Monthly Reports

Staffing Update: Since the January 12 SBDM meeting, there are no staffing openings. We can announce that we hired Tabaitha Hasty for our vacant English Position.

Behavior:

Total Referrals - 306	through 2/9/26	9th Grade - 122 referrals
Minor - 99 referrals		10th Grade - 73 referrals
Major - 207 referrals		11th Grade - 70 referrals
		12th Grade - 41 referrals

Academic Progress Check:

We did set a concrete date for the Junior School Day SAT. It will be on March 24, 2026 and all of the Juniors will take the SAT on that day at school. We have moved our Mock SAT from this Tuesday February 10th to Tuesday February 17th. NTI (Non-Traditional Instruction) days were used this last week because of the weather. NTI Days were a learning curve for teachers and administrators for teaching, learning and documenting the lessons and student work samples from those NTI days.

Budget:

Section 6 - January Balance - \$33,296.31 - February Balance - \$25,553.39
 Student Activity - January Balance - \$37,036.08 - February Balance - \$30,013.81

110201 Introduction to Programming/Coding I

No Prerequisites

Course Code - 110201

Grades 10-12

18 weeks - Semester Course (1.0 credit)

Description

This course introduces students to the fundamentals of computer programming and how software is designed and developed. Students will learn how to write, test, and troubleshoot programs using the programming language Python. Through hands-on activities and projects, students will explore how programmers analyze problems and create step-by-step solutions that computers can follow. Instruction will cover core programming concepts such as data types, variables, control structures (like loops and conditionals), basic data structures, error handling, modular programming, and working with files.

110201-1 Introduction to Programming/Coding II

Prerequisite - Coding I

Course Code - 110201-1

Grades 10-12

18 weeks - Semester Course (1.0 credit)

Description

This course requires the completion of Programming / Coding I. This course builds on the programming skills introduced in Intro to Programming/Coding 1 and continues to develop students' understanding of computer programming using Python. Students will strengthen their problem-solving and computational thinking skills as they analyze problems, design algorithms, and write, test, and debug programs. Instruction expands on core concepts such as control structures, data structures, and modular programming while introducing more advanced topics including functions with parameters and return values, basic algorithms, and improved code organization. Through hands-on projects, students will create more complex programs that combine multiple programming concepts and apply them to real-world problems. The course also introduces broader computer science ideas such as user interface design, the capabilities and limits of computers, and the societal and ethical impacts of computing, helping students understand both how programming works and why it matters in today's world.
