

Will there be a tax increase because of the MAC Project?

- No, any tax increases made will not be in connection to this project. This project is being funded separately through a previous bond issue, athletics revenue, and fundraising.

Why is it \$20 million?

- This is a comprehensive project that overhauls more than just *Gus Anderson Field*. It includes the student walkway, practice field, and multiple large ticket items. That includes ADA-compliant bleachers and press box, bathrooms for visitors, a band amphitheater, adding two additional lanes for the track, and a new student walkway from MIHS to McDowell.

Are the Football Boosters giving \$10 million?

- No. There is a fundraising committee that is serving as an arm of the Football Boosters. The boosters are allowing a fundraising committee to appropriately funnel donations to the project through their 501(c)(3). However, all MTSD sports and activity groups are combining efforts to help with fundraising.

What happens if the fundraising goal isn't met?

- The project will be scaled back to the amount that has been raised.
