Why **Stop-Arm Camera Technology** Matters

No Cost Burden

Our program improves student safety without adding financial strain to schools or taxpayers.

BUSPATROL

Protecting Students Starts with Smart Enforcement

Nearly 40 million drivers will illegally pass a stopped school bus this year. BusPatrol's school bus safety solution is designed to stop this dangerous behavior with AI-powered stop-arm camera technology and a fully managed enforcement program.

What Is Automated **Stop-Arm** Enforcement?

Automated stop-arm enforcement uses smart camera systems mounted on school buses to detect when vehicles illegally pass while the stop-arm is extended. These incidents are recorded, reviewed, and submitted to local law enforcement for review and approval.

Key Aspects of the Presumption and Liability:

Liability:

Registered owner is liable for a \$300 fine, regardless of whether they were driving, unless a specific defense is proven.

Lessee Responsibility:

For leased vehicles, the lessee is considered the owner.

Nature of Offense:

This is a civil violation, not a criminal conviction. It does not add points to the license, nor impact insurance rates.

Rebutting the Presumption (Defenses):

The owner can contest the liability by providing evidence that they were not operating the vehicle at the time.

No Mandatory Disclosure:

The owner is not required to identify the actual driver, only to submit evidence that they were not the driver.
