2025-2026 Dual Enrollment Course-High School Subject Area Equivalency List

This list should not be interpreted as a complete list of the dual enrollment courses available. Current law allows for any course in the Statewide Course Numbering System (SCNS) to be offered as dual enrollment, with the exception of remedial courses and Physical Education skills-based courses. Physical Education courses that can be offered for dual enrollment are limited to those that satisfy the personal fitness requirement. Three credit (or equivalent) postsecondary courses taken through dual enrollment that are not listed on this list shall be awarded at least 0.5 high school credits either as an elective or subject area credit as determined by the local school district.

Course titles listed are the titles as found in the SCNS; individual postsecondary institutions may utilize alternative course titles.

Courses indicated as Postsecondary General Education Core Subject Area courses (GE Core), may also be applied to the General Education Core requirements for an undergraduate degree from a public postsecondary institution in Florida. Students should check with their postsecondary institution regarding these requirements.

English

Courses under the English discipline shall be considered English coursework for the purposes of high school graduation requirements. Courses with AML, ENC, ENL and LIT prefixes that require ENC X101 as a prerequisite as identified in the SCNS shall award 1.0 high school English credit. Other courses within these prefixes and others may be awarded English credit based on district review and policy.

World Languages

All four-credit world language courses, including American Sign Language, shall be awarded one full high school elective credit. Courses offered for three credits are awarded at least 0.5 high school elective credit.

Mathematics

Courses listed in this section shall be considered Mathematics coursework for the purposes of high school graduation requirements.

Performing/ Fine Arts/ Speech and Debate/ Career and Technical Education

Courses listed in this section shall be considered Performing/Fine Arts/Speech and Debate/Career and Technical Education coursework for the purposes of high school graduation requirements. For those career and technical secondary courses that have been identified as satisfying the fine or performing arts high school graduation requirement (s. 1003.4282(3)(e), Florida Statutes), the equivalent postsecondary CTE course may also satisfy that requirement.

Physical Education: Personal Fitness

These courses only satisfy the personal fitness requirement; students must still complete another 0.5 credit physical education elective course to complete the 1.0 physical education graduation requirement. **Courses within the PEL, PEM, PEN, PEO and PEQ prefixes should be evaluated for eligibility.**

Science

High School Graduation Requirement in Science for Students Entering Grade Nine in 2014-15 or later:

3 credits in Science, one of which must be Biology I (BI), two of which must be equally rigorous (EQ) science courses and two must have a laboratory component.

All dual enrollment science courses should satisfy the equally rigorous requirement; certain courses identified on this list will satisfy the Biology I high school graduation credit. Dual enrollment science courses taken **with** a corresponding laboratory course will be awarded 1.0 high school science credit. Dual enrollment science courses taken **without** a laboratory component will be awarded 0.5 high school science credits. Separate lecture and lab courses may not be combined or the grades averaged for secondary transcript purposes. The lecture and lab courses must be listed separately on the student's secondary transcript with the grade(s) as assigned by the postsecondary institution. Lecture and Lab courses with different course numbers may be used to fulfill a 1.0 high school credit if the lab course is appropriate to the lecture course as identified by the postsecondary institution.

Biology I: Dual enrollment courses in general biology identified on this list will meet the Biology I high school graduation requirement. However, courses that are a lecture-only format, and are not taken with a corresponding laboratory course, are designated as Equally Rigorous and will be awarded 0.5 high school credit. *A district-determined (DD) subject area graduation code was implemented in SY 2018-19 and thereafter, which has been applied to specific courses. Schools MUST convert the DD code to an acceptable subject area code on official student records in order for a student to receive graduation credit. For the 2018-19 and thereafter, the only acceptable subject area codes that can be used for those courses carrying the DD graduation code will be codes BI or EQ.

Note: Two lecture-only format courses with similar numbers to those designated as Biology may satisfy the Biology I graduation requirement; students should be advised that they will still need to complete two laboratory courses.

