## Disclaimers

Please note that all courses will not be offered every semester of every year—or even at every campus. Some courses listed in this guide may not actually be offered due to low enrollment or due to the lack of certified teachers. Because of such cancellations or other scheduling conflicts, students may not be able to enroll in all of the courses they plan to take during a semester. For this reason, students should have in mind other course options in case their first choices are not available.

In some cases, courses may be offered only in a virtual learning environment, including (but not limited to) online coursework, or instruction provided remotely over the internet.

In some circumstances, students can earn credit for courses through Odysseyware, the District's online course provider. Credits earned through this program (Odysseyware) may not be accepted by the NCAA Eligibility Center (which determines a student's eligibility to play sports in college).

A student is not required to complete an Algebra II course to graduate under the foundation graduation program. However, parents and students should be aware that not taking Algebra II will make a student ineligible for automatic admission to four year public universities and colleges in Texas and for certain financial aid and grants while attending those institutions.

Course enrollment is based on grade level and aptitude. District policy prohibits discrimination on the basis of race, color, national origin, sex, or handicap in its vocational programs, services, and activities, as required by Title VI of the Civil Rights Act of 1964, as amended; Title IX of the Education Amendments of 1972; and Section 504 of the Rehabilitation Act of 1973 as amended. District policy also prohibits discrimination on the basis of race, color, national origin, sex, or handicap in its employment practices as required by Title VI of the Civil Rights Act of 1964, as amended; Title IX of the Education Amendments of 1972; the Age Discrimination Act of 1975, as amended; and Section 504 of the Rehabilitation Act of 1973, as amended. The district will take steps to ensure that lack of English language skills will not be a barrier to admission or participation in all educational and vocational programs.

The Texas Success Initiative (TSI) is a program mandated by the Texas legislature. It is designed to determine if a student is ready for college-level coursework in the general areas of reading, writing, and mathematics. Students are able to demonstrate college-readiness by meeting the minimum Benchmark scores set for the SAT, ACT, or TSIA2 in both ELAR and mathematics. The table below summarizes the established benchmarks for each assessment:

**TSI Benchmark Standards**

| Assessment   | Mathematics                                                         | English Language Arts (ELAR)                                             |                           |
|--------------|---------------------------------------------------------------------|--------------------------------------------------------------------------|---------------------------|
| <b>SAT</b>   | At least a 530 math score                                           | At least a 480 Evidenced-Based Reading & Writing (EBRW)                  |                           |
| <b>ACT</b>   | At least a 22 math score                                            | At least a 40 on English and reading combined scores                     |                           |
| <b>TSIA2</b> | At least a 950 CRC score <b>OR</b> CRC below 950 and a 6 diagnostic | At least a 945 CRC score <b>OR</b> CRC below 945 and a 5 or 6 diagnostic | At least a 5 on the ESSAY |

Students may use multiple exams to establish college-readiness. For example, a student may take the SAT and meet the benchmark score for ELAR but not mathematics. The student could then take the math portion of the TSIA2, and meet the benchmark score for math; thus, the student is considered “TSI clear” in both ELAR and mathematics. Students in the WFISD have many advanced coursework options available that may lead to college credit. Before enrolling in these courses, students should be TSI clear in math, ELAR, or both depending on the course. The requirements will be listed under “Prerequisites/Information” on the Course List for each subject.

The WFISD high school campuses offer the TSIA2 assessment multiple times during the year for various groups of students, such as students interested in AP/IB/Dual Credit after scheduling, most students enrolled in English 2 and Algebra 2 in the late winter months. Additionally, students may go to Vernon College to take the TSIA2 if repeated attempts are necessary or they missed a testing window opportunity at their school. There is a small cost associated with taking the TSIA2 at Vernon College.

Contact your school’s College & Career Advisor for more information on college-readiness assessments.

**GPA & CLASS RANK**

Course Descriptions for each course include information about the course's Grade Point Average (GPA) scale. Students will be awarded GPA points based on the grade earned in each enrolled course for semester 1 and semester 2. The breakdown of high school GPA points is shown below:

### GRADE POINTS

| Grade Earned | Advanced | Regular | Modified |
|--------------|----------|---------|----------|
| 95-100       | 5.0      | 4.0     | 3.0      |
| 90-94        | 4.5      | 3.5     | 2.5      |
| 85-89        | 4.0      | 3.0     | 2.0      |
| 80-84        | 3.5      | 2.5     | 1.5      |
| 77-79        | 3.0      | 2.0     | 1.0      |
| 75-76        | 2.5      | 1.5     | 1.0      |
| 72-74        | 2.0      | 1.0     | 0.0      |
| 70-71        | 1.5      | 1.0     | 0.0      |
| ≤ 69         | 0.0      | 0.0     | 0.0      |

Advanced courses that earn more grade points include:

- Honors courses
- Advanced Placement (AP) courses
- International Baccalaureate (IB) Diploma Program (DP) courses
- Dual Credit (DC) courses
- OnRamps courses

Some students may receive modifications of the course content. This only occurs when a special committee determines through testing that modification of the standard curriculum is necessary. Since the committee communicates those needs directly to the student's counselor, those courses are not listed for open choice in the course guide.

Initial class rankings are determined using the earned grade points.

For more information related to GPA and class rank, please see the [Academic Policies & Procedures Guide](#).

| 13420            | IBDP English IV (Year 2)                 | Taken IBDP English III (Year 1)                                                                                     | 12          | 1.0                  |
| VC1343<br>VC1344 | Dual Credit English IV (Vernon College)  | English III, <a href="#">TSI Clear</a> in ELAR<br>Must have own transportation.                                     | 12          | 0.5 (S1)<br>0.5 (S2) |
| MD1343<br>MD1344 | Dual Credit English IV (MSU Texas)       | English III, <a href="#">TSI Clear</a> in ELAR                                                                      | 12          | 0.5 (S1)<br>0.5 (S2) |

- Requirements:** To graduate high school, students must:
- Take 4 English courses (including English I, II, and III).
  - Pass the English I STAAR End-of-Course (EOC) exam
  - Pass the English II STAAR End-of-Course (EOC) exam

**College-ready:** Students meeting the benchmark scores on the SAT, ACT, TSIA2, or a combination of exam scores, are considered college-ready by the Texas Education Agency and the Texas Higher Education Coordinating Board. Some colleges and universities may have higher score requirements for admission. Check the website for any college or university that you may be interested in attending to find their specific admission requirements. See the [TSI page](#) for more information on scores.

Students who have not achieved “readiness” by the senior year may take a *College Prep ELAR* course. Completion of this online, self-paced program guarantees “college ready” status (to bypass introductory level coursework) at over 40 universities, colleges and trade schools across Texas.

