RFP 26/29 High School Gymnasium Scoreboard Replacements

The District solicited proposals for the replacement and installation of a gymnasium video scoreboard system at Battle High School. This RFP was structured as a multi-year project, with Hickman and Rock Bridge high schools in subsequent phases. Four vendor responses were received and evaluated based on equipment, warranty and support, pricing, and prior experience with other districts. Interviews were then conducted with the three vendors meeting the specifications of the RFP.

Following the interviews, the evaluation team determined that Daktronics is the best provider for the requested equipment, based on its established experience with the District, proprietary equipment and software, and subscription costs. Due to the multi-site discount offered, we recommend proceeding with the replacement of video and fixed digit scoreboards at all three high school gymnasiums: Battle High School ($141,350), Rock Bridge High School ($138,722), and Hickman High School ($138,722).
