

RFP Q&A SUMMARY

Community-Based Organizations

Prepared: March 2026

1. FS-10 Documentation

Q: The FS-10 form was not included in the original RFP materials. Where can applicants find it?

The district added the FS-10 and FS-10F to the RFP website on March 5, 2026. Applicants should download these forms directly from the district website.

2. FS-10F Submission Requirements

Q: Since the FS-10F is typically submitted at the end of the program year, which version should be included with the RFP submission?

- Include the 2024–2025 FS-10F with your RFP submission.
- The 2025–2026 FS-10F will be submitted separately at the end of the 2025–2026 school year.

3. BEDS Day Payment Language

Q: Page 22 references prorated payments to CBOs based on BEDS Day enrollment. Is this language accurate?

The district has acknowledged that this section may need revision. Applicants should note that the payment structure language is under review.

Please confirm final payment terms with the district prior to contract execution.

4. Contract Language and Legal Review

Q: Some contract provisions appear carried over from a prior year. A participant offered an alternative contract template previously approved by legal counsel. Would the district consider it?

The School District is willing to consider the proposed revisions to the contract.

The changes are being evaluated by the School District's legal counsel.

Revised contracts will be submitted by the district after the interview process is complete.

5. District Funding Beyond State Allocation

Q: The RFP states that the district does not provide funding beyond state allocation. Is there any opportunity for the district to supplement state funding through district budget resources, as some districts do?

The compensation for the 2026-27 universal pre-k program will be set at the available reimbursement rates. Information about the reimbursement rates is included in the RFP. The final reimbursement rates will be conveyed to providers as soon as they become available. We are waiting for the governor's proposed budget to be enacted. The deadline is April 1st, however in years past it has gone beyond that date.

6. Screening Section in the RFP

Q: What information is expected in the screening section of the RFP? Is the intent to ensure appropriate supports are provided to families during enrollment?

Screening will NOT occur prior to enrollment. Students enroll through the district first and are then assigned to CBOs.

CBOs may conduct screening only after receiving student information from the district.

At that point, providers may identify needs, perform any necessary screenings, and connect families with appropriate resources and support.