## COURSE SEQUENCES: ENGLISH LANGUAGE ARTS

| Who   | Traditional students                                                        | Students seeking college credit while still in high school                                                                                                                        |                                                                                                                               |                                                                                                                          |
|-------|-----------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|
| Grade | The standard sequence of English courses satisfies graduation requirements. | Students who meet admission requirements can take courses at Vernon College or MSU Texas to count for English III and IV. For info, see page 19 on <a href="#">“Dual Credit.”</a> | Advanced Placement (AP) English courses are available for students who want to earn college credit through end-of-year exams. | Upper-level diploma program (DP) courses in English are available through the International Baccalaureate (IB) students. |
| 9     | English I                                                                   | Honors English I                                                                                                                                                                  | Honors English I                                                                                                              | Honors English I                                                                                                         |

## COURSE DESCRIPTIONS: ENGLISH LANGUAGE ARTS

*\*courses with the same PEIMS# cannot be repeated if one of the credits was already earned*

|                                                                                  |                                                                                                                                                                                                                                                                                                                                                 |
|----------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 13100<br><b>English I</b><br><br>GPA Scale: Regular<br>PEIMS#: 03220100          | This course covers grammar, literature, composition, vocabulary development, and spelling. Development of language concepts along with reading and writing skills are stressed. Students focus on literary and informational pieces including plays, novels, and poetry. Students will write literary, argumentative, and informational texts.. |
| 13110<br><b>Honors English I</b><br><br>GPA Scale: Advanced<br>PEIMS#: 03220100  | This course is for students who have demonstrated superior skills and who are sufficiently motivated to accomplish challenging assignments. Honors English I teaches the same skills and general concepts as English I; however, students are expected to apply critical thinking, analysis, and synthesis skills at a higher level.            |
| 13200<br><b>English II</b><br><br>GPA Scale: Regular<br>PEIMS#: 03220200         | English II is a world literature survey course emphasizing classical reading selections. Text complexity increases with challenging vocabulary, sophisticated sentence structures, nuanced text features, cognitively demanding content, and subtle relationships among ideas                                                                   |

| <p>13310<br/><b>AP English III (Language &amp; Composition)</b></p> <p>GPA Scale: Advanced<br/>PEIMS#: A3220100</p>      | <p>The AP English Language and Composition course aligns to an introductory college-level rhetoric and writing curriculum. This course focuses on the development and revision of evidence-based analytic and argumentative writing, the rhetorical analysis of nonfiction texts, and the decisions writers make as they compose and revise. Students evaluate, synthesize, and cite research to support their arguments. Additionally, they read and analyze rhetorical elements and their effects in nonfiction texts—including images as forms of text—from a range of disciplines and historical periods. This course is designed to prepare students for the Advanced Placement test, which may result in college credit.</p>                                                                                                                                                                                                                                                                                                                                                                       |
| <p>13320<br/><b>IBDP English III (Year1)</b></p> <p>GPA Scale: Advanced<br/>PEIMS#: I3220700</p>                         | <p><i>IB Courses are only offered at the Legacy campus.</i><br/>Junior Language A-1 of the IB program will study Part 2 and Part 4 of the Language A-1 International Baccalaureate Curriculum. The human journey will be integrated into the study of the prescribed areas of poetry, drama and the novel as a thematic foundation. The course includes an in-depth analysis of literary language and author's use of technique as well as thematic structures. This course is designed to prepare students for the International Baccalaureate certification components, which may result in college credit.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <p>VC1333/VC1334<br/><b>Dual Credit English III (Vernon College)</b></p> <p>GPA Scale: Advanced<br/>PEIMS#: 03220300</p> | <p><i>*Note: These are college courses taken for high school credit.</i><br/>S1: ENGL 1301 is an intensive study of and practice in writing processes, from invention and researching to drafting, revising, and editing, both individually and collaboratively. Emphasis on effective rhetorical choices, including audience, purpose, arrangement, and style. Focus on writing the academic essay as a vehicle for learning, communicating, and critical analysis.<br/>S2: ENGL 1302 is an intensive study of and practice in the strategies and techniques for developing research-based expository and persuasive texts. Emphasis on effective and ethical rhetorical inquiry, including primary and secondary research methods; critical reading of verbal, visual, and multimedia texts; systematic evaluation, synthesis, and documentation of information sources; and critical thinking about evidence and conclusions.</p>                                                                                                                                                                     |
| <p>MD1333/MD1334<br/><b>Dual Credit English III (MSU Texas)</b></p> <p>GPA Scale: Advanced<br/>PEIMS#: 03220300</p>      | <p><i>*Note: These are college courses taken for high school credit.</i><br/>S1: ENGL 1143 provides training in rhetoric, including skills involved in the writing process through composition and reading with the addition of particular skills needed for thoughtful research, from selection and analysis to integration and documentation of both print and electronic sources. Students will be required to prepare a research paper of moderate length demonstrating these skills.<br/>S2: ENGL 1153 provides students an opportunity to develop critical reading and literary analysis skills in order to achieve deeper understanding of literary texts. Students will explore the various factors informing the production of written texts and learn how to conduct literary research in order to gain experience exploring different perspectives on select literary works and themes. The course will include several opportunities for students to articulate their interpretations and insights in essay assignments, which will be assessed for clarity, insight, and understanding.</p> |

| 13400<br><b>English IV</b><br><br>GPA Scale: Regular<br>PEIMS#: 03220400                                       | <p>English IV is a British literature survey course emphasizing classical selections. Additional emphasis is placed on writing, with a more rigorous focus on composition skills, vocabulary, and the conventions of language. A research paper is required.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 13410<br><b>AP English IV (Literature &amp; Composition)</b><br><br>GPA Scale: Advanced<br>PEIMS#:             | <p>The AP English Literature and Composition course aligns to an introductory college-level literature and writing curriculum. This course focuses on reading, analyzing, and writing about imaginative literature (fiction, poetry, drama) from various periods. Students engage in close reading and critical analysis of imaginative literature to deepen their understanding of the ways writers use language to provide both meaning and pleasure. As they read, students consider a work's structure, style, and themes, as well as its use of figurative language, imagery, and symbolism. Writing assignments include expository, analytical, and argumentative essays that require students to analyze and interpret literary works. This course is designed to prepare students for the Advanced Placement test, which may result in college credit.</p> |
| 13420<br><b>IBDP English IV (Year 2)</b><br><br>GPA Scale: Advanced<br>PEIMS#: I3220800                        | <p><b><i>IB Courses are only offered at the Legacy campus.</i></b></p> <p>As a final step toward the International Baccalaureate Diploma, the student will continue the thematic exploration of world literature, produce a variety of quality writings, and analyze a broad spectrum of world literature. An original research paper will be required. The goal of this culminating class is to develop strong writers and critical thinkers who can move with ease in the world community. This course is designed to prepare students for the International Baccalaureate certification components, which may result in college credit.</p>                                                                                                                                                                                                                     |

- Requirements:** To graduate high school with an endorsement, students must:
- Take 4 mathematics courses (including Algebra I and Geometry)
  - Pass the Algebra I STAAR End-of-Course (EOC) exam

Note: Algebra II is a required course for all students who pursue the STEM endorsement.

### **Algebra II College Entry Notification**

A student is not required to complete an **Algebra II** course to graduate under the foundation graduation program. However, students and parents should be aware that not taking Algebra II will make a student ineligible for automatic admission to four year public universities and colleges in Texas and for certain financial aid and grants while attending those institutions.

**College-ready:** Students meeting the benchmark scores on the SAT, ACT, TSIA2, or a combination of exam scores, are considered college-ready by the Texas Education Agency and the Texas Higher Education Coordinating Board. Some colleges and universities may have higher score requirements for admission. Check the website for any college or university that you may be interested in attending to find their specific admission requirements. See the [TSI page](#) for more information on scores.

Students who have not achieved “readiness” by the senior year may take a *College Prep Math* course. Completion of this online, self-paced program guarantees “college ready” status (to bypass introductory level coursework) at over 40 universities, colleges and trade schools across Texas.

