Here we are: american dreams, american nightmares	Shahani, Aarti Nandev	2019	Memoir	Who really belongs in America? That question has chased every newcomer and many native born since the founding of the republic. In this heart-wrenching, vulnerable and witty memoir, journalist Aarti Shahani digs deep inside herself and her family for an answer--one that she finds in an unlikely place. The Shahanis came to Queens--from India, by way of Casablanca--in the 1980s. They were undocumented for a few years and then, with the arrival of their green cards, they thought they'd made it. This memoir is the story of how they did, and didn't. Here We Are: American Dreams, American Nightmares follows the lives of Aarti, the precocious scholarship kid at one of Manhattan's most elite prep schools, and her dad, the shopkeeper who mistakenly sells watches and calculators to the notorious Cali drug cartel. Together, the two represent the extremes that coexist in our country, even within a single family, and a truth about immigrants that gets lost in the headlines. It isn't a matter of good or evil; it's complicated. Ultimately, Here We Are is a coming-of-age story, a love letter from an outspoken modern daughter to her soft-spoken Old World father. She never expected they'd become best friends"	Immigrants -- United States -- Biography. Autobiographies. From a Whisper to a Rallying Cry: The Killing of Vincent Chi and the Trial That Galvanized the Asian American Movement	Yoo, Paula	2021	Informational	A groundbreaking portrait of Vincent Chin and the murder case that took America's Asian American community to the streets in protest of injustice. America in 1982. Japanese car companies are on the rise and believed to be putting American autoworkers out of their jobs. Anti-Asian American sentiments simmer, especially in Detroit. A bar fight turns fatal, leaving Vincent Chin--a Chinese American man--beaten to death at the hands of two white men, autoworker Ronald Ebens and his stepson Michael Nitz. Separate No More: The Long Road to Brown v. Board of Education	Goldstone, Lawrence	2021	Informational	Since 1965, in the landmark outcome of Plessy v. Ferguson, the doctrine of "separate but equal" had been considered acceptable under the United States Constitution. African American and white populations were thus segregated, attending different schools, living in different neighborhoods, and even drinking from different water fountains--so long as the separated facilities were deemed of comparable quality. However, as African Americans found themselves lacking opportunity, barred from the educational, legal, and personal resources readily available to white people, and living under the constant menace of lawless mob violence, it was becoming increasingly apparent that segregation was not only unjust, but dangerous. Fighting to turn the tide against racial oppression, revolutionaries rose up all over America, from Booker T. Washington to W. E. B. Du Bois. They formed coalitions of some of the greatest legal minds and activists, who carefully strategized how to combat the race judicial system, picking and choosing which cases to take on and how to tackle them. These activists would not always win, in some instances suffering great setbacks, but, over resilient, they continued to push forward. These efforts would be rewarded in the groundbreaking cases of 1952-1954 known collectively as Brown v. Board of Education of Topeka, in which the U. S. Supreme Court would decide, once and for all, the legality of segregation--and on which side of history the United States would stand. In this thrilling examination of the path to Brown v. Board of Education , Constitutional law scholar Lawrence Goldstone highlights the key trials and players in the fight for integration. Written with a deft hand, this story of social justice will remind readers <i>separate and still of the misnomer of the connection between</i>	Brown, Oliver, 1918-196. Topeka (Kan.). Stolen Justice: The Struggle for African American Voting Rights	Goldstone, Lawrence	2020	Informational	"Following the Civil War, the Reconstruction era raised a new question to those in power in the US: Should African Americans, so many of them former slaves, be granted the right to vote? In a bitter partisan fight over the legislature and Constitution, the answer eventually became yes, though only after two constitutional amendments, two Reconstruction Acts, two Civil Rights Acts, three Enforcement Acts, the impeachment of a president, and an army of occupation. Yet, even that was not enough to ensure that African American voices would be heard, or their lives protected. White supremacists loudly and intentionally prevented black Americans from voting—and they were willing to kill to do so. In this vivid portrait of the systematic suppression of the African American vote, critically acclaimed author Lawrence Goldstone traces the injustices of the post-Reconstruction era through the eyes of incredible individuals, both heroic and barbaric, and examines the legal cases that made the Supreme Court a partner of white supremacists in the rise of Jim Crow. Though this is a story