Empowering Learners, Building Resilience

Turning before- and after-school hours into meaningful opportunities for learning, belonging, and growth.

At Innovation Learning, we believe the hours before and after school matter. Our programs provide a safe, engaging environment where children learn, build confidence, and develop the skills to be independent and resilient. By combining academic support with social and emotional growth, we help children feel capable, connected, and excited to learn. Families can trust that their child is cared for and encouraged during these opportunity-filled hours.

Building Resilience Through the Circle of Courage®

Our before- and after-school programs are grounded in the Circle of Courage®, a research-based approach that helps every child, regardless of their background, build resilience through four essential values:

- **Belonging:** Your child feels safe, welcomed, and connected.
- **Mastery:** Your child experiences pride in effort, progress, and learning.
- **Independence:** Your child builds a sense of confidence, self-advocacy, and responsibility.
- **Generosity:** Your child practices kindness, teamwork, and helping others.

Together, these values help children try new things, work through challenges, and grow with confidence.

What Your Child Experiences Before and After School

Each day is welcoming, structured, and balanced to support learning and well-being. Children participate in:

- Homework support that builds skills and confidence
- Discovery play and innovation stations that spark curiosity
- Tinker challenges that encourage creativity and problem-solving
- Fun fitness and health activities that build energy and focus
- Early childhood literacy experiences for younger learners
- Community moments that help children connect and reflect

All activities are guided by trained staff who know your child and celebrate their growth.

Supporting Learning at School and at Home

Innovation Learning partners with schools to extend learning beyond the classroom while supporting positive routines children carry home. Families often notice that children feel more confident and independent, are more engaged and motivated to learn, build stronger friendships and social skills, and develop pride in trying hard and making progress.
