded to assure high school older kids are not a negative influence on younger kids. I moved around to different states and was in school in different age groupings. 6th grades do not need to be with 12th graders. But, 8th through 12th is an option.	3/4/2026 4:38 PM
1877	I like traditional	3/4/2026 4:36 PM
1878	The Lakeside cluster is stable and should remain. OGE is projected at over 90% utilization for next year as is Sagamore. Briarlake is less utalized but is not able to absorb the number of children that it would need to to make such a chage realistic.	3/4/2026 4:35 PM
1879	Our middle school and high school are over crowded. Not sure what to do	3/4/2026 4:34 PM
1880	i'm confused on why you Dunwoody is even in a grade band discussion when we do not have open seats across our district. Have we thought about why enrollment is down in general? we are losing kids to private schools due to lack of resources provided within the county. While i do know there are empty seats in South Dekalb, that is where the focus should be now.	3/4/2026 4:34 PM
1881	The entire district should have the same grade levels in high school, middle school, and elementary school. The grades in each level should be the same from cluster to cluster.	3/4/2026 4:31 PM
1882	Horrible! Small children shouldn't be around older kids. The different influences as well as the level the kids are on.	3/4/2026 4:30 PM
1883	K-8 schools are a great idea. This is similar to what we had in DeKalb when it was one of the country's best school districts.	3/4/2026 4:27 PM
1884	K-7 for elementary schools. 8-12 High Schools.	3/4/2026 4:27 PM
1885	Please keep the grade as they are and find better programing on the southside to keep students engaged in the community.	3/4/2026 4:25 PM
1886	Keep the same. Having grades middle school kids should not be mixed with high schoolers particularly upper high schoolers.	3/4/2026 4:22 PM
1887	Maintaining separation of elementary schools seems best for students. Integration of middle and high school and be done with careful attention but may not be best.	3/4/2026 4:21 PM
1888	Can Wadsworth Magnet stay the same as well as Robert Shaw Elementary?	3/4/2026 4:16 PM
1889	See below. Middle schoolers will have a hard time on the same campus as high school students. I would be concerned about the potential for bullying of the younger students.	3/4/2026 4:14 PM
1890	I feel elementary should remain k-5. 6-8 would not work in the same building due to age and very different social needs/behaviors.	3/4/2026 4:14 PM
1891	I think the idea of grade band scenarios could work. Assuming Oak Grove is paired with Sagamore Hills I would want to be assured that these schools would feed into Lakeside - again to keep the community intact.	3/4/2026 4:12 PM
1892	For elementary schools, I think it is fine to do this. A K-1 and a 2-5 in any cluster would make sense. But, as for your example of grades 6-12 in one school....just NO! Who thinks it's a good idea to have 11 year olds and 19 year olds in the same school? Absolutely not developmentally appropriate and I think you're asking for trouble.	3/4/2026 4:09 PM
1893	I am not opposed to grade bands. I am more worried about class sizes and amenities.	3/4/2026 4:09 PM

1894	I believe special programs could benefit from different grade bands (DLI, magnet, IB etc) that could potentially maximize a building usage and better serve school communities	3/4/2026 4:09 PM
1895	I do not think the grade bands should be altered at this time.	3/4/2026 4:08 PM
1896	Ok	3/4/2026 4:05 PM
1897	Grade band scenarios work well in the pk-6th grade class range	3/4/2026 4:05 PM
1898	Cedar Grove Middle and High Schools. Grades 6-12.	3/4/2026 4:05 PM
1899	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%, Briarlake is at 73%, but would need to adsorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK-5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant under-utilization.	3/4/2026 4:03 PM
1900	Not opposed to grade band scenarios. I see 6-12 banding as an opportunity to address many of the concerns with middle schools in the district.	3/4/2026 4:02 PM
1901	Ashford Park Elementary is an old building on a small lot. I understand the decision to close it as elementary school. I do hope those in the district can remain in the Chamblee MS & HS cluster to maintain community and not divide neighbors against neighbors by splitting the cluster up.	3/4/2026 3:57 PM
1902	-concerns about a wide range of developmental stages in buildings and on buses in the banded grade model Concerns about daily schedule in banded grade model - young kids and much older kids arriving and entering the building, using restrooms, having lunch, recess, specials, etc throughout the day. Staff burnout among specials teachers. -concerns for safety and exposure to mature content between younger kids and much older kids sharing the same facilities. -having smaller bands is more appealing - ex: pk-3, 4-5, 6-8, 9-12	3/4/2026 3:57 PM
1903	Oak Grove Elementary school should NOT be part of a grade band. It must remain as it is and has been.	3/4/2026 3:53 PM
1904	Scenarios For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization	3/4/2026 3:52 PM
1905	Closing of Middle schools and relocation of students and staff on the south side of the district	3/4/2026 3:44 PM
1906	While I understand the need for consolidation, the closing Oak Grove Elementary would not be positive for this community.	3/4/2026 3:38 PM
1907	Grade clusters should stay as they are. Families want their children in school together. Rather than changing schools ever few years. Also have children going through puberty with five or six year olds does not appear child focused.	3/4/2026 3:38 PM
1908	N/A	3/4/2026 3:33 PM
1909	The traditional grade band is not working well and a Junior High (6-9) would serve students better. I don’t believe 1st, 2nd, and 3rd graders should be mixed with PK and 6th, 7th, and 8th graders shouldn’t be combined with high school age students.	3/4/2026 3:33 PM
1910	Building infrastructure is probably best focused on maintaining same or similar grade bands, i.e. a middle school (5-8 or 6-8) does not necessarily need chemistry classrooms.	3/4/2026 3:32 PM
1911	We should keep a traditional setting	3/4/2026 3:29 PM
1912	Yet again Dekalb trying to do things that don’t make sense. Having all the grades at our school allows students to attend school with their older and younger siblings. My younger kids also	3/4/2026 3:27 PM

	get excited when they finally come to 4th grade and have a teacher they've been wanting since they were little. It creates community.	
1913	Grade bands should not be changed. Families with multiple children would change schools on a regular basis - that's not easy for families with multiple students as they navigate transportation, conferences, spirit nights, night activities at schools, etc.	3/4/2026 3:26 PM
1914	HMES should stay open for or children.	3/4/2026 3:22 PM
1915	I do not want 6th in Elementary	3/4/2026 3:22 PM
1916	Traditional	3/4/2026 3:22 PM
1917	Traditional	3/4/2026 3:22 PM
1918	Traditional Band for elementary K -5	3/4/2026 3:22 PM
1919	N/A	3/4/2026 3:22 PM
1920	Traditional preferred	3/4/2026 3:22 PM
1921	If changes are considered in the Oak Grove cluster, I would prefer a model that allows Oak Grove Elementary to remain open. A traditional PK–5 elementary model paired with 6–8 middle schools and 9–12 high schools remains the most familiar and stable option for families. This structure aligns well with students' developmental stages and avoids unnecessary additional transitions for younger children. If enrollment challenges require adjustments, a PK–3 / 4–5 configuration could potentially allow schools like Oak Grove to remain open while improving operational efficiency. For example, Oak Grove could serve PK–3 students with nearby schools serving grades 4–5. This would maintain the building as an active school while focusing resources on early literacy and foundational learning, which the district has identified as a priority. Any grade band scenario should prioritize keeping neighborhood schools open when possible and minimizing transitions for students.	3/4/2026 3:22 PM
1922	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/4/2026 3:21 PM
1923	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/4/2026 3:21 PM
1924	Traditional	3/4/2026 3:21 PM
1925	None	3/4/2026 3:20 PM
1926	K-1st	3/4/2026 3:19 PM
1927	Grade bands can definitely be an immediate solution to the school population and reason for consolidation issue. For example, keeping elementary as PK-5 and secondary as 6-12 is one way to; control behaviors, create intentional/ targeted learning environments for the specific grade/age groups and clusters, and effectively grow the social/ emotional skills of our scholars to ensure their success.	3/4/2026 3:19 PM
1928	Oak grove elementary school is extremely important for kindergarten to middle school	3/4/2026 3:16 PM
1929	Pre-3, 4-6, 7-8 and 9-12	3/4/2026 3:15 PM
1930	Cluster whatever you need to cluster in South the cab, but please do not cluster North Dekalb schools.	3/4/2026 3:14 PM

1931	I honestly do not have strong preferences for the grade banding is as long as any child doesn't have to get on a bus at 6 am in the dark. You need to look at each region individually to see what works. Dekalb used to be K-7 and 8-12. Not sure why that changed as at the time Dekalb was winning awards in the state. Not sure why we are trying to add pre-k when we can't even manage k-12. I only do not agree that 6th graders should be with high schoolers. 8-12 would be okay, but younger than 8th should be closer mixed with middle or elementary. By around age 14 (8th) I think high school would be fine. Henderson used to be a high school and has a plot of land. If you take into consideration the actual smaller regions, or even clusters, I think you will see that you can get creative with banding and consolidations without being so disruptive.	3/4/2026 3:14 PM
1932	I honestly don't know	3/4/2026 3:11 PM
1933	I do not think it would be wise the extend the grade bands to 6-12, safety concerns for the younger students.	3/4/2026 3:08 PM
1934	Do not close Oak Grove Elementary!	3/4/2026 3:06 PM
1935	I do not agree with placing 6-8 graders with high schoolers. These age group and maturity level between this range of kids is too risky and possibly dangerous! Some of these kids will not have yet hit puberty while others are full grown. This can cause a serious problem and should have never been considered.	3/4/2026 3:06 PM
1936	The Grade band scenario will add more students together and take away teaching time	3/4/2026 3:05 PM
1937	I feel that 4th and 5th could be the prep to make middle schools more successful.	3/4/2026 3:03 PM
1938	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/4/2026 3:03 PM
1939	N/A	3/4/2026 3:02 PM
1940	Keeping the ES, MS, and HS separate makes the most sense. However, for magnet schools such as Kittredge, the current structure (4-6) makes the most sense and has worked really well.	3/4/2026 3:02 PM
1941	Not aware	3/4/2026 3:00 PM
1942	Uncertain	3/4/2026 3:00 PM
1943	Chaos and confusion and over crowded schools	3/4/2026 3:00 PM
1944	Middle school and high school should not be in the same building due to the maturity gap. K- 8 is fine.	3/4/2026 2:59 PM
1945	Grade banding should be designed around student need, not just geographic boundaries. An Open Campus option must remain available to students across multiple clusters because the students who most need this model often require a reset outside their assigned school environment. Rather than restricting services to one location or grade band per cluster, DCSD should maintain an Open Campus pathway that can serve students from various areas of the district, prioritizing graduation and stability over attendance in a specific neighborhood school. Grade band decisions should ensure Open Campus remains flexible and accessible for the full range of students who benefit from it.	3/4/2026 2:59 PM
1946	There are vastly different needs and expectations by parents involved with grades PK-5 then those involved with grades 6-8, or 9-12. A well-educated demographic will be likely to litigate issues if over-generalizing across vastly differing grade bands causes friction, or if a perception of needs or expectations being ignored appears evident due to overreach in grouping age groups.	3/4/2026 2:57 PM
1947	The grouping of the bands appear to be connected.	3/4/2026 2:57 PM
1948	I personally think a combined middle and high school, could be challenging considering the typical relationships and behaviors of adolescents. With that said, having sufficient staff and security should make that environment safe.	3/4/2026 2:56 PM

1949	Schools always need upgrades no matter where they are. The better the school the better participation on all levels.	3/4/2026 2:56 PM
1950	N/a	3/4/2026 2:54 PM
1951	I have no children attending school	3/4/2026 2:52 PM
1952	Looking at development is important so that younger children are not grouped with older children who are way beyond them in terms of social and emeotional development.	3/4/2026 2:52 PM
1953	The horizon area will benefit from the traditional grade band.	3/4/2026 2:51 PM
1954	Grade branding is not a good idea to merge grade levels.	3/4/2026 2:51 PM
1955	Not sure of how it would effect Snapfinger	3/4/2026 2:50 PM
1956	N/A	3/4/2026 2:49 PM
1957	These grade band scenarios make sense for school in south dekalb for schools that are under capacity as a way to consolidate resources. This solution does not seem relevant to north dekald and particularly ashford park elementary as the school is over capacity.	3/4/2026 2:49 PM
1958	none	3/4/2026 2:48 PM
1959	The best grade band would be pre-3, 4-6, 7-8 and 9-12. 6,7,8 are not a good combination.	3/4/2026 2:48 PM
1960	I am open to making different grade bands for different schools.	3/4/2026 2:47 PM
1961	Personally, I would not recommend combining middle school and high school due to maturity levels of the groups.	3/4/2026 2:46 PM
1962	Pre K and elementary school kids need to be grouped with the same aged children	3/4/2026 2:46 PM
1963	Need improvement	3/4/2026 2:44 PM
1964	middle/High school	3/4/2026 2:44 PM
1965	I don’t have too much to share regarding this besides the fact that 6th graders definitely do not need to be in same school as 12th graders.	3/4/2026 2:44 PM
1966	I would like to prioritize keeping Ashford Park / Drew Valley (current Ashford Park students) on the Chamblee Middle School and Chamblee High School trajectory.	3/4/2026 2:44 PM
1967	Not sure	3/4/2026 2:43 PM
1968	I think middle and high school students should be kept separate	3/4/2026 2:43 PM
1969	I do not think that the current concept of middle schools {6-8} is working. I think there needs to be some preparation prior to entering middle schools	3/4/2026 2:43 PM
1970	Agree	3/4/2026 2:42 PM
1971	Ashford Park could go to Montogmerh	3/4/2026 2:42 PM
1972	K-5	3/4/2026 2:42 PM
1973	I fear that grade bands will mix and there will be legal issues at hand. I do not like this for Snapfinger or any other closing schools	3/4/2026 2:42 PM
1974	When students are split between grade bands (k-2) and (3-5) it slows the learning progress down for students. Teachers are not able to flow from year to year to help them grow academically.	3/4/2026 2:42 PM
1975	Keep traditional clusters	3/4/2026 2:41 PM
1976	n/a	3/4/2026 2:39 PM
1977	Pre k to 8.	3/4/2026 2:38 PM
1978	Another concern would be the schools that has precincts in them would be problem for seniors that don't drive far if their school is close. It would effect the voting changes as well.	3/4/2026 2:37 PM
1979	Keeping a non-traditional school open is a flexible option and a needed element in the school	3/4/2026 2:37 PM

	district. Returning open campus to what it was prior to 2020 should be a key focus.	
1980	Not relevant to Chesnut	3/4/2026 2:36 PM
1981	Stability should be prioritized for the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake) Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/4/2026 2:36 PM
1982	See above	3/4/2026 2:33 PM
1983	Mental development from a social and an educational viewpoint happen very differently and the age ranges that have historically been grouped tend to not cause issues. Mixing high school with 6th grade is not right.	3/4/2026 2:30 PM
1984	Combining schools in a middle school or high school gives the need space but I would also look to adding more educational support for the buildings looking to close	3/4/2026 2:23 PM
1985	As a general rule, I prefer 9-12 high schools. The other grade band configurations could work depending on community. I previously worked in a PK- 8 school and it was a positive experience. If the district chooses to pursue non-traditional grade bands then I recommend thinking about how to support extra curricular offerings to ensure equity in access. At the school I worked at we had a relationship with another middle school to develop full team rosters and sharing school sponsors. The district also needs to think about how they will train, communicate, and support all schools as traditional methods may no longer fit.	3/4/2026 2:23 PM
1986	I'm not sure the benefits of grade banding??	3/4/2026 2:22 PM
1987	Nun	3/4/2026 2:21 PM
1988	I think they can stay as they are, or go K-6/7, 8-9, and 10-12. I think that helps the 6th and 7th graders away from some negative peer and social situations, and gives them a little maturity before pre-high school. By the time they're in 10th, they have more maturity and can focus on school.	3/4/2026 2:20 PM
1989	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/4/2026 2:19 PM
1990	We want to stay in our cluster	3/4/2026 2:17 PM
1991	I think having the schools full with students on an age grade band makes sense with appropriate transportation to those schools. That would mean that by re-districting current students and rearranging current maps, a school cluster would cover a bigger area. Kids could go to those schools and being transported by the buses that now transport way less of those students that go to a neighborhood schools or are transported by the parents to a theme school or magnet school. I think that is an important consideration knowing the state of the buses and how little the district pay the bus drivers that we cannot have enough of them to cover the current needs.	3/4/2026 2:15 PM
1992	I prefer younger kids to be separated from older kids for abuse and bullying reasons.	3/4/2026 2:14 PM
1993	Open to changes in grade banding. Do not think 6th graders should be with highschoolers. Prefer the improvements to local communities by having smaller schools with walkability.	3/4/2026 2:13 PM
1994	Leave the K-5, 6-8 and HS grade bands in place. I don't want my kindergartner going to a giant consolidated school with 8th graders for multiple reasons.	3/4/2026 2:08 PM
1995	Na	3/4/2026 2:04 PM
1996	In areas where there is overcrowding in elementary schools like APES, it may be beneficial to	3/4/2026 2:03 PM

	move to smaller grade bands. I know there are real trade-offs to that, though.	
1997	no opinion, whatever works best	3/4/2026 2:02 PM
1998	Brockett Elementary should stay as it is K-5 We know a lot of friends with kids there and they are very happy.	3/4/2026 2:01 PM
1999	Generally speaking, I prefer the existing grade bands. However, if we could avoid overcrowding and give more students the individual support they need by dividing some larger schools into small bands, I would support that effort.	3/4/2026 1:59 PM
2000	N/A	3/4/2026 1:58 PM
2001	What is the change for?? why are we doing it	3/4/2026 1:58 PM
2002	I don't have a strong preference on grade bands.	3/4/2026 1:57 PM
2003	Just a game...kids need to buy into their community and eliminate busing by allowing kids to walk to their local elementary if possible	3/4/2026 1:57 PM
2004	As a Kindergarten Special Education teacher within the Flat Rock Elementary School cluster, I have specific concerns about a potential K–2 and 3–5 grade band model. For our youngest learners — especially students with disabilities — consistency, routine, and strong home-school connections are critical. Transitioning to a separate building after 2nd grade could be challenging for students who require additional supports and thrive on stability.	3/4/2026 1:55 PM
2005	I am not opposed. I am more concerned with the changing of clusters and possible moving my higher performing children to subpar performing schools	3/4/2026 1:53 PM
2006	No feedback.	3/4/2026 1:52 PM
2007	As a former teacher I think small class size in paramount is teaching, connecting and relationship building.	3/4/2026 1:51 PM
2008	See above. I think in some cases, changing the grade bands might be a good middle ground.	3/4/2026 1:43 PM
2009	I strongly support maintaining traditional grade bands (separate elementary, middle, and high schools). This structure is working well in our area, and there is no clear need to combine significantly different age groups into the same building. Kindergarteners and eighth graders are at very different developmental stages, just as sixth graders and twelve graders are at different stages. Younger children benefit from environments specifically designed for early childhood learning, play, and supervision, while older students require settings tailored to adolescent academic and social needs. Keeping these groups separate ensures that facilities, programming, and supports remain age-appropriate and aligned to students' developmental stages. In addition, expanding grade bands into a single, larger school would significantly increase traffic in and around the campus. The Atlanta area already experiences congestion, and concentrating more students, buses, and carpool traffic at one site would negatively affect both the school community and surrounding neighborhoods. Maintaining traditional grade bands preserves developmentally appropriate learning environments and helps manage infrastructure impacts like traffic. I encourage the district to continue building on a structure that is already serving our community well.	3/4/2026 1:42 PM
2010	I am opposed to the idea of major differences in student age groups being in the same school.	3/4/2026 1:42 PM
2011	na	3/4/2026 1:41 PM
2012	Remove middle school and return to the way DCSD operated fo decades. K-7 & 8-12.	3/4/2026 1:39 PM
2013	One thing not mentioned in your presentation, is the psychological impact of the change in grade bands on children. Have you even looked the affect of this change on children in the City of Decatur school sytem or other schools using proposed grade bands? Fourth and sixth grade are the most difficult transition.	3/4/2026 1:37 PM
2014	I deeply value and support maintaining traditional grade bands (pre k -5, 6-8, 9-12). This structure is working well in our area, and there is no clear need to combine significantly different age groups into the same building. Kindergarteners and eighth graders are at very different developmental stages, just as sixth graders and twelve graders are at different stages. Younger children benefit from environments specifically designed for early childhood learning, play, and supervision, while older students require settings tailored to adolescent academic and social needs. Keeping these groups separate ensures that facilities,	3/4/2026 1:36 PM

	programming, and supports remain age-appropriate and aligned to students' developmental stages. In addition, expanding grade bands into a single, larger school would significantly increase traffic in and around the campus. The Atlanta area already experiences congestion, and concentrating more students, buses, and carpool traffic at one site would negatively affect both the school community and surrounding neighborhoods. Maintaining traditional grade bands preserves developmentally appropriate learning environments and helps manage infrastructure impacts like traffic. I encourage the district to continue building on a structure that is already serving our community well.	
2015	Brockett Elementary is an excellent school, who's faculty has shown admirable devotion to their charges. If they were to be consolidated, they would be overly taxed and unable to give their students the attention they need and deserve.	3/4/2026 1:29 PM
2016	No change is needed. The Lakeside cluster is stable and does not need attention.	3/4/2026 1:27 PM
2017	I firmly support keeping traditional grade configurations in place, with separate elementary, middle, and high schools. This model is serving our community effectively, and there is no compelling reason to merge vastly different age groups into one shared building. Students at opposite ends of the age spectrum—such as kindergarteners and eighth graders, or sixth graders and twelfth graders—are in very different phases of development. Younger children thrive in spaces intentionally designed for early learning, play, and close supervision, while older students need environments that reflect the academic rigor and social dynamics of adolescence. Maintaining separate grade bands ensures that facilities, instruction, and student supports remain appropriately tailored to each stage of growth. Additionally, consolidating broader grade bands into a single campus would substantially increase traffic in and around the school. The Atlanta area already faces significant congestion, and adding more buses, student drivers, and carpool vehicles to one location would place added strain on both the school and surrounding neighborhoods. Preserving traditional grade bands supports age-appropriate learning environments and helps minimize infrastructure challenges such as traffic. I encourage the district to continue with a structure that is already working well for our community.	3/4/2026 1:26 PM
2018	I think the K-8 model is strong and advantageous for lots of reasons. I also strongly believe that the district should can and should learn from the successful K-8 schools already in the district - GLOBE, The Museum School, DATE	3/4/2026 1:24 PM
2019	n/a	3/4/2026 1:22 PM
2020	I strongly support maintaining traditional grade (pk-5, 6-8, 9-12). This structure is working well in our area, and there is no clear need to combine significantly different age groups into the same building. Kindergarteners and eighth graders are at very different developmental stages, just as sixth graders and twelfth graders are at different stages. Younger children benefit from environments specifically designed for early childhood learning, play, and supervision, while older students require settings tailored to adolescent academic and social needs. Keeping these groups separate ensures that facilities, programming, and supports remain age-appropriate and aligned to students' developmental stages. In addition, expanding grade bands into a single, larger school would significantly increase traffic in and around the campus. The Atlanta area already experiences congestion, and concentrating more students, buses, and carpool traffic at one site would negatively affect both the school community and surrounding neighborhoods. Maintaining traditional grade bands preserves developmentally appropriate learning environments and helps manage infrastructure impacts like traffic. I encourage the district to continue building on a structure that is already serving our community well.	3/4/2026 1:20 PM
2021	I like keeping the traditional grade bands of PK-5, 6-8, 9-12.	3/4/2026 1:12 PM
2022	The neighborhood is thriving and there currently in no need to change grade bands.	3/4/2026 1:11 PM
2023	All of this is irrelevant if you don't direct your energies toward maintaining good elementary education and fixing the situation with the middle school. Grade bands are irrelevant when you have an average of 740 students in our cluster enrolled per grade in elementary schools and only an average of 403 students per grade enrolled in the single middle school they all feed in to. Please work to STOP THE BLEED TO PRIVATE from elementary to middle. Destroying a high performing elementary school like Vanderlyn only undermines that goal.	3/4/2026 1:02 PM
2024	Not good we need Oak Grove Elementary!!!	3/4/2026 1:00 PM
2025	I do not have any feedback	3/4/2026 1:00 PM

2026	I the schools are close to neighborhoods the smaller grade bands are ok. If it means kids are on busses longer and further from home I would need more information.	3/4/2026 12:59 PM
2027	My child (soon to be children) are part of the Ashford Park ES/Chamblee MS/Chamblee HS cluster. PK-8 + HS: would require fewer, bigger schools. Not sure how this works with existing infrastructure. PK-5 + 6-12: our 12 year olds do not need to be in a school with 18 year old adults. SPECIFICALLY pertaining to bullying and unwanted attention from older males>females. PK-3or4 + 5or6-8 + HS: ok with this scenario, as long as APES is not closed, for above-mentioned reasons. PK-5or6 + 7-8 + HS: ok with this scenario, as long as APES is not closed, for above-mentioned reasons.	3/4/2026 12:52 PM
2028	Stoneview. Should go to lithonia middle. Lithonia Middle should go to lithonia high.Let lithonia high go to millergrove high. However, I am concerned about the rivals between the high schoolers. Because that's embedded in the communities. So I think that if you go into put the high schoolers together with high schoolers, there needs to be counselors in the building working in the building every day to make sure that psychologically influence the children, that it's okay to be in the building together as high schoolers.	3/4/2026 12:47 PM
2029	NA	3/4/2026 12:44 PM
2030	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/4/2026 12:35 PM
2031	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/4/2026 12:35 PM
2032	As mentioned above, I believe utilizing both APES and John Lewis to support PK/K-5 is a realistic option as long as they both feed in to the Chamblee cluster. You could utilize one for PK/K-3 and the other for 4-5.	3/4/2026 12:33 PM
2033	I don't even know what this question is asking. Y'all are mismanaging this entire process by making it confusing and complicated.	3/4/2026 12:29 PM
2034	The Redan Elementary, Middle and High Schools are within my child's district.	3/4/2026 12:27 PM
2035	I prefer the current grade band setup (PK-5 / 6-8 / 9-12) or the more broken out version (PK-3 / 4-5 / 6-8 / 9-12) for Ashford Park / Chamblee Cluster. I worry that 6-12 puts kids is asking for trouble, as those who can be very highly influenced (6-8th graders) are mixed with kids who are highly influential (9-12th graders) and that is concerning to me.	3/4/2026 12:27 PM
2036	We should not change existing structures which have set consistent expectations over time.	3/4/2026 12:26 PM
2037	The shift to K–3 and 4-5 may increase the number of school transitions for students and create challenges for families with children in multiple schools. However, careful consideration should be given to capacity limits and whether specialized programs can still be effectively supported at each site.	3/4/2026 12:20 PM
2038	I do not have specific feedback on the band scenarios as I do not believe its an option in our area with the lack of building spaces in our immediate area. However I think there is some opportunity to be flexible here so long as our community stays together.	3/4/2026 12:19 PM
2039	If OGE is closed, then students would be pushed to Briarlake Elementary or Sagamore Hills, which are already at 91% and 73% capacity! The 3 schools in our cluster all want to remain open! Leave these poor children alone in the environments they're accustomed to.	3/4/2026 12:16 PM
2040	Prefer no change.	3/4/2026 12:15 PM

2041	I would like Ashford Park Elementary to stay in the Chamblee cluster.	3/4/2026 12:09 PM
2042	Grades K-5 are okay to mix and change. However, grades 6-8 really need to be kept together. There are too many changes going on with 6th graders mentally and physically to have them mixed with 5th or lower. Similarly, 9-12th grades need to be kept together and should not mix with grades any lower.	3/4/2026 12:02 PM
2043	I think pk-4, 5-7, 8-12	3/4/2026 12:02 PM
2044	In the past, Oak Grove had grades K-7. Lakeside had grades 8-12. This worked well. A former teacher remarked to me that having younger children in the high school, “gentled” the upper grades. Also, the younger children tried to act more maturely. A relative who taught school remarked to me that middle schools were in many ways a waste of. Consolidating grade levels in elementary and high schools should be considered.	3/4/2026 12:01 PM
2045	I grew up going to a school that split PK-3, 4-5, 6-8, 9-12. I like it.	3/4/2026 11:54 AM
2046	We could utilize John Lewis Elementary, since it is so close. Perhaps Ashford Park is for grades K-2 and John Lewis is 3-5. I wouldn’t love splitting up, but it’s a solution.	3/4/2026 11:54 AM
2047	There isn’t a point to it.	3/4/2026 11:45 AM
2048	I think we need to do evidenced based education	3/4/2026 11:41 AM
2049	No direct feedback on the grade band scenarios.	3/4/2026 11:38 AM
2050	N/A	3/4/2026 11:31 AM
2051	Dont Close Oak Grove	3/4/2026 11:28 AM
2052	Do not close Oak Grove Elementaru	3/4/2026 11:27 AM
2053	Flexible on grade bands. I do think overall k-8 is good, but not a dealbreaker in other configurations	3/4/2026 11:26 AM
2054	APES - Chamblee Cluster --- I personally like the idea of adding John Lewis to the Chamblee Cluster and having APES/JLE be upper/lower schools. Keep this neighborhood's kids together and it will be very fruitful for the county. The county would see families leaving, which means money leaving, if they don't find a way to keep these kids together through high school.	3/4/2026 11:26 AM
2055	I think that putting Middle School aged children in the same facility as High School students will be detrimental to the younger students.	3/4/2026 11:22 AM
2056	Na	3/4/2026 11:21 AM
2057	It should stay the way it is- k-5,6-8, 9-12 is the best for the changes occurring to the students at that time- I guess this is specific to OakGrove- Lakeside feeder- with Magnet schools feeding to zoned schools when kids transfer between	3/4/2026 11:18 AM
2058	I like traditional grade bands of pre-K through 5, 6-8, and 9-12. The ages make sense to me since kids are going through similar developmental periods of their lives.	3/4/2026 11:17 AM
2059	I think schools should be k-5, 6-8, 9-12	3/4/2026 11:16 AM
2060	No specific feelings	3/4/2026 11:15 AM
2061	Traditional PK-5 - Ashford Park or John Lewis 6-8 - Chamblee Middle School 9-12 - Chamblee High School	3/4/2026 11:15 AM
2062	Grade band clusters are an option but only if the Ashford Park area remains in the Chamblee High School cluster.	3/4/2026 11:10 AM
2063	I am not in favor of grade band changes especially 6-12 grade.	3/4/2026 11:09 AM
2064	Statues quo or PK-7 and 8-12	3/4/2026 11:08 AM
2065	I like the traditional PK-5 / 6-8 / 9-12 and even doing it this way PK-3 / 4-5 / 6-8 / 9-12, with the option of making all the class sizes smaller, keeping all your teachers.	3/4/2026 11:05 AM
2066	Cedar Grove Middle and Cedar Grove High should continues as one band.	3/4/2026 11:02 AM
2067	I'm not familiar with the potential grade band scenarios to answer this section.	3/4/2026 11:00 AM

2068	For the Dunwoody cluster, I support maintaining the traditional PK-5 / 6-8 / 9-12 grade band configuration. This model has served our community well and provides age-appropriate learning environments at each stage. Elementary schools like Vanderlyn benefit from keeping younger children (PK-5) together in a nurturing environment before the transition to middle school. Experimenting with alternative grade bands adds unnecessary disruption to families and students who are already facing uncertainty from consolidation proposals.	3/4/2026 11:00 AM
2069	As an educator, I think a PK - 8 or 6- 12 grade band could be helpful when it comes to instructional purposes, mentorship, etc. It would have to be very intentional on the age group separation and the safety of younger/vulnerable childern.	3/4/2026 10:56 AM
2070	I think these ideas are bad as well. I do not want a Prek student in the same school as an 8th grader. Part of growing up is going to new schools and learning to adapt	3/4/2026 10:48 AM
2071	I do not agree with 6-12 students being in the same facility. The only way that could work is if the 6-8 and 9-12 are totally isolated and cannot in anyway interact with one another.	3/4/2026 10:48 AM
2072	Leave the Druid Hills cluster alone, although you might consider swapping the HS and middle school campuses.	3/4/2026 10:43 AM
2073	A mistake. Putting 6-12 together is a recipe for disaster. You will have a lot of problems with underage sex and pregnancies. I saw this growing up in the 70’s and 80’s.	3/4/2026 10:37 AM
2074	I feel the the move will impact families.	3/4/2026 10:32 AM
2075	Absolutely no to 6-12. Other banding depends. Should be considered case by case not as district wide.	3/4/2026 10:31 AM
2076	I don't feel the grade band is appropriate. Younger children look up to older children and some kids may not set a good example for the younger children's behavior. I also feel it would not be a safe environment for the younger kids. Reports show that high schools have reported having the most school shootings.	3/4/2026 10:29 AM
2077	I believe without a traditional middle school with grades 6-8, the jump into high school can be extremely overwhelming for a student socially and academically.	3/4/2026 10:26 AM
2078	As a mother of three children who this year go to three different schools, I can say that this year has been a challenge as far as transportation and keeping up with logistics for each school. If you divide by grade bands, you are ensuring many families will have siblings split for more periods of time, which is challenging for families. I was far more involved as a parent when my children were in the same school vs. now at three different schools. Otherwise, I have no objection. I just think it's worth considering the impact on many families with multiple siblings.	3/4/2026 10:26 AM
2079	Preschoolers to elementary kids can walk to school and enjoy several playgrounds in and around the school. Need keep all the same with current grades.	3/4/2026 10:26 AM
2080	My kids loved going to a pre-k to 5th. I would be a shame to destroy that kind of community.	3/4/2026 10:24 AM
2081	I think that grade bands makes sense if you break up Elementary school to create a primary and secondary - more kids the same age would create better economies of scale.	3/4/2026 10:19 AM
2082	Please do not change our school.	3/4/2026 10:14 AM
2083	I dont want PreK in a building with 8th graders.	3/4/2026 10:11 AM
2084	Research consistently shows that smaller schools are associated with stronger academic outcomes, higher engagement, and improved student well-being. A report by the National Education Policy Center found that smaller schools often produce higher student achievement, particularly in elementary grades, due to stronger relationships between teachers, students, and families. Smaller elementary schools foster: • Stronger relationships between teachers and students • Greater parent involvement and community engagement • Improved safety and supervision • More individualized attention for young learners Elementary school is a foundational stage in a child’s development. Research suggests that larger school environments may dilute the close relationships and personalized learning that are especially important during these early years. Instead of closing high-performing schools like Vanderlyn, the district should consider investing in modernization, facility improvements, and long-term planning that preserves successful learning environments while addressing infrastructure needs.	3/4/2026 10:09 AM

2085	I think 6th grade should still be in elementary school. The kids are developmentally so much different than 7th and 8th graders.	3/4/2026 10:08 AM
2086	We do not want young kids with much older kids. The traditional bands are best.	3/4/2026 10:05 AM
2087	No comment.	3/4/2026 10:01 AM
2088	Grupos de grados	3/4/2026 10:00 AM
2089	I do not want to see young children attending school with kids over the age of 10. I think that’s dangerous and encourages kids to try to mature faster than they should.	3/4/2026 9:59 AM
2090	N/A	3/4/2026 9:53 AM
2091	Keep up the good work	3/4/2026 9:45 AM
2092	No closure or consolidation for Oak Grove elementary school. Keep just as it is.	3/4/2026 9:45 AM
2093	Oak grove is fine as k-5, Henderson middle is the issue as it’s lower performing.	3/4/2026 9:40 AM
2094	They should not change.	3/4/2026 9:37 AM
2095	I am incredibly uncomfortable with the idea of PreK-8 and 6-12 groupings. The idea of my 12 year old attending school with 18 year olds is very concerning. Alternately, having 13 year old teens attending school with 4 year olds seems like an awful idea.	3/4/2026 9:35 AM
2096	K-8 scenario is not appealing given the difference between elementary age and kids going through puberty. 6-12 is slightly better.	3/4/2026 9:33 AM
2097	Unknown	3/4/2026 9:32 AM
2098	Grade bands could be an option. However, banding 6th-12th is ridiculous. I would much rather see scenarios such as Pre-K-2nd; 3rd-6th; 7th-9th; 10th-12th. This would allow families to make better choices on schools depending on life phase of their child; it would also allow teachers to specialize and focus on specific grades without being moved around as much. It also groups the development of children and their executive skills with the appropriate responsibilities of the grade.	3/4/2026 9:27 AM
2099	The grade band scenarios, where high school is 6th-12th grade, makes perfect sense. Middle schools were built for a generation in time. That generation is no longer being served by the current education system. Changing the way education is provided to meet the needs of society is a win-win.	3/4/2026 9:19 AM
2100	Expanding grade bands would make the range of activities and resources that children need to be too wide and again, tax teachers who would need to gain additional training n and resources to work with the wider range of students. There is a large difference between the needs of a sixth grade student and twelfth grade student and having both in the same building means that either one may be receiving less resources and stretch thin the teachers.	3/4/2026 9:17 AM
2101	Keep as is	3/4/2026 9:15 AM
2102	HUNTLEY HILLS elementary school	3/4/2026 9:14 AM
2103	The traditional grade bands should stay K-5, 6-8, 9-12.	3/4/2026 9:13 AM
2104	Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization.	3/4/2026 9:13 AM
2105	I think standardized across the district is best, regardless. I think traditional bands are best, but that is just familiarity. I could be convinced of the PK-5 and 6-12 being similarly effective. I'm cautious about this, however, as the "middle school-aged" kids might not be best suited around high schoolers.	3/4/2026 9:12 AM
2106	Region 1 has always been 'different' compared to the other regions, from location to density to income level. While all regions are important, we just want to ensure that everyone keeps in mind that this is not an apples-to-apples comparison. We need to stay focused on what's best for the students of each region and not try to give a blanket 'solution' for the entire district.	3/4/2026 9:12 AM
2107	I believe that due to the size of Vanderlyn a PK-5 school would work best. I don't believe	3/4/2026 9:10 AM

	smaller grade bands such as a pk-2 or 3-5 only school are beneficial to students or staff.	
2108	Some areas already does this, and it works!	3/4/2026 9:10 AM
2109	Unsure what you are asking. I know that placing children in larger school environments decreases community. Children are lost in larger environments. Resources can be spread out if we are putting children first and not putting fiscal or convenience for the district first.	3/4/2026 9:09 AM
2110	Oak Grove Elementary should maintain its current K–5 grade band structure. The school is a successful and stable learning environment, and its model of keeping elementary students together supports strong academic and social development. Splitting grade bands into multiple schools would create unnecessary transitions for young children and disrupt a school community that is clearly working well. Oak Grove Elementary should be preserved as a K–5 school and viewed as a model of a strong neighborhood elementary school within the district.	3/4/2026 9:08 AM
2111	I think the existing grade bands are working.	3/4/2026 9:06 AM
2112	I am concerned that one of the proposals is to have 6-12. I don't agree that this would be beneficial for the kids unless 6-8 and 9-12 are in separate buildings. Middle school is already tough as it is, we don't need older kids that have gone through the transition "bully" younger kids.	3/4/2026 9:00 AM
2113	Students definitely need to be the same age at the school. Why create unneeded problems. Just renovate REDAN ELEMENTARY.	3/4/2026 8:58 AM
2114	6-12 grade schools are not a good idea. 11 year olds should not be in the same building as 18 year olds.	3/4/2026 8:57 AM
2115	I think leaving students in their traditional grade bands makes the most sense.	3/4/2026 8:54 AM
2116	Pre-K-2nd should have a building facility and 3-5th should have a building facility	3/4/2026 8:53 AM
2117	Grade bands that include 6th grade with elementary school is a good option and a win win for elementary and middle schools	3/4/2026 8:53 AM
2118	I believe maintaining clear K–5, 6–8, and 9–12 grade bands across clusters provides consistency, developmental alignment, and stability for students and staff. Any shifts should carefully consider capacity, staffing, student supports, and long-term enrollment trends.	3/4/2026 8:51 AM
2119	Grade band changes should prioritize stability, community continuity, and minimizing student transitions. In the Dunwoody cluster, elementary schools such as Vanderlyn operate as cohesive neighborhood schools where students live close to classmates and families are highly engaged. Altering grade bands or consolidating elementary programs risks fragmenting these established peer networks and increasing transportation demands without clear academic benefit. Maintaining K-5 neighborhood schools in areas with strong enrollment and community integration supports both student outcomes and family engagement.	3/4/2026 8:47 AM
2120	I definitely don't like the idea of a 6-12 Campus. I think the younger kids should not be in the same facility with older kids as this would encourage the children to start modeling their behavior after some of the older kids (and a lot of bad behaviors will be learned at a much earlier age). I also think it could promote bullying. I do think the PK-3, 4-5, 6-8, and 9-12 model could work.	3/4/2026 8:40 AM
2121	Bad idea. Stick to traditional schooling. Making mega schools is not how you fix this problem. Change zoning to shift kids to under filled schools not make bigger schools.	3/4/2026 8:38 AM
2122	I am ok with whatever needs to be done to keep the school open.	3/4/2026 8:37 AM
2123	I do not have any feedback about these.	3/4/2026 8:36 AM
2124	Good education is the key to everything that we do for our children but you have to remember dismantling places does not help families that cannot get their kids where they need to be and the potential risk is less kids in school	3/4/2026 8:30 AM
2125	I feel this could be very helpful, but I don't want limited resources to hinder the students education needs	3/4/2026 8:30 AM
2126	I believe this is another poor choice that will reflect badly on the development of children. It’s unhealthy for kids in seventh grade to intermingle with older, more mature kids. They are impressionable and easy targets for influenced behavior.	3/4/2026 8:30 AM

2127	Grade banding in District 1 for the Dunwoody Cluster works as is. K-5, 6-8 and 9-12. We do not want our young, impressionable 6th graders in a school older teenagers.	3/4/2026 8:27 AM
2128	Changes to grade band configurations should be approached very carefully, particularly for younger students. Frequent transitions between schools can disrupt academic continuity, peer relationships, and the sense of stability that elementary-aged children benefit from. The current elementary (K–5), middle (6–8), and high school (9–12) structure in the Dunwoody cluster has provided a clear and consistent progression for students and families. Altering grade bands may create additional transitions for students without clear evidence that it would improve educational outcomes. Any proposed changes should be supported by strong data demonstrating academic benefits, improved student services, or meaningful operational efficiencies that directly benefit students. If the district is exploring alternative grade band models, it would be helpful to see detailed analysis on how those models would impact class sizes, transportation times, facility utilization, and program offerings across the cluster. Maintaining stability for students and preserving strong neighborhood school communities should remain a priority when considering any grade band adjustments.	3/4/2026 8:24 AM
2129	Maybe there's some merit in rearranging the grade bands. I don't know. So long as class sizes aren't affected perhaps there's a way forward with that but I don't see it.	3/4/2026 8:24 AM
2130	Before middle schools, Oak Grove was PK-7. It worked just fine.	3/4/2026 8:21 AM
2131	I don’t disagree with consolidating grade bands, so long as there are separate buildings for each band. I don’t think Kindergartners should be mixed with High School kids	3/4/2026 8:20 AM
2132	There is not noted rationale on why high performing schools with good leadership and high satisfaction that result in high property values are being closed. On the other hand, you have documented in the news, troubled schools plagued with leadership issues, like smoke rise, staying open and unaffected while it kills property values and education statistics.	3/4/2026 8:19 AM
2133	I suggest that "high school" be 7th grade through 12th. Many 6th graders are too immature to be with high school students.	3/4/2026 8:18 AM
2134	The 4th and 5th grade should be treated as higher elementary and and given more concentration.	3/4/2026 8:17 AM
2135	Vanderlyn Elementary	3/4/2026 8:14 AM
2136	As a long-term resident of Dekalb County, I recall a time when there were very few middle schools. I came into the Dekalb County School System in 1988 as a 7th grade student. At that time Elementary Schools were K-7 and High Schools were 8-12. I believe that this grade cluster scenario should be reintroduced.	3/4/2026 8:09 AM
2137	I am writing to share some thoughts regarding the potential consolidation of school grade bands within our district, specifically the idea of housing elementary, students in a single building. Elementary education, particularly from pre-K through fifth grade, serves as a critical milestone in preparing children for real-life challenges. This foundational stage equips students with essential skills before they transition to middle and then high school. Combining Elementary School in one building raises significant concerns, especially regarding the climate and the overall enrollment experience. Such consolidation could impact the distinct needs of elementary students and may pose challenges that need to be carefully addressed to ensure a positive environment for all age groups.	3/4/2026 8:05 AM
2138	Children are already having a hard time learning I think it would make it even harder to focus	3/4/2026 8:03 AM
2139	I would need to research the effectiveness of larger grade bands and its effect on students of different ages, but I don’t particularly think my kindergartener needs to be in school with high schoolers.	3/4/2026 7:58 AM
2140	Not putting a damper on assessments; but improving our students prerformance articulatinf the studentsa goal and or learning outcomes.	3/4/2026 7:57 AM
2141	I prefer the traditional k-5, 6-8, 9-12 breakdown as it keeps kids of similar maturity levels withing similar groups.	3/4/2026 7:57 AM
2142	My daughter attends Oak Grove Elementary due to school choice. Oak Grove is a great school with great teachers. It is small class sizes and we need that for our daughter to succeed. Smaller class size works. If she would not been able to attend Oak Grove we would have left Dekalb County Schools and put her in private	3/4/2026 7:56 AM

2143	I would like to see more k-8 9-2	3/4/2026 7:45 AM
2144	I don't care what you do. The most incompetent group of individuals nation wide.	3/4/2026 7:45 AM
2145	My children attend Lithonia Middle and Stoneview Elementary. It would definitely be detrimental to close schools in my area. My children should be able to attend school in their neighborhood.	3/4/2026 7:33 AM
2146	Do PK-5 and 6-12 to offer more robust programs and less school changes for children.	3/4/2026 7:02 AM
2147	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/4/2026 6:54 AM
2148	I strongly believe that elementary school students, typically in grades K-5, should not be exposed to older students in grades 6-8 within the same school building. Maintaining a clear separation between these age groups is essential for fostering a safe, nurturing environment tailored to the developmental needs of younger children. In today's world, where children have unprecedented access to the internet and social media, they are already bombarded with influences that can accelerate exposure to mature or inappropriate content far beyond their years. Combining elementary and middle schoolers under one roof exacerbates this issue by introducing direct, daily interactions with preteens and early teens who are navigating puberty, increased social pressures, and more complex behavioral dynamics. This setup risks younger kids adopting negative habits—such as profanity, bullying, or risky behaviors like experimenting with vaping or social exclusion—through observational learning and peer imitation, a phenomenon well-documented in developmental psychology as behavioral contagion. Research shows that transitions to middle school environments, where older students dominate, are linked to spikes in aggression, rule-breaking, and emotional distress among younger adolescents, and extending this exposure downward to elementary ages could amplify these problems for even smaller children. Children in K-5 are at a critical stage of building foundational social skills, self-confidence, and a love for learning, often in a more playful, structured setting with closer adult supervision. Middle schoolers, on the other hand, face heightened hormonal changes, identity exploration, and peer-driven independence, which can lead to cliques, teasing, or more overt conflicts. Studies on school configurations highlight that K-8 models—where elementary and middle grades share a building—often result in poorer outcomes compared to separate elementary schools, including increased behavioral infractions, lower attendance, and higher dropout rates later on. For instance, sixth graders in middle schools are twice as likely to face discipline issues than those remaining in K-8 setups, suggesting that the presence of older peers disrupts the protective bubble needed for younger ones. Varying maturity levels mean that while some elementary students might handle interactions maturely, many others—especially those developing more slowly—could experience stress, anxiety, or a dip in academic motivation from feeling overwhelmed or intimidated. This isn't just about bad habits; it's about preserving the innocence and focused growth of young minds without the added pressure of navigating a shared space with kids who are essentially in a different life stage. Furthermore, consolidating schools in this way overlooks the long-term developmental trajectories of children. Evidence indicates that the shift to a middle school context can interrupt positive trends, such as the natural decline in ADHD-related symptoms or aggressive behaviors that occur in stable elementary environments. Younger students might internalize negative role models, leading to emotional problems like hyperactivity or withdrawal, which persist into adolescence. In high-poverty or diverse districts, where consolidation is often proposed for cost savings, this mixing can worsen disparities, as school-level factors like concentrated disadvantage fuel antisocial behaviors. Instead of consolidation, we should prioritize keeping elementary schools as standalone havens, investing in smaller class sizes and age-appropriate programs that shield kids from premature exposure. The potential for picking up detrimental habits isn't hypothetical—it's backed by patterns seen in transitional disruptions, where academic engagement drops and behavioral issues rise. Ultimately, true individual growth happens when children are allowed to mature at their own pace in environments designed specifically for them, not diluted by the challenges of older peers.	3/4/2026 6:52 AM
2149	Oak Grove is not an underperforming or failing school — it is a high-performing, stable, and	3/4/2026 6:40 AM

	deeply rooted community school within the cluster. Closing it would not only disrupt academic continuity but would dismantle a long-standing community that families intentionally chose.	
2150	The grade bands should remain the same but could operate in the same building if the facility could accommodate all students. For example a high school could become a K-8 school.	3/4/2026 6:26 AM
2151	I don't have any.	3/4/2026 6:10 AM
2152	Please reconsider any discussion about shutting down the school. It would be a tragedy for our entire community	3/4/2026 6:00 AM
2153	Although we have a few K-8 schools, I again am extremely concerned about bringing different neighborhoods and communities together with no support. Redan ES is just starting to build community and get scholars and parents on board with the high academic expectations and our scholars are performing. I think k the merge would impeded their growth and be a major setback for scholars and staff.	3/4/2026 3:52 AM
2154	Reconfiguring grade bands (e.g., moving 5th Grade to Middle School) is a "False Efficiency" that incurs massive transition costs while merely shifting overcrowding from one building to another rather than solving it. For the Chamblee Cluster, specifically regarding Ashford Park Elementary (APES) and Chamblee Middle School (CMS), this strategy is fiscally wasteful and operationally dangerous.	3/3/2026 11:45 PM
2155	I think a new grade band would be a great suggestion. I’m not sure how it would work.	3/3/2026 11:12 PM
2156	As a parent in the Tucker cluster, I would prefer maintaining traditional grade bands (K–5 elementary, 6–8 middle, 9–12 high school). This structure feels developmentally appropriate and helps maintain stability for students and families. If changes are considered within the Tucker cluster, I hope the district prioritizes minimizing transitions and ensuring receiving schools have the capacity and resources to support students successfully.	3/3/2026 10:07 PM
2157	I grew up in a rural school district with the proposed grade band clusters. I went to one school for kindergarten and first, then another for second and third, and yet another for fourth and fifth. I hated the lack of continuity. It was a very big transition for a shy child. Just as I learned the ins and outs of the building, it was time to change. Keeping schools as K-5 allows children to acclimate to the physical environment as well as the leadership structure.	3/3/2026 9:46 PM
2158	I don’t think it’s appropriate to have the youngest of kids in the same building as teenagers. This risks exposure to inappropriate behavior and language at far too young of an age.	3/3/2026 9:46 PM
2159	HPM emphasizes that choices are driven by data such as declining enrollment and building conditions. But…their numbers are wrong and only support their cut and paste plan. If we had instead used the almost $8M we paid HPM and instead invested in our schools, we’d be in a much better place.	3/3/2026 9:33 PM
2160	We have paid HPM nearly $8M. This is financially irresponsible!	3/3/2026 9:20 PM
2161	I really don't think that K-8 is appropriate in terms of the vast differences in development needs. Spaces, schedules and programs should be developmentally appropriate and large grade band ranges make that more difficult. The exception to this idea would be school choice, where a parent chooses this option. For some, it's something they want or that they see their child needs. I support standard grade band schools: P-5, 6-8 and 9-12 for traditional school buildings and variations in school choice programs only.	3/3/2026 9:19 PM
2162	KG - 5	3/3/2026 9:18 PM
2163	Devon Horton started this process and has been indicted on 17 federal counts tied to alleged embezzlement, wire fraud, and tax fraud. So, who, involved in this, is corrupt or financially benefitting?!	3/3/2026 9:12 PM
2164	Traditional PK–5 grade bands remain appropriate	3/3/2026 9:07 PM
2165	See above.	3/3/2026 9:05 PM
2166	I think different grade bands could work depending on the specific schools.	3/3/2026 9:00 PM
2167	This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth.	3/3/2026 8:56 PM

2168	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/3/2026 8:47 PM
2169	Leave Sagamore Hills as PreK - 5th	3/3/2026 8:35 PM
2170	K–5/6–8/9–12 grade band strategy is aligned with student cognitive, social, and emotional stages and therefore is the preferred structure. An alternative structure of K-3/4-5/6-8/9-12 allows the schools/populations to be smaller and more focused, but may increase transitions and difficulties for students adjusting to new environments which may affect them socially and academically.	3/3/2026 8:30 PM
2171	Thanks for sharing the potential grade band scenarios. I'd like more details on how each school or cluster would be affected, including the grade bands and how the changes might impact students, staff, and transitions.	3/3/2026 8:27 PM
2172	None	3/3/2026 8:22 PM
2173	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/3/2026 8:18 PM
2174	Not sensible in the least	3/3/2026 8:17 PM
2175	It seems like putting high schoolers in with any younger band is not sensible. Also, switching between 3rd and 4th grade seems to be a bit much. So traditional seems to make the most sense to me.	3/3/2026 8:16 PM
2176	The grade bands should be based upon local needs in the county. Lakeside HS should be K-5, 6-8, 9-12.	3/3/2026 8:02 PM
2177	I do not support a school from pk-8. There are safety issues for younger children.	3/3/2026 8:00 PM
2178	I am against the grade bands. I used to be in a school like that back in my country. It never worked well having bigger kids along with the smaller kids in one school it gives more potential for bullying. The	3/3/2026 7:56 PM
2179	2 and 5th grade	3/3/2026 7:42 PM
2180	This whole plan is outrageous and I will not honor any of the components with an answer.	3/3/2026 7:35 PM
2181	Erick and Tracy said that Stoneview elementary was not on the list and would be modernized he also told the board of education member five, Dr. Tiffany Hogan.	3/3/2026 7:34 PM
2182	You could have another school feed into ours and have an upper campus and a lower campus (new building on the lower field). Expansion on the lower field would allow minor disturbances during construction.	3/3/2026 7:34 PM
2183	The idea of a 6-12 grade school is so problematic! Placing young, impressionab le tweens with teens leads to exposure to things the young students are just not ready for... 6th grade student could be 12 years old intermixed with 19 year old high school student would leave me very concerned!	3/3/2026 7:33 PM
2184	I think improvements should be made to DCSD to encourage more attendance. Better schools would mean more people wanting their kids un Dekalb Co. schools. I don't like the idea of combining middle school age kids with high school kids.	3/3/2026 7:09 PM
2185	Oak Grove Elementary should remain the way it is. Same with Lakeside High School.	3/3/2026 7:06 PM
2186	This question should be reworded for clarity. Grade band?? What does that mean. If your	3/3/2026 7:06 PM

	referring to a literal band just word it so it’s clear	
2187	Consolidating middle and elementary schools is the best moddl	3/3/2026 6:55 PM
2188	This does not appear to apply to my cluster as it appears in the proposed plan now.	3/3/2026 6:55 PM
2189	I am not opposed to K-6 or K-8 if the schools are given the resources to implement it properly	3/3/2026 6:48 PM
2190	It is important to keep the clusters consistent for families for tradition, consistency and the ability to attend a local school.	3/3/2026 6:44 PM
2191	I don’t want new scenarios or grade bands.	3/3/2026 6:41 PM
2192	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/3/2026 6:23 PM
2193	I think it is a horrible idea, there is no way my 1st grade child will be going to a school of 900 kids, especially as old as 8th graders. That is not appropriate, way too big of an age gap. Also, large school and large enrollment cannot keep tabs on everyone, kids get lost in the system, not good for anyone.	3/3/2026 6:19 PM
2194	K-8 grade bands at elementary schools or at current middle schools. High schools 9-12 with the many special programs (CTAE, Fernbank Science, IB, etc) spread among the different high schools	3/3/2026 6:08 PM
2195	Prek-8 and 6-12 should not be considered anywhere. It’s not developmentally appropriate	3/3/2026 5:57 PM
2196	I support maintaining the traditional PreK–5, 6–8, and 9–12 grade bands because they align with students’ developmental stages and academic needs. Elementary schools should remain focused on building foundational skills in a safe, nurturing environment designed specifically for younger children. Middle school students are at a very different social and emotional stage, and combining them with elementary-aged children raises concerns around supervision, exposure, and age-appropriate interactions. Keeping these groups separate preserves a learning environment that is structured, secure, and developmentally appropriate for all students.	3/3/2026 5:51 PM
2197	The idea that an 12 year old and an 18 year old would be in the same school does not sound great. It sounds like a horrible idea. One that would cause issues socially.	3/3/2026 5:48 PM
2198	Stability is the priority for the elementary schools feeding into Lakeside. Again, next years projections are 96% for Oak Grove and 91% Sagamore Hills. Even if Briarlake's numbers do not increase in kind, Briarlake cannot take all of those students. Traditional PK-5 grade band remains appropriate in high utiliziation.	3/3/2026 5:28 PM
2199	The current grade band cluster for OGE should be continued.	3/3/2026 5:09 PM
2200	No need to consoolidate the band grads or even the clusters. Don't waste tataxpapyer money tht has already been spent just because someone thingthinks this is the way to do something, another person can come up uwith a different iDEas and then this might all change.	3/3/2026 5:02 PM
2201	Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization.	3/3/2026 4:50 PM
2202	I do not think PK-8 bands work at all without any separation due to vast age differences and particularly our cluster of where the elementary level of PK-5 is already well over 800 kids alone makes zero sense to try to force 6-8 grade on top of this--its already over utilized. I also dont like the idea of 6th graders being lumped with HS 9-12 grades. I already can tell vast differences in what the 8th graders say/do at CMS vs 6th and to then put a HS mentality in with that is inappropriate...maybe 8-12 would work or teenagers together, but definitely not preteens with teens...there is a reason TV shows and movies has a PG-13 or 14+ rating and 11-13 yr olds should be separated--same way I feel about preteens owning smart phones, but	3/3/2026 4:40 PM

	that is a separate issue. I may be biased to traditional models, but given current facilities and current/projected future enrollment of both Chamblee and surrounding clusters like Cross Keys, I only see traditional PK-5, 6-8, 9-12 grade bands working and all at healthy levels as we have the most overcrowded schools in whole district here--enrollment is NOT the issue...currently, unless we upset many people who just pull to private pending final outcomes here.	
2203	I believe the grade bands should be evaluated on a cluster-by-cluster basis, serving the needs of each community and optimizing the use of facilities for each cluster	3/3/2026 3:56 PM
2204	I am amenable to changing grade band scenarios. I agree that developmental fit (can you separate 6th graders from 12th graders effectively in the building) is important, as is efficiency. If there aren't other significant pros for student outcomes that you declare you will prioritze, then reducing the grade bands in a school building just screams operational inefficiency to me (which you've made clear is what you're prioritizing).	3/3/2026 3:47 PM
2205	Oak Grove should remain as it has been.	3/3/2026 3:46 PM
2206	I am in the Druid Hills high school cluster and I would like to keep the traditional grade bands	3/3/2026 3:37 PM
2207	The PK-8 scenario is the most beneficial in my opinion. Keeps siblings together longer, only one transition. Fewer buses needed. Saves money.	3/3/2026 3:31 PM
2208	Evansdale ES, Henderson Middle and Lakeside HS. My child went to all three and had a good learning experience at all of them. Having their schools in the neighborhood allowed the kids to experience more of their community.	3/3/2026 3:19 PM
2209	I think Evansdale Elementary school should be kept going to ensure a smaller number of kids in the classroom for the kids who live nearby.	3/3/2026 2:36 PM
2210	I prefer k-5/6-8/9-12.	3/3/2026 2:33 PM
2211	I think the way it is now is fine. In my opinion, nothing needs to be changed with the grade bands. Elementary school should remain pre-K through fifth, middle school should remain six through eight, in high school should remain nine through 12. Ashford Park should continue going to Chamblee middle in Chamblee high school.	3/3/2026 2:27 PM
2212	I actually went to DeKalb High Schools when they were 8-12 and kind of thought it was a better situation.	3/3/2026 2:11 PM
2213	The grade bands make sense to me if we have the building space. I'm fine with splitting up grades between buildings, just not entire school communities.	3/3/2026 1:55 PM
2214	I cannot provide feedback on scenarios without all of the information. All options should be considered based on the communities needs.	3/3/2026 1:53 PM
2215	I think the grade band of k-6/8 is too wide.	3/3/2026 1:25 PM
2216	I would not want my child to be banded with a lot of older kids	3/3/2026 1:19 PM
2217	Grade band scenarios should consider size of the school and closeness of students to their school. People with means to will leave our school district if forced to attend mega large schools not near their homes. This will reduce opportunities for all students.	3/3/2026 1:19 PM
2218	I'm indifferent about the grade bands	3/3/2026 1:08 PM
2219	NO 6th graders with seniors!	3/3/2026 1:01 PM
2220	I actually think the smaller schools that are still in decent condition should be used for pk-k and elementary schools be 1-5. Also think special needs classes need to be broken up more by level. Putting kids with minor needs and major needs in the same class actually sets the minor needs kid back more	3/3/2026 12:44 PM
2221	NOPE	3/3/2026 12:32 PM
2222	If you need to move Tucker Middle School into Tucker High School, I'm fine with that. 6-12th grade in one spot, fine. But do not close my neighborhood elementary school. Do not combine it with Livsey.	3/3/2026 12:26 PM
2223	I do not agree with changing grade bands, particularly for elementary and middle school.	3/3/2026 12:26 PM
2224	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized.	3/3/2026 12:25 PM

	Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	
2225	My biggest concern is of the potential for pk-8 grade bands. A 4 year old and 14 year old have vastly different education, emotional and social needs and combing those two grade bands would negatively impact the school's ability to serve those students.	3/3/2026 12:14 PM
2226	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/3/2026 12:09 PM
2227	Closing Evansdale should not be an option	3/3/2026 12:05 PM
2228	It's terrible. Evansdale Elementary is a cornerstone of its community and must remain open as is.	3/3/2026 11:58 AM
2229	Grade band consolidation is far preferred as it is a better avenue to build community and support for their teachers. I definitely prefer PK-3 / 4-5 / 6-8 / 9-12 but I think there is a lot of room in the other gradeband configurations to encourage leadership of older kids with younger kids.	3/3/2026 11:43 AM
2230	I do not prefer the scenario for 6-12th to be together unless there is lots of thought around separation from older kids.	3/3/2026 11:35 AM
2231	Have Robert Shaw stay opened by adding Prek-3 year olds and extending the grade levels to 8th grade.	3/3/2026 11:34 AM
2232	I don't believe the younger middle school grades should be lumped in with high school grades. They need time to mature before joining older kids.	3/3/2026 11:33 AM
2233	Grade bands change frequently and have nothing to do with justification for facility closure.	3/3/2026 11:32 AM
2234	It would probably be better to keep students in their elementary school until sixth or seventh grade than to combine elementary schools (e.g. PK-7, 8-12).	3/3/2026 11:30 AM
2235	Keep it as is	3/3/2026 11:17 AM
2236	I am not opposed to creating novel bands, but only if the individual school programming is taken into account. People move into communities to be close to STEM, IB, or language programs, which this entire plan throws into confusion.	3/3/2026 11:15 AM
2237	Young people are moving to Tucker because Decatur is too expensive. Closing down those schools as the community is starting to experience a baby boom is backwards.	3/3/2026 11:10 AM
2238	I think PreK-8 is inappropriate to have those gaps in age levels for 4 to possibly 14 or 15 in the same building. Perhaps 6-12 would work better. I have only worked in elementary schools, so I couldn't speak as well to those age dynamics.	3/3/2026 11:08 AM
2239	It doesn't seem to directly impact our community since our issue is overcrowding. However, there's appetite for more preK classes at Ashford Park.	3/3/2026 11:05 AM
2240	I generally support maintaining the PK–5 / 6–8 / 9–12 traditional model, as it provides stability, clear developmental transitions, and strong feeder alignment within clusters. This structure is familiar to families and allows elementary, middle, and high schools to focus on age-appropriate programming and culture. I have concerns about the PK–3 / 4–5 / 6–8 / 9–12 variation. Splitting elementary into two campuses creates an additional transition point for young students and families. It may also fragment school culture and increase logistical challenges without a clear academic benefit. Any consideration of this model should clearly demonstrate improved student outcomes to justify the added disruption. The PK–8 model can	3/3/2026 11:03 AM

	be effective in specific clusters where enrollment supports at least 900 students and a strong standalone 9–12 high school remains viable. PK–8 campuses may provide continuity for families and reduce transitions, but they must be large enough to offer robust electives, extracurriculars, and student support services. I have concerns about the PK–8 model, particularly related to the wide age span within a single campus. The developmental differences between early elementary students and eighth graders are significant, both socially and emotionally. The size and maturity gap between younger children and adolescents raises questions about supervision, shared spaces, and overall school culture. While PK–8 schools may offer continuity and fewer transitions, it is important to carefully consider how age-appropriate environments would be maintained. Separate wings, schedules, and programming would need to be thoughtfully designed to ensure that younger students are not overwhelmed and older students still have leadership opportunities and middle school–specific experiences. These developmental considerations should be weighed alongside enrollment efficiency when evaluating this model. The 6–12 campus model may offer advantages in academic alignment and early exposure to high school coursework. However, careful planning would be needed to ensure that middle grade students maintain age-appropriate environments and do not lose access to middle school–specific programming and leadership opportunities. This model could work well in clusters with sufficient enrollment and facility capacity. Overall, I encourage the district to evaluate each model not only for operational efficiency but also for developmental appropriateness, academic outcomes, feeder alignment, and community impact within each specific cluster.	
2241	Grade band scenarios are pointless, the status quo works fine for the district. Remove and replace current principals and upper level management.	3/3/2026 10:54 AM
2242	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/3/2026 10:52 AM
2243	I'm undecided about this.	3/3/2026 10:52 AM
2244	I would not mind the grade bands as in separating the students into smaller schools- pro of a small school feel, but since I have multiple kids, it would prove difficult to be as involved as I'd like since they will be spread out.	3/3/2026 10:50 AM
2245	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/3/2026 10:48 AM
2246	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/3/2026 10:46 AM
2247	Keep schools open	3/3/2026 10:43 AM
2248	I think if we are to adjust the bands, we need more bands and not fewer. Combining 6 graders with 12 graders will increase problem behaviors as younger students are exposed too early to adult problems.	3/3/2026 10:42 AM
2249	Do not put 6-12 together. Middle school-aged children should not be in the same building as high school-aged children.	3/3/2026 10:39 AM

2250	Evansdale is a quality school that should not be closed	3/3/2026 10:27 AM
2251	i would not want my 6th grader in a school with HS students so no to 6-12 schools	3/3/2026 10:18 AM
2252	They should stay how they are. Most other countries in the state have the same grade bands. That is not the problem.	3/3/2026 10:05 AM
2253	I can see some value in grade bands but only if the schools stay small (see above). However, I do worry for some younger children that only start to feel confident in school as they get older. K-5 schools give older students the opportunities to be leaders.	3/3/2026 10:05 AM
2254	Traditional pre-K to 5th band is the best for our students	3/3/2026 9:55 AM
2255	Changing schools every 2-3 years is not good for kids. Keep at least elementary school together.	3/3/2026 9:55 AM
2256	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/3/2026 9:39 AM
2257	We do not support any of the proposed grade band scenarios that alter the current K–5 structure at Ashford Park Elementary within the Chamblee cluster. Specifically, we oppose: • Any K–2 / 3–5 split between Ashford Park and another school. • Any model that converts Ashford Park into a single-grade band campus (such as K–2 only or 3–5 only). • Any consolidation that shifts Ashford Park students into another elementary within the cluster under a restructured grade configuration. Ashford Park currently operates successfully as a K–5 neighborhood school. Keeping students in one building from kindergarten through fifth grade creates academic continuity, strong peer relationships, consistent leadership, and meaningful family engagement. Splitting grade bands across schools would introduce unnecessary transitions at a young age, disrupt established social groups, and create logistical challenges for families with multiple children. Additionally, moving to a grade-band model could weaken community identity and reduce the neighborhood-based foundation that makes Ashford Park successful. Families purchased homes and invested in this community with the understanding of a traditional K–5 structure. If capacity or enrollment is a concern within the Chamblee cluster, we encourage the district to explore solutions that preserve the K–5 model at Ashford Park rather than fragmenting it. We respectfully request that Ashford Park remain a K–5 neighborhood elementary school within the Chamblee cluster.	3/3/2026 9:37 AM
2258	You could expand Evansdale to include K- 6th and Henderson Middle 7th and 8th.	3/3/2026 9:28 AM
2259	This needs to stay the way it is. Different age groups have different needs. Middle schoolers dont need to be shoved into high schools because you cant figure capacity issues	3/3/2026 9:23 AM
2260	I prefer the traditional K-5, 6-7, and 9-12. Evansdale, Henderson middle and Lakeside High	3/3/2026 9:17 AM
2261	Children need to be around children their age. I wouldn't feel comfortable if my 6year old kids were on a school bus with high schoolers, potentially getting picked on/bullied, and it wouldn't be right morally to combine these ages. Specifically the Tucker area clusters.	3/3/2026 9:17 AM
2262	More information is needed.	3/3/2026 9:08 AM
2263	This proposal is not helpful for families as it spreads the children among many schools. This disrupts community involvement and is a logistical nightmare for parents. It would also stresses the bus system. Part of the strength of the Oak Grove Elementary is the parental involvement. If students were spread to many different schools and only stayed a couple of years, parent involvement would deteriorate and not be cohesive.	3/3/2026 8:59 AM
2264	I believe grade clusters should stay with the traditional cluster such as pre k-5, 6-8, 9-12	3/3/2026 8:47 AM
2265	I like that the scenarios stick to traditional elementary, middle, and high school grade bands.	3/3/2026 8:23 AM
2266	I believe that stability should prioritized.	3/3/2026 8:23 AM
2267	Do NOT break up communities or clusters! This includes magnet programs.	3/3/2026 8:13 AM

2268	I believe the Traditional PK-5 / 6-8 / 9-12 model works well because it keeps elementary, middle, and high school students in developmentally appropriate environments. Separating younger elementary (PK-3) from upper elementary (4-5) may create additional transitions that could be challenging for students and families. If changes are considered, the district should ensure smooth transitions, clear communication, and academic consistency across clusters.	3/3/2026 8:12 AM
2269	The Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake) has great enrollment and performance. The traditional grade band is the best distribution as it allows children to be consistently with their friends through their formative early childhood years. Switching multiple times between 3rd and 8th grade would be quite difficult emotionally for the children. PK-5 and 6-12 is a reasonable alternative as it would require only one change, as would PK-8 and 9/12 (which many private schools do).	3/3/2026 8:11 AM
2270	With regards to Oakgrove, I am not in favor of grade bands. Grade bands should reflect local enrollment trends and utilization levels rather than a uniform district-wide model. For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/3/2026 8:06 AM
2271	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/3/2026 8:04 AM
2272	Not opposed to oak grove closing, and expanding LRE and Briarlake. Just concerned about how large the student population will be once this happens.	3/3/2026 7:27 AM
2273	Sagamore and Briarlake would need SIGNIFICANT expansion to be able to house all of the displaced oak grove students.	3/3/2026 7:00 AM
2274	n/a	3/2/2026 11:14 PM
2275	I like PK-3 / 4-5 / 6-8 & 9 -12. However, I have no feedback on the potential grade band scenarios. I trust the County to make the right decisions based on the current needs of the students in a particular cluster. No schools or neighborhoods are the same.	3/2/2026 10:47 PM
2276	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/2/2026 10:20 PM
2277	There should be consideration for "lower elementary" and "upper elementary" grade bands across the DCSD school buildings, specifically in the Brookhaven/Chamblee area: example- utilize Ashford Park, Montgomery, and Huntley Hills as PK-3 schools and shift all 4-5 students to Cary Reynolds (shifting Cary Reynolds PK-3 student across Montgomery and Huntley Hills)- and invest construction dollars to rebuild Cary Reynolds as a 4-5 for the area. This allows the district to continue to utilize Ashford Park Elementary and not divide the neighborhood. Reduce a Montgomery expansion project. And the kids who eventually feed into chamblee middle and chamblee high, will have a bridge year together for grades 4-5 before going to middle School.	3/2/2026 9:43 PM
2278	Not a fan of splitting our kids to other schools unless shifting entire cohort or using grade bands. Ideally, rebuild and expand Ashford Park and merely do temporary shift. Ashford Park continues to grow. Not appropriate to ask everyone to permanently send kids to a different school entirely.	3/2/2026 9:24 PM

2279	I am highly concerned that you are proposing to close the only IB elementary school in the Tucker cluster. We will no longer have a K-12 IB pathway in our cluster. This is inequitable.	3/2/2026 8:44 PM
2280	I went to Midvale when it was K-7, and then Henderson high school when it was 8-12. Henderson high school was turned into a middle school my 9th grade year, and our school was forced to split up between Tucker and lakeside. It was fairly traumatic at the time, but being high schoolers already, we survived - but elementary school children may not be so resilient. They thrive in these tiny communities where everyone knows their names, and I hate to think of the tight knit school being divided up and ripped apart from the comfort of their close groups. I also cannot get behind the idea of 6th or 7th graders being in the same environment as 12th graders - the influence of these older kids would be insanely dangerous, in a world where kids are already exposed to too much and growing up too fast, we need to keep them in small safe environments as long as possible!	3/2/2026 8:30 PM
2281	I don't like the grade band item.	3/2/2026 8:25 PM
2282	The below question 6 isn't well worded. Grade bands need to be consistent across all schools in the same cluster. I am not concerned about differences between clusters.	3/2/2026 8:21 PM
2283	Pre-k - 5th needs to be a small number of students	3/2/2026 8:19 PM
2284	Vanderlyn sits on a lot of unused land, so building an updated Vanderlyn where the playground is and building up, not out, would help everyone get what they want. By moving Vandrlyn to the end of the playground field, there is room to create a large parking lot that can be used by Vandrlyn Staff and the High School. During work hours, there are assigned sports for Vandrlyn Staff and Visitors, and others for the high school. When the high school has a game, all spots are available at night. Currently, the county is putting money into fixing schools they know they are not going to keep, so why not save that money and use it to help rebuild schools that are showing good numbers and where the kids are learning? Vanderlyn is a school that is highly sought after by parents when they make school choices or even when choosing a home to buy. Vanderlyn has been more than a school to the neighborhood; for people like me who grew up here, it is also home. It is where you made new friends and had great teachers, and you still came back to see them after you graduated, or even to work there. I am not the only former Viking who came back to work there. Also, our administration teacher has been great and supportive, and will guide you if you need help. Also, closing that many schools will create overcrowding and large class sizes. Larger class sizes make it harder to reach and help the students.	3/2/2026 8:11 PM
2285	Expanding grade bandings are challenging to provide age/size appropriate extracurricular activities. I do not support K-8 schools where activities might not be offered or would require parents to handle commuting logistics to allow kids to participate at a different facility.	3/2/2026 8:06 PM
2286	I do not believe any grade band scenarios relative to PK-5 is feasible for Ashford Park Elementary School in view of the already strong transition of a significant number of students from Ashford Park Elementary School to Kittridge magnet school at 4th grade.	3/2/2026 8:04 PM
2287	Probably would not work for current Ashford Park Elem, since many kids leave for Kittredge Magnet.	3/2/2026 8:04 PM
2288	Prefer K-5, 6-8, 9-12. Again without all the information it is not a fair question! Each cluster may need to be unique instead of the typical “one size fits all”!	3/2/2026 7:58 PM
2289	It might be too much stress for middle schoolers to be mixed with high schoolers - developmentally and socially.	3/2/2026 7:45 PM
2290	Bottom line. It's not a good idea to mix middle and high schoolers in same building. Middle schoolers are in transition and are not ready for that type of pressure.	3/2/2026 7:42 PM
2291	I have less concerns about the clusters and grade bands. I think those proposals are acceptable.	3/2/2026 7:34 PM
2292	Having a cluster of grades would help with the decline in enrollment for Dekalb school with collect data on how students in the area that is affected to better serve Dekalb county school.	3/2/2026 7:22 PM
2293	Brockett has served many generations of students in neighboring communities. Elementary age students have been able to thrive in the lovely building and thoughtful space for families to interact.	3/2/2026 7:15 PM
2294	The traditional PK–5 / 6–8 / 9–12 grade band model seems to have the least number of	3/2/2026 7:14 PM

	challenges for both families and the school system.	
2295	Pk-3,4-5,6-8,9-12 AP	3/2/2026 7:11 PM
2296	Would prefer to keep as is, but grade band is not a top concern.	3/2/2026 7:09 PM
2297	Changing the grade band scenario from traditional would not be productive for Ashford Park and the Chamblee clusters. It takes years of families funding into schools. If you have families changing schools every few years they are less likely to invest money and more likely to move to private school.	3/2/2026 6:55 PM
2298	Potential if done properly	3/2/2026 6:43 PM
2299	I like the grade banks PK-3, 4-5 schools for Elementary. This makes sense for the Ashford Park area if the school will not close altogether. The building can not sustain the growth of the Brookhaven community, we simply have too many kids.	3/2/2026 6:16 PM
2300	When considering grade banding across schools in DeKalb County School District, decisions should extend beyond enrollment numbers and geographic efficiency to fully account for facilities, community involvement, and teacher quality. The physical condition, capacity, and adaptability of school buildings directly affect safety, learning environments, and long-term costs; moving students into outdated or overcrowded facilities undermines the intended benefits of restructuring. Equally important is the depth of community engagement—schools with strong parent involvement, active partnerships, and consistent volunteer support foster higher student achievement and stability, assets that can be weakened or lost through reconfiguration. Finally, teacher quality and staff cohesion must be central to the analysis; experienced, highly trained educators and established instructional teams are not easily replicated after reassignment. Effective grade banding should preserve strong school cultures, leverage high-performing faculty, and invest in facilities that enhance, not hinder, student success.	3/2/2026 6:15 PM
2301	11 year old 6th graders have no business being in a school with 18yr old 12th graders. Period. Developmentally speaking, follow science and milestones: PK-6: bring 6th graders back to elementary school...there's no need to rush childhood and expose them any earlier to things older kids are...especially with technology these days. Our kids are drowning. Give them one more year of recess and less peer pressure in the more "mature" space. 7-9: JR High....allows resources for higher level programs, gives a divide of 9th graders to stay out of the driving group. 10-12: High School This helps better utilize our smaller seat elementary schools in Tucker, and spreads crowding at TMS and THS.	3/2/2026 6:13 PM
2302	I grew up in Dekalb under k-7, 8-12 grade bands and it was very healthy. The older kids learned to be leaders. We were able to help with the younger kids in meaningful ways. I love that we are considering a non-traditional approach.	3/2/2026 5:38 PM
2303	I don’t think it is wise to have 6th-12th grades on the same campus. Bullying young children is at epidemic levels. Children are choosing suicide at very young ages due to bullying. Having 12-18 year olds on the same campus would have disastrous impacts on these students.	3/2/2026 5:14 PM
2304	Oak Grove is a unique school that has generations of our family supporting and attending it. We moved to this area to have our own children grow up in the same school district/area my husband and I grew up in. We need to support this amazing school.	3/2/2026 4:48 PM
2305	I am not in favor of consolidating more bands together (like 6-12 or K-8). This potentially puts students in close proximity at any point throughout the day. I would not like potential scenarios of Kindergarteners being in proximity or contact with 8th graders or 6th graders having possible contact with 12th graders.	3/2/2026 3:53 PM
2306	The traditional model (PreK-5) we currently have is the best. As stated below, Evansdale's lower field could be used to house upper grades and the existing building PreK-2. This would cut down on siblings being split between multiple schools.	3/2/2026 3:47 PM
2307	I feel strongly we need to keep PreK - 5th, 6th - 8th, and 9th - 12th grade clusters. It’s more appropriate based on age and supports developmental continuity during students most formative and vulnerable years.	3/2/2026 3:28 PM
2308	Grade band scenarios can certainly be an option. It would depend on the need of the schools in various clusters and what programs are available to them. Grade bands could be a unique scenario depending on need and do not need to be applied across the county as a whole.	3/2/2026 3:26 PM

2309	The traditional grade bands fit perfectly with IB in the Tucker Cluster - Elementary, Middle, High.	3/2/2026 2:49 PM
2310	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/2/2026 2:48 PM
2311	I would prefer a traditional grade band but I am also open to considering non-traditional ones. For lower grades, I am open minded as to how they are structured, however, I am strongly opposed to a PK-8 structure. For middle school and high school, if you were to consider non-traditional grade bands, I think 7-12 makes the most sense.	3/2/2026 1:16 PM
2312	Do not tear thriving communities and clusters apart. People will leave and the goals of the country will not be met. Financially and academically. This includes magnet programs!	3/2/2026 12:56 PM
2313	When we first moved to the Oak Grove area in 1986, the elementary school went up to 6th or 7th grade and then students continued to Lakeside High School. I appreciate the data that says middle schools/junior highs are an important part of a student's academic and emotional development, but losing the elementary school that draws these families in would be a detriment to Dekalb County schools.	3/2/2026 12:37 PM
2314	I'm concern about all the children. My grandson in high school and if you change McNair from high to middle school, how much further will he has to travel?	3/2/2026 12:35 PM
2315	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/2/2026 12:21 PM
2316	IF an expansion of AP isn't feasible (still need more info on this), I would be open to a grade band of PK-2nd or 3rd. This would benefit the whole cluster of overcrowding.	3/2/2026 12:05 PM
2317	I believe grade band scenarios will make it difficult for parents with more than one child. I will make volunteering, logistics and fundraising opportunities more difficult.	3/2/2026 11:46 AM
2318	N/A	3/2/2026 11:42 AM
2319	works fine. changing it will require too many expensive changes.	3/2/2026 11:35 AM
2320	1) keep chamblee cluster trajectory to chamblee middle and chamblee high 2) keep the AP ES attendance zone together	3/2/2026 11:31 AM
2321	There are not clear enough explanations for what the options are or for where. When you do not provide clear and direct information, and request feedback on those, it is destined to fail as an initiative and for involved parents to feel like they are not heard.	3/2/2026 11:04 AM
2322	My concern is mainly around having different ages/developmental stages in the same facility. A K-8 or 8-12 could be challenging - as those are big age ranges. If you are able to segment the population by grades in either different parts of the buildings or different buildings, that could work.	3/2/2026 11:00 AM
2323	Not sure what schools you are planning this for but it seems to work well w/in Globe.	3/2/2026 10:56 AM
2324	I think the existing grade bands are fine.	3/2/2026 10:34 AM
2325	Chesnut needs to be torn down and rebuilt. Please consider the traffic on Peachtree and add additional opportunities for pedestrians.	3/2/2026 10:30 AM
2326	I think the grade band scenarios are probably fine - it would require children adapting to new schools more often and would be difficult on children and families (especially families with	3/2/2026 10:13 AM

	multiple children). I honestly like the idea of the littlest kids (pre-K and kindergarten) being grouped in a band with younger kids instead of exposed to the older kids.	
2327	N/a	3/2/2026 10:06 AM
2328	Totally fine to separate out grades more if it helps with overcrowding but keeps currently high achieving school districts together. No reason to tank school districts that are actually functioning.	3/2/2026 10:01 AM
2329	I think mixing middle schoolers with high schoolers is a terrible idea.	3/2/2026 9:42 AM
2330	I'm used to the Pre-K -5th and 6-8 and 9-12th	3/2/2026 8:53 AM
2331	Keep Communities and current Clusters in tact as a priority! Do not believe that parents will allow their children to go to a lower performing school if theirs is thriving. They will leave and go to another private or charter and the funding + academic achievement for that child will also go.	3/2/2026 8:39 AM
2332	N/A	3/2/2026 8:35 AM
2333	I do not have any specific feedback on grade band scenarios. I can see the argument for each and am in support of whatever offers the best support for our students.	3/2/2026 7:59 AM
2334	Grade bands could work. However putting 6-12 in one building seems developmentally inappropriate. Sixth graders are very different than twelfth graders, socially and academically.	3/2/2026 7:32 AM
2335	I think the bands should be k-5, 6-9, 10-12. Students in High School can be in their early 20s. It is a terrible idea to have that age range together 11-20 years old. High school should be a smaller age range.	3/2/2026 7:07 AM
2336	Never should have started with middle schools. Elementary to high was wonderful. You give these children a false sense of completion.	3/2/2026 5:43 AM
2337	I do not agree at all with a 6-12 building. That is too many afe ranges in a grade band. These kids will have to ride the bus to school together.I believe it will contribute to the adultification of young minds. Additionally if there are bullying issues on the middle school side it create cross grade band fights and chaos.	3/2/2026 5:20 AM
2338	I grew up in DeKalb when there were no middle schools so our elementary schools were 1st - 7th grade and our high schools were 8th - 12th. It was challenging to be an 8th grader with other kids much bigger than me my first year, but fortunately I had two older brothers so bigger kids left me alone...but no so for other 8th graders. I could see going back to this model so you have larger / fewer schools, but I would not put anyone younger than 8th grade in high school as the physical and emotional differences in kids is too great (especially boys) and putting 6th/7th graders in high school could be seriously detrimental to their development. Kids need the time to develop physically, mentally, and emotionally at a pace and in an environment that will be supportive for them.	3/1/2026 11:59 PM
2339	Stick with traditional pk-5, 6-8, and 9-12	3/1/2026 10:34 PM
2340	Expand Oak Grove grade band to PK to 8 to utilize space.	3/1/2026 10:04 PM
2341	Reconfiguring in different grade bands could help solve some challenges with 6th - 8th grades.	3/1/2026 10:01 PM
2342	The information is not presented in a way that makes it easy to understand.	3/1/2026 9:42 PM
2343	Utilizing our building (with already approved renovations) as a grade band facility for pre-k through 3 For the three elementary schools here, Ashford Park, Huntley Hills and Montgomery Elementary, would solve our issues while saving money. Instead of expanding multiple elementary schools, undergoing renovations, that again are already on the way and then utilizing Carey Reynolds for a 4th and 5th grade campus, makes more sense while also creating a community for the whole cluster that will then feed into Chamblee middle and Chamblee High.	3/1/2026 8:09 PM
2344	I believe a grade band for the full Chamblee cluster of K-3rd would solve overcrowding for Ashford Park, Montgomery Elementary and Huntly Hills. To my knowledge, the Cary Reynolds School, will become vacant and available next year. Could this property be used for our upper grade band (4th and 5th). This would add a sense of community between these children that will all feed into Chamblee Middle and High. This would also help save the district money, as	3/1/2026 8:01 PM

	there would only be (already approved) renovations to one elementary school. It would also eliminate the need to expand Montgomery and Huntly Hills.	
2345	My personal opinion to solve all issues and save funds is to bring the Chamblee cluster into a K through 3rd grade band. This will solve over crowdfunding in all the elementary schools. Only use capital funds for renovations. Then turn the Cary Reynolds school for 4th & 5th campus (expansion if needed). The wouldn't only require one expansion in the cluster vs the proposed two.	3/1/2026 7:51 PM
2346	I prefer scenarios that provide for larger cohort groups in order to maximize advanced scheduling	3/1/2026 7:09 PM
2347	Keep them traditional	3/1/2026 6:32 PM
2348	The way it is now is most beneficial to our community.	3/1/2026 6:31 PM
2349	I feel like we should go back to where elementary schools were kindergarten through 7th grade and high schools were 8th through 12th grade.	3/1/2026 6:17 PM
2350	Current students should always be able to finish their time at their current school — for instance those going into K now should be able to finish at their current elementary school thru 5th grade, those going into 9th finish 12th at current school. So perhaps a phased closing would allow for this and accomplishing the county's goals of more facilities.	3/1/2026 6:14 PM
2351	I believe traditional grade band is the best option	3/1/2026 6:07 PM
2352	I have no opinions on the grade bands. I seems like it could be helpful to use these to reduce the number of school buildings but keep class sizes small.	3/1/2026 4:11 PM
2353	For the Sagamore, Brairlake, and Oak Grove corridor, the Traditional PK–5 grade bands remain appropriate in this high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	3/1/2026 3:51 PM
2354	Grade band scenarios may be helpful where numbers are down, but should carefully be evaluated for the different ages that would be in the same school.	3/1/2026 3:11 PM
2355	If it's not broken- don't fix it - Oak Grove Elm already offers a robust program through high parent participation, fundraising & an active foundation that contributes heavily to educational achievement	3/1/2026 2:57 PM
2356	For the Dunwoody cluster, any grade band change should be evaluated based on how it improves utilization and long-term stability while minimizing disruption to elementary-aged students. If reconfiguration is necessary to better utilize capacity, the district should fully explore campus-level options within the Vanderlyn/Dunwoody High School footprint, including phased adjustments or alternative grade configurations that relieve high school pressure without eliminating an elementary school that serves a defined neighborhood population. * Before implementing grade band changes, the district should share: * Projected enrollment and utilization under each configuration * Impact on feeder continuity within the Dunwoody cluster * Transportation and travel time analysis * Equity implications and access to programs Grade band changes should strengthen cluster coherence, not fragment it.	3/1/2026 1:57 PM
2357	PK-3, 4-5, 6-8, 9-12 grade banding is the most logical	3/1/2026 12:06 PM
2358	We desire to send our kids to Ashford Park Elementary K-5.	3/1/2026 10:39 AM
2359	Grade band scenarios that shift elementary students into shared campuses with older students raise significant concerns. Overcrowding becomes more likely when multiple grade levels are consolidated, which can strain facilities, increase class sizes, and reduce individual attention during the most foundational years of learning. Additionally, placing younger elementary students in closer proximity to significantly older students introduces developmental and safety concerns. Pre-K through 5th grade students are at very different social and emotional stages than middle or upper grades. Elementary schools function best when they are designed specifically around the needs, routines, and developmental levels of young children. For these reasons, I strongly believe elementary schools should remain Pre-K through 5th grade. This structure promotes age-appropriate learning environments, enhances safety, preserves school culture, and provides the stability that young learners need to succeed academically and socially.	2/28/2026 10:29 PM
2360	Only agree with current or breaking apart elementary but do NOT agree with upper classmen	2/28/2026 6:57 PM

	being mixed with lower. Not in today's world.	
2361	Grade bands should be adjusted as necessary to accommodate as many students/communities as possible	2/28/2026 5:24 PM
2362	We can have that conversation once you respond to the comments above.	2/28/2026 4:03 PM
2363	I believe that these are less relevant to our cluster.	2/28/2026 3:24 PM
2364	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake) stability should be prioritized) Oak Grove is projected at 96% for next year. Sagamore is already at 91%. This cluster is not experiencing structural decline. It is located next to one of the largest healthcare and research expansions in GA, with thousands of jobs added and ongoing campus growth. Traditional Pk-5 bands remain appropriate in a high utilization, growth corridor. Structural grade reconfiguration should focus FIRST on clusters with long term SIGNIFICANT underutilization.	2/28/2026 3:05 PM
2365	For elementary schools, tradition PK-5 will best benefit the families that having more than one kid, regarding the drop off/pick up for parents, younger kids learning from older kids, and older kids being role models and helpers for younger ones.	2/28/2026 2:41 PM
2366	Stability should be prioritized for the Lakeside cluster. The cluster is not experiencing any type of structural decline. It is located near one of the largest healthcare and research expansions in GA, with thousands of jobs added and ongoing campus growth.	2/28/2026 2:18 PM
2367	Our area (Ashford Park and surrounding schools) do not have large enough buildings to support a different grade band layout. We are fully over crowded in the North area.	2/28/2026 1:58 PM
2368	the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/28/2026 1:23 PM
2369	I don't have specific schools to reference (I've not researched it), but I generally oppose 6-8 grade students attend school with 9-12, unless there is 100% hard and strict separation. My opinion here has to do with behavioral issues in those age group that could exacerbate male-female behavior and conduct issues.	2/28/2026 12:28 PM
2370	For the Lakeside cluster stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore is currently at 91% and Briarlake is at 73% but would need to absorb a significant share of Oak Groce enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located close to one of the largest healthcare and research expansions in Georgia. This brings huge growth. Traditional PK-5 grade bands remain appropriate in a high utilization growth corridor. Structural grade reconfiguration should focus first on clusters with long term significant underutilization.	2/28/2026 11:46 AM
2371	If it helps keep schools open that are well attended.	2/28/2026 11:43 AM
2372	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/28/2026 11:03 AM
2373	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/28/2026 10:14 AM

2374	I believe there are benefits to pk-8 clusters.	2/28/2026 9:55 AM
2375	The grade band needs to remain the same.	2/28/2026 8:55 AM
2376	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/28/2026 7:46 AM
2377	At one point there were no middle school. Middle school became I guess because of number of kids that were attending but now more people are choosing to home school or private. I've been in the Lithonia high and towers high district forever and seen the incline and now the decline because more people are moving out of those areas	2/28/2026 7:20 AM
2378	I have concerns with prek-8. There will be students at varying developmental levels, physically and mentally. I am already concerned about the age/height difference between my 1st grade and the 5th graders. Keeping the bands the same will also save in transportation costs. Bus drivers are hard to find, and so many districts are competing for drivers in a shrinking pool.	2/27/2026 8:31 PM
2379	Small school sizes benefit the students the most - not "operational efficiency." Students learn and grow from relationships with their teachers and friends, which is not fostered by oversized mega schools.	2/27/2026 7:56 PM
2380	I am not opposed to grade bands, but would like to see research on how students success is impacted versus the standard structure we have now.	2/27/2026 7:54 PM
2381	One side I get done with the survey I will send it to the resident Director	2/27/2026 7:31 PM
2382	I find the grade band scenarios a little confusing. I'm not sure it will be a good idea to have one cluster use one type of band while another uses a different one. Seems like consistency across the school district would be most beneficial.	2/27/2026 7:27 PM
2383	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/27/2026 6:59 PM
2384	We prefer middle schools and elementary schools to be together. This is easier for parents who have students in both, and we worry that the maturity gap is too large for middle and high schoolers to be on the same campus.	2/27/2026 6:47 PM
2385	I would prefer to see middle schoolers grouped with elementary schoolers. I think putting 8th graders in with younger students would provide more opportunities for leadership and growth. It also seems more logical to me in terms of parents transporting kids if you have multiple children (since high schoolers may have more independent options getting to school anyhow). The main benefit I think to the alternative (grouping middle and high school) would be more advanced class opportunities for eighth graders. I still lean toward keeping younger students together though.	2/27/2026 6:41 PM
2386	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/27/2026 4:44 PM
2387	Bring back the goat Mr Fowler and band to elementary schools	2/27/2026 4:18 PM
2388	For the Lakeside cluster — Oak Grove, Sagamore Hills, and Briarlake — stability should be	2/27/2026 4:16 PM

	the priority. Oak Grove is projected to reach 96% utilization next year. Sagamore Hills is already at 91%. Briarlake stands at 73%, but would be expected to absorb a substantial portion of Oak Grove's students if consolidation moves forward. This cluster is not in decline. It sits adjacent to one of the largest healthcare and research expansion corridors in Georgia, with thousands of jobs added and continued institutional growth. Residential development in the area further supports the likelihood of sustained or increasing enrollment. In a corridor that is demonstrating both strong utilization and long-term investment, maintaining traditional PK–5 grade bands provides consistency for families and preserves neighborhood stability. Structural reconfiguration efforts should focus first on clusters experiencing prolonged and significant underutilization, rather than those positioned for continued growth.	
2389	I see benefits of K-3 combining oak grove and sagamore then 4/5 at the other school. Or keep traditional k-5 at Oak Grove	2/27/2026 3:50 PM
2390	I think understanding what are the largest classification of students being servied is good based on analysis of enrollment. If you have a large mid-gradel level of students say 6-9 where are they attending in the district and what facilities can you optimally house them to include understanidng the teacher resource, programs they should have and ensruing transportation is not an issue. This is an example i would use for all the grade band scenarios.	2/27/2026 3:36 PM
2391	Having too broad an age range combined together in a single school I feel would be detrimental given that student behaviors and ability vary widely as they develop. Having a kindergarten child in the same school as an 8th grader - someone who is almost old enough to babysit them, doesn't seem like a good idea - nor does it make sense to have someone who is not even a teenager (6th grade) to be in the same school as someone who is almost legally an adult (a 12th grader)	2/27/2026 2:28 PM
2392	I would like to keep traditional grade band scenarios. I feel the cons outweigh the pros when switching to either K through eight or six through 12 or splitting up the younger grades.	2/27/2026 2:06 PM
2393	We should keep the traditional grade bands based off the cons, listed in the sap feedback if we were to switch. I do not want my young children in schools with middle school or high school aged children.	2/27/2026 2:00 PM
2394	I am not opposed to either scenario of grade adjustment.	2/27/2026 1:32 PM
2395	I am for less traditional grade bands, I do not love how many transitions kids have and like grade bands K-8 and 9-12.	2/27/2026 1:27 PM
2396	I am open to that option as well for our area in Ashford Park. I think in our area having the PK-8 bands won't work due to the large student population. We have almost 900 students with only PK-5.	2/27/2026 1:16 PM
2397	Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/27/2026 12:45 PM
2398	I have serious concerns about the proposed 6–12 grade banding. While I understand this model is used elsewhere, it does not address DeKalb's capacity challenges and is not an appropriate solution. The social, developmental, and academic differences between an 11-year-old and an 18-year-old are significant, and placing them in the same building puts undue strain on school resources—including counseling, clubs, sports, supervision, and overall student safety—especially when buildings are already planned to operate at maximum utilization. It's also important to maintain Pre-K programs. Affordable early childhood education is a national issue, and Pre-K access within public schools is essential. Increased trust in the DeKalb school system would naturally lead to higher enrollment in these programs. Rather than implementing quick structural fixes, the district should focus on strengthening program quality and building a sustainable system that better serves students and families.	2/27/2026 12:27 PM
2399	Again, Vanderlyn if a highly reputable school in Dunwoody which directly impacts our community and property values.	2/27/2026 12:23 PM
2400	Na	2/27/2026 12:16 PM
2401	Option 1 Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization.	2/27/2026 12:14 PM
2402	None	2/27/2026 11:54 AM

2403	Keeping children especially young children with similar ages is key to me	2/27/2026 11:53 AM
2404	This cluster needs to have multiple feeder elementary , a middle and then Lakeside. Lakeside is the largest high school in Dekalb. We need to check registrations and ensure that all kids at Lakeside live in district.	2/27/2026 11:45 AM
2405	It would be my preference to keep the current grade band systems. I feel like putting two wide range of ages together could cause a lot of social and developmental concerns. I also think splitting them up in a smaller bands, would be a logistical nightmare for parents and bus systems.	2/27/2026 11:34 AM
2406	I do not support the potential grade band scenarios. I do not think it would be developmentally appropriate for elementary aged children to be with middle school children. I think the schools would be way too large and children would feel lost in the crowd.	2/27/2026 11:30 AM
2407	Traditional public schools in the county should all have the same grade band and function on a traditional, year-long schedule. This ensures high school classes, especially AP classes, end when the tests are given and more students can get into the classes they need.	2/27/2026 11:29 AM
2408	I do think there is a scenario in which Peachtree Middle and Chestnut combined to become PK-6/8 and Dunwoody High and Vanderlyn combine become 6-12.	2/27/2026 11:27 AM
2409	Keep grade bands K-5, 6-8 and 9-12. Dekalb county schools has a proven track record of staggeringly incompetent leadership, especially at the superintendent level. There is no trust from the community that the county could execute on a plan to change a well established, nationally recognized grade structure.	2/27/2026 11:19 AM
2410	If you're plan is to close Kingsley and move the students, the students/parents should be given grace to decide where their student is relocated to. For example, moving students to other schools (such as Hightower, Dunwoody, Austin, or Chestnut) should not be decided by moving boundaries but based on keeping the students with their grade-level friends. Parents who make this choice should be expected to provide transportation or have a central meeting location for bus transportation (if needed). Treat moving students to different schools much like y'all do the ridiculous lottery system (or whatever y'all call it, something like School Choice). But give those students who are having their schools CLOSED first rights when it comes to CHOOSING where the student goes (within a set number of schools). Also, how will closing Vanderlyn and Kingsley effect the ridiculous School Choice that is provided? Will Dunwoody, Chestnut, or Austin no longer be an available choice because those schools will be closer or at capacity? Something to consider... Also, schools don't have to all match - just because one school can only accommodate grades K-5th, why can a school that has capacity not be allowed to teach more grade levels - maybe through 6th, 7th, or all the way through 8th?	2/27/2026 11:13 AM
2411	I think a junior high band would be better than breaking up elementary schools.	2/27/2026 10:40 AM
2412	More transparency around modeling assumptions would be helpful in the next round. Specifically, showing projected enrollment, building utilization, and student distribution across the full cluster for each scenario would help families understand tradeoffs and long-term impacts.	2/27/2026 10:36 AM
2413	Keeping the Montgomery > Chamblee MS > Chamblee HS cluster intact makes the most sense given the proximity to those schools.	2/27/2026 10:35 AM
2414	I think the PK–3 / 4–5 configurations with the traditional 6-8 / 9-12 would be beneficial. I'm in the OGS area and I think having a school focus on the foundation of learning earlier and then in the 4-5 be able to offer more support to the students whether they need additional development or to provide a more rigorous/challenging option.	2/27/2026 9:44 AM
2415	I think it could be interesting and am open to learning more.	2/27/2026 9:40 AM
2416	The lakeside cluster includes two schools that are at a lower utilization and Oak Grove kids would have to go to one of the other schools.	2/27/2026 9:03 AM
2417	I do not like having so many schools for younger years. PK-3, 4-5, etc. It's hard for students and parents. I like 6-12 campus better than PK-8. Your challenges list is shorter, and I like keeping the younger kids in their own environment (up to 5th grade).	2/27/2026 8:15 AM
2418	There is evidence that keeping children in bands PK-8 is better for students.	2/27/2026 7:40 AM
2419	Why not move 6th grade to Oak Grove to help with Henderson crowding.	2/27/2026 6:50 AM

2420	The Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake) has great enrollment and performance. We relocated specifically to the Oak Grove community in 2024 to be a part of this elementary school, and we have cousins/friends with very young children, who will be severely impacted by this potential disruption. Closing Oak Grove does not directly help with the Dekalb School district-wide utilization gap.	2/27/2026 6:22 AM
2421	I feel the grade bands should be kept stable. Buildings are not in structural decline and the high growth corridor in our area should be a signal for growth, not decline.	2/27/2026 6:13 AM
2422	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/27/2026 4:08 AM
2423	When we moved here 51 years ago, Brockett offered Grades 1 - 7. Students then moved on to Tucker High. That worked well.	2/27/2026 1:17 AM
2424	If you want more students ADD early childhood programs!!!!! This is a community need and the Parents are more likely to stay in district. K0-2nd grade 3-5 grade 6-8 9-12 Or 3-7 8-12 6-12 could work as long as you either have 2 buildings or large enough building to keep middle school and high school separated	2/26/2026 11:08 PM
2425	Please consider including campus-level or phased options that address secondary capacity needs while maintaining elementary access where possible. Seeing multiple solution types side-by-side would help the community better understand the full range of possibilities.	2/26/2026 11:06 PM
2426	No banding solution was provided for our area, which is also nonsensical given the proximity of Ashford Park and John Lewis.	2/26/2026 10:28 PM
2427	I went to DeKalb County schools myself a generation ago, in K-7, 4-6, and 8-12 bands. I think many options can work.	2/26/2026 10:17 PM
2428	I would be open to learning more about adding 6th grades to some elementary schools. Prek - 6, 7-8, 9-12 in the Lakeside Cluster.	2/26/2026 10:13 PM
2429	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/26/2026 10:05 PM
2430	No comment	2/26/2026 9:55 PM
2431	Kids and teens should be separated	2/26/2026 9:24 PM
2432	I am concerned that having 6/7th graders and 11/12th graders will lead to unhealthy/illegal romantic/dating scenarios. I think having many smaller high schools with large age ranges will hurt the competition of sports teams. It may also silo specialized classes to certain schools, limiting access of some students to certain AP classes because of the school they are districted to.	2/26/2026 9:08 PM
2433	Elementary to mid/high seems like a big jump. I think k-8 and 9-12 makes sense.	2/26/2026 8:52 PM
2434	I think could expand elementary to 6th grade	2/26/2026 8:24 PM
2435	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in	2/26/2026 8:15 PM

	a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	
2436	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/26/2026 7:57 PM
2437	None	2/26/2026 7:14 PM
2438	I don't think band scenarios should have been layered in during phase 1. I also have a huge problem with the lack of consideration that was taken. Our family is part of the chamblee cluster and we are currently an Ashford Park family. Instead of repurposing our school, it is slated to be closed. It seems as though there was no consideration about using Ashford Park's pre-existing building (that is currently receiving a substantial renovation and over capacity) to be a "lower school" that could house pk-2 and then a neighboring school like John lewis could then be the home of 3-5. It is illogical to close a school getting capital improvements that is overcrowded when there is literally no neighboring schools that can handle taking in all these dispersed students. Also, if transportation efficiency and displacement of families is really a priority of the DCSD, SAP committee, and consulting group then not considering bands or repurposing of buildings in our area was a complete miss.	2/26/2026 6:55 PM
2439	Grade bands for high school should be 10-12; 6-9; and PK-5. As a high school teacher there is a big difference in the maturity and drive of most 9th graders to 10th graders. Allowing 9th graders an extra year to mature will make high school more serious and give students an extra year before their GPA gets calculated with greater weight and consequences.	2/26/2026 6:38 PM
2440	Middle school grades are the most difficult in DeKalb, so care should be taken to address deficiencies in this age cohort.	2/26/2026 6:32 PM
2441	Overall, I do not see the need of creating so many grade band options (see 7).	2/26/2026 6:25 PM
2442	K-8 being combined seems reasonable	2/26/2026 6:24 PM
2443	There is strong balance of students from ES > MS > HS in the Chamblee Cluster. The only need is slightly higher capacity at the ES level. Montgomery has 12 acres, that should be used to expand capacity to ~900 and families north of Peachtree can shift from the over-crowded AP > Mont. AP can continue with facility improvements where needed. This is a cost-efficient solution that keeps communities in tact and keeps the cluster whole.	2/26/2026 6:22 PM
2444	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/26/2026 5:57 PM
2445	I do not like the idea of 6-12. I am not comfortable with that wide age range for those ages. The separate building for 4&5 grade is too much transitioning. K-8 seems more reasonable. Or PK3 & PK4 in separate buildings. Or even PK3-kindergarten in separate building then 1st-5th , 6th-8th, then 9th- 12th.	2/26/2026 5:42 PM
2446	The grade bands are appropriate but could use more lessons to enhance student life	2/26/2026 5:38 PM
2447	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/26/2026 4:18 PM

2448	We'd prefer to leave the ashford park community in tact. If grade bands are considered, we'd like the community to stay together at that grade band.	2/26/2026 4:07 PM
2449	Regarding, the potential grade band scenarios, I oppose having 6-12 because of the age range. You have children who are just becoming adolescents in the same environment with young adults about to leave home. I don't think it's safe and would require more security measures. I'm not convinced about the PK-8 / 9-12 option either because I think the middle school transition is beneficial for students.	2/26/2026 4:01 PM
2450	I think any of the grade band scenarios can make sense where it better matches a facility. I like the idea of even a prek-3, 4-7, 8-12 scenario so it's about 5 years per facility that closer matches the developmental planes of childhood growth. (Govern/garden/guide)	2/26/2026 3:40 PM
2451	Not opposed to differing bands. I'm not familiar with the current research on this, but I've seen positive benefits of kids of different ages interacting on a regular basis, (4th-5th graders doing drop off and pick up, peer tutors, and "big brothers big sisters"-type programs)	2/26/2026 3:35 PM
2452	I do not want to change the grade band scenarios unless they are done district-wide--which I do not think is possible at this time. I see the value in Wadsworth being a 4-8 school, and could support applying that change to Kittredge, as well. However, unless all traditional, non-school choice Middle schools are converted to a 4-8, I do not see the value in converting only a few.	2/26/2026 3:33 PM
2453	I support continuing Pk-5 / 6-8 / 9-12 across the district. However, in the southern part of the district, it makes sense to me that we might need to do some grade band adjustment to shorten commute times and keep communities together. In that scenario, I think the 6-12 campus is the best option. I think it is more important for advanced middle school student to have access to early HS classes than an advanced ES student to have access to early MS classes. Further, I think this makes more sense for access to extra-curricular activities. I would caution the district against a Pk-3 model if splitting elementary into upper and lower. Since EOG testing starts in 3rd grade, I would much prefer a Pk-2 campus and 3-5 campus, similar to Decatur. This means that the students in Pk-2 don't have to have their education impacted by high stakes testing during those years. For clusters where there is already over capacity schools (Like the Dunwoody Cluster), I would prefer to keep the community together and maintain the current grade bands rather than split up the boundaries and have people who live in Dunwoody attend Chamblee HS or the new Sequoya HS.	2/26/2026 3:32 PM
2454	I would like to see more data on benefits to grade band scenarios that aren't the current makeup.	2/26/2026 3:02 PM
2455	I would like to see more data on benefits to grade band scenarios that aren't the current makeup.	2/26/2026 2:59 PM
2456	6th graders should not be in same school as 12th graders, same for 8th graders with little kids. Way too much difference in maturity, growth, and student needs. See alternate suggestion below.	2/26/2026 2:58 PM
2457	I believe the Chamblee cluster should keep its current grade band clusters.	2/26/2026 2:53 PM
2458	Will not support our immediate area correctly.	2/26/2026 2:46 PM
2459	The impact on the individual child needs regarding development and socialization are paramount. The current bands are likely most effective. Disrupting this will have negative impacts that may not be worth the benefits.	2/26/2026 2:43 PM
2460	Oakgrove Elementary could be kept at a prek-3 or 4th grade. It is a great facility and community for that age.	2/26/2026 2:42 PM
2461	It's important to follow the research here. What are the best ways to group students? I'm no longer in education, but I was a classroom teacher and school administrator for 13 years, and I certainly have my preferences and thoughts. As I indicate below, one cluster may be different from another cluster based on needs, but in my experience, I loved the model used in Fairfax County Public Schools: K-6 7-8 9-12 where there's a 9th grade academy (i.e., somewhat separated from gen pop)	2/26/2026 2:42 PM
2462	I think the children that are in our Tucker School Cluster do well at their school. I think it needs to stay Pk-K, 6-8, and 9-12. 11 year old students should not be in a school with 17 or 18 year students. 6-8 grades are very important years for kids to start to develop into independent student.	2/26/2026 2:34 PM

2463	I saw Henderson Mill was also set for closure so I wonder if there's a way to look at Lakeside High and Oak Grove to split the grades between them if Henderson Mill is consolidated. Perhaps add two grades to Oak Grove (k-7) and 1 to Lakeside (8-12).	2/26/2026 2:25 PM
2464	I think it's very risky to impose new grade bands unless there's an overwhelming call from a community for a change. DCSD hasn't successfully implemented alternate grade bands at non-School Choice schools (where kids can be sent back home if they don't "comply") for decades. I see this as an unnecessary complication and risk. I think that the statement that Cross Keys cluster students will either have a K8 experience or be split up into 3 different MS is a terrible idea. The standard MS experience should be an option for Cross Keys cluster kids, just as it is for ALL other DCSD kids. I realize that it would be hard to find 10-15 acres in that area for a MS, not to mention the exorbitant cost to buy and build a new MS. But unless the Cross Keys community loudly supports K8 or a 3-way MS split, then this is not fair to them.	2/26/2026 2:21 PM
2465	kindergarten 2026 pre-kindergarten 2028	2/26/2026 2:16 PM
2466	I am in favor of an alternate grade banding. 7-12 The idea of letting 7-8 grade students have access to higher learning, especially those enrolled in the gifted program, seems to benefit the gifted learning curve. Being in the same building as the traditional 9-12 would allow them to take advanced coursework by sitting in with the next grade levels class. Specifically speaking about the Dunwoody clusters. There are 37% of students at Vanderlyn who are deemed gifted. It would be great to look to the future for those students and offer them the best that they can get.	2/26/2026 2:15 PM
2467	I believe the current grade band structure is the most logical approach, as it helps address the challenges that can arise when young children are grouped with older students. A traditional grade band configuration—such as PK-3, 4-5, 6-8, and 9-12—provides a more developmentally appropriate environment for students at each stage, ensuring their social, emotional, and academic needs are better met.	2/26/2026 1:47 PM
2468	I think it should say the same.	2/26/2026 1:44 PM
2469	Have you considered leaving 6th graders in elementary school & having 7-12 grade? For 6-12 grade model, how would you keep preteens separated from teens, like separate floors or wings?	2/26/2026 1:28 PM
2470	I am not opposed to changing the grade bands, as long as our neighborhood school remains in the Chamblee middle/high school cluster	2/26/2026 1:17 PM
2471	I think grade bands should stay as is.	2/26/2026 1:12 PM
2472	I really appreciate the PK–3 / 4–5 configuration. I came from a district that had a PK-6 / 7-8 configuration. I think, despite the challenges of transitions, these models work well for differing developmental stages of the students. I would want to know more about how this sort of configuration would impact the closure and consolidation process for our district. Specifically in my cluster, I think a different grade band would be very helpful, as we know there is an enrollment drop off at the 4-5 level, with many families opting to move students to other clusters. Applying the PK-3/4-5 model feels like it would improve our children's experiences.	2/26/2026 12:59 PM
2473	(Cedar Grove and Southwest DeKalb clusters) I would prefer to keep the traditional grade band, PK-5, 6-8, 9-12 or if not possible, then the PK-8, 9-12 scenario. I appreciate the consideration for parents who have children in multiple buildings, I was once one of those parents due to the spacing in my children's ages. What is most important is how school culture, instruction, and leadership best impact student achievement.	2/26/2026 12:47 PM
2474	The traditional grade bands are what I want for my children, i am in the Brockett elementary/Henderson middle/Tucker high section. Not a good plan to transition middle schools to merge with high schools in the same building. If you are going to do that we might as well tear down the majority of schools and have large, centralized, multi building k-12 campuses. Not what I want to see but if you're going to start inter-mingling grade groupings having the full range run together seems like the best solution & one that could foster more connections between high school and elementary age children. Get rid of pre-k & have those children in preschool.	2/26/2026 12:31 PM
2475	I have no opinion on consolidations. However, given the low building adequacy score (66%) and high enrollment projections (116%) for Huntley Hills Elementary, I would consider a new building for the school. I would be interested in knowing what the "facility additions" will be. If	2/26/2026 12:30 PM

	they are trailers, then I am highly opposed to expansion of this school and would prefer restricting the attendance area to keep it smaller.	
2476	While I can appreciate some of the education/structural novelty of these grade bands, I think the strain that this increased school change would place on families is untenable. Let's face it, in our current economic landscape, most families have two working parents. It is increasingly rare to see a stay at home parent. Stability is key to raising a kid while working and the more stability the school district can offer, the better. I also think children can benefit from being around students who are multiple years older them. I just don't think there are enough benefits to outweigh the immense logistical hassle and peer-peer experience losses in this grade band scenario.	2/26/2026 12:20 PM
2477	As a parent I do not agree with a 6-12 grade band in high school. There is too large of an age and maturity gap for those children. Pk-2,3-5 grade bands could work	2/26/2026 12:19 PM
2478	SZC	2/26/2026 11:52 AM
2479	If shifting to a K-5, 6-8 and 9-12 the district should ensure middle schools 6-8 are adequately staffed and designed to support early adolescent both academically and socially	2/26/2026 11:44 AM
2480	n/a	2/26/2026 11:42 AM
2481	As for the grade band scenarios. Always felt that middle school was a mishap and I have data to prove it. I believe elementary schools should stay as PK-7. We could maybe combine 8-9 and 10-12 Another solution is to let 8 grade stand along and put 9-12 together, however elementary should go back to ending with 7th grade.	2/26/2026 11:23 AM
2482	I think focusing on the facility closures need to be addressed first before grade band changes can be considered.	2/26/2026 10:46 AM
2483	Current Grade Band is fine for all DCSD Clusters. If seats are needed to fill buildings, DCSD could return to a elementary/high school structure with 6 to 8 grades for each.	2/26/2026 10:38 AM
2484	It’s a lot of transition for kids	2/26/2026 10:00 AM
2485	Oak Grove already meets the district’s utilization target today (about 89%) • The school is projected to reach ~96% capacity next year • Enrollment has been increasing, not declining • Significant new investment and development in our area has likely not yet been reflected in projections • Academic performance, test scores, and teacher retention were not included as closure criteria	2/26/2026 9:58 AM
2486	I like the idea of keeping Chamblee Middle and High Schools, Kittredge and Montgomery as they are high performing with appropriate utilization.	2/26/2026 8:58 AM
2487	I don't really understand the term grade band exactly nor what you all mean about clusters for grade bands. I need an example in order to understand this fully on how this would affect my children.	2/26/2026 8:46 AM
2488	Splitting elementary into lower and upper elementary, or combining elementary/middle and/or middle/high isn’t a bad option so long as you are going to ensure an guarantee that the quality of my child’s education, and every child’s education, isn’t going to be impacted in the slightest. As long as you will actually stand by the county and states commitment to address bullying immediately (which Dekalb historically has turned a blind eye to); putting older students with younger increases the chance that the younger and smaller students will become targets for older students lashing out.	2/26/2026 8:45 AM
2489	NA for me	2/26/2026 8:38 AM
2490	I am strongly opposed to closing Vanderlyn Elementary and urge the district to carefully consider how each proposed grade band scenario would impact our school community and cluster. Traditional PK–5 / 6–8 / 9–12 This model provides the most stability and continuity for elementary students. Keeping a PK–5 structure at Vanderlyn supports age-appropriate learning environments, minimizes transitions during foundational academic years, and preserves the strong school culture that currently exists. This is the least disruptive option for our community and should be prioritized. PK–3 / 4–5 / 6–8 / 9–12 I have significant concerns about splitting elementary grades into PK–3 and 4–5 campuses. This model forces students to transition schools during critical developmental years, disrupting peer relationships and instructional continuity. For young children especially, additional transitions can negatively impact both academic performance and social-emotional well-being. Implementing this within the Vanderlyn	2/26/2026 8:34 AM

	cluster would create unnecessary instability. PK–5 / 6–12 While maintaining PK–5 at Vanderlyn would be positive, combining grades 6–12 at another campus raises concerns about developmental appropriateness. Middle school and high school students have very different needs. A 6–12 model could dilute focus on middle grades and create challenges related to school culture, extracurricular access, and age separation. PK–3 / 4–5 / 6–12 This is the most disruptive scenario. It introduces multiple transitions (PK–3 to 4–5, then again to 6–12), while also combining middle and high school students. For Vanderlyn families, this would significantly reduce stability and increase logistical challenges for parents with multiple children. PK–8 / 9–12 If closure is unavoidable, a PK–8 model would be preferable to splitting elementary grades. A PK–8 structure can provide long-term continuity and reduce transitions, which benefits students academically and socially. However, this must only be implemented if facilities are equipped to handle capacity and if resources are allocated to ensure both elementary and middle grade students receive appropriate programming. Overall, I strongly advocate for preserving Vanderlyn as a PK–5 elementary school within a traditional PK–5 / 6–8 / 9–12 framework. Maintaining neighborhood elementary schools strengthens community engagement, supports student achievement, and avoids unnecessary disruption to young learners. The district should prioritize stability, capacity management, and the long-term well-being of students over short-term consolidation efficiencies.	
2491	The potential grade bands K-2 and 3-5 are acceptable. However how would a parent with a kindergarten student and a fifth grader feel when they have to go to two different schools in the morning?	2/26/2026 8:29 AM
2492	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/26/2026 8:28 AM
2493	I think they should stay the same traditional format.	2/26/2026 8:02 AM
2494	Yes. They should be the same.	2/26/2026 7:57 AM
2495	I do not have any specific strong opinions on the grade band scenarios; however, I will say that I do not see a compelling reason why the current traditional structure should be changed.	2/26/2026 7:09 AM
2496	Grade band configuration should be based on enrollment trends, facility capacity, and developmental alignment — not uniformity across clusters. In clusters experiencing declining enrollment, a PK-5 / 6-12 or PK-8 / 9-12 model may: • Improve resource concentration • Increase program stability • Reduce transition points • Strengthen mentorship opportunities between older and younger students In clusters with stronger or growing high school identity, maintaining a traditional PK-5 / 6-8 / 9-12 model may preserve community cohesion and extracurricular continuity. The district should carefully evaluate where 6–12 campuses could maintain high school identity while optimizing underutilized space.	2/26/2026 7:02 AM
2497	In clusters with smaller elementary schools (eg, Lakeside), I think it makes sense to have flexible grade bands that can change with the student population numbers. The same-grade student community and quality of their educational environment could remain more intact than when shifting geographic attendance boundaries. Perhaps some practical considerations about flexible grade bands would be available from the City of Decatur Schools.	2/26/2026 6:16 AM
2498	I am also concerned about the grade band scenario. My concern is for the lower grades that are now insolated being thrust into high school when perhaps they are not ready for that transition.	2/26/2026 4:18 AM
2499	I recommend to support and upgrade Robert Shaw Theme School to pre-k3 to grade 8.	2/26/2026 12:25 AM
2500	No comment	2/25/2026 10:41 PM
2501	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in	2/25/2026 10:28 PM

	a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	
2502	K-5 is perfect 6-8 is perfect 9-12 is perfect. If ANY changes to be made, it would be to adjust the middle school cluster. But the elementary and high school clusters are perfect.	2/25/2026 10:16 PM
2503	For the Henderson Mill and Evansdale clusters, I support maintaining a traditional K–5 grade band if consolidation is necessary. Splitting grades into K–2 and 3–5 would create unnecessary transitions during key learning years. As a former student of both schools, I believe Evansdale's strong academic culture should be carefully considered in any restructuring decision. Preserving stability and instructional quality should remain a priority.	2/25/2026 10:12 PM
2504	I like the idea of smaller, grade-specific schools - we attended Coralwood for pre-school-k and I wish every child could have that experience. I don't like the idea of k-8 or 6-12, I think age range too wide to be safe in a large school.	2/25/2026 9:47 PM
2505	For my cluster (Tucker), PK - 8 feels like way too many kids in the same building. There are 5 elementary schools that feed into one middle school. That would be like 3000 kids in the same building.	2/25/2026 9:14 PM
2506	Traditional bands are best- when families move across districts and counties, it'll be more consistent for everyone. It's also best not to have such a wide range of ages together, especially when high school age kids are involved .	2/25/2026 9:04 PM
2507	I'm actually disappointed that Ashford Park wasn't given any other scenarios. I wish it had been. That said, the grade band scenarios across the district make sense to me to make better use of buildings. If it was an option given to us, I would certainly consider it, especially the idea of two buildings (a lower and upper) serving grades K-8 or something along those lines to be able to serve more students. But I would have to better understand the scenarios before giving any real feedback. We simply have not been given enough information at this point.	2/25/2026 8:05 PM
2508	I think the grade bands make sense so that you can better utilize the buildings; however, I'm a bit concerned about a sixth grader going to school with a senior in high school, unless they're in separate buildings across a campus.	2/25/2026 7:49 PM
2509	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/25/2026 7:41 PM
2510	Since middle school is such a vulnerable time in child development, I don't think it should be included with high school. PK-5/6-12 cluster.	2/25/2026 7:41 PM
2511	I do not like this idea this may put the younger kids at risk with the older kids. Specifically elementary and middle school kids.	2/25/2026 7:20 PM
2512	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/25/2026 7:03 PM
2513	n/a	2/25/2026 6:54 PM
2514	don't like it little kids and middle or high school shouldn't be in same area	2/25/2026 6:22 PM
2515	Stability should be prioritized for the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake). This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia.	2/25/2026 5:58 PM
2516	The Tucker cluster would benefit from PK-8, but this would require schools the removal of PK programs from schools not adequately able to support the number of students due to building	2/25/2026 5:49 PM

	size. However, this would promote stronger community bonds, stronger teacher-student relationships, greater safety, less stress, and less traffic or need for long bus rides.	
2517	Small schools are crucial. If consolidation needs to happen, I would prefer grades 6-8 be incorporated into the elementary schools.	2/25/2026 5:32 PM
2518	While I value the historical success of our current school structure, I would not be opposed to the proposed K–8 Model For the Chamblee Cluster , provided it is executed with a well-thought-out strategy and strict capacity protections.	2/25/2026 5:22 PM
2519	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/25/2026 5:21 PM
2520	The data supports a "stabilize first" approach for Lakeside (Oak Grove, Sagamore Hills, Briarlake). With Oak Grove near capacity (96% projected) and Sagamore Hills also high (91% current), the cluster is already operating in a tight utilization range. Briarlake's 73% utilization should be viewed in context, since it would be expected to absorb a meaningful portion of Oak Grove's enrollment if consolidation proceeds. Given the cluster's proximity to one of Georgia's largest healthcare and research expansions and continued growth drivers, there is no clear structural-decline rationale for reconfiguring grade bands here. PK–5 structures remain appropriate, and reconfiguration attention should go first to areas experiencing long-term, substantial underutilization.	2/25/2026 5:15 PM
2521	Keep Lakeside's focus on continuity and capacity management. Oak Grove is projected to run at 96% utilization next year, and Sagamore Hills is already at 91%. Briarlake is at 73%, but if consolidation advances, Briarlake would likely need to take on a large share of Oak Grove's students. This cluster is not in decline and sits next to a major healthcare and research growth area in Georgia, with ongoing campus expansion and thousands of new jobs. In a high-utilization, high-growth corridor, PK–5 remains the right default. Structural grade changes should be targeted first to clusters with persistent, significant underuse over time.	2/25/2026 5:09 PM
2522	Great school how it is	2/25/2026 5:02 PM
2523	The cluster of schools in our area does not have declining utilization. In fact, development with multifamily apartment complexes means that the demand will increase--potentially significantly.	2/25/2026 4:55 PM
2524	Grade band should remain the same for the lakeside HS neighborhood. For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/25/2026 4:54 PM
2525	Prefer traditional method based on what we know about specific milestones in each grade/age group. Also, school sizes would be too large if middle and high school were to be combined.	2/25/2026 4:52 PM
2526	The Lakeside cluster (Oak Grove, Sagamore Hills, and Briarlake) should remain as it is. The cluster is not experiencing structural decline. There is so much growth in the area with many new jobs. Traditional PK-5 grade bands remain appropriate in a cluster such as Lakeside, which is a high-utilization, high-growth corridor.	2/25/2026 4:48 PM
2527	For Lakeside, prioritize maintaining current structures. Oak Grove is nearing full capacity (96% projected), Sagamore Hills is also high (91%), and Briarlake's 73% utilization does not reflect long-term decline, especially given the likelihood it would need to accommodate a large share of Oak Grove's students if consolidation occurs. The cluster sits next to a major healthcare and research growth hub with ongoing campus expansion and thousands of jobs being added. In this context, PK–5 grade bands remain appropriate, and grade reconfiguration should be directed first to clusters facing persistent, significant underutilization.	2/25/2026 4:40 PM

2528	The Lakeside cluster should remain focused on stability rather than structural change. Utilization is high at Oak Grove (96% projected) and Sagamore Hills (91% current). Although Briarlake is at 73%, it would be expected to absorb significant enrollment from Oak Grove under a consolidation scenario. With no signs of structural decline and strong nearby drivers of growth, including one of Georgia's largest healthcare and research expansions, maintaining PK–5 grade bands aligns with the corridor's demand. Reconfiguration efforts should start where long-term underutilization is more severe.	2/25/2026 4:38 PM
2529	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/25/2026 4:36 PM
2530	Focus on stability first. I don't care what the grade bands are as long as Oak Grove remains intact. Oak Grove is projected at 96% utilization next year, Sagamore Hills is already at 91%, and while Briarlake is at 73%, it would need to take on a substantial share of Oak Grove's students if consolidation moves forward. This is a high-demand area adjacent to major healthcare and research expansion in Georgia, with continued job growth and campus development. PK–5 remains an appropriate grade band in a growth corridor, and structural reconfiguration should be prioritized in clusters with sustained, significant underutilization.	2/25/2026 4:31 PM
2531	My only opinion is that there should be some separation of older kids from the younger ones	2/25/2026 4:03 PM
2532	Good community and Family vibe	2/25/2026 3:54 PM
2533	6-12 consolation is not on the best interest of a large group of students. DeKalb county already has issues surrounding bullying in smaller grade bands. Expanding the bands will exacerbate those problems. Further, the staffing required to ensure 6th graders are able to navigate their school safely while potentially dealing with 12th graders will need a lot of training and expense.	2/25/2026 3:23 PM
2534	Oak Grove ES	2/25/2026 3:18 PM
2535	There are not extra middle or high school-sized buildings in our cluster that would facilitate any of the alternative grade band scenarios.	2/25/2026 3:17 PM
2536	Again, we feel strongly this will severely upset the balance of education. We would seriously consider removing our children from public school and or moving to another area without this action or consolidation.	2/25/2026 3:03 PM
2537	I believe the traditional grade band approach is most appropriate. Having experienced both a PK-5/6-12 and PK-3 / 4-5 with another child, I believe the traditional model keeps children in more age appropriate clusters. In my area (Oak Grove) we see deterioration of the education experience at the middle school level, when smaller elementary schools all feed into one larger middle school. Many families leave the public school system at that stage. I believe a PK-8/9-12 model could help with this but only if it provides for similar sized elementary school populations and smaller middle school populations.	2/25/2026 2:22 PM
2538	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/25/2026 2:08 PM
2539	Closing Vanderlyn is a mistake. It's a great school.	2/25/2026 2:05 PM
2540	I think it's wise to explore different grade band scenarios as I know districts around us use these models. I do think Dekalb is diverse and we should look at neighborhoods and the students served in those neighborhoods and what would be most beneficial for them. For example, maybe in some areas a K-8 is beneficial bc it allows for less transitions and drop offs.	2/25/2026 1:51 PM

2541	bra do u	2/25/2026 1:31 PM
2542	Traditional Grade Bands (K-5, 6-8, and 9-12) make the most sense considering the logistical complexities of staffing and transportation. In the Cross Keys Cluster, since there is no middle school, would all elementary schools shift to a K-8 model? If yes, do the current buildings have the capacity for that shift?	2/25/2026 1:24 PM
2543	I do not think 6-12 should ever be together	2/25/2026 1:10 PM
2544	Evansdale: older children may be inappropriate for younger students.	2/25/2026 1:07 PM
2545	PK- 8 and 6-12 are concerning regardless of cluster. Those are extreme developmental stages in the same building. Even with the best of scheduling and building intentions, you will have students up to 10 years or more difference in ages interacting.	2/25/2026 12:37 PM
2546	I like the 6-12 scenario. For parents with students in middle and high school they can have 1 school for both.	2/25/2026 12:07 PM
2547	I am uncertain of the social aspects of having elementary age student in closer contact and environment as middle school aged students. I do not know of examples of this being done effectively elsewhere, but it gives me pause.	2/25/2026 11:36 AM
2548	I would be ok with PK-6 or even PK-8 but not 6-12 for the dunwoody cluster. I do think it needs to be consistent along the cluster.	2/25/2026 11:33 AM
2549	Keep younger kids separated from teens as long as possible	2/25/2026 11:04 AM
2550	I am concerned about the grade band scenarios because of the difference between a 6th grader and a 12th grader however I am supportive of more strategically using our buildings. Splitting elementary school students to two buildings/grade bands would be very hard for parents and effective drop off/pickup. I would like to hear more about school start and end times to better inform this. I also heard repeatedly on the call that we would need more bus drivers and that seems like it is already a problem in Dekalb.	2/25/2026 10:38 AM
2551	Having previously worked in education for 26 years, I feel that the grouping of the PK-3 / 4-5 / 6-8 / 9-12 grade band works well, although I understand the drawback of not being able to share resources.	2/25/2026 10:26 AM
2552	They’re pretty good	2/25/2026 10:21 AM
2553	I think you should never consider a 6th-12th scenario. That is too wide of an expanse of ages to cover that is good for the mental health of those students. Especially given that these schools would be large in configuration in public school, I would consider it in a private school, smaller class K-12th scenario only.	2/25/2026 10:20 AM
2554	I prefer not to have younger trades (6-8) combined with high school students. They would be on the same busses and potentially same hallways and I think it is not best for the younger students.	2/25/2026 10:13 AM
2555	They fight a lot	2/25/2026 10:13 AM
2556	Good	2/25/2026 10:12 AM
2557	N/A	2/25/2026 10:10 AM
2558	None	2/25/2026 10:06 AM
2559	.	2/25/2026 10:06 AM
2560	great	2/25/2026 10:04 AM
2561	9–12 should stay 9–12. High school should just be high school. they already be dating freshman’s as a junior/senior which is weird	2/25/2026 10:03 AM
2562	Currently indifferent.	2/25/2026 10:02 AM
2563	idk	2/25/2026 10:00 AM
2564	N/A	2/25/2026 9:59 AM
2565	This is not a bad idea but it all depends on how we are grouping the grades. Dekalb schools can change into being K-8th and 9th-12 so there is no more middle schools.	2/25/2026 9:59 AM

2566	?	2/25/2026 9:56 AM
2567	I think the band is good	2/25/2026 9:56 AM
2568	neutral	2/25/2026 9:52 AM
2569	good	2/25/2026 9:46 AM
2570	Its good	2/25/2026 9:43 AM
2571	I am only in favor of grade bands if the cluster elementary schools stay in place. I want my children in my neighborhood school.	2/25/2026 9:36 AM
2572	I don't agree with middle school children going to school with high school students. The maturity levels are different and the student's needs are different. It also creates a potential for bullying.	2/25/2026 9:29 AM
2573	I would like to see Kittredge Magnet expanded to a 4-8 school. It would be lovely if the program could accept twice as many students for 6-8 grade. I love the size of the school for 4-5th graders - this is typically a population that was being underserved at their home school and greatly benefits from the structure, executive functioning, and accelerated classes. Note the high numbers of students with 504s, IEPs and gifted classifications. KMS is able to cater their needs at a critical educational point in their lives. I also think that Montgomery and Huntley Hills students and teachers would perform best in a PreK-2 and 3-5 shared grade band. Please look closely at school choice programs and note that they would benefit from larger programs at the 3-5th grade levels offering more ample and appropriate socialization and larger access to subject-specific teachers. Quite frankly, I think many students in the HHES Montessori school choice program would gladly switch to Traditional classes beginning in third grade if the school was able to abundantly equip the students with accelerated and gifted learning in a traditional environment that better prepares them for middle and high school. Unfortunately I do not believe the Montessori program is beneficial or competitive beginning in third grade. There are mixed feelings regarding the HHES traditional program due to its high ESOL population. Students not needing the ESOL content may find that traditional classes are not on grade-level and not accelerated enough to be competitive and produce adequate or exceptional results.	2/25/2026 9:01 AM
2574	I would prefer that Ashford Park be a PK-5 or PK-3 and 4-5 and that could be split between different buildings. My main preference would be that the overall cluster remain the same.	2/25/2026 8:54 AM
2575	Just to combine them will not be right good ideal, that more on teachers as well as students. If some students could do homeschool that might be better than combine students.	2/25/2026 8:02 AM
2576	I didn't read about specific grade band scenarios, but this also makes sense for communities that do not want their schools to close. You have a space that's too big and so you share the space. From a school employee point of view, this would probably be a nightmare to make sure the cafeteria schedule can accommodate meals for all students and each grade has adequate access to libraries, gyms, etc.	2/25/2026 6:30 AM
2577	Don't have much	2/25/2026 5:00 AM
2578	You cannot put middle schoolers with high schoolers. That's a ridulous scenerio.	2/25/2026 3:42 AM
2579	The proposed grade band scenarios are fine.	2/25/2026 12:04 AM
2580	I do not think this is a good idea.	2/24/2026 11:45 PM
2581	Please share your feedback on the potential grade band scenarios, please be specific to the schools or clusters you are referencing along with the grade bands.	2/24/2026 11:31 PM
2582	idgaf about grade band kiss my bootay	2/24/2026 11:21 PM
2583	It's better for the kids to keep middle school agreed kids and elementary aged kids separated. Are you doing the purely for financial reasons, or do you actually care about the kids?	2/24/2026 11:21 PM
2584	Aside from the facilities, considering changing the grade bands is an idea worth further exploring. Potentially, this could aide in cost savings while providing value by changing grade bands to better align with developmental milestones. Even though there is another transition, it could work to have PK-3/4-5 bands with smaller class settings, while combining 6-12 seems to make sense as the structure of middle and high school have more similarities.	2/24/2026 11:09 PM
2585	Moving to a split model (for example, K–2 at one campus and 3–5 at another) or shifting to a	2/24/2026 10:27 PM

	K–3 / 4–5 or similar configuration risks disrupting a successful instructional environment. Elementary students benefit from continuity in leadership, peer relationships, and academic programming. Breaking apart grade bands at a high-performing school could: • Disrupt established academic systems • Increase transitions during critical developmental years • Weaken school culture and community cohesion If grade band restructuring is being considered within the Dunwoody cluster, the district should clearly explain how altering a successful K–5 model at Vanderlyn would improve student outcomes or operational efficiency. Changes should prioritize academic stability and student experience — especially at schools where the current structure is demonstrably working.	
2586	Find a better way to break up middle school, as this is the most challenging time for kids developmentally and they need smaller environments with more support.	2/24/2026 10:21 PM
2587	Not a big deal for elementary	2/24/2026 10:07 PM
2588	The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made.	2/24/2026 9:22 PM
2589	I don’t hate the ideas of grade bands and see that it could be beneficial in many ways. I only have two kids so it feels doable but can see how it would be challenging with families with more kids, trying to navigate multiple drops off and pickups etc.	2/24/2026 8:58 PM
2590	I am currently a parent of a pre-k student at Vanderlyn, and have a younger sibling we would like to send there as well. I would like more information regarding the potential reasoning and benefits of grade banding, but without that right now, would lean towards a traditional pattern, our combining the older students. It seems like a lot for pre-k students to attend school with 8th graders.	2/24/2026 8:54 PM
2591	I don’t mind somewhat alternate grade bands except when it’s used as an excuse to make schools larger. But, putting high schoolers in with middle schoolers without a plan for separation is incredibly risky esp. in terms of keeping our younger girls safe. They can be targeted by older boys for their niavete and desire to be accepted	2/24/2026 8:28 PM
2592	Keep the band m scenarios as they are.	2/24/2026 8:23 PM
2593	I like either the traditional model or prek - 8th and then 9th - 12th. I would not want a 6th-8th grade kid in the same school as a high school kid.	2/24/2026 8:17 PM
2594	I am very concerned about having younger students with much older students. This is not going to end well.	2/24/2026 8:00 PM
2595	When I went to Ashford Park and then later Cross Keys as a child/teenager, the grade went from 1-7 (elementary school), then 8-12 (high school) It worked very well for all of concerned, and grouping students in these wide bands would put more students in the largest buildings and help keep the neighborhoods together.	2/24/2026 7:23 PM
2596	K-5, 6-8, and 9-12 makes sense	2/24/2026 6:56 PM
2597	Traditional Elementary, Middle, High School in separate buildings.	2/24/2026 6:48 PM
2598	I am supportive of a more traditional grade banding due to the difficulties in raising and educating kids in today's environment	2/24/2026 6:42 PM
2599	N/A	2/24/2026 6:39 PM
2600	Im optimistic about the various choice because I grew up in dekalb and are a product of DeKalb Schools and things was so much better when k-7 was elementary and 8-12 was high school. Having middle school with hours 8-4 is so exhausting and makes things difficult for families to be home together at same time. It's like we're waiting on the middle school child all day because they home on the bus after 4 depending on traffic etc. Our staff, teachers don't get home to their families at decent times as well. All of the above aforementioned needs to be considered.	2/24/2026 6:31 PM
2601	Cedar Grove High School.	2/24/2026 6:29 PM
2602	Pre K to 8 th grade and 9-12.	2/24/2026 6:25 PM
2603	I understand and appreciate that this exercise has been incredibly challenging given the very diverse and complex geographic, demographic, and socioeconomic conditions that make	2/24/2026 6:07 PM

	DeKalb County the wonderful melting pot that it is. I would encourage and support flexibility in grade band structure by cluster - specifically being located in the Dunwoody cluster, I would advocate for keeping banding as it is given long-term neighborhood friendships of varying ages/grades may end up in separate schools, but if necessary I would think limiting it to a one-time instance in Pre-K would be better than in MS and/or HS when kids are more mature, developed, and entrenched with friends, athletics and social circles.	
2604	N/a	2/24/2026 6:05 PM
2605	I honestly do not know the research, I am fine with traditional since it is what I know.	2/24/2026 6:04 PM
2606	I support keeping the traditional grade band clusters as they are today.	2/24/2026 6:01 PM
2607	No specific feedback	2/24/2026 5:45 PM
2608	Rather than closing Evansdale, consider “unloading” Henderson Middle. Evansdale’a dual language immersion and proximity to so many family homes makes it truly a neighborhood school with high family/parental involvement. This draws more local families to attend public schools rather than choosing other options.	2/24/2026 4:46 PM
2609	I think it is unwise to have high school students in the same buildings as 6th -8th graders. I think it exposes the younger students to potential high school concerns like drug use, gang involvement, sexual activity, etc.	2/24/2026 4:45 PM
2610	Dunwoody HIgh School Cluster	2/24/2026 4:41 PM
2611	I think the current framework for grades is serving Deklab students well.	2/24/2026 4:34 PM
2612	I have heard about some schools already not being able to handle capacity. I honestly can't see my children, who attend the Cedar Grove cluster going to other schools where it may be way too crowded.	2/24/2026 4:01 PM
2613	Traditional grade bands helps the students to not transition so frequently and keeps the populations of the schools. It also keeps administrative and resource staffing down since they are in charge of more grades per school.	2/24/2026 3:53 PM
2614	I do not think we should have 6th graders in the same building as 12th graders, but I also see potential issues with 8th graders being in the same building as pre-k students. I feel like the traditional PK-5 / 6-8 / 9-12 is probably best, but I can also see benefit in doing PK-6/7-12.	2/24/2026 3:44 PM
2615	there shouldn't be a bigger age gap than what we have in the traditionnal bands . 5 yo should not be in the same school as 14 year old. The fight against bullying wil be greatly impacted for our younger kids in a larger school with older students.	2/24/2026 3:28 PM
2616	I also agree	2/24/2026 3:27 PM
2617	I disagree with breaking up the elementary schools in this way because it causes families of younger students to have to balance multiple school communities which is difficult. Our small PK-5 community school allows for special relationships between teachers/staff and students and families in the community. It provided great opportunities for older students to support younger students and to learn about and experience true leadership in a place where they feel truly supported and connected.	2/24/2026 3:24 PM
2618	I think it is good to keep younger kids separated from older kids but I don’t have an established option about this as of yet. If need to understand what difference it would make for our cluster.	2/24/2026 3:15 PM
2619	I think grade bands are another way to increase student enrollment in individual campuses. Not sure if that is the best outcome for Dekalb Co students (larger student -to -teacher ratios should not be an acceptable outcome of the SAP).	2/24/2026 3:04 PM
2620	Changing the grade bands to equalize numbers of students at a particular school should be used and should be adjusted each year, if necessary.	2/24/2026 3:02 PM
2621	Bend the grade bands as necessary.	2/24/2026 3:01 PM
2622	I don’t have a specific opinion on this.	2/24/2026 2:29 PM
2623	I think the structure should remain the same as they are now, with our ES being PreK or K - 5th, middle at 6-8 and high 9-12. Developmentally I would not want my preK student in the same building as middle school teenagers with very different needs. I am currently spread	2/24/2026 2:21 PM

	across three school as it is, and it is challenging, but I would not want my current 3rd grader in the same space as my current 8th grader. Youd have to do too much modification of facilities to meet the needs of either end of those age spectrums and it seems forced just to provide convenience to drive to less buildings. If at least one of my kids has the ability to walk to school that is incredibly helpful, but it is not required. Keep it like the traditional grade band scenarios to address age- appropriate needs head on and with specificity.	
2624	There is NO need for public preschool, especially down to PK3. We MUST use those resources for current K-12. We are already lacking in those areas, why are we continuing to stretch resources thinner?	2/24/2026 2:19 PM
2625	There should not be students together of large age and developmental differences.	2/24/2026 2:16 PM
2626	I've always been a fan of K-8 and 9-12. Maybe create Pre K cluster schools. And each feeder district could have its own alternative schools.	2/24/2026 1:55 PM
2627	Henderson elementary is right on major road for easy traffic flow.	2/24/2026 1:26 PM
2628	You have a tough job deciding which schools should have more middle schools combined with some high schools. Unfortunately not many folks will be happy for	2/24/2026 1:13 PM
2629	My daughter went to the PreK The Learning Center for two years (Pk3 & PK4) this is an amazing program however I don't know if it is going as well being implemented in the schools and having a school with all PreK students i feels works much better and allows more access.	2/24/2026 1:01 PM
2630	In Dunwoody, Dunwoody High School seems over capacitated and could move 9th and maybe 10th grade to Vanderlyn due to proximity. Kingsley Elementary could also be repurposed to hold all Pre-K and Kindergarten in Dunwoody, which would relieve some room in the other elementary schools.	2/24/2026 12:46 PM
2631	Keep the grades K-5, 6-8, and 9-12.	2/24/2026 12:39 PM
2632	I think all decisions should be focused on the goal of the best education possible for our children. Not be a facilities / cost savings measure. The quality of schools is deeply important to communities both in terms of quality of life but also continued property value.	2/24/2026 12:38 PM
2633	We do not support grade-band scenarios that would break up Vanderlyn Elementary or split elementary grades across different schools/buildings. Our feedback is specific to Vanderlyn Elementary in the Dunwoody cluster, and we strongly support keeping Vanderlyn together as a PreK–5 school. Breaking up the school would create unnecessary transitions for young children, disrupt continuity in learning and relationships, and weaken the close-knit school community that makes Vanderlyn so special. Elementary students benefit from staying in one school community through these important early years. There is also real value in having a school community with a range of ages together, similar to the benefits often emphasized in Montessori philosophy. Older students can help younger students, serve as role models, and learn responsibility and leadership. Younger students benefit from seeing those examples and growing into them over time. Please preserve Vanderlyn Elementary as a unified PreK–5 school.	2/24/2026 12:05 PM
2634	I am not in favor of adjusting grade bands and have not viewed that part of the proposal carefully.	2/24/2026 12:03 PM
2635	This structure aligns with most districts across Georgia and provides consistency for families who move between systems. It also supports age-appropriate academic programming, extracurricular offerings, and developmental transitions at key stages. For clusters such as Chamblee, Lakeside, Dunwoody, and other North DeKalb high school clusters, maintaining the traditional grade bands would preserve feeder pattern clarity and avoid unnecessary structural disruption on top of any facility changes. Stability in grade configuration, especially during a period of potential consolidations, would help minimize confusion, protect academic continuity, and maintain alignment with statewide norms.	2/24/2026 11:50 AM
2636	I think the grade bands should stay as they are.	2/24/2026 11:36 AM
2637	Henderson Mill Elementary is a small schools compare with others facilities. We have trust and support the decisions our Principal will take to be able to balance the budget assigned.	2/24/2026 11:35 AM
2638	I would like to see more Early Childhood Centers. I think PK-3 schools and 4-5 (or 4-6) schools would be a good idea. I'd also like to see 8th grade back in high school. Too often, 9th graders struggle adapting to high school, and they fail their classes. Back in my day (because I'm old	2/24/2026 11:32 AM

	enough to say that), 8th grade was in high school. The 8th graders struggled the same way the current 9th graders struggled. But the difference is, 8th grade doesn't go on your transcript. Most students were able to recalibrate and begin succeeding in 9th grade when it actually counts. I don't know if that's a change the district is allowed to make, but I say, bring back Subbies!	
2639	He is Next year pre _k	2/24/2026 11:27 AM
2640	I've been focused on the possible closures, and dont' have an opinion yet on the grade bands.	2/24/2026 11:24 AM
2641	Evansdale could include 6th grade also, or 6 and 7, to reduce Henderson Middle which seems overcrowded.	2/24/2026 11:15 AM
2642	N/A	2/24/2026 11:01 AM
2643	Sharing that data without also sharing how dcsd will change curriculum or reduce district overhead is appalling.	2/24/2026 10:44 AM
2644	I generally support this.	2/24/2026 9:52 AM
2645	The best scenrios is the traditional or the where it is combinded middle and high.	2/24/2026 9:52 AM
2646	PK-3 and 4-5 grade bands should be considered where schools are in close proximity, so as not to burden families and to ensure parental support and involvement. I would NOT want to see PK-8 grade bands due to the age range and different developmental stages in the same facility. This is an added concern in aftercare programs. It would also negatively impact the middle school age students and their programs offered and prepared for high school. Massive schools may be less costly but they sacrifice effective management, parental involvement, culture and community connection as families have to travel farther. They will also lose families to private and charter options.	2/24/2026 9:13 AM
2647	I do not like the new grade band scenarios.	2/24/2026 9:09 AM
2648	I urge you not to combine 6-12. I was in a school with 7-12 and despite efforts to separate, there was bullying, fights and romantic/sexual mixing if the 7/8 graders with 12th graders.	2/24/2026 9:07 AM
2649	Combining middle and high school seems like a horrible idea for the students. It may be more cost-effective, but I do not think 6th-grade girls need to be in the same building as 12th-grade boys.	2/24/2026 8:34 AM
2650	I believe that the Cedar Grove Cluster band does very well. Band should be taught from the PK level as music education does well for students.	2/24/2026 8:24 AM
2651	Consider the age, maturity, and access of the students today when thinking of placing 6th graders with 12th graders.	2/24/2026 7:54 AM
2652	I think grades bands can be flexible, but need to keep in mind some separation based on maturity/adolescent ages. I.e. if a 6-12 grade scenario occurs, school structure (physical, classes) needs to support the development differences of a 6th grader vs 12th grader.	2/23/2026 10:37 PM
2653	I am unsure how i feel about the grade band. But mentally I prefer the smaller separate brands because children maturity levels clearly differ from these small age adjustments. Blending middle school with upper or high school classmates, I see as a forced maturity culture and can cause over maturity for many ages.	2/23/2026 10:35 PM
2654	I do not agree with the Grade bands due to the age demographics and maturity level of students younger children should not be with older children. Older grades have the ability and advantage point to get a hold to contraband that should not be in school. In addition to that not enough security.	2/23/2026 10:32 PM
2655	I think grade bands at the elementary school level are fine.	2/23/2026 10:29 PM
2656	New Grade bands does not sound like a good idea	2/23/2026 10:15 PM
2657	All clusters need the same Elementary: PK-4, Middle: 5-8, High: 9-12. This fosters a student maturity level, educational capabilities and expectations including education, social and performative.	2/23/2026 10:06 PM
2658	6-12 is a bad idea. Some of the older kids aren’t mature enough to be around that age children.	2/23/2026 8:58 PM
2659	Having smaller grade bands within school creates more flexibility for students' needs	2/23/2026 8:54 PM