of America's past, Goldstone brilliantly draws direct links to today's creeping threats to suffrage in this important and, alas, timely book"—Provided by the publisher. One hundred years later, an eye-opening look at their playbook shows that some of their strategies seem oddly familiar. Women's marches at inauguration time? Check. Nellie Bly	Cimino, Luciana, et. Al.	2021	GNF	Born in 1864, Nellie Bly was a woman who did not allow herself to be defined by the time she lived in, she rewrote the narrative and made her own way. Luciana Cimino's meticulously researched graphic-novel biography tells Bly's story through Miriam, a fictionalized female student at the Columbia School of Journalism in 1921. While interviewing the famous journalist, Miriam learns not only about Bly's more sensational adventures, but also about her focus on self-advocacy from an early age, the scathing letter to the editor that jump-started her career as a newspaper columnist, and her dedication to the empowerment of women. In fact, in 1884, Bly was one of the few journalists who interviewed Belva Ann Lockwood, who was the first woman candidate for a presidential election--a contest that was ultimately won by Grover Cleveland--and Bly predicted correctly that women would not get the vote until 1920. Of course Bly's most well-known exploits are also covered--how she pretended to be mad in order to get institutionalized so she could carry out an undercover investigation in an insane asylum, and Bly's greatest feat of all, her journey around the world in 72 days--alone--which was unthinkable for a woman in the late 19th century. As Miriam learns more of Bly's story, she realizes that the most important stories are necessarily the ones with the most dramatic headlines, but the ones that, in Nellie's words, 'come from a deep feeling.' This beautifully executed graphic novel paints a portrait of a woman who	Bly, Nellie, 1864-1922. Graphic Novels. Journalists -- US --- Biographies. Women journaists. Nonfiction comics. The youngest was thirteen, and all had been hoping to find something better at the end of their journey. But they never arrived. Instead, two white women falsely accused them of rape. The effects were catastrophic for the young men, who came to be known as the Scottsboro Boys. Being accused of raping a white woman in the Jim Crow south almost certainly meant death, either by a lynch mob or the electric chair. The Scottsboro boys found themselves facing one prejudiced trial after another, in one of the worst miscarriages of justice in U.S. history. They also faced a racist legal system, all-white juries, and the death penalty. When Evil Lived In Laurel	Wikie, Curtis	2021	Mississippi True Crime	The inside story of how a courageous FBI informant helped to bring down the KKK chapter responsible for a brutal civil rights-era killing. By early 1966, the civil rights work of Vernon Dahmer, head of the Forrest County chapter of the NAACP and a dedicated advocate for voter registration, was well-known in Mississippi. This put him in the crosshairs of the White Knights, one of the most violent sects of the KKK in the South-which carried out his murder in a raid that burned down his home and store. A riveting account of the incident and its aftermath. [this book] is a tale of obsession, in which the infamous Imperial Wizard Sam Bowers became so fixated on killing Dahmer that the bungled attack ultimately led to Bowers's downfall and the destruction of his virulently racist organization	Dahmer, Vernon Ferdinand, 1908-1966; Landrum, Tom, 1932-; Bowers, Samuel Holloway, 1924-2006; Ku Klux Klan (1915-). Murder Among Friends: How Leopold and Loeb Tried to Commit the Perfect Crime	Fleming, Candace	2022	Narrative NF	How did two teenagers brutally murder an innocent child...and why? And how did their brilliant lawyer save them from the death penalty in 1920s Chicago? Written by a prolific master of narrative nonfiction, this is a compulsively readable true-crime story based on an event dubbed the "crime of the century." In 1924, eighteen-year-old college students Nathan Leopold and Richard Loeb made a decision: they would commit the perfect crime by kidnapping and murdering a child they both loathed. But they made one crucial error: as they were disposing of the body of young Bobby Franks, whom they had bludgeoned to death, Nathan's eyeglasses fell from his jacket pocket. Multi-award-winning author Candace Fleming depicts every twist and turn of this harrowing case--how two wealthy, brilliant young men planned and committed what became known as the crime of the century, how they were caught, why they confessed, and how the renowned criminal defense attorney Clarence Darrow enabled them to avoid the death penalty. Lethal Tides: Mary Sears and the marine Scientists who helped win WWII	Museumeche, Catherine	2022	Biography	" Lethal Tides tells the story of the virtually unknown Mary Sears "the first oceanographer of the Navy," whose groundbreaking oceanographic research led the U.S. to victory in the Pacific theater during World War II. In Lethal Tides , Catherine Museumeche weaves together science, biography, and military