## **COURSE SEQUENCES: MATH**

| Who   | Students who did NOT take Honors Algebra I in the 8th grade              |                                                                                                  |                                                                                                                                                       |                                                                                                                                                   |
|-------|--------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|

| Grade | In most cases, students will take the standard sequence of math courses. | For students who struggle to pass the Algebra I EOC exam, the Math Models course is recommended. | Students who meet admission requirements can take college courses to count for a fourth math. For info, see page 19 on <a href="#">“Dual Credit.”</a> | In some cases, advanced students may be allowed to “double up” on Geometry and Algebra II, in order to take an AP or IB course during 12th grade. |

## MATH COURSE SEQUENCES (continued)

| Who   | Students who took Honors Algebra I in the 8th grade                                        |                                                                                            |                                                                                                                                                                                                                                                          |
|-------|--------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Grade | College-bound students who take Algebra I in middle school can ultimately take AP classes. | In some cases, advanced students may be allowed to “double up” on Geometry and Algebra II. | IB Diploma candidates can take the Applications & Interpretations (AI) course as a senior. (It is also possible to take this course instead of Precalculus.) Or, IB students can take the Analysis & Approaches (AA) class (which requires Precalculus). |
| 9     | Honors Geometry                                                                            | Honors Geometry and Honors Algebra II                                                      | Honors Geometry                                                                                                                                                                                                                                          |

## COURSE DESCRIPTIONS: MATHEMATICS

*\*courses with the same PEIMS# cannot be repeated if one of the credits was already earned*

|                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|---------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 14100<br><b>Algebra I</b><br><br>GPA Scale: Regular<br>PEIMS#: 03100500         | Algebra I is designed to expand the manipulative skills of arithmetic to algebraic skills. This course develops the properties of real numbers; includes the study of linear equations, inequalities, operations with polynomials, factoring, algebraic fractions, functions, graphing systems of equations, and operations with radicals. The TEKS place much emphasis on functions and graphing; emphasis on use of the graphing calculator; and emphasis on realistic up-to-date word problems. Conceptual development with hands-on activities will precede abstract thinking activities. |
| 14110<br><b>Honors Algebra I</b><br><br>GPA Scale: Advanced<br>PEIMS#: 03100500 | This course is for students who have demonstrated superior skills and who are sufficiently motivated to accomplish challenging assignments. Honors Algebra I teaches the same skills and general concepts as Algebra I; however, students are expected to apply critical thinking, analysis, and synthesis skills at a higher level. Honors also includes an introductory unit of both trigonometry and probability of statistics.                                                                                                                                                            |
| 14200<br><b>Geometry</b><br><br>GPA Scale: Regular<br>PEIMS#: 03100700          | Geometry is designed to stimulate creative and logical thought processes and to develop systematic reasoning. Geometry will include the study of angles, perpendicular and parallel lines, congruent triangles, polygons, constructions, area and volume, trigonometric ratios and coordinate geometry. Proofs will be emphasized to develop logical reasoning.                                                                                                                                                                                                                               |
| 14210<br><b>Honors Geometry</b><br><br>GPA Scale: Advanced<br>PEIMS#: 03100700  | This course is for students who have demonstrated superior skills and who are sufficiently motivated to accomplish challenging assignments. Honors Geometry teaches the same skills and general concepts as Geometry; however, students are expected to apply critical thinking, analysis, and synthesis skills at a higher level. Students in Honors Geometry will be given a more in-depth study of transformational, solid, and non-Euclidean geometry, while also taking a deeper dive into trigonometry.                                                                                 |

## MATH COURSE DESCRIPTIONS (continued)

|                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|-----------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 14400<br><b>Math Models</b><br><br>GPA Scale: Regular<br>PEIMS#: 03102400                           | Students continue to build on the Algebra I foundations as they expand their understanding through other mathematical experiences. Students use algebraic, graphical, and geometric reasoning to recognize patterns and structure to model information, and to solve problems from various disciplines. Real-world applications include money, data, chance, patterns, music, design, and science.                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 14300<br><b>Algebra II</b><br><br>GPA Scale: Regular<br>PEIMS#: 03100600                            | Algebra II curriculum is an expansion of Algebra I. Students will broaden their knowledge of quadratic functions, exponential functions, and systems of equations. Students will study logarithmic, square root, cubic, cube root, absolute value, rational functions, and their related equations. Students will connect functions to their inverses and associated equations and solutions in both mathematical and real-world situations. In addition, students will extend their knowledge of data analysis and numeric and algebraic methods.                                                                                                                                                                                                                                                                                        |
| 14310<br><b>Honors Algebra II</b><br><br>GPA Scale: Advanced<br>PEIMS#: 03100600                    | This course is for students who have demonstrated superior skills and who are sufficiently motivated to accomplish challenging assignments. Honors Algebra II teaches the same skills and general concepts as Algebra II; however, students are expected to apply critical thinking, analysis, and synthesis skills at a higher level. Honors Algebra II requires extensive application of learned skills in new settings through realistic up-to-date word problems. Abstract thinking will be developed and technology will be extensively utilized.                                                                                                                                                                                                                                                                                    |
| 20136<br><b>Financial Math</b><br><br>GPA Scale: Regular<br>PEIMS#: 13018000                        | Financial Mathematics is a course about personal money management. Students will apply critical-thinking skills to analyze personal financial decisions based on current and projected economic factors. Financial Mathematics will integrate career and postsecondary education planning into financial decision making. Topics include budgeting, withholdings, income taxes, car and home loans, credit, and investing for the future. <i>This course is not accepted as a 4th math credit by the NCAA.</i>                                                                                                                                                                                                                                                                                                                            |
| 14440<br><b>Advanced Quantitative Reasoning (AQR)</b><br><br>GPA Scale: Regular<br>PEIMS#: 03102510 | In AQR, students will develop and apply skills necessary for college, careers, and life. Course content consists primarily of applications of high school mathematics concepts to prepare students to become well-educated and highly informed 21st century citizens. Students will develop and apply reasoning, planning, and communication to make decisions and solve problems in applied situations involving numerical reasoning, probability, statistical analysis, finance, mathematical selection, and modeling with algebra, geometry, trigonometry, and discrete mathematics.                                                                                                                                                                                                                                                   |
| 14500<br><b>Precalculus</b><br><br>GPA Scale: Regular<br>PEIMS#: 03101100                           | Precalculus is preparation for calculus. The course approaches topics from a function point of view, where appropriate, and is designed to strengthen and enhance conceptual understanding and mathematical reasoning used when modeling and solving mathematical and real-world problems. Students systematically work with functions and their multiple representations. The study of Precalculus deepens students' mathematical understanding and fluency with algebra and trigonometry and extends their ability to make connections and apply concepts and procedures at higher levels. Students investigate and explore mathematical ideas, develop multiple strategies for analyzing complex situations, use technology to build understanding, make connections between representations, and provide support in solving problems. |

