- Attempted Crimes (art. 56 c.p.)

2. 2. Identification of “Sensitive Activities

LUDUM has defined sensitive activities at risk of crime as those relating to the following categories:

1. Crimes against the Public Administration.
2. Corporate crimes;
3. Transnational crimes;
4. Crimes committed in violation of accident prevention regulations and the protection of hygiene and health at work.
5. Crimes relating to copyright
6. Tax crimes;
7. Illegal immigration crimes;
8. Crimes against the individual personality.
9. Crimes against property. Reati contro la Pubblica Amministrazione;
10. Corporate crimes
11. Transnational Crimes
12. Crimes committed in violation of accident prevention regulations and the protection of hygiene and health at work.
13. Crimes relating to copyright.
14. Tax crimes.
15. Illegal immigration crimes
16. Crimes against individual personality
17. Crimes against property or assets

3. The Sanctions System

The Decree provides for pecuniary sanctions up to a maximum of Euro 1,549,370.69 (combined with precautionary seizure) and/or disqualification sanctions (applicable also as a precautionary measure) lasting no less than three months and no more than two years (with the clarification that, pursuant to art. 14, paragraph 1, of the Decree, the interdictory sanctions have as their object the specific activity to which reports the offense attributable to the Entity).

The **disqualifying sanctions**, in turn, may consist of:

- a ban from carrying out the activity.
- suspension or revocation of authorisations, licenses or concessions functional to the commission of the offence.
- prohibition on contracting with the public administration.
- exclusion from benefits, financing, contributions or subsidies and possible revocation of those granted.
- prohibition on advertising goods or services.
- confiscation (and precautionary seizure);
- publication of the sentence (in case of application of a disqualifying sanction).

The **pecuniary sanction** is determined by the criminal judge through a system based on "quotas" in numbers of no less than one hundred and no more than one thousand, with an amount varying between a minimum of Euro 258.22 and a maximum of Euro 1,549.37.

In assessing the financial penalty, the judge determines:

- the number of shares, taking into account the seriousness of the fact, the degree of responsibility of the company as well as the activity carried out to eliminate or mitigate the consequences of the fact and to prevent the commission of further offences.
- the amount of the individual quota, based on the economic and financial conditions of the company, in order to ensure the effectiveness of the sanction.

Interdictory sanctions apply only in relation to crimes for which they are expressly provided for and provided that at least one of the following conditions is met:

- the company derived a significant profit from the crime;
- the crime was committed by individuals in top positions or by individuals subject to the management of others when, in the latter case, the commission of the same was determined or facilitated by serious organizational deficiencies.

In case of repetition of the offences, the judge determines the type and duration of the disqualification sanction, considering the suitability of the individual sanctions to prevent offenses of the type committed and, if necessary, can apply them jointly (art. 14, paragraph 1 and paragraph 3, Legislative Decree no. 231/2001).

The sanctions of the ban from carrying out the activity, the ban on contracting with the public administration and the ban on advertising goods or services can be applied - in the most serious cases - even definitively.

Furthermore, the continuation of the company's activity (instead of the imposition of the sanction) by a commissioner appointed by the judge pursuant to and under the conditions set out in art. 15 of the Decree.

4. Attempted Crimes

In cases of attempted commission of crimes relevant to the administrative liability of entities, the pecuniary sanctions (in terms of amount) and interdictory sanctions (in terms of time) are reduced by a third to a half.

The imposition of sanctions remains excluded in cases where the entity voluntarily prevents the completion of the action or the realization of the event (art. 26, Legislative Decree no. 231/2001).

The exclusion of sanctions is justified, in this case, by virtue of the interruption of any relationship of identification between the entity and the subjects who assume to act in its name and on its behalf.

This is a particular hypothesis of the so-called "active withdrawal", provided for by art. 56, paragraph 4, c.p.

5. Crimes committed Abroad

Pursuant to the provisions of art. 4 of the Decree, the entity can be held accountable in Italy in relation to crimes - relevant for the purposes of the administrative liability of entities - committed abroad.

The conditions (provided for by the regulation in question or deduced from the whole of the Decree) on which the entity's liability for crimes committed abroad is based are:

- the crime must be committed abroad by a person functionally linked to the entity, pursuant to art. 5, paragraph 1, Legislative Decree no. 231/2001;
- the entity must have its main headquarters in the territory of the Italian State.
- the entity can respond only in the cases and under the conditions provided for by the articles. 7, 8, 9 and 10 c.p. in cases where the law provides that the guilty person - a natural person - is punished at the request of the Minister of Justice, proceedings are taken against the entity only if the request is also made against the entity itself (reference to articles 7- 10 of the Criminal Code is to be coordinated with the provisions of articles 24-25-novies of Legislative Decree no. 231/2001, so that - also in compliance with the principle of legality referred to in Article 2 of Legislative Decree no. 231/ 2001 - in relation to the series of crimes mentioned in articles 7-10 of the criminal code, the company will only be liable for those for which its responsibility is provided for by an ad hoc legislative provision);
- if the cases and conditions referred to in the aforementioned articles of the penal code exist, the State of the place where the crime was committed does not take action against the entity.

ORGANISATIONAL MODELS AS EXEMPTION FROM LIABILITY

1. Syndicate Suitability

The ascertainment of the company's liability, attributed to the criminal judge, occurs through:

- verification of the existence of the crime required for the liability of the company.
- the suitability review of the organizational models adopted.

The suitability judgment is formulated according to a substantially ex ante criterion whereby the judge ideally places himself in the company reality at the moment in which the offence occurred to test the congruence of the model adopted.

In other words, the organizational model which, before the commission of the crime, could and should be considered such as to eliminate or, at least, minimize, with reasonable certainty, the risk of the commission of the crime subsequently occurring must be judged "suitable for preventing crimes". .

The art. 6 of the Decree provides for a specific form of exemption from the aforementioned liability if the Organization demonstrates that:

- the management body of the Organization has adopted and effectively implemented, before the commission of the crime, organizational and management models suitable for preventing crimes of the type that occurred.
- the task of supervising the functioning and observance of the models, as well as ensuring their updating, has been entrusted to a body of the organisation with autonomous powers of initiative and control.
- the people who committed the crime acted by fraudulently evading the aforementioned organisation and management models.
- there has been no omitted or insufficient supervision by the Supervisory Body.

2. Responsibilities of the Institution

LUDUM must establish, document, implement, control and keep the Model updated and continuously improve its effectiveness.

Furthermore, based on what is indicated in this Manual:

- identify the obligations and ethical principles of reference.
- identify the processes necessary for the Model and ensure their application throughout the organisation;
- implement a risk management process (Risk Management);
- ensure the availability of the resources necessary to support the effective functioning and continuous monitoring of activities, through the establishment of the Supervisory Body.
- monitor, evaluate and analyze the above processes.
- implement the actions necessary to achieve the planned results and continuous improvement of the processes.

