

CE&S Nurse Updates

SPRING 2026

NOTE FROM THE GATOR CLINIC

Spring weather often brings mud and puddles, and students may occasionally soil their clothing during recess. To minimize time away from the classroom and avoid the need for parents or guardians to bring replacement clothing to school, it is recommended that students keep a spare set of clothes in their backpack.

Nurse Thomas

SPRING FLOWERS BRING ASTHMATICS TO THE CLINIC

Ensure your child takes their allergy and asthma medications as prescribed to reduce asthma attacks and reliance on rescue medication at school. Students always have access to their rescue medication, so make sure it's available along with an Asthma Action Plan on file.

RISING KINDERGARDENERS

Now is the time to schedule school physicals and Kindergarten vaccines.

- Physicals dated prior to August 24, 2025 will not be accepted.
- Ensure page 1 of the physical is completely filled out and signed by a parent/guardian.
- The updated immunization record must also be signed by the healthcare provider.
- Please be on the lookout for a packet outlining the requirements for your rising kindergartener.

Students cannot be enrolled without completed forms and proof of required immunizations.

Asthma Management for School

Does your child have asthma?

Yes

Do you have an Asthma Action Plan and Rescue Medication on file with the Nurse?

No

Ask your doctor for a plan and rescue inhaler to have for school

A parent/guardian is required to bring the medication and doctor order/action plan in person. **DO NOT** send medication with your student. .