## MATH COURSE DESCRIPTIONS (continued)

|                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|--------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 14550<br><b>AP Precalculus</b><br><br>GPA Scale: Advanced<br>PEIMS#: A3100100                    | AP Precalculus is designed to be the equivalent of a first semester college precalculus course. AP Precalculus provides students with an understanding of the concepts of college algebra, trigonometry, and additional topics that prepare students for further college-level math courses. This course explores a variety of function types and their applications—polynomial, rational, exponential, logarithmic, trigonometric, polar, parametric, vector-valued, implicitly defined, and linear transformation functions using matrices. Throughout the course, the mathematical practices of procedural and symbolic fluency, multiple representations, and communication and reasoning are developed. Students experience the concepts and skills related to each function type through the lenses of modeling and covariation and engage each function type through their graphical, numerical, analytical, and verbal representations. This course is designed to prepare students for the Advanced Placement test, which may result in college credit. |
| 14600<br><b>AP Calculus AB</b><br><br>GPA Scale: Advanced<br>PEIMS#: A3100101                    | AP Calculus AB is designed to be the equivalent of a first semester college calculus course devoted to topics in differential and integral calculus. AP Calculus AB features a multirepresentational approach to calculus, with concepts, results, and problems expressed graphically, numerically, analytically, and verbally. Exploring connections among these representations builds understanding of how calculus applies limits to develop important ideas, definitions, formulas, and theorems. A sustained emphasis on clear communication of methods, reasoning, justifications, and conclusions is essential. This course is designed to prepare students for the Advanced Placement test, which may result in college credit. <i>Students may not take both AB &amp; BC Calculus.</i>                                                                                                                                                                                                                                                                 |
| 14610<br><b>AP Calculus BC</b><br><br>GPA Scale: Advanced<br>PEIMS#: A3100102                    | AP Calculus BC is designed to be the equivalent to both first and second semester college calculus courses. AP Calculus BC applies the content and skills learned in AP Calculus AB to parametrically defined curves, polar curves, and vector-valued functions; develops additional integration techniques and applications; and introduces the topics of sequences and series. This course is designed to prepare students for the Advanced Placement test, which may result in college credit. <i>Students may not take both AB &amp; BC Calculus.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 14800<br><b>AP Statistics</b><br><br>GPA Scale: Advanced<br>PEIMS#: A3100200                     | The AP Statistics course is designed to be the equivalent of a one-semester, introductory, non-calculus-based college course in statistics. The AP Statistics course introduces students to the major concepts and tools for collecting, analyzing, and drawing conclusions from data. There are four themes evident in the content, skills, and assessment in the AP Statistics course: exploring data, sampling and experimentation, probability and simulation, and statistical inference. Students use technology, investigations, problem solving, and writing as they build conceptual understanding. This course is designed to prepare students for the Advanced Placement test, which may result in college credit.                                                                                                                                                                                                                                                                                                                                     |
| 14620<br><b>IBDP Analysis &amp; Approaches SL</b><br><br>GPA Scale: Advanced<br>PEIMS#: I3100500 | <i>IB Courses are only offered at the Legacy campus.</i><br>The IBDP Mathematics Analysis and Approaches course recognizes the need for analytical expertise in a world where innovation is increasingly dependent on a deep understanding of mathematics. The focus is on developing important mathematical concepts in a comprehensible, coherent and rigorous way, achieved by a carefully balanced approach. Students are encouraged to apply their mathematical knowledge to solve abstract problems as well as those set in a variety of meaningful contexts. There is a strong emphasis on the ability to construct, communicate and justify correct mathematical arguments. Students should expect to develop insight into mathematical form and structure, and should be intellectually equipped to appreciate the links between concepts in different topic areas. This course is designed to prepare students for the International Baccalaureate certification components, which may result in college credit.                                       |

## MATH COURSE DESCRIPTIONS (continued)

|                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| 14630<br><b>IBDP Applications &amp; Interpretations SL</b><br><br>GPA Scale: Advanced<br>PEIMS#: I3100700 | <i>IB Courses are only offered at the Legacy campus.</i><br>The IBDP Mathematics Applications and Interpretation course recognizes the increasing role that mathematics and technology play in a diverse range of fields in a data-rich world. As such, it emphasizes the meaning of mathematics in context by focusing on topics that are often used as applications or in mathematical modeling. To give this understanding a firm base, this course includes topics that are traditionally part of a pre-university mathematics course such as calculus and statistics. Students are encouraged to solve real-world problems, construct and communicate this mathematically and interpret the conclusions or generalizations. This course is designed to prepare students for the International Baccalaureate certification components, which may result in college credit. |
| VC1316<br><b>Dual Credit Ind Study Math</b><br>GPA Scale: Advanced<br>PEIMS#: 03102500                    | <i>*Note: This is a college course taken for high school credit.</i><br>MATH 1316, Plane Trigonometry, In-depth study and applications of trigonometry including definitions, identities, inverse functions, solutions of equations, graphing, and solving triangles. Additional topics such as vectors, polar coordinates and parametric equations may be included. <i>Must have MATH 1314 College Algebra</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

**Requirements:** To graduate high school with an endorsement, students must:

- Earn 4 science credits (including Biology and either IPC or Chemistry)
- Pass the Biology STAAR End-of-Course (EOC) exam

## COURSE SEQUENCES: SCIENCE

| Grade | In most cases, students will take the standard sequence of science courses.    | For students who struggle to pass the Biology EOC exam, it is recommended to take IPC and Environmental Systems. | To prepare for college, advanced students can enroll in honors courses, then choose from several advanced courses as a senior. |

| 15200<br><b>Integrated Physics &amp; Chemistry (IPC)</b><br><br>GPA Scale: Regular<br>PEIMS#: 03060201 | In Integrated Physics and Chemistry, students conduct laboratory and field investigations, use scientific practices during investigation, and make informed decisions using critical thinking and scientific problem solving. This course integrates the disciplines of physics and chemistry in the following topics: force, motion, energy, and matter.                                                                                                                                                                                                                                                                                      |
| 15300<br><b>Chemistry</b><br><br>GPA Scale: Regular<br>PEIMS#: 03040000                                | In Chemistry, students conduct laboratory and field investigations, use scientific practices during investigations, and make informed decisions using critical thinking and scientific problem solving. Students study a variety of topics that include characteristics of matter, use of the Periodic Table, development of atomic theory and chemical bonding, chemical stoichiometry, gas laws, solution chemistry, thermochemistry, and nuclear chemistry. Students will investigate how chemistry is an integral part of our daily lives.                                                                                                 |
| 15310<br><b>Honors Chemistry</b><br><br>GPA Scale: Advanced<br>PEIMS#: 03040000                        | This course is for students who have demonstrated superior skills and who are sufficiently motivated to accomplish challenging assignments. Honors Chemistry teaches the same skills and general concepts as Chemistry; however, students are expected to apply critical thinking, analysis, and synthesis skills at a higher level.                                                                                                                                                                                                                                                                                                           |
| 15400<br><b>Principles of Technology (Physics)</b><br><br>GPA Scale: Regular<br>PEIMS#: 13037100       | In Principles of Technology, students will conduct laboratory and field investigations, use scientific practices during investigations, and make informed decisions using critical thinking and scientific problem solving. Various systems will be described in terms of space, time, energy, and matter. Students will study a variety of topics that include laws of motion, conservation of energy, momentum, electricity, magnetism, thermodynamics, and characteristics and behavior of waves. Students will apply physics concepts and perform laboratory experimentations for at least 40% of instructional time using safe practices. |
| 15500<br><b>Environmental Systems</b><br><br>GPA Scale: Regular<br>PEIMS#: 03020000                    | In Environmental Systems, students conduct laboratory and field investigations, use scientific methods during investigations, and make informed decisions using critical thinking and scientific problem solving. Students study a variety of topics that include biotic and abiotic factors in habitats, ecosystems and biomes, interrelationships among resources and an environmental system, sources and flow of energy through an environmental system, relationship between carrying capacity and changes in populations and ecosystems, natural changes in the environment, and human activities that impact the natural environment.   |
| 15700<br><b>Earth Systems Science</b><br><br>GPA Scale: Regular<br>PEIMS#: 03060200                    | The Earth Systems Science course is designed to build on students' prior scientific and academic knowledge and skills to develop their understanding of Earth's systems. These systems (the atmosphere, hydrosphere, geosphere, and biosphere) interact through time to produce the Earth's landscapes, climate, and resources. Students explore the geologic history of individual dynamic systems through the flow of energy and matter, their current states, and how these systems affect and are affected by human use.                                                                                                                   |
| 15900 or 15910 (CEC)<br><b>Forensic Science</b><br><br>GPA Scale: Regular                              | Forensic Science is a survey course that introduces students to the application of science to law. Students learn terminology and procedures related to the collection and examination of physical evidence using scientific processes performed in a field or laboratory setting. Students also learn the history and the legal aspects of forensic                                                                                                                                                                                                                                                                                           |