3. The characteristics of the Model

The Model must meet the following needs:

- identify the activities in which there is the possibility that the crimes envisaged by the Decree will be committed.
- provide specific protocols aimed at planning the formation and implementation of the organisation's decisions, in relation to the crimes to be prevented.

- identify ways of managing financial resources, suitable for preventing the commission of such crimes.
- provide for information obligations towards the Body responsible for supervising the functioning and observance of the Models.
- introduce an internal disciplinary system, suitable for sanctioning failure to comply with the measures indicated in the Models.

The Models can be defined, guaranteeing the above requirements, based on the codes of conduct, drawn up by the Associations representing the entities, communicated to the Ministry of Justice.

Confindustria has prepared and delivered to the Ministry of Justice guidelines for the preparation of the Models.

According to these guidelines, the adoption of a suitable Model corresponding to the requirements dictated by the Decree must necessarily include:

- risk assessment: in-depth analysis of the activities and offices at risk in relation to the possible commission of crimes of the type indicated by the Decree.
- creation of a risk management system: identification of organizational and preventive control procedures and systems that minimize the risks identified above.
- preparation of a Code of Ethics: it is an essential element to be able to maintain that all directors and employees are aware of the rules of conduct to be followed in carrying out work activities, with reference to activities identified as "at risk".
- establishment of an internal control body: the Supervisory Body.

4. The Functions of the Model

The purpose of the Model is the definition of a structured and organic system of directives and control activities, aimed not only at preventing the commission of the different types of crime contemplated by the Decree, but also as an organisational, management and control tool, aimed at rationalizing and monitoring corporate behaviour.

The effective implementation of the Model is also a function of its dissemination and knowledge within the Company and of the awareness, for all employees, of LUDUM's desire to operate within the context of a concrete and constant application of the behavioral principles contained therein.

The implementation of the Model, after its approval, must therefore be accompanied by:

- a formal presentation of the document to staff.
- the formal delivery of a document containing the Model to each employee.

- holding meetings to illustrate and raise staff awareness of the contents of the Model.
- the publication of the Model on the internal network, available to employees.

Effective implementation of the Model is also a function of its dissemination and knowledge within the Company and of the awareness, for all employees, of LUDUM's desire to operate within the context of a concrete and constant application of the behavioral principles contained therein.

5. Circulation of the Model Externally

Since the behaviour of collaborators or other subjects with whom the Company has contractual relationships (professionals, subjects operating as representatives, in various capacities, or as agents of the Company, other companies or companies with which there are business or partnership relationships, etc.), in contrast with the lines of conduct indicated by this Model, may entail the risk of committing a crime sanctioned by the Decree, it is essential that the implementation of the Model is accompanied by a specific dissemination of its contents to such collaborators and third parties.

To this end it will be necessary to:

- formally deliver to each external collaborator a document containing the general part of the Model, with a note of the delivery details.
- require collaborators, upon delivery of the document or at the time of signing the contract, to undertake to observe the rules of conduct set out therein.
- inform these external parties that failure to apply the rules of conduct may result in the termination of the contract and/or the application of other sanctions indicated in the document.

6. Modifications and integrations of the Model

In compliance with the provisions of article 6, paragraph 1, letter. a) of the Decree, this Model is an act issued by the governing body of the Institution.

Consequently, the organisation, management and control Model for risk prevention is adopted by the **Board of Directors** with the indication that the implementation and management activity of the Model, including the Guidelines, the Code of Ethics, the system sanctioning and the operating methods of the Supervisory Body (hereinafter also **SB**), is entrusted to the competences of the President of the **Board of Directors** – Head of School.

In consideration of the adoption of the Model by the Board of Directors, any relevant changes and additions must be approved within the same body.

7. Commitment of the Governing Body

The Head of School ensures the development and implementation of the Model through the following activities:

- communicate to the organisation the importance of complying without reservation with every requirement set out in the Model;
- promote a policy of compliance with the Model;
- ensure that the objectives of compliance with the Model are defined;
- ensure the availability of resources;
- ensure the functioning of the Supervisory Body;
- adopt sanctioning tools;
- ensure that responsibilities, tasks, delegations and authorities are defined and disclosed within the organization.

8. Ethical Code

The rules of conduct contained in this Model are integrated with those of the Code of Ethics which represents an instrument adopted autonomously and susceptible to application on a general level by the Company, with the aim of expressing the principles of "corporate ethics" that the Company itself recognizes as its own and calls for compliance by all employees.

The Code of Ethics recommends, promotes, or prohibits certain behaviors, regardless of what is required at a regulatory level.

Non-compliance must give rise to sanctions proportionate to the seriousness of any infringements committed by anyone who acts in such a way as to involve the organization with their actions.

9. Recipients of the Model

By "Recipients" we mean the subjects to whom the provisions contained in this Model are addressed and who are required to comply with them.

- illegally possess, obtain, reproduce or disseminate access codes or means suitable for accessing LUDUM systems protected by security measures.

THE DISCIPLINARY SYSTEM

1. General Principles

In order to ensure the effectiveness of the organisation, management and control model, LUDUM intends to sanction failure to comply with the provisions contained therein by employees, external collaborators and partners, as well as administrators, recalling compliance with the disciplinary system currently in force in the company which refers to that envisaged by the CCA or CCNL applied to the RIS.

The application of disciplinary sanctions for violations of company rules of conduct can therefore regardless of the outcome of the criminal proceedings, as these rules are adopted by the Company in full autonomy and regardless of the offense that any conduct may cause.

2. Obligation to Communicate

Every Ludum employee has the obligation to communicate, even anonymously, to the Supervisory Body any transgression by the Company's internal staff and external collaborators of the rules, guidelines and procedures set out in this Model.

3. Measures against the company's employees

Failure to comply with the rules set out in the Model adopted by Ludum pursuant to the Decree may give rise, depending on the seriousness of the infringement, to the imposition of disciplinary sanctions in full compliance with the provisions of the art. 7, l. 20 May 1970 n. 300 and the current collective bargaining of the applicable sector, and precisely:

- verbal reprimand;
- written reprimand;
- suspension from service and salary, up to a maximum of 6 days;
- dismissal for justified reason.
- dismissal for a just cause.

The type and extent of each of the sanctions mentioned above will also be determined considering:

- the intentionality of the behaviour adopted by the worker or the degree of negligence, imprudence or incompetence also with regard to the predictability of the event;

- the overall behaviour of the worker, with particular regard to the existence or otherwise of previous disciplinary measures imposed on him;
- the worker's duties.
- the functional position of the people involved in the facts constituting the failure to comply.
- other circumstances connected or relating to the disciplinary offence.

