

Dear Parent/Guardian:

To enroll your child in a preschool, childcare or school, the State of Michigan requires children be fully vaccinated against diphtheria, tetanus, pertussis, measles, mumps, rubella, polio, hepatitis B, and varicella.

In addition, pneumococcal conjugate and haemophilus influenzae type b vaccines are required for preschool-aged children, and meningococcal conjugate and Tdap vaccines are required for children who are 11 years of age or older upon entry into 7th grade or higher or newly enrolled in the district.

Parents/Guardians must provide the preschool/childcare/school proof of the above vaccinations and/or valid exemptions*.

The following resources are options to obtain the required vaccinations:

- Provider’s office: Contact your provider’s office for an appointment.
- Macomb County Health Department Immunization Clinics: Contact the location for hours and appointments. Appointments are preferred. Walk-ins accepted as time allows. For more information, please visit: <https://www.macombgov.org/departments/health-department/family-health-services/immunization-clinic>.

***Non-Medical Immunization Exemption:**

- Obtained for religious or other exemption(s) to vaccine(s)
- Requires education and certification done in person at the Mount Clemens Health Department location, 43525 Elizabeth Rd., Mt. Clemens, MI 48043
- Call 586-466-6840 for an appointment
- Walk-ins are not accepted
- Issued electronically and entered into the student’s MCIR record, parents/guardians no longer required to submit a paper copy of this non-medical exemption to the school

***Medical Exemption:**

- Can only be completed by a physician (MD/DO)
- States the medical reason that prevents the child from receiving a specific vaccine(s) for a specific time
- Once completed by a physician, must be turned into the school by the parent/guardian

The MDHHS Medical Exemption and more information can be found on the Macomb County School Immunization website at:

<https://www.macombgov.org/departments/health-department/disease-control/school-immunization-program-sip>

Even with a valid exemption to a particular vaccination, a child is considered susceptible to that vaccine-preventable disease and is subject to exclusion from the school if an outbreak of the disease occurs.