| 15651 (CEC)<br><b>Medical Microbiology</b><br><br>GPA Scale: Regular<br>PEIMS#: 13020700              | The Medical Microbiology course is designed to explore the microbial world, studying topics such as pathogenic and non-pathogenic microorganisms, laboratory procedures, identifying microorganisms, drug resistant organisms, and emerging diseases.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 15190 or 15161 (CEC)<br><b>Anatomy &amp; Physiology</b><br><br>GPA Scale: Regular<br>PEIMS#: 13020600 | The Anatomy and Physiology course is designed for students to conduct laboratory and field investigations, use scientific methods during investigations, and make informed decisions using critical thinking and scientific problem solving. Students in Anatomy and Physiology will study a variety of topics, including the structure and function of the human body and the interaction of body systems for maintaining homeostasis.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 15160<br><b>Honors Anatomy &amp; Physiology</b><br><br>GPA Scale: Advanced<br>PEIMS#: 13020600        | This course is for students who have demonstrated superior skills and who are sufficiently motivated to accomplish challenging assignments. Honors Anatomy & Physiology teaches the same skills and general concepts as Anatomy & Physiology; however, students are expected to apply critical thinking, analysis, and synthesis skills at a higher level.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 15130<br><b>AP Biology</b><br><br>GPA Scale: Advanced<br>PEIMS#: A3010200                             | The AP Biology course is designed to be the equivalent to a two-semester college introductory biology course for biology majors. In AP Biology, students cultivate their understanding of biology through inquiry-based investigations as they explore the following topics: evolution, cellular processes, energy and communication, genetics, information transfer, ecology, and interactions. This course is designed to prepare students for the Advanced Placement test, which may result in college credit.                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 15140<br><b>IBDP Biology</b> (Year 1)<br><br>GPA Scale: Advanced<br>PEIMS#: I3010201                  | <i>IB Courses are only offered at the Legacy campus.</i><br>Biology is the study of life. The vast diversity of species makes biology both an endless source of fascination and a considerable challenge. By studying IBDP biology students will become aware of how scientists work and communicate with each other. While the scientific method may take on a wide variety of forms, it is the emphasis on a practical approach through experimental work that characterizes the sciences. Teachers provide students with opportunities to design investigations, collect data, develop manipulative skills, analyze results, collaborate with peers and evaluate and communicate their findings. This course is designed to prepare students for the International Baccalaureate certification components, which may result in college credit.                                                                                                                             |
| 15150<br><b>IBDP Biology</b> (Year 2)<br><br>GPA Scale: Advanced<br>PEIMS#: I3010202                  | <i>IB Courses are only offered at the Legacy campus.</i><br>Through the study of IBDP biology, students are empowered to make sense of living systems through unifying themes. By providing opportunities for students to explore conceptual frameworks, they are better able to develop understanding and awareness of the living world around them. This is carried further through a study of interactions at different levels of biological organization, from molecules and cells to ecosystems and the biosphere. Integral to the student experience of the DP biology course is the learning that takes place through scientific inquiry. Students will have opportunities to ask questions, design experiments, collect and analyze data, collaborate with peers, and reflect, evaluate and communicate their findings. This course is designed to prepare students for the International Baccalaureate certification components, which may result in college credit. |

| 15330<br><b>AP Chemistry</b><br><br>GPA Scale: Advanced<br>PEIMS#: A3040000                                                        | The AP Chemistry course is designed to be the equivalent of the general chemistry course usually taken during the first college year. AP Chemistry provides students with a college-level foundation to support future advanced coursework in chemistry. Students cultivate their understanding of chemistry through inquiry-based investigations, as they explore content such as: atomic structure, intermolecular forces and bonding, chemical reactions, kinetics, thermodynamics, and equilibrium. This course is designed to prepare students for the Advanced Placement test, which may result in college credit.                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 15340<br><b>IBDP Chemistry (Year 1)</b><br><br>GPA Scale: Advanced<br>PEIMS#: I3040002                                             | <i>IB Courses are only offered at the Legacy campus.</i><br>Chemistry is an experimental science that combines academic study with the acquisition of practical and investigational skills. Chemical principles underpin both the physical environment in which we live and all biological systems. By studying chemistry students should become aware of how scientists work and communicate with each other. While the scientific method may take on a wide variety of forms, it is the emphasis on a practical approach through experimental work that characterizes the subject. Students will develop manipulative skills, design investigations, collect data, analyze results and evaluate and communicate their findings. This course is designed to prepare students for the International Baccalaureate certification components, which may result in college credit.                                                                                                                                                                                                                     |
| 15350<br><b>IBDP Chemistry (Year 2)</b><br><br>GPA Scale: Advanced<br>PEIMS#: I3040003                                             | <i>IB Courses are only offered at the Legacy campus.</i><br>IBDP Chemistry is primarily concerned with identifying patterns that help to explain matter at the microscopic level. This then allows matter's behavior to be predicted and controlled at a macroscopic level. The subject therefore emphasizes the development of representative models and explanatory theories, both of which rely heavily on creative but rational thinking. IBDP chemistry enables students to constructively engage with topical scientific issues. Students examine scientific knowledge claims in a real-world context, fostering interest and curiosity. By exploring the subject, they develop understandings, skills and techniques which can be applied across their studies and beyond. Integral to the student experience of the DP chemistry course is the learning that takes place through scientific inquiry both in the classroom and the laboratory. This course is designed to prepare students for the International Baccalaureate certification components, which may result in college credit. |
| 15610<br><b>Dual Enrollment<br/>Geoscience (OnRamps<br/>Earth, Wind &amp; Fire)</b><br><br>GPA Scale: Advanced<br>PEIMS#: 03060200 | Earth, Wind, and Fire is a course in geoscience literacy. It covers the fundamentals of how the Earth works, and how its various systems—the lithosphere, atmosphere, hydrosphere, and biosphere—interact to form the complex world in which we live. Geoscience is the study of the Earth. In this course, students will study the Earth as an integrated science, applying the fundamental principles of physics, chemistry, biology, and geosciences to explain Earth processes. Many of the most complex and interesting scientific problems of this century, such as energy resources, water supply, and climate change, require geologic thinking skills to solve. This class introduces students to the major areas in geoscience and helps them develop critical, creative, and geologic problem-solving skills, as applied to current scientific problems. Students have the potential to claim 3 college credit hours at UT-Austin based on performance.                                                                                                                                  |
| 15411<br><b>AP Physics 1</b>                                                                                                       | AP Physics 1 is a full-year course that is designed to be the equivalent of a first-semester introductory college course in algebra-based physics. AP Physics 1 is an algebra-based course in which students cultivate their understanding of physics through inquiry-based investigations as they explore these topics: kinematics,                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| 15431<br><b>AP Physics 2</b><br><br>GPA Scale: Advanced<br>PEIMS#: A3050004                                                  | AP Physics 2 is a full-year course that is designed to be the equivalent of a second-semester introductory college course in algebra-based physics. AP Physics 2 is an algebra-based course in which students cultivate their understanding of physics through inquiry-based investigations as they explore these topics: fluids; thermodynamics; electrical force, field, and potential; electric circuits; magnetism and electromagnetic induction; geometric and physical optics; and quantum, atomic, and nuclear physics. This course is designed to prepare students for the Advanced Placement test, which may result in college credit.                                                                                                                                                                        |

| VC1671 | Dual Credit Sociology<br>(Vernon College)  | <a href="#">TSI Clear</a> in ELAR | 12    | 0.5 |
| MD1671 | Dual Credit Sociology<br>(MSU Texas)       | <a href="#">TSI Clear</a> in ELAR | 12    | 0.5 |