In the event of violation of the provisions and behavioral rules contained in the Model by Managers, the Company - once the responsibility of the perpetrator of the violation has been ascertained - adopts the measure deemed most appropriate, among those reported above.

If the violation of the Model leads to a lack of trust between the Company and the manager, the sanction is dismissal.

4. Measures against the members of the Board of Directors

In case of violation of the Model by the **Head of School**, the SB informs in writing, the Sole Auditor who will carry out an investigation in order to verify what has been reported and transcribe the results in the designated book as provided by in art. 2421, paragraph 1, n. 5, c.c..

In the event that the Sole Auditor finds that the conduct carried out by the **Head of School** commits a type of crime, the findings of the investigation will be communicated to the competent Judicial Authority.

5. Measures against the Sole Auditor

In case of violation of this Model by the Sole Auditor, the Supervisory Body informs, in writing, the **Head of School** who will take appropriate measures.

6. Measures against third parties

Any conduct of external collaborators, commercial partners and, more generally, of suppliers of goods or services in conflict with the provisions of the Model, may lead to the termination of the contractual relationship through the provision of specific contractual clauses, without prejudice to the right to compensation for any damages incurred.

To this end, specific clauses are included in contracts which:

- acknowledge knowledge of the Decree and the principles contained in the Model adopted by the Company;
- require the assumption of a commitment to comply with the provisions contained in the Model;
- regulate the consequences in case of violation of these provisions;

- in the case of subcontracting of services, the contractor (or subcontractor) must ensure the inclusion of similar clauses in the subcontracting contract.

The Supervisory Body is responsible for evaluating the suitability of the sanctioning measures against third parties, as well as reporting any updates to the aforementioned clauses to the competent functions of the Company.

7. Measures against secondment workers

For the purposes of exercising disciplinary power, which is reserved for the seconding party or the administrator, LUDUM will communicate to the companies with which the aforementioned relationships exist the elements that must be the subject of the dispute pursuant to article 7, l. 20 May 1970, n. 300 and current contractual regulations.

THE SUPERVISORY BODY

1. Assignments of the Supervisory Body

The Decree provides, in its art. 6, paragraph 1, letter. b), that the exemption from administrative liability operates if the task of supervising the functioning and observance of the Model, as well as ensuring that it is updated, is entrusted to a body of the organisation, with autonomous powers of initiative and control.

The Supervisory Body (SB) operates with maximum autonomy and independence and is authorized to carry out any type of control or inspection, functional to the performance of the tasks entrusted to it, and consisting of:

- supervise the effective application of the Model, or verify that corporate behavior corresponds to the Model;
- monitor compliance with the Code of Ethics by corporate bodies, managers and employees;
- constantly evaluate the adequacy of the Model adopted, verifying the actual ability to actually prevent unwanted behaviour;
- prepare an information report, on a six-monthly basis, to be sent to the Board of Directors, the Head of School and the Sole Auditor regarding the control and verification activities carried out and their outcome;
- submit to the Board of Directors proposals for modification, integration or adaptation of this Model and the Code of Ethics, to make these documents compliant with any changes to the structure or mission of the company, or to fill gaps or imperfections found during application of the Model or the Code of Ethics.

To allow the widest possibility of carrying out its surveillance activity, the SB and any internal or external collaborators, upon presentation of a specific letter of appointment, may:

- carry out inspections in all the Company's offices and locations, accessing all the documentation stored there.
- directly request information from employees regarding actions and activities carried out by them.

Identification of the Supervisory Body

The Body called upon to carry out supervisory functions on the operation and observance of the Model must possess specific characteristics, in particular:

- be an "organisation of the organisation", i.e. an internal body of the Company;
- be endowed with "autonomous powers of initiative and control", i.e. endowed with general functional autonomy within the company; the position of the Supervisory Body within the

Company must be able to guarantee the autonomy of the control initiative from any form of interference and/or conditioning by any member of the Company;

- be equipped with the necessary professionalism (knowledge of inspection, accounting and legal techniques);
- be able to ensure constant supervision ("continuity of action") over company activity and compliance with the Model.

The SB is a monocratic body, appointed by the Board of Directors.

The duration and awarding of the emolument is always established by the Board of Directors at the time the mandate is granted.

The mandate ends for:

- expiration;
- resignation;
- revocation for just cause by the body that granted the mandate

In this regard, just cause for revocation must be understood as:

- interdiction or incapacitation, or a serious illness that makes the SB unfit to carry out its supervisory functions, or an illness that, in any case, leads to absence from the workplace for a period exceeding six months;
- a serious failure to fulfill the SB's duties, as defined in the Organization and Management Model;
- failure to comply with the principles of conduct indicated in the Code of Ethics and in the previous paragraph;
- the sentence of conviction of the Company pursuant to the Decree, which has become final, or a criminal proceeding concluded through so-called "plea bargaining", where the documents show "failure or insufficient supervision" by the SB, in accordance with the provisions of the art. 6, paragraph 1, letter. d) of the Decree;
- the conviction, with a final sentence, against the SB for having committed one of the crimes provided for by the Decree;
- the sentence of acquittal (for example, due to the statute of limitations of the crime) with attribution of responsibility;
- the conviction, with a final sentence, against the SB of a penalty which entails disqualification, even temporary, from the management offices of legal persons and companies.

In cases in which a conviction has been issued, the Board of Directors, pending the finalization of the sentence, may also order - with the approval of the Sole Auditor - the suspension of the powers of the SB and the appointment of an SB to interim.

The operational control and compliance activities may, by decision of the Board of Directors and upon proposal of the Supervisory Body, be entrusted to external professionals with proven experience and professionalism, even if they are not part of the Supervisory Body.

Any tasks delegated externally are those relating to the performance of technical-inspection activities, without prejudice to the obligation of external professionals to report to the SB; it is clear, in fact, that the assignment of this type of delegation does not reduce the responsibility of the Supervisory Body regarding the supervisory function conferred on it by law.

The SB and any external collaborators appointed, by presenting a specific letter of appointment, will be able to carry out inspections in the Company's offices, accessing all the documentation stored there, and will be able to directly request information from employees with reference to acts and activities carried out by them.

Employees must provide information in a clear, truthful and timely manner.

To achieve its objectives, the SB may also have access to the minutes of the Sole Auditor as well as to the results of the activity carried out by the external auditors and the company's lawyers, including those professionals who, even if not directly appointed by RIS, receive the compensation for work performed on behalf of employees.

A report is drawn up for each verification or inspection, registered in the Company's protocol, and kept in the records of the Supervisory Body. A copy of it will be sent to the **Head of School** and the Sole Auditor.

If the Supervisory Body finds the behaviour contrary to the legislative provisions in force, the Code of Ethics or this Model on the part of any of the subjects referred to in the Decree, it will forward a detailed report to the **Head of School** and the Sole Auditor as well as, where necessary, to the competent authorities.

