FOR IMMEDIATE RELEASE

Forsyth County Schools Approves Partnership to Enhance School Bus Transportation

CUMMING, Ga. — At its March 17, 2026 meeting, the Forsyth County Schools Board of Education approved an agreement with BusRight, Inc. to enhance the district's school bus transportation system. This agreement establishes a partnership between Forsyth County Schools and BusRight, Inc. to enhance the district's ability to provide safe, reliable, and timely transportation for students and families.

"This is a step in the right direction for our schools," said Superintendent Mitch Young. "It strengthens safety for our students and staff, while also improving efficiency in how we operate our transportation system. When we can do both, we are being responsible with taxpayer dollars and making smart investments that support our entire community."

Forsyth County Schools operates more than 400 buses each day, serving over 33,000 students and families. This investment is informed in part by feedback from Local School Councils and Parent Advisory groups, helping ensure transportation services continue to meet the needs of our community.

As part of the agreement, BusRight tablets will be installed on school buses. Similar to the integrated screen technology found in modern vehicles, these tablets are designed to support drivers with real-time information in a secure, digital environment.

Key features include:

- Improved routing tools to help optimize bus routes and bus stop locations, supporting safer and more efficient transportation
- Turn-by-turn navigation for all bus routes and stops
- Enhanced communication tools that provide drivers and district staff with important student and route information, including relevant student needs, through the district's student information system
- Real-time tracking of bus routes, including arrival times at stops and schools
- A parent communication app that allows families to view live estimated arrival times for their child's bus

Forsyth County Schools will begin installing BusRight tablets on select buses this spring and summer as part of a phased implementation plan. The district's goal is to have the system fully operational across all school buses by the end of the 2026–27 school year.

Additional information will be shared with families in the coming months as implementation begins.

###

Forsyth County Schools is a premier school district in metro Atlanta, serving 55,300+ students representing 129 countries and 69 languages. FCS envisions a safe, connected, and thriving community for all and is dedicated to providing an unparalleled education for all to succeed.