- Requirements:** To graduate high school with an endorsement, students must:
- Earn 3 social studies credits (including US History, Government [½], Economics [½], and World Geography)
  - Pass the US History STAAR End-of-Course (EOC) exam

## COURSE SEQUENCES: SOCIAL STUDIES

| Grade | Currently, students are required to take only 3 credits of social studies.                     | Students who are unsuccessful on the US History EOC may be scheduled into World History for re-test prep. |
|-------|------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------|
| 9     | World Geography                                                                                | World Geography                                                                                           |

| 16100<br><b>World Geography</b><br><br>GPA Scale: Regular<br>PEIMS#: 03320100         | <p>In World Geography, students examine people, places, and environments at local, regional, national, and international scales from the spatial and ecological perspectives of geography. Students describe the influence of geography on events of the past and present with emphasis on contemporary issues. A significant portion of the course centers around the physical processes that shape patterns in the physical environment; the characteristics of major landforms, climates, and ecosystems and their interrelationships; the political, economic, and social processes that shape cultural patterns of regions; types and patterns of settlement; the distribution and movement of the world population; relationships among people, places, and environments; and the concept of region. Students analyze how location affects economic activities in different economic systems. Students identify the processes that influence political divisions of the planet and analyze how different points of view affect the development of public policies. Students compare how components of culture shape the characteristics of regions and analyze the impact of technology and human modifications on the physical environment. Students use problem-solving and decision-making skills to ask and answer geographic questions.</p> |
| 16110<br><b>Honors World Geography</b><br><br>GPA Scale: Advanced<br>PEIMS#: 03320100 | <p>This course is for students who have demonstrated superior skills and who are sufficiently motivated to accomplish challenging assignments. Honors World Geography teaches the same skills and general concepts as World Geography; however, students are expected to apply critical thinking, analysis, and synthesis skills at a higher level.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 16200<br><b>World History</b><br><br>GPA Scale: Regular<br>PEIMS#: 03340400           | <p>World History Studies is a survey of the history of humankind. The major emphasis is on the study of significant people, events, and issues from the earliest times to the present. Traditional historical points of reference in world history are identified as students analyze important events and issues in western civilization as well as in civilizations in other parts of the world. Students evaluate the causes and effects of political and economic imperialism and of major political revolutions since the 17th century. Students examine the impact of geographic factors on major historic events and identify the historic origins of contemporary economic systems. Students analyze the process by which constitutional governments evolved as well as the ideas from historic documents that influenced that process. Students trace the historical development of important legal and political concepts. Students examine the history and impact of major religious and philosophical traditions. Students analyze the connections between major developments in science and technology and the growth of industrial economies, and they use the process of historical inquiry to research, interpret, and use multiple sources of evidence.</p>                                                                           |

## SOCIAL STUDIES COURSE DESCRIPTIONS (continued)

|                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| <p>16300<br/><b>US History</b></p> <p>GPA Scale: Regular<br/>PEIMS#: 03340100</p>                              | <p>In US History, students study the history of the United States from 1877 to the present. The course content is based on the founding documents of the U.S. government, which provide a framework for its heritage. Historical content focuses on the political, economic, and social events and issues related to industrialization and urbanization, major wars, domestic and foreign policies, and reform movements, including civil rights. Students examine the impact of geographic factors on major events and eras and analyze their causes and effects. Students examine the impact of constitutional issues on American society, evaluate the dynamic relationship of the three branches of the federal government, and analyze efforts to expand the democratic process. Students describe the relationship between the arts and popular culture and the times during which they were created. Students analyze the impact of technological innovations on American life. Students use critical-thinking skills and a variety of primary and secondary source material to explain and apply different methods that historians use to understand and interpret the past, including multiple points of view and historical context.</p> |
| <p>16370<br/><b>Honors US History</b></p> <p>GPA Scale: Advanced<br/>PEIMS#: 03340100</p>                      | <p>This course is for students who have demonstrated superior skills and who are sufficiently motivated to accomplish challenging assignments. Honors US History teaches the same skills and general concepts as US History; however, students are expected to apply critical thinking, analysis, and synthesis skills at a higher level.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <p>16310<br/><b>AP US History</b></p> <p>GPA Scale: Advanced<br/>PEIMS#: A3340100</p>                          | <p>AP US History is designed to be the equivalent of a two-semester introductory college course in US history. In AP US History, students investigate significant events, individuals, developments, and processes in nine historical periods from approximately 1491 to the present. Students develop and use the same skills and methods employed by historians: analyzing primary and secondary sources; developing historical arguments; making historical connections; and utilizing reasoning about comparison, causation, and continuity and change. The course also provides eight themes that students explore throughout the course in order to make connections among historical developments in different times and places: American and national identity; work, exchange, and technology; geography and the environment; migration and settlement; politics and power; America in the world; American and regional culture; and social structures. This course is designed to prepare students for the Advanced Placement test, which may result in college credit.</p>                                                                                                                                                              |
| <p>16320<br/><b>IBDP History of the Americas (Jr Year)</b></p> <p>GPA Scale: Advanced<br/>PEIMS#: I3301300</p> | <p><i>IB Courses are only offered at the Legacy campus.</i><br/>This course emphasizes the importance of encouraging students to think historically and to develop historical skills as well as gaining factual knowledge. It puts a premium on developing the skills of critical thinking, and on developing an understanding of multiple interpretations of history. In this way, the course involves a challenging and demanding critical exploration of the past. Teachers explicitly teach thinking and research skills such as comprehension, text analysis, transfer, and use of primary sources.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <p>16401/16402<br/><b>IBDP History Topics (Sr Year)</b></p> <p>GPA Scale: Advanced</p>                         | <p><i>IB Courses are only offered at the Legacy campus.</i><br/>This course is based on a comparative and multi-perspective approach to history. Students continue to build upon skills from IB History of the Americas, while studying political, economic, social, and cultural issues.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| <p>16403<br/><b>US Government</b></p> <p>GPA Scale: Regular<br/>PEIMS#: 03330100</p>                                        | <p>In US Government, the focus is on the principles and beliefs upon which the United States was founded and on the structure, functions, and powers of government at the national, state, and local levels. Students learn major political ideas and forms of government in history. A significant focus of the course is on the US Constitution, its underlying principles and ideas, and the form of government it created. Students analyze major concepts of republicanism, federalism, checks and balances, separation of powers, popular sovereignty, and individual rights and compare the US system of government with other political systems. Students identify the role of government in the US free enterprise system and examine the strategic importance of places to the United States. Students analyze the impact of individuals, political parties, interest groups, and the media on the American political system, evaluate the importance of voluntary individual participation in a constitutional republic, and analyze the rights guaranteed by the U.S. Constitution.</p>                                               |
| <p>16423<br/><b>AP US Government</b></p> <p>GPA Scale: Advanced<br/>PEIMS#: A3330100</p>                                    | <p>AP US Government is designed to be the equivalent of an introductory college course in US government. AP US Government provides a college-level, nonpartisan introduction to key political concepts, ideas, institutions, policies, interactions, roles, and behaviors that characterize the constitutional system and political culture of the United States. Students will study US foundational documents, Supreme Court decisions, and other texts and visuals to gain an understanding of the relationships and interactions among political institutions, processes, and behaviors. Underpinning the required content of the course are several big ideas that allow students to create meaningful connections among concepts throughout the course. Students will also engage in skill development that requires them to read and interpret data, make comparisons and applications, and develop evidence-based arguments. In addition, they will complete a political science research or applied civics project. This course is designed to prepare students for the Advanced Placement test, which may result in college credit.</p> |