The SB may be convened at any time by the corporate bodies and may in turn request to consult with the **Head of School** to report on the functioning of the Model or specific situations.

3. Information to be sent to the Supervisory Body

The following must be sent to the Supervisory Body by anyone who becomes aware of them within the Company:

- the provisions and information coming from judicial police bodies or any other authority, from which it is clear that investigations have been carried out, even against unknown persons (but falling within the sphere of reference of the RIS), for the crimes referred to in the Decree;
- requests for legal assistance forwarded by staff, in the event of initiation of legal proceedings for crimes envisaged by the Decree;
- any reports prepared by the Area Managers or by the Head of School or by the Sole Auditor as part of their control activities and from which facts, acts, events or omissions with critical profiles with respect to compliance with the provisions of the Decree may emerge;

- the disciplinary procedures carried out and any sanctions imposed in reference to the provisions of the Model and the crimes envisaged by the Decree;
- reports relating to the commission of crimes envisaged by the Decree, coming both from RIS, and from controlled and associated companies, and from companies or entities that are part of the corporate structure (All. 4 “Whistleblowing procedure for reporting crimes and irregularities”)

4. Information on events or facts provided for within the Internal Protocols

The Supervisory Body will have access to the documentation required by the individual specific parts of the Model, such as:

- the "Intervention sheets", containing the data of the different management phases of the initiatives.
- the contracts stipulated, the agreements signed, the projects started, the assignments received and confirmed and anything else the company commits to the Public Administration and third parties.
- the declarations, issued by employees and collaborators, in such a way as to protect the privacy of the subject, regarding kinship or affinity relationships with subjects who belong to the Public Administration.
- the minutes of the Board of Directors, of the Sole Auditor and of the documentation exchanged with the auditing company responsible for the legal audit of the financial statements.

5. Method of Transmitting Information

Reports of the data and facts referred to in the previous paragraphs must be sent to the Supervisory Body through written communications, expressly indicating that the correspondence is reserved for the Supervisory Body, or communications via e-mail, using the specific address reserved for the Supervisory Body; the report must strictly contain:

- the qualification of the existing relationship with the Company (employee, director, auditor, collaborator, etc.);
- the reference to the provisions of the Model and the crimes envisaged by the Decree;
- the provisions and information coming from judicial police bodies or any other authority, from which it is clear that investigations have been carried out, even against unknown persons (but falling within the sphere of reference of the RIS), for the crimes referred to in the Decree ;
- requests for legal assistance forwarded by staff, in the event of initiation of legal proceedings for crimes envisaged by the Decree;

- any reports prepared by the Area Managers or by the administrative body or by the Sole Auditor as part of their control activities and from which facts, acts, events or omissions with critical profiles with respect to compliance with the provisions of the Decree may emerge;
- the disciplinary procedures carried out and any sanctions imposed in reference to the provisions of the Model and the crimes envisaged by the Decree;
- reports relating to the commission of crimes envisaged by the Decree, coming both from RIS, and from controlled and associated companies, and from companies or entities that are part of the corporate structure.

The above communications must be registered by the Supervisory Body on a specific protocol, kept and updated under the responsibility of the Supervisory Body itself or of a person in charge, to guarantee the anonymity of the person carrying out the communication.

False reports submitted to the SB are defined as "disciplinary offenses" and will result in the application of the relevant disciplinary sanctions (All.4 "Whistleblowing procedure for reporting offenses and irregularities").

6. Periodic Checks by the Supervisory Body

This model provides several types of checks:

1. Checks on Documents

The Corporate Bodies and Area Managers must communicate in advance to the Supervisory Body the main acts of the Company (for example: extraordinary operations, particularly large contracts, annual budget, partnership, acquisition or sale of shareholdings, agreements with other companies, etc.).

They must also provide the following documentation:

- “Intervention sheets”, containing the data of the different management phases of the initiatives;
- contracts stipulated, agreements signed, projects started, assignments received and confirmed and anything else the Company commits to the Public Administration and third parties;
- declarations, issued by employees and collaborators, in a form that protects the subject's privacy, regarding kinship or affinity relationships with subjects who belong to the Public Administration;
- minutes of the Board of Directors and documentation exchanged with the auditing company responsible for the legal audit of the financial statements.

Periodically, the Supervisory Body will carry out a verification of the most important contracts concluded by the Company in areas of activity at risk.

2. Checks on the application of the Model

At least every four months, the Supervisory Body will verify the effective application of this Model.

Furthermore, at least once a year the SB must carry out a surprise check on sensitive company activities.

3. Examination of the reports received

The SB must promptly examine the reports that come to its attention according to the procedures adopted by the LUDUM (All. 4 - "Whistleblowing procedure for reporting crimes and irregularities").

For each report, you must leave evidence of receipt, of the verification carried out, of the actions taken and of any reports made to the other interested parties (Board of Directors, Head of School, Sole Auditor, Judicial Authority, etc.).

Periodically the SB will issue a report on the activity performed, containing an indication of the checks carried out and the reports received, the outcome of the actions undertaken, and the feedback received.

The above report will be sent to the Board of Directors, the **Head of School** and the Sole Auditor.'

ELEMENTS OF THE GOVERNANCE MODEL AND THE ORGANISATIONAL STRUCTURE OF LUDUM

LUDUM has adopted a traditional governance system.

The body of the Company is the **Board of Directors** which appoints the **Head of School**, while the Sole **Auditor** carries out the function of control body. The corporate areas analysed - which refer to the Company's General Organization Chart - which were considered in the creation of the Organization and Management Model, are listed and analyzed below.

1. President of the Board of Directors – Head of School

The person of the **President of the Board of Directors** coincides with that of the **Head of School (HoS)**

As per the minutes of the Board of Directors of 16 December 2025, the Head of School in addition to the powers that cannot be delegated by law or by the Articles of Association, reserves the following powers without the right to sub-delegate:

1. represent the Company in all relations with social security, welfare, insurance, and accident institutions and with labor and employment offices.
2. represent the Company before the public security authorities and the fire brigade, drafting and signing the appropriate reports, declarations and complaints.

In general, the exercise of a public administrative function is recognized with reference to persons who form or contribute to forming the will of the public body, who represent it before third parties, or who are vested with certifying powers.

- **Instigation to corruption between private individuals (Article 2635-bis of the Italian Civil Code)**

Anyone who disseminates false information, or engages in simulated transactions or other artifices specifically designed to cause a significant alteration in the price of unlisted financial instruments or instruments for which no application for admission to trading on a regulated market has been submitted, or to significantly affect the public's confidence in the financial stability of banks or banking groups, shall be punished with imprisonment for a term of between one and five years.