history in the compelling story of an amazing woman who had a dramatic effect on the U.S. Navy's success against Japan in WWII, creating an intelligence-gathering judgement based on the new science of oceanography. When World War II began, the U.S. Navy was unprepared to enact its island-hopping strategy to reach Japan. Anticipating tides , planning for coral reefs, and preparing for enemy fire was new ground for them, and with lives at stake it was ground that had to be covered quickly. Mary Sears, a marine biologist, was the untapped talent they turned to, and she along with a team of quirky marine scientists were instrumental in turning the tide of the war in the United States' favor. The Sears team analyzed ocean currents, made wave and tide predictions, identified zones of bioluminescence, mapped deep-water levels where submarines could hide and gathered information about the topography and surf conditions surrounding the Pacific islands and Japan. Sears was frequently called upon to make middle-of-the-night calculations for last-minute top-secret landing destinations, and boldly predicted optimal landing times and locations for amphibious invasions. In supplying these crucial details, Sears and her team played a major role in averting catastrophes that plagued earlier amphibious landings, like the disastrous Tarawa, and cleared a path to Okinawa, the last major battle of World War II." Von Braun became an American hero, recognized the world over, while Korolev toiled in obscurity. These two brilliant rocketeers never met, but together they shaped the science of spaceflight and redefined modern warfare. Fair Play: How Sports Shape the Gender Debates	Barnes, Katie	2023	Informational	"A richly reported and provocative look at the history of women's sports and the controversy surrounding trans athletes by a leading LGBTQ+ sports journalist. For decades women have been playing competitive sports thanks in large part to the protective cover of Title IX. Since passage of that law, the number of women participating in sports and the level of competition in high school, college, and professionally, has risen dramatically. In Fair Play, award-winning journalist Katie Barnes traces the evolution of women's sports as a pastime and a political arena, where equality and fairness have been fought over for generations. As attitudes toward gender have shifted to embrace more fluidity in recent decades, sex continues to be viewed as a static binary that is easily determined: male or female. It is on that very idea of static sex that we have built an entire sporting apparatus. Now that foundation is crumbling as a result of intense culture wars. Whether we are talking about bathrooms, gender affirming care for trans youth, or sports , the debate about who gets to decide gender is being litigated every day in every community. Many transgender and intersex athletes, from a South African runner, to a New Zealand power lifter, to a wrestler in Texas, to Connecticut track stars, have captured the attention of law and policy makers who want to decide how and when they compete. Women's sports , since their inception, have been seen as a separate class of competition that requires protection and rules for entry. But what are those rules and who gets to make them? Fair Play looks at all sides of the issue and presents a reasoned and much-needed solution that seeks to reserve Up until the 1970s, if you were a girl, you were told you shouldn't play team sports, or go to college. But, in 1972, Title IX changed that, by ensuring that girls have the same opportunities as boys to participate in sports and classes. But that change did not come without a fight.	Gender identity. Striking Gridiron: A Town's Pride and a Team's Shot at Glory During the Biggest Strike in American History	Nicols, Greg	2014	Informational	In the summer of 1959, most of the town of Braddock, Pennsylvania--along with half a million steel workers around the country--went on strike in the longest labor stoppage in American history . With no paychecks coming in, the families of Braddock looked to its football team for inspiration. The Braddock Tigers had played for five amazing seasons, a total of 45 games, without a single loss. Heading into the fall of '59, this team from just outside Pittsburgh, whose games members of the Steelers would drop by to watch, needed just eight victories to break the national record for consecutive wins. While the townspeople bet their last dollars on the Tigers, young black players like Ray Henderson hoped that the record would be a ticket to college and spare them from life in the mills alongside their fathers. When his teammate Dusty Baker hit a historic home run, Glenn enthusiastically congratulated him with the first ever high five. But Glenn also made history in another way--he was the first openly gay MLB player. While he did not come out publicly until after his playing days were over, Glenn's sexuality was known to his teammates, family, and friends. His MLB career would be cut short after only three years, but his legacy and impact on the athletic and LGBTQIA+ community would resonate for