| <p>MD1641<br/><b>Dual Credit Government<br/>(MSU Texas)</b></p> <p>GPA Scale: Advanced<br/>PEIMS#: 03330100</p>      | <p><i>*Note: This is a college course taken for high school credit.</i><br/>POLS 1433 studies the legislative, executive, and judicial functions in the United States and Texas governments; foreign policy; the conduct of foreign relations; civil liberties and rights; national defense; government and the economy; and governmental services. Special attention given to the Texas government system.</p>                                                                                                                                                                                                                                                                                                             |
| <p>16503<br/><b>Economics</b></p> <p>GPA Scale: Regular<br/>PEIMS#: 03310300</p>                                     | <p>Economics focuses on the basic principles concerning production, consumption, and distribution of goods and services (the problem of scarcity) in the United States and a comparison with those in other countries around the world. Students analyze the interaction of supply, demand, and price. Students will investigate the concepts of specialization and international trade, economic growth, key economic measurements, and monetary and fiscal policy. Students will study the roles of the Federal Reserve System and other financial institutions, government, and businesses in a free enterprise system. Types of business ownership and market structures are discussed.</p>                             |
| <p>16523<br/><b>AP Macroeconomics</b></p> <p>GPA Scale: Advanced<br/>PEIMS#: A3310200</p>                            | <p>AP Macroeconomics is designed to be the equivalent of a one-semester introductory college course in economics. AP Macroeconomics introduces students to the principles that apply to an economic system as a whole. The course places particular emphasis on the study of national income and price-level determination. It also develops students' familiarity with economic performance measures, the financial sector, stabilization policies, economic growth, and international economics. Students learn to use graphs, charts, and data to analyze, describe, and explain economic concepts. This course is designed to prepare students for the Advanced Placement test, which may result in college credit.</p> |
| <p>VC1651<br/><b>Dual Credit Economics<br/>(Vernon College)</b></p> <p>GPA Scale: Advanced<br/>PEIMS#: 03310300</p>  | <p><i>*Note: This is a college course taken for high school credit.</i><br/>ECON 2301 is an analysis of the economy as a whole including measurement and determination of aggregate demand and aggregate supply, national income, inflation, and unemployment. Other topics studied include international trade, economic growth, business cycles, and fiscal policy and monetary policy</p>                                                                                                                                                                                                                                                                                                                                |

|                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|-----------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 16660<br><b>AP Human Geography</b><br><br>GPA Scale: Advanced<br>PEIMS#: A3360100                                     | The AP Human Geography course is designed to be the equivalent of an introductory college-level course in human geography. This course introduces students to the systematic study of patterns and processes that have shaped human understanding, use, and alteration of Earth's surface. Students employ spatial concepts and landscape analysis to examine socioeconomic organization and its environmental consequences. They also learn about the methods and tools geographers use in their research and applications. The curriculum reflects the goals of the National Geography Standards (2012). This course is designed to prepare students for the Advanced Placement test, which may result in college credit.                                                                                           |
| 16633<br><b>Personal Financial Literacy (PFL)</b><br><br>GPA Scale: Regular<br>PEIMS#: 03380082                       | The PFL course will develop citizens who have the knowledge and skills to make sound, informed financial decisions that will allow them to lead financially secure lifestyles and understand personal financial responsibility. The knowledge gained in this course has far-reaching effects for students personally as well as the economy as a whole. When citizens make wise financial decisions, they gain opportunities to invest in themselves, build businesses, consume goods and services in a responsible way, and secure a future without depending on outside assistance. The economy benefits from the optimal use of resources, increased consumption, and strong local businesses. State and local governments benefit with steady revenue streams and reduced future obligations as our society ages. |
| 16634<br><b>Personal Financial Literacy &amp; Economics (PFL&amp;E)</b><br><br>GPA Scale: Regular<br>PEIMS#: 03380083 | The PFL&E course emphasizes the economic way of thinking, which serves as a framework for the personal financial decision-making opportunities introduced in the course. Students will demonstrate the ability to anticipate and address financial challenges as these challenges occur over their lifetime. In addition, students are introduced to common economic and personal financial planning terms and concepts. As a result of learning objective concepts and integrating subjective information, students gain the ability to lead productive and financially self-sufficient lives.                                                                                                                                                                                                                       |
| 16603<br><b>Psychology</b><br><br>GPA Scale: Regular<br>PEIMS#: 03350100                                              | In Psychology, students study the science of behavior and mental processes. Students examine the full scope of the science of psychology such as the historical framework, methodologies, human development, motivation, emotion, sensation, perception, personality development, cognition, learning, intelligence, biological foundations, mental health, and social psychology.                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 16613<br><b>Sociology</b><br><br>GPA Scale: Regular<br>PEIMS#: 03370100                                               | Sociology is an introductory study in social behavior and organization of human society. This course will describe the development of the field as a social science by identifying methods and strategies of research leading to an understanding of how the individual relates to society and the ever changing world. Students will also learn the importance and role of culture, social structure, socialization, and social change in today's society.                                                                                                                                                                                                                                                                                                                                                           |
| VC1661<br><b>Dual Credit Psychology (Vernon College)</b><br><br>GPA Scale: Advanced<br>PEIMS#: 03350100               | <p><i>*Note: This is a college course taken for high school credit.</i></p> PSYC 2301 is a survey of major topics in psychology. Students will be introduced to the study of behavior and the factors that determine and affect behavior.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

\*Students may only earn 1 credit for dual credit Spanish.

Students with advanced skills in Spanish reading, speaking, listening, and writing may take a locally developed Credit-by-Exam, which, if passed, will allow them to earn credit for Spanish I and proceed directly to Spanish II or Honors Spanish II. Interested students should contact the District's Coordinator of Emergent Bilingualism / LOTE at [agonzales@wfisd.net](mailto:agonzales@wfisd.net) prior to beginning Spanish I or notify the counselor or Spanish I teacher by the second day of enrollment in the course. Notification, testing, and grading should be completed within 10 instructional days.

Find more information on this credit-by-exam opportunity at <https://www.wfisd.net/departments/curriculum-instruction/credit-by-exam>