- **Obstruction of the functions of public supervisory authorities (Article 2638 of the Italian Civil Code)**

Administrators, general managers, executives responsible for preparing corporate accounting documents, auditors and liquidators of companies or entities and other persons subject by law to public supervisory authorities, or bound by obligations towards them, who, in communications to the aforementioned authorities required by law, in order to obstruct the exercise of supervisory functions, present material facts that are untrue, even if subject to assessment, concerning the economic, equity or financial situation of those subject to supervision or, for the same purpose, conceal by other fraudulent means, in whole or in part, facts that they should have communicated concerning the same situation, shall be punished with imprisonment for a term of between one and four years.

The punishment shall also apply in cases where the information concerns assets owned or administered by the company on behalf of third parties.

To simplify matters, some of the above offences could be classified as follows:

- **Prevented inspection**

The HoS or the Administration Manager, in order to avoid revealing a particular situation that could influence the judgement of the Sole Auditor or the Group's auditing firm, conceals documents or engages in deception in order to prevent or hinder the control activity.

- **Transactions detrimental to creditors**

The Shareholders' Meeting reduces the capital or carries out extraordinary transactions, causing damage to creditors.

- **Failure to disclose conflict of interest**

The law provides for a criminal penalty of imprisonment for one to three years for directors who fail to disclose their own interest in a transaction, if such omission has caused damage to the company or to third parties.

Paragraph 2 of Article 2629-bis of the Italian Civil Code provides for the administrative liability of the entity for the same offence.

This is an offence of damage, since, for the criminal conduct to be consummated, actual damage to the protected legal interest is required; the conduct that the legislator intended to punish is, therefore, exclusively that which causes damage to the company or third parties.

In this regard, it is interesting to note that, since the company itself is most often the party damaged by the criminal conduct committed by the HoS, the criminal offences that may involve administrative liability on the part of the entity do not so much concern the conduct of directors to the detriment of the company to which they belong, but exclusively conduct that causes damage to third parties.

All activities related to the management of relations with third parties are therefore at greater risk.

➤ **Fictitious accumulation of capital**

For example, the Shareholders' Meeting that artificially increases LUDUM's capital through extraordinary transactions (overvaluation of contributions, mergers or other contributions in kind for amounts lower than the nominal value of the share capital increase).

➤ **Activities outside the company**

The same offences may be committed by LUDUM personnel or by other individuals appointed by the company to represent it in the governing bodies of subsidiaries or affiliates.

The conduct that constitutes the above offences occurs when the representative of RIS, in their capacity as Director or Statutory Auditor, acts to ensure that the financial statements and disclosures of the subsidiary or affiliate are manipulated and that controls are influenced to the advantage of RIS.

● **Corruption between private individuals**

With reference to the legislation introduced by Law No. 190 of 6 November 2012 ("provisions for the prevention and repression of corruption and illegality in public administration reformed") which came into force on 28 November 2012, note the radical amendment to Article 2365 of the Italian Civil Code, which introduced a reference to corruption between private individuals, subject to the applicability of the offence to the fact that the conduct does not constitute a more serious offence.

The aforementioned legislation expressly includes, among the active subjects, those subject to the management or supervision of others; furthermore, the giving or promising of benefits may now be accepted "for oneself or for others" by the active subjects, and the performance or omission of the act may take place not only in violation of the obligations inherent in their office, but also of their "obligations of loyalty".

Letter s-bis of Article 25-ter, referring to "the cases provided for in the third paragraph of Article 2635 of the Italian Civil Code", provides that only the company to which the corrupting person belongs may be sanctioned, since, obviously, only this company can benefit from the corrupt conduct, while the company to which the corrupted person belongs suffers damage as a result of the breach of official duties or loyalty.

The provision of aggravating circumstances remains confirmed (in the fourth paragraph of Article 2635 of the Italian Civil Code) in cases where the corruption involves companies with securities listed on regulated markets in Italy or other European Union countries or widely held by the public.

Proceedings may be brought by the injured party unless the act results in a distortion of competition in the acquisition of goods or services. It should be noted that, pursuant to Article 8 of Legislative Decree No. 231/2001, in the event of withdrawal of the complaint, any liability on the part of the entity remains. With specific reference to the new offence of "corruption between private individuals", although it is classified

as a corporate offence, it should be noted that it is more closely related to offences against the public administration.

Therefore, in relation to this offence, all LUDUM employees who have a direct relationship with the public administration and with the recipients of payments are at potential risk.

A. Activities at risk

Based on the above, LUDUM's activities that present a risk in relation to corporate offences could be as follows:

- 1) preparation of financial statements;
- 2) preparation of reports accompanying the financial statements;
- 3) corporate communications;
- 4) formation of share capital;
- 5) relations with creditors.

B. Functions at Risk

The HoS, the Sole Auditor (Sindaco Unico) and the Administration Manager are the individuals most exposed to the risk of corporate crime.

C. Guidelines

It is necessary to:

- maintain the stratification of decision-making powers and the distinction of roles within the LUDUM organisation with regard to relations with third parties;
- implement information flows directed to the Supervisory Body regarding operations to be carried out "outside the threshold" or in derogation from the standards adopted by the company or, in any case, whenever a critical issue or potential conflict of interest with a third party arises;
- identify - where possible - "other benefits" that may constitute consideration for a possible corrupt agreement (gifts to customers, gadgets, sponsorships to clubs, associations and so on, attributable to an entity/customer/third party or its individual managers); in this regard, any gifts, benefits or advantages must never consist of cash payments and must always be 'reasonable' according to common sense parameters.

All employees are required to ensure that the information provided to the HoS, the Sole Statutory Auditor and the SB is up to date and complete; employees of the Administrative Area and the Personnel Office, in particular, have the specific responsibility of ensuring that the Company's accounting practices guarantee the above-mentioned parties full, correct, accurate and timely cooperation in providing economic and financial data on the Company itself.

Employees who are aware of possible omissions, falsifications, alterations of accounting records and/or related documents, and who highlight anomalies or situations that are inconsistent and incoherent, are required to immediately notify their direct manager or the Supervisory Board.

With regard to opportunities to commit corporate offences, risk management is carried out using the tools indicated below..

In general:

- by distributing the Code of Ethics to all employees and corporate bodies, and by publishing it on the notice board at the headquarters and offices and on the LUDUM website;
- by specifically requesting, upon delivery, that the Code be strictly applied and observed;
- by expressing the firm intention to apply sanctions in the event of non-compliance;
- through the inspection and compliance activities of the Sole Auditor, the Independent Auditors and the Supervisory Body.

In this specific case:

- specific checks on compliance with internal regulations governing accounting and financial statements;
- the timely and complete preparation and submission to the HoS and the Sole Auditor of the documentation relevant to each decision on the agenda; draft financial statements and reports, as well as the opinion of the independent auditors and the budget for the following financial year;
- sending the SB a copy of the communications issued by the independent auditors and the final report of the Sole Auditor;
- ensuring the traceability of every transaction that generates in an accounting entry.

