

BYOD Enrollment - Windows

BYOD Setup Steps

Minimum requirement is Windows 10, with a 5GHz network adapter.

Your PSJA account gives you access to enroll your personal device to use the PSJA-BYOD network. Follow the steps below to complete the BYOD Enrollment process.

Please **forget the PSJA-BYOD network** on your device if it had previously connected before this year as the process has changed.

For non-cellular devices these steps would need to be performed offsite, as these steps can be done from home or any other location with internet access.

1. Download the Company Portal App

Visit the Microsoft Store to download the Company Portal App. Use the [link](#) below or search for '[Company Portal](#)' in your device's app store.

2. Install the Company Portal App

Select Install to begin the installation of the App

3. Enter Your Account Information

Enter your account credentials to sign in.

4. Continue Process select OK

You will need to leave the "Allow my organization to manage my device" checked then click OK.

5. Select Done

Enrollment process is complete, select done.

6. Check Device Compliance

In Company Portal you can select your device name and Check access. This will verify your device is in compliance with our security requirements of having updated OS, a up-to-date Antivirus running with real time protection and other security settings. The device should pull the configuration shortly after it has confirmed to have access to company resources.

Device information

Original Name

DESKTOP-SSJG7H

7. **Wi-Fi will auto connect to PSJA-BYOD**
Now with the device enrolled to our BYOD it should auto connect to the PSJA BYOD network when on campus or at any district location.

 PSJA-BYOD
Connected, secured
