Executive Summary

StanCorp Investment Advisers has been retained by the Responsible Plan Fiduciary as an ERISA Section 3(38) Discretionary Fiduciary Investment Manager. As a Discretionary Fiduciary Investment Manager, we will select, remove, replace, and monitor all Designated Investment Alternatives unless a specific investment is contractually excluded. The Named Fiduciary will be responsible for monitoring our activity. Investment decisions will be based on the standards and criteria established in the Plan's Investment Policy Statement ("IPS"). What follows are the funds we have placed on Watch and/or have determined to Remove from the menu.

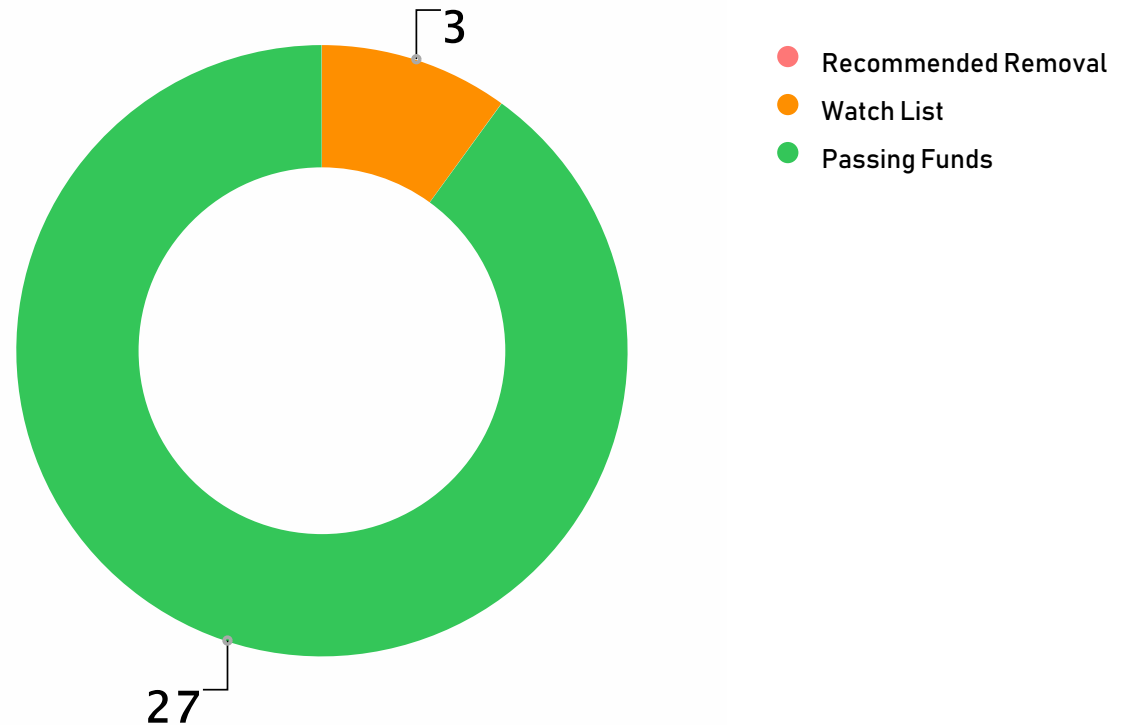

Status of Funds

Recommended for Removal

There are no funds recommended for removal this quarter.

- Thrivent Mid Cap Stock S

Broad Markets

The U.S. federal government shut down ended on Nov. 12, 2025, which made it the longest one in U.S. history at 43 days. While many households were impacted in the short run due to a delay in paychecks, the long-term impacts of the shutdown appear to be minor. Equity markets do not appear to have been impacted, nor do there appear to have been any impact on either interest rates or inflation.

Last year was very good for equity markets throughout the world. Artificial Intelligence continued to be the dominant force for growth, particularly in the U.S., which has seen massive capital investment in computing infrastructure, data centers, and software development. This surge was fueled by businesses racing to build AI capabilities, supported by strong demand for advanced chips and cloud infrastructure. Consumer spending and exports also played an important role in the second half of the year.

Domestic Equity

According to the Bureau of Economic Analysis, U.S. GDP grew at an annualized rate of 4.3% during the third quarter, following an increase of 3.8% in the second. The growth was primarily attributed to faster consumer spending, an upturn in exports and higher government spending. This was partly offset by a decrease in business investment. Corporate profits were also strong, rising \$166.1 billion during the period as compared to the quarter before.