1) *Prohibited behaviour*

Recipients of the Model are prohibited from:

- representing or transmitting, for processing and representation in financial statements, reports and prospectuses or other corporate communications, false, incomplete or otherwise inaccurate data on the economic, equity and financial situation of the Company;
- omitting data and information required by law on the economic, equity and financial situation of the Company;
- carrying out simulated transactions or spreading false information likely to cause a significant alteration in the price of financial instruments;
- presenting facts that do not correspond to reality in communications addressed to the supervisory authorities, or concealing relevant facts relating to the economic, equity and financial conditions of the company.

2) *Obligations for the recipients of the model*

All those who, due to their position and role, make decisions and resolutions, individually or collectively, relating to the management of the Company and its governance, in particular senior managers, as well as all employees who collaborate in these activities in any capacity, are required to comply with the following requirements:

- Strict compliance with the law, the Articles of Association and internal regulations relating to the functioning of corporate bodies, as well as any transactions involving share capital. Prohibition on disclosing material facts that are untrue, even if subject to evaluation, omitting information and concealing data in violation of regulatory principles and company rules, in order to mislead the recipients of the financial statements and other documents representing the economic, equity and financial situation of the Company;
- fairness, lawfulness and integrity, compliance with regulatory principles and internal procedural rules in the preparation and processing of data, accounting documents and the Company's financial statements and in their external representation, also for the purpose of guaranteeing the rights of shareholders and the proper functioning of the market;
- compliance with the principles of loyalty, fairness, cooperation and transparency in activities and relations with supervisory and control functions and authorities and auditing firms. Clarity, truthfulness and compliance with company policies and programmes in external communications, reserving relations with the media to the relevant company departments;
- the transmission of data and information to the responsible department is carried out through a system (including IT) that allows the tracking of individual steps relating to the processing of accounting flows and the identification of the persons who enter the data into the system;
- ensuring the smooth running of the Company and its corporate bodies, guaranteeing and facilitating all forms of internal control over corporate management required by law, as well as the free and proper formation of the will of the shareholders' meeting;
- strict compliance with all legal provisions protecting the integrity and effectiveness of the share capital, so as not to prejudice the guarantees of creditors and third parties in general. Strict compliance with internal procedures designed to ensure correct and timely reporting to supervisory bodies;
- behave in a proper, transparent and cooperative manner, in compliance with the law and internal company procedures, in all activities aimed at preparing the financial statements and other corporate communications, in order to provide shareholders and third parties with truthful and accurate information on the Company's economic, equity and financial situation.
- timely, correctly and in good faith carry out all necessary communications with the Supervisory Authorities, without hindering the exercise of their supervisory functions.

7. GUIDELINES FOR THE PREVENTION OF CRIMES AGAINST INDIVIDUALS

- Making available to the public, in a telematic network system, through connections of any kind, a protected intellectual work, or part thereof (Article 171, paragraph 1, letter a-bis, Law No. 633/1941)

A. Risk area

1. School plays

Schools may stage theatrical performances, and it is therefore important to remember to respect copyright and the related fees payable to the SIAE (Italian Society of Authors and Publishers).

In particular:

it is possible to adapt a pre-existing work that has fallen into the public domain, provided that seventy years have passed since the death of the author; if, on the other hand, the pre-existing work is still protected, the adaptation can only be carried out with the authorisation of the copyright holder. Transpositions, adaptations

and translations carried out without the consent of the rights holders are strictly prohibited, even in cases where the text is declared to be “freely adapted from...”, “inspired by...” or “based on an idea by...”.

To use a theatrical work by a foreign author, you must contact the DOR section. If the author is a member of a foreign sister society with which SIAE has reciprocal relations or is represented in Italy by a concessionaire, the DOR Section will consult the rights holder and issue a licence for use.

An amateur theatre company wishing to stage works not protected by SIAE must still request prior authorisation from SIAE to ensure that no repertoire protected by SIAE (music, literary works, theatrical works by other authors, etc.) is used.

2. Photocopies

The law of 18 August 2000, no. 248, which supplements and amends the copyright law, contains certain provisions governing reprography, i.e. the reproduction of intellectual works by means of photocopying, xerocopying or similar processes.

The legislation concerns works protected by copyright law (i.e. creative works belonging to the fields of science, literature, music, visual arts, architecture, theatre and cinematography) for the entire lifetime of the author and extended until 31 December of the 70th year after his or her death; after this period, the work is considered to be in the public domain and may be freely reproduced.

The law now allows the photocopying of protected works, but only “for personal use” and up to a maximum of 15% of each volume or issue of a periodical, excluding advertising pages.

Reproduction “for personal use” is that which may be carried out for one's own purposes of reading, study, consultation and not for commercial use or to make other copies for distribution to others, either for payment or free of charge. However, any use made in competition with the author's economic rights is excluded.

Agreements have already been concluded with the Ministry of Education for the photocopying of texts in school libraries; with local authorities represented by the Conference of Presidents of Regions and Autonomous Provinces, the Union of Italian Provinces (UPI) and the National Association of Italian Municipalities (ANCI), for the payment of copyright fees relating to the photocopying of books in local authority libraries; with the C.R.U.I. (Conference of Italian University Rectors) for copies made within universities; with the A.I.C.I. (Association of Italian Cultural Institutions) for photocopies made in the libraries of cultural institutions; with UNIONCAMERE for photocopying carried out in the libraries of chambers of commerce; with MiBAC (Ministry of Cultural Heritage and Activities) for photocopying carried out in state public libraries; and with the Bank of Italy for photocopying carried out in its library.

The introduction and preface are an integral part of the text, and therefore the 15% must be calculated on the total number of pages in the book, excluding advertising and including the introduction, preface, index and bibliography.

To photocopy an entire volume, therefore, specific authorisation must be obtained from the rights holders. To this end, the SIAE may be contacted.

The law does not provide for any time limit, and repeated reproduction, resulting in photocopying in excess of the 15% limit, is not permitted. A copy shop is considered to be complicit in the offence if it is aware that a user is violating the law by visiting the shop several times and asking to copy less than 15% each time.

Photocopies of photocopies are legal if they are within the limits set by law (15% - personal use) and provided that the photocopies to be reproduced bear the identification details of the work (title, author, publisher, etc.).

Photocopies cannot be reproduced from anonymous photocopies, i.e. those without any element that allows the text from which they are taken to be identified (author, publisher, etc.).

Law 248/2000 also applies to books published abroad (European and non-European).

Copyright law does not allow digital reproduction (e.g. from paper to digital file, obtained by scanning), which must always be authorised by the publisher. Subsequent reproduction from file to paper is also not permitted.

Texts cannot be downloaded from the Internet to make photocopies unless this activity is expressly authorised by the rights holders.

Photocopies of daily and weekly newspapers are also subject to the law: there are no exemptions in this regard.