years to come. A Literary History of Mississippi	Watkins, Lori, ed.	2017	Mississippi	"With contributions by: Ted Atkinson, Robert Biny, Patsy J. Daniels, David A. Davis, Taylor Hagood, Lisa Hirschbach, Summe Mann, Greg O'Brien, Ted Owsby, Id Piacentini, Claude Pruitt, Thomas J. Richardson, Donald M. Shaffer, Theresa M. Towser, Yvonne T. Tucker, Daniel Cross Turner, Lottie Watkins, and Ellen Weinauer Mississippi is a study in contradictions. One of the richest states when the Civil War began, it emerged as possibly the poorest and remains so today. Geographically diverse, the state encompasses ten distinct landform regions. As people traverse these, they discover varying accents and divergent outlooks. They find pockets of inexhaustible wealth within widespread, grinding poverty. Yet the most illiterate, disadvantaged state has produced arguably the nation's richest literary legacy. Why Mississippi? What does it mean to write in a state of such extremes? To write of racial and economic relations so contradictory and fraught as to defy any logic? Willie Morris often quoted William Faulkner as saying, "To understand the world, you must first understand a place like Mississippi." What Faulkner (or more likely Morris) posits is that Mississippi is not separate from the world. The country's fascination with Mississippi persists because the place embodies the very conflicts that plague the nation. This volume examines indigenous literature, Southwest humor, slave narratives, and the literature of the Civil War. Essays on modern and contemporary writers and the state's changing role in southern studies look at more recent literary trends, while essays on key individual authors offer more information on luminaries including Faulkner , Jackson Wible, Richard Wright, Tennessee Williams, and Margaret Walker. Finally, essays on autobiography, poetry, drama, and history span the creative breadth of Mississippi's literature. Written by literary scholars closely connected to the state, the volume offers a history suitable for all readers interested in learning more about Mississippi's great literary tradition." Strategic Inventions of the Cold War	Bougie, Matt	2016	Informational	In the years following World War II, a new kind of war gripped the world. This was not a war fought on a battlefield but a war fought in the mind and through willpower and demonstrations of strength. The Cold War, as this conflict became known, lasted from the 1950s to the 1980s. It was a time that saw many new technologies emerge. Among them were ballistic missiles, the M1 Abrams tank, and the television. This book details the events of the Cold War, the need for these technologies, and the impact these advancements had on societies of the past as well as today.	Cold War. The Cold War	Day, Meredith, ed.	2017	Informational	Immediately following World War II, former allies the United States and the Soviet Union began an open yet restricted rivalry that became known as the Cold War and played out around the world until the Soviet Union's collapse in 1991. Many conflicts, such as the Chinese Civil War, the Korean War, the Vietnam War, and the Arab-Israeli wars, acted as proxy wars for the U.S.-Soviet competition. Other major issues explored in this examination of the Cold War include Europe's 1919's Iron Curtain, the nuclear arms race, decolonization in Africa, and the spread of communism into Latin America and Southeast Asia. The Post Cold War World	Maxim, Bailey, ed.	2017	Informational	The post-Cold War era began with a decade of conflicts often mediated by the United States as the world's only remaining superpower. The September 11 terrorist attacks, however, marked the dawning of a new era. The United States became preoccupied by the wars in Afghanistan and Iraq, while around the world, new challenges and threats emerged: a more assertive Russia, an increasingly powerful China, dangerous terrorism organizations, and a refugee crisis in the Middle East that spilled into Europe. The story of this fraught era, in which the world was beset by millennial anxiety and destabilized by geopolitical shifts in the balance of power, is told here with great insight and a sure understanding of the complex interplay of action and reaction that characterized the proliferation of conflicts at the turn of the 21st century. Now Let Me Fly: A Portrait of Eugene Bullard	Wimberly, Ronald	2023	GNF	"On the eve of World War I, Eugene Bullard was a refugee of the Jim Crow South who was determined to find a place where a Black man would be treated as a fellow human being. His search took him from rural Georgia to the streets of Paris, from the vaudeville stage to the boxing ring, and finally, from the muddy trenches to the open skies. In 1914, Bullard joined the fight to defend France--and made history as the world's first African American fighter pilot. Days of Infamy: How a Century of bigotry led to Japanese American Internment	Goldstone, Lawrence	2022	Informative	"On December 7, 1941--"a date which will live in infamy"--the Japanese navy launched an attack on the American military bases at Pearl Harbor, Hawaii. The next day, President Franklin