This economic momentum continued through the fourth quarter. As of this writing, the Federal Reserve Bank of Atlanta predicts 5.4% growth for the period. However, the recent government shutdown has impacted data gathering, so there could be some later revisions as the data gaps are filled.

International Equity

The IMF's October 2025 World Economic Outlook described a world economy "in flux," with near-term prospects limited relative to the strong growth experienced in the two decades preceding the pandemic. It projects global GDP growth of 2.9% in both 2025 and 2026, highlighting tariff-related headwinds, weaker confidence, and tighter financial conditions.

Trade has swung from a strong first half of 2025, supported by front-loading in anticipation of tariffs, to a weaker second half as policy uncertainty persisted. In October, the World Trade Organization (WTO) raised its 2025 trade volume growth to 2.4% but warned 2026 might slow sharply as the full-year tariff impact comes into effect.

Once a growth engine for the world economy, China is now facing deflationary pressures and a slowdown in consumer confidence. Ongoing problems in the real estate sector and an aging population are contributing to economic uncertainty. In its December 2025 China Economic Update, the World Bank estimates GDP growth of 4.9% during 2025 and 4.4% during 2026.

	Current Quarter	One Year	Three Year	Five Year	Ten Year

Fixed Income

Inflation may be moderating, as the Bureau of Labor Statistics reported that the Consumer Price Index rose 2.7% year over year in November 2025, with core CPI up only 2.6% for the prior twelve months. However, we remain above the Federal Reserve's 2% inflation target. The labor market continued to show signs of softening this past quarter. The unemployment rate was 4.5% in December. The pace of job creation has dropped noticeably in the second half of the year, as only 50,000 new jobs were added in December. A total of 584,000 jobs were created for the full year, which represents the weakest year for job growth since 2003.

The Federal Reserve has a dual mandate: maintaining price stability and achieving maximum employment. In its December meeting, the Fed cut the federal funds target range by 25 basis points to 3.50% to 3.75%, believing employment risks to be more pressing than inflation risks at this time. This was the third cut of 2025. The vote was 9 to 3, with two members preferring no change and one preferring a 50bp cut. This represents an unusually high level of dissent from the Fed that underscores internal uncertainty.

	Current Quarter	One Year	Three Year	Five Year	Ten Year

How to use this Report with Graphics

Investment Policy Monitoring Criteria

- Perform in the top one-half of its respective category on either a three- or five-year basis.
- Have a minimum of \$35 Million or more in total assets.
- Have an expense ratio that is 125% or less of the category average.
- Have the same portfolio manager or a member of the same management team in place for at least the previous three years.
- Maintain investment style.
- Index funds are excluded from the monitoring criteria.

Graphics Key

	Denotes criterion passes minimum standards period.
	Denotes criterion failing minimum standards period.
Watch	Investment fails one or more criteria.
Remove	Investment is recommended for removal.
Exception	Investment has been reviewed, see Recommendations and Monitoring Decisions for details.

Recommendations and Monitoring Decisions

MFS Mid Cap Value R6	Ticker/ID: MVCKX	Peer Group: Mid-Cap Value
<p>MFS Mid Cap Value was added to the Watch List at the end of Q3 2025 due to performance. In 2022, returns were hampered by stock selection in financials, health care and basic materials. For 2025, security selection in utilities and industrials were the largest contributors to underperformance. We will continue to monitor the strategy.</p>		
Thrivent Mid Cap Stock S	Ticker/ID: TMSIX	Peer Group: Mid-Cap Blend
<p>Thrivent Mid Cap Stock was added to the Watch List at the end of Q2 2025 due to performance. In 2022, returns were hampered by stock selection in communication services, technology and consumer cyclical. For 2023, health care, communication services and technology stock selection hurt returns. For 2024, stock selection was negative in seven sectors with health care leading the way. During 2025, security selection in consumer cyclical, technology and healthcare sectors were the largest contributors to underperformance. We will continue to monitor the strategy.</p>		
Hartford International Opportunities R6	Ticker/ID: IHOVX	Peer Group: Foreign Large Blend
<p>Hartford International Opportunities was added to the Watch List at the end of Q2 2025 due to performance. From 2021-23, security selection and allocation in Asia emerging markets was the primary contributor to underperformance. This was especially true for strategies in the category that expressly invest outside of developed markets, unlike most of the strategies in the category which limit their portfolios to mainly developed countries. In 2022, Co-portfolio manager Tara Connolly Stilwell assumed leadership of the team and strategy at year-end 2023 in preparation for the retirement of lead portfolio manager, Nicolas Choumenkovitch, which occurred in June 2024. For 2025, while security selection in technology and communication services was positive, financial services and consumer cyclicals selection detracted. Regionally, overall allocation and security selection was positive, but dampened by an overweight to and selection in Asia-emerging. We will continue to monitor the strategy.</p>