3. Photocopies for educational purposes

The reproduction of multiple copies of certain pages of a text does not fall within the scope of “personal use”; in order to make this use lawful, which has been tolerated but not authorised by law until now, a specific agreement must be drawn up between publishers and the Ministry of Education. At present, multiple copies are prohibited, and the educational purposes that limit copyright are exclusively those expressly provided for by law and by the agreements entered into.

4. Protected works

The following are protected, provided they are creative in nature:

- literary, scientific, educational and religious works;
- dramatic works;
- musical works;
- lyrical works;
- choreographic and pantomime works;
- works of sculpture, painting and drawing;
- computer programmes;
- creative adaptations of the original work;
- photographic works;
- architectural designs and works;
- databases;

- industrial designs;
- collective works (magazines and newspapers).

Reproduction by photocopying is subject to the copyright regulations set out in Law No. 633/41.

5. Teaching materials

Teaching materials distributed with authorisation to photocopy by the school must have authorisation issued by the rights holders (authors and publishers) and not by other parties who do not hold the rights (e.g. teachers, the school, etc.).

Maps, if part of a book or periodical, may be reproduced up to a limit of 15% and subject to payment of royalties.

They may not be freely reproduced if they are not part of a volume or periodical.

Activities that are sensitive for the purposes of Legislative Decree 231/2001 in relation to copyright offences are those relating to:

the management of relations with parties purchasing IT products (Administrative Area);

management and use of software licences in business activities: this activity includes the purchase, installation and management of both operating systems and application software on the Entity's servers and personal computers.

preparation of teaching materials: this activity requires particular attention to be paid to teaching materials used in all courses. As already mentioned, the reproduction of photos, logos and/or any images must always be monitored and, above all, used solely and exclusively for these purposes, ensuring their distribution and avoiding their disclosure outside the educational sphere (Teaching Area).

A. Activities at Risk

The activities carried out by LUDUM involve a low risk of the environmental offences listed above being committed, with the exception of the following two areas:

1) **management of canteen activities and cleaning of teaching spaces;**

2) **management of authorisation and verification aspects by the control bodies:** i.e. all activities governed by the Operational Protocol regulating the management of relations with public officials in the context of inspection and control activities carried out by the Public Administration in the field of environment, health and safety, with the identification of the personnel responsible for managing these activities, as well as those relating to the management of relations with public entities for the purpose of obtaining authorisations or administrative measures (authorisations, licences and permits) necessary for the exercise of the company's typical activities, also with reference to the risk of impediment to control. L'attività svolta dalla LUDUM implica un basso rischio che possano essere compiuti i reati ambientali sopra elencati, ad eccezione dei seguenti due ambiti:

B. Functions at Risk

Head of School, Head of Administration and the School Manager

C. Guidelines

1) Obligations for recipients of the Model:

Regulations aimed at reducing the risk of environmental crimes must include:

- precise rules for classifying different types of waste in accordance with Legislative Decree 152 of 2006, based on information relating to the nature, origin and composition of the waste;
- identification of all waste and/or related containers by affixing a label or sign bearing the name of the waste and its EWC code;
- drafting of a specific list indicating the different types of waste treated and produced by RIS, the classification assigned and the related operational management methods;
- updating of the list in the event of new waste, indicating the related operational instructions and/or other operational control measures, subject to assessment of health and safety risks or new environmental aspects;
- identification of authorised and qualified transporters and disposers to manage the various types of waste treated and produced by LUDUM, requesting a copy of the respective authorisation from each of them and keeping it on file;
- verification that the special waste treated is stored in specific dedicated areas and that the management of the relevant temporary storage areas is carried out in compliance with current legislation, also taking into account that the quantities provided for by law are not exceeded;
- verify that the containers of the aforementioned waste cannot cause spills into the ground and sewers: in particular, the ground in hazardous waste storage areas must be protected from the elements, fenced off, paved with concrete/asphalt and must not have direct drains into the sewer system (e.g. manholes);
- in the case of transport of waste subject to the regulations for the transport of dangerous goods, preparation of appropriate shipping documents;

- verification that waste containing hazardous substances is packaged and labelled in accordance with current legislation.

With regard to the **temporary storage of waste**, LUDUM:

- ensures that the location is indicated on the site plan;
- ensures that hazardous waste is collected and sent for recovery or disposal at least every two months, regardless of the quantities stored, or, in the case of non-hazardous waste, that it is collected and sent for recovery or disposal at least every three months, regardless of the quantities stored;
- verifies that waste is stored separately in dedicated and marked areas and, where necessary, fenced off. The containers used must not allow spillage into the ground or sewers.

With regard to possible emissions into the atmosphere, the regulation of the activity must provide for:

- mapping of all existing emission points with specific indication of points subject to authorisation by the competent local authorities pursuant to Presidential Decree 203/88 - whether pre-existing or subsequent to the entry into force of the decree, or emission points with reduced atmospheric pollution not subject to this legislation;
- creation of emission points in compliance with the provisions of current legislation;
- planning of annual monitoring of all emission points;
- identification of each emission point by affixing a specific plate bearing the relevant identification number;
- drawing up of a plan indicating the location of the individual emission points.

17. GUIDELINES FOR THE PREVENTION OF TAX OFFENCES

Offences attributable to the Entity pursuant to Article 25-quinquiesdecies of Legislative Decree No. 231/2001

For the purposes of the tax legislation referred to in the aforementioned Legislative Decree No. 74/2000, the following general definitions applicable to all predicate offences relating to taxation shall apply:

- a) ‘invoices or other documents for non-existent transactions’ means invoices or other documents having similar probative value under tax regulations, issued for transactions that have not actually been carried out in whole or in part, or that indicate amounts or value added tax higher than the actual amounts, or that refer the transaction to parties other than the actual ones;
- b) ‘assets or liabilities’ means the components, expressed in figures, which contribute, positively or negatively, to the determination of income or taxable bases relevant for the purposes of applying income or value added taxes, and the components that affect the determination of the tax due;
- c) ‘declarations’ also means declarations submitted in the capacity of director, liquidator or representative of companies, entities or natural persons or as a withholding agent, in the cases provided for by law;
- d) the ‘purpose of evading taxes’ and the ‘purpose of enabling third parties to evade taxes’ shall also include, respectively, the purpose of obtaining an undue refund or recognition of a non-existent tax credit, and the purpose of enabling third parties;
- e) with regard to acts committed by persons acting as directors, liquidators or representatives of companies, entities or natural persons, the ‘purpose of evading taxes’ and the ‘purpose of evading payment’ are understood to refer to the company, entity or natural person on whose behalf they are acting;
- f) ‘evaded tax’ means the difference between the tax actually due and that indicated in the tax return, or the entire tax due in the case of failure to file a tax return, net of any sums paid by the taxpayer or by third parties as advance payments, withholding taxes or in any other way in payment of said tax before the tax return was filed or the relevant deadline expired; theoretical tax that is not actually due in connection with a downward adjustment of losses for the financial year or previous losses that are due and usable is not considered evaded tax;
- g) the “punishment thresholds” relating to evaded tax are also extended to the amount of the undue refund requested or the non-existent tax credit shown in the tax return;
- h) “objectively or subjectively simulated transactions” means apparent transactions, other than those governed by Article 10-bis of Law No. 212 of 27 July 2000, carried out with the intention of not carrying them out in whole or in part, or transactions involving fictitious intermediaries;
- i) ‘fraudulent means’ means active fraudulent conduct and omissions in violation of a specific legal obligation, which result in a false representation of reality.

