

2026-2029 Academic Plan

Theme 1: Establish Bilingual Standards from Preschool to 8th Grade, Aligned with French and American Requirements

Students will flourish as plurilingual learners in an academically rigorous and supportive environment.

1. Foster mastery of oral and written language to support learning across all disciplines.
 2. Promote a plurilingual mindset by ensuring continuity and integration of teaching in both French and English, and the incorporation of Spanish in upper levels.
 3. Strengthen students' mathematical understanding through meaningful and engaging instructional practices.
 4. Encourage inquiry-based and concept-based approaches to learning across all subject areas.
-

Theme 2: Empower the Teaching Team with Best Practices that Prioritize Student Wellbeing and Engagement

Students will be active, self-motivated, and responsible participants in their personalized learning journeys.

1. Nurture creativity and innovation by integrating cross-disciplinary skills from areas such as science, technology, engineering, the arts/culture, and mathematics.
 2. Implement an interdisciplinary, project-based teaching approach that emphasizes collaboration and inclusivity.
 3. Support individualized learning pathways for students with diverse linguistic backgrounds.
 4. Ensure each student's success through continuous assessment and the setting of clearly defined goals in a personalized learning plan.
-

Theme 3: Cultivate a Sense of Global Citizenship

Students will grow as responsible global citizens, guided by ethical values, civic engagement, and environmental stewardship.

1. Foster empathy, kindness, and a sense of belonging within an inclusive and equitable school environment, guided by principles of respect and appreciation of diverse cultures and perspectives.
2. Uphold an ethical mindset and cultivate a deeper level of thinking when approaching the use of technological innovations.
3. Develop each student's identity as a global citizen with the competencies needed to actively and positively contribute to society.
4. Encourage sustainable practices and promote environmental responsibility at both local and global levels.