Putnam Large Cap Value Y (PEIYX)

Fund Objective

The investment seeks capital growth and current income. The fund invests mainly in common stocks of U.S. companies, with a focus on value stocks that offer the potential for capital growth, current income, or both. Value stocks are issued by companies that the adviser believes are currently undervalued by the market. The adviser may consider, among other factors, a company's valuation, financial strength, growth potential, competitive position in its industry, projected future earnings, cash flows and dividends when deciding whether to buy or sell investments.

Vanguard Value Index Adm (VVIAX)

Fund Objective

The investment seeks to track the performance of the CRSP US Large Cap Value Index that measures the investment return of large-capitalization value stocks. The manager employs an indexing investment approach designed to track the performance of the index, a broadly diversified index predominantly made up of value stocks of large U.S. companies. The manager attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

JPMorgan US Equity R6 (JUEMX)

Fund Objective

The investment seeks to provide high total return from a portfolio of selected equity securities. Under normal circumstances, the fund invests at least 80% of its assets in equity securities of U.S. companies. "Assets" means net assets, plus the amount of borrowings for investment purposes. In implementing its strategy, the fund primarily invests in common stocks of large- and medium-capitalization U.S. companies but it may also invest up to 20% of its assets in common stocks of foreign companies, including depository receipts.

Vanguard 500 Index Admiral (VFIAX)

Fund Objective

The investment seeks to track the performance of the Standard & Poor's 500 Index that measures the investment return of large-capitalization stocks. The fund employs an indexing investment approach designed to track the performance of the Standard & Poor's 500 Index, a widely recognized benchmark of U.S. stock market performance that is dominated by the stocks of large U.S. companies. The advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index. The fund is non-diversified.

Harbor Capital Appreciation Retirement (HNACX)

Fund Objective

The investment seeks long-term growth of capital. The fund invests primarily in equity securities, principally common and preferred stocks, of U.S. companies with market capitalizations of at least \$1 billion at the time of purchase and that the Subadvisor considers to have above average prospects for growth. The stocks of mid and large cap companies in the fund's portfolio are those the Subadvisor expects to maintain or achieve above average earnings growth. The fund may invest up to 20% of its total assets in the securities of foreign issuers, including issuers located or doing business in emerging markets.

MFS Growth R6 (MFEKX)

Fund Objective

The investment seeks capital appreciation. The fund normally invests the fund's assets primarily in equity securities. Equity securities include common stocks and other securities that represent an ownership interest (or right to acquire an ownership interest) in a company or other issuer. The adviser focuses on investing the fund's assets in the stocks of companies the advisor believes to have above average earnings growth potential compared to other companies (growth companies). The fund is non-diversified.

Vanguard Growth Index Admiral (VIGAX)

Fund Objective

The investment seeks to track the performance of the CRSP US Large Cap Growth Index that measures the investment return of large-capitalization growth stocks. The fund employs an indexing investment approach designed to track the performance of the index, a broadly diversified index predominantly made up of growth stocks of large U.S. companies. The advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

MFS Mid Cap Value R6 (MVCKX)

Watch

Fund Objective

The investment seeks capital appreciation. The fund normally invests at least 80% of the fund's net assets in issuers with medium market capitalizations. The adviser generally defines medium market capitalization issuers as issuers with market capitalizations similar to those of issuers included in the Russell Midcap® Value Index over the last 13 months at the time of purchase. It normally invests the fund's assets primarily in equity securities.

Vanguard Mid Cap Index Admiral (VIMAX)

Fund Objective

The investment seeks to track the performance of the CRSP US Mid Cap Index that measures the investment return of mid-capitalization stocks. The fund employs an indexing investment approach designed to track the performance of the CRSP US Mid Cap Index, a broadly diversified index of stocks of mid-size U.S. companies. The advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

Neuberger Mid Cap Growth R6 (NRMGX)

Fund Objective

The investment seeks growth of capital. The fund normally invests at least 80% of its net assets in common stocks of mid-capitalization companies, which it defines as those with a market capitalization within the market capitalization range of the Russell Midcap® Index at the time of purchase. It seeks to reduce risk by diversifying among many companies, sectors and industries.