End of Course Assessment: Students who complete their Biology I requirement through dual enrollment are not required to take the Biology I End-of-Course Assessment (EOC). However, students who choose to pursue the “Scholar” diploma designation must complete the Biology I EOC. The EOC will be used for the diploma designation only. The content in the sequence BSC X010 and BSC X011 or BSC X007 and BSC X008 are comparable to the standards for Biology I and therefore can be used as preparation for the Biology I EOC for those students who choose to take the assessment.

Social Studies

Course listed in this section shall be considered the specific Social Studies coursework for the purposes of high school graduation requirements as indicated.

United States History: Faculty reviewers have determined that the content in the AMH X010 and AMH X020 sequence is comparable to the standards for United States History and may be used for preparation for the End-of-Course (EOC) assessment. All other AMH courses should be reviewed by the school district and postsecondary institution to determine if the course(s) may be used as preparation of the U.S. History EOC.

Electives

Elective courses have been identified as high enrollment courses and are provided to assist in determining appropriate high school subject area credit. This section should not be considered a complete list of courses that may be used for elective credit toward high school graduation requirements.

High School Graduation Code Definitions (COLUMN E on Academic and CTE Courses tabs)

A1 = Algebra 1 (or course equivalent)
AG = United States (American) Government (or course equivalent)
AH = United States (American) History (or course equivalent)
BI = Biology (or course equivalent)
CT = Career and Technical Education course (includes courses previously coded as PA = Practical Arts)
DD = District-Determined (must be converted to BI or EQ on individual student basis on official records)
EC = Economics (or course equivalent)
EL = Elective (includes world language courses)
EN = English/Language Arts
EQ = Equally Rigorous (to Chemistry and/or Physics) Science
FE = Personal Financial Literacy and Economics (or course equivalent)
GE = Geometry (or course equivalent)
MA = Mathematics
PE = Physical Education (only applies to Personal Fitness, not Physical Activity requirement, for dual enrollment purposes)
PF = Visual and Performing Fine Arts
PL = Personal Financial Literacy (or course equivalent)
WH = World History (or course equivalent)

2025-2026 Dual Enrollment Course-High School Subject Area Equivalency List Career Dual Enrollment Credit

The inclusion of career and technical education courses on this list does not guarantee that they are all appropriate for career dual enrollment. Institutions must determine which of these, or any other career courses, meet the statutory requirements for career dual enrollment in Section (s.) 1007.271, Florida Statutes (F.S.). Under these provisions, the course must lead to an industry certification approved by the Department of Education as specified in s. 1008.44, F.S.

Career dual enrollment includes courses offered through career certificate (clock hour) programs and career associate degree programs (e.g., Associate of Science).

For college credit programs, postsecondary courses taken through dual enrollment for three credits or more that are part of a postsecondary career/technical program of study (College Credit Certificate, Applied Technology Diploma, Associate in Applied Science, Associate of Science) shall be awarded at least 0.5 elective credits toward high school graduation.

For Career Certificate clock hour courses taken through dual enrollment, the following methodology must be used for the awarding of high school credits:

0.5 high school credit for each 75 hours in the course rounded down to the nearest 0.5 credits

Information on career certificate clock hour courses and career education college credit and the corresponding high school credit that may be awarded for these courses is provided herein. If a course is not listed, one of the following may apply: 1) The course is not at least 75 clock hours or at least 3 college credit hours and cannot result in award of high school credit, 2) the course is not eligible for dual enrollment because it does not lead to an industry certificate approved under sections 1008.44, F.S., or 3) the course is recently approved and has not been included in this table.

The high school credits are awarded upon completion of the postsecondary course. Individual courses may be awarded more or less credit than is indicated on the list based upon the number of hours of which a course is taught at a Florida College System institution. Clock hour courses offered in school district technical centers/colleges use a standard program length pursuant to Rule 6A-6.0571, Florida Administrative Code (F.A.C), and there is no variance in the length of time the course is offered.

Students seeking to meet the requirements of the Gold Seal Vocational Scholarship through dual enrollment must carefully choose courses that meet the requirement for 3 sequential credits in one career education program.

