Feb 16 Brainstorm of panel questions
How do you see AI most positively impacting K–12 education in the next 3–5 years?
What ethical concerns should schools prioritize when using AI with children?
How can students use AI as a learning tool without it replacing critical thinking?
How do we ensure AI tools do not reinforce bias or widen achievement gaps?
Aside from plagiarism, what issues are likely to come up? Across a variety of grade levels?
What guardrails should districts put in place to protect student privacy and data?
What does appropriate AI use look like at different grade levels (elementary, middle, high school)?
Are any AI platforms better suited for educators than others?
What is higher eds stance on AI in college - what is acceptable, etc.
How are you achieving balance with AI and non-AI teaching and learning methods in the classroom?
How do we teach students to evaluate AI-generated information for accuracy and bias?
How can AI support teachers without increasing workload or stress?
How do we teach students to validate AI results when we know errors via AI answers can exist?
What are the most appropriate ways teachers can use AI for planning, assessment, or differentiation?
How do we ensure AI does not replace professional judgment or teacher expertise?
How can AI support personalized learning while still maintaining high expectations for all students?
How do we maintain authenticity in student work and assessment?
How do schools go through the process of determining how AI is best utilized within their district without a teacher’s bias?
How does AI support career and workforce readiness? How can we establish this as an objective?

What does AI student use look like at the elementary level? How young is too young to introduce AI?
What district-level policies should be in place before rolling out AI tools?
How do we teach students to enhance learning, not just copying was AI generates?
How do we align AI use with district goals, curriculum, and instructional frameworks?
How can schools help families understand AI and its role in learning?
Can AI provide practice and application – not just answers?
Realistically, what will learning and teaching look like with AI in 5 years? Any teaching-learning model to look at?