DFA US Targeted Value I (DFFVX)

Fund Objective

The investment seeks long-term capital appreciation. The fund purchases a broad and diverse group of the readily marketable securities of U.S. small and mid cap companies that the advisor determines to be value stocks with higher profitability. It may purchase or sell futures contracts and options on futures contracts for U.S. equity securities and indices, to increase or decrease equity market exposure based on actual or expected cash inflows to or outflows from the fund.

DFA US Small Cap I (DFSTX)

Fund Objective

The investment seeks long-term capital appreciation. The fund, using a market capitalization weighted approach, purchases a broad and diverse group of readily marketable securities of U.S. small cap companies. A company's market capitalization is the number of its shares outstanding times its price per share. Under a market capitalization weighted approach, companies with higher market capitalizations generally represent a larger proportion of the fund than companies with relatively lower market capitalizations.

Vanguard Small Cap Index Admiral Shares (VSMAX)

Fund Objective

The investment seeks to track the performance of the CRSP US Small Cap Index that measures the investment return of small-capitalization stocks. The fund advisor employs an indexing investment approach designed to track the performance of the CRSP US Small Cap Index, a broadly diversified index of stocks of small U.S. companies. The advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

Hood River Small-Cap Growth Retirement (HRSIX)

Fund Objective

The investment seeks long-term growth of capital. The fund, under normal market conditions, invests at least 80% of its net assets plus any borrowings for investment purposes in common stocks of U.S. corporations that are judged by Hood River to have strong growth characteristics or to be undervalued in the marketplace relative to underlying profitability and have a market capitalization which, at the time of purchase, is consistent with the capitalization ranges of the S&P SmallCap 600® Index and the Russell 2000® Growth Index ("small-cap companies").

American Funds EUPAC R6 (REGX)

Fund Objective

The investment seeks long-term growth of capital. The fund invests primarily in common stocks in Europe and the Pacific Basin that the investment adviser believes have the potential for growth. Growth stocks are stocks that the investment adviser believes have the potential for above-average capital appreciation. It normally will invest at least 80% of its net assets in securities of issuers in Europe and the Pacific Basin. The fund may invest a portion of its assets in common stocks and other securities of companies in emerging markets.

MFS International Growth R6 (MGRDX)

Fund Objective

The investment seeks capital appreciation. The fund normally invests its assets primarily in foreign equity securities, including emerging market equity securities. Equity securities include common stocks and other securities that represent an ownership interest (or right to acquire an ownership interest) in a company or other issuer. The advisor focuses on investing the fund's assets in the stocks of companies the advisor believes to have above average earnings growth potential compared to other companies (growth companies).

Vanguard Short-Term Federal Adm (VSGDX)

Fund Objective

The investment seeks current income while maintaining limited price volatility. Under normal circumstances, the fund will invest at least 80% of its assets in bonds issued or guaranteed by the U.S. government and its agencies and instrumentalities, many of which are not backed by the full faith and credit of the U.S. government. The majority of these investments will have a dollar-weighted average maturity of 1 to 4 years. The fund may invest in derivatives instruments, such as options, futures contracts, and other swap agreements.

Vanguard Total Bond Market Index Adm (VBTLX)

Fund Objective

The investment seeks to track the performance of the Bloomberg U.S. Aggregate Float Adjusted Index. This index measures the performance of a wide spectrum of public, investment-grade, taxable, fixed income securities in the United States-including government, corporate, and international dollar-denominated bonds, as well as mortgage-backed and asset-backed securities-all with maturities of more than 1 year. All of the fund's investments will be selected through the sampling process, and at least 80% of its assets will be invested in bonds held in the index.

Dodge & Cox Income X (DOXIX)

Fund Objective

The investment seeks a high and stable rate of current income, consistent with long-term preservation of capital; a secondary objective is capital appreciation. The fund invests in a diversified portfolio of bonds and other debt securities. The fund will invest at least 80% of its total assets in (1) investment-grade debt securities and (2) cash equivalents. "Investment grade" means securities rated Baa3 or higher by Moody's Investors Service, or BBB- or higher by Standard & Poor's Ratings Group or Fitch Ratings, or equivalently rated by any nationally recognized statistical rating organization, or, if unrated, deemed to be of similar quality by Dodge & Cox.