- **Fraudulent declaration through the use of invoices or other documents for non-existent transactions (Art. 2, paragraph 1 and paragraph 2-bis, Legislative Decree No. 74 of 10 March 2000)**

Anyone who, in order to evade income or value added tax, uses invoices or other documents for non-existent transactions to indicate fictitious liabilities in one of the declarations relating to said taxes shall be punished with imprisonment for a term of between four and eight years.

The offence is considered to have been committed using invoices or other documents for non-existent transactions when such invoices or documents are recorded in the mandatory accounting records or are held for the purpose of providing evidence to the tax authorities.

If the amount of the fictitious liabilities is less than one hundred thousand euros, imprisonment for a term of between one year and six months and six years shall apply.

- **Fraudulent declaration by other means (Article 3 of Legislative Decree No. 74 of 10 March 2000) □**

Except for the cases provided for in Article 2, anyone who, in order to evade income or value added tax, carries out objectively or subjectively simulated transactions or uses false documents or other fraudulent means to obstruct assessment and mislead the tax authorities, shall be punished with imprisonment for a term of between three and eight years. Indicates in one of the declarations relating to said taxes assets for an amount lower than the actual amount or fictitious liabilities or fictitious credits and withholdings, when, jointly:

a) the evaded tax exceeds, with reference to any of the individual taxes, thirty thousand euros;

b) the total amount of assets subtracted from taxation, including through the indication of fictitious liabilities, exceeds five per cent of the total amount of assets indicated in the tax return, or in any case exceeds one million five hundred thousand euros, or if the total amount of fictitious credits and withholdings reducing the tax is greater than five per cent of the amount of the tax itself or, in any case, thirty thousand euros.

The offence is considered to have been committed using false documents when such documents are recorded in the mandatory accounting records or are held for the purposes of evidence against the tax authorities.

For the purposes of applying the provision of paragraph 1, the mere violation of the obligations to invoice and record assets in the accounting records or the mere indication in invoices or records of assets lower than the actual ones does not constitute fraudulent means.

- **False Declaration (art. 4 of law 74/2000)**

Except for the cases provided for in Articles 2 and 3, anyone who, in order to evade income tax or value added tax, indicates in one of the annual tax returns relating to such taxes assets for an amount lower than the actual amount or non-existent liabilities, shall be punished with imprisonment for a term of between two years and four years and six months, when, jointly:

a) the evaded tax exceeds €100,000 for any of the individual taxes;

b) the total amount of assets evaded, including through the indication of non-existent liabilities, exceeds ten per cent of the total amount of assets indicated in the tax return, or, in any case, exceeds €2 million.

For the purposes of applying the provision of paragraph 1, no account shall be taken of the incorrect classification or valuation of assets or liabilities that objectively exist, in respect of which the criteria actually applied have in any case been indicated in the financial statements or in other documentation relevant for tax purposes, of the violation of the criteria for determining the relevant financial year, of the non-relevance or non-deductibility of actual liabilities.

Except for the cases referred to in paragraph 1-bis, valuations that, when considered as a whole, differ by less than 10 per cent from the correct ones shall not give rise to punishable offences. The amounts included in this percentage shall not be taken into account when verifying whether the thresholds for punishment provided for in paragraph 1, letters a) and b) have been exceeded.

- **Failure to declare (art. 5 d.lgs. 74/2000)**

Anyone who, in order to evade income tax or value added tax, fails to submit one of the declarations relating to said taxes, when required to do so, shall be punished with imprisonment for a term of between two and five years(1), when the tax evaded exceeds fifty thousand euros with reference to any of the individual taxes.

Anyone who fails to submit a withholding tax return, when required to do so, shall be punished with imprisonment for a term of between two and five years(2), when the amount of unpaid withholding tax exceeds fifty thousand euros.

For the purposes of the provisions of paragraphs 1 and 1-bis, a return submitted within ninety days of the deadline or not signed or not drawn up on a form complying with the prescribed model shall not be considered omitted.

- **Issuing invoices or other documents for non-existent transactions (Article 8, paragraph 1 and paragraph 2-bis, Legislative Decree No. 74 of 10 March 2000)**

Anyone who, in order to enable third parties to evade income or value added tax, issues or releases invoices or other documents for non-existent transactions shall be punished with imprisonment for a term of between four and eight years.

For the purposes of applying the provision set out in paragraph 1, the issue or release of multiple invoices or documents for non-existent transactions during the same tax period shall be considered a single offence.

If the amount indicated in the invoices or documents that does not correspond to the truth, per tax period, is less than one hundred thousand euros, imprisonment from one year and six months to six years shall apply.

- **Concealment or destruction of accounting documents (Article 10 of Legislative Decree No. 74 of 10 March 2000)**

Unless the act constitutes a more serious offence, anyone who, for the purpose of evading income tax or value added tax, or of enabling third parties to evade such taxes, conceals or destroys, in whole or in part, accounting records or documents that must be retained, so as to prevent the reconstruction of income or turnover, shall be punished with imprisonment for a term of between three and seven years.

- **Fraudulent evasion of tax payments (Article 11 of Legislative Decree No. 74 of 10 March 2000) □**

Anyone who, in order to evade payment of income tax or value added tax, or interest or administrative penalties relating to such taxes, for a total amount exceeding fifty thousand euros, fraudulently disposes of

or performs other fraudulent acts on their own or others' assets, rendering the enforcement procedure wholly or partially ineffective, shall be punished with imprisonment for a term of between six months and four years. If the amount of taxes, penalties and interest exceeds two hundred thousand euros, imprisonment for a term of between one and six years shall apply.

Anyone who, in order to obtain for themselves or others a partial payment of taxes and related accessories, indicates in the documentation submitted for the purposes of the tax settlement procedure assets for an amount lower than the actual amount or fictitious liabilities for a total amount exceeding fifty thousand euros shall be punished with imprisonment for a term of between six months and four years. If the amount referred to in the previous period exceeds two hundred thousand euros, imprisonment from one to six years shall apply.

- **Unlawful compensation (Article 10-quater of Legislative Decree 74/2000)**
