

## **St. Paul Public Schools About the Report: Oct 1 to Oct 1 Continuation Rate**

### **About the Data Source, Measures, and Metrics**

The graphs and tables in this set of dashboards are based on official October 1 enrollment (maintained in static files).

Cohorts for each Continuation Period (CP; e.g., CP 24→25) are defined by students enrolled in the official October 1 enrollment of the first year (e.g., SY 2023-24). The analyses are based on the matching of student October 1 enrollment records of the first year to that of the second year (e.g., SY 2024-25) at the individual student level. Thus, the CP 24→25 same-school continuation rate indicates the percentage of students enrolled in a given school on October 1, 2023 (SY 2023-24) who were still enrolled at that same school on October 1, 2024 (SY 2024-25).

EC students served in Pre-K classrooms are included in the analyses with grade PK. EC students served in self-contained classrooms are excluded. The analyses exclude grade 12 students as they are generally expected to graduate.

### ***School Oct 1 to Oct 1 Continuation***

--The school continuation rate analyses include students in traditional schools only. Students who were in alternative programs, treatment centers, or correctional institutions in the first year are excluded. To see the full list of schools included in school continuation rate analyses, please see the School Continuation by School dashboard.

--The analyses include only those students who could logically be expected to stay in the same school based on the grades offered in that school (or in a unified elementary or K-8 program). The analyses in recent years exclude most grade 5 and grade 8 students, as these students generally transitioned to new schools for grade 6 or grade 9.

--The unified programs for these analyses include Global Arts Plus Lower & Upper, Nokomis Montessori North & South, Farnsworth Lower & Upper, and Txuj Ci Upper and Lower.

### ***District Oct 1 to Oct 1 Continuation***

--The district continuation rate analyses include students in both traditional and non-traditional schools.

--Because all grades are offered within the district, no students are excluded based on grade (except for grade 12), regardless of their ability to remain in the same school at the next grade level.

## St. Paul Public Schools - School Oct 1 to Oct 1 Continuation Rate Trend by School Type

Includes students in traditional schools who could be expected to stay in the same school based on the grades offered in that school (or unified program)

## St. Paul Public Schools - School Oct 1 to Oct 1 Continuation Rate Trend by School

Includes students in traditional schools who could be expected to stay in the same school based on the grades offered in that school (or unified program)