Vanguard Federal Money Market Investor (VMFXX)

Fund Objective

The investment seeks to provide current income while maintaining liquidity and a stable share price of \$1. The fund invests primarily in high-quality, short-term money market instruments. Under normal circumstances, at least 80% of the fund's assets are invested in securities issued by the U.S. government and its agencies and instrumentalities. The adviser maintains a dollar-weighted average maturity of 60 days or less and a dollar-weighted average life of 120 days or less. The fund generally invests 100% of its assets in U.S. government securities and therefore will satisfy the 99.5% requirement for designation as a government money market fund.

Vanguard Balanced Index Adm (VBIAX)

Fund Objective

The investment seeks to track the performance of a benchmark index that measures the investment return of the overall U.S. stock market with 60% of its assets; the fund seeks to track the performance of a broad, market-weighted bond index with 40% of its assets. The fund employs an indexing investment approach designed to track the performance of two benchmark indexes. With approximately 60% of its assets, the fund seeks to track the investment performance of the CRSP US Total Market Index. With approximately 40% of its assets, the fund seeks to track the investment performance of the Bloomberg U.S. Aggregate Float Adjusted Index.

Performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. To obtain current month-end performance information, please contact your plan advisor.

DISCLOSURES

FOR PLAN SPONSOR USE ONLY

Any recommendations in this report are made with respect only to funds for which StanCorp Investment Advisers, Inc., acts as an ERISA section 3(21) or 3(38) investment advisory fiduciary.

Information for funds for which StanCorp Investment Advisers is not acting as an investment advisory fiduciary is included in this Quarterly Monitoring Report as a courtesy, and its inclusion does not constitute investment advice by StanCorp Investment Advisers or its affiliates. StanCorp Investment Advisers is not responsible for making any recommendations with respect to the inclusion or removal of any investment option that it subadvises or is issued by an affiliate.

Actual results may differ from the performance shown herein. Average annual total return figures include changes in principal value, reinvested dividends, and capital gain distributions. Returns for periods less than one year are not annualized. For funds less than one year old, the Since Inception return figure is not annualized and represents an aggregate total return. Returns presented are net of underlying fund expenses and gross of any recordkeeping or administrative fees charged by Standard Retirement Services which generally include any fees, as applicable, for investment advisory services provided by StanCorp Investment Advisers. These fees would reduce returns.

Overall ratings are provided for the specific share class shown. Different share classes may have different ratings. Morningstar rankings represent a fund's total return rank relative to all funds that have the same category. The percentile ranking is based on the fund's total return percentile rank relative to all funds that have the same category for the same time period. The highest (most favorable) percentile rank is 1% and the lowest (least favorable) percentile rank is 100%. Morningstar rankings do not include the effect of sales charges.

Past performance does not guarantee future results. The value of an investment will vary so that an investor's shares, when redeemed, may be worth less than their original value. Fees and expenses will decrease investment returns so investors should take them into consideration prior to investing. Gross expense ratios represent the Total Annual Operating Expenses for the fund and do not reflect any fee waivers or reimbursements that may be in effect at the time the expenses are calculated. The net expense ratio reflects the expenses being charged by the fund at the time the expenses are calculated after taking into account any applicable waivers.

Asset allocation and diversification do not ensure a profit or protect against loss in declining financial markets.

Adjusted indicates an adjustment in the reported performance or expense figures of the underlying fund by the amount of revenue sharing returned to plan assets. Category Ranks and Averages do not apply to adjusted data.

Unadjusted refers to the performance or expense figures reported by Morningstar.

Hyphens appear in data columns to indicate that data is not available.

CUSIP, Net Expense Ratio and Turnover Ratio for Group Annuity investments pertain to the associated underlying mutual funds.

Some investments require a delayed import and will be available approximately 45 days after month end. Therefore, some of the data may be empty or outdated until it is available. Peer groups are comprised of all of the funds that match an investment's category as classified by Morningstar. Morningstar Category identifies funds based on their actual investment styles as measured by their underlying portfolio holdings over a three-year period.

Based on Morningstar data, the system calculates data points on: Product History; peer group rankings for Calendar Year, Standard Deviation, Alpha, Treynor Ratio, Sharpe Ratio, and Expense Ratio; and all peer group rankings for money market funds.

Morningstar reports Manager Tenure at the fund portfolio level, while Product History is listed for the fund share class. As a result, more recent share classes may have much longer manager tenures than the reported Product History.

