

CONSTRUCTION DESIGN: 6920

Facilities will be designed to accommodate the educational and instructional needs of the District. The professional experience and judgment of staff will be used in developing such educational specifications. The law requires that special attention be given to the accessibility of the education program by students of both sexes and those with disabilities. The Superintendent or designee will see that all construction projects comply with the requirements for accessibility to individuals with disabilities and comparability between the sexes.

After determining that a need for new or improved facilities exists, the Board, with the guidance of its staff, may engage in the following processes:

- A. Engage construction management services;
- B. Select an architect and/or engineer;
- C. Review a site evaluation including an assessment of existing facilities, if any, on the site;
- D. Develop educational specifications recognizing instructional needs and available financial resources;
- E. Review and approve schematic design prepared by architect, assuring that the new or remodeled facility or part of a facility is readily accessible to and usable by individuals with disabilities;
- F. Review a value engineering study and constructability review, and approve construction design including construction estimates;
- G. Call for bids; and
- H. Review and approve final construction contract.