2660	I am referencing the Ashford Park /Chamblee Schools/clusters. I believe that high school should be 9-12, middle school should be 6-8. Elementary school can remain at k-5 or split or 4-5 from k-3. I do not believe 6th graders and 12th graders should be in the same building. There is a huge maturity discrepancy in that age range.	2/23/2026 8:34 PM
2661	6-12 is too big of a grade band to place in one location.	2/23/2026 8:11 PM
2662	We are in favor of the current Druid hills high school location becoming a 6-12 school.	2/23/2026 8:00 PM
2663	Not sure i would like my 11yo in the same facility as a 19 yo. I am against this idea.	2/23/2026 7:08 PM
2664	Firmly disagree with putting middle school aged children with high school children. Far too much risk with such broad age ranges.	2/23/2026 6:54 PM
2665	K-12	2/23/2026 6:31 PM
2666	All answers are in reference to the Dunwoody Cluster. I am a Vanderlyn parent of two with one entering K next year and one going to Peachtree Middle next year. The traditional grade bands are best.	2/23/2026 6:08 PM
2667	My schools have not been impacted but I supposed the grade band expansion if the schools can accommodate.	2/23/2026 5:48 PM
2668	None to give.	2/23/2026 4:34 PM
2669	Middle school kids and high school students should not be attending the same school.	2/23/2026 4:02 PM
2670	As for the grade bands scenarios, I believe they should remain traditional. I say that because unless we have the schools set up with grade level academy's then coming together for example middle school with high school will not be safe. I say that because some years ago we had another school to use trailers on our premises and it increase fights in the school and with the other school on sight. I believe having elementary students mixed with middle school students will not be safe as well. Unless the schools are set up with academy's, separate bathrooms (anything can break out like a fight, vaping, gambling or etc.), and different lunch schedule. Why allow a child in grade 1 to experience a fight of upper classmen. Why plant the seed of what they see to solve issues then to what is heard of how to resolve or prevent in an elementary setting. I believe keeping certain age groups separate will not allow opportunities that will expose younger students to negative issues/concerns that older students may see daily or weekly.	2/23/2026 3:54 PM
2671	Regarding the potential grade band scenarios, I strongly support maintaining the traditional K–5 structure at Avondale Elementary within its current cluster. Keeping elementary students together in a consistent K–5 model provides stability, stronger teacher-student relationships, and continuity in academic instruction during critical developmental years. Splitting elementary grades into separate campuses (such as K–2 and 3–5) or altering the grade configuration could create unnecessary transitions and disrupt the progress students have already made. Maintaining the current grade band at Avondale Elementary best supports academic growth, emotional stability, and community cohesion within the cluster. I respectfully request that the district prioritize continuity and avoid restructuring grade bands in ways that would require currently enrolled students to change campuses.	2/23/2026 3:45 PM
2672	expanding grade band will work only if facility is big enough. there are so many trailers added to the various schools, i fear this just lead to costly rebuilding/renovation, while we're trying to run efficiently.	2/23/2026 3:45 PM
2673	I see the benefits of all of them.	2/23/2026 3:31 PM
2674	I'm in the way the situation can work depending on how the county can split the amount of students in certain areas and the number of bus drivers and people living situations but just combining and closing down the schools will be a big issue but the number one thing is the budget and how the budget is using over the years DeKalb county School system been using the budget not like they supposed to do two people lack of responsibilities something needs to change but closing down the schools is not going to help but you really going to have to have parents and teachers and board input before making dramatic decisions like this	2/23/2026 3:28 PM
2675	I believe both proposed grade-band scenarios, PK–3/4–5 configurations, and 6–12 campuses could work well, depending on the specific cluster and community needs. For example, in clusters such as the Stephenson High School cluster or the Martin Luther King Jr. High School cluster, a PK–3/4–5 model could provide strong foundational support during the early learning	2/23/2026 2:52 PM

	years. Separating PK–3 from 4–5 allows schools to focus specifically on early literacy and developmental skills in the lower grades, while upper elementary (4–5) can begin preparing students academically and socially for middle school expectations. This structure gives students a gradual transition rather than a sudden shift. I also support the idea of 6–12 campuses in certain clusters. A 6–12 model could create continuity, stronger relationships between students and staff, and better academic alignment from middle to high school. In clusters where enrollment numbers support it, this could help students feel more stable and better prepared for graduation requirements. As a product of DeKalb County Schools, I attended elementary school through 7th grade and transitioned to high school in 8th grade, and I was successful. Because of that experience, I believe nontraditional grade bands can work when there is structure, support, and clear expectations. Ultimately, whichever model is selected, consistency, academic alignment, and student support should be the priority.	
2676	I don't believe a 6-12 environment would be good, but I do feel a k-8 might be a good option in some areasl.	2/23/2026 2:46 PM
2677	Stop looking at the schools as the problem. Teachers are not the problem schools should not need to be at full capacity. Having no Reading Specialists at some Elementary schools is another Stupid County decision that make s the school look bad. However this is a Dekalb County HQ decision. Fire yourselves.	2/23/2026 2:40 PM
2678	The PK-3 scenario just doesn’t seem feasible. 4 and 5th graders are still young enough to need help getting home from school just as much as pk-3. Also for those who have multiple elementary aged kids- they don’t need another roadblock. As someone with 4 kids I would love the pk-8 schools although I understand how that could make some parents nervous. I think a PK-1 would be better than PK-3.	2/23/2026 2:33 PM
2679	I think grade bands (P-3)/ (4-5)/ (6-8) and (9-12) would create a better community environment for the students. Resources could be distributed according to grade levels and needs. It would be a good balance. The Traditional grade bands are also beneficial.	2/23/2026 2:21 PM
2680	Previous DCSD leaders made a mistake when they adopted the middle school concept. Many stakeholders despise the 3 school model. Not only is it developmentally harmful to many children, it is inconvenient for many families, who may have multiple children in three different schools. Three schools per cluster can create large feeder zones that make it impossible for high school students to fully participate in before- and after-school programs, due to parents' inability to provide transportation. Please provide a scenario proposal for PK-7 and 8-12 clusters. Also, please do not propose any grade band design that expands the number of separate schools with small grade bands, such as PK-2, 3-5, 6-8, 9-12 or similar. This is a nightmare for busy families to keep up with emails, meetings, programs, bus schedules, etc... for so many schools. Please also consider how grade bands impact schools in emergency situations, such as early closures due to inclement weather that have happened in the past. Working parents who suddenly have to leave work and pick up children from 3 separate school buildings is a nightmare for all stakeholders and creates chaos in our communities. A 7th grader can safely walk a younger sibling home from school in an emergency, if they live in close proximity to the school.	2/23/2026 2:08 PM
2681	I am concerned about the current large class sizes at the school.	2/23/2026 1:45 PM
2682	I think the grade bands should stay the same across all clusters.	2/23/2026 1:44 PM
2683	In my opinion 6-12 is too wide of an age gap to be housed in the same school building. 6-8 grade students will be targets for bullying by older students.	2/23/2026 1:35 PM
2684	Would prefer to keep 6th graders out of middle school, but agree that 7th and 8th graders benefit from larger middle schools where they can take more advanced and specialized classes.	2/23/2026 1:25 PM
2685	6th graders should not be banded with rising adults.	2/23/2026 1:20 PM
2686	If this happens, I think it would be important to physically separate older kids from younger kids for safety reasons	2/23/2026 12:59 PM
2687	If elementary & middle or middle & high school students are in the same building, but different "wings" or areas, I think that's fine. But, Kindergarteners and 12th graders shouldn't be crossing paths, in my opinion.	2/23/2026 12:53 PM
2688	The current traditional 3-bands makes most sense for child development.	2/23/2026 12:43 PM

2689	Towers ought to continue functioning as a high school, while Bethune should persist as a middle school. Both institutions boast Celebrity alumni who frequently mention them in various interviews they participate in.	2/23/2026 12:41 PM
2690	In reference to the Cedar Grove Cluster, I believe a better suggestion would be to make Cedar Grove HS an 8th-12th grade school. Allow Cedar Grove Elementary to accommodate K-7th. I am totally against having Cedar Grove High School combine with McNair and making it a middle school.	2/23/2026 12:24 PM
2691	I am not in favor of k-8. I prefer K-5, 6-8, and 9-12	2/23/2026 12:15 PM
2692	Clustering is a bad idea for the students as well as the teachers. The teachers are already having issues with 28 kids in one classroom imagine all those different age groups clustering together. The kids won't be able to focus because it will be too many kids in a classroom too much distractions. Keep the schools the way they are, keep the grades separate they are that way for a reason. Elementary school needs to be Pre-K to maybe 6th grade, that's how my school was in the 2000s. Hire more teachers add better incentives for them to want to work there: dekalb county police is offering bonuses maybe offer new employees bonuses for the new teachers and raises for the teachers that have been at the school for years they need to be paid more so that we can have more teachers that way the schools will not experience this terrible idea you all or Norman Sauce has come up with. Do not let this MAN we don't know ruin our schools please and thank you.	2/23/2026 12:09 PM
2693	I grew up in South DeKalb in the late 70s & 80s where elementary was k-7 & Highschool was 8-12. I started Gordon high back in 85 & it was a nightmare being with 18 & even 19 year old students being preyed on especially when it came to 8th grade girls & senior boys. It was a complete predatory environment. 6th-12th grade together would lead to all types of issues that the county better be ready for!	2/23/2026 12:07 PM
2694	6-12 grade band would prove to be resource effective, however the change and transition for middle aged students need to be priority as to keep the middle school students safe and prioritized.	2/23/2026 12:06 PM
2695	Lithonia Cluster- While my school is overcrowded, Title I, and historically low-performing, I have witnessed real cultural improvements—better student behavior, higher staff collaboration, and a more structured learning environment. A grade-band shift (such as turning Lithonia High into a middle school) introduces: A full student-population reset, including new developmental needs A staffing reassignment process that may disrupt the stability we are finally building A loss of momentum at a time when our culture is improving Because culture is a fragile, long-term effort, major changes should be timed carefully so the gains made in the last two years are not reversed. I understand the data-driven need for realignment as enrollment has dropped significantly across the district. However, grade band shifts require attention to: a. Instructional Coherence Moving from high school to middle school programming requires: -different certification needs -different academic models new intervention structures This must be planned with teacher voice at the center. Our students need consistent systems, SEL supports, and stable leadership. A sudden grade-band shift may create anxiety for families already facing instability and overcrowding. The schools proposed for conversion and closure impact primarily South DeKalb, including Lithonia, Cedar Grove, Towers, and multiple middle schools. This geographic pattern should be examined through an equity lens so we ensure that disproportionate disruption does not fall on one region.	2/23/2026 12:03 PM
2696	Anything that puts adolescents together with 9-12 does not get my vote. 6-8th grade are vulnerable times for the social development of the kids (which is MORE important than academic skills, as we can be lifelong learners ONLY if we are emotional and socially stable adults). Kids need to be kids as long as we can support them be so. Grouping at child levels (pk-5) is less of an issue, and can be beneficial to both younger and older students. But 6-8th graders are at a scientifically and fundamentally different stage of life, and need to have that recognized.	2/23/2026 12:00 PM
2697	Cedar Grove Middle (Current Grades 6–8) Scenario Impact: If Cedar Grove were converted to a 5–8 middle school or merged with neighboring clusters: Pros: Potentially aligns feeder elementary schools and reduces transition points. Cons: Expanding to include 5th grade could strain facilities and resources, and merging 6–8 students into another cluster may disrupt academic and social continuity. Recommendation: Maintain current 6–8 grade band. Cedar Grove Middle has established programs, such as STEM and gifted services, optimized for this grade span. Transition disruptions could negatively impact student learning and engagement.	2/23/2026 11:54 AM

2698	Leave them traditional, too many older generations in	2/23/2026 11:52 AM
2699	For middle schools, this should allow students to grow in a variety of areas.	2/23/2026 11:47 AM
2700	Elementary, middle and highschool	2/23/2026 11:45 AM
2701	1-4, 5-8, 9-12. McNair cluster	2/23/2026 11:42 AM
2702	Grade band scenarios sound logical. Many parents with children in middle/high will find it easier to digest if siblings are pulled together during the transition.	2/23/2026 11:40 AM
2703	I think the middle school and high schools should be separated because children develop at different stages.	2/23/2026 11:39 AM
2704	I came from a K-7 / 8-12 model in DCSD back in the day. After seeing my own children move through the PK-5 / 6-8 / 9-12 model, I'm not so sure that we didn't have it better back in my day.	2/23/2026 11:36 AM
2705	In reviewing the potential grade band scenarios, I encourage careful consideration of how changes would affect specific schools and clusters, particularly in terms of balance, continuity, and community impact. For example, in the southern cluster, shifting elementary schools to a K–5 model while transitioning the middle grades to a centralized 6–8 configuration may create larger enrollment concentrations and longer transition points for students. If certain southern schools are proposed to move to a K–4 structure feeding into a 5–8 campus, the district should closely evaluate capacity, transportation implications, and the academic and social-emotional impact of introducing an additional transition year. Conversely, in northern clusters where schools may remain in a traditional K–5 and 6–8 model, it will be important to assess whether resource allocation, programming access, and enrollment stability remain equitable across regions. If any individual schools are proposed to shift to a K–8 or 6–12 configuration, additional clarity is needed regarding staffing, scheduling, extracurricular access, and facility readiness to support those expanded grade bands. Overall, I recommend that each proposed grade band scenario clearly outline the rationale for specific schools or clusters, demonstrate equitable regional distribution, and provide transparent data on enrollment projections, capacity, transportation impact, and academic outcomes to support informed decision-making.	2/23/2026 10:31 AM
2706	The Lakeside cluster would benefit most from preserving its current structure and avoiding unnecessary disruption. Oak Grove is projected to operate at 96% utilization next year, and Sagamore Hills is already near capacity at 91%. While Briarlake is at 73%, it would need to take on a substantial portion of Oak Grove's enrollment under a consolidation scenario, which would rapidly tighten its available space. This area is not shrinking—far from it. The cluster borders a major regional employment hub anchored by rapidly expanding healthcare and research institutions, bringing significant workforce and residential growth to the surrounding neighborhoods. In a corridor where student demand is increasing, the traditional PK–5 model continues to be the best fit. Grade-band restructuring should be directed first toward clusters with chronic underutilization, rather than those experiencing sustained growth and strong community stability.	2/23/2026 10:23 AM
2707	For the Lakeside cluster—which includes Oak Grove, Sagamore Hills, and Briarlake—maintaining stability should be the primary goal. Oak Grove is projected to reach 96% utilization next year, while Sagamore Hills is already operating at 91%. Although Briarlake is currently at 73%, it would be tasked with absorbing a large share of Oak Grove's students if a consolidation were approved, pushing it quickly toward higher utilization as well. This cluster is not experiencing enrollment decline. In fact, it sits adjacent to one of Georgia's most significant medical and research expansion corridors, where thousands of new jobs and major institutional investments are driving ongoing population growth. Given these conditions, traditional PK–5 grade bands remain the most appropriate structure for this high-utilization, fast-growing area. Any large-scale grade reconfiguration efforts should begin in clusters that are facing persistent, long-term underutilization—not in areas where demand continues to rise.	2/23/2026 10:14 AM
2708	I am open to the potential grade band scenarios in order to not lose some of the key schools in the county. This makes the most sense for the schools that can fit the amount of students the bands would require for consolidation.	2/23/2026 9:24 AM
2709	I prefer geographic cohesiveness to grad band allocation. I do not think 6-12 is a safe and healthy grade band option in our county.	2/23/2026 9:02 AM
2710	As someone who serves 7 grades (PK-5th) I see a huge range of developmental growth. It makes more sense to me to have administration and staff focused on a smaller more targeted	2/23/2026 9:02 AM

	learning range. It seems that it would make more sense to group students by developmental stages creating a staff that is more informed. In addition, I see elementary teachers being shifted from grade to grade - a 3rd grade teachers moved to 1st; 1st grade teacher moved to 5th - due to the changing student numbers. With small grade bands teachers will have more experience and knowledge of the students developmental stages and I believe a better educator.	
2711	There is NOTHING good that can come from 6th and 12th graders being in the same educational space. You will terrify younger kids and push them to pull away from their school community before they get to be an upper classman/woman.	2/23/2026 8:54 AM
2712	Will there be a smaller or bigger lottery system for age groups not in kindergarten? Will all grade levels receive at least 2 teachers if the schools will be consolidated? With future budget cuts how will this impact resources already allocated for the current school year?	2/23/2026 8:44 AM
2713	I'm not a fan of any of the scenarios.	2/23/2026 8:35 AM
2714	If the grade band scenario affects PreK-5 grade level transitions only, then I believe they can be different based on needs or preference. If the grade band scenario breaks from traditional for grades 6-8/9-12 then they all need to be the same.	2/23/2026 8:34 AM
2715	I would be happy with a school will a wider grade range as long as, for example, 6th graders are kept in their own hallway away from 12th graders. Feels unnecessary to overlap too much.	2/23/2026 7:54 AM
2716	Na	2/23/2026 12:19 AM
2717	I strongly oppose the proposed grade band changes because they would create unnecessary instability for students during critical stages of their academic and social development. Increasing the number of school transitions would disrupt learning continuity, friendships, and emotional stability, while larger consolidated schools could reduce individualized attention and support. Our students need consistency and strong relationships with teachers and peers, not another major restructuring that adds stress and uncertainty.	2/22/2026 11:52 PM
2718	The potential grade band scenarios are not supported for any school or cluster. The grade levels should not be intermixing at new levels.	2/22/2026 11:10 PM
2719	Limpieza diaria en baños, salones de clase, cafetería, etc.	2/22/2026 10:34 PM
2720	So much effort and money is wasted moving schools and converting schools. Schools should be flexiblr and never torn down and converted to green space. Schools should not use trailers! If enrollments fluctuate, then that is the cyclical nature of schools. Maybe parents would not have to resort to private schools for their children if their children are not in mold-infested trailers in overcrowded schools. If pre-K programs are available at more schools, that would help bolster enrollments.	2/22/2026 9:08 PM
2721	I do not believe the proposed grade band scenarios are a great idea at this time. In particular, I have concerns about how the changes would impact the schools within the Henderson Mill cluster and the proposed restructuring of grade configurations. Altering established grade bands can significantly disrupt school culture, instructional continuity, and relationships that have been intentionally built between students, staff, and families. Stability in grade configuration supports vertical alignment, consistent expectations, and smoother academic transitions for students. Additionally, shifting grade bands may create unintended challenges related to transportation, scheduling, staffing, and student social-emotional development, especially if students are required to transition schools more frequently.	2/22/2026 8:53 PM
2722	I am sure now, but High-school are very crowed	2/22/2026 7:43 PM
2723	Grade Bands - I don't understand why you would not have the following due to GA Milestone testing: PK-2 Grades 3-5 Not sure why you would put 6-12 together (too big of a change in hormones and learning) as well of K-8. I don't feel grade bands would be as effective.	2/22/2026 7:28 PM
2724	6-12 is a reach. I believe 7-12 is a better band. Sixth graders seem to be getting smaller, so I don't think putting them in schools with high schoolers is smart.	2/22/2026 7:15 PM
2725	The Dekalb County schools were the best school district in Atlanta 23 years ago. We need to go back to what was working then. K-8, 9-12.	2/22/2026 5:53 PM
2726	The best scenario is for communities to stay together. Brockett was previously a K-8 school and would have success with stability. K-8 would also promote the future growth and continuity	2/22/2026 5:49 PM

	for residents in the City of Tucker. Residents would be able to plan for years of schooling at a time without the need for stress, confusion, and isolation that overcrowding, being bussed in, and school choice bring to parents and students.	
2727	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/22/2026 5:40 PM
2728	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/22/2026 5:40 PM
2729	Concerns around 12 year olds and 18 year olds being in same school, so would need more information on separation.	2/22/2026 4:02 PM
2730	The traditional band makes more sense to me.	2/22/2026 3:52 PM
2731	My only concern is where my child will fit in the cluster, and if my child be moved to Dunwoody or Chestnut since both are 1 mile from our home.	2/22/2026 3:43 PM
2732	I would love to see very little schools closed. I agree the district should reconsider the grade ban located at schools. I, particularly, am drawn to a PK-2, 3-5, 6-8, 9-12 grade ban plan. Under this design, I believe specialization and differentiation can exist within multiple grade-level homerooms for PreK to 2nd and departmentalized classrooms for grades third thru fifth. Upper grade-level elementary students should be grouped on ability tracks beginning in third grade. It allows teachers to truly address the needs of each ability track while appropriately providing rigor that stretches them to the next ability level. In a perfect world, this strategic system of ability grouping should move forward into middle and high school. Of course MAP scores, gifted testing results, teacher observations/recommendations, and other factors, can catapult students to other tracks.	2/22/2026 3:17 PM
2733	I believe neighborhood elementary school schools are important. It allows parents to be involved in school activities and then the life of their student. It would be a sad day when students must be busted or transported long distances to get to school. Therefore, I believe the bands should stay as they are.	2/22/2026 3:11 PM
2734	We both grew up in and enjoyed school districts with traditional grade bands. We would not be open to wider grade bands than the traditional. We feel that there should be a way to distinguish varying levels of performance within the same grade. Having a school with a large, consolidated grade band, such as PK-8, would make it difficult to discretize students of the same grade year.	2/22/2026 2:43 PM
2735	Again, I don't think that we need to consolidate grade bands, which would increase these campuses further. Smaller campuses have shown a better participation with parents, teachers, and students. If you combine grade bands and increase these campuses further number of the student body on a campus, you are furthering the overload on the faculty while also allowing more students to become anonymous and fall through the cracks. Just another face in the overwhelming crowd.	2/22/2026 1:54 PM
2736	3rd grade	2/22/2026 1:16 PM
2737	I personally prefer the traditional PK-5, 6-8 and 9-12 grade band option mostly because it best aligns to student cognitive, social and emotional stages. I remember when I was a child in Dekalb County schools with a K-7 and 8-12 grade band approach and the difference between a 5 and 12-13 year old is quite daunting particularly on a school bus where everyone is mixed together with limited adult supervision given the driver needs to be focused on driving. Today, Dekalb already has a mix of traditional and PK-8 schools (e.g. Smoke Rise, Pleasantdale). Is	2/22/2026 12:12 PM

	there a benefit or preference for consistency vs. flexibility to different grade bands in different areas across the county?	
2738	If the only consideration is enrollment, to maintain consistent, stable numbers in elementary schools, DCSD could consider magnet programs beginning in grade 6. Losing students to Kittredge and Wadsworth contributes to lower enrollment in high-performing schools.	2/22/2026 11:25 AM
2739	The placement of students in magnet programs should shift at middle school (starting year 6) to stabilize elementary school enrollment numbers.	2/22/2026 10:24 AM
2740	I didn't like the i	2/22/2026 9:34 AM
2741	Unsure	2/22/2026 8:31 AM
2742	No one should be listening to recommendations from a committee run by Sarita Smith until she and other employees put in place by Horton have been fully investigated and the community feels safe.	2/22/2026 7:30 AM
2743	I am confused about this idea. I did not think the scenarios included any specific grade band scenarios, so I am wondering if I missed that.	2/21/2026 7:24 PM
2744	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/21/2026 7:03 PM
2745	I like the traditional grade bands. If schools were smaller, I would be open to pk-8 or 6-12 but not in large schools with 900+ students. That feels too big and like less of a community where relationships could be formed across the board school and grade levels.	2/21/2026 6:09 PM
2746	Typo! Maybe someone got left behind :) Maybe a smaller classroom would have gotten better results	2/21/2026 2:07 PM
2747	Robert shaw elementary .we are more than happy if it changed to middle school	2/21/2026 1:24 PM
2748	I recommend to be grade bands to be middle school	2/21/2026 1:13 PM
2749	I think all grade bands should stay the same.	2/21/2026 9:52 AM
2750	I think if unable to expand Huntley Hills, we could possibly shift to a PK-3 through 3rd. That seems like a reasonable accommodation! We could get their foundations stronger too.	2/21/2026 5:29 AM
2751	If some elementary schools have to be closed, still keep the traditional current grade bands for the Lakeside Cluster. Redraw attendance zones and consolidate elementary schools to have grades PK-5 to accommodate families with multiple children at that age.	2/21/2026 1:02 AM
2752	I do not have strong opinion about this, ann am open to suggestions and change. I went to a school system with k-6 and 7-12 and it worked well for me. The only thing I know from experience and from academic research is that the grade band is something that depends a lot on the socio-economic making of the community, and so may be best used in different ways and different places.	2/20/2026 10:45 PM
2753	I am uncertain how to respond to the grand band scenarios. I think the answer is it depends? I would be more open to discussion about these.	2/20/2026 10:27 PM
2754	I don't think this is a great idea. Closing schools and combining them. Rock chapel seems pretty full. The school is amazing and so is the staff. Instead of this making a different in our community it's destroying it. I don't agree with SAP. I'm a product of Dekalb County Schools. The only thing I like new is the curriculum.	2/20/2026 9:34 PM
2755	I think It's best to keep the school the way it is. So many families move here to be part of this wonderful school.	2/20/2026 9:12 PM
2756	I'm sorry, I don't see any reference to clusters in what you're describing -- or do you just mean the specific elementary/middle/high schools a given respondent is part of?? I think grade bands are an interesting idea (specifically, fewer grades in a school), as it would seem like	2/20/2026 8:17 PM

	they would promote stronger learning and ability to identify and focus on missing skills in students. BUT, it's a little hard to envision how this would work for parents with multiple children in schools unless the schools were clustered in very close geographic proximity and ran on a schedule about 15 minutes apart (for drop-off and pick-up purposes) -- or were in multiple buildings located on the same campus. I think that if you really want to get blue-sky about managing facilities AND trying to creating a stronger educational environment to draw people to DeKalb, ideas like that are what you should be looking more closely at.	
2757	You should do away with middle school and have K to 8 if you make bigger schools. Middle school is the worst	2/20/2026 5:41 PM
2758	Na	2/20/2026 5:20 PM
2759	In my opinion, PreK-7th should be band together and then 8-12th. There is no need for middle school. It has not proven to do anything but cause a lot of turmoil, identity crisis, and drama. This is the way Dekalb used to be and perhaps we should return to this configuration.	2/20/2026 2:30 PM
2760	A better approach to consistent grade bands and scalable gifted/magnet programs is needed. Specifically, Kittredge is not a scalable solution and only applies to grades 4-6. This disrupts students elementary and middle school experience.	2/20/2026 2:26 PM
2761	I do not approve	2/20/2026 2:03 PM
2762	Need to show how the rezoning lines would move to see where we would now potentially be placed to be able to have strong feelings. Need to take into account to population of a school and its rating and why it is rated as it is. Apartments zoned into school or not etc.	2/20/2026 1:04 PM
2763	The expansion/renovation of Ashford park is preferred. If expansion is not achievable, I would highly prefer the continued renovation of the school and a grade band of PreK-3d grade. That would solve an overcrowding issue and keep the young kids close to home and walkable. Can the Nancy Creek school be used as a potential grade band for 4&5 grades.	2/20/2026 12:51 PM
2764	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/20/2026 12:25 PM
2765	I think the traditional grade bands are best. If a school needs to be spilt, then I think elementary schools in Chamblee could be split into an upper and lower elementary school. I do not like the idea of having middle school age kids and kindergartners in the same building. Or 6th grade and high school students. For Montgomery Elementary, I could see utilizing the old Nancy Creek Elementary school building for a 4-5th grade upper Montgomery school or a pre-k (3s and 4s) through 1st grade lower Montgomery school.	2/20/2026 11:14 AM
2766	Not enough information was shared about how the different grade bands support student academic growth. PK-2, 3-5 might also be considered. This would put all the elementary Milestones testing grades in one building. If the big literacy bill Is passes, it would also put a literacy coach with both grade bands. Coaches are for k-3 schools, however, if k-2, 3-5 schools exist, each school would be eligible for a coach, which would support more students.	2/20/2026 11:05 AM
2767	I feel like I need more information about how exactly this would work to give an opinion. I have some reservations, but I'm open to considering it.	2/20/2026 10:44 AM
2768	Grade bands will always be an issue because of the "aging" of grade bands. When the birthdate/age criteria changed, the number of 18-year olds in high schools for an entire senior increased dramatically. That being said, 10th and 12th graders should be separated into a Senior High school that will facilitate dual enrollments in colleges, technical schools, or specialized college preparatory programs.	2/20/2026 10:43 AM
2769	I like it how it is now	2/20/2026 9:10 AM
2770	I think Smokerise Elementary could house K-8 grade.	2/20/2026 8:49 AM
2771	I would keep the PreK-5, 6-8 and 9-12 model	2/19/2026 11:27 PM

2772	Prek to 5 th grade	2/19/2026 10:26 PM
2773	I am all for being flexible with grade bands but please don't create schools for 4-5 grade band. This seems like a logistical nightmare for school busses and families, especially with multiple kids.	2/19/2026 10:11 PM
2774	3	2/19/2026 9:11 PM
2775	I think it would be more appropriate age wise to have elementary and 6-12 grade bands if that will be considered. Middle schoolers are generally going through more physical and hormonal changes as are high schoolers. Though, it should still be considered to keep them separate at each stage.	2/19/2026 8:54 PM
2776	I am most familiar with and in favor of the P-5/6-8/9-12 divisions. I think it best reflects common developmental stages and simplifies transportation requirements.	2/19/2026 8:38 PM
2777	Absolutely it should be K through a not 6 through 12 that is just too much mixing for that age group K through 8th sounds better	2/19/2026 8:32 PM
2778	If Austin Elementary School because a K-8, or if there another middle school created separate from Peachtree, I know many families would keep their children in the public school system. With the large concerns regarding Peachtree Middle, parents send their children to private and in some cases keep them there. If the elementary school were made K-8, it would eliminate the need for Peachtree Middle School and give families a better option in keeping their kids in Dekalb County. By eliminating the transition to a new school during a crucial time in a child's adolescent years, it shows significant growth academically and socially. I also feel that something needs to be done regarding Dunwoody High School. How is it considered safe to have students in the trailers around the building? In today's day and age, safety is a huge concern and those trailers allow people to have direct access to many students at once. I cannot believe that this has not been addressed.	2/19/2026 8:03 PM
2779	Don't love combining middle with HS. I feel elementary could go up to 6 or 7, then 7 or 8 go to HS.	2/19/2026 7:59 PM
2780	I feel if we are going to consider grade bands then consider putting K-7; 8-9; 10-12. I believe this will allow a more effective transition for exceptional education students and 9th graders to get accustomed to credits without having all of the distractions of older high school students. This will also allow for our 14 and 15 year olds to not be in the same classes with our 18 and 19 year olds.	2/19/2026 7:49 PM
2781	I don't see any benefit in changing the grade bands. Of all the problems our students face socially these days, separating them more doesn't seem like it's solving anything except cost. And yet the taxes keep going up, so where's the problem? Fewer students, more taxes. Seems like a win for the schools and stidents	2/19/2026 7:48 PM
2782	I prefer a more traditional pk-k, elementary 1-5, middle 6-8, and high school 9-12 band scenario. My children both started school in pk4 and I've seen the addition of pk3. I have personally found school events challenging when everyone is invited at the same time. Specifically a school gym event with pk3-5th grade where older kids we not appropriate with younger children. Parents of older children not adequately supervising their kids and not wanting to participate in future events with a 8 grade spread. I do love our Montessori cluster of pk4/k, 1-3, 4-5th there are many benefits of looping clusters and building that teacher relationship.	2/19/2026 7:30 PM
2783	This sounds ridiculous. Why don't want to stick all the kids together in a factory setting.	2/19/2026 7:29 PM
2784	Cedar Grove Elementary, Middle and High appears to be attacked by this and while Cedar Grove Middle is fairly new, the elementary and high holds traditional value to the community. I believe look at schools that have been most recently added to the communities and identify if they have benefited the communities not just through the enrollment but the student performance, community engagement, and parental involvement. For those schools have shown upward trends in those 3 areas, they should NOT be considered for closing but used as models to what other schools could be in the district by repurposing those that are not doing as such. The grade bands of K-8, 4-8, and 7-12 should be great considerations for Cedar Grove Elementary and High especially with the renovations that have recently occurred at Cedar Grove High School.	2/19/2026 7:08 PM
2785	Keep the grades together as they are currently. Younger children don't need to be exposed to	2/19/2026 6:45 PM

	older children and the normal things that they go through for that age.	
2786	Elementary should be from PreK to 6, middle 7 - 8, and maintain high school as 9 - 12.	2/19/2026 6:37 PM
2787	For the Lakeside cluster (Oak Grove, Sagamore, Briarlake) I see no benefits for different grade band scenarios. We are hitting utilization goals so no real point to change up grade bands. I also think developmentally- having 6th graders in the same building as 12th graders seems dangerous and makes no sense. You can use different grade band scenarios if the schools are severely underutilized.	2/19/2026 5:24 PM
2788	I am a proponent of the 3 bands of grades - pre-k - 5th; 6-8; 9-12 I am concerned about any plan that combines 6 to 12 and that adds older students to a pre-k through 5th school	2/19/2026 5:13 PM
2789	In the Lithonia HS cluster, we should have the PK-8/9-12 grade bands. Students are not experiencing success in middle school. It truly serves no purpose. Doing this creates just one transition for students and families. This could also eliminate the dressed time difference of middle school (9am-4pm).	2/19/2026 4:19 PM
2790	Todos los grados son importantes, en la escuela Evansdale elememtary	2/19/2026 4:09 PM
2791	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/19/2026 3:57 PM
2792	No opinion on this question as a community member	2/19/2026 2:46 PM
2793	For the Dunwoody community, the banding as is PK-5, 6-8, 9-12 works very well. While I do understand the need for other banding in other areas, I do not think a change to that banding is applicable here.	2/19/2026 2:44 PM
2794	There no clusters for Stoneview elementary homes residential side!!	2/19/2026 2:12 PM
2795	Depends on the students in the cluster as to how you configure	2/19/2026 1:49 PM
2796	Lakeside has been over capacity for quite a few years now. Rather than close any of their feeder elementary schools, how about looking into moving 6th grade back to elementary and 9th to Henderson Middle? For this particular cluster, that would seem to make sense rather than having empty buildings/properties to either dispose of or still incur costs on.	2/19/2026 12:56 PM
2797	Grade bands should remain in tact for proper peer support	2/19/2026 11:33 AM
2798	Based on the high utilization rate of Oak Grove as well as surrounding schools (Briarlake and Sagamore), and the growth is projected to continue with the new CHOA campus being so close. In fact I can name five families that moved to this area recently for job opportunities there.	2/19/2026 11:23 AM
2799	I think developmentally, it's best to keep the grade bands either the same or potentially splitting elementary school.	2/19/2026 10:01 AM
2800	For the Lakeside cluster (Oak Grove, Sagamore, Briarlake), stability should be prioritized, and the traditional PK-5 cluster is still appropriate.	2/19/2026 7:13 AM
2801	In the Lakeside cluster, the traditional PK-5 / 6-8 / 9-12 model is preferred, but only if facilities are appropriately sized. Currently, Henderson Middle is massively over-enrolled, creating a restrictive, 'jail-like' environment for students. Any grade band change must prioritize moving students out of portable trailers and into permanent, modernized classrooms that reflect the high property taxes paid by this community.	2/19/2026 4:44 AM
2802	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in	2/18/2026 9:33 PM

	a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	
2803	If choosing an alternative grade band than the current model allows for Vanderlyn to remain open, I am open to changing grade bands	2/18/2026 9:22 PM
2804	I prefer to keep it PK-5, 6-8, and 9-12.	2/18/2026 8:34 PM
2805	Do not change anything.	2/18/2026 7:05 PM
2806	I don't have much of opinion on that. My child doesn't participate or n band at the moment	2/18/2026 7:00 PM
2807	The combined Vanderlyn and Dunwoody High School campus presents an opportunity to explore thoughtful, phased solutions that address secondary capacity while preserving elementary access	2/18/2026 5:00 PM
2808	The possibility of a grade ban scenario could be favorable but the traditional clusters that currently exist are preferred. I believe a grade band of PK-3, 4-6, 7-9, and 10-12 is most ideal based on adolescence.	2/18/2026 4:57 PM
2809	I like the PK-3 idea, but prefer PK-2.	2/18/2026 4:41 PM
2810	El grupo de kinder es un grupo muy excelente con padres muy participativos	2/18/2026 4:33 PM
2811	Only one who is ignorant of child development stages, would seriously consider putting grades 6 through 12 aged students, in the same physical learning environment.	2/18/2026 4:27 PM
2812	I think a K-8 grade band could be helpful to families as this provides less transitions, more time for families to be in one building and longer for staff/student/family relationships to grow.	2/18/2026 4:24 PM
2813	Grade band scenarios concern me less than losing the DLI program	2/18/2026 3:36 PM
2814	I do not think it is a good idea to combine K-8 or 6-12 in one building. I do like the idea of PK-3.	2/18/2026 3:12 PM
2815	I don't believe 6-12 graders being together in the same school is a good idea. The educational and safety needs of that age range would be too different.	2/18/2026 2:56 PM
2816	I have no experience with grade bands other than k-5, 6-8, 9-12. I have only one high school age child and I do not think it would effect him as a rising junior.	2/18/2026 1:53 PM
2817	I like the idea but those schools would need to two teacher librarians and an LMA.	2/18/2026 1:27 PM
2818	I would be more hesitant about grouping 6-12, given that the developmental differences between a 6th grader and 12th grader are so high.	2/18/2026 1:26 PM
2819	6 - 12 graders in on school is NOT reasonable nor does it seem manageable. The age range and maturity level is too big of a gap. With behaviors the way they are currently, its a NO!! 11 year olds with 18-19 year olds.....NO!	2/18/2026 1:15 PM
2820	In Metro Atlanta 6th grade is too young to combine with 12 graders - period. Perhaps 8-12 if it is absolutely necessary.	2/18/2026 12:58 PM
2821	Oak Grove is an important elementary resource for our community.	2/18/2026 12:29 PM
2822	Given the district's long-term enrollment decline and facility imbalance, I believe we should reconsider the traditional PK–5 / 6–8 / 9–12 grade band model. These structures were designed decades ago under very different enrollment and growth conditions. The current challenges require creative, non-traditional solutions rather than adherence to historical norms. Redistricting alone should not be the primary lever for solving capacity issues—especially when it disrupts stable communities. Adjusting grade bands presents a more innovative and potentially less disruptive alternative. For example, if a cluster such as Chamblee is overcrowded and physical expansion is not feasible, the district could distribute grade levels across multiple buildings within the cluster. We already have examples of non-traditional configurations working successfully, such as Kittridge beginning at 3rd grade. Similar models could be expanded thoughtfully. One possible approach would be: Separating older elementary grades (e.g., 4–5 or 3–5) into a dedicated upper-elementary building Pairing younger middle school grades (e.g., 6–7) in another building Reconfiguring buildings strategically to optimize capacity without forcing large-scale boundary shifts Upper elementary and early middle grades are developmentally closer than early elementary and upper elementary. A 4–5 and 6 configuration, for example, could ease the transition to middle school while allowing more	2/18/2026 11:31 AM

	efficient use of space across underutilized facilities. Rebalancing grade bands: Maximizes existing infrastructure Reduces the need for disruptive redistricting Preserves community stability Allows clusters to maintain continuity while addressing overcrowding The district is facing new demographic realities. This is precisely the time to consider structural innovation. Creative grade reconfiguration, implemented thoughtfully and with community input, may offer a more strategic and less divisive solution than shifting attendance boundaries alone.	
2823	I believe the grade bands should stay as they are.	2/18/2026 11:18 AM
2824	I think it's important to keep the younger kids "young" as long as possible - meaning, it's important to keep the high school aged kids separate from the younger kids and the middle school aged kids separate from the younger kids. Re the high schoolers - they just have a lot more going on (college apps, grades mean more, more developed extracurriculars, driving, being real - more exposure to drinking/drugs) as they transition into adulthood. Similarly, middle schoolers are growing a lot during those years. Let's let them make their age-appropriate mistakes in a contained environment where others are similarly equipped to handle those mistakes.	2/18/2026 11:17 AM
2825	Grade banding seems like a unique solution that will add to the overall community feel of the schools but may raise issues when it comes to younger student to older student interactions	2/18/2026 10:32 AM
2826	PK-4, 5-6, 7-8, 9-12 OR PK-2, 3-8, 9-12	2/18/2026 10:25 AM
2827	Larger schools don’t work for younger students and their families. The fear students felt in transitioning to middle school was real. It always seems to be dismissed in the rush to be efficient. Additionally, small elementary schools allow local families to socially bond in ways that CANNOT be replicated in larger and more distant schools.	2/18/2026 10:16 AM
2828	Henderson MS has a very large # of students apparently. This was one reason I did not send my 3 kids to Dekalb for MS.	2/18/2026 10:01 AM
2829	I disagree with including 6-12 students all in one building. Socially that may not be feasible.	2/18/2026 9:59 AM
2830	The grade band should say the same. I don't see the point of changing it.	2/18/2026 9:35 AM
2831	As a parent with children at Montgomery Elementary and Kittredge Magnet School in the Chamblee cluster, I have significant concerns about potential grade band changes and how they would affect both continuity and instructional quality. 1. K–5 to K–4 / 5–6 Model (Elementary to Intermediate Split) If the district is considering shifting current K–5 elementary schools such as Montgomery Elementary (K–5) to a K–4 model, with Grade 5 moving to an intermediate (5–6) campus feeding into Chamblee Middle School (6–8), I would strongly urge caution. Fifth grade plays a critical leadership role within elementary schools. Removing Grade 5 changes school culture and eliminates leadership opportunities for students. A 5–6 intermediate model adds an additional school transition (K–4 → 5–6 → 7–8 → 9–12), which may increase stress and reduce stability. Transportation time and logistics for families with multiple children would become more complicated. Unless there is a clearly articulated academic benefit (e.g., stronger STEM labs, targeted middle-grade supports), this feels like structural change for operational reasons rather than student-centered ones. If pursued, the district should show clear evidence that a 5–6 campus improves outcomes compared to the current K–5 → 6–8 structure. 2. K–8 Model Expansion in the Chamblee Cluster If one potential scenario involves creating or expanding K–8 schools within the Chamblee cluster (for example, converting an existing elementary into a K–8), this model has some appealing aspects: Fewer transitions (K–8 → 9–12 at Chamblee High). Stronger long-term peer and family community. Increased stability for students socially and academically. However, implementation details matter: Would K–8 schools have true middle school-level electives, athletics, band, and advanced math tracks comparable to Chamblee Middle School (6–8)? Would gifted, ESOL, and special education services be fully staffed at scale? How would this impact enrollment and programming at Chamblee Middle School? A partial K–8 rollout that weakens either the elementary or middle school experience would not be beneficial. 3. Shifting 6th Grade to Elementary (K–6 / 7–8 Model) If the district is considering moving to a K–6 elementary and 7–8 middle school model within the Chamblee feeder pattern, I would have academic and developmental concerns: Sixth grade is often when students begin changing classes, accessing higher-level math, and participating in structured extracurriculars. Montgomery Elementary (currently K–5) is not physically or structurally designed to support a full middle-grades experience. A 7–8-only Chamblee Middle School could lose economies of scale for electives and extracurricular offerings. Unless there is significant capital investment and staffing redesign, this shift may dilute program quality rather than enhance it. 4. Impact on	2/18/2026 9:26 AM

	Kittredge Magnet School Kittredge Magnet School operates as a magnet program serving grades 4–6. Any grade band restructuring must carefully protect: The integrity of the 4–6 magnet model. Advanced math pathways that feed into Chamblee Middle and ultimately Chamblee High. Transportation equity for magnet families. If elementary schools move to K–4 or K–6, how will that align with Kittredge's 4–6 structure? Misalignment could create unintended barriers to magnet participation or disrupt established academic pathways. 5. Feeder Continuity into Chamblee High School (9–12) All grade band scenarios should be evaluated through the full K–12 lens: Will students arrive at Chamblee High School (9–12) academically prepared and socially supported? Will advanced coursework pipelines (accelerated math, IB/AP pathways) remain intact? Will changes increase or reduce enrollment volatility at the high school level? Overall Recommendation Before adopting any grade band changes in the Chamblee cluster (Montgomery Elementary K–5, Kittredge 4–6, Chamblee Middle 6–8, Chamblee High 9–12), the district should clearly demonstrate: Academic advantages — not just operational efficiency. Minimal additional transitions for students. Preservation of magnet integrity and advanced academic pathways. Transportation impact analysis for families with multiple children. Multi-year stability — not structural changes that may be reversed in a few years. As a parent of three children moving through this feeder pattern, predictability and program quality matter just as much as facility utilization. Structural shifts should strengthen — not fragment — the Chamblee cluster experience.	
2832	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/18/2026 9:16 AM
2833	The grade band scenaries are not adequately described for each cluster. I cannot comment until there is more clarity.	2/18/2026 8:43 AM
2834	In the EL. Bouie, Champion Theme, Arabia Mountain or area schools cluster, I have concerns about moving to a K–5 / 6–8 / 9–12 grade band if it means students, especially 5th graders, have to switch schools earlier. This could affect their learning, adjustment, and transportation. If a K–8 model is considered, it may help by keeping students in one school longer, but space, staffing, and resources would need to be planned carefully. I hope decisions will focus on keeping students stable and minimizing disruption for families.	2/18/2026 8:42 AM
2835	Having 6th grade with elementary has never been a great thing. I was in DeKalb when elementary went up to 7the grade. The bullying increases and the older kids are not great influences on the younger ones.	2/18/2026 8:25 AM
2836	Breaking down the elementary schools into grade bands seems like a good idea to me, similar to what city of Decatur has done. However, as middle school teacher in the county as well. It's seems absurd to close down south DeKalb middle schools and possibly plan to make a 6-12 school. It seems that this choice disregards the research established as it relates to middle school aged children and their specific social and learning needs. The plan into a push these south DeKalb babies into failing high schools to maximize a building space?? These a humans not numbers! Pk3-2 makes sense. 3-5 or even 3-6 makes sense developmentally. But robbing as certain demographic of a true middle school experience is unjust.	2/18/2026 5:52 AM
2837	As is is working well… from where I stand. Pk - 5 is good, 6-8 are pre teens and all experiencing some of the same things. 9-12 starts to shape each grade for the next level. The fact that bigger kids leave the house last helps working parents get the younger kids off to school.	2/18/2026 12:10 AM
2838	I think putting middle school and high school together would be detrimental and potentially unsafe for middle schoolers. There is such a HUGE developmental difference between 10 year olds and 18 year olds, and the safety concerns facing older kids across several categories (sexuality, drugs, internet/screen use, etc) are much more weighty safety issues than those in the younger grades. Middle school is already hard enough; I would not feel safe having my 6th/7th grader in a public school with high schoolers. Separating PK-3 and 4-5 makes a transportation nightmare for parents! Every parent with multiple kids would pretty much ALWAYS have them in different schools at every age! The PK-8 arrangement, while also a wide age gap, feels safer and easier to navigate. I would be okay with that option or with the traditional structure.	2/17/2026 11:32 PM

2839	Elementry	2/17/2026 9:28 PM
2840	Fully agree. However I have concerns about putting 6 graders with Highschool students.	2/17/2026 9:21 PM
2841	Grade banding is a horrible idea and has little to no evidence of benefits. If we wanted special programs, parents could choose Montessori or Julie Billiart type charter schools. I can't even believe what I'm reading.	2/17/2026 9:14 PM
2842	I have significant concerns about grade band changes, particularly for elementary-age students. Increasing the number of school transitions may introduce avoidable academic and social-emotional disruption at critical developmental stages. Stability and continuity are especially important in early education, where strong peer relationships, teacher familiarity, and consistent support systems directly influence student success. While I understand the operational rationale for exploring alternative grade band models, I do not support configurations that increase student transitions or separate siblings across multiple schools. For young learners, minimizing structural disruption should remain a priority alongside facility efficiency considerations. Banding models such as PK-3 / 4-5 may create significant logistical burdens for families, including multiple school schedules, increased transportation complexity, and greater challenges for working parents. These impacts disproportionately affect families with younger children and may unintentionally reduce satisfaction and district retention. DCSD should prioritize student stability, developmental appropriateness, and family impact when evaluating grade band options. Configurations that increase transitions or fragment neighborhood school communities may carry long-term academic, social, and enrollment risks that outweigh projected operational benefits. Grade band changes should be evaluated not only through efficiency and capacity metrics, but also through the lens of student experience and family realities. Elementary students benefit from consistent environments and relationships over time. Structural models that introduce additional transitions or divide siblings across schools may undermine those benefits and create unintended consequences for both students and families.	2/17/2026 9:07 PM
2843	I do not think 6-12 should be an option. A 6–12 grade band creates a very large developmental gap, placing early adolescents alongside near-adults. Sixth graders are still developing socially and emotionally, while twelfth graders are preparing for independence, which can expose younger students to social dynamics and behaviors they are not ready to navigate. This structure also makes it harder to maintain age-appropriate programming, expectations, and activities. Middle school students benefit from environments designed specifically for early adolescent growth, and combining them into a high school–dominant setting may reduce their sense of safety, belonging, and engagement. A PK-8 grade band can be appropriate in certain scenarios, especially in specialized programs like high achievers or language immersion.	2/17/2026 8:55 PM
2844	I think grade band scenarios are good for elementary students. I do not think that grade banding would be a good idea for middle and high school students. Middle school students need to stay to themselves because it is such a critical/sensitive time. Being around high school students is not an ideal situation.	2/17/2026 8:32 PM
2845	I have always felt middle schools are unnecessary. We should have prek/1-8 grades in one school and 9-12 in a high school, as when I was a child. Having a hierarchy that rises all the way to 8th grade creates a pathway for long-time students to build an “Ownership” relationship with their school and grow their leadership and community skills. Younger students will look up to upper class men and women.	2/17/2026 8:21 PM
2846	K to 5th grade should stay elementary. If you make it a k to 8 school you will be adding things to elementary that students that age are not mentally ready for.	2/17/2026 8:13 PM
2847	Things were less of a problem here when elementary schools were K-6 and then Jr High was 7-8 and high school was 9-12. Make the grade bands match the need for each enrollment level and each building, whether that means moving some schools around.	2/17/2026 7:10 PM
2848	Grade band changes create a lack of resources in schools. Students need to be around those who are closer in age to support appropriate social skill development. A change in grade bands means a larger scope of resources but less specificity in education. This specificity is what is needed.	2/17/2026 6:21 PM
2849	This would be nice to have to keep families together longer and neighborhoods consolidated with shorter commutes and traffic.	2/17/2026 5:27 PM
2850	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized.	2/17/2026 5:22 PM

	Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	
2851	The Lakeside cluster should prioritize stability. The area is experiencing growth overall. People are moving into the area. The traditional PK-5 grade band should remain constant since there is no need to shift at our particular school. Any shifts that do occur should occur at schools that aren't meeting utilization criteria.	2/17/2026 5:04 PM
2852	My daughter went to Shamrock Middle School for only one year. There were many issues at the school and some kids did not do well at all. Then a switch was made to Henderson Middle School, which was better for student living in the Oak Grove and Briarlake areas.	2/17/2026 4:50 PM
2853	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove's enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/17/2026 4:16 PM
2854	Changing grade bands would have a significant impact on our family, as we have three children. I believe the traditional model strikes the right balance between the number of school transitions and the age range of students within a school. I strongly feel that 6-8 grade students should be kept separate from 9-12 grades for safety reasons.	2/17/2026 4:03 PM
2855	We recently applied to Coralwood because I love the idea of pk-k or younger kids being together. It seems as though you could consolidate in this way with th pk-3 4-7 8-12 or similar and use buildings that are smaller or newer.	2/17/2026 3:54 PM
2856	It does not appear that any of the schools my kids are attending are affected by potential grade band scenarios, but it does not seem reasonable to expand grades in any single school in Tucker. Further, creating smaller grade bands will result in even more difficult transportation scenarios for the Tucker region. It is a very tight squeeze for the busses to complete their elementary, then high school, and finally middle school routes within the morning time frame.	2/17/2026 2:40 PM
2857	Cluster schools would be great	2/17/2026 2:03 PM
2858	Did the possibility of adding 6th and 7th grade back to elementary and adding 8th to high school come up? Where it would be PK -7 and 8-12. Or adding a 3-year old class to schools making the grade bands- PK3-3, 4-8, 9-12.	2/17/2026 1:36 PM
2859	Unsure	2/17/2026 1:32 PM
2860	The alternate gradeband scenarios seem reasonable. Other school districts have seen success with a 4th and 5th-grade academy.	2/17/2026 12:26 PM
2861	I bribe that 6-8 needs to stay middle school	2/17/2026 11:25 AM
2862	Best option to minimize school closures PK-8/9-12 grade bands. This increases the utilization of buildings, reduce the number of elementary schools labeled under-enrolled. Allows more students to stay in their community and supports smoother transition into high. Additional ways to use middle school buildings. Create specialized programs, magnet or vocational/trade schools. Like, STEM, arts, language immersion, criminal justice etc. (These programs attracts families!!) Also, they can strategically be used for overflow from K-8 or 7-8 grades only in areas where elementary lack space. And they can also be used as shared facilities for after-school or enrichment programs. With this grade band. You are not only utilization the buildings, your are also prepared for the unexpected, The unexpected, meaning ... more families moving into DeKalb County. A community is only as good as it's school system.	2/17/2026 10:39 AM
2863	If the county sold the abandoned properties and used the funds for reconfiguration of the occupied buildings, it could be a good plan. However, the real issues is the takeover of testing	2/17/2026 8:54 AM

	culture that restricts instruction. We are literally teaching to the test when students cannot read and write. Shame on Dekalb.	
2864	High School definitely should not include grades 6 -12.	2/17/2026 8:09 AM
2865	I grew up with a grade band (I am in my 40's now) and quantify that as one of my first exposures to a progressive learning environment that could adapt to give me a more challenging learning opportunities.	2/17/2026 7:55 AM
2866	OakGrove, Henderson middle, Lakeside	2/17/2026 1:12 AM
2867	It is hard to understand which cluster my kids will fall into in the future. If you could provide guidance on what neighborhoods may be moved out of the Chamblee cluster it would alleviate a lot of anxiety.	2/16/2026 11:35 PM
2868	focus needed on early education	2/16/2026 10:37 PM
2869	Prek and kinder students being with 8th graders in a large school setting seems particularly wild. 6-12 or other smaller banding seems less worrisome personally	2/16/2026 9:59 PM
2870	Elementary	2/16/2026 9:20 PM
2871	I'm very opposed to any scenario that mixes nearly legal adults (~18 year olds) with impressionable children.	2/16/2026 9:09 PM
2872	One grade band that is not considered is PK-6, 7-9, 10-12. This helps to fill up the elementary schools, keeps 9th graders with younger students prolonging their exposure to teenage influences. This is for the Dunwoody Cluster. Taking the land from Vanderlyn Elementary and using it for Dunwoody High School could create a real high school campus that has room to expand with	2/16/2026 8:43 PM
2873	I do not like the grade band 6-12.	2/16/2026 8:39 PM
2874	It would be helpful to know who these 120 individuals that made these decisions. Some elementary schools on the northern side of Dekalb County have dropped enrollments however they were not suggested for a move. Redan High School had a drop in enrollment and nothing there.	2/16/2026 8:36 PM
2875	Regarding the proposed facility consolidations, the scenarios presented for District 2 appear thoughtful and reasonable based on the information shared.	2/16/2026 8:00 PM
2876	I have no opinion about what age group attends which school.	2/16/2026 7:45 PM
2877	I prefer lower student teacher ratios however that needs to happen.	2/16/2026 7:34 PM
2878	Some of the proposed scenarios feel overly complicated. I would switch the grade bands to PK–4 for elementary school, 5–8 for middle school, and 9–12 for high school. This model has been successful in many private schools, and even in DeKalb, some of the highest-achieving schools follow the middle school model in 5 grade. would absolutely keep grade bands consistent across all of DCSD to make it easier to follow the same curriculum and avoid discrepancies for both students and teachers. The only exception would be special programs.	2/16/2026 5:11 PM
2879	Lakeside cluster - not in favor of grades 6-12 at the same school.	2/16/2026 4:55 PM
2880	Still not sure what is happening	2/16/2026 4:47 PM
2881	I believe the proposed grade band scenarios could be beneficial in reducing the number of transitions students experience between schools. Fewer transitions may help students build stronger, long-term relationships with their peers and minimize the social pressures that often come with repeatedly adjusting to new environments and friend groups. However, I do have safety concerns. I feel more comfortable when students are grouped primarily with others in their own age range, as this helps ensure age-appropriate interactions are established and maintained.	2/16/2026 4:19 PM
2882	Traditional grade bands are desired.	2/16/2026 4:06 PM
2883	Traditional grade band programming works best for the Lithonia Cluster.	2/16/2026 3:53 PM
2884	Currently, Druid Hills has 1200 students and will have 1400 or so next year. The school is sized for no more than 1200 even after the renovations. So the school is overcrowded but it is not listed on the overcrowded list. Most of the students come from the area near 285 and is	2/16/2026 3:30 PM

	much closer to Lakeside HS and to Clarkston HS yet they are being bused all the way to Druid Hills and there is no provision for the students to be re-districted. Many live close to Towers HS but Towers HS is being converted into a middle school. The entire situation is a disaster and parents in Dunwoody and Brookhaven are planning to leave the district for private schools.	
2885	Bands definetly need to be split up more	2/16/2026 3:27 PM
2886	The existing grade bands have made sense for years and proven to work. Every decision should not be made base on optimizing enrollment capacity. 6 graders should not be with 12th graders. Kindergarten should not be with 8th grade. K-5, 6-8, 9-12 have endured for a reason they also align more closely with stages of adolescence. At the same time bands that are too narrow like 4-5 make it almost impossible for siblings to go to school together and basically ensure parents are spending a large part of every day split between multiple schools.	2/16/2026 3:25 PM
2887	We are ok with many of the clubs at Robert Shaw theme School	2/16/2026 3:18 PM
2888	Change in potential grade band scenarios would add more chaos to existing bullying in middle school, when younger children (3rd grade to 5th grade) are included in the middle school the bullying might become worse. The current framework helps educators focus on grade level standards and reduces inconsistencies in grading across the district. Sticking with current band helps in providing better, more tailored feedback regarding how students are meeting specific learning goals rather than just numeric averages	2/16/2026 3:07 PM
2889	Oppose the proposed new banding. Would support the traditional.	2/16/2026 3:06 PM
2890	When rezoning the demographics matter. I wonder if that is being considered.	2/16/2026 2:55 PM
2891	A potential grade band to me would be PK-5th, 6th-9th, 10th-12th. 9th graders often struggle with the maturity it takes to navigate high school.	2/16/2026 2:54 PM
2892	I do agree that some may need to possibly close, but we need to strategically choose which locations. I don't think it should be over 20 schools. Cedar Grove Elementary have been serving my local community for years. All of my children attended school there. I believe that you'll lose some dedicated teachers/staff if this decision is made, which would not be good considering there's is already a teacher her shortage in Dekalb.	2/16/2026 2:52 PM
2893	You have to be very careful with grade bands. I don't think 6th graders should be in the same school with 12th graders.	2/16/2026 2:50 PM
2894	no feedback	2/16/2026 2:46 PM
2895	no feedback	2/16/2026 2:34 PM
2896	Middle Schoolers grades 5-7 do not belong in the same school as older children. 8th grade was part of HS when I attended Lakeside and that scenario works well.	2/16/2026 2:34 PM
2897	I think it could be very useful to have middle-high schools (6th-12th) as students can participate in accelerated, higher grade level classes and it creates a larger community of students and more opportunities for continuation in athletics and sports.	2/16/2026 2:34 PM
2898	Keep oak grove the same	2/16/2026 2:32 PM
2899	I would need more information	2/16/2026 2:29 PM
2900	I don’t agree with grade band clusters middle high and elementary should be separate facilities due to safety concerns.	2/16/2026 2:16 PM
2901	No issues.	2/16/2026 2:11 PM
2902	My child attends Sagamore and I believe there could be benefit to a k-8 program there or a closer middle school option. Henderson Mill middle feels very far away. I have also appreciated the connected nature of a K-8 school.	2/16/2026 2:08 PM
2903	I think with the 4 grade band model, we could make the most out of the spaces.	2/16/2026 1:57 PM
2904	I believe that Prek, K and 1st shouldn't be in with 4th, 5th and above. Their needs are different. Younger students are learning the basics of being in a learning environment. Older students should be preparing for middle school and beyond. And lets be honest, older students often exhibit behaviors that shouldn't be around our younger students. I have experience with prek-2,3-5 (tested grades), 6-8, and 9-12 model and it was very effective.	2/16/2026 1:16 PM

2905	I like the current grade band structure, mainly so that age groups are around comparable age groups. Should we have broader age brackets in a school (ie 6-12) want to ensure there is proper separation and infrastructure to support the younger classes.	2/16/2026 1:06 PM
2906	Will you be creating more Early Learning Centers?	2/16/2026 12:45 PM
2907	Don't close the schools.	2/16/2026 12:32 PM
2908	6-12 for a school is just wrong! 6th graders are in no way emotionally, developmentally, or mentally compatible with 9-12 graders. The gap is just too far and wide!	2/16/2026 12:30 PM
2909	I don’t recommend having students with a large age gap. Students thrive with likewise peers and benefit from similar age groups. What I fail to understand is how the logistics of doing this. More building in a school ? A different time slot	2/16/2026 12:23 PM
2910	I am not sure it if is wise to separate grade bands as that would be harder for parents, but combining grade bands may work well. In fact, even though it wasn't a scenario it may work well to have multiple sets of 6-12 schools so that parents have fewer schools to worry about, ESPECIALLY since so many of the current middle and high schools are very far apart.	2/16/2026 12:07 PM
2911	Keep the current grade bands. Children develop differently and there is no reason to put elementary school kids with middle schoolers and high schoolers.	2/16/2026 11:41 AM
2912	I do not think middle grade students should be merged with high school students. We could consider schools with a PK-2 or 3-5 grade band. I really do not think 6-8 grade students should be with high school or elementary students, unless it is a theme or IB school.	2/16/2026 11:36 AM
2913	The grade bands are fine the way they are. I disagree with the potential of Grade 6-12. Keeping pre-teens together with 17 and 18-year-olds is not appropriate.	2/16/2026 11:24 AM
2914	In the Tucker Cluster there is a great need for more Pre-K 3 & 4 spots. Make Livsey a PK 3/4 school, which it is perfectly suited for, move those classes away from Brockett and Midvale, and keep Midvale and Brockett open, absorbing the displaced 1-5 students at Livsey.	2/16/2026 11:05 AM
2915	Let's stick with traditional. I haven't seen definitive studies that says there is a better way to do it.	2/16/2026 11:02 AM
2916	I agree with consolidation and hope for more co-taught classrooms. This would assist with support to behavioral students which reduce disruption of class instruction.	2/16/2026 10:55 AM
2917	I support the traditional grade band scenario.	2/16/2026 10:51 AM
2918	Regarding consolidation, my main concern is increased traffic in the Hawthorne neighborhood. If the consolidation occurs, traffic would only seem to be balanced with the school bands being changed from Pre-K to 5 to Pre-K to 3rd. The excess volume from consolidation will definitely overwhelm the neighborhood setting. It seems that it would make more sense to consolidate students into a school that is not inside a neighborhood.	2/16/2026 10:46 AM
2919	For our cluster, I believe the proposed grade band scenario (e.g., K-5, 6-8, 9-12) supports smooth academic transitions and aligns well with students’ developmental needs. Keeping these grade bands consistent within the schools in our cluster will help maintain continuity in instruction, social-emotional support, and community engagement.	2/16/2026 10:34 AM
2920	i feel strongly that the area divisions should stay as they are currently.	2/16/2026 10:31 AM
2921	I like the grade band scenario because personally the middle school gives some scholars and families a false sense of completion. I believe we would see graduation rates continue to climb with changing grade bands	2/16/2026 10:20 AM
2922	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/16/2026 10:04 AM
2923	Other than the current grade band model, the PK-8 grade band model is one potential scenario to consider because it enables siblings to remain together in the same school for longer, which	2/16/2026 10:02 AM

	I believe is an important factor in enabling younger siblings to more smoothly transition into school, for siblings to support one another, and for families to be equally engaged in each of their children's schools. The PK-8 model is preferable to the 6-12 campuses, because 4 year olds in the same building as 12/13 year olds is not as concerning to me as 12 year olds in the same building with 18 year olds in the 6-12 grade model.	
2924	6th through 12th grade is not a reasonable idea when dealing with cognitive, behavioral, educational and safety concerns. An 11-year-old and an 18-year-old are at vastly different psychological and social stages, middle schoolers are at puberty level and need more emotional support while high schoolers are being taught more independent. There is also the risk of more bullying and sexual intimidation from older students.	2/16/2026 10:01 AM
2925	Concerns: Imbalance risk Transportation impact Staffing distribution Cluster-based grade bands can work if enrollment projections are stable and staffing models are guaranteed. Without firm hiring commitments and enrollment caps, this model risks inequity between clusters.	2/16/2026 9:46 AM
2926	I don't agree with this for zip code 30087	2/16/2026 9:45 AM
2927	As the developmental needs of elementary, middle and HS students are so different, I believe keeping the PK-5, 6-8, and 9-12 bands together makes the most sense. Making some schools in a cluster PK-8 and others 6-8 spreads the resources too thin.	2/16/2026 9:43 AM
2928	Please be sure that paying teachers appropriately also is a part of the plan. They already have so many stressors placed on them. Resources stretched thin, parents having to pay for classroom supplies. My child trying to get access to speech therapist the district for three years.	2/16/2026 9:40 AM
2929	Traditional	2/16/2026 9:39 AM
2930	PreK-5, 6-8, 9-11	2/16/2026 9:37 AM
2931	For the Lakeside Cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. This cluster is experiencing growth, not decline. Traditional PK–5 grade bands remain appropriate in a high-utilization corridor.	2/16/2026 9:34 AM
2932	The potential grade band would really tear apart families whose mutliple kids of different ages are attending the same school. Why force families to have to go to multiple schools and put that kind of burden on hard working families.	2/16/2026 9:30 AM
2933	We do not need to cram as many kids into a classroom to "save money". There are other ways the district can reallocate money, such as paying the superintendent less, so as to not sacrifice the quality of student education and the community feel of our schools.	2/16/2026 9:29 AM
2934	I don't understand what you are saying when grade band scenarios. You are not being clear.	2/16/2026 9:28 AM
2935	For the Dunwoody area elementary schools, this makes sense. We have schools that are so close together and small and it makes no sense. With Vanderlyn, the community would love to see that space converted into classrooms for DHS and get rid of the trailers there. This would be a big draw for DHS and eliminate the eye sore of these trailers. I think the community would be disappointed to see Vanderlyn just turned into a green space when the high school needs it so bad!	2/16/2026 9:28 AM
2936	The teachers are not qualified to teach the material from the curriculum and they are lazy, they call out of work a lot	2/16/2026 9:27 AM
2937	I like the idea of having PK-2 and 3-5 schools. 3rd grade should be separate from PK-2. Testing grades should be in the same band with 3-5. There is a huge difference in PK, K, 1 and 2 curriculum from 3, 4, and 5. This is done in many other school system and it has many benefits, especially for elementary.	2/16/2026 9:22 AM
2938	This would be disruptive to parents with multiple childen. Too may drop offs and traffic would become even worse.	2/16/2026 9:22 AM
2939	If the grade band scenarios are the reason for shutting down the proposed schools, then I feel that another option should be examined.	2/16/2026 9:16 AM
2940	At the moment the Lakeside cluster would not benefit from banding. The county does not need to apply a one-size-fits-all approach here. There may be clusters were it's a good idea.	2/16/2026 9:07 AM

2941	N/A	2/16/2026 9:06 AM
2942	HS Concerns: The feeder disruption: how will this affect the GA athletic alignment. The program stability: No clarity on how AP, magnet, IB, athletics, or CTAE programs relocate after HS status is removed. The justification: DCSD cites “low educational adequacy” and “proximity,” but needs to show detailed adequacy and cost data. MS Concerns: Families need timelines, staffing plans, and feeder reassignments. ES Concerns: The issue for overcrowding and traffic due to having fewer elementary schools will increase congestion at remaining sites; parents are already concerned with traffic issues. This will cause more attendance infractions. The closures are mostly concentrated in South Dekalb, raising concerns of equity and disproportionate impact. There is a lack of school-level rationale. Stakeholders need to see adequacy scores and enrollment projections for each ES targeted.	2/16/2026 9:05 AM
2943	The k-8 and 9-12 grade bands are most ideal. For the obvious reasons stated, but also, if the middle schoolers are in athletics, and the younger siblings are able to stay in the aftercare program they can both be dismissed at the same time. Also consider bringing back the after school activities bus route and the tutorial routes. May be the district can contract out some of the routes to professional transport companies like medicaid does.	2/16/2026 9:00 AM
2944	I don't have a strong opinion on this one way or the other.	2/16/2026 8:58 AM
2945	If all children can be taught to read, any grade bands would be sufficient.	2/16/2026 8:55 AM
2946	I see more benefit with a scenario of k-5 and 6-12 than other changes to the current k-5, 6-8, 9-12. Many middle school students are already involved in high school sports activities and some magnet schools had middle school students able to participate in high school courses. These groupings make sense for the maturity of students and the building up of programming across the board - sports, theatre/ band, academics.	2/16/2026 8:52 AM
2947	I think the current set up makes the most sense.	2/16/2026 8:47 AM
2948	I want to know your plans for increasing the enrollment in Theme schools, which are your highest performing schools in South Dekalb. Why are you moving an elementary school into Champions building? The school is old and needs major work. Are there no better schools into which you can move students. Where will the Champion theme program move to?	2/16/2026 8:46 AM
2949	I think options for a variety of band scenarios is good for diversity.	2/16/2026 8:42 AM
2950	Children are very different developmentally at different ages. For instance, the smallest children should definitely be together, as should teenagers.	2/16/2026 8:40 AM
2951	Traditional	2/16/2026 8:39 AM
2952	Therefore, Hawthorne, Sagamore, and Briarlake and other elementary schools in the Lakeside Cluster can apply to attend Oak Grove.	2/16/2026 8:36 AM
2953	NA	2/16/2026 8:33 AM
2954	Elementary could definitely benefit. This is where the foundation is developed.	2/16/2026 8:30 AM
2955	I believe the grade bands are too wide for grades 6-12. There needs to be a divisions and that’s much of an age gap. I would even propose grades 6-9 at one school and grades 10-12 at another.	2/16/2026 8:23 AM
2956	Personally I am uncomfortable with the thought of middle schoolers being around/influenced by high schoolers. Middle school is already formative years, and exposing them to more young adults can raise some concerns.	2/16/2026 8:18 AM
2957	Teachers should have the freedom to choose based on needs. Education shouldn’t be limited.	2/16/2026 8:17 AM
2958	6th graders and 12th graders do not need to be in the same school unless you plan to have an upper and lower campus.	2/16/2026 8:16 AM
2959	Just follow the latest research on what is best long term for kids. Have the back bone to make the right decision even if it is not popular.	2/16/2026 8:08 AM
2960	Elementary schools should remain small for the best experience of the kids, teachers, and parents. Prefer to keep K-5, 6-8, 9-12 based on developmental needs of kids at those ages.	2/16/2026 8:07 AM
2961	There is a significant shift from 2nd to 3rd grade that is not being addressed. It seems there is a lack of preparation or projections to assist children in adapting to this change in instruction.	2/16/2026 8:02 AM

	This transition is crucial for a child's development and learning. Altering standards appears to merely shift the goalposts, making it more challenging for most learners to catch up. What measures are in place to evaluate teachers and ensure that their shortcomings are not passed on to the students, thereby creating further gaps in their education? Pre-K and Kindergarten used to show strong proficiency numbers. Now, children are entering and leaving with learning deficits.	
2962	Bands are terrific	2/16/2026 7:58 AM
2963	As a PTSA board member of my school I see and hear more than most parents. Middle school needs to stay 6-8 because of developmental and physical growth at this stage. I do agree less schools with siblings spread out is inconvenient and causes transportation issues.	2/16/2026 7:55 AM
2964	As for the potential grade band scenarios, I do believe they should be the same District-wide. For instance, when I was in school, there was no such thing as middle school. I attended elementary school from grades K-8 and high school from grades 9-12. Perhaps, things could go back to this scenario. However, I do not think it would be a great idea to merge middle with high school because of the maturity level of high school students to middle school students.	2/16/2026 7:36 AM
2965	I have concerns about the proposed grade band scenarios, particularly those that shift schools from a traditional K–5 model to a K–2 and 3–5 structure within consolidated clusters. While this may create operational efficiencies, it introduces additional transitions for students before middle school, disrupting academic continuity, peer relationships, and family engagement. Schools that currently function successfully as K–5 communities provide stability during critical developmental years, and restructuring them could negatively impact both students and the broader school community.	2/16/2026 7:28 AM
2966	k-6th grade elm, 7-8th grade middle, 9th grade academy, then 10-12th grade high school.	2/16/2026 7:10 AM
2967	The safety of children is a concern when combining younger grades with middle schools and high schools.	2/16/2026 5:49 AM
2968	N/A	2/16/2026 1:35 AM
2969	I do not know enough about the cluster in which I am currently working, as far as the demographics, the number of students etc. However, I do think that in general, smaller groups are better and keeping the grade level bands aligned with the rest of the state is preferable.	2/15/2026 11:32 PM
2970	I like the idea	2/15/2026 10:49 PM
2971	I have no comments on the grade band scenario yet. I would need more information on how many and schools would turn into the grade configurations mentioned.	2/15/2026 10:35 PM
2972	It's a highly disturbing to treat and outcast our children to this extent. This is very disrespectful to the students,parents and teachers.	2/15/2026 10:26 PM
2973	It didn’t work when you tried it in Dunwoody. Why will it work now?	2/15/2026 10:13 PM
2974	Grade band scenarios does not work long term with the changing demographics of these neighborhoods. Children moving schools too often will be detrimental to their education and to the property values in the community. House in the OGE and lakeside HS districts are sought after and have continued to be that way for decades-changing this area will force homeowners out of Dekalb county.	2/15/2026 10:10 PM
2975	Little children shouldn’t be clustered with much old children.	2/15/2026 9:53 PM
2976	I think the tradition bands work well for the Lakeside cluster; I think other clusters need to evaluate what is best for them, which could be different.	2/15/2026 9:39 PM
2977	For the Lakeside cluster (which includes Oak Grove Elementary School), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/15/2026 9:17 PM
2978	Consolidation is fine but not elementary to middle and middle to high schools. Reason being different age group kids have different emotional needs and vulnerabilities. It has to be well	2/15/2026 9:02 PM

	looked into.	
2979	I don’t think combining middle and high school is. Good idea .	2/15/2026 8:27 PM
2980	I think it would make sense to add more grades though 8th at elementary and lessen over crowding in middle school.	2/15/2026 8:13 PM
2981	I do like the idea of grade bands. Briarlake a near by school and OGE could do something like one e PK - 1 and the other 2 -6. Pulling more free preK spaces to increase enrollement from the private daycares that use resources that could be funneled into a more regulated PreK program	2/15/2026 8:11 PM
2982	I have seen grade bands be successful in school systems like Decatur. While I don’t like the approach for my family (having multiple children) I do understand the benefits of it	2/15/2026 6:50 PM
2983	Improve schools currently under perform, not to try to blend students from better performing schools to “improve” the under performing schools.	2/15/2026 6:43 PM
2984	Unless it’s a trade class room everyone needs to learn with their respective age groups. If you advance then you go up but as far as teaching the same subject with 2 or more grades isn’t productive at all. Now you have more opportunities for distractions from the ones who want to learn and who don’t.	2/15/2026 5:57 PM
2985	Put 6th grade in the middle school cluster	2/15/2026 5:42 PM
2986	Traditional grade bands (PK-5 remain appropriate). The Oak Grove district is adjacent to one of largest health care expansion with thousands of jobs and residential units.	2/15/2026 5:38 PM
2987	i'm not sure what you mean by this question. My reading glasses are missing and I can't seem to read like I did 50 years ago...	2/15/2026 5:20 PM
2988	I think the grade bands do not need to change.	2/15/2026 5:16 PM
2989	I prefer traditional grade bands.	2/15/2026 4:33 PM
2990	DO NOT CLOSE ANY SCHOOLS, DO NOT COMBINE SCHOOLS!!!	2/15/2026 4:27 PM
2991	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/15/2026 4:23 PM
2992	For the Lakeside cluster (Oak Grove, Sagamore Hills, Briarlake), stability should be prioritized. Oak Grove is projected at 96% utilization next year. Sagamore Hills is already at 91%. Briarlake is at 73%, but would need to absorb a significant share of Oak Grove’s enrollment if consolidation proceeds. This cluster is not experiencing structural decline. It is located adjacent to one of the largest healthcare and research expansions in Georgia, with thousands of jobs added and ongoing campus growth. Traditional PK–5 grade bands remain appropriate in a high-utilization, growth corridor. Structural grade reconfiguration should focus first on clusters with long-term, significant underutilization.	2/15/2026 4:19 PM
2993	I don't know which of these works best, but these scenarios scare me less than closing schools entirely.	2/15/2026 4:18 PM
2994	I vehemently disagree with moving children into a 6-12 shared space. Areas like Druid Hills High School being renovated and upgraded while the students in the lower income south side move into an older building like Towers together is unacceptable. My son is currently at Druid Middle on the IB scholarship and is on one of three 6th grade hallways which equates to him effectively being in a private school. His hallway does not interact with older students which eliminates the opportunity for bullying or the introduction of age inappropriate material. Is Towers High able to accommodate students in the same manner? What guarantees would parents have that their young children, an 11-12yr old, isn’t being influenced by an 16,17,18yr old on campus? Student safety is paramount to education and knowing young students in our neighborhood have experienced bullying at Bethune - to the point of leaving to homeschool - what can parents and students expect when the grades are blended together?	2/15/2026 3:34 PM

2995	Most scenarios seems logical, I believe that the cluster for PK-3 and 4-6, 8-12 makes more sense because these grad bands have specific requirements that would benefit the students to get on grade level performance track.	2/15/2026 3:24 PM
2996	Keep everything the same!	2/15/2026 3:22 PM
2997	When done in a small scale, we can understand the effectiveness of this, on a large scale, this could end up with lack of competitiveness in classrooms decreasing children's drive to do better, children feeling they are being singled out because they are "not as smart."	2/15/2026 3:13 PM
2998	Grade band should remain the same as they are Pk-5 /5-8/9-12 or Pk-3/4-5/6-8/9-12 because having student at the same clusters help kids to grow according to their age, and they won't be pressured or influenced by what the see in everyday basis since kids always look up to their elders.	2/15/2026 2:56 PM
2999	No comment	2/15/2026 2:16 PM
3000	I think the Lakeside cluster could benefit from having a Pk-3, 4-5, 6-8 type model. That would utilize more of the existing school buildings that are so close to Lakeside (Oak Grove, Sagamore, Briarlake, etc). It would allow focus on specific grade level needs and since the schools would be so close together, the bus routes would work better.	2/15/2026 1:36 PM
3001	I do not wish to change the grade bands in the Lakeside cluster.	2/15/2026 1:11 PM
3002	I think that having 6th graders in the same school with adult students (11th and 12th graders) is a recipe for disaster. Possibly exposing the younger students to things (drugs, sex, violence, etc) that a 11-13 yr old should not be around to at that age. Pk-7 and 8th-12th would be better.	2/15/2026 1:11 PM
3003	makes sense	2/15/2026 12:41 PM
3004	It was absolutely amazing and awesome at Dekalb Art Academy	2/15/2026 12:08 PM
3005	I think this is a good and efficient effort.	2/15/2026 11:55 AM
3006	The clusters will only stress students th more and make parents out their kids in home school.	2/15/2026 11:45 AM
3007	These are inportant for growth for children.	2/15/2026 11:42 AM
3008	I am concerned by the grade band scenarios, especially PK-8 and 6-12 grade bands. These configurations seem inappropriate to varying stages of development, and a safety risk for younger grades.	2/15/2026 11:40 AM
3009	Never should there be a 6th grade-12th grade scenario.	2/15/2026 11:15 AM
3010	While I think the traditional model definitely has some defects, it’s the closet to my preference (PK-6, 7-8, 9-12). Middle school both in general and in Dekalb is awful. From administration to kids. Too many, going through too many hormones with administration and staff that flat do not care is criminal.	2/15/2026 11:10 AM
3011	I'm more concerned about 9th grade students. I believe either an 8-9 or 8-12 model would work better to aid in the transition to where credits matter for students.	2/15/2026 11:09 AM
3012	I dont see how different grouping would be beneficial. Unless said child needs accommodations	2/15/2026 10:56 AM
3013	The current grade band transition from elementary to middle school send a confusing message to students as if they are on a different developmental stage that creates detachment from their childhood.	2/15/2026 10:27 AM
3014	For the Lakeside cluster (including Oak Grove, Sagamore Hills, and Briarlake), maintain flexible grade bands that avoid unnecessary closures in growing areas. Oak Grove's enrollment has risen for 6 years straight, hitting 96% projected for 2026-27, amid $2.5+ billion in local investments like the $1.5 billion Arthur M. Blank Hospital and Emory's $87.7 million expansions. This growth indicates we may not fully know the enrollment effects yet, potentially requiring expansions at Sagamore Hills, Briarlake, and Oak Grove rather than consolidations.	2/15/2026 10:25 AM
3015	We hope Ashford elementary stays open as is.	2/15/2026 10:18 AM
3016	K-5 schools should not be combined with anything higher than 6th grade.	2/15/2026 10:16 AM

3017	Oak Grove Elementary is a fabulous school and a cornerstone of the community. If this school closed, it would be devastating to the community. Many students would end up at private school, not another public school.	2/15/2026 10:08 AM
3018	Oak Grove's enrollment has risen for the last six years. With the major investments in the Druid Hills/North Druid Hills area, we may not know the full enrollment effects yet, potentially requiring expansions at Sagamore Hills, Briarlake, and Oak Grove rather than consolidations. Traditional PK-5 bands suit high-utilization, high-performing schools like Oak Grove, top-tier CCRPI scores. Changes should be applied to underutilized clusters elsewhere, not at Oak Grove.	2/15/2026 10:03 AM
3019	I am currently in favor of maintaining the K-5, 6-8, 9-12 structure as it stands. While I recognize the potential advantages of implementing an approach similar to that used in the City of Decatur, it could be perceived as divisive if applied selectively to certain areas within the county but not others.	2/15/2026 9:56 AM
3020	I support thoughtful grade band adjustments where they strengthen programs and balance enrollment without eliminating community schools. Any grade band shift should be cluster-specific, data-driven, and aligned to feeder pattern stability. A 6th grade academy housed at an under-capacity elementary campus • 7–8 consolidated at an existing middle school site This would also support smoother academic transitions and targeted behavior supports at the 6th-grade level.	2/15/2026 9:52 AM
3021	The earlier kids are put together, the better. Starting middle school in 6th grade is good	2/15/2026 9:21 AM
3022	Miller Grove Middle School-Will there be considerations for a K-8?	2/15/2026 9:21 AM
3023	I personally attended a K-6 elementary and 7-11 high school in Canada. I thought this was a perfect way to do it. It separates younger kids from older kids, while also limiting difficult transitions between schools. For 7-8 we had first period homeroom teachers that taught 2-3 classes. This eased the transition to high school. High school had different wings for different grades to separate ages. Younger kids (7-8) had the first of two lunch periods. Older kids (9-11) had the second.	2/15/2026 9:08 AM
3024	I can accept consolidation, but I do not like grade bands of P/K-8, etc. I prefer traditional K-5, 6-8, 9-12. PK can have it's own location regionally, 1-2/region.	2/15/2026 8:31 AM
3025	Please do not close Ashford park elementary	2/15/2026 8:21 AM
3026	I think the grade bands should stay as they are. They are age and development appropriate.	2/15/2026 8:01 AM
3027	I think the grade bands should stay as is. Again this isn't a numbers game these are kids we are talking about.	2/15/2026 7:03 AM
3028	When has less space with more people ever been beneficial (other than to save money)? You're proposing to revamp the facilities platform using the counties money, and are seemingly trying to get the residents to buy into this premise.	2/15/2026 6:21 AM
3029	6-12, I believe I read it's too steep of a stretch. The kids already experience so much so having grave band clusters isn't in the best interest in my opinion. Puberty and maturity plays a big part in that as well so I don't foresee that option being a good decision.	2/14/2026 11:33 PM
3030	I have concerns about grade band scenarios, specifically those with 6th-12th grade schools. I take issue with younger children being placed with much older teenagers especially in today's society where there is the potential for exposure to so much more negativity and things outside of their age group.	2/14/2026 10:51 PM
3031	In full support	2/14/2026 10:42 PM
3032	Not sure	2/14/2026 10:41 PM
3033	Not 6-12. There is something special, something that feels like its been earned when you FINALLY get to HS and its separate from all other schools.	2/14/2026 9:47 PM
3034	If anything maybe k through 8 would be a good option but to get rid of high schools all together is really detrimental to the community and a loss for the alumni of the high schools.	2/14/2026 9:42 PM
3035	NA	2/14/2026 9:11 PM
3036	Don't really want my 6th grader in school with HS seniors	2/14/2026 8:46 PM

3037	I think that grade bands are great. My children attended school in a district that adopted this concept many years ago.	2/14/2026 8:32 PM
3038	Huge schools on any level are asking for trouble. Combining schools with no structure to require parent engagement and tight structure, strong leadership teams per grade level is a disaster waiting to happen.	2/14/2026 8:10 PM
3039	I do not like the idea of elementary and middle or high school mixing, even if it is only to share buses. Sharing buses makes me extremely concerned too.	2/14/2026 8:00 PM
3040	Close towers	2/14/2026 7:46 PM
3041	I have 2 9th graders at Lithonia High with a 3rd who will be in the 9th grade next year. Graduating 2029 & 2030. We live in walking distance to the school. Closing LHS for high schoolers in the area may cause issues with students getting to school. Lithonia High School should continue to operate as a 9–12 grade school only to ensure strong academic continuity, student readiness, and improved graduation outcomes. A 9–12 model also promotes equity, strengthens school culture through mentorship and long-term relationships, and reduces unnecessary transitions that can disrupt student progress.	2/14/2026 7:10 PM
3042	I strongly believe that maintaining the current grade bands of Pre-K to 5, 6-8, and 9-12 is essential for fostering developmentally appropriate learning environments for our students. Each grade band serves a distinct purpose in addressing the unique needs of students at different developmental stages. The Pre-K to 5 band provides foundational skills and socialization opportunities crucial for young learners. As children transition into middle school (grades 6-8), they face significant developmental changes and benefit enormously from an environment tailored to their specific growth needs. Similarly, high school (grades 9-12) presents critical academic and social experiences that prepare students for adulthood and post-secondary education. Aligning students with their peers within these designated bands not only supports their academic growth but also nurtures their social and emotional development. Mixing age groups outside of these established bands could lead to disparities in learning experiences and result in difficulties for both students and teachers. Additionally, maintaining these grade bands aligns with best practices in education and ensures that both curricular design and instructional strategies are appropriately tailored to the age and developmental characteristics of the students within each group.	2/14/2026 6:59 PM
3043	Socially 1-5, 6-8, 9-12 makes sense but some varieties are fine. My concern is breaking things down to 1-3, 4&5, etc. More school changes are disruptive & put increased burden on parents.	2/14/2026 6:15 PM
3044	I am open to other grade band scenarios, but would prefer the traditional band.	2/14/2026 5:42 PM
3045	My children went to DESA at one point. The k to 8 model can work remarkably well. If children are allowed to move up if they demonstrate proficiency there is an opportunity for accelerated learning	2/14/2026 4:27 PM
3046	I prefer maintaining the existing grade band structure. I do not think 8th graders should be grouped with younger kids and similarly do not think 6th graders should be in facilities with 12th graders. I also do not think it is necessary to separate 4-5th graders, causing an unnecessary transition.	2/14/2026 4:20 PM
3047	Middle school clusters should include STEM/STEAM curriculum and high school clusters should include dual enrollment and STEM/STEAM curriculum in order to offer and provide realistic and practical learning experiences to succeed in a changing and innovative job market.	2/14/2026 3:44 PM
3048	The current grade bands should remain in place. Changing the grade bands would NOT be good for the Lakeside cluster. Frankly, this is something that would lead to parents removing their children from Dekalb schools. Residents would also leave Dekalb for other counties or send their children to private schools. How would any of this be beneficial?	2/14/2026 3:06 PM
3049	Bands should be developmentally appropriate	2/14/2026 2:46 PM
3050	Traditional needs to stay the same.	2/14/2026 2:31 PM
3051	I am happy with how the grade bands currently are PK-5, 6-8, 9-12. I like that my kindergartener and 4th grader can go to school together. Changing the grade bands will make it harder for parents to take their younger kids to school. Middle schoolers and high schoolers do not need to go to school together. It is not appropriate for a 12 year old and 18 year to be at the	2/14/2026 2:22 PM

	same school. If school bands change or Evansdale is shut down, my family will change school districts.	
3052	I would be horrified for my 6th grader to be in the same school as high schoolers	2/14/2026 2:12 PM
3053	I believe that the team should review what City Schools of Decatur did years ago regarding grade bands. I believe that allowing teachers to focus intensely on tighter grade bands always for greater differentiation with student learning needs. A school focused on PreK-2 can have up to five 1st and 2nd grade classroom. If vertical alignment work is built into professional learning and pre/post planning, instruction across grade bands can be powerful.	2/14/2026 1:15 PM
3054	In my opinon new grade configuration combining schools (Full K-12 model) will offer expanded programs like STEM/STEAM due to the larger student body, allowing for more diverse extracurricular activities.	2/14/2026 1:15 PM
3055	I am still trying to understand the grade band. Leadership at these locations would be detrimental to the success. Current leadership at many of the schools is questionable.	2/14/2026 1:13 PM
3056	That is an interesting approach - I like the idea of grouping appropriate ages together - 6-12 as suggested is to broad - seems better	2/14/2026 1:12 PM
3057	Confused by Ashford Park ES is in the closure list when it is running at 171% of capacity. If anything we need to keep that open AND expand nearby schools to offer relief.	2/14/2026 1:07 PM
3058	I would be interested to learn more about potential K-8, 9-12 progressions for some or all areas. Did the SAP committee map out how this could work? I would strongly advocate for movement to K-8, 9-12 model where possible even you are not able to apply this district-wide. School transitions are know to have a negative impact on student outcomes and minimizing transitions should be a priority. Conversely, I would be very against adding more school transitions by creating upper/lower elementary schools as was done in City Schools of Decatur.	2/14/2026 12:50 PM
3059	As an educator, middle school age children should never be with high schoolers. The traditional model works best so that the appropriate learning and developmental environment can be established and done well for all students at each stage.	2/14/2026 12:45 PM
3060	I could see the benefit of expanding grade level bands within the elementary schools. Could some middle school grades be added to elementary clusters for increased attendance.	2/14/2026 12:29 PM
3061	Would clustered grade bands mean inclusion of all the grades as one united school? Or Would there be a sort of Upper school and Lower school but on one campus? The upper/lower split seems more ideal than having 6th and 12th graders in one student population	2/14/2026 12:28 PM
3062	6-12 will never be an option I'd choose for students. Larger schools and the wide age ranges create	2/14/2026 12:23 PM
3063	Focus on the parents not forcing their children attend schools. Some receive federal financial support and housing. Benefits should stop. This will increase sttendance.	2/14/2026 12:11 PM
3064	I think testing grades and non testing grades should be separated.	2/14/2026 12:09 PM
3065	I'm NOT in favor of PK-3/ 4-5/ 6-8/ 9-12 as this requires a lot drop offs and pick-ups for families, especially for those with multiple younger children.	2/14/2026 11:49 AM
3066	I believe the traditional grade groupings are still good, as splitting into more bands will cause more logistical issues than possibly expected. As a student who attended dekalb academy of technology and environment from 1st thru 8th grade, I helped build and wqs supporrted by a foundation and community that has benefitted me tremendously even to this day	2/14/2026 11:41 AM
3067	I am comfortable with all the proposed grade bands.	2/14/2026 11:41 AM
3068	I've worked in schools with PK-8. It led to younger students being exposed to behaviors they should not be exposed to.	2/14/2026 11:35 AM
3069	Dunwoody and vanderlyn elementary. Putting 6th grades with 12th graders is ridiculous. The age of maturity of students. Exposure to drugs , alcohol and mature content. Shows a lack of what's best for our children's education, mental heath health and overall success.	2/14/2026 11:34 AM
3070	I have no feedback on the grade clusters.	2/14/2026 11:23 AM
3071	Bands should be traditional	2/14/2026 10:54 AM

3072	6-12th graders should not be placed together. You will be placing immature children with upper class students. Problems with younger students imitating older student is a problem with 8-12th graders.	2/14/2026 10:52 AM
3073	If this improves classroom/ratio sizes for Avondale and druid hills we support it	2/14/2026 10:03 AM
3074	This concept only works in smaller communities. In reality 92,000 is still a high capacity community. I'd need to see plans for separation within these schools. Sounds like an increased potential for access to inappropriate age relationships/friendships etc. in key developmental stages.	2/14/2026 9:59 AM
3075	I don't think that this is a good option. It not only opens the door for inappropriate, large age gap interactions, but could have developmental consequences on the younger children.	2/14/2026 9:55 AM
3076	6 th graders are still too young to be with 8th graders	2/14/2026 9:28 AM
3077	K-8 schools are a better grade band consolidation than 6-12. 6th graders should not be in a high school, even if kept in a separate wing of the school.	2/14/2026 8:55 AM
3078	Would need clear separation between the lower and upper grades so the students are not interacting across such a large age range	2/14/2026 8:51 AM
3079	I believe the population of children should be the driving factor for any scenario and I don't believe that's the case	2/14/2026 8:40 AM
3080	Current bands PK-5, 6-8, 9-12 need to remain in place. Grouping them by development stages is necessary	2/14/2026 8:38 AM
3081	The potential grade band scenarios are interesting. Because special services sometimes need patterns and time to be seen, it is important for those years to be under one tier. I would like 6 grade to remain there also.	2/14/2026 8:24 AM
3082	Most interested in k-8 scenarios.	2/14/2026 8:21 AM
3083	Combining middle and high school to for 6-12 schools is disastrous for the younger students, who need more nurturing, not less.	2/14/2026 8:20 AM
3084	I believe that the bands needs to be consistent and need to align to private school bands. It would be really great if elementary and middle could be combined where possible as most people want to transition out of public and into private at the high school level.	2/14/2026 8:18 AM
3085	K - 5th	2/14/2026 8:17 AM
3086	Please do not place 6th grade with 12	2/14/2026 7:59 AM
3087	If grade band changes are considered, the district should clearly communicate how these changes will improve academic opportunities and student experiences. Any adjustments should prioritize: • Expanding access to advanced courses, electives, and specialized programs • Strengthening extracurricular and athletic opportunities • Supporting teacher staffing stability and course availability • Minimizing disruption to students and families during transitions Families will want to understand how grade band changes will strengthen school communities and improve long-term outcomes for students. Clear communication about the educational benefits of these changes will be essential for building trust and community support.	2/14/2026 7:46 AM
3088	I am not in favor of the changes.	2/14/2026 6:48 AM
3089	Grade Band & Facilities Scenarios Lithonia Cluster Evaluation Prepared for District Consideration ——— I. Current Cluster Structure Lithonia Cluster • Lithonia High School — Grades 9–12 • Lithonia Middle School — Grades 6–8 • Elementary feeder schools within Lithonia attendance zone Current Enrollment • Lithonia High School: 1,500+ students • Historical capacity (1996): 1,800+ students Observation: Enrollment levels support continuation of a comprehensive high school model. ——— II. Scenario Comparisons ——— 🔹 Scenario A: Status Quo (9–12 Model Maintained) Lithonia HS: Grades 9–12 Middle Schools: 6–8 Impact • No feeder disruption • No transportation changes • No staffing restructuring Strengths • Stable enrollment • Strong alumni/community identity • Predictable budgeting Limitations • Freshman transition challenges • Facility modernization needs remain ——— 🔹 Scenario B: 9th Grade Academy Model (Within Lithonia Cluster) Lithonia HS: Grades 10–12 Dedicated 9th Grade Academy: On-site (separate wing or lower level) Middle	2/14/2026 6:03 AM

	Schools: 6–8 Impact • No cluster boundary changes • Minimal transportation adjustment • Requires targeted renovation Academic Benefits • Focused freshman intervention • Improved attendance & graduation rates • Reduced discipline referrals Operational Considerations • Additional staffing structure • Renovation cost allocation Assessment: High academic upside with low cluster disruption. 1. Lithonia High School does not demonstrate an enrollment deficiency. 2. Grade band restructuring should prioritize academic improvement, not consolidation. 3. A 9th Grade Academy model provides measurable benefits without cluster disruption. 4. Consolidation presents disproportionate community and operational risk. 5. Reinvestment at Randall Avenue provides the strongest long-term growth capacity. ——— V. Recommendation for District Consideration If grade band adjustments are being evaluated within the Lithonia cluster, the most viable options are: • Maintain 9–12 with facility modernization OR • Implement a 9th Grade Academy within a reinvestment framework Both preserve enrollment stability and cluster continuity.	
3090	Lithonia shouldn't be closed because it has a LARGE community dating back years that will be affected.	2/14/2026 6:01 AM
3091	No big issues with this plan as long as it makes sense for the zone/community you are in. I worry about the 6-12 combined school as I believe 6-8 would be more appropriate for middle school aged kids. There should be no reason for 6th graders and 12th graders to share the same facility and be exposed to each other, as that could create its own set of unique challenges associated with the larger age difference of the students	2/14/2026 5:32 AM
3092	I do not like the idea of my very impressionable, soon to be 11 year old walking the halls with 18 year olds	2/14/2026 5:24 AM
3093	The traditional grade bands should remain in place. 6-8 graders should still have the excitement of transitioning to from middle to high school.	2/14/2026 1:42 AM
3094	I do not support Towers High School being converted into a middle school. The district must understand that demographics in the area will continue to shift where more young families will soon occupy homes and will desire schools closer to their residence.	2/14/2026 1:00 AM
3095	My children attend a theme school what would be the feeder school for Middle school	2/14/2026 12:10 AM
3096	As a former teacher, combining middle and high school could be a challenge. I would still suggest separating them in the same building if that is the solution.	2/14/2026 12:08 AM
3097	The reason why we have less enrollment is after 5 is very hard to find another school parent they wasted to same school from k to 8 grade easy for parents and children	2/14/2026 12:02 AM
3098	For Ashford Park cluster, leave elementary as K-5	2/13/2026 11:28 PM
3099	With Rainbow, Bob Mathis and Chapel Hill so close, moving those clusters into Chapel Hill Middle will free up those older buildings for demolition(larger space to build out CHM) or repurpose. CHM could then move to SWDH and become either 6-12 or 7-12. Early learning PreK3, PreK4-2nd, 3rd-6th, 5th-8th, 9th-12th grade bands	2/13/2026 11:21 PM
3100	I would prefer to avoid a k-3, 4-5 scenario because of siblings going to different schools.	2/13/2026 10:49 PM
3101	na	2/13/2026 10:24 PM
3102	N/a	2/13/2026 10:07 PM
3103	I'm more comfortable with the traditional grade bands. Socially there is great difference between kindergarten and 8th grade students where I would be uncomfortable. I'm more open to combining 6th-12 but that would require very large facilities however I attended a side by side middle school and high school which shared outdoor recreational facilities.	2/13/2026 10:07 PM
3104	Have not read up on it or followed it	2/13/2026 10:04 PM
3105	It seems as though all of these are on the south side of Dekalb County. I don't think the scenario of 6th graders being in an environment with 12th graders is at all a good idea.	2/13/2026 9:50 PM
3106	7	2/13/2026 9:39 PM
3107	Not sure I understand the question, but I tend to prefer including 8th grade with elementary students vs the high school students. Evansdale and Oak Grove closures would unfairly impact that neighborhood.	2/13/2026 9:34 PM

3108	I like 6-12 - I've worked in one before and the school is organized in grade pods.	2/13/2026 9:14 PM
3109	Combining high school to middle schools in the black community would unfair and put student in the 6 to 8th grade in a position that wouldn't be mature enough to handle. Also leaving middle school and highschool separate allows for the students be matriculation with their classmates within an appropriate time.	2/13/2026 9:14 PM
3110	I'm challenged with the Lithonia HS cluster as well as Cedar Grove. The community should receive additional insight regarding the financial and geographic impact.	2/13/2026 9:00 PM
3111	My children attended a K-8 school (Museum School of Avondale Estates) and thrived there. Such combinations must take many variables into account, including library space/use.	2/13/2026 8:59 PM
3112	Traditional middle schools work! They help students become adaptable for high school.	2/13/2026 8:50 PM
3113	The greatest band and teachers.	2/13/2026 8:48 PM
3114	I'm not in favor of putting grades 6 through 12 in the same school. The differences in maturity level leaves the younger students exposed to things they shouldn't be exposed to.	2/13/2026 8:40 PM
3115	not familiar	2/13/2026 8:36 PM
3116	I think worst case scenario it could be an option To do grade bands. We are in the McNair cluster. McNair DLA is the newest school of all of them and had a recent MedCura clinic added on allowing access for students and the community to see medical and mental health professionals during school hours and free to low costs. I could see a scenario of splitting the elementary grades into two or three of the schools listed to close like Kelly Lake which has recently undergone structural improvements. I do not believe having middle and high school together is a positive choice. I've attended a school like this myself and it was an increase in the younger youth getting pregnant and engaging in inappropriate activities since they are around the up to 18 year old crowd. They should be separated.	2/13/2026 8:30 PM
3117	Hawthorn and briar. Cliff elementary	2/13/2026 8:26 PM
3118	making some High schools 6-12 may be problematic given the adult-like behavior of many High schoolers and the vulnerability of some early-age middle schoolers. a K-8 model might be more successful	2/13/2026 8:26 PM
3119	I believe middle school can be combined with high school or elementary as long as it is operated as it's own part of the school.	2/13/2026 8:22 PM
3120	Grade bands in the traditional way are best. I live in district 4 with theme schools. Age maturity will affect learning.	2/13/2026 8:16 PM
3121	Rock Chapel and Lithonia	2/13/2026 8:03 PM
3122	Closing the high schools is not the way to go, maybe middle schools. Make the listed high schools 6th-12th if feasible. Or do pk-8th then 9-12	2/13/2026 8:02 PM
3123	I do not like it. The schools will be too large.	2/13/2026 7:56 PM
3124	Whatever is best for the kids	2/13/2026 7:54 PM
3125	Do what is best for the children	2/13/2026 7:53 PM
3126	Think outside the box - other configuration	2/13/2026 7:44 PM
3127	I do have an issue with the 6th to 12th graders being together. The question would be are they going to be seperated?????	2/13/2026 7:39 PM
3128	Grade bands need to remain traditional, Pre-K -5th, 6-8, 9-12	2/13/2026 7:25 PM
3129	Kids are maturing earlier and faster. It's better to recognize age and stage changes that have further emphasized the need for the traditional system. Protecting the naive PreK-5 and formative 6-8 as much as possible, while supporting the adolescent and career development needs of 9-12.	2/13/2026 7:19 PM
3130	I love the idea of the 6-12 school. I really think that gives older kids a chance to mentor and the younger to see how far they can go. I love this idea.	2/13/2026 7:04 PM
3131	I think it's fine but again my worry is you guys are looking at a bottom line when you should be trying to be competitive with making the schools the best they will be . People move out of	2/13/2026 6:51 PM

	DeKalb because of the state of the school system being so bad . Improve the schools and you will have no issue with enrollment .	
3132	Through my partnership with the City Schools of Decatur for afterschool programming, I've seen firsthand how their grade band structure creates a strong academic foundation and smoother transitions for students. Their model is something I believe DeKalb County School District should seriously consider adopting. The way Decatur organizes its grade bands eliminates multiple structural challenges while creating immediate opportunities for student success. The transition from 3rd grade into a dedicated 4th–5th grade school provides the kind of milestone and sense of progression that today's students respond to. That shift creates motivation, excitement, and a feeling of growth — something many kids need. This structure also allows teachers greater flexibility in using school facilities more intentionally. Principals can narrow their focus, giving targeted attention to the developmental stage they serve rather than spreading their efforts too thin across wide grade ranges. Elementary school is the most critical stage in a child's education. A focused grade band model creates more room for strategic planning, intentional teaching, and expanded opportunities to help students reach their educational goals. In my opinion, this approach represents a stronger, more intentional brand of schooling — one that prioritizes development, structure, and long-term success	2/13/2026 6:50 PM
3133	the band is great.	2/13/2026 6:30 PM
3134	Traditional grade bands work for the chamblee cluster. Montgomery elementary should stay just that. With traffic and the age of the building, there is no reason to over populate the school or build a new facility to accommodate expanded enrollment.	2/13/2026 6:13 PM
3135	I am uncomfortable with the prospect of having 6th graders in the same school as high school but am otherwise open to alternative grade band proposals.	2/13/2026 6:02 PM
3136	In the Dunwoody Elementary, Peachtree Middle School, Dunwoody High School, I am comfortable with the traditional grade bands. I like when the schools are broken up to cater the needs for the different age levels.	2/13/2026 5:49 PM
3137	Grade banding could be beneficial to areas that support a smaller community where kids could attend a 'local' school. On the other end, allowing the crowded areas to have a condensed population of a smaller age group would also allow for a great teacher success rate with helping struggling students.	2/13/2026 5:43 PM
3138	My children are currently at all grade levels and I think it is appropriate to keep the ages separate. The middle and high school level challenges I do not think are conducive to younger children.	2/13/2026 5:33 PM
3139	Well, my child is in the 6th grade and has autism. The classes are already full, and with all these schools closing, the situation will only worsen. This is about funding, not about what will benefit the children.	2/13/2026 5:28 PM
3140	I do not mind the idea of grade bands, but I think it is highly disruptive for families with multiple children. Lots of OGE students are at our school for seven years. I'm a fifth grade teacher, but I know kids at every grade level. They look forward to coming up. Please leave us alone. Please.	2/13/2026 5:22 PM
3141	They should have the pre-k up to third then 4th-5th then 6-8th and the high-schoolers the same	2/13/2026 5:21 PM
3142	Terrible idea. While some change is good, that change is unnecessary in my opinion.	2/13/2026 5:13 PM
3143	The Southside and Eastside schools for middle and high school has declined over the years. The Northside middle and high schools are fully staffed and engaged parental involvement.I would recommend 50% of middle schools and high school in the south should be closed and bus the students to other high performing schools, Transfer your staff as well.	2/13/2026 5:05 PM
3144	When reviewing the potential grade band scenarios for DeKalb County School District, it is important to carefully evaluate how each configuration impacts academic continuity, student development, and community stability. Grade band adjustments affect more than scheduling. They influence curriculum alignment, staffing, transportation, and the emotional well being of students.	2/13/2026 5:04 PM
3145	NA	2/13/2026 5:01 PM
3146	Please consider combining k-8 on one campus.	2/13/2026 4:52 PM

3147	Traditionally school setting is best	2/13/2026 4:36 PM
3148	Do not mix the 6-8 graders with high schoolers.	2/13/2026 4:32 PM
3149	No opinion on this - as a product of K-7th grade, keeping the older children with the younger kept them more innocent - we chose to send our children to Catholic school for this reason	2/13/2026 4:32 PM
3150	6th and 7th graders should not be in high school. I do understand having first through 7th grade as an elementary school.	2/13/2026 4:19 PM
3151	The grade band models are all worth discussing. But without details about specific schools and clusters, it is impossible to get a robust discussion going.	2/13/2026 4:18 PM
3152	Unless the schools are completely seperated, I see this being complete chaos especially when it comes to combining middle and high school. I am all for keeping the traditional clusters.	2/13/2026 4:11 PM
3153	KEEP EVERYTHING THE WAY IT IS NOW!! NO NEED FOR CHANGE!!	2/13/2026 4:03 PM
3154	The smaller cluster bands would be better (PK-2/3-5/6-8/9-12). The PK-8 grade band does not seem like a good idea. 4 and 5 year old students do not need to be in schools with 12 and 13 year old students.	2/13/2026 4:00 PM
3155	Grade bands should remain the same: Traditional PK-5 / 6-8 / 9-12	2/13/2026 3:54 PM
3156	I think that the proposed closures will require extensive fleets of buses to be purchased (or leased) and the transportation costs will negate the savings by closing schools that are already paid for.	2/13/2026 3:46 PM
3157	There are too many elementrys schools, bob Mathis students usually show up late	2/13/2026 3:32 PM
3158	I would like to hear more about the plan for the Columbia Cluster. I'm assuming that with Towers HS closing that means those students will be coming to Columbia HS. What is the plan for this consolidation? What is the plan for leadership helping to facilitate this consolidation?	2/13/2026 3:23 PM
3159	Traditional PK–5: B / 6–8: C / 9–12: B–C – reflecting literacy strengths and areas for improvement in math and other subjects.	2/13/2026 3:17 PM
3160	I am not sure what the advantage is of the grade banding except maybe utilizing smaller buildings. I do not think it was laid out as clearly as the closures/cascading approach. My main concern would be separating siblings. For my own children, I know that my pk'er will be starting K next year and would be very sad to lose the support of her older brother who will be in 4th. I also do not think that there is much benefit to having 13 year olds in the same building as 4 year olds. I think there are places where this makes sense (smaller charter schools, etc.) but with the larger student body, I do not think that will make sense.	2/13/2026 3:13 PM
3161	La escuela brockett es muy buena y es de nuestra comunidad no deberían quitarla	2/13/2026 3:03 PM
3162	La escuela que donde va mi sobrino es y estoy a -5 minutos de la casa y es importante por que si.llega a pasar eso por que el edificio es más y la escuela es de pre k to 5 grado .	2/13/2026 2:51 PM
3163	Grade bands with fewer grades and more buildings can be really hard on famlies with multiple children. It is also really hard for some students to constantly make transitions. My first job was at a K-12 school and it was so amazing to be all in one building and see the kids grow and to have whole families together. Attendance was good even though we have 93% free and reduced lunch families. It was a lot easier for parents to get kids to all school a whole family in one drop off. Right now we are in a place that is K-6, 7-8, 9-12 and I think the short middle school time is weird.	2/13/2026 2:49 PM
3164	I think grade bands in the younger years is great - pk-2 3-5. 6-8 9-12. I don’t mind the idea of 6-12 but would be concerned with developmental differences between the youngest and oldest grades. I attended Tucker High 8-12 and it was intimidating to be in school with 18 sometimes 19 year old men.	2/13/2026 2:48 PM
3165	Ashford park should remain Pre-K to 5 or Pre-K to 3. If the school is over capacity, it can either be renovated to accommodate pre-k to 5 or potentially convert to pre-k to 3 if there is not enough capacity for students there.	2/13/2026 2:45 PM
3166	grade band scenarios	2/13/2026 2:38 PM
3167	I prefer the current grade bands, however, if it would mean being able to keep kids in smaller schools, I would be willing to switch to smaller grade bands.	2/13/2026 2:32 PM

3168	If middle schools are eliminated, return to former grade structure: K-7 Elementary and 8-12 High School. Primary considerations are emotional intelligence and not exposing to more mature scenarios too early.	2/13/2026 2:32 PM
3169	I think it would be good for toney elementary to stay an elemetary school	2/13/2026 2:31 PM
3170	Lakeside cluster already has one abandoned school within its boundaries. There is an early childhood center within the cluster now (Coralwood). Briarlake elementary has a smaller footprint, and is on a major road, making it less desirable for walkability and expansion without negatively impacting the community.	2/13/2026 2:17 PM
3171	This is not a great idea. It’s a reason grades were disbanded from presvious years. I worked at Pk3-8th grade campuses in Baltimore City Schools and it was not the best environment. I know we are exploring 6-12 but it’s the same thing. No parent in their right mind wants their 6th grader being exposed to 12th grade behaviors at an early age. This will be a major failure in climate and behaviors for our students.	2/13/2026 2:16 PM
3172	This is a bad idea	2/13/2026 2:15 PM
3173	No	2/13/2026 2:09 PM
3174	My position is that schools on the densely populated northern part of the county should not be closed. In particular, Sagamore Elementary already has numerous teaching trailers in its back yard. Adding Oak Grove students will only worsen the overpopulation problems in Sagamore. Unless of course the intent of the County and the School Board is to reduce the population of children in the public schools by causing parents to have to remove their children and send them to private schools.	2/13/2026 2:01 PM
3175	I think that transitioning from a school so often can be challenging, particularly for SPED students who often stay with the same teachers for multiple years. At the same time, I do believe that the junior high model - PK/1-6/7-9/10-12 is great for students and keeps older high school students (who are basically young adults) separate from freshmen who can be as young as 14. It allows elementary school kids in sixth grade to "stay kids" a little longer.	2/13/2026 1:50 PM
3176	I am be open to grade band clusters HOWEVER my biggest concern would be what type of extra curricula would be available for the younger students in the bands. Example..... if we were to move to 7- 12 what will be open to the younger students that aren't just sports.	2/13/2026 1:17 PM
3177	Whatever changes to grade bands should leave high schools as 9-12 grades only, as young adults and pre-pubescent children in the same facility presents unmanageable difficulties. Additionally, I do not want to be assigned to teach middle schoolers.	2/13/2026 1:16 PM
3178	I have no preference and would support whatever you decide as far as the clusters.	2/13/2026 1:07 PM
3179	I only like the banding scenarios in elementary schools - a lower level school and an upper level school. I feel the greatest con in this case is having siblings being split to different schools, but I also feel at the elem level there is the greatest amount of support from the community and the kids don't have as many diverse activities, meaning parents have more support from other parents in coordinating schedules of kids across campuses. I do not like the idea of K-8. While it gives advanced students in elem school greater opportunity to middle school classes I feel it is more detrimental to those middle schoolers. I prefer for there to be more challenging classes for the 7th & 8th graders than for in the younger grades. In a traditional middle school environment I feel many 8th graders have outgrown their environment and are not being challenged by the 8th. I think that problem will only be worse with a K-8 campus. I also dislike the idea of 6 - 12. Sports have been a large sport of both of my kids high school experience in less traditional 'popular' sports. Some of these sports would not be supported at a 6-12 level school. I know schools could be combined, but having been on a team that pulls from 2 high schools, the camaraderie and benefits of team building are not as great as when pulling from one school. I also do not like the idea of the socially immature 6th, 7th graders in the same school as 11th, 12th graders. I fully believe that middle school is 70%+ social growth vs. academic growth. I strongly believe in a more protected space for that growth than a 6-12th school.	2/13/2026 12:55 PM
3180	Ok	2/13/2026 12:48 PM
3181	I think we need to keep it traditional. Other methods don't work as well.	2/13/2026 12:40 PM
3182	I think the tradition grade band is good just the way it is, and I think that offering students	2/13/2026 12:35 PM

	opportunities to be bused between north and south DeKalb should become more of an option.	
3183	Grade band scenarios should be considered based on the needs of the cluster. Because the Tucker cluster has such a high population of ESOL student, the K-3, 4-5, 6-8, 9-12 grade may work well to improve student reading levels.	2/13/2026 12:31 PM
3184	I do not under any circumstance want 6th graders in same school with 12th graders!	2/13/2026 12:13 PM
3185	Fit the kids needs	2/13/2026 12:09 PM
3186	Students are vulnerable. Unless you all plan to completely separate campuses for these grade mixes, then NO!	2/13/2026 12:09 PM
3187	I do not want to see any model of putting 6-12 in one building. Keep the middle school format or go to K-8. High schoolers need space for teenagers and cannot manage pre-teens. I am agnostic about 4-5 academies, in my experience the K-5 elementary model already supports the 4-5 grades	2/13/2026 11:59 AM
3188	Even dumber.	2/13/2026 11:52 AM
3189	Grade band changes would be interesting, but I don't have strong opinions about this, as I have worked in other districts/states that have these differing grade bands. However, I don't think 6-12 is a good idea in one building. Too many different hormone levels/maturity levels that students are more aware of.	2/13/2026 11:50 AM
3190	In my area of zip code 30021, Brockett Elementary and Idlewood Elementary, provide ease of access to multi-family units that have more than one child in attendance. These schools are in walking range and provide the best possible opportunity for parents.	2/13/2026 11:45 AM
3191	I am interested in and supportive of different grade bands. For example, and early elementary school for preK-3 would be very welcome for my 2 young kids (currently in preK and K).	2/13/2026 11:42 AM
3192	I have been in a k-7 cluster in the past and do not see any issues with reasonably changing clusters. I do think there are benefits to expanding the cluster to look 6/7-12 since younger students can see older students excel.	2/13/2026 11:37 AM
3193	For SEL reasons alone grade clusters should be revised.	2/13/2026 11:34 AM
3194	I would need to see more data and research to understand how this would benefit students but not opposed.	2/13/2026 11:31 AM
3195	I think any grand band scenarios except the traditional will be hard to implement. If it is done, there will need to be alot of education and communication to everyone involved as to why and how these changes will take effect.	2/13/2026 11:14 AM
3196	If the grade band scenario is used, parents will not like having their children going to different schools. This might work if all the schools are located together and have the same start time, but parents will not like having kids in different schools, starting at different times.	2/13/2026 11:11 AM
3197	I'm concerned about young children around significantly older students.	2/13/2026 10:55 AM
3198	The facilities that are currently in existence are tailored to the grade bands that the buildings currently serve; it would be a huge financial expense to move resources, and in many cases purchase new equipment. Not to mention, create a lot of disruption for families that are used to the curtain model. If a grade band change must be made, the least disruptive one would be Pre-K -5, 6-12. This scenario potentially minimizes the awkwardness of " Middle School", and help children find their social footing with a cohort they will have for a longer period of time. It would also mean that there would be a lot of buildings made available; I would hope this would mean that savings in operations cost would be diverted to better programming.	2/13/2026 10:54 AM
3199	The plan to consolidate some high or middle schools to a campus for 6-12 could be feasible, but concerning for the safety of kids ages 10-19 being together. These are difficult times socially and developmentally for kids and they need safe, supportive schools environments. Take a look at Ericksons stages of development and consider how you can cluster grades to also support healthy family life cycle.	2/13/2026 10:51 AM
3200	APES is a neighborhood school with an exceptional location. Given it's small size and footprint, it may be better repurposed as a PK-3 or other school serving a smaller grade band. This may contribute to less overcrowding.	2/13/2026 10:49 AM

3201	What does it look like to go back to K-7th and 8th-12th because things kind of worked back then? Why make huge elementary and middle schools in Lithonia while closing the high. Claiming Miller Grove is newer? It's like two years newer. It would also be a killer commute for the kids in the Norris Lake area unless they get sent to Stephenson. The 6-12 schools seem like a lot to put on an 11-year-old. I need more current seat numbers and attendance map because there is no way you are talking about transportation cost with no idea of where you are transporting children to all these different bands.	2/13/2026 10:40 AM
3202	i like the preK-6 th grade , 7-12 the best.	2/13/2026 10:29 AM
3203	Keep grade bands the same as they are now.	2/13/2026 10:23 AM
3204	Mcnair	2/13/2026 10:19 AM
3205	Looks good	2/13/2026 10:17 AM
3206	I would not change the grade bands either. There needs to be a middle school and high school due to the maturity levels of the students to meet their individual needs at their grade levels.	2/13/2026 10:13 AM
3207	A 6-12 grade band is a disaster waiting to happen. There is a significant deficit in disciplinary action not just in DCSD, but nationwide in 6-9 grades most commonly. More students experiencing behavioral issues packed into one place will never be the answer. If PK-3, 4-5, 6-8, 9-12 grade bands better utilize the school buildings and staff the district has, I am more in favor of this grade band option. However the isolation of 4-5 I don't think will be beneficial long term. I think there is a welcoming and supportive culture in PK-5 schools that is beneficial to the older grades.	2/13/2026 10:09 AM
3208	I do not like the idea of middle school and high school being combined. Especially 6/7 grades should not intertwine with high school.	2/13/2026 10:08 AM
3209	I believe it should stick to traditional grade band, depending on the schools needs. I think DeKalb School of the Arts is a really good example of a different grade band that seems to work though.	2/13/2026 9:58 AM
3210	Can't even consider this question in a 'vacuum' -- if you are considering this scenario, you need to provide a tangible example to the community as to what this would look like from a school realignment perspective. The concept alone may be 'fine', but without understanding how it practically will impact the community and education is an empty exercise.	2/13/2026 9:47 AM
3211	My perspective on grade band offerings may be somewhat limited, as my experience has only been within traditional grade band structures. Based on that experience, I believe traditional grade bands appropriately address student needs. I do have concerns about models that would place students with significant age gaps in the same building. These factors should be carefully considered when evaluating alternative grade band configurations.	2/13/2026 9:40 AM
3212	I don’t feel comfortable with my child being around middle and high school students when he can barely comprehend things or defend himself. I have had severely bulling incidents at Redan elementary school this school year alone and they have only been in school 6 months so far. I don’t feel these kids will be protected in these environments.	2/13/2026 9:36 AM
3213	I am sure this would be fine and allow for constant ebb and flows of students to be better managed.	2/13/2026 9:33 AM
3214	Please add ISS room to all schools. Discipline will drive how effective any of these models work.	2/13/2026 9:27 AM
3215	The grade band scenario allows for easier future changes based on population.	2/13/2026 9:21 AM
3216	I strongly prefer keeping traditional grade bands: Elementary (K–5), Middle (6–8), and High (9–12). I do not support converting schools into K–8, 6–12, or shifting campuses between elementary/middle/high configurations in the [YOUR CLUSTER / YOUR SCHOOLS] area. Grade-band changes create unnecessary disruption, complicate scheduling and staffing, and can create developmental and safety issues by mixing very different age groups. Middle school and high school students have distinct academic, social, and extracurricular needs that are better served in purpose-built schools. If utilization needs to be addressed, do it within the traditional grade-band structure (K–5 / 6–8 / 9–12) by balancing attendance zones, improving program offerings to retain/enroll students, and using underutilized space for Pre-K, student supports, and community partnerships—rather than reconfiguring grade bands.	2/13/2026 9:21 AM

3217	I wasn't able to fully understand this part of the proposal for its applicability to my children's cluster.	2/13/2026 9:15 AM
3218	I'm indifferent to grade banding outside of having 6th graders in the same school as seniors. My children are small and on the younger immature end of the grade level. The thought of having my kids who are already lightly bullied in with 18 year olds is terrifying. However, for the grades prior to puberty, I don't really think it matters	2/13/2026 9:11 AM
3219	A lot of families leave elementary school early because of middle school fears. Therefore, you loose a lot of students to either Kitteridge or Private. My son lost the equivalent of an entire 4th grade homeroom because of this. It resulted in consolidation of classrooms, losing a homeroom teacher and disrupting consistency during the school year. If you offered parents a 6-12 grade school option or a K-8th school option it would considerably change the view that you need to leave public home schools in 3rd or 4th grade.	2/13/2026 9:10 AM
3220	As I mentioned, I have many concerns for this scenario. 6-8 graders are not on the same level mentally, physically, emotionally, or overall maturity wise as high school students. They should not be put in a school together that will leave room for chaos in may different aspects.	2/13/2026 9:06 AM
3221	Grade bands could work for some schools, but there would have to be major support from Admin and paid teacher certification training. Also, the infrastructure of the schools would have to be updated of modified to accommodate for the ages of the students. turning a middle school into a large elementary school	2/13/2026 9:05 AM
3222	Traditional, K-6, 7-12	2/13/2026 8:56 AM
3223	I do not think 6th graders should be in the same building as high schoolers. When I was a DCSD in the 1990s, we had K-7 elementary schools and 8-12 high schools. No middle schools. That seemed to work fine, honestly, but I strongly believe 6th/7th graders are too young to be in the same building as 9-12.	2/13/2026 8:55 AM
3224	Ashford Park transitioned from Pre-K-6 to Pre-K -5 when my children were there years ago and Chamblee Middle School came on line. Also, only one of them was able to attend Pre-K at Ashford Park because of the lottery. I feel that better utilization could be obtained at Ashford Park through expansion of grade bands (including more Pre-K)	2/13/2026 8:53 AM
3225	The idea of the band scenarios should consider that the rest of the state currently has the same grade band. We should again consider an advisory board with not just administrators but students and maybe community partners including social workers, psychologists, psychiatrists to consider the impact of the band changes.	2/13/2026 8:46 AM
3226	In reviewing potential grade band scenarios across clusters, careful consideration must be given to developmental appropriateness, staffing strengths, and program continuity. Clusters serving communities with higher mobility or greater student needs may benefit from tighter grade band groupings at the elementary level (PK–3 and 4–5) to strengthen foundational skills and transitions. Middle and high school grade bands should prioritize consistency in programming and staffing expertise to avoid instructional gaps that currently exist when teachers are placed outside their content strengths.	2/13/2026 8:43 AM
3227	See below	2/13/2026 8:40 AM
3228	It makes sense to us. Though we're not necessarily impacted due that our children attend to a school that is not included in this first phase analysis and would potentially attend to a high school not impacted by this first phase.	2/13/2026 8:40 AM
3229	The grade band should stay traditional. The schools I am referring to are Cedar Grove High School, Cedar Grove Middle School, Oak View, and Cedar Grove Elementary School. In my opinion, all 4 of these schools are thriving with their current grade bands.	2/13/2026 8:36 AM
3230	All Cedar Grove school have a strong community behind them and it will be devastating to see them go	2/13/2026 8:33 AM
3231	Redan elementary, grade band, PK-2	2/13/2026 8:28 AM
3232	Similar to my response above in #4, this reduces the locality and neighborhood basis of schools and reduces the connection in the community at a critical stage in development of children, families and the resulting impact on neighborhoods.	2/13/2026 8:25 AM
3233	Can't really provide feedback on this without knowing what is happening with our kids at	2/13/2026 8:21 AM

	Ashford Park.	
3234	Grade bands PK-8/9-12 is a good option for parents especially those with special education programs. I do think its even better to split out PK-3. This was the previous grade designation many years ago with fewer transitions for the students.	2/13/2026 8:21 AM
3235	I am open to 6-12 or K-8 schools. I would not want to see K-12.	2/13/2026 8:17 AM
3236	Terrible idea to combine these grades. 6th graders should not be in the same school as 12th graders.	2/13/2026 8:12 AM
3237	Traditional band grade	2/13/2026 8:12 AM
3238	I think that traditional grade bands (preK-5th, 6-8, and 9-12) work best to be able to provide the resources/sports fields/etc necessary for each of those age spans. Kids need consistent routines so splitting up the schools into too many different level schools will cause difficulty for kids with transitioning. On the other hand, adding too many grades into one school takes away from opportunities for middle school sports and puts 14 year olds on the same bus at 5 year olds which is totally inappropriate.	2/13/2026 8:07 AM
3239	With the increasing number of young children in East Atlanta, I think mc nair should 100% reman open and serve the younger children in preK and earlier grades.	2/13/2026 8:02 AM
3240	My specific question is why is the staff finding out these schools finding out at the same time parents and stakeholders. I feel that staff should have been told about this projection prior to is being communicated within the media. I would like to know how this will affect the staff that is currently employed with the district and how this vision will affect certified and classified staff members. I'm concerned how staff will be selected to remain if the current school closes or combined to another location. How much advance notice will staff receive.	2/13/2026 7:42 AM
3241	Two 4-5-grade band schools would be ideal for this area. Kelley Lake or Toney could be turned into those schools, so the impression is not that this area is being abandoned.	2/13/2026 7:35 AM
3242	I would love to see Kittredge expanded to cover grades 4–8. Chamblee middle has a good program, but the Kittredge kids can handle so much more and are bored in the Chamblee MS honors program. Otherwise I think most schools should stick to traditional K-5/6-8/9-12 programs. Combining sixth graders with 12th graders in the same school sounds like a bad idea.	2/13/2026 7:35 AM
3243	Pk-3 and 4-5 is too much. Siblings are broken up too soon. 6-12 may increase bullying issues and these are critical puberty and maturity times. 6-8 adequately focuses on that critical time of transition for children.	2/13/2026 7:29 AM
3244	none	2/13/2026 7:16 AM
3245	no comment	2/13/2026 7:05 AM
3246	I don’t think any changes to the grade band need to be made.	2/13/2026 7:03 AM
3247	honestly pk-3/4-5/6-8/9-12 is the perfect band. it prevents the younger ages from being influenced by the older kids. obviously, there will still be influence but it will be fewer negative influences from those older groups who are more mature to be around that type of influence. it could also keep our kids more interested.	2/13/2026 7:01 AM
3248	A 6-12 grade band may be difficult to manage operationally without a substantial facility renovation. A 4-5 grade band seems unsustainable and may contribute to enrollment decline as there is a rise in charter options for this grade band.	2/13/2026 7:00 AM
3249	I do not think kindergarteners should be in the same school as anyone greater than grade 5	2/13/2026 6:51 AM
3250	Having large 6-12 schools seems like a poor idea. There is a large developmental difference between 12yo-18yo. I think they are best served in the current grade bands. 6-12 may work in a smaller setting, not with thousands of students	2/13/2026 6:40 AM
3251	I do not agree with making a school 6-12 will be a good solution. It’s tough enough to transition to middle school from elementary, but sending them into an environment with kids much older can create a chaotic scenario for teachers and administration.	2/13/2026 6:36 AM
3252	The school children in the neighborhoods close to Brockett has decreased in the past few years; however, there are a lot of babies now living in the neighborhoods so this is important to	2/13/2026 6:32 AM

	know in planning for future years like pre-school and early education.	
3253	The traditional grade band works and no changes are needed.	2/13/2026 6:28 AM
3254	I also do not agree with merging schools into K-9 or K-12 models without clear evidence that it benefits students academically or socially.	2/13/2026 6:26 AM
3255	Grade bands will force more bullying and potentially increase school violence.	2/13/2026 6:25 AM
3256	Not a fan	2/13/2026 6:17 AM
3257	Merging schools in close proximity makes better sense. Teachers and students would continue to have familiarity and strengthen new learning relationships that will support better outcomes. Not to mention more available resources for students.	2/13/2026 6:07 AM
3258	Even within South DeKalb, communities differ in socioeconomic status, neighborhood history, access to resources, and exposure to trauma. Simply combining populations because overall numbers are lower does not mean those groups will automatically integrate smoothly. Any model that merges schools without significant investment in climate, supervision, and mental health infrastructure risks increasing: • bullying • conflict between neighborhoods • student disengagement • staff burnout • loss of community identity K–8 / 9–12: While fewer transitions can be positive, placing very young children in the same environment as adolescents requires major safeguards. I have not yet seen a clear operational plan for how that would occur. K–3, 4–5, 6–8, 9–12: This structure may match developmental stages better, but it increases transitions. Every move requires children to rebuild peer groups, relationships with staff, and a sense of belonging. For vulnerable students, that disruption can be significant. Larger consolidated schools in any band may offer more programming, but they also increase the risk that students feel unseen unless adult capacity is expanded. Right now, I do not see evidence that the level of staffing and resources required to make these models safe and effective will be available. PK–5 / 6–12 This structure keeps elementary students together longer, which may support foundational development. However, a 6–12 environment places early adolescents with much older teenagers, and that can intensify social pressure, exposure to mature behaviors, and bullying unless carefully managed. I have not yet seen a detailed plan explaining how this would be prevented. PK–3 / 4–5 / 6–12 While separating early childhood from upper elementary may align with developmental differences, it introduces another transition point. Students must repeatedly rebuild peer groups and relationships with adults, which can be particularly hard for children already coping with instability. Adding a large 6–12 consolidation again raises concerns about younger students mixing with much older ones.	2/13/2026 6:06 AM
3259	Schools were not built for non traditional grade bands. Show us the cost ratio for keeping things as is vs all the renovations needed for this plan including renovations regarding different grade bands. Will cost tax payers more money in the end while district is unbothered.	2/13/2026 5:57 AM
3260	Brockett	2/13/2026 5:49 AM
3261	Ashford park is a great elementary school and closing it will be devastating	2/13/2026 5:47 AM
3262	This is a great idea that’s it that’s all	2/13/2026 5:43 AM
3263	I think the pk-8 could work well if the schedule for elementary students was changed to start closer to 8.	2/13/2026 5:36 AM
3264	Traditional bands	2/13/2026 5:04 AM
3265	Don’t close the school	2/13/2026 4:54 AM
3266	I prefer the current grade bands. I am concerned transportation would be difficult if we split them up more. I’d be willing to hear more but with three young children that at one point would all be K-5 I worry about logistics, bus routes and carpool for multiple young kids.	2/13/2026 4:48 AM
3267	I don’t think the potential grade band scenarios are beneficial to any cluster.	2/13/2026 4:43 AM
3268	Rowland elementary has been one of my best choice of school and will be involve every one to be part of this school	2/13/2026 4:42 AM
3269	I love the idea of PK-3 school models in SOME areas. As a teacher, certified in grades PK-8, I like the PK-8 model. I am concerned with what consolidation means for our schools with special programs - IB, Dual Language, High Achiever, Montessori.	2/13/2026 4:20 AM
3270	Columbia Middle School has the best staff who already engage in sports activities with both	2/13/2026 3:02 AM

	middle and high School students building a community of minors who look up to their peers instead of bullies.	
3271	N/A	2/13/2026 1:35 AM
3272	No comment	2/12/2026 11:58 PM
3273	I attended high school at Dunwoody HS. At that time, it was an 8-12 school. It was difficult to make the transition to a school with so many age groups at grade 8. The current grade bands make more sense.	2/12/2026 11:43 PM
3274	I don't feel this would be safe for the younger students regarding bullying and influence.	2/12/2026 11:32 PM
3275	Ashford Park Elementary School should not be closed.	2/12/2026 11:19 PM
3276	We do not like the proposal to break schools into smaller grade bands, as that will not allow siblings to attend school together, in turn making it more difficult for our transportation/schedules.	2/12/2026 11:17 PM
3277	Of the proposed bands, the traditional ones seem the most realistic.	2/12/2026 10:59 PM
3278	I think the grade band should remain as it is now for Kelley Lake Elementary. Traditional*	2/12/2026 10:50 PM
3279	Students from prek to 5th grade	2/12/2026 10:48 PM
3280	I like the seperation of k-3, 4-5, 6-8 and 9-12,	2/12/2026 10:47 PM
3281	No specific feedback, but I have heard great reports of PK-3/4-5 split from parents in City of Decatur Schools.	2/12/2026 10:41 PM
3282	The schools clusters were just recently clustered to resemble that of an elementary middle and high school with theme schools that provided private school curriculum with public school funding.	2/12/2026 10:38 PM
3283	Midvale: Do PK-6 instead of PK-5. Do this at Livsey and other Tucker cluster schools to reduce crowding at Tucker Middle.	2/12/2026 10:26 PM
3284	I think grade bands should be prek to 5, 6-9, 10-12. I don’t like the current or proposed band systems.	2/12/2026 10:25 PM
3285	In the proposed grade band scenario that would relocate 6th–8th grade students from Cedar Grove Middle School to the Cedar Grove High School campus (creating a combined 6–12 configuration), I have concerns about the facility decision-making process. Cedar Grove Middle currently operates in a comparatively newer building, while the high school campus is an older facility with known infrastructure challenges. It is unclear whether building conditions, long-term maintenance needs, and student learning environments were fully evaluated before proposing this shift. Moving middle school students into an older high school facility raises concerns about safety, space allocation, and age-appropriate environments. Additionally, this change may signal a gradual reduction of investment within the Cedar Grove cluster rather than a strengthening of it. Any grade band adjustment should clearly demonstrate that facility quality, equity, and long-term sustainability were central to the decision.	2/12/2026 10:24 PM
3286	I personally as a parent would not like to see any scenarios that include grades 6 -12 all together in one school setting, I honestly think that a very bad plan.	2/12/2026 10:20 PM
3287	Prefer K-8 . I don't think 10 yr olds should be with teenagers	2/12/2026 10:17 PM
3288	It it not a wise idea to put 6th graders in the same school as 12th	2/12/2026 10:11 PM
3289	Middle school was horrible for both of my children in Dekalb. Willing to try PK-8 and 9-12.	2/12/2026 10:01 PM
3290	One of my children attends the a K-8 school and some of the logistics are difficult but I do think it helps to build community and curb some behavior issues in the middle school grades; however, I think these need to be capped in size for this to be a benefit and I wonder if the kids will be fully prepared for high school. I don't think 6th graders should be in school with 12th graders in the 6-12 scenario, and I don't love the k-3 //4-5 separation because it doesn't build leadership skills enough. I'd prefer staying the same or moving to K-8 but the k-8 will need A LOT of logistical support in terms of scheduling, curriculum , etc.	2/12/2026 9:54 PM
3291	Increasing the number of times students change schools is disruptive to establishing communities within schools and will result in a decrease in community.	2/12/2026 9:44 PM

3292	Frankly, I think the K8 proposal is being driven by the buildings we have - something that Tracy of HPM said should NOT be done. Why should the Cross Keys cluster be the ONLY cluster that has a MS choice of either split feeder (to Sequoyah, Chamblee, Druid Hills) or K8? Cross Keys kids have been ill treated for decades. Why must the district continue this? No evidence has been presented that CK cluster parents want this. I'm not opposed to offering K8 as a CHOICE to parents, but to give residents in some areas the K5/6-8 experience while others get K8 is unfair. Clearly Globe Academy, The Museum School, and DATE charter schools in DCSD have lots of demand for K8. But it's a choice made by parents - not something that is driven by a child's zip code.	2/12/2026 9:42 PM
3293	I am a product of Dekalb county traditional school system. But the Pre-K-3 would help get students on the right track	2/12/2026 9:36 PM
3294	I'm interested in better understanding how schools, such as Cedar Grove HS, will be repurposed. Particularly since the building recently had an expensive addition built. Is it possible to further evaluate how schools are selected for renovations etc. or perhaps pause such projects until decisions about closures and repurposing are made?	2/12/2026 9:36 PM
3295	Again, documentation please. Studies. Analysis. White papers. Etc. that is your job	2/12/2026 9:34 PM
3296	Lithonia High School 9-12	2/12/2026 9:30 PM
3297	Don't do nothing	2/12/2026 9:27 PM
3298	Regarding the Lakeside/Chamblee cluster, I am concerned about splits like PK-3 and 4-5. For families with young children, adding an extra transition between 3rd and 4th grade creates unnecessary "educational hurdles." We should prioritize keeping K-5 or PK-5 models to provide stability for early learners and working parents.	2/12/2026 9:25 PM
3299	If you grow vertically, I would recommend pk-8 together before 6-12. Socially speaking, I think the younger kids are less likely to get in trouble or hurt or bullied in that scenario than in the 6-12 scenario. Specifically I would be affected by Sagamore, Henderson middle, and Lakeside.	2/12/2026 9:20 PM
3300	I am against changing grade bands because it can disrupt academic consistency and student development. Students benefit from stable transitions between school levels, and restructuring grade groupings may create adjustment challenges and gaps in instructional alignment.	2/12/2026 9:16 PM
3301	My kid goes to Allgood Elementary School. I believe that they could be either a PreK-3 or a 4 & 5 school. They have a great administration and staff so I'm sure they would be great either way. My kid will be at Freedom Middle next year, but I love Allgood.	2/12/2026 9:05 PM
3302	K-5	2/12/2026 9:01 PM
3303	I don't think 6th graders need to be with 12 graders. Those age groups at that number are hard to manage. They both have different issues and needs I fear a personal touch is going to be lost.	2/12/2026 9:00 PM
3304	Elementary schools grade band need to remain the same	2/12/2026 8:55 PM
3305	Middle school students should not go to school with high schools students.	2/12/2026 8:54 PM
3306	I believe students should remain in traditional grade band structures such as elementary, middle, and high school rather than being grouped in combined grade configurations like 6–12 campuses. Mixing middle school and high school students in the same setting can create developmental, social, and safety concerns, as these age groups have very different academic and emotional needs. This is particularly important in clusters where schools may be converted or repurposed, such as those involving potential reconfiguration of existing middle or high school facilities. Maintaining traditional grade bands helps ensure students receive age-appropriate instruction, support, and environments that are better suited to their stage of development. I encourage the district to prioritize stability and developmental appropriateness when evaluating grade band scenarios across all clusters.	2/12/2026 8:48 PM
3307	I think I need more information on this topic	2/12/2026 8:42 PM
3308	Grade band configurations that convert neighborhood schools into specialized or theme schools may unintentionally introduce financial barriers if participation requires additional materials, fees, or travel. These scenarios could limit equitable access for students across clusters.	2/12/2026 8:42 PM

3309	We love our district school, Henderson Mill Elementary. The teachers are supportive and thoughtful, the school is proud of their STEAM program, our sports and test averages excel and are always improving. This school is culturally diverse. Losing Henderson Mill would be detrimental for many families in the area who may not have access to a charter or private school and those who live in close proximity who may not have other means of transportation. Our kids deserve access to a good public education. The next school closest to us is Evansdale which is also on the closure list. That school has even better ratings on paper although I have no personal experience. Losing both these schools would displace more than 1000 kids in our area.	2/12/2026 8:42 PM
3310	Keep it k-5	2/12/2026 8:39 PM
3311	I'm open to grade band changes, but do not believe we should look at increasing the age difference in schools. Younger students do not need to be brought into school environments with more mature students. Keeping children surrounded by similar age/development levels/milestones seems like a healthier environment. I do not like the idea of 12 and 13 year olds being in the same school as 16-18 year olds.	2/12/2026 8:33 PM
3312	Keep the grade band scenario as is. It clearly is working at Ashford Park Elementary, Chamblee Middle, and Chamblee High.	2/12/2026 8:22 PM
3313	Y'all just like to change stuff. We don't have regions but when you complete other surveys, it's still by regions.	2/12/2026 8:21 PM
3314	6 graders should not go to school with 12 graders to much going on in the middle schools	2/12/2026 8:11 PM
3315	As a parent in the Chamblee cluster (30341) with children in French DLI, and as a licensed K-12 French teacher with an MA in Second Language Acquisition, I see the grade band question as inseparable from program continuity. For DLI students specifically, Concept C's model of standalone PK-5 DLI facilities feeding into 6-12 thematic pathways is the most research-aligned option. Research consistently shows that DLI students need 4-7 years minimum in both languages to close achievement gaps (Thomas & Collier, 2002), and cohort preservation through secondary school is essential for both linguistic development and social-emotional well-being. A 6-12 pathway would formalize what I advocated for in my November 2025 letter to the Board: guaranteed continuation from elementary DLI through AP/IB French, regardless of residential zone. For our cluster specifically, Chamblee High School already offers AP French but has had enrollment as low as one student. A 6-12 model could consolidate DLI middle and high school students into a cohort large enough to sustain robust advanced French programming.	2/12/2026 8:06 PM
3316	I have no feedback here other than we need a uniform grade bands across every cluster!	2/12/2026 7:55 PM
3317	2nd and 4th grade	2/12/2026 7:54 PM
3318	I prefer a grade band of pk-6, 7-9, 10-12. But this isn't an option listed below. I think this model would serve the Lithonia cluster well.	2/12/2026 7:54 PM
3319	I would never send an elementary aged child to school with middle schoolers. And I also wouldn't be comfortable sending my middle schooler to school with high schoolers. The developmental difference, size and maturity seems incredibly risky and dangerous.	2/12/2026 7:50 PM
3320	Why change something that's not broke. I did go to a school that was 6 through 12. It was not the greatest way of learning. One thing that should be standard is all kids wear uniforms. I am sick of high school kids looking like sluts and thugs.	2/12/2026 7:49 PM
3321	I believe Dunwoody high school desperately needs the space being utilized by Vanderlyn elementary and while it will be difficult will ultimately benefit those students in the long run.	2/12/2026 7:46 PM
3322	The weakest school in our cluster is Tucker Middle. Many people, my family included, put their children in private schools for grades 6-8, then send them to Tucker High for an excellent education.	2/12/2026 7:46 PM
3323	Six through 12 is not acceptable. Middle School could include the through eighth. However, six through 12 I think is too large of an age gap to be in the same school and have a community feeling.	2/12/2026 7:44 PM
3324	None of these grade band scenarios alleviate the over crowding at Peachtree Middle and Dunwoody High.	2/12/2026 7:44 PM

