CRITICAL THINKER

About Me

Hi, I am Divino Hernandez I am 11 years old and I am in 6th grade I play seven instruments, I play saxophone, recorder, clarinet, guitar, violin, piano, cajon. My favorite instruments are the piano and the saxophone. I began as a self-taught musician on the violin and saxophone. I slowly branched out to learning other instruments. I am planning on working as a music teacher or musician (or both!) in my future. I also know I can branch out into art and music production. School has been solid in helping me learn in all different ways. For example, I am loving reading our class novel and am now interested in mythology. School can help not only with the things you think you need, but also what you need for the future to be successful and didn't even realize.

I am an Effective Communicator when I

split up our group into pods of individuals who work well together and can tackle different parts of a task. I am effective at delegating roles and jobs so that we can be successful as a group and let people shine in the areas where they are confident. I lead by example and take on an equal amount of responsibility.

Outside of school when I am in violin lessons I am not afraid to speak up and ask for help. I tend to be independent but am not afraid to ask for help.

“Are you Puerto Rican? Or Puerto Ri-can’t?” -my dad