Roosevelt declared war on Japan, and the US Army officially entered the Second World War. Three years later, on December 18, 1944, President Roosevelt signed Executive Order 9066, which enabled the Secretary of War to enforce a mass deportation of more than 100,000 Americans to what government officials themselves called 'concentration camps.' None of these citizens had been accused of a real crime. All of them were torn from their homes, jobs, schools, and communities, and deposited in tawdry, makeshift housing behind barbed wire, solely for the crime of being of Japanese descent. President Roosevelt declared this community 'alien,'-- whether they were citizens or not, native-born or not--accusing them of being potential spies and saboteurs for Japan who deserved to have their Constitutional rights stripped away. In doing so, the president set in motion another date which would live in infamy, the day when the US joined the ranks of those Fascist nations that had forcibly deported innocents solely on the basis of the circumstance of their birth. In 1944 the US Supreme Court ruled, in <i>Korematsu v. United States</i> , that the forcible deportation and detention of Japanese Americans on the basis of race was a 'military necessity.' Today it is widely considered one of the worst Supreme Court decisions of all time. But <i>Korematsu</i> was not an isolated event. In fact, the Court's racist ruling was the result of a deep-seated anti-Japanese, anti-Asian sentiment running all the way back to the California Gold Rush of	Korematsu, Fred, 1919-2005. Uprooted: the Japanese American experience in WWII	Martin, Albert	2016	Informational	"Just seventy-five years ago, the American government did something that most would consider unthinkable today: it rounded up over 100,000 of its own citizens based on nothing more than their ancestry and, suspicious of their loyalty, kept them in concentration camps for the better part of four years. How could this have happened? Uprooted takes a close look at the history of racism in America and carefully follows the treacherous path that led one of our nation's most beloved presidents to make this decision. Meanwhile, it also illuminates the history of Japan and its own struggles with racism and xenophobia, which led to the bombing of Pearl Harbor, ultimately tying the two countries together"--Amazon.com. The Victors: Eisenhower and His Boys: the men of WWII	Ambrose, Stephen E.	1998	MS author	From one of the twentieth century's greatest military historians, Stephen E. Ambrose, the brilliant and comprehensive story of World War II in Europe, from D-Day, June 6, 1944, to the end, eleven months later, on May 7, 1945. The Victors tells the stories of the individual battles, raids, actors of courage from the first engagement of D-Day, when a detachment of British airborne troops stormed the German defense forces and paved the way for the Allied invasion. It also follows an American rifle company from the 506th Parachute Infantry Regiment who fought, died, and conquered from Utah Beach through the Battle of the Bulge and on to Hitler's Eagle's Nest in Germany. Ambrose describes the momentous decisions about how and where the war was fought, and the strategies and conduct of the generals who lead the invasion and the bloody drive to Berlin. The author draws from his five acclaimed books about that conflict to create this authoritative narrative account, to yield what has been called, "the best single-volume history of the war that most of us will ever read." Tokyo rose : zero hour : a Japanese American woman's persecution and ultimate redemption after World War II	Frattino, Andre R.	2022	GNF / Biography	"Who was Tokyo Rose? Was she a traitor or a hero? Tokyo Rose: Zero Hour tells the true story of Iva Toguri, a Japanese-American woman who was visiting her relatives in Tokyo shortly before the attack on Pearl Harbor--and became caught up in an unlikely chain of events which made her infamous. She ended up at odds with everyone--her family, her country, Japan, even herself! But was she guilty? Or just a pawn in a larger game? Trapped in Japan, Iva was pressed to renounce her American citizenship, but refused. As war raged across the Pacific, she took a job with Radio Tokyo where she was forced to host "Zero Hour" in the role of Tokyo Rose, "The Siren of the Pacific," aimed at demoralizing American troops. The dramatic events recounted in this story include: Iva's arrest after the Japanese surrender, which ultimately led to a determination that her actions were harmless. - Her emotional return to the United States and the public outcry that led to her re-arrest and prosecution for treason. - The corrupt actions of prosecutors who coerced witnesses into providing incriminating evidence against Iva. - The six years she spent in prison, never admitting guilt, and her eventual pardon by President Gerald Ford in 1977. Written by Andre Frattino and illustrated by Kate Kaeonow, Tokyo Rose: Zero Hour has an introduction explaining the "Tokyo Rose" phenomenon and the devastating effects of World War II on Asian-American communities that continue to reverberate. In