Counselor Connection

Competency of the Month:

Academic Development

During the month of April, school counseling lessons will focus on Academic Development, helping students continue to build the skills and habits needed for success in junior high and beyond. Students will review and practice important academic skills such as effective study strategies, using available resources, and strengthening critical thinking and problem-solving abilities. Lessons will also emphasize the importance of the use of these skills throughout MAP Testing. Through guided activities, students will reflect on their strengths, set personal academic goals, and connect those goals to grade-level expectations.

Lessons will also be presented to students to help prepare for the academic transitions and planning needs for next year's courses. Current 6th and 7th-grade students will have specific lessons with the counselors to begin requesting electives for next school year.
