

Practicum for Senior Students:

This proposal addresses how practicum students can monitor the hallways during 1st and 2nd periods. All students will report to class for attendance and then the first group (Alpha) will monitor the hallways while (Bravo) remains in class for lecture/assignments. The Alpha group will return to class before the 2nd period transition so that the Bravo group can prepare to head out. We have enough students from both teams to cover the 1st and 2nd floor, and the gym area.

7-8 period students will report to class for attendance and all students will remain in class for lecture/assignments. All students will monitor the hallways during 8th period and cover the 1st and 2nd floors and the gym area. The students will report back to class for the final bell dismissal.

One student for each group will be in the security office assuming the role of dispatcher for the students who will be carrying training radios. Any discrepancy, or issue will be communicated to the student-dispatcher, who will in turn notify security. The student-dispatcher will be communicating via a training radio as well.

The student-dispatcher will be filling out a daily log sheet, the assigned paired students roster, and a perimeter checklist. All the students will be briefed on the expectations and understand their role. I will make adjustments as needed to accommodate the school needs.

Student Duties:

- Secure all perimeter doors.
- Report and document any unsecured perimeter door.
- Report any student restroom discrepancies.
- Report any unusual inside/outside activity.
- Secure classroom doors courteously without reprimand to the teacher.
- Students will not open any outside perimeter door for anyone. Will motion for the person to enter via the front entrance.
- Students will not escort any student out of any classroom, unless admin or security approval has been made.
- The students will not be involved in any type of physical, or verbal confrontation.

Students in this program will earn a Level II Private Security State certification at the end of the school year, which will enable them to seek employment in the private security industry. This in-school experience will set a learning foundation for the student.
