Work Based Learning Experiences

Name: _____

1. What company or workplace did you visit?

La Vega high school

2. What were three new things you learned about this career field or industry?

Fabrication is a major part of welding.

Hours are usually long.

Flux core wire can be giant

3. Describe one job role or position that interested you the most. Why did it stand out?

welding was one of the biggest need in the shop. All the training being done on site it very easy for both the company and worker who needs to learn

4. What skills (technical or soft skills) did you observe employees using during your visit?

I saw the head of the on site training show his technical skills while the plant manager used soft skills when talking to us.

5. What questions do you still have about this career field or workplace after the trip?

How much time is really spent welding and not fabricating.
