

# CONSTRUCT a Career

*Build Your Future!*

The Construct a Career Initiative (CCI) is a program designed to raise awareness and increase access to state-registered apprenticeships, ensuring a robust and well-rounded workforce through strategic partnerships with building and construction trades unions and their affiliated apprenticeship programs.

## About Construct a Career Initiative

Construct a Career is supported by a team of dedicated Apprenticeship Navigators strategically stationed throughout Washington. These Navigators engage in targeted outreach efforts, providing wrap-around support and strategic guidance to individuals seeking entry into apprenticeship.

Acting as liaisons between candidates and affiliated apprenticeship programs, our Navigators are dedicated to addressing barriers and facilitating success for aspiring apprentices. The Apprenticeship Navigators will:

- Identify and address application requirements
- Offer resources, and provide financial support when eligible
- Ensure applicant is prepared and has the tools and resources to be successful

From application assistance to enrollment and retention, we're here to ensure every new apprentice is prepared for a prosperous career in the trades.
