 - Friday, Apr 24: Reuse & Recreate
Wear: STRIPES to celebrate giving items a second life.

April 22nd- Earth Day!

This month in preschool: Garden/Building

Welcome to our Month of Growth and Discovery!

We are so excited to dive into our new Garden and Building units this month! Our classroom is transforming into a bustling hub of "little landscapers" and "junior architects" as we explore how things grow and how they are made. These themes are more than just fun—they are powerful tools for developing your child's science, math, and literacy skills in a hands-on way:

- **Scientific Thinking:** We'll be acting as "Gardening Detectives," observing the life cycles of plants and testing the stability of different building materials.
- **Math in Action:** From counting seeds and measuring sprout heights to exploring the geometry of blocks, math is becoming a concrete part of our daily play.
- **Literacy Connections:** We're expanding our vocabularies with new "big words" like foundation, photosynthesis, and blueprint, while creating our own garden journals and building plans.

April 22nd is Earth day! April 22, 2026, marks the global celebration of Earth Day, a time dedicated to environmental protection and stewardship: Organize a "Litter Walk" around your community or park allowing your child to see the direct positive impact of their actions on their immediate environment and leaving shared places better than how we found them.

THANK YOU

A huge thank you to our amazing PTA for sponsoring eggs for every class! On April 2nd our students will enjoy a special Egg Hunt during their outdoor time. Keep an eye on Class Dojo, where your child's teacher will share photos of all the hunting and hopping fun!
