0860 - ENGINEERING

✓ REQUEST

Final - Vocational Education Credits: 1.000

Units: 4

Engineering is a year-long course that will cover basic construction principles and practices. Emphasis will be placed on design, geometric theories, construction, and evaluation/testing. Some projects may include robotic arms, electric cars, scale model bridges, roof trusses, geodesic domes, residential wall framing, tower building, pneumatic structures, and concrete work. Pre-engineering software and sketching will be used. This class will be taught from a hands-on, problem-solving approach.

Prerequisite: CAD I and consent of the instructor.

- A full year course will be worth 1 credit
- A semester course will be worth .5 credit
- You do not need to worry about the units

0822 - BAKING & PASTRY

Final - Vocational Education Credits: 0.500

Units: 2

This course introduces the functions of baking ingredients including flour, sugar, fat, eggs, and liquids. Students will be introduced to methods and equipment used in a commercial bakeshop. Units include bakery measuring techniques, preparation of a variety of yeast breads, cake variations, cake decorating, cookies, pastry techniques and plated desserts. Students will be introduced to methods of mass production and will evaluate the quality of items which they produce.

Prerequisite: Gr. 11 & 12.
