

ARIA RADHAY

SYNERGISTIC COLLABORATOR
CARING

About Me

I go to Nathan Hale middle school and I'm in 6th grade. I like to play my flute and hang out with my friends in and out of school. My favorite colors are black lavender. I have two sisters and two cats. I like visiting places but plane rides get me very sleepy. Brownies and bread are my favorite things to eat. My favorite classes are band and G.T.. I'm very creative and draw all my ideas on my Ipad. In my free time I draw and play VR.

I am a Synergistic Collaborator when I

work well with groups. I can understand people's ideas and opinions. I support people when I can during group work. I feel comfortable talking to people when we are working and I want to get better in groups. Being caring is important to being a synergistic collaborator because if you care about your group and work. Caring about your work means you put more work into it and want it to be as good as it can. If you care about your group you will try to work well with them. Being caring will help you be a synergistic collaborator.

“Believe you can and you're halfway there.” - President Theodore Roosevelt