3325	Please stick to the K-5 and traditional bands. My child should experience this same bands we did.	2/12/2026 7:40 PM
3326	I believe that the traditional middle and high school bands (6-8 and 9-12) remain highly efficient and best for our students. However, could we consider having separate pre-k through 3rd grade schools in a consolidated structure? With this, you can have 1-2 early learning centers per high school cluster and could consolidate further among the 4-5 grade students. This could also create opportunities to introduce SLCs to their 4-5 graders due to them being in dedicated facilities. These SLCs can carry over into middle and high school, while allowing the early learning schools to focus solely on basic education to prepare our students for more rigorous learning.	2/12/2026 7:30 PM
3327	I think the bands should be consistent so there's more flexibility around potential moves, etc. I also think there isn't anything inherently wrong with the current banding - except I could see value in the Pk grades being separated from the 4-5th grades due to how much growth/maturity happens at that age.	2/12/2026 7:26 PM
3328	Allows more vertical access to curriculum (advanced middle school students can take high school coursework). I think this is a better opportunity for students.	2/12/2026 7:25 PM
3329	K-3 4-5 6-8 and 9-12 sound like good grade band solutions.	2/12/2026 7:07 PM
3330	Keeping magnet schools/programs on edge by not releasing our scenarios is not fair to those students/parents/staff.	2/12/2026 7:07 PM
3331	I think clustering elementary & middle schools would be more appropriate. High school students are more mature and should have an independent facility which specifically serves their advancing needs.	2/12/2026 7:04 PM
3332	No Chesnut Give us other outlets AUSTIN Elementary can acomodate kids. What about the library/ Art school why can move the school there???? Can we move my kids to Chamble middle school instead of dunwoody peachtree middle school. Explain how kids will be divided. Not possible to pretend to put kids in trailers they will stay there forever like Peachtree Middle School	2/12/2026 7:01 PM
3333	It does not make sense to go with smaller grade bands if you are closing schools or hoping for efficiency. Only traditional would make sense at this point. I think my cluster would like k-8 but the schools buildings are not built for this. The gyms do not have locker rooms, there are not lockers, additional specials space, athletics programs etc.	2/12/2026 6:59 PM
3334	As a proponent of small schools with a close-knit community, I have always been in favor of PK-8th grade schools. I feel that children in middle school are made to grow up too quickly, and if they were to stay with their younger peers, support the lower grades, and still play on a playground like the children that they are, we'd have far fewer behavior problems and mental health issues with those grade levels. Smaller is better for PK-8th and 9th – 12th education.	2/12/2026 6:57 PM
3335	McNair Cluster - Kelley Lake	2/12/2026 6:54 PM
3336	I'm glad to see Livsey will remain a part of the Tucker cluster. Will Midvale feed into it.	2/12/2026 6:50 PM
3337	As a career educator spanning the grade bands, I am opposed to a 6-12 program, and believe that a 4-8 program can only be successful if the building can be meaningfully utilized to keep hunger and older kids separate.	2/12/2026 6:44 PM
3338	I would not want to see younger children mixed into a middle or senior HS. This exposes them to gangs, drugs and other influences that they are not prepared for. That is a key benefit of traditional elementary, middle and high school structure. Pk-8/9-12is the next best option.	2/12/2026 6:41 PM
3339	I'm fine with the current traditional or Pk-8 and 9-12. I don't like the others. Def not for kids to change schools 4 times. Do not like middle schoolers with high schoolers. They do not need to be exposed to kids who may be smoking, drinking or doing drugs. Middle schoolers is hard enough. Don't make the younger kids grow up too fast, just to fit the needs of the school board.	2/12/2026 6:36 PM
3340	No comment	2/12/2026 6:35 PM
3341	I don't love the 6-12 options bc 6th graders are so different from 10-12th graders. I think it would be best to have middle school separate.	2/12/2026 6:35 PM
3342	Traditional seems to work best. It's important to have 6-8 and 9-12 be separated.	2/12/2026 6:35 PM

3343	May be more beneficial for siblings	2/12/2026 6:31 PM
3344	Traditional model is best. The other grade bands don't make sense. As a parent, I wouldn't want my child going to school with High schoolers and vice versa. Now maybe one 6-12th school might work at a school the size of Arabia but most schools don't have the capacity to support grades 6-12 so this model isn't feasible	2/12/2026 6:29 PM
3345	I will move anywhere...	2/12/2026 6:26 PM
3346	I would never send my elementary aged child to school with middle/highschoolers.	2/12/2026 6:16 PM
3347	I'm speaking globally, so understand that please. I think that school should try to be more aware of what happens to elementary students when they enter middle school. They are often introduced to behaviors that are not good for that age. If they stay in an elementary school environment, they may pay more attention to education and less attention to older teen behaviors. If there is a desire to gradually change their environment, cluster within the elementary level: pk-4 5-7. This should allow students to make better choices as they mature in an appropriate environment.	2/12/2026 6:04 PM
3348	I hate the idea of middle schoolers being with high schoolers. I don't mind a PK-3 band scenario. However I thought the grade band scenario being thrown on us at the meeting was quite surprising and confusing. How do we determine grade bands when we don't know boundaries and needs of those boundaries?	2/12/2026 6:01 PM
3349	Even though my daughter goes to DATE where the grades are pre k - 8th, I say keep prek-5th together, 6th-8th and 9-12th. Maturity levels, change and school times are my main concerns.	2/12/2026 5:57 PM
3350	i like it the way it is even though i feel 9th graders not muture enough to be with the upperclassman	2/12/2026 5:50 PM
3351	Just like in a classroom why make everything the same when it has been said for years that students would get what they need.	2/12/2026 5:46 PM
3352	When I was a student, we had elementary and high (8-12). This seemed to work very well. I don't think 6-12 would be good for the younger students. Decatur has split some of the elementary schools, you should investigate how well (or not well) that is working.	2/12/2026 5:45 PM
3353	Ashford Park should remain K-5. We are over-capacity, but a building upgrade has been "apparently" in the works for close to three years now. That is what needs to happen.	2/12/2026 5:26 PM
3354	It's dumb as hell	2/12/2026 5:22 PM
3355	I don't agree with 6-12. You will have 10 year olds in school with 18 year olds.	2/12/2026 5:17 PM
3356	Clustering works well in many instances provided that there are sufficient resources to appropriately address the various age groups.	2/12/2026 5:16 PM
3357	All scenarios are awful. Closing schools because you don't want to pay to repair them is disgusting. God forbid these teachers have a decent ratio of students in their class instead of cramming in 30 for 1 teacher. Deplorable.	2/12/2026 5:14 PM
3358	I prefer the traditional grade clusters. I also like the P-3 & 4-5 option but 6-12 is not favorable.	2/12/2026 5:04 PM
3359	Convert Vandelyn into a 9th grade academy.	2/12/2026 4:57 PM
3360	I am in favor of flexibility in the early year grades. All options make sense. I also Ike the idea of changing the band scenarios for older grades. Has 8-12 been considered?	2/12/2026 4:53 PM
3361	I am not sure what middle school McNair students would attend.	2/12/2026 4:51 PM
3362	I live in the Lithonia 30058 area and the school system here is atrocious my child presently attends champion themed Middle School and that is the best I could find in the area of my residency. The schools in the North DeKalb area have better funding teachers school facilities etc as the schools in the South dekalb areas are poorly funded poor teachers and the students are not learning the schools are out of control	2/12/2026 4:45 PM
3363	If high schools are often over capacity why not consider pk-6, 7-9, 10-12? Of the options I think that the ones that have pk-8 probably is too large age difference in one school. Dunwoody cluster	2/12/2026 4:45 PM

3364	I have no opinion on the grade band.	2/12/2026 4:40 PM
3365	I remember when the children in our neighborhood went to Oak Grove for grades 1-8 and on to Lakeside for high school. By the time our daughter was in 6th grade, Oak Grove students had to go to Henderson Middle School. Henderson Middle School was not a good experience at all because it did not have enough accelerated programming. If we returned to the K-8 model, Oak Grove could certainly be at more than full capacity and probably offer better programming.	2/12/2026 4:39 PM
3366	I do not like the grade bands that require more than 3-4 transitions. That is a lot for growing children. The transitions to middle school and high school are hard enough, and now increasing that to more than 2 is way too much for the average child. Let alone neurodivergent learners. Sixth to eighth graders should not be with high schoolers. Middle schoolers are mean enough as is, and high schoolers are typically worse. They need that transition time during the main ages of puberty with out 17-18 year olds around.	2/12/2026 4:35 PM
3367	Pk-8 could potentially work.	2/12/2026 4:31 PM
3368	I'm not a fan of changing the bands as it creates logistical issues for my family and many others with multiple kids.	2/12/2026 4:30 PM
3369	see below	2/12/2026 4:30 PM
3370	I support the adoption and continuation of the traditional grade band structure of K–5, 6–8, and 9–12. This model aligns with students' developmental stages and provides a structured progression from elementary to middle to high school. Grouping students in these bands allows schools to better tailor academic programming, social-emotional supports, and extracurricular opportunities to age-appropriate needs. In the K–5 setting, younger students benefit from a nurturing, foundational environment focused on literacy, numeracy, and core learning habits. The 6–8 middle school model recognizes the unique academic and social transition of early adolescence, offering targeted supports and exploratory opportunities. Finally, the 9–12 high school structure prepares students for postsecondary education, careers, and adulthood through specialized coursework, athletics, and leadership development.	2/12/2026 4:30 PM
3371	I like traditional grade bands, especially for 6-12.	2/12/2026 4:29 PM
3372	PK-3 4-5 grade band makes sense. Specifically in Ashford Park where the school is over-utilized.	2/12/2026 4:24 PM
3373	SWD cluster	2/12/2026 4:14 PM
3374	Elementary students should NOT be exposed to potential bad influences from middle schoolers until they are old enough to understand the consequences of their actions. As they get older, their brain develops to get a better understanding between good and bad. Same with middle school and high school. There's already teenage pregnancies that are on the rise. Why would y'all even consider risking exposing younger ages to things that they shouldn't be exposed to until they're older to understand. Keep K-5, 6-8, 9-12.	2/12/2026 4:13 PM
3375	I think the grade bands should be standardized, at least within a cluster.	2/12/2026 4:09 PM
3376	I have a student at KMS, so the 4-6 band makes sense in specialty school scenarios. I don't really have strong opinions if the grade bands make sense for staffing educators. I do think that sixth graders in the same space as 12th graders is too much of a difference.	2/12/2026 4:08 PM
3377	I'm not interested in "grade band scenarios." The DeKalb County School system is making up bad ideas based on years of failed leadership. The interim superintendent should not be the person to put forward such an aggressive -- and bad -- idea when he'll ultimately not be the one responsible for the results. Get a new interim superintendent because the current one doesn't understand he's only in a temporary position and serves as a caretaker.	2/12/2026 4:02 PM
3378	In general I do not believe that grades 6-8 benefit from being in the same school as grades 9-12. I also do not believe that having 8th graders in an elementary school is appropriate.	2/12/2026 4:01 PM
3379	I am interested in learning more about the smaller grade band scenarios - especially in the younger grades where so much development is happening.	2/12/2026 4:01 PM
3380	We need to prioritize against split feeders. I see that Cross Keys may have split middle schools/no middle school. Can they not benefit from another facility, like the Kittredge facility (renovated/enlarged)? The school program could stay within that local facility, just like it operates for 7-8 at CMS and CHMS, and 9-12 at CMS and SDHS. If program embedding	2/12/2026 4:00 PM

	"works" well enough to exist for for those facilities, why wouldn't it work for Kittredge and Wadsworth? This would also enable middle school sports, which is a key reason many eligible students do not accept their earned seat at Wadsworth.	
3381	I do not support grade band changes that would result in my child's elementary school being consolidated or repurposed. Keeping elementary grade bands intact within existing schools provides consistency, age-appropriate learning environments, and stronger family engagement. Moving younger students to larger or unfamiliar campuses, or separating siblings across multiple schools, would negatively impact student well-being and family logistics. Grade band scenarios should prioritize continuity, safety, and stability for elementary students and avoid consolidations that disproportionately affect younger children.	2/12/2026 3:58 PM
3382	I do like the change in grade banding. I've always felt it is hard to have pre-K with fifth graders.	2/12/2026 3:58 PM
3383	I believe our grade bands are remaining the same. I wouldn't mind seeing K-6 grade bands at Vanderlyn and Dunwoody elementary schools and then having Peachtree Middle just be 7th and 8th grades.	2/12/2026 3:58 PM
3384	smaller neighborhood schools and smaller class sizes are better, especially when inclusion is being followed— and the younger the grade the more important	2/12/2026 3:55 PM
3385	No way, the younger children do not need to be mixed with the older students. Terrible influence.	2/12/2026 3:53 PM
3386	I am EXCITED by the idea of a 6-12 grade band at McNair. Quite frankly, our students are not being adequately prepared by their middle schools. If we could co-plan across developmental levels, that might improve. I am concerned that formerly 9-12 teachers will be required to fulfill middle grades duties. I chose to teach high school because I am not interested in micromanaging bathroom trips and hallway transitions. Nor do I want to struggle with hallways arranged by grade band. It has never once worked in my experience. Meanwhile, arranging by subject often silos teachers and prevents cross-subject collaboration, in particular in support of efforts to improve literacy. (McNair is currently thoroughly intermixed for classroom placement, which has been quite enjoyable to date.)	2/12/2026 3:50 PM
3387	The grade bands need to remain as they are — or a primary/elementary school level. However, there is no way that I'd want my elementary school aged children attending schools with a middle or high school student who could negatively impact their primary years.	2/12/2026 3:47 PM
3388	As a graduate from DeKalb County School District, I matriculated from 1st - 12th grade. I was a part of the last 7th grade class at Chapel Hill Elementary and last 8th grade class at SWD. I believe K-7th grade and 8th-12th grade should be options for Elementary and High school.	2/12/2026 3:46 PM
3389	I believe certain schools should have certain grade bands depending on the need and recreations offered.	2/12/2026 3:41 PM
3390	I think the grade bands will give students more responsibility in a sense. Also bridge the gap of students when transitioning to higher grades.	2/12/2026 3:38 PM
3391	Rowland Bethune towers	2/12/2026 3:30 PM
3392	I would like more information about the closing elementary schools. For schools like kingsley, where would the students be relocated to? How will you help manage the increased capacity? And please don't say trailers. That won't go over well	2/12/2026 3:29 PM
3393	Get rid Middle schools	2/12/2026 3:27 PM
3394	Kids need to be in prek thru 4th. Those smaller and younger children do not need to be in a building with middle school kids. That environment is not appropriate for smaller younger children. Maybe you want to go to 6th grade at most but once they reach 7 or 8th grade it is a whole new world for kids. Amd Hugh school kids are not the same as middle school.	2/12/2026 3:27 PM
3395	Disagree. Why are we going back on something that was so painful to implement 30 years ago	2/12/2026 3:12 PM
3396	I do not have a strong feeling about grade bands. If anything- maybe do pre-k through sixth, and then 7th through 12th.	2/12/2026 3:12 PM
3397	If grade bands are implemented, I believe it should be grades K-7 and then grades 8-12. Putting 6th and 7th graders with high school kids is not a good idea on a maturity level. This could potentially increase the number of juveniles being seen in juvenile court due to undue influence, exposure, and pressure to "be like" or "impress" the older kids.	2/12/2026 3:10 PM

3398	I’m not sure how you can assess facility needs without first finalizing grade bands. This seems out of sequence.	2/12/2026 3:08 PM
3399	I do not like combining middle and high schoolers. This day in age, we need to allow kids to have a child-mindset and exposing them to more mature clusters of kids early on may have detriment, especially now that tech is so rampant.	2/12/2026 2:58 PM
3400	This seems like a better idea to me than straight consolidation. However, I do wonder what class sizes we're solving to; wouldn't lower enrollments allow us to return to more ideal class sizes than what we've dealt with for years (presence of trailer classrooms at nearly every school would suggest so).	2/12/2026 2:55 PM
3401	n/a	2/12/2026 2:54 PM
3402	I would prefer livsey be k-8. If we are expanding it to be huge, let the kids stay for more years.	2/12/2026 2:53 PM
3403	I went through DCSD when there were no middle schools. I did not like being in school with 12th graders when I was in 8th grade, so I cannot imagine it working well to have one school serve 6th through 12th grades. The idea of having such young, impressionable middle school aged students in a school with high schoolers does not sit well with me. However, if they had totally separate buildings on the same campus, that would sit better with me.	2/12/2026 2:44 PM
3404	I have viewed all grade bands and understand that high schools are only losing three, middle school are losing five, and elementary are losing more. Statistically, people are not having children like they have in earlier times.	2/12/2026 2:43 PM
3405	Ig grade bands are changed, there needs to be a way to keep the younger grades away from the influence of the older generation.	2/12/2026 2:39 PM
3406	keep elementary schools local and small this is were kids make life long friends and learn the fundamentals	2/12/2026 2:39 PM
3407	The idea of breaking PreK-3 and 4-5 into separate bands may be the only feasible solution. I'd caution against shifting the bands for older students.	2/12/2026 2:34 PM
3408	I don’t support putting 6th graders in high schools as developmentally, this is not good. Merging 4-8 th grades is likely ok as there are already models in the district that do this.	2/12/2026 2:30 PM
3409	No way an 11 year old 6th grader needs to be on campus with 17-18 year old seniors in high school!	2/12/2026 2:26 PM
3410	Stephenson has a strong zone system and this may work in our community	2/12/2026 2:26 PM
3411	No real opinion	2/12/2026 2:24 PM
3412	Keep the schools the same.	2/12/2026 2:24 PM
3413	Terrible! Loop hole for under performing schools!	2/12/2026 2:20 PM
3414	I prefer the traditional PK-5/6-8/9-12 grade band, but I understand it may be more efficient to adopt alternative bands in areas based on population and demographic needs.	2/12/2026 2:20 PM
3415	I don't have opinions on specific grade bands. However, it seems like it will simply cause more headache and confusions for parents and students to transition through additional schools and having to learn new teachers/routines.	2/12/2026 2:17 PM
3416	It seems like school band clusters are better for students, but the traditional model is better for families.	2/12/2026 2:16 PM
3417	No comment.	2/12/2026 2:16 PM
3418	I think the grade bands should be the same as what has normally been done. This makes the most sense for children during the different stages of development.	2/12/2026 2:11 PM
3419	You've identified large clusters of elementary schools (27) and it is not clear how many you will eventually close and what this will look like. Yes grade band sould be kept the same. (K-5) (6-8) and then 9-12 unless you were considering a true Junior high model of K-6 ES and then 7/8 Junior Highs.	2/12/2026 2:09 PM
3420	PK-3 is not ideal, but is acceptable if it keeps Ashford Park open.	2/12/2026 2:07 PM

3421	I don’t think more grades should be added to a high school due to developmental differences	2/12/2026 2:07 PM
3422	No feed back	2/12/2026 2:06 PM
3423	I'm concerned with the PK-8 and 6-12 scenarios based on the wide range of ages that would be in close proximity.	2/12/2026 2:05 PM
3424	No comment	2/12/2026 2:05 PM
3425	This is regression to me. Back in the 90s, the grade bands were on a similar system. Then, they were reorganized into Jr High/ Middle School bands. This served a crucial gap between the ages/stages. It not only aided the younger kids in their progression into high school but it also gave the parents a little reassurance that their middle school child/children were with kids of a similar age.	2/12/2026 2:00 PM
3426	I'm curious what school additions mean and how this process is mentioned to be gradual over the next 6-8 years. Does that mean schools will close in phases? When will grade bands be discussed?	2/12/2026 1:54 PM
3427	Younger students do not need to be around those who are much older. The 2 band system would not be beneficial at all	2/12/2026 1:52 PM
3428	As long as the consolidations affect the scholars and teachers positively, I'm for it.	2/12/2026 1:50 PM
3429	NO on that ideal. Mixing the older children with the younger vulnerable children is just to much. The issues of being bullied is hard enough with younger groups then to add on older groups in the mix, NO. DCSD needs to do way more in the lower valued/ low income areas, give the community a better education struction just has the inner areas have, such as Decatur school system has; Buckhead; Atlanta City areas. By not pouring into these schools has parents applying for School Choice programs and fighting for the seats just so scholars can achieve a better education. How long will this mess continue?	2/12/2026 1:45 PM
3430	I am in the Chamblee cluster but my feedback applies to all clusters. I'm opposed to PK-8 and 6-12 grade bands unless they involve separate buildings and completely separate administration. As a former educator, I cannot imagine the administrative inefficiencies that would be created by principals overseeing such a wide age range. Teachers of different ages also have very different understandings of what the teacher/administrator relationship should be like, and I feel these expanded grade bands would result in chaos that ultimately trickles down to the students. I think 4-5 clusters are totally fine as they don't carry those concerns.	2/12/2026 1:43 PM
3431	I work in SPED, and with a lot of mental and physically needs and challenges, being in certain buildings, puts more care, knowledge and experienced staff in those buildings to not only have a better safety net, but parents will feel appreciated-due to better control of its environment/ Paras need to be paid MORE not only bc it's a MUST, but to help teachers out when it comes to paperwork, etc, teachers do a lot alone. So, by all the buildings being lost, put that $ in staffs' pockets, so we can continue to stay healthy, happy, focused and ready to go on teaching, guiding and securing the future for the students, who will become our next generation of doctors, lawyers, scientists and TEACHERS!!	2/12/2026 1:40 PM
3432	If serving 6-12 in a Cedar Grove Cluster will be helpful to the community instead of dispersion of the students to other schools	2/12/2026 1:37 PM
3433	You didn't have Druid Hills middle in the scenario	2/12/2026 1:33 PM
3434	I like the idea of K-8 and 9-12 but realize this wouldn’t align with keeping Vanderlyn open, which would be my preference. It would also be nice to have a gifted magnet school closer to Dunwoody.	2/12/2026 1:33 PM
3435	I would be in favor of the higher grade bands if the middle school and high school students were not on the same wing. Like have the middle school students on different halls and the high school students on a different hall. Keep the hours the same for high school and middle school to keep the grade bands separated.	2/12/2026 1:24 PM
3436	I think generally adjusting great bands would be preferable over closing facilities entirely.	2/12/2026 1:24 PM
3437	In the Dunwoody cluster, I support keeping the traditional PK–5 / 6–8 / 9–12 model. The current PK–5 structure at Vanderlyn works well and provides stability during critical early learning years. I do not support shifting to PK–3 / 4–5 or PK–8 configurations if those changes	2/12/2026 1:21 PM

	lead to closing a successful neighborhood school. Stability and continuity for students should remain a priority.	
3438	Traditional, as I would not like a student much older being in the same building as my younger kids.	2/12/2026 1:12 PM
3439	I appreciate the district exploring multiple grade band scenarios and being transparent about the benefits and challenges of each configuration. My feedback is specific to the Tucker Cluster, particularly Midvale Elementary. For our community, maintaining a traditional PK–5 / 6–8 / 9–12 structure provides the greatest educational stability for students. Early-grade students at Midvale benefit from consistent relationships, targeted supports, and a school environment designed specifically for younger learners. Adding additional transitions—such as a PK–3 / 4–5 model—may disrupt academic progress and reduce the continuity that is especially important for early elementary students. While I understand the operational efficiencies of PK–8 or 6–12 models, these configurations may dilute middle-grade program offerings when student cohorts become too small. Midvale and other Tucker cluster schools are not currently sized or designed to operate effectively as PK–8 facilities without significant renovation. The district notes that PK–8 schools require enrollment of at least 900 students to be operationally efficient, which is not feasible for most Tucker-area elementary schools. In addition, the district has highlighted that increased transitions and mixed developmental stages within a single building are key challenges of nontraditional configurations. These concerns are particularly relevant for families in the Tucker cluster because the proposed grade band changes may create scenarios where siblings are spread across more buildings, and where students face more transitions during foundational academic years. Given these considerations, I believe that the traditional PK–5 model remains the most developmentally appropriate and educationally stable option for Midvale Elementary and the wider Tucker cluster. I encourage the district to prioritize minimizing student transitions, maintaining age-appropriate learning environments, and ensuring that any grade band changes support both academic continuity and equitable access to programming. Thank you for considering this perspective as scenarios continue to be refined.	2/12/2026 1:11 PM
3440	Creating a grade band of 6-12 seems very irresponsible. Children in this band are at vastly different developmental stages. I would have strong concerns about children in 6-8 being grouped with high schoolers as it feels like it creates scenarios for younger children in that band to have exposure to issues they are not developmentally ready for. It particularly concerns me to have girls on the younger end of that band in a an environment with much older boys.	2/12/2026 12:58 PM
3441	I think pk-8 or 6-12 would need significant procedures and structures in place to ensure the emotional protection of the younger students. A 4 year old and a 13 year old are in vastly different places in terms of maturity and that must be considered.	2/12/2026 12:55 PM
3442	In general, I think PK-8 is a bad idea. As someone who works in a middle school, I don't think 7th or 8th graders need to be in the same building with little kids. Same for 6-12. The maturity difference between a 6th grader and a 12th grader is too great and I think these grand bands are potentially dangerous for younger students. I like the idea of having a 3rd/4th grade band or 4th/5th or 7th/8th in areas where it would make sense due to overcrowding/ under population.	2/12/2026 12:54 PM
3443	Having both PreK and 8th graders in the same building would make me uncomfortable, and I imagine I am not alone. Middle school has kids who are rebellious and schools already do things like locking bathrooms and taking preventative measures against adolescent teenagers that would not be appropriate to have four-year-olds involved in.	2/12/2026 12:51 PM
3444	I think having a variety of ages in the building benefits everyone. Younger kids get to go to school with older siblings. Parents have all elementary events in one place. Older kids get to mentor and read to younger kids.	2/12/2026 12:50 PM
3445	Spread the apt base evenly between Austin and dunwoody elementary when closing vanderlyn and Kingsley. Dhs and pcms are still overcrowded. Too many trailers.	2/12/2026 12:50 PM
3446	I have a strong preference for the traditional grade bands. I think transitioning from elementary school to middle school and then to high school is important for development and for fostering a sense of community. I'm currently zoned for Vanderlyn, Peachtree Middle, and Dunwoody High School. Really, I'd like to see zoning adjustments that reduce overcrowding at DHS and eliminate the need for the trailors.	2/12/2026 12:49 PM
3447	For the Dunwoody school cluster (Vanderlyn, PMS and DHS) I like the idea of keeping the	2/12/2026 12:48 PM

	current structure of PK-5, 6-8 and 9-12 or potentially pivoting to PK-3, 4-5, 6-8 and 9-12. I don't like the option to expand building to include either PK-8 or 6-12. The age ranges in these options are too great and do not serve the best interest of the students.	
3448	I do not believe it is safe for 12 year olds and 18 year olds to share the same facilities.	2/12/2026 12:47 PM
3449	As an elementary school teacher, I believe that elementary is best served with the traditional k-5 or PK-3/4-5/6-8/9-12	2/12/2026 12:44 PM
3450	Growing up in Indiana, districts used a variety of middle school configurations. Ours was a K-6; 7-8; and 9-12. I would like to know whether the 7-8 configuration was considered.	2/12/2026 12:42 PM
3451	I think the grade band should stay the same because students do well with students their own age or closer to there age. It would be LESS bullying. It would be easier for them to attend the schools with their siblings or family members.	2/12/2026 12:42 PM
3452	I currently teach PreK-5th grade art but if they change us to a K-6 school, I am not willing to teach middle school.	2/12/2026 12:41 PM
3453	Starting with Pk3 -9-12... class sizes should be small with great teachers, will give them more time to focus on their students versus being packed into a class room. All kids deserve it not just the Northside, with newer schools n up to date technology in training for the staff	2/12/2026 12:39 PM
3454	No feedback on grade bands	2/12/2026 12:39 PM
3455	I am against the combining of the schools from 6-12th grade. maybe 7-12 grade and put 6th grade back in elementary school, or pre K - 8th grade and 9-12th, the elementary school has to be big enough.	2/12/2026 12:38 PM
3456	I'm glad the district is examining this and laying out the pros and cons. I think PK-3 and 4-5 configurations would be most beneficial for my area of South Dekalb where more children live at or below the poverty line which negatively impacts early learning outcomes. I look forward to hearing more specifics on which grade bands will be offered at each school.	2/12/2026 12:35 PM
3457	N/A	2/12/2026 12:34 PM
3458	PK-8 is a TERRIBLE idea. The difference between a 5yo and a 13yo is enormous. I would not want my kindergartner in the same building as an 8th grader. 6-8 is already a nightmare to administer, why would you want to add k-5 into that social construct.	2/12/2026 12:31 PM
3459	ES grade bands are sensible if logistically challenging. 6-12 grade band is an insult to parents' intelligence, especially those like myself who have actually been teachers across many of these grade levels.	2/12/2026 12:31 PM
3460	I think some PreK-2 and 3-5 schools could be great!	2/12/2026 12:28 PM
3461	5th grade could move up to middle school but otherwise bands could stay traditional	2/12/2026 12:19 PM
3462	I think some of the younger grade banding makes sense. I am against the older sections. There is such a large difference in maturity and social interactions between what is traditionally middle school and the upper end of high school.	2/12/2026 12:15 PM
3463	Great idea	2/12/2026 12:13 PM
3464	I love the idea of a return to K-8. While the idea of middle school’s was to better serve young adolescence, in practice, they have they have become a place that really only benefits school districts, operationally. I believe most evidence favors fewer transitions for students, smaller school communities, and strong relationships between students and teachers. K-8 models often produce equal or better academic outcomes and smoother, developmental trajectories, largely due if you were transitions and stronger relationships. Middle schools generally lead to more transitions and fewer strong relationships.	2/12/2026 12:07 PM
3465	6-12 together is the least desirable option in my opinion because that mixes students of very different developmental stages.	2/12/2026 12:06 PM
3466	I support consolidation of grades (ES/MS or MS/HS) because I think they foster closer connections between the students, families, and schools. I don't know that this would really impact extracurriculars - in small school districts, for example, 5th graders can participate with 6th graders in athletics (if ES & MS combined) or 8th graders could participate in JV high	2/12/2026 12:04 PM

	school sports (if MS & HS combined). We compete with private schools who allow kids to play up, whether it's athletics or other extracurriculars	
3467	It would be helpful to know more specifics about timelines for specific consolidations/expansions. While programs come later, surely there is talk about how those will be impacted if/when these consolidations/expansions occur.	2/12/2026 12:03 PM
3468	All county schools	2/12/2026 12:02 PM
3469	Vanderlyn cluster. My preference is keep as is or PK-8 in one school. High schoolers are nearly adults and should be separate from all other grades.	2/12/2026 11:57 AM
3470	I do not think a Pre-K through 8 school is a great idea, unless some separation is included to keep the youngest kids separate from the oldest kids. It is already a lot to have a Pre-K or K child ride the bus with a 4th or 5th grader. Adding middle schoolers seems like a bad idea, specifically for the safety of the youngest children. In specific situations it might be the best of some not great options, but for the Doraville United/oakcliff elementary area I don't think it makes sense.	2/12/2026 11:54 AM
3471	Not a good idea. When I was a DeKalb student years ago, Chamblee high had an 8th grade. It was NOT a good mix having 17-18 year olds around 12-13 year olds (especially older boys/younger girls and older boy vs. older boys fight wise.	2/12/2026 11:51 AM
3472	I personally like a grade band of 8-12 for HS and PreK-7 for Elementary. That's what I had and it kept the crazy of puberty down since the kids were with "babies" in 6th and 7th grade, and they were with adults when they went to HS. Otherwise, I have no input to grade bands.	2/12/2026 11:48 AM
3473	Tough balance of minimizing operations costs and maximizing age appropriate safety and measures	2/12/2026 11:46 AM
3474	I'm amenable to changes in grade bands to keep commutes to school short and to ensure resources are available for the kids.	2/12/2026 11:46 AM
3475	Insanity.	2/12/2026 11:45 AM
3476	I do not agree with the theme middle school being closed or moved to another school. Why was the school going through all this construction over all these years just to close it. Seems like misappropriation of funds and inefficiencies	2/12/2026 11:39 AM
3477	I think Lakeside High School is too crowded. I am in favor of a scenario that relieves pressure on these large high schools while allowing community-based schools the opportunity to exist and continue to thrive.	2/12/2026 11:38 AM
3478	I think the grade band scenario with pk-3/4-5 could potentially be a solution to consolidate schools, particularly in an older building that may be smaller. I could see Henderson Elementary working as a pk-3 OR 4-5 but I am concerned about the more frequent moving of students from one school to the next and how that will affect the teachers actually getting to know the students. I'm not sure that grade banding would really work or solve anything when there's a large middle school down the road though, Henderson Middle.	2/12/2026 11:37 AM
3479	It's not clear in the scenarios shared what potential grand band scenarios you are applying to these proposed changes. In general, I do not support Pk-8 schools - the children are so developmentally different in elementary and middle school that I don't believe them being in the same school has benefits ... in fact probably more risks.	2/12/2026 11:36 AM
3480	As long as the inconveniences that go along with this are addressed, I don't see it as a problem As a music teacher, i would be more likely to apply to a K-3 elementary school than a K-5 or K-8	2/12/2026 11:34 AM
3481	Do not close neighborhood elementary schools, it is the only thing that makes Dekalb stand out from other districts.	2/12/2026 11:28 AM
3482	NA	2/12/2026 11:28 AM
3483	I have major concerns related to social-emotional well-being and developmental differences for 6-12 schools. I think this is a really bad idea. I think it's less of a concern for K-8 schools. I still think traditional PK–5 / 6–8 / 9–12 models are best, but I admit this is also just what I'm most familiar with.	2/12/2026 11:28 AM
3484	I do like the idea of redoing the grade bands to help with transportation but also see benefits in	2/12/2026 11:23 AM

	using the many buildings we have to re-envision the 4-tier band.	
3485	I do not believe younger bands should be mixed with older students. He traditional band cluster should remain, especially in today’s climate.	2/12/2026 11:20 AM
3486	Awful as usual Dekalb!	2/12/2026 11:14 AM
3487	PK-8- Currently my daughters are at Chesnut Elem and there is absolutely no room for that scenario to exist without building expansion. I do think that utilization of Kingsley into a potential 4-5 building could work if they brainstorm correctly.	2/12/2026 11:14 AM
3488	I have only seen one example of the grade bands. In terms of the Tucker cluster, I think it would be beneficial to group grades 5-8 together or 6-9 together.	2/12/2026 11:13 AM
3489	No comments	2/12/2026 11:10 AM
3490	That's not a bad idea, but it does stretch families thin with kids in many grade bands.	2/12/2026 11:08 AM
3491	I worry about mixing children of highly varied social and emotional maturity in the same building. Models that include 6-12 schools in particular are concerning. 11 year-olds don't need to be in the same building as 18 year-olds who can drive and legally buy tobacco products.	2/12/2026 11:01 AM
3492	I don't think it's a great idea to be mixing such a wide range of student ages. The younger kids tend to get picked on and including more of them isn't a good idea.	2/12/2026 11:00 AM
3493	Research shows that fewer school transitions are better for students both socially and academically. Of the scenarios provided PK-5 and 6-12 provides the best balance of grade levels.	2/12/2026 10:57 AM
3494	I have no real thoughts on the grade bad scenarios but I am generally with the camp that 7 year olds should be far away from 13 year olds. I also wouldn't want the elementary aged kids exposed to the level of bullying and fighting that happens at many of the middle schools	2/12/2026 10:57 AM
3495	Too much overlap.	2/12/2026 10:56 AM
3496	Depending on special programs, consistent banding would allow for more equitable instruction and after school activities. Consistent banding will also make movement between schools smoother for families.	2/12/2026 10:52 AM
3497	I like the way the schools are organized now, but also see opportunity to do PreK-3rd, 4th-8th, and 9th-12th as a good alternative.	2/12/2026 10:47 AM
3498	I like the smaller grade bands.	2/12/2026 10:45 AM
3499	fine	2/12/2026 10:40 AM
3500	I believe really young kids need to be separated from older elementary kids. Just like the middle school kids need to be separated from older teenagers. They should not be mixed. To many issues can occur with mixed younger kids with older kids.	2/12/2026 10:40 AM
3501	Keep it as it is	2/12/2026 10:36 AM
3502	Peachtree Middle, Dunwoody High and Vanderlyn should not be closed or redistricted	2/12/2026 10:35 AM
3503	I don't feel as though I know enough to speak to this.	2/12/2026 10:35 AM
3504	It’s not clear from the information provided what a potential grade band scenario would happen in the Tucker cluster. It’s not even clear that the proposed plan would mean Brockett merges with closed Midvale and expanded Livsey or if we would end up at Idlewood/Smoke Rise (please no). With that said, I see the value in both K-8 grade bands as well as smaller k-3/4-5 schools. I think there is value in keeping a larger cohort of students with the same teachers/admin for longer periods of time while they navigate emotional/hormonal changes that come with middle school years. We participate in extracurricular activities outside of school in addition to in school so this is not a big concern. I have more concerns about 6-12 grade bands than elementary/middle school clusters. There are too many opportunities for inappropriate influences (cell phones, social media, bullying, etc.) for middle schoolers interacting with high schoolers	2/12/2026 10:35 AM
3505	Grade band scenarios should be given strong consideration. Age appropriate programming and resources can be robust and critical for a child's learning and development.	2/12/2026 10:31 AM

3506	The pros are all the same , however the cons have more variables. if the variables are triaged due to level of importance and addressed sufficiently any of the scenarios can work. Standardization causes less variables and confusion. all should be done the same if the change is made.	2/12/2026 10:29 AM
3507	Schools combining prepubescent kids with more mature kids sounds like a potentially good idea, until I recall the positively prison-like, punitive nature of Henderson Middle School. The entire first week was spent signing enormous documents outlining the punishments students would receive for every possible infraction. After the first kid brought that ridiculous document home, looking so much less enthusiastic about school than when they first arrived, I tossed the next two in the recycle bin without a glance. DeKalb has a knack for crushing the spirit is even gifted, well-behaved kids who love to learn, with its preemptive threats. I sincerely doubt that the younger students would be treated more like the older students, enabling them to achieve more and learn more, rather, the older students would be treated like the younger students and the place even more closely resemble a prison. It would be great if we offered foreign language starting in kindergarten. It seems no one actually has a degree in education. If they did, they'd know that learning a foreign language becomes exponentially more difficult after puberty. They'd also know that learning a foreign language improves competence in one's native language. Yeah, only those who excel in ELA (even if it's not their native tongue) are permitted to take a foreign language. It's idiotic. So, I would be in favor of k through 4 and then 5 through 12, but I don't think it would be implemented in a positive and beneficial (to the kids and in the long term, society) way.	2/12/2026 10:26 AM
3508	N/A	2/12/2026 10:25 AM
3509	A 6-12 grade band is a NO GO!	2/12/2026 10:25 AM
3510	I personally prefer the tradition grade bands (PK-5, 6-8, 9-12). I don't like adding PK-3 because my kids will be spread across different schools more often. I think the traditional band works best and keeps kids developmentally in the right place.	2/12/2026 10:21 AM
3511	I prefer traditional grade band clusters but I don't have a strong preference either way.	2/12/2026 10:21 AM
3512	Ashford Park	2/12/2026 10:16 AM
3513	I am not sure about what a grade band is.	2/12/2026 10:15 AM
3514	I think it is prudent to consider options outside of the status quo. K-6; 7-9; 10-12, etc.	2/12/2026 10:14 AM
3515	I am a fan of PK-2 (or 3) and 3 or 4-5. That's how the schools are allocated in my home district. I like the bigger kids being separated since there is such a difference in children's needs when they are 4-5 vs 10-11. It would eliminate a lot of the crowding if the older grades were reallocated.	2/12/2026 10:13 AM
3516	I suggest the district consider transitioning Ashford Park into a PK–3rd grade school. Many students already transition from Ashford Park after 3rd grade to magnet programs, making this a natural and minimally disruptive point for the school to end. Fourth and fifth grade students could then be rezoned to Montgomery and Huntley Hills based on updated district lines. This approach would reduce the number of students required to travel to those schools each morning, lessen traffic and safety concerns, and decrease enrollment at Ashford Park. The current modulars on the field could be used to house students while any build repairs took place in phases. Eventually, the building would be in good enough shape to potentially completely remove the modular classrooms currently on the field while still utilizing a school building that is ideally located for the surrounding neighborhood.	2/12/2026 10:11 AM
3517	Grade band scenarios, as they stand today, seem to work well. My experience is in the Lakeside cluster. Henderson middle needs some attention, tho. The majority of the elementary schools in the cluster are high performing and Lakeside is high performing, but Henderson seems to be void of high performance, except for the STEM teams within each grade.	2/12/2026 10:10 AM
3518	I prefer high schoolers (9-12) to be separated from middle school students (6-8). So I am against a 6-12 grade band. I also prefer elementary (PK-5) to be separate from middle school.	2/12/2026 10:07 AM
3519	Proper age limits need to be in place.	2/12/2026 10:06 AM
3520	We want Clarkston High School have the newest school like Cross Keys.	2/12/2026 10:05 AM
3521	6-12 seems like an awful Idea. We do not need our 6-8the graders exposed to high school problems	2/12/2026 10:03 AM

3522	Leave it as it is. Do not band grades beyond the traditional band already in place	2/12/2026 10:03 AM
3523	9-12. Students need space to do co-curricular activities and clubs. Currently, the common areas are used for several purposes (Eg. Media center is used for Literacy/ Reading/ Clubs/ Meetings etc)	2/12/2026 10:03 AM
3524	I think it is important to keep neighborhoods together to provide a sense of community. If breaking the schools up into more bands would allow the district to utilize the smaller buildings in our cluster but keep the cluster together - I think that is preferable. The building on Nancy Creek Drive should come back to the Chamblee Cluster and can handle the excess students at the elementary school level - perhaps make it a 4th & 5th grade school. Again, closing Ashford Park seems far fetched without much thought behind it.	2/12/2026 10:03 AM
3525	Grade bands must be considered through a P3–12 lens, especially for students with special needs, especially with the increase of Autism Spectrum Disorder. If a preschooler (age 3) near Briar Vista or Woodward or Dunwoody needs an inclusion placement, the only option in the entire county is Coralwood, because no other school provides Preschool Inclusion programming for three year old students. If a preschooler (age 3) needs inclusion near Rock Chapel, Stoneview or Bob Mathis, Coralwood is the only location. This leaves families in many areas—North, Central, Stone Mountain, and South DeKalb—without accessible services. There is an urgent need to expand Preschool Inclusion options across the district so young learners are not forced to travel long distances for appropriate services. Some preschool students are on the Special Education bus for up to 2 hours. Every region of the county should have preschool inclusion programs support not just Coralwood. This should be a core part of the grade-band scenarios and facilities planning objectives.	2/12/2026 10:02 AM
3526	Makes sense as needed	2/12/2026 10:01 AM
3527	I don’t know that I have specific grade band feedback that is relevant to this discusion.	2/12/2026 10:01 AM
3528	There is no way for the safety of PK or K to be around 8th graders. The kids are way too small for the 8th graders.	2/12/2026 10:00 AM
3529	Need proper age gaps in schools.	2/12/2026 10:00 AM
3530	I think the current grade bands or modifying with a lower elementary/upper elementary split is ideal. As a former teacher in a K-8 environment, I am concerned about the proposal to merger schools to have either a K-8 or 6-12 option. I think it is essential that middle school remain separate as this is a major transition time for students and I do not think the middle school grades in a K-8 environment adequately prepared students for high school, at least in the system that I previously worked in.	2/12/2026 9:56 AM
3531	6-8 should not be in the same building with high school. This is a unique developmental stage. In addition, the activities, behaviors, dating etc is different in high school. Grade bands should be the same. this will help ensure equity in programing across the system and make it easier for families if they move within the district	2/12/2026 9:56 AM
3532	If moving away from the current model, I think this grade band option makes the most sense: PK-3 / 4-5 / 6-8 / 9-12 is a possible variation of this grade configuration. I think it is important to keep 6-8 separate from 9-12. A lot of maturing comes during these years and can be challenging for students. Giving 6-8 time to mature without olders would be beneficial.	2/12/2026 9:55 AM
3533	In my opinion, it's not a good idea to mix younger students with older ones because the older kids might not always show the best behavior, and that could really affect how the younger ones act and learn.	2/12/2026 9:55 AM
3534	PK-2, 3-5, 6-8, 9-12	2/12/2026 9:54 AM
3535	In addition to the proposed school closure, I am deeply concerned about the recommendation to implement grade band options across the district. While this approach may appear efficient on paper, it would introduce additional transitions for young students, forcing them to change schools multiple times during their elementary years. Research and experience show that stability, consistency, and long-term relationships with educators are critical to student success particularly for early learners. Grade banding would also create significant logistical challenges for families, especially those with multiple children who could be assigned to different schools with different schedules and transportation needs. This model weakens neighborhood school communities, reduces sustained parent involvement, and places unnecessary strain on working families. Without clear evidence of meaningful academic	2/12/2026 9:51 AM

	benefit, grade banding risks prioritizing operational restructuring over what is best for students and families. I strongly urge the district to reconsider grade banding proposals and instead focus on strengthening existing neighborhood schools and minimizing disruption to students and communities.	
3536	I believe the school cluster grade bands should stay the same as it is now. Prek-5, 6-8, 9-12	2/12/2026 9:50 AM
3537	I prefer the traditional model of Pre-K-5/6-8/9-12. Having 8th graders and 4 year-olds in the same building seems unfair to all. Younger students do not need to be exposed to some of the things older children might be. And older students need that middle school transition - where there's more responsibility, autonomy, and accountability - to make the move to high school smoother.	2/12/2026 9:50 AM
3538	6-12 is too large a grade collection to put into the same school	2/12/2026 9:49 AM
3539	Every scenario has almost an equal amount of pros/cons. However, I do think they all need to be the same.	2/12/2026 9:47 AM
3540	I'm not totally opposed but don't exactly understand how this is being executed with the current proposal. My concern would be how this affects kids socially. Having 6th graders with 12th graders seems awkward, unless you somehow had a split campus like private schools.	2/12/2026 9:39 AM
3541	As a parent and active PTA member, I strongly advocate for maintaining the Traditional PK–5 / 6–8 / 9–12 configuration for our cluster. My preference is based on three primary factors: Developmental & Social Alignment: This model ensures that school environments are tailored to specific cognitive and emotional stages. For example, a 5th grader in an elementary setting is a 'senior' leader, which builds confidence before transitioning. In a PK-8 model, the developmental gap between a 4-year-old and a 14-year-old in the same facility presents significant social and safety challenges. Operational & Extracurricular Robustness: From a club and programming perspective, traditional middle schools (6-8) provide the 'critical mass' of students necessary to sustain diverse electives, competitive sports, and specialized wellness programs. Smaller 'middle school slices' in a PK-8 or 6-12 model often result in diluted resources and fewer opportunities for students to find their niche. Logistical Stability for Families: The traditional model supports a three-tier transportation system, which is vital for minimizing bus delays and driver shortages. Furthermore, while the PK-3/4-5 model offers specialized instruction, it creates an 'academic disruption' and logistical nightmare for families with siblings in multiple elementary buildings, effectively splitting parent volunteer support and PTA resources.	2/12/2026 9:38 AM
3542	I am very concerned about the potential grade band scenarios that would separate traditional elementary grade levels (K–5) into different configurations such as K–2 and 3–5 or move 5th grade into middle school settings. For our cluster, particularly at the elementary level, maintaining a K–5 model is extremely important. Young children benefit from stability and continuity. Splitting elementary students across multiple buildings disrupts relationships with teachers, administrators, and peers during critical developmental years. If the proposed grade band scenario includes: • K–2 in one building and 3–5 in another • Moving 5th grade into middle school • Creating larger upper-elementary centers I strongly urge the district to reconsider. Specifically: K–2 / 3–5 splits create unnecessary transitions. Students would have to adjust to a new school environment twice before middle school. That increases stress and reduces consistency in instruction and support. Moving 5th grade to middle school concerns me deeply. Fifth graders are still elementary-aged children developmentally. Placing them in a middle school environment may expose them to older students before they are socially and emotionally ready. Larger consolidated upper-grade centers could increase class sizes and reduce individualized attention during important academic years when reading comprehension and math foundations are solidified. In our cluster, I would prefer maintaining neighborhood-based K–5 schools with manageable enrollment and class sizes. Stability, community connection, and age-appropriate environments should be prioritized over operational convenience. If grade band changes are being seriously considered, I request clear data on: • Projected class sizes by grade • Student-to-teacher ratios • Transportation impact • Effects on special education and support services • Research supporting improved outcomes under the proposed model Elementary years set the foundation for a child’s academic and social success. Please prioritize developmentally appropriate structures and minimize unnecessary school transitions.	2/12/2026 9:37 AM
3543	I do not want grade bands consolidated. The separation allows kids to maintain psychological safety and maintain limited exposure prior to maturity readiness. Social media is a big issue in middle/high school and the separation of these two is critical to delaying some exposure. If	2/12/2026 9:36 AM

	you were to consolidate, I would want separate buildings/admin who focus on each one and only standardized mixing.	
3544	I'm okay with the idea of 4-5 graders having their own grade band. At that point, they're more mature and are preparing for middle school.	2/12/2026 9:36 AM
3545	I think 4 levels is problematic for the increased number of transitions. That is asking a lot for parents with kids of multiple age levels.	2/12/2026 9:36 AM
3546	I do not support middle and elementary consolidation. Suggested consolidation: Pre-K 3, 4 and K, 1st-6th grade, 7-12th grade. Within 7-12th grade institutions, a transition academy hall for 7,8,9 that prepares for transition to 10th grade.	2/12/2026 9:35 AM
3547	Worth exploring, but I feel it will be very tough to uproot the existing system. I also worry about the inequity present if grade bands are adjusted for only SOME areas of the district and not standardized across the whole district. I'm not against it outright, but it's definitely something to think about.	2/12/2026 9:33 AM
3548	This will be counterproductive.	2/12/2026 9:31 AM
3549	I think grade bands make sense so that we can keep communities together. And I'd much rather prefer that over being split up. I have two kids, so I realize that that might mean I have to drive them to two separate schools, but I'm open to that if the alternative is being split up from their peers. I'm a little concerned about sixth graders going to school with seniors, but if they were still divided by buildings on a larger campus, that could work.	2/12/2026 9:31 AM
3550	I do not have faith you can execute a change in grade bands. Further, becoming more granular with tighter grade banding is a huge issue for parents with multiple kids in terms of getting them to and from school. Again, nonsensical approach to the problem.	2/12/2026 9:29 AM
3551	I like the idea of the more refined grade band scenarios (PK-3, 4-5, 6-8, 9-12). I do not support the K-8 or 6-12 scenarios as that will be too much difference in age and life experience for the kids.	2/12/2026 9:28 AM
3552	I LOVE the idea of grade band scenarios. PK-3, 4-5, 6-8, etc. This would create smaller schools which build community and are usually higher performing. This could easily be created using the current real estate, with some remodeling needed on the older buildings.	2/12/2026 9:28 AM
3553	Grade bands should remain as-is. If there are changes, the PK-3/4-5/6-8/9012 makes the most sense. Keeping children in schools with other children who are the similar age is best for their development.	2/12/2026 9:27 AM
3554	The campus needs to be large enough for separation. You would need a lower campus and a middle campus. Private schools do this well.	2/12/2026 9:26 AM
3555	I'm OK with consolidating into two bands, either PK-8, 9-12 or PK-5, 6-12, so long as student-teacher ratios and class sizes are kept in optimal ranges.	2/12/2026 9:22 AM
3556	Separating the schools amongst different grade bands is a reasonable choice. Have you considered making Ashford Park Elementary School PK through second grade and then making John Lewis elementary school third through fifth grade? Again, as a community we would like to stay together and not be split up amongst several elementary schools. Why has no money been invested into Ashford Park Elementary School to be expanded similar to what is happening at Dresden elementary school? We are severely overcrowded, which means that the need is there.	2/12/2026 9:22 AM
3557	Scenarios are fine. Druid Hills Middle School is not listed and Druid Hills High School is not changing; however needs the renovation process to start immediately.	2/12/2026 9:21 AM
3558	There are constant leadership and boundary disruptions. The focus of the Board does not seem to be on Education or property values that come with it. The focus of the board seems to be on some invisible political or social agenda at the expense of our kids. I would bet most or none of you have kids that are affected by your choices. EDUCATE OUR DAMN KIDS AND STOP WITH THIS SHIT	2/12/2026 9:17 AM
3559	Generally this makes sense.	2/12/2026 9:14 AM
3560	This is an interesting concept. I like the idea of changing it up - especially with the pk3-3, 4-5 idea. Younger kids have different needs. This could be a good use of some of the smaller schools.	2/12/2026 9:14 AM

3561	NA	2/12/2026 9:13 AM
3562	I am most interested in keeping it prek-5, 6-8, 9-12 OR Prek-8, 9-12. The option to have prek-8 gives a good transition for the middle school age to act as mentors for the younger kids, allowing them to have more confidence and learn independence in a productive way. Middle school can be hard when isolated together and I've seen other school districts and private schools do this option well.	2/12/2026 9:13 AM
3563	my initial feelings on changing the grade bands is negative. I appreciate the pro's and con's laid out and believe the status quo balances transitions, transportation, offerings, and keeping siblings in the same building	2/12/2026 9:12 AM
3564	I would prefer PK-8 band.	2/12/2026 9:12 AM
3565	I do think the traditional K-5, 6-8, 9-12 is best. I would consider 8-12 because it would give 8th students the opportunity to take high school level classes AT a high school. Perhaps K-6 and 7-12 would be best.	2/12/2026 9:11 AM
3566	Complicated. Decatur does this, I know parents who love it and who hate it.	2/12/2026 9:10 AM
3567	Middle schoolers and high schoolers are in such different places developmentally - mentally and physically - they should not be in the same school together.	2/12/2026 9:09 AM
3568	I agree that the proposed grade band reconfigurations are a necessary evolution to ensure students have access to specialized resources that smaller, traditional models can no longer sustain. Moving away from the status quo is the only way to modernize the DeKalb County School District.	2/12/2026 9:08 AM
3569	I don't know enough about Peachtree Middle or Dunwoody HS to comment on school bands.	2/12/2026 9:08 AM
3570	I haven't properly explored the pros/cons of the 6-12 model, but my main concerns is having smaller 6th graders with 12th graders. Will there be a separate building for them?	2/12/2026 9:07 AM
3571	The grade bands need only apply to the southern districts.	2/12/2026 9:07 AM
3572	The changes in grade bands is one of the least reasoned ideas I have seen recently. Who in the hell thinks that 6-12 graders should belong in the same school. Was this scheme devised by a high ranking gang member seeking to expand recruitment opportunities in our schools? Notably, this scenario would help DeKalb County Public Schools continue to do what they do best: Creating the gang leaders of tomorrow, today!	2/12/2026 9:07 AM
3573	There is no need for bands	2/12/2026 9:06 AM
3574	Middle school is hard wherever it takes place. Removing students from the community where they are known and placing them into a very large middle school adds upheaval at a time when stability matters most. Adolescents need more connection with trusted adults, not less. In giant schools, it becomes easier for students to feel invisible. I would strongly favor K–8 or 6–12 models that create continuity, strengthen relationships, and support students through these pivotal years rather than resetting everything right when they are most vulnerable.	2/12/2026 9:06 AM
3575	I don't have a specific cluster or school in mind, but I do not believe middle school and high school should be combined. 1. Developmental appropriateness concerns Students in grades 6–8 are at a significantly different developmental stage than students in grades 11–12. Housing them in the same building raises concerns related to social maturity, behavior modeling, and age-appropriate school culture—particularly in shared spaces such as hallways, cafeterias, and extracurricular settings. 2. School culture and climate challenges Middle school and high school operate with fundamentally different instructional models, disciplinary structures, and student expectations. Combining them risks diluting intentional middle-school supports (team structures, advisory models) or, conversely, undermining high school rigor and independence. 3. Safety and supervision issues Managing supervision, scheduling, and behavior across such a wide age range may create logistical challenges, especially in larger clusters. Ensuring appropriate separation and monitoring could require additional staffing and resources. 4. Impact on extracurriculars and leadership opportunities Middle school students may have fewer leadership opportunities if extracurriculars and student organizations are dominated by older students. Conversely, high school students may lose age-specific traditions and experiences that contribute to school identity and engagement. 5. Implementation and cost concerns Any shift in grade banding would likely require significant investment in facility modifications, scheduling redesign, transportation adjustments, and	2/12/2026 9:06 AM

	professional development. Without sufficient planning and funding, the change could negatively impact instruction and student outcomes.	
3576	If you are having resourcing issues I don't understand why you would have MORE grand bands, but I also think consolidating from PK-8 OR 6-12 isn't the best interest of students growth as a whole.	2/12/2026 9:05 AM
3577	I do not agree with middle and high school being banded together. If anything, I would suggest a Pre-k3, Pre-k and kindergarten specific school. Example. Pulling those 3 grades to Oakgrove would open up 4 class rooms at Briarlake for 1-5grade classrooms and likely open up classrooms at other schools too.	2/12/2026 9:05 AM
3578	N/a	2/12/2026 9:04 AM
3579	The logic for transitioning schools makes sense. However, there is no mention of school choice programs and the impacts these will have on them. For example, Ashford Park has German immersion. If you close the school, where do those kids and the program get moved to?	2/12/2026 9:04 AM
3580	Oppose 6–12 (and concern with K–8): Wide age-range campuses create developmentally inappropriate social influence and supervision challenges; middle grades need their own environment and identity.	2/12/2026 9:04 AM
3581	Grade band scenario is an awful choice. Having kids transition more than the traditional 3 times is horrible. Many kids already have a hard enough time. The grade band scenario is absolutely not taking into account what is best for our children!	2/12/2026 9:03 AM
3582	While I am not a fan of the idea of transitions this feels more appropriate and potentially beneficial at the elementary age. I would be willing to hear more about a PK-3 and 4-5 option as teachers could specialize more and students could prepare for the transition to middle school. This would depend greatly on the student population numbers though.	2/12/2026 9:03 AM
3583	Columbia Elementary has been a staple in the community for many years and to see it closed would be heartbreaking. Many generations have attended Columbia.	2/12/2026 9:02 AM
3584	I strongly prefer keeping PK–5 students in their own building. Younger children thrive in environments designed specifically for their developmental and social needs, and separating them from older students helps build a safe, supportive early-learning community. Having bands that include just 4th and 5th grades would appear to increase the facility demands of the district without solving a specific need. I do believe that a one-size fits all approach might not be ideal, so implementing different bands across different clusters seems logical - but at the core of it all, the belief of smaller environments for younger students is key.	2/12/2026 9:00 AM
3585	I have very mixed feelings on changing grade band scenarios (truly mixed - I see benefits and drawbacks). My comments are general and are not specific to any particular school or cluster. I tentatively prefer the idea of PK-5 and 6-12. It does indeed provide more continuity, makes it easier for parents as kids are more likely to be in the same school for longer, and reduces the trauma of the MS experience where you only get there for 3 years. I know as a parent if often feels like the kid is at the MS for such a short time that you have just gotten to know everyone and feel like you can make a difference when they're moving on! I think 6-12 could also help sports because MS kids could get involved from a younger age. Moreover, kids with IEPs and special needs would have continuity with the counseling office and might have an improved experience. And, of course, your point about advanced classes for advanced MS kids. My main concern with this - which wasn't in your cost/benefit analysis - is that I worry about 6th grade kids in a school with 12th graders. Some 6th-7th grade kids are still really small/immature, and I can see potential for bullying at bus stops and other places where there are no adults to keep an eye on things. I also worry about younger girls getting themselves in a bad situation with an older boy who they wouldn't (necessarily) have been exposed to at a traditional MS. I don't know if there is research on these problems, but they are things to keep in mind. I do not like PK-3 and 4-5. I completely understand the benefits of having the younger kids in a school that can focus on literacy (and the little kids away from the 5th graders who develop early and are larger, as per my point above), but transitions are amazingly hard on kids and I think adding transitions, especially for kids that young, is a bad idea. Moreover, for kids with SLDs or other disabilities/challenges, a lot of them are diagnosed in 2nd and 3rd grade, so it would break up continuity in trying to diagnose and figure out the best pathway forward for these kids. I would be less concerned if the school moved as a unit (like our current MS-HS transition, where it's all the same kids with no additions), but that frankly doesn't make sense	2/12/2026 9:00 AM

	from an efficiency standpoint. Presumably you'd feed multiple PK-3 programs into a 4-5 academy situation, like Decatur does. I don't have a kid that young anymore, so it wouldn't affect me personally, but I'd be very concerned about this model. I am agnostic on PK-8 and 9-12. I think it keeps a lot of these benefits (more continuity, more options, fewer transitions) and might even make more sense than 6-12, but I worry about 3 year olds in the same building with 8th graders. But, depending on how the building is set up it might work just fine and would provide more options. I do think that whatever you do, you should keep the current situation where there are HS clusters that stay together. I grew up in a system where they zoned MS and HS with no accommodation for earlier grades, and it was awful. Kids would go to MS with just a handful of peers from their ES and be massively disadvantaged socially compared to the kids where most of the ES kids went together. Teams that had formed in MS were split up across 3 HSs. Parents started intentionally moving to houses where preferred districts overlapped in the ven diagram of schools that they wanted and it had a bad impact on housing. I realize it's trickier, and makes for some funky shaped districts, but whatever grade band distribution ends up being most efficient I am strongly, strongly in favor of keeping the current HS cluster model. To foreshadow one of your questions below, I think it's fine if the grade bands are different, and in fact, the flexibility to use different grade bands might really help with the redistricting, because it would allow you to use smaller bands in more densely populated districts and keep everyone in their current cluster. Obviously the less moving around of people you can do, the happier they will be and the less pushback there will be to these changes! I'm sure most people would trade off a grade band that wasn't their preferred if it meant they got to stay in their same cluster. Indeed, despite my reservations, I would even be in favor of Pk-3/4-5 split if it meant that a cluster could stay together. Another advantage of different grade bands in different districts is that it allows parents the flexibility to choose what band works best for them. If they prefer one over the other, they can move or school choice in. In my opinion, the best feature of DCSD - and why we have stayed for all our kids - is that we have so much choice (theme, IB, magnet, language immersion, art...) and adding the ability to choose the grade band that works best for your family would give parents more choice and flexibility.	
3586	Against it	2/12/2026 8:59 AM
3587	I think the grade bands could be beneficials. There is a big difference in the maternity and the needs of elementary school students, so splitting them up makes sense.	2/12/2026 8:59 AM
3588	I’m curious why you would close Kingsley and not Chesnut. Chesnut’s location is absolutely horrible and the mobility in the area is already greatly impacted. Capacity is equal between the schools, while Kingsley has more room to grow without impacting traffic.	2/12/2026 8:57 AM
3589	I prefer this model: Traditional PK–5 / 6–8 / 9–12 models PK-3 / 4-5 / 6-8 / 9-12 is a possible variation of this grade configuration since PK-8 brings more challenges than benefits.	2/12/2026 8:57 AM
3590	I think a PK-8 would be fine. I do not like 6-12. I think there are too many different developmental stages that would cause too many issues.	2/12/2026 8:57 AM
3591	This makes sense if elementary schools remain walkable and local, otherwise the distance impacts all students and buses are too early and unreliable. Walking creates a sense of community that we should protect wherever possible.	2/12/2026 8:56 AM
3592	I can not focus on the specific schools or clusters, I just feel that the needs of any school or cluster should determine same grade bands or not.	2/12/2026 8:56 AM
3593	Pk-3 and 4-5 grade bands seem like a reasonable possibility. 6-12 banding seems incredibly problematic. My 11 year old rising 6th grader is absolutely not ready to be included with 17 and 18 year old high school students. A middle and a high school student population are inherently very different and assuming that one leadership team could adequately manage both of those populations together is undervaluing what educational leadership does.	2/12/2026 8:55 AM
3594	Grades 6 through 8 will be challenging no matter what you do. My concern is that there is a greater disparity in regards to academic abilities and social skills than ever before. Liberal transfer decisions exacerbate the challenges by providing a moving target.	2/12/2026 8:55 AM
3595	My children are in the HHES Montessori program, so they have been in classes with older/younger students since they started PreK. My oldest currently (4th grade) has exceeded the educational offerings of his Elementary level and would greatly benefit from banding, or being able to take classes with 7th or 8th graders. So, I love the idea of having classes	2/12/2026 8:54 AM

	available for students at any level, meet the kids where they are, don't fit them into a box. (All general comments on banding, no specific schools or clusters referenced)	
3596	I'm not quite as concerned about the grade bands, but the consistency of the current structure makes commuting much simpler - especially as many of us are returning back to office.	2/12/2026 8:53 AM
3597	I am not interested in elementary students being able to take middle school courses to advance their learning while the curriculum and organization of the current elementary school and the available resources can't provide adequate and consistent grade-level instruction.	2/12/2026 8:52 AM
3598	Less transitions are better for families so siblings of different ages can be on the same campus.	2/12/2026 8:51 AM
3599	I would be more open to utilizing the schools for a lower school and upper. Why can we not utilize John Lewis as 3-5 and Ashford Park as PK - 2nd?	2/12/2026 8:51 AM
3600	I would love to see elementary schools split into lower and upper elementary schools. Lower school would be PK-3 and upper would be 4-6. Keeping 6th grade as an upper elementary school gives kids and extra year of more hands-on support before they go off to middle school and the challenges they'll face in that environment. Our twins are currently at Kittredge (grade 5), and we have an older child at GLOBE Academy (grade 7). Seeing the 4-6 graders at Kittredge has really opened my eyes to how helpful it is to give kids an extra year in this grouping before middle school. An ideal arrangement would be: PK-3, 4-6, 7-8, and 9-12	2/12/2026 8:51 AM
3601	Grade banding could be fine if you go the route of doing pk-3, 4-6, etc. but having the large range of pk-8 is too big and those young children do not need to be around the older ones.	2/12/2026 8:51 AM
3602	Whatever grade band keeps Vanderlyn is the one I support	2/12/2026 8:51 AM
3603	Creating giant elementary schools does not seem ideal (if I understand, there would be elementary schools the size of middle schools).	2/12/2026 8:50 AM
3604	I do like the idea of the PK-3 and 4-5 band in that teachers would spend more time on the basic fundamentals which i don't think they are getting enough currently. I also think this way they can focus on writing and cursive-which have been thrown out-much to my dismay and to the detriment of their future.	2/12/2026 8:50 AM
3605	I don't have an issue with this discussion. Pending seeing what schools would be assigned for our home.	2/12/2026 8:46 AM
3606	While I understand the potential desire to consider alternative grade bands as a way to optimize efficiency, the negatives of each situation really outweigh the positives in my opinion. PK-3/4-5/6-8/9-12 is just way too many transitions and requires families with multiple children to likely attend several schools at once. PK-5/6-12 when done in large numbers just further highlights the differences between potential 11-year olds and 18 year olds. PK--3/4-5/6-12 is still tough with additional transitions, but likely is the 2nd best alternative to the traditional model in my mind. PK=8/9-12 is also a bad option because having 4 year olds in the same school as 14 year olds just really doesn't mesh well in large numbers. The traditional model was designed for a reason and has proven to be successful for decades now in terms of age appropriate clustering.	2/12/2026 8:45 AM
3607	Sixth through eighth grades should stay in the same cluster.	2/12/2026 8:44 AM
3608	I would be uncomfortable having a school band of Henderson Middle and Lakeside. I'm not sure how appropriate it is to have middle schoolers in such close proximity to older students. My preference would be to have a grade band scenario of K-8, with some of the projected to close elementary schools (like Evansdale) to band to Henderson. This would allow DLI programs to continue.	2/12/2026 8:43 AM
3609	While Vanderlyn/Austin perform well, DES and Chestnut do not perform as well. Neither does Peachtree Middle. It would make more sense to me to consolidate Chestnut and/or DES than Vanderlyn. If there is an opportunity to fix Peachtree Middle through consolidation or different grade bands than that could be interesting.	2/12/2026 8:42 AM
3610	I'm very concerned about the 6-12 option. A child who just came from 5th grade doesn't need to be exposed to everything that 11-12th graders are doing/discussing, etc.	2/12/2026 8:41 AM
3611	At Oak Grove, the 4th and 5th grade classes are looked at as leaders in the school and help the lower grades throughout various activities during the year. Having them at the school is	2/12/2026 8:40 AM

	beneficial for the younger grades to understand they are working towards leadership roles as well. However, if we needed to change the band in order to keep Oak Grove, that would be considered.	
3612	Without having full knowledge of each Cluster its difficult to be spot on. However discovery of percentage gaps in each cluster should be used to determine how we consolidate grade bands.	2/12/2026 8:40 AM
3613	What's missing is a 9th grade band. Have you considered PK-6, 7-9, 10-12? Ninth grade is still not got their eyes on graduation and can use a little more help given in MS. I don't know that we have bldgs to handle 6-12 well and 6th graders should not be mingling with 12th graders. I don't feel strongly for PK-3 - in fact, I had read research that it didn't work. I have been in ES where the 5th graders work with 1st graders. This removes this possibility. Also, removes 5th graders learning how to be the example for the younger students.	2/12/2026 8:40 AM
3614	No changes to grade bands in my cluster that I saw.	2/12/2026 8:39 AM
3615	Keep Briarlake a small neighborhood school	2/12/2026 8:39 AM
3616	We need to do what will expand academic program offerings the most. If the "traditional" model with at capacity schools will offer the most rigorous programming for the most students, then that is what needs to be done.	2/12/2026 8:39 AM
3617	Based on developmental stages, I think it is a bad idea to have 6-8 mixed with 9-12. I do not like the idea of 3 transitions instead of 2 with the 4 band scenario.	2/12/2026 8:38 AM
3618	Consider making Peachtree Middle school a high school!! If you do 6-12 for high school, or K-8 for elementary school it could work! 2 Dunwoody high schools possibly? Or, keep it 6-8 for Peachtree Middle and 9-12 at Dunwoody High.	2/12/2026 8:38 AM
3619	Traditional clustering is still better. If teachers already feel overwhelmed with this number, making them bigger sizes would even be worse and more kids would again pull out from schools. This is in particular to most schools in Lithonia for instance that dont even want to put any effort in encouraging students. Tucker High and Middle schools are still doing better jobs! Please leave them that way.	2/12/2026 8:38 AM
3620	I would be very happy to see smaller elementary schoolss with smaller bands (k5-2 and 3-5).	2/12/2026 8:37 AM
3621	I would like KMS and Wadsworth to continue to exist in a stand alone so want to see the 4-6 or 4-8 grade band model continue. It does a lot for school culture and climate. For Montgomery I could see at PK-3 and 4-5 scenario with using the old Nancy Creek school site. I still like 6-8 and 9-12 for Chamblee. Unless the 4-6 or 4-8 could be more replicated.	2/12/2026 8:37 AM
3622	I think keeping pre-K-8 or even 9th grade away from older kids for as long as possible is the best idea. I think keeping prek-6 together as long as possible is also good. This preserves innocence and focus and builds readiness for middle school and high school	2/12/2026 8:36 AM
3623	Middle school should be preserved. The 6,7,8 grades for kids are particularly difficult. Giving them their own places, where they can be awkward is important. There's a good reason that middle-schools exist. These kids are too old to be with the youngsters, not quite mature enough to be in high school. Don't screw this up. I don't see any reasonable justification for breaking up the elementary schools. bus schedules should not dictate how schools operate. This is backwards. Bus schedules should accomodate the needs of the schools.	2/12/2026 8:36 AM
3624	My kids go to the AP, chamblee high cluster & are part of the German emergnce program, ending thsi cluster is stupid	2/12/2026 8:35 AM
3625	I think the Jr/Sr High has been successful in the past, but middle school years are tough for just about everyone.	2/12/2026 8:35 AM
3626	K-3, 4-6, 7-9, 10-12	2/12/2026 8:32 AM
3627	Yeah I understand middle school not being separated I, but are you guys ready for high school seniors asking out 6th graders?	2/12/2026 8:32 AM
3628	High school kids absolutely shouldn't be with middle school kids. I think breaking up the elementary schools could have merit, but you really need to ensure high school is separate from middle school.	2/12/2026 8:32 AM
3629	The continuum we have for Ashford Park, Chamblee MS and HS is one of the best in the district. Disrupting that again goes against the goals for my kids to provide the best possible	2/12/2026 8:32 AM

	outcomes. This would lead to even more students moving from public school.	
3630	The grade bands for a few grades would be good but I don't think having grades 6-12 in one building is a good idea. That is a large age range to have all in one building.	2/12/2026 8:31 AM
3631	I think less transitions would be better	2/12/2026 8:30 AM
3632	Will need to understand our children’s new zoning to understand if I agree with the clusters.	2/12/2026 8:30 AM
3633	These scenarios should reflect the distinct needs of the communities. It should not be a one size fits all.	2/12/2026 8:28 AM
3634	I do not think 6-12 is a good idea, the changes kids go through in 6-8 need a separate learning space.	2/12/2026 8:28 AM
3635	I like the idea of being non-traditional though the of 6-12 together seems overwhelming. I would be interested in seeing the school size projections with all of these.	2/12/2026 8:28 AM
3636	The Tucker cluster seems to work ok except Idlewood elementary is the only elementary within the cluster to be over capacity and it's the smallest of the schools. [Though this year is different because of construction]	2/12/2026 8:27 AM
3637	High schools need to focus on preparing their students, at minimum, to be able to take the classes they need at the pace they need to be able to apply competitively to our state flagship universities. Currently, if a student is not "gifted", they will not be able to take the higher level courses they need to be a competitive applicant without taking extra classes in the summer. If expanding grade bands leaves high schools with less resources, then it shouldn't be a consideration.	2/12/2026 8:27 AM
3638	Vanderlyn is the only school nearby that fully impacts my family. I understand why it would be the school in our cluster to close.	2/12/2026 8:26 AM
3639	I think it would be detrimental to have sixth graders in the same school as 12th graders. That is too big of an age gap and I would not want my 12 year old going to school with 17-18 year olds.	2/12/2026 8:26 AM
3640	I do not have preference on grade banding. There are too many variants listed to give an opinion as this seems not flushed out enough	2/12/2026 8:26 AM
3641	I think that more transitions in the lower grades creates discomfort and difficulty for kids. I don't support creating lower and upper elementary schools. if there's room to have K-8 schools, that's fine.	2/12/2026 8:25 AM
3642	I believe the grade bands are fine. The closing and repurposing of schools on the south side will be the biggest issue.	2/12/2026 8:24 AM
3643	Leave things as they are!!! The traditional grade bands are working for the Ashford Park area.	2/12/2026 8:24 AM
3644	Considering the state of students going through puberty at the middle school level, I would not be comfortable with middle grades with younger students (K-5).	2/12/2026 8:24 AM
3645	The bands need to stay like they are. I think even pre k with fifth grade is to wide of a gap, but it doesn’t need to get any larger than that.	2/12/2026 8:22 AM
3646	I think the traditional is likely fine, however, I understand other scenarios may be beneficial.	2/12/2026 8:22 AM
3647	I think separating elementary into 2 groups would be very beneficial to those students and their education but I do think that in the chamblee HS cluster right now we are already short bus drivers we would need more as 4 school levels would make it harder for 1 driver to drive all the levels of the same route.	2/12/2026 8:20 AM
3648	NA	2/12/2026 8:19 AM
3649	We used to do elementary K-7 and high school 8-12. It was awful. The maturity level is not there.	2/12/2026 8:18 AM
3650	I dislike the various elementary grade band scenarios. When elementaries are split K-2, 3-5, no accountability is placed on K-2 in regard to standardized testing. When the split is more extreme, K-3, 4-5, parents check out of the school they are only going to attend for a couple of years. Lower grades do not have older students to look up to. Every time the students switch schools, behavior problems occur.	2/12/2026 8:17 AM

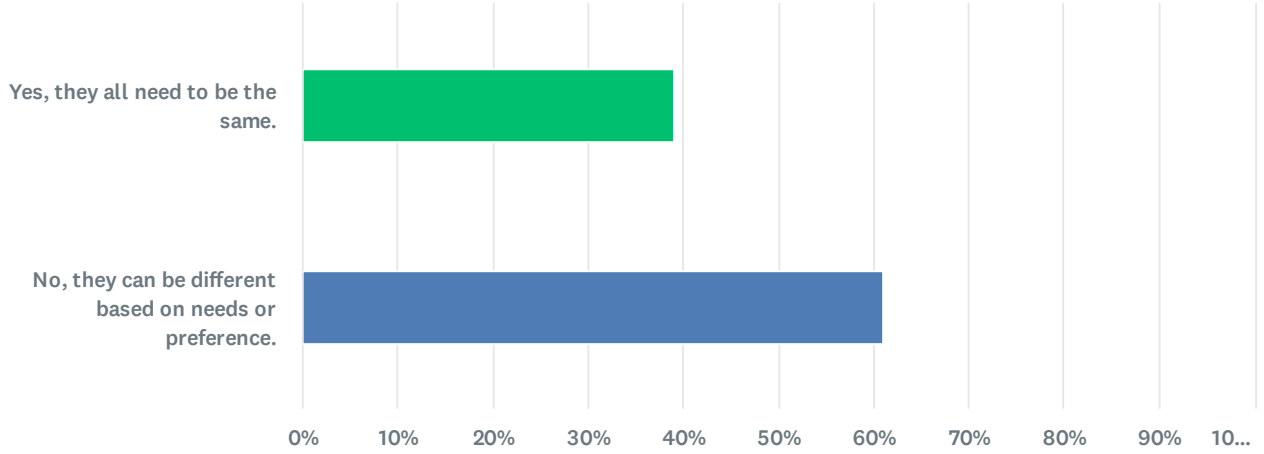
3651	There is no scenario where we want elementary kids with middle school children or middle school kids with high school children. There is serious concern about the safety of these kids given the potential for sexual abuse.	2/12/2026 8:17 AM
3652	I like the idea of smaller grade bands so that the schools can more closely serve a more specific population i.e. you have more students of a similar age together versus broader ranges which can be hard when managing programs like after school and bussing. My Pre-K student has been exposed to a ton of new things this year through interactions with older students in after school and more segmentation by age could be beneficial.	2/12/2026 8:17 AM
3653	I like the idea of smaller clusters. I think this could also be more beneficial for teachers because they have larger teams to plan with and more quality lessons would be provided.	2/12/2026 8:15 AM
3654	I want the school to remain open as it currently exists.	2/12/2026 8:14 AM
3655	We can do school like City Schools of Decatur K-3, 4-5 middle, and high	2/12/2026 8:14 AM
3656	Grade banding is fine and may even be necessary, but it should ideally be the same across the district.	2/12/2026 8:13 AM
3657	My initial feedback is the following. The people in the decision-making of hiring Superintendents who are under federal investigation are deciding on what's best for DeKalb parents, faculty, and students.	2/12/2026 8:13 AM
3658	Pre-K through 5 this is good as is. The littles and the big kids are great together and builds better kids and relationships with each other. The older grades could be banded better.	2/12/2026 8:13 AM
3659	Keep oak grove	2/12/2026 8:12 AM
3660	I support this idea as well.	2/12/2026 8:12 AM
3661	I think it’s a bad idea to have grade 6 with grade 12. Some of my HS students are 20-21 years old.	2/12/2026 8:10 AM
3662	Focus on schools or clusters that are low performing before addressing high performing but crowded clusters. Seem like a solution looking for a problem in specific areas.	2/12/2026 8:10 AM
3663	No opinion	2/12/2026 8:09 AM
3664	Dunwoody cluster-if vanderlyn closes please expand DHS. We've been told previously that it can't be done but no reason why. It could always be a much needed parking lot. The county was suppose to provide additional parking over the storm drain area years ago and it never happened.	2/12/2026 8:08 AM
3665	I like the idea of having smaller grade bands.	2/12/2026 8:05 AM
3666	A 6-12 is simply overcrowding the schools. Teachers are overworked and overwhelmed with all the access trainings as is. Making students teach even more students is NOT the solution. This is how students get overlooked and undiagnosed.	2/12/2026 7:59 AM
3667	Sure. We need to do things differently.	2/12/2026 6:59 AM
3668	SAP Member- where possible clusters should transition to K-8/9-12. This allows for the community building to continue on, building family trust over 9+ years, and allowing HS attendance with current level numbers. In practicality either a middle or high building closes, and elementary attendance zones are adjusted to maximize student volume to meet GA state funding requirements. Added programs to elementary foster community buy-in. An underenrolled elementary may not have an art teacher, but a metric meeting k-8 school gets fully funded. If a larger high school is eventually needed then again more programming becomes available.	2/12/2026 6:40 AM
3669	I believe HPM should consider reverting to DCSD’s former, pre-middle-school concept of PK-7 elementary schools and 8-12 high schools. Turn those middle schools back into high schools. This is a better situation for busy working families. Older elementary age siblings can assist in supervising their younger siblings after school. Also, 8th graders who struggle with transitioning to high school will not have their 8th grade class average included in their high school transcript. Parents with multiple children will only ever have to keep up with PTA/sports, concerts, etc… at 2 schools, not 3. This is a more family-friendly and community-focused grade band.	2/11/2026 11:19 PM

3670	It is strange that only one cluster wouldn't have a middle school. Data needs to be made available to the community to show the new Cross Keys HS, capacity 1600, could serve 6th-12th once Seqouyah HS, capacity 1600, is completed in 2029. Another option is to utilize the 11.24 acres of the Kittredge Magnet facility as the Cross Keys cluster middle school, or even a 4-8 one like Wadsworth; it is only 1.6 miles for Cross Keys HS. Brookhaven is building a pedestrian bridge across 85 too, providing alternative transportation options. What's more, the magnet program could continue to run in that new facility -- call it Kittredge -- as a local zoned school, and then continue within the Cross Keys HS, which both would have capacity to run the magnet program and attract high achievers. Having a magnet program at Chamblee MS and HS does not serve the needs of DCSD if they are overcapacity; how do you attract out of zone kids to an overcapacity facility? Rather, it's primarily benefiting the students already zoned for Chamblee MS and HS (which are my own kids); that is not equitable.	2/11/2026 10:43 PM
3671	Great band should be based perhaps on regions however I am not a proponent. I believe this district should be a K-5, 6-8, and 9 to 12 District. delving into the other models, create problems like the need for multiple buildings when we're trying to shut buildings down that are under utilize. This will be a ploy used by some to maintain buildings that we no longer need to use.	2/11/2026 10:08 PM
3672	I need more information, because things weren't too clearly explained tonight.	2/11/2026 9:41 PM
3673	2 grade bands only this will help consolidate resources and buildings	2/11/2026 9:39 PM
3674	I think it makes sense to keep Dunwoody with current grade bands. I'd like to see Kingsley repurposed as a Pre-K 3/4 for the Dunwoody cluster and Vanderlyn used to expand the DHS facility. I like the idea of Kittredge as a stand alone 4-8 to give Chamblee more capacity, but I'm worried about placement being far from most of the kids who attend.	2/11/2026 9:29 PM
3675	I am open to the grade band scenarios discussion but need more information on how buildings would be laid out to support any changes.	2/11/2026 8:25 PM
3676	I do not agree with the Grade Band Scenario. I think the bridge that middle school brings between elementary and high school is necessary and very important.	2/11/2026 8:23 PM
3677	Pk-2, and configure the rest because they are testing grades.	2/11/2026 8:20 PM
3678	The grade band scenarios you provided were informative and the way that you explained them I thought was excellent as well. Each cluster should have a different grade band based on need! As an example, the six through 12 grade band scenario works really well for fine arts and AP and IB and CTAE and stem related courses and programs.	2/11/2026 8:17 PM
3679	I would keep traditional grade bands with the exception of magnet schools and programs.	2/11/2026 8:16 PM
3680	I would need to see the grouping in person to wrap my mind around it.	2/11/2026 8:15 PM
3681	Traditional for Ashford Park area to accommodate varies stages for kids	2/11/2026 8:14 PM
3682	I worry about exposing sixth graders to seniors. There are too many fights.	2/11/2026 8:13 PM
3683	Thinking through the benefits and challenges of each scenario, I'm in favor of the traditional approach, particularly for the middle school grades. However, K-8 schools may work for clusters that have smaller enrollment sizes.	2/11/2026 8:05 PM
3684	As a south county resident I do think the Pk-3, 4-5 band scenario is preferable because we know those early years for reading are critical. I'm ok with 6-8, 9-12 for the rest of the county.	2/11/2026 8:05 PM
3685	I do think K-8 would make sense for the Cross Keys Cluster. I have a hard time envisioning different grade bands for other clusters. Some clusters could benefit from having a preK-3 to bolster literacy.	2/11/2026 8:04 PM
3686	I am in favor of the PK3-PK-4 and or PK-2 and 4/5 I'm not sure I'm in favor of K-8 yet.	2/11/2026 8:03 PM
3687	I believe in high traffic areas (Druid Hills & Cross Keys) there would be a benefit to having a different grade band.	2/11/2026 7:58 PM
3688	I'm curious about Cross Keys possibility of K-8. Is that to consolidate English Language Learner resources? To help build up the community or to segregate a largely immigrant community?	2/11/2026 7:56 PM
3689	I am a fan of any grand banding scenarios that get rid of seperated "middle schools." Middle	2/11/2026 7:50 PM

	school is a tough age/phase of life, for the kids and teachers dealing with them. And I am more for middle school going UP into high school vs. down into elementary school. Also, regarding grade bands and the various options... I'd think about parents with multiple kids and the more you have these schools with limited grades, you've got parents who have kids at 3 different schools in one year vs. just traveling to 1 or 2 schools. I just think having like 4 different schools for parents with kids of different ages to go to feels untenable.. and kids take time to adjust to new schools/buidlings too.. so kids being in a building for just 2 years feels not ideal for that reason, from the kids and paretns perspective.	
3690	I prefer clustering the grade levels into smaller segments.	2/11/2026 7:34 PM
3691	I prefer the traditional grade bands.	2/11/2026 7:28 PM

Q6 Do you believe that each cluster needs to have the same grade band?

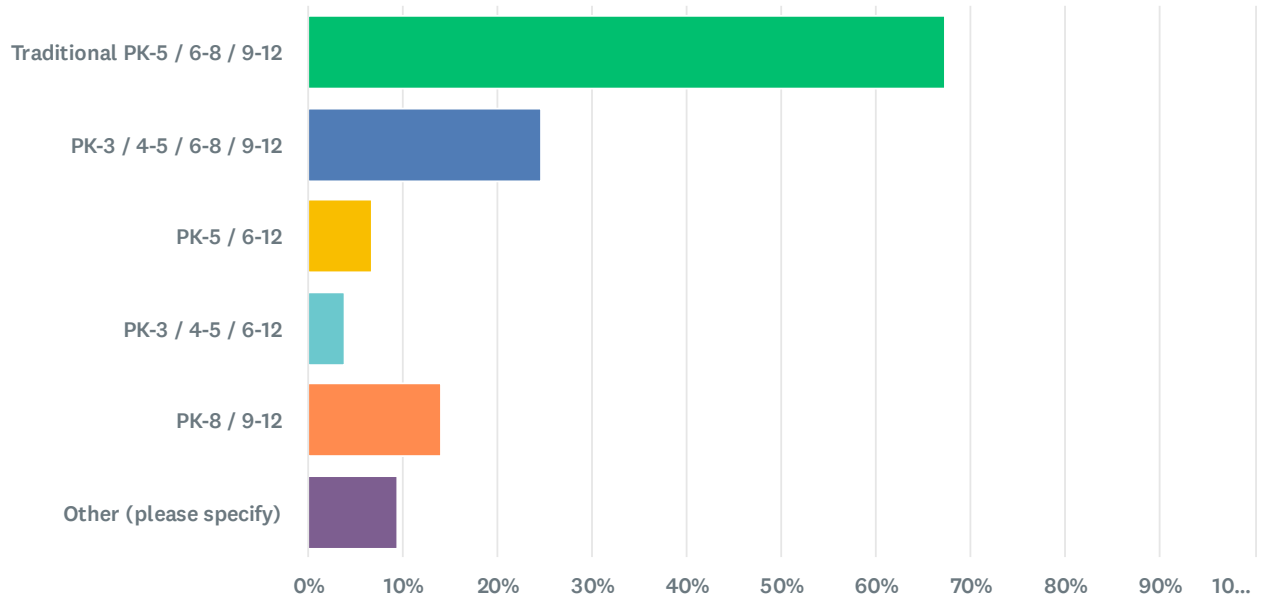
Answered: 5,074 Skipped: 3,930



Answer Choices	Percentage	Responses
Yes, they all need to be the same.	38.94%	1976
No, they can be different based on needs or preference.	61.06%	3098
Total		**5074**

Q7 Which of the following grade bands do you think your cluster could most benefit from?

Answered: 5,227 Skipped: 3,777



Answer Choices	Percentage	Responses
Traditional PK-5 / 6-8 / 9-12	67.34%	3520
PK-3 / 4-5 / 6-8 / 9-12	24.58%	1285
PK-5 / 6-12	6.81%	356
PK-3 / 4-5 / 6-12	3.79%	198
PK-8 / 9-12	14.00%	732
Other (please specify) Show responses	9.47%	495
Total		**6586**

#	OTHER (PLEASE SPECIFY)	DATE
1	PK-3 / 4-6 / 7-8 / 9-12	3/9/2026 10:54 AM
2	PK 3-7, 8-12	3/9/2026 9:39 AM
3	Can’t answer in a vacuum. Depends on programming and size. Kittredge 4-6 model works because small size and nature of program. But might not work if it is the size of Chamblee High and not a theme or magnet	3/9/2026 12:31 AM
4	Pk-7th/8-12	3/9/2026 12:00 AM
5	PK-6/7-8/9-12	3/8/2026 11:52 PM
6	Pk-2, 3-5, 6-8, 9-12	3/8/2026 11:50 PM
7	PK-7/8-12	3/8/2026 11:49 PM
8	PK-6 / 7-9 /10-12	3/8/2026 11:44 PM
9	PK-6, 7-12	3/8/2026 11:38 PM
10	PK-3/ 4-8/ 9-12	3/8/2026 11:30 PM
11	PK-6 / 7-8 / 9-12	3/8/2026 11:30 PM
12	PK-3 / 4-8 / 9-12	3/8/2026 11:18 PM
13	There is not enough information available	3/8/2026 11:02 PM
14	The banding should align with stages of development	3/8/2026 10:16 PM
15	No. Gradey bands should reflect local enrollment trends and utilization levels rather than a uniform district-wide model.	3/8/2026 9:59 PM
16	Not sure. Like idea of pk-8	3/8/2026 9:47 PM
17	Pk-7 made sense when they built the schools in our neighborhood.	3/8/2026 9:40 PM
18	Pk-6th, 7 & 8, 9-12	3/8/2026 9:26 PM
19	N/A	3/8/2026 9:23 PM
20	I would take out the middle school, and go back to PK-8 and then 9-12.	3/8/2026 9:22 PM
21	PK-7/8-12	3/8/2026 9:18 PM
22	PK-6 / 7-9 / 10 - 12	3/8/2026 8:49 PM
23	I like our current grade band structure but I am open to discussions around change as this project progresses. I would need to understand why a change would benefit us.	3/8/2026 8:48 PM
24	PK-2,3-5 in adjoining buildings,6-8,9-12	3/8/2026 8:43 PM
25	One grade band scenario not mentioned is PK (early learning center) / K-6 / 7-8 / 9-12. This was used in the area we grew up in and I wondered if this is ever used anymore. More of a question than a suggestion - but something to share. Specific to my cluster, it is too early for me to know which would benefit us the most. We need more information about the boundaries, programs and expansions before I can answer this question.	3/8/2026 8:02 PM
26	PK-3, 4-8, 9-12	3/8/2026 7:45 PM
27	Pk- K / 1st - 8th / 9th-12th	3/8/2026 7:24 PM
28	Pk-6/7-8/9-12	3/8/2026 7:22 PM
29	PK-6/7-8-9/10-12	3/8/2026 7:16 PM
30	We need community schools, not mega schools.	3/8/2026 7:13 PM
31	Unknown.	3/8/2026 7:07 PM
32	PK - 6/ 7-9/ 10-12	3/8/2026 6:52 PM

33	second choice would be traditional pk-5, 6-8, 9-12	3/8/2026 6:49 PM
34	PK-7/ 8-12	3/8/2026 6:37 PM
35	PK-6, 7-8, 9-12	3/8/2026 5:12 PM
36	Open to ideas as long as the schools and attendance lines in the cluster remain the same. (Perhaps consolidating one or two elementary schools, but keeping the Lakeside cluster together.)	3/8/2026 5:10 PM
37	PK-2 / 3-5 / 6-8 / 9-12	3/8/2026 4:39 PM
38	Separate PK campuses	3/8/2026 4:14 PM
39	No tengo ningún grupo todo son buenos	3/8/2026 4:12 PM
40	pre-k-6	3/8/2026 4:02 PM
41	PK-7 and 8-12	3/8/2026 3:53 PM
42	A rigid, district-wide grade band is often less effective than a flexible, cluster-based approach. While uniformity can simplify administrative tasks like busing and curriculum planning, it frequently ignores the physical and demographic realities of specific neighborhoods. Each cluster has a unique "ecosystem"—varying in building sizes, population density, and community needs—that a one-size-fits-all model fails to address. As we discussed with Ashford Park, a K-8 model might be a great theoretical fit, but the physical footprint of the school simply cannot accommodate it without a massive, multi-story overhaul. Conversely, a different cluster might have a vacant middle school building nearby that makes a 6-12 or K-8 transition seamless. Forcing every cluster into the same band often leads to overcrowding in some areas and underutilized space in others. Some clusters, like Chamblee and Brookhaven, are seeing rapid residential growth, while others may be seeing a decline in student-age populations. A cluster with high density may need to stick to a traditional PK-5/6-8/9-12 split to manage volume, whereas a smaller cluster might find that a K-8 model helps keep a community school open that would otherwise be consolidated. Clusters often develop their own "identities"—some might focus on STEAM, while others focus on Dual Language Immersion (DLI) or IB programs. Grade bands that are tailored to these programs can enhance the educational outcomes. For example, a K-8 band might better support a continuous DLI track, while a traditional split might be better for a cluster focused on a high-intensity high school vocational program. Parents in Brookhaven often value the "neighborhood school" feel of a PK-5 environment. Imposing a 4-5 "academy" or a K-8 configuration just for the sake of district-wide symmetry can alienate families and disrupt the local support systems (like the PTA and "Room Moms") that make schools like Ashford Park successful.	3/8/2026 3:28 PM
43	Reject this proposal	3/8/2026 3:17 PM
44	Pk-7/8-12	3/8/2026 3:02 PM
45	PK-7/ 8-12	3/8/2026 2:48 PM
46	Depends on how programs will be considered/ are already decided by district.	3/8/2026 2:43 PM
47	None	3/8/2026 2:27 PM
48	Either the one above, or the traditional model. It does not make sense to me to put kids in middle school alongside high schoolers. They are just at hugely different developmental stages. Makes sense to keep middle school and high school smaller and more specialized, offering different levels of classes depending on needs.	3/8/2026 2:27 PM
49	PK3-PK4 / K-5 / 6-8 / 9-12 if space is needed to bring elementary schools up to capacity, PK4 can be served at early childhood centers.	3/8/2026 1:56 PM
50	10-12/7-9/K-6	3/8/2026 1:09 PM
51	4-6, 7-12	3/8/2026 12:56 PM
52	Don’t know	3/8/2026 12:53 PM
53	PK-K, 1-6, 7-8, 9-12	3/8/2026 12:00 PM

129	Pk-7/ 8-12	3/6/2026 12:11 PM
130	I couldn't understand what cluster Clarkston would be in. I also don't know why this matters. By the time someone in PK gets to high school, you will likely have changed it again	3/6/2026 11:56 AM
131	As is	3/6/2026 11:39 AM
132	see suggestions in previous comments	3/6/2026 11:20 AM
133	Pre-K - 6	3/6/2026 11:13 AM
134	PK-6 / 7-12	3/6/2026 11:00 AM
135	I think the plans proposed are horrible	3/6/2026 10:55 AM
136	I can’t answer	3/6/2026 10:52 AM
137	None	3/6/2026 10:36 AM
138	Pk-6/ 7-9/10-12	3/6/2026 10:30 AM
139	Kittredge could be 4-8, I think that would work well as long as it fed into a high school with strong academic opportunities.	3/6/2026 10:29 AM
140	PK-3 / 4-7/ 8-12 or PK-7/8-12	3/6/2026 9:51 AM
141	Not sure	3/6/2026 9:48 AM
142	Evansdale should be PK through 6	3/6/2026 9:47 AM
143	None	3/6/2026 9:37 AM
144	PK-3 - 2, 3 - 5 or 6, 7-8 or 7 - 9, 9 -12 or 10 - 12	3/6/2026 8:45 AM
145	No expertise, will not answer	3/6/2026 8:32 AM
146	Pk-3, 4-6, 7-9, 10-12	3/6/2026 8:24 AM
147	PK-3 / 4-7 / 8-12 or PK-3 / 4-6 / 7-9 / 10-12	3/6/2026 8:08 AM
148	The Japanese and other Asian countries also benefit from the 1-6, 7-9, 10-12 model	3/5/2026 11:14 PM
149	PK-6/ 7-12	3/5/2026 11:13 PM
150	Consider separate Pre-K schools so elementary would be K-5	3/5/2026 10:43 PM
151	PK-7/8-12	3/5/2026 9:52 PM
152	PK-6 / 7-12	3/5/2026 9:26 PM
153	PK-6 / 7-12	3/5/2026 9:15 PM
154	PK-3, 4-6, 7-9, 10-12	3/5/2026 9:09 PM
155	All of these suck,frankly. Again, first day on earth?	3/5/2026 9:06 PM
156	Pk-6, 7-8, 9-12	3/5/2026 8:42 PM
157	I oppose any change	3/5/2026 8:30 PM
158	Cannot be established until a real, independent consulting firm is engaged, not HPM!	3/5/2026 8:11 PM
159	Na	3/5/2026 7:42 PM
160	PK-3, 4-6, 7-9, 10-12	3/5/2026 7:22 PM
161	PK-3, 4-6, 7-8, 9-12	3/5/2026 6:53 PM

162	Pk-6, 7-9, 10-12	3/5/2026 6:48 PM
163	N/A	3/5/2026 6:44 PM
164	K-6/7-9/10-12	3/5/2026 6:31 PM
165	It doesn’t matter!	3/5/2026 5:43 PM
166	Pk-6/7-8/9-12	3/5/2026 5:36 PM
167	Pk-4, 5-7, 8-12	3/5/2026 5:33 PM
168	I was in dekalb when it went k-7, 8-12 and I thought that worked fine as well	3/5/2026 5:30 PM
169	PK-3 / 4-6 / 7-9/ 10-12	3/5/2026 5:19 PM
170	PK - 6 / 7-9 / 10-12	3/5/2026 5:12 PM
171	K-6. 7-12	3/5/2026 5:05 PM
172	Anything that works to prevent OGE from closing	3/5/2026 5:03 PM
173	I think the bands should be tailored to the individual areas or cluster schools and the facilities available.	3/5/2026 5:01 PM
174	I would be most interested in what the data say are most beneficial bans for children's education	3/5/2026 4:46 PM
175	PK-6th grade or 4-6th grade	3/5/2026 3:23 PM
176	K-6/7-8/9-12	3/5/2026 3:09 PM
177	P3-2, 3-7, 8-12	3/5/2026 2:45 PM
178	PK-2, 3-5, 6-8,9-12	3/5/2026 2:20 PM
179	(P-4) (5-8) (9-12) might be something to consider.	3/5/2026 2:19 PM
180	I don't understand this question.	3/5/2026 1:59 PM
181	PK-2, 3-5, 6-8 and 9-12	3/5/2026 1:54 PM
182	NONE	3/5/2026 1:43 PM
183	If not all the same across the county, fear creation of an administrative and student nightmare if transferring schools for whatever reason.	3/5/2026 1:15 PM
184	PK-6/ 7-8 /9-12	3/5/2026 1:02 PM
185	combining too many grades is a terrible idea	3/5/2026 12:58 PM
186	I think it can depend on the needs of the programs.	3/5/2026 12:44 PM
187	PK-1/2-5/6-8/9-12	3/5/2026 12:17 PM
188	Please see comment #5 (PK-2, 3-5, 6-8, 9-12	3/5/2026 12:07 PM
189	Reconsider keeping eleven year olds (6th grade) in the lower bands.	3/5/2026 11:53 AM
190	Again I would like to see PK-6/7-12 as an option	3/5/2026 11:21 AM
191	undecided	3/5/2026 11:12 AM
192	PK-3, 4-8, 9-12	3/5/2026 10:48 AM
193	needs detail study by upper school management...they should know best.	3/5/2026 10:24 AM
194	PK-5 / 6-7 / 8 / 9-12	3/5/2026 10:05 AM
195	It depends on the needs of the area.	3/5/2026 9:54 AM
196	PK-6; 7&8; 9-12. This is I think optimal given child development. However bands could be adjusted to help address utilization concerns.	3/5/2026 9:53 AM
197	PK - 6; 7-12	3/5/2026 9:45 AM

198	Back home, we had PK&K centers to transition students to school life better. It kept 5th/6th graders from being on the same bus as PK/K students and preventing bullying situations.	3/5/2026 8:32 AM
199	Relating to grade bands above, expanding Druid Hills MS to be 6-12 could help with future Lakeside and Did Hills HS utilization percentages	3/5/2026 8:24 AM
200	PK-3, 4-7, 8-12, possibly	3/5/2026 8:24 AM
201	Prek3+Prek4+K-5th / 6-8 / 9-12	3/5/2026 7:27 AM
202	PK-2, 3-5, 6-8, 9-12	3/5/2026 6:53 AM
203	PK-6 / 7-8 / 9-12	3/5/2026 6:52 AM
204	None	3/5/2026 6:16 AM
205	PK-7 / 8-12	3/5/2026 5:20 AM
206	Pk-3, 4-6, 7-9, 10-12	3/5/2026 5:09 AM
207	All	3/5/2026 4:25 AM
208	PK-7 / 8-12	3/5/2026 2:22 AM
209	Traditional old school DeKalb K-7 / 8-12	3/5/2026 12:52 AM
210	Consider pk-7/ 8-12	3/4/2026 11:55 PM
211	pk-6th, 7-9th 10-12th	3/4/2026 11:18 PM
212	K-7 models solve 'empty seat' gaps by keeping 6th-7th graders in nurturing environments, addressing middle school safety concerns. Flexibility allows clusters to leverage local strengths like Midvale, keeping DeKalb competitive for families and the housing market.	3/4/2026 11:11 PM
213	PK-6, 7-8, 9-12	3/4/2026 10:38 PM
214	Pk-5, 6-8,9-12	3/4/2026 10:31 PM
215	I honestly do not think it matters to have a standard of grade bands - what matters is what makes sense to use the surrounding buildings in the best way. If that means each cluster has a different formation, than so be it.	3/4/2026 10:21 PM
216	(Pk-3/4-6)/7-9/10-12	3/4/2026 10:08 PM
217	I think it depends on the needs of the community. My community only has K-5 and middle and high school are in an entirely different neighborhood. Of a neighborhood has sufficient need, why wouldn't that neighborhood have its own resources?	3/4/2026 9:22 PM
218	PK-3, 4-8, 9-12	3/4/2026 9:18 PM
219	While I am most in favor of the traditional model I can see merit in the PK-3/4-5/6-8 and 9/12. The problem with that model is that you do not typically get parent buy in. They are only at one school for 3 years on average and they are not invested. With the traditional model you have much greater parent support.	3/4/2026 9:12 PM
220	Asi es	3/4/2026 8:42 PM
221	PK-6 / 7-8 / 9-12	3/4/2026 8:38 PM
222	I think the traditional structure but the standalone PK is great	3/4/2026 8:34 PM
223	Pk-3, 4-7, 8-12	3/4/2026 7:49 PM
224	PK-3/4-6/7-12	3/4/2026 7:41 PM
225	Not sure. Changing grade bands can have unpredictable results and may only exacerbate existing problems.	3/4/2026 6:47 PM
226	PK-7 / 8-12	3/4/2026 6:31 PM
227	PK - 6, 7-8, 9-12	3/4/2026 6:14 PM
228	None	3/4/2026 6:10 PM

229	Non of the above	3/4/2026 6:05 PM
230	Pk -6 /7-8/ 9-12	3/4/2026 5:26 PM
231	Prek-3 /4-6 / 7-8 / 9-12	3/4/2026 5:18 PM
232	This school has only PK-5	3/4/2026 5:14 PM
233	no change	3/4/2026 4:54 PM
234	K thru 8th grade	3/4/2026 4:53 PM
235	Kk	3/4/2026 4:49 PM
236	A model which addresses the commute to Henderson MS would be beneficial.	3/4/2026 4:42 PM
237	Is there a case for or conditions that bring K-7 and 8-12 school footprints back into the county?	3/4/2026 4:40 PM
238	smaller schools with more attention in the classroom has benefit, and it's not one size fits all per cluster. Dekalb is too big to operate as such.	3/4/2026 4:34 PM
239	PK-7/ 8-12	3/4/2026 4:30 PM
240	PK-3, 4-8, 9-12	3/4/2026 4:14 PM
241	PK-1, 2-5, 6-8, 9-12	3/4/2026 4:09 PM
242	pk-3 / 4-6 / 7-12 (4-6 works very well at KMS)	3/4/2026 4:05 PM
243	Oak Grove elementary school should remain as it is, not part of a cluster.	3/4/2026 3:53 PM
244	N/A	3/4/2026 3:33 PM
245	PK, 1st - 5th (Elementary school), 6-9 (Junior high school), 10 - 12 High school.	3/4/2026 3:33 PM
246	PK-4/5-8/9-12	3/4/2026 3:32 PM
247	Please do not close oak grove elementary school	3/4/2026 3:22 PM
248	No. Each cluster should have flexibility based on its enrollment, facility capacity, geography, and community needs. Different areas of the district face different challenges. Requiring every cluster to follow the exact same grade band model may limit the district’s ability to develop solutions that work best locally. Allowing some clusters to remain PK–5 while others explore PK–3/4–5 or PK–8 options could provide more creative solutions that preserve community schools and reduce unnecessary closures. A flexible approach would allow the district to better balance efficiency, programming, and community needs.	3/4/2026 3:22 PM
249	Pre-3, 4-6, 7-8 and 9-12	3/4/2026 3:15 PM
250	pk-7, and 8-12 is a viable option as well 8th graders are closer to high schoolers than elementary	3/4/2026 3:14 PM
251	Do not close Oak Grove Elementary	3/4/2026 3:06 PM
252	Magnet schools should keep their current grade bands.	3/4/2026 3:02 PM
253	NA	3/4/2026 3:00 PM
254	A flexible format that provides additional options for students—specifically an Open Campus model and exploration of a 4-day school week to improve engagement, attendance consistency, and credit completion for students balancing school with work, caregiving, or other barriers.	3/4/2026 2:59 PM
255	PK- K / 1-5 / 6-8/ 9-12	3/4/2026 2:50 PM
256	prek-3, 4-6, 7-8 and 9-12	3/4/2026 2:48 PM
257	k-5	3/4/2026 2:42 PM
258	A non-traditional open campus model with flexibility for different students.	3/4/2026 2:37 PM
259	As stated above	3/4/2026 2:20 PM
260	PK-4/5-6/7-9/10-12	3/4/2026 2:13 PM

261	local public or privatize pk and K. Public 1-5 6-8 and 9-12	3/4/2026 1:57 PM
262	No preference.	3/4/2026 1:52 PM
263	PK - 2, 3-5, 6-8, 9-12	3/4/2026 1:43 PM
264	When I was a DCSD student in the 80's/90's (graduated Henderson High School class of 1995), K-7 & 8-12 made sense and was a great experience. My vote is a return to that scenario. Middle school structure is a nightmare.	3/4/2026 1:39 PM
265	P-7 in elementary, and 8-12 in high school has worked in the past.	3/4/2026 12:01 PM
266	Pk-12	3/4/2026 11:45 AM
267	PK-3, 4-6, 7-8, 9-12	3/4/2026 11:21 AM
268	or PK-7 and 8-12 (former pattern)	3/4/2026 11:08 AM
269	PK-3/4-6/7-9/10-12	3/4/2026 10:32 AM
270	PK-5	3/4/2026 10:26 AM
271	Pre-K-2; 3-6; 7-8; 9-12	3/4/2026 10:08 AM
272	I think DCPS has enough problems within introducing another "moving part". This sounds like the recommendation of an expensive consultant more interested in their fees than improving the quality of teaching.	3/4/2026 10:01 AM
273	Although some of these options may be better for students, working parents need to be considered. Getting your kids to possibly 4 different schools and picking them up on time, could be an impossible task for some people. Even if one scenario would be better for children, which should be the first priority, if parents can't get the children to and from those places, stress at home and absenteeism could rise. A solution could be to allow siblings to wait at the earlier starting school for a bus ride to their school, that causes new expenses in transportation and staff and responsibility for these students	3/4/2026 9:54 AM
274	Do not change, alter, close or consolidate Oak Grove elementary school	3/4/2026 9:45 AM
275	I listed above. PreK-2nd; 3rd-6th; 7th-9th; 10th-12th	3/4/2026 9:27 AM
276	Pk-6 / 7-8 / 9-12	3/4/2026 8:53 AM
277	Children with disabilities do not get enough attention.	3/4/2026 8:30 AM
278	There is no known reason to continue upheaval in an unstable county.	3/4/2026 8:19 AM
279	PK-7 / 8-12	3/4/2026 8:09 AM
280	no of the above	3/4/2026 7:56 AM
281	Na	3/4/2026 6:00 AM
282	PK-3, 4-8, 9-12.	3/3/2026 11:12 PM
283	dont change anything- keep it as it si	3/3/2026 5:02 PM
284	See above	3/3/2026 1:01 PM
285	Pk-k/1-5/6-9/10-12	3/3/2026 12:44 PM
286	Pk-4, 5-6, 7-8, 9-12	3/3/2026 12:12 PM
287	Have Robert Shaw stay opened by adding Prek-3 year olds and extending the grade levels to 8th grade.	3/3/2026 11:34 AM
288	no strong preference	3/3/2026 10:52 AM
289	Pk-6th/ 7-8/ 9-12	3/3/2026 9:28 AM
290	See above! Definitely NO to 6 being with 12!	3/2/2026 7:58 PM
291	Autistic children and the moderate intellectual delayed students	3/2/2026 7:22 PM
292	PK-6, 7-9, 10-12	3/2/2026 6:13 PM

293	PK-4, 5-6, 7-8, 9, 12	3/2/2026 3:41 PM
294	This change will depend on schools opening times.	3/2/2026 3:21 PM
295	PK-5; 6-9; 10-12	3/2/2026 7:07 AM
296	PK-2 / 3-6 / 7-8 / 9-12 or PK-3 / 4- 6/7-8/9-12	3/2/2026 5:20 AM
297	4 bands ok too	2/28/2026 3:40 PM
298	Again i think its based on current numbers for all of the district. If you have less high schools students enrolled do to drop outs or parents choosing other school districts or private schools then thats one thing you have to think about for future but if you have again more -6-8 then make the adjustments accordingly that will maximize the learning opportunities for the students to ensure right programs(academic/social, supportive), right number of qualifed teachers and that transportation isnt an issue. if you stop using a building for a current puprose make sure you balance what future needs are or what it could be used to provide the right support for community needs to support students,	2/27/2026 3:36 PM
299	The grade band should be based on the capacity/size of the school. If Kingsley can accommodate more students, maybe consider adding a grade level and reduce the amount of students moving to Peachtree Middle? But, you HAVE TO FIX THE HVAC SYSTEM FIRST!!!!	2/27/2026 11:13 AM
300	It feels unwise to change the grade banding. Putting 4 year olds with 14 year olds feels foolish. And putting 12 year olds with 18 year olds is also unwise. Leave it as traditional.	2/27/2026 10:35 AM
301	PK-6/7-8/9-12	2/27/2026 6:50 AM
302	All options shown are reasonable and viable	2/26/2026 9:55 PM
303	There is some research suggesting elementary until 8th grade works well	2/26/2026 8:24 PM
304	PK-4/ 5-7/8-9/10-12	2/26/2026 6:58 PM
305	Pk-5; 6-9; 10-12	2/26/2026 6:38 PM
306	PK-7 / 8-12	2/26/2026 6:32 PM
307	PK-K/1-6/7-8/9-12	2/26/2026 5:42 PM
308	PK-6 / 7-8 / 9-12	2/26/2026 4:01 PM
309	(as described above) pk-3 / 4-7 / 8-12	2/26/2026 3:40 PM
310	not sure which is evidence-based	2/26/2026 3:35 PM
311	PK-2 / 3-5 / 6-8 / 9-12	2/26/2026 3:32 PM
312	Pk-6, 7-9, 10-12	2/26/2026 2:58 PM
313	K-6 / 6-7 / 9-12 with 9th grade academy	2/26/2026 2:42 PM
314	I am also in favor of a k-6 / 7-12	2/26/2026 2:15 PM
315	P/K-12	2/26/2026 12:31 PM
316	PK-6 / 7-12	2/26/2026 10:38 AM
317	This model reduces one major transition point, allows stronger academic continuity, and may better utilize under-enrolled high school facilities while maintaining high school culture and programming.	2/26/2026 7:02 AM
318	none	2/25/2026 6:54 PM
319	PK / K-6 / 7-9 / 10-12	2/25/2026 5:49 PM
320	Don’t know	2/25/2026 10:06 AM
321	nun	2/25/2026 10:06 AM
322	Pk-7; 8-12	2/25/2026 8:38 AM
323	Neither	2/25/2026 8:02 AM

324	13th grade	2/24/2026 11:21 PM
325	Prek-3/4-6/7-8/9-12	2/24/2026 10:21 PM
326	PK-7 / 8-12	2/24/2026 7:23 PM
327	Prek-7/ 8-12	2/24/2026 6:31 PM
328	High school needs to be separate from lower grades	2/24/2026 4:46 PM
329	You could do the Pk-5/ 6-12 if you were able to keep the 6-8 group really separate from the 9-12	2/24/2026 4:07 PM
330	Pk-2, 3-5, 6-12	2/24/2026 4:01 PM
331	PK-6/7-12	2/24/2026 3:44 PM
332	PK-K, 1-5, 6-8, 9-12 or 9-10 and 11-12	2/24/2026 12:46 PM
333	I would like to see more Early Childhood Centers. I think PK-3 schools and 4-5 (or 4-6) schools would be a good idea. I'd also like to see 8th grade back in high school. Too often, 9th graders struggle adapting to high school, and they fail their classes. Back in my day (because I'm old enough to say that), 8th grade was in high school. The 8th graders struggled the same way the current 9th graders struggled. But the difference is, 8th grade doesn't go on your transcript. Most students were able to recalibrate and begin succeeding in 9th grade when it actually counts. I don't know if that's a change the district is allowed to make, but I say, bring back Subbies!	2/24/2026 11:32 AM
334	Evansdale could include 6th grade also	2/24/2026 11:15 AM
335	PreK-7, 8-12	2/24/2026 7:54 AM
336	Pk-5/6-8/9-12	2/23/2026 10:32 PM
337	PK-4, 5-8, 9-12	2/23/2026 10:06 PM
338	Either of these are way more reasonable than 6-12	2/23/2026 7:08 PM
339	PK-2/3-5/6-8/9-12	2/23/2026 6:31 PM
340	PK-7 and 8-12 (grades 8-9 in one wing/building, and 10-12 in another).	2/23/2026 2:08 PM
341	PreK-6/7-8/9-12	2/23/2026 1:25 PM
342	PK-7th / 8-12th	2/23/2026 12:24 PM

367	preferably PK-2	2/18/2026 4:41 PM
368	Me quedo con lo tradicional para no estresar los niños desde los 3	2/18/2026 4:33 PM
369	PK- 2/ 3- 6/ 7-12	2/18/2026 1:15 PM
370	PK-6 / 8-12 OR PK - 4 / 5 - 8 / 9 - 12	2/18/2026 12:58 PM
371	PK-4; 5-6, 7-8, 9-12	2/18/2026 11:17 AM
372	PK-6 / 7-12	2/18/2026 8:43 AM
373	Traditional Middle school is such a tough transitional range. I like the idea of consolidation into 2 bands but would consider opportunities to shift 7th and/or 8th grade up. Ie. pk-6,7-12 or pk-7,8-12. 6th grade (and possibly 7th) feels young to be grouped with high school	2/18/2026 12:10 AM
374	PK-6 / 7-8 / 9-12 works pretty well for the magnet program.	2/17/2026 11:32 PM
375	Pk - 6; 7-12	2/17/2026 5:27 PM
376	Some time ago, Oak Grove was also a middle school. Subsequently, kids went to Lakeside High School.	2/17/2026 4:50 PM
377	PK-4 / 5-8 / 9-12	2/16/2026 5:11 PM
378	Unsure	2/16/2026 4:47 PM
379	PK-3 4-7 8-12	2/16/2026 2:34 PM
380	PK-K / 1-3 / 4-6 / 7-9 / 10-12	2/16/2026 1:57 PM
381	prek-2, 3-5, 6-8, 9-12	2/16/2026 1:16 PM
382	PK-2/4-5/6-8/9-12	2/16/2026 11:36 AM
383	None	2/16/2026 9:30 AM
384	ALL , this is the problem with Dekalb. Everyone needs to learn.	2/16/2026 9:28 AM
385	PK-2. 3-5, 6-8, 9-12	2/16/2026 9:22 AM
386	We need more options for Age 3-PreK. Because there are too few options and it forces parents to go to private. If we can get them early, it is a higher likelihood they will remain. We especially need to increase seats in Theme schools.	2/16/2026 8:46 AM
387	Yes and no. Some clusters require more difficult support than others. If you concentrate on what is fair rather than merely what is equal, the children can achieve better results, leading to a more conducive learning environment for them and a significantly less stressful one for teachers. I believe the Board of Education that employed Horton should be dismissed immediately. Furthermore, all of Horton's initiatives ought to be paused until a permanent Superintendent is appointed to assess the situation with a fresh perspective and accountability. It is unacceptable to use an interim Superintendent as a scapegoat for yet another major initiative. We must tackle the resources that are being poorly managed in the Central Office. This should alleviate shortages and provide essential resources for more	2/16/2026 8:02 AM

	qualified teachers, paraprofessionals, and support staff. This would make families feel more at ease sending their children to public schools. We need smaller class sizes, a reduced focus on technology and testing, and enhanced instructional rigor with targeted teaching. Technology should enhance learning rather than overshadow it. This current approach is hindering children's creativity and their capacity to think independently. It is vital to prioritize more but smaller bands for Elementary education. Being proactive instead of reactive will greatly assist in ensuring that the bands are streamlined as they advance, but only if learning trends indicate improvement. A good beginning results in a good ending.	
388	PK-5 / 6-9 / 10-12	2/16/2026 7:55 AM
389	As mentioned previously, I don't necessarily see the need for a separate entity for middle school. I think the 6th - 8th grade students could remain in elementary school. However, I do realize the need for more social-emotional support for middle school students.	2/16/2026 7:36 AM
390	pk-5th/ 6th-8/ 9th grade academy/ 10-12 grade high school	2/16/2026 7:10 AM
391	N/A	2/16/2026 1:35 AM
392	Close the ELC location and combine their PreK-3's and 4's with ALL cluster K's into the DLA; 1-6 at McNair MS and 7-12 at the HS. Leave Obama as is.	2/15/2026 10:49 PM

#	RESPONSES	DATE
1	Why can't we revisit shifting areas/zones from the north, southward?	3/9/2026 11:33 AM
2	none	3/9/2026 8:37 AM
3	The assumption that high performing students moved to low performing schools will raise overall success is false. Students performance falls to the lowest common denomination, and it is irresponsible to assume that community success, integrity and accountability, neighborhood cohesion, and even property values will remain if high performing populations are carved up. Let's be creative with our solutions not taken the easiest paths on paper. We parents are ready to tackle challenges like difficult site builds, extra funding, new traffic patterns if it means keeping a thriving community successful now and for future siblings. My own family has a 1st grader, 2 year old, and 6 month old. We're here to stay—-unless this SAP process makes it impossible for our students to regain the strong performance and community for which we invested and plan to continue supporting. Thank you.	3/9/2026 6:38 AM
4	Please be transparent on $. Please be more forthright on what may happen to students, where they might move, and where their assigned upper schools might change.	3/9/2026 6:00 AM
5	N/A	3/9/2026 4:07 AM
6	I'd also like to propose a look at options for gifted and overachieving students which are not currently served well at Dekalb county, It is a shame that these students are left behind and that the programs that serve them are limited (if even available).	3/9/2026 3:36 AM
7	why not provide a list of school names, capacity, and current number of students?	3/9/2026 2:09 AM
8	Yeah I can do better at figuring out how to do this, but do not set these kids up for failure. The future is in your hands all Joseph aside.	3/9/2026 1:17 AM
9	Low income students need the same resources as high income students. This feels like a way to crown poor kids into class rooms while the real resources go into better neighborhoods.	3/9/2026 1:15 AM
10	Dekalb has some of the best schools and programs in the state. Please do not mess those up due to poorly thought out plans.	3/9/2026 12:31 AM
11	How will these shifts impact the services that students with disabilities receive and the employment of teachers and staff?	3/9/2026 12:13 AM
12	Closing these elementary schools and redistricting elementary, middle and high schools will RUIN our property values! We just moved to a new home 1 year ago so our kids to REMAIN at LAKESIDE HIGH SCHOOL. Evandale's French Program is unique to the Lakeside Cluster and it is ridiculous that the county is no longer allowing students that started in this program to continue from Evansdale to Henderson Middle to Lakdeside High School! DCSD should have advanced language programs from K-12! Evansdale has build a strong neighborhood parent ad teacher and community. Volunteers provide strong resources and personnel for French students. Moving the program would destroy this vital comunity. French teachers at Evansdale Elementary, Henderson Middle School and Lakeside High Schools have put down strong roots in our community. Older students mentor younger students. It is imperative to keep this program at Evansdale and within the Lakeside cluster to keep the program strong. And for the current 6-10 kids that have NOT been approved to move from Evansdale to HMS to Lakeside and the county did not provide any information, shame on you. Parents have made decisions on not to move or expand their homes to keep their kids in this Cluster and then DCSD changes the rules after the families have already made commitments and sacrifices. Let them stay!	3/9/2026 12:10 AM
13	I also need someone to explain to me the bias and conflict of our former superintendent who hired this firm before he resigned in disgrace after being federally charged with fraud.	3/9/2026 12:03 AM

14	Each cluster needs to have in depth discussions about what is needed and what fits their clusters needs. Then there needs to be a follow up to consolidate those needs into what aligns within the district protocols.	3/9/2026 12:01 AM
15	Families buy homes in areas where schools are convenient to reach. The neighborhood school concept leads to better friendships and better learning. My children went through Drkalb County schools, and I was so glad they did not have to be in a giant school like some of those in the more north counties of greater Atlanta. Evansdale can accommodate more students by expanding the school footprint because of its large lot size	3/9/2026 12:01 AM
16	I feel that as a parent, I need more information about where students might go in the event of building closures in order to make a more informed decision. I will be standing by to learn more information about the next steps.	3/9/2026 12:00 AM
17	It is beyond disturbing that the person heading up this SAP project is a former employee/associate of Dr. Horten , our former superintendent who is now under indictment and had to resign from his position heading our school district only months ago. She also did not disclose her association with Mr. Horton when she was hired. My understanding is they implemented this scheme in Chicago. My guess is this has not benefited Chicago students and educators, as Dr. Horten came to Dekalb school district from Chicago to evade the crimes he is now under indictment for and which he was suspected of when he was hired and approved by the DSCD board so quickly. I do not feel that the person leading this adventure in disrupting our neighborhood schools that have been established for decades and several generations has any business doing any of it and needs to resign herself. And we are currently represented by a retiring board members so we are not supported adequately at the moment. Finally, I understand that there is now a law in GA where elementary schools that have enrollments of 450 students or more will receive state funding for 7 FTEs vs 2 FTEs for schools with less than 450 students enrolled. I am curious as to whether this is the impetus for the entire SAP scheme we are being presented with. If so, that is quite upsetting.	3/9/2026 12:00 AM
18	Criteria for closing schools should come from educators and educational leaders, with input from the community. The plan needs to address why people are leaving. People are leaving because their kids' needs are not being met. There are not enough resources for children with special needs -- neurodivergent, learning disabilities, sensory issues, mental health issues, gifted learners.	3/8/2026 11:59 PM
19	I think I missed the part where you actually tried to the fix the real problem - declining enrollment? Seriously, what tangible things have you done to address it? As I see it, the absolute and total mismanagement of COVID has propelled us here. And I'm not some MAGA lunatic. But I suppose there's no sense in re-hashing that. That horse was out of the barn a long time ago. But the other huge reason, at least in my area, you lose enrollment is because you've had an underperforming Middle School the entire 16 years I've lived here. The prospects of having to go to Henderson forces parents to look for alternatives to DCSD elementary schools, which affects enrollment there. The reputation is terrible and many parents that DO send their kids to DCSD ele schools go elsewhere for MS. My oldest went to Henderson and her experience was find. Not great, not terrible. But my second kid did have the sought after 'gifted' check box (don't get me started on that). So she would have been in gen pop at Henderson. That's right, parents actively and out in the open compare HMS to a prison. So we sent her to a small, Christian school for MS and then she came back to LHS. Did the same thing for our 3rd kid. That choice was easy. The private MS they were in were attending in person, not the virtual nightmare DCSD created. Put some money, effort, TLC into your middle schools and make them schools we can be proud of and I promise you will get enrollment back. But that's harder that just closing a whole bunch of schools I guess.	3/8/2026 11:59 PM
20	keep oak grove elementary open	3/8/2026 11:57 PM
21	Please consider the French program unique to the Lakeside cluster. This program has built many resources across the community with volunteers, teachers and students. Please don’t let this successful program end. Lastly, please keep Evansdale. It can be renovated and expanded. The area is ideal with traffic flow on 2 sides of the neighborhood. It works! So much potential for Evansdale with more than 10 acres. Plus it sits on Evans Rd with easy access to both Henderson Mill Rd on one end and Chamblee Tucker on the other end. Thanks for you consideration!	3/8/2026 11:57 PM
22	What role will redistricting play a role in consolidation?	3/8/2026 11:57 PM

23	This is a huge mistake. It does not make sense to close elementary schools and create bigger schools for young children outside of their communities and closing schools of excellence. Many families pull their kids out of DCSD at middle school because they are too large and mismanaged. This plan is going to result in erosion of the tax base for DeKalb County and will not address the root cause of low enrollments this seems to be just another example of the districts short- sided mismanagement.	3/8/2026 11:57 PM
24	I would like DCSD to consider repurposing buildings for special programs such as autism units that include programs that support those learns like ABA therapy, sensory rooms, speech therapy, occupational therapy etc	3/8/2026 11:56 PM
25	My oldest 2 daughters are currently in the German Immersion Dual Language program which has been excellent. My oldest is in the gifted program and would be eligible for the Kittredge magnet lottery. If that were the pathway for my oldest but not my youngest two, it is very important they would still all go to Chamblee Middle and High School. I don’t think it is feasible to expect high performing students to bring up the low performing students if rezoned to worse schools. Instead of having some schools that are 7-10 on great schools, this would just even them all out to be mediocre. We moved to this neighborhood in order to have our kids go to Chamblee cluster and do not want to be moved to the Cross Keys cluster, especially since we live 0.3 miles from Ashford Park Elementary. Taking away an excellent school in a part of town that doesn’t have underutilized neighboring schools does not seem like a feasible option. While ideally we could continue with our renovation with an added expansion so that we could stay in current location, I would be open to changing the boundaries to split some of the school population to other schools so that Ashford Park can remain open.	3/8/2026 11:51 PM
26	Reconsider - in fact, reject - the idea of consolidating our schools. Maintain a low student:teacher ratio. Educate the public on your suggestions, ‘scenarios,’ and why it is that we need to consolidate the schools in DCSD. Whatever the symptom you are trying to address, consolidating schools is not a good means to that end. Regroup with the community about this.	3/8/2026 11:51 PM
27	If Ashford Park goes away, we want the community to stay together, the faculty to stay together, and AP kids to remain in the Chamblee cluster.	3/8/2026 11:50 PM
28	We can change what grades each building serves...New grade bands and new grade groupings. Example: Early Learning Center:PK–2 Elementary: 3–5 Middle: 6–8 High: 9–12	3/8/2026 11:50 PM
29	Look into different combinations of what can be done. My children use school choice because the offerings at the neighborhood schools are not in our best interest. Enrollment is low in these schools because we seek better opportunities for our children. Make the schools of the south side have the same opportunities. Bring some equity to the south side. I considered sending my child to Chamblee but didn't apply via school choice because I didn't think I would be able to be actively involved as I would like to be. Why doesn't Cedar Grove have the same opportunities? My child may have to go there next year. I hope that doesn't happen.	3/8/2026 11:49 PM
30	Scenario 1 proposes 27 elementary closures—significantly exceeding the previously discussed range of 4–16. Oak Grove, in particular, is a poor candidate for closure: it already exceeds the 88% utilization target (projected at 96% next year), has seen four years of consistent growth, and remains a top-tier academic performer. Closing high-utilization schools does not solve the district's efficiency issues; it merely redistributes students and forces costly capacity adjustments at neighboring schools like Sagamore Hills and Briarlake. To truly reduce excess capacity, the district should prioritize schools operating below 70% utilization. Before moving forward in this growth corridor, we request clarification on the following: Did enrollment projections account for 2024–2026 employment and residential growth? Were pandemic-era trends over-weighted, potentially distorting post-2023 growth data? What are the projected utilization rates for 2028 and 2030? What is the cost-benefit analysis of maintaining Oak Grove versus the capital required to expand Sagamore Hills and Briarlake? A phased, data-driven approach is essential to ensure we don't eliminate capacity in the very areas where the community is investing most heavily.	3/8/2026 11:45 PM
31	Having different grade bands within the District, would seem to be a problem for consistency for families when it comes to changing residency within the County. Having too many breakouts by grade in also problematic for parents trying to coordinate pickup and drop off, etc.	3/8/2026 11:44 PM
32	Suspend SAP process until the permanent superintendent is elected. Reconsider the guiding principles by understanding what makes each school and community special first.	3/8/2026 11:43 PM

33	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/8/2026 11:42 PM
34	Please offer more time for community stakeholders consider the information you're providing and more educational opportunities to learn about what's being proposed or considered.	3/8/2026 11:41 PM
35	Provide possible responses for questions. Prose is time-consuming and in accessible to all who might want to participate. Provide an 'other' option for individuals who would like to write.	3/8/2026 11:38 PM
36	Oak grove elementary should not be closed. It is one of the best Elementary schools in Dekalb.	3/8/2026 11:36 PM
37	As the district develops the next round of scenarios, it will be important to consider the stability of existing school clusters and the expectations families have built around them. Many families in this area specifically chose to live within the Lakeside Cluster and value the ability for students to progress through elementary, middle, and high school within that community. Maintaining clear and stable cluster pathways helps preserve the sense of continuity that families rely on when choosing where to live. Transportation realities should also be carefully considered. Routes that require traveling across I-85, particularly via Shallowford Road, are already heavily congested and function as a significant traffic bottleneck. For many neighborhoods, this route is not a natural part of the local community pattern and can create longer, more difficult commutes for students and families. As new scenarios are developed, prioritizing neighborhood continuity and practical transportation patterns will help ensure that any changes remain workable for families while maintaining strong, connected school communities.	3/8/2026 11:34 PM
38	.	3/8/2026 11:32 PM
39	Consolidating schools to increase sufficiences and enrollment in school, should not be achieved by sacrificing core programming and student development or extracurricular activities. Be creative and think outside the box to accommodate both high educational standards and student development. Extracurriculars are important in order to develop the whole student, not just academically.	3/8/2026 11:30 PM
40	I understand there is a target school capacity and that larger schools can provide a cost savings and allow for more opportunities for the students. But what are we giving up? Smaller elementary schools (400-600 students) allow for these youngest children to feel like part of a community without getting lost. Staff know the students by name, not just those in their classroom. Students know most of the students in their grade after a couple years but have large enough grades that they can still make new friends and form new social circles. The school is large enough to distribute fluctuating enrollment across several classrooms without overfilling classes and decreasing student and teacher well-being.	3/8/2026 11:30 PM
41	Numbers are low because parents are tired of the behavior problems (lack of accountability and discipline on schools part), lack of support for special needs students, teachers who have become numb to the needs of the students because their needs aren't met, deplorable facilities, a lack of successful programs, a push towards data over project based and hands on learning , horrible communication between schools and parents, and a office administration who would rather close schools down than lift students up through supportive programs, reading programs, a shift in school climate, less testing, and more engaging learning. Closing neighborhood schools isn't the answer. But all these "companies" that are hired never think to survey the students, parents, and teachers to ask how can we support you? What do you need to be successful and happy? And even why are you leaving?	3/8/2026 11:29 PM

42	1) For reasons including those noted in my response to Question #5, I think that it is very important that the high schools do not include students younger than 9th grade. My children are currently 9th graders and one was offered vapes containing illicit substances during the first week of school WHILE WAITING for a bus on campus. My sons are old enough, knowledgeable enough, and physically mature enough to say "no" to their peers, but younger students, in particular, would be even more vulnerable. Do not mix pre-pubescent children with student who are legally considered adults! 2) Traditional PK-5 is preferred because it allows for formation of community, allows for young children to have stability and routine (which they might not have in some home environments), and because these students are generally more uniform in behaviors and exposures. If smaller grade bands are considered for the younger children, it would be useful to hear a synopsis of the literature supporting that and to hear from a local leader with experience with such a model (e.g., Decatur City Schools). 3) What staffing and budget will allow any proposed closures / consolidations? Does DCSD really have the budget to close some schools and expand others? Won't this require more SPLOST funds? I would like less "reimagining" and more grounding in reality. Thanks!	3/8/2026 11:29 PM
43	N/A	3/8/2026 11:26 PM
44	Closing Oak Grove which is already near the utilization targets and redistributing students will have a negative impact on our children, our district, and our community. My family has only been at Oak Grove for this school year as I have a kindergarten and PreK student but I have already experienced many of the reasons that make it a successful school and one that should be used as a model for other schools in the district. I already know my children are being set up for success in their future by attending Oak Grove. Additionally, there are so many families who desire to move to be a part of this school. Closing Oak Grove and combining with another elementary school will not improve outcomes. Research shows that when students from a high performing school and moved to a different school, their academic performance is impacted negatively. Closing Oak Grove would negatively impact not only my family and the fellow families with students but the entire community.	3/8/2026 11:24 PM
45	Please take into consideration the PTA and parent contribution to the schools. Oak Grove Elementary has a strong community of parents and neighbors that pour their hearts, money and souls into this school. These people are doctors and professionals that can afford private schools. Please consider how to keep one of your best schools Oak Grove Elementary open and retain the students from not leaving the district for private schools from the 5th to 6th grade because nobody wants to go to Henderson Middle. These are families that care and invest in their children’s’ schools. Let’s not alienate the families of Oak Grove Elementary and keep this school open.	3/8/2026 11:23 PM
46	NA	3/8/2026 11:20 PM
47	Make sure special ed is offered in area close to where child lives. This will create better friendship opportunities and less busing. Advanced classes close by also.	3/8/2026 11:20 PM
48	I don’t feel like a sixth grader should be in the same building as a ninth or 12th grader I feel like it’s poses a safety issue.	3/8/2026 11:19 PM
49	Future scenarios should carefully consider equity, developmental appropriateness, and the overall impact on communities across the district.	3/8/2026 11:18 PM
50	As the district develops the next round of scenarios, it will be important to consider the stability of existing school clusters and the expectations families have built around them. Many families in this area specifically chose to live within the Lakeside Cluster and value the ability for students to progress through elementary, middle, and high school within that community. Maintaining clear and stable cluster pathways helps preserve the sense of continuity that families rely on when choosing where to live. Transportation realities should also be carefully considered. Routes that require traveling across I-85, particularly via Shallowford Road, are already heavily congested and function as a significant traffic bottleneck. For many neighborhoods, this route is not a natural part of the local community pattern and can create longer, more difficult commutes for students and families. As new scenarios are developed, prioritizing neighborhood continuity and practical transportation patterns will help ensure that any changes remain workable for families while maintaining strong, connected school communities.	3/8/2026 11:18 PM
51	On the next round, let's look at what services each school provides that supports all students in academics and specialized services. Let's also take a look at transportation and how communities will be affected. I would also like to talk about what qulifys the north end schools	3/8/2026 11:18 PM

	to not receive closure proposals at all. What Does the district feel these schools offer that's more beneficial than fully functional schools on the south end of the map.	
52	I understand the 20k seats you have to account for and I'm sure there are changes that are needed. But the way you are going about this, the timing of it all, and speed with which you are expecting to this is infuriating. There needs to be room for information to be provided that is easy for the public to understand, and provide their feedback, and to take that all into account before you rip our Evansdale community apart. A community that supports a full school, diverse populace, dual language program with a lot of land to expand. The fact that you suggest expanding Livsey which is a smaller footprint AND right on (the now 1 LANE)Chamblee Tucker Rd-a major traffic artery- indicates to me that the parameters by which you are assessing this entire situation is extremely flawed. That is one tiny spot with such massive implications - I cant imagine the load of problems with every other data point you have in this first round scenario. That takes 2 seconds to see when you look at a map. What else have you missed ? And this is just an initial plan? You need more time to get the feedback -adjust - ask for feedback again and adjust - to be able to come to a reasonable solution.	3/8/2026 11:14 PM
53	Please consider the impact of "empty buildings" on DeKalb...didn't we spend millions on space of Lavista that is just sitting there. How about sell that building and reinvest it back into our local schools.	3/8/2026 11:13 PM
54	Please provide details on where kids in closed school would go and any boundary changes so we can provide more specific feedback.	3/8/2026 11:08 PM
55	I believe what is best for students is to have fewest possible transitions.	3/8/2026 11:08 PM
56	Closing a highly utilized school like Oak Grove does not actually address the district’s goal of addressing under utilization and only creates infrastructure costs to shuffle around the displaced kids. Therefore Oak Grove should not be closed.	3/8/2026 11:05 PM
57	Continue community discussions and involvement	3/8/2026 11:05 PM
58	I strongly urge you to remove Midvale Elementary from the list of schools recommended for closure and instead build upon and invest in this community school. Strong schools build strong communities. Whether or not a household has children enrolled, we all benefit from a thriving, walkable neighborhood school. Schools serve as anchors — supporting property values, attracting new families, fostering civic engagement, and reinforcing the vibrancy that makes Tucker special. I encourage a comprehensive process that looks to invest in the growth of communities anchored on strong g neighborhood schools to foster increased enrollment, academic achievement, and growth.	3/8/2026 11:05 PM
59	Traditional schools or grade works educational wise.	3/8/2026 11:05 PM
60	If we’re able to see up to date numbers for the bottom line of both the total revenue and costs of each school being considered, along with performance markers, building conditions, and where students live compared to the schools, we can generate a more evolved dialogue to effectively make better decisions, and give better/helpful feedback on the surveys! An interactive map with school clusters highlighted that shows enrollment numbers + future projections, mileage for transportation from each of the ES, MS, and HS, and even allow for users to redraw the lines to see how that shifts numbers by the year would be an invaluable tool for us to look at the facts and defend our choices. By first selling off the empty and unused properties, like the recently acquired Kroger offices on Parklake Drive and the previous Briarcliff HS/Jim Cherry/DSA/Open-Campus next to Adams Stadium, etc., we can begin to recoup that money. Consider relocating the schools housed at the AIC to schoolhouses that may be closer to the communities where the students who attend live, then that will allow for more offices to be at the AIC. Eliminate wasteful spending on things not directly related to the students who are being served. Ensure our superintendent will stay for a decade or more to see this through and avoid having to pay money to complete a contract once removed from the county. I’d like to see DeKalb praised for making the right hard decisions and not as a cautionary tale.	3/8/2026 11:05 PM
61	This is a crazy idea that hurts communities, childhoods and neighborhoods. Mega schools are not the way to educate children. Shame on all of you if you are putting efficiency and money before basic morals!!!	3/8/2026 11:03 PM
62	The whole SAP process needs to be halted. This district is drowning in issues that need to be resolved before something so major is to occur. We also need to make sure that the states	3/8/2026 11:02 PM

	problems are actually valid and explore multiple ways to solve those problems, not just with restricting	
63	Leave the Evansdale cluster alone and fix/expand the facilities. Our enrollment is expected to grow. No company closes down work in areas experiencing/expecting growth.	3/8/2026 11:01 PM
64	• At 10.1 acres, Evansdale's lot size is bigger than neighboring schools recommended for expansion. • Evansdale is unique in that it has a large, separate play field, two playgrounds, and multiple parking lots. Our site can accommodate additions in the back of the school and still have ample play and parking space. • Evansdale is uniquely situated to accommodate increased traffic, as it takes up two sides of a large neighborhood block. • Evansdale's enrollment is projected to increase to over 600 by 2030. Additionally closing neighborhood schools is short sighted. Young families move to the Evansdale/Lakeside cluster specifically for the neighborhood schools. If they close families will move away, further decreasing our school age population.	3/8/2026 10:58 PM
65	Todos tenemos derecho aser iguales	3/8/2026 10:57 PM
66	I understand the goal of this process and that it’s necessary. I urge the district to better understand the reasons why enrollment is so far down and work to improve the conditions that are causing families to withdraw, change to other school districts, home school, or enter private school. The district should be identifying cost reductions across operations. The administration and support is bloated to one of the highest costs per student in the state. There should be significant staff reductions at the county level and additional resources devoted to the individual school level (i.e. less county level admin staff and more in school teachers). It’s also important for the district to be more transparent that the eventual closure/consolidation of buildings will likely mean that most if not all will be permanently closed and/or demolished. The documents reference repurposing or changing to something else, but that defeats the entire point of the exercise, which is to better balance students within buildings in order to save on the costs of keeping underutilized/deficient buildings open.	3/8/2026 10:57 PM
67	Several high performing community schools are on the list of potential closures. Closing these schools would be unfair to the students and parents in these districts. Many families moved to these neighborhoods and paid a premium so they could send their kids to these schools. Ignoring academic performance in Scenario 1 was a mistake that ignores the most important function of a school - to educate children.	3/8/2026 10:56 PM
68	Oak Grove Elementaey currently is already above the district’s utilization goal of 88%, has experienced 4 years of consecutive student increases, and is one of the district’s top performing schools. Closing a school with high utilization is only creating costs of expanding another site to accommodate these displaced students without actually addressing the issue of empty seats that the district says is the focus. If the true objective is to address the utilization issue, then the district should focus on schools with low (below 70%) utilization.	3/8/2026 10:56 PM
69	Evansdale is a little more than 30 students under capacity and projected to have higher enrollment. Evansdale has served as a Foreign language and science specialty school for at least 30 years. The French and Science Magnet program eventually evolved into the French Immersion program that we have today and continues at Henderson Middle and on to Lakeside HS. Closing Evansdale will disrupt the program that has taken years to establish. Evansdale should remain and be expanded. Given the popularity of DLI, consider converting Evansdale to a DLI school similar to GLOBE Academy with more than one type of DLI program, perhaps adding Spanish. Such programs will attract families that would otherwise send their children to private schools. Please focus on building instructional programs that attract families. Our community has choices. Many go to private schools because they do not feel good about DCSD. Let's change the narrative. Then we won't have decreasing enrollment.	3/8/2026 10:51 PM
70	Here’s the last answer: As the district develops the next round of facilities scenarios, I strongly encourage greater transparency around the data and assumptions used to generate the proposals. The community would benefit from clearly seeing the enrollment projections, capacity calculations, transportation modeling, and facility constraints that are driving these recommendations. Without clear and accessible data, it is difficult for families to fully understand or trust the rationale behind major decisions such as school closures or consolidations. I would also encourage the district to evaluate scenarios that prioritize strengthening existing neighborhood schools rather than consolidating them into significantly larger campuses. Schools like Evansdale Elementary School offer advantages that should be carefully weighed in future planning. Evansdale has a large site with room for expansion, existing parking capacity, and better traffic circulation than several nearby schools. These	3/8/2026 10:47 PM

	physical characteristics make it well suited to continue serving as a neighborhood elementary school. In addition, planning should consider the programmatic value of existing offerings, such as the French immersion program at Evansdale that continues into Henderson Middle School. Programs like this attract families to public schools and help stabilize enrollment. Disrupting established program pathways could unintentionally weaken enrollment rather than strengthen it. Finally, I encourage the district to carefully consider the family choice implications of closing neighborhood elementary schools or creating very large consolidated schools. Many families choose to live in this area specifically because of access to a strong local elementary school. If that option disappears or becomes a large “mega-school” further from home, it is very likely that some families will pursue private or alternative schooling options, which could reduce enrollment and undermine the goals of the consolidation effort. For the next round of scenarios, I would urge the district to focus on solutions that maintain strong neighborhood schools, preserve successful program pathways, and make full use of campuses that have the space and infrastructure to grow.	
71	I align with what I saw in the APES survey results - I’m in favor of moving is to John Lewis as that will immediately put the students and staff in better facilities and provide adequate space, and/but with the goal Of remaining in the Chamblee HS cluster	3/8/2026 10:46 PM
72	I strongly urge the district to keep Oak Grove Elementary School open. Oak Grove has a long and proud history of serving our community, providing exceptional support for all students, including those with IEPs or 504 plans, and fostering both academic and social growth. The school’s dedicated, long-tenured staff—including many teachers and the principal with 20–30 years of service—help create a stable, nurturing environment where children can thrive. Families, including multiple generations of my own, have chosen Oak Grove because of its strong programs, supportive teachers, and engaged parent community. The education, experiences, and life-long friends that I had at Oak Grove Elementary School has played an important role in shaping who I am today. Oak Grove provides students with the support, guidance, and opportunities they need to grow, learn, and succeed, helping them become capable, confident, and engaged members of the community. Closing this school would disrupt a thriving learning environment, fragment the community, and remove a model of excellence for the district. Decisions should prioritize schools with true underutilization, rather than closing one that is academically strong, culturally rich, and deeply valued by the community. Oak Grove Elementary should remain open to continue supporting students, families, and the broader Lakeside community.	3/8/2026 10:46 PM
73	Na	3/8/2026 10:45 PM
74	In reviewing Scenario 1, I was surprised by the scale of the proposal. Earlier discussions referenced a possible range of 4–16 elementary school closures, yet Scenario 1 proposes 27. That is a significant increase, and it makes it difficult for communities to understand how the criteria were applied and how schools were selected. Looking specifically at Oak Grove, the data does not appear to align with the stated objective of addressing underutilization. Oak Grove already exceeds the district’s 88% utilization target. The school is currently at about 89% utilization and is projected to reach approximately 96% next year. Enrollment has increased for four consecutive years, indicating a sustained growth trend rather than decline. In addition, Oak Grove ranks in the top tier academically among the schools being reviewed. Closing Oak Grove would also create capacity challenges in nearby schools. Sagamore Hills is already operating at about 91% utilization, and Briarlake is around 73%. If Oak Grove were to close, these schools would need to absorb a significant share of Oak Grove’s 447 students. This raises an important question: does closing a school that is already near or above the utilization target actually reduce excess capacity, or does it simply redistribute students and create new pressures elsewhere? If the primary goal is to address underutilization across the district, it may be more effective to prioritize schools operating well below roughly 70% utilization. In those cases, consolidation can meaningfully improve efficiency without immediately requiring additional expansion at neighboring schools. Several areas would benefit from additional clarification. First, were recent employment expansions and residential development pipelines incorporated into the enrollment projections? This corridor sits next to one of the largest healthcare and research growth areas in Georgia, including major expansion at Emory and Children’s Healthcare of Atlanta. These developments are adding thousands of jobs and typically bring families and population growth to the surrounding communities. Second, it would be helpful to understand how pandemic-era enrollment data from 2020–2022 was used in the projections. Those years created unusual enrollment patterns in many school systems. If those data points were heavily weighted in regression models, they may distort more recent trends since 2023. Third, longer-term projections would provide important context. What are Oak Grove’s projected utilization levels in 2028 and 2030? Based on current trends,	3/8/2026 10:43 PM

	it appears the school may be approaching full utilization within that timeframe. Fourth, a financial comparison would be helpful. What are the relative capital costs of maintaining Oak Grove compared with expanding capacity at Sagamore Hills and Briarlake if Oak Grove were to close? Understanding these cost implications is important when evaluating whether the proposal truly improves efficiency. Beyond the specific data points, many families are also concerned about the process itself. The timeline feels very compressed given the magnitude of the decisions being considered. Communities are being asked to respond to complex scenarios without clear access to the underlying data, assumptions, or modeling criteria. This creates confusion about how decisions are being made and makes it difficult for families to fully engage with the analysis. Transparency and trust are essential in a process like this. When communities cannot clearly see the data, the methodology, or the criteria being used, it becomes harder to maintain confidence in the outcomes. Providing clearer information about the modeling, the assumptions, and the decision framework would help strengthen public trust. Given the level of economic investment and population growth occurring in this corridor, a more phased and data-driven approach may be appropriate. Decisions in areas experiencing growth should be sequenced carefully to avoid eliminating capacity that may soon be needed to support expanding communities. For many families, the concern is not simply about one school. It is about ensuring that long-term planning reflects what is actually happening in our communities and that decisions are made using transparent data, clear criteria, and thoughtful timing.	
75	Keep Oak Grove!	3/8/2026 10:41 PM
76	I am concerned about spending a lot of esplost funds on buildings in the next 3 years that may be closed or consolidated, esp when we already don't have enough funds for eplost projects that have been committed. Before consolidating, I would prefer to see the district decide what models they are WILLING to implement - and IF they are willing to let clusters decide what is best for their area or if they will require every cluster to have the same model. Then DCSD needs to decide which specialty programs the DATA shows are the most successful and will keep (not based on which has the most vocal parents and DCSD chickens out and keeps them). Once these 2 areas are decided, then it makes sense to look at how to accomplish them with which school buildings.	3/8/2026 10:37 PM
77	Please ensure that academics come first. Children in a high performing schools should not be moved to a much lower performing school. Ashford Park ES is an example where this is a fear. If possible, even in a different building, please keep the current group of students, families, and faculty together as this community has worked very hard to support the school and families and has achieved this through collaboration with the district. We ask that the APES community stays together and in the Chamblee highschool cluster.	3/8/2026 10:36 PM
78	I taught middle school for 22 years. It is a needed transition prior to high school. Oak Grove was redistricted to Henderson Middle when my youngest son should have gone to Druid Hills Middle. It was a detriment to his education. Changing the zones again is a disservice to the CHILDREN of this community and to the taxpayers.	3/8/2026 10:34 PM
79	Good evening, As both a teacher and a long-time Brookhaven resident who raised children in this community, I have seen schools from both sides and feel I have a unique perspective on this issue John Robert Lewis Elementary School currently serves an extremely high percentage of ESOL students. In my 2nd grade classroom alone, 19 of 27 students are English learners. These students are hardworking and capable, but they are learning academic content while also learning a new language. That requires significant support, time, and resources. What is concerning is that the demographics of the school do not fully reflect the diversity of the surrounding community. The neighborhoods around John Lewis are much more mixed than what we see represented in the student population. When a school reaches nearly 97% ESOL, it places enormous pressure on teachers and can unintentionally isolate students rather than integrate them into a broader community. Redistricting could be an opportunity to address this imbalance. If students from nearby neighborhoods are reassigned to John Lewis, the feeder patterns should also be adjusted in a way that families feel confident about the pathway through middle and high school. Many parents are willing to support elementary schools when they know their children will eventually feed into strong and stable secondary schools. Families understandably care about safety and stability in middle and high school environments. If the district expects more families to attend a different school, then creating a clear feeder pattern—such as aligning the school with the Chamblee cluster—could build stronger community buy-in. Teachers also want diverse classrooms. A mix of language backgrounds, cultures, and experiences benefits all students. When one classroom has around twenty English learners with limited language support, that is not simply a classroom challenge	3/8/2026 10:34 PM

