

WHAT'S NEW AT THE VIEW

During the month of March, Mrs. Jordan facilitated an engaging session on effective testing strategies. Classes were combined to support students preparing to take the GED, WIN, and Northstar Digital Literacy assessments.

During the session, students explored common myths surrounding test-taking and learned practical, research-based strategies designed to improve confidence and performance.

WHAT'S NEW AT THE VIEW

March was a month of continued achievement for our students, highlighted by measurable skill gains (MSGs), the attainment of WIN credentials and Northstar Digital Literacy certificates, and several successful program graduations.

WHAT'S NEW AT THE VIEW

March was another month of strong achievement for our students, highlighted by measurable skill gains (MSGs), the earning of WIN credentials and Northstar Digital Literacy certificates, and several successful program graduations.

WHAT'S NEW AT THE VIEW

Our commitment to continuous improvement remains strong as we expand our use of MagicSchool to support instruction, planning, and student engagement. Through this work, our team is exploring innovative ways to enhance lesson design, differentiate instruction, and streamline daily practices to better meet the needs of our adult learners.

In partnership with Mrs. Jeniffer Miller and Casey Lefler, we are also strengthening our Professional Learning Community (PLC). Together, we are focusing on collaboration, data-driven decision-making, and the sharing of effective instructional strategies. This ongoing work is helping to build a more aligned, reflective, and responsive instructional team, ultimately leading to improved outcomes for our students.
