

April

7th & 8th Grade Math + Algebra

What We Are Learning

7th Grade - Students will learn about Data and Statistics which includes: bar graphs, circle graphs, box plots, and dot plots. This is our last unit. We will then move onto STAAR review.

7th Honors - we are learning about volume, simple interest, and compound interest. We will start reviewing all concepts to prepare for success on STAAR.

8th Grade & Algebra I - we are digging in deep to review for the math STAAR!

Talk About Learning

7th Grade - Look at the average 7-day temperatures for two U.S. cities. Record each set of data, and create a box plot or dot plot for each city. Which city's average temperature is more consistent lower range from day to day? Which city has greater variability in temperatures higher range?

7th Honors - We are starting to review all concepts. Ask your student about their learning. Have them explain the concepts they review.

Important Reminders

Bring your pencil and binder to class daily!

Upcoming Events

4/2 - Volume Quiz (7th Honors)

4/7 - Data Quiz (7th/tentative)

4/28 - Math STAAR

Misc.

We are in need of tissues, hand sanitizer and pencils.