	—it is a structural issue that district planning should address. No single teacher can provide grade-level instruction and the language development that many students need at the same time. When classrooms are structured this way, the mismatch between student needs and available support becomes a system design issue. If that balance cannot be achieved through boundary changes, then schools serving extremely high numbers of English learners must be equipped with significantly stronger supports, including additional ESOL staffing, instructional materials, and realistic expectations around testing and planning time. Teachers also need the time necessary to do this work well—time to plan meaningful instruction, time to collaborate, and time to respond to the needs of our students. We need time to think, time to breathe, time to eat lunch, and time to take care of basic needs during the school day. These may seem like small things, but they are essential for sustaining the work required to support students effectively. If DeKalb wants to retain strong teachers, these issues must also be addressed. All of this work will mean very little if there are not ENOUGH teachers willing to stay in the classroom. I entered teaching after a career in corporate America because I believe deeply in public education. What I see every day are teachers and students doing their best in a school system that often makes the work harder than it needs to be. Redistricting should create conditions where teachers can truly support students and where families feel confident in the schools their children attend.	
80	No alternate scenarios/plans have been submitted. Where will my child go if this closure happens? What is the timeline? Are the funds for fixing the other schools earmarked already?	3/8/2026 10:32 PM
81	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/8/2026 10:31 PM
82	Oak grove already exceeds target utilization of 88% and is expected to reach full capacity within the next 3 years with year on year enrollment increases in the past for years. Sagamore hills and Briarlake do not have the capacity to host Oak grove's students without major expansion. This does not align either district's stated goal of maximizing utilization. The district should focus on schools with under 70% utilization	3/8/2026 10:30 PM
83	If the idea is to decrease the utilization gap, the district should look closer at schools below the utilization goal (70%). Oak Grove has four consecutive years of enrollment growth and ranks in the top tier academically. It also exceeds the 88% utilization target at 89% and is projected at 96% in2026-27.	3/8/2026 10:29 PM
84	As a new homeowner in the community, it would be disheartening to lose my neighborhood's school that is so loved here and providing a good education and learning experience. I would strongly be inclined to move out of the area once I have a child of school age if Evansdale was no longer an option. I am also concerned about how the consolidation would affect the neighborhood's home values.	3/8/2026 10:28 PM
85	Do not consider consolidating well utilized and well performing schools. Possible cost saving will be offset by reduced attendance and poorer student outcomes. I believe public education is very important for many reasons. However, poor leadership from DCSD in this regard will further drive students toward private options and increase political pressure for voucher programs. Thus further eroding DCSD footprint and negatively impacting all DCSD students.	3/8/2026 10:28 PM
86	We moved to Ashford Park specifically for the school system. We would hate to see the school close but it's obvious it cannot continue like this with she significant overcapacity. Either the boundary lines of eligible students needs to be restricted or the school needs to be closed. If the students do have to move it should be as a school and not broken apart and sent	3/8/2026 10:27 PM

	to separate schools. This would be detrimental to young developing psyches who would end up in a new school with strangers, then moved again for middle school.	
87	I think that the city boundaries that exist within DeKalb county should play a large role in determining which schools to expand and keep so that a family could have their child/children attend local schools from PreK through high school. This supports long term neighborhood stability and builds community.	3/8/2026 10:26 PM
88	With any school reassignment, education should be at the forefront of decision making. Children who are in a higher performing school should not be moved to a drastically lower performing school. With regard to this I would ask that Ashford Park be treated this way. The community has invested heavily in the success of this school from a time and money perspective. The rewards have come in the form of higher performance of the children at the school, happier and longer tenured teachers, and revitalized neighborhoods and community bonds. Please keep this attendance zone the same even if buildings change. Additionally please keep this attendance zone aligned to the Chamblee HS cluster.	3/8/2026 10:24 PM
89	I attended Oak Grove Elementary & LHS. There were no middle schools. Raising my kids in surrounding counties we experienced the opposite problem of too many kids & not enough schools. Construction, redistricting, trailers, double sessions was the norm. Kids are much more resilient to these changes than we think. I'm not so sure the parents are as resilient. Having a neighborhood school is wonderful but no longer affordable especially when the facilities are old and require expensive renovations and quite frankly appear unsafe & unhealthy. •Sell the properties •Convert to alternative schools (k-12)for behavioral issues which would give the teachers and kids a break from continuing discipline issues. •Create ESOL facilities. I support middle & high school physical buildings in close proximity as I think the new sequoia is proposed. My experience with this was a positive as there was sharing of facilities, courses, teachers and events. The camaraderie was very positive as the kids entered HS.	3/8/2026 10:24 PM
90	The details and the credentials of the consultant firm hired and paid for by Dekalb county taxes needs to be made public immediately. Documentation on how the firm was chosen needs to disclosed as well as the details and methods in which the firm collected data and made recommendations.	3/8/2026 10:24 PM
91	Provide more information as to the benefits of the change.	3/8/2026 10:23 PM
92	I hope that you will actually and sincerely listen to the feedback from this round, from the community and the SAP members. Don't see this only through the lens of your hoped for outcome but what DeKalb County citizens want and need.	3/8/2026 10:22 PM
93	Redistricting Dunwoody schools would add to the already awful traffic and congestion of mt Vernon road.	3/8/2026 10:21 PM
94	The fact the county is trying to have a firm lead this project that was hired by Horton, had previous relationships with Horton, and SAP is being led by someone brought to the county by Horton is extremely concerning. We were told HPM was the lowest bid by far. Gee, isn't Horton currently on trial for basically fixing contracts and then secretly taking a cut? The county has had no problem bleeding money in fruitless superintendent searches where they repeatedly chose poorly then had to buy out their mistake's contract….but now you want to have some sort of financial awareness and it comes at the price of our students? When all the research says smaller schools are better, but because mega schools are cheaper, that is what the county will push. Have you considered, with the new legislation, the absolute exodus in certain communities and therefore the funding that will leave the public schools and go to private schools? What a disgrace.	3/8/2026 10:21 PM
95	I attended DeKalb county schools from K-12 and later went on to obtain a bachelors and masters degree and have had a wonderful career. I owe my success and education not only to the school itself, but to the community that truly makes the school. I chose to raise my family in the Ashford Park and Chamblee community and it is so important to me that my children have the same community experience that I did and not be divided up. If Ashford Park Elementary is to close, it would be my preference for the students in the APES community be moved to John Lewis Elementary School but also stay in the Chamblee Middle and High Cluster so that the community stays intact.	3/8/2026 10:19 PM
96	Kids remaining in a lower band of grades like PK-8 remain more empathetic to younger kids and also remain more innocent than if they are thrown into schools for 6-12 graders.	3/8/2026 10:18 PM

97	I think they should keep the grades the same far as schools and I think Redan should stay open for the kids in our community.	3/8/2026 10:17 PM
98	Please ensure the next round of scenarios accounts for the high percentage of transient and ELL populations in the Buford Highway corridor. We need "weighted" capacity—classrooms shouldn't just be filled to the legal limit; they need space for the co-teaching and ESOL support models we use daily. Scenarios should address why Cross Keys remains over-capacity while neighboring clusters often have seats to spare. We need scenarios that look at cross-cluster redistricting to relieve our "vertical" overcrowding (from K through 12).	3/8/2026 10:16 PM
99	I would not recommend putting 6th graders with 12 graders. If there is a school with k-8 it could allow 8th graders to have more responsibility supporting younger classes. Also they may have less pressure to grow up so fast. OGE is a fixture of our community and one of the biggest reasons we moved to the area. So many parents and families walk to student which is a valuable lesson for students and eases congestion in the area.	3/8/2026 10:16 PM
100	I am proud to be an Oak Grove Eagle. My mom and dad and grandpa went to this school too. I love my teacher and my friends, and I really enjoy learning at Oak Grove. I also love my after-school activities at Oak Grove, including the after-school clubs like games with friends, ukulele, and karate. I do not want Oak Grove to close. This is my school, and it makes me happy to be here every day.	3/8/2026 10:16 PM
101	Every child in our district deserves to go to an excellent school from K (or PreK) to 12. I strongly urge you to consider being much more explicit about how this project supports that goal - for the students at my child's school and for every school across the district. I am aware that decisions will impact those whose schools are on any potential closure list and those who aren't - and we all deserve to have a clear line of sight into how any shifts are going to support better learning (academically, socially, and more) - not just how it could be better.	3/8/2026 10:16 PM
102	No es justo que quiten las escuelas porque cada escuela beneficia a muchos niños	3/8/2026 10:15 PM
103	I want the entire Evansdale school zone to remain in the Lakeside Highschool zone even if Evansdale is closed.	3/8/2026 10:15 PM
104	As the district develops the next round of scenarios, I encourage you to consider broader community and economic impacts alongside enrollment and facility utilization metrics. Ashford Park is a high performing, in demand school that operates near capacity and continues to see growing enrollment projections. Families actively choose this community because of the strength of its public school. When a school consistently delivers strong academic outcomes and maintains high engagement, it becomes an anchor for neighborhood stability and long term enrollment sustainability. Strong neighborhood schools help attract and retain families, support stable property values, and contribute to the district’s tax base. Disrupting a school that is nearly full and academically successful could have ripple effects that extend beyond the building itself and may unintentionally accelerate enrollment decline rather than solve it. For these reasons, I strongly oppose any scenario that would close or consolidate Ashford Park Elementary and urge the district to protect schools that are high performing, in demand, and operating efficiently.	3/8/2026 10:15 PM
105	I have always shared that there isn’t a single private school option that is $30k better then vanderlyn, but closing this school would cause many family’s to choose private school and the county will continue to loose students.	3/8/2026 10:11 PM
106	Closing/repurposing so many schools will lead to children spending more time being transported to and from school rather than in a school learning. It will also lead to current clusters changing greatly within certain neighborhoods.	3/8/2026 10:10 PM
107	The Ashford Park Elementary School and the Chamblee Cluster are intertwined into one highly successful community. I ask that you please keep the Ashford Park community in the Chamblee High cluster.	3/8/2026 10:06 PM
108	The district must confront the inequity created by a small group of very low-poverty, highly exclusive schools that are consistently shielded from redistricting. Schools such as Vanderlyn ES (7.1% economically disadvantaged, 85.7% utilized) and Oak Grove ES (9.0%, 84.9%) serve overwhelmingly affluent populations while operating below optimal capacity, yet remain largely untouched in facilities planning discussions. At the same time, other schools with similarly low poverty rates are allowed to become severely overutilized—most notably Ashford Park ES (14.4%, 161.7%) and Montgomery ES (13.5%, 120.7%)—relying heavily on trailers and temporary fixes rather than equitable boundary adjustments. This uneven approach	3/8/2026 10:05 PM

	reflects a form of structural elitism, where certain communities are protected from change while others are repeatedly asked to absorb growth, consolidation, or disruption. From both an equity and fiscal standpoint, this model is inefficient and unsustainable. Maintaining exclusive enrollment zones leaves available capacity underused while driving costs elsewhere through overcrowding and trailers. Redistricting apartment communities into these low-poverty, underutilized schools would both balance enrollment and allow them to qualify for Title I funding, ensuring resources follow student need rather than remaining concentrated in already advantaged areas. Schools such as Sagamore Hills ES (25.6%, 90.6%) and Briarlake ES (32.9%, 74.6%) further demonstrate that capacity exists but is not being leveraged fairly across clusters. True equity requires that all communities participate in solutions, including boundary adjustments where exclusivity and inefficiency persist. If the district is serious about fairness, responsible use of taxpayer dollars, and long-term system stability, it must be willing to redistribute opportunity—and responsibility—more evenly across the county. While it is reasonable to acknowledge that some school closures may be necessary where enrollment is persistently low or facilities are no longer viable, the proposal to close 27 schools at once poses a serious risk to the district's workforce stability. After years of staffing shortages, the county has only recently achieved full staffing across schools—a significant and hard won milestone.	
109	I believe this entire process needs to be paused due to corrupt Horton's involvement, incorrect data and lack of community input. Evansdale does not have anyone on the SAP and is therefore not represented. The French Immersion program is an essential part of the Evansdale community. Do not incorporate us into Pleasantdale or Sequoia. The fact HPM is running this and stands to profit off of this project is disgusting and should kill this entirely.	3/8/2026 10:05 PM
110	An elementary school student needs continuity and stability ie one school. For that reason, PK- 5 makes more sense than two schools for that educational period. Also, that makes for sense for the community and for the use of buses. Why does a child need to switch to 3 schools before high school? The PK-8 scenario was changed years ago, except it was K. 6-12 is ridiculous, exposing 6th graders to high school, which is one reason, the 7th graders were removed originally. Go with the way it is now; it addresses adolescence needs and also high school requirements for graduation. That's why they did it to start with! Thanks!	3/8/2026 10:05 PM
111	I understand that Oak Grove is currently expecting increased enrollment. It is ranked very high in scores and performance for Dekalb County. It would be a great loss to our neighborhood if the school closed.	3/8/2026 10:04 PM
112	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4-16. Oak Grove: Already exceeds the 88% utilization target (89% current; 96% projected) Has four consecutive years of enrollment growth Ranks in the top tier academically Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity.	3/8/2026 10:03 PM
113	Vandelryns school community has taken decades to build. It is not something that can simply be relocated to another school and expecting such would undervalue the work of the educators in your system. The priority the school board should not be considering is school buildings but quality of education programs, investment of community. Destroying one highly achieving school will not accomplish increasing opportunity's at another. There are other ways to support and foster and understand the needs of the teachers and students. The Dunwoody community has invested so much in vanderlyn and changing it would be a devastating affect on our community. Furthermore, for our neighborhood to get redistricted it would add to the unsafe and already challenging congestion on mt Vernon road.	3/8/2026 10:03 PM
114	It is extremely disappointing to hear that the parents who volunteered their time to the SAP process found out about the possible closure of 30 schools a mere 2 hours before it was made public.	3/8/2026 10:03 PM
115	Evansdale is a unique school and has multiple facilities (play field, two playgrounds, indoor gym) that are important as kids mature.	3/8/2026 10:02 PM
116	Oak Grove: Already exceeds the 88% utilization target (89% current; 96% projected) Has four consecutive years of enrollment growth Ranks in the top tier academically Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity.	3/8/2026 9:59 PM
117	I believe this entire process needs to be paused due to corrupt Horton's involvement, incorrect data and lack of community input. Evansdale does not have anyone on the SAP and is	3/8/2026 9:59 PM

	therefore not represented. The French Immersion program is an essential part of the Evansdale community. Do not incorporate us into Pleasantdale or Sequoia. The fact HPM is running this and stands to profit off of this project is disgusting and should kill this entirely.	
118	Why does there have to be another round of scenarios. Some things simply need to be left alone. I truly want my child to get the best education possible, but redoing the grade band isn't solving the problem. How well would a six grader thrive in a building with senior students?? Is child safety not a priority. With the potential change, you are solving one problem but creating several other problems. There is no forward movement with this idea. Find another way!!	3/8/2026 9:59 PM
119	I do have concerns of breaking into small grade bands that families will need to have more drop offs/pick ups and also the inability of siblings to benefit from being within the same building.	3/8/2026 9:58 PM
120	A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be considered carefully to avoid eliminating capacity needed to support major community investment.	3/8/2026 9:58 PM
121	I can't speak to the other schools, I don't know them, but closing Midvale would be a mistake. You're going to lose more affluent people in Tucker either moving out, going private, or never moving in. It's a bright spot in DCS. We will have to explore other options if it happens.	3/8/2026 9:58 PM
122	Make sure the Doraville cluster moves out of the Dunwoody attendance zone.	3/8/2026 9:56 PM
123	The schools that are thriving need to be given the resources to continue to thrive. Schools that are not meeting standards should be consolidated. Has consideration been given to increased amount of time on busses should neighborhood schools close? One of the best parts of where we live is the special community each school has. Each area in Dekalb county has something unique that we want to keep. To give underperforming schools a chance, combine them with existing higher performing schools. Consider the money spent on this consultant group— how could these funds be put in place to better support overcrowded schools that are also high achieving.	3/8/2026 9:56 PM
124	Please provide more data on how the schools with higher utilizations were included. It seems as though it doesn't incorporate the recent and expected growth trends. Additionally, what are the comparative capital costs of maintaining Oak Grove versus expanding the 2 nearby schools? We can't boil the ocean so why isn't the county focusing on investment in clusters that have true underutilization. Additionally, rather than large change with multiple clusters, perhaps a pilot to ensure the changes achieve the desired goal would be more prudent before spending significant funding on this change.	3/8/2026 9:54 PM
125	The district should expand small, inclusive early learning and specialized centers like Coralwood when repurposing vacant or smaller buildings. Coralwood draws from over 40 home schools, yet access is challenging—many families face hour-long traffic delays crossing I-85 just to reach services. Hawthorne's success shows how an intentionally sized, co-taught inclusion model can thrive, and Hawthorne should remain a strong continuation option where appropriate. Research shows that neurotypical students in inclusive, co-taught settings develop stronger empathy, leadership, and long-term career outcomes, benefiting all students. Expanding Coralwood-like models into grades 1–5, adding additional centers (especially east of I-85), or strengthening feeders to schools like Hawthorne would reduce traffic burdens, expand access, and invest in what is already working—without overexpanding neighborhood schools. The district must confront the inequity created by a small group of very low-poverty, highly exclusive schools that are consistently shielded from redistricting. Schools such as Vanderlyn ES (7.1% economically disadvantaged, 85.7% utilized) and Oak Grove ES (9.0%, 84.9%) serve overwhelmingly affluent populations while operating below optimal capacity, yet remain largely untouched in facilities planning discussions. At the same time, other schools with similarly low poverty rates are allowed to become severely overutilized—most notably Ashford Park ES (14.4%, 161.7%) and Montgomery ES (13.5%, 120.7%)—relying heavily on trailers and temporary fixes rather than equitable boundary adjustments. This uneven approach reflects a form of structural elitism, where certain communities are protected from change while others are repeatedly asked to absorb growth, consolidation, or disruption. From both an equity and fiscal standpoint, this model is inefficient and unsustainable. Maintaining exclusive enrollment zones leaves available capacity underused while driving costs elsewhere through overcrowding and trailers. Redistricting apartment communities into these low-poverty, underutilized schools would both balance enrollment and allow them to qualify for Title I funding, ensuring resources follow student need rather than remaining concentrated in already	3/8/2026 9:54 PM

	advantaged areas. Schools such as Sagamore Hills ES (25.6%, 90.6%) and Briarlake ES (32.9%, 74.6%) further demonstrate that capacity exists but is not being leveraged fairly across clusters. True equity requires that all communities participate in solutions, including boundary adjustments where exclusivity and inefficiency persist. If the district is serious about fairness, responsible use of taxpayer dollars, and long-term system stability, it must be willing to redistribute opportunity—and responsibility—more evenly across the county. While it is reasonable to acknowledge that some school closures may be necessary where enrollment is persistently low or facilities are no longer viable, the proposal to close 27 schools at once poses a serious risk to the district's workforce stability. After years of staffing shortages, the county has only recently achieved full staffing across schools—a significant and hard won milestone. Large scale closures and forced consolidations at this magnitude would almost certainly disrupt that progress. Experienced teachers, specialized staff, and proven school leaders are unlikely to simply relocate en masse; many will choose to leave the district entirely. This is especially true for hard to staff roles and specialized programs that depend on stable teams and established school cultures. A more measured approach—targeting closures strategically while preserving well functioning schools—would protect instructional continuity, retain talent, and avoid undoing recent gains. Facilities planning should balance efficiency with the reality that people, not buildings, drive school success.	
126	Your multistage announcement plan is only creating confusion, fear and panic. I strongly recommend taking you time to address each cluster with a unique plan so that all stakeholders have to opportunity to formulate an educated and unemotional response.	3/8/2026 9:53 PM
127	Students and student learning should be a priority, anything else is vanity. This survey required a great deal of prior learning, and I am concerned how getting the information out could be better accessible to stakeholders: ELL, Illiterate, those without or limit technology accessibility?	3/8/2026 9:51 PM
128	One question I have is, is DCSD band-aiding a systemic problem, or addressing symptoms of one or more deeper at actual issues? Why is school enrollment declining? Could it be lack of confidence in DCSD, caused by a string of poor leaders, decision making that damaged students (COVID response specifically, and I realize there is an argument here I'm not making in this space)? Could Dekalb county property taxes disincentivize families from residing and rooting in the communities? Could DCSD span too broad of an area, causing bureaucratic waste, undermining subsidiarity, creating opportunities for fraud/abuse, and ultimately diluting the education of our kids? (Again, a larger argument is needed to support this, I realize.) What about options that break up DCSC in to smaller, geographic units that are completely independent. E.g. North Dekalb School district, Central Dekalb School district, etc.? Less robust program offerings, but more local control, which I'd support. So if you want my feedback then I say deprioritize "Diverse and Robust Program Offerings"	3/8/2026 9:50 PM
129	Breaking Ashford park into an upper and lower elementary could help with the over crowding	3/8/2026 9:50 PM
130	Please consider the communities and the families that have lived here for generations with their students attending the same school. They believe in Oak Grove, and it is one of the best elementary schools in our county! Why don't you bring students to Oak Grove instead of sending ours to other schools?	3/8/2026 9:49 PM
131	Evansdale has a larger property and if expanding a school is the an then it would be a better choice than Livsy or Pleasnatdale.	3/8/2026 9:48 PM
132	You must keep Ashford Park and Montgomery in the Chamblee school cluster.	3/8/2026 9:48 PM
133	Scenario 1 proposes closing 27 elementary schools, far exceeding the previously referenced range of 4–16. Including Oak Grove Elementary School in this scenario is concerning because it does not address true underutilization. Oak Grove already exceeds the district's 88% utilization target (currently 89%, projected ~96% next year), has experienced four consecutive years of enrollment growth, and ranks in the top tier academically. Closing a school that is already near or above capacity would primarily shift students rather than meaningfully reduce system-wide excess seats. Such a closure would also place significant strain on nearby schools in the Lakeside High School cluster. Sagamore Hills Elementary School is already at ~91% utilization, while Briarlake Elementary School would need to absorb a large share of Oak Grove's students. This would likely require major boundary changes, overcrowding, or future facility expansion. If the district's objective is to close the utilization gap, priority should be given to schools operating well below ~70% capacity, where consolidation can effectively improve efficiency without triggering new capital costs. Before advancing closures in this phase, you the community would like more answers regarding the data and reasoning used to	3/8/2026 9:48 PM

	make these decisions • Are pandemic-era regression inputs skewing projections relative to post-2023 growth trends? • How do the costs of maintaining Oak Grove compare to expanding Sagamore Hills and Briarlake to accommodate displaced students? A phased, evidence-based approach targeting schools with the greatest underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this high-growth corridor should be carefully sequenced to preserve capacity needed to support major community and employment investments.	
134	Elementary schools are key to the community. We looked specifically to buy in our neighborhood for Oak Grove. Please reconsider closing.	3/8/2026 9:47 PM
135	Oak grove elementary has a good reputation and closing it hurts Dekalb county schools and its reputation if it’s closed. It’s beneficial having good reputation for future enrollment and engagement.	3/8/2026 9:47 PM
136	APES has created a wonderful environment for kids to learn and be enthusiastic about their education. Keeping that enact should be viewed as crucial for school administrators when considering what is best for the students. German immersion should continue to be offered to all students after completion of the Lift & Shift as this was a key component of Ashford Park’s ascension as a performing school.	3/8/2026 9:46 PM
137	Why does this feel like a unhealthy sacrifice of our children just to satisfy the need to save money for the county...despite the high/low enrollments, is combing the schools(the potential clusters) the best possible solution to improving dekalb county school system.....is anyone thinking of the children's sake??(the potential intimidation and bullying of the younger students,the security threat of being around the older kids,the mentality of the younger students who may feel out of place).	3/8/2026 9:46 PM
138	Before making sweeping changes, the district must investigate the root cause of declining enrollment. Closing Ashford Park Elementary and severing the Chamblee High pipeline will only worsen the issue. Rather than accepting reassignment from the district's top-performing school, many families will simply leave for private schools—accelerating student flight and exacerbating the exact enrollment problem the committee is trying to solve	3/8/2026 9:46 PM
139	Any facilities decision should prioritize student experience, community stability, and long-term educational outcomes, not just short-term building utilization. Elementary schools play a critical role in building strong communities. When neighborhood schools close or consolidate, it often reduces family engagement and increases transportation burdens for young students. DCSD should work closely with families and communities before making major structural changes and should consider alternatives such as boundary adjustments, program enhancements, or strategic use of facilities before pursuing consolidation.	3/8/2026 9:45 PM
140	Please keep German immersion and Ashford Park together. We will have a kid in each and don’t want to be spread across two different schools.	3/8/2026 9:45 PM
141	It is not clear how neighboring elementary schools will be able to absorb the additional students. Elementary schools should service their neighborhood community and the class sizes should be small to provide each student the appropriate start to education. There is always some "extra" seating as we need to accommodate variations, and need to provide cultural diversity, such as dedicated art and music rooms, along with special curricular, special needs, speech therapy, gifted, reading, hands-on sciend activities.	3/8/2026 9:44 PM
142	I support the district’s responsibility to address overcrowding at Dunwoody High School; however, the current proposal to close Vanderlyn Elementary is not supported by sufficient analysis and should not move forward. While Vanderlyn’s proximity to the high school places it within broader facilities planning discussions, proximity alone does not justify closure. The district has stated that the SAP is driven by enrollment trends and utilization, yet the proposal does not clearly demonstrate how these metrics have been applied at the cluster level to support this recommendation. Critical data—including receiving school enrollment capacity, projected class sizes, transportation impacts, and feeder pattern changes—has not been shared. These analyses are essential and must be provided before any consideration of closure. The shared Vanderlyn–Dunwoody campus presents a clear opportunity to pursue phased, campus-level solutions that directly address secondary capacity constraints without eliminating elementary access. Closing a successful elementary school without fully evaluating and presenting such alternatives represents a missed opportunity and an incomplete planning process. Vanderlyn is a diverse, high-performing, and inclusive school community. Disrupting a stable elementary environment without transparent justification runs	3/8/2026 9:41 PM

	counter to the district's stated priorities. I strongly urge the Board to pause any closure decision and direct district leadership to engage both school communities in a collaborative process focused on viable, data-driven solutions that relieve high school overcrowding while preserving the Vanderlyn community.	
143	We need more information as to what the plans are for Vanderlyn students specifically as well as if Vanderlyn, despite its near 600 student capacity size, is being shut simply to allow for the high school to expand. Homecoming park is currently not used as a park or any other serviceable area. Expanding high school facilities into this unused space makes sense.	3/8/2026 9:40 PM
144	I know that the enrollment numbers change but closing a very successful elementary like Oak Grove Elementary that has been there for over 50 years does not make sense. I think that focusing on keeping the schools smaller in the neighborhood increase parent participation which in turn makes the school successful.	3/8/2026 9:40 PM
145	We need more information as to what the plans are for Vanderlyn students specifically as well as if Vanderlyn, despite its near 600 student capacity size, is being shut simply to allow for the high school to expand. Homecoming park is currently not used as a park or any other serviceable area. Expanding high school facilities into this unused space makes sense.	3/8/2026 9:40 PM
146	I understand that DCSD has a responsibility to address overcrowding at Dunwoody High School; however, the current proposal to close Vanderlyn Elementary is not supported by sufficient analysis and should not move forward, as a solution to that problem. While Vanderlyn's proximity to the high school places it within a broader facilities planning discussions, proximity alone should not justify closure. The district has stated that the SAP is driven by enrollment trends and utilization, yet the proposal does not clearly demonstrate how these metrics have been applied specifically at the cluster level to support this recommendation. Critical data—including receiving school enrollment capacity, projected class sizes, transportation impacts, and feeder pattern changes—has not been shared. These analyses are essential and must be provided before any consideration of closure. As the parent of a student who graduated from Vanderlyn Elementary and is now pursuing an engineering course at a premier nationally recognized institute of higher learning, I cannot emphasize how much of an impact Vanderlyn Elementary had to boost my student into that trajectory. Closing a successful elementary school without fully evaluating and presenting such alternatives represents a missed opportunity and is a failed planning process. Vanderlyn is a diverse, high performing, and inclusive school community. Disrupting a stable elementary environment without transparent justification runs counter to the district's stated priorities. I strongly urge the Board to reconsider any closure decision and direct district leadership to engage in a collaborative process focused on viable, data driven solutions that relieve high school overcrowding while preserving the Vanderlyn community.	3/8/2026 9:36 PM
147	We need more information on how SAP is going to impact the Magnet program as this has not been addressed and although it's not a facility issue there will be hundreds of parents impacted if the program is disbanded or moved. People have to make decisions soon on their kids so round 2 should have this program included.	3/8/2026 9:36 PM
148	The Dekalb Board of Commissioners needs to be in on these meetings because this undertaking will affect homeowners whether they have children in the system or not.	3/8/2026 9:36 PM
149	I would ask for clarity on whether employment expansions and residential pipeline data were included in enrollment projections? Also, what are Oak Grove's projected utilization rates for 2028 and 2030?	3/8/2026 9:35 PM
150	We need to continue to have community input discussions and open communication. Everyone was blindsided by the possibility of closing Ashford Park. That was not on anyone's radar. Transparency is key to earning and keeping people's trust throughout this process.	3/8/2026 9:34 PM
151	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression	3/8/2026 9:34 PM

	inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment	
152	It is imperative that we consider the size of the classrooms. (old schools vs new school) It is challenging to expect every school to house the same number of studentsk without considering the measurements of the classroom. Often New school classrooms are bigger vs-old school classrooms are smaller, but require the same teacher student ratio(unfair)	3/8/2026 9:33 PM
153	I think that it is imperative that any redistricting be slowed to wait for a permanent superintendent, as well as, new board members that will be elected this year. I also feel like a conflict of interest with regards to HPM and construction contracts following the closure and expansion recommendations. Not only is conflict of interest an issue but the data provided is inaccurate and will show that data falsification has led to drastic changes in the education of many children in Dekalb county.	3/8/2026 9:33 PM
154	Our community is very close. It is also very dedicated to evansdale elementary which is the hub of the community. Please do not break apart something that is working very well. It is rare to have this sort of tight knit community in such a large city. We value what we have very much. Please help us preserve it.	3/8/2026 9:32 PM
155	I don't understand why the County is pursuing a plan put forth by a deposed school superintendent. In fact, I question why the School Board ever decided otherwise hire Mr. Horton given the information that was known. I am a graduate of Oak Grove and Lakeside and my daughters attended Sagamore Hills Elementary, Henderson Middle nd Lakeside High. I am so very disappointed by our recent legacy of failed superintendents. The idea that we've had at least 3 superintendents resign or be fired due to corruption is, quite honestly, embarrassing and confidence destoying. The Board needs to do better.	3/8/2026 9:32 PM
156	Don't close Evansdale and move the students to another school. If anything, expand Evansdale! Evansdale has a large lot with a large separate play field, woods with an outdoor classroom, 2 playgrounds, and multiple parking lots. You could more easily ADD to Evansdale and still keep the playgrounds/parking lots. It's also a great n'hood school but yet in an easily accessible spot, traffic-wise. Also Evansdale's enrollment is projected to increase to well over 600 students in just a few years-- by 2030. Closing it would be devastating to this n'hood.	3/8/2026 9:31 PM
157	If consolidation helps the district create smaller classes, it would be a positive step. Teachers have a limited amount of time and attention to give during the school day. When that attention must be divided among 30 students, it is very different than when it is shared among 15. Smaller classes allow for more individualized instruction, stronger teacher-student connections, and improved learning opportunities for every child. Reducing class size should remain a key priority.	3/8/2026 9:26 PM
158	It feels like every few years there is a new grand plan of school closings, and yet there is no attempt to renovate existing schools. Closing high performing neighborhood schools does not make sense. Closing smaller schools with larger lots available for expansion also does not make sense.	3/8/2026 9:26 PM
159	No change for Oak Grove Elementary	3/8/2026 9:25 PM
160	Clarity on where the projected enrollment data is coming from would be appreciated.	3/8/2026 9:25 PM
161	I support consolidation if it leads to meaningful reductions in class size. A teacher only has so much time and attention to give during the school day. When that attention is divided among 30 students, it becomes extremely limited; when it is shared among 15, the quality of instruction and interaction changes significantly. Smaller classes allow teachers to build stronger relationships, provide more individualized support, and ultimately improve learning outcomes for all students. Class size has a major impact on student success, and it should be a priority to reduce it.	3/8/2026 9:24 PM
162	School building thrive when the community supports. Midvale to remain open to thrive.	3/8/2026 9:24 PM
163	Sorry, never had children in Dekalb County Schools	3/8/2026 9:23 PM

164	It’s unfortunate that the smaller schools that have such well-established communities are on the chopping block. It’s interesting that three of the four feeder schools going to Henderson Middle are on the list. Won’t taking these schools out of commission increase the time people spend traveling to school? I would take out the middle schools and go back to K-8 and 9-12 also. Henderson could go back to being a high school with such a big parking lot that isn’t being utilized as a middle school. Thank you for asking for feedback! I hope some of these decisions are reconsidered with the effects on the community in mind.	3/8/2026 9:22 PM
165	Address how this will be paid for…and help us understand how the declining enrollment projections were developed (how much confidence can we have in these numbers). What will be the plan if enrollment does not decline?	3/8/2026 9:21 PM
166	I strongly support consolidation if it allows the district to reduce class sizes. A teacher only has a limited amount of time and attention each day. With 30 students, that attention is stretched thin; with 15, instruction changes entirely. Smaller classes mean stronger relationships, more individualized instruction, and more learning for every child.	3/8/2026 9:20 PM
167	I am also a teacher in the county. I have concerns that with schools being targeted for closing may further strain recruitment/retention efforts that have been strained county/state/country-wide since COVID. I understand that our primary concern is student well-being, but I also believe that some reassurances as far as what the plan is for those teachers impacted by school closures will be. I know that everyone cannot be retained, but some idea as far as placement of teachers/administrators impacted would be nice.	3/8/2026 9:19 PM
168	Oak Grove Elementary has tremendous support from parents & the community. It has a stellar reputation & is a treasure for the DeKalb County School District. It doesn't make sense to close the school. People move into this cluster for OGE. It is mentioned on every real estate listing. That should tell you something. I think boundaries should be adjusted before the school is closed. Include more of the Sagamore Hills area.	3/8/2026 9:19 PM
169	As DeKalb County School District evaluates facility use and consolidation options through the Student Assignment Project, the district should also consider investing in facilities that are already highly utilized and serving growing communities. Ashford Park Elementary School is a strong example of this. The school is already operating well above its designed capacity, which demonstrates both the demand for the school and the level of community support it receives. Rather than considering consolidation of Ashford Park into another location, the district should explore facility investments that would allow the campus to accommodate additional students more effectively. Expanding classroom space, modernizing facilities, or reconfiguring the building could help relieve current overcrowding while preserving a successful neighborhood school. Investing in Ashford Park would also help support the school’s strong academic community and its sought-after German immersion program, which benefits students beyond the immediate neighborhood. Supporting and expanding schools that families actively want to attend can help strengthen enrollment and confidence in the district overall. Given the demonstrated demand for Ashford Park, investing in its facility capacity would be a more constructive long-term strategy than consolidation.	3/8/2026 9:19 PM
170	Please do not shut down Oak Grove elementary	3/8/2026 9:18 PM
171	If chestnut is the school chosen for expansion on their current land it will create so much traffic disruption. Peachtree middle is right next door. Additionally many commuters take this road to get onto 285. The traffic created is going to be appalling. Why not consider VES for expansion. It is already a sought after well utilized school. Additionally, I have already heard people enrolling their kids into private just because of speculation of closure. The same amount of resources will not follow to other schools because many students will be in private.	3/8/2026 9:18 PM
172	Having too many students in a classroom or a school will hinder learning more than could be achieved by freeing up funds to add more programs. Also the concept of magnet schools should be closely scrutinized from a cost-benefit standpoint. This seems like a costly model that advantages a relatively small number of students and pulls kids from the neighborhood schools they should be attending. Dekalb County schools should prioritize selling off properties that are not at all utilized (former site of Briarcliff High School on N Druid Hills) for funding before closing facilities that are being used.	3/8/2026 9:18 PM
173	I believe that PK-8 should not be mixed within the same school.	3/8/2026 9:17 PM
174	As a family zoned for Ashford Park Elementary School in the Chamblee cluster, we want to offer the following priorities to guide the next round of scenario development: Keep the Ashford	3/8/2026 9:16 PM

	Park community together. Whatever scenario the District advances, Ashford Park students should not be fragmented across multiple schools. The relationships, culture, and community built at Ashford Park have real educational value. Scattering students across different schools — particularly different clusters — would cause irreversible harm to a cohesive neighborhood community. Guarantee the Chamblee cluster pathway for all Ashford Park students. Any scenario affecting Ashford Park must include an explicit, guaranteed feeder relationship into Chamblee Middle School (6-8) and Chamblee Charter High School (9-12). This is not a preference — it is a matter of educational equity. Families made housing and life decisions based on access to this pathway. Involuntarily removing students from the Chamblee cluster would reduce their educational opportunities through no fault of their own. Exhaust building solutions before dismantling communities. The concerns driving this process — aging facilities, capacity mismatches, operational inefficiency — are infrastructure problems. The next round of scenarios should include serious consideration of renovation, rebuilding on the current Ashford Park site, or new construction within the attendance zone before defaulting to closure and redistricting. The community should not bear the cost of solving a facilities problem. Do not sacrifice high-performing clusters for system-wide uniformity. The Chamblee cluster is a high-performing, high-demand pathway. Any scenario that weakens it — through grade band restructuring, redistricting, or fragmentation — should require a compelling, specific justification. System-wide standardization is not sufficient justification on its own. Provide transparency and adequate community input before decisions are finalized. The next round of scenarios should be accompanied by proposed redistricting maps, cluster assignments, and feeder patterns — shared with sufficient lead time for meaningful community feedback. Families cannot respond substantively to scenarios that lack this specificity. Prioritize stability for currently enrolled families. Any transitions resulting from this process should include meaningful grandfathering provisions, so that students already enrolled at Ashford Park or assigned to the Chamblee cluster are not involuntarily displaced mid-pathway. In closing, we ask the District to approach the next round of scenarios with a clear principle: improvements to the system should not come by making any particular community worse off. The Ashford Park community is not asking for special treatment — we are asking to be protected from harm in a process designed to benefit DeKalb County as a whole.	
175	It will be disadvantage for students and parents for the commute.	3/8/2026 9:14 PM
176	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investmenT.	3/8/2026 9:13 PM
177	All of the above. Suspend this until a permanent Super is in place. Discuss where the kids would be going BEFORE closing buildings! This should be about THEM! I am Tired of my tax dollars being wasted	3/8/2026 9:13 PM
178	If closing the schools - the students will have to commute to far	3/8/2026 9:12 PM
179	I would like to understand how the enrollment projections for Oak Grove Elementary, Sagamore, and Briarlake were developed and whether they incorporated the 2024-2026 employment expansion and residential pipeline data. I'd also like to see the projected utilization rates for 2027-2030 for these three elementary schools and understand the comparative capital cost scenarios of maintaining OGE versus expanding Sagamore and Briarlake. This may require delaying the closure decisions to allow for adequate and careful validation of the enrollment assumptions.	3/8/2026 9:11 PM
180	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–	3/8/2026 9:10 PM

	16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	
181	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/8/2026 9:07 PM
182	My number one priority is to keep the entire Ashford Park Elementary attendance zone together. Redrawing boundaries or dividing our community into multiple schools is not an acceptable solution. Ashford Park is a cohesive, established community. Splitting the attendance zone would disrupt long-standing relationships, weaken neighborhood connections, and create unnecessary instability for families. Keeping our community intact must be the guiding principle in any proposed changes. I strongly urge the district to pursue solutions that preserve the full Ashford Park Elementary attendance zone as one unified community, without fragmenting it through redistricting.	3/8/2026 9:06 PM
183	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investmen	3/8/2026 9:05 PM
184	I would like to see more of the community and the 250 parents involved in the SAP project to have their voices heard, and included within the weighting of this project. It doesn't appear to be the case and the community is upset with how this has been handled thus far. If schools are going to get closed and impact neighborhoods, please share the plan for the school building that will be closed. These are residential areas and transparancy is expected.	3/8/2026 9:03 PM

185	Oak grove doesn't meet the basic criteria for consideration of closure and should not be considered.	3/8/2026 9:02 PM
186	Oak Grove Elementary currently exceeds the 88% utilization target with additional capacity expected for the 2026-27 school year. OGE has seen increased growth for four consecutive years. It makes no sense to close a high performing school that is showing increased enrollment.	3/8/2026 9:02 PM
187	The Dunwoody cluster is consistently burdened with the Doraville schools being pushed in at the middle and high school levels. These students should be back in the Doraville cluster.	3/8/2026 9:01 PM
188	Save the small neighborhood schools that make DeKalb county neighborhoods desirable.	3/8/2026 9:00 PM
189	We cannot use a one-size fits all approach to the county. The needs of each High School cluster should be evaluated to best serve the needs of that community.	3/8/2026 9:00 PM
190	Based on the meeting at Cross Keys, it sounds like decision makers aren't fully listening to parents, community, and SAP members. North and South DeKalb are in different situations with enrollment numbers and a one sized approach isn't going to work across the board.	3/8/2026 9:00 PM
191	NA	3/8/2026 9:00 PM
192	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: •Already exceeds the 88% utilization target (89% current; 96% projected) •Has four consecutive years of enrollment growth •Ranks in the top tier academically •Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1.Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2.Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3.What are Oak Grove's projected utilization rates in 2028 and 2030? 4.What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/8/2026 8:59 PM
193	The round one scenario laid out is worthless without having a plan. Saying you are closing dozens of schools with absolutely zero information about where kids from each of those schools would end up is a horrible plan. The fact that the entire process was started by a former superintendent who was hired while under investigation for felony criminal activity such as fraud and imbezzlement (and has since been indicted) leaves a massive lack of trust in any board member that voted for him. Some may also question the sizeable contract given to the consulting agency involved with this process. At minimum this should be investigated and details shared with the public. Another issue I have strong concerns with is there is absolutely nothing about this process that considers academics. Last I checked the primary purpose of schools is education. That should've priority #1. My family and I moved to the area we live due to the good public schools. Closing the school could force my children into other nearby schools which are some of the worst performing in the state. That's unacceptable. The Community feedback session did not answer many of the hard questions posed to them. The Director of SAP was supposedly present and did not say a single word.	3/8/2026 8:57 PM
194	Please let the teachers and staff know what will happen to them. There are a lot of scared staff who are starting to look for other jobs because they do not feel safe here now. Also, please let the staff know before Decaturish does.	3/8/2026 8:57 PM
195	Kids should not be forced to switch schools mid way through. This is NOT in the best interest of students, especially those who struggle to connect with teachers and friends and/or require additional support services. Smaller class sizes with more teachers is ALWAYS better than consolidating into larger class sizes. Bigger class sizes puts more pressure on teachers and students and sets them up for higher stress, bigger feelings and less capacity to care and respond when students require more care and attention. Atlanta is a city with major companies with major money. Rather than settles for the cuts this state dishes out because it hates people and kids, get creative and raise some money. Hire a development team than can work	3/8/2026 8:49 PM

	to solicit donations from all the big money in our area. STOP wasting time trying to make cuts and focus your efforts on growing your budget. BE PROACTIVE NOT REACTIVE	
196	Ashford Park needs to stay open, and we need to be a part of Chamblee Cluster no matter what.	3/8/2026 8:48 PM
197	Specific to my current Dunwoody cluster, I support the current recommendations of school closures, consolidations and expansions. I do not support breaking up neighborhoods or municipalities between clusters. I do not support keeping older, aging and smaller capacity schools open. I do not believe a schools strong performance history should be a reason to keep a school open. I believe all decisions should be data driven and fact based and done in and equitable way across DeKalb.	3/8/2026 8:48 PM
198	My number one priority is to keep the entire Ashford Park Elementary attendance zone together. Redrawing boundaries or dividing our community into multiple schools is not an acceptable solution. Ashford Park is a cohesive, established community. Splitting the attendance zone would disrupt long-standing relationships, weaken neighborhood connections, and create unnecessary instability for families. Keeping our community intact must be the guiding principle in any proposed changes. I strongly urge the district to pursue solutions that preserve the full Ashford Park Elementary attendance zone as one unified community, without fragmenting it through redistricting.	3/8/2026 8:47 PM
199	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment	3/8/2026 8:47 PM
200	My feedback across all three sections points to a consistent conclusion: Ashford Park Elementary should not be closed or removed from its role as the elementary anchor of the Chamblee cluster. A high-performing school with growing enrollment is not a] consolidation candidate The SAP process rightly focuses on underutilized, underperforming, and over-capacity schools. Ashford Park does not meet that profile. It is a top-10% school in Georgia by academic performance, its enrollment has grown 11% over five years, and it serves a defined residential community with a stable feeder pathway to Chamblee Middle and Chamblee High. Applying consolidation logic to a school like this would contradict the district's own stated criteria and goals. The German immersion program adds irreplaceable district value Ashford Park is home to one of DeKalb County's few dual language immersion programs — a specialized offering that is not easily relocated or replicated. Families, like my own, have made deliberate school and residential choices based on access to this program. Closing Ashford Park would effectively eliminate a unique academic asset from the district's portfolio at a time when the SAP's stated goal is to strengthen program offerings, not reduce them. A request for the next round of scenarios As the district refines its approach, I ask that the following criteria be applied explicitly and transparently in the next iteration: schools with growing enrollment, strong academic outcomes, specialized programs, and established cluster feeder roles should be categorically deprioritized for closure or consolidation. Ashford Park meets all of these criteria. The goal of this process should be to ensure every DeKalb student has access to a high-quality school. Closing one of the district's best is not the path to that outcome.	3/8/2026 8:47 PM
201	Evansdale Elementary has the land capacity, community support, and projected growth to remain a strong and sustainable school within the Lakeside cluster. Rather than closing it, the district should consider renovating and expanding the facility so it can continue to serve current and future families. Thank you for your time and for considering the long-term impact of this decision on students, families, and the broader community.	3/8/2026 8:47 PM

202	Please do not close this special school of ours. Generations upon generations have made it a point to live and thrive around our school community. We move back to this area for a reason. Because we love Oak Grove Elementary and the parents, teachers and staff that goes with it.	3/8/2026 8:46 PM
203	EES is uniquely positioned to sustain and grow the French program because of both its facilities and its strong community foundation. The 10.1-acre campus provides ample space, including multiple playgrounds, a large play field, and sufficient parking, allowing the school to accommodate future growth while maintaining safe traffic flow and student spaces. Just as important, the program is supported by an established network of neighborhood parents, teachers, and community volunteers, as well as a strong mentorship tradition in which older students guide younger learners. French teachers across EES, HMS, and LHS have built deep roots within the Lakeside cluster, creating continuity and stability for students. Moving the program would disrupt these facilities, relationships, and community supports that are essential to its continued success.Maintaining the French program at EES and within the Lakeside cluster is essential to preserving the strength, stability, and long-term success of the program.	3/8/2026 8:45 PM
204	My vote is to keep Ashford Park ES functioning and in Chamblee cluster given $25M renovations and community location. I would not want current school to be used for other purpose.	3/8/2026 8:44 PM
205	Our priority is the best possible education for our children and we believe that is best obtained by remaining at Ashford Park and in the Chamblee cluster	3/8/2026 8:44 PM
206	Our priority to is the best possible education for our children and we believe that can be achieved by remaining at Ashford Park and in the Chamblee Cluster.	3/8/2026 8:44 PM
207	Scenario 1 proposes 27 elementary school closures, which significantly exceeds the previously referenced range of 4–16 closures. Closing Oak Grove Elementary raises particular concerns. Oak Grove: Already exceeds the district's 88% utilization target (89% currently; 96% projected next year) Has experienced four consecutive years of enrollment growth Ranks in the top tier academically Would require substantial capacity adjustments at Sagamore Hills and Briarlake to absorb displaced students Closing schools that are already near or above the district's utilization targets primarily redistributes students rather than meaningfully reducing excess capacity. If the goal is to address the district's utilization gap, it would be more effective to prioritize schools operating well below 70% utilization, where consolidation would materially improve efficiency without triggering new capital expansion. Before proceeding with closures in this corridor, additional clarification would be helpful: Were 2024–2026 employment expansions and documented residential pipeline activity incorporated into enrollment projections? Were pandemic-era enrollment data (2020–2022) weighted in ways that may distort post-2023 recovery trends? What are Oak Grove's projected utilization rates for 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding capacity at Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest sources of underutilization would better align with fiscal responsibility and long-term capacity planning. In a corridor experiencing significant employment and housing growth, decisions should be sequenced carefully to avoid eliminating capacity that may soon be needed.	3/8/2026 8:43 PM
208	With State funding associated with 450 students, more focus should be placed on that number rather than the 600 which magically appeared 11 minutes 20 seconds in the PowerPoint presentation with no justification. 900 students for PK-8 was slung in the end of the presentation but no background or justification.	3/8/2026 8:43 PM
209	Vanderlyn is a close-knit, diverse, academically strong, and inclusive community. Preserving stable elementary environments while solving high school challenges aligns with district priorities. Me and my fellow parents would welcome collaboration between district leaders and both school communities to explore campus-level solutions that address high school capacity while preserving the Vanderlyn community.	3/8/2026 8:40 PM

212	Please don’t close our community smaller schools. Children thrive in a place where they know their classmates, play at their friends homes and spend time with friends from different backgrounds and cultures.	3/8/2026 8:34 PM
213	N/A	3/8/2026 8:33 PM
214	I have not seen any information on how any of the proposed consolidations would affect traffic and business patterns in their areas and I just do not think a proper informed decision can be made without those types of logistical projects.	3/8/2026 8:33 PM
215	Evansdale has many programs that are unique to the Lakeside cluster for example the French program.	3/8/2026 8:33 PM
216	Some of these schools are located in neighborhoods.Development and an increase in size could negatively impact these areas with construction. Many people moved to a certain area for the specific school. Elementary students are learning fundamentals and do not need large classrooms. This also puts more burdens on teachers.	3/8/2026 8:31 PM
217	This needs to be paused until a new superintendent is in place, until all data has been released to the Public, until a feedback period with multiple opportunities for feedback with elected officials making the decisions have been noticed and scheduled over a 3-5 month period, excluding school breaks. This process cannot go forward with the current board with members who have announced they are retiring and who cannot be invested in the way ongoing community members and elected officials are invested. There also needs to be a review to make sure the companies hired were not implicated in former superintendent Horton's potential criminal acts.	3/8/2026 8:31 PM
218	Although I agree with the data driven approach has been beneficial in arriving at the first set of building recommendations, I am concerned that without consideration given to "Non-facility" aspects of, in this case, the great learning institution that APES has become over the years will be overlooked. I am convinced that there is a unique combination of excellent well-credentialed teachers and staff, an extremely involved parents, guardians and extended family community, perhaps the strongest, most robust Foundation in the District, and the school's location in the center of a thriving community (Brookhaven). These things have APES rated 7th of 83 (92nd percentile) DCSD elementary schools by US News and World Report and 86th in Georgia (93rd percentile) with excellent math and reading proficiency scores. This is including the fact that 49 students living in the APES attendance boundary attend Kittredge (which in their absence at APES dilutes our academic excellence). I am sure that the District has many other data points that we parents do not have visibility to that supports APES' strong position. Add to that the fact that APES recently received the "Distinguished Family Friendly School Award" for 2025-26. Please give us an opportunity to showcase Ashford Park Elementary School. It's about a lot more than capacity and facilities scores. Please give us a chance to save APES by allowing us to expand on the attributes that make APES the great place that it is. By the way, ask our SAP team representatives to tell you about the APES Multicultural Night which takes place in the gym next Tuesday where students and their families will showcase cultures, food, dress and so on from their family origins from over 20 different countries. It is all part of our "secret sauce"! SAP = Save Ashford Park! Thank you.	3/8/2026 8:31 PM
219	Very diverse student body building strength and unity in our neighborhood— stron ties to Henderson middle and lakeside- easy walking distance for many — strongly support keeping Evansdale open and thriving	3/8/2026 8:26 PM

220	Please provide focus groups for teachers to have a say and specific questions on office 365 to get their input. That will vital to success moving forward.	3/8/2026 8:25 PM
221	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment	3/8/2026 8:23 PM
222	The behavioral and exposure of young kindergarten students to 8th graders would be a terrible thing. Kindergarteners and 8th graders do not need to be on the same buses or using the same bathrooms.	3/8/2026 8:18 PM
223	Traffics in the Chamblee/Brookhaven area is bad and Montgomery Elementary is on a very busy street that commuters use to get to I-285. Expanding that school and adding more traffic poses a lot of issues. It's also too far away for most Ashford park families to commute to on congested roads. Is there really no way to expand Ashford Park? Can we put our heads together to think outside of the box on this one?	3/8/2026 8:17 PM
224	Please keep my school open.	3/8/2026 8:17 PM
225	I am writing to express strong opposition to any proposal to close Evansdale Elementary School or remove Evansdale from the Lakeside High School community as part of the district's school consolidation and redistricting process. Evansdale is a vital institution within the Lakeside High School cluster, and closing it would overlook several important factors related to facilities, community investment, and future enrollment growth. First, Evansdale is well positioned physically to support long-term use and expansion. The school sits on approximately 10.1 acres, a lot size that is larger than many neighboring schools and provides ample room for future growth. The campus is unique in that it includes a large, separate play field, two playgrounds, and multiple parking areas. Because of this layout, additions could be constructed at the back of the school without sacrificing play space or parking. In other words, the site has the capacity to accommodate modernization and expansion rather than closure. The school is also well situated to manage transportation and traffic flow. Evansdale occupies two sides of a large neighborhood block, allowing for safer and more flexible traffic patterns for buses and carpool lines. This physical advantage would be difficult and costly to replicate elsewhere. Additionally, enrollment projections indicate that Evansdale's student population is expected to increase to over 600 students by 2030. This projected growth suggests that closing the school now could create capacity problems in the near future and force the district to reopen or rebuild facilities later at much greater expense. Another critical factor is Evansdale's unique role in the Lakeside cluster's French language program. Evansdale's French program is supported by a strong network of neighborhood parents, teachers, and community volunteers who provide valuable resources and assistance for students. Moving the program away from Evansdale would disrupt this vital community infrastructure that has taken years to build. The French language pathway connecting Evansdale Elementary, Henderson Middle School, and Lakeside High School has deep roots in the community. Teachers in this program have developed long-standing relationships with students and families, and older students often mentor younger ones within the same cluster. Maintaining this continuity is essential to preserving the strength and success of the program. Finally, enrollment projections themselves should be carefully examined. Forecasting future student populations is inherently uncertain, and current models may underestimate the number of children who will attend Evansdale. In many communities, projections fail to fully account for apartment developments, immigrant families, and newly arriving households who may not appear in traditional forecasting models. These populations often bring additional students into neighborhood schools over time, which can make projected enrollment numbers significantly	3/8/2026 8:12 PM

	lower than the reality that unfolds. Evansdale Elementary had this issue the last time Dekalb redistricted as 120 more students than estimated showed up for the school year because the student estimates had significantly underestimated our area and large amount of families with children continuous moving into our area. Closing a school based on projections that may undercount future students could create unintended consequences for the district, including overcrowding in neighboring schools and the loss of an established community hub. Evansdale Elementary has the land capacity, community support, and projected growth to remain a strong and sustainable school within the Lakeside cluster. Rather than closing it, the district should consider renovating and expanding the facility so it can continue to serve current and future families. Thank you for your time and for considering the long-term impact of this decision on students, families, and the broader community. Sincerely, Matt Murphy Please keep Evansdale Elementary intact and keep it as a key member of the Lakeside High School community.	
226	Closing Evansdale doesnt just close a building - it dismantles the only dual STEM + FRENCH Immersion school in Dekalb. The French immersion pipeline flows into Middle and High school. The entire educational path way collapses without the elementary school anchor. The District said that target schools with "low educational adequacy" near schools with more capacity. Evansdale is a magnet/choice school drawing students county-wide. The enrollment model is fundamentally different from neighborhood schools. Was Evansdale's enrollment evaluated against it's magnet draw, or was it misclassified as an underperforming neighborhood school? Who is leading this effort? It was started by a criminal- and a completely flawed choice for superintendent by the School Board. Now HPM is in control and no one has the power to stop them. THe COMMUNINTY has never had direct input until now. Further, the School Board has shown its inability to work together, each member failing to represent the county as a whole. Several failed appointments in leadership, clearly dysfunctional school board members, and a lack of transparency in the process leads to only two conclusions - the board do the right thing and suspend this process until the time that a full time and credible Superintendent is appointed, OR the citizens of Dekalb County must ask the State Board of Education to dissolve the county school board and allow the State to oversee the County education system.	3/8/2026 8:11 PM
227	Please keep our clusters together. Please help our schools not be so overcrowded as they are in my cluster. My elementary school was very old. It was a great school but it didn’t seem fair that my friends went to schools that were so much nicer.	3/8/2026 8:09 PM
228	Hire more teachers, spend more on training amd support of teachers	3/8/2026 8:08 PM
229	Schools are not factories. Our children are our future. Just because numbers on a paper look “better,” does not mean that the outcome is better. Children need to feel safe. They need to feel understood. This is necessary before education can even occur. Larger schools are not the answer. Keep education in the neighborhoods. Schools are such an important piece of the community. Midvale elementary is a gem and its closure would be a terrible loss for the children, families, and community.	3/8/2026 8:04 PM
230	Standard based grading	3/8/2026 8:02 PM
231	* I support more early learning centers throughout DCSD. * I support a centralized program school in each cluster or "super region". * I STRONGLY do not support keeping older facilities, with low FCAs and Building Adequacy Scores, open simply because that school community doesn't want their school to close - there has to be supporting logistical and/or positive data to reverse any decisions. * I STRONGLY do not believe that a school's current "strong performance" should be a reason to keep a school open. We want all schools to have to perform strongly, and this is the path to get us there. * I STRONGLY do not support breaking up legal municipalities (i.e.: legally formed cities) between clusters as it is entirely possible to keep them together. * I STRONGLY believe that all decisions must be made in an equitable way that ensures resources and high-quality facilities are shared fairly across DCSD. All students, regardless of where they live or which school they attend, should have access to strong educational environments and facilities that support their success. *Specific to my cluster (Dunwoody Cluster), I support the current plan of closures/consolidations/expansions. We need our elementary schools geographically distributed throughout our cluster to serve everyone and I support options to expand the high school in the future.	3/8/2026 8:02 PM
232	Evansdale supports a unique French language program within the Lakeside cluster, which relies on a strong partnership between teachers, parents, and the community and connects to continued language study at Henderson Middle and Lakeside High School. Preserving this program and the neighborhood community around Evansdale would strengthen the cluster	3/8/2026 7:55 PM

	while still allowing DCSD to pursue its broader goals of efficient facility use and expanded student opportunities.	
233	N/A	3/8/2026 7:54 PM
234	I strongly suggest reevaluation. Considering more closely community input, the variety of unique learning opportunities, and events the smaller Pre-K through 5th school environments offer.	3/8/2026 7:54 PM
235	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment	3/8/2026 7:52 PM
236	Evansdale is a neighborhood school and the reason we moved to the area	3/8/2026 7:51 PM
237	Please do not take any final decisions without getting feedback from the parents that are impacted by those changes.	3/8/2026 7:50 PM
238	The disparity in innovation, improvement, and advancement for South DeKalb scholars is evident in this proposal. By considering the closure of schools in predominantly Black and Brown communities while planning investments elsewhere, the district sends a troubling message about whose students and neighborhoods are seen as worthy of growth and opportunity. Instead of abandoning these communities, the district should be investing in them. South DeKalb deserves the same commitment to progress, innovation, and excellence that other parts of the county receive. That means attracting young families by strengthening neighborhood schools, recruiting and retaining top-tier educators, and investing in modern, inspiring learning environments. Our scholars deserve facilities that ignite curiosity, programs that prepare them for the future, and educators who are supported and empowered to help them succeed. When schools are closed rather than strengthened, it sends a message to students and families that their communities are not worth the investment. South DeKalb students are just as talented, capable, and deserving as any others in this district. The role of this board is not simply to manage buildings and enrollment numbers—it is to ensure every child, in every community, has access to opportunity. Closing our schools does not reflect belief in our scholars. Investing in them does.	3/8/2026 7:47 PM
239	Evansdale is a true neighborhood school. Multiple generations of our neighbors have attended.	3/8/2026 7:46 PM
240	Although facility decisions are important, the highest priority for my family is to make every effort to keep the Ashford Park students, teachers and faculty together to maintain the amazing community and exceptional learning at APES. Thank you for your consideration.	3/8/2026 7:46 PM
241	I think it would be so helpful if you could keep explaining what people are giving up in terms of programming when the elementary enrollment falls below 450.	3/8/2026 7:45 PM
242	Please dont close Evansdale. I dont know what I would do with my kids.	3/8/2026 7:41 PM
243	Would like to continue at our current elementary school (Chesnut) and not to be rezoned	3/8/2026 7:39 PM
244	KEEP OAK GROVE ELEMENTARY!!!	3/8/2026 7:39 PM
245	Please do not close Oak Grove Elementary.	3/8/2026 7:31 PM
246	In addition to having parents come out to meetings, take the time to go into schools that could be affected to get feedback from admin, teachers, staff, parents, students, and other stakeholders. Consider how local businesses may be affected. Increased traffic patterns.	3/8/2026 7:31 PM

	Pedestrian safety (that is already a HUGE concern). Find creative ways to get valuable feedback from communities aside from in-person meetings at times and locations that could be difficult to attend and online surveys that unintentionally marginalized those with limited English and literacy proficiency.	
247	The lakeside cluster seems to be consistently growing. Oak grove elementary specifically continues to meet both utilization goals and academic milestones. Closing a thriving school/community seems short sighted. Start with the schools who are not achieving goal utilization rates. Or those not achieving academic goals. Or those who want a change. Phase this project out; don't start haphazardly with 27 schools. And consider HPM's motives and skill set. They seem suspect with this being their largest project, openly discriminating against north Dekalb, and having ties to Horton.	3/8/2026 7:27 PM
248	Schools that are being kept need to be assessed for working HVAC, plumbing and electrical issues. Many schools are VERY OLD and need to be updated to properly serve the students.	3/8/2026 7:26 PM
249	Rather than looking at cutting cost through facility costs, minimize programs, school choice, and school board FTEs, consultant costs, travel and new initiatives under consideration for a truly transparent and balanced budget can be presented to the public.	3/8/2026 7:24 PM
250	I hope that teachers will be distributed across these schools to decrease class sizes and offer more programs. Thank you!	3/8/2026 7:24 PM
251	Please leave Oak Grove and Lakeside alone.	3/8/2026 7:23 PM
252	I'm very concerned that not enough will be completed, fast enough, and with the most sound tax appropriations. I'm very concerned that Dekalb's "opportunity" right now could be squandered, by good old Dekalb lackadaisically.	3/8/2026 7:22 PM
253	If you actually care about feedback, stop this process now, and provide actual information as to what you plan to do. To do this right now when you don't even have a superintendent is very wrong. The last few times DCDS tried redistricting it went poorly because the information was wrong and poorly communicated, and this is exactly the same thing again.	3/8/2026 7:22 PM
254	Lakeside can accommodate 3 years, freshman class can be put at Henderson Middle, and you can leave the elementary schools alone.	3/8/2026 7:16 PM
255	There is a wonderful possibility of Evensdale Elementry being expanded, do NOT destroy this community school.	3/8/2026 7:13 PM
256	Unsure	3/8/2026 7:07 PM
257	NA	3/8/2026 7:05 PM
258	Do not touch Coralwood. That school is special and serves a very unique community of students. It would be a devastating loss if you tried to change it. Don't consider closing Hawthorne. My child (a Coralwood graduate) is thriving there under great teachers.	3/8/2026 7:05 PM
259	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/8/2026 6:53 PM
260	Student educational quality would be sacrificed with the current proposal which is not acceptable given the present academic performance of students in DeKalb County.	3/8/2026 6:52 PM
261	The Lakeside high school cluster and specifically Oak Grove Elementary are a prime example	3/8/2026 6:44 PM

	of a community that supports public school education and the results speak for themselves. Closing a school of this caliber will reignite a trend of flight to the suburbs, increased private school enrollment in lieu of public education, and diminish a high income tax base. Revisiting this consolidation plan in this cluster may make sense if the enrollment trends decrease, rather than waht is being shown via current and forecasted enrollment numbers. If a short sighted decision is made, families will flee this region including this survey taker due to a clear lack of understanding from this committee.	
262	Please do not engage in such aggressive campus consolidation. Especially consider how these changes would impact programs like the French-English dual-language immersion track my son is enrolled in at Evansdale Elementary.	3/8/2026 6:42 PM
263	School choice was a great option for us to tailor our son’s education experience.	3/8/2026 6:38 PM
264	We moved to Oak Grove district specifically for how well of a job they do with inclusion for our special needs kids. It is truly a unique and amazing school and may special needs parents seek it out through moving here and the lottery. Please don’t close one of the only schools doing such a great job with our special needs kids and inclusion. You should be using Oak Grove as a model for elementary schools not closing it.	3/8/2026 6:38 PM
265	Ensuring equitable funding across all school clusters and communities is essential so that every school has the resources necessary to provide high-quality learning opportunities for all students. Additionally, encouraging families to contribute a designated number of volunteer hours to support their child’s school could further strengthen school communities and enhance student support.	3/8/2026 6:38 PM
266	Take the word equity out of the equation. Unfortunately, without proper parental involvement you will never get equity in public schools. The communities with ample parental engagement are doing well and do not want the disruptions and poor behavior from poorly run schools being fed into their schools. No one wants to be honest but, the truth is, if students do not have engaged parents then they fail. The students fail, the schools fail and the ones who don’t use school choice to get their children into different schools. This is why you have the problem you have. Parents who care, move their kids to successful districts. Equity is impossible. You will never achieve it and the more you force it on other districts the quicker you exasperate this growing issue.	3/8/2026 6:35 PM
267	Evansdale has been the anchor of our community for decades	3/8/2026 6:29 PM
268	Question 8: Additional Feedback Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove’s projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/8/2026 6:16 PM
269	Evansdale's French program is unique to the Lakeside cluster. - Neighborhood parent, teacher, and community volunteers provide needed resources and personnel for French students. Moving this program will eliminate a vital community to this program. - Older students mentor the younger students. It is critical to keep this program at Evansdale and within the Lakeside cluster to keep the program strong. - French teachers at Evansdale Elementary, Henderson Middle School, and Lakeside High Schools not only teach but live in and are a part of the community.	3/8/2026 6:15 PM
270	n/a	3/8/2026 6:09 PM
271	I want those who are currently zoned for Evansdale Elementary to remain zoned for Lakeside	3/8/2026 6:09 PM

	high school. Particularly if the number of students is lower in the county, then those zoned for Lakeside should remain zoned for Lakeside.	
272	Evansville has been a strong school. Closing it is short-sighted. However, if there are no other options and Evansdale needs to be merged with another school, it is imperative to keep Evansdale in the Henderson Middle and Lakeside cluster.	3/8/2026 6:05 PM
273	Please raise awareness of SAP beyond just school communities and get lawmakers engaged in increasing public school funding instead of closing schools.	3/8/2026 6:05 PM
274	Put the money where the communities are located as they pay the taxes and benefit from the local school and create more teaching jobs and administrative jobs.	3/8/2026 6:00 PM
275	Oak Grove Elementary is not underutilized, it is currently overcrowded. If capacity is an issue, the district should consider adjusting attendance boundaries rather than closing or relocating the school. Oak Grove Elementary is essential to the Lakeside/Oak Grove community, and closing or moving it would significantly impact local families. It is also worth noting that the Lakeside/Oak Grove area generates roughly 1.7–2× the district's average property tax base per student, reflecting the strong support our community provides to the district. For these reasons, I strongly urge the district to keep Oak Grove Elementary open.	3/8/2026 6:00 PM
276	There are things that DCSD has done well, mainly with programs such as the magnet program and early elementary/inclusion programs like that at Coralwood. These are the types of programs that should be expanded, not discontinued, and the SAP should take that into consideration when looking at the use of programs in the county. I know I am not including every program that is available in my examples, I am including the ones that have impacted our family directly.	3/8/2026 5:56 PM
277	Please do not shut down Oak Grove School. I understand that everyone has emotional ties to their own school and that this decision would be difficult for anyone. I would urge you to look at data (accurate) and facts. I would also suggest stopping any initiatives started by a corrupt leader and move towards a fresh start. I heard some of that philosophy in the meetings I attended and it was encouraging. And, I have no faith or trust in the school board. Stopping this planned chaos would be an opportunity to show that there is a willingness to be flexible and thoughtful for the students. Y'all are not overseeing tire factories. You are responsible for creating a context that provides the best opportunities for our children to learn. Mega schools, while highly profitable for the builders and businesses involved, deprives children of well known needs based on outcome data in the field of education. Please be wise. Please be thoughtful.	3/8/2026 5:54 PM
278	I have noticed that there are lots of young families moving into this neighborhood. I believe they would benefit from a great public school like Oak Grove.	3/8/2026 5:51 PM
279	Given the situation at APES, if feasible, consideration should be given to reducing the quantity of grade levels contained within the school to allow the current enrollment to shrink to a level to where the school's current facilities could adequately accommodate the students. I do not know all of the details, but I know that, currently, some upper grades (possibly 3rd, 4th and 5th) feed some students into Kittredge Magnet school. I'm not sure how that school functions, but having this school, dedicated to higher achieving students, while ideal, may not be of the greatest benefit to the families currently attending APES. It may make more sense to have all upper level elementary grades moved to a new/different school.	3/8/2026 5:51 PM
280	1) One of the main premises for SAP that has consistently been mentioned is the declining enrollment and projected decline in trends. We have not heard anything about the reasons for declining enrollment (even though population in Dekalb County is increasing) and any strategies to increase enrollment. 2. As mentioned previously, I think parents would like to hear about the programs. Specificially, I am interested in the Gifted and magnet schools and how they will be affected (or unaffected) in the next round.	3/8/2026 5:44 PM
281	Ashford Park needs to be fully rebuilt. In the meantime, the entire student population could be temporarily shifted to John Lewis ES, while remaining Chamblee Cluster. If AP students were to permanently move to JLES, then JLES must also be rezoned to Chamblee cluster. It does not make any sense to fully dismember and disassemble a high-functioning school community. If DCSD is truly concerned about equity, the district needs to focus more on programs and how to bring high-quality teaching and support to other schools before dismantling a school that thrives despite willful inattention from the district. If the district wants to put students first, then they need to look at student performance metrics (in various forms) and do what fits the	3/8/2026 5:39 PM

	students with least amount of student (and family) disruption and give them a building that fits the students….not the other way around. Put the students first!	
282	Oak Grove is a part of our neighborhood. We walk to get there. We walk home after school. It's one of the primary reasons we chose to live where we do. If we get rezoned to a repurposed middle school or overcrowded elementary school - we'll leave the district or find a private option. We want public ed to work. Our experience with OGE has been even better than we expected.	3/8/2026 5:36 PM
283	Listen to this input, reevaluate the numbers, make it make sense. Oak Grove already exceeds the 88% utilization target (89% current; 96% projected). OGE has four consecutive years of enrollment growth. OGE Ranks in the top tier academically. Plus it would require significant capacity adjustments at Sagamore Hills and Briarlake to make this scenario work. Remove Oak Grove Elementary from the closure list.	3/8/2026 5:30 PM
284	We must think about unintended consequences as we pursue these changes. Let's not harm institutions that are performing well and where scholars are thriving (Dekalb School of the Arts) for short term solutions. The microclimates that students experience every day should be taken into account. Students should also get a voice in these decisions. It would be inappropriate and unwise for us to not involve all stakeholders in the decisions we make and to give proper weight to the students' voices since they will be most impacted.	3/8/2026 5:21 PM
285	The SAP program’s alignment with the traditional PK–5 / 6–8 / 9–12 grade structure is developmentally appropriate and promotes equity. This framework corresponds to recognized stages of childhood, early adolescence, and late adolescence, minimizing social-emotional and academic challenges that can arise from mixing students across very broad age ranges.	3/8/2026 5:20 PM
286	information about closing was not provided to the community if it had not been for a mother of 2 children given flyers	3/8/2026 5:20 PM
287	Please keep Brookhaven Fields in the same cluster as Ashford Park and Drew Valley. We invested a lot to move to this community and raise our family here. It is scary to think it could get broken apart.	3/8/2026 5:19 PM
288	grade bands work only if community within the school is established where interaction between the grades is deemed important to form a community. Students helping students	3/8/2026 5:17 PM
289	Again, I think it is too great a loss for elementary children to loose their neighborhood schools.	3/8/2026 5:13 PM
290	Make sure that current data is being used to make decisions. Get out to the schools, meet with parents , teachers, school administrators. Have the mind set of modeling top performers.	3/8/2026 5:12 PM
291	Again, you will be more successful if you promise to keep the existing clusters and attendance lines together but work to consolidate some facilities within the clusters.	3/8/2026 5:10 PM
292	The SAP project is a welcomed development that will reposition the schools greater impacts on the students	3/8/2026 5:10 PM
293	Redrawing the boundaries will inevitably split the children into different schools. It will disrupt the development of our children and cause dissension within communities. Additionally, there will be negative impact on some property values. Unless you'd like some lawsuits on your hands I'd suggest you dismiss all of this nonsense.	3/8/2026 4:57 PM
294	Kingsley has such a strong community and have worked hard to fight against unfair judgements. The school has amazing teachers, most all of them know all the students. It has helped make this transition to elementary school so easily. I worry about these larger schools for my future kindergartner.	3/8/2026 4:56 PM
295	The age groups need to remain separate, due to current social media norms, and age-based changes of today's society.	3/8/2026 4:56 PM
296	Please don’t close high performing schools or magnet programs and instead expand upon them to benefit more students	3/8/2026 4:55 PM
297	DCSD is currently suffering from a lack of community trust. This whole initiative was started under the leadership of a superintendent currently under indictment for fraud. Keeping the community together including already existing APES neighborhoods including Brookhaven, Fields and drew Valley. Keeping things consistent in what’s actually working in this district: APES is the top performing ES in DCSD and should be protected to keep teachers, staff,	3/8/2026 4:54 PM

	students, and family members in the same community that has proven time and time again that when the county fails to equip a school or community with resources and appropriate facilities, the community will support their school and ensure it has what it needs to succeed. DCSD risks losing these families and educators by messaging out a half baked plan that affects them directly. They will leave the district.	
298	It's going to take raising the median income of the neighborhoods, and making the neighborhoods more attractive to more families moving in, that can invest time and resources into the schools. So hopefully a slower approach can be rolled out to give things time to improve.	3/8/2026 4:53 PM
299	Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake	3/8/2026 4:53 PM
300	We pay hefty taxes to live in Ashford Park and specifically moved to this community to be able to walk to our elementary school. This will negatively affect our home value and encourage us to move away from Dekalb County. We are a medium to high tax bracket and good contributors to our community. Additionally there are massive data centers being developed in Dekalb County that are paying massive permitting and impact fees that should be going towards improving our schools not shutting them down.	3/8/2026 4:42 PM
301	Do not close evansdale elementary	3/8/2026 4:39 PM
302	You have put yourself in a pickle with a building's first proposal by an underqualified vendor with financial incentive to close schools that would create new expansion schools and spent most of their sessions arguing with parents. You have broken the public's trust. I would not release new scenarios until you can correct the data, as you will not gain what you lost back.	3/8/2026 4:37 PM
303	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment	3/8/2026 4:35 PM
304	Oak Grove has a high utilization, 89%expected to grow to 96%. It is also very highly ranked academically.	3/8/2026 4:34 PM
305	I know that Dekalb is receiving/about to receive substantial revenue from the Data Centers being built in the county. I work for one of the General Contractors who is leading construction for several Data Centers in the area. Take these funds and improve the school system, the schools, and improve the lives of the teachers. This is an opportunity to take a giant leap forward, not a step backwards.	3/8/2026 4:33 PM
306	Questions and investigations needs to be made as to why, the root cause of low enrollment. Has population in the country decreased or less children, or are parents/guardians making choices to send children elsewhere. School ratings/grades are not great among most of Dekalb county. 90% off schools across all bands would be an extremely difficult decision for me to send my child vs private school or homeschool	3/8/2026 4:28 PM
307	Oak Grove is the best	3/8/2026 4:25 PM
308	Oak Grove Elementary is the greatest school in the nation	3/8/2026 4:25 PM
309	Oak Grove Elementary is a model for a tight-knit school community, with parents of different income levels committing to public education for their children's through high school. Breaking	3/8/2026 4:25 PM

	up this school community may lead to lower levels of trust and involvement with DeKalb schools.	
310	Oak grove elementary is the best school that has ever existed.	3/8/2026 4:24 PM
311	Families want safe, neighborhood schools! Giant mergers don't feel like a sense of community	3/8/2026 4:24 PM
312	The list seems arbitrary to begin with, but that said, Oak Grove and Vanderlyn stand out as soar thumbs. If anything, both of these schools should be among the (if not literally the) *last* to be on a list of potential closures. And the powers that be are for sure hearing about it (but will they listen?).	3/8/2026 4:23 PM
313	I think it's important to maintain something that's actually working in this district: APES is the top performing ES in DCSD and should be protected to keep teachers, staff, students, and family members in the same community that has proven time and time again that when the county fails to equip a school or community with resources and appropriate facilities, the community will support their school and ensure it has what it needs to succeed. DCSD risks losing these families and educators by messaging out a half baked plan that affects them directly. They will leave the district.	3/8/2026 4:22 PM
314	Oak Grove already exceeds the 88% utilization target. It has had 4 consecutive years of enrollment growth, and ranks in the top tier academically. If the goal is to close the utilization gap, the district should prioritize school operating well below 70% utilization.	3/8/2026 4:21 PM
315	Ashford Park Elementary is a thriving community school that supports strong academics, engaged families, and long-term student success. Preserving the integrity of this school community by keeping the students and teachers together would serve the best interests of both students, teaching staff and the surrounding neighborhood.	3/8/2026 4:16 PM
316	It is just as important to keep our schools open in South Dekalb as it is in North Dekalb. Decisions such as this should certainly be heavily influenced by what the parents think	3/8/2026 4:14 PM
317	Why not relocate some of the students from the north to the south to make sure that the facilities are balanced. Change the boundaries just like it was done before to avoid over crowding not only in the north but also in the south. We need ALL students in DeKalb County to be provided with the best education possible. We need equality and quality education for our students, our teachers, administrators, staff and community in the entire DeKalb County School District.	3/8/2026 4:13 PM
318	Todos están muy buenos,porque maestros y alumnos asen su mejor esfuerzo para enseñar bien y aprender mejor	3/8/2026 4:12 PM
319	We are planning for our 3 girls to switch to Austin in the near future. It's important to me to try to keep teacher to student ratios low. I'd like to see two teachers in kindergarten classes. I went to Oak Grove as a kid and can't imagine closing that school. It's such a special community and so many families buy homes there solely because of Oak Grove.	3/8/2026 4:08 PM
320	I honestly don't agree with - or trust - this process continuing under an interim superintendent and knowing it was started under a superintendent indicted on federal charges of misconduct. The board should pause this process until the new superintendent is confirmed and THEY should then lead this process.	3/8/2026 4:07 PM
321	Family support of this school is significant and shows that it will continue you to be an attraction to young families	3/8/2026 4:06 PM
322	None at the moment	3/8/2026 4:06 PM
323	why not return to a K-6 model like in previous years to fill the elementary schools and decrease the need for trailers in middle/high school?	3/8/2026 4:02 PM
324	Closing both evansdale and Henderson mill is a very short sighted idea that will not work	3/8/2026 4:02 PM
325	Keep Brockett Elementary Open	3/8/2026 3:56 PM
326	I understand that these are just first steps. I understand that options need to be explored. However, to move forward with actually making decisions without having a BOE in place that demonstrates integrity and taken time to build trust is just perpetuating the circus.	3/8/2026 3:56 PM
327	I disagree with the proposed grade band and closing schools in our area will have a negative impact on our property values and is a disservice to our children.	3/8/2026 3:53 PM

328	I think elementary schools should not be closed. Close or consolidate middle and high schools. I think younger children will do better in smaller classroom with more teachers. As children mature then increase the class sizes.	3/8/2026 3:52 PM
329	It's absurd to make building decisions without talking about boundaries and programs. This whole process became a joke.	3/8/2026 3:52 PM
330	I think DCSD should focus more on the curriculum and resources for students and teachers. There is no reason we should be behind the state of Tennessee with providing an education for our students. Over the summer teachers need a revamping summit to address new strategies as well as dealing with students with disabilities.	3/8/2026 3:51 PM
331	Please do not shut down Oak Grove. This school is a cornerstone in my neighborhood. My kids have loved it. Also if the idea of growth is to move them to other elementary schools in this area, the roads are already so congested, the additional school traffic will send people over the edge and be so dangerous for the little ones.	3/8/2026 3:49 PM
332	You need to focus on the impacts to the schools that are expanding, and the disruption that such an expansion will cause to current students of the assigned facility, as well as to the individuals that live and work near the schools.	3/8/2026 3:31 PM
333	Again, I am completely against the discussion of closing so many schools. Bigger is not better. It's just bigger. My child is the product of a successful French immersion program that has helped shape her educational trajectory and is thriving. I think it would be a shame for others not to be able to experience dli programs as such.	3/8/2026 3:31 PM
334	N/A	3/8/2026 3:29 PM
335	4 day school weeks. I know it doesn't help with the problem of missing 20,000 seats but it might bring families and educators to DeKalb Co.	3/8/2026 3:28 PM
336	Our Ashford Park community has spent years pouring its heart and soul into making Ashford Park more than just a school; it is a vibrant, high-achieving family that has proven its worth through exceptional test scores and prestigious awards. We have worked incredibly hard to build this foundation of excellence, and we deserve to be seen as a role model to be invested in and expanded—not a line item to be cut. This isn't about administrative convenience or cutting costs; it’s about the children and the deep-rooted bonds that make our neighborhood thrive. Even if it means relocating to a nearby building within the Chamblee cluster to gain the space we need, our priority is staying together. We plead with you to protect our beloved community and choose growth over closure, ensuring that the excellence we’ve built continues to flourish for generations to come. Thank you!	3/8/2026 3:28 PM
337	Close the Ashford Park facility as a neighborhood school, shift the Ashford Park Elementary attendance zone to the current John Lewis Elementary facility, and preserve Chamblee cluster alignment.	3/8/2026 3:19 PM
338	I think you are doing the children a disservice to band schools together	3/8/2026 3:17 PM
339	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove’s projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/8/2026 3:15 PM
340	Before you focus on schools, you can save half a billion dollars by cutting the non teaching headcount in half.	3/8/2026 3:14 PM

341	We feel like the decision has already been made & these surveys are used to only appease the community. Millions of dollars have been spent to hire outside companies when that money could have been put into the schools to make the schools better. It feels like we can't trust Dekalb	3/8/2026 3:13 PM
342	Regarding the clusters I feel like it should be based of the parents preference but also the options should not be far away.	3/8/2026 3:06 PM
343	This entire process should be paused and reassessed once Dekalb County Schools has earned the trust of it's constituents and there's stable leadership in place. Also, my daughters are in the Ashford Park German Immersion program, and it has been a wonderful experience. Our expectation is to continue this experience while our daughters are attending Dekalb County Schools.	3/8/2026 3:04 PM
344	How will the SAP changes affect DCSD employees?	3/8/2026 3:02 PM
345	n/a	3/8/2026 3:00 PM
346	As the district develops the next round of scenarios, I encourage decision-makers to carefully consider both the data and the lived experiences of students and families in schools like Oak Grove Elementary within the Lakeside cluster. My daughter is currently a first-grade student at Oak Grove. When she first enrolled, the transition to a larger school environment was challenging for her. However, the leadership, teachers, and support systems at Oak Grove helped her find her footing quickly. Over the course of this year, she has grown tremendously both academically and socially. Her MAP scores have increased significantly, and she was recently recognized as Student of the Month. Experiences like this highlight the strength of Oak Grove's school culture and instructional environment. As someone who works professionally in public education, I fully understand the importance of evaluating enrollment trends, facility utilization, and long-term financial sustainability. Those are responsible practices for any school district. However, it is equally important to recognize when a school community is functioning exceptionally well. Schools like Oak Grove represent successful models of neighborhood-based education with strong leadership, engaged families, and measurable student outcomes. For the next round of scenarios, I would encourage the district to: • Ensure enrollment projections and utilization data are carefully validated at the cluster level before major structural decisions are made. • Prioritize maintaining successful neighborhood schools in communities with stable enrollment and strong performance. • Consider targeted solutions for areas experiencing sustained underutilization rather than applying uniform structural changes across the district. • Study and replicate the conditions that contribute to the success of high-performing schools like Oak Grove in other parts of the county. Thoughtful, data-driven planning that preserves strong school communities while addressing district-wide challenges will ultimately produce the best outcomes for students across DeKalb County.	3/8/2026 2:57 PM
347	Neighborhood parents, teachers, and community members support the school and provide volunteers for the French Immersion Program. Evansdale is a successful and diverse school that continues yea to serve the needs of the community.	3/8/2026 2:50 PM
348	less grades per school the more focus on the student. Dont mess it up!	3/8/2026 2:47 PM
349	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/8/2026 2:46 PM

350	Significantly more focus needs to be placed on the impacts of the proposed changes on the local communities.	3/8/2026 2:46 PM
351	Whatever occurs , Candace Steadman should not be an administrator in the county.	3/8/2026 2:45 PM
352	Our biggest wish is just to keep our community together as we have a very strong community of supportive families and active loving teachers that have been in the school for many years. It feels difficult to give any specific feedback without knowing where our children would be going if our school is closed. We do not want to be moved out of the Chamblee cluster. Most ideal scenario would be not closing an overcrowded well running and high performing school due to size of the lot and instead investing in this community and what we've put into our school by either increasing size of the school or doing a grade band scenario where certain grades go to a different campus. E Rivers had a very small campus and was able to increase school size and redevelop the school to their needs.	3/8/2026 2:45 PM
353	More support for the schools	3/8/2026 2:45 PM
354	Evansdale provides community engagement and support by hosting events and being a French Immersion school. Neighborhood parent, teacher, and community volunteers provide needed resources and personnel for French students. Moving the program would destroy this vital community. French teachers at Evansdale Elementary, Henderson Middle and Lakeside High Schools have put down strong roots in our community. Older students mentor the younger students. It is imperative to keep this program at Evansdale and within the Lakeside cluster to keep the program strong.	3/8/2026 2:44 PM
355	Please do not claim to reach out to the community to get everyone's voice when you cherry-pick questions and reframe them for the public to hear. Please do not put time limits on questions. Yes, your time matters but so does the community's time - and you get paid for it. Let families speak, share, question in the public forum. Please respect the question and answer truthfully.	3/8/2026 2:43 PM
356	Kittredge Magnet js #1 school and should not be eliminated. Rather, we need to see what is happening and see how we can replicate what is happening. Also, given challenges of the diverse areas, ethnicity, ESL students, need to solve for this and help ESL catch-up with English speakers. Montessori is also great to help kids learn materials.	3/8/2026 2:41 PM
357	If my children are not able to attend Oak Grove Elementary, we will certainly be moving out of this school district. I've heard this from many families who are worried about losing their community schools. Please re-think these scenarios, in order to preserve our schools.	3/8/2026 2:40 PM
358	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/8/2026 2:31 PM
359	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion.	3/8/2026 2:31 PM
360	Brockett Elementary's location allows students in the immediate area to maintain a sense of	3/8/2026 2:29 PM

	neighborhood/community. Also, structurally the buildings sound and recently had HVAC upgrades. Brockett could also be kept open with enrollment maximized by expanding its zone or by providing Pre-K3 services there.	
361	Please attempt to keep neighborhoods together. Please do not rip kids away from high schools as they are in the middle of high school-they have so much pressure to think about college and friend groups and that seems really difficult as they are wrapping up their primary education. Relationships are strongly formed by this age and it would be really rough and disruptive to move during high school. With elementary school encompassing six grade levels, it makes sense to divide these up into more manageable sizes if changes are going to be made.	3/8/2026 2:27 PM
362	The district should prioritize schools operating well below 70% utilization, however oak Grove is currently at 89% capacity with projection to be at 96% for 2026-2027.	3/8/2026 2:24 PM
363	We need to continue to have community discussions involving potential changes to our school district.	3/8/2026 2:22 PM
364	I recognize that the district has framed SAP around enrollment trends and utilization. Any proposal should clearly demonstrate how those metrics are being applied at the cluster level. The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made. Vanderlyn is a diverse, academically strong, and inclusive community. Preserving stable elementary environments while solving high school challenges aligns with district priorities.	3/8/2026 2:20 PM
365	I think more data is necessary before considering eliminating the capacity of Oak Grove that is needed to support our communities investment.	3/8/2026 2:19 PM
366	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/8/2026 2:19 PM
367	I support district growth, but I strongly oppose moving our neighborhood out of the Dunwoody cluster. Peachtree Industrial is a major safety hazard for children and is not a walkable boundary. Our family chose this community because of the Dunwoody schools and the stability of the current feeder pattern. Please find solutions that allow the district to grow while keeping established neighborhoods in their existing clusters.	3/8/2026 2:18 PM
368	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to	3/8/2026 2:17 PM

	avoid eliminating capacity needed to support major community investment. In addition, data on performance of the schools should be an important part of the decision making on which schools to keep open or close. Careful attention to how to support the receiving schools, what resources will be given to continue excellence in student instruction also need to be considered in this plan.	
369	Without data to back up what the long term ripple effect of consolidation will bring, then those who vote to move forward with any consolidation will be responsible for negative results. This means SAP should look at things such as why enrollment is declining, how to increase it, what cultures each school brings and what it would mean to merge one school culture with another. When merging schools, what supports and trainings are provided for the following years to equip all parties involved? How will the district reinvest the saved money back into the particular areas where the schools are closed rather than redistribute equally across the entire district? Bc if you re-distribute equally then you will continue to see the southside enrollment drop and the Northside increase as they are the ones who will keep consolidating resources as the concentration of the schools move further and further north.	3/8/2026 2:16 PM
370	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/8/2026 2:16 PM
371	Close Kingsley and rezone some of the houses to Vanderlyn to make up for the empty seats at Kingsley. Or, leave Kingsley open and rezone high tower	3/8/2026 2:14 PM
372	Closing schools are already near or above utilization targets redistribute students without reducing excess capacity. If the adjective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, we're consolidation meaningfully improves efficiency without triggering new capital expansion.	3/8/2026 2:07 PM
373	Concentrate on other areas besides South Dekalb area. Be inclusive.	3/8/2026 2:06 PM
374	Evansdale Elementary: neighborhood parent, teacher and community volunteers provide needed resources for French students. So would like to keep this program intact. French teacher at Evansdale, Henderson Mill middle and Lakeside High schools has strong roots in our community. Older students mentor. It is imperative to keep this program intact at Evansdale and within Lakeside cluster to keep the program strong.	3/8/2026 2:06 PM
375	Neighborhood parent, teacher, and community volunteers provide needed resources and personnel for French students. Moving the program would destroy this vital community. Also, French teacher at Evansdale Elementary, Henderson middle and Lakeside high Schools have put down strong roots in our community . Older students mentor the younger students. It is imperative to keep this program at Evansdale and within the Lakeside cluster to keep the program strong.	3/8/2026 2:00 PM
376	Oak grove elementary is top elementary in Dekalb. It should be used as an example rather than a victim of poor resource utilization	3/8/2026 1:59 PM
377	Please consider offering a well-written and much more thorough proposal next round, otherwise our ability to give feedback is limited.	3/8/2026 1:58 PM
378	Oak grove is highly utilized and highly sought out school and incredibly active within the community. It would be a shame to close it. There is no need. We need to find the money for facilities improvements and work on hiring leaders with the school system that aren't stealing money.	3/8/2026 1:57 PM

379	Evansdale elementary has a unique location and property size that would allow expansion both behind the school and on a second level of the existing facility all while maintaining the two playgrounds and a large soccer field and track all necessary for balanced physical as well as mental development. Many young families have moved into the Evansdale territory with hopes their children could be attending… closing the school would present enormous disruption to the area and its real estate values	3/8/2026 1:57 PM
380	Having smaller grouping of students in the same age group facilitates greater integration because it's important for fellow students to recruit students outside of their friend group in order to have a team or club. Smaller grade level to hearts within a specific school facilitate that.	3/8/2026 1:56 PM
381	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/8/2026 1:56 PM
382	Oak Grove is a high performing and stable school with increasing enrollment. With significant employment and residential growth in the Clifton Corridor, future enrollment demand may increase. Maintaining Oak Grove and preserving current capacity will support long term planning, student choice opportunities, and community stability.	3/8/2026 1:54 PM
383	Having observed friends in other school districts I am in favor of less school transitions (not city of Decatur structures) and at the same time having 12 year olds and 18 year olds at the same school seems very challenging from a behavior management process. If they had to a change I would do preK to 8 and the. 9-12. I feel like the current system serves kids well.	3/8/2026 1:51 PM
384	N/A	3/8/2026 1:42 PM
385	Please do not announce scenarios without full context. This is a very emotionally powered topic, and I do not believe it is being explained or rolled out with enough sensitivity.	3/8/2026 1:38 PM
386	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/8/2026 1:33 PM
387	Please don't close our community school.	3/8/2026 1:30 PM
388	I also think that schools should get responsible bus drivers. My children sometimes don't get picked up or the bus comes late and that takes away learning time. I think schools should continue to focus on students education and I also think that the schools should try to become more like Gwinnett schools. The solution to this is not closing schools.	3/8/2026 1:29 PM

389	Oak grove is an excellent school	3/8/2026 1:27 PM
390	The next round of scenarios must reflect where the schools are overcrowded. It does not make sense to close assets in the area where the schools are already overcrowded. 85% of capacity is acceptable. 115% of capacity is completely unacceptable. Manage the resource allocation toward that asymmetric distribution of acceptability.	3/8/2026 1:25 PM
391	From my experience, there has not been enough consistency in the district making the necessary transitions from one school to another difficult.	3/8/2026 1:22 PM
392	Focus on keeping communities together and in the same clusters they are in today.	3/8/2026 1:19 PM
393	Neighborhood parent, teacher, and community volunteers provided the needed resources and personnel for French students. Moving the program would destroy the vital community. We have French teachers who have put down roots in the community (Lakeside and Evansdale area), and older students often mentor younger students. It is important to keep the program at Evansdale within the Lakeside cluster to keep the program strong.	3/8/2026 1:19 PM
394	Strong consideration should be given to preserving high schools, particularly Lithonia, assuming that the facility is (or can be made to be) suitable for that purpose. To that end, the amount of investment needed to bring the Druid Hills campus up to standards should be critically reconsidered in light of the other changes needed to address the mismatch between capacity and enrollment Districe-wide.	3/8/2026 1:17 PM
395	A emphasis should be made to keep existing clusters and students together. Moving students to a temporary school for a few years while their school is renovated or built, but keeping students within the same cluster would be preferred. Most communities have been built up around the elementary, middle school, and high school path with family, friendships, teammates, and relationships. Moving physical school buildings, or even having the latest and nicest school buildings is a much less important issue compared to keeping communities together.	3/8/2026 1:10 PM
396	Please don’t make thriving schools suffer for other schools with poor enrollment	3/8/2026 1:09 PM
397	Why aren't other scenarios being presented now? Why wait?	3/8/2026 1:09 PM
398	Evansdale’s French language immersion program is a unique offering to the Lakeside cluster and a beloved opportunity for the communities’ children’s and teachers alike. - the French teachers at Evansdale ES, Henderson HS, and lakeside HS have put down strong roots in our community. Older students mentor the younger students. It is imperative to keep this program at Evansdale’s and within the Lakeside cluster to keep the program strong and thriving.	3/8/2026 1:07 PM
399	My feedback is that people, in general, cannot comprehend global vision. Especially parents. And, this will always be tainted with Dr. Sauce’s predecessor’s footprint. But, this is important work, Dr. Sauce has set a precedent from day one, that he is listening, and I pray that people will avoid divisiveness and imagine a future that promotes positive experiences in every area of our county though it may not be exactly what they think they should have.	3/8/2026 1:05 PM
400	The French immersion program is a valuable program that should continue.	3/8/2026 1:05 PM
401	Please avoid small carve outs and keep our communities intact.	3/8/2026 1:00 PM
402	The high achiever magnet program is the most successful program in Dekalb schools. The wait list is long enough to accommodate a second 4-6 Kittredge-like school in the Tucker/Lakeside cluster area, where the population requires a larger amount of advanced placement courses already. Wadsworth accommodates the Druid Hills and southern Dekalb area. As Chamblee school demand increases (mostly due to the magnet program being there in the first place), redistricting may occur, making the magnet program (whose population stays the same) the scapegoat of the community. The high achiever magnet program was made to provide the opportunity for ALL high-achieving students to receive the necessary resources, teachers, and classes to achieve academic excellence. It was NOT founded to cater to a particular neighborhood. It is important for this program to be open for all areas of Dekalb, due to extreme advanced placement class differences in schools. This is why a stand-alone high achiever magnet 7-12 school makes sense. However, it needs to have modern buildings to accommodate this population’s unique needs. A new 7-12 magnet school also needs to be in an area that is easy for parents to send their kids. Looking at the data, there is a large population of kids from Druid Hills, Dunwoody, Chamblee, and Lakeside at Kittredge. Any new magnet program needs to be accessible to these kids. A 7-12 school in south east dekalb	3/8/2026 12:56 PM

	would be a huge burden for these families who presently make up the largest high achiever magnet population. Parents would simply go to other schools if that became the option. It needs to stay in the north or central region in order to be successful.	
403	Want to see consideration of the community as well as your geography basis for planning.	3/8/2026 12:53 PM
404	Please don't close Oak Grove.	3/8/2026 12:49 PM
405	Why close schools that are doing well? Just charge more in taxes and leave our better schools alone. Close the worst performers not the best.	3/8/2026 12:48 PM
406	Please consider what is best for the students and teacher not just what is more convenient for the district.	3/8/2026 12:46 PM
407	Communities are important to schools and schools to communities. Oak Grove is highly supported by the community. Child populations are variable. If there is extra space in a thriving school, accept students from outside the area who wish to attend. But expect that the number of children in any age group will go up and down.	3/8/2026 12:44 PM
408	Why is the sas committee moving from closing 16 Elementary schools to 27? Nearby Elementary schools-sagamore and Briarlake are barely under capacity so where would Oak Grove students go? Although there is a financial benefit to closing schools school quality should also be considered. I have worked in 800 plus Elementary Schools and they do not match the quality of what we have at Oak Geove ES.	3/8/2026 12:43 PM
409	None at this time	3/8/2026 12:37 PM
410	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/8/2026 12:36 PM
411	Please create a larger map with a readable font that you can click on to magnify. Also provide a chart with actual scenarios of where students would be moved.	3/8/2026 12:30 PM
412	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Elementary Schools Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment. Also, it appears that SAP and DCSD is looking at hard numbers and not considering school performance, community involvement, and individual child needs met at each school. Building a great school with good community engagement/support takes decades. At the elementary level, it will be much harder to create the same positive learning environment in a school twice the size. OGE	3/8/2026 12:29 PM

	has 23% students with disabilities. Families actively seek out OGE for inclusion quality. The school also receives more federal IDEA dollars than Title I schools due to this model. Higher IEP/504 rate funds 2 teachers per classroom for those students. Spreading students across larger schools would be a disservice to all. OGE should be replicated, not dismantled.	
413	My main concern is that this is too big a change all at once. For a district as large and with as much SES and other diversity as DeKalb it would be better to start with a small test region and see if the changes improve student outcomes before rolling out massive changes district wide.	3/8/2026 12:24 PM
414	Evansdale has several parking lots, two playgrounds, and a large field that could be used or converted for other things. Evansdale's enrollment is projected to increase over 600 students by 2030. Evansdale can accomodate increased traffic. It is situated inside a neighborhood and not on a main road like the neighboring schools so it's safer.	3/8/2026 12:13 PM
415	Evansdale is an important part of the Lakeside cluster and fosters an important community and cluster relationship through its French DLI program. French teachers, students, and parents at Evansdale, Henderson Mill and Lakeside High collaborate with each other to foster love of the language and mastery of the French language. Lakeside High School French students often tutor the younger elementary French DLI students. The French DLI program is an important part of Henderson Middle with successful academic results seen from kindergarten through twelfth.	3/8/2026 12:00 PM
416	No consolidation should be allowed under any circumstances	3/8/2026 11:57 AM
417	I again just hope that demographics are considered when combining territories of schools. I also hope that appropriate resources are allocated to mitigate any potential negative outcomes from the combining of territories.	3/8/2026 11:57 AM
418	I would like to see scenarios with half or fewer school closures over a longer period of time. I understand Dekalb county has fallen behind on consolidation but the school system does not get to play catchup at the expense of the students and their communities.	3/8/2026 11:53 AM
419	Please take the time to better explain the why of the proposed changes. Specifically cite why schools need to be the particular size, how much money in actual dollars is being wasted each year on these excess facilities, what the fiscal and school house realities would be if these changes aren't made (higher taxes, lower teacher pay, lower services, etc). This would go a long way in selling the changes to the stakeholders and has not properly been communicated so far. DCSD has a long history of starting these structural change projects and not completing them because they are too hard (Dunwoody cluster redistricting in 2000, Cross Keys expansion/replacement for the last 20 years, Druid Hills debacle, 2015 North Dekalb high school expansion plans, etc). DCSD leadership needs to step up, make the hard choices that benefit the district as a whole and execute the plan no matter the complaints of a vocal minority. Without this all of DCSD will be dealing with the fallout for decades.	3/8/2026 11:51 AM
420	I am in strong favor of consolidating in order to free up funds to reduce classs sizes. A teacher has a fixed amount of time and mental energy in a day. When there are 30 students, that attention gets stretched thin. When there are 15, it does not just feel different. It functions differently. Fewer students means more feedback. Better connections. More individualized instruction. More time for each child. More learning. Class size matters.	3/8/2026 11:44 AM
421	Perhaps if the schools are not over capacity anymore, then trailers for classrooms would not be needed? This would be a welcome improvement and return to “normal” school building environment.	3/8/2026 11:37 AM
422	These school closures should have been implemented for the last decade or more but now the system is scrambling to catch up to a problem that has been put off by many leaders over the years. We must maintain good safe facilities with excellent outcomes to do whatever we can do protect public schooling.	3/8/2026 11:35 AM
423	Please keep in mind the attachments these schools bring to the long standing neighborhoods that are in.	3/8/2026 11:34 AM
424	I have seen first hand the declining youth population in Southern Dekalb. I can understand the need to make adjustments. I am only concerned about equity among the schools. Even though our population is declining here, we should have the same access and quality of services in South Dekalb.	3/8/2026 11:30 AM
425	This constant redistricting is exhausting. Please come up with a different way to manage the	3/8/2026 11:30 AM

	school district.	
426	Please make the fiscally responsible choice.	3/8/2026 11:28 AM
427	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/8/2026 11:28 AM
428	If students are traveling further distances already I can see the bands being more effective.	3/8/2026 11:26 AM
429	Additional information needs to be made to the community to have a better understanding of the picture as a whole and how it would impact each family individually. Additionally, I know this isn't mentioned in this phase but I urge the district to maintain the centralized High Achievers Magnet program as single-site facilities. It is a proven model that protects the specific needs of advanced learners and ensures DeKalb remains a competitive choice for academically gifted families. In a local school setting, these students are often socially isolated; in a Magnet setting, they find a sense of belonging that is essential for their mental health and academic confidence. High Achievers Magnet schools act as a center of excellence, housing a high concentration of teachers specifically trained and endorsed in gifted education. Spreading this expertise across multiple campuses would weaken the program's impact and make it nearly impossible to maintain the same standard of specialized instruction and advanced resource allocation. I also think it is imperative to remember the building these schools are housed in. If you are saying that Phase I is just about Buildings, please include those facilities in your recommendations.	3/8/2026 11:23 AM
430	Sending our kids through DCSD had always been a little tenuous for us given the use of laptops at such an early age and overall rankings compared to east Cobb schools. The quality of our elementary school was going to be the test for us, but if we lose that, we'll have no choice but to leave Dekalb county.	3/8/2026 11:21 AM
431	This is crazy! Just crazy!	3/8/2026 11:20 AM
432	I think this could work, but you will need to be very careful with this and make sure all grade levels stay on their designated hallways unless they have an upper level class. Also, all electives should be centrally located in the building so it wants to be too much interactions with upper class students. I would love to be a part of this discussion. My email is klcobb4@gmail.com.	3/8/2026 11:16 AM
433	Oak grove already exceeds utilization target. Has four years of enrollment growth and ranks top tier academically.	3/8/2026 11:09 AM
434	While a PK-3 and 4-5 split is conceptually ideal, it poses practical challenges for parents with multiple children attending different schools. To address this, schools within the same cluster must maintain an organic, close-knit relationship, such as co-hosting events. This new paradigm requires high connectivity between schools. Furthermore, there should be flexibility in teacher transfers, with the central district—rather than individual principals—assigning staff based on their commute distances. Periodically rotating teachers, principals and vice-principals could also strengthen this inter-school synergy. Lastly, we must consider that a PK-3/4-5 split may not fully resolve the financial issues intended to be addressed through consolidation.	3/8/2026 11:08 AM
435	N/A	3/8/2026 11:04 AM
436	What would the school hours look like for all the new changes? How do the changes affect the families' routines?	3/8/2026 10:57 AM

437	As future proposals are considered, it will be important to carefully evaluate how consolidation and larger school sizes could affect elementary students. Very large elementary schools may present challenges related to supervision, transportation, and maintaining strong relationships among students, families, and school staff. Smaller or neighborhood-based elementary schools often allow teachers and administrators to better know their students and provide more individualized support. In addition, maintaining strong parent engagement will be important, as family involvement plays a key role in supporting student success. Balancing efficient use of facilities with the developmental needs of younger learners will be an important consideration as decisions move forward.	3/8/2026 10:55 AM
438	The county needs to take a hard look at administration costs and remember two things 1. There job is to educate our kids. Nothing more. 2. The citizens pay for the system and the output recently has been subpar. We need to have three types of high schools 1 College bound 2 Those destined for vocational work such as plumbing and electrical. 3 The students who need a place to be off of the streets. Literally glorified baby sitting. These students are detrimental to the first two groups of students I noted.	3/8/2026 10:54 AM
439	New charts should individually enumerate EACH school, its capacity, its current enrollment, any attendance trends unique to it, and its condition. This data might better explain especially the logic for closing so many elementary schools and how a few were selected for enhancements.	3/8/2026 10:39 AM
440	I support the Brookhaven community’s strong support of the public school system now and for many, many years to come therefore, I support the following position… keeping our trajectory in the Chamblee MS and HS cluster, and the pathway of closing the Ashford Park Elementary School facility as a neighborhood school, and shifting the Ashford Park Elementary attendance zone to the current John Lewis Elementary facility, and preserve our (current attendance zone) Chamblee Cluster.	3/8/2026 10:35 AM
441	Please consider spending more time to understand WHY enrollment is falling before making major changes. My kids go to a large elementary school, and we love it. I am not against larger schools, but I am not convinced the district is fully understanding the issues that created falling enrollment. I'm also not convinced that the district office is trustworthy when it comes to making any decisions when it comes to funding, increasing efficiencies, or long-range planning.	3/8/2026 10:23 AM
442	It is very hard to be extremely definitive on feedback without the bigger picture. What happens to my kids if the school closes? Where do we go? I understand that is hard to say until we have a firmer lay of the land but leaves people very nervous about what comes next.	3/8/2026 10:19 AM
443	Allow Evansdale to remain open to keep the community strong, this area a desirable place to live, and keep children safe and at the top of the budget priority list.	3/8/2026 10:17 AM
444	Strong neighborhood schools help attract and retain families, support stable property values, and contribute to the district’s tax base. Disrupting a school that is nearly full and academically successful could have ripple effects that extend beyond the building itself and may unintentionally accelerate enrollment decline rather than solve it.	3/8/2026 10:12 AM
445	We are happy with Oak Grove. We would love a better middle school option that was not quite so large.	3/8/2026 10:11 AM
446	You CANNOT divorce the HOW from the WHAT when these decisions are being made by SAP (and disseminated). SAP is deciding to close some of the highest performing schools in the district (Vanderlyn). It is one of the top schools in the district because of the administration, teaching staff, and community support. If no plan is implemented for those staff members around transitioning to other equal/better roles (and importantly the WHY), then staff members who made Vanderlyn the high-performance school that it is will simply leave the district. Without clear plans in place for staff members at Vanderlyn, Kingsley, Ashford Park (for example), the district WILL be losing some of its best teaching/administrative talent to private or neighboring school districts. Furthermore, it seems that Dr Sauce is not putting any weight or stamp behind these SAP decisions being made. The superintendent must be able to get behind the decisions behind the SAP. When a company lays off employees, the WHY, EMPATHY, and CONVEYANCE of this information comes from the company president. These decisions carry equal weight, so they should be owned, blessed, and understood by the district's leadership (Specifically Dr. Sauce).	3/8/2026 10:07 AM
447	Keep LRES open.	3/8/2026 10:04 AM

448	Keep the elementary schools walkable. Pushing people out of their neighborhoods only furthers the nightmare of traffic we already deal with. Neighborhoods and community support is vital to education. As soon as you push these schools out and create mega schools, the community and parental involvement and support will drop, overloading admin and teachers even more, and creating more disconnect between community and kids.	3/8/2026 10:01 AM
449	Oak Grove elementary does not have excess capacity there's over 200 students on the waitlist, including more than 100 kindergartners. Oak Grove is not under utilized.	3/8/2026 9:55 AM
450	DCDS is becoming a source of stress to taxpaying families. Hence the exodus to private schools in the past decade. This is a mess. DCDS wants to close 30 schools? To even bring the idea out for proposal signals how poorly run DCDS is. This is some office within the bloated administration trying to justify its existence. Sad that it is being done at the cost of taxpayer schools	3/8/2026 9:55 AM
451	The Ashford park scenario impacts my family and community directly. I think there are a number of scenarios that help keep one of the top performing schools in the district open and keep the community together. If the building needs to close, the attendees and staff could move to JLES, and JLES shifted into the the chamblee HS cluster. The main reason for this is to keep the strong community involvement together which helps the children and staff. Most importantly students from a top performing school are not moved into a low performing school and continue to receive a high quality education.	3/8/2026 9:54 AM
452	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/8/2026 9:48 AM
453	Use our tax dollars for the kids and their actual education and not to pay higher ups salaries and bonuses. Thanks	3/8/2026 9:43 AM
454	Need to consider programs while considering buildings. Moving gifted or language immersion to lower performing schools. Closing/consolidating makes sense for south Dekalb, it does not make sense for Chamblee cluster. Please consider the impact of teachers with school closures being announced- how to keep strong teachers and admin at schools that are closing?	3/8/2026 9:42 AM
455	My children went through Oak Grove Elementary, Henderson middle school, and then Lakeside High School. Oak Grove Elementary was the best experience. HMS the worst, and Lakeside generally good (because it offers advanced classes). Instead of closing Oak Grove Elementary maybe you could consider expanding it to include sixth grade or even seventh and eighth grades. It is a fantastic school and I wish my children could've stayed there longer rather than going to Henderson middle school.	3/8/2026 9:41 AM
456	Our child has attended OGE since pre-K and is thriving—thanks to exceptional teachers and strong parent involvement. Closing OGE will damage the community and student outcomes. Please reconsider and explore alternatives that preserve OGE.	3/8/2026 9:40 AM
457	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize	3/8/2026 9:39 AM

	schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	
458	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/8/2026 9:34 AM
459	Our elementary zone is tight-knit, and parents from within our cluster almost exclusively would like children living within the Ashford Park zone to stay together instead of being split up. We would also like to stay within the Chamblee cluster.	3/8/2026 8:48 AM
460	Our area is building new homes because of the reputation of Oak Grove E and the development in the area. The sales of homes are always linked to OGE, Henderson and Lakeside as a criteria. Oak Grove Elementary's academic performance, test scores and teacher retention have not been included in the closure criteria.	3/8/2026 8:47 AM
461	We need to see the boundaries before we can provide useful feedback. It doesn't help anything if I don't know where my kids will be in the next couple years. The lines and boundaries need to be shared soon.	3/8/2026 8:45 AM
462	Larger schools mean larger classes, I feel it would be less effective for the students	3/8/2026 8:39 AM
463	Please consider the well being of our children and their social/emotional growth. Tucker is a strong community with a strong desire to strengthen our neighborhoods and the schools that they feed. Duscussions with families throughout the cluster as are that we want our cluster to remain in tact.	3/8/2026 8:37 AM
464	The combined Vanderlyn and Dunwoody High School campus presents an opportunity to explore thoughtful, phased solutions that address secondary capacity while preserving elementary access.	3/8/2026 8:30 AM
465	What are plans to mitigate risks of closing too many schools and over enrolling at schools. If plans include reopening schools, what are the plans around that including hiring and securing resources?	3/8/2026 8:29 AM
466	I am incredibly disappointed that SAP and HPM's first scenario drifted so far away from what they told the community it would be. They said that there would be a BUILDINGS ONLY scenario, but this first scenario released 1) did not include all buildings, and 2) told the community without other context WHAT those buildings would be used for (i.e., middle school to high school). This type of bait and switch is what makes the community not trust you and gives the impression that some decisions have already been made without community input. If you're going to release a buildings scenario, it should have included ALL buildings (where are Kitteredge, DSA, etc???) and it should NOT have included WHAT purpose those buildings will be used for (middle school, high school, etc). People are rightfully mad because you're giving them half of a redistricting plan and because HPM is not following the plan laid out from the beginning. They're also mad because the SAP Q&A page keeps changing and even the most	3/8/2026 8:28 AM

	involved and informed community members can't keep up. For example, the first SAP Q&A page initially said that building capacity was calculated using all current mobile classrooms and now it says that the future model assumes no mobile classrooms. Which is it? Why the switch? The HPM scenario said that there would be no expansion at Dunwoody High school but there has also been some insinuation that Vanderlyn could be used for some DHS expansion. Which is it? It makes sense that decisions will change as the process goes on, but you need to own when decisions or assumptions change and be transparent about why and SAP isn't doing that. Communities can't be expected to go through the Q&A page regularly just to see when SAP changes its mind on things. Add a section that clearly explains what you've changed through the process and WHY so that parents aren't gaslit in community meetings when they quote the SAP Q&A page from a month ago. I understand the need for changes to the district, but I am very troubled that there does not seem to be enough data to support the decisions being made, or the data is not easily accessible to the public. I don't want soundbites; I want to be able to review HPM's full dataset and bring it to the district's attention if I find errors in assumptions, and I can't even find it. I want to see the process by which the district double checked enrollment numbers and future projections used by HPM. I want to see that there was another layer of reliable review and decision-making used to ensure that if we are making decisions this big, they are based on correct data and assumptions. This is a big decision that impacts communities all over a huge geographical area. It needs to be done right. That means that it needs to be data-driven and not emotional. Redistricting should be done in a way that makes sense geographically, not based on keeping 2026 schools together now. Ten years from now, families moving into the area shouldn't have to deal with a gerrymandered school map that doesn't make any sense geographically simply because some parents whose children are by then long through their educations, yelled the loudest at community meetings back in 2026. If you want to placate current families and make a transition easier, what you need is a change to the district policy to temporarily allow more school choice to affected families, not a permanently gerrymandered district map that doesn't make the most geographical sense. While community input is important, the district ultimately needs to be making data-driven decisions for decisions this big. Finally, it is unacceptable that Dr. Sauce as interim superintendent isn't taking a bigger role in guiding this process. SAP has no leader, and decisions this important need to be made with leadership's full oversight. He cannot and should not be hands-off. He should be personally reviewing and approving every single scenario BEFORE it is released to the public, and if he doesn't think that he can get fully behind a scenario for any reason, then he needs to tell HPM to go back to the drawing board until there is a scenario he can fully support. Nothing should be released for public comment until Dr. Sauce has personally reviewed it, fully vetted and checked its data assumptions, ensured that it meets SAP's guiding principles as explained to him, ensured that it meets the district's needs, and ensured the feasibility of the plan. That's leadership, and it's incredibly lacking at the moment.	
467	Please do not break up our community. Brookhaven is a tight-knit community, and I can't imagine having our city broken up and going to two different middle and high schools. Quite honestly, I also can't imagine what it would be like without Ashford Park Elementary School at the heart of the community. Ashford Park Elementary and the rest of the Chamblee cluster are the reason we moved to the area back in 2005.	3/8/2026 8:25 AM
468	Please evaluate WHY dekalb county has decreasing enrollment. Are the number of children decreasing, or are parents choosing private schools? If so, why? What can dekalb county do to improve their programming and better compete?	3/8/2026 8:22 AM
469	You say that you need to consolidate schools because there are fewer enrollments than current capacity and you want to maintain enrichment programs (such as robotics, sports, debate, etc). But the truth is, enrollment is declining because people don't have confidence that Dekalb Schools will give their students a quality education. They are moving out of the Perimeter for better public schools or paying for private school or choosing charter schools. Note that the Dekalb elementary schools that are expected to decline in enrollment over the next 5 years (Toney, McNair Discovery, Columbia, Flat Shoals) all have low scores at GreatSchools.org (scores of 4 or 5 out of 10). Parents read these reviews when deciding where to live. In contrast, Evansdale has a GreatSchools score of 8 out of 10 and it's enrollment is expected to rise over the next 5 years. So, if you are wanting to attract enrollment, your strategy should be to increase the quality of the schools by attracting effective teachers and firing ineffective ones.	3/8/2026 8:20 AM
470	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would	3/8/2026 8:09 AM

	require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	
471	The changes proposed are not well thought through and some of these changes are drastic to some families	3/8/2026 8:06 AM
472	My main issue with the listed plan is the lack of commitment to the Magnet programs. The Kittredge Magnet program is the number one elementary program in the state and it seems that DCSD is committed to ruining it. By not committing to continue the school as a separate Magnet school (or expanding it to a 4-8 school), you are creating uncertainty among the population which has led to many qualifying families not applying and to existing families to consider other options. I currently have two students in the KMS-->Chamblee Magnet program and we are applying to private schools for next year because there have been no guarantees that we will be able to continue in the Magnet school in the future. We have to make a decision now and don't have time to wait for DCSD to tell us next year or the year after that the entire program is going away, or being shifted to each "home school" or moved to the south part of the county where a commute would be prohbitive for us. Continued incompetence and extremely wasteful spending is why so many excellent students have decided to leave DCSD over the last 20 years. If you spent half the money that is wasted on district level administration on schools/students/teachers, the entire district would attract and retain many more students. STOP WASTEFUL DISTRICT LEVEL ADMINISTRATIVE SPENDING!	3/8/2026 7:49 AM
473	Dr. Sauce is coming out swinging. Any development project needs community support for zoning before it has a pulse. I do not believe the County will get community support for a variety of reasons. DOA.	3/8/2026 7:42 AM
474	We're very concerned about high school spaces and quality on the north end of the county (Dunwoody and Chamblee high schools). If the magnet program does not feed into Chamblee, we will go to private schools. Further, Kittredge is the most amazing program in all of DCSD. I would prioritize getting that one right ahead of all else in the county. Currently with no mention in the SAP plans, parents worry it is either an afterthought or major changes are coming and the program is being dismantled and put into other schools which would be a true shame. Give Kittredge space for 4-8 and let them them continue their amazing success for Dekalb county.	3/8/2026 7:33 AM
475	Thank you for all you do. I appreciate your allowing stakeholders the opportunity to give feedback and input in the process. This comes from a previous DCSD student and current DCSD educator.	3/8/2026 5:59 AM
476	Do not close Vanderlyn! Additionally, consolidating and enlarging Chestnut will make the traffic on North Peachtree intolerable.	3/8/2026 4:55 AM
477	Better facilities are needed to better serve our students where funds can be properly used. However, this can take away from community. There needs to be more opportunities for our students to utilize sub-communities i.e. clubs, sports, theater plays for all elementary school kids can participate in, not just 4th/ 5th graders and older.	3/8/2026 3:25 AM
478	As future scenarios are developed, it may be helpful to consider several key factors that directly impact student success and school effectiveness. First, maintaining developmentally appropriate groupings should remain a priority. Early elementary grades (K–2) often benefit from being grouped together because these years focus heavily on foundational literacy, phonics, and early numeracy. Keeping these grades aligned allows teachers to collaborate closely on early intervention strategies and foundational skill development. Second, it will be important to consider the impact of transitions on students and families. Each additional school transition can create adjustment challenges for younger students. Whenever possible, minimizing the number of transitions between schools may help support stronger relationships,	3/8/2026 1:18 AM

	continuity of learning, and family engagement. Another important consideration is equitable access to resources and support services. Schools within each cluster should have balanced access to intervention programs, special education services, ESOL supports, and enrichment opportunities. Grade band changes should ensure that no school becomes disproportionately responsible for high-need populations without adequate staffing and support. Additionally, the district may want to review capacity, enrollment projections, and class size balance across clusters. Grade band structures should be designed in ways that distribute enrollment efficiently while still maintaining manageable class sizes and appropriate learning environments. Finally, teacher collaboration and vertical alignment should be a key part of planning. Grade band structures that allow teachers to work closely with colleagues teaching similar developmental levels can strengthen instructional consistency and improve student outcomes. Overall, thoughtful planning around developmental needs, student transitions, resource equity, and instructional collaboration will help ensure that any future grade band scenario supports both students and educators effectively.	
479	N/A	3/7/2026 11:58 PM
480	Close the most empty schools, and move spread those students to other elementary schools ONLY IF they have open space and DO NOT OVER LOAD THEM!!! Please!!!!!!!!!!	3/7/2026 11:50 PM
481	Losing the walkable local elementary schools and the community building due to that proximity is a disappointment. Especially while young being in closer proximity is most ideal when thinking of pre-k and kindergarten ages especially.	3/7/2026 11:28 PM
482	I think middle school is a very important phase in a child's development. The current model starts to focus on testing for kids to progress to middle school as early as the 3rd grade. The maturity level of the kids in this stage needs specialized focus that will be diminished if the cluster is expanded to PK-8 model. Additionally, the limited activities for the high school cluster by grouping of grades 6-12 is not ideal.	3/7/2026 11:22 PM
483	Even without providing detail, showing capacity for school choice programs of varying sizes under the new plan would be helpful. Some elementary school programs (like Kittredge magnet program for high achievers and Evansdale French immersion) are linked to middle and high schools. Considering facilities independently makes it difficult to understand the plan for the programs, but having at least a generic plan would be helpful. Also, I will note that my family was seriously considering moving to Gwinnett county until my children got into Kittredge Magnet School. These school choice programs do keep some families in the district, although I do wish DCSD wasn't so dependent on them.	3/7/2026 11:13 PM
484	Please give us some maps on where students might go.	3/7/2026 11:02 PM
485	I disagree with the consolidations because it will displace several, teachers, students, and families. Families will have to travel further distances to get their kids to school, schools will suffer from crowding, and learning will not be a priority. It will also affect the culture at said schools receiving new students, and it will take years for everyone to adjust.	3/7/2026 10:56 PM
486	My youngest son, a junior in high school, is looking forward to the Oak Grove tradition of graduating high school seniors visiting Oak Grove for a parade next year.	3/7/2026 10:55 PM
487	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4-16. Oak Grove: • Already exceeds the 88% utilization target 189% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion.	3/7/2026 10:53 PM
488	1) get rid of the fat at the county office before taking things away from our kids. 2) sell the 6.5 million dollar property 3) leave our community schools alone!	3/7/2026 10:35 PM
489	Evansdale’s French program is unique to the Lakeside cluster. Neighborhood parent, teacher, and community volunteers provide resources and personnel for French students, creating a vibrant community. French teachers at Evansdale, Henderson Middle, and Lakeside have put down roots in their community that would be destroyed with thus restructuring.	3/7/2026 10:28 PM
490	Really good school	3/7/2026 10:26 PM

491	N/O	3/7/2026 10:22 PM
492	I am in favor of expanding/rebuilding Huntley Hills, Montgomery, and Chestnut in North Dekalb. I am also highly in favor of closing Ashford Park since it is an unsustainable campus (portables, limited acreage for expansion, source of division for previous decades). These stated primary driver of the SAP effort is to make the county more financially sustainable and reduce unnecessary costs from unfilled seats. However, no information has been provided on how this scenario meets this goal vs other scenarios considered. Is there a clear number 1 best scenario for cost or are there a few? Financial impact of each scenario should be acknowledged and discussed since it is the primary driver of this process.	3/7/2026 10:21 PM
493	Moving the french community would destroy the roots that have been built over many years in the community. Within the Evansdale to Henderson Middle to Lakeside lineage, we have older students who mentor younger students. There are strong community ties built within the French learning. The large Evansdale site can continue to sustain the strong French program as well as accomodate for expansion to hold addtional programs. Our lot has ample space for additional buildings, play and parking.	3/7/2026 10:19 PM
494	Keep Oak Grove out of the plans.	3/7/2026 10:12 PM
495	McLendon is a very central aspect of our neighborhood, though it’s very blighted now with its large field of dust and weeds and no shade, I worry greatly about what will become of it when the school is closed. It’s already common for people to drink and smoke there at night or on the weekends. To lose a school in walking distance has its downsides, but to gain an abandoned building is a real concern. I’d hope that either a charter moved in or the property be redeveloped.	3/7/2026 10:07 PM
496	Ashford park is a true neighborhood school with involved community. Closing it to bus the kids to a bigger school (that was a community school now is extremely large) ruins the small community of a school that kids need. Make the zone for ashford park smaller to fit the capacity - don’t close the school.	3/7/2026 9:52 PM
497	I am both a DCSD parent and a graduate myself. I had an excellent experience in DeKalb Schools as a student; I would not be the person I am now without my teachers and opportunities--both educational and social--from those years. Being a DeKalb County student showed me a diverse world from an early age, and that was and continues to be a truly invaluable foundation for my life. I can only imagine that this must be an incredibly demanding and complex task to undertake, with countless stakeholders. And I understand that the number of students being educated by the district has shifted since I was in school here and warrants discussion and in some respects change. But I am disappointed to know that the goal is to move toward elementary schools of 600 or more students. I think that is far too large a number to be beneficial to a child, especially in these early years of education. I think one reason I had such a positive elementary school experience was because my school--Laurel Ridge--was a solid, small neighborhood school with strong parent, staff, and community involvement. Now that my own child is at Oak Grove, I see these benefits in action as well. Teachers and parents are plugged in; we see one another around the community as well as school events. Smaller elementary schools create an interwoven educational ecosystem that still feels personal and shows children the interdependence and importance of community in and out of the classroom. School is not just a place where they are a number. I've heard the statement on the virtual SAP meetings that schools of 600+ qualify the school for more state funding, and it's such a shame that this is the case. I don't know if the pros of state funding outweigh the cons of such a large pool of students. I've also heard the argument that larger schools don't necessarily equal larger class sizes, and I would like more assurance that this would truly be the case. When asked what the plan would be if higher-performing schools such as Oak Grove were closed, the responses from the district/HPM that I've heard have been that "the teachers and resources will follow the students" to the new school and that is supposed to ensure that the high performance element will stick. I see that as an absolutely empty statement and I can't even believe that any individual in this process would say such a thing "on the record." It's not realistic at all to think that you could replicate such circumstances in a different (larger) school--there are so many factors that would impact which teachers go where if their school closes (if they even want to stay in the district), how programs are set up and resources are distributed, etc. Even with state funding, there's no guarantee of how that will shake out in terms of intangibles, which so often make a school and community what it is. It was incredibly frustrating and disappointing to see such a wave-it-off response that is supposed to be reassuring but couldn't be backed up in any way. I know this scenario focuses only on the buildings and that others related to programs, etc. are to follow. But if there was no	3/7/2026 9:50 PM

	consideration of traffic patterns and flow done in tandem with the building scenario, that seems like a big miss. Taking away Oak Grove and putting these students at Briarlake (which is on the main thoroughfare of Lavista squeezed right between two traffic light intersections) or Sagamore Hills (in the middle of a small neighborhood right on the edge of the main roads going to Buckhead, Emory, and I-85) sounds truly hellish in terms of what it would do to traffic that is already quite substantial in this (still growing) area. I'm also concerned about the proposed expansions to schools that would stay open and take on more students. I've heard a lot of talk about "building up" instead of "out," given acreage limitations of some campuses. This seems like it would cause even more disruption to the students who already attend these schools--it wouldn't simply be an addition to the building that might be blocked off but not impact current classrooms, it would be an entire addition *on top of* classrooms that are currently being used. How can students and teachers avoid being impacted by such a massive construction project that would clearly take more than the 2 months that summer break provides? If the goal of SAP is to close the gap of utilization, then the focus should be on schools that are well under 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Unfortunately, the district has a history of corrupt leadership dating back to when I was a student and continuing to the very recent present. This doesn't give parents much confidence in the process to begin with, and I'm worried that even more families will choose to look elsewhere for their children's education, which will make the district even less successful. Please consider slowing this process down into phases and look into more data focused on what primarily drives the under-utilization. This would help with fiscal responsibility and long-term capacity planning. I want all the children of DeKalb Schools to succeed, including my own. I don't think that consolidating into elementary schools of 600 or more kids is the way to do that, especially in an area that has high-performing schools and is experiencing a lot of growth. Thank you. (As a postscript, can Dr. Sauce please start writing emails along with sending videos, or at least include a transcript? Different people have different learning styles and I much prefer to read words rather than sit and watch a video to learn information. As a full-time working parent, it's also more time efficient.)	
498	n/A	3/7/2026 9:37 PM
499	the system has to face this problem and generate efficiency. I am not sure the grade bands configuration has to be changed, but i do think it worth experimenting with to see how schools perform.	3/7/2026 9:23 PM
500	My concern is the execution of any plan as they occur over a long period. Communicating clear timelines and conveying confidence that they can be achieved is important.	3/7/2026 9:20 PM
501	Please consider the importance of strong neighborhood school like Evansdale Elementary School and Henderson Middle School, this schools provide a supportive environment for students and families in our community.	3/7/2026 9:20 PM
502	Please do not close Oak Grove Elementary. Thank you for listening.	3/7/2026 9:10 PM
503	You need to look at WHERE kids will go when you close buildings. Closing Ashford Park, for example, and building at Montgomery (in a high traffic zone) and/or Huntley Hills makes no sense geographically.	3/7/2026 9:07 PM
504	Please consider including campus-level or phased options that address secondary capacity needs while maintaining elementary access where possible. Seeing multiple solution types side-by-side would help the community better understand the full range of possibilities. I also was to see clear definitions for robust programing, low operating costs and small schools.	3/7/2026 9:07 PM
505	Please be cautious about the data you have invested in. Also, please use common sense and not be too quick to re-imagine our schools and communities. Please be careful! Because your decisions will affect so many people for years to come.	3/7/2026 9:03 PM
506	Based on what I have seen and heard so far, this process has been messy at best. We have been given inconsistent data and conflicting answers that don't coincide with the County's own stated objectives. Best case is that this process is not going well. Worst case is that we are not being told the truth. In the webinar I attended we were also told that this process is about fixing a facilities problem. Not about teaching and learning. Apparently that would come later. If this is truly about capacity, then as I mentioned before, let us explore alternatives for expanding a school that is performing well, and that is well loved.	3/7/2026 9:01 PM
507	Vehemently opposed to the proposed changes. Consolidation of schools would lead to larger	3/7/2026 8:53 PM

	class sizes, lower community involvement and poorer learning conditions.	
508	I think it should not change . I think that if they want to bring more students in , they should teach better and make sure test scores can grow so they can reach high scores and ratings as other county's .	3/7/2026 8:52 PM
509	I would love to remain in conversation as a community member but I hope you get the parental involvement and input necessary for what appears to be a massive shift.	3/7/2026 8:45 PM
510	There has been an elementary school in the Oak Grove neighborhood since pre- civil war!! When the current one was built, the community petitioned that it be named Oak Grove to continue this line. Oak Grove has been known for its Special needs programs which not only benefit those children, but all the other children in the school to be more loving, caring individuals. Please keep it open!!	3/7/2026 8:40 PM
511	I understand and support the need to address overcrowding at Dunwoody High School. I recognize that Vanderlyn's proximity to the high school places our campus within a broader facilities planning conversation. I also recognize that the district has framed SAP around enrollment trends and utilization. Any proposal should clearly demonstrate how those metrics are being applied at the cluster level. The combined Vanderlyn and Dunwoody High School campus presents an opportunity to explore thoughtful, phased solutions that address secondary capacity while preserving elementary access. The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made. Vanderlyn is a diverse, academically strong, and inclusive community. Preserving stable elementary environments while solving high school challenges aligns with district priorities. I would welcome collaboration between district leaders and both school communities to explore campus-level solutions that address high school capacity while preserving the Vanderlyn community.	3/7/2026 8:40 PM
512	Grade bands are less important to us. We are most concerned that Evansdale remain open and that Evansdale kids go on to Lakeside High School.	3/7/2026 8:35 PM
513	Oak Grove already exceeds 88% utilization. Has 4 consecutive years of enrollment growth and ranks in top tier academically. It would require significant capacity adjustments at Sagamore Hills and Briarlake. District should be targeting those schools operating well below 70% capacity.	3/7/2026 8:29 PM
514	None	3/7/2026 8:26 PM
515	Please just do your best for our students and neighborhoods. We're counting on you.	3/7/2026 8:21 PM
516	None	3/7/2026 8:20 PM
517	Smaller schools are better for kids especially little kids	3/7/2026 8:20 PM
518	Oak Grove Elementary has always had a reputation as one of the best elementary schools in the county. Losing it will be a disservice to the community. Closing it will cause property values to decrease and make DeKalb County to be less desirable.	3/7/2026 8:20 PM
519	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. This proposed closure DOES NOT address the stated objective. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/7/2026 8:01 PM

520	The school district’s plan is flawed and not consistent with their mandate to provide education.	3/7/2026 8:01 PM
521	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove’s projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investmen	3/7/2026 7:57 PM
522	This will be very disruptive to the community	3/7/2026 7:56 PM
523	Our community needs A LOT more information to truly give feedback. Saying you are closing the local elementary school with no information on where the students are going does not make sense. Will there be a new building? Will the community stay together? Where will the school feed? Where will the special programs go?	3/7/2026 7:56 PM
524	Excelente	3/7/2026 7:47 PM
525	Oak Grove: Oak Grove already exceeds the 88% utilization target (89% current; 96% projected)	3/7/2026 7:41 PM
526	Please consider the importance of strong neighborhood schools like Evansdale Elementary. This school provides a supportive environment for students and families and is an important part of the community. Before closing schools like Evansdale, the district should explore alternatives that protect stability for young students.	3/7/2026 7:34 PM
527	Concerning the Lakeside clusters, I don't believe there is any need or justification for closing any elementary schools.	3/7/2026 7:32 PM
528	We need to see actual concrete plans for where students of closed schools go, and will be incredibly frustrated, disappointed, and need to consider other education options if the Ashford Park elementary community is removed from the Chamblee cluster. That is of the utmost importance to maintain, with a secondary but equally important consideration being keeping the Ashford Park elementary community together. This community has long invested and worked for a quality public education. That means K-12 and means the community must stay together and stay in the Chamblee cluster. Anything else and we simply cannot say we can stay in the community or in Dekalb public schools. If Ashford Park must close then the students should stay together at another facility that continues to feed into the Chamblee cluster.	3/7/2026 7:20 PM
529	Creo que es muy buena elementary, excelente por cierto, y espero siga asi por mucho tiempo	3/7/2026 7:12 PM
530	Evansdale Elementary School is neighborhood school in a great community. The two of these things go hand in hand. There are other more effective ways to cut budgets within the county office, there are too many personnel and staff that have salaries that definitely need to be address. This staff has no direct involvement with schools and education of our children.	3/7/2026 7:11 PM
531	Support the traditional grand band.	3/7/2026 7:10 PM
532	Losing affluent, high-achieving families from the DCSD to Private Schools due to programs like Georgia Promise creates a harmful cycle of declining funding, engagement, and program quality; to stop it, focus on retaining and attracting those families by strengthening and promoting gifted/advanced and enrichment programs, increasing family engagement, and studying successful practices from high-performing districts.	3/7/2026 7:09 PM
533	More early learning centers Balanced classrooms Be competitive and a better options by providing education that prepares students for their future Don’t close so many schools in Black neighborhoods just to bus them to Whiter neighborhoods	3/7/2026 7:06 PM

