

I Appreciate My Teacher Because...

By Beckum

First, Mrs Loyd tells me new things every day. She tells me all the stuff about math, reading, and science. In math, Mrs Loyd teaches me about geometry and quadrilaterals so we can be geniuses. We do literacy part 1 and 2 and we also do CKLA. In CKLA we read about native americans. In science we learn about weather and animals. That is what I learned from her.

Second, I appreciate my teacher because Mrs. Loyd helps me when I need help on a problem. She helps me by telling me the answers after everyone is done with their work, also she helps me by going over it with me.

Third, I appreciate Mrs Loyd because she is kind to everyone. She is nice to everyone because Mrs. Loyd says to us to never give up, like you got this or keep the hard work up. Also, she gives us hugs and fistbumps at the end of the day when it's time to leave.
