Empower data-informed decisions with an interactive MTSS collaboration and management system

eduCLIMBER integrates all of your whole child data into a single platform and provides interactive data visualizations and built-in tools designed for essential MTSS and RTI practices.

Benefits:

- **Provide all stakeholders with the right access to whole child data**—including academic and non-academic data—in one platform.
- **Be proactive** with a customizable early warning system and action-oriented workflow tools.
- **Ensure equitable practices** with built-in tools for need identification, intervention management, and evaluating effectiveness through an equity lens.
- **Drive continuous, system-level improvement** with a holistic view into district needs.

Equip collaborative data teams with access to the right data at the right time to make the best decisions for your students:

District and school admin

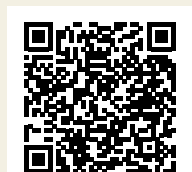

School psychologist

Interventionist

Teacher

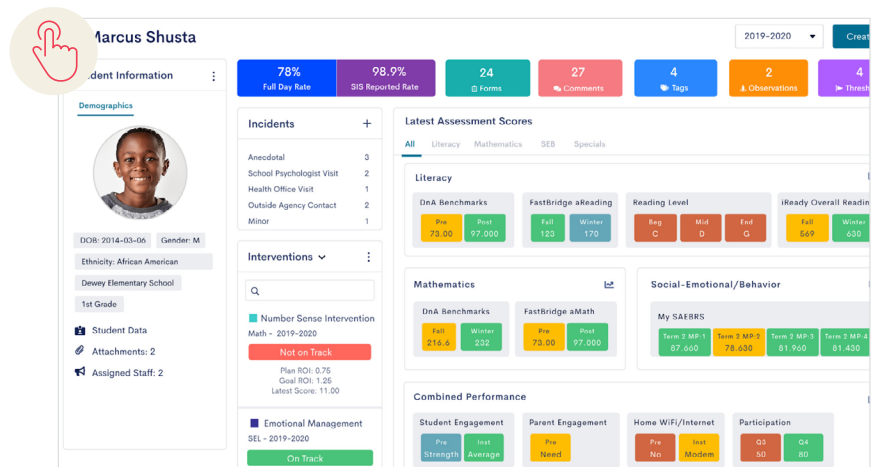

Scan the QR Code to learn more about how eduCLIMBER supports these four key roles.

Take the heavy lifting out of high-impact instruction and intervention

Support the whole child by bringing together key data all in one place:

- Academic
- Behavior
- Intervention
- Attendance...and more!

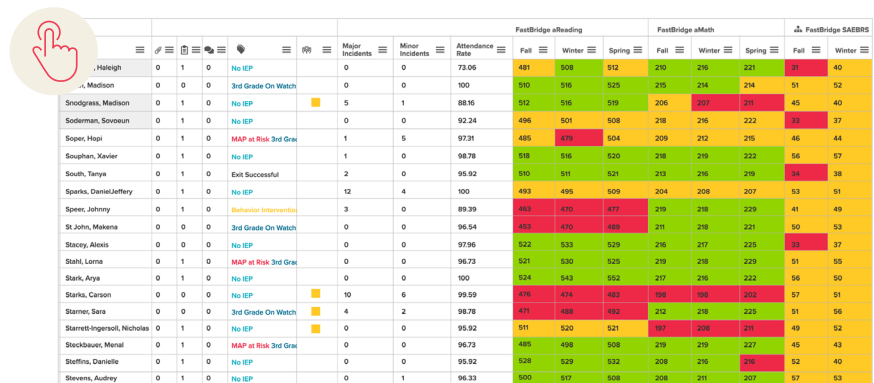

Use interactive dashboards and smart workflow tools to drive student growth:

- View longitudinal trends
- Monitor and intensify instruction
- Evaluate intervention and program effectiveness

Empower teams to take action and advance equity with a built-in meeting module and dynamic reporting and filters.