534	Tener suficientes conductores para los autobuses.	3/7/2026 7:05 PM
535	Keep our schools open!! Every year there are more children in our neighborhood! Our suicide is growing for school aged children!	3/7/2026 7:01 PM
536	Look at where you are slated to spend money on construction that is already approved. Those building will be great. Look at the fact cross keys doesn't have a middle school. Look at keeping strong and great schools strong and together so they can remain great.	3/7/2026 6:58 PM
537	We need neighborhood schools to stay open as they help communities thrive. There are plenty of other ways to cut budgets within the county office. There are too many unnecessary jobs with bloated salaries by those who are not directly involved with educating children.	3/7/2026 6:57 PM
538	Children are better educated with fewer students per class, consolidation of high performing and less well performing schools will contribute to a lowering of standards and a poorer education for all.	3/7/2026 6:56 PM
539	I have no additional feedback at this time.	3/7/2026 6:49 PM
540	Your plan does not seem to include any measure for the sense of community that will be lost by removing schools. Oak Grove ES plays an ESSENTIAL role in our neighborhood as it hosts many family events throughout the year and allows children to walk to and from school, a wonderful way for kids to build independence as they grow older. Please consider the impact you are making by destroying a beloved anchor that ties together our community.	3/7/2026 6:47 PM
541	Keep all schools open	3/7/2026 6:36 PM
542	Neighborhood schools need to stay open to help communities thrive. There are many other ways to reduce budgets especially within county personnel that are directly involved with educating children.	3/7/2026 6:33 PM
543	Please allow more time for community feedback and increased transparency.	3/7/2026 6:29 PM
544	Evansdale has a big footprint that would allow for expansion. At the same time you could keep it's athletic, which I believe is important.	3/7/2026 6:27 PM
545	We are just really hoping to preserve our elementary school Ashford Park so that our daughter can attend a school with diversity in rise to any challenges that she may face. My husband and I did not attend private school and we would really like for our child to not do so as well. By closing this elementary school you will make many families scramble and pay exorbitant amounts for private schools given the unknown of attending a different public elementary school. I am a pediatrician in Sandy Springs and I see a lot of private school children and I really want my daughter to be able to attend a public school where she has a sense of diversity and different economic backgrounds. Please please keep Ashford Park open for my daughter and for all the children and all the families who cannot afford to go elsewhere.	3/7/2026 6:21 PM
546	More early learning centers and the arts should be returned	3/7/2026 6:19 PM
547	I would like for Kittredge to remain 4 to 6. Chamblee Middle as 6 to 8 with the magnet program and Chamblee high as 9 to 12. I think all students in the Chamblee High magnet should be able to complete their studies at Chamblee High even if the magnet program is moved. I think Dekalb is trying to move the magnet program just like you moved Kittredge out Chamblee and over to Druid Hills.	3/7/2026 6:13 PM
548	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be	3/7/2026 6:12 PM

	sequenced carefully to avoid eliminating capacity needed to support major community investment.	
549	As a staff member/teacher I love DCSS and completely see the need and benefit of these changes, and I am excited to contribute what I can for the long term improvement of our services for our students.	3/7/2026 6:00 PM
550	No tengo ningún in conveniente todos están ala ferfeccion	3/7/2026 5:41 PM
551	Better data on trends of population in the proposed changes would enable more rational choices to achieve the utilization goals. Dividing a fully utilized school among those currently underutilized seems to seek maximum disruption as the tool to address underutilization. Perhaps removing the fully utilized from the mix would give a better picture of where change would help a community rather than disrupting it	3/7/2026 5:40 PM
552	Closing high performing elementary schools seems a poor idea all around	3/7/2026 5:31 PM
553	The more teachers and smaller classes are benefit to all the students. Why work to make it worse.	3/7/2026 5:28 PM
554	Consolidating McNair cluster facilities and potentially grouping grade bands with primary students is concerning.	3/7/2026 5:22 PM
555	The ability of neighborhood children to walk to school adds so much to the cohesiveness of the community and promotes interaction between neighbors. We are protective of these relationships.	3/7/2026 5:21 PM
556	What I'm not seeing here is how certain specialized programs, currently housed within certain facilities will be managed, if school population attendance zones shift. Prime example: the Kittredge Magnet, Chamblee Middle, and Chamblee High School pathway. This is one of the strongest overall programs, with CHS being one of the most highly regarded HS in the county and in the state for the last 30 years, due in large part because of the unique dyanmic fostered between the combined magnet and residential population. And, for those that may not be aware, the magnet program was intentionally and strategically placed at CHS and has never been anywhere else. In fact, were it not for the magnet program being placed at Chamblee, DCSD wouldn't even have a building at CHS or even own the property today. On a more general level, one way to boost attendance is to restore the district's prestige and instill confidence in families -- from what I've observed, a great deal more families are electing to send their kids to private schools, even where amazing public schools exist in their neighborhoods. 20 years of poor and at times corrupt leadership, poor decisions, lack of accountability has driven many families away, even from the best of our DCSD schools.	3/7/2026 5:19 PM
557	Ashford Park community of Ashford park, Drew Valley, Brookhaven Fields are a strong community that should stay together and continue to be in the Chamblee cluster. We as an entire school should move to John Lewis facility and move John Lewis into the Chamblee cluster. I am on Drew Valley and if we are rezoned to a lower ranked education school without the current kids/staff that makes the higher ranking, you will see an outflow to private school.	3/7/2026 5:14 PM
558	Our vote is to please keep Oak Grove Elementary open.	3/7/2026 5:12 PM
559	Oak Grove has been a great school for both my children and I would hate to see this tight knit school community revamped with a massive school. Kids learn better in smaller environments at an early age. As a former Dekalb school employee for over 30 years there are huge pluses in smaller neighborhood schools	3/7/2026 5:12 PM
560	Dekalb county should spend money on education. There are other places they can cut funding such as animal shelters, etc. Education should be top priority in spending.	3/7/2026 5:10 PM
561	Everything the school board does is idiotic. You should be ashamed at the Devon Horton debacle. All the unnecessary central office staff her hired should be fired. The entire school board should be forced to pay back his salary. Then they should be sent to prison with Horton.	3/7/2026 5:06 PM
562	I do not have any additional feedback at this time.	3/7/2026 5:06 PM
563	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing	3/7/2026 5:02 PM

	excess capacity. A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment	
564	Pay teachers more, increase school funding - reduce police/immigration funding	3/7/2026 4:56 PM
565	Evansdale need remain open given its lot size, capacity, French track, and quality condition	3/7/2026 4:56 PM
566	I'll be glad if they don't school the school.because my cousins go there also there's a lot of staffs and teachers that are really nice and helpful with the kids learning .	3/7/2026 4:49 PM
567	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/7/2026 4:42 PM
568	As a grandparent of a student at Oak Grove Elementary School and as a resident and member of the surrounding community within my zip code 30033, I urge you to reconsider this plan. It appears to have limited (and erroneous) data, and does not include any assessment or data regarding the over-staffing, misuse of funds, and other factors within the administration of DeKalb County Schools.that likely are contributing to the financial issues the administration is trying to solve. First look within. Again, a transparent and full audit assessing the impact to communities on closing and reorganizing schools rather than solely focusing on financial issues is the only way to approach the problem. If Dekalb County schools continues down this road, communities will be negatively impacted. The ripple effect will be that DeKalb County will see even further decline as hard-working, engaged, higher income contributing families will migrate away from this county.	3/7/2026 4:40 PM
569	While I am in support of closing APES and moving the FULL zone to John Lewish, I also encourage consideration of ways to minimize change for the John Lewis community. One option worth exploring would be relocating the current Pre-K and Special Education programs to the Ashford Park facility so the building can continue serving important district needs.	3/7/2026 4:39 PM
570	Stop trying to close community elementary schools, mega schools are terrible for the community and offer very little benefit besides "efficiency" for the county.	3/7/2026 4:24 PM
571	The school is great.	3/7/2026 4:24 PM
572	Hoping for more transparency on the decision process and why there is advocacy for certain decisions	3/7/2026 4:21 PM
573	Some studies have shown that pk-8/9-12 have the most benefits for the students	3/7/2026 4:19 PM
574	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing	3/7/2026 4:17 PM

	excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment	
575	DeKalb seems to want to close excellent schools like Evansdale and Oak Grove in strong neighborhoods. You will have people moving out of DeKalb if you follow this plan.	3/7/2026 4:16 PM
576	Please keep the Dunwoody HS district as it stands today. It's important to preserve the only high school in our city. Thank you!	3/7/2026 4:15 PM
577	High academic performing schools do so because of strong community, faculty, and PTA. Why would you mess with a formula of success?! Renovate. Don't relocate!	3/7/2026 4:15 PM
578	Don't take our school away!	3/7/2026 4:01 PM
579	I'm a community member and feel the neighborhood school, Evansdale should serve this neighborhood.	3/7/2026 3:54 PM
580	The Evsndale neighborhood has been paying much higher taxes to the county for decades. Closing the school would destroy that tax base and decimate a community.	3/7/2026 3:54 PM
581	I have not heard how language immersion programs would be addressed. For example, if a student is at Evansdale in the French immersion program—what will happen to these French teachers—will the students no longer take French—how will this be handled? In addition to the above concerns, Briarlake is also a smaller school than Evansdale. Briarlake is also 10 years older than Evansdale. It does not make sense to use an older and smaller school to solve this problem. Livsey is 4 years newer than Evansdale but it is smaller and the layout of the land and the smaller land area is problematic. Of course, I am biased to Evansdale, but I can be objective having been an educator for 43 years. In looking at Briarlake and Livsey, it doesn't make sense to close Evansdale. Evansdale already has over 500 students and is likely to have over 600 students in the next few years. Evansdale has land to expand…and it is not off busy Chamblee-Tucker Road or busy LaVista Road—which is a safety concern. I also have concerns about longer bus rides, which means students have to get up earlier and get home later. Another consideration is Lakeside High School. Lakeside is well regarded in the county and metro Atlanta area. Making bad decisions to Lakeside's feeder schools will negatively impact Lakeside's success. As I stated at the beginning, it seems like the decline in enrollment and older school facilities was just noticed—and you are trying to do something that should have begun years ago too quickly…to the detriment of DeKalb students. Though I know a lot of time has gone into this, I do not believe it is a plan that serves DeKalb students well.	3/7/2026 3:53 PM
582	Dekalb needs to re-evaluate why so many students are choosing to go to private and alternative schools instead of the public system. The issue starts there.	3/7/2026 3:50 PM
583	If the object is to close the utilization gap, the district should focus on schools operating well below 70% utilization. Consolidation there would improve efficiency in a meaningful way. Please clarify what data were used in making the district's enrollment projections. Were all inputs weighted appropriately? Were Oak Grove's growth trends considered and included? Thank you for the opportunity to comment!	3/7/2026 3:45 PM
584	Why would you close Evansdale? It has a lot of room to expand, and has separate playgrounds and multiple parking lots. It's perfectly situated to grow, and the area is growing with increased projections for enrollments. Does it need to be renovated? Yes, but closing it would be such a waste of good space and baseline facilities. Closing Evansdale and Henderson Middle would disrupt the French immersion program and continuity, which is so well received and valued. Again, why? Eliminating Evansdale and Henderson Mill would destroy the French program ... what a shame.	3/7/2026 3:33 PM
585	Again, please protect the Chamblee magnet program. It offers significant opportunities to students who do not live in the Chamblee cluster or other similar clusters.	3/7/2026 3:31 PM

586	Consider informing everyone of possible scenarios as they relate to closures.	3/7/2026 3:30 PM
587	You have many professional educators among the families in the neighborhoods served by Oak Grove. Let us help!	3/7/2026 3:06 PM
588	Young children are the most vulnerable student group and benefit greatly from small, community-based school environments. Large schools often require heightened security measures such as metal detectors and frequent active-shooter drills. While safety is essential, these practices can create stress and anxiety that young children may not yet have the emotional maturity to process. Chronic stress at early ages can negatively affect focus, emotional regulation, and early literacy development. Elementary-age children thrive when they feel safe, supported, and personally known by educators. It is the responsibility of adults and policymakers to design learning environments that protect children's emotional well-being while supporting academic growth. Preserving smaller elementary schools helps shelter young learners during their most formative developmental years.	3/7/2026 3:05 PM
589	Evansdale elementary una pequeña escuela de barrio con muy buenas referencias y con el apoyo de las familias	3/7/2026 2:52 PM
590	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: •Already exceeds the 88% utilization target (89% current; 96% projected) •Has four consecutive years of enrollment growth •Ranks in the top tier academically •Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/7/2026 2:50 PM
591	What is working should not be sacrificed. Keep Oak Grove intact.	3/7/2026 2:48 PM
592	Listen to all sides	3/7/2026 2:43 PM
593	I just think the smaller elementary schools are better for the kids.	3/7/2026 2:40 PM
594	I am calling on the county to immediately stop this school closure study. Instead of spending resources on consultants and projects aimed at downsizing our community, I ask that you spend our tax dollars where they belong: on our teachers and our children's education. Our neighborhood is not a series of line items to be consolidated; it is a community that deserves an investment in its future.	3/7/2026 2:23 PM
595	The focus grade bands selected above with help to focus on the needs, skills and academic achievements. Each level allows each school to better meet the needs of the students.	3/7/2026 2:22 PM
596	We want more transparent cost information. I do not believe closing 27 schools, many of which are almost at capacity and performing well, is prudent. I support looking at schools overall, but there is no reason to close many of these schools. It will result in more students leaving the district for private and will perpetuate the cycle we've seen in South DeKalb.	3/7/2026 1:57 PM
597	Please consider slightly expanding Evansdale Please consider slowing down this process	3/7/2026 1:50 PM
598	Use reason - do not break up top performing schools. Even if you only care about buildings, shuffling Elementary schools in the Lakeside cluster does not make sense and is a waste of money. Focus on schools extremely over or under capacity.	3/7/2026 1:49 PM
599	The most critical data-set to analyze is the utilization-to-performance-to-per-pupil-cost ratio, combined with K-3 early literacy outcomes and community stability markers- not simply raw capacity percentages. A deeper analysis demonstrates that: 1. Closing small, high-performing schools costs more money long-term than right-sizing them 2. Federal, state, and local funding formulas reward school stability and student outcomes, not just enrollment size 3. Best practices from comparable districts show that mixed-size portfolios outperform aggressive	3/7/2026 1:47 PM

	consolidation strategies 4. Community-anchored schools generate measurable non-fiscal benefits that appear in federal Title I allocation formulas and state accountability metrics To make the right decisions for the long-term, please compare: 1. “Incremental cost analysis” showing only the truly variable costs of operating each school 2. Transition costs for closure and consolidation (bussing disruption, facility retrofitting, staff retraining), this alone often exceeds 5-7 years of “savings” 3. Attrition costs: Research shows 12-18% of families either leave the district or move to private schools when their neighborhood school closes 4. The total revenue-per-student for each school. Not the cost - REVENUE: Title I allocation (federal), QBE per-pupil amount (state), Local property tax per-pupil, ESPLOST per-pupil (capital), Weighted Pupil Unit (WPU) score. Necessary data from each school in order to understand and compare the full scope: 1. Student enrollment by month (September data point) for each year 2. Academic performance data including: - MAP testing scores (reading and math) for grades K-5 - CCRPI scores and components, current and 5-year trend - Subgroup performance (race/ethnicity, ELL status, special education status, economically disadvantaged status) - Specialized programs (inclusion, ELL, gifted, special ed, IB) 3. Financial data including: - Title I and other federal allocation amount - QBE state per-pupil funding amount - District allocation of local property tax revenue per-pupil - ESPLOST allocation and actual capital projects funded - Annual incremental operating cost 4. Facility data including: - Building condition assessment scores - Deferred maintenance backlog amounts - Life expectancy dates for major building systems (roof, HVAC, electrical) - Recent ESPLOST investments 5. Enrollment projections by year for the next 10 years, with methodology documented 6. Transportation route data showing current bus routes, distances, and annual operating costs 7. Utilization rates (current enrollment ÷ building capacity) for each year 8. Community feedback received on SAP to date (all written comments, emails, survey responses)	
600	Some children may need additional help within each grade. I do believe then there should be one on one tutoring available to families that have children that are in need of additional assistance with homework and testing skills so they can complete each grade with their classmates. Each grade should be singular … never combined with another grade bracket. Elementary schools should always be separated from high schools. Keeping some smaller schools that has a full staff and decently full classrooms should stay open to better the communities they have been placed in!	3/7/2026 1:43 PM
601	La escuela de Brockett está en buen vecindario	3/7/2026 1:28 PM
602	- Incorrect focus for a first step: by focusing on just buildings first and trying to make decisions based on that, you’re going to force/limit some of the options later. More appropriate first step: collect all data (buildings/class sizes/programs/student achievement records/accessibility needs/etc), group the data, look for trends across them, and have community meetings. The current plan takes consultants work too far by providing recs - that’s ok, but let’s stop throwing good money and time after bad - set aside the data they provided and take a step back. - — there are many ways to comply with requirements for redistricting. Based on the data available data so far, it seems like the on the ground situation shows the south part of the county is in a very different situation than the north. I’m guessing more granular data would show additional trends and differences. Maybe the solution is applying a per student or per school $ amount, and approaching the communities for input as to priorities (for example, i wouldn’t want to speak for anyone definitively, but I could see a situation where the focus for the north is new/expanding buildings, while the focus in the south is closing buildings and expanding programs at those schools, as well as transportation options to reduce commute times to the school). - — a more correct focus would be on child educational and psychological needs. This is particularly true for this particular group of kids - they’ve already had a huge disruption (Covid) that is still impacting them and their learning. It’s unclear to me what additional impacts this redistricting have for them, particularly if they’re (again) separated from friends. - — if y’all are dead set on this path of school buildings decision first without additional info, then 1) in the next round, please work to keep school co- mmunities together; and 2) please consider making class sizes larger for magnet schools, reevaluate whether current school enrollments at magnet schools are appropriate, and for any child whose community can’t be kept together, reopening/adjusting admissions criteria for all of the magnet schools.	3/7/2026 1:23 PM
603	Many families have moved to the Chamblee cluster for the HS and the middle. By changing the clusters many families will not support this and are looking forward to sending their children to Chamblee Middle and HS.	3/7/2026 1:18 PM
604	Middle school age students are transitioning from young children to adolescents which is a fragile and vulnerable time for these children. 6-8th graders should not be exposed to 9-12th grade high schoolers.	3/7/2026 1:17 PM

605	Do not close oak grove it is an amazing community and it is my child hood	3/7/2026 1:15 PM
606	Evansdale elementary is an integral part of our community and it cannot be closed.	3/7/2026 1:14 PM
607	It seems you do not address the problem if you now have to open schools specifically for PK-3 and then 4-5 - two facilities open where you had one.	3/7/2026 1:14 PM
608	Como comunidad deseara con todo corazón. Que no cierren brockett	3/7/2026 1:02 PM
609	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/7/2026 1:01 PM
610	I love the band it sounds good	3/7/2026 12:55 PM
611	N/A	3/7/2026 12:42 PM
612	Please please please DO NOT shut down Evansdale or interrupt the French immersion program. These institutions/programs are beloved in our community.	3/7/2026 12:36 PM
613	Nobody wants a huge elementary school. Lakeside is very overcrowded.	3/7/2026 11:59 AM
614	I hope future scenarios consider how important access to strong schools is for families who are not zoned for them. Opportunities like this help keep families within DeKalb County School District rather than seeking private or charter options. Preserving high-performing schools and the programs that allow broader access to them should be an important part of long-term planning.	3/7/2026 11:58 AM
615	Lakeside is overcrowded.	3/7/2026 11:56 AM
616	As a community member, I encourage DeKalb County School District to prioritize maintaining strong neighborhood elementary schools that families rely on. Schools such as Oak Grove Elementary School serve as important community anchors and help attract and retain families in the public school system. Future scenarios should carefully consider walkability, transportation impacts, and the role these schools play in maintaining stable neighborhoods and long-term enrollment.	3/7/2026 11:54 AM
617	Oak Grove Elementary has been a vital part of Oak Grove for many decades and provides a very good education for children. Please do NOT close it.	3/7/2026 11:49 AM
618	Resource concentration is important, but it should not come at the expense of successful schools. Instead, DCSD should prioritize investments and consolidation in under-enrolled or under-performing facilities while protecting strong schools like Oak Grove Elementary School that are helping the district retain and attract students. Closing neighborhood elementary schools significantly disrupts communities. Families choose neighborhoods based on elementary school access. The closure of Oak Grove Elementary School would likely increase traffic, lengthen bus routes, and weaken a long-standing community hub that supports families beyond academics. Oak Grove Elementary School should remain open because it has strong academic performance, a stable and engaged community, and a reputation that attracts families to public schools rather than private options. Maintaining successful schools helps stabilize enrollment across the district and strengthens community trust in DCSD.	3/7/2026 11:47 AM
619	I will be advocating to keep Dekalb School of the Arts programming.	3/7/2026 11:45 AM
620	There are too many risks of older students taking advantage of younger students when mixed in buses and in buildings, please keep the traditional Pk-5, 6-8, 9-12 bands.	3/7/2026 11:34 AM

621	These neighborhoods were built and grew to support independent schools.	3/7/2026 11:32 AM
622	As future scenarios are developed, it will be important to consider the impact on instructional quality, transportation, and staffing. Schools receiving additional students should have the necessary classroom space, special education resources, and intervention supports in place before transitions occur. Clear communication with staff and families throughout the process will also be essential to ensure that changes are implemented successfully and that student learning remains the priority.	3/7/2026 11:31 AM
623	Do not destroy the fabric of the communities by shuttering the elementary schools that bring the communities together. Oak Grove elementary is the reason why families move into this district. That is exactly how we want to spend our tax dollars. We a should prioritize education and community over a narrow dollars and cents analysts.	3/7/2026 11:29 AM
624	Children would be hurt if Kingsley Elementary school is closed! KES is more than a school, it's a family organization. I'm a retired lawyer who lives in the neighhood of KES. This is my fourth year as a volunteer with 4th and 5th graders. I'm with the students from 8:15-1:50 every Wednesday from August to May, so I know them well. Many are from disfunctional families that offer little academic or emotional support. KES, throught its extremely dedicated teachers and staff, many of whom have been at KES for years, fill the void. The children must have this support, and it won't be available at this level at a larger school. I donate my time to help these children who are in need. I recognize that while my efforts assist them, it's nothing compared to the tender loving care that they receive and require from KES. Please do NOT close this school! Thank you, Bret L. Block, Esq.	3/7/2026 11:29 AM
625	Keep Oak Grove, Sagamore, Lakeside, and Henderson.	3/7/2026 11:22 AM
626	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/7/2026 11:16 AM
627	Consider bands that reflect better schools….school enrollment if not considering why it's low will not declining will not affect quality. Use other resources that have affected student success. Do not let a small compass group affect everyone else's opinions.	3/7/2026 11:10 AM
628	Oak Grove should not close or consolidate	3/7/2026 11:09 AM
629	I would welcome collaboration between district leaders and both school communities to explore campus-level solutions that address high school capacity while preserving the Vanderlyn community.	3/7/2026 11:08 AM
630	I would welcome collaboration between district leaders and both school communities to explore campus-level solutions that address high school capacity while preserving the Vanderlyn community.	3/7/2026 11:06 AM
631	The district should continue to prioritize transparency, community input, and equitable access to programs while considering transportation, capacity, and the impact on school communities.	3/7/2026 11:05 AM
632	I think what you first need to do is get feedback from the community to come up with a reasonable plan. This was not a very effective way to inspire trust with parents in the community. I think stepping back and getting more feedback before proposing a plan is necessary. And the argument that is central to this plan about the number of students 110,090 2000 is incorrect. If you look at the data any parent will know that.	3/7/2026 11:04 AM
633	Please include recommendations from recognized bodies/authorities in these proposed	3/7/2026 10:55 AM

	changes and any known learning outcomes from each variation.	
634	Please balance community cohesion with economic factors and respect the value of hyperlocal elementary schools for our community.	3/7/2026 10:47 AM
635	Additional feedback to give would be to include more hands-on activities throughout the school in order for them to gain understanding of what they're learning.	3/7/2026 10:47 AM
636	Evansdale is a large property with good traffic and parking options for an expanded campus	3/7/2026 10:45 AM
637	We love our neighborhood school and want to see it continue to flourish. Even with trailers and rundown facilities, our school is one of the most overcrowded in a neighborhood where many can afford to go private. I think that means APES is doing something right and we should try to replicate that learning environment across other districts. I worry if we close the school without clear plan of where all the students will go (and stay together in the chamblee has trajectory) than you will lose far too many families and resources to private options.	3/7/2026 10:43 AM
638	None	3/7/2026 10:42 AM
639	Evansdale has a robust French Immersion program that is deeply embedded in the community and the current k-12 schools. It is imperative to keep this program at Evansdale and within the Lakeside cluster to keep the program strong. It took years of effort and resources to build this program to where it is today. Disrupting the program would waste tremendous resources and diminish a flourishing and unique DeKalb county educational resource.	3/7/2026 10:41 AM
640	Evansdale should be renovated and expanded. • At 10.1 acres, Evansdale's lot size is bigger than neighboring schools recommended for expansion. • Evansdale is unique in that it has a large, separate play field, two playgrounds, and multiple parking lots. Our site can accommodate additions in the back of the school and still have ample play and parking space. • Evansdale is uniquely situated to accommodate increased traffic, as it takes up two sides of a large neighborhood block.	3/7/2026 10:40 AM
641	As long as my child can have access to better programs and education experience.	3/7/2026 10:38 AM
642	Scenario 1's proposal to close 27 elementary schools far exceeds the previously discussed range of 4–16 and raises concerns about Oak Grove. The school already surpasses the district's 88% utilization target, with 89% current and 96% projected enrollment, has experienced four years of sustained growth, and ranks among the top academically. Closing Oak Grove would shift students to Sagamore Hills and Briarlake, both of which would require significant capacity adjustments, meaning closures would redistribute students without meaningfully reducing excess capacity. If the goal is to address underutilization, the district should focus on schools operating well below 70%, where consolidation can improve efficiency without requiring major capital expansion. Key clarifications are needed before moving forward: whether recent employment growth and residential developments were included in projections, whether pandemic-era data distort post-2023 trends, Oak Grove's projected utilization for 2028 and 2030, and the comparative costs of maintaining Oak Grove versus expanding nearby schools. A phased, data-driven strategy targeting the largest underutilization drivers would better support fiscal responsibility and long-term planning, ensuring capacity remains in place to accommodate ongoing growth in this corridor.	3/7/2026 10:31 AM
643	Make it fair and equal for all kids in all communities	3/7/2026 10:20 AM
644	As a current Dunwoody resident, we would be STRONGLY OPPOSED to any scenario that moves us out of the Dunwoody HS cluster. We are currently assigned to Chesnut Elementary.	3/7/2026 10:17 AM
645	I think this consolidation would be a major disruption in the education system and may cost more money in the long run. What is going to happen to all the abandoned schools? Instead of slashing taxes, divert more towards the schools.	3/7/2026 10:13 AM
646	Be very careful of changing things just by looking at statistics. The age range in neighborhoods with older people leaving and being replaced by younger families should be considered.	3/7/2026 10:02 AM
647	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize	3/7/2026 9:59 AM

	schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	
648	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/7/2026 9:32 AM
657	Oak Grove Elementary is a close community school and awards of excellence for years.	3/7/2026 9:31 AM
658	Individual schools should be liked at independently. Midvale Elementary serves the needs of the community and schof be off the chopping block. If our preschool programs were expanded there would be more seats available for K through 12. This could double the need for seats available if just 1 additional PreK was added at some elementary schools such as Midvale.	3/7/2026 9:30 AM
659	I think careful consideration needs to be taken when thinking about having 6-12 grade bands (maturity levels, what the youngest kids could potentially be exposed to by the oldest kids). I, personally think moving kids from an elementary school (youngest being 11) into a school where seniors are 18 poses significant risks to the younger students. Even private schools have upper and lower campuses to separate specific ages.	3/7/2026 9:25 AM
660	Please don't take away Montessori from HHES. We have 3 kids, 2 in the program already, 1 that we hope gets a spot in the future. We bought our house in this district with dreams of sending our kids to a Montessori school.	3/7/2026 9:23 AM
661	Parking at our school is very small, whenever we have events we park in the neighborhood with long walks while bringing young children or multiple children. This is an issue now with a small neighborhood school but will intensify if the school is expanded. Consider more parking in your plans.	3/7/2026 9:20 AM
662	Distributionn if closed schools needs to be considered so that pockets of dekalb are not unfairly affected by change. Dont be racist and classist idiots and assume "if they dont like the options and the changes, they have school choice and have other options." Thats not a realistic and reasonable option for many families.	3/7/2026 9:12 AM
663	Oak Grove Elementary is a solid school. Parent involvement is extremely high. It is the glue that keep our community connected.	3/7/2026 9:06 AM
664	If you said it took $500k of community fundraising to keep the school, I'm confident we can do it.	3/7/2026 9:06 AM
665	Future scenarios should clearly show the data and assumptions used to make decisions, including capacity, utilization, travel impact, and where students would actually be placed. Transparency and validation of the underlying data are critical for community trust and for evaluating whether proposed solutions truly address the district's capacity challenges.	3/7/2026 9:04 AM
666	Our students will be much more success if they can be allowed to stay at the elementary school through grade 8 and then go to high school. They are not prepared, mentally, socially or psychologically, to a separate school in grade 6. Please give our children more time to grow before shipping them off to a separate campus at a separate school. BIG mistake Delalb County !!	3/7/2026 9:04 AM
667	Too wide of age groups in one school increases the risk for the students and strains the staff. Keep the bands small.	3/7/2026 9:03 AM
668	If Dekalb Schools is suffering from a shortfall in income, maybe it should look at non-instructional jobs (County office staff and salaries). Additionally, if Dekalb School Board would vet and then hire a qualified superintendent instead of felons and failures, payoff to get rid of such would stop.	3/7/2026 9:03 AM

669	none	3/7/2026 8:59 AM
670	Local schools are important to building and maintaining a strong community	3/7/2026 8:57 AM
671	Oak Grove Elementary is a very important part of this thriving community and should not be closed.	3/7/2026 8:39 AM
672	can the consolidations be cut from 27 consolidations to 12 consolidations (4 elementary facilities 4 middle school facilities 4 high school facilities) can clarifications be provided regarding how the facilities that are closed due to consolidations will be repurposed?	3/7/2026 8:20 AM
673	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/7/2026 8:15 AM
674	I want the schools to stay in the same cluster. Montgomery ,Chamblee middle, Chamblee high school also kittredge magnet school.	3/7/2026 8:14 AM
675	Evansdale elementary should remain open and be part of the Lakeside high school district.	3/7/2026 8:00 AM
676	The state of DCPS is most unfortunate. The families that could afford private school did a mass exodus due to the dilapidated buildings and lack of vision due to revolving door superintendents. So much of this could have been prevented. So unfortunate.	3/7/2026 7:58 AM
677	Please provide additional information on the next step if school will be closed. Where will the students be reassigned and how? What cluster if move?	3/7/2026 7:49 AM
678	I've lived in Dekalb since 1992 and owned property here since 1999. Like many of my neighbors, I chose my neighborhood based on Lakeside High School and my children graduated from there. A decision to close Evansdale and redistrict our children into Tucker or Doraville has many impacts to the quality of life for our neighborhood. I implore the Board to keep Evansdale open, expand its capacity and allow it to stay in the Lakeside High School cluster.	3/7/2026 7:49 AM
679	Keep academically successful community schools like Oak Grove Elementary open.	3/7/2026 7:41 AM
680	The community will be better able to comment if you pair building closure info with how boundaries would be affected.	3/7/2026 7:34 AM
681	Keep Montgomery, Huntley hills and Ashford park families in the chamblee cluster. Keep the magnet program in Chamblee. Kids in keswick village, Keswick park and sexton woods should all stay at Montgomery elementary since together they form 1 neighborhood unit.	3/7/2026 7:04 AM
682	Would school choice go away? What about families who already opted in to school choice? I think it needs to go away when the lines are re-drawn. There are lots of great ideas about how to improve chesnut elementary - changing the entrance to be off such a main road, more parking for visitors and staff, more areas for meetings and staff to meet with parents, less trailers, etc. I am excited to see the plans for our school! I am worried about losing so many amazing families to Doraville schools - especially those who live in the Carver Heights neighborhood. They are VERY active at school and need to stay with us. If chesnut is expanded to hold 900 students, please make sure our school has enough admin support across all grades - it feels like we do our best with a little. More support is needed! Thank you!	3/7/2026 6:52 AM
683	I drive on Lavista Road and Briarlake, Coralwood, Sagamore Hills, and McLendon are all within a few minutes of each other. Are you closing any of the Area 1 schools in the District. You won't inconvenience those parents or their children.	3/7/2026 4:56 AM

684	Keep Oak Grove Elementary open. It's a great school and the community supports it's continuation.	3/7/2026 3:10 AM
685	I would've liked an option to say I don't know. Feedback from parents, teachers, administrators should be considered on the cluster concept and individualization of choice.	3/7/2026 1:47 AM
686	As DCSD evaluates future scenarios, the district should prioritize strengthening schools that are already producing strong academic outcomes. Decisions about consolidation should reinforce what is working, not dismantle it. Preserving successful neighborhood schools is one of the most effective ways to retain families in the district and sustain long-term enrollment.	3/7/2026 12:12 AM
687	So far, so good. Looking at it objectively, this makes sense.	3/6/2026 11:34 PM
688	When I was growing up GA ranked one of the lowest for public schools in the nation, and this seems to be headed back in that direction. This feels more like a move to devalue our education system and push more people to support vouchers rather than strengthening our schools. There is a reason why other schools have tried to duplicate Ashford Park when building magnet schools. You can say that closing Ashford Park is just about the building, but that school is the crown jewel of public schools in Brookhaven and closing it impacts the people here. It would tear apart this community and greatly impact us and our neighbors.	3/6/2026 11:27 PM
689	I believe prioritizing the consolidation of underutilized schools should take priority. Closing a school that meets and exceeds utilization metrics will unduly displace the community and will not assist in utilization of the schools in the immediate are without significant and unnecessary construction, disruption to surrounding neighborhoods. None of this looks at the disruption to the quality school that Oak Grove is, the disruption of the education to the displaced students and community, and the knowledge that other expansion projects of elementary schools in DeKalb county have not provided the outcomes of increased quality education metrics.	3/6/2026 11:02 PM
690	Keeping neighborhood community schools, particularly elementary schools, should be a top priority.	3/6/2026 10:52 PM
691	My daughter was fortunate enough to get into Oak Grove via school choice and the progress she has made has been tremendous. She is a student with a 504 plan recently and was recently diagnosed with a specific learning disability in math; she is currently in the evaluation process. Oak Grove has been extraordinary for her, as well as the numerous students at Oak Grove with a 504 plan or IEP (approximately 23% of students). She has grown 18 percentile points in math on MAP, and the leadership and support under Principal Ms. Kennedy have been exceptional. Stability is critical to my daughter and the students of Oak Grove's continued academic and emotional progress.	3/6/2026 10:48 PM
692	DO NOT CLOSE OAK GROVE ELEMENTARY. This would be a terrible loss to a thriving community. Oak Grove has a place in the hearts of many that have attended, have subsequently sent their own children there, and donated money to after they left.	3/6/2026 10:48 PM
693	I appreciate the effort that DeKalb County Schools is making through the Student Assignment Project to address declining enrollment and excess facility capacity. However, the proposal to close Ashford Park Elementary raises significant concerns because it appears to conflict with the district's stated goals and risks undermining one of the strongest school communities in the system. First, Ashford Park Elementary is both high-performing and heavily utilized, serving roughly 776 students in a facility designed for approximately 480. The stated purpose of the SAP process is to address underutilized capacity across the district. Closing a school that is already significantly over capacity and in high demand does not address the core capacity challenge. Instead, it risks redistributing students away from one of the district's strongest schools and weakening a community that is currently thriving. Second, the SAP proposal focuses heavily on declining enrollment but does not sufficiently address the root causes behind why families leave DeKalb County Schools. Across the metro Atlanta region, families often make decisions about where to live based on confidence in public school quality, cluster stability, and the predictability of school assignments from elementary through high school. Without addressing these drivers—such as academic consistency, program quality, and feeder pattern stability—facility consolidation alone may accelerate the loss of students rather than stabilize enrollment. Third, the Chamblee High cluster is one of the strongest academic clusters in DeKalb County, and preserving the continuity of that cluster should be a priority for retaining families in the public school system. Many parents choose to remain in DeKalb specifically because they value the pathway from Ashford Park Elementary through the Chamblee cluster. Disrupting that pathway risks fragmenting a community of highly engaged families who are deeply committed to public education and may otherwise choose	3/6/2026 10:48 PM

	private schools or neighboring districts if that stability is removed. Fourth, Ashford Park represents a model of extraordinary parental engagement and community investment. Schools like this benefit from strong volunteer participation, PTA fundraising, and community involvement that significantly enhance the educational experience for students. When highly engaged school communities are disrupted, the district risks losing not only students but also the volunteer time, philanthropic support, and enrichment programming that strengthen the broader system. Fifth, the district should also consider the broader economic implications of closing high-performing neighborhood schools. Strong public schools are one of the primary drivers of residential stability and property values. Major disruption to schools within the Chamblee cluster could negatively impact property values in Brookhaven and surrounding communities, which ultimately affects the county's tax base and long-term economic stability. Additionally, the Brookhaven and Chamblee areas are experiencing continued population turnover and redevelopment that bring young families into the community. Long-term enrollment demand in this part of DeKalb County is structurally stronger than in many other parts of the district. Closing Ashford Park risks eliminating capacity in one of the few areas where enrollment demand is likely to grow over time. Finally, I would encourage the district to consider a broader strategic framework for the SAP process that includes identifying and preserving "anchor schools." Anchor schools are high-performing, high-demand schools within each cluster that serve as stabilizing forces for enrollment and community engagement. Schools like Ashford Park help retain families in the public system and provide models for best practices that can be replicated elsewhere in the district. Rather than closing these schools, the district should analyze the factors that make them successful and seek to expand those practices across the system. In summary, a more sustainable approach to the Student Assignment Project would: • Prioritize consolidation among consistently under-enrolled schools where capacity utilization is low • Preserve high-performing, high-demand schools such as Ashford Park Elementary • Maintain strong feeder clusters like the Chamblee High cluster to retain families in public education • Conduct a deeper analysis of the root causes behind enrollment decline and implement strategies to address them • Identify and protect "anchor schools" that stabilize communities and strengthen the overall district Ashford Park Elementary is not simply another facility within the district—it is a school that represents strong academic performance, high enrollment demand, extraordinary community engagement, and long-term stability for families committed to DeKalb County Schools. Preserving and learning from schools like Ashford Park will ultimately do far more to strengthen the district than closing them.	
694	The elementary schools you are suggesting to close such as Evansdale, oak grove, ashford park, vanderlyn are some of the highest performing ones and the reason people move into the area. I would think focusing on keeping the schools that perform well would be a better plan than keeping low performing schools.	3/6/2026 10:46 PM
695	Community schools that feed into each other yields benefits that benefit the students, parents and society in general. Oak Grove is an excellent school that has produced graduates who do well in High School and College.	3/6/2026 10:38 PM
696	Evansdale Elementary School has long been a cornerstone of our community. It is more than just a building—it is where relationships are built, teachers invest deeply in students, and families form lasting connections. Closing this school would not only disrupt the education of current students but also dismantle a community that has been thoughtfully built over many years. Families in this area made intentional decisions about where to live based on the stability and continuity of the Lakeside High School cluster and the French DLI program. Many households have children at multiple grade levels, and removing Evansdale from this cluster or closing it entirely would create unnecessary disruption for students and families who rely on that continuity.	3/6/2026 10:38 PM
697	Instead of closing, Consider repurposing facilities into magnet/theme schools that would greatly benefit and fit the culture of our cluster.	3/6/2026 10:32 PM
698	Smaller kids tend to work well with others and be more accepting of others. As they get older, the differences in the ages become much greater.	3/6/2026 10:25 PM
699	In my opinion, this process should be slow and methodical. School closures should start at the schools that are actually below capacity and are low performing, and then reevaluated if they improved. Additionally, we need to know where our kids will go to school to give adequate feedback. Will boundaries be redrawn between school districts?	3/6/2026 9:56 PM
700	I specifically advocate for retaining Evansdale Elementary given its unique French Program which is an example of an educational asset that if promoted and advertised could attract	3/6/2026 9:17 PM

	parents and growth in enrollment. There must be greater focus on forward-thinking activities on how to retain and grow DeKalb Schools enrollment. Parents desire affordable, local schools and it is easier than expected to help parents choose public schools over private schools or schools outside of DeKalb. Schools must remain local and local schools must have reasonable flexibility with curriculum and methods, with accountability maintained through performance measures. The past year's attempt at standardization, homogeneity, and other practices promoted by Mr. Horton have not been effective and are increasing dissatisfaction as many parents will attest to. Devote resources to unique educational programs at schools such as DLI and science-focused tracks and parents will return. School closures will drive away many affluent parents as well as disproportionately hurt poorer families who can least afford longer travel times and greater disconnection from local education resources.	
701	To preserve a school, consider adding specialized programs to maximize use of the facility.	3/6/2026 9:12 PM
702	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/6/2026 9:10 PM
703	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: Already exceeds the 88% utilization target (89% current; 96% projected) Has four consecutive years of enrollment growth Ranks in the top tier academically Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? 704	The optics will be bad no matter what you do. It looks like another attempt to avoid any appearance of division by racial lines, but the facts are the facts - the southern part of the district radically skews to undercapacity while the middle and norther part of the district are closer to appropriate utilization.	3/6/2026 9:02 PM
705	The city can keep building homes Why keep closing schools. Education is important more than the investors that's buying up everything	3/6/2026 8:56 PM
706	There a few fundamental problems that will not allow this plan to work: 1) This plan was started under Dr. Horton, now indicted for fraud; DeKalb county parents are at an all time low in terms of their confidence in DCSD leadership. You can not expect DeKalb county parents to "trust" the process if they can't trust the system. These are BIG changes for some area. Without public buy-in, you will run into BIG opposition 2) SAP has clearly been working for some time on this process; but, every parent I talk to feels completely blind-sided by the announcement. We are completely inundated with communication from our schools (particularly if you have kids in more than one school) and DCSD. So while I'm sure there was communication along the way, we receive so messages, a complete reorganization of our school system was not on	3/6/2026 8:49 PM

	anyone's radar 3) These changes are being made due to low enrollment. These changes are very likely to further decrease enrollment. Mistrust of DSCD, closing local smaller walk-able schools so that kids have to be transported by bus to a larger school will not help increase enrollment. It will worsen the problem. I have heard many people speaking of pulling their kids and putting them in private school. Anyone with the means to do so will pull their kids out of DCSD, further decreasing our enrollment. And then you'll have the same enrollment problem again.	
707	Keep Montgomery, Huntley hills and Ashford park families in the chamblee cluster. Keep the magnet program in Chamblee. Kids in keswick village, Keswick park and sexton woods should all stay at Montgomery elementary since together they form 1 neighborhood unit.	3/6/2026 8:43 PM
708	PLEASE DO NOT CLOSE EVANSDALE ELEMENTARY! It is a gem and a gift to have a school that is so diverse and community oriented. Larger schools feel much less personal and I think would negatively impact property values. I think many kids feel safer in a smaller school setting and their feelings of safety are vitally important in a time of unmitigated school shootings.	3/6/2026 8:42 PM
709	If there are scholl that have empty seats ,move them about, if schools need help getting better, then send money to them. My school has great teachers, it's perfect size and I am learning so well.	3/6/2026 8:23 PM
710	Que hayan nuevas escuelas Y que se, la educación se un poco más buena en tecnologías	3/6/2026 8:21 PM
711	N/A	3/6/2026 8:20 PM
712	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/6/2026 8:17 PM
713	I don't love most of these options. I'd hate for my kid to move schools every 3 years. But having pre-k kids and 8th graders in the same building doesn't seem like the best idea either.	3/6/2026 8:17 PM
714	I would welcome collaboration between district leaders and school communities to explore campus-level solutions that address high school capacity while preserving the Vanderlyn community.	3/6/2026 8:15 PM
715	Schools that have desirable special programs can absolutely fill those spots. Fix the buildings or build new ones, don't move us	3/6/2026 8:05 PM
716	There has been a strong response and a goal towards organization in order to preserve our neighborhood's spot and its current cluster and neighborhood elementary school. I think it would be a significant waste of county resources in order to continue down this path that is very, obviously not supported by the public and its tax base.	3/6/2026 8:00 PM
717	Please consider adding additional pre-K classrooms. Our communities would highly benefit from this, and with the lottery waitlist, it is clearly needed and would fill higher utilized schools.	3/6/2026 7:54 PM
718	The next round of scenarios should not include school closures for the high schools unless ABSOLUTELY necessary, such as a dangerous facility to occupy. Closures will be less volatile for elementary and middle school students. Let's keep this data people first and not facility first. Think of the broader socioeconomic outcomes with each scenario. I have not seen that data yet.	3/6/2026 7:52 PM

719	I ask again that the county review the performance of Robert Shaw Theme school and reconsider closing such a valuable school that has produced excellent scholars for years.	3/6/2026 7:50 PM
720	You do not look at demographics for those closing. There needs to be a similar quality of schooling and that is difficult to find. Where will the teachers go? What will happen to the existing facility? What is the true motivation. Quality of schooling is why parents are upset about Ashford park potential close. There is nothing equivalent or close around. It is a disservice to those students in the area deserving a higher quality education. You will reduce home prices and make families leave the area that moved specifically for the school cluster.	3/6/2026 7:40 PM
721	It’s insane to close Ashford park, a great school that is overcrowded! And a 26 million dollar upgrade of the cafeteria there is underway—why would you close it? Vanderlyn is another good one you all want to close. Keep high performing schools open and close low performing ones that aren’t full. It’s not rocket science. Also, why move the Ashford park cluster from a well-performing school like Chamblee high to a low performing school like Crosskeys? That’s not fair to take away the good highschool from this cluster.	3/6/2026 7:37 PM
722	Find a way to keep neighbors together to keep crime from spreading.	3/6/2026 7:29 PM
723	Oak Grove Elementary School: - Exceeds the 88% utilization target (89% current; 96% projected) - Has four consecutive years of enrollment growth - Ranks in the top tier academically - Would require significant capacity adjustments at Sagamore Hills and Briarlake	3/6/2026 7:29 PM
724	Just no reason whatsoever to close Oak Grove Elementary School as it would negatively impact our neighborhood and our kids education needs.	3/6/2026 7:23 PM
725	Maybe if DCSD didn’t waste money hiring people already under investigation (2 past superintendents)they could save and not be so worried about this.	3/6/2026 7:14 PM
726	This is all a major distraction before testing.	3/6/2026 7:10 PM
727	The entire rollout of this round-by-round process has been frustrating to families who will be affected by the SAP scenarios. I'm not going to repeat the same valid issues (board absence and disinterest in the clusters over the last couple of years, breaking the news days before schools in the district were going on break) that others have laid out on Facebook and in meetings, but the simple fact that you've now pulled back on the late March in-person meetings does NOT make this seem like a conversation with communities, but an ultimatum.	3/6/2026 7:10 PM
728	The first step to close facilities should be the last step. Planning for purpose not seats should be first with a clear financial plan. I am concerned weighing what the state funds today could change what the state funds tomorrow. Think locally first.	3/6/2026 7:09 PM
729	Unless schools are losing enrollment, renovations and expansion should be considered when you consider the long term hassle of students traveling on buses, congestion around Atlanta and Dekalb county, and the cost of students and parent traveling each day of the school year for the next 20 years.	3/6/2026 7:06 PM
730	Do not close Oak Grove Elementary School 1) our enrollment is growing every year since Covid 2) we are a top performing school we should be replicated not closed 3) a consulting company with construction interests should not be driving process. People buy their homes to belong to neighborhood schools for many reasons.	3/6/2026 7:04 PM
731	If these schools are closing, what will happen to the employees? I'm concerned.	3/6/2026 6:59 PM
732	I live in Oak Grove Community-went to Oak Grove as a kid. Excellent teachers	3/6/2026 6:58 PM
733	This is the cluster we used to have until the late 1990's	3/6/2026 6:52 PM
734	Based on the current 92k students attending school, let's consider the smaller class size can benefit the teachers and students for structure and learning. Please reassess the earlier assessment of closing schools. Examine other options such as how military and charter schools' functions with smaller number of students.	3/6/2026 6:50 PM
735	It is important to keep communities and neighborhoods together under the same high school. Once a child started under one high school they should be allowed to continue in that high school through graduation. Forcing children to switch school, communities, and friendships after starting at one high school will damage their mental and emotional health, as well as the likelihood that they will succeed academically.	3/6/2026 6:45 PM
736	It is important to keep communities together in the same highschool. And once a kid started	3/6/2026 6:45 PM

	one school, they shoould be grandfathered in and allowed to stay in that school until graduation. Whether they are a freshman or a junior/senior. Switching schools and community and friendships in the middle or after starting at one highschool is detrimental for mental health of teens. Please keep community in one school.	
737	I small children do not need to bus so far from home to go to school. They should be able to walk to the school in their neighborhood.	3/6/2026 6:37 PM
738	N/A	3/6/2026 6:34 PM
739	Reiterating the need to keep all elementary schools in the Dunwoody cluster IN the cluster. Scenario 1 provides an equitable access to all Dunwoody and keep the walkability of the cluster intact, as there is no change on highways since inception. Important to note the great sport and collaboration effort the schools among the Dunwoody cluster have with Peachtree Middle and DHS. Something important to note how many CES students keep going to Peachtree as they always have seen it part of the development and academic curriculum due to the close distance. Thank you to consider my survey insights.	3/6/2026 6:22 PM
740	Do not close best performing schools.	3/6/2026 6:03 PM
741	This school need to close , their horrible there	3/6/2026 5:52 PM
742	I also recognize that the district has framed SAP around enrollment trends and utilization. Any proposal should clearly demonstrate how those metrics are being applied at the cluster level. The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made.	3/6/2026 5:48 PM
743	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/6/2026 5:47 PM
744	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment	3/6/2026 5:44 PM
745	The grade spans above in other block was used where I went to school in the 1950's and 60's. I have no idea if it would work any better than other options.	3/6/2026 5:37 PM
746	Does any of this affect home millage rates?	3/6/2026 5:31 PM
747	High school should start from 8-12 grades	3/6/2026 5:26 PM

748	It would be nice if they would start with the families, the students and the staff directly impacted by all of this endless and expensive threats of change.	3/6/2026 5:23 PM
749	We will reject all proposals about closing oak grove elementary which is a trademark school	3/6/2026 5:20 PM
750	Because of emotional, physical and psychological development mixing Elementary, Middle and High School students together could pose a problem. Those issues were the basis for the current configuration. More than just space and resources must be considered.	3/6/2026 5:19 PM
751	Please do not shut down Oak elementary. It is an outstanding place and it should stay open. Lots of staff need that job and students need to learn there. It's the closest place for a lot of us. It's our community.	3/6/2026 5:11 PM
752	Priority should be given to fix actual problems, not made up ones used for optics to look like HPM is fair to all districts. This is unfair to this area. Adjust school with qctual large empty seats, adjust districts where growth has slowed. Adjust school with poor performance...send money to help fix these problems. Making changes where none are needed is ludicrous and wasteful of tax payers money	3/6/2026 5:09 PM
753	Why. It does not matter. This is the same game 25+ years.	3/6/2026 5:06 PM
754	Save schools that people deeply care about like oakgrove	3/6/2026 4:57 PM
755	Save Oak Grove.	3/6/2026 4:56 PM
756	Save schools that people care about like oak grove.	3/6/2026 4:56 PM
757	How many certified teachers will be placed in a class? What will happen to teachers if and when their school site close?	3/6/2026 4:55 PM
758	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/6/2026 4:54 PM
759	Please don't close Ashford Park elementary! Sinc Giles Stevens	3/6/2026 4:53 PM
760	I have listed most of my ideas and concerns above, and would welcome any sessions involving parent input with the HPM representatives so that we can have a discussion of ideas and give feedback on what would and wouldnt work for our community. SOOOOOOO many people want to send their kids to the public schools and end up moving to Milton or private school (if they can afford it) because of distrust in Dekalb County. I think this distrust combined with teacher concerns of job security and lack of communication around this whole experience up to now will only cause a greater exodus of families from Dekalb county schools.	3/6/2026 4:51 PM
761	I have never seen a process that asks parents for feedback on closure decisions without also articulating what the alternative proposal for rezoning is. How can parents reasonable give feedback if they cannot respond to what will happen to their kids?	3/6/2026 4:47 PM
762	Many staff members were unable to login to the staff Teams meetings. I registered for both the 7am & the 4pm, but I could not login to the 7am at all. I got into the 4pm, but colleagues could not. I wound up losing audio in the 4pm meeting, so I had to wait for the video, anyway. Many staff found out about the meetings too late to attend.	3/6/2026 4:45 PM
763	At this time and always, we cannot afford to loose jobs and we just cannot ignore the need for efficiency if it is not at the cost of our diverse students' learning needs. Thank you!	3/6/2026 4:41 PM

764	The next step should involve deeper data analysis, data visualization, and a careful review of the survey results from the community. These analyses could help decision-makers better understand school performance, enrollment patterns, and community concerns. I understand that it is difficult to make everyone satisfied with decisions like this. However, by using data and listening to community feedback, the district can try to make the best and most balanced decision possible.	3/6/2026 4:35 PM
765	Middle schoolers are not high schoolers and need their own school	3/6/2026 4:11 PM
766	DCSD needs to be more transparent. It is not possible to close schools then talk about reasoning etc. They must occur concurrently.	3/6/2026 4:09 PM
767	No because every child learn different.	3/6/2026 4:03 PM
768	Do not bring Dekalb county schools by closing excellent schools. I will only make the county school system rankings worse.	3/6/2026 4:03 PM
769	Please do not close Ashford Park elementary, it is a neighborhood gem. People move to the area just to go to Ashford Park elementary.	3/6/2026 4:02 PM
770	It costs money and resources to heat, cool, maintain facilities that are under utilized. Children don't walk to these s hools they are driven by their parents. Just go look at the long lines of traffic clogging parents.	3/6/2026 3:59 PM
771	As a parent of 3 who moved to this area specifically for the school, it is very important to me that these considerations be taken into account. It's not simply that we don't want consolidation, it's that the data do not support anything of the sort for Oak Grove. Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with f iscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/6/2026 3:49 PM
772	There needs to be systems in place if big kids are allowed to be around little kids, especially around technology and illegal substances. All schools should remain open and FULLY FUNDED and not closed and absorbed into other schools that would inevitably lead to bigger classrooms.	3/6/2026 3:47 PM
773	Additional age bands might allow for neighborhoods to remain in their current school district, decrease the need for major building expansion and, with needed renovations, make the buildings more appropriate for the age group without losing the community buy in. Special programs (like the French program at Evansdale) could remain intact and even expand within the cluster. Losing school community support by dividing neighborhoods and moving them to different clusters will force families out of DeKalb County.	3/6/2026 3:46 PM
774	definitely keep ALL schools open and instead of preparing to close schools, direct that effort to get more state or federal funds or grants.	3/6/2026 3:45 PM
775	We prefer to keep the trailers rather than changing cluster. L	3/6/2026 3:44 PM
776	Evandale is where my kids went. My grandchildren should go to the same school. Our home was purchased based on this location	3/6/2026 3:43 PM
777	I think it would be a good use of some of the closed school buildings to make space for some exhibits for field trips. For example, a World War 2 exhibit that 5th graders could go visit. Could be changed monthly or offer several different programs. Would be efficient to get to and inexpensive.	3/6/2026 3:42 PM

778	As the district develops the next round of scenarios, I encourage leaders to continue focusing on solutions that strengthen the long-term stability of DeKalb County schools while minimizing disruption for students and families. I understand that declining enrollment means the district needs to evaluate how buildings are being used, and I support efforts to make sure resources are focused on academics, teachers, and student support rather than maintaining underused facilities. At the same time, it will be important to carefully consider how changes affect students day to day. Transportation times, school capacity, and student safety should all be major factors in any final decisions. If schools are consolidated, the receiving schools should have the staffing, resources, and facilities needed to support additional students without creating overcrowding or reducing program quality. I also encourage the district to prioritize age-appropriate learning environments when considering grade band changes. Younger students should not be placed in school settings that are primarily designed for much older students. Maintaining environments that are developmentally appropriate is important for both safety and student well-being. Finally, schools play an important role in the identity and stability of communities. Continued communication, transparency, and opportunities for family input will be essential as scenarios evolve. My priority as a parent is that any changes ultimately improve the educational experience for students across the district while maintaining strong, supportive school communities.	3/6/2026 3:39 PM
779	Keep Chestnut as is	3/6/2026 3:36 PM
780	I would hate for these schools to close because it would change the community. The community makes the school. Some communities are better than others, and some communities value education more than others. And some communities don’t get along with other communities. And some communities don’t get along with other communities, and trying to force all the communities to get along isn’t going to work. I sent my boys to the Globe Academy thinking that they would get a scoop of culture, and all it did was confirm that some people want to stay with the people that look like them, eat like them, and pray like them, and they don’t wanna be your token, Hispanic friend, token, Asian friend, or token, black friend. The teachers make the school, and you can’t re-create the same school in a different community because you need the people who fill the school and the teachers who teach the students. They have a horrible time educating because they have to overcome so many social issues. Please don’t close Oak Grove Elementary, and please don’t relocate KITTREDGE at assembly. Those schools have earned their spot. Those schools have produced wonderful students who have gone on to work in Georgia and have created a great workforce that you all should be proud of. Don’t penalize these kids for doing the hard work. I know you can figure it out. You can get creative. Some things on paper look great, but don’t forget the human element, and don’t forget that just because you don’t understand it doesn’t mean it’s not happening, or that just because you think it’s racist doesn’t mean it’s not an actual factor.	3/6/2026 3:36 PM
781	N/A	3/6/2026 3:27 PM
782	Biggest Priority: Keeping the Ashford Park Elementary community together and being in close proximity to our elementary school.	3/6/2026 3:16 PM
783	I am concerned with the finances surrounding this initiative since it started under Horton. While I think we need to efficiently use building space, I believe the closure of 27 schools is very drastic.	3/6/2026 3:09 PM
784	Instead of closures, DCSD should use the 20,000 'empty seats' to pilot smaller class sizes (15–18 students) and specialized 'Micro-School' hubs for STEM, Arts, or Special Education. Future scenarios should model PK–8 grade bands in underutilized buildings to improve student retention and provide stable community anchors. Don't prioritize operational efficiency over the proven educational benefits of smaller, specialized neighborhood schools.	3/6/2026 3:02 PM
785	Na	3/6/2026 3:00 PM
786	Make McNair Middle a theme or magnet school so the Barack Obama Elementary kids have somewhere to go. That building has a lot of technological capabilities that are not being utilized.	3/6/2026 2:59 PM
787	None	3/6/2026 2:58 PM
788	Robert Shaw Theme School is an important part of the community and should remain open. The school serves many families who value its supportive environment, cultural diversity, and commitment to student success. Closing neighborhood schools can weaken communities and place unnecessary burdens on families, especially younger students who would have to travel	3/6/2026 2:57 PM

	farther and adjust to new environments. I strongly encourage the district to prioritize maintaining and strengthening schools like Robert Shaw rather than consolidating or closing them.	
789	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake One of the assumptions often associated with school closures is that they produce significant operating cost savings. However, research from other districts suggests that the financial impact is often much smaller than expected. In many districts, estimated annual savings per closed school are typically in the range of $500,000 to $1 million, because many costs remain in the system AND closures can create new costs. Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/6/2026 2:57 PM
790	None for now.	3/6/2026 2:54 PM
791	NA	3/6/2026 2:51 PM
792	Specifically for Evansdale Elementary. Our parents, teachers, and staff have worked hard to secure and develop our French program. This program draws people to our community. It is non/transferable and it continues into HMS, which is an argument for staying in our cluster There is a lack of clarity of the data used and decision making to make these decisions, not to mention that this plan was hatched by Horton, who has been charged with fraud; general distrust of the board and the process. There is a high probability that enrollment will drop if we lose our local elementary school as some people will go to private school/alternative options rather than send their child to a "mega school" that is further away	3/6/2026 2:48 PM
793	Prek to 6, 7-9, 10-12	3/6/2026 2:46 PM
794	To reiterate what I have said above, I find the framing on these questions, particularly unhelpful. We are not really weighing in on grade band scenarios, or at least it does not seem that way. Way. We are weighing in on the closure of specific schools. This district has not built the level of trust with Community where people feel like they understand or believe in the vision the district is working towards.	3/6/2026 2:42 PM
795	As the district develops future scenarios, it will be important to consider transportation time, class sizes, and the availability of specialized services such as special education, counseling, and intervention support. Community input should continue to be prioritized, and families should receive clear information about how changes may impact their students. Ensuring that all schools remain safe, well-resourced, and supportive learning environments should be the top priority in any facilities decision.	3/6/2026 2:37 PM
796	Try to keep class sizes from being to large.	3/6/2026 2:36 PM
797	I can't emphasize enough how important and fair it is to ensure Ashford Park students all get to remain together and as part of the Chamblee cluster.	3/6/2026 2:35 PM
798	Evansdale's French program has local vounteers and resources who are already involved. Those resources and volunteers may not be available in other neighborhoods. It is also critical to keep the French program in the Lakeside cluster as the program and its teachers have strong roots in the Lakeside community.	3/6/2026 2:33 PM
799	Whatever you do, make sure operational capacity is created to hold teachers and administrators accountable and conduct meaningful performance management reviews monthly/quarterly/annually. I'm very disappointed with the DCSD, the facilities are below standard (not even the school facilities operators care that the HVAC systems don't work for	3/6/2026 2:32 PM

	months, water leaks, etc..), each school is like it's own sovereign nation making up rules on the fly, teachers are incorrectly incentivized, the administrators are like small cartels stealing money with no regard or accountability. Majority of the teachers and administrators are flying under the radar picking up their next annual step in pay and focusing on tenure to retire. It's shameful what I've witnessed with my two kids going through the DCSD system and glad my last one only has a year left. As a son of a life long teacher (50 years) I use to think teachers were underpaid, what I've experienced and researched with the compensation and salary bands (call it total rewards) they are overpaid. DCSD needs true leaders, people who have worked in the private sector that can solve problems and drive results, not a bunch of career teachers/administrators rising through the ranks that are not competent to run the education programs for our kids.	
800	The TEACHERS who will be affected by this merger need to be supported and reassured that a clear plan and a strong leader will be in place to guide us through this transition.	3/6/2026 2:30 PM
801	Lithonia is the oldest High School in Southest DeKalb, its a shame to heritage and history to not have a Lithonia High School.	3/6/2026 2:28 PM
802	I think this could be a good opportunity to further integrate schools race wise (because sadly we are still very segregated as far as that goes) which would over all be better for everyone. However some of the schools that will possibly close are going to deter families from going to their “new schools” and seek out another county or private schools then furthering the divide. So again i think a lot of trust needs to be built between the community and DeKalb County. Aka prove you are in it for the kids and not just for improving the bottom line. In short, put your money where your mouth is, respectfully.	3/6/2026 2:25 PM
803	Different rounds of feedback and information gathering is a great protocol for these important decisions. I am impressed with the process.	3/6/2026 2:23 PM
804	Staff how would we be placed at the new schools.	3/6/2026 2:23 PM
805	Actually listen to teacher and parent feedback and use it to inform decisions. The district just spent millions of dollars on a new building. Don't close our smaller and amazing schools to "save money".	3/6/2026 2:22 PM
806	Community members need to be included in decisions. Research should be done on the possible psychological effects of changing the grade bands of students.	3/6/2026 2:21 PM
807	Please offer us solutions for Dunwoody High. It’s an important school that is massively over crowded. It needs help now, not in 6-8 years	3/6/2026 2:21 PM
808	I currently have a child at Kittredge Magnet. I think it's very important to keep an academic magnet program intact and available as an option for Dekalb students to high achievers can find a place to be challenged while also aiming to build/expand/update schools and redraw lines in a way that is equitable for all kids and that balances the resources fairly so that all students are met where they are. Part of this includes designing any new schools or expanded schools in a way that provides use of the outdoors, daylight, etc. and limits overcrowding in classrooms.	3/6/2026 2:20 PM
809	New construction on 124 at Lithonia Industrial and new construction on Stephenson Road; Multi-unit apartment buildings on Covington Hwy: The population will increase.	3/6/2026 2:18 PM
810	I find making decisions on buildings difficult without additional information. With the information I do have, it is focused on Ashford Park Elementary. That facility is not in good condition and it over capacity. I can get behind closing the facility - however - I prioritize keeping my neighborhood in the chamblee cluster. priorities: (1) remain in same cluster (2) keep our elementary community in tact (3) keep our building operational.	3/6/2026 2:15 PM
811	Chesnut knows how to successfully deliver exceptional educational services to a diverse population. CES is one of the most diverse elementary schools in the Dunwoody cluster, and we believe it is extremely important that CES continue to execute what it knows how to do for these families. As evidence of this, Chesnut is a GA Distinguished School and in the top 5% of all Title 1 schools in the state of Georgia. I support expansion opportunities for Dunwoody High School to help alleviate its overcrowding, which would help ensure that all families in the City of Dunwoody could be served by one high school, which strengths our entire Dunwoody community. As all Dunwoody cluster elementary schools roll up to the same middle and high school, I want the best opportunities and outcomes for our students even after they leave	3/6/2026 2:15 PM

	Chesnut. Better utilization of the available land around DHS would best serve all families within the City of Dunwoody.	
812	The bottom line is that cluster-specific grade band decisions, grounded in enrollment data, facility conditions, and genuine community input, will produce better long-term outcomes than a countywide template applied uniformly. The goal should be coherence within clusters and equity across them — not identical structures everywhere.	3/6/2026 2:14 PM
813	Please think creatively on use of staff resources and efficiency in operating buildings before jumping to highly disruptive options such as the massive student concentration plans under discussion	3/6/2026 2:13 PM
814	PK-7 and 8-12 gives the 8th graders the experience before hits their GPA (in most cases)	3/6/2026 2:12 PM
815	As future options are developed, I encourage the district to prioritize decisions that maintain stability for students and minimize disruption to established school communities. It will be important to consider not only enrollment numbers and facility capacity, but also the overall impact on students' academic progress, social-emotional well-being, and access to support services. Many students rely on consistent relationships with school staff, counselors, and support teams, and major structural changes can affect those supports. Additionally, family accessibility and transportation should remain key considerations. Any future scenarios should take into account travel times for students, the ability of families to stay connected to their school community, and the potential strain on transportation systems. I would also encourage continued engagement with school leaders, teachers, counselors, and families throughout the process. Those working directly with students each day can provide valuable insight into how potential changes may impact learning environments and student success. Overall, thoughtful planning, transparent communication, and stakeholder input will be essential in developing scenarios that best support students, families, and staff across the district. Thank you again for allowing stakeholders the opportunity to provide input.	3/6/2026 2:11 PM
816	OGE needs upgrades but should remain as our neighborhood school.	3/6/2026 2:10 PM
817	If Dunwoody high school needs space Vanderlyn is happy to give them land to build on. Taking away a school where the children are thriving can't be the only solution.	3/6/2026 2:08 PM
818	The county just did some renovations On midvale	3/6/2026 2:06 PM
819	Please consider the pulse of the community if you put some schools back to their original status and place those who were to remain open as now closed or repurposed. This would not sit well with the community.	3/6/2026 2:04 PM
820	This entire SAP doesn't make sense. On paper it may, sure. But, it's clear DCSD is trying to do more with less. Period. This is the way things have been trending at DCSD for years now. It's also clear that with each new school year, DCSD cares less and less for the very teachers it employs.	3/6/2026 2:03 PM
821	I have lived in the Oak Grove community for nearly 50 years and our 3 daughters are products of the Dekalb School system. I know the type of quality education that has always been provided by both Oak Grove and Lakeside. They have proven to be exceptional institutions and exemplary of quality public education the entire time I have lived in the community. They show a strength and commitment that is hard to reproduce. I fear our community would lose so much if these schools are closed. It would be an irreparable tear and hole in our community.	3/6/2026 2:02 PM
822	As noted previously, I would like to understand how any re-districting lines may be impacted based on the proposed closures.	3/6/2026 1:59 PM
823	The new big underattended schools should be converted to school employee single housing	3/6/2026 1:58 PM
824	Please consider putting assistant principals back in classrooms to teach at least 1/day a week.	3/6/2026 1:54 PM
825	I think middle grades can be a difficult group, behavior wise. It would be wise to separate the 6th graders from the rest of middle school. This would allow 6th graders time to mature and cause fewer issues in middle school.	3/6/2026 1:54 PM
826	Oak Grove Elementary should remain intact.	3/6/2026 1:51 PM
827	Please keep DeKalb county schools open and opportunities for the children to get a good education	3/6/2026 1:50 PM

828	none	3/6/2026 1:45 PM
829	While I think it’s ok if grade bands are different by cluster, I think it could be hard to implement and manage as a district. It would certainly cause increased complexity.	3/6/2026 1:44 PM
830	none at this time	3/6/2026 1:42 PM
831	I just want what's best for the teachers and the district.	3/6/2026 1:39 PM
832	We should value high performing schools, family choice and stability, and successful programming.	3/6/2026 1:38 PM
833	Keep Sagamore Hills open!	3/6/2026 1:37 PM
834	none	3/6/2026 1:33 PM
835	I strongly believe that the current grade bands at my child's school should remain unchanged. Closing or consolidating these grade levels will negatively impact students by forcing them to travel much longer distances to attend classes. It is essential for children to remain in a familiar and accessible environment for their stability and academic success. Please prioritize student proximity and family convenience in the next round of scenarios.	3/6/2026 1:30 PM
836	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove’s projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/6/2026 1:24 PM
837	Good schools deserve to be saved from being closed. Instead it is beneficial to remodel the school to accommodate more students	3/6/2026 1:21 PM
838	I believe our neighborhood school Evansdale Elementary and community would be needlessly harmed by closing. It’s crazy!	3/6/2026 1:19 PM
839	Don’t listen to the loudest voices. Go with proven best standards.	3/6/2026 1:16 PM
840	The District should carefully consider special ed needs before thinking about closing buildings. There is a GREAT need for more preschool special education classes. The location of these classes should not be up to the principals of each building as this is a district wide need.	3/6/2026 1:14 PM
841	I am strongly opposed to the proposed closure of Oak Grove Elementary. A building adequacy score of 71% does not reflect a school that is failing — it reflects a school that needs investment, not elimination. Rather than close Oak Grove and displace its students, I urge the district to direct capital funds toward improving the existing facility. The plan to redirect students to Sagamore Hills and Briarlake only works if those expansion projects are fully funded and completed on time, which is far from guaranteed. The district's own data shows that the proposed closures are contingent on capital investments at receiving schools. If those projects are delayed or underfunded, students from Oak Grove will be pushed into already strained facilities. Before closing any school, the district must demonstrate — with a concrete, funded plan — that receiving schools can absorb additional students without compromising the quality of education. Oak Grove is more than a building. It is a neighborhood anchor. Closing it disrupts the relationships, routines, and community ties that help children thrive, especially at the elementary level. The district's own research acknowledges that school transitions can cause academic disruption — and this proposal would force that disruption on young children who have done nothing wrong.	3/6/2026 1:13 PM
842	Evansdale's French program is unique to the Lakeside cluster. Teachers and parents have put down strong roots in the community	3/6/2026 1:09 PM

843	Do not close Evansdale Elementary.	3/6/2026 12:53 PM
844	None	3/6/2026 12:48 PM
845	I love this school because 3 of the teachers that I have through Brockett Elementry School they we`re amazing they treat me good they give me and my class a break of 20-30 minutes to play with our computers and I also like this school because we have 30 minutes UBT.	3/6/2026 12:47 PM
846	I love Brockett because were all a family and love being loved	3/6/2026 12:47 PM
847	I love Brocket because it is the best and I know all the teacher and they know me and I don't want it to close because I want my sister and my brother can come to this school and have the same experinans like me if this school shut down I wont be able to see the teachers that I love so much .	3/6/2026 12:47 PM
848	the people know my name in 2 grade	3/6/2026 12:47 PM
849	I love Brockett, I love the teachers, and all my friends, I love how when I was new they welcome me with open arms and I made a best friend in just a few minutes after my arrival and I could not imagine going to a different school than Brockett.	3/6/2026 12:47 PM
850	I want my sisters to have the sam as me	3/6/2026 12:47 PM
851	I have been here since prek and I like everyone in my class.i know a lot of teacher my mom knows the princable very well and I know so many teachers my whole fam has been here plsssssssssssssssss o love this school	3/6/2026 12:46 PM
852	I love how my old teachers remember me and say hi to me! I also want my sister to be at this school till 5th!	3/6/2026 12:46 PM
853	I am okay with Brockett, talking and chatting with teachers and cupcakes on birthdays, but some teachers are mean and make kids suicidal and don't do anything for bullying	3/6/2026 12:46 PM
854	I love going to a school where I am familiar with everyone and I already have so many friends here. I also want my little sister to have the same opportunities I did because she is my only little sister. Please do not close Brockett.	3/6/2026 12:46 PM
855	I love going to a small school and being familiar with almost all the teachers. If you close our school a LOT of schools will close.[Including the building.	3/6/2026 12:46 PM
856	Reverify all middle and high school addresses	3/6/2026 12:45 PM
857	I love Brockett and l love my.	3/6/2026 12:45 PM
858	I love brockett because all my teachers know me and the teachers are very kind and nice my teacher know me very much and other teachers.	3/6/2026 12:45 PM
859	So I love Brockett only on Fridays and Thursdays but pls don't shut down da schools	3/6/2026 12:45 PM
860	I love brockettElementry school because I was here la 2 to 3 years but I like here because i have so much friends on this school and good teachers.	3/6/2026 12:45 PM
861	I love going to know each teacher and I love how they know my name. It is very good to have a playground to be very nice and talk to our friends in lunch and I love Brockett.	3/6/2026 12:45 PM
862	I love my teacher because they have my back in they make sure we are good in nice	3/6/2026 12:45 PM
863	I love that everyone knows each other, kids and adults.	3/6/2026 12:45 PM
864	I love brockett and going to a small school, where everybody knows each other and we can all be comfortable with everything/anyone. Please do not close brockett, it holds memories and is a safe, learning experience.	3/6/2026 12:45 PM
865	I LOVE BROCKETT BECAUSE THERE ARE LOVELY TEACHERS THAT CAN HELP YOU WITH STUFF YOU DON'T KNOW ABOUT.	3/6/2026 12:45 PM
866	I love my teacher even though I give her a nasty attitude and I'm not sure how I'm going to handle Brockett closing down so please don't close it down	3/6/2026 12:45 PM
867	I like when I go to my old school I would say hi to teacher's and say it to other kids I know.	3/6/2026 12:44 PM
868	I love Brokett and love the cool playground and love how all the teachers now me and how	3/6/2026 12:44 PM

	there's so many clubs like soccer basket ball dance ECT	
869	I love this school where everybody knows me and it feels like I'm at home.	3/6/2026 12:43 PM
870	Brockett is cool beans so don't make it close down	3/6/2026 12:43 PM
871	I love my teacher. I want to know the teacher.	3/6/2026 12:43 PM
872	How much does having older students in the same building as younger students affect the younger students? 9-12 is good leave it alone. PreK could be a building of their own. K-3 is good. 4-6 is good. 7-8 is good. Keep 6th grade out of middle school. They get influenced by the older students. 7-8 need to be watched closer. PreK can have everything their size. Staff can deal better with those students who need extra help with the emotional and learning challenges. Each level can prepare students for the next level. It's a lot of levels, but weeding out the behaviors could be good.	3/6/2026 12:39 PM
873	need to take into account drop off and pick up ESPECIALLY for elementary schools that are expanding as they currently affect traffic pattern at their given capacity and would need to greatly expand parent parking and drop off process	3/6/2026 12:28 PM
874	Thanks for the opportunity for feedback, hopefully the community feedback is factored in	3/6/2026 12:22 PM
875	Please let us know what this will look like in the future. Where will administrators and teachers go who are in the schools that are closing?	3/6/2026 12:22 PM
876	Large public schools have been horrible for our youth today, our kids are really suffering from them. It is so difficult for the kids to find a place, make a team, find life lasting friends. These kids are a number. The parents are a number as well as they struggle to find a community they can belong to. Ashford Park is an actual community, one that so many want to belong to, it should be the model for what others are trying to be like. It would be such a Dekalb County idiot move to get rid of such a gem. Please do not do this. Please try to raise up all of your other schools to the Ashford Park standard instead of lowering them to the bottom of the barrel.	3/6/2026 12:12 PM
877	With the facilities that will be closed they can be repurposed for extra curriculum facilities that are able to certify students in different trades. As well as being trades available to the public for a fee. Some can be repurposed as to be rented spaces or pods by small business owners. in that community or district not outsiders.	3/6/2026 12:11 PM
878	Staff at consolidated or closed schools should be allowed to keep their positions with the district.	3/6/2026 12:06 PM
879	Having taught in DeKalb County for 30 years before retiring, I find it incredible that schools that are highly successful are marked for closure. Bringing students into that successful environment seems like a much more desirable model. As a taxpayer I recognize the challenges. As a former teacher, I know the shortcomings of the DeKalb School System. Neighborhood schools should not be closed because of past wasteful practices. I would look to reducing the upper level "administrative" positions and expenses and putting the money to use at the local school level. Overstaffing in administration and understaffing in local schools has gone on for years.	3/6/2026 12:01 PM
880	Vanderlyn is open to collaborating with the district and high school to share our space. It's wonderful to be so close and have high school students help out with our events and encouraging our young students. We don't want that to end. Our teachers and staff have developed over time to create an outstanding school environment and we have many school choice students from Dunwoody, Chestnut and Kingsley with a waitlist for many more. Our staff and strong community is why parents are trying to move their children to Vanderlyn away from the schools that you want our community pushed towards. Please be open to considering keeping Vanderlyn open by moving some Kingsley neighborhoods to vanderlyn (closer than chestnut) and allowing us to be at capacity- our building was built to handle 624 students which meets the target requirement of 600. Let us do that and partner with the high school on field space by transforming our parking/outside space to accommodate and better utilize that space for all students (elementary and high school)	3/6/2026 11:57 AM
881	I am coin warned about the money being spent on Ashford Park renovations currently and the fact this it is on the closure list. I don't want the closure of Ashford Park to have an impact on Montgomery's boundaries. I do not want to see the Montgomery boundaries changed, and also	3/6/2026 11:53 AM

	think Ashford park should go unchanged. Both of these schools have wonderful and high performing school communities and wonderful neighborhoods.	
882	one of the most pivotal things I think that needs to be considered again is the ratio of student to teacher qualified teachers teachers who are skilled and trained in classroom management cultural competency of the learning plans and learning styles of the students based on their background their trauma experiences what they have been experienced and exposed to each Community is different and in some communities parents have the language to make the arguments to meet the needs of their children but in some communities the parents don't even know because they're not aware of the resources that are available or could be made available to help their child to help their community.	3/6/2026 11:52 AM
883	This is a community based school, keeps housing right also.	3/6/2026 11:50 AM
884	What is the plan to accommodate special subjects and child learning theories. Such as longer school day to facilitate more recess, especially among younger kids. Schools for younger children should be right sized to the community, mega schools are not wanted.	3/6/2026 11:39 AM
885	Can the next round include more details on timelines and when will see these changes. Will schools close the end of next school year? Will it be 2 years? Also, can it include more details on programs and if opening Early Child Learning Centers will be done at locations that are closing. My child attends Champion and in the current scenario the current building will become a large elementary, where could the program be potentially housed? Is there a current building that can hold them in one place or will the Middle school theme program go away? And if going away how soon will that happen?	3/6/2026 11:39 AM
886	The boundaries for the Dunwoody Cluster Elementary Schools need to be redrawn. It is shocking to me that one Elementary School is zoned for the majority of Apartment Complexes, while others have 1 or 0. This is not about excluding people based on where they live, but the fact of the matter is that segment of the school population is more transient in nature, and to create a stable community at a school, it needs to be appropriately divided amongst the Elementary Schools. To reiterate - a school shouldn't lose resources/funding due to fluctuating populations, when the boundaries are not drawn evenly.	3/6/2026 11:35 AM
887	Would any changes made be implemented simultaneously or over multiple years?	3/6/2026 11:34 AM
888	Please don’t close the schools- I know people at several other schools on this list and everyone is sad/ unhappy about it!	3/6/2026 11:29 AM
889	Bob Mathis Elementary School is achieving growth and success in every classroom preparing students to become productive lifelong learners in a diverse society.	3/6/2026 11:29 AM
890	Ashford Park, Chamblee Middle School, and Chamblee High School should remain unchanged . The Ashford Park community as a whole supports the education of all the students in the cluster financially, philosophically, and are there for the teachers as well as the administration.	3/6/2026 11:24 AM
891	How will busing be handled for the elementary school attendance areas that close those schools? Our elementary students already catch the bus at about 6:45 am to get to school on time. Students who have to go farther will have to get up even earlier. Please keep this in mind.	3/6/2026 11:20 AM
892	It would be really sad to loose good teachers due to the extended travel times because they were displaced.	3/6/2026 11:19 AM
893	I feel as though the goal of these scenarios doesn't meet the need of the county.	3/6/2026 11:18 AM
894	Please check all the last few years how successful is school all that school students are very great personalities and also succeeded	3/6/2026 11:02 AM
895	You have the ability to do such immense planning with AI, and I hope the consultants we've hired are understanding the power (not just using "AI", but actually have it build programs that simulate different scenarios to the individual-child level).	3/6/2026 11:00 AM
896	If you have to move Ashford Park, please keep our community together and in the Chamblee cluster. I would be open to you redistricting John Lewis Elementary (with the opening of Dresden and other schools) and moving all of AP into JL facility but I would also like JL to be in Chamblee Cluster to keep our community together.	3/6/2026 10:56 AM
897	Truly I can’t think of anything WORSE than the school consolidation plan. You hired a criminal	3/6/2026 10:55 AM

	as the superintendent so clearly are not the best judges of character. Do better. You claim to care about what is best for our kids but clearly you do not. Solve the actual issues that are hurting dekalb county schools vs making a horrible consolidation plan. Keep our schools small. Resources are spread thin? Fix the real issues, make dekalb schools something great so parents want to send their kids to our schools. I'd like to see scenarios that admit to the leadership mistakes that have been made and a scenario to gain back trust in the school system. You have a real opportunity to make positive change that will impacts real lives. Don't screw it up like you are with this horrible plan.	
898	This decision is horrible and the transparency from the school board is abysmal	3/6/2026 10:53 AM
899	Prioritize keeping schools in low income areas	3/6/2026 10:47 AM
900	We are a new Midvale family and we are in awe of this school. As a family of four, we have experienced a "merged" elementary school in DeKalb. Now that we've seen both sides, we will fight for the better option. My daughter started at Midvale this year in second grade. She had been at Smoke Rise Elementary since PreK. After the Idlewood merge, it became a "mega" school with 1,200ish students. It changed drastically after the influx of students. My son is currently in PreK at SRES. We do not want a giant school for our kids, and it seems like that's where we may be heading at Midvale. It feels like the kids at SRES are numbers now. There isn't a sense of community, and the concept of "all the teachers know the kids' names" doesn't exist there. The school is far too large for that. Administration isn't proactive with issues, because they are simply trying to keep up, and keep their heads above water. The teachers don't seem happy; they seem overwhelmed with huge class sizes and an unsupportive administration. Kids only get to do music class and art class every nine days, when it used to be once (sometimes twice!) a week. I don't want that future for my children. When my eldest started at Midvale, it was a breath of fresh air for her, and for her father and me. At SRES, we were so used to the negativity, the lack of outside time (they go days without going outside!), the focus on testing, and the weak admin, that we didn't know that elementary schools aren't all like that. Midvale Elementary School is exactly what an elementary school should be. The teachers are warm and kind, and they know the kids by names. They focus on the individual child, they provide adequate outdoor time, and the principal and VP are caring and involved. The staff is kind and involved because they have the space to be. They aren't overwhelmed. These small schools are what make Tucker GREAT. The data doesn't lie — look at the numbers of families who have left SRES since the merge was announced. Almost every SRES family I know applied for School Choice because they no longer want to be a part of this unhappy mega school that has no community. We want better for our children. Please do not close Midvale. Keep it small. I've seen both sides, and I'm here to say that the smaller, neighborhood schools are far better.	3/6/2026 10:46 AM
901	Feeding into Lakeside Highschool is imperative. We need to be in the Lakeside Cluster and NOT in Tucker or in Doraville.	3/6/2026 10:44 AM
902	Having a cluster in which the current school breakdown would benefit my family the most. Any cluster grade banding that would eliminate Evansdale Elementary would not be effective or appropriate for my family's current situation.	3/6/2026 10:43 AM
903	Please do not bus kids all over. Kids need to walk and be close to their home school	3/6/2026 10:38 AM
904	I am happy with the current situation.	3/6/2026 10:38 AM
905	No consolidation	3/6/2026 10:36 AM
906	I vote to keep Evansdale elementary open.	3/6/2026 10:32 AM
907	I believe that as an alternative technical high schools that focus heavily on all trades need to be introduce in all clusters. Life skills need to be introduced early so that students can have better focus on what they want to become in life.	3/6/2026 10:30 AM
908	To fully understand scenarios for us, we need more information than "Ashford Park might close". What matters most to us is where we would be zoned and where the magnet programs would be. Right now the scenarios just have us potentially losing things and that feels extremely precarious and worrisome. We need some stability and more information.	3/6/2026 10:29 AM
909	The international community school is an amazing school also serving specific needs of the diverse community. I'd feel fine extending that school to eighth grade.	3/6/2026 10:14 AM
910	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–	3/6/2026 10:08 AM

	16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	
911	Raise sales taxes by 1.5% and keep our communities safe, our children safe, and our schools open. Stop giving tax breaks to large corporations, have them fund these students by pilot program funding, college prep-scholarship programs, or have them sponsor an entire school district. Stop the greed and invest in our communities.	3/6/2026 10:07 AM
912	Evansdale should stay open, especially given all the growth in the area and possible additional apartment complexes.	3/6/2026 10:05 AM
913	As the district develops the next round of facilities scenarios, I encourage decision-makers to evaluate schools not only through the lens of building utilization but also through the broader role they play in supporting academic opportunity, district-wide programs, and community engagement. Evansdale Elementary is not simply a neighborhood school. It is home to a district-wide French dual-language immersion program, strong STEM programming, and a highly engaged community supported by the Evansdale Foundation and an active PTA. Schools that combine unique academic offerings, strong performance, and deep community investment should be carefully considered before being included in consolidation scenarios. Evansdale's French dual-language immersion program attracts families from across DeKalb County through a lottery-based choice program. Students spend half of their instructional time learning in French, developing language proficiency and global competency. The program has also earned international recognition through the LabelFrancÉducation designation, awarded by the French Ministry of Foreign Affairs to schools that demonstrate excellence in bilingual French education. Importantly, the immersion pathway does not end at Evansdale. Students continue their language learning at Henderson Middle School, where Evansdale parents and teachers helped build the continuation of the program, and then into advanced French coursework at Lakeside High School. This creates a long-term academic pathway that supports sustained language proficiency and represents years of collaboration between families, educators, and the district. Evansdale has also demonstrated strong academic growth and achievement. The school was recently named a Georgia Title I Reward School, placing it among the top-performing Title I schools in the state for student growth. In addition, Evansdale offers robust STEM opportunities that encourage innovation, inquiry-based learning, and participation in robotics competitions, technology fairs, and project-based science programs. The school's success is reinforced by extraordinary community engagement. The Evansdale Foundation and an active PTA provide substantial financial and volunteer support that enhances classroom resources, enrichment programs, and student opportunities. This partnership between families and the district represents a significant asset that contributes directly to the school's success. It is also important to consider cluster stability. Evansdale has long been part of the Lakeside cluster, and families often make long-term decisions about where to live based on that educational pathway. Over the years, there have been multiple proposals to move Evansdale out of the Lakeside cluster and into nearby clusters. Now, the possibility of closing the school entirely—while nearby schools such as Pleasantdale Elementary School have recently been expanded and Livsey Elementary School may also be expanded—raises understandable questions about how these decisions align with the district's long-term planning strategy. Schools that combine strong academic outcomes, specialized programs, and deep community investment often play an important role in attracting and retaining families within a public school system. Preserving successful schools like Evansdale should be an important consideration as the district refines its facilities planning.	3/6/2026 10:05 AM
914	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would	3/6/2026 10:03 AM

	require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	
915	Do not go after small elementary schools that are barely under enrolled and try to consolidate them into underperforming schools.	3/6/2026 9:59 AM
916	The budget doesn't seem to allocated correctly. Also certain programs are allocated more fluently areas of DeKalb	3/6/2026 9:58 AM
917	We know these are hard decisions but Evansdale is unique and special	3/6/2026 9:53 AM
918	I prefer the split at 6th, because some kids could access higher level courses earlier in areas of strength. Also those with sporting ability could train with the higher level teams. Music programs could also be improved with instruction from a higher level band director/music dept chapter who could oversee the improvement of the music department from the beginning while exposing younger kids to drama, band, orchestra, chorus, etc earlier. That could also have the downside of giving fewer opportunities to younger players or scholars if resources are at the current high school level. Traffic could be worse with more students driving to bigger campuses. Busses would need fewer routes, but mixed ages on the busses could be problematic for 6-12. I think that having localized elementary schools helps foster community and should be cherished and preserved where possible. We also don't have the money to perform repairs on the buildings slated for them at this point. How could we make mega schools if we don't have funds to build them? Yes, we could sell properties to raise funds, but why don't we change properties to athletic fields or another pool facility to make things more equitable around the county? I really do believe change needs to come, but as a parent in a cluster that needs to keep their IB certification, we will need to keep some things the same to hold on to these important programs for our future scholars.	3/6/2026 9:52 AM
919	Checking the veracity and accuracy of the occupancy data is primordial. The firm that was hired to evaluate has no skin on the game, local experts should be involved and have a say. If decisions are made on inaccurate data it would cause a lot of harm to our students and community. Secondly, DCSD have some really excellent programs that are coming under scrutiny for no good reason in my opinion. Those magnet and choice programs should be supported and used as models to improve others, not targets of dismantling. "Fixing" something that is working fine is not the way to elevate the education of the students. These rumors have created great anxiety in those top performing programs, such as DSA	3/6/2026 9:51 AM
920	I think the professionals should do what they think is best	3/6/2026 9:48 AM
921	The closure of Evansdale Elementary will devastate this community and this neighborhood. I am firmly opposed to it and will lobby against anyone who supports it. I do not care at all that there is more space than necessary and that it is inefficient. Fix the corruption and mismanagement and irresponsible use of funds in the Dekalb School Board before you address this issue, and maybe you'll have the moral standing to make the argument you are trying to make. Right now you certainly do not.	3/6/2026 9:48 AM
922	Na	3/6/2026 9:47 AM
923	Evansdale has a long history of high parental involvement, one of the most important elements for school success.	3/6/2026 9:47 AM
924	I do not feel comfortable with middle school and high schoolers being pooled together	3/6/2026 9:45 AM
925	I think you have to be really careful putting younger kids with older kids just to satisfy butts in seats.	3/6/2026 9:41 AM
926	Close all the schools and the district	3/6/2026 9:37 AM

927	I personally don't think thoughts are being made specifically for those kids that will be negatively impacted by this change. We are at DAA and my kid is thriving there in the arts. And we plan on attending the DESA for high school. She is already having anxiety about how her 8th grade and 9-12th grade is going to look like with these changes.	3/6/2026 9:32 AM
928	Middle school banding option is critical. Exposing 6th graders to high schoolers opens the door to potential harassment, early drug and alcohol use, and other inappropriate behaviors that they are not prepared for.	3/6/2026 9:27 AM
929	Please really listen to community feedback. I know this comes down to numbers, but if some of these schools need more money to stay open, I do think that a fund raising campaign would be successful.	3/6/2026 9:24 AM
930	I would welcome collaboration between district leaders and both school communities to explore campus-level solutions that address high school capacity while preserving the Vanderlyn community. As homeowners who specifically purchased a home in this area a few years ago to ensure our child was districted for a highly rated elementary school because we believe in the public school system, we're very concerned that this will disrupt the level of education that we had anticipated. While I understand why Vanderlyn Elementary was put on this list due to it's proximity to Dunwoody High School, it's diversity, academically strong, high enrollment, and inclusive community I think should be considered.	3/6/2026 9:18 AM
931	While I think that sending preliminary scenarios for review and input is extremely helpful, I think more thought should have gone into the results of each scenario and how the children of the impacted schools will be affected - my biggest question, is what is the actual plan for the schools that will close and where those kids will go - and what will happen to the kids at the schools they move to (will this just cause new capacity issues?). It just feels almost as if the SAP committee threw darts at a wall and said "hey this sounds good", without explaining what will happen next.	3/6/2026 9:16 AM
932	As the district moves into Round 2, I ask that DeKalb Schools provide more transparent data, more scenario modeling, and more opportunities for meaningful community input. Families need a clearer understanding of the long-term impacts on Montgomery and the Chamblee cluster before they can support any major structural changes.	3/6/2026 9:13 AM
933	Evansdale is projected to increase to over 600 in 2030.	3/6/2026 9:10 AM
934	Please consider sharing the plan for programs and boundaries as soon as possible. This would create more practical and elaborate feedback.	3/6/2026 9:10 AM
935	Do not close oak grove elementary!	3/6/2026 9:09 AM
936	Help the kids develop so that are willing to learn.	3/6/2026 9:06 AM
937	There needs to be information shared on where students from the proposed schools to be closed will attend so that the county can then get feedback from the community on the proposed scenarios. Right now it feels as though some of the strongest schools in the district have been forgotten.	3/6/2026 9:03 AM
938	Consolidation for balancing enrollment will tear down qualitative success of the school which has been a model.	3/6/2026 9:03 AM
939	take into consideration that expanded schools should have plenty of additional space, I don't think maximizing a building initially is a good plan since overcrowding can become an issue very quickly. In our years in the district, I seen expanded school become overcrowded by the time the expansions are finished (i.e.Lakeside was still well above capacity even after the last addition was added- a case of too little too late)	3/6/2026 9:02 AM
940	Closing schools are already near or above utilization targets needlessly redistributes students without materially reducing excess capacity.. The district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion nor community disruption.	3/6/2026 9:02 AM
941	Please keep the schools small and not overpopulate them by grouping them into others and closing existing ones. Mega schools are not the answer.	3/6/2026 8:58 AM
942	Future arrangements should prioritize stability for students, especially those in special education who benefits from consistent support, services and routines. Transportation, class	3/6/2026 8:51 AM

	sizes and access to specialized resources should be carefully considered. Parent and community input should always remain central to all decisions.	
943	Oak Grove elementary school is a high-performing school with a tradition of excellence that other elementary schools would benefit to emulate. More students should be directed to this effective school rather than closing it down.	3/6/2026 8:50 AM
944	I would like data for how consolidation will impact student success, academics, behavior, positive learning environment, and over all scores. Will there be an abundance of trailers or class sizes that make instruction difficult.	3/6/2026 8:47 AM
945	Another area to readjust funding: we are sitting in PLCs with multiple district level personnel being paid to be there when ONE person would do. The other 1 or 2 often sit there watching or possibly assist in passing out information. PLCs should not have paid "babysitters." Many of the PLCs are also not relevant to specific staff but mandatory from county level directives. We need to differentiate PLCs. We need to reduce the number of positions that are not directly serving students and are not located within school buildings to directly serve students.	3/6/2026 8:45 AM
946	Oak Grove is operating at capacity. No justification for closing it. Families with small children are moving into the neighborhood.	3/6/2026 8:44 AM
947	Please lay out where students who are zoned for an elementary school that is recommended to close would then go for elementary school.	3/6/2026 8:39 AM
948	We need more understanding on how this contract with HPM came to be as the have previously worked with Horton. HPM is using a cut and paste approach that previously wasn't fruitful in Illinois. The fact that they are putting the numbers together to er (which are wrong) and will be benefiting from any expansion projects is a huge conflict of interest,	3/6/2026 8:38 AM
949	You are not making community informed decisions. Listen to your elementary parents before even more enrollment drops because parents move away or seek private/home schooling and your funding becomes worse's Don't alienate who you have in the "interest" of money when you guys purchased a building for millions and then had MORE funneled in for renovations without the input of your community.	3/6/2026 8:33 AM
950	Remember, you work for the citizens of DeKalb County. Please do the right thing, not the easiest or most lucrative.	3/6/2026 8:32 AM
951	Try renovating and upgrading getting better staff whom actually care about the education and scholars. Don't close the school down. Take the time to build it up!!!!	3/6/2026 8:31 AM
952	I like the way you are gathering info and allowing families to give input.	3/6/2026 8:30 AM
953	I believe we should focus on bettering the existing schools and providing more teachers as well as upgrading the school facilities where necessary. Grouping schools into another and taking people out of the area they have looked forward to having their kids go to school in does not seem fair.	3/6/2026 8:28 AM
954	Please do not close our amazing neighborhood schools. These are the heart of our communities.	3/6/2026 8:20 AM
955	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/6/2026 8:16 AM
956	SAP creo que es un proyecto que quiere aprovechar los recursos necesarios que habían	3/6/2026 8:16 AM

	estado sin aprovechamiento. Sin embargo considero que si deciden cerrar las escuelas que no hay matrícula suficiente están en lo correcto. En mi área las escuelas que conozco están en su máxima capacidad creo y deben de asignarles más presupuesto para la administración, maestros, alimentación y materiales educativos.	
957	Our neighborhood school, Laurel Ridge Elementary, is a huge part of our neighborhood and community. Our child is in high school, but our neighborhood elementary school still impacts us and improves our connection to our neighbors.	3/6/2026 8:08 AM
958	I am a parent and also an educator in GCPS. I have worked in a variety of buildings in my 11 year career at the elementary level. A concern I have is elementary buildings being so large that they lose the community closeness of all the adults and students knowing each other. While in high school, the students are independent enough to be fine without such a close tight knit community. With early scholars that are 4-6 years old it is absolutely vital that schools are small and not too overwhelming. This is when these small children are learning to navigate their educational careers for the first time and it is imperative that the environment stay warm and close knit.	3/6/2026 8:02 AM
959	While you are concentrating on the number of students in our schools, the sizes of the classes need to be evaluated. In addition, the types of teachers needed to be evaluated, i.e., more special needs teachers, are needed due to teachers seeing more mental issues. Also, classroom sizes need to be reduced so teachers can teach effectively and help students master their content. In conclusion, I think all the schools need to stay where they are and be repaired as needed for each school.	3/6/2026 8:02 AM
960	Please listen to the constituents!	3/6/2026 8:01 AM
961	So not close mistake. It is one of the few IB schools.	3/6/2026 7:58 AM
962	Do not take budget from Dunwoody or Austin	3/6/2026 7:58 AM
963	I would prefer to see investment in Ashford park and or maintain the community and German immersion programs if moved to another school.	3/6/2026 7:56 AM
964	Ok	3/6/2026 7:44 AM
965	I know this process is difficult. Please be sure you are clearly communicating expectations of how proposed public meetings will function.	3/6/2026 7:29 AM
966	Thank you for the opportunity to give my input.	3/6/2026 7:28 AM
967	none	3/6/2026 7:24 AM
968	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/6/2026 7:16 AM
969	While the district is addressing under-enrollment overall, it is important to recognize that some schools are already operating near capacity. Any consolidation or redistribution of students should carefully consider building capacity so that already crowded schools are not further impacted. In addition, the physical condition of school buildings should be a major factor in future scenarios. Some facilities are aging and experiencing ongoing maintenance issues, including unreliable heating and air conditioning in classrooms. Ensuring that buildings meet safety standards, are properly maintained, and provide a comfortable and welcoming learning	3/6/2026 6:56 AM

	environment for students and staff should be a priority when determining which facilities remain open, are renovated, or are rebuilt. Transportation times, building safety regulations, and the overall condition of facilities should be carefully evaluated so that the final plan improves learning environments across the district.	
970	The ultimate goal is to have a good school district like gwinnett and be able to gain the same funding	3/6/2026 6:51 AM
971	I really think that the list should be looked at again. Being in the Elementary setting, maybe the schools whose numbers that don't get over the 200-300 enrollment, work with those and see what can be done to maybe cluster those somehow.	3/6/2026 6:45 AM
972	Please ensure that the written communication about SAP are written on an 8th grade reading level. Many of our parents/staff don't understand terms such as cascading, consolidation, excess capacity, low educational capacity. Speak plainly, the school is not performing well in academics, the school building is too small while this school building over here is 2x as large (I'm sure ChatGPT can assist with this task). If you want parents engaged especially areas taking the biggest hit (South and East DeKalb) you have to meet people where they are. Those parents are not engaged because they don't understand exactly what is happening. They are looking to social media for interpretation, and unfortunately the interpretation is coming across like the District doesn't care about the Black communities it serves.	3/6/2026 6:43 AM
973	Please take look at the needs of the school/students rather than size.	3/6/2026 6:41 AM
974	It would be a huge mistake to close a school like Oak Grove in Dekalb County as it will no longer draw families who are choosing the area for the school. The community is strong and viable. Many parents take their children out for middle school but then reenroll for high school keeping the community strong. Dekalb will be impacted if families don't want to move to the area.	3/6/2026 6:36 AM
975	This seems like a plan to close higher performing schools with increasing enrollment and push those kids and their parents resources to drive further to lower performing schools. This will impact property value and instead, you'll see a mass exodus of the higher performing students. If you must consolidate, do so specifically where enrollment is decreasing. Don't close the Ashford Park where performance is top of county and there's a 30+ person waitlist for prek. Should be adding resources to this school.	3/6/2026 6:28 AM
976	Any grade band changes should consider how they will affect schools that already have successful programs and strong community support.	3/6/2026 6:12 AM
977	Include ideas for repurposing the closing school buildings and how the district and how the district can work with the county to ensure communities have good options to fill in the gaps from the closed schools.	3/6/2026 6:01 AM
978	Why is McNair Middle being turned into an elementary? Their labs and things are sized for older students. It looks like a small college. Can it become the high school instead? My kids were very disappointed to move from McNair Middle to McNair High because they felt like they should have a nicer school as they got older, and McNair High has small halls, classrooms without windows, and it's all concrete block.	3/6/2026 4:52 AM
979	Sports facilities need SERIOUS UPGRADES: fields with no lights means students lose valuable time in class, plus transportation makes it such that competing is a challenge. Dekalb does not even try to compete with surrounding counties. Dekalb has lost students to private schools and Decatur and sports facilities has much to do with that loss.	3/6/2026 3:16 AM
980	Equal access to all communities	3/6/2026 2:32 AM
981	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: Already exceeds the 88% utilization target (89% current; 96% projected) Has four consecutive years of enrollment growth Ranks in the top tier academically Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and	3/6/2026 1:06 AM

	2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	
982	OGE is a neighborhood gem. It is a high achieving school with excellent performance. It has a very high proportion of students who qualify for special needs, and it is considered to be one of the best schools at meeting the needs of those students — in fact, it has been suggested that OGE's approach be adopted by other schools. Many of these families come to OGE because their previous schools did not meet their children's needs and they have found a supportive community at OGE. Additionally, I am concerned by the conflict of interest in HPM evaluating the schools, and then potentially making a lot of money if the proposal is implemented. I am ever more concerned when I look at the data and see that HPM's assessment is not accurate. OGE does not have any problem with under-utilization and so it should never have been on the list. The growth projections for future years is also not accurate and does not reflect the major economic growth in the neighboring community. I have heard that the next phase of the proposal will be announced shortly after this survey closes, but how can the SAP possibly take the feedback from families and neighbors into consideration if the next phase is announced so soon after the survey closes.	3/6/2026 12:21 AM
983	I think that letting in some of the older students to give their feedback and their opinion and how they feel will be very helpful to how this impacts everyone	3/6/2026 12:10 AM
984	I loved my K-8 school, with 6-8 in a separate part of the building. We were well-prepared academically and emotionally for 9-12 and college.	3/6/2026 12:05 AM
985	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/5/2026 11:50 PM
986	Please keep in mind that strengthening the schools and community would likely draw students in/back. We are zoned for Smokerise, but it's not very close to our house and doesn't feel like a community school for us. That, plus significant issues in the school culture (obsessed with test scores) led us to choose to home school. Our numbers have been increasing, and if people feel more separated from their schools, more will home school, private school, or move, exacerbating rather than alleviating this problem.	3/5/2026 11:40 PM
987	I had one student at DSA when it was 8-12 grade. The higher enrollment numbers at that time meant he had the option for a variety of AP classes in-person. My second student has experienced DSA as 9-12 with lower enrollment and less teacher numbers. She had to take more virtual classes to meet the advanced academic experience that would keep her academically challenged. While we love the supportive dynamic of a smaller school, the academic offerings would be stronger with a larger student body.	3/5/2026 11:24 PM
988	If Ashford Park Elementary needs to be closed or repurposed to pre-K, please keep the Ashford Park/Drew Valley neighborhood intact and rezone John Lewis to Chamblee High cluster	3/5/2026 11:20 PM
989	As the district considers the next round of scenarios, it will be important to prioritize solutions that strengthen existing school communities rather than relying primarily on consolidation. For the Cedar Grove cluster, investing in strong academic or theme-based programs could help attract and retain students while making better use of existing facilities. The district should	3/5/2026 11:13 PM

	also carefully consider transportation impacts on students and families if consolidation leads to increased busing. Keeping students in their local community schools supports engagement, extracurricular participation, and stability for families. Finally, if changes such as a 6–12 configuration are considered for Cedar Grove, the district should ensure long-term investment in facility repairs and clearly communicate plans for maintaining the buildings so the community can feel confident that these schools will continue to serve students for years to come.	
990	I encourage the district to carefully review the long-term enrollment assumptions being used to inform these scenarios. For example, the projections currently show Fernbank Elementary's enrollment stabilizing in the coming years, yet the surrounding area has experienced steady growth for several years and continues to see new housing development and strong demand for neighborhood schools. If projections underestimate future enrollment, consolidation decisions made today could quickly lead to overcapacity conditions. Given the long-term impact of redistricting and facility planning decisions, it would be helpful for the district to ensure that projections fully reflect recent growth trends and housing patterns. As future scenarios are developed, I encourage DCSD to include analysis of: optimal elementary school size based on research and operational factors strain on shared instructional resources (cafeterias, libraries, and technology spaces) traffic and arrival/dismissal safety relative to enrollment levels validation of enrollment projections against recent housing and population trends These factors have a significant impact on the daily experience of students, staff, and families and should be considered alongside building capacity when planning for the district's future.	3/5/2026 11:12 PM
991	I'd like for scenarios to consider transportation needs (bus routes) for lower income neighborhoods. I'd also like for buildings with larger capacity to be inspected for code compliance and safety. Consolidating to larger, dilapidated buildings negates potential benefits to students. Thank you for the thoughtful consideration in collecting feedback from a representative group of stakeholders.	3/5/2026 10:53 PM
992	Please consider the importance of strong neighborthood schools like evansdale Elementary.this school provides a suportivve for students and families and is an important part of the community. Before closing schools like evansdale the district school	3/5/2026 10:34 PM
993	Instead of closing schools, why not focus on reducing class sizes by reallocating resources?	3/5/2026 10:33 PM
994	My children attend Montgomery Elementary which already seems to be in great need of renovation and utilizes trailers outside of the main buildings and yet the SAP is closing / consolidating. I don't want my children to be redistricted from their current cluster but also have concerns that Montgomery is overcrowded and that children that are recognized as gifted are not taught to their full potential.	3/5/2026 10:32 PM
995	Rely on accurate up-to-date data to inform any potential decisions, including employment expansion, residential pipeline data, current and projected attendance rates in 2028 and 2030, costs of maintaining OGE vs. expanding Sagamore Hills and Briarlake? The worst case scenario would be eliminating capacity needed in a growing community.	3/5/2026 10:31 PM
996	Evansdale es excelente	3/5/2026 10:30 PM
997	Clear comparisons between scenarios would be helpful, including academic, community, transportation, and facilities impacts. Providing both short-term and long-term projections would also help families evaluate sustainability.	3/5/2026 10:30 PM
998	Making gifted schools like Kittredge to be grade 4-8 should be prioritized.	3/5/2026 10:28 PM
999	Traditional system works and makes sense. Work with what you have, re-organize, clean up, make corrections. Do not create a much bigger mess in an already messy situation. DO NOT CLOSE Ashford Park Elementary school. Build an additional building if anything. One would perfectly align and fit in the front left of the current building, connecting directly through the hallway. The new addition can be two-story and create a very useful and welcoming courtyard in the front field providing both a pleasing front elevation as well as a safe community space. There is a great playground/soccer field in the rear that was a very recent project that the community heavily contributed to. Great school, great students, parents, teachers… a school that is instrumental for many generations' elementary experience as well as a fantastic educational foundation.	3/5/2026 10:27 PM
1000	It would help to have a fuller picture of the impact as well as more scenarios. For example, Kittredge was not included in the list of school impacted. If it were expanded to include more	3/5/2026 10:21 PM

	grades, for example, this might relieve some of the overcrowding in other schools.	
1001	Closure of top performing schools is foolish and should be avoided at all costs. It is difficult to create build and maintain a high performance culture and such schools should be cherished, not targeted.	3/5/2026 10:15 PM
1002	Putting 11/12 year olds in a school with 18 year olds feels scary and risky to parents with small kids.	3/5/2026 10:14 PM
1003	Just don't close the school please.	3/5/2026 10:07 PM
1004	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/5/2026 10:02 PM
1005	Even though enrollment is dropping isn't this better for classroom sizes? Students learn better in a classroom or 20 vs a classroom of 30. If we are trying to gain the trust of the parents who dis enrolled and took advantage of the Georgia promise scholarship what can we do differently?	3/5/2026 9:56 PM
1006	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/5/2026 9:54 PM
1007	I would hate to see a neighborhood school(specifically) Oak Grove Elementary closed that has such a good reputation.	3/5/2026 9:52 PM
1008	Brockett ES is a special school. It is diverse in many ways and functions very much as a community-building environment. The high percentage of parents at the school who are immigrants and non-English speaking may result in less direct feedback from those families to this survey. But please know that our families are so supported by having a smaller school environment. Our students flourish by building confidence and social skills because they are known - every teacher and administrator knows my child's name. There is VALUE in that, especially for a kid like mine. Please please ensure you are considering much more than a bottom line economic impact in making these decisions.	3/5/2026 9:49 PM
1009	All of DCSD loses a lot by losing a school like OGE -- OGE is a model school that other schools could look to for improvements.	3/5/2026 9:48 PM

1010	Schools should incorporate a parent contract similar to Oakcliff Theme	3/5/2026 9:45 PM
1011	Please take the feedback into the community and board. Consultants who have no skin in the game should not influence the future of our children	3/5/2026 9:34 PM
1012	Suggest scenarios that are actually backed by evidence and informed by a wider group of community members.	3/5/2026 9:34 PM
1013	Have we considered what grade banding is most effective for teaching and learning? It is clear that a lot of urban planning data is driving the scenarios but it is concerning that we are not starting with what is important to foster development at ages and stages to guide grade banding and school composition. I would also like to understand how student:teacher ratios have been factored into the scenarios.	3/5/2026 9:33 PM
1014	Thank you for thinking outside the box, but let's also do what is best for kids safety and learning	3/5/2026 9:30 PM
1015	Please keep us in our assigned Lakeside cluster and take the students, the teachers who will also lose their jobs, and the families in the neighborhood who can walk their children to and from school into consideration.	3/5/2026 9:29 PM
1016	Please consider the importance of neighborhood schools to the community that it is a part of. - these little elementary schools are dear to us and important to our communities	3/5/2026 9:28 PM
1017	Reducing class sizes has a financial cost, but let’s not forget to count all the positive gains for students and teachers when classes are smaller. Teachers are less stressed, classes have more opportunities for creative projects, students get more attention, individual students have a better chance to have the teacher work with them for their specific needs/learning style. All of these factors result in better test scores, happier staff, less teacher turnover, and happier students.	3/5/2026 9:24 PM
1018	Please prioritize keeping our community schools open. Our children need stability, safe environments, and strong neighborhood schools. Closing schools would negatively impact families and students.	3/5/2026 9:21 PM
1019	Thank you for the opportunity to provide feedback. I live in a different county, their organization is unique in my opinion. The have elementary PK-5 / 6-7 /8-9/ 10-12. If that is useful look into Dawson County. I do not care for the increased transitions of their model, but the schools are in close proximity as it is a small county. They are able to specialize their staffing for meeting the needs of specific developmental ranges and are able to provide transportation to students during the day who require advanced opportunities.	3/5/2026 9:15 PM
1020	Don’t close any elementary schools……period. There has been no information on what will happen to empty buildings. If you are not selling them, you will simply have empty buildings that will continue to deteriorate and attract vagrants. So you are just going to spend money keeping them up anyway. Elementary schools are meant to be neighborhood schools. These are babies, just young kids who should be able to walk and ride their bike. They should not be bussed 5-10 miles away because the school board has a history of being reckless with money that belongs to the kids. Instead of closing schools, you should cut the waste at the county office. Stop wasting taxpayer dollars and cheating the kids in this county. You should be ashamed of yourself for even suggesting this absolutely terrible plan. Don’t patronize the families and tax payers in Dekalb county with the propaganda that months of planning and consideration went into this. You paid a firm millions of dollars to make these recommendations. That is fraud as far as I am concerned. It’s time to put the kids first for a change. Focus on getting back to the basics of teaching and stop with all the bloat and layers of administrative staff at the county level. If you start doing that people just might opt to send their kids to public school in the county vs private school which would increase the attendance. The students are here in the county, families just have little faith in the system. It should be your primary goal to restore the faith in the quality of education available to families not closing schools further deteriorating that trust / faith.	3/5/2026 9:13 PM
1021	I would like to see more research and data from the district about why these changes would be beneficial for the students - not just financial reasons or so that other class options could potentially be offered. I also do not want my child to be a number in a large school.	3/5/2026 9:12 PM
1022	I am most supportive of decisions help us maximize resources in a safe manner and avoid overcrowding classrooms. Schools need flexible areas and provide access to movement, media, the arts, exploration, quiet and relaxing spaces,	3/5/2026 9:09 PM

1023	The community engagement process must be genuinely accessible to the families most affected by these changes, many of whom are working multiple jobs and cannot attend daytime or evening meetings. Virtual options are a good start, but the district should also consider partnering with churches, community centers, and trusted neighborhood organizations to reach families who may not engage through traditional channels. The district should also conduct and publicly release an equity impact analysis before finalizing any scenario. And before students are moved anywhere, there needs to be an honest assessment of the physical condition of receiving schools. Overcrowding and deferred maintenance are already real challenges in many buildings. Families deserve to know that their children are being moved toward something better, not just something different. The district has committed to multiple rounds of feedback, and that commitment must be honored in substance, not just in form.	3/5/2026 9:09 PM
1024	I would like to see what alternatives we have for expansion not closure. This is a neighborhood school that fits this neighborhood	3/5/2026 9:08 PM
1025	I just think we are owed some ACTUAL explanations of the redlining, no BS. ALSO, it is not fair for any parent or child to spend all their free time on transportation to and from school because you guys want to redline out the poor schools.	3/5/2026 9:06 PM
1026	Once again, my school is in a growing area of high utilization and is in the top tier academically. The other schools in my cluster are also high capacity. I do not want my children at an over capacity schools just because the county is utilizing a one size fits all model, instead of a common sense model. The schools under 70 percent should consolidate, but rose at capacity should not. It's a shame it is even under consideration. Please quit being DeKalb will always DeKalb and do something to surprise us with common sense and financial responsibility.	3/5/2026 9:01 PM
1027	If the objective of the district is to close the utilization gap, the district should prioritize schools which are under-enrolled and under-performing. This is NOT Oak Grove Elementary. OGE has been a staple in this community for decades. Community schools should be the goal. Raising my kids in a place I can walk them to school is why I moved to this area of Dekalb. It is a huge draw for families and closing the school would be a huge detriment to the community as a whole. How would the structural expansion be managed at Sagamore and Briarlake as significant changes would be required to accommodate all the students from Oak Grove? How does this compare to the facility maintenance required at OGE? Dekalb needs to provide data that confirms this would be fiscally responsible given the terrible management decisions they have shown in the recent past.	3/5/2026 9:00 PM
1028	None.	3/5/2026 8:57 PM
1029	Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/5/2026 8:57 PM
1030	I'm disappointed in this district.	3/5/2026 8:39 PM
1031	Evansdale's French program is unique to the Lakeside cluster. Neighborhood parent, teacher, and community volunteers provide needed resources and personnel for French students. Moving the program would destroy this vital community. French teachers at Evansdale elementary, Henderson middle and Lakeside high schools have put down strong roots in our community. Older students mentor the younger students. It is imperative to keep this program at Evansdale and within the Lakeside cluster to keep the program strong.	3/5/2026 8:36 PM
1032	The German program should be discontinued to help balance class sizes for each grade and distribution of ESL students. (A German 2nd grade Class has 21 students and a "normal" second grade class has 29 students.)	3/5/2026 8:33 PM
1033	I oppose any change	3/5/2026 8:30 PM
1034	The current system is working fine. We chose Oak Grove for the great education. Our kids and us love this school. We have a special education child who needs all the resources that Oak Grove have been providing. Please keep the school open. Thank you for your consideration!	3/5/2026 8:30 PM
1035	I appreciate feedback being collected and understand the issues that are being addressed. I do	3/5/2026 8:29 PM

	wonder what will happen with empty schools. As someone that lives in Smoke Rise where the old school I don't live now it's being used as building for the county in a residential neighborhood. Also DeKalb county taxes are very high and increased 25% last year, it seems to largely go to schools so I am not understanding how tax dollars are really being used. Would love to hear more about that. It is my understanding that smoke rise elementary was empty but once Idlewood was added, some of the classrooms became overcrowded. Being careful not to over correct, will be essential.	
1036	There are other ways to combat monetary deficits. This is quite frankly, ill-planned and fiscally irresponsible yet again.	3/5/2026 8:27 PM
1037	8. People are losing their jobs and that means that fewer families can afford private schools, so your projections may be off or premature, considering the shifting landscape. Consider closing fewer elementary schools to allow for the potential of expanding enrollment in public schools.	3/5/2026 8:23 PM
1038	We as a community have significant concern regarding Tracy Richter & HPM's analyses. Critics have repeatedly charged that the firm's engagement processes are performative rather than genuinely consultative, that proposals feel predetermined, and that reports contain errors or opaque assumptions — including enrollment projections that communities have alleged are rigged toward decline. Recurring concerns include an overemphasis on facilities and construction metrics at the expense of academic performance, equity, and community context; a lack of demographic and cultural ties to affected neighborhoods; and, in DeKalb's current engagement, board members themselves criticizing HPM's outsized visibility as the public face of the process. Such issues have occured in Austin, Texas in 2011, Boise, Idaho in 2005-2006, Baltimore, Maryland, Huntsville, Alabama, and now DeKalb County, Georgia. To highlight recurring themes across complaints: • The firm is seen as prioritizing facilities/construction outcomes over educational ones • Community engagement sessions are perceived as performative rather than genuinely consultative • Proposals are felt to be predetermined, with community input treated as a formality • Reports and data have been challenged as containing errors or unrealistic enrollment projections • The firm's outsider role means it lacks demographic and cultural ties to affected communities • High-performing or over-capacity schools have sometimes appeared on closure lists alongside underperforming ones, raising questions about the criteria used • Opaque assumptions: Projections depend on birth rates, housing yield, charter/choice behavior, etc. If those assumptions aren't openly shared, the outputs look arbitrary. • Choice of metrics: If a plan uses utilization and facility condition but barely weights academic performance, safety, or community role, people understandably say "this data is misleading," even if each number is technically accurate. • Changing numbers mid-process: In Howard County, different FARM methods were used at different stages, causing shifts in reported percentages. The state said that's not "faulty," but to parents it looks like a moving target. • Overconfident projections: Projections are inherently uncertain; when reality doesn't match, it can look like the consultant was cooking the books, even if they were just…overconfident or wrong.	3/5/2026 8:16 PM
1039	I understand there's a very unique French program in the Lakeside cluster, which includes Evansdale. Consolidating Evansdale's students elsewhere would almost certainly detrimentally impact the program.	3/5/2026 8:14 PM
1040	Needs to start over; please see my comments above.	3/5/2026 8:11 PM
1041	Remember Allgood and it's amazing faculty and students.	3/5/2026 8:02 PM
1042	Stop bringing in white people who are destroying our community and legacy	3/5/2026 7:59 PM
1043	I chose to move to the neighborhood specifically for Evansdale and Lakeside HS. Moving our children to an UNDERPERFORMING school district will hurt property values and hurt the children scholastically. I urge you not to close Evansdale and leave us in the Lakeside HS cluster.	3/5/2026 7:57 PM
1044	The community meetings in the first round severely lacked interaction with the community and true engagement of the community. It's incredibly disappointing to be part on the receiving end of a school closure of a highly ranked school and to not be engaged in a manner that is constructive. Matt Powell matthew.powell@icloud.com	3/5/2026 7:57 PM
1045	With consolidations, excellent teachers are lost to other counties.	3/5/2026 7:55 PM
1046	Small schools benefit students! We love LRES! I don't not trust the district has the best interest of students truly in mind. It is also hard to believe this will ever come to fruition with all	3/5/2026 7:55 PM

	the dysfunction at the district level. Glad we are pretty isolated from it by good administration at our school.	
1047	There has to be better communication. I am aware of many parents who already completed feedback who would have commented on Kittredge changes if they were aware that was supposed to be a part of the discussion. If you truly want feedback, you have to let people know what is on the table. Kittredge should not be broken up or consolidated into a bigger school. It is the envy of parents in districts across the country. I am convinced that part of what makes the school such a great education is that it allows that group of children to exist in their own space--one where they are free from outside influences that exist in larger 6-12 type locations. That said, we as a community should absolutely be looking for ways to make gifted track programs at home substantially more robust. The focus should be on raising the bar, not tearing down those who were lucky enough to be selected. Part of this is parent engagement and part of it is investment by the District and empowerment of the educators to create more opportunities. As to Chamblee generally, shifting Ashford Park in the Cross Keys system is like cutting a giant piece out of our community. Our kids place sports, socialize, and grow up together. Moving Ashford Park to Cross Keys destroys that fabric and cannot be justified by virtue of the fact that prior generations of leaders failed to build schools where the demand was greatest. Do not punish those children by splitting them from children they grew up with. As a final point, it is the clear that the district messaging is to think as a whole district. This is a noble goal but the truth is that the problems facing various parts of the district are fundamentally different and require different solutions. When it comes time for decisions, Chamblee cluster families, Montgomery Families, and Kittredge families will not have a voice in the room. Andrew Ziffer was elected to be our voice. South DeKalb's elected representatives have been powerful and loud advocates for their communities. It is laudable. We need the same advocacy for our kids. It is not acceptable for the mistakes of past leadership to poison the well for future generations. This process can be a force for good--but it has hallmarks of a preordained political show that has nothing to do with making our kids education better. This process is off to a rough start. There is time for improvement. I hope to see it soon because the stakes are too high to let a political agenda destroy the best chance we have to make a positive change.	3/5/2026 7:54 PM
1048	Na	3/5/2026 7:42 PM
1049	Precovid there was talk about having split ES clusters where kids wouldn't all go to the same middle and high school. I truly think the best way to build a strong school community is to keep neighborhoods together from ES through HS. I graduated from Chamblee in '91 (before it was a magnet school!!), and my children now attend Dunwoody ES, Peachtree MS and Dunwoody HS. Traveling to the south of the county for band events, I could NOT believe the discrepancy between their fancy new High Schools built for large student bodies in comparison to our old falling apart ones with lunchrooms busting at the seams and lunch periods that begin in the morning to accommodate everyone. This initiative must address the empty seats, and that is the main goal for good reason, and very important financially. But I do also hope part of the goal is to even out our entire school district's facilities. Stop the overcrowding trailer madness, and provide ALL students with buildings designed/updated for the capacity they actually are. My youngest is headed to MS next year, so I have no specific stake in the ES changes, other than our observations over the years. DES is a great and new building and I assume Austin is great as well. With declining enrollment, we certainly do not need so many elementary schools in our cluster, which geographically is not that large. And the people crying about their property values need to get over it, DCSD has ZERO responsibility about that... and doing what is best for the ENTIRE school district will most likely mean school ratings will only go up! Thanks so much for taking this big leap amongst so many naysayers. Ultimately, we have to trust DCSD to make the hard decisions that help the district as a whole. Keep your eyes on the end game and know that change is often hard but it is often necessary for the greater good. Y'all got this!	3/5/2026 7:42 PM
1050	Before proposing any school changes, DeKalb County Board of Education members need to seriously address the need for a Qualified, Experienced, and Vetted superintendent!!!	3/5/2026 7:40 PM
1051	Too many positions and micromanagement happening on the district level. We don't even have assessments that align with our standards or CAAG. Micromanagement in all the wrong areas that are making teachers to tons of busy work. Focus on fixing that, then you can plan to uproot the entire district.	3/5/2026 7:39 PM
1052	Just because a community is the loudest voice doesn't mean they are the voice of everyone.	3/5/2026 7:37 PM
1053	Reflect on the surveys	3/5/2026 7:36 PM

1054	You need to bring in experts at managing the transition now and not wait until plans are final or closer to be finalized. In my former corporate career, I managed downsizing from hundreds of thousands to ~17000 when I left. Real estate, technology, training, and human factors all require the same level of planning and integration. The best success requires this role to be involved now.	3/5/2026 7:36 PM
1055	Please do not close the magnet program. I have heard rumblings about moving the program to local schools and adopting the same model at gifted. This does not work. The gifted program in Dekalb does not differentiate and needs an overhaul itself. Other schools could learn from kittredge's organization and model. But turning it over to local schools would water it down into nothing.	3/5/2026 7:25 PM
1056	Successful schools need to be encouraged.	3/5/2026 7:24 PM
1057	What would be the average and max number of students per class with each variation proposed? What's the travel time between the schools in each zone for families with siblings in different grades?	3/5/2026 7:21 PM
1058	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: Already exceeds the 88% utilization target (89% current; 96% projected) Has four consecutive years of enrollment growth Ranks in the top tier academically Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/5/2026 7:20 PM
1059	I support smaller neighborhood schools	3/5/2026 7:13 PM
1060	Please keep Champion Middle School. This school is important for the community.	3/5/2026 7:12 PM
1061	Please do not touch Fernbank. I know they are large, but it works there. The school community will is ideal and the teachers and staff are incredible. We moved to Medlock Park to specifically go to Fernbank. There are numerous families in my neighborhood that chose their home for the same reason.	3/5/2026 7:08 PM
1062	People buy their homes and create their lives around the schools they choose to attend. Evansdale in particular, as it is a choice school, and extraordinarily special. This French program is supposed to extend into middle school and if you kill this program you will lose a lot of families. The board of education has made many bad decisions in years lately, this feels like another bad decision to rush into such a big change. The leadership needs to be stable and trustworthy before changes should be made. You have not proved yourself to the community.	3/5/2026 6:56 PM
1063	I think the upper class part of Dekalb county teaching out to dunwood and places like that are the reason for all this…. They notoriously have a lot of "private school" kids…. Making it seem low attendance but when you come to Decatur /Lithonia area it's a waitlist for ga pre-k and classes are full. I'd prefer a more in depth breakdown if WHERE enrollment, NOT attendance is low and those elementary middle and high school should be re-banded. Our location WILL NOT benefit from having the little kids mingle with the big ones, discipline problems look differently.	3/5/2026 6:54 PM
1064	Don't break what works. High performing schools should be left alone and the district should understand why they're successful and copy them. Dr. Sauce should take responsibility for the plans being proposed by his employees and the overpaid consultants.	3/5/2026 6:53 PM
1065	Please prioritize protecting strong, well-utilized neighborhood schools like Montgomery from closure or disruptive reconfiguration, and consider additions or targeted improvements instead of consolidation where schools are already near or over capacity and performing well	3/5/2026 6:52 PM

	academically. As a parent with one child at Montgomery and another entering Kittredge Magnet, I am asking the district to publish specific information about how SAP scenarios affect magnet programs, including Kittredge's enrollment, capacity (currently forecast at roughly 500–550 students and operating above its nominal capacity), and facility assignments. Any final plan should: • Maintain the academic quality and selectivity of magnets like Kittredge, • Ensure safe, reliable transportation so access is equitable across the county, and • Provide a multi-year transition plan so current and incoming students at Kittredge are not disrupted by sudden location or program changes.	
1066	Many in the community don't trust the current school board. This is based on the lack of transparency and failures of past initiatives that have been proposed. This entire process has been presented to the public in a way that makes us feel our opinions are not valued. Many feel that the school board has already made their decision and are just holding this process to check a box and claim they listened. How did the school board and its partners arrive to this "proposed" list, but frame it as just being a conversation? Clearly these schools were targeted for specific reasons and those motives are unclear to the public. Until we have confidence that has been explained, this process will continue to be a disaster.	3/5/2026 6:48 PM
1067	Please take into consideration the impact this will have not only to the students, but the communities as well. There has to be an alternate option, that was not brought to the public, that can work where our students and children are not sent to farm-mill elementary schools that are not productive or conducive to the education and well-being of the students.	3/5/2026 6:45 PM
1068	What can we do to help save our kids and their school	3/5/2026 6:44 PM
1069	more options and or justification of the scenarios provided	3/5/2026 6:38 PM
1070	OGE is essential to our community. Please see that.	3/5/2026 6:37 PM
1071	The Dunwoody community needs another alternative rather that Peachtree middle school. The leadership at Peachtree is unstable and constantly changing. The issues at Peachtree Middle make it where you have a child with special needs that you have to send them to private school for middle school.	3/5/2026 6:37 PM
1072	Please we need to keep Brockett	3/5/2026 6:32 PM
1073	The Kittredge and Wadsworth Magnet programs must be protected. They are the best schools DeKalb Co has. If we can broaden enrollment to the magnet program, more students will benefit from it.	3/5/2026 6:32 PM
1074	Think about why the county enrollment is so low? People are moving out of the county. With a massive school closing more people will leave then what will be done. How are these children for which a school was next door now get to school? Spend hours on a bus to and from school each day. Absenteeism will rise because of this.	3/5/2026 6:31 PM
1075	Evansdale French program is unique to Lakeside cluster. Evansdale, Henderson Mill, Oak Grove, Pleasantdale, and Midvale, ties to Lakeside cluster and should not be moved to different cluster.	3/5/2026 6:28 PM
1076	Picture yourselves as children having to navigate these changes. This is difficult and all they want is to feel safe and amongst friends in their community. We've been dealing with boundary and school closure threats since we moved into the county 8 years ago. Actual lives are deeply impacted by all these moves. These are not just political decisions when you are one of the families having to go through these changes.	3/5/2026 6:28 PM
1077	Please do NOT close Ashford Park.	3/5/2026 6:28 PM
1078	Dekalb county used to have one of the best school systems and it's a shame that many people have no confidence in the system anymore.	3/5/2026 6:26 PM
1079	Please consider different decisions based on different regions within the county	3/5/2026 6:19 PM
1080	Follow the research that has the evidence thay shows that students learn more and perform better in smaller class sizes.	3/5/2026 6:11 PM
1081	Closing one of the best elementary schools and over-crowding the nearby ones would lead to a worse result for all students and teachers involved, so Oak Grove Elementary should be left alone for the foreseeable future.	3/5/2026 5:59 PM
1082	The plan is too broad and disrupts too many communities all at once.	3/5/2026 5:55 PM

1083	As the district develops the next round of facilities scenarios, I strongly encourage greater transparency around the data and assumptions used to generate the proposals. The community would benefit from clearly seeing the enrollment projections, capacity calculations, transportation modeling, and facility constraints that are driving these recommendations. Without clear and accessible data, it is difficult for families to fully understand or trust the rationale behind major decisions such as school closures or consolidations. I would also encourage the district to evaluate scenarios that prioritize strengthening existing neighborhood schools rather than consolidating them into significantly larger campuses. Schools like Evansdale Elementary School offer advantages that should be carefully weighed in future planning. Evansdale has a large site with room for expansion, existing parking capacity, and better traffic circulation than several nearby schools. These physical characteristics make it well suited to continue serving as a neighborhood elementary school. In addition, planning should consider the programmatic value of existing offerings, such as the French immersion program at Evansdale that continues into Henderson Middle School. Programs like this attract families to public schools and help stabilize enrollment. Disrupting established program pathways could unintentionally weaken enrollment rather than strengthen it. Finally, I encourage the district to carefully consider the family choice implications of closing neighborhood elementary schools or creating very large consolidated schools. Many families choose to live in this area specifically because of access to a strong local elementary school. If that option disappears or becomes a large “mega-school” further from home, it is very likely that some families will pursue private or alternative schooling options, which could reduce enrollment and undermine the goals of the consolidation effort. For the next round of scenarios, I would urge the district to focus on solutions that maintain strong neighborhood schools, preserve successful program pathways, and make full use of campuses that have the space and infrastructure to grow.	3/5/2026 5:50 PM
1084	Want to see data on all potential closures.	3/5/2026 5:50 PM
1085	Please consider other ways to cut costs like non teacher beaucarcy	3/5/2026 5:49 PM
1086	Brockett’s afterschool performing arts club is absolutely amazing! It would be a shame to see these children lose this gem that is also supported throughout the Tucker Community.	3/5/2026 5:45 PM
1087	The proposal is a pure racist targeting of white (north county and high performing, high parent involvement, high school foundation donation) schools. Close lowest performing schools and bus kids into the higher performing schools via a voluntary school choice program. This is not rocket science.	3/5/2026 5:43 PM
1088	I am a state funded literacy coach at a struggling school. I started my career in Dekalb at Midway Primary School. I think schools that struggle have a unique opportunity to hyper focus on literacy at a K-3 school. Consider how that can create a space for innovative configurations of classrooms for struggling readers. You could also consider an early intervention school that focuses on building strong readers before transitioning to a traditional elementary school. One of my fellow CSI Coaches works in a school like that in another Ga city.	3/5/2026 5:40 PM
1089	My current comment is that the district is loosing students because people are moving out of the county due to the lack of leadership over the district. Dekalb is a great place, but has a bad rap. Trust in the schools has been lacking. Build trust, build schools.	3/5/2026 5:39 PM
1090	Keep communities in place!	3/5/2026 5:38 PM
1091	make current enrollment data available	3/5/2026 5:37 PM
1092	Kittridge is great, but why continue the magnet program at Chamblee middle and high school. It is pointless after that.	3/5/2026 5:34 PM
1093	Provide an alternative plan.	3/5/2026 5:33 PM
1094	Share information on class sizes that are used to make these decisions	3/5/2026 5:31 PM
1095	I moved to my neighborhood for the school. I will do that again if i need to and it would not be in DeKalb.	3/5/2026 5:31 PM
1096	As transitioning to Round 2 begins please be mindful of keeping neighborhoods together with respect to boundary lines.	3/5/2026 5:26 PM
1097	Information about how boundaries will be drawn is necessary. SAP needs to take into consideration the impacts that these scenarios have on the local community, housing sales,	3/5/2026 5:26 PM

	etc. People will be fleeing DeKalb based on these scenarios. Smokerise is a mega school and it is not going well and families are fleeing. I don't want to see the same thing happening to the rest of Tucker.	
1098	You just spent money updating the school why close it!!	3/5/2026 5:21 PM
1099	Consider having the PK-3 / 4-6 / 7-9 / 10-12 The 7-9 school could be a junior high school preparing students for their high school academic path, there could possibly be high school level classes for 7th and 8th grade in a junior high school.	3/5/2026 5:19 PM
1100	N/A	3/5/2026 5:12 PM
1101	My children attended Evansdale through 7th grade. Then went to Henderson High School School 8-12. Middle school was not offered and I think things went more smoothly	3/5/2026 5:05 PM
1102	DO NOT CLOSE OAK GROVE	3/5/2026 5:03 PM
1103	My biggest concern at this point is keeping DeKalb School of the Arts HS a separate school but with much better facilities. I'm not opposed to them leaving Avondale as long as they are not subsumed into an existing HS as a "program" rather than a separate school. The most important thing is to give them better facilities and in some cases teachers and more teachers so that it is a much more robust program that fosters those students who are arts focused and would not fit in well within a traditional HS. My current MS student is planning to attend DSA in Fall 2027 (if we don't move out of Georgia before then).	3/5/2026 5:01 PM
1104	When DeKalb was one of the most sought-after districts in the metro area, its neighborhood model was similar to the K-8, 9-12 grade band suggestion. Convert middle schools to high schools in clusters where needed. The neighborhood school model would set DeKalb apart and attract more families. Kids are getting lost in the mega-school model, especially in middle and high school.	3/5/2026 4:59 PM
1105	Completely against closing any school named after McNair	3/5/2026 4:56 PM
1106	Teacher compensation in DeKalb County remains significantly lower than salaries offered in neighboring districts such as Atlanta, Cobb, and Fulton. This disparity places DeKalb educators at a financial disadvantage, especially during a period of sustained inflation and rising living costs. To remain competitive and to ensure that teachers can meet basic economic needs, a raise salary increase of approximately 20% is necessary to bring pay levels in line with surrounding districts. Many educators are experiencing severe financial strain, with some relying on community food distribution programs to supplement their household needs. This situation underscores the urgency of addressing compensation gaps so that teachers can maintain financial stability and continue to serve students effectively.	3/5/2026 4:54 PM
1107	I would look at traffic patterns, race and ethnicity data. I would seek to remove the trailers from all schools- consider Cross keys, Dunwoody high School Peachtree metal, for example. Children should not have to learn in boxes.	3/5/2026 4:46 PM
1108	Conversation about changing school districts, closing, moving grade levels, all create a fire storm. When the board can finally hire a highly qualified, and experienced superintendent, not until that is accomplished should any major changes be seriously considered.	3/5/2026 4:43 PM
1109	Before closing elementary schools in high-value neighborhoods, the county should conduct a comprehensive analysis of potential economic impacts. While operational savings may be immediate, school closures could reduce neighborhood desirability and lower property values, leading to a decline in property tax revenue that may offset or exceed those savings. A data-driven study comparing projected cost savings with potential revenue loss, including impacts on families and community stability, will ensure that any decisions balance short-term budget relief with long-term fiscal health.	3/5/2026 4:42 PM
1110	Although I understand the need to reduce operational cost due to empty seats, I believe DCSD will need to work hard to gain the trust of its stakeholders. Using Smoke Rise Elementary as an example, the trust was broken with the recent rezoning. Meetings were held, options presented, stakeholders expressed concerns, more meetings were held. Projections of enrollment were put forward. DCSD repeatedly said existing students/families would not be affected by rezoning. Fast forward to this year and everyone is affected. DCSD completely missed the projected enrollment. As a result, the school is now overcrowded by over 100 students. Trust is hard to earn and easy to lose. What happened with the recent rezoning to Smoke Rise lost trust among many.	3/5/2026 4:18 PM

1111	I am not enough of an expert to answer Question 6. I do know that many children are vulnerable, and can have a difficult time adjusting to change. The consistency that Evansdale to Henderson Middle to Lakeside HS provides, seeing the same faces, working with familiar peers, helps them learn how to conduct themselves socially, as well as academically. Also Evansdale has a lot of land area that can support expansion via additions to the back of the school, while still allowing ample play and parking space, and because it is on a corner, the traffic flow does not block a single street but it can be accessed along two side streets. It is really a gem of a school.	3/5/2026 4:16 PM
1112	N/a	3/5/2026 4:12 PM
1113	More equitable distribution of new facilities and add ons in all parts of the county. Growth can not just be assumed for one area and the south side and south east side are not considered.	3/5/2026 4:01 PM
1114	Oak Grove is in area with much expansion & growth causing growth of the Oak Grove Elementary population.	3/5/2026 3:58 PM
1115	Our community and staff really does not appreciate the LHS SAP meeting being changed last minute to be virtual and not allowing us to speak up in person. The reason we didn't attend the February meetings was because we were under the impression they would all be on the same topic and we needed to attend our cluster/regions meeting. We later found out there was a phase 1 discussion for February's meetings and phase 2 for March when it was too late.	3/5/2026 3:52 PM
1116	Do not close this school as it offers many opportunities that would be lost if students were sent to other areas!	3/5/2026 3:51 PM
1117	I would like to know how classroom sizes and classroom staffing (co-teachers/teacher assistants) will be handled when it comes to the possibility of increasing overall school sizes. If consolidations were to occur, I am also concerned for the overall air quality inside of buildings. I would want to know the plans for making sure HVAC systems are updated and plans for implementing air cleaning/air purifying measures in classrooms to help protect students and staff from airborne diseases, dust, etc. (The less likely you are to get sick, the less likely you are to miss school, which also has a huge impact on quality of education).	3/5/2026 3:50 PM
1118	Na	3/5/2026 3:41 PM
1119	Do not fall for the allusion that the let the loud voices in the Northern area speak for all of us. We are an upper middle class white family with 2 graduates of Dunwoody HS and one currently there. We absolutely loved our time at Vanderlyn but the shifts in enrollment post-Covid cannot be sustained. Life evolves, and we need to evolve with it!	3/5/2026 3:40 PM
1120	Keep searching for viable solutions	3/5/2026 3:35 PM
1121	Stop making the south dekalb students suffer!	3/5/2026 3:27 PM
1122	Dekalb should not do away with programs that are working and proving to be successful. Also, what would projected class sizes be once schools are closed or consolidated?	3/5/2026 3:23 PM
1123	Please consider Ashford Park Elementary expansion and keeping it in the Chamblee Cluster Family. So many of us moved to this community for those particular public schools.	3/5/2026 3:20 PM
1124	Oak grove elementary school is a great asset to the Dekalb county school district. We would really hate if you decide to close Oak Grove elementary school. Please reconsider your plan.	3/5/2026 3:10 PM
1125	I think it would be important to have apartment buildings/transient housing zoned in our school boundary, not just single family homes.	3/5/2026 3:05 PM
1126	The consulting firm the District engaged also is involved in school construction work. This feels like a conflict of interest when the proposal envisions expansion/renovation of many facilities in the District. I fully acknowledge that District facilities need dramatic upgrades, but the company recommending them should not be one that could be hired to do the work.	3/5/2026 2:50 PM
1127	I am very concerned that my child could be uprooted from her school (which is not listed as a closure possibility) in the middle or end of her high school career due to reconfiguring of student assignments. I would like assurance of some stability (or grandfathering) for current students who wish to remain at their school. Students should not be removed from their teachers, teams, and peers against their will during their school experience.	3/5/2026 2:45 PM
1128	The Ashford Park community is like a family and I'd hate to see any of us separated. However, the top priority is staying in the Chamblee cluster, even if that means some boundary changes	3/5/2026 2:45 PM

	for the elementary school. We also need to take into consideration traffic issues in-town. For example, driving from Ashford Park to Montgomery Elementary would be horrific. There's already terrible traffic on Ashford Dunwoody during morning carpool, with cars spilling out onto the street. This is very close to I-285. Adding more cars to that morning dropoff would be dangerous and create road rage, not to mention create a long commute for young students. While Montgomery has a huge property, I don't see how it can be expanded since it's on a very busy road. What would be great is if we could expand Ashford Park to accommodate up to 950 students. It seems like we could get creative to figure out a way to do that, even if it means building a small parking deck on the lower part of the property. Could the renovation be paused while this is considered instead?	
1129	I had the pleasure of observing a smaller elementary school setting in the city of Decatur Schools Oakhurst ES. The school went up to 2nd grade. Thiis grade band seemed to be a great fit without the upper grade students at the school. A smaller school setting and smaller classroom sizes.	3/5/2026 2:45 PM
1130	I strongly believe that Vanderlyn Elementary should remain open and that students should continue to attend this wonderful school. Vanderlyn is the second highest performing elementary school in the Dunwoody cluster for reading and math. I prayed for my daughter to be accepted here, and she has thrived. She is currently in the 91st percentile in reading and the 85th percentile in math. She is excelling alongside so many other children because of the exceptional teaching and the nurturing environment at Vanderlyn. What makes Vanderlyn truly special is the sense of community. Our children do not feel like a number. Every student is loved and cared for by the entire staff. Teachers and staff know each child by name, and the students know and respect all of their teachers. This close-knit environment fosters meaningful relationships, a sense of belonging, and confidence that allows children to grow both academically and emotionally. Vanderlyn provides an atmosphere that allows children to succeed and reach their highest potential. Moving students from a school that is thriving to lower performing schools simply to fill seats or increase enrollment numbers would be deeply harmful. If any changes are necessary, it would make far more sense to consider schools with lower proficiencies. Keeping Vanderlyn open ensures that our children continue to flourish in the supportive, caring, and academically excellent environment they need to reach their very best.	3/5/2026 2:29 PM
1131	Please consider keeping Oak Grove Elementary open as it is vital to the community.	3/5/2026 2:21 PM
1132	While any change will present challenges and may not meet the needs of every family, it is important to thoughtfully consider which structure will best support students academically. Some families may experience logistical difficulties, such as managing childcare or coordinating schedules when students attend different schools (for example, having children in K–2, middle school, and high school simultaneously). However, organizing schools into clearer four-year bands at each level—elementary, middle, and high school—may ultimately provide a more effective structure for students. A smaller, more focused elementary environment could allow young learners to strengthen their foundational academic skills during these critical early years. From a district perspective, this type of configuration has the potential to create more targeted instructional environments and, in turn, support stronger academic outcomes for students.	3/5/2026 2:19 PM
1133	I'd prefer for our high school clusters to not vary far from where they are today. I do not want to suddenly need to switch to an entirely different HS cluster.	3/5/2026 2:11 PM
1134	I don't understand why there are vouchers for children to attend private schools when the public school attendance is not meeting expectations. Combining schools into bigger populations when we want smaller size classrooms will not attract families to the public school system. Parents and very involved in these small schools, there's a strong sense of community. I envision a relationship loss, falling into more social detachment, feeding a culture that already is in desperate need of more presence. With more children per school, it adds to more concern about mass shootings. Security needs to be enhanced significantly. There should be another way to get through this. Not closing schools and reducing the ability for the individuals to connect and teach our children. Efficiency is not the same as making a difference in a child's life. Topics: potential change of high school zones, DLI programs survive, safety from inside and outside of the schools, small community feel, transportation, life of closed buildings, overwhelmed children in mega school environment, children becoming invisible in a too big environment.	3/5/2026 2:06 PM
1135	I have sat on many school committees and facilities boards within this cluster and i find that this district is under served fro the amount of giving this cluster provideds for all of Dekalb.	3/5/2026 2:03 PM

1136	Simplify the language of the survey for clearer communication. For example, you have us inferring what a grade band is. And even then, I don't understand what you're asking in question 7.	3/5/2026 1:59 PM
1137	The district already has a high rate of suspensions for students with disabilities.	3/5/2026 1:57 PM
1138	Please keep sagamore/ oak grove at lakeside! These schools are so close together and truly part of the lakeside community. I know in past scenarios Sagamore has been flagged for Cross Keys and it just would be a very difficult commute across 85 and really split our community. We are in the lakeside backyard! I know this is for a future discussion but just sayin' :)	3/5/2026 1:57 PM
1139	History indicates that DCSD will not consider our input. However, it's pretty frustrating that we spent the past three years being kicked out of buildings in an effort to repair them, applied for numerous grants in attempts to remedy problems that DCSD wouldn't remedy, and then have all that ripped out from under us. Also, it should be considered that saying these schools are so under-attended implies that 30 kids in a kindergarten classroom is acceptable. It's NOT.	3/5/2026 1:54 PM
1140	Please consider the scores of the students in the schools as you make decisions. Don't penalize high performing schools by making them consolidate. Instead of focusing on the buildings, focus on how to improve the learning environment and support system in under performing schools.	3/5/2026 1:53 PM
1141	I believe that the emphasis on buildings and utilization is the wrong way to go about these decisions. Foremost the academic and social impacts should be weighed and valued. As well as potential impacts on community impact and local changes to thinks like traffic and implementation should be higher priorities as well.	3/5/2026 1:52 PM
1142	Evansdale Elementary has been an important part of our community for many years. As the district continues to refine the next round of scenarios, I encourage leaders to carefully consider the importance of strong neighborhood elementary schools like Evansdale Elementary. Schools such as Evansdale provide stability, strong relationships between families and educators, and a supportive environment that is especially important for young students. While I understand the district is facing enrollment and facility challenges, decisions should prioritize student well-being, community stability, and maintaining schools that are already serving their communities well. Elementary students benefit greatly from consistency and from learning in environments designed specifically for their developmental stage. Before considering closing schools like Evansdale, the district should explore alternative solutions such as boundary adjustments, program enhancements, or strategies to strengthen enrollment in existing schools. Preserving established neighborhood schools helps maintain strong communities and supports long-term student success.	3/5/2026 1:43 PM
1143	n/a	3/5/2026 1:42 PM
1144	Excited to hear more about the new curriculum and the benefits for the kids, teachers and parents	3/5/2026 1:36 PM
1145	None	3/5/2026 1:25 PM
1146	NA	3/5/2026 1:25 PM
1147	Closing our small neighborhood schools is the biggest mistake Dekalb County can make. This will be devastating to our communities and our students. It doesn’t seem like what is best for students is being considered. Our children deserve better.	3/5/2026 1:21 PM
1148	Smaller is better. Large scale does not help children meet their best potential nor does it allow for leaders to do their best for families.	3/5/2026 1:19 PM
1149	As you move elementary schools, the fabric of the surrounding community and the ready access to “THEIR” school for the little ones is fractured.	3/5/2026 1:15 PM
1150	As you continue this process, I ask you to please examine the data with this in mind. These kids (and their parents and community members) have worked hard to try and put the pieces back together after the pandemic. We lost so much in terms of stability. Please prioritize stability, especially in a vibrant, demonstrably growing community like Oak Grove.	3/5/2026 1:14 PM
1151	Focus on teaching kids, smaller classrooms, more structured teaching for success, better funding for teachers that are in the system. Less administrative functions, more teacher function.	3/5/2026 1:11 PM