a world rife with misinformation and racial prejudice, the story of Tokyo Rose has never been more relevant. Iva's story is not just the story of one Asian woman and her struggle to stay true to herself; it's the inspiring story of an underdog who persevered against overwhelming odds, never gave up hope, and <i>was vindicated in the end</i> ." Men of the 65th the Borinqueneers of the Korean War	Aikens-Nuñez, Talia,	2023	Narrative NF	Honor and Fidelity. That is the motto of the 65th Infantry Regiment, also known as the Borinqueneers, the only Puerto Rican unit in the United States Army. Since the regiment's creation in 1899, the men of the 65th have proudly served the US through multiple wars, despite facing racial discrimination. Their courage, loyalty, and patriotism earned them hundreds of accolades, including the Congressional Gold Medal in 2014. But the honor and fidelity of the men of the 65th came into question in 1952, in the midst of the Korean War, when ninety-one Borinqueneers were arrested and tried for desertion and disobeying orders. How could this happen in one of the most distinguished and decorated units of the Army? In this telling of one of the forgotten stories of the Korean War, author Talia Aikens-Nuñez guides us through the history of the Borinqueneers and the challenges they faced leading up to what was the largest court martial in the entire war. The American Civil War and Reconstruction, 1850 to 1890	edited by Jeff Wallenfeldt	2012	Primary Source	Interweaving primary source documents and narrative history, this book uses some of the era's (1850-1890) most memorable speeches to take the reader deep into the issues and events surrounding the Civil War and Reconstruction . From the intimate perspective of three friends and neighbors in mid-nineteenth century Auburn, New York--the 'agitators' of the title--acclaimed author Dorothy Wickenden tells the fascinating and crucially American stories of abolition, the Underground Railroad, the early women's rights movement, and the Civil War. Harriet Tubman--no-nonsense, funny, uncannily prescient, and strategically brilliant--was one of the most important conductors on the underground railroad and hid the enslaved men, women and children she rescued in the basement kitchens of Martha Wright, Quaker mother of seven, and Frances Seward, wife of Governor, then Senator, then Secretary of State William H. Seward. Harriet worked for the Union Army in South Carolina as a nurse and spy, and took part in a river raid in which 750 enslaved people were freed from rice plantations. Martha, a 'dangerous woman' in the eyes of her neighbors and a harsh critic of Lincoln's policy on slavery, organized women's rights and abolitionist conventions with Susan B. Anthony and Elizabeth Cady Stanton. Frances gave freedom seekers money and referrals and aided in their education. The most conventional of the three friends, she hid her radicalism in public; behind the scenes, she argued strenuously with her husband about the urgency of immediate abolition. Many of the most prominent figures in the history books--Lincoln, Seward, Daniel Webster, Frederick Douglass, Charles Sumner, John Brown, Harriet Beecher Stowe, William Lloyd Garrison--are seen through the discerning eyes of the protagonists. So are the most explosive political debates: about women's roles and rights during the abolition crusade, emancipation, and the arming of Black troops; and about the true meaning of the Declaration of Independence and the Constitution. Beginning two decades before the Civil War, when Harriet Tubman was still enslaved and Martha and Frances were young women bound by law and tradition, <i>The Agitators</i> ends two decades after the war, in a radically changed United States. Wickenden brings this extraordinary period of our history to life through the richly detailed letters her characters wrote several times a week. Like Doris Kearns Goodwin's <i>Team of Rivals</i> and David McCullough's <i>John Adams</i> , Wickenden's <i>The Agitators</i> is	NA. Contents: Reconstruction - the New South.	Reconstruction. A Time of Fear: America in the era of red scares and Cold War	Marrin, Albert.	2021	Informative	In twentieth century America, no power--and no threat--loomed larger than the communist superpower of the Soviet Union. America saw in the dreams of the Soviet Union the overthrow of the US government, and the end of democracy and freedom. Meanwhile, the Communist Party of the United States attempted to use deep economic and racial disparities in American culture to win over members and sympathizers. From the miscarriage of justice in the Scotsboro Boys case, to the tragedy of the Rosenbergs to the theatres of the Hollywood Ten to the menace of the Joseph McCarthy and his war hearings, Albert Marrin examines a unique time in American history...and explores both how some Americans were lured by the ideals of communism without understanding its reality and how fear of communist infiltration at times caused us to undermine our most deeply held values. The questions he raises ask: What is worth fighting for? And what are you willing to sacrifice to keep it?