For those career and technical secondary courses that have been identified as satisfying the fine or performing arts high school graduation requirement (s. 1003.4282(3)(e), F.S.), the equivalent postsecondary CTE course will also satisfy that requirement.

2025-2026 Career Dual Enrollment - High School Subject Area Equivalency List

DIG	Digital Media
DIM	Diesel, Hybrid and Alternative Fuel Technology
DSC	Domestic Security
EEC	Education: Early Childhood
EER	Electrical/Electronics Repair
EET	Electrical Engineering Technology
EGN	Engineering: General
EGS	Engineering: Support
EMS	Emergency Medical Services
ENC	English Composition
ENG	English- General
ENL	English Literature
ENY	Entomology
ESC	Earth Science
ETD	Engineering Technology: Drafting
ETG	Engineering Technology: General
ETI	Engineering Technology: Industrial
ETM	Engineering Technology: Mechanical
ETS	Engineering Technology: Specialty
EVR	Environmental Studies
EVS	Environmental Science
FFP	Fire Fighting & Protection
FIL	Film
FRE	French Language
GEB	General Business
GER	German
GIS	Geography: Information Science
GLY	Geology
GRA	Graphic Arts
HBR	Modern Hebrew Language
HCP	Health-Care Providers (Assistants)
HEV	Home Economics- Vocational
HIM	Health Information Management
HLP	Health/Leisure/Physical Education
HSA	Health Services Administration
HSC	Health Sciences
HUN	Human Nutrition
ISC	Interdisciplinary Sciences
ISM	Information Systems Management
ITA	Italian Language
JPN	Japanese
LAT	Latin (Language Study)
LIN	Linguistics

LIT	Literature
MAA	Mathematics- Analysis
MAC	Mathematics- Calculus and Precalculus
MAD	Mathematics- Discrete
MAN	Management
MAP	Mathematics Applied
MAS	Mathematics- Algebraic Structures
MAT	Mathematics
MCB	Microbiology
MEA	Medical Assisting Technology
MET	Meteorology
MGF	Mathematics- General and Finite
MHF	Mathematics- History and Foundations
MKA	Marketing Applications
MLT	Medical Laboratory Technology
MNA	Management: Applied
MTB	Mathematics- Technical and Business
MTE	Marine Technology and Nautical Science
MTG	Mathematics- Topology and Geometry
MUE	Music Education
MUH	Music History/Musicology
MUL	Music Literature
MUM	Music: Commercial/Management/Administration
MUN	Music Ensembles
MUS	Music
MUT	Music: Theory
NMT	Nuclear Medicine Technology
NSP	Nursing: Special
NUR	Nursing, Generic Undergraduate
OCB	Biological Oceanography
OCE	General Oceanography
OCP	Physical Oceanography
OPT	Ophthalmic Technology/Vision Care
ORH	Ornamental Horticulture
OST	Office Systems Technology
OTA	Office Technology Applications
OTH	Occupational Theory
PCB	Process Biology (Cell/Molecular/Ecology/Genetics/ Physiology)
PET	Physical Education Theory
PGY	Photography
PHT	Physical Therapy
PHY	Physics
PLA	Paralegal/Legal Assistant/Legal Administration
PMT	Precision Metals Technology
POR	Portuguese Language
POS	Political Science
PRN	Practical Nursing

PSB	Psychobiology
PSC	Physical Sciences
PTN	Pharmacy Technician
QMB	Quantitative Methods in Business
RAT	Radiation Therapy
REE	Real Estate
RET	Respiratory Care
RTE	Radiologic Technology
RTV	Radio-Television
RTV	Radio-Television
RUS	Russian Language
SLS	Student Life Skills (Learning)
SON	Sonography
SPC	Speech Communication
SPN	Spanish Language
STA	Statistics
STS	Surgical Technology Studies
SUR	Surveying and Related Areas
SWA	Swahili Language
TAR	Technical Architecture
TDR	Technical Drafting (PSAV Level)
THE	Theatre Studies and General Resources
TPA	Theatre Production and Administration
TPP	Theatre Performance and Performance Training
TRA	Transportation and Logistics
WOH	World History
ZOO	Zoology