1152	If closures do end up happening, there should be discussion of what the current school buildings/facilities will be used for to ensure the community is not burdened with vacant structures that serve no purpose.	3/5/2026 1:07 PM
1153	I would like to know the different scenarios and how many students would fit into each scenario. My other concern will they have some smaller schools or will all schools be filled to capacity.	3/5/2026 1:04 PM
1154	It's important to get neighborhood input besides the parents on any schools that you are planning to close within a neighborhood. Those buildings should not end up "office space" (nor do I think they are zoned for commercial). So it would be important that they become something that benefits the neighborhood or house another school program.	3/5/2026 1:02 PM
1155	Stop threatening the parents who actually give a shit about the schools and the teachers. Go back to your palace and learn how to manage your budget. Which means stop wasting money on dumb exercises like this and crappy superintendents.	3/5/2026 12:55 PM
1156	One suggestion for the next round of scenarios would be to consider offering educator-only town hall meetings, particularly at schools that may be significantly impacted by potential changes. Providing a dedicated space for educators to ask questions and share feedback could help ensure that the perspectives of those working directly with students are heard. I believe consistent grade band structures across clusters would be beneficial. Many students move from one cluster to another, particularly at the high school level. Having a consistent structure could help ensure smoother transitions and reduce the likelihood that students' academic credits or course progress are negatively impacted when they transfer. Additionally, while the graphics provided are clearly well-intentioned, they can be somewhat difficult to process due to the number of boxes and arrows included. A brief narrative explanation accompanying each graphic on the same page would help provide clearer context and make the information easier to interpret.	3/5/2026 12:55 PM
1157	I understand the need to close some facilities due to cost and low enrollment, however, closing elementary schools which help mold the youths primitive years can hinder their overall growth.	3/5/2026 12:47 PM
1158	Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/5/2026 12:47 PM
1159	I don't have enough feedback I think so it's the best way.	3/5/2026 12:44 PM
1160	The thought of closing all the proposed schools is ridiculous. No one wins, we lose the neighborhood schools and community and get overcrowded schools outside our area. Terrible	3/5/2026 12:41 PM
1161	As a parent of 2 future Dunwoody high school students, i support the expansion of Dunwoody HS. But i would like to know when the potential closure of Vanderlyn takes place. 6 years?	3/5/2026 12:41 PM
1162	How can we redirect funding to public schools from private school subsidies	3/5/2026 12:34 PM
1163	While this wasnt explained, the assumptions that lead to all the elementary schools being closed don't seem to align with the reduced bus ride lengths. Less elementary schools means each student will have an increased commute, on average.	3/5/2026 12:33 PM
1164	Evansdale Elementary should not be closed. Here is why: 1) Evansdale's lot size is large enough for considerable expansion - it includes two parking lots and street parking. 2) DLI French program: this program draws people to our community. It continues into Henderson MS. Lakeside HS has created a path for immersion students to continue at a rigorous level. Separating Evansdale from the cluster threatens that carefully considered continuity. 3) If	3/5/2026 12:22 PM

	declining enrollment is a concern, the consolidation approach will further exacerbate it. People move to this part of the county specially for a walkable school/small community experience - they pay a premium for it. Closing neighborhood schools risks county flight and blight. Equity should mean that each part of the county gets what it needs, not that the same changes are imposed unilaterally in the name of “fairness.” Closing schools like Evansdale, which have built strong community support and special programs that are difficult to replicate, means shredding years of work and buy-in. You might not get it back.	
1165	No additional feedback.	3/5/2026 12:20 PM
1166	consider the neighborhoods, home values, time to travel on a bus to school especially given high traffic areas where these children will have to travel through to get to school	3/5/2026 12:18 PM
1167	I would begin the process with affecting schools that are not at capacity first. Seems like so much of a simpler way to deal with things. If the issue is empty seats, mess with the schools with empty seats first. Seems like a no brainer and that you are overcomplicating things.	3/5/2026 12:17 PM
1168	Smaller student ratio to teacher is scientifically proven to be better for student achievement	3/5/2026 12:14 PM
1169	Public messaging around SAP has emphasized whole-school transitions, yet discussions indicate Vanderlyn students would likely be split between neighboring schools, if closed. This is not comparable to combining two half-capacity schools and would create significant feeder disruption and transportation impact. If this proposal is driven by high school facility needs rather than elementary inefficiency, and if future enrollment shifts may relieve this pressure, closure should not be assumed as the default solution. The Dunwoody cluster cannot be evaluated using the same framework as clusters with multiple under-enrolled campuses. Before moving forward, families need cluster-specific reassignment modeling, receive school utilization projections, and a clear explanation of why expansion or shared-campus options were not prioritized.	3/5/2026 12:12 PM
1170	Would love to see a new glider middle school to Oak Grove area instead of Henderson Middle	3/5/2026 12:11 PM
1171	We love Ashford Park!	3/5/2026 12:09 PM
1172	I have not heard how the language immersion programs in the elementary schools will be addressed. For example, if a student is in an elementary school that is doing French and the new school they go to is doing Spanish. . . how will this be handled. This is a concern and needs to be addressed.	3/5/2026 12:07 PM
1173	La escuela tiene persona tan importante muy bien clasificado por si buenas prácticas son maravillosos maravillosas las y los maestros para mi es la mejor escuela qie mis hijos an estado	3/5/2026 12:05 PM
1174	Again, I would also just like to consider any demographics that may be pertinent such as income, language, or other socioeconomic factors that may play a role in getting access to schools and meaningful education. I do think that some of the proximity tools that you use might benefit from having a bit of a curve prioritizing access to those who will have the most negative impact from changes to school distribution or program relocation.	3/5/2026 12:03 PM
1175	Please do what’s best for the students, especially elementary and keep it how it is.	3/5/2026 12:03 PM
1176	As the district develops the next round of scenarios, I encourage you to consider broader community and economic impacts alongside enrollment and facility utilization metrics. Oak Grove is a high performing, in demand school that operates near capacity and continues to see growing enrollment projections. Families actively choose this community because of the strength of its public school. When a school consistently delivers strong academic outcomes and maintains high engagement, it becomes an anchor for neighborhood stability and long term enrollment sustainability. Strong neighborhood schools help attract and retain families, support stable property values, and contribute to the district’s tax base. Disrupting a school that is nearly full and academically successful could have ripple effects that extend beyond the building itself and may unintentionally accelerate enrollment decline rather than solve it. For these reasons, I strongly oppose any scenario that would close or consolidate Oak Grove Elementary and urge the district to protect schools that are high performing, in demand, and operating efficiently.	3/5/2026 12:02 PM
1177	At the end of the day - the attendance boundaries part of this is the most important - people need to know where their kids will be going. municipalities need to know what the expected traffic patterns will be. Figure out the budget first - we can support X high schools, Y middle	3/5/2026 11:59 AM

	schools, and z elementary schools. We can renovate up to X buildings. And then you figure out how to make the existing real estate fit the needs within that budget and with those attendance boundaries.	
1178	Please find ways to save money such as better Superintendent selections so that we don't have 4 fired SIs on the payroll!	3/5/2026 11:58 AM
1179	Creo se sentía precalificar las escuelas y si llegase a ganar que las escuelas queden igual, seréis solo cerras las de las bajo nivel. Pero se tenga en cuenta que al ingresar más niños a escuelas que ya se encuentran en nivel académico alto, bajará porque la atención ya no sería la misma.	3/5/2026 11:55 AM
1180	Please include pediatricians and sociologist (feedback) in your discussions regarding mass grouping of students.	3/5/2026 11:53 AM
1181	Leave schools that operate units capacity. Robert Shaw Elementary is a great school with great teachers. It’s been great for more than decade.	3/5/2026 11:51 AM
1182	Its very confusing. Huntley hills is old and needs work. There isn't enough teachers too many kids and economically needs to be more 50/50. Get rid of title 1 doesn't help. Ashford park and Montgomery schools school be all mixed in. Huntley hills gets low grades because it's isnt economically equal. People should be able to place there kids in better schools that are close to where they live. Montessori should only be prek-2. Third -5th should be traditional learning. Montessori should include traditional concepts. Kids are not set up for unnecessary at Huntley hills. ES students should be at different schools at its slows down learning for other students. Gifted program needs to be better, it is also too hard to get into the program. Needs to be re-assessed. Huntley hills is under serving there kids. They are not prepared for middle school. Need to go into huntley hills and listen to their parents	3/5/2026 11:51 AM
1183	Please do not close Oak Grove Elementary!!!	3/5/2026 11:40 AM
1184	I understand the need to close schools because of declining enrollment. BUT I have concerns in decisions the board has made with the choice of superintendent. You may say this is not relevant, but it is. . . because dollars wasted on bad decisions made by the board cost the children. The money wasted could be used to help students and keep more schools open. I realize percentage wise the board's superintendent decision may not make a difference, but little (bad) decisions add up and cost money and take funding away from the kids. I am trying to be as nice as possible as requested by the presentation. . . but this is a factor and needs to be addressed.	3/5/2026 11:30 AM
1185	None	3/5/2026 11:30 AM
1186	I like the idea of upper and lower elementary schools. Maybe this could be an option for Ashford Park, John Lewis, and Woodward?	3/5/2026 11:26 AM
1187	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove’s projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/5/2026 11:20 AM
1188	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing	3/5/2026 11:15 AM

	excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	
1189	Oak Grove Elementary is a great neighborhood school. Parental involvement is strong, the teacher and supporting staff are great. Having a smaller school with a robust program is great for the students and staff. With more students, the funding may be better but the kids get lost, the teacher can't cope and the students loose at the end. Having less time to teach affects this generation and those to follow. I hope you will consider all aspects before making a decision that will affect so many.	3/5/2026 11:13 AM
1190	The elementary schools students in Dunwoody need to be equally divided. Peachtree middle school STEM program was the only best thing in that school and that was taken away. Peachtree Middle school had many principles changes and inconsistency. Peachtree Middle School in Dunwoody needs help. Dunwoody High School is a wonderful high school.	3/5/2026 11:13 AM
1191	n-a	3/5/2026 11:09 AM
1192	Most concerned that Vanderlyn will be shut down. It's an essential part of the community and successfully teaching students (we've sent two children to KMS through vanderlyn).	3/5/2026 11:08 AM
1193	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/5/2026 10:56 AM
1195	Think about what you all are doing before you really do it. You said that these school closing is not indefinite but is coming across the table. Closing Lithonia High school altogether shouldnt	3/5/2026 10:54 AM

	even be. What we should be doing is building a new lithonia or adding on to the recent building to make it look and be well equipped as a high school. Why build a small high school and then want to change it to an middle school. That seems to have been the plan from the beginning.	
1196	I strongly support keeping Evansdale Elementary School open. My granddaughter attends Evansdale and participates in the Dual Language French program, which is a valuable opportunity for students to develop bilingual and cultural skills. I encourage the district to protect successful programs and maintain stability for students and families when considering future scenarios.	3/5/2026 10:49 AM
1197	I'm confused as to why Chesnut is being expanded since the facility is not in great shape. It's also not in a "safe" location. I would rather see that used as an office. Many meetings now are held at McNair Middle-having an alternate location would be respectful to the teachers that are closer to this area. Dunwoody Elementary has room to expand to take in some students from Kingsley, Vanderlyn, and Chesnut. These students can also be reassigned to Austin. Kingsley has as much land as Chesnut, and it seems like a great place to put one of our magnet programs. The building's rating is better than both Robert Shaw and Kittredge. If four classrooms were added to Kingsley, you could change the band of the magnet programs to include more grades.	3/5/2026 10:48 AM
1198	I think breaking up the younger grades and combining the older ones works better. Having a neighborhood elementary schools are important to these neighborhoods and having an involved community only benefits the school. In addition, the schools can be pretty important and sacred to the community. Not just parents, but business that invest time and money into these schools and their students. I think messing with that will just anger many constituents. However, loyalty/community to MS/HS isn't as strong due to more students coming from a variety of communities. Simply adding to those doesn't seem as offensive.	3/5/2026 10:39 AM
1199	While I understand the reasoning behind consolidation, my primary concern is the impact it may have on classroom capacity and learning conditions. Ensuring that schools do not become overcrowded will be critical to maintaining effective instruction and student support.	3/5/2026 10:35 AM
1200	Why spend money buying and renovating anotehr building for the people who do not work in the school house but close schools. I understand money and buildings are an issue. fix them. Fix the school house. Too many people being paid big bucks outside the school house that have forgotten how it is. People come from all over Dekalb to go to school at Midvale. If it closes more people in the area will move to private, and possible take money with them.	3/5/2026 10:31 AM
1201	I also support expansion opportunities for Dunwoody High School to help alleviate its overcrowding with better utilization of the available land around the school.	3/5/2026 10:31 AM
1202	Please strongly take into consideration our voices that night at the meeting at Cedar Grove High, bring back programs and advance learning opportunities and programs back in our schools to increase enrollment, try to balance funding with each area less funding in the north DeKalb area and more funding in the south DeKalb area. Use outside resources for funding and monies. Church and school work well in our communities. Communicate with south DeKalb commissioners and congressmen on bringing money back into our school systems. We have funds to keep building in the south DeKalb area as far as homes, apartments, and businesses, we can be putting that back in our schools	3/5/2026 10:27 AM
1203	The upper management needs to do or hire people that are cost efficiency oriented.	3/5/2026 10:24 AM
1204	A intense study need to be completed on the negative effect school clustering will have on students.	3/5/2026 10:21 AM
1205	In general I am against the concept of huge schools having little kids in the same building with big kids. Contacts are inevitable, unless the space itself is re-imagined, going from one big building to small separate building and separate playground for the little ones. In fact, in my opinion, even the elementary school current set up should be split up more, rather than consolidated. I would like to see Prek-2nd and 3rd-5th being separated.	3/5/2026 10:20 AM
1206	Evansdale Elementary should not be closed. Here is why: 1) Evansdale’s lot size is large enough for considerable expansion - it includes two parking lots and street parking. 2) DLI French program: this program draws people to our community. It continues into Henderson MS. Lakeside HS has created a path for immersion students to continue at a rigorous level. Separating Evansdale from the cluster threatens that carefully considered continuity. 3) If declining enrollment is a concern, the consolidation approach will further exacerbate it. People move to this part of the county specially for a walkable school/small community experience -	3/5/2026 10:20 AM

	they pay a premium for it. Closing neighborhood schools risks county flight and blight. Equity should mean that each part of the county gets what it needs, not that the same changes are imposed unilaterally in the name of “fairness.” Closing schools like Evansdale, which have built strong community support and special programs that are difficult to replicate, means shredding years of work and buy-in. You might not get it back.	
1207	I know you're wanting to release recommendations for programs/boundaries later, but please consider releasing full recommendations/scenarios for consideration. I support closing the Ashford Park building. Don't let loud feedback stop you from making the best long term decision for the district.	3/5/2026 10:18 AM
1208	Improving outdoor recess and tutors for children.	3/5/2026 10:11 AM
1209	none	3/5/2026 10:06 AM
1210	For context, my wife and I are DCSD graduates, as is one grandparent. We are familiar with all the good & bad.	3/5/2026 10:05 AM
1211	I appreciate the request for feedback - but please make it easier to understand what the county is proposing.	3/5/2026 9:59 AM
1212	This is super embarrassing for our district. This should stop. It’s all nonsense. You’re trying to make something work rather than admit you all messed up. Small schools matter, your current plan will negatively impact children. I don’t care about buildings. I care about my kids and the community. Your plan also does the opposite of what you state, it will not save money, it will cost us much more money than we stand to save. Start gradually and go from there.	3/5/2026 9:59 AM
1213	It's a good and complete school	3/5/2026 9:53 AM
1214	Thank you for undertaking a process to better utilize the available resources. It’s not an easy thing to do. I imagine each proposed closure will generate negative feedback. And it might be easy to categorize such responses as a “NIMBY”-like reaction and not clearly hear what is being said. Oak Grove Elementary really is an integral part of the community I live in, and has been for many years. One of the reasons we moved here—in 1987!—was Oak Grove Elementary, and new neighbors have moved here for the same reasons—OG Elementary and Lakeside High. As I understand it, OG Elementary is one of the district’s best performing elementary schools. To me, given the goal of fostering better opportunities and performance by all DeKalb students, closing a high performing elementary school is counterproductive (not to mention the impact on its community). Rather, I would think the question would be: what lessons can we learn from OG Elementary and how can we use them in other elementary schools. Thank you again for doing this evaluation.	3/5/2026 9:53 AM
1215	Certain unused elementary schools would make great community rec centers or green space!	3/5/2026 9:52 AM
1216	As a parent with children in both elementary and high school, stability in school assignments is very important. Frequent changes to grade bands or school assignments can be disruptive for families and students. I encourage the district to prioritize neighborhood schools, minimize rezoning when possible, and maintain clear feeder patterns so students can move through elementary, middle, and high school with their peers.	3/5/2026 9:50 AM
1217	Dunwoody High School is severely overcrowded but is not mentioned in the plan for a resolution. Vanderlyn is listed as a potential closure. If this is to alleviate the overcrowding at DHS, this needs to be clearly stated and how do you see that happening? If you are not using the Vanderlyn property to expand DHS then there is no viable reason to close that school. It has high scores and is not far from capacity. While it is an older building it has been well maintained and with some investment can be brought up to current standards. Vanderlyn sits on a large plot of land and with creative thinking, can help alleviate some of the high school's issues. The plan for District 1 (the Dunwoody cluster) has a lot of holes that need to be addressed. I don't believe that the plan as presented can work without moving school borders and that has not been mentioned. It states that schools closing will be moved as a whole to another school but the Dunwoody schools don't have enough open seats for that to be possible. What will the new school borders look like? This needs to be presented before a decision on closures is made.	3/5/2026 9:49 AM
1218	Leave the schools as they are now	3/5/2026 9:47 AM
1219	Chamblee cluster schools are doing well and have been growing consistently over the past decade. Making a change like closing Ashford Park Elementary would likely cause many	3/5/2026 9:42 AM

	parents to move to private schools - please don't disrupt a good thing here.	
1220	Keep our community in the loop.	3/5/2026 9:41 AM
1221	Don’t close the schools	3/5/2026 9:35 AM
1222	I think it’s really important for all families to understand how students will be reassigned, especially if their ES is closing. I’m open to change if it is strategic but also want my kids to remain in the lakeside cluster.	3/5/2026 9:32 AM
1223	These are our neighborhood schools, and we need to support the activities in the area of our neighborhood!	3/5/2026 9:31 AM
1224	Research shows that small class size is one of the most important factors in successful education--over crowded schools make this very difficult. Neighborhood schools with good reputations are good for the neighborhoods and hopefully fewer families will choose private schools.	3/5/2026 9:31 AM
1225	There are a few schools under 60% which are logical choices for closure - but you've mentioned LOTS of schools which are over 90% for closure, that would be foolish.	3/5/2026 9:30 AM
1226	Stakeholders need to see how much money is saved if you want to sell this.	3/5/2026 9:28 AM
1227	N/A	3/5/2026 9:24 AM
1228	Stoneview is a community school which has a lot of support and a high enrollment! This school is much needed in this community and closing it will only hurt this community and others around it!	3/5/2026 9:20 AM
1229	This whole process has lacked transparency and adequate communication. It seems disingenuous. It was begun under a corrupt superintendent and has no credibility or legitimacy at this point.	3/5/2026 9:17 AM
1230	I feel that this entire SAP process should be tabled at this time. This is from the ideas of a person who has been indicted on fraud. We need to separate ourselves from his ideas and vision. I also do not know one parent, community member or teacher that agrees with these plans. We are the stakeholders and we still live in a democracy not a dictatorship. Also this news has been extremely disruptive to our communities and schools. We need to focus on what is best for our children from an academic and developmental stand point. We also feel that stop trying to cut corners and renovate our facilities instead of closing them down and just building new facilities.	3/5/2026 9:16 AM
1231	I know that ultimately this comes down to numbers, but I am really concerned that the emphasis in all the discussions thus far has been about optimizing the number of bodies in seats, rather than a real qualitative consideration of what is developmentally most appropriate based on research in education. I want to know what we can learn from other districts comprising of similar demographics to us who have adopted these different scenarios - which ones have children who have most thrived academically and socio-emotionally? If we could point to another district in the country and say, "see, they have similar racial and ethnic makeup to us, they have similar socioeconomic status to us, and they implemented this system and they are thriving" then I would be more convinced that we could change for the better. However, the current analysis emphasizes butts in seats and financial benefits to the district, and the proposed benefits to our children are simply theoretical speculation.	3/5/2026 9:15 AM
1232	Those who will lose jobs or misplaced must be considered carefully.	3/5/2026 9:11 AM
1233	I do not think that Lithonia High school should close	3/5/2026 9:08 AM
1234	I’m very appalled that this is even moving forward when the idea stemmed from a superintendent who was fired for embezzlement. How can we actually follow this persons ideas when we 1. Don’t have a superintendent 2. Only had one who was corrupt? This seems negligent on so many levels. We do not want to see the AP community get broken up or dismantled. This is a strong performing community with a strong middle and high school. So many of us moved here for THESE SCHOOLS. We want to see our children thrive at these schools and not see our school performance go down. I think the he’s consultant said “all schools are high performing schools” and that is simply not the case in Dekalb. The AP community is so special. We want to keep it that way. We want to see our children succeed! Please think of our strong community and how this has an impact on everyone in it. We want	3/5/2026 9:05 AM

	to see the AP elem kids stay in the chamblee cluster with Chamblee high. We will fight for our children.	
1235	See above.	3/5/2026 9:03 AM
1236	None	3/5/2026 8:52 AM
1237	As a parent, you try to make the best choices for your children. Our home school is Dunwoody Elementary School, but through school choice, we chose Vanderlyn because there is something special there that can't be replicated in a big school. We toured several schools and the sizing of Vanderlyn creates a family dynamic, which has been proven in the education Vanderlyn kids are receiving. Speak to the families and listen to the community. Vanderlyn is one of Dekalb's top elementary schools. Don't make a short sighted decision based on money.	3/5/2026 8:52 AM
1238	Shutting down Oak Grove would be a terrible mistake and reflect the corruptness and ineptitude of the DeKalb County educational management.	3/5/2026 8:49 AM
1239	Traffic and chaos will be the results	3/5/2026 8:47 AM
1240	When we have done redistricting in the past, the squeaky wheel gets the cheese. These Vanderlyn and Austin parents always get their way at the expense of the rest of the cluster. You guys need to have some cajones and stop placating them. Vanderlyn has to go and it should have happened a long time ago but you guys can't stand your ground. Pick Kinglsey or Chesnut but they need to be combined. Probably pick Chesnut because I think some of the Kingsley population will get redirected to Doraville. Also Chesnut land is slightly bigger and having a middle school campus next door probably makes some things more convenient. However Chesnut/Peachtree Middle have (in the past) not had much of a working relationship together. It would be nice to fix that.	3/5/2026 8:45 AM
1241	Closing the Kittridge program, which has been repeatedly regarded as the best elementary program in the entire state, for financial reasons would be an incredibly bad decision. One that would definitely be remembered at the ballot box.	3/5/2026 8:34 AM
1242	For what it's worth, I grew up in a place where 6th grade was part of elementary school, and 9th was part of middle school. It gave kids a little more time to grow. But those were different times....	3/5/2026 8:32 AM
1243	Large schools will impact attendance, increase tardies, bullying and other behavioral issues	3/5/2026 8:29 AM
1244	Please further evaluate grade bands to lessen disruption of existing school boundary communities, especially 6-12. I also encourage fiscal discipline to be considered more to minimize facility construction or improvements if band changes could use existing facilities. Lastly, consider traffic pattern impacts further as housing efforts are looking to increase housing density (number of houses per square mile - think rowed townhomes where 1 house used to be), which can impact future enrollment numbers and parent/community engagement.	3/5/2026 8:24 AM
1245	In my neighborhood (Oak Grove), there's a lot of opposition to this plan because the parents are so attached to the school, as am I. We transferred our son to Kittredge in 4th grade and I immediately saw the benefits of a larger school. I also think that community members get too focused on their own student/school/cluster and forget about what's best for the county and the students who do not live near them.	3/5/2026 8:24 AM
1246	Cut the administrative staff at the county level not at the schools , waste of $$,focus on low enrollment schools with low scores . You must start small on this to see what the impact is	3/5/2026 8:23 AM
1247	Keep Rock Chapel open.	3/5/2026 8:22 AM
1248	N/A	3/5/2026 8:20 AM
1249	There has been extremely poor communication this round. Meetings have been scheduled, meetings have been canceled, and there is no concrete way that parents are understanding what's happening. The school board needs to step back and reassess how they are looking to communicate with parents in the future to facilitate trust and coordination with all those involved.	3/5/2026 8:15 AM
1250	None	3/5/2026 8:11 AM
1251	I believe the smaller schools are far better off for the development of children, their sense of security and feeling their importance.	3/5/2026 8:09 AM

1252	The Vanderlyn/Dunwoody community has raised concerns beyond seat capacity. Two that seem especially important to note are: 1) dismantling a higher performing school that has proven its effectiveness in learning achievements and 2) the impact on traffic with the redistribution of students to Chestnut Elementary.	3/5/2026 8:09 AM
1253	I just hope female keeping the way it is.	3/5/2026 8:05 AM
1254	You should compare the utility of burning a barrel of cash compared to rehabbing a 100 year old Highschool. At least the barrel of cash gives off heat.	3/5/2026 8:03 AM
1255	pk-8 is better than join with 9-12 . bcs. 6 graders are too smaller with high schoolers	3/5/2026 7:59 AM
1256	We will be very upset if Robert Shaw closes.	3/5/2026 7:55 AM
1257	Closing Oak Grove would snarl traffic in our area even more than it is. Parents are able to and do walk their children to school which helps a lot.	3/5/2026 7:53 AM
1258	My children used to go to Hawthorne. That building was in terrible shape! How in the world did you come up with a 90.6% facility score for Hawthorne? Evansdale's facility is in MUCH better shape. It is also a much better staff than Hawthorne. We also have more room to expand than Livsey. Our lower field could be utilized for upper grades and the existing building for lower grades.	3/5/2026 7:45 AM
1259	I have three children in elementary, middle and high school. My biggest priority is seeing my children complete their schooling in the Chamblee cluster. We are extremely happy with our current schools and our children are thriving. I agree that Ashford Park needs major upgrades/to be torn down, but I do think it’s irresponsible to approve a major renovation that has already started and then just stop it and wait for the next steps which could take years.	3/5/2026 7:34 AM
1260	Middle school students cannot be with high school students it is irresponsible and dangerous. It also put the faculty and staff in challenging situations.	3/5/2026 7:33 AM
1261	Na	3/5/2026 7:28 AM
1262	I don’t understand why we can’t expand PreK3 access for all if we have so many open seats. The waiting list is hundreds of students long. I also think any positioning to increase federal funding at this time is an insane move. I think that any positioning to increase the local resources from property tax will backfire and leave us with enormous underfunded schools in the long run.	3/5/2026 7:27 AM
1263	DeKalb County’s population has continued to grow over the past decade, increasing by more than 80,000 residents since 2010. While student enrollment may fluctuate in the short term, long-term planning should consider that the county and the broader Atlanta area continue to grow. Many of the new residents moving into the county may eventually have children who will attend our schools. Because of this, schools should remain a priority and plans should remain flexible to adjust as population patterns change. Closing schools should not be considered, as reducing capacity now may create challenges in the future and could push families to move to other counties perceived to have stronger school systems.	3/5/2026 7:15 AM
1264	I understand why this needs to happen and the cost saving with the decline in enrollment. My hope is it happens gradually starting with older high school kids. The elementary kids have formed their relationship and learning the basic fundamentals to life/learning/friendship. I believe it will disrupt their learning/trust and they will have to start over. Such as in kindergarten. Most of the elementary kids have been in the same school since 4 years old and that's all they know. They're already nervous about middle school. I just believe elementary schools should be off the table. Start with Middle/High School kids are more adaptable by this age.	3/5/2026 7:11 AM
1265	Na	3/5/2026 7:02 AM
1266	It’s hard not to understand the full scope of plans if you don’t release the school closures or possible outcomes. Just giving us the closures and not plans in total is dishonest and intentionally misleading. We will be fighting back on this as parents and community members. Do better.	3/5/2026 6:52 AM
1267	Closing oak Grove Elementary will have a negative impact on the community and the county. It is the best elementary school in the 30345 zip code and has the best reputation. We moved into the area for that school, coming from another county. You will see much less movement to Dekalb County if you close it.	3/5/2026 6:40 AM

1268	Please keep clusters intact. Dunwoody students should be in Dunwoody schools for elementary, middle and High school. Please do not split neighborhoods.	3/5/2026 6:21 AM
1269	Consider Pk-7th grade. 8th to 12th grade.	3/5/2026 6:19 AM
1270	Please don’t close the south in schools, make is fair across dekalb county.	3/5/2026 6:19 AM
1271	Esta escuela es muy buena	3/5/2026 6:02 AM
1272	Promote excellence. Replicate successful programs instead of shutting them down.	3/5/2026 5:49 AM
1273	Larger schools are not the way to go. Also, there are communities in DeKalb that are growing over time in enrollment. North Decatur is currently seeing young families move in as baby boomers downsize. My neighborhood was one just four years ago that never saw a stroller on the street and now families with babies and toddlers are the norm. I have been an educator all my life in both public and private schools. Figure out a way to keep schools small and protect communities. Offer exemplary core education with a focus on reading and math and our children will thrive.	3/5/2026 5:27 AM
1274	My concern would be the urban blight of a community where a school would be closed. There must be a plan to re- utilize an empty school for public use or purpose (health center, senior center / headstart) or the building would need to be demolished to prevent vandalism and vagrancy.	3/5/2026 5:20 AM
1275	Evansville Elementary should not close: It has full classrooms and many families benefit from having it near their homes and apartments.	3/5/2026 5:17 AM
1276	No comment	3/5/2026 4:39 AM
1277	DCSS is paying a fortune for a company to close schools. Such monies could be used to upgrade the neighborhoods schools.	3/5/2026 4:08 AM
1278	the schools don’t need more students they need better teachers and more funding to have special programs and more educational opportunities.	3/5/2026 2:22 AM
1279	Please don’t allow this to change. Children need to be in a learning environment they can thrive in being with kids that has such a different age gap will only add more stress to the teachers and the kids themselves. This is unacceptable	3/5/2026 1:57 AM
1280	Ultimately, many families (including my own) no longer trust the current direction or leadership of the DeKalb County School District. The board appears focused on facilities and financial efficiencies while failing to address the academic and programmatic issues that actually matter to families—such as protecting and expanding successful specialized programs like French Immersion and STEM. Additionally, the district continues to double down on policies that undermine learning, including issuing computers to very young students instead of prioritizing foundational skills developed through reading, writing, and hands-on instruction. Parents are increasingly concerned that students are losing basic academic abilities, attention, and memory because learning has been replaced with excessive screen use. This is part of a broader and deeply troubling trend: many educators and researchers now warn that we may be raising the first generation of children less academically prepared than their parents. Until the district demonstrates integrity, accountability, and a genuine commitment to students’ long-term success rather than short-term financial calculations, it will be difficult for families to believe these proposals are truly in the best interests of our children.	3/5/2026 12:36 AM
1281	It is extremely difficult to answer questions strictly about a physical space without having an understanding of the community within that building. The district should spend more time within these community hubs prior to making a decision based solely on the physical building. The district should make an effort to visit these schools and see for themselves the excitement and activity within the classrooms. The district should also spend time and resources identifying ways to bring families back into the schools rather than making decisions based on the argument that enrollment is down bc families are having fewer kids. The reality is that even in the highest performing schools parents are still choosing to send their kids to private school or go through the school choice process.	3/5/2026 12:32 AM
1282	I also support an expansion for Dunwoody High School. With availability of the Vanderlyn Elementary School space due to over crowding of Dunwoody High School.	3/5/2026 12:09 AM
1283	Please consider a phased approach. I don’t think we need to identify 27 schools to close even if they aren’t closing at once. Start with x number per cluster or area- execute that plan and	3/4/2026 11:55 PM

	assess if there are opportunities to further optimize. The current plan creates destabilization in an already unstable system.	
1284	The facilities at Ashford park can be revamped, increased to accommodate the growing student number. If the county keeps threatening closure every few years, why will the parents feel comfortable or secure in sending the kids to the school. And then the county will give excuse as decreasing student numbers. Atleast do research on each individual school you are planning to close. It's not a raffle draw, whatever comes in mind just lets close. Some of the schools on the list are rated best schools in Georgia. Already out of all counties in Georgia, DeKalb has only 3-4 on the list out of that y'all want to close 3 of them. What's wrong with DCSD, do you guys even take a neighborhood vote? If taken a vote, Ashford park, Oak Grove, Vanderlyn will never want their schools closed. So how can you guys just blatantly decide to harm the community.	3/4/2026 11:49 PM
1285	I bought my house and continue to live here because Brockett Elementary is special. The minute you close that school, I will move and give my tax dollars to another county. How dare you!	3/4/2026 11:25 PM
1286	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/4/2026 11:07 PM
1287	I'm gonna say no for right now because my comments are not good comments because the district have failed to implement my daughter IP for a total of 2 1/2 years probably longer than that.	3/4/2026 11:04 PM
1288	Scenario 1's proposal to close 27 elementary schools significantly deviates from the previously established range of 4–16. Oak Grove Elementary is a primary example of why this expansion is problematic: it already exceeds the district's 88% utilization target, boasts four years of consistent growth, and maintains top-tier academic rankings. Closing high-performing, high-utilization schools merely redistributes students to neighbors like Sagamore Hills and Briarlake, necessitating costly new capital expansions rather than reducing overall excess capacity. To effectively bridge the utilization gap, the district should prioritize consolidating schools operating below 70% capacity. This ensures fiscal efficiency without compromising growth corridors. Before moving forward, we request clarification on the following: Did enrollment projections account for the 2024–2026 residential and employment pipelines? Were pandemic-era data points weighted in a way that obscures post-2023 recovery trends? What are the 2028 and 2030 projected utilization rates for Oak Grove? What is the cost-benefit analysis of maintaining Oak Grove versus expanding surrounding campuses? A phased, data-driven strategy will better ensure that long-term capacity aligns with community investment.	3/4/2026 11:04 PM
1289	I think keeping the cluster grade bands keeps what's familial and allows students some opportunity to transition (without a major gap with 6 graders being with 12 graders or eight graders jumping into a high school as their first transition. This also helps middle school from being greatly affected by curricular or students resources spreading too thin.	3/4/2026 10:45 PM
1290	Maintaining stable learning environments for students should remain a top priority. While operational efficiency is important, decisions about facilities and grade structures ultimately impact students' educational experiences, social development, and sense of belonging within their school communities.	3/4/2026 10:44 PM
1291	I think part of the info said a certain kind of school needed to be 900 students to be cost effective. Is that true for all bands or just some?	3/4/2026 10:43 PM

1292	Do not make Dunwoody students go to doraville schools. It will hurt both the ESOL and English speaking students.	3/4/2026 10:38 PM
1293	We love Robert Shaw theme school. I have two sons one in 5th and one in 3rd . I heard about Robert Shaw years ago before I had kids .. it is well known in the Clarkston community and means a lot to mine and many other families	3/4/2026 10:31 PM
1294	I....we....really hope you actually listen to what we're saying for your round 2 scenario development. Tracy, consultant, who spoke at the 2/26 meeting at Cross Keys was great. He answered a lot of great questions. He said a number of times "we don't want to pull communities apart." So don't. Don't mess up this amazing cluster of schools that people SEEK OUT. Don't make people LEAVE this AREA/CLUSTER because of the changes you make. Make the changes BETTER our area. Make people continue to want to MOVE to Ashford Park bc of the amazing PUBLIC schools they offer.	3/4/2026 10:21 PM
1295	The administration of DeKalb County Schools is disgusting.	3/4/2026 10:20 PM
1296	Closing Oak Grove would redistribute students without meaningfully solving underutilization, while potentially eliminating capacity needed to support major community growth. A phased, data-driven approach focused first on significantly underutilized schools would better align with fiscal responsibility and long-term planning. What are the comparative capital costs of: maintaining/expanding Oak Grove, and expanding Sagamore Hills and/or Briarlake?	3/4/2026 10:14 PM
1297	I believe the cluster should be K-8 / 9-12. Leave the young children with their adolescent peers and the young adults within each other By putting middle school children with high school is a high risk. Middle school is just transitioning from children to young adults and I just believe it’s to much for their brain to adjust to	3/4/2026 10:10 PM
1298	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove’s projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/4/2026 10:10 PM
1299	Don't take community out of public schools	3/4/2026 10:08 PM
1300	As a parent in the Robertshaw Elementary School cluster within the DeKalb County School District, I encourage the district to prioritize stability, equity, and transparency as you develop the next round of scenarios. Please consider minimizing the number of school transitions students must make, especially in elementary grades. Stability is critical for academic success and emotional well-being. I also recommend providing clear data to families, including enrollment projections, building capacity, transportation impact, and how staffing and class sizes would be affected. Seeing side-by-side comparisons of each option would help families better understand the long-term impact. Finally, I urge the district to continue engaging parents and staff before final decisions are made. Our community values being part of the solution, and meaningful input will strengthen trust in the process.	3/4/2026 10:08 PM
1301	Add scenarios that involve reallocating central office staff to schools. What about the former schools that are being used for office space? What's happening with the Northlake office complex and how much has been spent on an empty building?	3/4/2026 10:04 PM
1302	We’d all like an idea of when closures would start. Some of these schools are already close to capacity. I think my son’s whole grade has about 64 kids and they’re a small grade compared to some of the others. So that’s 30 kids divided between Austin and DES for ONE GRADE. Then they’ll both be OVER capacity. It’s already hard enough for one teacher to manage 20 students and give them all attention.	3/4/2026 9:59 PM

1303	Don’t close the top performers like Oak Grove and Kingsley. You’re only asking for families to leave the district and cause more distrust. If there are truly schools in South Dekalb that are underpopulated, consolidate those, but don’t close schools in North Dekalb where we are already overcrowded. Make sure we don’t end up with portables in our end state. For that matter, figure out how to relieve overcrowding at Lakeside. Portables were put on top of tennis courts years ago. We have limited parking because the school wasn’t built for its current size. Help fix those issues instead of closing top performing schools.	3/4/2026 9:50 PM
1304	Dear DCSD Reps, Evansdale Elementary has been a shining star in my life this year. After years of anticipation, my child started Kindergarten there this year. Every time I enter the school, I feel the pulsing heart of our community. I know you can't place numbers on the value of community, so I do have feedback that is specific and targeted as requested, but I also want you to understand how much more than a dot on a map our school is for my community. The diversity, the cultural exchange at school events, the incubator environment that provides elementary age students a place to feel safe while preparing for success in middle and high school. I do feel like there was a missing piece of community engagement earlier in this process, but as it is, here is my feedback on the initial scenario presented: 1. Evansdale Elementary is above the threshold for attendance set by the district. In fact, enrollment is projected to increase by 2030. 2. Evansdale Elementary School sits on a large lot (10+ acres) and is an excellent option for renovation and expansion as it does not sit on a busy street. 3. Redirecting current Evansdale families to the proposed expansion schools (Livsey, Hawthorne) greatly impacts traffic in areas that are already gridlocked during school drop-off and commute times. In fact, Tucker recently reduced lanes on the primary route to Livsey Elementary to reduce traffic volume, but the now two-lane road is at a standstill from the time school is out through early evening. There will be more than the school communities impacted by this shift. 4. The French DLI program continues to grow and has taken root in our community. The French teachers have been stellar and we need Evansdale to remain in the French pathway in the Lakeside cluster. What a unique experience Dekalb offers for students here, so much work has gone into setting it up for success and sustainability. 5. Our school has been passed over several times for capital improvements, yet this is now being counted against us. We have a strong support system at the school who are passionate about finding funds and will be happy to work with Dekalb to find partners in funding for any needed improvements. This community of parents and supporters just want to be heard. We share a passion for the success of children and the ways that schools create an identity for a community. We want face time with decision-makers and not to worry that our concerns being painstakingly entered into this survey are just entering the void. Will anyone read this? Please consider real engagement with our communities before moving forward. I thank you for your time and consideration.	3/4/2026 9:45 PM
1305	See response to question 4	3/4/2026 9:39 PM
1306	Keep schools open	3/4/2026 9:38 PM
1307	I do not trust HMP since they were hired by Horton and do not have good record in other districts. There is a lack of transparency about conflicts of interests. Even the SAP process has been misleading. The community meetings did not have any language stating that only the February meetings were for Phase 1. I was planning on attending the meeting at Kakeside in March to discuss/learn about Phase 1. We realized too late. This gives the Lakeside area a disadvantage since most of us were waiting for the Lakeside meeting. These are big decisions, why the rush and lack of clear timeline?	3/4/2026 9:26 PM
1308	If it can help save costs I will agree of the closing of the schools	3/4/2026 9:20 PM
1309	Please, let’s not reinvent the wheel. Can we see the data from school districts across the country that have grade bands that work having PK-8, 9-12 and what are the demographics of those schools with over 92,000 students? How do some school districts determine that their grade bands should be PK-3, 4-8, 9-12? Can we do what works? I think the elementary model for Specialists having to teach 6 grade levels is not sustainable. Cutting back to 4 grade levels in each band would be manageable but it depends how scheduling would be handled as well student population.	3/4/2026 9:18 PM
1310	Nothing more	3/4/2026 9:16 PM
1311	Clustering 11-13 year olds with 14-18 year olds (in the 6-12 buckets) seems borderline inappropriate with how differently developed children are at those ages (maturity, growth, mental, etc)	3/4/2026 9:16 PM
1312	Museum School & DSA have a proven good model.	3/4/2026 9:14 PM

1313	Keep things open for community discussion, keep things democratic, prioritize pedagogy	3/4/2026 9:14 PM
1314	Please keep class sizes small	3/4/2026 9:12 PM
1315	Your area 1 schools are a unique problem. This area is experiencing rapid growth and economic growth as well. You do not need to close schools in area 1 but instead you need to look at how best to realign schools, redraw lines and keep these building open to serve their growing populations. Even on small acreage such as Ashford Park, a new building could be constructed (build vertically). If a new building for APS cannot be done, keep our community - families and staff - intact. Move the community to John Lewis and rezone John Lewis to Chamblee. The county needs to try to acquire additional land around CHS in order to increase capacity there. They also need to look again at building at the property on North Druid Hills Road. Relocate or close Kittredge and use the land for a new Brookhaven High School. Cross Keys could be a middle school. But do not waste taxpayer money by pouring millions of dollars into a property that you will just close in a couple of years. Do not renovate a property without a long term plan for its use. It is wasteful and short sighted. Keep staff and students together at Ashford Park!	3/4/2026 9:12 PM
1316	Are student addresses being considered in consolidation plans? Are you able to see where students are located and choose consolidation that optimizes physical access and local / neighborhood integrity? When choosing the facility that will host consolidated schools, this should be the facility in better condition, or this should be an opportunity to update outdated facilities.	3/4/2026 9:10 PM
1317	It appears that ESOL funds are managed at the district level while for example Title 1 funds are managed at the school level. Once ESOL students are more evenly distributed across the schools, how will DCSD empower individual schools to fairly meet the needs, understand those needs, and afford to support their ESOL population?	3/4/2026 9:04 PM
1318	you all should look at performance outcomes (milestones) in addition to crowding.	3/4/2026 9:03 PM
1319	I support a commitment to repair and expand current schools that are over capacity and functioning well. Transparent public reporting of the data and models used to justify closures/redistricting. A phased plan that prioritizes facility upgrades, program enhancements, and targeted supports for struggling schools without closing high-demand campuses. Genuine collaboration with affected families, educators, and staff before any boundary or closure decisions. I urge the DeKalb County Board of Education and SAP leadership to revise the proposal to reflect community strengths, improve all schools, and preserve public confidence. Arbitrarily closing neighborhood schools as a first option it undermines the very outcomes you seek to achieve.	3/4/2026 9:03 PM
1320	The highest rate of students leaving Vanderlyn per year in the last 10 years was during COVID. Vanderlyn families can afford to place there child in private school. Dekalb needs to factor in the ability of Vanderlyn parents to do what's best for there children. We will be leaving for private school if Vanderlyn closes as well as many other families. How will that help Dekalbs numbers?	3/4/2026 8:53 PM
1321	Don’t close them!	3/4/2026 8:43 PM
1322	Es muy i pórtate qe siempre este abierta la es cuela por los niños para qe estudiar mejor	3/4/2026 8:42 PM
1323	I would ask that we keep students in mind as we make decisions in their best interest	3/4/2026 8:41 PM
1324	I do not want Ashford Park to be closed. I would prefer the school be renovated. I very much enjoy the community of Ashford Park and the small neighborhood setting it’s in. I grew up in DeKalb and have much always preferred the smaller elementary school building than large ones in other counties. I want Ashford Park to remain open.	3/4/2026 8:41 PM
1325	In some communities, enrollment decreases as students approach middle school. Parents do not feel their children aged 10-11 years old are ready to move to a middle school with students aged 13-14-15 years old. As a result, they leave DCSD during grades 4-5 for private options. If 6th grade were located in the elementary building, many of these parents would not leave at all.	3/4/2026 8:38 PM
1326	thank you	3/4/2026 8:35 PM
1327	Do not destroy Dunwoody schools more than you already have.	3/4/2026 8:34 PM
1328	I really don’t like the idea of 6-12	3/4/2026 8:33 PM

1329	I would appreciate clarity on why there would be money for an expansion of Chestnut, which is already full, rather than fixing the older buildings like Kingsley. I can see the logic behind closing one elementary in the area if there are too many empty seats, but why close two if that means one has to be expanded anyway? I watched the video about why empty seats is a problem but I felt like a lot of what was said doesn't apply to elementary schools. At Kingsley, we have many students who are English learners, I think what they benefit from most is small class sizes, not from "AP Classes" or "extracurriculars". The video mentioned not being able to have an AP Biology teacher, which would be a high school problem. I actually teach AP biology at Dunwoody High School. I don't have enough kids for that to be the only subject I teach, so I also teach the regular biology classes. So I don't understand this argument from the perspective of AP classes. Many of our AP teachers are in a similar situation, and they just teach another class as well. Why not just close Vanderlyn and allow Dunwoody High School to use that space? As a teacher at Dunwoody High School, the SAP does not make clear to me a plan to address the situation with Dunwoody High School classroom space either. We have a large number of portables that are in very bad shape and poorly maintained. We are far over the capacity of the building that we have. There are multiple places in the building where the ceiling leaks and is crumbling away every time it rains. The custodians have to put trashcans in the hall to catch the water. Students step on the crumbling pieces of the ceiling and track it up and down the stairs. In the faculty restroom there is a trashcan permanently under a sink to catch water that drips down. As I mentioned about the HVAC at Kingsley, these are reasons why parents choose to send their students to private schools and enrollment declines. There is less pride in the school when it looks this way.	3/4/2026 8:33 PM
1330	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4-16. Oak Grove: Already exceeds the 88% utilization target(89% current, 96 % projected). Has four consecutive years of enrollment growth. Ranks in the top tier academically. Would require significant capacity adjustments at Sagamore Hills & Briarlake. Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the object is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, wher consolidation meaningful improves efficiency without triggering new capital expansion.	3/4/2026 8:29 PM
1331	What is best for the students is to have a full school so that the staff can run the school appropriately not with school that is fund but with students that are not enjoying the funds because it is be held back for more students to show	3/4/2026 8:28 PM
1332	I would like more data around performance and larger schools, specifically in an area with similar demographics to Dekalb	3/4/2026 8:28 PM
1333	I do not want to see changes to the school choice program, which currently provides some of the best schools in all of Georgia. These schools and students should not be penalized for the mismanagement that has occurred up until now in south Dekalb County	3/4/2026 8:26 PM
1334	This will be a mistake to change one of the greatest things about the DeKalb County School System- the neighborhood schools. Having neighborhood schools allows neighbors to come together as a community. Walking to school or having a very short drive verses adding extra commute time to and from school is a huge consideration. I don't want my kids spending extra time in traffic when they could be learning or being with family or playing. Closing neighborhood schools will lead to an exodus of young families and accelerate the declining enrollment.	3/4/2026 8:26 PM
1335	Until a school is closed it should receive financial funds for building improvements to keep the building safe/ functional until it is fully offline.	3/4/2026 8:22 PM
1336	For the next round of scenarios, I would encourage thoughtful consideration of how changes will specifically impact younger students—academically, socially, and emotionally. Clear plans around grade-level structure, supervision, student supports, and maintaining age-appropriate environments would be helpful to see outlined in more detail. It would also be beneficial to understand how increased enrollment will be supported beyond facilities, such as counseling resources, teacher-to-student ratios, leadership capacity, and school culture preservation. Many families chose their schools for specific pathways or learning environments, so maintaining those strengths should remain a priority in any new scenario. Transparency around how decisions are made, what metrics are being prioritized, and how student outcomes will be measured would also help families feel more confident and informed moving forward.	3/4/2026 8:14 PM
1337	Please do not destroy the best thing about DeKalb County schools.	3/4/2026 8:12 PM
1338	none	3/4/2026 8:11 PM

1339	I think with the current state of society, 6th grade should never be in a school with upper grades.	3/4/2026 8:08 PM
1340	Do not proceed with this plan. There has not been enough communication with the community to understand their thoughts and feelings. And it appears the in-person meeting at Hawthorne elementary on 3/23 has been cancelled and made virtual to all. You don't have community buy-in, so should not use our tax dollars to proceed until you do.	3/4/2026 8:04 PM
1341	Kingsley teachers or some of the strongest teachers in the area. That wasn't done in separate buildings. It was done together. Looking at data, we have a lot of adversity we face with language barriers, and other obstacles. If you look at the growth, though, that's where we shine. And we do it together.	3/4/2026 8:01 PM
1342	I'm not sure what this survey was for.	3/4/2026 7:59 PM
1343	Do not increase the attendance at Montgomery Elementary - morning traffic on that road (Ashford Dunwoody) is horrendous.	3/4/2026 7:58 PM
1344	Senario 1 proposes 27 elementary closures,exceeding the previously referenced range of 4-16. Oak Grove: already exceeds the 88% utilization target(89% current, 96% projected). Has four consecutive years of enrollment growth. Ranks in the top teir academically. Would require significant capacity adjustment at SagamoreHills and Briarcliff. Closing schools already near or above utilization targets redistribution students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, whee consolidation meanigfully improves efficiency without triggering new capital expansion.	3/4/2026 7:55 PM
1345	I hear concerns from other parents moving to larger elementary schools. Focusing the next round on the additional resources consolidating buildings would provide would help. For example, I hear Fernbank ES has an affordable summer program that lasts all day (similar to school after care). That would be a great benefit. Or more free afterschool activities or special classes at the schools.	3/4/2026 7:49 PM
1346	Class sizes and teacher-student ratios should be addressed.	3/4/2026 7:48 PM
1347	you can just copy paste this: I support the Scenario 1 proposed plans as they relate to CES and the elementary schools in the Dunwoody cluster. CES sits on the largest acreage of land available to DCSD to expand compared to the other elementary school sites in our cluster. ● As traffic on North Peachtree has been questioned as a potential issue, we feel it important to share that due to the CES site location, any redesign could easily include a reconfiguration for new access point(s) off Peachford Rd. This is something the PAC has previously advocated for to improve overall school safety and traffic conditions. ● CES's geographical location creates the most equitable access to elementary schools across the City of Dunwoody. Based on Scenario 1, the three remaining elementary schools would be geographically spread out to best serve students across Dunwoody [i.e.: northeastern side of Dunwoody (via Austin), central Dunwoody (via DES), and the southeastern side of Dunwoody (via CES)]. ● Removing an elementary school from the southeastern side of Dunwoody would adversely affect, and potentially impact educational outcomes, for a large number of Dunwoody residents that reside in the thriving multi-family communities of our city. These families are an important part of the CES community, and many of these families can best engage with their elementary school due to the walkability and public transportation corridor that CES's location provides. ● CES's proximity to Peachtree Middle School further enhances our thriving educational corridor in the Dunwoody cluster by allowing efficiency in shared resources and facility utilization. ● The CES community deserves to be served by a facility similar to the other schools in our cluster. CES has the lowest Building Adequacy Score (67.4%) of all Dunwoody cluster schools. The Building Adequacy Score is a measure of how well a facility aligns with desired standards by school type. Meaning, DCSD can continue to fix issues at our ageing building, but the building itself no longer best fits the needs for delivering exceptional educational services to our students. ● CES knows how to successfully deliver exceptional educational services to a diverse population. CES is one of the most diverse elementary schools in the Dunwoody cluster, and we believe it is extremely important that CES continue to execute what it knows how to do for these families. As evidence of this, CES is a GA Distinguished School and in the top 5% of all Title 1 schools in the state of Georgia. I support expansion opportunities for Dunwoody High School to help alleviate its overcrowding, which would help ensure that all families in the City of Dunwoody could be served by one high school, which strengths our entire Dunwoody community. As all Dunwoody cluster elementary schools roll up to the same middle and high school, we want the best opportunities and outcomes for our students even	3/4/2026 7:42 PM

	after they leave CES. Better utilization of the available land around DHS would best serve all families within the City of Dunwoody.	
1348	N/a	3/4/2026 7:39 PM
1349	All students and schools should receive adequate funding and be grouped based on social economic statuses. Keep the politics at bay when making decisions for public school education for our students...	3/4/2026 7:39 PM
1350	Please consider what is working and what doesn't mandate change. Our cluster of Ashford Park to Chamblee tests well and contains your top tier of performers. Lean into strengths and don't let a horribly advised formula dictate real world decisions. Our community is important and continuity within our cluster and community support our children's learning.	3/4/2026 7:39 PM
1351	Parents and grandparents attended Brockett and love the fact that they are able to send their kids to the same school. The teachers love their students and know the families. We should be pushing for smaller classes and space versus bigger....students need a safe place.	3/4/2026 7:29 PM
1352	I think the county and district is doing a disservice to the entire community with the SAP proposed program. The lack of transparency and visibility and access for parents who care about what is happening in their school is appalling. The district is virtue signaling by scheduling these sessions when they are clearly happening when parents are physically unable to get their in person. The district chooses to label this as lack of community care when that is so far from the truth a significant portion of the population of DeKalb county are underserved under privileged title one schools why does the district think that parents can be in person on a school night when they have their children and their jobs to tend to?	3/4/2026 7:25 PM
1353	with wider grade bands, we need to monitor bullying cases more as i believe having too wide difference in ages can create chances for bullies.	3/4/2026 7:21 PM
1354	So much building to "save money " seems like fraud. Such a huge amount of money when they board hired a criminal is suspicious.	3/4/2026 7:17 PM
1355	Consider more charter schools, technical schools, stem schools, and alternative schools to replace when combining schools and utilizing the closed building. Pushing children at cedar grove to McNair is a poor choice. Two schools with low scores does not help the children or community. We taking a way opportunities and hope from our youth to meet financials. What is happening is Systematic destruction. We are deliberately planning prison to pipe line by not helping the children already in title 1 schools and pushing them together… 2 low scoring school with no change equals no future.	3/4/2026 7:15 PM
1356	We should immediately stop any facility upgrades until this issue if finalized (short of roof or plumbing leaks or safety issues.).	3/4/2026 7:14 PM
1357	Please keep Oak Grove ES an elementary school!	3/4/2026 7:13 PM
1358	Homes purchased in the area because of the school.	3/4/2026 7:12 PM
1359	Closing schools in south dekalb will disproportionately impact Black students especially given the burden on parents for commute time especially if there is no added benefit of access, better integration etc	3/4/2026 7:11 PM
1360	I support addressing overcrowding at Dunwoody High School and want strong long-term facilities planning across the cluster. Since SAP is framed around enrollment trends and utilization, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. Before any closure decision, it would be helpful to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications.	3/4/2026 7:11 PM
1361	Consider athletes when moving high school students. Perhaps grandfather students into schools where they play sports.	3/4/2026 7:08 PM
1362	Take care in considering exceptional education students in all of these scenarios	3/4/2026 7:06 PM
1363	I support the Scenario 1 proposed plans as they relate to Chestnut Elementary School and the elementary schools in the Dunwoody cluster.	3/4/2026 7:04 PM
1364	There needs to be a HEAVY focus on catering to the needs of gifted children so that parents aren't forced to look elsewhere.	3/4/2026 7:04 PM

1365	You all need to better explain what is to happen with the children, and the plans for transportation for the children.	3/4/2026 7:03 PM
1366	Oak Grove elementary is one of the highest performing schools in the area.	3/4/2026 7:02 PM
1367	Focus on smaller schools for academics and then come up with a solution for sports or band to spread resources. Larger schools dilute the teaching and academic focus. Do something about the college prep curriculum for the county to improve it, please.	3/4/2026 6:59 PM
1368	The Kittredge magnet program would benefit continuing through 8th grade. This would allow continued academic rigor until students can pick classes in high school. This would also help with overcrowding at Chamblee Middle School.	3/4/2026 6:58 PM
1369	You are trying to lump so many s hooks that it doesn't make sense, will only hurt education for ea h chikd	3/4/2026 6:58 PM
1370	DeKalb needs walkable schools, not commuting all over half of metro Atlanta. Idle time is "the devil's plaything" and seeing dozens of children stacked up at the bus stops to make their long commutes home is just silly when they could be doing things like art, drama, detention instead of in-school suspensions (homework makeups and tutoring!), music, clubs and athletics (though WHY are we spending money on FOOTBALL, which we KNOW leads to head injuries and muculoskeletal injuries ... health outcomes we know are delirious and possibly only to come back and be a health expense the county has to then bear.	3/4/2026 6:56 PM
1371	Provide a deeper description of how transportation is effective’s for the grade band clusters	3/4/2026 6:51 PM
1372	1. Provide map of current school districts overlaid by future student population estimates. 2. Replacing a high academic performing school because its facilities have not been upgraded is not likely to provide a satisfactory outcome.	3/4/2026 6:47 PM
1373	So many children live in the Dekalb area, that a closure would only serve to help the disctrict, but not consider the minds, and emotions of the students attending Ashford Park. Have some faith, and humanity that a good remodelimg would do the school good, but a complete closure.	3/4/2026 6:46 PM
1374	I noticed the proposal doesn’t say what would happen to any of the magnet schools, like Kittredge. I think it would be a terrible idea to close or repurpose those - you’ll just lose many of those kids (and their parents’ financial support and community involvement) to private schools.	3/4/2026 6:43 PM
1375	Data supporting closure of OGE is entirely incorrect. In a (respectfully) woefully underperforming school system and after a complete mishandling of return to school during COVID that resulted in a mass exodus for those with means, the decision to include one of the county's best schools (across every metric) is a complete mystery. Any decision to close ANY school needs to be done carefully, thoughtfully, and with ACCURATE data and clear disclosure regarding conflicts of interest.	3/4/2026 6:43 PM
1376	Before moving forward, families need cluster-specific reassignment modeling, receive school utilization projections, and a clear explanation of why expansion or shared-campus options were not prioritized. We are open and have been collaborating with our high school neighbors, and would like to propose alternative solutions instead of closure.	3/4/2026 6:40 PM
1377	Thank you for reviewing my feedback	3/4/2026 6:40 PM
1378	Please keep us posted for any progress during the whole procedure.	3/4/2026 6:37 PM
1379	Don't close vanderlyn or Kingsley. These are high performing schools with a small, neighborhood feel. People bought homes in these school districts for these schools, as well as in the other nearby elementary schools, such as austin, which will inevitably be negatively affected by school closures.	3/4/2026 6:33 PM
1380	I’d like to get a better understanding of how the declining enrollment is being measured, if there is any evidence of what may be causing declining enrollment, if there are ways to stop the declining enrollment, and if there are more robust and swift ways to address changes if enrollment begins to rapidly increase, other than reopening recently closed schools, which also present a significant challenge. What’s driving declining enrollment is something that I have personally not seen explained.	3/4/2026 6:31 PM
1381	Oak Grove Elementary should not be closed or consolidated.	3/4/2026 6:20 PM
1382	Robert Shaw is a very prominent school and it is very important to keep it up and alive. This	3/4/2026 6:17 PM

	school has raised, taught and educated families, children and communities. In doing so, they have created leaders, doctors, nurses and more that I know personally and now my child is attending Robert Shaw Theme School. This school is immensely important and valuable to parents, teachers and students. This would break the hearts of the community and students as well as parents who have attended Robert Shaw and now having their own children attending this school.	
1383	Please consider grandfathering in magnet students at their exisitng locations. Those entering Kittredge now should graduate from Chamblee.	3/4/2026 6:14 PM
1384	Serious consideration needs to be made about the logistical burden we're putting on families, especially considering how many students come from families with limited resources.	3/4/2026 6:13 PM
1385	I think traditional grade bands work, but I'm not against separating p-3 and 4-5.	3/4/2026 6:13 PM
1386	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake It does not make sense to close down a school with these characteristics. Projections should be reviewed in light of more recent enrollment and development trends. To close Oak Grove Elementary would be a detriment in the long-run for the county as it eliminates capacity for students just as that capacity will be needed in this corridor.	3/4/2026 6:12 PM
1387	I am concerned that closing schools or changing grade bands could negatively affect students, especially African American children, by disrupting their learning and community connections. I encourage the district to prioritize stability, equity, and student support when considering any changes. Any new scenarios should be carefully reviewed to make sure they do not create unnecessary challenges for students, families, and staff. I hope the district explores alternative solutions that strengthen schools rather than closing or heavily restructuring them.	3/4/2026 6:12 PM
1388	Invest in infrastructure is a priority good Air Conditioning and good heater. Provide resources for Spanish speakers	3/4/2026 6:11 PM
1389	Stop hiring superintendents that steal all the school funds!!	3/4/2026 6:10 PM
1390	Please don't shut down well performing achools	3/4/2026 6:07 PM
1391	We are suppose to care about our children not set them up for failure.	3/4/2026 6:05 PM
1392	Please consider saving money in other ways before closing our neighborhood schools. I'm not in favor of the mega elementary school.	3/4/2026 6:03 PM
1393	I would like better communication regarding transportation and improved safety for children in special education.	3/4/2026 6:03 PM
1394	6-12 feels like a very broad range of ages and developmental stages to put in the same building. I attended a 7-12 school, and while grades 7-8 were clustered on certain floors, it did lead to early exposure to certain concepts (drug use, alcohol, sexual activity) that likely would not have been as prevalent in a junior high environment. These seemed to outweigh any benefits of leadership or mentorship from older students on the same campus.	3/4/2026 6:01 PM
1395	I think Chesnut is perfect for expansion. It's on 11 acres of land and those kids should feed right into peachtree middle	3/4/2026 6:00 PM
1396	Numerous families have moved specifically to be able to attend Oak Grove Elementary. The school is such a special place and a shining example of communal support and partnership with the school system. Eliminating Oak Grove would create a vacuum in the community and drive more families to private schools and alternative to public education.	3/4/2026 5:57 PM
1397	N/a	3/4/2026 5:56 PM
1398	My top priority would be keeping Ashford Park's trajectory to Chamblee MS and HS. My second priority would be keeping our community together, whether through shifting the population to John Lewis Elementary or rebuilding and expanding Ashford Park.	3/4/2026 5:56 PM
1399	Oak Grove is a fantastic school and an integral part of the community.	3/4/2026 5:55 PM
1400	Hawthorne building should not be expanded. Please see 12.8.21 Hawthorne Position Paper for full list of reasons and provided research. If you do not have a copy, please reach out to me for	3/4/2026 5:46 PM

	one - maikedesigns@gmail.com	
1401	In future communications, please be more specific and show real life examples of how closing schools will free up funds to support students, especially considering the fact that significant additional construction costs will need to be expensed in order for the schools to be expanded.	3/4/2026 5:40 PM
1402	This is a terrible idea and I wonder why it is really necessary!	3/4/2026 5:39 PM
1403	HPM has a vested financial interest in capital improvements. We should be prioritizing educational reform.	3/4/2026 5:39 PM
1404	Please consider how best to uphold the educational standards and those schools currently thriving as best as possible. If anything, move them to a building that is larger and bring some new students in but please do not completely redo the schools they feed into on a higher level.	3/4/2026 5:38 PM
1405	The principal at Browns Mill is very unprofessional	3/4/2026 5:32 PM
1406	The problem with K-8 is that 13 year olds should not mix with 5 year olds. On the flip side, it's not appropriate to have 11 year old mixing with 18 years in the 6-12 grade setting.	3/4/2026 5:32 PM
1407	Maybe the Terry Mill Early Childhood program can be housed into specific designated areas of the elementary schools (as many as needed) in the proposed list. For example, if there are 12 - 3 year old classes at TMEC, then 6 could classes could be housed in 2 of the elementary schools slated to close, or 4 classes housed in placed 3 of the slated elementary schools to close and the same for the 4 year olds. If concern for grade 5 in schools with 3 and 4 yr olds make a 5/6 academy as cm part of middle school concept.	3/4/2026 5:26 PM
1408	The APES parent association provided a survey to parents and according to the results, a majority of the parents agreed that as long as the APES students continue in the Chamblee cluster, it doesn't matter what building they are in. That was the main priority. Thank you to our community and parent volunteers in the SAP committee. Your dedication to our public schools here in DeKalb county is appreciated.	3/4/2026 5:26 PM
1409	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment	3/4/2026 5:25 PM
1410	Evansdale has more room for expansion than Livsey and our building certainly seems in better condition than Hawthorne! We could house grades 3-5 on the lower field and lower grades in existing building.	3/4/2026 5:25 PM
1411	Midvale Elementary is the only IB school in its cluster, which is why we opted for our child to attend over our zoned school.	3/4/2026 5:24 PM
1412	Reiterating your priority is to the wellbeing of the actual children who attend these schools, not to your desire to "maximize efficiency", cut budgets, or get credit for an unneccesary mutli-million dollar mega school. I understand those are exciting for adults and combining resources may sound good on paper, but please PLEASE think of these kids and what is best for THEM.	3/4/2026 5:23 PM
1413	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4-16. Oak Grove: Already exceeds thef88% utilization target (89% current; 96% projected) Has four consecutive years of enrollment growth Ranks in the top tier academically Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity.	3/4/2026 5:23 PM

Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment	3/4/2026 5:20 PM
1415	Please keep OGE open	3/4/2026 5:19 PM
1416	It's not fair to the community to announce feedback meetings and then cancel them. The flyer that was published had 4 March meeting, now there are only 2 virtual meetings? Many of the parents in the Lakeside cluster were planning to attend the Lakeside meeting. It doesn't seem that you care to actually hear our thoughts if you are going to eliminate half of the feedback sessions. I beg you to consider the programs that are in the schools, the traffic to get to these megaschools, and the studies that show larger schools are not good for elementary age students. I purchased my home in my neighborhood based on it being zoned for Evansdale and Lakeside. If you take the schools out of the communities, you'll be taking the community out of the schools and those who can afford to go to private school or to move will leave, further degrading the quality of our schools. Thank you.	3/4/2026 5:18 PM
1417	Start cutting at the central office. Sell the Kroger property. Fire HPM and either use an LLM to come up with scenarios or get some GT civil engineering students to help.	3/4/2026 5:18 PM
1418	If Ashford park students are moved to John Lewis then John Lewis should be moved into the Chamblee Cluster. Or, in the grade band scenario above utilize both JL and AP and then they feed into Chamblee. Another idea is a northern magnet school and use the AP building. Then you can open more spots as well as extend less students who are not zoned for Chamblee spots	3/4/2026 5:18 PM
1419	Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization.	3/4/2026 5:15 PM
1420	Let’s not let the wealthiest, loudest voices make our decisions! Make choices that support ALL of the district!	3/4/2026 5:15 PM
1421	This school is an asset to our community of children. We will want to see this open. The school is in a great neighborhood and has great parental involvement and support.	3/4/2026 5:14 PM
1422	I would like to know what will happen to the staff if this happens at these schools…. How do the staff feel about this if it takes place	3/4/2026 5:12 PM
1423	More informative thought process on our area would be beneficial to our future planning.	3/4/2026 5:11 PM

1424	If Vanderlyn does end up closing, I hope that the district uses that land/building to serve Dunwoody High School. Dunwoody High School is very overcrowded with limited parking and trailers, it could use Vanderlyn's space for expansion.	3/4/2026 5:11 PM
1425	I hope that DCSD will make decisions that make our district stronger and able to compete with other districts. We have had many setbacks in the past 10 years and it is really time for this district to do better!	3/4/2026 5:05 PM
1426	If this proposal is driven by high school facility needs rather than elementary inefficiency, and if future enrollment shifts may relieve this pressure, closure should not be assumed as the default solution. The Dunwoody cluster cannot be evaluated using the same framework as clusters with multiple under-enrolled campuses. Before moving forward, families need cluster-specific reassignment modeling, receive school utilization projections, and a clear explanation of why expansion or shared-campus options were not prioritized.	3/4/2026 5:02 PM
1427	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with f iscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/4/2026 5:00 PM
1428	Vanderlyn is a wonderful school and an asset to our community.	3/4/2026 5:00 PM
1429	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with f iscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/4/2026 4:58 PM
1430	keep Oak Grove Elementary open	3/4/2026 4:54 PM
1431	Closing buildings should be a last resort, and it seemed like the first one the way this was presented. Additional context would be helpful in the next round - specifically, what are the options for repurposing? While I was thinking of Pre-K, CTAE campuses, Admin, Health services, testing sites, etc. - people have other ideas. Perhaps coordination could be done with Dekalb Parks and Rec for after school programs, or with Technical College System of Georgia for classes, or other education/ job training organizations. Still others have suggested the district is selling property to parties that will make the buildings data centers.	3/4/2026 4:54 PM
1432	In the Dunwoody cluster, I would like to see Vanderlyn closed, and that property become part of DHS. If Kingsley were to also close, then another elementary school would likely need expansion… Probably Chesnut, as Austin and Dunwoody Elementary are already newer and larger.	3/4/2026 4:50 PM
1433	Having 6th-7th graders in a high school is absurd.	3/4/2026 4:49 PM

1434	Also maybe just shutting down parts/wings/floors of the school to save money on heating/lighting, and other overhead resources rather than closing entire schools down. Transferring to smaller buildings?	3/4/2026 4:48 PM
1435	Please stay committed to information and feedback. Be just as thorough about releasing survey results as you have thus far. Thank you!	3/4/2026 4:46 PM
1436	The portable and very exposed portable classrooms (trailers) that are ON Ashford-Dunwoody Road need to be removed so all students can fit within Montgomery Elementary for grades PK-3rd. Overflow to 1663 E. Nancy Creek Drive for 4th and 5th grades (or Kittredge Magnet). The existing "Dunwoody Elementary" students would be relocated to nearby Kingsley Elementary or even Chesnut Elementary in Dunwoody. Thank you for asking for feedback!	3/4/2026 4:41 PM
1437	See above.	3/4/2026 4:38 PM
1438	Oak grove elementary should stand	3/4/2026 4:36 PM
1439	The data used to perform the SAP closure list is flawed. Likewise Scenario 1 as proposed suggests closing 27 elementary schools which far exceeds the prior stated goal or 4-16 closures. To close a school which is already above utilization targets would redistribute students without being able to achieve the SAP goal of reducing excess capacity. Goals of the SAP program need to be clearly stated and defined. Goals then need congizible ties to the proposed cloures. Transparancy is key and the current list of closures does NOT comport with the stated objectives. Pandemic numbers aside, OGE exceeds in utliziation and performance. Closing OGE would not accomplish stated goals.	3/4/2026 4:35 PM
1440	focus on the empty areas directly. the entire district does not need to be impacted. focus on retention of students as opposed to closing schools.	3/4/2026 4:34 PM
1441	Please do not close Oak Grove Elementary.	3/4/2026 4:32 PM
1442	DCSD needs to have all of its schools with the same grades in each level. Also, this district has got to start to plan to replace old facilities rather than continuing to patch them together. It can be a tear down, build up model, as new land and purchasing new land would be very difficult to do in DeKalb. That is why some of the schools should be used to temporarily house other schools, while the permanent location is completely rebuilt.	3/4/2026 4:31 PM
1443	Survey results are manipulated to achieve the goals of the central staff. Parents should be allowed to vote for the school they want, including faith based schools or home schools. I have little faith in the survey, the process and eventual decision of the board.	3/4/2026 4:27 PM
1444	We need better options, especially on the southside.	3/4/2026 4:25 PM
1445	The small neighborhood school setting is what made DeKalb top in the nation in the 70’s. As everyone knows the inefficiencies at the county level should be addressed first. You could save millions by utilizing the same processes used at the federal level	3/4/2026 4:23 PM
1446	Would like to see more inclusive PreK classes available.	3/4/2026 4:22 PM
1447	You don't provide any data that could be used to understand these options. Like FCA scores, CCRI scores, capacity information, enrollment forecast, etc.	3/4/2026 4:18 PM
1448	This plan should be reconsidered. This will impact the students, education, and DeKalb County as a whole.	3/4/2026 4:14 PM
1449	I think the county needs to consider why the seats are empty. I suspect it has to do with the constant upheaval in leadership and decaying buildings. In addition, the county has no special programming for children with autism. It is a definite turn off. If Tapestry did not exist, my children would not be in a Dekalb school for middle/high school.	3/4/2026 4:14 PM
1450	All other avenues should be exhausted before firing/reassigning teachers or closing/consolidating buildings. Look at scenarios which do not have direct impact on student outcomes- such as trim nonessential BOE staff, sell/consolidate buildings not used by students, etc.	3/4/2026 4:14 PM
1451	I like the idea of bespoke grade bands for each community.	3/4/2026 4:12 PM
1452	I have worked in Falls Church, VA schools. They have K-1 and 2-5. It is amazing. I grew up in Dekalb, going K-7 and 8-12. 8th graders (and anyone younger) and 12th graders don't need to be together.	3/4/2026 4:09 PM

1453	I am also concerned about what will happen to these schools if they close. Will this affect property values?	3/4/2026 4:09 PM
1454	I will reiterate, I would encourage the district to carefully evaluate any proposed changes through the lens of what is best for students and educators, rather than focusing primarily on enrollment counts or capacity metric	3/4/2026 4:08 PM
1455	Middle School causes more bad than good	3/4/2026 4:05 PM
1456	Dekalb is not a one size fits all model. The building capacity and infrastructure conditions very wildly across the district. Dekalb needs to look at each cluster individually and determine how to best utilize the resources they have. Drastic future plans should not be announced on infrastructure that does not exist as Dekalb has had quite a difficult time excuting projects to fruition over our 12 years with a student in the county.	3/4/2026 4:05 PM
1457	I feel like these closures target a certain demographic that always seems to get the short end of the stick in Dekalb County. Hopefully discrimination isn't a part of the decisions to close our schools.	3/4/2026 4:05 PM
1458	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4-16. Oak Grove : Already exceeds the 88% utilization target (89% current; 96% projected) Has four consecutive years of enrollment growth Ranks in the top tier academically Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024-2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of under-utilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/4/2026 4:03 PM
1459	Please share the intended redistricting maps and don't change the currently assigned middle and high schools! Thank you for taking the time to read feedback!	3/4/2026 3:57 PM
1460	As a grandparent of two Oak Grove Elementary School students, I urge those who are considering makinmg changes to leave Oak Grove Elementary school as it is. My grandchildren are thriving at Oak Grove Elementary School. I strongly believe it would be detrimental to their well-being to close the school or transform it into something other than what is it is today.	3/4/2026 3:53 PM
1461	Feedback Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/4/2026 3:52 PM
1462	N/A	3/4/2026 3:38 PM
1463	The small neighborhood schools are charming in Dekalb county. Families want to go to school with their neighbors. Teachers want to support other teachers and making mega schools will increase the number of teachers on grade level - effecting culture, collaboration, and more.	3/4/2026 3:38 PM

1464	N/A	3/4/2026 3:33 PM
1465	Junior high school scenarios (grades 6-9) have worked well in the past and it separates the adolescent age students from the more mature high school students.	3/4/2026 3:33 PM
1466	It’s so disappointing to continue to have so much change in education. What we need to focus on is giving teachers time to plan and make engaging and meaningful lessons. We need to support our students and teachers and schools instead of tying to pay kids to have school choice, further creating gaps between classes.	3/4/2026 3:27 PM
1467	Shutting down schools that are at capacity to build larger schools is not why families moved into specific areas. Redistricting schools affects families, property values, and so forth. Dekalb will lose value, families, and more as a result of shutting down schools.	3/4/2026 3:26 PM
1468	Thank you!	3/4/2026 3:22 PM
1469	Na	3/4/2026 3:22 PM
1470	None at the time	3/4/2026 3:22 PM

1472	None	3/4/2026 3:22 PM
1473	N/A	3/4/2026 3:22 PM
1474	HMES is a strong & thriving school. Please do not close HMES.	3/4/2026 3:22 PM
1475	Please do not close oak grove elementary school	3/4/2026 3:22 PM
1476	As the district develops the next round of scenarios, I encourage the following considerations: Prioritize keeping neighborhood elementary schools open whenever possible. Consider renovation, modernization, or partial repurposing before full closure. Carefully evaluate the impact of closures on class sizes, transportation times, and family engagement. Ensure that community identity and school culture are considered alongside facility data. Explore creative programmatic uses (early learning centers, magnet programs, or specialized instruction) that could allow schools like Oak Grove to remain active and valuable to the district. Oak Grove Elementary is an important part of its community, and preserving it would support both students and families. I hope the district will continue to explore solutions that balance efficiency with the long-term value of neighborhood schools.	3/4/2026 3:22 PM
1477	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. 	2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	
1479	Figure out the root of deficiency across the board.	3/4/2026 3:19 PM
1480	Safest in the area for all kid’s	3/4/2026 3:16 PM
1481	Convert the middle and high schools first. Close the elementary that are going into those schools then revisit. Those schools will be the easiest transitions since mostly everything would be in place. Most of the furniture can remain. Move the k-2 furniture and library books over the summer and they can be ready in the fall. The middle schools will fit 3-5 elementary school populations depending on the size. The will be an easier transition than combining schools because everyone is in a new building.	3/4/2026 3:15 PM
1482	Has the overall administrative headcount been adjusted downwards to align with the declining student enrollment? Property taxes are going up yet. Enrollment is going down. Perhaps the funds are being mismanaged. Elementary school children should be in a smaller more nurturing space. Under performing schools we will cause an increase in enrollment. Expanding Briarlake elementary would hurt our home values.	3/4/2026 3:14 PM
1483	I don't think we should be providing pre k seats in the county until we can serve each k-12 student comfortably. Perhaps, since pre k is a privilege, you can house pre -k by region or cluster into the schools that are under enrolled. Also, look at moving some of the magnet or charter programs to underenrolled schools esp those housed in crowded regions. Most of those programs began in order to fill seats in underenrolled areas and look, it worked, so now we have an opportunity to do the same without closing schools or disrupting communities. Special programs as a whole, are a choice. I chose to drive to Evansdale elementary from Clarkston to utilize their French program years ago, as a choice. If the north is overcrowded, you could look at the special programs. Also, what will become of the old Heritage elementary now that GLOBE has moved? It is in an area of growth. If paying extra staff is an issue, then start at the administrative staff level for saving money (AIC) as the children do not know them and that is where consolidation needs to occur, not at the local school level where staff interfaces on the daily with our children. Plus, even a 650-seat school will need more than one principal, and it really takes away that personal touch. I have been in the larger schools, and while pretty and shiny, they are overwhelming and easy to get lost in and not what childhood memories are made of. Gwinnett built their schools later and have larger roads and can get away with that, but any neighborhood built before the 1950's (much of Dekalb) cannot support this same model consistently. What part of the plan takes administrative staffing and facilities into consideration? Let's start there after we hire a permanent CEO, and then we can talk about the schools. And let's start with each cluster or region by having the regional superintendent lead each path to see what works best. You cannot put a large puzzle together by trying to do it all at once. You start on the edges or corners or in clusters and eventually as you fill in the pieces, the whole picture comes to fruition. Take a pause and let's break this down on a smaller more manageable level and reconvene when the pieces start to come together for each region/cluster. Also, let's be real. I think each cluster should be considered first and foremost, as we know best. I cannot speak for other clusters or regions, as I am not familiar with the specifics of their needs or logistics and I don't expect them to understand our needs. Surely, an outside firm is not the answer and never has been. Wasn't a firm used to hire the last several CEOs? How much did that cost? How much is it costing us now? And based on having gone through discussions like this for 20 years, they usually get the data wrong. Lastly, make an effort to start high school later. If schools are bigger and more spread out, bus rides will be even longer! NO. Maintain what you have. Improve upon what is working. And please start checking for housing verification throughout the school year so that the schools, that are overcrowded, ie. Lakeside, can get some relief. People outside of the county and clusters abuse the system and that isn't fair to anyone attending our schools that are currently overcrowded.	3/4/2026 3:14 PM
1484	I think it should stay the same	3/4/2026 3:11 PM
1485	Do not close Oak Grove Elementary	3/4/2026 3:06 PM
1486	Please seriously consider the feedback from the parents. Our children will be affected more than anyone no matter what is decided.	3/4/2026 3:06 PM

1487	I need more information.	3/4/2026 3:06 PM
1488	N/A	3/4/2026 3:04 PM

1490	N/A	3/4/2026 3:02 PM
1491	Please keep the magnet schools so that the gifted students can develop to their full potentials.	3/4/2026 3:02 PM
1492	NA	3/4/2026 3:00 PM
1493	No suggestions	3/4/2026 3:00 PM
1494	Please keep the Traditional PK-5 / 6-8/ 9-12	3/4/2026 3:00 PM
1495	Example if you close two schools on the south also close two on the north to make it equal around the county	3/4/2026 2:59 PM
1496	Prior to 2020, Open Campus provided DCSD with a proven pathway to graduation for students who needed an alternative structure. It increased stability by helping students stay enrolled, earn credits, and complete school—supporting long-term community outcomes. When students can graduate, they are more likely to build stable lives, remain in the county, and create families that continue to contribute to DCSD. Changes made to the original Open Campus model have reduced overall effectiveness; the district should return to the original intent and structure: flexible scheduling, student-centered support systems, and consistent attendance accountability that matches the realities of the student population served.	3/4/2026 2:59 PM
1497	N/A	3/4/2026 2:57 PM
1498	Consider communities and how the schools could help them, but make sure the funding makes sense.	3/4/2026 2:56 PM
1499	Would love to see The Museum School expand to a 9-12. DHHS needs a lot of support if we plan to send our kids there. I think if you can improve the volunteer culture at these schools, the staff would feel more support and empowerment to do their best, thus showing up refreshed and providing better education. Long term this would improve learning/test scores and draw more interest to the public schools.	3/4/2026 2:53 PM
1500	None	3/4/2026 2:52 PM
1501	I think students still need help from COVID-19.…	3/4/2026 2:51 PM
1502	My feedback regards specifically ashford park elementary and surrounding schools. Ashford is greatly efficient school, scoring high on all student testing despite being over capacity. Many student walk to school as it is anchored at the very heart of the neighborhood. Ashford part housing market has been rising in great part because of APES rating and proximity, which in turns raises money through property taxes for DCSC public schools. A closure of APES would not only hurt a community but also impact the DC public schools budget. If a change is required, it's either re-zoning some of the current students to nearby schools that are near capacity (J. Lewis or Montgomery), or increase the capacity and renovate the existing building of ashford park elementary. Closing this school is not an option as the surrounding schools do not have the capacity to accept >800 students or more in the coming years.	3/4/2026 2:49 PM

1503	none	3/4/2026 2:48 PM
1504	Decide how long it will take to consolidate the schools. The schools that are going into the middle schools should go first and regroup.	3/4/2026 2:48 PM
1505	If we can accurately predict a declining school enrollment what would predicted enrollment look like 20 yrs from now? How would that impact schools that have been consolidated?	3/4/2026 2:47 PM
1506	PK-3/4-6/7-12 possibly. I wouldn't think 6 grade should be with high school.	3/4/2026 2:46 PM
1507	Ashford Park I doubt will close, they just need to build upwards with that school. Lithonia High has too many fights and other problems and may need closing.	3/4/2026 2:44 PM
1508	I think we should renovate Ashford Park elementary to accommodate more students.	3/4/2026 2:44 PM
1509	Transparency	3/4/2026 2:43 PM
1510	Consider projected trends in enrollment and neighborhood growth	3/4/2026 2:42 PM
1511	NA	3/4/2026 2:42 PM
1512	n/a	3/4/2026 2:39 PM
1513	N/A	3/4/2026 2:38 PM
1514	Please notify the seniors that are paying property taxes for these schools yet they can't use them. Maybe you can consider senior day centers for them.	3/4/2026 2:37 PM
1515	Maintaining an open-campus model that is flexible for the variety of students in the county should be a factor moving forward.	3/4/2026 2:37 PM
1516	I firmly believe scenario/phase 1 should be extended. A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment. The following needs to be taken into consideration Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Clarification and answers to the following would be beneficial: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake?	3/4/2026 2:36 PM
1517	If school closure is a real conversation how will that burden other areas and demographics	3/4/2026 2:23 PM
1518	Can you provide fundraising activities/level of parent support for each school? Can fundraising be enough to fill the gap?	3/4/2026 2:22 PM
1519	Small neighborhood schools are such a selling point for DeKalb. It makes us different than other metro districts and more appealing to parents looking to purchase homes and have children.	3/4/2026 2:20 PM
1520	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach	3/4/2026 2:19 PM

	focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	
1521	I think the district needs to assess how much money they would really invest in new programs for all schools (music, STEM, etc), and how the kids would be transported. We are all tired for the lack of real leadership in previous years, scandals and the amount of people the district hire for admin work. All needs to be transparent, starting with the capital and human investment to reach these goals. My kid is in a magnet school and finally happy and learning at his level. After K-3 in a regular school, I am hesitant to believe a regular school would be able to meet his needs as his current magnet school is doing. I think there should be, perhaps, an expansion of the magnet program instead of being replaced by going back to your school that is not serving you.	3/4/2026 2:15 PM
1522	Keep in mind what the impact of announcements of potential school closures does for items such as fundraising. It is incredibly difficult to continue much-needed efforts running successfully with impending closures. Nobody wants to donate to something that is announced to be closing.	3/4/2026 2:14 PM
1523	Making schools larger will only drive more families to alternative schooling (home, private, charter). Also 6th graders are being forced to grow up too fast. They have no business being in the same school as 10th graders let alone seniors.	3/4/2026 2:13 PM
1524	The school board needs to continue to build trust. I'm in north DeKalb and don't have the impression that my board members have been transparent about their views on the scenarios. I want to know what they're doing to represent my community -- I'm tired of hearing them parrot district talking points.	3/4/2026 2:08 PM
1525	Na	3/4/2026 2:04 PM
1526	I know there has been a lot of talk about viability of buildings in this first round of scenarios. Please also consider the children and community that has been created within that building. We love our school, certainly not because of the facility quality, but because of the love and care of our teachers, the parent involvement, and the community and friendships we have made there. Please consider the vitality our school brings to our community and consider the impact removing it would have on not just school families but all families in the Ashford Park area.	3/4/2026 2:03 PM
1527	first round seemed fine.	3/4/2026 2:02 PM
1528	Separate from these scenarios, I want to share concerns about support for students with learning disabilities at Dekalb Schools. Despite our great love for Midvale, we are planning to leave the school next year because they are not well equipped to support students with dyslexia and dysgraphia. Although my son now has an IEP, the school does not have any trained literacy specialists, and his dyslexia went undiagnosed from first through third grade. We love all other aspects of the school, and we have been deeply devoted to supporting our public school, but we are now faced with a fourth grader who cannot read at an appropriate grade level, and who has developed school refusal and anxiety because he does not have the tools he needs to succeed. Instead of consolidating schools, I would urge the County to devote additional resources to identifying learning disabilities and supporting students diagnosed with those disabilities. Many parents would gladly return to public school if their students could receive the necessary support and instruction. Moreover, those who leave are often the families who can afford private school--families who have the time and resources to become active participants in their school community. Dyslexic students without the economic resources to attend private school or hire tutors are left to struggle and often fail, and the school as a whole becomes weaker as this cycle continues. I do not understand why Dekalb has chosen to focus its energy on consolidations and school closures rather than addressing these very real issues affecting student enrollment and success in our schools.	3/4/2026 1:59 PM
1529	none at this time	3/4/2026 1:58 PM
1530	Closing buildings first is just walking people down a road of no return and your huge SAP to rubber stamp the changes. You must respect communities and cultures. This isnt an easy process	3/4/2026 1:57 PM
1531	Again, I reiterate the absolute lack of information and “real” ideas provided by the SAP committee. There has been no information about where students would move to if there school was to close, no data to support these closure as best for everyone, and there remains a	3/4/2026 1:53 PM

	decided lack of trust with this entire process. I am no ignorant of the fact that changes need to be made, but that lack of information and transparency during this information sharing phase of alarming as for what is to come. Reportedly, the committee also didn't take into account any parent feedback with the plans, however I still do not feel like I have seen an actual plan, so who is to say.	
1532	I would like to see the long term needs of English learners and Newcomers taken into consideration. When the political landscape changes, we should expect a return to higher immigration and refugee resettlement. Future scenarios must take into consideration this population and the programs that serve them, such as the International Student Center. This may also be an opportunity to rethink and revamp these programs to better address the needs of the students.	3/4/2026 1:52 PM
1533	Please maintain the Magnet program for DeKalb county schools through the Chamblee Middle and Chamblee High schools. This is the jewel of DeKalb schools with high achievers thriving and representing DeKalb county with pride!	3/4/2026 1:51 PM
1534	I would suggest making this strategy not based on affluence of the community, but rather the number of students served by each school. Different communities will have different resources and parent involvement. Let's drive our decisions based on student numbers across each of the clusters.	3/4/2026 1:46 PM
1535	Keep the Kittredge cluster as it stands (feeding into Chamblee MS and Chamblee HS). The most efficient relief of any overcrowding is to alleviate overcrowding at Ashford Park, a main feeder to Chamblee Cluster.	3/4/2026 1:43 PM
1536	My number one priority is to keep the entire Ashford Park Elementary attendance zone together. Redrawing boundaries or dividing our community into multiple schools is not an acceptable solution. Ashford Park is a cohesive, established community. Splitting the attendance zone would disrupt long-standing relationships, weaken neighborhood connections, and create unnecessary instability for families. Keeping our community intact must be the guiding principle in any proposed changes. I strongly urge the district to pursue solutions that preserve the full Ashford Park Elementary attendance zone as one unified community, without fragmenting it through redistricting.	3/4/2026 1:42 PM
1537	How about we not close and tear down any more schools to build crappy condos. I for one would be happy to pay more school tax in order to keep schools open and class sizes from becoming bloated.	3/4/2026 1:42 PM
1538	na	3/4/2026 1:41 PM
1539	Please share results of your findings from the survery	3/4/2026 1:38 PM
1540	Can you post the full study to the county site?	3/4/2026 1:37 PM
1541	My number one priority is to keep the entire Ashford Park Elementary attendance zone together. Redrawing boundaries or dividing our community into multiple schools is not an acceptable solution. Ashford Park is a cohesive, established community. Splitting the attendance zone would disrupt long-standing relationships, weaken neighborhood connections, and create unnecessary instability for families. Keeping our community intact must be the guiding principle in any proposed changes. I strongly urge the district to pursue solutions that preserve the full Ashford Park Elementary attendance zone as one unified community, without fragmenting it through redistricting.	3/4/2026 1:36 PM
1542	Please keep in mind the teacher to student ratio. Kids absolutely need and deserve the attention of their teachers in order to develop healthy bonds with the faculty.	3/4/2026 1:29 PM
1543	Communication and accurate data shared with constituents are essential in making any decisions going forward. Any fiscal concerns should be addressed at the county administrative level first. Misappropriation of funds and blatant corruption have already cost DeKalb taxpayers millions of dollars. The solution is not to resolve county caused deficits by further utilizing resident tax dollars (ESPLOST) to expand and consolidate schools at a hundred-million-dollar price tag. DeKalb can't build its way out of its self-inflicted funding crisis. The quality of education in DeKalb is not going to improve with larger schools and larger class sizes. DeKalb risks losing families to other cities/counties if the high achieving schools they rely on are closed in favor of mega schools. Our children are more than just numbers and dollar signs on a spreadsheet. This decision has wide-ranging impacts on their education and futures.	3/4/2026 1:27 PM

1544	My top priority is keeping the entire Ashford Park Elementary attendance zone intact. Redrawing boundaries or breaking our community apart across multiple schools is simply not an acceptable outcome. Ashford Park is a well-established, tightly connected community. Dividing the attendance zone would fracture long-standing relationships, undermine neighborhood cohesion, and create avoidable disruption for families. Preserving the integrity of our community should be a non-negotiable principle in any proposal under consideration. I strongly expect the district to focus on solutions that keep the full Ashford Park Elementary attendance zone unified and to reject any plan that fragments our community through redistricting.	3/4/2026 1:26 PM
1545	n/a	3/4/2026 1:22 PM
1546	My number one priority is to keep the entire Ashford Park Elementary attendance zone together. Redrawing boundaries or dividing our community into multiple schools is not an acceptable solution. Ashford Park is a cohesive, established community. Splitting the attendance zone would disrupt long-standing relationships, weaken neighborhood connections, and create unnecessary instability for families. Keeping our community intact must be the guiding principle in any proposed changes. I strongly urge the district to pursue solutions that preserve the full Ashford Park Elementary attendance zone as one unified community, without fragmenting it through redistricting.	3/4/2026 1:20 PM
1547	It is difficult to provide feedback when we do not have the whole picture so in the void, people fill in the holes with possibilities. We would like to see where our attendance zone will move to if the closure is reality. We also need to see the implementation timeline so that families can make decisions. Ultimately, it feels like the students and the impact on children, development and education were not taken into account with these decisions. For a school system, education should be the primary goal. Don't forget the "why" when you are making decisions.	3/4/2026 1:19 PM
1548	I think this is a good ideas of using grade bands.	3/4/2026 1:12 PM
1549	The data for Oak Grove Elementary does not show a school in decline. Families are choosing to move into this community. The school is the community. Please keep this highly engaging, high-performing community institution intact. Thank you	3/4/2026 1:11 PM
1550	I think the biggest issue is the lack of diversity of the area. Years ago when City of Atlanta purchased parts of Dekalb which would be considered where all the higher income families were. It left this area to be mostly low income African American families. This lack of diversity in the remaining schools in this zip code 30032 leaves families with higher income to pursue private education for their children or relocation into better school zones.	3/4/2026 1:06 PM
1551	IF you are concerned about the underenrollment in DCSD, please work to STOP THE BLEED TO PRIVATE from elementary to middle. In our cluster, we have an average of 740 students enrolled per grade in elementary schools and only an average of 403 students per grade enrolled in the single middle school they all feed in to. Destroying a high-performing elementary school like Vanderlyn only undermines that goal by incentivizing parents who can to opt out of public school before they even try it.	3/4/2026 1:02 PM
1552	Don’t close our schools.	3/4/2026 1:00 PM
1553	The changes proposed will only lead to teachers leaving Dekalb County schools thus, unqualified teachers being hired to fill a void. There is already a lack of qualified teachers or teachers who care in Dekalb county.	3/4/2026 1:00 PM
1554	I would like more information on how well schools perform when merged based on prior performace criteria as opposed to which school building costs less to repair. That is the easy part.	3/4/2026 12:59 PM
1555	Oak Grove is at capacity with a waiting list. PLEASE do not consolidate or close this great, historic, community resource.	3/4/2026 12:56 PM
1556	The parent feedback from the 2/26 meeting was clear - the families of the students at Ashford Park want to save our school. For the students, for the teachers, for the community.	3/4/2026 12:52 PM
1557	I have taken so many of these surveys in the years. That my kids attended your schools. And I don't believe anyone has taken the questionnaire's so serious, so please make sure that if you're going to make us fill out these surveys that you take them serious and listen to the community. And evaluate what we're really trying to say, instead of just throwing it on a file	3/4/2026 12:47 PM
1558	NA	3/4/2026 12:44 PM

1559	The northeast part of Dekalb County has been very ignored by Dekalb County School board and administration. We want to have conversations mummify schools and maintain our property value. Keep Oak Grove Elementary!!!	3/4/2026 12:36 PM
1560	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/4/2026 12:35 PM
1561	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: Already exceeds the 88% utilization target (89% current; 96% projected) Has four consecutive years of enrollment growth Ranks in the top tier academically Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital Expansion. Before proceeding in this corridor, clarification would be helpful: Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment. Recent Updates to the responses: 1) Housing and organic growth near Briarlake I pulled recent housing permit data in the Briarlake area. There is measurable residential development underway within the attendance zone and surrounding corridor. Briarlake is currently at 73% utilization and is not on the closure list. Given the approved and active residential pipeline, combined with significant employment growth from large public-private investments in the area, Briarlake's enrollment is likely to increase organically over the next several years. Updates: This suggests Briarlake may naturally move closer to the 85–95% utilization range without consolidation. Eliminating capacity in this corridor before that growth materializes introduces sequencing risk. 2) Enrollment projection methodology If the district's enrollment projections rely heavily on regression models that incorporate pre-2023 data — particularly pandemic-era enrollment declines — those inputs may distort current trends. Enrollment patterns from 2020–2022 do not reflect current conditions. Projections should be recalibrated to emphasize post-2023 recovery trends and incorporate: • Documented residential development pipeline • Certificates of occupancy and permit data • Major institutional investment • Employment growth associated with CHOA and Emory expansions The central point is sequencing and risk management. We should consider slowing the process in this corridor and postponing major decisions affecting this cluster until updated projections incorporate 2024–2026 data and confirmed development activity. In a downside scenario, the district could close one of the highest-performing elementary schools in DeKalb County and then face capacity constraints at surrounding schools as growth continues. That would require reactive expansion spending and could limit the district's ability to provide adequate public services in a corridor anchored by major institutions such as Children's Healthcare of Atlanta and Emory. A phased, data-driven approach would reduce that risk and better align long-term capacity planning with documented economic and residential growth.	3/4/2026 12:35 PM
1562	Please sort this out before huge impacts to real estate and families take hold.	3/4/2026 12:29 PM
1563	My child's learning progression has been improving and I would significantly see him declining	3/4/2026 12:27 PM

	if he was relocated from the school. The teachers have worked hard with him to improve his learning skills.	
1564	I know the Ashford Park parents can be very vocal, but it's because we all moved here with the intent on making something great and being a part of something great (and given our high performing school, we've proven it). There are ways to make changes without impacting the greatness that we have all worked hard to create and strive to maintain. Thank you	3/4/2026 12:27 PM
1565	For the next round of scenarios, I recommend prioritizing fewer student transitions, minimizing transportation impacts, and preserving school communities. It would also be helpful to include clear data on enrollment, capacity, and how resources and programs would be supported under each scenario.	3/4/2026 12:20 PM
1566	I truly hope that the feedback given by the Ashford Park community is taken into true account. Having seen this plan without a viable solution is concerning that the people the public school system is built to serve was not the first line of consideration. Yes we need to find solutions to a clear issue of capacity but if doing so downgrades the experiences of the students this needs to be looked at again.	3/4/2026 12:19 PM
1567	Oak Grove Elementary School enjoys an excellent reputation and is central to this area of DeKalb County's sense of community. That, too, is a reason to retain its current standing.	3/4/2026 12:15 PM
1568	Huntley Hills Elementary school a great school and should be remodeled	3/4/2026 12:08 PM
1569	There needs to be 3rd party to verify any data or numbers presented by Dekalb. This should be approved by parents people not working for or having direct connection to the Dekalb county employees.	3/4/2026 12:02 PM
1570	I think it makes sense to close Ashford Park School and move that school population to nearby (and brand new) John Lewis School, as long as this doesn't change us to a different middle and high school cluster. Or I think it could make sense to keep Ashford Park School open and switch to a different grade band and still use John Lewis School.	3/4/2026 11:54 AM
1571	I love our school community. I want all three of my kids to continue where we started. Ashford Park Elementary is so overcrowded because so many people love it here that they literally move here to go to this school- much like my own family did!	3/4/2026 11:54 AM
1572	None	3/4/2026 11:45 AM
1573	Keep moving forward.	3/4/2026 11:41 AM
1574	We need more transparency. In every session, we should be able to see and vote for questions being asked. It’s extremely frustrating when you select only the questions you want to answer, specially when those questions were already addressed on the 20min recorded power point presentation.	3/4/2026 11:38 AM
1575	N/A	3/4/2026 11:31 AM
1576	Dont Close Oak Grove	3/4/2026 11:28 AM
1577	Do not close Oak Grove Elementary. Do not close Kittredge Magnet.	3/4/2026 11:27 AM
1578	Most important thing for us is to remain in the Chamblee cluster. We currently are at Ashford Park in German Immersion and another student at Kittredge	3/4/2026 11:26 AM
1579	Without a tenured and creditable leader for the school district, I feel the timing of this SAP brings about suspicions of the true goal of this project.	3/4/2026 11:22 AM
1580	My mother and Grandmother also taught for over 20+ years each in DeKalb county, and I believe it’s the best county	3/4/2026 11:18 AM
1581	My brother went through this last year when his school in Sandy Springs was closed. They spent hours and hours trying to state their case, but in the end the school closed. I think the decisions have already been made in closing 27 schools and that is very disappointing. On Friday night we went to get ice cream on Dresden and kids were running around and it looked like a great community of ashford park parents/kids-if you close this school you will also kill the community.	3/4/2026 11:16 AM
1582	I was curious if the option of building "up" on Ashford Park is a possibility since it's only on 7 acres?	3/4/2026 11:15 AM

1583	I am not in favor of school closing especially 27 schools in Dekalb county (absolutely too many, this is unheard of). This will disrupt the schools climate and the living surrounding neighborhoods, and communities across Dekalb County. I believe students, staff, and communities will suffer from a drastically from the number of proposed schools closing.	3/4/2026 11:09 AM
1584	Please start by talking about what has been done to save money outside the local schools. Maybe it is time to liquidate some real estate?? If success in education is what matters most, let's make that a metric too!	3/4/2026 11:08 AM
1585	N/A	3/4/2026 11:00 AM
1586	I urge the district to reconsider the methodology behind these consolidation proposals. Enrollment numbers alone do not capture the value a school provides to its community. Vanderlyn Elementary has strong test scores, engaged families, and serves as a community anchor in our neighborhood. Before closing any school, DCSD should conduct a thorough community impact assessment and explore all alternatives — including investment in facility improvements, boundary adjustments, or innovative programming that could attract more students. Our children deserve stability, not disruption driven by facilities planning that treats schools as interchangeable buildings rather than the heart of our communities.	3/4/2026 11:00 AM
1587	I think that this whole process is no considering community and school impacts.	3/4/2026 10:48 AM
1588	I would hope that you are not only closing schools that serve predominately black students. We should also use any funds saved to get teachers support in the classroom. The students of today needs more than one adult in the classroom. You may be able to keep teachers if they felt supported with behavior. Better training for behavior, and another adult in the classroom. Also, class sizes should be capped. Too many students in one class for one adult is too much. If you are consolidating to save resources, I would hope that you would not try to put 30 kindergarteners, 28-2nd graders, and 32-5th graders in one classroom. This is what makes teachers overwhelmed and leave.	3/4/2026 10:48 AM
1589	When will DCSD do an actual audit and show it to the community? Why are you not restructuring county office?	3/4/2026 10:37 AM
1590	we did fine in the 80's no nibble schools .We stayed in elementary until 7th then went straight to high school 8-12	3/4/2026 10:34 AM
1591	We need more information. We need to know the downstream effects of VES closure. I understand we won’t know boundary lines but we at least need some options to think through. Are we waiting for a new chestnut to be built? If DHS capacity or space is an issue we want to know specifically so that we can work Collaboratively to help DHS (our kids will be students there too) but also to keep VES open.	3/4/2026 10:31 AM
1592	Traditional is the best way to go. I feel the reason for having elementary, middle, and high school is to give the kids a chance to develop and grow in their own environment.	3/4/2026 10:29 AM
1593	I am not in favor of small school closures and believe these neighborhood schools are important for our communities and raising confident and well adjusted children.	3/4/2026 10:26 AM
1594	I heard Dr. Sauce speak about concerns that Dekalb enrollment was going down before the SAP recommendations came out. I do not think that closing Ashford Park or Vanderlyn are going to help those numbers. I'm not personally wealthy, but I can ensure you that many of the families with children at these schools have the means for private schools, and will leave if you choose to close their community school. That would be an unfortunate loss to Dekalb.	3/4/2026 10:26 AM
1595	I don’t support any consolidation. Keep all the schools. If not enough enrollments, rooms/facilities can be rented out for group activities within the community for people of all ages.	3/4/2026 10:26 AM
1596	Good luck! There will be no way to make everyone happy. Thank you for including us in the process.	3/4/2026 10:24 AM
1597	Need to provide guidance on where students would go if their elementary school is closed.	3/4/2026 10:14 AM
1598	Do not close Oak Grove. We love our school and want it to be around forever so our friends and neighbors can continue to have a great school in our neighborhood.	3/4/2026 10:14 AM
1599	There is tremendous value in neighborhood schools. They create community. Children know the other students and families. With increased anxiety rates amongst kids, this is important to	3/4/2026 10:09 AM

	their social-emotional learning and growth.	
1600	Bus routes are already delayed or having issues- bussing kids further will make this much worse and the walkable Vanderlyn community will be destroyed	3/4/2026 10:05 AM
1601	I hope someone has properly “vetted” the current superintendent so that he is not arrested and indicted as others have before him.	3/4/2026 10:01 AM
1602	De acuerdo	3/4/2026 10:00 AM
1603	My primary concern is not losing Brockett. We are a community. We help and uplift one another. More than half of our families struggle with financial needs. We make sure as a community that their kids do not miss out on experiences or have any basic needs unmet. Please let us continue caring for one another.	3/4/2026 9:59 AM
1604	Although some schools are older and would require updates, all costs need to be considered. The cost of many children newly requiring busing, the effect on parents (so many of whom work and may not be able to handle time changes without paying more for gap childcare). A neighborhood elementary school acts as a kind of glue for a community. That's hard to put a price on and we can all agree that people spend too much time on screens and not enough time in person. A neighborhood school encourages both student and parent face to face contact. I don't know how to quantify this, but I know it's important.	3/4/2026 9:54 AM
1605	N/A	3/4/2026 9:53 AM
1606	Teachers are mean and treat the kids like prisoners. I witnessed a teacher making a child sit in the floor and not get any pizza due to hit acting up. He’s in the 1st grade what do they expect. My son tells me the teacher doesn’t allow them to outside for recess because they’re bad. What type of teachers are at these schools and telling kids their bad that already stay in a low income neighborhood is a disaster for their future. The school or administration doesn’t care!!!	3/4/2026 9:42 AM
1607	The magnet program with kittredge already provides some relief from oak grove, Henderson and lake side and no reason to change it unless you want to ruin our neighborhood, our community and our housing values. Oak grove is one of the top performers in the state so why do you want to mess with it?	3/4/2026 9:40 AM
1608	I am writing to strongly oppose the proposed closure/repurposing of Vanderlyn Elementary (and Ashford Park Elementary). The current SAP scenarios prioritize building age and arbitrary capacity targets over the proven academic excellence and irreplaceable community culture of these schools. 1. Penalizing High Performance: > Vanderlyn boasts an 89% 3rd-grade reading proficiency—one of the highest in the district. It is logically inconsistent to dismantle a "winning coaching staff" and a proven culture of literacy while the district claims to prioritize "educational adequacy." 2. Unique Physical Assets (Land vs. Concrete): Vanderlyn’s land size is a unique, non-replicable asset that supports physical activity and community wellness. If the district moves toward an 800-student model, newer "land-locked" sites cannot accommodate that density without becoming concrete jungles. Vanderlyn’s footprint is exactly what a high-capacity school should look like. 3. Economic Risk and Enrollment Exodus: These schools are the primary reason families move to Dunwoody and Brookhaven. Closing these top-tier assets will not "reallocate" students within DeKalb; it will drive an immediate exodus to the private sector, permanently damaging the district’s tax base and reputation. 4. Lack of Human Centricity: > The district admitted that academic data was not used in Version 1. I request that "Community Value" and "Academic Performance" be added as primary metrics for Version 2, rather than just "Building Adequacy. "We pay a lot in taxes to go to the schools that we do. We should not be penalized because the school board district doesn't know how to manage the financial aspect of running our district.	3/4/2026 9:37 AM
1609	We love Brockett Elementary and do not want it to close. Our community is very involved and many would gladly cover extra costs to keep it open. Pleas consider the community impact!	3/4/2026 9:35 AM
1610	Cut costs by reducing administrative bloat and expensive office real estate deals for said administrators.	3/4/2026 9:33 AM
1611	From an occupational therapy lens: grouping of emotional and behavioral maturity, motor development, executive functioning, activities of daily living, nd leisure life- it makes MUCH more sense to band grades accordingly, rather than closing and overcrowding schools. However, I do not love the idea of continuity of community- it does leave much less time for community to feel connected to their school, which ultimately lends itself to less parent involvement	3/4/2026 9:27 AM

1612	6th graders should not be at the same school as 18 year olds	3/4/2026 9:18 AM
1613	I would highly encourage the closed schools to be available as public spaces for kids to play, with investment in infrastructure to support that - skate parks, pools, playgrounds, etc.	3/4/2026 9:12 AM
1614	Based on my earlier comment, public messaging around SAP has emphasized whole-school transitions, yet discussions indicate Vanderlyn students would likely be split between neighboring schools, if closed. This is not comparable to combining two half-capacity schools and would create significant feeder disruption and transportation impact. If this proposal is driven by high school facility needs rather than elementary inefficiency, and if future enrollment shifts may relieve this pressure, closure should not be assumed as the default solution. The Dunwoody cluster cannot be evaluated using the same framework as clusters with multiple under-enrolled campuses. Before moving forward, families need cluster-specific reassignment modeling, receive school utilization projections, and a clear explanation of why expansion or shared-campus options were not prioritized. Thank you for asking for and reviewing our feedback. We really appreciate it.	3/4/2026 9:12 AM
1615	Cost need to be decreased so money can be distributed equally to meet the needs of all students and properly compensate staff members. These small neighborhood schools have become entitled! Parents think they control the school!	3/4/2026 9:10 AM
1616	The districts pushed it to align seats to fiscal bands is unnecessary and more research needs to be done on how smaller community based schools benefit elementary students. Vanderlin has always been a high performing school.	3/4/2026 9:09 AM
1617	Oak Grove Elementary is a valuable asset to the DeKalb County School District and has consistently maintained strong enrollment and active community support. Its strong academic performance, dedicated teachers, and engaged community make it an example of a successful neighborhood school that should be preserved and supported. Please please please do not close OGE!	3/4/2026 9:08 AM
1618	To ensure the Dunwoody cluster’s long-term success, I am requesting that the next round of scenarios include comprehensive, cluster-level data. Specifically, we need to see reassignment outcomes, capacity projections, class size impacts, and transportation analysis clearly mapped against SAP drivers like enrollment trends and utilization. While I recognize the district faces under-utilization challenges elsewhere, the Dunwoody cluster remains highly utilized with post-pandemic enrollment growth. Decisions regarding school closures must account for the specific demand and enrollment trajectory of local schools like Vanderlyn. Our community’s real estate market and family stability are built almost exclusively on the high performance of these public institutions. Families districted for Vanderlyn bought their homes (and paid a significant premium) SOLELY because their home was districted for this school. Closing a high-demand, well-utilized school like Vanderlyn risks a significant trust gap. As we saw during the pandemic, when families lose confidence in the district's stability, they move to private options. This would not only exacerbate declining enrollment across DCSD but would likely leave the remaining Dunwoody schools either overcrowded or destabilized. I urge the district to prioritize data that reflects these local realities before finalizing any reassignment plans.	3/4/2026 9:06 AM
1619	Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization.	3/4/2026 9:03 AM
1620	Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization.	3/4/2026 9:00 AM
1621	KEEP REDAN ELEMENTARY OPEN!!!	3/4/2026 8:58 AM
1622	I don't think consolidation in and of itself is a terrible idea, but it certainly needs more fleshing out before being implemented. This should not happen until the 2027-2028 school year at the earliest, and repairs to schools that will remain need to happen first.	3/4/2026 8:57 AM
1623	Do better. Don't release another round of scenarios until you have fully explored and explained all of the impacting factors (including without limitation traffic patterns, impact to enrollment, student outcomes in larger vs smaller schools, where students will be moved to, how 'expanded' schools will be expanded and with what budget, impact to staff and teachers,	3/4/2026 8:54 AM

	consideration of special programs like magnets, etc.). Don't release another round of scenarios until this district has permanent and established top leadership (including superintendent).	
1624	These older buildings are not safe, not able to secure easily, and are sending some serious health risk.	3/4/2026 8:53 AM
1625	Closing excelling schools is not the solution. Think performance over profit. Smaller schools perform better in test than larger ones so consolidation only increases the chances of even lower academic achievement	3/4/2026 8:53 AM
1626	Transportation is one of the largest district costs Walkable schools reduce bus routes and staffing. Vanderlyn has a high walkability rate	3/4/2026 8:47 AM
1627	Shutting high performing schools especially those with STEM certified programs is only going to negatively impact Dekalb county students. Closing schools with low enrollment (50% or less) makes sense. But taking hundreds of children out of a high performing school to place them in schools that don't have the capacity to absorb them does not make sense. For example, instead of expanding Dunwoody high school into Vanderlyn or using Vanderlyn land for a new athletic field, why not expand the current facilities upward and have the school expand by another floor. Can also expand later covering the parking lot while at the same time creating a vertical parking complex. Shutting down a high performing elementary school with stem program is counterproductive and will only negatively impact the students and Dunwoody as a whole. New families moving to our town or families staying in our town will plummet.	3/4/2026 8:38 AM
1628	The stability of our neighborhood and the financial health of local families are inextricably linked to the continued excellence of our public schools. Unlike other regions facing different demographic shifts, the Dunwoody cluster has maintained high utilization and post-pandemic growth. Because of this, any proposal involving a high-demand school like Vanderlyn must be grounded in its specific enrollment trajectory rather than broad district-wide averages. To ensure the cluster remains viable, I am asking that the upcoming planning phases include a more granular, data-driven analysis. It is essential for the community to see how reassignment, class sizes, and transportation logistics specifically align with the SAP's focus on enrollment trends and space efficiency. We have seen in the past, most notably during the pandemic, that when the district's long-term planning feels unpredictable, families frequently transition to private education. A decision that undermines the stability of our high-performing schools risks driving away the very students we seek to retain, potentially leaving our remaining facilities either overburdened or fundamentally weakened. I urge the district to prioritize a data set that reflects these local realities before moving forward with any final plans.	3/4/2026 8:30 AM
1629	They're definitely schools out here in DeKalb county that needs to be closed down or be revamped or we teach the teachers how to handle specific situations the 504 plan does not always protect the children with disabilities	3/4/2026 8:30 AM
1630	I think it can work but want about teachers and their jobs when this does happen and support staff	3/4/2026 8:30 AM
1631	We are making choices that affect children's, and parent's , lives. Be considerate, be responsible, and use good judgement. Don't make these decisions in a vacuum and by looking at a map. Propose, listen, and make them based on what is best for our children.	3/4/2026 8:30 AM
1632	Specific to the Dunwoody Cluster, we know there is overcrowding at middle and high school level. But once the new Sequoia high school is built, we can rezone students and relieve pressure from Peachtree Middle and Dunwoody High School. Vanderlyn can expand on the land and give the high school a needed softball field while still keeping the elementary school as is. There is no need to close Vanderlyn. Our students would be split up, neighborhoods would be split up as Dunwoody Elementary and Austin cannot hold our students. Close Kingsley since it cannot be expanded and divide the students up between Chesnut and Vanderlyn.	3/4/2026 8:27 AM
1633	Vanderlyn Elementary is a high-performing school that serves as an important anchor for the surrounding neighborhood. It consistently delivers strong academic outcomes and benefits from a highly engaged parent and community base. While the facility may be older, it remains a well-functioning neighborhood school that supports student success and community involvement. The school is also well integrated into the surrounding neighborhood in ways that benefit both students and residents. Many families are able to walk or have very short commutes, and the current traffic patterns and school access points work well within the community. Reassigning students to other schools could introduce unnecessary transportation	3/4/2026 8:24 AM

	challenges and increased congestion in surrounding areas. As the district evaluates future facility scenarios, it is important to consider not only building capacity but also the academic performance of schools, the strength of neighborhood school communities, and the practical impacts on families. Preserving strong, high-performing neighborhood schools like Vanderlyn should remain a priority when considering consolidation options.	
1634	Present a cohesive plan that is all of the steps. Fix the HVAC. It's been broken for years. If the county's failure to repair the HVAC system is used as an excuse for closing this school it will be exceptionally disappointing.	3/4/2026 8:24 AM
1635	Oak Grove is adaptive. It can handle any division.	3/4/2026 8:21 AM
1636	I am concerned about the school lottery (choice) decisions. What happens to those who successfully lotteried in? I don't think it would be fair to make those families re-lottery since their kids have already been used to going to a certain school. The assignment should be made on CURRENT enrollment at schools.	3/4/2026 8:20 AM
1637	This district has constant instability in leadership and education. The leader of this study is a remnant of someone under federal indictment. We need the district to be going in the direction of stability and predictably while addressing ongoing issues with existing schools. This project would do the opposite and permeate additional instability.	3/4/2026 8:19 AM
1638	Pre-K is vital to having children ready for K'garten. Without it, a number of children are "left behind" at the beginning.	3/4/2026 8:18 AM
1639	These initial scenarios revolve heavily on schools in the South Dekalb region with few if any on Dekalb's North side schools. Also, older schools (such as Redan Elementary) with deep historical community roots need renovation, not closure. We need to look at the community impact, not just the economic end game, when implementing these scenarios.	3/4/2026 8:09 AM
1640	My deep concern regarding the recent 20,000-student enrollment decline in DeKalb County and its impact on the southside community. It is difficult for me to believe that all of these students only affect the southside. Yet, resources have been allocated to hire a company to provide raw data that may not be effective in addressing the issue. The southside of DeKalb County is indeed affected by these changes. However, the decision to bus our children to other schools where there is insufficient space and a shortage of teachers is troubling. Additionally, the plan to place portable buildings on school property is unacceptable. I urge you to revisit these decisions and consider holding meetings within each school community. The area superintendents are in place and capable of hosting these discussions to engage parents and community members effectively. Please be advised that parents from Redan Elementary and surrounding communities, including others in the southside, are prepared to stand united in opposition to any school closures. We demand that our schools remain open and that we receive the resources we deserve.	3/4/2026 8:05 AM
1641	Focusing on behavior,Impact, and consequences rather than just outcome.	3/4/2026 7:57 AM
1642	Serious thought needs to be given to impacts to traffic patterns within neighborhoods and the accuracy of population projections.	3/4/2026 7:57 AM
1643	My daughter attends Oak Grove Elementary due to school choice. Oak Grove is a great school with great teachers. It is small class sizes and we need that for our daughter to succeed. Smaller class size works. If she would not been able to attend Oak Grove we would have left Dekalb County Schools and put her in private	3/4/2026 7:56 AM
1644	Oak Grove has an 86% utilization rate with a projection rate of 96% by 2026. 200+ students on waitlist with 100+ of them being Kindergartners. This school is a foundation of a community built right into a neighborhood. Please do not close it.	3/4/2026 7:54 AM
1645	You are incompetent idiots, and you should be shaping the future of our children on a whim.	3/4/2026 7:45 AM
1646	If the seats are the problem, then bring back pk-7/8/12.	3/4/2026 7:19 AM
1647	Show exactly what the programming would look like at the school include elective/special classes, extracurricular activities and what grade levels they would be open to.	3/4/2026 7:02 AM
1648	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools	3/4/2026 6:54 AM

	already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with f iscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	
1649	Dear DeKalb County School Board Members and Community Leaders, I am writing to express my deep concerns regarding the proposed school consolidation and redistricting plans in the DeKalb County School District, particularly the ideas involving the repurposing of middle schools into elementary schools and high schools into middle schools. While these changes are framed as necessary due to declining enrollment—from facilities built for 110,000 students down to just 92,000 currently—they risk creating environments where younger elementary students (K-5) could end up sharing spaces or transitioning into buildings previously used for older grades, effectively blurring the lines between elementary and middle school experiences. This "cascading" approach to consolidation, as described in the district's Student Assignment Project, may lead to unintended mixing of age groups during transitions or in repurposed facilities, which I believe is a fundamentally bad idea for the developmental well-being of our children. First and foremost, elementary school students should not be exposed to environments influenced by middle school dynamics. Children in grades K-5 are at a vulnerable stage, building foundational social skills, self-esteem, and a positive attitude toward learning in a nurturing, age-appropriate setting with high levels of supervision. Middle schoolers, however, are dealing with puberty, peer pressure, and more complex social interactions, which can introduce behaviors like bullying, profanity, or risky experimentation that younger kids might imitate through observational learning—a concept supported by developmental psychology research on behavioral contagion. In today's digital age, where kids already face premature exposure to mature content via the internet and social media, we must protect them from additional real-world influences from older peers. Studies on school configurations show that combining younger and older students in shared spaces often leads to increased behavioral issues, lower attendance, heightened anxiety, and even long-term academic setbacks for the younger ones. For example, transitions into middle school settings are linked to spikes in aggression and emotional distress, and extending this downward could disrupt the protective environment elementary kids need to thrive. Varying maturity levels among children mean that while some might cope, many—especially those in high-poverty areas common in DeKalb—could suffer from intimidation, reduced motivation, or the adoption of negative habits, exacerbating existing disparities. Moreover, this proposal comes at a time when DeKalb County has repeatedly failed to deliver on promises of improved educational standards and outcomes. Despite years of initiatives and funding, the district has 45 schools identified as low-performing—the highest number in Georgia—making families eligible for the state's voucher program to escape to private options. Eighty percent of these underperforming schools are in South DeKalb, highlighting a persistent failure to address inequities. Recent reports show that while six schools were removed from the federal improvement list due to progress, three more were added, indicating inconsistent gains at best. The district has also faced legal challenges, such as the Georgia Association of Educators' lawsuit over the failure to issue proper contracts to nearly 700 certified employees, violating state law and undermining teacher stability—key to quality education. Historical issues, like the protracted retirement fund case where the district suspended payments to employees, further erode trust in leadership's ability to follow through on commitments. Promises of better resources, simplified processes, and aligned support in the district's Forward Together Transition Plan and Strategic Plan have not materialized into widespread improvements, as evidenced by ongoing enrollment declines driven by families seeking better opportunities elsewhere. How can we trust that consolidation will suddenly fix these deep-rooted problems when past efforts have fallen short? Instead of rushing into closures and repurposing—such as turning Bethune, Champion Theme, Lithonia, McNair, and Miller Grove Middle Schools into elementary schools, or Cedar Grove, Lithonia, and Towers High Schools into middle schools—we should focus on investing in existing structures to maintain separation of grade levels and address root causes like affordability, birth rate declines, and performance gaps. Smaller, dedicated elementary schools foster better outcomes, with research indicating optimal sizes around 300-500 students for balanced engagement without the disruptions of larger, mixed-age settings.	3/4/2026 6:52 AM

	Community input is crucial, but let's prioritize proven strategies over cost-cutting measures that could harm our children's growth. I urge the board to reconsider these plans and seek alternatives that preserve age-appropriate separations and genuinely fulfill long-overdue promises for educational excellence in DeKalb County.	
1650	Oak Grove is a generational school for our family. We intentionally chose to live in this neighborhood so our children could attend Oak Grove, just as previous generations in our family have. This school is not simply a building to us — it represents continuity, community, and a long-standing investment in public education.	3/4/2026 6:40 AM
1651	I do not have any.	3/4/2026 6:10 AM
1652	Merging small elementary schools as opposed to closing them and corralling them in middles schools would be a better route in my opinion. I would also like to know the plan to rehouse all the staff that will be affected, including administrators.	3/4/2026 3:52 AM
1653	We strongly oppose the closure scenario for Ashford Park Elementary. The proposal relies on obsolete Facility Condition (FCA) data that ignores the current $23.5M renovation already resolving building issues. Closing a school with 171% utilization—the highest in the district—is counter-intuitive, especially when neighboring schools lack the capacity to absorb 822 students. I request the Planning Department develop a 'Maximize Asset' scenario for the next round. Instead of closure, the district should pivot to Strategic Expansion and Targeted Rezoning. Expanding the current construction to include a permanent wing would capitalize on existing taxpayer investment, while surgical rezoning can balance enrollment without the fiscal negligence of abandoning a newly renovated facility.	3/3/2026 11:45 PM
1654	Please save our community schools even if the outcome is higher taxes. Our children are our future and investing in that future is a priority of our institutions, corporation and all of society.	3/3/2026 11:36 PM
1655	Expand pre-k enrollment by eliminating the lottery. If schools are overloaded and some are not, offer relocation due to parent's locale for work (or other valid scenarios)	3/3/2026 11:12 PM
1656	As a DLI lottery parent, I hope the district carefully considers how any consolidations or grade band changes may affect the continuity of Dual Language Immersion programs. Families often choose these programs through the lottery process with the expectation that students can continue through the full pathway. Maintaining stability and clear program pathways for DLI students should be an important factor when developing future scenarios. If possible, preserving access and minimizing disruption to established DLI cohorts would be greatly appreciated by families participating in the program.	3/3/2026 10:07 PM
1657	The IB programme is vital to raising informed and caring citizens. We are in an era of strife not seen in many decades. IB creates world citizens who are empathetic and thoughtful. It creates students who are aware that differences make us stronger.	3/3/2026 9:46 PM
1658	You need to provide the full scenario - if X happens, then these children do this/ go to this school - to get real feedback. This piecemeal approach only creates confusion, panic and distrust.	3/3/2026 9:46 PM
1659	HPM emphasizes that choices are driven by data such as declining enrollment and building conditions. But…their numbers are wrong and only support their cut and paste plan. If we had instead used the almost $8M we paid HPM and instead invested in our schools, we'd be in a much better place.	3/3/2026 9:33 PM
1660	if a school building is underutilized, consider creative solutions like re-purposing one part of the building (i.e rent out the space) instead of overcrowding a school that is functioning well at its current capacity	3/3/2026 9:27 PM
1661	We have paid HPM nearly $8M. This is financially irresponsible!	3/3/2026 9:20 PM
1662	School choice options are vast and should likely be evaluated on program effectiveness in relationship to the stated goals of the choice program. I will add that Kittredge should be expanded to serve grades 4-8 district-wide, rather than having two high achievers programs. Wadsworth is severely under-enrolled. With the right location and marketing, a Kittredge program that serves all of DCSD at grades 4-8 could be a diverse and full program that offers opportunities in advanced/accelerated coursework grades 4-8, fine arts, world language and extra-curriculars/athletics. And such a program could offer choice HS pathways to places like DSA, DECA, Arabia and Chamblee or even include a CTAE element that begins in 6th grade with options that continue in a chosen pathway including the major CTAE pathway schools.	3/3/2026 9:19 PM

	You could open more seats and prepare more for our very brightest students. The options for Carnegie Unit coursework at grades 6-8 is vast. What an amazing opportunity you have there.	
1663	Consider not putting younger kids in the high school bracket schools. Emotional development of kids will be hampered if they are interacting at an early age with high school kids.	3/3/2026 9:18 PM
1664	Run a TRANSPARENT community input process, then listen. Instead of reassigning students to different schools, fix the enrollment issues. The community sees SAP as a bandaid that won't solve the bigger problem. It's become clear to me in the last several years that the county doesn't put students and their education first. A few examples — 15 min recess, laptop usage for kindergarteners, Saturday testing proposals (thankfully nixed, but wow!).	3/3/2026 9:15 PM
1665	Devon Horton started this process and has been indicted on 17 federal counts tied to alleged embezzlement, wire fraud, and tax fraud. So, who, involved in this, is corrupt or financially benefitting?!	3/3/2026 9:12 PM
1666	My mom said, someone's pocket is benefiting from this and they could care less about us kids.	3/3/2026 9:07 PM
1667	As you consider which schools may need to close, consider some of the information provided above. Closing an IB school or a magnet school would greatly decrease the benefits of an education in this school system.	3/3/2026 9:05 PM
1668	If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion.	3/3/2026 8:56 PM
1669	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/3/2026 8:47 PM
1670	For the next round of scenarios, it would be helpful to have more details for each school—like enrollment numbers, staffing, and how student transitions will be handled. A clear timeline and plans to minimize disruptions would also be really useful.	3/3/2026 8:27 PM
1671	None	3/3/2026 8:22 PM
1672	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be	3/3/2026 8:18 PM

	sequenced carefully to avoid eliminating capacity needed to support major community investment	
1673	Leave the community and schools alone If you actually care about the children	3/3/2026 8:17 PM
1674	N/A	3/3/2026 8:16 PM
1675	Please respect the neighborhoods and what this will do to the value of homes	3/3/2026 8:10 PM
1676	Oak Grove elementary school consists of students who live in the houses that pays the most property taxes. Those parents deserve to have a Oak Grove elementary school, hands off of the school..	3/3/2026 7:56 PM
1677	I wonder why there isnt full enrollment in the schools?? People are leaving poorly performing school districs and moving to good ones. The school board is incompetent and needs to be taken over by the governor again.	3/3/2026 7:35 PM
1678	Tracy only tour schools while not in session/ students and staff were not present during visits! to see the schools operating at full capacity!!	3/3/2026 7:34 PM
1679	Evansdale's DLI French immersion program is part of the reason that families move to the Evansdale neighborhood or enroll in school choice. Smaller neighborhood schools are the only reason people choose DeKalb anymore because they don't want their kids in mega schools with overpacked classrooms like surrounding counties and if DCSD decides to close this many schools that are so special to the community, their enrollment will end up declining and this will also have a huge negative impact on student learning and special programs. Not only will DeKalb lose many families, but great teachers as well! Transportation is already an issue at our school because of the shortage of bus drivers, how are they going to accommodate sending our students to schools even farther away? Many of our classrooms that don't have homerooms are used forSPED, ESOL, EIP, and Gifted instruction so our teachers can allow small group instruction to help students grow in academic achievement . I have worked at Evansdale for over ten years and had planned on staying there until retirement. This news and scenarios are devastating to our staff and community when we have already gone through so much with superintendents over the last decade. Evansdale should be chosen as one of the schools to expand rather than close for many reasons.	3/3/2026 7:34 PM
1680	Closing Brockett Elementary would be a detriment to Tucker. This sweet school has been a cornerstone of our Brockett area community.	3/3/2026 7:09 PM
1681	Oak grove should remain the same.	3/3/2026 7:06 PM
1682	Please make questions clear and easy to understand	3/3/2026 7:06 PM
1683	It is one thing to propose school closures because of empty seats. It is another thing entirely to propose closures because the district board and administration failed to properly maintain buildings and now expect the community to bear that burden and experience the consequences of the district's inaction. Evansdale does not have empty seats. I would ask that DeKalb focus on one thing at a time. Prioritize collapsing schools with half empty buildings and then perhaps we can invest resources into the maintenance of schools that are community gems. Keep in mind these small community schools are the reason many families do not move to other districts like Gwinnett with gigantic elementary schools.	3/3/2026 6:55 PM
1684	I dont understand why the plan started by a clearly corrupt superintendent and possibly board is being pursued. No one who pays taxes and has children in a school could possible be happy with these scenarios	3/3/2026 6:48 PM
1685	Keep OGES open as a diamond in the crown of DeKalb County Schools.	3/3/2026 6:44 PM
1686	Instead of closing schools, start reinvesting money in neighborhood schools that have been a staple for decades. Oak Grove started to slip because there was no reinvestment, yet it was allocated to help other lesser wealthier districts. Erego many people switched to private schools and then COVID. I went to OGE and so did both my kids. So many neighbors are distraught about this. Please don't do this. This school is the reason for the neighborhood.	3/3/2026 6:41 PM
1687	Family has moved to that community just for that school. Great test scores and a waitlist to get in	3/3/2026 6:34 PM
1688	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) •	3/3/2026 6:23 PM

	Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	
1689	Please do not close Midvale. These are horrible ideas. Leave the elementary schools alone!	3/3/2026 6:19 PM
1690	Do the hard thing. it won't be perfect but it will be a strong start to responsible managment of resources and of support for students	3/3/2026 6:08 PM
1691	Vanderlyn should be utilized to relieve pressure on Dunwoody high	3/3/2026 5:57 PM
1692	Tucker is growing tremendously closing down an elementary at this time is short sided, and most likely lead to a reversal in the next few years. So all in all a waste of time.	3/3/2026 5:48 PM
1693	I beg you to hear from the homeowners and parents of these children, NONE of whom agree with this proposal. We want what is the best interests of our children, and closing Oak Grove Elementary is not among those. Please hear us. Signed - a worried and loving mom of a 4 year old, pre-k boy and 6 year old kindergartner girl, enrolled in Oak Grove Elementary.	3/3/2026 5:28 PM
1694	Oak Grove already exceeds the 88% utilization target. Due to economic factors in the community, there is projected growth. There has been four consecutive years of enrollment growth. Oak Grove ranks in the top tier academically.	3/3/2026 5:09 PM
1695	don't change any of the edcuational structure, think of the schildren there and also the teachchers who ae helping the students to thrive and learn. many teaeeachers go above and beyond to care for and help their students.	3/3/2026 5:02 PM
1696	Please layer on boundaries with facilities as I am not understanding how all these overcrowded schools and where students in our current cluster are going by shutting down whole bldgs that seem to be critical to functionality! It makes no sense when every school is at/over capacity nearby.	3/3/2026 4:40 PM
1697	n/a	3/3/2026 4:39 PM
1698	Severely lacking is any mention of what DCSD will do with all of the other buildings its closing. Even if you don't know the final quantity of vacant buildings yet, I think round 2 of scenarios needs to include clear guardrails so that community can understand how their neighborhood will be impact (vacant building? community services? different instructional use?) I also think STUDENT-FIRST outcomes need to be much more present in the next round of communications.	3/3/2026 3:47 PM
1699	I was frustrated that the communication from the county was not clear that the February and March feedback sessions would be focused on a different phases. We had scheduling difficulties and we're unable to attend any of the feedback assessments during the first week they were offered and we're planning on coming to the March scenarios. This was also an issue with the Druid Hills high school Renovation meetings where it was not made clear that they would be accumulative. Your communication team needs to be more clear when sending out messaging that these meetings are going to be on separate topics. The times offered for the meetings were also inconvenient for many families as there were no weekend options and no virtual options offered outside of a traditional workday.	3/3/2026 3:37 PM
1700	Please keep ASHFORD PARK ELEMENTARY open!	3/3/2026 2:33 PM
1701	We moved into this neighborhood in 2009 because of the amazing schools. The community is incredible, with parent volunteers and incredible public education and test scores. If our school	3/3/2026 2:27 PM

	community gets split up, many parents will opt for private school instead. This will bring down the test scores and overall success of the county's schools. It's tragic, really.	
1702	I was at the Feb. 25 meeting, and I think the next meeting should take into account parents' time more. The first hour was taken up by a video we have all seen repeatedly these past 20 months and then a Q&A from QR codes that were easy questions that most of us already knew the answers to. We had gotten a babysitter, and I would like to next time trust that a meeting like this will be worth my time. An open forum where actual questions are addressed early on, not 1.5 hours into the meeting.	3/3/2026 1:55 PM
1703	Please provide us with enough information to actually be able to offer thoughtful feedback. There are buildings that were left off the 'buildings phase' and it is impossible to discuss buildings without knowing the plan for where the students will be going.	3/3/2026 1:53 PM
1704	Pk-8 and 6-12 is crazy, I would never combine that many children and of that wide an age range. You are asking for kids to get hurt and possible bullying. If you do this I will take my kids to private	3/3/2026 1:19 PM
1705	There is little trust in the school board and the Board of Education these days. This should be considered as you continue with this process.	3/3/2026 1:08 PM
1706	STOP and prioritize things that matter and reduce BLOAT at district headquarters giving teachers more autonomy to do what they are trained to do!!!!! There education matters!	3/3/2026 1:01 PM
1707	Do away with school choice!	3/3/2026 12:44 PM
1708	Please create clear and transparent KPIs for these changes which will absolutely be damaging. What improves and by how much.	3/3/2026 12:32 PM
1709	Do not close Midvale Elementary and turn Livsey into a mega school. Look at Smokerise Elementary and how it's doing since combining with Idlewood. Everyone hates it there. People are leaving the public school system. I know families in that cluster that purposely chose private BECAUSE of how bad Smokerise Elementary is. It's too big. The kids get lost in the sea of students. These small elementary schools are a blessing to our community. Closing them because it's at 88% capacity instead of 90% is bullshit.	3/3/2026 12:26 PM
1710	Please provide more clarity and data on this decision making process. Thank you.	3/3/2026 12:26 PM
1711	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/3/2026 12:25 PM
1712	In general I think the lack of information and transparency and unclear timeline has been incredibly disappointing and the district would be best served listening to parents and following the relevant data. Evansdale Elementary is on track to surpass 100% enrollment in the next 5 years. Closing this neighborhood school would be a travesty.	3/3/2026 12:14 PM
1713	Please don't close Evansdale. We have a strong, welcoming community, and would be devastated to lose our elementary school.	3/3/2026 12:12 PM
1714	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing	3/3/2026 12:09 PM

	excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	
1715	Do not close Evansdale	3/3/2026 12:05 PM
1716	Pushing elementary-aged kids into larger schools is deeply problematic from a child development and community-building standpoint. It will push even more DeKalb County children into private and charter schools, particularly among families in higher socio-economic brackets who have that flexibility, and drain crucial support by those families from neighborhood schools.	3/3/2026 11:43 AM
1717	Can you please allow more time and education around any next steps? It can be challenging to get the word out. It seems as if you are NOT trying allow feedback when you shorten survey time and the decisions seem to already be made. This is a major disservice to children, parents and community members. Also, the empty schools and property affect homeowners and we would like to know more about that.	3/3/2026 11:35 AM
1718	Have Robert Shaw stay opened by adding Prek-3 year olds and extending the grade levels to 8th grade.	3/3/2026 11:34 AM
1719	I don't like the idea of 6th graders in with high schoolers. They need that transition period before high school and mixing with older children.	3/3/2026 11:33 AM
1720	Schools are part of community identity. Make cost reductions in the county bureaucracy, not cuts to schools themselves.	3/3/2026 11:32 AM
1721	Keep Oak Grove!!! It is apart of our community. Think about all the students, teachers, staff, and future families that would be affected by this. Don't you care about them?!	3/3/2026 11:17 AM
1722	Please address how IB, STEM, and language programs will be saved and address average class sizes instead of just talking about "empty desks."	3/3/2026 11:15 AM
1723	I think if the team is going to name specific schools on the list then the team needs to be prepared to speak to the specific scenario for each school. If you are not ready to discuss specific school scenarios then do not begin a list that requires many answers to questions that you are not ready to answer.	3/3/2026 11:08 AM
1724	Address our questions if you want us to make informed recommendations. The SAP committee lost the trust from the community the moment you came up with scenarios completely out of the left field.	3/3/2026 11:05 AM
1725	Stop wasting our property tax money on misguided ideas and charging time to this pointless and useless project.	3/3/2026 10:54 AM
1726	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be	3/3/2026 10:52 AM

	sequenced carefully to avoid eliminating capacity needed to support major community investment.	
1727	Thanks for your hard work. You can't make everyone happy, but consolidation needs to happen. Carry on.	3/3/2026 10:52 AM
1728	Please consider the traffic patterns, overcrowded classrooms, renovation budgets when thinking of merging schools. Would small renovations to multiple schools be more beneficial than a large rebuild to "mega schools"? Also- having soooooo many children in one school just seems to be an obvious issue with behavior, parent involvement, school discipline, funding, criminal activity... the list goes on and on. Long live small neighborhood schools!	3/3/2026 10:50 AM
1729	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/3/2026 10:46 AM
1731	Part of the reason I bought my house was close proximity to Midvale ES. I am less than a quarter mile from the school and I believe closing it will negatively impact my housing value.	3/3/2026 10:42 AM
1732	The lines need to be redrawn so they aren't gerry-mandered. There is plenty of diversity in our communities, but the communities are split by socio-economics and ethnicity because of how the lines are drawn. Please be thoughtful in your maps.	3/3/2026 10:39 AM
1733	How can the county spend millions of dollars on ANOTHER building for people not working with students but not put in money to fix building that students have been in for years. Such mis-management of money. The people outside a school house should not be making decisions like this. They are wayyyyy out of touch.	3/3/2026 10:05 AM
1734	Starting from facilities is a mistake. You have to consider the current success of various schools, the different program options, community support, and not breaking up schools that are at capacity. Also, get rid of computers for elementary kids and severely limiting middle school. These devices are hurting our children. Our kids are the first generation not to exceed the prior generations in terms of cognitive function and the main difference is computer based learning.	3/3/2026 10:05 AM
1735	Closing Oak Grove will terribly affect the future of our students, the community and will not benefit anyone.	3/3/2026 9:55 AM

1736	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment	3/3/2026 9:39 AM
1737	We respectfully urge the district to prioritize stability, student well-being, and community trust in its final decision. Ashford Park is a thriving K–5 neighborhood school that is working well for students and families within the Chamblee cluster. Preserving what is already successful is often the most responsible course of action. We ask that the district protect the continuity, identity, and strength of our school community by maintaining the current structure.	3/3/2026 9:37 AM
1738	I think it is extremely short sighted to close both Evansdale and Henderson Mill. Closing one could work and you could get the community around it, closing both is just dumb and won't work	3/3/2026 9:23 AM
1739	Keep Midvale as it is, let us be the only IB elementary school in the area. Keep the grades as they are. Dont close these schools.	3/3/2026 9:17 AM
1740	The data does not support this consolidation. OGE is at full utilization as defined by the county. The other schools in the area are either at full utilization or will be in the next few years as they recover from the Covid decline. Dekalb made the decision not to return to in house learning and it hurt the system dramatically. Recovery is underway and those years of remote learning should not be factored into the equation as a measure of the utilization. The current growth in the area should be used as a factor instead. Shortfalls in the Dekalb budget are a direct result of poor management and selection of crooked Superintendents (more than one!!!) These hires have cost the county in so many ways. The students and parents should not bear the burden of these horrible decisions. The new interim Superintendent seems to be on the right track.	3/3/2026 8:59 AM
1741	When this proposal was first announced, it was presented as an initial step in gathering community input — not as a final decision. However, it now appears that the process may be moving forward in a way that feels predetermined. The lack of transparency and shifting tone around this issue is deeply concerning and undermines trust with families who are trying to engage in good faith.	3/3/2026 8:47 AM
1742	The data does not support large elementary school sizes. The community is invested in Midvale.	3/3/2026 8:23 AM
1743	Parents will not allow there children to move from a high achievement school to a lower achievement school. If you want to keep performing students in Dekalb schools do not break up or close performing schools.	3/3/2026 8:13 AM
1744	Please prioritize student safety, transportation efficiency, smaller class sizes, and strong communication with families. Any changes should include community input and a clear transition plan to minimize disruption to students' academic and social development.	3/3/2026 8:12 AM
1745	Our community's position is clear: the proposed closure is not supported by the district's own data, would create significant capacity challenges within the Tucker cluster, and is being advanced by consultants whose financial interests are not aligned with the best outcomes for students (as shown when this was done in Austin, TX: https://www.austinchronicle.com/news/what-the-task-force-wrought-11751623/) Several factors indicate that closing Midvale is not in the best interest of students or the community: **IB Feeder Pattern** Midvale serves as an established IB feeder school. Closure would disrupt a pathway that many families intentionally choose. **Walkability and Community Access**	3/3/2026 8:11 AM

	Midvale is highly walkable for Tucker families. Reassigning students to Livsey Elementary would reduce safe walking access, increase traffic on already congested roads, lengthen commute times for young students, and likely increase district transportation costs. **Capacity Concerns** Livsey is reported to have capacity for approximately 300 students, while Midvale currently serves about 430 students — excluding potential impacts from Brockett Elementary, which is also under consideration. This represents a material capacity mismatch that warrants careful review. **Facilities and Expansion Potential** Midvale has substantial space for future expansion. Livsey already relies heavily on trailers near a busy roadway, raising both safety and long-term infrastructure concerns. **Academic Performance** Midvale currently holds the highest CCRPI score in the Tucker cluster. Disrupting a high-performing and improving school requires a clear, data-driven justification. **Public Education and Equity Implications** Consolidating neighborhood schools primarily for financial reasons, while the district simultaneously supports charter expansion and private school vouchers, creates a conflicting message for families and risks further straining traditional public school enrollment. More broadly, the assumption that larger, consolidated schools are inherently more economical or educationally effective has not been clearly demonstrated in this case. Research and experience often show that school stability and community connection are key drivers of student success. The Tucker cluster is already experiencing enrollment instability, including families leaving Smoke Rise Elementary. Additional disruption is unlikely to rebuild confidence in the system and may further weaken long-term enrollment trends. Midvale's community may be perceived as quiet, but it is highly engaged and paying close attention. Families expect a transparent process that meaningfully incorporates community input and fully evaluates long-term student impact. **Process Integrity Concerns** Finally, I would like to discuss concerns around process integrity: One of the most concerning details to arise is that the SAP originated under former Superintendent Dr. Devon Horton, who was federally indicted in October 2025 and subsequently resigned. In response, the Board ordered a forensic audit of district contracts and purchasing activity, acknowledging the need for heightened oversight of decisions made during his tenure. Two additional facts warrant review: * The Executive Director of Student Assignment overseeing the SAP, Sarita Smith, was hired during Horton's administration and previously worked in Evanston-Skokie School District 65. * The third-party vendor HPM was also contracted under Horton's administration to support the consolidation analysis and dashboard used to inform closure recommendations. We are not alleging misconduct by any individual. However, given the Board's own decision to initiate a forensic audit, it is reasonable and prudent to ensure that the SAP recommendations — which carry irreversible community impact — have been independently validated. **Requested Actions Prior to Any Board Vote** * Confirmation that the forensic audit scope includes all SAP-related vendor contracts, including HPM * Full public disclosure of the HPM contract (authorization date, scope, compensation, and approving authority) * Disclosure of any financial interests HPM or its principals may have in construction, renovation, or repurposing work resulting from school closures * Publication of the full enrollment projection methodology, data inputs, and model assumptions underlying Scenario 17	
1746	It is important to separate the cost factor of maintaining multiple schools with the benefits of access for children and reduced commutes. The area already struggles with difficult traffic, and unless these patterns are considered when choosing school closures/expansions, it may lead to more chaos for children and their parents. If a school is expanded, the logistics involved in that expansion must be considered beyond just adding or expanding buildings - the effect on the entire community must be considered.	3/3/2026 8:11 AM
1747	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: Already exceeds the 88% utilization target (89% current; 96% projected) Has four consecutive years of enrollment growth Ranks in the top tier academically Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/3/2026 8:06 AM

