ELEMENTARY TECHNOLOGY AGREEMENT FOR PARENTS

At Grand Rapids Christian Schools, our mission is to ***prepare students to be effective servants of Christ in contemporary society***. Technology is a tool that supports learning helping students research, create, analyze, communicate, collaborate and grow as learners. As a Christian school community, we expect technology to be used in ways that reflect our core values of **Christ, Community, and Commitment**.

Christ | Students are expected to use technology in ways that honor God.

Community | Technology should strengthen our learning community by protecting privacy, encouraging positive communication, and supporting learning.

Commitment | Students are responsible for caring for and using their school-issued device appropriately.

Parent/Guardian Acknowledgement

Device Care & Responsibility | Our family is responsible for repair or replacement costs if the school-issued device or accessories is damaged due to neglect or misuse.

Responsible Use | Students must abide by the GRCS Responsible Use Policy. Repeated misuse may result in restrictions on device use or other school consequences.

Internet Safety | GRCS uses internet filtering on school devices. We understand that GRCS cannot guarantee that all inappropriate material will be blocked and will not hold the school liable for content accessed.

Student Data Privacy and Software Use | Students may access school-approved platforms to create and store school-related work in accordance with GRCS guidelines.

Acknowledgment

I have reviewed this agreement and understand the responsibilities and guidelines for my student's use of GRCS technology. Students will sign the Elementary Student Technology Agreement.