Net Assets reported in this report may be current as of the end of the month prior to the end of the quarter or the end of the last month of the quarter, depending on when net asset data was made available to Morningstar.

Alpha, Beta and R-squared statistics are calculated using the best-fit index as determined by Morningstar.

Morningstar groups mutual funds and exchange traded funds into different fund universes, although the same category types are used in both universes. Rankings are done within the separate universes, so that mutual funds are ranked with other mutual funds within the same category, and exchange traded funds are ranked with other exchange traded funds within the same category. As a result, a mutual fund and an exchange traded fund that share the same category are ranked relative to different peer groups.

and (3) is not warranted to be accurate, complete, or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results.

Funds that focus on certain sectors may involve a greater degree of risk than broadly diversified funds. In addition to the risks associated with equity investing, investments in small and mid-cap companies and narrowly focused investments typically exhibit higher volatility and are less readily marketable than investments in larger companies or more diversified strategies. Similarly, international investing involves certain risks, such as currency fluctuations, economic instability, and political developments. These risks may be accentuated in emerging markets. Real estate investment funds are subject to special risks, such as tax law changes, and general economic conditions that may affect the value of the underlying real estate assets. Funds that invest in bonds are subject to certain risks including interest-rate risk, credit risk and inflation risk. Derivatives are subject to a number of risks, such as liquidity, interest rate, market, credit and management risk. A fund investing in a derivative instrument could lose more than the principal amount invested. The principal value and investment returns of mutual funds, money market funds and stocks are neither guaranteed nor insured by the U.S. Government. Indices are unmanaged, do not incur fees and cannot be invested in directly by an individual.

Employers and plan participants should carefully consider the investment objectives, risks, charges and expenses of the investment options offered under the retirement plan before investing. The prospectuses for the individual mutual funds contain this and other important information. Please read the prospectus carefully before investing. Investments are subject to market risk and fluctuate in value.

Standard Stable Asset Fund is a group annuity product issued by Standard Insurance Company. Amounts contributed and the fulfillment of any guarantees specified in the group annuity contract are insurance claims supported by the full faith and credit of Standard Insurance Company. Standard Stable Asset Fund is neither a mutual fund nor a bank product and is not insured by the FDIC or any other federal governmental agency. Standard Insurance Company provides and periodically resets a guaranteed crediting rate for Standard Stable Asset Fund. However, plan sponsors may instruct Standard Insurance Company to reduce the crediting rate in order for Standard Retirement Services to reduce certain administrative fees for plan-related services. Your plan's crediting rate may be lower than the guaranteed crediting rate once the reduction has been applied. Past interest rates are not indicative of future rates. Standard Stable Asset Fund may not be available in all states.

Information on Standard Stable Asset Fund may be obtained by contacting your Standard Insurance Company representative.

If the plan sponsor selects The Standard Stable Asset fund as the cash equivalent investment option for the plan and instructs Standard Insurance Company to reduce the crediting rate as described above, the Annualized Returns for the fund as shown in this report is net of that reduction. Current regulations do not permit StanCorp Investment Advisers to recommend the Standard Stable Asset Fund to plan sponsors and plan

participants. Once a plan sponsor, or its designed fiduciary (other than StanCorp Investment Advisers or its affiliates), selects the Standard Stable Asset Fund, allocations to the fund are in accordance with the allocation percentage for the cash equivalent sleeve in the models.

Please refer to StanCorp Investment Advisers' Form ADV disclosure brochure for additional details. StanCorp Investment Advisers creates general asset allocation models for use when providing investment advisory services. The allocation percentages to the asset classes in each model are set and updated, as necessary, based on certain assumptions made about market conditions, the rate of return for each asset class, average internal fees and expenses of an investment option, etc. No specific investment option was considered when setting the allocation percentage of each asset class. Therefore, the allocation percentage for the cash/cash equivalent sleeve of each asset allocation model does not take into account any specific investment option selected or whether the plan sponsor has instructed the issuer to reduce any crediting rate. Consequently, investment results may vary among investors using the same asset allocation model and the same investment options.

The Standard is the marketing name for StanCorp Financial Group, Inc., and its subsidiaries. Standard Insurance Company provides insurance services and issues a group annuity contract for retirement plans. Standard Retirement Services, Inc., provides financial recordkeeping and plan administrative services. Investment advisory services are provided by StanCorp Investment Advisers, Inc., a registered investment adviser.