1748	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/3/2026 8:04 AM
1749	Please do not close Oak Grove. We love our neighborhood school, it is vital to our community.	3/3/2026 7:00 AM
1750	Currently, the district lacks International Baccalaureate (IB) options and has limited AP course availability. Additionally, DeKalb has fewer specialized high schools compared to neighboring districts, such as dedicated technical, STEM, health sciences, aviation, or technology-focused schools, despite strong demand that doesn't follow the decreased enrollment trend, and the potential for corporate partnerships to support these models. If the district is considering consolidation, it must be paired with a clear investment strategy that expands high-quality academic and career pathways equitably across the county. Without a commitment to opportunity expansion, closures will intentionally exacerbate inequities rather than solve structural challenges. I encourage the Board to ensure that any restructuring plan includes a forward-looking vision for academic innovation and equitable access to advanced and specialized programming.	3/3/2026 12:17 AM
1751	Oak Grove community is rallying to save our school. I will be attending the various feedback meetings virtually or in person to voice my opinion.	3/2/2026 11:14 PM
1752	Do not move onto Phase 2 yet. Parents have't had enough time to give feedback before decisions are made at the end of Phase 1.	3/2/2026 11:01 PM
1753	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/2/2026 10:20 PM
1754	Has it been considered to expand up at Ashford Park and double the footprint with a second story since it sits on a flood plane? The Brookhaven and Chamblee needs and scenarios are VASTLY different from south dekalb county. We cannot afford to close school buildings up here.	3/2/2026 9:43 PM
1755	Need more parent feedback and consideration for our community and not merely what others from a distant location providing feedback without living in region. Would entertain tax write off donation for families to support rebuild of Ashford Park School.	3/2/2026 9:24 PM
1756	Do not remove the only IB elementary school from a cluster. IB schools cannot be moved.	3/2/2026 8:44 PM
1757	Midvale is the happiest place I could have imagined for my kids, and I could not be prouder of what my little school has become since I was there in the 80's. The IB program is incredible. I	3/2/2026 8:30 PM

	beg you to keep this wonderful community intact and don't rip these kids away from this warm and loving space.	
1758	More information on specialty schools like Robert Shaw and how the program will look if a merger was to happen.	3/2/2026 8:25 PM
1759	Closing Vanderlyn is a disservice to the community. Yes, there is a newer school down the street, but many parents still choose school choice and come to Vanderlyn rather than stay in that newer building. Vanderlyn is known for their perfomance. I believe one of the reasons we have an older building is that updates seem to be only done in alphabetical order, rather than in what is needed. Also, I felt like more meetings should be held in the Dunwoody area and elsewhere so that everyone has the chance to speak up. I have copied and pasted what I have said above because I feel all of it is important. I think closing our school will not be good for the community and for the high-achieving students who attend it. The only downside to Vanderlyn is that the building is old, but it is very well-maintained. The parents and staff form a relationship that benefits the whole child. We do not look at what we can gain outside of it, but build lasting relationships. I used to attend Vanderlyn when I was a child, and a teacher there, whom I ended up working with as an adult at Vanderlyn, was the reason I wanted to become a teacher. Teachers like her are rare, and we have a good number at our school who push students to succeed, but that also comes with supportive parents and a strong community. So, only wanting to close Vanderlyn down because of the building's age seems a bit unfair. I feel like Vanderlyn is on this list because the high school is planning to build a stadium for home games and needs parking. Vanderlyn sits on a lot of unused land, so building an updated Vanderlyn where the playground is and building up, not out, would help everyone get what they want. By moving Vandrlyn to the end of the playground field, there is room to create a large parking lot for Vandrlyn Staff and the High School. During work hours, there are assigned sports for Vandrlyn Staff and Visitors, and others for the high school. When the high school has a game, all spots are available at night. Currently, the county is putting money into fixing schools they know they are not going to keep, so why not save that money and use it to help rebuild schools that are showing good numbers and where the kids are learning? Vanderlyn is a school that is highly sought after by parents when they make school choices or even when choosing a home to buy. Vanderlyn has been more than a school to the neighborhood; for people like me who grew up here, it is also home. It is where you made new friends and had great teachers, and you still came back to see them after you graduated, or even to work there. I am not the only former Viking who came back to work there. Also, our administration teacher has been great and supportive, and will guide you if you need help. Also, closing that many schools will create overcrowding and large class sizes. Larger class sizes make it harder to reach and help the students.	3/2/2026 8:11 PM
1760	Keep current school communities together.	3/2/2026 8:04 PM
1761	Please keep the current school community together.	3/2/2026 8:04 PM
1762	If anything 7-8 together and 6 out!	3/2/2026 7:58 PM
1763	N/A	3/2/2026 7:34 PM
1764	Keep small neighborhood schools!	3/2/2026 7:33 PM
1765	Please look at the impact a school will have on the community, homes, city proposed project like the Tucker Path, and traffic before closing an integral part of our neighborhood community. Sometimes less is truly more.	3/2/2026 7:15 PM
1766	Would like to see all ashford park students moved to John Lewis and have John Lewis moved to chamblee cluster. Or would like to see Ashford park expanded instead of shut down.	3/2/2026 7:09 PM
1767	We moved to this area specially for the Ashford Park, Chamblee Middle & Chamblee High school zones. I understand you have empty seats in south Dekalb and the county should address that. Closing or rezoning Ashford Park will likely result in another problem, more empty seats due to upset families. If you want to keep Brookhaven money in Dekalb county let Ashford Park stay in the Chamblee cluster.	3/2/2026 6:55 PM
1768	Middle schools seem to struggle across the board serving students	3/2/2026 6:43 PM
1769	As DeKalb County School District weighs consolidation and grade banding decisions, we urge district leaders to look beyond test scores and attendance data alone. While academic metrics matter, they do not capture the full value of a school community. Research and lived experience consistently show that smaller schools foster safer environments, stronger	3/2/2026 6:15 PM

	relationships between students and staff, greater family engagement, and more individualized instruction. In smaller settings, children are known by name, behavioral concerns are identified earlier, and teachers can tailor learning to individual needs—benefits that are often diluted in larger, consolidated campuses. These qualitative factors directly impact student confidence, belonging, and long-term success, even if they are not immediately reflected in standardized scores. This is especially important when considering schools like Midvale Elementary School. Midvale is not just a building with enrollment numbers; it is a high-functioning academic community with International Baccalaureate and STEM-certified programming, strong family involvement, and an established culture of innovation and support. Closing a school that already demonstrates educational quality, community commitment, and specialized programming would undermine the very strengths the district seeks to promote. If changes must be made, they should protect proven, high-performing, community-centered schools like Midvale and prioritize models that maintain the benefits of smaller learning environments rather than replacing them with larger, less personalized systems.	
1770	DO NOT CLOSE MIDVALE. DO NOT CLOSE MIDVALE. DO NOT CLOSE MIDVALE. The only IB elementary in the Tucker Cluster with and IB middle and IB HS...don't break that consistency and distinguishment. Neighborhood elementary schools are the best thing in our Tucker Cluster...the staff at TMS was the biggest shock coming from a well organized elementary school. The LAST thing parents need are elementary schools where the staff and administration fail them. Smokerise Elementary was DCSD's chance to show the Tucker Cluster they were capable of success in a "super" elementary school and it's been the biggest failure, families leaving Smokerise in droves for school of choice at Midvale and Livsey and private school. We have zero trust that you can facilitate, across the board, a succesful district of large elementary schools. Take your one sided research you paid for and throw it in the trash. We'll never recoup the money you spent on that, but you can do the right thing and save our thriving neighborhood schools from this poor thought out plan.	3/2/2026 6:13 PM
1771	I would love to know how this study arrived at 33% of elementary schools need to be closed if the student population has only decreased by 17%	3/2/2026 5:14 PM
1772	Closing elementaries like Ashford Park without understanding the organic success drivers will cause failure to the student, district, and local area. Ashford Park is a (original) capacity of 500 but a school of 800 students which means it's in high demand for a reason. If you take that away the high demand for enrolling students in this school will go away. Parents are ready to move away or take their students to private school (this will syphon more money out of the district). Desirability of the area will go down. DCDS will lose claim to high performing ES like Ashford Park and Vanderlyn. Parent involvement will go down in a new mega school. Most importantly, if Ashford Park students lose the Chamblee cluster, all of the above will be further accelerated.	3/2/2026 3:53 PM
1773	If closing schools is the only option, both Hawthorne and Livsey should have been on the closure list instead of Evansdale. Evansdale has a lower field that could be used for an upper grade building and the existing building could be PreK - 2. It has more room for expansion than Livsey and Evansdale's building adequacy score is higher than Hawthorne. I worked for 8 years at Hawthorne. That building was in HORRIBLE shape...much more run down than Evansdale. Hawthorne had trash cans everywhere in the hallways catching water and the bathrooms smelled terrible because there were always issues with the plumbing. Hawthorne also had a boiler blow up (thankfully on a weekend) right before we were supposed to come back from Covid. Unless Hawthorne has had a TREMENDOUS amount of work since I left 4 years ago, I don't know how they got a high FCA score. It doesn't make sense that Evansdale is on the closure list over these schools.	3/2/2026 3:47 PM
1774	I hope you really take the local community and SAP committee feedback into consideration before any next round of scenarios. We need to build trust back into our school system before it’s too late.	3/2/2026 3:28 PM
1775	Please consider adding in more information to the scenario prior to releasing another round. For various reasons, parents, teachers, and staff have a lack of trust in DCSD. Not acknowledging the lack of trust doesn't make it go away, it only reinforces why those populations don't trust the county. For weeks we heard about being able to provide feedback and then were given 20minutes, in a two hour meeting, to provide it, but only if it was a question the county felt could be answered. Don't talk to us as if we don't know what's going on. Work with us. Discuss with us. Problem solve with us. Please get rid of this consulting firm. They aren't helpful.	3/2/2026 3:26 PM
1776	MIdvale Elementary is tucked back into a neighborhood. It is much bigger than Livsey. It has a huge field, and also could be expanded, if necessary. Livsey is on a main street and is pretty	3/2/2026 2:49 PM

	much landlocked with no expansion capabilities. If Livsey has to remain a school because of the land donation requirements, then make it a Preschool or Early Development Center. I am sure Dekalb has many other things that Livsey could become. Thank you.	
1777	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/2/2026 2:48 PM
1778	The APS community is strongly opposed to the idea of closing our school. Not because we think the building is sufficient but because there is not clear solution to rehome the APS students that doesn't result in either displacing a significant portion of the JLE population or dividing our community. We propose deep research and feasibility study of rebuilding APS on the current lot - while we have been told 7 acres is insufficient space, there is evidence in urban settings for schools being build on smaller plots and even similar projects for schools in the Atlanta area, like E. Rivers. Further, we are steadfast that our community maintain their participation in the Chamblee Cluster.	3/2/2026 1:16 PM
1779	Do not pull any schools or communities from the Chamblee cluster. It is working!	3/2/2026 12:56 PM
1780	I think you need to re-think this situation over. Beside, there is a lots of children misses the first week of school. That count needs to be to be counted at least 2-3 weeks after school starts, this way all the late comers and transferring students can be added in. It also takes several of weeks before DeKalb receives transfer school records from the student transferring school. It took 3 weeks before my grandson could start your district school. All because it's computerized.	3/2/2026 12:35 PM
1781	I am deeply concerned by the conflict of interest of HPM's involvement in this process and their ties to the corrupt Horton. Has anyone looked at the negative impacts of their previous projects (Jefferson County, KY, for example)? Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	3/2/2026 12:21 PM
1782	Please show actual site plan and study showing that AP can't be expanded. Has this been researched? This is the only school in the immediate area. To close it, would mean all the schools are on the north side of the cluster. *The AP community has no interest in being redistricted into another cluster. Non--starter.	3/2/2026 12:05 PM
1783	I would like to see how rezoning changes these scenarios.	3/2/2026 11:46 AM
1784	We love the schools in our area, please open a new Middle School in the north Decatur area	3/2/2026 11:42 AM

	the choices are not great	
1785	if you are trying to save some money maybe close the charter schools. that has taken many children out of their community schools. Im sure they are fine schools but knowing the cost involved for instance globe academy sitting on very very expensive land should change before closing neighborhood schools.	3/2/2026 11:35 AM
1786	if we are closing down ashford park elementary school for expansion, where are the children going to go?	3/2/2026 11:31 AM
1787	More direct information is needed. It already feels like the board and district will make decisions based on what they want to do rather than based on the feedback provided. By providing vague scenarios and asking people to comment on them, you provide yourself a loophole for not hearing the feedback that's necessary to this procedure. We moved to this area for the schools, we have so far been disappointed and would consider moving or trying different schools if the magnet schooling changes.	3/2/2026 11:04 AM
1788	Specific building utilization and projected enrollment would be helpful to see in the next round of modeling.	3/2/2026 11:00 AM
1789	I left Ashford Park off my list. If closed and rehoused to Montgomery you will certainly have a massive increase of traffic on Ashford Dunwoody Rd. passing two large private schools as parent will not put their kids on a bus before daybreak.	3/2/2026 10:56 AM
1790	Redistrict Drew Valley into John Lewis Elementary. Redistrict north of Peachtree Rd. to Montgomery. Keep Ashford Park in the Chamblee cluster.	3/2/2026 10:34 AM
1791	Please provide more opportunities for special needs kids. Dekalb County has Coralwood for Pre-K through K, and then Tapestry for middle and high school. However, there is nothing for grades first through fifth. And, both of those schools are based on a lottery system and are hard to get into. Our special needs students deserve better options.	3/2/2026 10:30 AM
1792	The principal and teachers at HMES are wonderful, as is the cultural diversity.	3/2/2026 10:13 AM
1793	I would like to see scenarios that explore the opposite of the first scenario. One where the south is potentially expanded.	3/2/2026 9:36 AM
1794	Please include detailed cluster-level data in the next round, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and any feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization.	3/2/2026 8:45 AM
1795	Do not move magnet programs from their current clusters. Same comment as above. You will lose the students. They will leave and go to another private or charter and the funding + academic achievement for that child will also go.	3/2/2026 8:39 AM
1796	Dekalb is a wide ranging geographical footprint and needs the micro schools in each area to best serve the families close by. This benefits the students and the families and the ability to be full participants in the educational and extra curricular experience. Please DO NOT try to consolidate and cluster large groups of kids in wide ranging age groups resulting in the closure of local school campuses.	3/2/2026 8:35 AM
1797	I would ask that you include more information about where you plan for the students whose schools are closing to attend. There are many options and possibilities floating around, and it is impossible to know how to think if we don't know where and when children will be moved. I would also ask that you have feedback meetings in each cluster that will be tailored to the specific needs and issues there. Each cluster and each school has such a unique situation, and some have the resources to speak louder than others. Please make it accessible for all and give equal time to each community.	3/2/2026 7:59 AM
1798	Please be transparent and disclose the same information through general messaging sent via schools, email and meetings. Right now I have gotten completely different updates and information from emailing directly with school board members, standard communication sent through our school and DCSD, and from attending meetings in person. There is a lot of distrust with Dr. Horton's scandelous departure from the district, the extreme plan sent out in February, and discordant information from dealing directly with DCSD leadership.	3/2/2026 7:07 AM
1799	Next round of scenarios need to be clear, detailed, and leave no room for guess work as parents. They also need to explain why and how schools will be combined with details of new	3/2/2026 5:20 AM

	#'s and configurations. They need to detail what staffing, administration, and counseling, and other human resourcing will outfit the building. Additionally, we need to hear about our specialty schools like DSA, DECA, ELIZABETH Andrew's Arabia HS as well. Finally, it should be clear what will happen with buildings that will be close and explicit which buildings will close and those being repurposed how they will be repressed. Thers is a mention of more resources, What will be those resources? Also, will this limit school choice options for parents who are looking for something else? I.e. I want my child to attend Chamblee will they be able to or will they be forced into their home school that may become more violent? Have the community combinations been considered based on community interactions i.e. joining rival schools?	
1800	Transparency is key to this decision for all parents to see. You need clear metrics and criteria upon which you are basing your decisions and you need to publish these so there is no appearance of favoritism or 'peanut butter spread' so that you are trying to equally negatively impact everyone. The criteria you use should include total cost per student which will show where the county is being more efficient with its money (i.e., lower cost/student). The total operational cost should include the costs to run the school -- faculty, administration, utilities, maintenance, food, etc. This doesn't mean to move a lot of kids to a school that is not large enough to handle them and class sizes exceed 25 students per class. The learning environment must be strong or all your efforts will result in kids unable to learn, teachers dealing with discipline issues with much larger classes, etc. There are other places to find excess costs that the county can reduce before it decides to consolidate elementary schools. Look at the overhead /admin costs of the school system (e.g., the non-teaching roles that add no value to the students). Look at the sourcing and procurement process as it can probably be improved significantly to reduce costs. Look at current vendor contracts and if they need to continue. Last, you need to consider the growth plan for the county...where development is occuring and more businesses/residents are moving into the area. You do not want to close a school in a current area that might have lower capacity, but there is going to be a huge development that will bring a lot of new residents to the area (e.g., the old North DeKalb Mall development). You need to consider current usage/capacity of a school and the future usage/capacity so you do not create more problems for the county.	3/1/2026 11:59 PM
1801	I am curious about how the High school overcrowding will be addressed with Lakeside students. Has there been discussion around AP courses being offered at the former Globe Academy lower school? What is being done with that property?	3/1/2026 10:04 PM
1802	Dunwoody residents in Dunwoody High cluster.	3/1/2026 10:02 PM
1803	There needs be a revision of the information that is being presented that simplifies it.	3/1/2026 9:42 PM
1804	We are a close knit community and shutting down Ashford Park would be detrimental to our community, the area as a whole, and would force families out of the public school system.	3/1/2026 8:01 PM
1805	Redistributing the Chamblee cluster will sacrifice many high achievers from the Dekalb system. Not opinion. Based on many real life conversations.	3/1/2026 7:51 PM
1806	I feel that schools with special programs should be evaluated and expanded and upgraded. Neighborhood schools deserve a place and our community.	3/1/2026 6:17 PM
1807	It is so important to keep neighborhood schools, so more thought should be given to closing multiple schools in adjacent districts. It should also be a big priority for all students to be able to remain in their current schools they've already started in, so a phased closing leaving upper grades in place needs to be considered.	3/1/2026 6:14 PM
1808	Putting 6th to 12th grade together is asking for problems	3/1/2026 6:07 PM
1809	Please continue to invest in magnet programs and the Dekalb School of the Arts!	3/1/2026 4:11 PM
1810	Do not close Vanderlyn!	3/1/2026 4:04 PM
1811	If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake?	3/1/2026 3:51 PM

1812	Strong, stable elementary environments are important for students and communities, and I would like to better understand how this proposal supports long-term cluster planning. I support solutions for high school overcrowding, but it would be helpful to see complete modeling on reassignment, receiving school enrollment and capacity, transportation, and feeder impacts before decisions are finalized.	3/1/2026 3:11 PM
1813	Oak Grove just had a recent investment in it's roof , beautiful artificial turf installed on the playground & new playground equipment	3/1/2026 2:57 PM
1814	As the district develops the next round of scenarios, it would be helpful for the community to see clear, side-by-side modeling that shows projected enrollment, utilization rates, class sizes, transportation impacts, and feeder alignment under each option. Transparent cluster-level data will allow families to understand how proposals align with the district's stated goals around efficiency, access to opportunities, and long-range sustainability. For the Dunwoody cluster specifically, I encourage the district to explore campus-level and phased solutions that address Dunwoody High School capacity while preserving stable elementary access in the surrounding neighborhood. Given the unique proximity of Vanderlyn Elementary and Dunwoody High School, thoughtful reconfiguration or grade band adjustments within that footprint may provide alternatives to full closure. Finally, I encourage the district to consider not only utilization percentages, but also community stability, walkability, equity implications, and the impact of transitions on younger students. Long-range planning decisions should balance system-wide efficiency with the value of maintaining strong, cohesive elementary communities. Thank you for continuing to gather input before advancing future scenarios.	3/1/2026 1:57 PM
1815	We just bought in Ashford Park with the excitement of the elementary school, it would be a great detriment to the neighborhood to lose it.	3/1/2026 10:39 AM
1816	Druid Hills HS is overcapacity and will be overcapacity once built. Redistricting students who live near 285 would make sense.	2/28/2026 10:47 PM
1817	Merging several "home schools" into one larger campus will inevitably lead to overcrowding and strained resources. Research consistently shows that smaller learning environments produce stronger academic outcomes. Overcrowding works against that progress. In addition, consolidating multiple school communities into one site will significantly increase peak-hour traffic along Covington Highway, which already experiences heavy congestion. Concentrating hundreds of additional families into one arrival and dismissal window creates safety concerns and unnecessary strain on local infrastructure. Smaller, neighborhood-based elementary schools support stronger academic performance, safer traffic patterns, and healthier community connections.	2/28/2026 10:29 PM
1818	Priority is to maintain the Chamblee cluster and not tear apart our community.	2/28/2026 6:57 PM
1819	Please see above. The next rounds should be a start over. Instead of a building firm, spend a bit on a PR firm, do some good non-controversial project that could make you gain our trust, and then we can discuss large structural changes.	2/28/2026 4:03 PM
1820	Prefer traditional scenario and not opposed to 4bands, but strongly oppose the others because of the age considerations with younger kids with kids so much older	2/28/2026 3:40 PM
1821	In the future please consider having cluster-specific meetings. It would be helpful to engage substantially when it's community-focused.	2/28/2026 3:24 PM
1822	Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be	2/28/2026 3:05 PM

	sequenced carefully to avoid eliminating capacity needed to support major community investment	
1823	Oak Grove Elementary School (OGE) is already a strong performing school. The success of OGE kids is collaboration of parents and school teachers, with years of effort building it. The culture may form again after dissemination but it will take several years. Please pause major consolidation in schools in north Decatur area. The Druild Hills/North Druid Hills corridor area is experiencing unprecedented investment and job growth, which is attracting more families to the Oak Grove, Briarlake, Sagamore Hills elementary school area. These schools may require expansion in a few years. DSCD should look at significantly underutilized schools, and use the good experience from well utilized schools to help them.	2/28/2026 2:41 PM
1824	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4-16. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion.	2/28/2026 2:18 PM
1825	Perhaps Ashford Park can continue to be renovated and become a new magnet school. Kittredge has a massive waitlist.	2/28/2026 1:58 PM
1826	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	2/28/2026 1:23 PM
1827	I emphasize and refer back to my response to Question #4.	2/28/2026 12:28 PM
1828	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment	2/28/2026 11:46 AM
1829	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential	2/28/2026 11:03 AM

	pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	
1830	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	2/28/2026 10:14 AM
1831	You need to consider the fact that you are ignoring the impact this will have on parents in South DeKalb. It appears that benefits are being pooled to North DeKalb.	2/28/2026 9:55 AM
1832	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16 Oak Grove: Already exceeds the 88% utilization target (89% current; 96% projected) Has four consecutive years of enrollment growth Ranks in the top tier academically Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	2/28/2026 7:46 AM
1833	Will there be a map available of how this will play out. Yes the list is there but it is sort of confusing because you cannot really see what is going on	2/28/2026 7:20 AM
1834	We moved to DeKalb County for the dual language immersion programs, please do not cut these as part of these efforts.	2/27/2026 8:46 PM
1835	I feel like there is concern around potentials RIFs if we are talking about physical buildings closing/being repurposed. Is it possible to address the possibility of minimal reduction since more teachers will be needed in each building	2/27/2026 8:31 PM
1836	Hi think I might attend these activities	2/27/2026 7:31 PM
1837	30 years ago we had only elementary schools and middle schools. The shift to the current model has seemed beneficial - keeping younger kids in different environment than older (thinking especially high school. 6-12. That's a little crazy)	2/27/2026 7:27 PM
1838	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing	2/27/2026 6:59 PM

	excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment	
1839	In terms of student assignment, we hope that our cluster will not be shifted to cross 285. This would seem inefficient for busing. We'd rather still have our neighborhood (Evergreen Forest) flow into the Druid Hills cluster as Druid Hills Middle School is quite close.	2/27/2026 6:41 PM
1840	Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization.	2/27/2026 4:44 PM
1841	If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? 5. Who is responsible for this process and why is HPM leading the meetings? The board needs to take responsibility for these decisions. HPM has a vested interest in capital investments in the SAP program and the board seems to be abdicating their responsibilities so that they can point their fingers at everyone else if something goes wrong. A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment. In addition, Phase 1 input needs to be extended for a much longer period. Releasing the SAP recommendations the week before Winter Break and only give families and community members a couple of weeks to give input shows a lack of respect for the stakeholders.	2/27/2026 4:44 PM
1842	Scenario 1 proposes 27 elementary closures — significantly more than the previously referenced range of 4–16. In evaluating this scenario, it is important to consider whether each school recommended for closure truly advances the district's stated goal of addressing underutilization. Oak Grove already exceeds the district's 88% utilization target (89% currently and 96% projected next year). It has experienced four consecutive years of enrollment growth and ranks in the top tier academically. Closing it would require substantial redistribution of students to Sagamore Hills and Briarlake, both of which would face capacity pressures or boundary disruption as a result. Closing schools that are already at or near target utilization does not meaningfully reduce excess capacity; it primarily shifts students within the system. If the objective is to close the utilization gap efficiently, priority should be given to schools operating well below 70% utilization, where consolidation produces measurable capacity gains without creating new strain elsewhere. Before final decisions are made in this corridor, additional clarification would be helpful: Were recent employment expansions and documented residential pipeline activity incorporated into enrollment projections? Were pandemic-era enrollment trends weighted in a way that may understate current recovery and growth? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital and operating costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake to absorb its students? A phased, data-driven approach that focuses first on the most significant sources of underutilization would better align with fiscal responsibility and long-term planning. In a corridor experiencing sustained investment and enrollment growth, decisions should be sequenced carefully to preserve capacity needed to support the community's future.	2/27/2026 4:16 PM
1843	Maybe work on overcrowding at LHS first.	2/27/2026 3:50 PM
1844	Make sure you get all the data needed that provides you why the enrollments are low or high	2/27/2026 3:36 PM

	for certain neighborhoods. What is the tax base for some of the schools that are being considered to be closed is it because lower households of school aged kids (senior) more rental properties that maybe contributing to low propoerty taxes being collected how do you get state laws that corporations or buisness pay into the tax support for schools, ensure all children in Dekalb have the appropriate access to resoures that set them up for success, make sure the communities know what your needs are often and share in variouls platforms, should not be hearing about first time as a dire issue on the news. Pair up with the CEO of Dekalb and other commmisioners to share updates in community forums. I am a taxpayer although i dont have children but adjustment in school placement could negatively impact the value of my home or if done right could improve my value so consider me a partner	
1845	I was disappointed to see that so many schools with majority lower income families may be closed. It seems like those should be invested in more to improve enrollment	2/27/2026 2:26 PM
1846	Ashford Park represents a successful, deeply connected community of students, families, and educators. Our strength comes from the relationships and consistency we have built together. While a building may change, our commitment to one another does not. If relocation is unavoidable, we asked that our entire school community remain intact and continue within the same middle and high school cluster to preserve stability, continuity, and the academic progress our students deserve.	2/27/2026 2:06 PM
1847	Ashford Park is more than a building, it is a strong and high-performing community of dedicated teachers, engaged parents, and thriving students. We are committed to staying together as one school community, regardless of the physical building we are placed in. If relocation is necessary, we respectfully ask to remain unified and to stay within the same middle and high school cluster so students can maintain continuity, relationships, and the academics success this community has built together.	2/27/2026 2:00 PM
1848	The Dunwoody cluster and District 1 overall does not have the same problems as South Dekalb. In the south you can take an entire school, close it and move the all to another school. That cannot happen in Dunwoody. We want to keep Our communities together. This will tear Dunwoody apart! Relieve overcrowding in the middle school and high school with redistricting those in our district who really should be at High Tower and Sequoia and this can fix the issue. No need to close Vanderlyn.	2/27/2026 1:40 PM
1849	I reiterate I feel like there has been a decided lack of information to make an informed decision. There has been no data given to demonstrate that any interest in our children’s education has been at the forefront, let alone even a consideration. I implore this group to release these surveys for parents to review. They are anonymous, their is some data, and it would help with some degree of transparency.	2/27/2026 1:32 PM
1850	I believe you need to work on keeping communities together rather than focusing on clusters. Communities like Ashford Park need to stay together, wherever you move them. We've proven we can handle 900 capacity communities and it's a success, let us stay together to continue to be neighbors in school and at home.	2/27/2026 1:27 PM
1851	If Ashford Park gets shifted to John Lewis is it an option to continue renovations on the current Ashford Park and turn that school into a magnet school.	2/27/2026 1:16 PM
1852	Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake	2/27/2026 12:45 PM
1853	I attended the regional community meeting yesterday (2/26 at Cross Keys) and asked specifically about teacher retention and staffing throughout this process. I was told there would be no teacher layoffs or attrition. If that is truly the expectation, I’m deeply concerned the district is underestimating the magnitude of what’s being proposed. Consolidating five elementary schools into three larger ones in the Dunwoody cluster alone will inevitably create turnover and disruption for teachers and staff. Separating these discussions—first facilities, then programs, then boundaries—feels short-sighted and risks long-term negative impacts. These elements are interconnected, and decisions in one area directly affect the others. I strongly urge the district to take a more holistic approach and meaningfully incorporate parent, staff, and student feedback as these scenarios evolve.	2/27/2026 12:27 PM
1854	Leave Vanderland as is.	2/27/2026 12:19 PM
1855	None	2/27/2026 11:54 AM

1856	Be specific as possible on numbers of children would be in schools with each different option	2/27/2026 11:53 AM
1857	No one	2/27/2026 11:45 AM
1858	My biggest goal would be to keep the Ashford Park community intact. To me the building doesn't matter, but the community and the parents and the teachers who have built such an amazing school is what matters. I want to work with the county to keep that community together in one school and remain in the Chambly cluster. I believe we could work together to make it happen, however I'm scared to be blindsided by the county making decisions outside of what is discussed.	2/27/2026 11:34 AM
1859	Ashford Park is being suggested to close. I do agree that the building has been sadly neglected over the years and does not support the current size of students. A building is not what makes Ashford Park special. Ashford Park is special because of it's community of parents and teachers. Please keep our community together. With several nearby elementary schools suggested for expansion, I think you should consider moving the Ashford Park community to John Lewis. Proximity makes sense, school size make sense and with neighboring schools either suggested for expansion or already have expansions in progress I think the current John Lewis students could feed into those schools as needed.	2/27/2026 11:30 AM
1860	I was a DCSD student who was in elementary school until 7th grade, and high school in 8th grade. The lack of access to electives courses in 6-7 was severely detrimental to those students and to the programs in the high schools that depended on them.	2/27/2026 11:29 AM
1861	You need to focus on keeping the programs that make our schools valuable. Evansdale Elementary has risen in school rankings through the years for one reason, French DLI. The teachers in this program care deeply about it. The families care and are actively involved. There is an established pipeline to continue french at Henderson Middle School and an opportunity for AP French at Lakeside High School. The schools Evansdale feeds into are part of our community. Lakeside kids volunteer and are actively involved. We are one cohesive unit, with the aim of giving these young children a quality dual language education. You have forgotten about the children in this discussion by starting with buildings. Your consultants have failed to acknowledge how these schools are the central cores of our neighborhoods, and have been for generations.	2/27/2026 11:19 AM
1862	1. Proceed with vital improvements that were already approved on the budget and is essential for student/facility success. 2. Consider stopping the School Choice option and allow students who are going to be re-distributed with new boundaries to choose where their children are moved and give those students first rights of refusal as to where they are moved to. 3. Possibly utilize the buildings already open but redistribute the grade bands which would reduce the over-capacity at the middle/high school (specifically in the Dunwoody cluster).	2/27/2026 11:13 AM
1863	Please keep Vanderlyn!	2/27/2026 11:07 AM
1864	This plan was started under a person that is now indicted on federal charges, I do not trust anything about it. No one wants their local neighborhood schools closed so their child can attend a larger, further school. STOP THIS PLAN.	2/27/2026 10:40 AM
1865	Has the county considered the amount of new families that have moved into the Vanderlyn community and the growing current capacity of the school to be 86%. Can we also consider the amount of families that will intent to move to private school when this plan takes place and what that will mean for Dekalb Counties financial bottom line. We plan on sending all 4 of our children (2 currently at Vanderlyn) to private school if and when this plan takes place.	2/27/2026 10:36 AM
1866	Keeping existing neighborhoods intact to give kids stability and the least amount of disruption during this process.	2/27/2026 10:35 AM
1867	I am partial to keeping the 6-8 and 9-12 because I don't think the younger kids are ready to handle what all comes with socializing with the older kids. I do wish Dekalb had more options for the advanced math and languages in middle school for those that want it. It should be more consistent between clusters too. I think not having those options over the last few years has impacted on the enrollment in HMS, then LHS. There were a lot of complaints when those options were removed.	2/27/2026 9:44 AM
1868	Oak Grove already exceeds the utilization target and is expected to be even higher next year. This is a great community school and is highly relied on by all members of this community.	2/27/2026 9:03 AM
1869	The county has many ways to cut costs like actually doing their due diligence when hiring a	2/27/2026 7:40 AM

	superintendent instead of hiring someone who misuses taxpayer funds. Some of the lower student projections are due to the county's poor management. The board should focus on offering public education to all students in safe facilities that parents want to send their kids to.	
1870	A school at 89% capacity should not be closed to overcrowd two schools next to it. But it does need renovation.	2/27/2026 6:50 AM
1871	Oak Grove Elementary school has had 4 consecutive years of enrollment growth, with 2026-2027 projected to be 96% utilization. We can look into expanding Oak Grove capacity in the future to achieve the district's target of 600 students. If you get into the numbers, I am sure the comparative costs of maintaining Oak Grove will be LOWER than expanding BOTH Sagamore Hills and Briarlake to accommodate all of the current Oak Grove students, not to mention additional future students. We also love our current teachers and staff: Mrs. Hawkins has been instrumental in my son's math skills, Ms. Davidson opened up his reading potential, the after-school enrichment programs have expanded his interest in the arts, in Taekwondo, in chess. We did not have this when we attended a giant school of > 1000 students in Houston, Texas, prior to our relocation in 2024 to this community. Potential disruptions may cause these gems of teachers/staff to go elsewhere completely.	2/27/2026 6:22 AM
1872	Oak Grove already exceeds the utilization target. Keep the school cluster stable as it is in a high growth zip code and structures are not in decline.	2/27/2026 6:13 AM
1873	The district needs to shift the assignment zones. Adjust the areas to balance out student population. Shift the assignment areas south where there are seats.	2/27/2026 6:07 AM
1874	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	2/27/2026 4:08 AM
1875	I urge that Brockett be retained. We have supported that school for 51 years, recommended it to countless neighbors even in favor of alternatives. This is a strong, safe community.	2/27/2026 1:17 AM
1876	They don't all need to be the same but they do need to be equitable. The wealthy parts of the district shouldn't have k1-2, 4-5 and the least wealthy get stuck with k-8. That will create more wealthy inequalities I worked at a k-8 school in Boston Public Schools for 7 years and it was dangerous to have students with the biggest bodies in the same school with the littlest bodies. It was a scheduling nightmare because they can't all be transitioning in the hallway at the same time which is impossible to avoid between lunch times and specials as those classes are usually housed in similar areas of a school	2/26/2026 11:08 PM
1877	I would like to see clearer data showing how this scenario aligns with the district's stated focus on enrollment trends and utilization at the cluster level. I understand the need to address high school capacity pressures, but sharing full reassignment and receiving school modeling — including transportation and class size impacts — would help families fully evaluate the proposal.	2/26/2026 11:06 PM
1878	How long will HPM be involved in this process? We don't want to hear from them we want to hear from our elected officials. Of course a construction company, HPM, will advocate for closing schools and building brand new. $$$ We don't want mega elementary schools. When we bought our home it was to attend a small neighborhood school. We also looked at homes districted to Fernbank but did not want our kids to attend such a large school. Can these construction projects be funded without ESPLOST? No ESPLOST NO SCHOOL CLOSURES sounds like a great chant for the next election cycle.	2/26/2026 10:13 PM

1879	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment	2/26/2026 10:05 PM
1880	Please consider including campus-level or phased options that address secondary capacity needs while maintaining elementary access where possible. Seeing multiple solution types side-by-side would help the community better understand the full range of possibilities.	2/26/2026 10:00 PM
1881	Increase transparency. Is the goal to get every school close to 100% or just to remove schools with <100%, leading to most schools >>100% capacity, relying on aging trailers.	2/26/2026 9:14 PM
1882	Parents need better options. Consolidate the great teachers redirect financial resources to update facilities and provide more student benefits.	2/26/2026 8:52 PM
1883	Oak Grove should be removed from the list for consideration of closure. The county would be doing a tremendous disservice by closing a school that has always been a top performer in forming students to excel at the next level.	2/26/2026 8:38 PM
1884	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investmenT	2/26/2026 8:15 PM
1885	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be	2/26/2026 7:57 PM

	sequenced carefully to avoid eliminating capacity needed to support major community investment.	
1886	More details and transparency about the data, models, class sizes would be helpful	2/26/2026 7:28 PM
1887	Community members are strong in support of local schools. Don't destroy our neighborhoods	2/26/2026 7:27 PM
1888	School performance is a critical factor that should be considered. What's the purpose of having these ratings if they are not a part of showcasing the success of public schools in our county. These impact funding, these impact economics of the surrounding community, these impact resources for our children and teachers. Secondly, if student displacement has shown to impact student success rates we should be trying to minimize the amount of kids being impacted and displaced so we should be taking some of these very top performing schools across the district and working harder to be creative about how we use buildings and investing in these communities instead of dispersing and closing. The surrounding schools to Ashford park are already at or almost over capacity. Where do these families go and how awful would it be to displace families at the surrounding schools. Have you also considered the Nancy creek option and banding So perhaps have John Lewis and Ashford Park be lower and higher for the current APES enrollment. Then have Nancy Creek and Montgomery be banded or attendance overfill. Nancy Creek most likely will be available in the next year or two after Cross Keys construction is complete and doesn't need Nancy Creek to house displacement. Then everyone can stay in the chamblee cluster and elementary schools are considered more "efficient."	2/26/2026 6:55 PM
1889	Please consider meetings for community participation for weekend meeting times. Or consider offering childcare or meals for children who must attend because parents may not have childcare for meetings in the evenings during the weekdays. Weekday meetings in the evening are very difficult to find childcare to be able to attend for many families, in addition to having to get children ready for dinner, bedtime and school the next day on a weekday evening.	2/26/2026 6:38 PM
1890	Focus on educational outcomes (students first agenda) not optimizing resources. Eliminate top-down waste (think lean, our superintendent made $300k+ but only contributed felonies) and focus on improving personnel in a bottom up fashion first where impact will be felt (aggressively retaining quality teachers).	2/26/2026 6:32 PM
1891	No confidence in SAP or the Board.	2/26/2026 6:25 PM
1892	Vanderlyn has a brand and supporting community worth saving. If there's an opportunity to save the brand, this should be considered	2/26/2026 6:24 PM
1893	The treatment of Ashford Park is the most egregious part of this entire plan. Take action and do better.	2/26/2026 6:22 PM
1894	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment	2/26/2026 5:57 PM
1895	Too many transitions, spreads money and resources from PTO's. If traditional is not an option K through eight seems to be the best option that way students can begin foreign language and other advanced classes sooner. PTO resources can be distributed among the entire school instead of dividing into so many schools, then having limited resources for the fewer grade bands schools. Another reason I do not like the 6 to 12 model is because the needs of this age	2/26/2026 5:42 PM

	group vary drastically and concerned funding and resources will go to the higher grades while the 6th-8th grades will be left without funding for sports, after school programs, etc.	
1896	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	2/26/2026 4:18 PM
1897	Please propose solutions that include how things would be rebalanced. It's easy to say I don't want my school closed, but if I understood the proposed solution, I might not have an objection to the plan	2/26/2026 4:07 PM
1898	Again, we should keep in mind the different cultures that exist within our school. It once was easy to put children together and they co-exist with no problem, but that is no longer the world we live in. Closing schools or changing locations affect surrounding communities as well. Other considerations have to be made, such as traffic or crime.	2/26/2026 4:01 PM
1899	How do we find out more info about who is in charge of the final decision?	2/26/2026 3:40 PM
1900	Listen to the data, not people's hearts. Change is not easy but as Dr. Sauce said, "Empty seats are not neutral. They cost money." This district DESPERATELY needs to realign school zone lines.	2/26/2026 3:33 PM
1901	As much as I deeply love my small neighborhood school (Chesnut), I believe we need to move to larger elementary schools in order to most efficiently utilize district resources for our children. I'm very concerned that some well-resourced parents at smaller elementary schools (like Vanderlyn) will be the loudest voices in the room in order to keep their school the way that it is and stand in the way of a more equitable distribution of resources across the district. I sincerely hope that the district stands firm on this and applies the same criteria across the district, in all clusters. I truly believe that well-resourced, high performing students will continue to thrive when they are reassigned to other schools, and I'd like to see the district spend some time on discussing what the transition plan will look like and what the vision for the future is in order to help ease the fears that some parents have.	2/26/2026 3:32 PM
1902	Could Kingsley be turned into a solely PreK/ kindergarten school to allow for more PreK lottery spots. Could vanderlyn then become part of the high school? That way the high school doesn't have to use trailers outside for some classes.	2/26/2026 3:04 PM
1903	Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization. Please consider including campus-level or phased options that address secondary capacity needs while maintaining elementary access where possible. Seeing multiple solution types side-by-side would help the community better understand the full range of possibilities.	2/26/2026 3:02 PM
1904	Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization. Please consider including campus-level or phased options that address secondary capacity needs while maintaining elementary access where possible. Seeing multiple solution types side-by-side would help the community better understand the full range of possibilities.	2/26/2026 2:59 PM
1905	As mentioned, I believe the Chamblee cluster is a tight knit community with strong	2/26/2026 2:53 PM

	involvement and leadership. I believe it would be a huge mistake to move Ashford Park Elementary students out of this cluster. As long as a building closure ensures the cluster remains intact, I would be very supportive.	
1906	Decisions must be thoughtful regarding exposure of younger children to older individual and topics. The Internet and social media are quickly exposing children, especially older ones with less restricted access at home, to more mature topics and behaviors that negatively impact mental health and wellness. Limiting younger kids exposure to those already exposed to these topics and experiences is the responsibility of the district since it has a large impact on child development and mental wellness.	2/26/2026 2:43 PM
1907	when you take away the neighborhood school you really gut the neighborhood and hurt everyone.	2/26/2026 2:42 PM
1908	A credible cost estimate for the expansions and mods (HS to MS, MS to ES) upon which a scenario depends MUST be presented. Ditto for transportation cost. Mr. Stanley's inputs at the 2/26 virtual meeting were much appreciated. When you talk about having break-out sessions for clusters, that is quite risky since in many areas there will be cluster changes. Parents don't have the bandwidth to attend/advocate in multiple clusters, and if they pick the "wrong" one then their input won't be heard. Ms. Smith's experience with a transition to a new school (presumably the Idlewood transfer to Smoke Rise this year) needs to be explained a bit. DCSD has a weak track record of managing redistrictings well, partly because they have done so few redistrictings lately and because the ones they've done have NOT had resources follow the students. Necessary ESOL resources for CKHS students transferred to Chamblee HS didn't come. That's not ok. One of the main reasons for these changes is to improve resources at schools. The track record isn't inspiring. Excess capacity by geographic area MUST be presented. Otherwise, this initial scenario is viewed as an unfair closures in south DeKalb, inflaming persistent perceptions that north DeKalb is treated more favorably. The lack of a plan to relieve severe overcrowding at Lakeside HS (2030 forecast = 129%) is a serious flaw. Unless students are moved to Cross Keys (which will have space due to Sequoyah opening), this is not ok. Despite these many serious concerns, my level of understanding and support for HPM and the internal SAP team has grown this week. I hope for more data and transparency in round 2.	2/26/2026 2:21 PM
1909	As a former special education teacher, the more support, the better the education	2/26/2026 2:16 PM
1910	Performance at a school has to be considered.	2/26/2026 2:15 PM
1911	Streamline this process to avoid confusion and maintain parents' trust. Right now, you're just scaring people.	2/26/2026 1:47 PM
1912	I have non	2/26/2026 1:44 PM
1913	Have you considered leaving 6th graders in elementary school & having 7-12 grade? For 6-12 grade model, how would you keep preteens separated from teens, like separate floors or wings?	2/26/2026 1:28 PM
1914	Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization.	2/26/2026 1:25 PM
1915	Why are we cutting IB schools?	2/26/2026 1:12 PM
1916	I am the most in favor of a "Robust Program Offerings with Small Schools" model and feel like it is the most helpful to focus on in this process. I would like to see how achievement levels bear this out in future meetings.	2/26/2026 12:59 PM
1917	When making these decisions, please keep student development and achievement at the forefront, while also considering community and taking a long-term view. There are several subdivisions and apartments currently being built within the Cedar Grove and Southwest DeKalb clusters, which could increase future enrollment. I would not want the schools to go back to situations where students are without desks or trailers are needed to accommodate for the growth. Additionally, from the perspective of a parent who has fundraised for PTA and extracurricular activity groups, cultivating community/business support takes time and sustained effort to build those relationships. Eliminating/rearranging school clusters will require a rebuilding that support, which could also impact the schools.	2/26/2026 12:47 PM

1918	Keep local neighborhood elementaries open. It fosters better community and I think having kids split up from elementary as they feed up the chain is also bad for development. Each elementary should feed wholly into a middle school. Middle schools could potentially split in half to high schools which would keep peer groups together from k-12	2/26/2026 12:31 PM
1919	Explain what you are proposing in more detail.	2/26/2026 12:30 PM
1920	I hope y'all are paying a lot of attention to what these potential school closures, such as Evansdale, would do to home values. This is a well-rated and well-respected school. When we bought our home in late 2020, this highly rated elementary school, as well as our close proximity, were part of the valuation that was done by mortgage company. In this tenuous economic landscape, negatively impacting so many home values throughout the district (even for folks without kids to attend the schools) while closing highly rated school just doesn't make sense to me.	2/26/2026 12:20 PM
1921	Rather than close some elementary schools- transition them and underutilized schools to pk-2 or 3-5 schools to help with overcrowding	2/26/2026 12:19 PM
1922	x	2/26/2026 11:52 AM
1923	Consolidation plan should prioritize minimizing disruption to students and families	2/26/2026 11:44 AM
1924	n/a	2/26/2026 11:42 AM
1925	The stability of our neighborhood and the financial health of local families are inextricably linked to the continued excellence of our public schools. Unlike other regions facing different demographic shifts, the Dunwoody cluster has maintained high utilization and post-pandemic growth. Because of this, any proposal involving a high-demand school like Vanderlyn must be grounded in its specific enrollment trajectory rather than broad district-wide averages. To ensure the cluster remains viable, I am asking that the upcoming planning phases include a more granular, data-driven analysis. It is essential for the community to see how reassignment, class sizes, and transportation logistics specifically align with the SAP's focus on enrollment trends and space efficiency. We have seen in the past, most notably during the pandemic, that when the district's long-term planning feels unpredictable, families frequently transition to private education. A decision that undermines the stability of our high-performing schools risks driving away the very students we seek to retain, potentially leaving our remaining facilities either overburdened or fundamentally weakened. I urge the district to prioritize a data set that reflects these local realities before moving forward with any final plans.	2/26/2026 11:29 AM
1926	I think as less grand band as possible. Elementary and middle grades need recess daily and gym to help them to burn some of that energy they have. I also think you all should especially add recess for the Special Education department, because those students definitely need to burn off energy after lunch. It helps to keep them calm. I work in a school that had that method and they did not have any disciplinary problems with their schools in their Special Education Department. It made a difference. I am available as a consultant to speak with you all to help make a difference with behavior and discipline in your schools as well as parents engagement.	2/26/2026 11:23 AM
1927	To ensure the Dunwoody cluster's long-term success, I am requesting that the next round of scenarios include comprehensive, cluster-level data. Specifically, we need to see reassignment outcomes, capacity projections, class size impacts, and transportation analysis clearly mapped against SAP drivers like enrollment trends and utilization. While I recognize the district faces under-utilization challenges elsewhere, the Dunwoody cluster remains highly utilized with post-pandemic enrollment growth. Decisions regarding school closures must account for the specific demand and enrollment trajectory of local schools like Vanderlyn. Our community's real estate market and family stability are built almost exclusively on the high performance of these public institutions. Closing a high-demand, well-utilized school like Vanderlyn risks a significant 'trust gap.' As we saw during the pandemic, when families lose confidence in the district's stability, they move to private options. This would not only exacerbate declining enrollment across DCSD but would likely leave the remaining Dunwoody schools either overcrowded or destabilized. I urge the district to prioritize data that reflects these local realities before finalizing any reassignment plans.	2/26/2026 11:08 AM
1928	Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization. In addition, in any decision regarding reassignment or closure of schools, I believe an important factor	2/26/2026 10:59 AM

	should be the demand and enrollment trajectory for specific local schools. Our community and real estate market in Dunwoody is almost exclusively built around demand for our public schools. Vanderlyn is one of the top public schools in our state, and families here have made significant financial, housing, and location decisions based almost entirely on student assignment to Vanderlyn. Closing a school that is well utilized and high performing will result in families losing trust in DCSD and moving students to private schools as a result (as families in Dunwoody did during the COVID pandemic). This will further exacerbate declining student enrollment across the district. We also need more data at the cluster level. I understand DCSD as a whole has alot of empty seats. In the Dunwoody cluster, however, the data shows the school facilities are relatively highly utilized and enrollment has increased since the COVID pandemic. If Vanderlyn, a high performing and high demand school is closed, this will likely result in overcrowding at the remaining Dunwoody schools (unless, as a result of the closure, families move their children out of the public school system entirely, as they did during Covid).	
1929	Please consider including campus-level or phased options that address secondary capacity needs while maintaining elementary access where possible. Seeing multiple solution types side-by side would help the community better understand the full range of possibilities.	2/26/2026 10:46 AM
1930	Please make sure to include potential uses or purposes for closed schools. Also make sure to consider transportation logistics, school choice logistics, and the positions of DCSD Staff Members alongside the Student Assignment Project.	2/26/2026 10:38 AM
1931	More transparency around modeling assumptions would be helpful in the next round. Specifically, showing projected enrollment, building utilization, and student distribution across the full cluster for each scenario would help families understand tradeoffs and long-term impacts.	2/26/2026 9:19 AM
1932	I think there should be consideration about how the consolidations will effect traffic.	2/26/2026 8:58 AM
1933	More transparency around modeling assumptions would be helpful in the next round. Specifically, showing projected enrollment, building utilization, and student distribution across the full cluster for each scenario would help families understand tradeoffs and long-term impacts.	2/26/2026 8:34 AM
1934	It is interesting how most of the schools that are to be closed or repurposed are TItle 1 schools or in heavily populated black neighborhoods.	2/26/2026 8:29 AM
1935	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investmen	2/26/2026 8:28 AM
1936	I would address that folks should not be diminishing the other area schools that get to "stay open" Parents are starting to have a "me only" myopic viewpoint and it's concerning. Saying other elementary schools should be the ones to close purely based on achievement data isn't right. We all know that some schools have different make ups in population and programming which does affect testing data or survey participation from the community with CCRPI data. Folks need to be reminded we are all a part of the same cluster and we come together in middle and high so now is not the time to tolerate insults towards others' neighborhoods, property values, schools, or teachers as though a community a stones throw away is of lesser value or desirability. I love oak grove, HMS and LHS but I work with parents from all our feeder schools and they're all awesome. OGE is not the only school on the planet. Some of our parents need to be reminded of that. Sigh. Thank you for reading this.	2/26/2026 8:02 AM

1937	The proposed changes appear from the outside to be largely financial and not necessarily in the best interest of the students nor the communities they serve. The county has a lot of work to do to convince the public otherwise.	2/26/2026 7:09 AM
1938	• Transportation impact must be carefully modeled before finalizing scenarios. • Clear academic performance benchmarks should be established to evaluate whether consolidation achieves its stated goals. • Communication with families must remain transparent to prevent enrollment decline during transition. • Any reconfiguration should prioritize equity in access to advanced coursework, extracurriculars, and support services. The long-term goal should not simply be reducing facilities, but strengthening academic opportunity and stability for students across the district.	2/26/2026 7:02 AM
1939	I really like the idea of arts-focused students and high academic achievers being supported in their home schools. They're just kids: the lottery application process, subsequent rejection or transition stress, and pressure to fit into one mold in our charter schools seems unhealthy and exclusive.	2/26/2026 6:16 AM
1940	Has research been conducted on how this may impact the quality of education in terms of busing kids and various grade bands. It may be helpful to share those findings. Thanks.	2/26/2026 4:18 AM
1941	-	2/26/2026 12:25 AM
1942	Druid Hills Middle School is 4.8 miles from my zip code. In Atlanta traffic this is an eternity and causes our neighborhood to suffer from 2hour bus rides. Due to the distance many students in our neighborhood are prohibited from fully immersing in the middle school experience as after school sports and clubs are limited due the the 1hr round trip commute to school for parent involvement and late pickup. Making kitteredge 4-8 with priority placement to the west side of DCSD would greatly serve our community.	2/25/2026 11:07 PM
1943	Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment	2/25/2026 10:28 PM
1944	I strongly urge the district to avoid closing Evansdale Elementary in future scenarios. Evansdale serves a stable, invested community and has demonstrated a strong academic culture and supportive learning environment. As a former student, I experienced firsthand the quality of instruction and sense of community the school provides. Closing it would significantly disrupt families and neighborhood stability. If consolidation is necessary, I encourage the district to explore options that preserve Evansdale's academic strengths while addressing enrollment realities	2/25/2026 10:12 PM
1945	Understanding enrollment is below capacity in the county, the county should look at where enrollment trends are increasing, where community involvement is high, and decide what is best for the students as they make this impactful decisions to the future of our children.	2/25/2026 9:16 PM
1946	I think that suggesting a school closure without giving parents any idea of different paths forward is pretty insensitive to what our families are having to deal with when it comes to a conversation about redistricting. Asking for honest feedback without different solutions to consider is going against everything the SAP group has been saying for the past 20 months. It doesn't feel like good communication, and it makes me wonder what has been discussed during this time besides just a list of old buildings. So, if we're really only talking about buildings and location (distance from communities) in this first round of scenarios, it makes the most sense to move the Ashford Park community to John Lewis and move the John Lewis community to Dresden Elementary and other schools closer to Buford Highway. I'm definitely interested in seeing other potential ways to keep our community together, but nothing else seems to make sense from a building/facility standpoint.	2/25/2026 8:05 PM
1947	I care less about the Ashford Park building and more about keeping our strong community together and staying in the Chamblee cluster.	2/25/2026 7:49 PM
1948	Please add the officers who care for the building properties added into the crew of officers brought in tonight. Most questions involve their input and insights.	2/25/2026 7:48 PM

1949	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	2/25/2026 7:41 PM
1950	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	2/25/2026 7:03 PM
1951	District leaders need to more for our children instead of closing schools.	2/25/2026 6:54 PM
1952	Oak Grove: -already exceeeds the utilization target -has four consecutive years of enrollment growth -ranks in the top tier academically -would require significant capacity adjustments at Sagamore Hills and Briarlake	2/25/2026 5:58 PM
1953	Please keep our tradition. And elementary school should be more and smaller. 2	2/25/2026 5:53 PM
1954	Rather than resources and equability, it would be best if the district weighs the cost to a community and residents. Are city officials including city planning officials being engaged and have cost analysis of transportation and roadway cost been assessed? What are the distance and length of time for bus routes? Neighborhood streets are not connected in Tucker. Has traffic been accessed during morning and afternoon commute times? The City of Tucker has plans for walking trail planned. Will this impact roadways and if so, will it impact school routes? Has a cost analysis been complete for noted school expansion vs keeping another school open? Please reach out to individual communities before making decisions that will impact a residence quality of life.	2/25/2026 5:49 PM
1955	SMALL local schools that the community feels connected to are vital	2/25/2026 5:32 PM
1956	This is more important than the school itself, this has a huge impact on the property values in each school zone.	2/25/2026 5:23 PM
1957	A critical part of our support for moving Ashford Park to John Robert Lewis Elementary is ensuring that the current students at John Robert Lewis Elementary are also placed in a high-quality, modern school that meets the district's standards for educational adequacy. The district's "cascading use" approach must provide these students with a "win-win" transition into a newly renovated or expanded facility within their own cluster. We advocate for a solution where both communities benefit from modern infrastructure, ensuring that no student's education is disrupted without an immediate upgrade in facility quality. Cluster integrity and equitable access to "nice schools" must remain the guiding principles for the final 2026 plan	2/25/2026 5:22 PM

1958	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	2/25/2026 5:21 PM
1959	If the district is trying to reduce excess capacity, the closure list should be driven by underutilization, not by schools that are already full or getting fuller. Oak Grove is at or above the utilization target today and projected higher, and shutting it down would require substantial capacity changes at receiving schools. The district would likely get more measurable efficiency by prioritizing schools operating well below 70% utilization, where consolidation closes the utilization gap without triggering new expansion.	2/25/2026 5:15 PM
1960	Scenario 1 appears to overcorrect by proposing 27 elementary closures, overshooting the earlier 4–16 reference point. It also includes closing Oak Grove despite the fact that it is already above the 88% utilization target and is expected to climb further, with consistent enrollment growth and strong academic performance. That choice would push capacity stress onto Sagamore Hills and Briarlake, meaning the closure functions more as redistribution than right-sizing.	2/25/2026 5:09 PM
1961	Great school how it is lots of young families with young children are moving to this area	2/25/2026 5:02 PM
1962	The criteria for the suggested closures need more discussion and clarity. Areas of underutilization and underperformance should be prioritized for closure over a fully utilized, high-performing, sought after school with active parent involvement and investment.	2/25/2026 4:55 PM
1963	Scenario 1 proposes closing 27 elementary schools—far more than the previously discussed range of 4–16. Oak Grove Elementary: • Already exceeds the district's 88% utilization target (89% now; 96% projected) • Has grown enrollment for four straight years • Is a top-performing school academically • Its closure would require major adjustments at Sagamore Hills and Briarlake Closing schools that are already near or above capacity does not meaningfully reduce excess space—it simply shifts students around. If the goal is to improve efficiency, the district should focus on schools operating well below 70% capacity, where consolidation would have a real impact without creating new crowding or construction needs. Before moving forward in this area, several questions should be answered clearly: 1. Were new housing developments and job growth from 2024–2026 included in enrollment projections? 2. Were pandemic-era declines weighted too heavily in ways that distort recent growth trends? 3. What are Oak Grove's projected utilization rates for 2028 and 2030? 4. How does the cost of keeping Oak Grove open compare to expanding Sagamore Hills and Briarlake? A careful, phased approach based on current data would better support long-term planning and fiscal responsibility. Closing a school in a growing area could create overcrowding in just a few years. The district should also provide a clear cost-benefit analysis comparing renovation of smaller schools with building larger ones. The per-student cost figures presented do not account for the millions required to build new facilities or maintain closed properties. Educational outcomes should also be part of the analysis—not just building efficiency. Many parents and taxpayers do not want significantly larger elementary schools. This proposal creates uncertainty across multiple neighborhoods and deserves to be reconsidered with community stability, financial impact, and student success in mind.	2/25/2026 4:54 PM
1964	Please don't close OGE. Small schools like OGE are the best option community members have without having to consider private school options.	2/25/2026 4:52 PM
1965	Oak Grove already exceeds the utilization target of DeKalb County. It has 4 consecutive years of enrollment growth. It ranks in the top tier academically. Oak Grove is an absolute gem of a	2/25/2026 4:48 PM

	school and deserves to remain open given its always consistent excellent academic performance and utilization rate.	
1966	If the goal is to close the utilization gap efficiently, the district should focus closures on schools well below 70% utilization, where consolidation actually reduces excess capacity and avoids triggering new capital expansion.	2/25/2026 4:40 PM
1967	Oak Grove is a poor closure candidate because it is already above the 88% utilization target, has sustained enrollment growth, strong academics, and its closure would require major capacity changes at Sagamore Hills and Briarlake.	2/25/2026 4:38 PM
1968	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	2/25/2026 4:36 PM
1969	Scenario 1's 27 proposed elementary closures far exceed the earlier 4–16 range, and closing high-utilization, high-performing schools like Oak Grove (89% now, 96% projected) mainly shifts students and creates capacity strain elsewhere without meaningfully reducing excess capacity.	2/25/2026 4:31 PM
1970	Perfect	2/25/2026 3:54 PM
1971	Please provide your research into this decision making process to the public. Post it all on the website and make it easily available. Hearing about this from the news first and not Dekalb county was outrageous.	2/25/2026 3:23 PM
1972	Use alternative/additional sources of student enrollment predictions which take area employment growth into account (e.g. Emory and CHOA expansion.)	2/25/2026 3:17 PM
1973	We are heavily invested in the oak grove community and education. We strongly ask that oak grove be reconsidered or closing and that traditional grade bands remain in tact.	2/25/2026 3:03 PM
1974	Closing Oak Grove Elementary would damage the community and negatively impact the lives of the children that rely on the teachers and faculty there.	2/25/2026 2:22 PM
1975	Your survey is horriblly written!! For an education system that you are, you are truly showing your level of edication. Shame on you!	2/25/2026 2:17 PM
1976	Please consider including campus-level or phased options that address secondary capacity needs while maintaining elementary access where possible. Seeing multiple solution types side-by-side would help the community better understand the full range of possibilities.	2/25/2026 2:10 PM
1977	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: Already exceeds the 88% utilization target (89% current; 96% projected) Has four consecutive years of enrollment growth Ranks in the top tier academically Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers	2/25/2026 2:08 PM

	of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	
1978	Dekalb country has historically been corrupt and dysfunctional and this just showcases more of that dysfunction.	2/25/2026 2:05 PM
1979	Please consider campus level or phased options that address secondary capacity needs while maintaining elementary access were possible. Seeing multiple solution types side-by-side would help the community better understand the full range of possibilities.	2/25/2026 1:52 PM
1980	I think those of us in the Chamblee cluster would like to stay in this cluster as over the last few years we've helped build up the reputation and scores- and people are CHOOSING it now over other options (often private). Let's keep that. We're a Cham Fam. Please keep us intact- all the feeder schools. And let's help Other feeder patterns and schools also be successful.	2/25/2026 1:51 PM
1981	Clear comparisons between scenarios would be helpful, including academic, community, transportation, and facilities impacts. Providing both short-term and long-term projections would also help families evaluate sustainability.	2/25/2026 1:48 PM
1982	Question 6 is unclear: Are you asking should all clusters throughout DCSD have the same grade band configurations? In that case, my answer is no, not necessarily. Or, are you asking, within a specific cluster, should all schools have the same grade band configurations? In that case, my answer is yes.	2/25/2026 1:24 PM
1983	Vanderlyn is a very well performing school with a lot of passionate parent involvement. I think closing Vanderlyn would be a mistake.	2/25/2026 1:12 PM
1984	Evansdale offers language courses, speech therapy and other specific programs that other schools may not offer. It is a close community and needs it's own school to better serve the public.	2/25/2026 1:07 PM
1985	Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization.	2/25/2026 11:36 AM
1986	Please keep Vanderlyn intact. It is an amazing community of teachers and staff, parents, and students. We perform well each year in our very involved community. You would be closing one of the top elementary schools in DeKalb County and the state by closing Vanderlyn.	2/25/2026 11:33 AM
1987	What is the big picture plan to improve county schools? How can smaller facilities be leveraged to achieve better learning outcomes ?	2/25/2026 11:04 AM
1988	Thinking districtwide and long-term, I think Dekalb needs to address their spending of tax payer dollars and what is best for our students. I have a hard time understanding how a new school building at Dresden elementary can cost $74 million dollars but we can't fund a nurse at a school. We were told throughout the year that we couldn't have a new front desk staff until we hit 800 students. That puts our school at risk and seems like Dekalb is not prioritizing student safety. My main concern is preserving communities. Students as young as 4 years old in prek should not be on a bus for 30 minutes to get to school. I disagree with the model of mega schools. The impacts of these proposed school building closures had not been communicated well and HPM needs to take a step back and remember this is not a consulting project but actual children's lives. My priorities are the best public education for all children in Dekalb. There should not be a difference between south and north Dekalb but the core of that will be building community and not tearing apart community. We walk to school everyday and love that we have so many friends within walking distance. What matters most to me, my family, and the Ashford Park community is preserving our community. We want our special school to remain together even if it is not in the current school building.	2/25/2026 10:38 AM
1989	Having worked in a school that was closed and consolidated, I know that there will be a lot of frustration, anger and sadness expressed by the students, parents and staff of the closing schools. Be prepared. Let them have closure in their old building and make them feel welcomed in the new one.	2/25/2026 10:26 AM
1990	Yea	2/25/2026 10:21 AM
1991	I think understanding if you are planning to close school buildings, how do you plan to maintain schools with failing HVAC systems currently that still need to run for another 3 years? The	2/25/2026 10:20 AM

	expectation here is that you wouldn't be putting money into those buildings, however the students currently in those schools would be served a huge detriment of a safe learning environment for current students.	
1992	No	2/25/2026 10:13 AM
1993	None	2/25/2026 10:12 AM
1994	N/A	2/25/2026 10:10 AM
1995	None	2/25/2026 10:06 AM
1996	.	2/25/2026 10:06 AM
1997	Great	2/25/2026 10:04 AM
1998	Transportation would be a mess. Buses are already breaking down and overcrowded. The school would probably have to hire more people to monitor students too. i overly just don’t think it’s a good idea	2/25/2026 10:03 AM
1999	idk	2/25/2026 10:00 AM
2000	N/A	2/25/2026 9:59 AM
2001	I do not have anything else	2/25/2026 9:59 AM
2002	?	2/25/2026 9:56 AM
2003	I don't know	2/25/2026 9:56 AM
2004	m	2/25/2026 9:55 AM
2005	good	2/25/2026 9:46 AM
2006	good	2/25/2026 9:43 AM
2007	I think this is a complete farce of a process. I feel like underperforming schools are being targeted unfairly. I feel like the spending problem in DeKalb county is at the top and now they are trying to make our most precious resources- our students, pay the price for decades and of misappropriation of funding.	2/25/2026 9:36 AM
2008	School bands should stay traditional. Graduating gives the students a sense of accomplishment and something to look forward to when advancing to a new level of education.	2/25/2026 9:29 AM
2009	Please focus on the vast ways a school can be diverse. It is not only race - but also economic privilege. Again, healthy schools sit at the 50/50 mark or risk greatly underserving a population. Example: Huntley Hills' more economically advantaged students are not getting an adequate education, gifted services, or special education services. The school's needs are so focused on our ESOL population, leaving accelerated students to find challenging and on grade-level teaching elsewhere in tutoring, home assignments led by parents, Kumon, etc. SO MANY students in the Montessori program utilize outside services or their parents work hard to teach them at home after school hours - mostly beginning in third grade. The rigor, structure, oversight, and educational quality are less than desirable in both the Montessori and Traditional programs at Huntley Hills. And our students do not get into Kittredge at a rate that other schools do - usually only sending 3-4 students when an average of 7-10+ desperately need the service each year.	2/25/2026 9:01 AM
2010	To reiterate, I am open to Ashford Park ES being torn down, our kids being split between multiple elementary schools utilizing grade bands that aren't traditional but I am emphatic in that I want our community to remain intact and be in the same cluster through high school.	2/25/2026 8:54 AM
2011	Redistricting over 6-8 years is going to create chaos for students, the community and staff. Stability in a school community matters. The kids are going to suffer. Even if you make plans, I don't trust Dekalb to follow through with those plans or do them correctly. I assume any plans that Dekalb makes will change, not happen or be delayed. We had a ground breaking in our community for a new school that was never built. When we moved to the community there were plans to expand our high school and then those plans also disappeared. How is this going to be any different? The rollout is already a mess. How do you announce potential schools you want to close without explaining to the community where those kids are going to go when you close the school and how it might work. Do better.	2/25/2026 8:38 AM

2012	To put all kids is not good k-8 is not good kids can bullied those are babies not to mention when they get on bus. I rather homeschool my children but I allow that to happen	2/25/2026 8:02 AM
2013	It is really interesting that the entire line for the Stoneview-Lithonia MS-Lithonia HS would be closed. I guess that just means the student population in this specific area has declined significantly. It is hard to have an opinion on what should happen when I don't have any information about where students currently attending would be shuffled though. I understand why Evansdale would be closed since Pleasantdale got their new school and has never met capacity but Evansdale has a ton of trailers. But I'm not as sure with closing the Stoneview line where those students will go.	2/25/2026 6:30 AM
2014	Clear comparisons between scenarios would be helpful, including academic, community, transportation, and facilities impacts. Providing both short-term and long-term projections would also help families evaluate sustainability	2/25/2026 5:00 AM
2015	Stop panicking. Stop hiring superintendents that steal from the schools. Stop being so damn short-sighted and making decisions based your fear of your past poor decisions. Stop hiring ineffective Principals and APs. Stop wasting money on Admin. Have more town halls. Let teachers teach instead of doing all kinds of stupid irrelevant paperwork, just so admin. can check off some box. Go back to the way Thurman use to run this place. Less Horton, more Thurman. Also, the School Board needs to resign since they were the ones that brought Horton here knowing full well he was under investigation in Illinois. What the hell?	2/25/2026 3:42 AM
2016	I don’t love the idea of combining 6-12th grade. As mentioned above, it is nearly impossible to provide useful feedback on a physical building without considering the school’s community, programming, performance, traffic patterns, surrounding neighborhoods and more. To do so will only further weaken the trust parents and community members already have in DCSD. Additionally, our school (Brockett) has spent thousands of taxpayer dollars pursuing an IB designation. It is my understanding from a source at DCSD (not a school employee) that our finalized application is awaiting Dr. Sauce’s signature. The SAP committee acknowledged that they were unaware that IB programs cannot physically move locations until after it was announced both Midvale and Brockett were on the list. I have concerns that the superintendent will purposefully delay signing the school’s application in order to clear the way for Brockett to close. This would be extremely disappointing as a parent who has worked along side the school to support this effort. These are the exact types of programs the District needs to be pursuing to attract more families to the community. Furthermore it sends a clear message to the school’s staff that all of their time and efforts were in vain.	2/25/2026 12:04 AM
2017	Remaining consistent with other schools in the area and across the country is important because it provides stability and predictability for students and families. When grade bands align with common models, transitions between schools are smoother, especially for families who move, and academic, social, and extracurricular programming can be structured around widely recognized developmental stages. Consistency also supports alignment in curriculum standards, staffing models, and resource planning, helping ensure students receive comparable opportunities and are not unintentionally disadvantaged by a nonstandard structure.	2/24/2026 11:31 PM
2018	no.	2/24/2026 11:21 PM
2019	Why wreck the highest performing elementary school in the county. Seems like this is financially motivated and does not take what's best for the children into consideration at all.	2/24/2026 11:21 PM
2020	It will be important to the residents of Dekalb County to see the results of this survey in both qualitative and quantitative data. The expectation is that the board will not draw independent conclusions without being able to cite the data gathered in this study. Dekalb County has a consistent history of failed leadership, including at DCSD, which has put the residents in this position we are in today. Integrity and transparency are key to maintaining any level of public trust as this process moves along.	2/24/2026 11:09 PM
2021	I strongly oppose any scenario that would close Vanderlyn Elementary School. Vanderlyn was the top-performing elementary school in the county last year and has consistently been one of the highest-performing schools for many years. It is well-enrolled and supported by families. Closing a school with sustained academic success does not align with strengthening the district. High-performing schools should be protected and used as models for best practices, not eliminated. Any future scenarios should prioritize: • Preserving academically successful schools • Maintaining stability for elementary students • Providing clear data on long-term	2/24/2026 10:27 PM

	financial and academic impacts Decisions of this magnitude should reinforce what is working in the district, not dismantle it.	
2022	We want smaller schools with more diverse curriculum options. Reduce the dependence on technology and focus on real hands on learning with far more outdoor time.	2/24/2026 10:21 PM
2023	Please put Vanderlyn students into Austin especially neighborhoods that are already partially zoned for Austin.	2/24/2026 10:07 PM
2024	We call for better representation for Dunwoody residents and awareness of how the proposed change will negatively affect our lives and livelihoods.	2/24/2026 9:51 PM
2025	More transparency around modeling assumptions would be helpful in the next round. Specifically, showing projected enrollment, building utilization, and student distribution across the full cluster for each scenario would help families understand tradeoffs and long-term impacts.	2/24/2026 9:22 PM
2026	Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization.	2/24/2026 9:09 PM
2027	I work in accounting so spend a lot of time looking at budgets and spreadsheets so to me I just struggle to understand the math of closing so many schools and displacing teachers and building new and larger schools. Hawthorne would definitely need to be much larger to accommodate students from Henderson etc. I would want to see some numbers that make it make sense and show how this benefits current Dekalb employees and students.	2/24/2026 8:58 PM
2028	Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization.	2/24/2026 8:54 PM
2029	The published data is very clear at that mega elementary Schools and excessive 500 is bad for student academics, absenteeism, happiness at school, etc. It’s especially harmful to kids already at risk like sped students. following this risks enrollment declining farther as people flee the system	2/24/2026 8:28 PM
2030	This is going to create job loss, travel time increases for transportation where we are lacking bus drivers, and over crowded schools	2/24/2026 8:23 PM
2031	I understand and support the need to address overcrowding at Dunwoody High School. I recognize that Vanderlyn’s proximity to the high school places our campus within a broader facilities planning conversation. I also recognize that the district has framed SAP around enrollment trends and utilization. Any proposal should clearly demonstrate how those metrics are being applied at the cluster level. The combined Vanderlyn and Dunwoody High School campus presents an opportunity to explore thoughtful, phased solutions that address secondary capacity while preserving elementary access. The current proposal lists Vanderlyn for closure but does not outline receiving school enrollment after reassignment, class size projections, transportation impacts, or feeder pattern implications. This modeling should be shared before any closure decision is made. Vanderlyn is a diverse, academically strong, and inclusive community. Preserving stable elementary environments while solving high school challenges aligns with district priorities. I would welcome collaboration between district leaders and both school communities to explore campus-level solutions that address high school capacity while preserving the Vanderlyn community.	2/24/2026 8:17 PM
2032	Much more listening and sharing of information needs to happen. I hope you are also considering "grandfathering" especially for Junior & Senior High School students.	2/24/2026 8:00 PM
2033	In addition to SAP, I think it is way past time for the district to trim down the number of positions at the district offices. Too many people with vague job titles making 6-figures while at one of my local schools, there is one PE teacher with 50 students at one time with no paraprofessional. This is a serious liability.	2/24/2026 7:23 PM
2034	No decision should be made solely focused on "the buildings"	2/24/2026 6:56 PM
2035	Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size	2/24/2026 6:48 PM

	impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization.	
2036	This sounds like shifting the money to somewhere else other than to the betterment of the child education. More busses , and drivers will be needed, bus schedules making kids leave leave home earlier, also getting home later. This is a mess	2/24/2026 6:29 PM
2037	Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization.	2/24/2026 6:01 PM
2038	Will this band revitalize the arts, provide more aides for children w/learning disabilities?	2/24/2026 5:44 PM
2039	If enrollment rates and sustainability are truly the issue then I recommend rolling back to school models that were in place before all of the extra middle schools, etc. were built to address what at the time was a population boom (i.e. early 1990s)	2/24/2026 5:12 PM
2040	Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization.	2/24/2026 4:41 PM
2041	Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization.	2/24/2026 4:34 PM
2042	Please don't mess with the magnet programs! I know it wasn't mentioned here, but different programs offered through dual language, high achieving magnets, IB and montissouri are the best thing DeKalb schools have going for them. Whatever changes made, please protect those options for all students.	2/24/2026 4:07 PM
2043	I know everyone is looking at money, but we will be failing kids even more, if we have overcrowded classroom. 30 students in a classroom is totally unacceptable. Research had shown that smaller class sizes work better than large class sizes.	2/24/2026 4:01 PM
2044	More information should be provided to parents to help understand what would happen in their specific districts. The lack of information is causing a lot of distress and panic. The potential redistricted zones should be provided to the public.	2/24/2026 3:53 PM
2045	I'll be attending the meeting on Thursday, as will many of our other families and we hope to hear more information about actual plans beyond just consolidating school. We keep hearing that these are just initial scenarios and its the start of a conversation, but I have not seen any clear and defined information about where we would be consolidated into, whether our school would be split between two other schools, etc. I've provided my reasons for being opposed to the closure of our local school in general, but more specifically, HMES is the FIRST STEM/STEAM elementary school in Georgia. We have a very special curriculum that helps reinforce lessons through PBL and through programs like the Alliance Theatre. This is a very special school with a very special education style that I believe is truly innovative. I can see how much my son is learning and I do not want that to change for my daughter when she attends elementary school. The HMES teachers and admin are like none I've met before and what this school does is unlike any of our surrounding schools. The thought of closing HMES down is absolutely devastating to our school community.	2/24/2026 3:44 PM
2046	More transparency around modeling assumptions would be helpful in the next round. Specifically, showing projected enrollment, building utilization, and student distribution across the full cluster for each scenario would help families understand tradeoffs and long-term impacts.	2/24/2026 3:37 PM
2047	The main focus should be our students well being and success. The new plan will increase absences , bullying and overall difficulties	2/24/2026 3:28 PM
2048	Seems like resources can be pooled/shared among neighboring schools (that already exist and thrive) without having to spend the money on mega schools that require the youngest kids to leave their neighborhood environment and become nothing but a number in a huge school full of strangers.	2/24/2026 3:24 PM
2049	Parent involvement is best in the local neighborhood elementary schools.	2/24/2026 3:22 PM

2050	Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization.	2/24/2026 3:15 PM
2051	I support addressing overcrowding at Dunwoody High School and want strong long-term facilities planning across the cluster. Since SAP is framed around enrollment trends and utilization, I would like to better understand how closing a highly utilized elementary school aligns with those metrics at the cluster level. Before any closure decision, it would be helpful to see detailed reassignment modeling, receiving school capacity, class size projections, transportation impacts, and feeder pattern implications.	2/24/2026 3:04 PM
2052	I do think more k-8 schools are a good option to consider. It gives families more time in a specific school to get invested in the community.	2/24/2026 2:29 PM
2053	More transparency around modeling assumptions would be helpful in the next round. Specifically, showing projected enrollment, building utilization, and student distribution across the full cluster for each scenario would help families understand tradeoffs and long-term impacts.	2/24/2026 2:25 PM
2054	The other thing I want to see addressed are programs like Kittredge, to reenter our traditional schools. Those kids leaving our area neighborhood schools have hurt our enrollment for years, and I feel parents only do it to avoid the "big scary" middle school, or for status alone. These "gifted" needs CAN and should be addressed within a child's home school. Remove that option, or put it back inside the community neighborhood schools, and that consolidates a lot of our resources rather than spreading them thin. I would also like to see language programs be added if our schools grow in size, giving us the potential for an allotment of staff who can teach a foreign language as a special, like many APS schools do. Again, if you offer a language, many wouldn't leave to go to charter programs in other buildings, leaving our neighborhood schools to see attrition for foreign language programming. Thank you for the work you all are doing, I think you are on the right track. Folks don't love change, but right now many may not see how change could bring more programming, better staff, and better facilities, if done right.	2/24/2026 2:21 PM
2055	Must know where the kids from the closing schools will be re-zoned to.	2/24/2026 2:19 PM
2056	I understand that there is underutilized school capacity. This plan seems more like a plan to close small neighborhood schools like Evansdale and Henderson Mill than a plan to right size schools to demand in the local area. I am against it. Furthermore, grade basing across such a large age range is a terrible idea. A kindergarten student doesn’t need to share a school with an 8th grader, and nor does a 6th grader need to share with a high school senior. Both the banding and facilities plans seem to be more about saving money and less about good educational outcomes.	2/24/2026 2:16 PM
2057	Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization.	2/24/2026 2:08 PM
2058	Smaller classes, smaller grade level, smaller schools	2/24/2026 1:55 PM
2059	Please include detailed cluster-level data in the next round of scenarios, including reassignment outcomes, receiving school enrollment and capacity projections, class size impacts, transportation analysis, and feeder pattern effects. It would also be helpful to see how each scenario aligns with stated SAP drivers like enrollment trends and utilization.	2/24/2026 1:43 PM
2060	Any idea on when special programs will be discussed also can we offer transportation for theme schools like Kittredge and Wadsworth. And not just "satellite" stops that seem to still be more convenient for N. DeKalb. They deserve a bus to pick them up as well for being star students. Why punish parents with smart kids that can't afford to move into million dollar homes to get better education	2/24/2026 1:01 PM
2061	Do not send Evandale to Pleasantdale and please do not shift Evandale to feed into Tucker. We would leave DCDS as I'm sure many would. We bought our homes in this space for Evandale + Lakeside.	2/24/2026 12:53 PM
2062	In Dunwoody, Dunwoody High School seems over capacitated and could move 9th and maybe 10th grade to Vanderlyn due to proximity. Kingsley Elementary could also be repurposed to	2/24/2026 12:46 PM

	hold all Pre-K and Kindergarten in Dunwoody, which would relieve some room in the other elementary schools.	
2063	I think as parents of a closing school we need to either have a say in where our child goes or greater visibility into where our family would land after these changes. We moved into the area for a great elementary education, and whether we end up with Dunwoody ES or Austin ES vs a Chestnut which has a lower rating. Now we are forced to ask will our children be in trailers for their ES education, will it be filled with a constant change leading to worse education outcomes, etc.	2/24/2026 12:38 PM
2064	For the Dunwoody cluster, I believe the cluster would benefit most from the traditional PK-5 / 6-8 / 9-12 model, because it keeps elementary schools like Vanderlyn Elementary together as a unified PreK–5 school rather than splitting younger and older elementary students into different buildings. Keeping a unified elementary school supports continuity, strong relationships, and fewer unnecessary transitions for young children.	2/24/2026 12:05 PM
2065	In my experience as a teacher (3rd-12th) I like the identity formation involved with the Pk-5/6-8/9-12. However I could understand the need to do a PK-3/4-5/6-8/9-12 model to manage a larger elementary population.	2/24/2026 12:03 PM
2066	We bought our house to be in this school district. There should be some school choice options if your school is closing.	2/24/2026 11:55 AM
2067	As the district refines the next round of scenarios, I strongly encourage a phased and gradual implementation approach rather than large, immediate structural shifts. Incremental adjustments allow the district to address enrollment and utilization challenges while minimizing disruption to established school communities. Gradual change builds trust, creates space to evaluate outcomes, and allows for thoughtful course correction over time. Importantly, families should be given meaningful choices wherever possible. Options such as grandfathering, voluntary transfers, sibling alignment, and clear transition pathways help reduce anxiety and preserve continuity. When families feel empowered rather than forced, the district can move forward in a way that strengthens long-term confidence and stability.	2/24/2026 11:50 AM
2068	At this unusual time solidarity and unity is a most. We all have to sacrifice a little so we can balance everything out. In the benefit of our children.	2/24/2026 11:35 AM
2069	Stand your ground. Make the hard choices. You might get voted out, but these closures need to happen to help the district move forward. We need to stop wasting money on empty buildings & start investing money on students.	2/24/2026 11:32 AM
2070	I don't know	2/24/2026 11:27 AM
2071	The announcement and rollout of these scenarios has been poorly managed. It was announced the week before I'm concerned about the data used to make decisions, as our schools was incorrect. Including our school on the potential closures has already been detrimental to our school, which otherwise has an excellent reputation, high occupancy, and excellent academic outcomes.	2/24/2026 11:24 AM
2072	What worries me also is that many families in my neighborhood would send kids to private school rather than send their kids to another DeKalb elementary school, further reducing our county's student population. I am a DeKalb teacher also at another school.	2/24/2026 11:15 AM
2073	Why not make schools K-8 and leave the high schools.	2/24/2026 11:01 AM
2074	Sharing that data without also sharing how dcsd will change curriculum or reduce district overhead is appalling.	2/24/2026 10:44 AM
2075	Just the best fit to support our community	2/24/2026 9:52 AM
2076	If Kingsley Elementary is not closing immediately, what is the district’s plan to ensure students have safe, fully functional learning environments, including reliable HVAC? Why was the previously approved HVAC renovation paused, and why were families not directly informed before this decision was made? How will the district provide proactive and timely communication when building conditions or student routines are impacted? What transparent academic outcome data is being used to support proposed school consolidation decisions? What verified financial projections, timelines, and measurable savings justify consolidation, and how will those figures be publicly shared? What administrative or consultant cost savings have already been realized, and why are neighborhood school closures being considered before those efficiencies are demonstrated? How does the district plan to avoid leaving	2/24/2026 9:13 AM

	students in operational limbo while long-term facility and assignment decisions remain unresolved? How are community impacts — including student travel time, neighborhood stability, and family disruption — being weighed alongside cost efficiency?	
2077	Many families like mine move to Dekalb county for the schools. Even announcing closure of so many schools may hurt our school system for years to come as families including mine see the focus in school closures instead of on fixing overcrowding and reliance on old trailers. I think if schools need to be closed, it should be 5 or fewer in the districts with the lowest enrollment. Then reevaluate in 5 years. If additional schools are going to be repurposed, the parents/taxpayers/community deserve an explanation for how this will benefit the children of Dekalb county. Is the repurposing to decrease overcrowding at other schools, decrease reliance on trailers?	2/24/2026 9:07 AM
2078	As far as changes are concerned, I would like to see more theme schools for the middle and high school levels. To have so many theme elementary schools but only 1 theme middle and high school seems quite ridiculous. I think that there are many more students that could benefit from the theme school environment but are loosing out because of lack of availability.	2/24/2026 8:24 AM
2079	Because students are transient, it would be helpful to have similar grade bands across the district.	2/24/2026 7:54 AM
2080	Please consider demographics and how this affects neighborhoods who struggling with their youth and those which are thriving	2/23/2026 10:35 PM
2081	This needs to be address: critical structural and fiscal failures within our district. Currently, our school configurations and administrative priorities do not reflect the safety needs or economic realities of 2026. Student Safety and Developmental Realignment We propose a standardized Pre-K–5, 6–8, and 9–12 model with a stair-stepped bell schedule (prioritizing a later start for high school). In the current social climate, the intermixing of "Junior High" students with high schoolers is a safety liability. Younger adolescents should not be exposed to the social pressures and potential contraband issues associated with older students. Furthermore, by reducing class sizes, we can provide the supervision necessary to mitigate the "unwanted attention" and bullying fueled by social media, creating a focused sanctuary for learning. Economic Health and Administrative Accountability Beyond the classroom, the district's management of assets and funding is directly harming our community's economic growth. Empty school buildings have become blighted anchors that lower local property values and represent a significant loss of potential jobs. While these facilities sit idle, taxpayer funding is being "lost" to an over-bloated administrative hierarchy. We are concerned that top-tier staff are overcompensated while classroom resources dwindle. This reflects a failure in the vetting process for district leadership, including the last Superintendent, who must be held accountable for the lack of transparency in fund accounting and the failure to revitalize community assets. Proposed Forensic Audit Questions To ensure transparency, Administrative vs. Instructional Spending 1. What is the exact ratio of central office administrative salaries compared to classroom teacher salaries over the last five fiscal years? 2. How many new "non-instructional" management positions have been created in the last 36 months, and what is the total compensation package for each? 3. Can the district provide a breakdown of "unaccounted" or "miscellaneous" line items in the current budget exceeding $10,000? Asset Management & Economic Impact 1. What is the total annual cost (insurance, security, maintenance) to maintain vacant school buildings? 2. What specific "Highest and Best Use" studies have been conducted to prevent these buildings from devaluing the surrounding neighborhood property taxes? 3. How many local support jobs (custodial, cafeteria, clerical) were eliminated during the last school closure, and were those funds redirected to the classroom or to the central office? Leadership & Vetting 1. What third-party agency performed the background and fiscal-history vetting for the current Superintendent? 2. Does the Superintendent's contract include performance-based clawbacks if enrollment continues to drop or if audit discrepancies are found? 3. Why is there no public-facing portal that tracks real-time spending of state and federal grants to ensure they reach the specific students for whom they were intended?	2/23/2026 10:32 PM
2082	I'd be ok moving from PK-3 and then to a 4-6 cluster. Honestly I don't favor a K-8 approach, and I definitely don't favor a 6-12 approach. As someone who has taught 7th grade, I think that 6-8 grade is a tough age for kids socially and with puberty, and putting them with kids significantly older or younger than them is challenging.	2/23/2026 10:29 PM
2083	I believe the school zoning boundaries should be reevaluated. I understand that Ashford Park Elementary is currently over capacity; however, rezoning seems like a more effective solution because it would preserve much of the parental involvement and strong sense of community	2/23/2026 8:34 PM

	that define Ashford Park. Those two factors are key drivers of a high-performing school. If the school were closed, that community foundation would likely be lost, and I don't believe simply redistributing students would automatically recreate it at lower-performing elementary schools.	
2084	I think school zoning lines should be revisited. I realized Ashford park elementary is over capacity; however, I think reasoning is a better solution, as you would still maintain the majority of parental involvement and community at Ashford Park. These two qualities are what create high performing schools. You would likely lose that if you close the school. I don't believe you would gain it at the lower performing elementary schools.	2/23/2026 8:31 PM
2085	Due to poor superintendent behavior and responses to violence--like the substitute teacher that was beaten--I am also considering pulling my kids out of DCSD as they enter middle school. School violence, poor administration, and poor performance is the main reasons for my considerations.	2/23/2026 7:08 PM
2086	School closures negatively impact property values for ALL taxpayers in the zone. Mega schools do not benefit children and limit access to education and resources. Student population in the Oak Grove cluster continues to grow. The Oak Grove cluster continues to deliver the highest academic excellence in Dekalb. There is no data that supports closing or consolidating the schools that would benefit students or tax payers. The Board must vote no.	2/23/2026 6:54 PM
2087	More transparency around modeling assumptions would be helpful in the next round. Specifically, showing projected enrollment, building utilization, and student distribution across the full cluster for each scenario would help families understand tradeoffs and long-term impacts.	2/23/2026 6:08 PM
2088	Please keep successful, cost effective magnet programs open with continued availability across all of Dekalb.	2/23/2026 5:48 PM
2089	I think that the school times need to be adjusted as well. K-8 8:15-3:15 9-12 7:15-2:15	2/23/2026 5:29 PM
2090	Please provide cluster-level data in the next scenarios, covering reassignment results, school enrollment and capacity projections, class sizes, transportation, feeder patterns, and alignment with SAP drivers such as enrollment trends and utilization.	2/23/2026 4:39 PM
2091	Again, please acknowledge, if it's all about the students then consider combing same level schools of small populations and the staff. Those with larger populations than other schools rezone those areas to balance out the students at those schools. Thank you for listening!	2/23/2026 3:54 PM
2092	In addition to my previous comments, I respectfully ask the district to prioritize stability for currently enrolled students when considering any boundary or grade band adjustments. Children thrive with consistency. Frequent or significant transitions can disrupt academic momentum, peer relationships, and emotional well-being. If changes must be implemented, I strongly encourage the district to provide grandfathering options that allow current students to remain at their existing schools through the highest grade offered. This approach would balance long-term planning with compassion and consideration for families who are already established in their school communities. Clear communication, adequate transition time, and minimizing the number of school moves a child experiences should remain central to any final decision. Student success is not only measured by efficiency or facility usage, but by stability, belonging, and continuity of support. Thank you for engaging families in this process and for considering the long-term impact on children.	2/23/2026 3:45 PM
2093	Ashford Park, as a neighborhood cluster, is a uniquely tight knit community with many families able to walk to school, and friendships formed with neighbors. It would benefit the community to keep this school open to maintain the walkability for families, as well keeping students together with friends.	2/23/2026 3:31 PM
2094	Don't collapse school choice programs! These are beneficial to our scholars. They cannot be adequately serviced at neighborhood schools.	2/23/2026 2:46 PM
2095	Fire from within your HQ. Stop going to the schools looking for the cuts hurting the kids. Get rid of Executive directors, Directors sucking the system of all the money. Get rid of all the nepotism and that exists. Lots of fakers making dumb decisions. Like having a SNOW DAY that was not an Digital Learning Day. Stupidity constantly shows itself in the Highest offices of Dekalb Schools. Keep DR. Sauce and don't you dare have another Nationwide search for a Super-Intendent.	2/23/2026 2:40 PM
2096	It would be nice to have a little more info about where the students from the schools being	2/23/2026 2:36 PM

	consolidated will end up going. For example, "Vanderlyn will close and students will be sent to x and y schools instead."	
2097	In the districts with lower numbers of enrollment, there really needs to be a reason as to why that is. Are there simply not enough kids living in those districts? Are kids doing home school? Private school? Why is enrollment lower? Is there an opportunity for bilingual schools anywhere? This is absolutely needed in our communities. Are there incentives for sending kids to public schools for working parents such as before and or after care at either a free or reduced rate? I cannot accept the “enrollment numbers are low so we have to reassess” excuse. There’s a reason the numbers are low. Let’s fix the reason.	2/23/2026 2:33 PM
2098	PK-3 is a financial burden on stakeholders. Until fully funded by the state, PK-3 should be eliminated. Plus, research shows that achievement gains are lost by 3rd grade. Focus on K-12, please. If DCSD is committed to PK-3, enrollment should be given to children of student-facing staff only (bus drivers, food service, teachers, paras, clerks, custodians, media specialists, counselors, social workers, and local school administrators - not central office staff and BOE members) to help retain quality staff in DCSD.	2/23/2026 2:08 PM
2099	What will happen to the school buildings when they are closed? I suggest creating a school specifically for Pre-K to Pre-4.	2/23/2026 1:45 PM
2100	None at this time.	2/23/2026 1:35 PM
2101	Heavy impact on Lakeside and Tucker schools not justified by empty seats. Consider adding 6th graders to improve operating capacity at elementary schools instead of closing them. Middle schools would benefit from more contained programs/schools in schools from parents wary of middle schools who send their kids to private to avoid and then return for Lakeside.	2/23/2026 1:25 PM
2102	My children attended Obama, we loved the school! The school was too small for the number of kids that attended. The class sizes were 30+ and the facility could not accommodate the parents for events as well.	2/23/2026 1:20 PM
2103	Parents need enough lead time if their clusters will change to move out of the DeKalb county school district. 2 years minimum.	2/23/2026 12:59 PM
2104	Combine one or two schools, update / upgrade the buildings, then move them to the updated school, do the same thing with a few schools at the same time. Don't close 27 schools at once - take your time, do it right! Provide the magnet and charter schools updated buildings - they NEED AND DESERVE THEM! STOP TREATING CHARTER AND MAGNET SCHOOLS LIKE THEY DON'T MATTER!	2/23/2026 12:53 PM
2105	I am a product of DeKalb. I have witnessed the decline in academics and social emotional behaviors since that reformation. Initially, there were no middle schools in South DeKalb. Elementary was K-7th and high school was 8-12th. I believe that keeping K-7th together, reduces early exposure to teenage social pressures and limits disruptive school transitions. I believe that their would also be more parent involvement because middle school is usually where parent involvement declines.	2/23/2026 12:24 PM
2106	N/A	2/23/2026 12:15 PM
2107	Please leave the Pre-K-5th grade or the 6th grade. Please ! Do not group middle school and highschool you will see a rise in assault whether it’s sexual or physical. Please! Do not let Norman Sauce ruin our kids !	2/23/2026 12:09 PM
2108	A PK–5 and 6–12 cluster balances child development needs with resource efficiency and expanded opportunities. It protects early learning environments while building a stronger, more coherent pathway to graduation.	2/23/2026 12:06 PM
2109	Please do not overlook social developmental stages. It is at least as important as academics. Keep 6-8 away from 9-12. I do love the ideas of opening more facilities that specialize - it is so important that kids feel 'at home' and with those who understand them.	2/23/2026 12:00 PM
2110	Prioritize Academic Continuity Maintain stable grade bands in clusters where students are thriving academically. Avoid unnecessary transitions between schools, especially for grades 5–6 and 8–9, to support student achievement and social-emotional well-being. Consider Facility Capacity and Growth Use current enrollment and projected growth data to ensure schools are not overcrowded or underutilized. Cedar Grove Middle, in particular, has capacity for continued enrollment and should remain a 6–8 school to preserve middle school programs. Support Specialized Programs Preserve schools that offer unique programs (STEM, gifted,	2/23/2026 11:54 AM

	career pathways, special education services) without forcing relocations that could disrupt participation.	
2111	The funds need to go to schools with more students rather then schools that have low enrollments.	2/23/2026 11:47 AM
2112	Our kids have been through alot...not just mine personally but my kids friends and peers it could be the last straw for some kids I think the focus needs to be on getting facilities and teachers more money really	2/23/2026 11:45 AM
2113	Consider how and when the scenarios are being delivered. Record all meetings, so all stakeholders have an opportunity to listen to feedback so the process remains transparent.	2/23/2026 11:40 AM
2114	Please leave these schools alone. This is going to make it much harder for the children than it already is. The school on the proposed list are primarily schools located in African American neighborhoods making those schools primarily African American. Forcing children out of school and crowding them into other schools no only delays them educationally it ensures that the few resources that were once available to those children become no longer available to them. It will cause a strain on students and families caring for these students. Leave the schools alone.	2/23/2026 11:39 AM
2115	This is a tough problem to solve, and no answer will ever make all stakeholders happy. There will always be a group of people who are not on board. However, I trust Dr. Sauce to use his good judgment to navigate these waters. I hope those around him will also have the students' best interests in mind.	2/23/2026 11:36 AM
2116	As you develop the next round of scenarios, I encourage a closer review of the geographic distribution of schools being identified. At present, a disproportionately high number appear to be concentrated in the southern end of the district compared to the northern end. This imbalance raises concerns about equity and regional impact. Future scenarios should more carefully evaluate and balance these impacts to ensure that no single area of the district is disproportionately affected.	2/23/2026 10:31 AM
2117	Scenario 1 calls for closing 27 elementary schools, a number far beyond the previously suggested range of 4–16. Including Oak Grove in that group is not justified by the data. The school already exceeds the district's target utilization level, standing at 89% today and projected to reach 96% next year. Enrollment has climbed for four consecutive years, academic performance is among the best in the review group, and closing the school would force major capacity and boundary adjustments at Sagamore Hills and Briarlake. Eliminating schools that are already full—or nearly full—does not solve the district's capacity problem. It simply redistributes students, often creating new overcrowding issues. If the objective is to meaningfully address underutilization, the focus should be on schools operating below 70%, where consolidation can actually improve efficiency without requiring costly expansions elsewhere. Before moving forward with any closures in this cluster, the community deserves clarity on several key points: -Have the district's projections incorporated the major residential and employment growth occurring between 2024 and 2026? -Are outdated pandemic-era data points still driving regression models in ways that underestimate recent growth? -What utilization levels are expected for Oak Grove in 2028 and 2030? -How do the long-term capital costs compare between keeping Oak Grove open versus expanding nearby schools to take its students? A thoughtful, data-centered approach that prioritizes areas with true, long-term underutilization would better support the district's financial and strategic goals. In this fast-growing corridor, decisions must be made carefully to ensure the district does not remove capacity precisely where future demand is most likely to increase.	2/23/2026 10:23 AM
2118	Scenario 1 proposes closing 27 elementary schools, far exceeding the earlier stated range of 4–16. Oak Grove should not be included in that list. The school already surpasses the district's utilization goal, operating at 89% today and projected to reach 96% next year. It has experienced four straight years of enrollment growth, ranks among the strongest schools academically, and its closure would require substantial capacity adjustments at both Sagamore Hills and Briarlake. Closing schools that are already near or above the utilization target does not resolve the district's excess-capacity issue. Instead, it shifts students around without meaningfully reducing unused seats. If the goal is to close the utilization gap, the district should focus on schools operating below 70% utilization—locations where consolidation would genuinely improve efficiency without necessitating new capital spending. Before any decision is made in this cluster, several important questions need to be addressed: -Have the 2024–2026 employment expansions and residential pipeline been factored into updated enrollment projections? -Is the forecasting model still weighted toward pandemic-era regression data that	2/23/2026 10:14 AM

	no longer reflects current growth? -What does Oak Grove's projected utilization look like in 2028 and 2030? -How do the costs of maintaining Oak Grove compare to the costs of expanding Sagamore Hills and Briarlake to absorb its students? A careful, data-driven, phased approach—centered on the areas with the greatest underutilization—would better support long-term planning and fiscal responsibility. Decisions in this rapidly growing corridor must be sequenced thoughtfully to avoid eliminating capacity that will be needed as major regional development continues.	
2119	Clear comparisons between scenarios would be helpful, including academic, community, transportation, and facilities impacts. Providing both short-term and long-term projections would also help families evaluate sustainability.	2/23/2026 9:56 AM
2120	thanks for the hard work on this issue, the atlanta area is still growing, if we focus on quality at a number of Dekalb schools, families will repopulate more our area	2/23/2026 9:02 AM
2121	Just a comment on how this information was shared - before publicizing to the community the DCSD staff should have been notified. Not via email. Nothing too complicated. A Teams meeting for all staff to join and then Principals leading their staff in understanding the situation. The closing and retooling the district is a face-to-face conversation with those who serve and are dedicated to educating our students.	2/23/2026 9:02 AM
2122	Keep Vanderlyn off your list of closures!!!!!!!!	2/23/2026 8:54 AM
2123	How much money has gone into tech use and what are the metrics to show the benefits of utilizing technology in school? I would venture to say that is one of the most ineffective and expensive cost that should be reduced or eliminated. Revamp the current buildings and update to outdoor classrooms so students can be outside more. Also revamp playgrounds and invest in community officers and hold parents accountable as well as administrators when students and or staff/teachers are engaged in misconduct of any kind that is a threat to classroom . Use resources readily available to fund the needs of the classroom as opposed to teachers at times having to pay for supplies themselves particularly in lower grades.	2/23/2026 8:44 AM
2124	I believe by keeping the 6th graders in the elementary schools you not only help keeps the seats filled but you also don't overcrowd the middle schools.	2/23/2026 8:35 AM
2125	If the grade band scenario affects PreK-5 grade level transitions only, then I believe they can be different based on needs or preference. If the grade band scenario breaks from traditional for grades 6-8/9-12 then they all need to be the same.	2/23/2026 8:34 AM
2126	We love Kittredge but it is difficult to have a school that is only three grade levels. 4th-8th like Wadsworth would be more ideal.	2/23/2026 7:54 AM
2127	I think that the students who are already enrolled need to be able to complete their respective schools. I think that there shouldn't be new enrollments in schools that are closing	2/23/2026 12:19 AM
2128	The statement of their not being enough children to fill the classrooms is unwavering. DeKalb county is a growing community that will continuously have a rise and fall within population. Eliminating schools and potential grade band scenarios is not preparing for the future of influxes that will come due to gentrification pushing people out of the metro city and into these neighborhoods.	2/22/2026 11:10 PM
2129	Por favor hagan lo posible para que la escuela se limpie al 100 por ciento para que tenga mejor presentación y de igual manera tener personal de limpieza para que se encargue de limpiar los baños como tiene que ser, ya que siempre están sucios y descuidados. Gracias.	2/22/2026 10:34 PM
2130	Stop making changes based on knee-jerk reactions. Close a school for a year so it can be renovated, but make any closure temporary so it can be utilized for a variety of purposes. Having just two gifted schools for an entire county is insufficient.	2/22/2026 9:08 PM
2131	I'd like to provide additional feedback to inform the next round of scenarios by emphasizing just how exceptional Henderson Mill Elementary School is as an educational institution and community anchor. Henderson Mill isn't just another elementary school it has a distinguished history of innovation and academic excellence. In 2012, the school became the first Pre-K through 5th grade school in the State of Georgia to earn STEM certification from the Georgia Department of Education, reflecting a deep commitment to science, technology, engineering, and math education. Building on that foundation, Henderson Mill continued to expand its approach to learning; in 2017, it was formally recognized as the first STEAM-certified elementary school in Georgia, integrating the arts into its rigorous interdisciplinary STEAM	2/22/2026 8:53 PM

	curriculum. This status isn't just symbolic it signals a culture of project-based, experiential learning where students engage in real-world problem solving through hands-on STEAM activities, from engineering design challenges and environmental learning gardens to media production and collaborative investigations that prepare them for future careers. Moreover, Henderson Mill's program has drawn educators and visitors from across the state as a model for how to successfully integrate STEAM into daily instruction and build meaningful community/business partnerships that enrich students' learning experiences. Given its distinctive role as a statewide leader in innovative learning, I strongly believe that any next round of planning should fully consider the value Henderson Mill brings not just to its own students and families, but as a beacon of best practices in elementary STEAM education.	
2132	Based on maturity levels, it's best to keep the traditional separations of grades. My suggestion is to just close schools that either are under performing or don't have the headcount necessary to justify staying open for that community. Any other scenario would cause taxes to increase on homeowners who did not receive exemptions that older homeowners do.	2/22/2026 8:14 PM
2133	I know this is going to be a hard decision all around.	2/22/2026 7:28 PM
2134	We need to get a permanent Superintendent in office. We also need to stop hiring based on race and start hiring based on competence.	2/22/2026 5:53 PM
2135	Please look beyond facility age and cost and look more at which schools have received previous renovations and infrastructure. Has the county been fair to communities that are OTP, diverse communities, and up and coming communities? Many in the Brockett area have paid taxes for others to benefit. However, Brockett has a higher education score, more land, and easier traffic flow; no crossing a four lane road nor stop lights on the road. Children are able to use a sidewalk to school unlike other school not included on the closure list.	2/22/2026 5:49 PM
2136	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	2/22/2026 5:40 PM
2137	The parents in this community have put so much time and love into making oak grove the school it is today. There is so much research supporting student learning in small elementary schools. Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment	2/22/2026 5:40 PM
2138	I have a child on the spectrum with amazing resources at Austin. It would be highly concerning if the changes impacted the special needs sector. Peachtree Middle may improve with some	2/22/2026 4:02 PM

	much needed changes in leadership and possible facilities changes.	
2139	Austin Elementary has the capacity to be elementary through middle school with our children then going to Dunwoody High School. As long as the kids can still participate in middle school sports I think this is such a good idea!	2/22/2026 3:55 PM
2140	Quarterly updates would be nice.	2/22/2026 3:52 PM
2141	I think Midvale and Henderson Mill are perfectly situated to be school partners. Midvale Elementary School could be a PK-2 elementary school, while Henderson Mill Elementary School becomes a 3-5 grade ban elementary school.	2/22/2026 3:17 PM
2142	N/A	2/22/2026 2:43 PM
2143	Again, why are we looking to close facilities and create more overcrowding in classrooms before we look at the over inflated salaries of the board of education that are not earning them? Yet again, the people at the top are siphoning the majority of the funds and then telling those that actually need them to make do with less. It's irresponsible and greedy.	2/22/2026 1:54 PM
2144	More information is needed for the next round of scenarios: Provide more context on major drivers of projected enrollment declines. If driven by more students moving into charter or private schools, has the county completed or plan to conduct surveys on what drives that decision for those families? Provide more visibility on anticipated impacts of these changes -- e.g. current state with lower enrollment vs. future state results in what for the budget and expected educational outcomes for our students? Be clearer on pros/cons of educational student outcomes using data/studies for any suggested scenarios. Include audit of current and future 'robust program offerings' and how school closures/scenarios impact student access to these offerings. How do charter schools fit into this complex picture as they do not appear to be included in the current scenario? What, if any, impacts or changes are expected in terms of student-teacher ratios in proposed scenarios? Is major re-districting expected from these scenarios (even for middle/high schools that are not impacted by closures)? At what point in the process would specific school zone district/enrollment maps be drawn and shared to understand where students from impacted schools would be re-directed and what types of changes parents could expect from these changes?	2/22/2026 12:12 PM
2145	Kids with a strong start in elementary school go on to become community leaders in high school. We recognize the proximity of Vandelyn ES to Dunwoody HS and the high school's capacity issues. The parents of Vanderlyn support Dunwoody HS and regularly collaborate to support each other. The expansion of the high school campus to accommodate the number of students can be achieved thoughtfully and without removing access to a strong, high-performing elementary school in the cluster. The first point in DCSD H-PRIDE values is humanization; even considering closing such an academically strong school shows this decision is not aligned with this core value, which prioritizes human beings' worth over resources. These students are being viewed as nothing more than numbers on a spreadsheet. The community supporting Vanderlyn ES attracts lifelong learners to DCSD over other counties in Georgia; closure will only further the academic divide between DCSD and other counties.	2/22/2026 11:25 AM
2146	The focus needs to shift from destroying schools that are thriving to investigating why they are doing so well and taking that data and using it to put more resources into underperforming, over capacity campuses to bring them up.	2/22/2026 10:24 AM
2147	N/a	2/22/2026 9:34 AM
2148	Clear comparisons between scenarios would be helpful, including academic, community, transportation, and facilities impacts. Providing both short-term and long-term projections would also help families evaluate sustainability. We chose our elementary school it’s smaller size. The current uncertainty and potential for a larger school size has us considering private school for our children, as well as the lack of clear transparency and long term planning.	2/22/2026 8:31 AM
2149	No one should be listening to recommendations from a committee run by Sarita Smith until she and other employees put in place by Horton have been fully investigated and the community feels safe.	2/22/2026 7:30 AM
2150	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing	2/21/2026 7:03 PM

	excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment	
2151	We like the existing small community feel of our elementary school and know others in different elementaries who feel the same. We have gotten to know parents and they are our neighbors which builds trust and a sense of shared purpose and community. If there are ways to maintain and continue that feeling of community and connection, where the administrators know all the students names and parents feel comfortable being involved I would be open to larger schools but that seems harder when people are more spread out/don't live in close proximity.	2/21/2026 6:09 PM
2152	We are informing the school is working hard and shaping the students in good manners and teaching so we wish this school to be middle school	2/21/2026 1:24 PM
2153	As long as it benefits the kids. Just thnk about the kids learning and how it could support them and their needs	2/21/2026 1:18 PM
2154	We need this school remain function and wishes to be middle school	2/21/2026 1:13 PM
2155	Keep elementary schools tbe size they are. Close less of them and redistribute the students to the ones with open seats. Large elementary schools will result in a worse education	2/21/2026 1:08 PM
2156	Prioritize children's education and communities! This is not the place to save money.	2/21/2026 11:19 AM
2157	I am in favor of closing Montessori program in my school. Because of how it separates the kids, their class sizes are much smaller than the overrun traditional side, causing staff to be frustrated with each other for things outside their control.	2/21/2026 5:29 AM
2158	A new Superintendent can impact this process so please be mindful when creating future scenarios.	2/21/2026 1:02 AM
2159	To add to what I say above, I think you need to re-think the process. Thinking about "building" first and district wide is absurb. Parents care about their school clusters, their programs and ressources, and if you change that, then you need to tell them specifically what this school cluster would be and what program it would offer. Instead, maybe do a vast survey about what people want in their school and their cluster, then start from that. Then, you can say, ok, if we shut down evansdale and move you to Pleasantdale, we could have 250K more for the french program and a full football team. But until you provide specific and measurable about what people care about, you are not really asking for our opinion. And, assuming you are competent and knowledgeable, then the most logical conclusion about this process is that you are pretending to do so to cover up a process meant to achieve an end that has already been determined.	2/20/2026 10:45 PM
2160	I will be closely following the process and will continue to advocate for our students and my experience as a concerned parent. But the bottom like is, better facilities do not make better schools in my opinion.	2/20/2026 10:27 PM
2161	I think things should stay the same.	2/20/2026 9:34 PM
2162	Please think harder about how to use the neighborhood facilities you have for elementary schools in ways that keep smaller facilities. That advantage for this age group, including smaller classes, is so critical for learning. I appreciate what you're trying to do and can only imagine what hard work it is. Thank you for thinking about it and hopefully, keeping our wonderful Evansdale as the resource it has been for DeKalb and for this community!!	2/20/2026 8:17 PM
2163	Kids are going through too much bodily and emotional change to throw in the change in school with middle school.	2/20/2026 5:41 PM
2164	My other concern is of course behavior with so many students in one building, abandoned	2/20/2026 2:30 PM

	buildings in neighborhoods and taxes. With the decrease of needed schools, taxpayers shouldn't need to pay so much for school taxes every year. Finally, teachers are already walking out, increased enrollments In classes without another body in the room presents another problem for the school and the profession.	
2165	A better approach to gifted and magnet are needed across the district	2/20/2026 2:26 PM
2166	This is very hard to answer when you don't know where the zone lines would be redrawn and what school you are looking at for the future. Need to ensure that apartments and lower income housing are taken into account or you may have many more parents going private when in a current zone for a school that has high rating and less socioeconomic needs.	2/20/2026 1:04 PM
2167	The Ashford Park community is strong and loves our schools. We can remain involved in the Chamblee cluster. I'm worried the community will break down and break down quickly if moved to a different cluster. High performing schools and communities do not pick up and move. There's an intangible quality to them that may not show up in your data.	2/20/2026 12:51 PM
2168	This model seems to apply the same approach of consolidation to the whole county. I don't think that every cluster in the county is facing the same issues and needs the same approach. I'd like to see scenarios tailored to each cluster or region in the next scenario with maps explaining the possible movements. This scenario marks a bunch of schools for closure and explains the methodology behind the closures, but it doesn't explain what that flow will look like for the schools and communities marked. The way this scenario has been released has left a lot of confusion and uncertainty in our communities.	2/20/2026 11:14 AM
2169	There has been a lot of talk about how closing the school buildings will save money that can be used towards enhancing classroom support. Will the count be eliminating positions at the central office? Assuming that all 27 schools close, there should also be a reduction in the amount of staff needed to oversee the remaining schools. Will class sizes be lower? With the strategic waiver, our kindergarten classrooms already have 26 students with no additional support. Very little has been done to decrease the burden of overcrowded classrooms and providing additional support (EIP) to those who need it. In the number of non-classroom teachers has increased over the years.	2/20/2026 11:05 AM
2170	Don't close Ashford Park. You'd be cutting off your nose to spite your face and just propelling a reputation of incompetency.	2/20/2026 9:10 AM
2171	Livsey is already in trailers. (which seems unsafe in terms of intruder alerts. The trailers are right out front). I don't see how any more kids could fit at Livsey. Traffic on Chamblee Tucker is already bad. Idlewood should be split between Brockett and Smokerise.	2/20/2026 8:49 AM
2172	We are happy with Vanderlyn school and I would strongly recommend to continue to run this school	2/19/2026 10:26 PM
2173	I am concerned about the magnet program. I think the SAP committee needs to look at the outcomes and grandfather in current magnet students.	2/19/2026 10:11 PM
2174	I want all schools to be handicapped disabled facilities and I like all schools to make sure the rules are not molded and that there is adequate supervision monitors and extra staff	2/19/2026 8:32 PM
2175	The entire reason I moved to Dunwoody 3 years ago was to get our children into Vanderlyn. The smaller school fits the local community perfectly.	2/19/2026 8:18 PM
2176	Please consider making elementary schools K-8. The overall success of these grade bands allow students to be more successful when it comes to academics and social skills. This transition would keep families in Dekalb County Schools longer which should be the goal. Helping families stay in the county for their child's should always be the goal and K-8 elementary schools would allow for this option. If this is not an option, please reconsider the district lines for Peachtree Middle School and Dunwoody High School.	2/19/2026 8:03 PM
2177	Just thinking of my 13 year old, he'd benefit much more from being kept with younger kids longer instead of being thrown in with HS sooner.	2/19/2026 7:59 PM
2178	No, I think I have covered my current thoughts.	2/19/2026 7:49 PM
2179	If school facilities are being unoccupied; I strongly recommend expanding early childhood education in pk3/4/k programs to help develop skills for school readiness. It would be great to use school facilities that can only accommodate smaller populations.	2/19/2026 7:30 PM

2180	I support transparent decision-making, community engagement, and use of data in shaping the future of our school system. In addition, I propose: 1. Complete, Public Release of Enrollment & Capacity Data To ensure community trust, we urge the district to provide raw data on: Current enrollment per grade level Building capacity/utilization rates Enrollment projections for the next 3–5 years This data is critical for family decisions, real estate planning, and evaluating alternatives to closures. 2. Explore Alternative School Models Before Closing Schools Rather than closure, the district should consider grade-span models that are effective in other communities: K–8 schools that enhance continuity and reduce transitions 4–8 middle schools to streamline grade placement 7–12 junior/senior high models that expand academic offerings These models can rebuild enrollment and better serve families while optimizing space. 3. Repurpose Under-Utilized Buildings Rather than shuttering community assets completely, some facilities could become: Early childhood education centers Magnet or specialized programs Adult learning, community hubs, or partnership spaces This approach keeps schools at the heart of neighborhoods. 4. Collaborate with Local Government & Community Partners to Grow Enrollment We encourage the district to work closely with: Local county planners and economic development offices City councils and municipalities Real estate and housing partners	2/19/2026 7:08 PM
2181	Leave the Cedar Grove Cluster as it is. It's a great neighborhood school that's been around for over 50years. The community as a whole is great and the kids that are in attendance excel and have been for years. Not just athletically but academically as well.	2/19/2026 6:45 PM
2182	We specifically chose our school for the smaller size.	2/19/2026 6:37 PM
2183	Alternative schools for those under grade 8.	2/19/2026 6:37 PM
2184	The district should prioritize closing schools operating significantly below utilization goals.	2/19/2026 5:24 PM
2185	Please consider the history and community ties of these schools. Having an old building or a building that is too small shouldn’t mean the school doesn’t exist anymore. Consider keeping the more senior school and closing the most recent school. The name can go to any building.	2/19/2026 4:19 PM
2186	Tema, niños con Autismo porfavor no se olviden de ellos al tomar decisiones	2/19/2026 4:09 PM
2187	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove’s projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	2/19/2026 3:57 PM
2188	None at this time	2/19/2026 2:46 PM
2189	More transparency around modeling assumptions would be helpful in the next round. Specifically, showing projected enrollment, building utilization, and student distribution across the full cluster for each scenario would help families understand tradeoffs and long-term impacts.	2/19/2026 2:44 PM
2190	The scenarios are concocted bull	2/19/2026 2:12 PM
2191	I think every school within a cluster should share the same banding so that all students move up to middle and high school together. And elementary and middle feeder schools should move on completely to the same next building. This is what creates good community. Clusters may have different scenarios and would benefit from something different than ours.	2/19/2026 12:56 PM
2192	Save BOB MATHIS ELEMENTARY	2/19/2026 11:33 AM
2193	Oak Grove is already operating above the 88% utilization goal and has had four consecutive	2/19/2026 11:23 AM

	years of enrollment growth. It ranks in the top tie academically and closing it would require significant capacity adjustments at Sagamore Hills and Briarlake. Oak Grove should not considered for closing if the objectives are to close the utilization gap and reduce cost (tens of millions will be spent to bring Sagamore Hills and Briarlake able to house the new capacity). I would love to know what the cost comparison would be to maintain Oak Grove vs. expanding other schools.	
2194	Closing schools is a trade off. At the moment we know what we are losing but not what we are gaining. In my specific situation, I want to know how the Dunwoody High School situation is improved by closing Vanderlyn. I also want to see the proposals evaluated against high-medium-low enrollment forecasts. The plan needs to offer the best outcomes in a range of situations - for example, if we make a plan that eliminates a lot of capacity with no mechanism for adding that isn't as good as a plan that can be adjusted over the next five years to accommodate a wider range of enrollment scenarios effectively.	2/19/2026 7:13 AM
2195	South DeKalb schools (like McNair) often get brand-new, modern buildings, while North DeKalb schools (like Druid Hills) are left in crumbling 60-year-old structures. McNair Middle School. It was completely rebuilt and reopened in 2019 as a $35 million "Future Ready" facility with state-of-the-art labs and fields. Conversely, Druid Hills High School is nearly 100 years old. Despite being "bursting" with students, it was famously passed over for major repairs for years. Schools in high-demand neighborhoods (like Oak Grove or Vanderlyn) are often at 110% capacity. The "Lakeside Cluster" Reality: While the district has 20,000 empty seats overall, those seats are mostly in the South and Central parts of the county. In neighborhoods like Oak Grove, schools are frequently at 110% to 120% capacity. Neighborhoods like Oak Grove or those in the "Lakeside Cluster" have seen a massive influx of young families. Because these schools were built decades ago for a smaller population, they have "gone over" 100% capacity, resulting in the trailers. Politics and "equity" formulas have historically prioritized building in the South, while market demand and population growth have prioritized living in the North. For a long time, some board members argued that "richer" areas didn't need the money as much as "underserved" areas. Schools that need the space don't get the funding, while the schools that have the funding don't have the students. The "Student Assignment Project" isn't about efficiency, but about closing schools in certain neighborhoods to free up land or move money toward projects that benefit "connected" contractors. Many remember 2013, when the Governor had to intervene to remove school board members just to keep the district from losing accreditation due to "mismanagement and petty infighting.	2/19/2026 4:44 AM
2196	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: Already exceeds the 88% utilization target (89% current; 96% projected) Has four consecutive years of enrollment growth Ranks in the top tier academically Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	2/18/2026 9:33 PM
2197	It would be helpful to know how the zoning would change to better understand where my children would be going to school. That would help us to make informed decisions on how the closings would effect us. Thank you	2/18/2026 9:22 PM
2198	If you have people in a similar area, their child's educational path needs to be the same - banding across each district should be the same.	2/18/2026 5:06 PM
2199	Keep Vanderlyn Elementary School. It is invaluable to our community and our children!!!!!	2/18/2026 5:00 PM
2200	No me parece esforzarlos desde muy temprana edad y cada grado de acuerdo a su edad no me gustaría que mi hijo tenga convivencia con niños más grandes	2/18/2026 4:33 PM
2201	Please provide more transparency on the factors listed as rationale for closures/repurposing: low educational adequacy and underutilization. I don't see information on these and from what I	2/18/2026 4:24 PM

	can interpret, the decisions do not make sense to me.	
2202	If Evansdale is to shut down, Livesy needs to open up to school choice- I will literally move if my children have no choice but to attend Smoke Rise.	2/18/2026 3:36 PM
2203	The DLI program is strong at Evansdale and we've worked too hard just to see it end due to numbers. Stop rebuilding schools to make bigger buildings. That's the real problem. Don't punish our neighborhood schools because it was decided to rebuild some to make them bigger. That was completely unnecessary and now our close-knit community is being threatened. No thank you.	2/18/2026 3:23 PM
2204	The Pk-3 and 4-5 grade bands for elementary is harder on parents with transportation and having kids in more than 1 school. Also does not promote school community and stability since people are only there for a few years	2/18/2026 2:56 PM
2205	a "like kind" exchange should be considered. If a school closes its unfair to send students to a dramatically lesser school. That is disruptive to communities that take a long time to build and form	2/18/2026 2:22 PM
2206	Be careful about changing the district lines of schools, as people have purposely moved to where they wanted their child to go to school. The entire reason you are having this problem is people moved away from the underperforming schools or the more dangerous criminal areas within the county. My son has been in DeKalb County schools since Kindergarten. We started all the way down in the south of the county when they first opened Barack Obama Elem, moved up to Snapfinger Elem area, then into Freedom Middle and now Chamblee High. This was intentional for the safety and educational benefits to my child as he was moving between grade bands. My point being, if you change the school district lines, people will just move away from what they think is dangerous or under performing. I see the point of closing schools that are under enrolled, but the larger problem is changing the perception and performance of these schools. I believe Freedom Middle had a similar issue prior to my son attending. During the years my child was there I watched the principals of that school overhaul the culture of the school. If you focus more on retaining good principals and staff like you had at Freedom Middle, you will do better at keeping families in the school districts.	2/18/2026 1:53 PM
2207	The long term plan of land use - if you are going to close a stand alone ES, why not look at closing a ES that is next to another school to create more seats in that school (Ex. Chestnut ES and Peachtree MS). Better understanding on where kids would go if schools were closed.	2/18/2026 1:10 PM
2208	Must have consistency in the Cluster. Benefit to the students, parents/guardians, and community. Can plan for traffic, work schedules, etc.	2/18/2026 12:58 PM
2209	Please keep supporting Oak Grove Elementary and Kittredge Magnet School for high achievers	2/18/2026 12:29 PM
2210	If the recently suggested scenario were to be implemented I believe there would be a mass exodus of students from DCSD in favor of private schools or moving to other counties outside of Dekalb that have better schools. This would only exacerbate the problem of declining attendance particularly in areas like the Chamblee cluster where there are plenty of private school options and families with the means to send their kids to private school. My son currently attends Montgomery Elementary and we absolutely love the teachers, the staff, the leadership, and the community. However, with the potential to be redistricted to another lower performing elementary school, we have already decided that my second child will be going to private school to start kindergarten.	2/18/2026 11:31 AM
2211	I would recommend an increased chance for magnet/charter schools for the kids whose schools will be closed. I think this could be accomplished this way: a two lottery system where a) a first round lottery for a certain number of openings is restricted to kids from the closing schools; and b) a second round lottery just like the current one, where the kids from the closing schools names are reentered into the broader pool of all applicants. Similar to my answer for 4, here's additional info that would be helpful: 1) where will kids go once their current school closes, and will that affect where they are currently projected to go for any school that they would currently "feed" into (for example, if Ashford Park closes, where would they go, and would they be in a different middle/high school than currently projected to go to) 2) impacts on bus times and routes; 3) teacher/staff loss estimates under the scenarios under projections; 4) program loss under each scenario (for example, if an ES is currently STEM certified, but then the teachers are split up, will the district be able to maintain current program offerings). 5) evaluation method and data for each of the scenarios as we go through the process (for	2/18/2026 11:17 AM

	example, are you using some sort of transportation modeling to determine the "more efficient" transportation routes, and if yes, stakeholders should be provided with access to that modeling platform and the inputs).	
2212	In 2007 we moved our oldest child to private education. The reason was that it was a year DC capped Kitteidge seats at 2 per school. Our child was #3. There were empty desks at the magnet. Some decisions made by DC are made for political reasons even if there is a cost borne by a child. Don't let it occur. Try to help all children even if you have to do so with several localized options across the county.	2/18/2026 10:16 AM
2213	Are the missing 18000 students in private schools? Combining schools may make some families move to private schools especially with school vouchers providing off ramps.	2/18/2026 10:01 AM
2214	Schools are needed I think there needs to be a better solution than just closing schools.	2/18/2026 9:59 AM
2215	1. Protect Academic Pipelines (Especially Advanced Math & Magnet Pathways) One of the strengths of the Chamblee cluster is the clear progression of advanced coursework from elementary through high school. Any facility consolidation or grade band change should explicitly address: How advanced math placement will be preserved beginning in Grade 4–5. How Kittredge's 4–6 magnet structure will align with any new grade configuration. How students will continue seamless access to accelerated pathways leading into high school AP/IB tracks. Structural changes that unintentionally disrupt academic sequencing could have long-term consequences. 2. Avoid "Change for the Sake of Change" The Chamblee cluster is high-demand and relatively stable compared to other parts of the district. If enrollment and utilization are not significantly misaligned here, this cluster may not require structural intervention. It would be helpful for the district to clarify: Which clusters are experiencing severe under- or over-utilization. Whether high-performing, stable clusters are being adjusted primarily for district-wide symmetry rather than local need. 3. Transportation & Traffic Reality In our area, traffic patterns are already challenging. Any consolidation or grade band shift should include: Projected bus ride times. Impact on carpool lines and surrounding neighborhoods. Consideration for families with multiple children at different schools. Operational efficiency should not significantly increase daily family burden. 4. Long-Term Stability Commitment Families need confidence that whatever structure is adopted will remain in place long enough to justify the disruption. If changes occur, the district should commit to: A minimum stability window (e.g., no additional structural shifts for 5–10 years). Clear metrics that would trigger future reviews. Repeated reconfiguration erodes trust. 5. Define Success Metrics Upfront Before implementing consolidations or grade band changes, the district should define what success looks like: Improved academic outcomes? Balanced utilization percentages? Reduced operational costs? Increased program equity? Families should be able to look back in 3–5 years and objectively evaluate whether the change delivered its promised benefits. 6. Consider a "Do No Harm" Principle for Stable Clusters If the Chamblee feeder pattern (K–5 → 6–8 → 9–12 with the 4–6 magnet overlay) is functioning effectively, the burden of proof should be high before altering it. Improvements should strengthen what works, not destabilize it.	2/18/2026 9:26 AM
2216	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: Already exceeds the 88% utilization target (89% current; 96% projected) Has four consecutive years of enrollment growth Ranks in the top tier academically Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	2/18/2026 9:16 AM
2217	Dividing the elementary schools into two makes it more difficult for families with different age kids to school. Consolidating ES/MS or MS/HS makes more sense and would actually benefit families with kids of different ages due to fewer pick up/drop offs. However, maturity	2/18/2026 8:43 AM

	differences should be considered. I don't think having 8th graders in an elementary school is appropriate, but 6th graders would be. Consider PK-6 grade and 7-12 option.	
2218	As the next round of scenarios is developed, I encourage the district to prioritize student stability, minimize the number of school transitions, and limit transportation time increases for families. Clear data on enrollment projections, building capacity, and long-term financial impact should be shared to support transparency. It is also important to consider the impact on staffing, class sizes, and access to academic and support services to ensure equity across all schools and clusters. Continued community engagement will be critical before final decisions are made.	2/18/2026 8:42 AM
2219	Please be mindful of traffic, age of students, and location of schools who will have increased attendance lines.	2/18/2026 8:25 AM
2220	6-12 should not be on the table.	2/18/2026 5:52 AM
2221	Thank you for your work to look at optimizing resources for our children. As a mom of 4, one with special needs, and others who possibly qualify as gifted, I would love an opportunity for them to all attend the same school in the future with available resources at all levels of need. Thank you for your consideration!	2/18/2026 12:10 AM
2222	Quality analysis	2/17/2026 9:28 PM
2223	Please strongly reconsider this sledge hammer approach to our school system!	2/17/2026 9:14 PM
2224	I appreciate the district’s long-term planning efforts and recognize the need to address enrollment and facility utilization challenges. However, future scenario iterations should more clearly differentiate between schools facing structural under-enrollment challenges and those that remain educationally strong, stable, and valued by families. Oak Grove ES represents a high-functioning, trusted, and academically stable learning environment. Closure of such a school introduces significant and avoidable disruption for elementary-age students while risking unintended community and enrollment consequences. Planning frameworks that emphasize capacity efficiency should be balanced with educational continuity, student stability, transportation impacts, and the broader role schools play as community anchors. Schools that are performing well and sustaining strong family demand warrant additional scrutiny before consolidation or closure is considered. I strongly encourage the district to prioritize strategies that preserve effective elementary learning environments like Oak Grove ES and explore alternative solutions that align facility goals with student and community stability.	2/17/2026 9:07 PM
2225	For the next round of scenarios, it would be helpful if materials included more complete impact modeling so the community can evaluate tradeoffs clearly. Specifically, please consider publishing: • Receiving school enrollment projections after reassignment• Class size projections under each scenario• Transportation time and routing impact estimates• Feeder pattern projections showing long-term effects on middle and high schools• Cost comparisons between maintaining/renovating facilities versus consolidation plus transportation and expansion costs elsewhere Providing this information alongside future scenarios would help families give more precise, data-driven feedback and help build trust in the decision-making process. Thank you for continuing to gather community input and for considering the student experience alongside facility planning.	2/17/2026 8:55 PM
2226	Need to inform teachers sooner then later so that they can made a decision on which school they would like to work at.	2/17/2026 8:13 PM
2227	There is no question there is a need to collapse the elementary schools but there is only 1 theme middle school in dekalb. You're literally building on it and then you're going to change the school.	2/17/2026 8:02 PM
2228	I think we should consider combining some of the high schools with lower enrollment and just move the middle schools from the cluster into the vacant high school buildings, then there would be a bigger capacity for the middle school level.	2/17/2026 7:10 PM
2229	N/A	2/17/2026 6:21 PM
2230	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing	2/17/2026 5:22 PM

	excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	
2231	Closing schools near utilization goals doesn't help the situation. It makes Dekalb LESS appealing to prospective families moving into the Atlanta area. OGE has had 4 years of growth, ranks highly academically, the adjustments needed at Sagamore and Briarlake would be far more than makes sense to meet your goal. Instead of closing schools you should focus on doing better. The county just had a huge scandal of doing their job badly-HORTON. The new Globe school is silliness. That's not appealing to new families coming to the area at all. There's 0 accountability there. I wonder why people would choose private over public given the choice when this is the board. Reward schools that do well, focus on schools that are truly struggling. Do your jobs, hire people to work in the district instead of outsourcing contracts to psychologists and OT.	2/17/2026 5:04 PM
2232	Please see above. Closing Oak Grove Elementary School does not make sense. It is not under-staffed or under-enrolled. It is likely that more students will attend the school in the near future. Teachers are good and the kids generally perform well on tests and extracurricular activities.	2/17/2026 4:50 PM
2233	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? 3. What are Oak Grove's projected utilization rates in 2028 and 2030? 4. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	2/17/2026 4:16 PM
2234	Where do the schools that are presented to be closed move to. For example oak grove and McLendon?	2/17/2026 3:54 PM
2235	What is happening with the overcrowded Dunwoody High School??	2/17/2026 2:03 PM
2236	As a DeKalb County Alumni, middle schools were just beginning to be built. I wonder if it would be more impactful will to add grades to the elementary schools (6th and 7th) and add 8th grade to high schools again.	2/17/2026 1:36 PM
2237	too many schools closing in lithonia and scottdale	2/17/2026 1:16 PM
2238	Are we working closely with the county to look at housing and how housing impacts student attendance and enrollment? We are overwhelmed with youth group homes in South DeKalb, which greatly impacts enrollment and suspensions. We also have a high level of short-term rentals in South Dekalb. We have many families that move at least 1-2 times a year to various schools in Dekalb county. How is the data accurate with this in mind? We also need dedicated office and training space for the school district. Would closed schools fill this need?	2/17/2026 12:26 PM
2239	Poner atención al la limpieza de la escuela Huntley Hills ya que necesita mucho apoyo porque está muy sucia.	2/17/2026 11:53 AM
2240	shutting these schools is ridiculous. Fix the problem with how terrible these schools are and	2/17/2026 11:38 AM

	kids would come back. I personally feel like I've had to send my schools to private because of how bad all Dekalb country schools have performed.	
2241	Please address the whole issue. The enrollment numbers are due to poor instruction and accountability of the students. If you pass students without the skills they need to matriculate to the next grade level, there is no hope.	2/17/2026 8:54 AM
2242	I personally attend es k-7, hs 8-12. I feel like I missed out on the whole middle school experience.	2/17/2026 8:09 AM
2243	I drive on Dekalb roads everyday, see the value that teachers, students, & staff bring to the community. Closing schools means closing opportunities for the future of our students, requiring more scheduling for bus operations (which are already underpaid), less incentives to attract families to the Dekalb county, INSANE. This idea or “roll out” is counterproductive to the 6-8 year implementation. 6-8 years fully investing into the future instead of LIMITING it. Shame on you all	2/17/2026 12:57 AM
2244	I fear Brookhaven Fields / Drew Valley / Ashford Park property values could take a massive hit if redistricted from Chamblee cluster to Cross Keys cluster. The sooner you can provide guidance on which neighborhoods are at risk of redistricting the happier most folks will be.	2/16/2026 11:35 PM
2245	Don't destroy the northern DeKalb communities by closing all 3 of our high performing elementary schools.	2/16/2026 10:04 PM
2246	If we currently exist in the high operating costs, small schools area, it is important to help folks understand quite specifically what is missing from programming and where. Our school asks of families to supplement programming and most families who can give do - my sense is that families are quite happy but I realize our school does not represent all those in the district. It’s hard to be ready to give up such huge benefits of small schools without a real understanding and commitment of accountability to outcomes that result. Including the likely outcome that more families consider private school across the county.	2/16/2026 9:59 PM
2247	Neighborhood schools make for strong communities. McLendon Elementary is a special little school with a nurturing staff and faculty. I worked there for a couple of years. I hate to see it go.	2/16/2026 9:20 PM
2248	Consider also projected traffic growth and current traffic density. Safety for pedestrians needs to also be a consideration as speeding motorists routinely blow through school zones.	2/16/2026 9:09 PM
2249	We need to spend money on additional busing. Students are dependent on school buses vs. using public transportation. We have to provide a way home so that students can stay for tutorials and after school programs and still have a way to get home. Another scenario could be split schedule where there is an A and B schedule for high school. This was done in NY and worked well for overcrowding, having the 11th/12th graders take the earlier shift so they can leave earlier to work. Focusing on getting rid of the trailers is a key step in the right direction. Modernizing classrooms for 21st century learning and specificity of programs is also key for the community to get behind change.	2/16/2026 8:43 PM
2250	I do not like grade band 6-12	2/16/2026 8:39 PM
2251	Dekalb County need to stop playing politics and remember the students. Where is the SPLOST monies. Stoneview Elementary will leave a filthy school and enter another Filthy SChool unlike Peachtree Middle which looks like a college.	2/16/2026 8:36 PM
2252	Above all, stability should be a guiding priority. Reassigning students to new schools can be highly disruptive—academically, socially, and emotionally. It requires students to rebuild peer groups, adjust to new staff and systems, and adapt to different learning environments. For these reasons, reassignment should only occur when absolutely necessary and every effort should be made to minimize the number of families impacted.	2/16/2026 8:00 PM
2253	Please reconsider Oak Grove elementary. It is a top performing school with a great history.	2/16/2026 6:26 PM
2254	Buildings and grade bands should have been considered alongside programs. Transitional years students — students who will be affected during the shift from the current structure to the future one — should be treated as a separate priority. For example, a student who begins World Language A could be rezoned to a school that does not offer that course, disrupting their academic pathway. How are you going to support such students? Programs in split campuses with large distances between them (such as Kittredge and CMS/CHS magnet) make specialized programs convenient only for families who live between the two campuses.	2/16/2026 5:11 PM

	Students from other parts of the district would face long daily commutes for a portion of their academic journey. Lastly, please consider better support for gifted and twice-exceptional students. In mixed-ability classrooms, they are often the lowest priority, expected to work independently or help peers while teachers understandably focus on struggling students. Simply having gifted-certified teachers does not automatically make gifted students a priority.	
2255	I truly appreciate the significant level of effort being invested in bringing meaningful transformation to the DeKalb County School District. I remain hopeful and encouraged that the intentions behind these efforts are sincere and centered on what is best for students, families, and the community as a whole.	2/16/2026 4:19 PM
2256	Again, I will personally work to vote every single one of you out if you proceed with this plan.	2/16/2026 4:06 PM
2257	Make decisions based on demographics and data.	2/16/2026 3:53 PM
2258	Closures should be based on which schools are failing not which schools have fewer students. Close the failing schools with terrible test scores and send those teachers to the job market and let the teachers with good performance keep their jobs and send the students from failing schools into the schools that are doing well. Why would you send students from successful schools into failing schools? Whether you want to believe it or not and it is not politically correct but some of the schools in Dekalb are poorly run and are failing. Keeping those schools open is not doing any of those students any favors. It is disadvantaging those students. Focus on performance, not bodies in a building.	2/16/2026 3:30 PM
2259	While adding on is good many building have issues with plumbing and pipes being over 50 years old so some might be better completely torn down because adding on might make their issues wirse	2/16/2026 3:27 PM
2260	Minimize school reassignment as much as possible. It is tremendously disruptive and harmful to students and families to be reassigned to different schools. Shuffling learning plans, and social/educational networks is extremely detrimental. For this reassignment should be avoided and be considered an absolute last resort.	2/16/2026 3:25 PM
2261	Please rethink school closures.	2/16/2026 2:52 PM
2262	Each cluster needs to have the same grade band for consistency. Students may have to relocate/move from one cluster to another.	2/16/2026 2:50 PM
2263	noooo	2/16/2026 2:46 PM
2264	N/A	2/16/2026 2:34 PM
2265	They are pretty much little kids until they're about 9 or 10. When their bodies start to change, and hormones start to kick in, they need some extra attention (which in my experience with middle schools they do NOT receive!) and when they are a teenager they should be able to perform like young adults.	2/16/2026 2:34 PM
2266	Please keep Oak Grove open!! The school is projected to be at 96% enrollment in a year!!!	2/16/2026 2:29 PM
2267	Oak grove elementary school attendance has been increasing. It is a wrong choice to take it away when growth is happening and it has been a successful school	2/16/2026 2:22 PM
2268	As a community member in Sagamore Hills, I also want the district to review and discuss impact to traffic of expanding schools like Sagamore. Currently, Alderbrook is already very congested at drop off and pickup. Adding more students will exacerbate this problem and I think the district should be proactive in trying to alleviate further issues, by exploring how traffic can be directed, where entrances and exits to the school make the most sense, bus entrances, etc.	2/16/2026 2:08 PM
2269	I am not interested in all this survey about band scenarios. Interested in DeKalb County Schools protecting students from ICE	2/16/2026 1:33 PM
2270	I think you are doing a disservice to the children by moving towards a larger school/lack of neighborhood schools model. I think you may have to close a few schools BUT rather than close 27! you could re group the schools you already have to best serve your students. ALSO if you would do more for the students to make the schools more desirable, perhaps more students would enroll in the district. Behaviors are AWFUL. Communication with parents and schools are AWFUL. Teachers that care often leave because they have no support and the ones that remain could care less about the students and it shows. Before you start thinking of	2/16/2026 1:16 PM

	rearranging and closing schools, you should look at how the schools are run, how the staff handles situations, administration, student behaviors, etc. And I don't just mean on "announced" visits when the school puts its best foot forward. Talk to parents, talk to students, find out what you really need as a district. This isn't it.	
2271	Don't close the schools.	2/16/2026 12:32 PM
2272	I am extremely disappointed in the way that this has been rolled out. While I understand that this is "just a conversation starter" and no decisions are final, this format all but begs communities to turn on each other. This feels more like "survival of the fittest" or "the squeaky wheel gets the grease" causing division in a time when we need communities to come together! Not only that, it has unnecessarily caused stress among teachers, students, parents, and community members. Perhaps all stakeholders would not be as upset, I know this one wouldn't be, if the $6.5 million dollar property that was purchased in 2024 was part of the plan or if the plan included eliminating the excessive amount of employees who ARE NOT necessary school based personnel and hold a district level job. These changes could begin to alleviate the financial stress the district is facing immediately as opposed to waiting 6-8 years. I know that buildings would still have to close and hard decisions made about those closures, but it is WRONG to ask communities to make the entire sacrifice, especially when the county can make adjustments to current practices and assets. It is time Dekalb started leading by example!	2/16/2026 12:30 PM
2273	Engage community more think about long term impacts of these decisions. Example if you close good schools parents might opt for sending kids to private schools and or move to other counties offering better education offerings for children. Long term impact is decreased population of middle to upper class and lost tax income.	2/16/2026 12:23 PM
2274	You need to provide reasons and supporting data for all your scenarios and you need to retro-actively provide reasons and supporting data for the first roll out of scenarios pertaining with school closures. I cannot provide any meaningful insights on the initial scenarios for closures/consolidation until I know the reasoning and supporting data. Transparency has been a problem since the beginning of this process. You think you've been transparent but you have not because there has been information withheld from SAP committee meetings and community engagement meetings.	2/16/2026 11:41 AM
2275	Rezoning could possibly help save some smaller schools.	2/16/2026 11:36 AM
2276	Keep class sizes small. Do not overwhelm educators.	2/16/2026 11:24 AM
2277	Enrollment is cyclical and is believed to consolidating is a dangerous idea.	2/16/2026 11:14 AM
2278	Please consider expanding or building a new Lithonia High School. We serve a large population of DCSD students.	2/16/2026 10:51 AM
2279	I encourage the district to prioritize student learning, support services, and community engagement in the next round of scenarios to ensure continuity and success for our students.	2/16/2026 10:34 AM
2280	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: 1. Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? 2. 3. 4. Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment	2/16/2026 10:04 AM
2281	Consider everything holistically, and serve students better.	2/16/2026 9:40 AM
2282	Keep Kingsley Open	2/16/2026 9:39 AM

2283	* Oak Grove already exceeds the 88% utilization target (89%, projected 96% in 2026). * Oak Grove has experienced four consecutive years of enrollment growth. * Closing Oak Grove would require significant capacity adjustments at Sagamore Hills and Briarlake. * Oak Grove ranks academically in the top tier of reviewed schools. For these reasons, the district should prioritize consolidation efforts at schools operating well below utilization targets, where efficiency can be improved without triggering new capital expansion or destabilizing high-performing, growing school communities. Thank you for your thoughtful consideration of this feedback.	2/16/2026 9:34 AM
2284	This a disruptive idea, and I really think that we have a great thing going with our current school system and it should not be changed in any way.	2/16/2026 9:30 AM
2285	We would like to see the proposals for where the zones might be and which schools the kids of the closed schools would then go to. Im also concerned about how the schools absorbing those kids will manage with their facilities - lunch, specials, parking, recess. Austin has some extra classrooms, but time it would be interesting to see how we fit more kids in to the lunchroom, divide them for specials, manage the inclusion classes, etc. I would love to see more specific idea on how this might work. Overall, I think its a great plan.	2/16/2026 9:28 AM
2286	Mold in the building, leaks, a lot of empty classrooms and teachers call out of work a lot. There are always substitutes there that don’t teach so children are not learning. The state test scores are very low for it to be a “Theme” school	2/16/2026 9:27 AM
2287	Do not close Oak Grove Elementary and instead invest in the facilities and increase the zoning area.	2/16/2026 9:22 AM
2288	n/a	2/16/2026 9:16 AM
2289	Oak Grove has been a high-performing school for decades. It is the core of a stable community. It meets the utilization targets right now and is projected to continue to grow in the next few years. It simply doesn't make sense to close it.	2/16/2026 9:07 AM
2290	Although Sagamore Hills is a Community School it truly is not living to the potential and high standards that DeKalb should have for its school buildings. Sagamore Hills should be closed.	2/16/2026 9:06 AM
2291	I do not believe that expanding or closing schools is the answer to enrollment is closing/expanding schools. It would not benefit the students in any way to go to a bigger school, especially if they're use to a small school. Behavior problems and bullying could escalate with more students. I think the most beneficial thing is to critically about what would happen to students and families if they were suddenly forced into a bigger environment than they're used to, and to understand that there should be much more thought into how to work to increase enrollment, not taking the easy way and closing schools and expanding others. Not to mention some families/students, even teachers, may struggle to get to a new school location and decide to take their child/children elsewhere, leading to further enrollment decline. Students with accommodations, IEPs, and 504(s) will not receive the help they need. Students who are close to advancing to the next benchmark likely would receive the time and attention needed to help push them over that benchmark because, with larger classes and larger schools, teachers likely won't have the time to help them even if they want to. "Lower" students might be left behind because, with the emphasis on data, teachers will feel obligated to spend time with the higher achieving students to boost the data. This could lead to increased dropouts. Please rethink this and truly think about why families have not been enrolling their students. Again, closing schools and expanding others is not the answer; it's the easy way and I do not think it will help enrollment in the long run.	2/16/2026 8:57 AM
2292	Closing small community elementary schools I to larger facilities will not solve Dekalbs problems and will disadvantage the most vulnerable students....get rid of the bloat and high salaries in the administration distraction that have done nothing to ensure our children can read, do math, be prepared for the next level...not be passed on unprepared until they are no longer your problem...and most the facilities need to be demolished and rebuilt...our kids deserve better.	2/16/2026 8:55 AM
2293	I was surprised that school demand and quality were not considered in this round, and feel strongly that they should be. Please reconsider closing this beloved neighborhood school.	2/16/2026 8:47 AM
2294	Increase seats in theme schools please.	2/16/2026 8:46 AM
2295	Please don't close Oak Grove Elementary	2/16/2026 8:40 AM

2296	We appreciate the time and efforts you are putting into this project. We are all hoping for the very best outcome for all of DCSD students, communities, and staff.	2/16/2026 8:39 AM
2297	Each Area (1-7) can have different scenarios based on needs and preferences. One size does not fit all in Dekalb county.	2/16/2026 8:36 AM
2298	Having location relocation as a primary relocation priority.	2/16/2026 8:33 AM
2299	N/A	2/16/2026 8:17 AM
2300	If you are going to put out a list of possible school closures I would give a more definitive timeline listing when they would close. Teachers are starting to worry they won't have a job	2/16/2026 8:16 AM
2301	Make good decisions based on a well developed long term plan. Avoid the corruption, nepotism and incompetence of the past.	2/16/2026 8:08 AM
2302	The salaries brought into this district, along with the CO jobs assigned to principals dealing with stakeholder grievances, and the millions spent on the abandoned admin building, could have funded pay raises for our frontline workers, such as teachers, bus drivers, and cafeteria staff. This was initiated by Horton. Everyone he brought in, along with a few accomplices, needs to be evaluated. The Board of Education should resign, and all activities should be paused. If the right measures were being taken, a forensic audit would be conducted to ensure proper oversight and prevent adding more issues to the existing problems. SRES just experienced this situation. Ask Mrs. Latalia Robbins about the car rider line since the merger, especially since she wants to comment on families relocating to Midvale. Perhaps she can address her decision to leave bus rider duty every morning to help the former superintendent get his kids out of the car he parked in front of the buses, while other stakeholders struggled to drop off their children and get to work on time. Who will handle the logistics of the increased strain on the car rider process (pick up and drop off), along with the extra stops and delays in the morning and evening? Kids already wake up too early to reach the bus stops for school and face significant delays in the evening due to more routes with fewer drivers. A 5-minute ride for kids in the community can take an hour or more to get home in the evenings. Let's talk about how these larger classrooms result in more transition time, longer lines, and less time for meals. And what about the additional resources? Those funds are consumed by the growing number of students. There is nothing extra. Don't forget about the specials teachers, who receive no support and must interact with every single child. What about events and programs that can barely accommodate attendance? We also need to consider the amphitheater, which is seldom used, and the extra time needed to organize field trips. If property taxes are removed, I hope those pushing for this change are based on data. If you want to discuss this in real time, speak to a parent from SRES.	2/16/2026 8:02 AM
2303	I beleieve the schools with 300 or less should be the ones closed. North or south,	2/16/2026 7:57 AM
2304	To ease the size of high schools and have more siblings together that aren’t of driving age 6-9 works	2/16/2026 7:55 AM
2305	As the district considers the next round of scenarios, I strongly encourage the inclusion or expansion of specialized learning models such as Montessori programs, dual-language immersion schools, or other theme-based academies. These models can attract and retain families, increase enrollment, and provide distinctive, high-quality educational options within existing facilities. Rather than focusing primarily on consolidation, the district could strategically invest in specialized programming at targeted schools or clusters to strengthen community interest and long-term sustainability while preserving neighborhood school access.	2/16/2026 7:28 AM
2306	N/A	2/16/2026 1:35 AM
2307	Leave Cedar Grove students in their Cluster. Make the HS grades 7-12 and Pre-K-6 at the Middle School. Or put all Pre -K students from Cedar Grove ES and Oakview at Oakview, then 1-6 at the MS	2/15/2026 10:49 PM
2308	What funds that needs to be addressed allow the parents and teachers to pull together to gather the funds that needs to be met. This is OUR FUTURE AS A HUMAN RACE THAT NEEDS TO BE ADDRESSED PROPERLY AND RIGHTFULLY!	2/15/2026 10:26 PM
2309	This does not make me want to send my kids to Dekalb County public schools. This will accelerate the decline in enrollment, our family included. It seems like an obvious point, but no one wants to send their elementary or middle school aged children to a bigger school. I see how this may help the utility bill, but I don’t see how this will help my kids. This is a minor	2/15/2026 10:23 PM

	point but I read all of the above talking points, and there were multiple grammatical errors! That's embarrassing.	
2310	What is happening to the magnet schools?	2/15/2026 10:13 PM
2311	More information needs to be given out to these communities, current enrollment for each campus. Budgets for each location, predicted cost for the proposals-to be assumed that all this will be tax payer funded. Timeline for closures, what happens to all the buildings and land slated to be closed? Voters and parents need more specific and detailed information.	2/15/2026 10:10 PM
2312	Closing these schools would cause a major impact to the children in this community and the teachers and staff.	2/15/2026 9:53 PM
2313	With respect to the work behind the scenes on this project, releasing a list of potential closures as the first public facing step of the discussion is very damaging. More focus should be placed on student outcomes, safety, and well-being However, an appropriate next step would be to slow down and consider a small sample size - particularly at the elementary level. Redistricting plans should be clear - it's difficult for parents to provide feedback when they don't know where there child will be going if their school is closed. Consolidating in the North Druid Hills/Druid Hills area is particularly puzzling since this area is expanding and will likely need the three elementary schools in the Lakeside cluster to absorb incoming students as family move to the area for CHOA/Emory employment.	2/15/2026 9:39 PM
2314	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: Already exceeds the 88% utilization target (89% current; 96% projected) Has four consecutive years of enrollment growth Ranks in the top tier academically Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. If the objective is to close the utilization gap, the district should prioritize schools operating well below 70% utilization, where consolidation meaningfully improves efficiency without triggering new capital expansion. Before proceeding in this corridor, clarification would be helpful: Were 2024–2026 employment expansions and residential pipeline data incorporated into enrollment projections? Were pandemic-era regression inputs weighted in a way that distorts post-2023 growth trends? What are Oak Grove's projected utilization rates in 2028 and 2030? What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	2/15/2026 9:17 PM
2315	Consolidation is good to bring efficiency and have more resources to benefit the kids. Different kids have different varying needs like gifted students, students requiring extra help. School district should have plan to cater to such needs.	2/15/2026 9:02 PM
2316	These schools that are due to close are very important schools and they are difference makers in the community	2/15/2026 8:27 PM
2317	Keeping children close to home is essential.	2/15/2026 8:13 PM
2318	providing some of the financial gains, class size changes, and other information would have been helpful in allowing us to form a more educated opinion before asking us to complete a survey would have made our opinions more relevant.	2/15/2026 8:11 PM
2319	Oak Grove enrollment is expected to be 96% next year and it has 4 consecutive years of enrollment growth.	2/15/2026 5:38 PM
2320	DO NOT CLOSE ANY SCHOOLS, DO NOT COMBINE SCHOOLS!!!	2/15/2026 4:27 PM
2321	Scenario 1 proposes 27 elementary closures, exceeding the previously referenced range of 4–16. Oak Grove: • Already exceeds the 88% utilization target (89% current; 96% projected) • Has four consecutive years of enrollment growth • Ranks in the top tier academically • Would require significant capacity adjustments at Sagamore Hills and Briarlake Closing schools already near or above utilization targets redistributes students without materially reducing excess capacity. What are the comparative capital costs of maintaining Oak Grove versus expanding Sagamore Hills and Briarlake? A phased, data-driven approach focused on the largest drivers of underutilization would better align with fiscal responsibility and long-term capacity planning. Decisions in this growth corridor should be sequenced carefully to avoid eliminating capacity needed to support major community investment.	2/15/2026 4:19 PM
2323	I'm curious how Evansdale was selected for closure. It makes me wonder if the DLI program was considered at all among the people that were thinking through the scenario alternatives.	2/15/2026 4:18 PM
2324	We are a part of the DeKalb Overlay Improvement Program. Our community is growing. Don't cut out a piece of our heart before we truly have a chance to live.	2/15/2026 3:34 PM
2325	Reconsider Oak Grove Elementary School as being closed and consolidated. Ultimately, I think many families may move out of the school district.	2/15/2026 3:13 PM
2326	The district should investigate that does the county really has 110,000 students, but about 18,000 students are not attending public schools and the if the answer is yes why, and what can we do to change that instead of going straight to closing schools.	2/15/2026 2:56 PM
2327	Closing schools in the north section of the county seems short-sighted.	2/15/2026 2:16 PM
2328	Please consider community and parent involvement at schools. Oak Grove has a robust foundation and STEM support from the community.	2/15/2026 1:36 PM
2329	Satisfactory	2/15/2026 12:08 PM
2330	Do what is best and most cost efficient.	2/15/2026 11:55 AM
2331	None	2/15/2026 11:45 AM
2332	6 graders should not be with 12 graders. Thats a big transition and what about sports and other social development. Find another way to retain better teachers than to punish students with a lesser learning experience.	2/15/2026 11:42 AM
2333	I believe a change of this magnitude will cause residents to move out of the Oak Grove area or choose to send children to private options.	2/15/2026 11:31 AM
2334	Please listen to the leadership from Oak Grove Elementary who have looked at the numbers. This will cause a greater decrease in enrollment to make changes to communities based around some of these schools.	2/15/2026 11:15 AM
2335	Actually read and take into account the stakeholders - the students, families, teachers, that go into these schools every day, who live in these neighborhoods, who drive these roads everyday to and from school/work/games/etc., who's taxes to toward funding, and who are then asked to donate and volunteer on top of all of that. Do not just pay attention to whatever research firm is being hired to do a study or a survey. Do not pay attention to whatever school has the best football team. Pay attention to staff. Pay attention to staff placements - not just dropping teachers off in schools because "they have strong leadership and keep an eye out on her." (Direct quote from district, by the way).	2/15/2026 11:10 AM
2336	Why does the DLI program end at grade 8? Students should be able to stay woth their cohort	2/15/2026 11:09 AM

	through graduation.	
2337	Fix the buildings. Get rid of roaches. Color the stadiums make it mean something. Folks will come back. Dekalb looks old. We need some life	2/15/2026 10:56 AM
2338	I recommend a smarter fiscal approach. Start smaller with closures that precisely hit 88% utilization, phasing in changes to monitor effects and avoid unnecessary costs. For clarification - were 2024-2026 area investments factored into enrollment projections? Provide costs: remodel Oak Grove vs. expand Sagamore/Briarlake. Why include Oak Grove over lower-utilization schools?	2/15/2026 10:25 AM
2339	Unfortunately we have a huge rental population which causes students to move around often. Changing grade bands would have a further negative impact on our students.	2/15/2026 10:21 AM
2340	I think it’s a slap in the face to the school house to update and expand county facilities and personnel while leaving schools falling apart and taking needed staff. If anything schools need more staff and the county office should be streamlined.	2/15/2026 10:16 AM
2341	Oak Grove Elementary is a fabulous school and a cornerstone of the community. If this school closed, it would be devastating to the community. Many students would end up at private school, not another public school.	2/15/2026 10:08 AM
2342	Scenarios 1 overreaches with the closure of 27 elementary schools, including Oak Grove despite its 6-year enrollment growth to 96% projected for 2026-27 and top academics. The Druid Hills/North Druid Hills areas is continue to grow creating new jobs and attracting families to move here. Due to all of this, Oak Grove Elementary should not be considered to close when other schools have lower-utilization and are preforming lower than Oak Grove.	2/15/2026 10:03 AM
2343	Please continue to enhance clarity where feasible. While I value the inclusion of a 'worst-case' scenario, it is important to note that most stakeholders may not analyze the data in depth or infer changes based on factors such as facility age, attendance trends, and other economic indicators.	2/15/2026 9:56 AM
2344	Overall, I recommend: • Prioritizing redistribution before closure • Strengthening feeder pattern alignment within clusters • Using grade band adjustments to enhance academic programming rather than solely as a cost-saving measure • Protecting LRE and access to special education services when reconfiguring grades	2/15/2026 9:52 AM
2345	Kids on lower grades should feel like they’re in a separate school if combined with higher grades	2/15/2026 9:34 AM
2346	I think there should be some K-8 configurations.	2/15/2026 9:21 AM
2347	N/a	2/15/2026 9:15 AM
2348	Evansdale Elementary is a STEM school with French immersion program. It's a special school. Please reconsider your proposal	2/15/2026 8:46 AM
2349	Update Ashford park building but don’t close it	2/15/2026 8:21 AM
2350	Rock Chapel should stay open.	2/15/2026 8:01 AM
2351	I would like to see more data about what the potential savings are from this plan.	2/15/2026 7:03 AM
2352	Questions 6 and 7 are being used to encourage and validate a need for change. Instead of spending money to revamp facilities and transportation, money can go to other beneficial services within the district and county.	2/15/2026 6:21 AM
2353	Really hoping Canby Lane is taken off the list for potential closure/repurpose.	2/14/2026 11:33 PM
2354	Allow closed schools to be donated to nonprofits doing educational work.	2/14/2026 10:42 PM
2355	N/A	2/14/2026 9:42 PM
2356	Young children are developing socially at a different rate than older kids and perhaps that shouldn’t be in the same building. The educators handle the ages groups differently therefore they should be separated.	2/14/2026 8:46 PM
2357	It may be beneficial to combine McNair Middle and Champion Middle due to the similarity in programs	2/14/2026 8:32 PM

2358	Please let continue as it is	2/14/2026 8:12 PM
2359	The Littles should be a focus to set standards of SEL, academic focus and behavioral norms before moving on to elementary.	2/14/2026 8:10 PM
2360	What about DLI schools? Evansdale could be a entire school dedicated to the program, potentially boosting enrollment in the building but also in the county overall	2/14/2026 8:00 PM
2361	CLOSE TOWERS	2/14/2026 7:46 PM
2362	Vanderlyn is way too close to Dunwoody ES to remain opened. The Vanderlyn building should be repurposed for Dunwoody HS.	2/14/2026 7:43 PM
2363	It is crucial that the board includes a diverse representation of stakeholders, particularly those from the parent community. Parents of students from schools that are not directly affected by the proposed changes should also have a voice in these discussions. Their insights can provide valuable feedback and foster a more comprehensive understanding of the implications these decisions have on all students within the district, not just those who will experience immediate alterations. When the board encompasses parents from various schools and backgrounds, it promotes a more inclusive dialogue that considers a wider range of perspectives. This diversity can lead to more thoughtful decision-making and help ensure that the impacts on all families are taken into account. Parents can offer unique insights based on their experiences and knowledge about their children's educational needs, which is invaluable when planning changes that aim to enhance overall student achievement. I encourage the district to actively seek input from all parent stakeholders, not just those immediately affected, to create a more transparent and holistic approach to decision-making. This engagement will not only strengthen trust within the community but also improve the outcomes for all students in DeKalb County.	2/14/2026 6:59 PM
2364	South Dekalb needs to attract homebuyers. Any close facilities should be sold to the via the free market to be redeveloped. We don't need to keep these vacant schools off the tax rolls. Hopefully, enough schools can be combined and the after a period of adjustment a t-splost could be issued to start a rebuilding program to rebuild EVERY School in Dekalb. State of the art facilities will attract homebuyers back to South Dekalb. My neighborhood is a large one and I see approximately 6 children catching the bus in the morning. That is very telling. The average age in my neighborhood is probably 65, well beyond children bearing years. We need strong schools and new facilities in South Dekalb to compete!	2/14/2026 6:57 PM
2365	I'll have to research the article to provide my opinions on the above questions. But before I do- I've lived through 2 very specific times of transition -one was bussing kids over to another school district -and another where an influx of immigrants completely changed the face of the city. And I was an elementary teacher with strong beliefs about classes. I strongly believe that if a school is. I to silly performing at an exceptional level-LEAVE IT BE! Figure out a plan to make the other schools rise up to higher standards but don't mess with the ones that are working successfully.	2/14/2026 6:34 PM
2366	Are there options to survey the community of each school? What if fundraising or becoming a charter school is preferred over closure. Also what happens to school choice like French immersion as those schools are eliminated	2/14/2026 6:15 PM
2367	Please correct the grammatical mistakes: fewer than not less than 92,000 students and a high school not a high schools	2/14/2026 5:47 PM
2368	On a statewide scale, HB1193 includes provisions for mandatory kindergarten and retention of 1st graders who haven't hit certain benchmarks in literacy - both of which will increase enrollment in elementary schools. Research is overwhelmingly in favor of smaller schools, especially at the elementary level. Most of the commonly cited benefits of a larger school only apply at middle or high school levels. The benefits of a smaller school include increased safety and academic performance - which are top of mind for state legislators. In addition to legislative impact, I believe DCSD should consider the recent investments in the Druid Hills/North Druid Hills corridor (Arthur M. Blank's CHOA and Emory expansions, for example). My own family recently moved to the area for this reason, and we chose the Oak Grove area due to the wonderful things we heard about the staff and parents at the school. These projects are still actively attracting families, and the full enrollment impact has likely not been realized. Recent housing permit data within the attendance zone at Briarlake indicates that the elementary schoool may organically move to the 85-95% utilization range without consolidation. Consolidation discussion in this high-growth corridor including Sagamore Hills,	2/14/2026 5:42 PM

	Briarlake, and Oak Grove should be paused until projections more accurately reflect future growth. Enrollment patterns from 2020–2022 do not reflect current conditions. Lastly, while academic performance does appear to have been meaningfully considered, it should be. Oak Grove is one of the highest-performing schools in our peer group (CCRPI Content Mastery 94.2; Readiness 95.3). One SAP representative posited that by merging high-performing schools with nearby schools, the community effect from schools like Oak Grove would translate to other schools. The only time “success transfers” is when: students move into dramatically higher-performing schools; this does not match what DCSD is proposing - in Oak Grove or other high-performing schools listed for closure. The more likely outcomes (supported by large bodies of research on school closures in Chicago, NYC, Philadelphia) are: worse academic outcomes, top families leaving the district, receiving schools' failure to improve materially, and acceleration of enrollment declines. Please consider a more comprehensive review of the schools listed for closure.	
2369	Please don't favor North Dekalb in these discussions. The families there are wealthier and better resourced, so it always seems like their voices matter more. South DeKalb already bears the burden of disinvestment. This will only accelerate that if there is not a conscious effort to use this as an opportunity to improve education in South DeKalb	2/14/2026 4:27 PM
2370	Take parents' input into consideration, I suggest that the board have interviews with parents to know more about what students have had to endure in the last several years in schools in the areas incorporated.	2/14/2026 3:44 PM
2371	I am not pleased about how Dekalb has started this conversation. Dekalb should have started the conversation by sharing DATA with Dekalb residents rather than sewing confusion and panic. Do better!	2/14/2026 3:06 PM
2372	Please consider keeping this school. We recently relocated to the area to specifically have our kids in the school. Would be devastated and co sided moving if it closed	2/14/2026 2:46 PM
2373	Protect teachers jobs during this process.	2/14/2026 2:31 PM
2374	All these changes are horrible for the district, combining neighborhood schools into a few big schools. This will make it harder to get kids to school and eliminate the small classrooms that make learning easier for kids. My family bought a house in Dekalb county because we wanted our kids to go to a small neighborhood school that has a language immersive program. We will move to another district if these changes are made and Evansdales shut down.	2/14/2026 2:22 PM
2375	Very concerned about the DLI community at Evansdale and what these changes might mean for them. Also, we paid a premium on our home when we bought it a couple of years ago to ensure my child would eventually attend Lakeside. If this changes, not only would that be upsetting as we want our child to attend Lakeside, but it would negate the premium we paid for our home as well as decrease home values in our neighborhood.	2/14/2026 2:12 PM
2376	Keep Kitteidge, but end the magnet Chamblee middle and high. They aren’t necessary and could easily be filled with kids from closed schools.	2/14/2026 1:58 PM
2377	Focusing on new grade band programming will not have the same potential negative real estate impact that redrawing boundary lines here and there could cause. The grade bands could be developed within each area for organization and use of resources such as transportation, community support, etc. Additionally, the entire district has recently adjusted to alignment within fluid areas.	2/14/2026 1:15 PM
2378	Innovative learning spaces with flexible classrooms that cater to multi-grade learning experience, active learning spaces, and "Technology labs for all grades."	2/14/2026 1:15 PM
2379	Leadership is essential. Corrupt leaders are primarily to blame. DeKalb has a history of allowing North end parents to be the decision makers while ignoring the needs of the south end. South end schools are failing because of overcrowding, the student body has taken over the schools, leaders don't support teachers, and cheating is at an all-time high at several of the high schools. The district has supported and encouraged leaders to cheat and present false data.	2/14/2026 1:13 PM
2380	While I understand	2/14/2026 12:29 PM
2381	None	2/14/2026 12:28 PM
2382	Unclear in how impact to actual student experience will be impacted - IEP, special Ed, gifted, duel immersion. No details have been given on how student teacher ratios will be impacted or	2/14/2026 12:23 PM

	school choice, transportation etc	
2383	I have spoken	2/14/2026 12:11 PM
2384	More details for families. Better executed timeline.	2/14/2026 11:49 AM
2385	Take class sizes into consideration. Take special education and ESOL services into consideration as well.	2/14/2026 11:35 AM
2386	No where in the scenarios is the student mentioned other than capacity, just building conditions and potential cost(implied). Why not hit the breaks, look at your data on what is actually working in terms of academic performance, attendance, behavior. Then use that data to inform what the future should hold in terms of new and consolidated schools. Studies have shown that in some districts, especially minority and economically disadvantaged putting kids in a smaller high schools can result in a 9% increase in graduation rates. The old superintendent would called that increase a miracle and that could be potentially be achieved just by building size. Look at your data, see what is working and what is not. Let that inform the next steps after closing schools. Actually think about the students.	2/14/2026 10:54 AM
2387	Look at all of Dekalb Schools just not the South Dekalb area. McNair DLA also has the only school based clinic Medcura in the South Dekalb area which helps students stay in school.	2/14/2026 10:53 AM
2388	Please reach out to economic leaders/professionals and ask for their opinion on impact to house values for each school determined to close and to gut check closures. The community must be considered. Happy to discuss more and provide more feedback as an economic and cre professional myself — Jordan Goolsby / Jordan.agoolsby@gmail.com	2/14/2026 9:59 AM
2389	One of the best things about DeKalb county schools is the small schools. I could never imagine sending my child to a Gwinnett-sized school (3000 in a high school)!!!	2/14/2026 8:55 AM
2390	No	2/14/2026 8:51 AM
2391	In the event the clustering takes place, it’s extremely important to me that things like mental and physical maturity (being sexually active or having thought there of), violence (and this can be as little as a food fight and as big as someone pulling out a knife), etc. are taken into HUGE consideration. I’m a former DeKalb student and I encountered those situations very seldomly while in elementary and middle. Grade 9-12 is whole different ball game and should be treated as such. You learn in so many areas outside of just academics and you have to have the mental capacity to handle it all and keep showing up daily. My child is currently in Pre-K and I have a 2yo that will be trailing behind him. I personally don’t want them roaming the same halls as kids 13 and up. On another note, I’m not against this need for refining resource allocation. Maybe it’ll also encourage faculty/staff to step their games up so that they’re not on the chopping block.	2/14/2026 8:29 AM
2392	Thank you for your hard work and attention to this concern.	2/14/2026 8:24 AM
2393	There is a desperate need for investment in our public school system. The declining quality of education and disruptive changes like this continue to drive families into private. You’re building a system that no one wants to be in and the only families in it will be those that have no other choice financially rather than any interest in or love for their community. Facilities don’t needs to be great, but the quality of educators and the standards they are held to must be. That’s where the primary investment should be.	2/14/2026 8:18 AM
2394	N/A at this time	2/14/2026 8:17 AM
2395	Show us proof of low enrollment. Leave the schools open.	2/14/2026 8:07 AM
2396	Thank you for gathering community input early in this process. As future scenarios are developed, it will be important to clearly connect any proposed changes to improvements in student outcomes and school quality. Families understand that declining enrollment creates real challenges, but community support will depend on clearly demonstrating how changes will strengthen academic programs, expand opportunities, and improve the overall student experience. Transparency around how decisions will impact teacher staffing, course availability, extracurricular programs, transportation, and school community stability will be especially important. Continued communication, clear data, and ongoing opportunities for community engagement will help build trust as this process moves forward.	2/14/2026 7:46 AM
2397	I just want to say as a parent the low test scores, corruption and lack of accountability in DeKalb Schools have led our family to educate our kids elsewhere. I would focus on why	2/14/2026 6:22 AM

	families are moving to neighboring districts and choosing not to educate their kids in DeKalb and how that relates to low enrollment. We love our neighborhood but in the next few years we will have to move or send our kids to private school because of the disappointing academic records ands opportunities at Tucker Middle and Tucker High.	
2398	Lithonia Cluster Considerations 1️⃣ Enrollment Stability Must Drive the Model • Lithonia maintains 1,500+ students. • Historical capacity exceeded 1,800. • No evidence of sustained enrollment decline. Future scenarios should: • Use 5–10 year enrollment projections. • Model growth potential — not just current numbers. • Avoid designing structures around temporary dips. ——— 2️⃣ Facilities Capacity & Land Availability Should Be Evaluated If the Randall Avenue site is considered, the district should model: • Square footage capacity • Expansion potential • Athletic complex development • Parking & traffic redesign • Long-term scalability Scenarios should compare: • Renovation cost at current site vs. • Reinvestment and expansion at Randall Avenue A side-by-side capital comparison is critical. ——— 3️⃣ Academic Outcome Modeling Should Be Included Before altering grade bands, the district should model: • 9th grade failure rates • Attendance data • Discipline trends • Graduation trajectory impact If a 9th Grade Academy is modeled, include projected outcome improvements based on similar districts. Structural change should be tied to measurable academic gains. ——— 4️⃣ Cluster Equity Analysis If clusters are not uniform in grade bands, the district should clearly define: • Funding equity • Program access (AP, CTAE, athletics) • Student-teacher ratios • Safety standards Equity must be measured by opportunity, not just structure. ——— 5️⃣ Transportation & Community Impact Modeling Scenarios should include: • Bus route changes • Commute time increases • Traffic flow analysis • Impact on feeder patterns • Community engagement response Community stability is a measurable factor. ——— 6️⃣ Long-Term Strategic Planning (25-Year View) Next-round scenarios should ask: • Does this model support growth? • Does it increase or limit future expansion? • Does it strengthen community identity? • Does it optimize district assets? Short-term fixes often create long-term costs. ——— 🎯 Strategic Recommendation for the Next Round The next round should include: 1. Status quo (9–12) 2. 9th Grade Academy within cluster 3. Lithonia HS reinvestment model (with phased construction) 4. Capital cost comparison of all models 5. 5–10 year enrollment projection analysis	2/14/2026 6:03 AM
2399	More than More survey should be sent	2/14/2026 6:01 AM
2400	Huge major capital investments is not the solution here. Attracting new students and giving the resources our teachers need to do their job more effectively is the real issue. Figuring out the solution to under enrollment all goes back to why are less families coming to the area? If the answer is due to any of the reasons you are considering on moving to, then you are only going to make the matter worse, not better!	2/14/2026 5:32 AM
2401	Please reconsider this decision because it will impact local home values and increase parent’s commuting costs. This is not a prudent decision when you consider long term impacts.	2/14/2026 1:00 AM
2402	Please do not close our local elementary.	2/14/2026 12:08 AM
2403	Robert shaw elementary theme if they add more clas for middle school every body will stay	2/14/2026 12:02 AM
2404	There needs to be more clarity in how schools were chosen. There are schools being closed which exceeded almost every metric of schools who are being expanded or not closed. Also, high performing schools need to be in the criteria as education should be the number one priority and community engagement should be a positive in the analysis.	2/13/2026 10:07 PM
2405	Have not read up on it or followed it	2/13/2026 10:04 PM
2406	Listen to your veteran teachers.	2/13/2026 9:34 PM
2407	Champion Theme should remain how it is. My oldest went to that school and currently graduating from Arabia. I loved the structure and the environment. I have one more child that Im trying to get placed into that school because of that reason alone. The student teacher ration wasn't overwhelming which allowed for the teachers to be to more attentive to students needs.	2/13/2026 9:14 PM
2408	The closures are disproportionately impacting South DeKalb communities!!	2/13/2026 9:00 PM
2409	We need Rowland elementary school to stay open the best school and staff and education for students and parents where we all have a part to be part. This is the school every student has a freedom of speech and liberty of expression	2/13/2026 8:48 PM

2410	I vehemently oppose the closing of Vanderlyn Elementary. The quality of educators is outstanding and they have built amazing programs and culture for the students.	2/13/2026 8:40 PM
2411	District Representatives should speak to schools on closure list to provide more detailed and transparent detailed answers to the community and support to the schools who are now losing focus close to testing worrying about the possibility of their school closing.	2/13/2026 8:36 PM
2412	Please think of the communities this will directly affect and the jobs lost. This is already a lower income predominantly black community. Most families are barely able to eat. So many do not have cars. So many are living in cars, hotels, etc. Please consider the huge influx in new housing that has been recently built or in the beginning stages of Being built. Huge complexes have been built and where will this influx of families go? Will the schools then be over crowded? My first grader is in a class of 28 and possibly could close due to low numbers. Look at these programs they actually have that are creating engagement in the community. The safety they create for the neighbors. Being able to walk if they miss the bus because their family has no car.	2/13/2026 8:30 PM
2413	Support local education efforts.	2/13/2026 8:26 PM
2414	the k-8 model has proved successful at our facility in part due to a split administrative team serving traditional elementary and middle school populations separately	2/13/2026 8:26 PM
2415	Please take the time to consider more than just the numbers. Raising property taxes or other revenue means should be considered to preserve small classes and more community oriented schools before any cuts are made.	2/13/2026 8:22 PM
2416	Additional studies and community forums are recommended. While I understand the financial impact 27 schools will primarily impact African American demographic.	2/13/2026 8:03 PM
2417	The changes are not necessary and everything needs to stay the same	2/13/2026 7:59 PM
2418	I just believe a lot of money was spent in places that they should not have been. We have neighborhood schools. Unfortunately, a lot of our parents are not happy with the kids being tested all the time and over all education, so they are home schooling. We have also lost a lot due to deportations. Hold the parents responsible and make them bring the kids to school. Bring the joy back to these schools. We use to have fun learning. Now with all the standards , data talks and walks it has become stressful.	2/13/2026 7:56 PM
2419	Biggest concern is the children getting quality education and the neighborhoods being safe	2/13/2026 7:54 PM
2420	Tucker has 5 elementary schools. Tucker High -10-12, Tucker Middle -7-9, Smokerise Elementary - 4-6, Midvale Elementary 1-3, Idlewood Elementary - Pre-K - K. Close Lisvey and Brockett Elementary schools.	2/13/2026 7:44 PM
2421	This would definitely be trial and error.	2/13/2026 7:39 PM
2422	Kids are maturing earlier and faster. It’s better to recognize age and stage changes that have further emphasized the need for the traditional system. Protecting the naive PreK-5 and formative 6-8 as much as possible, while supporting the adolescent and career development needs of 9-12.	2/13/2026 7:19 PM
2423	Yes please do the same thing you do for North Dekalb in South Dekalb. South Dekalb students deserve a quality education.	2/13/2026 7:05 PM
2424	Peachtree Middle School is overcrowded. There are far too many elementary feeder schools going into the building. And, then afterwards going to Dunwoody High School. There should be at least an additional middle and high school in the north Dekalb region. It makes for a challenging learning environment for students, educators and parents.	2/13/2026 7:04 PM
2425	These announcements are going to throw grant funding for capital improvements into turmoil. I feel like now that this has been announced we need clear information asap.	2/13/2026 7:04 PM
2426	The other thing I would be ok with if you tell us of your plans with the elementary school. As you know DeKalb has a high crime rate / homeless population so leaving that school abandoned is going to make that worse . I would want there to be an opportunity for redevelopment into a community center , a mixed use facility with affordable living and some small businesses .	2/13/2026 6:51 PM
2427	I encourage you to truly engage with the community — because the community is what creates your success. When you have the support and backing of the people you serve,	2/13/2026 6:50 PM

	progress becomes possible and sustainable. Listen to the parents. Listen to the students. Listen to the alumni. Listen to the educators who are on the ground every day. If you have the community behind you, you will win. Thank you for taking the time to listen to the people and for considering the voices that care deeply about our schools and our future.	
2428	none	2/13/2026 6:30 PM
2429	Think critically about the age of the learners. Do we really want middle school students housed with high school students? How will this impact school discipline? People will pull their kids and send them to private schools.	2/13/2026 6:13 PM
2430	I strongly oppose the closure of Evansdale Elementary. The next round of scenarios (or at least the contextual information provided along with them) should speak to how the proposals may impact employees of DCSD. It is also extremely difficult to weigh in effectively about buildings alone without taking programs into consideration. The racial equity impacts of scenarios should also be part of the contextual information provided to parents. Finally, as a parent anxiously awaiting to hear the outcome of the DCSD lottery for GA pre-k seats, it strikes me that the district should commit to expanding pre-k offerings as part of this effort.	2/13/2026 6:02 PM
2431	On one hand, I would like DUNWOODY HIGH SCHOOL to use the Vanderlyn campus to expand the school, maybe for a 9th grade campus. On the other hand, Vanderlyn (and Ashford park) are good schools, and I don't know if it's wise to disrupt them. We want to keep good students in our school system. It helps out middle schools and High schools too to attract families looking for well regarded schools. I think Vanderlyn families will happily move to Austin. They will probably complain to shift to Dunwoody elementary, but hopefully stay in the school system. If you try to push some of them into Kingsley ES, they will go private or move — which I think won't help DCSD in the long run. If you push a large enough group from Vanderlyn to Kingsley it might be ok.	2/13/2026 5:49 PM
2432	An end result should have each school employing equal amounts of qualified teachers, administration and support staff.	2/13/2026 5:43 PM
2433	Please consider consolidation of some elementary schools to allow space for more students and assist with a curve in local population. Please put money into the facilities in South dekalb	2/13/2026 5:33 PM
2434	I fail to comprehend how this will benefit the children. Given the current scenario, it appears that more jobs will be eliminated, and children will be adversely affected. Consequently, more parents will opt to relocate their children from school to homeschooling, leading to a further decline in enrollment rates.	2/13/2026 5:28 PM
2435	Our families live our school FIERCELY. Please do not pick this battle. Their property taxes are high and they want their school to stay in their neighborhood. They will likely pull voucher money for private school if you do this.	2/13/2026 5:22 PM
2436	Please take into consideration the burden of parents having to travel further to get their children to school. Can we take a deeper look to save more schools?	2/13/2026 5:20 PM
2437	How can you get this survey out to more people?	2/13/2026 5:13 PM
2438	Dr. Sauce and Team, Thank you for the significant work that has gone into the recent Keheley/Henry redistricting discussions. I know this process is complex, data-driven, and iterative by design, and I appreciate the thoughtfulness that has gone into the recommendations. I wanted to share some of the limited but consistent feedback I have received so far. The first reaction I heard — including the night of the meeting — was that several parents could understand why certain recommendations were made. In particular, parents at Ashford Park expressed that they recognize the condition and limitations of the building. Many were clear that their commitment is to the school community, not necessarily to the facility itself. However, what was consistently unclear to them was: What happens next? If Ashford Park were to close, families did not have clarity about: • Where students would go, • How the attendance zones would be configured, • Whether the school community would remain intact, • What the transition timeline would look like. I had a similar conversation with Mayor Lynn Deutsch, who expressed that while she understands the rationale behind the recommendations, the community is struggling with the lack of clarity around the downstream implications. I believe part of this may be that the iterative nature of the process is not fully understood. From a planning perspective, it makes sense to present concepts, gather feedback, refine, and adjust. But from a parent's perspective, the absence of a defined end-state can feel destabilizing. One idea that emerged from several discussions is whether we should communicate this as a phased implementation strategy, even if those phases are still	2/13/2026 5:09 PM

	conceptual. For example: • Phase 1: Changes involving attendance zone adjustments only (no construction). • Phase 2: Changes requiring light construction combined with boundary adjustments. • Phase 3+: More complex and capital-intensive projects, including major renovations or new builds. Framing the work this way may help the community understand: • What can realistically happen first, • What requires funding and longer timelines, • That some higher-cost options may ultimately prove infeasible, • And that we may achieve a substantial percentage of the intended value before reaching the most expensive components. In other words, if we ultimately complete 60–70% of the structural improvements through lower-cost, boundary-based adjustments, and the final 30% requires a new school that proves cost-prohibitive, the community would better understand that tradeoff in advance rather than feeling surprised later. My suggestion is simply that in the next round of community engagement, we consider adding clearer articulation of: 1. What a likely end-state could look like, 2. How the work could be phased over 1-, 3-, and 5-year horizons, 3. And what decisions are conceptual versus financially contingent. I believe this added clarity could significantly reduce anxiety while maintaining the integrity of the iterative planning process. I will also add this feedback to the SAP survey engine. I look forward to continuing the conversation. Best, ---- Andrew Ziffer Board Member, District 1 DeKalb County School District 1701 Mountain Industrial Boulevard | Stone Mountain, Georgia 30083 678.676.0722 | Direct Office andrew_b_ziffer@dekalbschoolsga.org	
2439	The students in our schools are not awarded the same education that the Northside of county is presented. It has always been unequal for 40 yrs.	2/13/2026 5:05 PM
2440	It is important that students are able to flourish in an environment that feels safe, supportive, and familiar to them while also challenging them to grow academically. When students feel comfortable in their surroundings, they are more confident to participate, ask questions, and take academic risks. A stable and nurturing environment strengthens focus, builds healthy relationships with teachers and peers, and supports emotional well being. That sense of belonging directly impacts performance. At the same time, comfort should not mean complacency. The environment must also provide structure, high expectations, and access to strong academic programming. When students are both supported and challenged, they are positioned to grow, achieve, and reach their full potential.	2/13/2026 5:04 PM
2441	Please consider schools that are less focused on standardized tests and more focused on critical thinking, project based learning, and solving real problems.	2/13/2026 4:52 PM
2442	How about don’t worry about filling every seat but utilize smaller classroom size to pour more into those kids.	2/13/2026 4:49 PM
2443	Adding more low income students, with IEP'S, 504 plans, and behavioral problems to already struggling classrooms doesn't seem like the best use of resources.	2/13/2026 4:33 PM
2444	Focus on the students, not the money.	2/13/2026 4:32 PM
2445	You must provide more specific details about the complete scenario/plan. Listing school closures/repurposing only does not allow for necessary conversations because too much is still unknown.	2/13/2026 4:18 PM
2446	I am also concerned about my position as a staff member of one of the schools on the list. Is there going to be any support for the teachers who are displaced because of this decision?	2/13/2026 4:11 PM
2447	KEEP EVERYTHING THE WAY IT IS NOW!! NO NEED FOR CHANGE!!	2/13/2026 4:03 PM
2448	Repurposing a centralized school that ultimately closes to be a dyslexia remediation school would fit a need to serve our learners and solidify a civil right within DCSD- the right to read. This was recently done in NYC: https://bkliteracyacademy.org/	2/13/2026 3:54 PM
2449	Be truthful about the real reasons why you are proposing these changes. Would be interesting to see the before/ after school free meal figures. In the past redistrictings, they've always gone up almost exponentially. How this was done was by shipping kids into districts that previously were mainly single family residential.	2/13/2026 3:46 PM
2450	I hope the stakeholder meetings will be organized so they don't become "shouting matches" and that we explain to our communities the benefits of consolidation--which means the focus should be on all the positive (i.e., new facilities, programming, competitive athletic teams, etc.).	2/13/2026 3:23 PM
2451	I'm just worried about I.e.p students. What will that look like and how they are teated	2/13/2026 3:14 PM

2452	provide a video of someone explaining the plan and providing the rationale. Include visuals so it is easier to understand.	2/13/2026 3:13 PM
2453	Por favor tomen encue el cierre de la escuela nos afectaría a todos más .	2/13/2026 2:51 PM
2454	Please consider not closing Evansdale elementary as part of the scenario. Evansdale has shown a lot of growth the past year as seen through improvement in MAP scores. Don't throw this all away by sending these kids to a larger school where they would get less attention. Don't throw away the sense of community and the neighborhood. Thank you.	2/13/2026 2:32 PM
2455	Important to prepare students with identifiable knowledge and skills that will be useful as adults. In each course, students are or will be informed with examples: forms of matter are solid, liquid, gas or math usage applicable to daily life. Tech/Vocational training available to all students starting in 8th grade will teach everyday household issues: driving ed, auto maintenance, intro to electrician, repairing lawn/ garden equipment, cooking, construction (dog house, chair, etc), journalism, flight simulation, truck driver/forklift drivers, certifications by Georgia Dept Labor, mock court (law, evidence)…	2/13/2026 2:32 PM
2456	I think Bouie elementary is a good school to stay the and have the numbers.	2/13/2026 2:31 PM
2457	The largest siphon from home schools is the specialty, thematic schools. Investing in immersing these programs at home schools would negate the need for these magnet or specialty programs and provide a greater, more equitable education experience for all DCSD students.	2/13/2026 2:17 PM
2458	Let’s be 1000% serious about this process and not just what the numbers or budget say! Public school determines our county’s future!	2/13/2026 2:16 PM
2459	This would really hurt the learning experience for DeKalb County students.	2/13/2026 2:15 PM
2460	There are people in this county that are not opposed to paying more in taxes for the county to provide schooling to the young people that live in the county. Education is one of the four principal reasons for government (along with the provision of security, provision of infrastructure and preservation of finite resources). Many of us understand that providing those things costs money. If more people were educated and perhaps took a civics class, they may understand that and we all may be in a better place than we are right now. Reducing access to education is not the answer.	2/13/2026 2:01 PM
2461	I understand that due to today's administration this is what we have come to. My biggest fear is that the school to prison pipeline is going to become something scary. Kids that are able to get more attention now are going to lose that. We already have teachers that are overworked and this will not make that any better. We are losing community resources provided by some of these schools. The ENTIRE Cedar Grove cluster is on this list. That means the next closest school would be Columbia or SWD which is not very close. I have no transportation so how would I get to them in case of emergencies? What happens when the population does start to pick up again? This area is highly gentrified at this point soooooooo what happens when families start buying and fixing these houses again? Currently my children are middle schoolers. Over the next 5 years they will be moving into their most pivotal informative years. I dont want them to lose out on the high school experience being even more confused about where they fit in a NEW SCHOOL. As someone who graduated from the Inaugural class from Miller Grove High School I know first hand the type of division that can ensue. Its going to take years to get rid of. There should be something that can and will make this alot more seamless.	2/13/2026 1:17 PM
2462	None	2/13/2026 1:16 PM
2463	That's all for now. I think Chesnut Elementary and Peachtree Middle School should continue to be utilized and not repurposed.	2/13/2026 1:07 PM
2464	I am exhausted by the DCSD putting out major announcements and requesting feedback just prior to a school break. I mean it's better this time - typically it's just before winter break, end of school year or during summer break. At least this time it's winter break which many don't travel for. It almost feels as if you try to catch the parents off guard. I do feel you get less feedback based on timing these announcements prior to a school break and I feel DCSD knows that works in their favor... less noise, less engagement. I also feel as if I'm being asked to give feedback on closing schools, potentially our beloved Ashford Park, with no further data on what that does to our community. Does the school population get split across other elementary schools, does the current population get reassigned as a group to another school.	2/13/2026 12:55 PM

	It's difficult to say what I support with such a small segment of data on what the end result would be.	
2465	I'm a DHHS student heading to DSA next year, and moving DSA closer to my house (my house is right down the street from DHHS) would be really great for me and my siblings. I understand if that can't be done though, but I think a big priority should be getting school buses going to DSA. A lot of people don't have transportation right now and that's going to be a nightmare for my parents next year. I don't think Marta goes there. Transportation shouldn't be a barrier to better opportunities.	2/13/2026 12:40 PM
2466	Please explain why Princeton Elementary is the ONLY primary school in the county that feeds two different clusters for MS and HS via the imaginary line drawn down the middle of the school (feeds Lithonia and Stephenson clusters). Yet you lie on your website and tell the public Princeton only feeds the Stephenson cluster😡.	2/13/2026 12:13 PM
2467	With our current political climate, I think disrupting the lives of Dekalb County Student and parents is thoughtless and telling of who is important and who's not.	2/13/2026 12:09 PM
2468	This is a difficult conversation and needs to happen. But what also needs to happen is streamlining of the DCSD infrastructure, audits and oversight of the administration under the former and current superintendent, and further transparency of how results of audits and oversight are used to improve accountability and drive results.	2/13/2026 11:59 AM
2469	When building new schools, ensure proper office space for support and itinerant staff so that we are not doubled up. This impacts our ability to work with students, maintain student/family confidentiality, and maintain ethical standards required for our jobs.	2/13/2026 11:50 AM
2470	I have no additional feedback. But I feel as though as a member of this community, I would like to see and hear more initiatives to interact with the people. Furthermore, young adults who are thinking about children need to be a part of this conversation as well.	2/13/2026 11:45 AM
2471	I really value and love our small neighborhood Sagamore Hills Elementary school. Principal Freeman has done an amazing job even in 1 year reigniting our community and parent support at the school. My kindergarten son loves the school. It is just the right size for starting school, not too big to be overwhelming, and very welcoming. It certainly needs building and facilities upgrades and could use more funding for more specials teachers (special Ed, gifted, stem), but we are very happy with the education so far. I would prefer to keep schools on the smaller side for elementary, but am also supportive of balancing that with cost savings of closing under utilized buildings if to provide more funding direct to student education/support.	2/13/2026 11:42 AM
2472	Thank you all for soliciting feedback. News like this can bring out a lot of emotions but I am excited to hear more	2/13/2026 11:31 AM
2473	We should prioritize smaller schools (especially at the elementary school level) and programming, even if it means the trade-off is higher costs. There is no better investment than one going to our communities' schools.	2/13/2026 11:20 AM
2474	Why is it that Dekalb cannot figure out which schools are highest performing. Why not list that on the next round of scenarios and list all the highest performing to the lowest performing. Let's make it easy to compare. List only map scores across the board, since those scores are national not local to a school.	2/13/2026 11:15 AM
2475	Alot of the schools considered for closure or consolidation are in predominantly Black and Brown communities. It looks like those communities once again will be taking the brunt of what will finally be decided. This issue needs to be handled with great care and consideration.	2/13/2026 11:14 AM
2476	I understand that the drop in enrollment is the reason that this scenario is being considered, but it seems like Dekalb has been wasteful with taxpayer dollars. For example, a new building was purchased last year for central office staff, even though the county was aware of the drop in enrollment beforehand. It seems especially wasteful to get rid of schools that have been renovated or the newer buildings that are not yet decrepit. Millions of dollars have been spent with no regard for the drop in enrollment. My school is being renovated now for several millions of dollars, and our enrollment is drops every week. Who do they expect will be attending the new, renovated building?	2/13/2026 11:11 AM
2477	It becomes too difficult with multiple children in one family	2/13/2026 10:58 AM
2478	While I understand that changes are necessary, please do your utmost to ensure as little disruption to DCPS families as possible.	2/13/2026 10:54 AM

2479	We are quite pleased with our specific school community at Montgomery Elementary School since PK - 5th.	2/13/2026 10:51 AM
2480	Why middle schools? The extra transition during puberty. The loss of a year of high school. The late days for those kids and earlier days for elementary. I remember a Dekalb with driver's ed (we have so many bad drivers- bring it back), where our high school teams all played each other because they were in the same region, where we had tennis courts and not trailer courts. Don't reinvent the wheel. Just tell us why the old wheel doesn't work and maybe we will be on board with this one.	2/13/2026 10:40 AM
2481	please renovate and do not close Oak Grove Elementary. It is a great school a db many people move into the neighborhood precisely to have access to it. That being said, it is shamefully in need of major renovations. The state of decay of the physical plant is Inexcusable- We pay high property taxes- why is our elementary school so delapidated? This is shameful and wrong.	2/13/2026 10:29 AM
2482	RENOVATE KINGSLEY AS PROMISED AND AS THE SPLOST FUNDING HAS ALREADY BEEN ALLOCATED!!! These families, students and staff deserve some stability and a healthy, safe school.	2/13/2026 10:23 AM
2483	No	2/13/2026 10:19 AM
2484	The populations fluctuate from year to year. To permanently close a school would cause overcrowding in the other schools, then when populations increase again there would be no re-opening shuddered schools. This plan is not in the best interest of students or the residents of Dekalb. I'm not sure what the motivation for this plan was, but it is not for the communities of Dekalb. If it is being dictated by the school board, I would caution anyone from taking any more failed recommendations from them.	2/13/2026 10:13 AM
2485	Look at the AIC for options to budget cuts, not the schools. Their seems to a lot a services and perks offered to all of DCSD employees but are only realistic for AIC staff to benefit from (mammogram services, food trucks). These services either need to be better planned to serve all DCSD staff from Dunwoody to Redan, or only pull from a budget used to AIC staff benefits/services.	2/13/2026 10:09 AM
2486	There have been studies suggesting moving 6 and 7th graders to high school grades risks exposing younger adolescents, who are less mature to cope, to degraded social and emotional environments. I'm strongly opposed to the consolidation of these grade bands.	2/13/2026 10:08 AM
2487	Just don’t do it…	2/13/2026 9:58 AM
2488	We cannot continue to have discussions/make decisions on shutting down schools without having the full information/full picture of what the resultant impact is (e.g. under a given scenario, like the one currently proposed, what will the new school boundaries be, what will the proposed capacities be of the expanded schools, what does the proposed utilization of the remaining schools look like over time). You are asking to provide feedback/ make decisions in a vacuum right now which is an extremely poor way to run this process as well as build credibility in the community. Additionally, if you share certain principals as to what is guiding your decisions, then we expect you to follow those principals -- and at a bare minimum, provide rationale as to why you deviate from them if/when you do. Given the recent scandals at the highest levels of the administration and the distrust in the school board given their judgement in the situation, community trust is at an all-time low. The school district should be doing everything in its power to rebuild trust in the community. Exercises such as this with 'partial transparency' and work to have the opposite effect on our community and continue to elevate distrust.	2/13/2026 9:47 AM
2489	I would like to see how the current plan would impact school choice program locations and offerings. Some of the school locations listed also house school choice programs along with their residential populations.	2/13/2026 9:40 AM
2490	Having a jr high model vs middle school model keeps pressure off overcrowding a high school. By having upper and lower elementary schools, there can be a better management of population swings in desirable school districts. Not every area in Dekalb needs it though. So make logical decisions for each cluster. Stop treating the district like there can be a 1 size fits all approach. Do not close Ashford Park Elementary and keep Ashford Park in the Chamblee Cluster!	2/13/2026 9:33 AM
2491	Please add teachers and paras to all discussions as we are still in the classrooms and see	2/13/2026 9:27 AM

	daily what needs to be done to create an environment to help all students learn.	
2492	During this time of change, verifying residency of students for each school attendance zone with more diligence would be ideal.	2/13/2026 9:21 AM
2493	DeKalb has a strong and growing school tax base, and that should be used to stabilize—not dismantle—neighborhood schools. DCSD's published tax digest history shows the district is levying an estimated ~$975M in total school taxes (2024) on a net M&O digest of ~$42.4B at 22.98 mills. With district enrollment around 92,066 students, that's roughly ~$10.6K per student in property-tax levy capacity as a simple districtwide scale reference. Rather than closing schools and forcing longer commutes, DCSD should invest these resources in right-sizing through program expansion, targeted boundary adjustments, and facility improvements —while keeping traditional grade bands (K–5 / 6–8 / 9–12). Disruption from closures and grade-band reshuffling is avoidable when the district has the fiscal capacity to pursue solutions that preserve stability for students and communities.	2/13/2026 9:21 AM
2494	Given the organizational tumult for DCSD, the parents and community have lost significant trust in your decision making— especially for such a sensitive, challenging topic like school closures. I would encourage more transparency for recommendations in the next phase to help rebuild trust.	2/13/2026 9:15 AM
2495	If there is an option to do somewhat of a hybrid of the options. If there is a way to keep more small schools at the elementary level where enrichment is less important and then consolidate to larger schools where the activities really matter would be my preference.	2/13/2026 9:11 AM
2496	Please do not do this it is very unconventional and will have many flaws. It will also inconvenience many students around Dekalb who may have to move districts or even counties just to be enrolled in school.	2/13/2026 9:06 AM
2497	RIDICULOUS! My biggest concern is the impact this would have on class sizes. Smaller schools allow for smaller class sizes, which allows for better engagement and personalized interactions between students and teachers. There is tons of research that supports this. Closing manageable neighborhood schools would be catastrophic for stakeholders. Students, parents, and teachers would suffer heavily due to massive changes. I can only imagine the amount of teachers that would be fired because there wouldn't be a need for all of them after consolidating. Furthermore, the bus situation would be a NIGHTMARE! There aren't even enough buses or bus drivers to support the schools as they function now.	2/13/2026 9:05 AM
2498	Part of what makes DCSD special IS the neighborhood feel of the schools. I love that Chamblee Middle is tucked into a neighborhood. It feels safe and community-oriented. These giant school systems in the exurbs that have a massive elementary school (on a huge main road) right next to a middle school and then the high school....feel impersonal, huge and generic. I understand they draw from a larger population radius and can absorb, adapt to changes in populations better than these little neighborhood schools. For instance, my parents live in Smoke Rise. That was my elementary school and now it's repurposed as something else because only grandparents live in that neighborhood now. I understand the generational ebbs and flows. But if a school is thriving, please do not make huge changes. You'll send everyone to private schools and then DeKalb will have even more "declining enrollment" on their hands. Also: Please renovate the Kittredge Magnet building (it was decrepit when I was a DCSD student 30 years ago!) but keep it where it is. It is SUCCESSFUL. Moving it will make it less so. Have more magnet schools throughout the county and people can choose which one they want to attend, based on proximity or preference. It is one of DeKalb's most successful programs....do not screw it up!	2/13/2026 8:55 AM
2499	Ashford Park Elementary has a lot of community support and I believe it could be utilized effectively. It has had classes outside the building in trailers for quite some time so it seems like capacity should not be an issue. It's really cost effective to have some children from the neighborhood walk to school rather than needing buses. I also wonder if buses could be downsized to help with costs as I have observed that they run half empty most of the time. Perhaps smaller, more efficient vehicles could help the school system reduce costs rather than aggregating schools. Elementary school children, especially, benefit from being in a more intimate school setting.	2/13/2026 8:53 AM
2500	If any of the Dunwoody cluster schools were to close, attention needs to be paid to the size of remaining schools. Focus needs to be on SAFE, CLEAN environments and keeping students in the traditional school building, NOT trailers. Attention also needs to be paid to keeping	2/13/2026 8:52 AM

	students with their neighborhood versus splitting neighborhoods and sending kids to schools that are further away and lower performing for the sake of closing schools.	
2501	The current drop in enrollment is often misattributed. Two major contributing factors are: Ongoing leadership instability at the district level, which has disrupted trust and consistency. Teachers being assigned to teach content areas outside of their expertise, leading to disengaging instruction. When educators are not confident or well-versed in the content they are assigned to teach, instruction often becomes limited to distributing assignments and grading rather than engaging students in meaningful learning. This results in student boredom, lack of connection to school, and eventual disengagement. For example, my degree is in fashion design. While this county does not offer the course at the school I am at (Cross Keys High), I sponsor a fashion club. Despite being only a club, my students advanced to the state-level competition and outperformed schools that actually offer the class. This demonstrates both instructional capability and strong student engagement when content aligns with teacher expertise. One student shared that the fashion club was the primary reason she continued coming to school. Due to personal circumstances involving ICE and family instability, she had begun missing school and has fewer than 60 days remaining before graduation. As her teacher, I emphasized the importance of consistent attendance so she can graduate, but her situation highlights how meaningful, relevant programs can be the deciding factor in whether students remain engaged at all. To truly address enrollment and retention, future scenarios must prioritize: Proper alignment of teacher expertise to content Expansion of engaging, career-connected programs Stability in leadership and instructional vision Without addressing these core issues, changes to facilities or grade bands alone will not resolve the underlying challenges.	2/13/2026 8:43 AM
2502	Oak Grove Elementary is a cornerstone to the community and where my family plans to send our children. The reputation of the school was a huge reason we decided to purchase a home in the area, and consolidating/closing the school would impact the longstanding reputation and community engagement. We would consider moving out of the Dekalb district entirely if OGE closes.	2/13/2026 8:40 AM
2503	We suggest to consider traffic and safety for our students. The Globe Academy (however not short term impacted) and Lakeside HS create a massive impact to nearby neighborhoods in regards to traffic. Please work along with DeKalb Publix work department to improve roads, sidewalks and crosswalks systems in order for students and neighbors to be safe at al times.	2/13/2026 8:40 AM
2504	I would like to see new schools built in the South Dekalb area as well as North Dekalb	2/13/2026 8:28 AM
2505	Reducing the number of elementary schools in an effort of consolidation decreases the connectivity of students to teachers to parents to communities and lessens the neighborhoods affected.	2/13/2026 8:25 AM
2506	Don’t close Ashford Park. Simple. It does not fall under the criteria you provided for school closures.	2/13/2026 8:21 AM
2507	I don't think 6-8 needs to ever be with 9-12 grade students, and any change should maintain the 9-12 grade band.	2/13/2026 8:21 AM
2508	I'd love more detail on the number of students that would be shifted to each school and the rough estimate of how that would impact classroom size and dollars per student.	2/13/2026 8:17 AM
2509	Cut from central office.	2/13/2026 8:12 AM
2510	For boundaries, please keep in mind neighborhoods should stay together. Also, please spread out high density living (apartments) kids throughout all the different schools instead of putting them all in one school. Make sure that kids that are less than 2 miles from a school get to go to that school because they often walk/ride bikes which saves space/money on buses. No split feeder middle or high schools please since that separates kids right at the prime age they need their close peers from elementary with them as they go to middle or high school.	2/13/2026 8:07 AM
2511	This behavior is how you will turn thousands of families in East Atlanta to requests to annex into city of Atlanta. Are you seriously willing to let go hundreds of thousands of dollars in property taxes just to close one tiny school? The impact will be felt way beyond your school system and it will have serious repercussions on the financials of all initiatives the county wishes to pursue and maintain. You have a lot to lose.	2/13/2026 8:02 AM
2512	I feel that classified and certified staff at the schools in jeopardy of closing or being combined should be emailed or be a part of listening to virtual meetings in advanced so that they are	2/13/2026 7:42 AM

	made fully aware of any agreed changes in advance.	
2513	Put the Champion Theme program at McNair Middle School. This way, you can rival Drew Charter, which is taking the area's high-achieving students, and attract students who live in the area, but whose parents do not send them to the school. It is already a STEM-certified school with technological facilities that can advance and challenge the 6-8 students in the area.	2/13/2026 7:35 AM
2514	I would love to see opportunities for gifted students expanded to cover the full range from 4th through 12th grade.	2/13/2026 7:35 AM
2515	Please consider that many VES families sought out this high performing neighborhood school when making big investments into their long-term financial decisions - housing.	2/13/2026 7:34 AM
2516	Please keep access to schools and commute time low. Redistrict to maintain ITP and OTP.	2/13/2026 7:29 AM
2517	none	2/13/2026 7:16 AM
2518	NA	2/13/2026 7:05 AM
2519	It feels like a lot of assumptions are going into this that we haven't seen and a lot of information is being withheld to get us to a pre-conceived plan. It would be really really helpful if this were presented with multiple scenarios, showing the cost/benefit analysis of each.	2/13/2026 7:02 AM
2520	considering how poor the academic status of redan is i think this repurposing could be a great idea. it will give redan another shot at a higher academic status.	2/13/2026 7:01 AM
2521	Keep Ashford Park, consider expansion or re-districting but do not close the school	2/13/2026 6:51 AM
2522	In our neighborhoods	2/13/2026 6:32 AM
2523	Closing 27 schools will create 27 vacant buildings in neighborhoods and decreases property value. What will the district do with these vacant buildings? Will they be sold, or still owned by the district? The overhead cost of these buildings will still exist and be listed as a capital asset. This is a decision that will have negative long term effects.	2/13/2026 6:28 AM
2524	I strongly oppose the proposal to close 30 schools on the south end. This decision disproportionately impacts predominantly Black communities and raises serious equity concerns. This is not an issue of low enrollment or families leaving the community. This is the result of years of mismanagement of funding and failure to address the real issues within DeKalb County Schools. Our children should not suffer because of administrative failures. I do not agree with consolidation, as larger class sizes negatively impact student learning. Closing neighborhood schools, overcrowding others, and busing students across the county is not a solution. I urge the board to reconsider and prioritize equitable, accountable leadership.	2/13/2026 6:26 AM
2525	Toney Elementary has been such a blessing to our family. We moved from charter to public and our kids have developed at a rate that exceeds average. There are more resources available and the smaller community supports holistic child development. Teachers and students are engaged. Lifelong value will be evident due to this strong foundational base.	2/13/2026 6:07 AM
2526	Before decisions are finalized, I would like to see significantly more information demonstrating how students will be supported and how outcomes will improve, not just how buildings will be utilized. Specifically, I would like the district to provide: Mental health data, including current counselor ratios, behavioral referral trends, suspension patterns, and how those numbers are projected to change under consolidation. Extracurricular and enrichment access, including which opportunities may expand or shrink, current participation rates, and how transportation changes may affect students' ability to remain involved. A plan to strengthen and invest in existing schools, such as enhancing academic programs, specialty pathways, magnet offerings, arts, athletics, or community partnerships that could increase enrollment before closures or mergers occur. Evidence from comparable districts where similar changes were implemented. What outcomes improved, what challenges emerged, and how were unintended consequences addressed? Funding commitments for additional counselors, social workers, and behavioral support personnel in larger or newly merged environments. Clear safety and supervision models for situations where wider age ranges may share campuses. Structured transition and integration programs to support belonging, peer connection, and family adjustment. Transportation impact information and how longer travel times may influence attendance, sleep, and extracurricular participation. Plans for supporting educators, who will be expected to meet broader academic and emotional needs. Consolidation should not move forward without transparent evidence that student well-being, safety, and opportunity will improve or, at minimum, will not decline.	2/13/2026 6:06 AM

2527	Your problem is we are shook time and again we can't trust dekalb with our decisions and money. So a big thing like this and you are blaming SAP on these decisions yet don't give them all the information needed is another example. I don't think you care what feedback we have because you're going to do whatever you want anyways but I pray I'm wrong and that's why I'm filling this out.	2/13/2026 5:57 AM
2528	Knowing where each collapsing school would be going would help	2/13/2026 5:49 AM
2529	I think the immaturity of the Middle School kids mixed the high schoolers is a bad decision. Middle schoolers are at a time where they are trying to figure out their hormones & emotions. It's truly a rebellious stage.	2/13/2026 5:49 AM
2530	I feel like it should be an section where we pick which schools because i have a lot to say about what's been going on in lithonia high school.	2/13/2026 5:43 AM
2531	Closing Ashford Park elementary would be detrimental to the community. Many individuals have moved to the area to be closer to the school and closing it would not be viewed favorably.	2/13/2026 5:04 AM
2532	The current Ashford Park Elementary families want to remain in the Chamblee High cluster.	2/13/2026 4:48 AM
2533	Rowland elementary has the best teachers and staff members	2/13/2026 4:42 AM
2534	Traffic patterns and parking should be addressed as part of the conversation.	2/13/2026 4:20 AM
2535	Parents and Teachers involvement	2/13/2026 3:02 AM
2536	We love Briarlake! Please consider keeping the schools as small as possible.	2/13/2026 1:29 AM
2537	No additional feedback.	2/12/2026 11:58 PM
2538	The closures of these schools with be extremely harmful for the black youth in my community.	2/12/2026 11:50 PM
2539	This is not a complete plan if it does not consider educational quality and only considers the capacity vs. attendance of individual schools.	2/12/2026 11:43 PM
2540	Ashford Park Elementary School should not be closed.	2/12/2026 11:19 PM
2541	Evansdale is a treasured neighborhood school, and it would devastate our community to close it.	2/12/2026 11:17 PM
2542	Just re-zone and spread population so some buildings are not vacant. Maximize space with what we have. Move in schools.	2/12/2026 11:01 PM
2543	Show how administration costs in the central office will go down.	2/12/2026 10:59 PM
2544	Combine 2-4 schools with the lowest enrollment into one new school to be housed in the biggest, newest or newly renovated school located geographically in the middle of the radius of those schools.	2/12/2026 10:50 PM
2545	I strongly recommend to continue to have a vanderlyn elementary school which is great STEM school. Thanks	2/12/2026 10:48 PM
2546	Do not close Oak Grove elementary. Were one of the only semi decent public elementary schools in GA.	2/12/2026 10:43 PM
2547	-How are low COVID-era enrollment numbers—particularly for students who began school in 2020—being factored into projections? -I'm also concerned about scenarios where minor boundary adjustments result in only a small number of students being reassigned, which can be disruptive for those kids. For example, we are right on the boundary between Montgomery and Huntley Hills - if we have to change schools, I would hope that a significant portion of kids would be changing to the same new school vs just a few. -What supports will be in place for students with IEPs to ensure smooth transitions and uninterrupted services? We moved houses to be in our current cluster, and I'm concerned how adding in another big school transition might impact my kid with an IEP, especially if there was a scenario where only a few kids get transferred. -What provisions will be made for high school seniors or students already enrolled in magnet or other specialized programs? -Will access to aftercare programs be more widely available with fewer schools (including transportation to third-party options)? I hope to see more capacity in general as well as programs available across communities.	2/12/2026 10:41 PM
2548	If you feel that the schools are starting to feel disproportionate, the reintroduction of magnet	2/12/2026 10:38 PM

	school systems should be considered	
2549	Please consider the impact of specialized programs such as DLI. We drive out of our zoned area to attend this program because we see the value in it. Making larger schools would make commutes longer or harder for families. Larger school zones mean kids would have to wake up earlier to catch the bus. Parents with rigid work schedules or shifts that overlap with the pick up and drop off times wouldn't be able to get children to schools that are further away. I read the information provided, but I think the reality of what students and families live is that larger school zones mean longer commutes and children won't be able to walk to school. Parents don't have extra time in the morning to get them to school if they miss the bus. More kids taking the bus means earlier bus pick ups. I do not like anything about this proposed plan the reasons do not match the reality that many families are living .	2/12/2026 10:25 PM
2550	In the proposed 6–12 grade band scenario for the Cedar Grove cluster, I have concerns about relocating 6th–8th grade students from a newer middle school facility into an older high school building without clear justification tied to facility condition data and long-term capital planning. Additionally, the academic vision for a 6–12 model has not been clearly articulated. If this shift is primarily financial rather than instructional, it risks disrupting students without delivering measurable academic benefit. Finally, consolidation decisions must demonstrate equitable investment across clusters to ensure that the Cedar Grove community is being strengthened rather than diminished.	2/12/2026 10:24 PM
2551	Reconsider this is going to have a domino effect on a lot of people, seriously.	2/12/2026 10:17 PM
2552	I think that McLendon could thrive as a PK-3 school. If the school is vacant, I would like to see some sort of facility-sharing agreement with the County to provide a rec center/community space for the neighborhood. Our closest community center is across the RR tracks at Tobie Grant. Have a community meeting place would be a game changer.	2/12/2026 10:09 PM
2553	Stop hiring criminals and wasting money.	2/12/2026 10:01 PM
2554	The more information you can give in these presentations the better. Everything that's left unsaid just allows space for fears to grow. Give us all of the information and allow for more robust feedback that actually allows space to consider the possibilities of what this could look like instead of the fear of what it could mean for their kid or their property. Also, not including magnet programs in the discussion is a major omission. For example, the Chamblee cluster would look very different without the magnet. To me this is evidence that allowing more choice, more programming and more flexibility is better. After witnessing all of the parents applying for different high schools this year, I think this type of high school applying could be beneficial to everyone in the district. Local k-8s or k-5 and middle schools with specialty high school programs thrroughout the district would be great	2/12/2026 9:54 PM
2555	Consider traffic patterns as well as utilization.	2/12/2026 9:49 PM
2556	Focus on improving community rather than maximizing facility usage.	2/12/2026 9:44 PM
2557	The next round MUST include the 3300 seats and 2100 projected enrollment of the "special schools" that weren't included in this analysis (DSA, DAA, KMS, WMS, DECA, EAHS). ALSO, I do not see how this proposed set of buildings would accommodate the various Program Placement options that the SAP spent so much time on. The public is told that transportation costs will decrease with this scenario - BUT there's no proof! Fewer schools means that fewer kids can walk or ride bike or have a reasonable parent drive-time to school. As a minimum, the # of students within the 1.0/1.5 mile location of the remaining schools should be calculated and shown to the public. ** I believe that schools must close. But the district hasn't presented a strong case to the public about how these schools were chosen. So what's the point of proposing a different scenario, since we have no means of knowing how that different scenario gives an overall improvement to the district?	2/12/2026 9:42 PM
2558	N/a	2/12/2026 9:36 PM
2559	If you need advise. And based on recent experience/hires/fires/indictments within this school system feel free to reach out. I do it for Congress and could most definitely help this dysfunctional school system which makes HUGE decisions based on……what exactly???	2/12/2026 9:34 PM
2560	N/A	2/12/2026 9:30 PM
2561	Consolidation creates a negative feedback loop. By removing neighborhood schools, the district increases the "logistical friction" of raising a family here. This friction, combined with	2/12/2026 9:25 PM

	the new state vouchers, will accelerate middle-class flight and the "ICE chilling effect," ultimately worsening the enrollment decline you are trying to solve. Invest in the "walker" schools to keep families in the system.	
2562	Good luck! This is a hard job, but has to be done.	2/12/2026 9:20 PM
2563	With traffic issues, bands should exist within geographical proximity a few ES to MS to HS.	2/12/2026 9:17 PM
2564	As the district considers future scenarios, I encourage leaders to prioritize academic stability, equitable resources across clusters, and minimizing disruption to students. Decisions should be data-driven and focused on long-term student achievement rather than short-term logistical solutions.	2/12/2026 9:16 PM
2565	Please do not consolidate Oak Grove Elementary School	2/12/2026 9:01 PM
2566	Austin Elementary is described as a “6-section school” in your supporting documents but current operations demonstrate that the building does not function as a true 6-section model. Under Georgia law (O.C.G.A. §20-2-710), every student must receive a minimum of 60 minutes of Physical Education per week. With two PE teachers and 1 gym, there are a finite number of instructional periods available each week. When the total number of homerooms exceeds what the PE schedule can accommodate, the school is forced to compress sections during specials. For example, 2nd grade currently has 6 homerooms but must operate as 5 groups due to the PE requirement. The same occurs in 4th grade. Compressing 6 sections into 5 groups results in instructional group sizes of approximately 31–32 students, even in grades where smaller class sizes are developmentally appropriate. This is not a staffing preference — it is a scheduling necessity driven by minute requirements and available PE slots. If over 7 sections (like in 1st grade), the minimum PE requirement is not met some weeks. This highlights a key issue.. Planning capacity assumes consistent sections at maximum class size (27). Functional capacity must account for program rooms, self-contained classrooms, PK sections, service rooms, and legally mandated instructional minutes, speech, esol, resource. Austin was built with a single lunch line knowing it would be made a 6 section school. How can you feed almost 1000 students with one small lunch line? How can you build a new school with no place for the entire school to gather? How can you build a new school without enough parking for staff and a grade level for informational sessions let alone a whole school event. When those realities are applied, the building cannot sustainably operate as a clean 6-section school without instructional compression or oversized groups. In practice, Austin is already being forced to combine sections to meet state requirements. That is a clear indicator that the functional capacity of the building is lower than the published planning capacity. We respectfully request that future capacity discussions incorporate: Actual homeroom counts by grade (with lower numbers for k-2 like the state recommends), Special program room usage, State-mandated instructional minute requirements, And the scheduling limitations created by staffing allocations. Functional capacity should drive decisions.. NOT some arbitrary numbers without the data to back it up. How do we even know these numbers are correct.	2/12/2026 9:01 PM
2567	I went to a k-8 school. But the school was very small, all students were held accountable.	2/12/2026 9:00 PM
2568	No mega-schools- keep the schools small neighborhood schools	2/12/2026 8:54 PM
2569	As the district develops the next round of scenarios, I strongly encourage decision-makers to prioritize student stability, family accessibility, and community impact. Proposed closures or major reconfigurations should be evaluated not only for efficiency, but also for how they affect transportation time, parent involvement, and neighborhood cohesion. Schools serve as vital community anchors, and removing them can have lasting social and economic effects on surrounding areas. I also recommend that any future scenarios include clear data on projected enrollment, capacity, travel distance changes, and student outcome impacts so families can better understand the reasoning behind proposals. Thoughtful planning, transparency, and meaningful community input will be essential to ensuring that any final decisions truly serve students’ best interests.	2/12/2026 8:48 PM
2570	Consolidating multiple schools could have unintended negative effects on students’ educational outcomes. Larger, combined student populations may make it more difficult to provide individualized attention and support, increasing the risk that some students’ academic or social needs go unnoticed. This concern is especially important given that many students are still recovering from learning disruptions and challenges associated with the COVID-19 pandemic.	2/12/2026 8:42 PM
2571	Do not close this school	2/12/2026 8:39 PM

2572	I would like to understand how these changes will impact our school district. Is this an exercise to save money or to reinvest the money saved into our children.	2/12/2026 8:33 PM
2573	Positions should be eliminated from Central Office as we have fewer students!!!	2/12/2026 8:24 PM
2574	There needs to be more focus on classroom sizes and density.	2/12/2026 8:23 PM
2575	If you abandon Ashford Park Elementary or redistrict us out of Chamblee Middle/High, understand that you will likely see an even larger exodus away from the public school option in the Ashford Park Community. This will only increase the problem you already have with lack of utilization/efficient-use of resources at these schools.	2/12/2026 8:22 PM
2576	FIRE THE BOARD! Mrs Pierce is a matriarch of DCSD family, I guess they get special treatment because our children suffering from terrible leadership and appointees, not the teachers.	2/12/2026 8:21 PM
2577	I'd like the understand if these scenarios also envision changing which schools are part of which of the existing clusters.	2/12/2026 8:20 PM
2578	Seeing all of these schools is truly heartbreaking! It has to be other options. Think about the students and teachers! Do better Dekalb!	2/12/2026 8:17 PM
2579	Look at the progress of each school	2/12/2026 8:11 PM
2580	I write as a parent, a licensed K-12 teacher (MA, Second Language Acquisition), a Licensed Master Social Worker, and a DCSD substitute teacher. My additional feedback centers on three points: First, school choice program continuity must be addressed in this round of scenarios, not deferred. Families entered lotteries with the understanding of a multi-year commitment. If Evansdale and additional schools close for sustainability reasons, the district must identify, in the next round of scenarios, exactly where DLI/IB/Arts etc will be housed at the elementary, middle, and high school levels—and guarantee that every currently enrolled student, regardless of zone, has access to arts, AP, IB, language, etc. Second, I urge the district to look at Arlington Public Schools (Virginia) as a model. APS guarantees automatic continuation from DLI elementary (Escuela Key, Claremont) through Gunston Middle School to Wakefield High School, with no lottery required for pathway continuation. Students who complete the elementary program have guaranteed seats at the next level. This is the kind of structural commitment DCSD needs to formalize. Third, regarding equity: Rockbridge Elementary DLI families (95% FRL) face the steepest barriers to pathway continuation. Any consolidation that preserves DLI access for northern cluster families but not for Rockbridge families would deepen the structural inequity I outlined in my November 2025 letter to the Board. I ask that the next round of scenarios explicitly address how DLI continuation will be equitable across all super-regions. Finally, I want to note that the Benchmark testing concerns raised by DCSD parents (regarding instructional time lost, poor question quality, and lack of vendor transparency) are amplified in a consolidation context. If schools are being closed to "concentrate resources," then every instructional hour matters more, not less. The district should reconsider whether Benchmark testing serves the goal of academic excellence that consolidation is supposed to enable.	2/12/2026 8:06 PM
2581	We need even more Community based feedback sessions AND a transparent view into the actual data the DCSD utilized when making these recommendations	2/12/2026 7:55 PM
2582	This is incredibly disappointing and destroys our plans to send our children to public school in this cluster. You will lose a lot of good families in this area.	2/12/2026 7:50 PM
2583	Consider the new construction and the new and young families that will move to the area	2/12/2026 7:48 PM
2584	I would love if Elementary was a true Elementary housing preK-7. High School could be 8-12	2/12/2026 7:46 PM
2585	Filling schools too close to capacity to save an overhead expenses of multiple schools should not outweigh classroom size. Currently our classrooms are way too large in the Elementary and Middle School. Students of all levels of learning do not currently get the attention they need in our elementary in middle school is because the classes are too large.	2/12/2026 7:44 PM
2586	First, Vanderlyn should remain open as it is one of Dekalb's top performing schools. Second, what will happen to the teachers?	2/12/2026 7:44 PM
2587	Please consider those that want the best for their child, not everyone will be happy, but closing a successful public school only incentivizes parents to sign up for private schools. This would compound the problem and push those students and parents out.	2/12/2026 7:40 PM

2588	Through all of these scenarios, please make sure EQUALITY and EQUITY are considered. The South End schools should be treated fairly compared to the North End.	2/12/2026 7:30 PM
2589	Please reconsider closure of Ashford Park Elementary School and look into alternative solutions - like districting families so there is less overcrowding (Drew Valley to John C Lewis as an example) and then looking at a cost efficient life cycle maintenance program to update end of life systems within the school.	2/12/2026 7:26 PM
2590	Honestly, I believe closing schools is a waste of taxpayer's money. If these 27 schools are going to be closed; it should be demolished there should not be anymore eyesores in our communities. As a result, the amount we pay for the school tax should be lowered because of this!	2/12/2026 7:25 PM
2591	Fix over crowding! Too many trailers at Dunwoody High	2/12/2026 7:23 PM
2592	We live south of Dresden, and my main concern is that Dresden is used as a dividing line for school redistricting. I want my kids to continue going to school with Ashford Park cluster. Maybe use Peachtree as a dividing line between Montgomery and John Lewis?	2/12/2026 7:21 PM
2593	Please do not close Ashford Park!	2/12/2026 7:20 PM
2594	Keeping magnet schools/programs on edge by not releasing our scenarios is not fair to those students/parents/staff.	2/12/2026 7:07 PM
2595	N/A	2/12/2026 7:04 PM
2596	Dunwoody Cultural art center and Dunwoody Library Dunwoody Botanical center use those facilities to relocate the kids. Make Austin Elementary uncomfortable why they are not part of the discussion. They have a very easy breezy area why we can use that side of Dunwoody....explain why?????	2/12/2026 7:01 PM
2597	I agree something needs to be done but it is hard to trust DeKalb County schools when information has been skewed or wrong before and there is no transparency. Has anyone in SAP walked through the schools during a school day to see how they are currently run / fit students? Seen how carpool is working with the current allotment. PARENTS have PAID THEIR OWN MONEY to hire an additional DeKalb County police officer to assist with traffic at Austin. That is without adding another 150-200 students to the school. It also looks so bad to say you are closing schools to save money on building costs yet in the same page say you might turn those buildings into office space for the administration... more money spent not on the students. I also wonder if the capacity numbers take into account class sizes for kindergarten, cotaught, esol, etc. Is it based off of a 27 seat classroom? Kindergarten should be 18. Also to note dekalb does not provide paraprofessionals in kindergarten like most other metro Atlanta districts do. Kindergarten at Austin is 25-26 without para support.	2/12/2026 6:59 PM
2598	I understand that the data must be paramount, in the decision-making process. The district must be solvent. However, my former regional superintendent used to say to me, "We always have to make decisions that are in best interest of children. Always." Please ask yourselves, "Is this in the best interest of children?" as you consider the data.	2/12/2026 6:57 PM
2599	Ashford Park Elementary should be renovated and upgraded. It is worth it due to the close neighborhood. The school remains a top performer for the county and many parents could afford private school but choose not to go because of the neighborhood school. If the school is not in the neighborhood, these parents will most likely go to private school, and the county will lose those families whose students are high performers, many of whom do not rely on the bus system or free lunch?	2/12/2026 6:44 PM
2600	Dekalb County is short of students because you fail at your stated objective. The South End of the county is a disaster.	2/12/2026 6:40 PM
2601	Please look more closely.	2/12/2026 6:38 PM
2602	If you keep middle schoolers with Pk-5 in a Pk-8 scenario, teach them how to tutor, mentor, etc	2/12/2026 6:36 PM
2603	Please remove the 2 schools I checked. They do not exist	2/12/2026 6:35 PM
2604	Show scenarios for the North End schools please, let's see what that looks like	2/12/2026 6:29 PM
2605	I think if you just go look at the school and ask yourself...."Would I want or be happy with	2/12/2026 6:26 PM

	Stone Mountain Elementary if my kids had to attend this school?" I'm sure you will find your answer.	
2606	This would be devastating to our community.	2/12/2026 6:16 PM
2607	Just be aware that too much cutting can cause more money issues in the future.	2/12/2026 6:04 PM
2608	I think someone with IB knowledge, like the district coordinator should be consulted before you like at taking out the Tucker IB continuum.	2/12/2026 6:01 PM
2609	Offer (more) public at home schooling.	2/12/2026 5:57 PM
2610	We love our school and want to be able to continue to grow together. Like stated before the only thing that needs to be updated is our building other than that out staff and students perform well. Also, our community involvement is amazing.	2/12/2026 5:46 PM
2611	Thanks for soliciting community input.	2/12/2026 5:45 PM
2612	I understand the rationale behind this decision, but breaking up community schools, like Ashford Park, will devastate the community, parents will move depending on how their child(ren) are re-zoned and school staff members will most likely leave the district.	2/12/2026 5:26 PM
2613	I think that closing and combining so many schools would create overcrowding and more behavior issues.	2/12/2026 5:20 PM
2614	Or stick with the traditional grade bands.	2/12/2026 5:17 PM
2615	This is a horrible idea and a disgusting excuse for a money grab by the city	2/12/2026 5:14 PM
2616	The grade configuration itself matters less than how well the school is run. But there are some important research findings. Studies show that sixth and seventh graders do better academically when they stay in elementary schools longer rather than moving to middle school. However, eighth graders perform better in actual middle schools. K-8 schools can work, but research shows they only work well if they're long-established schools with strong middle school practices, not newly converted ones. And when K-8 schools get too big, elementary students suffer because they lose those close relationships with teachers. Before we approve any grade band changes, I need to know: Will DeKalb commit to implementing strong middle school practices like teacher teaming and specialized instruction? Will elementary students still get meaningful relationships with their teachers? And do we have evidence that newly converted K-8 schools will actually work? We need answers to these questions before we can give informed feedback.	2/12/2026 4:51 PM
2617	I believe putting 6th graders with 14 15 16 17 and 18 year olds will not benefit them at all I believe putting 14 15 16 17 and 18 year olds together and then pre-k through 7th grade would be best as it used to be traditionally when I moved to Georgia in 1984	2/12/2026 4:45 PM
2618	Please preserve the history of the schools that have the most history in DCSD.	2/12/2026 4:40 PM
2619	Closing AP would be a mistake. Redrawing boundary lines would be much more effective for the area since it is over-enrolled as is. If enrollment could be lowered, maybe some work on the building and trailers could be done alternating to bring the school back to its glory.	2/12/2026 4:35 PM
2620	If schools close (i.e ours in our area, Ashford Park ES), where would we be re-zoned to? We bought our house in Brookhaven Fields SPECIFICALLY to be in that zone district for school. Will we be re-zoned to an elementary school of the same caliber? We need more answers and example re-zoning maps	2/12/2026 4:30 PM
2621	I recommend that before making structural changes such as consolidation or reconfiguration, the district formally investigate the root causes of declining enrollment and implement a strategic process improvement plan. Declining enrollment is often the result of multiple contributing factors, including demographic shifts, housing trends, school choice options, charter or private school competition, homeschooling growth, program perception, academic performance data, and community trust. Without clearly identifying the underlying drivers, any structural solution may only address the symptoms rather than the cause.	2/12/2026 4:30 PM
2622	In order to get buy in from the community, there needs to be more detail about redistricting lines, where will students go during the expansion phase, and plans to support the facilities marked for closure during the transition. Kingsley is in desperate need of HVAC renovation to make the building a comfortable place for staff and students. What will be done to facilitate that over the 6-8 year transition? Additionally, putting schools on a potential closure list should	2/12/2026 4:29 PM

	be done with very careful consideration. The mere suggestion that Kingsley might close is enough to prompt employees to leave, prospective families to look elsewhere, and already limited fundraising ability to be decimated. An already struggling school can be significantly affected by these scenarios.	
2623	Please stop using national companies to make decisions. Obviously, they have failed us in Superintendent searches. Please fire half of the county level positions and keep our schools open. Please stop making us the laughing stock of the city. Don't you dare close our schools and open new county offices.	2/12/2026 4:28 PM
2624	The district has squandered away tens of million of dollars and this process won't stop that. Y'all idiotically let a criminal take over the administration and bring his team here from Evanston where the same people tried this already. A massive expense for them to ultimately conclude that neighborhood based schools are the best option. If the district can't afford to run schools, then the district needs to figure out how to cut bloat. Sell the useless Kroger office complex. Cut out all of Horton's cronies with made up titles. Close the charters like Globe and reintroduce the duel language programs at the existing schools. Globe pulls two entire classrooms from Oak Grove alone. Return Charles McDaniel Park to Parks and Rec and turn over the deed to the building to the neighborhood for a community center.	2/12/2026 4:26 PM
2625	I would focus on developing a truly long term strategy that is based need and avoids social engineering. If it makes most sense build larger schools like Gwinnett and close neighborhood style schools this should be a comprehensive plan, not a piecemeal approach.	2/12/2026 4:24 PM
2626	Please explain why only the north end schools received expansions	2/12/2026 4:14 PM
2627	Not enough information is provided with this plan regarding where students will be relocated to if their school is closed. I agree some closures are likely necessary to improve finances and efficiency, but redistricting information proving remaining schools will not be overcrowded as a result of the closures is needed. School closures should be based on current DCSD student numbers (not arbitrary predictions tainted with COVID trends). Remaining schools should have capacity for current students + students to be redistricted there + 10% to allow for new students to attend should decreasing enrollment trends subside.	2/12/2026 4:09 PM
2628	Can we get a map with the school locations? I like the consolidation infographic, and it would be helpful to understand the schools by geographic location.	2/12/2026 4:08 PM
2629	Come on you guys! You're literally making stuff up to see if it sticks. Seriously!	2/12/2026 4:02 PM
2630	Please keep parents and the community informed on dates and when we can learn more. This is a BIG deal do not leave us in the dark.	2/12/2026 4:01 PM
2631	Please share data that larger/smaller schools produce better academic outcomes, or research of concerns that will be tracked for at-risk populations in the larger facilities. Also, please provide data of lot size for each/every facility.	2/12/2026 4:00 PM
2632	Please rethink this. Schools will get crowded again. Expanding Chesnut makes no sense. I'm in favor of Vanderlyn staying open.	2/12/2026 3:58 PM
2633	Do NOT close neighborhood and consolidate to mega schools - no program is worth what we lose	2/12/2026 3:55 PM
2634	Please consider placing preschools in close proximity to the high schools. It is unfortunate but a fact that we have both teen parents and teens who are forced to parent their siblings.	2/12/2026 3:50 PM
2635	Break this into smaller pieces. Fine to have a long term plan at county level but communicating hypothetically with limited data about scenarios 8 years from now is causing more harm than good.	2/12/2026 3:48 PM
2636	This option provided cannot be implemented. Housing has always been more affordable in South DeKalb, and that's not changing. That means more young families — and more children — will continue to live here. So why are we closing schools in South DeKalb while adding capacity in North and Central DeKalb? What data supports that decision? You can't use a blanket enrollment number to justify closing schools in the South with no expansion strategy here. If consolidation is necessary, why not combine schools in South DeKalb and then expand those campuses to prepare for future growth?	2/12/2026 3:47 PM
2637	For the closure of specific schools, lowest educational adequacy was listed as a factor for closure. How will the proposed changes address low educational adequacy? What changes will	2/12/2026 3:31 PM

	be made to ensure low educational adequacy is not a trend that continues with a change in address?	
2638	We ate not going back. Trump	2/12/2026 3:30 PM
2639	Rather then Consolidation : why not offer Online for Older Students. This would help when enroll goes backup. Focus more Quality Employability Skills and less on testing. Which will attract more people! Yes the goal in 100% complete 4 years of College! Get High paying jobs in Dekalb. Job their will have to create!	2/12/2026 3:27 PM
2640	Why don't you stop making it harder for yourself and get communicate with the parents and teachers before you publish this information. It creates swirl and distrust and out right anger and stress for parents and the community. You really don't have a clue what you are doing Dekalb Schools. I mean every which way we turn it is something new. Recess, superintendent indicted, and now this. What are you doing? Creating videos pretending things are good?	2/12/2026 3:27 PM
2641	It would be super helpful to explain what, if any, changes the consolidations of elementary schools will have on feeding. For example, I'm not as concerned about two elementary schools consolidating (though I hate it for personal/emotional reasons) if I knew my children would still process up to their same middle and high schools that we bought in the area for. I would have a much bigger problem if you tell me that they're not remaining on that pathway. So PLEASE send out or include this information if you have it.	2/12/2026 3:22 PM
2642	For starters we are the only county with SO many schools! We somehow ALWAYS have funds that are needed for resources misappropriated into other areas/people unknown. Get rid of the newer low performing, understaffed schools and maybe we'll have more quality teachers teaching effective curriculums	2/12/2026 3:18 PM
2643	More concrete information is needed on how closed schools would be utilized. Information on projected class sizes and staffing needs should be shared. Will teachers from closed facilities automatically be placed at a consolidated school? If not, what will be offered to those teachers, faculty, and staff? If school consolidations and/or closures take place, what will happen if the population increases? What makes the determination of which schools of the potential closures are on the chopping block?	2/12/2026 3:10 PM
2644	Many in our community strive to remain part of the Chamblee cluster for all of the advantages it offers such as the honors program, the German-track and magnet program.	2/12/2026 2:58 PM
2645	Many of us have chosen our communities based at least partially on the schools our children will attend. Changing these attendance zones will create additional movement throughout the county and potentially unintended consequences relative to over-enrollment elsewhere.	2/12/2026 2:55 PM
2646	While consolidation is needed, some facilities do require expansion that redistricting may not be able to address.	2/12/2026 2:54 PM
2647	If we consolidate, please narrow what is considered "high achieving" a 75 on the cogat is not high achieving. An 85 or 90 should be the cut off. I will be leaving dekalb for middle and high school if more options for brilliant children are not offered in this reditricting plan.	2/12/2026 2:53 PM
2648	It would be nice for the schools up for expansion to have an idea of how many students would be added and what that would look like in terms of additional facilities.	2/12/2026 2:44 PM
2649	I hope that teachers will not be impacted by this consolidation. Because of large classroom sizes, this may help teachers and students have another instructor in the classroom to meet the academic needs of students who have gaps in their learning.	2/12/2026 2:43 PM
2650	NA	2/12/2026 2:39 PM
2651	Why are the changes primarily on the south side of the district?	2/12/2026 2:34 PM
2652	Include how transportation would work. Give consideration to residential areas in the county that are already congested.	2/12/2026 2:30 PM
2653	I am embarrassed of our school board and the options they are proposing! Shame on Dekalb County Schools. The culture of Dekalbs County is to work to the lowest level not build up to the highest potential!	2/12/2026 2:20 PM
2654	A k-12 chatter band would be great also. A multi building campus.	2/12/2026 2:16 PM
2655	Keep busing of students to a minimum.	2/12/2026 2:16 PM

2656	Parents and taxpayers in the county deserve to know why the situation has become like this. Were resources mismanaged? It cannot possibly be due to lower enrollment rates alone. For example, Ashford Park is growing rapidly with many new families with young kids who would attend Ashford Elementary, so it is unclear why this school would be closing. Parents also deserve to know exactly how restricting the schools would affect where their kids go well in advance of any closures. Many may choose to leave if forced into schools they do not want to attend. People move to neighborhoods because of the school so the county needs to have plans that keep the same neighborhoods and cohorts together.	2/12/2026 2:11 PM
2657	Closing Ashford Park would be a mistake. Dekalb county revenue would be in question because property values and taxes would drop to reflect the closure of the best elementary school in the area. The premium people pay to be in the school district would disappear.	2/12/2026 2:07 PM
2658	none	2/12/2026 2:06 PM
2659	Leave the schools how they are.	2/12/2026 2:00 PM
2660	I think the fewer transitions, the better, especially for families with multiple children and managing schedules.	2/12/2026 1:54 PM
2661	You must listen to schools that have high parent involvement and not ruin amazingly run and well supported places of education, for the sake of saving a few dollars.	2/12/2026 1:52 PM
2662	SAVE ASHFORD PARK ELEMENTARY!!!	2/12/2026 1:43 PM
2663	We need more details, ASAP. I've been keeping up closely with this project since the beginning, and I feel that only releasing closure scenarios is a bit of a slap in the face. How much longer will we have to wait to find out even the rough sketches of where our children will attend school?	2/12/2026 1:43 PM
2664	It should all depends on the students' back grounds as well, their families. Those severe family's needs, NEED to be in certain clusters, to better help and assist. Putting students all in 1 center to work miracles, is a deep challenge and sometimes impossible, its 2026, raising children is becoming difficult, it seems and by that, you want to keep staffs' mental health guarded to continue, especially for low pay. To keep things afloat, bc WE NEED FUTURE TEACHERS to keep the cycle ALIVE and WELL.	2/12/2026 1:40 PM
2665	Can the Superintendent visit Cedar Grove Cluster, I see we didnt get a visit compared to the other schools	2/12/2026 1:37 PM
2666	I was a teacher before being a stay at home mom. It is very important to have high ranking public schools. It would be sad for this community to lose this school.	2/12/2026 1:33 PM
2667	I think it makes sense about potentially reusing different schools for different scenarios but all you are sharing is what those potential schools may be. You do not show any information about where all the kids in the district will go. My kids are currently set to move up through Druid Hills. This scenario shows that those schools will not be closed but it does not show how they will be impacted. And with the recent decision to renovate Druid Hills High School, which is a big mistake in my opinion, how will my family be impacted by possible redistricting.	2/12/2026 1:33 PM
2668	I wish class size would be discussed when promoting the idea of these gigantic, likely impersonal mega schools. Children benefit from smaller class sizes.	2/12/2026 1:33 PM
2669	If it is structured like I said before I am in favor.. if the groups are not separated by space and time, keep the regular grade groups prek-5, 6-8, 9-12	2/12/2026 1:24 PM
2670	It should also be considered why the population has declined. I think that is something worthy of research. Whether it’s due to declining population, immigration policies and tactics, families switching to private schools or homeschools because of school choice vouchers, or under enrollment due to schools with poor facilities and funding.	2/12/2026 1:24 PM
2671	Parents should be given an opportunity to do the survey by being notified by the schools their kids attend. Not many parents will know to look for this resource.	2/12/2026 1:23 PM
2672	I have sent four children through Vanderlyn and now have my fifth there. It is a strong, supportive school that has served my family well. Please do not close it. Vanderlyn is working, and closing it would hurt families like mine and push people out of DCSD.	2/12/2026 1:21 PM
2673	It's hard to differentiate building from programs. Those two need to be looked at together since	2/12/2026 1:18 PM

	the programs (special education, charter, gifted/magnet, French immersion, etc) really drive the building. The building is merely physical - we need to look at who and what is happening in each building as well.	
2674	Link to the data sets.	2/12/2026 1:15 PM
2675	McNair DLA is a fairly new school that could accommodate more students and will be closing but that means we wasted millions of dollars on something that wasn't worth the investment. Furthermore, let's talk about these school that are main roads with easy access to harm way, or that creates traffic daily during dismissal because of the car rider's lane.	2/12/2026 1:12 PM
2676	Thank you for the opportunity to provide feedback. As the district prepares the next round of scenarios, I encourage continued focus on the student experience—especially for early-grade learners. Minimizing unnecessary transitions, maintaining developmentally appropriate grade spans, and protecting access to high-quality instructional environments should remain central considerations. I also encourage the district to ensure that scenario development includes a clear analysis of: • The impact of additional school transitions, especially for PK–5 students, given the research showing that frequent transitions can disrupt academic continuity and social-emotional development. • The instructional implications of consolidations, including how schools will maintain strong support services, intervention programs, and manageable class sizes when cohorts are merged. • Community-based accessibility, particularly ensuring that younger students are not required to travel significantly farther or experience more complex transportation routes. • Facility readiness, including whether buildings proposed for new configurations (such as PK–8) are appropriately equipped for multiple developmental stages. • Long-term sustainability of each model, not only from a cost perspective but also from an educational quality and equity standpoint. While I understand the need to address declining enrollment and operational efficiency, I hope that future scenarios will incorporate options that preserve well-functioning elementary schools—such as Midvale—while still addressing system-wide capacity challenges through targeted, thoughtful adjustments. Thank you for continuing to include the community throughout this process. I look forward to reviewing the next round of scenarios.	2/12/2026 1:11 PM
2677	Oak grove and Briarlake have very similar capacities and sq footage (OGE slightly more it seems) however the area where Briarlake is situated is very high traffic. There are people regularly speeding though, traffic jams that take >20 mins to move through 1 mile sometimes. Trying to then add construction there would absolutely be a disturbance to students and residents. Oak grove has the space to expand, not adding much additional traffic jams as it is not located on a main road like Lavista where many people use Lavista to “Cut through”	2/12/2026 1:04 PM
2678	Oak Grove Elementary isn't going anywhere. My wife showed me a projection of enrollment that the SAP produced that showed Oak Grove trending up the last several years, and then an inexplicable projection showing it dropping in the future, which is flatly ridiculous. They are adding classes next year in both fifth and third grade that I know of, and possibly more that I don't. Please be honest in your data. Also, please don't make the mistake of thinking that a school district needs to be maxed out across all resources in order to be funded properly. We should not set a standard that a school or district is considered oversupplied unless it's undersupplied. It's OK for everyone to have a little room to grow into. Being maxed out is not an ideal state of being - for an individual, for a business, for a school, or any organization of any kind.	2/12/2026 1:03 PM
2679	Please provide some explanation of why Ashford Park was named as potential closure. It does not make any sense.	2/12/2026 12:54 PM
2680	Do not close Ashford Park Elementary. Expand the facility. Do not rezone children out of Ashford Park Elementary. To my family, the ability to attend Ashford Park is the determining factor between sending my child to a DCSD school or sending them to private school. My child will not attend a school with low test scores.	2/12/2026 12:51 PM
2681	The Evansdale community is very vocal and opposed to these changes. I will be attending all meetings on this to ensure that my voice along with my communities is heard.	2/12/2026 12:51 PM
2682	As a teacher I do not think it is wise to put 11-19 year olds on the same building. Middle school and high school students are very different! If anything I’d put 6th with elementary, 7-9, 10-12 together.	2/12/2026 12:50 PM
2683	Dhs and pcms are still overcrowded and trailers and not addressed. Been 15 years not solved.	2/12/2026 12:50 PM
2684	I want more clarity on how neighborhoods that are losing a school (based on the latest	2/12/2026 12:49 PM

	scenarios) would be rezoned. Where will my son go to elementary school if not Vanderlyn? Will he receive as good of an education there? How close to home will it be? I want to know this ASAP.	
2685	I am concerned that the area surrounding Flat Shoals, Candler Road and Wesley Chapel is being forced into closures. Why is Rainbow ES is more valid than Bob Mathis ES? Bob Mathis ES has the preschool diagnostic center and it also has facilitated a great place to meet students' needs.	2/12/2026 12:44 PM
2686	Evansdale is very special because of it's French immersion and STEM program. There is no other school like it and if you were to close it down you will lose alot of DCSD familes and staff members who are tired of things like this happening in DeKalb.	2/12/2026 12:41 PM
2687	All of our children deserve to have access to up to date technology in the best teachers and staffs available , just like the north side	2/12/2026 12:39 PM
2688	Please provide visibility into where students impacted with school closures are likely being accommodated to	2/12/2026 12:39 PM
2689	closing 27 schools is a lot	2/12/2026 12:38 PM
2690	Release a mission statement for the SAP. Is the mission simply to save money on facilities or is it to create more equitable outcomes through the consolidation process? More transparency overall is also needed, not just with the data, but also, who are the community stakeholders consulted in this and how are they chosen.	2/12/2026 12:35 PM
2691	Dekalb has been a mess for years, mishandling funds, and a overall theory to that to make underperforming schools look better, you have to bring down the high performing schools, so it's even. that's insane! Fix the infrastructure, work with the communities in the under performing schools. Stop hiring people we know are under federal investigation, make good choices that benefit the communities and children, not you! The mismanagement is horrendous.	2/12/2026 12:33 PM
2692	I appreciate your recommendations and know this is not an easy job.	2/12/2026 12:31 PM
2693	Does DCSD plan to communicate administrative hiring cost increases in relation to failed upkeep or re-zonings for under-utilized schools? Does DCSD plan to operate with a basic level of competence in finding non-crooks to be superintendent? Is it that hard to find someone who isn't a crook, and who won't then cost us in legal issues & lost leadership, capacity, and care for our students? Does DCSD realize we have already parented through COVID-19, are already sharing neighborhood watches against terrorism by ICE/CBP against our neighbors and school families - and now we have to open a new front against our own public school district? If your first communication is an incoherent and illogical closure & consolidation move, how are we not to feel like our kids are behind the siege walls here, and that you are our antagonists and not partners in ensuring successful educational outcomes and experiences?	2/12/2026 12:31 PM
2694	Grades 6-12 on the same campus does not seem best for social and emotional well being.	2/12/2026 12:19 PM
2695	Closing our highest performing schools such as oak grove elementary will cause additional losses of Dekalb residents to the suburbs and loss of revenue for the county. This is NOT the right direction for Oak Grove specifically.	2/12/2026 12:15 PM
2696	The DCSD staff is concerned about job security with the closing of schools. Will an explanation or discussion take place to address this?	2/12/2026 12:13 PM
2697	The schools my kids are in would not be affected in this scenario, and I am not familiar with the facilities proposed for closure or repurposing. Because of this, I am inclined to trust the explanations provided for the closures suggested in this scenario.	2/12/2026 12:06 PM
2698	I believe Children benefit more from smaller schools not larger ones. I also believe there should be a limit to the disruption for existing students and those that start in the next two years.	2/12/2026 11:57 AM
2699	Leave vanderlyn alone please	2/12/2026 11:55 AM
2700	Close Vanderlyn soon so the Dunwoody cluster can finally have a stadium for their teams to play, that can be parking since there is literally none for the high school and also practice fields for the marching band etc.	2/12/2026 11:51 AM
2701	Don't close Ashford Park! Do the right and obvious thing and invest in expanding the school to	2/12/2026 11:50 AM

	meet the need and passion of the community. Otherwise you will have another 1000 kids leaving the school district (unless that is your goal) and lose one of the brightest stars in the district and ensure that every school in DeKalb is barley adequate in educational quality and community support. Additionally, the lack of clarity around the actual recommendation is impossible to understand. How can anyone react to a building closure without understanding the impact of that closure on the actual student population. You wouldn't simply take a pill from the doctor without knowing why you need it so or what result/impact/side effects taking the medicine may have... Why this peice meal approach?	
2702	I appreciate the openness the committee clearly has to discuss novel ideas and approaches. Nothing will make everyone happy, but I feel this process will help all be involved and understand where the district is trying to take educational facility use.	2/12/2026 11:48 AM
2703	Lean heavily on this will improve quality. Quality improves home values. Home values improve taxes. Taxes improve quality, and then you’re in a happy cycle	2/12/2026 11:46 AM
2704	APES has been an excellent school for our kids. We would hate to see it go. The parent foundation has poured a lot of money and time into the school. APES connects Drew Valley, Brookhaven Fields, Brookhaven Heights, and Ashford Park But it needs expansion. I'm also concerned about the current project to expand the cafeteria. While needed, will we be wasting taxpayer dollars if DCSD decides to close APES?	2/12/2026 11:46 AM
2705	See above.	2/12/2026 11:45 AM
2706	what DeKalb county is doing is disgusting to it students. You guys have proven time and time again you do not know how to run a school administration. From the constant turnover of district superintendent, the misappropriation of funds, the low funds for school, no money to pay your teachers or hire enough teachers for the students now the audacity to say that you guys are closing schools you should be all ashamed of yourselves	2/12/2026 11:39 AM
2707	DeKalb is a big district with lots of older facilities. This is well known. Redistricting is very difficult, but operational efficiency is not the only factor to consider. Schools that are thriving as they are should be allowed to continue to do so. We want to keep students in the district and not lose them to private/charter options. It's better for all of us when our district schools thrive. Schools that are supporting their own curriculum enhancements should be factors to consider as well as number of kids in the facility. An involved parent community is much better for the district. We need decisions that allow DCSD to maintain students AND the community support that public schools so desperately need.	2/12/2026 11:38 AM
2708	Provide more detail around the impact of these changes - where the kids at closed schools would go to and what bands are being considered for the changes and do they have impact on schools that are not closing or being repurposed.	2/12/2026 11:36 AM
2709	If Vanderlyn specifically is closed, I would love for that facility to be transferred to dunwoody high school- we could really use the space	2/12/2026 11:34 AM
2710	NA	2/12/2026 11:28 AM
2711	I think families would benefit from having siblings in the same building for longer. But I think the developmental needs of students may require more separation.	2/12/2026 11:28 AM
2712	When will plans for clustering be announced? That is, will any school clusters change based on these reorganizations?	2/12/2026 11:23 AM
2713	Please also consider traffic implications. For schools in south Dekalb, it’s not beneficial to students attending schools in the area to have no where to turn for a good education locally. Take Ellenwood and Stone Mountain area schools for instance. Even Tucker. If you close all the local schools in a certain zone (cedar grove, for instance), where do those kids have to go? Consider the impact on those parents as well. What about schools that provide certain specialties or assistance programs for kids with IEPs etc? Please reconsider	2/12/2026 11:20 AM
2714	Druid Hills middle school is too far away from my zip code. Kids in my neighborhood spend 1.5 hrs on the bus in each direction. 3hrs a day traveling back and forth to school is too much. Driving my kids to school would be 25min drive each direction in the AM and 40min each direction in the afternoon. I am right on the edge of the district which does not serve my neighborhood in the least. I am surrounded on 3 sides by APS but I cannot annex in to the City of Atlanta and attend their public schools because DCSD struck a deal with city of atlanta when Emory annexed. My neighborhood was shutout of viable schooling options for middle	2/12/2026 11:14 AM

	school. Considerations: 1. Turn Kittredege Magnet into K-8 and give zipcodes like mine priority as long as MAP score minimums are met. This way the magnet identification can remain intact. 2. Make Briarvista a middle school to serve the west side of the central district. This would of course change which elementary schools would close. Thank you for honest considerations.	
2715	I want to see the zoning lines for my area of Dekalb. Unfortunately I have heard rumors regarding rezoning that would negatively impact my daughters specifically. I would not care if they were sent to Chamblee MS/HS but do have a huge problem if they were sent to the new school off Buford Hwy that will combine MS/HS. I do not think that we would stay in the county if they were sent there and would likely relocate to Forsyth or further. I have on good authority that multiple families would leave Dunwoody if they are sent to the wrong MS/HS choice or that school choice applications would significantly increase.	2/12/2026 11:14 AM
2716	I was extremely surprised that Midvale Elementary was on this list based upon our experience at this elementary school since 2018. I suggest that the district takes into consideration the involvements of parents, PTO/PTA involvement and fundraising, and overall parent feedback on this matter. Thank you	2/12/2026 11:13 AM
2717	Is anyone at the county level of this project aware of how things were handled when we closed 8 schools in 2011? I feel like we have had so many admin changes that some people don't even know that happened. Also, I hope Dr. Sauce considers trimming the $10M worth of admin staff that Horton hired. That's a lot of admin for a school system that is downsizing so much. This is going to be a struggle, as I remember the past. I do wonder what it is like to work in a brand new school, so hopefully we're not closing schools to put them into some other junkie building.	2/12/2026 11:08 AM
2718	I think middle schools should only be used in areas that need it for overcrowding. Have underutilized elementary schools PK-7, with high schools being 8-12	2/12/2026 11:01 AM
2719	I think it's important to consider the social aspects of combining age groups as well as the academic ones. There is a huge difference it maturity at the start of middle school versus the last couple of years of high school and we need children to have the space to grow and mature in socially appropriate ways in school.	2/12/2026 11:01 AM
2720	I don't think you can or should make any decisions till the parents get a chance to speak in person.	2/12/2026 11:00 AM
2721	I would like to make sure the South isn't an afterthought. I'd like to make sure programming is dispersed amongst each region (language immersion, Montessori, etc). If we will be consolidating into mega schools, then those schools should have everything those children need, including onsite aftercare.	2/12/2026 10:57 AM
2722	This seem to be very much throw the spaghetti against tbe wall and see what sticks. Where are the rest of the ingredients? Making kids feel like they’re not a priority and more of a number versus the bottom line. Empty schools that taxes and house values. So the kids, the families and the communities come as an afterthought. Whether that was the intent or not, I don’t know, but that’s how it comes across.	2/12/2026 10:56 AM
2723	Placement of special programs needs to be consistent with the arrangement for equitable access for students.	2/12/2026 10:52 AM
2724	I think if you're going to have larger schools with a higher student population, the kids need to be closer in age. If the schools are smaller, it's okay to have a wider range of grade levels.	2/12/2026 10:47 AM
2725	DeKalb has messed up in so many big ways lately. It would be wonderful if DeKalb focused on preserving high performing schools, looked at how to do that in a cost effective way and tried to save the little that is good about this school district.	2/12/2026 10:35 AM
2726	Brockett is a diamond in a rough. I fear that our large population of immigrant families will be inadvertently left out of these discussions. We are already seeing families not sending their children to school out of fear for the current political climate. Please make every effort for increased engagement with these families beyond sending emails, texts, etc.	2/12/2026 10:35 AM
2727	Has the county explored WHY enrollment is declining and attempted to address possible issues there? Perhaps changes to DCSD could work to maintain, if not increase, enrollment.	2/12/2026 10:31 AM
2728	That makes no sense. Who wrote this? Poorly done.	2/12/2026 10:26 AM

2729	I beg you to reconsider the closing of APES. While we understand it is overcrowded, is there a way to re-draw the lines to free up space? For example, limiting APES to just students who live in Ashford Park, or including students who live in Historic Brookhaven in the expanded Montgomery Elementary boundary.	2/12/2026 10:25 AM
2730	Elaborate on what grade bands are - will these students be housed together in the same building? What does grade band mean and entail? What is a cluster? Is that a grouping of neighborhood schools? It would be helpful for those of us not familiar with the language to have definitions within the survey so we can make the most informed decision.	2/12/2026 10:25 AM
2731	Please don't shut Oak Grove! Please!	2/12/2026 10:23 AM
2732	Please seriously reconsider some of the schools that will potentially close.	2/12/2026 10:21 AM
2733	N/A	2/12/2026 10:15 AM
2734	Please do not close Ashford park elementary - it is beloved, safe, and the heart of the neighborhood	2/12/2026 10:13 AM
2735	It is understood that AP has an overcrowding problem, however closing it completely would be very detrimental to the community. Dekalb benefits from people moving from other places into the district to enjoy the benefits of that school, its programs, and neighborhood setting which creates a tight-night community of students and parents that contribute to the school environment. I also understand that in the long term each school will evolve over time as the demographics and boundaries are shifted (thinking of schools that traditionally do not rank high in terms of test scores, satisfaction, etc), but in the short term I think the closure of Ashford Park would drastically change the AP, Drew Valley, and surrounding neighborhoods. Many families would feel they have no other choice than to move to be in a more desirable school district or make a switch to a private school as the reason so many families have moved into and invested in the district is specifically for this school. Property values would certainly be affected if families are switched into a neighboring district. While that can't be a deciding factor in what is best for the students, it's worth noting that it would most certainly have an impact on property taxes for Brookhaven and Dekalb County as property values decrease.	2/12/2026 10:13 AM
2736	I would like the district to consider keeping Ashford Park open while reevaluating the placement of the German Immersion program at this school. In my experience as a Dekalb County employee, this program has had unintended impacts on the school community and culture. The lottery process has resulted in classrooms that are not reflective of the broader student population, limiting opportunities for diverse peer interaction and raising equity concerns. The program has also contributed to significant division within the parent community, with a small but very vocal group often dominating school discourse. I believe reevaluating where this program is housed, or how it is structured, could help restore a more inclusive, balanced school environment while allowing Ashford Park to continue serving its neighborhood effectively.	2/12/2026 10:11 AM
2737	The neighborhood elementary schools in Dekalb are a gem and shouldn't be ignored as they are a prime attraction to home buyers and help drive home values. Stripping this will impact those values and will in the end have an effect of the tax revenue you rely upon. I understand that change is needed and ask that the county be thoughtful and not reactionary in implementing scenarios. Expand and make new seats available before closing existing buildings or you'll be doing a major disservice to the students and families that you serve.	2/12/2026 10:10 AM
2738	More information on how over crowding at the middle school and high school levels for the northern schools would be appreciated.	2/12/2026 10:07 AM
2739	Proper age limits need to be in place.	2/12/2026 10:06 AM
2740	Close the 19 doors that are constantly open as it is unsafe. There are no cameras on the outside to keep all safe. Please bus all Clarkston High School students to the new Cross Keys.	2/12/2026 10:05 AM
2741	I need to understand the thought process and plan for where the AP students will be placed. I dont see where they are going to place all of these students. Keeping Ashford Park neighborhood together should be a very strong priority. There are other neighborhoods flowing into AP that could be moved out to help with capacity issues.	2/12/2026 10:03 AM
2742	Any building that is repurposed should intentionally include Special Education programming. Students with special needs are too often left out of facility planning, which forces families to	2/12/2026 10:02 AM

	move their children repeatedly throughout preschool and elementary years, Sometimes they are forces outside of their feeder patterns just to access the services they need. As the district redesigns clusters, grade bands, and building use, it is important that Special Education programs are included in every region plan from the start, not added as an afterthought. All students deserve consistent, inclusive programming close to home.	
2743	Need proper age gaps in schools.	2/12/2026 10:00 AM
2744	Placing younger children with older ones can be very risky, as it can lead to them mimicking behaviors that are inappropriate for their age, which is why it is good for them to be in an environment with peers who are in their age group, making sure they are not exposed to things that could negatively impact their mental development.	2/12/2026 9:55 AM
2745	Often if feels like parents and staff are kept in the dark until the last possible minute so any transparency is appreciated as next steps are discussed. These are Dekalb families that have been good to their schools, staff, county and deserve to be given that back. We should be informed so that we can all make the best decision for our children, each so unique and they are at the heart of what this is all about.	2/12/2026 9:54 AM
2746	Our school performs well and our community is one that lends itself to academic excellence, students thriving in a relatively small (compared to other schools) but strong environment. Combining our school with another would be highly disruptive for that small community and the children..larger schools doesnt mean better education. Please do not disband Vanderlyn	2/12/2026 9:52 AM
2747	Clusters such as Brookhaven, where neighborhood schools are strong, walkable, and well-supported, should not be subject to the same restructuring as clusters facing overcrowding or declining enrollment. If grade banding is being considered at all, it must be evaluated on a cluster-by-cluster basis, with clear justification, data transparency, and meaningful community input. Applying a uniform model where no problem exists creates unnecessary disruption and undermines trust in the district’s planning process.	2/12/2026 9:51 AM
2748	I believe the school cluster grade bands should stay the same as it is now. Prek-5, 6-8, 9-12. Also, all schools should put ESOL kids in one class and all non ESOL kids in a separate class. It’s not fair to either class to be integrated when they don’t share the same language and the the students are the ones who suffer. For example when my oldest son was in kindergarten at Kingsley he was in a class full of ESOL kids and he spoke fluent English. He was put in the back of the room at a table by himself because the teachers were solely focused on teaching English to the ESOL kids. That’s not ok, fair or right to do this to any child. I’ve heard the same scenarios at Peachtree Middle and Dunwoody high as well.	2/12/2026 9:50 AM
2749	I think a better understanding of how the schools considered for closure would funnel into other schools would be beneficial for stakeholders to see.	2/12/2026 9:50 AM
2750	Ashford Park is an amazing school with involved parents and community. Please do not dismantle this school	2/12/2026 9:49 AM
2751	I would like to see redistricting lines. What the student attendance projections are. The rationale behind each school closing as they do not all match the " failing school" qualification or that the buildings are insufficient. Midvale just had major renovations done over the past 3 years. It also has enough land to accommodate an expansion, unlike Livsey. I'm confused. I want to see a plan for how the savings will be reinvested into the school system. How will this be sustainable? How are we encouraging families to stay? How are we building trust?	2/12/2026 9:47 AM
2752	Please don't cave to the demands or parents in wealthy areas. I feel as if they will give you the most trouble.	2/12/2026 9:42 AM
2753	I like the 4/5 model; it gives students a chance to get to know each other before they go to middle school. I also think that upper elementary students have different needs from K-3.	2/12/2026 9:42 AM
2754	Please consider the students and parents within the communities and what would best benefit them in ways that can ensure student success.	2/12/2026 9:40 AM
2755	A better explanation of the specific grade band changes proposed at schools would be helpful for more informed decisions. Also, I'd like to know what happens to kids where schools are closing altogether and how you plan to maintain the community that has been built in those schools.	2/12/2026 9:39 AM
2756	What will the impact be on magnet schools for high achievers? Will these be geographically available for all students?	2/12/2026 9:38 AM

2757	Give knowledge of how the schools closings will impact district lines and where students of closing schools would go for parents to make an accurate informed opinion.	2/12/2026 9:36 AM
2758	I don’t like the idea of high school going below 9th grade. There needs to be a transition.	2/12/2026 9:36 AM
2759	You need to consider quality of education as well. These will be enormous elementary schools and that will change school climate. Larger schools are more impersonal.	2/12/2026 9:36 AM
2760	Another thing to be considered, especially when evaluating grade band changes, is the changing environment around literacy in the early grades. Should GA explore adopting a model similar to Mississippi's and potentially opening the door for more elementary age students to be held back based on their reading proficiency, we should be exploring a grade band set up that makes that sort of thing easier. I think something like PK-3 / 4-5 / 6-8 / 9-12, for example, would make more targeted literacy instruction and an increased focus on students reading on grade level easier as there would be natural transitions at important inflection points in the model (4th grade, 8th grade).	2/12/2026 9:33 AM
2761	Again, my biggest concern is how the closure of this school will affect my child's education and the community at large. We moved into this neighborhood specifically for this school and to have a good sense of community. I'm completely opposed to a scenario in which it breaks up the community and some students are sent to schools that have much worse ratings when it comes to testing. This could affect not only friendships, education and overall childhood development but also property values and tax funding for this area. If enough people in the Ashford Park community dislike the new scenarios, they'll send their kids to private school, which would very much affect funding for the city and county. Essentially, it could completely destroy the community we've worked so hard to build here.	2/12/2026 9:31 AM
2762	I am very concerned with this administration making these types of decisions based on data of poor quality. If you intend to use enrollment data I think you need to consider modeling around the COVID era a bit better and also considering what enhancements of schools in certain areas can and will do for enrollment. Many are itching to attend public school in Ashford Park but the corruption of the prior Dekalb admin + this project is fearful enough for parents that they are opting out all together for private schools. That narrative can shift if you make better decisions across the board. Just my 2 cents, the data is not reflective of reality of our area in Ashford Park. That school is bursting at the seams as the centerpiece of the neighborhood with large appetite in the community to migrate there from private if given the opportunity with renewed confidence in the admins of Dekalb.	2/12/2026 9:29 AM
2763	Keep Ashford Park open. Provide more details on the plans for those students. This will absolutely be pushed back against in the community and I'm honestly dumbfounded that you even recommended this scenario.	2/12/2026 9:28 AM
2764	If there's schools that are over capacity and some that are under capacity, can't we just bus students to the schools that have seats? That seems like the most effective option. Charters- look at all the charter schools that have been created in Dekalb and why some of these Charters were started. Where I grew up (Fairfax, VA), the schools provided all the resources so parents did not need to start charter schools. Why can't Dekalb look at the needs of their student population and create/ensure schools have all the resources (from special education to gifted, etc.). So many students are leaving for charter, if they're lucky enough to get a spot!	2/12/2026 9:28 AM
2765	Provide more information on what you will do with the students in the schools that are proposed to close. Where do they go? Do they remain int he same cluster (very important). STOP SAYING THAT YOU ARE ONLY LOOKING AT FACILITIES!!! ACADEMICS ARE THE MOST IMPORTANT THING - YOU CAN'T PROPOSED CHANGES WITHOUT TAKING THAT INTO ACCOUNT!!!!!!!!!!!!!!!!!!!	2/12/2026 9:27 AM
2766	I was hoping to see more information on what expansion means.	2/12/2026 9:26 AM
2767	Please do not close Ashford park. It needs to be upgraded and added onto, but closing it is unwise.	2/12/2026 9:22 AM
2768	What contingencies do you have in place should your projections not materialize? How agile will the district be if this should happen? What sort of sensitivity testing have you done around the uncertainty of the projection?	2/12/2026 9:22 AM
2769	Ashford Park ES will not go down without a fight. We have a tight knit community with lots of powerful people and deep pockets. Our school is so great because of our parent involvement, we will not allow that to go away. We deeply ask that you reconsider closing our special	2/12/2026 9:22 AM

	elementary school. Logistically it just does not make any sense. Obviously, Dekalb County school District needs to re-allocate resources in other communities where their schools are underpopulated and under capacity, but that is not a problem at Ashford Park Elementary School.	
2770	None	2/12/2026 9:21 AM
2771	This scenario will destroy neighborhood schools that are able to remain socioeconomically diverse because of the neighborhood vibe. Parents who are able to will pull their kids and use the state voucher system, go even more heavily to charter schools or go to private schools. Why wouldn't they when DCSD is just trying to jam in as many kids as possible into a building to maximize budgets without considering impacts on the quality of education.	2/12/2026 9:20 AM
2772	RESIGN	2/12/2026 9:17 AM
2773	Please provide monetary or logistical reasons why so many schools need to close and actual plans for what you are going to do with the properties that would be shut down. Additionally what would the new student to teacher ratios be? What happens to specialized programs like the French immersion?	2/12/2026 9:14 AM
2774	Flow chart is confusing due to not providing specific plans/details for what would happen to the elementary schools. Ashford Park has a massive enrollment. What happens to those kids? Is the building being renovated? If so, 6-8 years out is laughably preposterous considering it's been bursting at the seams for years.	2/12/2026 9:14 AM
2775	I like the PK-3/4-5/6-8/9-12 band because maybe we can still utilize the buildings we have while spreading out the grades so younger students are not exposed to upper grades as much. Plus it would be a way to keep employees.	2/12/2026 9:13 AM
2776	I will be very personally frustrated and vocal if Oak Grove ES is closed	2/12/2026 9:12 AM
2777	I would like to see students from Lithonia Middle & High moved to Miller Grove cluster. This would eliminate the over crowding at Lithonia cluster while helping the low enrollment in the Miller Grove cluster	2/12/2026 9:12 AM
2778	I don't think you should rely heavily on community input. People who shout the loudest are only advocating for their own, and generally selfishly. Do what makes the best fiscal sense for ALL students. If we truly have community schools this will be best for all students involved. Let's get the facilities and boundaries taken care of so we can focus on TEACHING THE STUDENTS.	2/12/2026 9:11 AM
2779	Middle school students and high school students should not be in the same buildings.	2/12/2026 9:10 AM
2780	Good luck!	2/12/2026 9:10 AM
2781	Midvale is raising its scores in all areas - enrollment is up, test scores are up, school ratings are up. To close a school that is out performing its Title 1 status and out performing other DeKalb peers would be a tradegy.	2/12/2026 9:09 AM
2782	School Choice families	2/12/2026 9:07 AM
2783	Do not close any of the Dunwoody Elementary schools. Community preservation is important. Dunwoody High school needs a parking deck, and an external permanent expansion where the tennis courts are.	2/12/2026 9:07 AM
2784	The larger schools in the system are some of the lowest performing schools. You should evaluate why you expect creating larger schools to solve any of the problems you seek to limit.	2/12/2026 9:07 AM
2785	I am shocked that this is the best solution you all could come up with. I do respect this is a difficult situation. However, the real reason the enrollment is down, is because the actually education is down. If you all spent time finding better ways to educate and compete with the rest of the nation, the enrollment would go up. Putting the energy where it needs to be would solve the problem, put the kids first and provide a better educational system	2/12/2026 9:07 AM
2786	Please consider reducing the cost of central office workers and their work space before hurting the education and development of children.	2/12/2026 9:06 AM
2787	Leave Ashford Park ES and neighborhood as is. People buy homes here for the school district.	2/12/2026 9:05 AM

2788	While I totally get the limited resources, if Dekalb really says they care about students consolidating grade bands and creating bigger classrooms and schools isn't the answer	2/12/2026 9:05 AM
2789	From a resource side this makes most sense to me. PK3-K: Require similar resources. ie: smaller furnishings, playgrounds, class structure, reinforced support with teachers and helpers 1-5: First grade is generally the start of more structure for students. Mid size furnishings, playgrounds and open fields for play, etc. 6-8: preteen, hormonal shifts and teachers and faculties structured and trained in handle that. 9-12: prepping for adult life. All students in similar stage of life past preteen hormonal shifts. I highly suggest speaking/consulting with Child Psychologists. They know far better about dynamics of social interactions within student populations and performance outcomes.	2/12/2026 9:05 AM
2790	Potential school boundary lines will help people understand the impact from closures and redistricting. There also needs to be identification of impacts to school choice programs, as well as current capital improvement projects underway.	2/12/2026 9:04 AM
2791	Grade banding should absolutely be off the table! This is a terrible choice and not what is best for the children.	2/12/2026 9:03 AM
2792	The closure of small neighborhood schools would be a huge loss in my opinion. Dekalb would lose students with access to private schools and other educational opportunities. The county itself is not seen as trustworthy, but the small neighborhood schools are communities with invested parents and neighbors. Losing that would be a huge loss.	2/12/2026 9:03 AM
2793	If I understand this first proposed set of ideas right, this plan gives the district the needed ability to close schools while using flexible banding and existing larger spaces to (largely) keep kids and families in their cluster. To me, that is an ideal situation! I realize there will be complaints and no one wants their school closed, but it might help to provide some reasons for why (such as, we can move you and this other ES to a MS building, or this ES has a huge piece of land, so we're rebuilding a larger building here and moving your ES and that ES population into a new, larger and nicer building). It sounds like even at the HS level it is as much merger as split/redistricting. I realize that you said this will come at a later time, but I am also curious what the plan is for the specialty programs (theme, IB, magnet, etc). These specialty programs are unique to DCSD and one of the major factors that make people choose DCSD and stay put. I have lots of friends who were planning to move or send their kids to private school who changed their mind when they got into ICS/DSA/Kittredge/etc. I know some of these may need to be re-envisioned, but I think that keeping these (or expanding them!) will offer more people more reasons to stay in DCSD. And, of course, I have the same comment on these that I had above - promise currently enrolled students that they can stay to finish and you will find a lot less pushback for any changes that you need to make!	2/12/2026 9:00 AM
2794	Do not make this change. You will have a mass exodus from Dekalb	2/12/2026 8:59 AM
2795	Closing 25+ elementary schools seems dramatic if we are not offering improved facilities and improved staffing capabilities. Staff changes should focus on smaller class sizes and more paraprofessional supports as well as instructional coaches and special education staff.	2/12/2026 8:59 AM
2796	Please consider upgrading current schools first, then rezoning, then closing schools in that order.	2/12/2026 8:57 AM
2797	Closure scenarios need to be accompanied by a scenario of what happens next or the potential scenarios that will follow.	2/12/2026 8:57 AM
2798	DO NOT close Ashford Park. Whatever facilities concerns you have would likely be covered by the community via fundraising, rather than destroying this student cohort. It's hard to build something like this, easy to break. Don't do it. Dekalb needs better schools, not more mediocrity.	2/12/2026 8:56 AM
2799	The land and school space can definitely be better utilized. However the Board should also be focused on addressing the overinflated, inappropriate budget expenditures and construction waste at the Department level. Major audits should occur and the department heads should be removed immediately where ethical issues exist. School closures and overall budget expenditures should be addressed comprehensively. For example, Kingsley would need months of upgrades and repairs if it becomes a primary school in the Dunwoody cluster.	2/12/2026 8:56 AM
2800	N/A	2/12/2026 8:56 AM
2801	Just to reiterate: I am vehemently opposed to 6-12 banding. I would really encourage the	2/12/2026 8:55 AM

	district to be mindful towards students who have worked hard in special programs to ensure that, as an example, students who have been working in the DLI track for several years are able to finish that track even if they spend grades 4-5 in a different location.	
2802	IMO any decision regarding school closure should include plans for the property of the closing schools. DCPS has a large inventory of unused property and you will be adding more. Why not sell assets (North Druid Hills property) and use those funds to augment the current SPLOST deficit?	2/12/2026 8:55 AM
2803	Our family chose to settle in the Vanderlyn Elementary community because it represented the kind of school environment we believed our child deserved. From the moment we arrived, it became clear that Vanderlyn is more than a school. It is a place where families are woven into the life of the building, and we have been proud to take part in that. We contribute in the classroom, support events throughout the school, and stay connected through the PTO, which gives us opportunities to help shape the school's future. Principal Clayton has been an important part of this experience. His commitment to welcoming new families and actively recruiting students has strengthened the sense of community and ensured that the school remains vibrant. For us, Vanderlyn has become not only a place of learning but a genuine home. Vanderlyn also stands out for its academic strength, which is precisely the kind of excellence DeKalb County should strive to preserve. The school continues to post strong performance numbers, including an 81 percent proficiency rate in math and 74 percent in reading, supported by a 12 to 1 student teacher ratio that allows for more personalized instruction. As the district moves through the Student Assignment Project, leaders have made it clear that the current list of possible closures is only an early stage meant to generate conversation, not final decisions. With that in mind, it is important to recognize that closing a high performing, community-anchored school like Vanderlyn would be counterproductive. Schools that are academically strong, deeply supported by families, and led by engaged administrators already embody the goals the district is aiming for. Protecting a school like Vanderlyn is an investment not only in its students today but also in the long-term stability and success of the wider community.	2/12/2026 8:53 AM
2804	However this shakes out we need to ensure that each cluster and grade band has the same experiences for the students. The location of the schools in Dekalb County should not dictate the program availability and each student should have the same available experience regardless of school.	2/12/2026 8:53 AM
2805	You need to look closer at the success of your current schools and the sentiment of the parents. You have school listed for closure that are being sought after because you have crowded others. Smoke Rise elementary is at or above its student capacity and the school itself still can't figure out how to provide the basics to students, like an appropriate lunch time and ACTIVE recess time during the middle of the school day. You have much bigger problems in the Tucker cluster with Smoke Rise than you do with consolidating Midvale. You should be looking at the numbers of students who live closest to Smoke Rise who opted to be schooled elsewhere because of the failure of the school's former and current administration and the failure of the support of the district to provide resources to the school in the form of instruction and space. Do better.	2/12/2026 8:52 AM
2806	Giving kids in 6th grade an extra year in an "upper elementary" school gives them an extra year to mature and receive additional academic support before entering middle school.	2/12/2026 8:51 AM
2807	Vanderlyn Elementary should remain open because it is one of the district's strongest academic assets. The school consistently delivers high student achievement, with proficiency rates of 81 percent in math and 74 percent in reading, placing it well above many surrounding schools. Its 12 to 1 student teacher ratio allows for individualized instruction that supports a wide range of learners. The Student Assignment Project aims to balance enrollment and increase access to high quality educational programs, and closing a school that already demonstrates exceptional performance would work against those goals. The district has emphasized that these closure considerations are only early conversation starters, which underscores the importance of strong community feedback during this phase. [dekalbschoolsga.org] [ajc.com] Vanderlyn is also a deeply rooted part of the Dunwoody community. My family moved specifically to be in the Vanderlyn district, and since then we have made it our home. We volunteer in our son's classroom, support schoolwide events, and are heavily involved in the PTO because we want to help strengthen the school for future generations. Community involvement is already one of Vanderlyn's strengths, and initiatives like the annual VanderDash continue to raise funds that support meaningful improvements for students and staff. Principal Clayton has also done an excellent job recruiting new families to	2/12/2026 8:51 AM

	the school and ensuring that Vanderlyn remains a welcoming and vibrant community. Closing a high performing and community anchored school would disrupt not only student learning but also one of the district's most engaged and supportive school communities. Vanderlyn represents exactly the kind of strong neighborhood school DeKalb should be committed to preserving	
2808	The idea of having 6-12 in one schools is HORRENDOUS. The social dynamics of early adolescence are too treacherous to include 12 year olds with 16-18 year olds.	2/12/2026 8:50 AM
2809	Changing boundaries in areas with high performing schools will have a detrimental effect on communities. Families will likely withdraw en masse from the district, creating further issues.	2/12/2026 8:46 AM
2810	No additional feedback at this time.	2/12/2026 8:44 AM
2811	I really want to hear some discussion about specialty programs, as they are so critical to some of the kids in these projected closures. How do we ensure these programs continue at their current standards? If I have my child enrolled in a DLI program, how do we ensure that they continue to receive high level DLI instruction throughout their education?	2/12/2026 8:43 AM
2812	Vanderlyn is an integral part of the Dunwoody community and has been a high performing school for the kids, families and county. Closing that school does not seem to be in the best interest of any stakeholders.	2/12/2026 8:42 AM
2813	Please provide more information on the plans for the facilities.	2/12/2026 8:41 AM
2814	For the next round of scenarios, I'd recommend providing more details behind the proposal (if it's available today it's difficult to find). People need information on actual impacts to students based on these proposals - details on how the schools closing would be split to remaining schools, what the new location would look like (ex: what improvements has the school already had that is more than the closing schools, what would be required to be completed before more students could move to that location, does this require trailers, etc.)	2/12/2026 8:40 AM
2815	As stated above, I think the Jr. High label of 7-9th would be beneficial and allow 10-12th as high school.	2/12/2026 8:40 AM
2816	I'm more interested in rezoning info	2/12/2026 8:39 AM
2817	Take funds from the district level, it is too top heavy already. Nothing positive will come from this plan of you are truly putting students first.	2/12/2026 8:39 AM
2818	More information is needed in relation to where students in schools that are closing would go. Is there a plan to keep students in their current feeder high school (if it remains open)?	2/12/2026 8:39 AM
2819	Grade bands should remain traditional only except when populations fall for the cluster.	2/12/2026 8:38 AM
2820	Have you taken housing studies into account? I know Tucker has done one and DeKalb is about to.	2/12/2026 8:38 AM
2821	Clustering may not even be the problems. I understand funding is the case here, but schools need to take ownership of their jobs the periods students are in there rather than frustrating parents with calls. So that more kids can remain at school and parents can also work in order to pay more taxes to alleviate these funding issues. This is the epidemic unresolved.	2/12/2026 8:38 AM
2822	Don't vote on coping buildings until more information about proposed boundaries and program information is shared. Building closures will impact that and therefore these are not independent from one another.	2/12/2026 8:37 AM
2823	Good luck with redistricting. These parents are really preparing for the trenches	2/12/2026 8:36 AM
2824	None of this feels well explained, justified, or communicated. Put the kids first, not bus schedules.	2/12/2026 8:36 AM
2825	The Tucker consolidation does not reflect the growing population of families moving to the area, as well as the number of homes that are set to transition in the coming years as older homeowners move out, making way for new families to move in, with almost no nearby alternatives past 8th grade.	2/12/2026 8:35 AM
2826	Please take a look at the data about anticipated climate change migrations to Atlanta prior to making any expensive and potentially irreversible decisions. https://www.nature.com/articles/nclimate3271	2/12/2026 8:32 AM

2827	Oak Grove Elementary School is a staple of the Lakeside community. It would be a very tough outcome for the community. We would encourage you to reconsider this.	2/12/2026 8:32 AM
2828	The current proposal to just close Ashford Park will negatively impact DEKALB schools overall performance, move more kids to private schools and impact the community which this school is the center of. I disagree with the plan and will continue to voice my opposition. In addition the fact that Serita Smith is still employed after the close ties to a felon is a stain on the entire system.	2/12/2026 8:32 AM
2829	Even if buildings are consolidated, that doesn't guarantee all schools will get the staffing and resources they need. Keep our neighborhood schools small!	2/12/2026 8:31 AM
2830	Do not forget about Preschool Diagnostics, Audiology, and all the students in special education who are receiving services in a regional, special education classroom! Some of the buildings that are on the closure list house these departments and will have a huge impact on the exceptional education department.	2/12/2026 8:31 AM
2831	DCSD board members should be aware that their seats are elected. I will vote to remove all board members who approve this decision for APES closure cluster reassignment.	2/12/2026 8:30 AM
2832	Good luck. Not an easy task. Just don't lose sight of the community value. I'm speaking from experience as a parent of magnet school children. I absolutely loved what Kittredge offered, my children didn't find their community until HS and even then, not the same as the neighborhood community.	2/12/2026 8:28 AM
2833	Though I chose the traditional grade band scenario Dekalb used to be K-7 and 8-12 [this was before PreK]. Worked fine years ago	2/12/2026 8:27 AM
2834	theory is great, but without more information about zoning and feeder patterns, there isn't much to discuss.	2/12/2026 8:27 AM
2835	It would make sense to me to keep Ashford park open and combine with John Lewis. There could be lower campus(prek-2) and upper campus (3-5). As for middle school it makes no sense to send Ashford park and Drew valley families up to Sequoia Middle. It is far and low performing.	2/12/2026 8:26 AM
2836	There are still many unanswered questions. It still feels like the county to attempting to shove things down our throats and that behind the scenes decisions have been made. There is very little trust left and I caution them to hold tightly to what is left and hear parent feedback	2/12/2026 8:26 AM
2837	I do not believe that 6-12 should overlap. If they can be housed in a building without overlap that's fine. Gwinnett tried overlapping bussing the 90s and it was a huge mess between those ages.	2/12/2026 8:25 AM
2838	Please update your assumptions about the demographics of the Tucker area.	2/12/2026 8:24 AM
2839	Please better consider the implications of closing so many schools on the south side of town due to how this can viewed as far as district priorities and WHO they are trying to please. As an alumni and employee, it is disheartening to think all the schools on my side of town are being closed due to "low educational adequacy" when its the district's responsibility to ensure the educational adequacy of each school by ensure teachers are trained and resources are distributed equally.	2/12/2026 8:24 AM
2840	Please be aware of the negative impacts this will have on our community and neighborhoods. School is already hard enough for many children. Don't make this worse by forcing them to change or close schools when it's completely unnecessary. Put more thought, time, and effort into hiring a superintendent that's not a criminal and hiring people in the schools that will be positive influences in teaching our children. This redistricting and closing schools nonsense needs to stop. This would only harm our kids. Leave things alone!!!!	2/12/2026 8:24 AM
2841	I don’t know what the grade bands mean, but there would be a closure of a great school, academics, community, and that is full. We would not go to a school double the size as we’d be redistricted for, we would change to private.	2/12/2026 8:23 AM
2842	Please come up with a better plan that continues to meet the needs of the specific communities. This is not it.	2/12/2026 8:22 AM
2843	Again, I understand the need to consolidate or repurpose, but in the case of VES, which is an incredibly high performing school that families SEEK OUT, you have to give these families	2/12/2026 8:22 AM

	time to finish up at their chosen elementary school. If changes need to be made to VES, please do so over an 8-10 year timespan. Importantly, please be considerate of the community that is built in the neighborhood around this school. You should visit the playground on a beautiful day after school. Families and kids stick around after school to play - all grades and ages come together to talk and be together in our wonderful neighborhood playground. Please do not take this from our community. We will suffer.	
2844	Why Dekalb things expanding Briarlake which is at a very busy intersection, and smaller than OGE is beyond us. Also, OGE is in the middle of the neighborhood which many many families purchase high value properties to attend the school!	2/12/2026 8:19 AM
2845	Do. Not. Close. Oak. Grove.	2/12/2026 8:18 AM
2846	Please make the scenarios more accessible to view. Just put it in the email body or double check the link is going to the right place. Also we do not want videos of the superintendent. That is a waste of county resources. Put the information in the email so we can read it easily.	2/12/2026 8:18 AM
2847	While my family moved to the area we live for the quality of the elementary school it is becoming very clear that private school or relocating to a different district must be considered heavily going into next year. The school system is corrupt and incompetent, as evidenced by the hiring of Horton knowing about the pending legal issues at his prior employer and the entire SAP process.	2/12/2026 8:18 AM
2848	A lot of the elementary school closures appear to be in the southern end of the county. Could we at least have an elementary school that serves them in their actual community?	2/12/2026 8:17 AM
2849	Closing schools to conserve resources should be a nonstarter. Certainly there should be other ways to reduce costs that do not include creating mega schools and further fracturing communities.	2/12/2026 8:17 AM
2850	Run the data on performance. Remove high performing schools (test scores, teacher retention, student choice) from closure proposals. Reduce the total number of closures in this proposal with the thought that there may be additional closures in the future (example). This will give time to execute on school expansions and see how population changes shake out in real time without causing the risk to our schools that a looming closure has (teacher departures, student departures, general degradation).	2/12/2026 8:17 AM
2851	Briarlake Elementary should be closed over Oak Grove based on geography, location, and capability for expansion.	2/12/2026 8:15 AM
2852	None at this time.	2/12/2026 8:15 AM
2853	N/A	2/12/2026 8:14 AM
2854	My initial feedback is the following. The people in the decision-making of hiring Superintendents who are under federal investigation are deciding on what's best for DeKalb parents, faculty, and students.	2/12/2026 8:13 AM
2855	I would be supportive of the.Kingsley closing if we can be redistricted into Chestnut to help with logistics and keep us within our community. Fontainebleau Forest neighborhood. We are on the north end of the boundary and Hightower logistics would be a nightmare.	2/12/2026 8:13 AM
2856	You are completely destroying the reason why this area and these schools are so loved. I truly believe this will hurt the district in the long run. You are overwhelming Teachers and staff. This means less quality teachers, bigger classes in which no one can teach and scores go down, learning goes down.	2/12/2026 8:13 AM
2857	I am not sure it is always safe to put younger children in the same building as much older students who are more mature.	2/12/2026 8:12 AM
2858	The idea to close APES is not something I will support and will make sure my vote in the next election punishes officials that support it	2/12/2026 8:10 AM
2859	There has been discussion of boundary changes-specifically dunwoody high to chamblee high. Pls keep in mind the block schedule to a regular schedule. It's very difficult to do if you are already a student changing in a 4 year high school window. Maybe all high schools should be on 1 system...	2/12/2026 8:08 AM
2860	Do not do this. This targets certain demographics, forcing them to travel farther or relocate altogether for better education. You think the schools aren’t being used at max capacity but	2/12/2026 7:59 AM

	when is the last time you visited each of the schools on your list?	
2861	Don't listen to the screamers.	2/12/2026 6:59 AM
2862	SAP Member- You have to remember the importance of community buy-in for academic success. Elementary schools being the entry point they should be the focus. I'm sure some will still need to close, but the enrollment deficit should first be addressed at the middle/high level.	2/12/2026 6:40 AM
2863	We need to look carefully at the existing resources at middle schools being repurposed as elementary schools. Is it a good use of resources to have an elementary school in a former middle school with a turf field, track, and lighting? Also, what realistically is the timeline to expand 11 elementary schools in North DeKalb? There is no way DCSD has the money or can logistically expand 11 schools to accommodate the elementary schools proposed to be closed. Without a timeline, this list creates unnecessary hysteria.	2/11/2026 11:19 PM
2864	Show how Ashford Park can remain in Chamblee Cluster without being broken up. This can occur if Nancy Creek serves Montgomery/Huntley Hills 4-5th, and if John R Lewis boundaries are redrawn to primarily serve the closed Ashford Park ES. Most of the students currently zoned for JRL are closed to Woodward, Montclair, or Dresden; your problematic boundaries already break-up those neighborhoods. You can now solve it.	2/11/2026 10:43 PM
2865	if the district was smaller, the great man choices would make more sense for once in DeKalb. Let's be more uniform.	2/11/2026 10:08 PM
2866	We need more information about boundaries and programs.	2/11/2026 9:41 PM
2867	Focus on an 80 percent solution.	2/11/2026 9:39 PM
2868	I think the boundaries for Dunwoody given the three large elementary structure should closely mirror the voting districts to ensure equitable distribution of demographics and income levels across the three schools.	2/11/2026 9:29 PM
2869	Interested to see how programs may change the scope of the initial facility scenario. For instance, if DAA / DSA ends up with a full sized arts school, more seats may become available which may decrease attendance at neighborhood schools even more.	2/11/2026 8:25 PM
2870	Please consider making sure to have counselors, advisors, and security available when these changes happen in some of these areas. School rivalry's are real and this can really work if we use them as teachable moments.	2/11/2026 8:23 PM
2871	More explanation should be given on the schools that are supposed to be converted. People need to know that the converted schools will be retrofitted and renovated as well.	2/11/2026 8:17 PM
2872	I would say that we need to consider the configuration of some of the middle school when converting them to elementary school. Schools with a lot stairs might be difficult for little students to navigate. Also schools like Oakcliff Elementary School do not have an elevator; therefore, students with disabilities can easily move throughout the building. All of these things must be considered.	2/11/2026 8:16 PM
2873	N/A	2/11/2026 8:15 PM
2874	More map layers. I would love to see an interactive map with layers that can be toggled on and off. Layers could include current attendance zones, which are staying open, closed, expanded, board districts, population numbers.	2/11/2026 8:13 PM
2875	I am all for reallocating funding from empty seats towards program expansion and facility improvements. I also want to be sure that just because a school is not on the no change in use list that it still has facility needs addressed. I would also like to see facility and program dollars are used as a carrot to incentivize families who may be redistricted from a high performing cluster into a lower performing cluster.	2/11/2026 8:05 PM
2876	Be mindful of the north county- south county divide and perceptions. Especially as it relates to programs when those scenarios are considered. Also consider ELL support and continuity for Latino students when making decisions for clusters with high percentage of Latino students.	2/11/2026 8:05 PM
2877	This is very difficult to envision without talking about boundaries.	2/11/2026 8:04 PM
2878	I am in favor of dekalb utilizing funds to best suit the needs of students and if closing schools so that we can allocate funds back into the classroom is what will take place, then I'm all for it.	2/11/2026 8:03 PM

2879	N/A	2/11/2026 7:58 PM
2880	I think the next round of scenarios needs a bit more written THEMES of reasons why a group of schools is being proposed to close and why others are being expanded... to in any way sell this and not get an overeaction from parents which wastes a lot of time. It also feels like some of the data is wrong, which is concerning.. e.g. the data shows John Lewis has ~200 open seats, but a parent here said they're over-capacity.. so which is it?	2/11/2026 7:50 PM
2881	For the purpose of relocation within the District, it would make transitions easier on families and scholars who are moving into a different cluster within the District.	2/11/2026 7:34 PM
2882	I am in support of any program that benefits the community	2/11/2026 7:28 PM