## COURSE DESCRIPTIONS: LOTE

*\*courses with the same PEIMS# cannot be repeated if one of the credits was already earned*

|                                                                                 |                                                                                                                                                                                                                                                                                                                                      |
|---------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 18300<br><b>Spanish I</b><br><br>GPA Scale: Regular<br>PEIMS#: 03440100         | Spanish I is an introduction to the Spanish language and culture. Students will develop skills in listening, speaking, reading, and writing, while exploring various aspects of Hispanic culture. Students will study vocabulary and basic grammar skills. Emphasis is on conversational usage of Spanish in real-life situations.   |
| 18310<br><b>Honors Spanish I</b><br><br>GPA Scale: Advanced<br>PEIMS#: 03440100 | This course is for students who have demonstrated superior skills and who are sufficiently motivated to accomplish challenging assignments. Honors Spanish I teaches the same skills and general concepts as Spanish I; however, students are expected to apply critical thinking, analysis, and synthesis skills at a higher level. |
| 18340<br><b>Spanish II</b><br><br>GPA Scale: Regular<br>PEIMS#: 03440200        | Spanish II is a continuation of Spanish I. Students will develop more in-depth skills in listening, speaking, reading, and writing through the study of vocabulary, grammar, culture, literature, and conversational discussions.                                                                                                    |

| 18350<br><b>Honors Spanish II</b><br><br>GPA Scale: Advanced<br>PEIMS#: 03440200                                                                                                         | This course is for students who have demonstrated superior skills and who are sufficiently motivated to accomplish challenging assignments. Honors Spanish II teaches the same skills and general concepts as Spanish II; however, students are expected to apply critical thinking, analysis, and synthesis skills at a higher level.                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 18390<br><b>Honors Spanish III</b><br><br>GPA Scale: Advanced<br>PEIMS#: 03440300                                                                                                        | This course is for students who have demonstrated superior skills and who are sufficiently motivated to accomplish challenging assignments. In Spanish III, students will build on the foundations set in Spanish I and II. Students are expected to engage more in open-ended activities, and should be able to apply the language in a variety of situations. The class is conducted primarily in Spanish. Students will also have the opportunity to develop a better understanding of Hispanic culture through the study of its history, geography, and literature.                                                                                                                                                                                                                                    |
| 18395<br><b>IDBP Spanish III (Year 1)</b><br><br>GPA Scale: Advanced<br>PEIMS#: I3440400                                                                                                 | <i>IB Courses are only offered at the Legacy campus.</i><br>In Year 1 of IB Spanish, students begin to develop the ability to communicate in Spanish through the study of language, themes and texts, while developing a conceptual understanding of how language works. The main emphasis of the course is on the acquisition and use of language in a range of contexts and for different purposes while, at the same time, promoting an understanding of Hispanic culture through the study of its language. This course is designed to prepare students for the International Baccalaureate certification components, which may result in college credit.                                                                                                                                              |
| 18410<br><b>AP Spanish IV</b><br><br>GPA Scale: Advanced<br>PEIMS#: A3440100                                                                                                             | The AP Spanish Language and Culture Course is approximately equivalent to an upper-intermediate college or university course in Spanish language and culture. This course emphasizes communication (understanding and being understood by others) by applying interpersonal, interpretive, and presentational skills in real-life situations. This includes vocabulary usage, language control, communication strategies, and cultural awareness. The AP Spanish Language and Culture course strives not to overemphasize grammatical accuracy at the expense of communication. To best facilitate the study of language and culture, the course is taught almost exclusively in Spanish. This course is designed to prepare students for the Advanced Placement test, which may result in college credit. |
| 18420<br><b>IDBP Spanish IV (Year 2)</b><br><br>GPA Scale: Advanced<br>PEIMS#: I3440500                                                                                                  | <i>IB Courses are only offered at the Legacy campus.</i><br>Year 2 of IB Spanish is a continuation of the skills and concepts learned in Year 1. Students will advance their skills in communication and other required components of the course. This course is designed to prepare students for the International Baccalaureate certification components, which may result in college credit.                                                                                                                                                                                                                                                                                                                                                                                                            |

| 19230<br><b>AP Studio Art 2-D</b><br><br>GPA Scale: Advanced<br>PEIMS#: A3500400   | The AP 2-D Art and Design course is designed to be equivalent to an introductory college course in 2-D art and design. AP 2-D Art and Design teaches skills using materials and processes such as graphic design, photography, collage, printmaking, fashion illustration, and others. Students will demonstrate the ability to practice, experiment, and revise their personal work while communicating their ideas about art and design. Students are expected to submit a portfolio of their work for Advanced Placement review.                                                                                                                                                                                                                                                                  |
| 19235<br><b>AP Studio Art 3-D</b><br><br>GPA Scale: Advanced<br>PEIMS#: A3500500   | The AP 3-D Art and Design course is designed to be equivalent to an introductory college course in 3-D art and design. AP 3-D Art and Design teaches students how to create art in different disciplines such as sculpture, architectural rendering, metal work, ceramics, and others. Students will demonstrate their knowledge of art skills using three-dimensional materials. Students are expected to submit a portfolio of their work for Advanced Placement review.                                                                                                                                                                                                                                                                                                                           |
| 19260<br><b>IBDP Visual Arts I</b><br><br>GPA Scale: Advanced<br>PEIMS#: I3600200  | <i>IB Courses are only offered at the Legacy campus.</i><br>The IB Diploma Programme visual arts course encourages students to challenge their own creative and cultural expectations and boundaries. It is a thought-provoking course in which students develop analytical skills in problem-solving and divergent thinking, while working towards technical proficiency and confidence as art-makers. In addition to exploring and comparing visual arts from different perspectives and in different contexts, students are expected to engage in, experiment with and critically reflect upon a wide range of contemporary practices and media. These courses are designed to prepare students for the International Baccalaureate certification components, which may result in college credit. |
| 19270<br><b>IBDP Visual Arts II</b><br><br>GPA Scale: Advanced<br>PEIMS#: I3600100 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

### COURSE DESCRIPTIONS: THEATRICAL ARTS

*\*courses with the same PEIMS# cannot be repeated if one of the credits was already earned*

|                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-----------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 19400<br><b>Theatre Arts I</b><br><br>GPA Scale: Regular<br>PEIMS#: 03250100                  | This course provides an introductory survey to all aspects of theatre. The student is introduced to technical theatre, principles of acting, stage movement, and the fundamentals of play production. The course also includes training of the speaking voice, the study of stage diction and an exploration of theatrical history. Much time is spent in developing an appreciation of the art of design and acting as well as an understanding of dramatic structure.                                                    |
| 19410/19420/19430<br><b>Theatre Arts II-IV</b><br>GPA Scale: Regular<br>PEIMS#: 03250200      | Theatre Arts II - IV extend the concepts developed in Theatre Arts I by utilizing both contemporary and classical drama into the context of the course. Various types of drama methodology are explored and utilized in the assignments in the class. This course requires that the students exercise self-discipline, assume responsibility for performance and work on an independent level. This course requires additional work outside of the school day, including after school rehearsals and evening performances. |
| 19490/19491/1942<br><b>Theatre Production I-III</b><br>GPA Scale: Regular<br>PEIMS#: 03250700 | Theatre Production is a concentrated study of all of the elements of production for the serious student of theatre. These courses are for students who want to extend their knowledge of multiple aspects of production. Students must audition for this class and be prepared to accept either acting, production or management responsibilities. This course requires additional work outside of the school day, including after school rehearsals and evening performances.                                             |
| 19440/19450/19460<br><b>Technical Theatre I-III</b><br>GPA Scale: Regular<br>PEIMS#: 03250500 | Tech Theatre is a hands-on course combining theories of design and stagecraft techniques with construction and operation of the various technical theatre elements including scenery, properties, lighting, sound, and costumes. This course requires additional work outside of the school day, including after school rehearsals and evening performances.                                                                                                                                                               |

## FINE ARTS: INSTRUMENTAL MUSIC

| 19660 or 19610 (S1)<br><b>Band I</b><br>GPA Scale: Regular<br>PEIMS#: 03150100 or<br>PES00012 (S1)  | Students will study instrumental techniques, music theory, sight-reading, music history, performance techniques, and leadership. The fall semester begins with marching band. Students are expected to perform at and attend all designated football games, pep rallies, parades, and marching contests and festivals. After the marching season ends, students will be placed in a specific performance band by audition according to their playing ability, personal maturity, commitment to participation, grade classification, and class instrumentation needs. Attendance will be required outside of class for rehearsals, trips, performances, and other engagements. Students needing PE credit toward graduation may use the fall semester of Band I and Band II to fulfill the credit requirement. |

| 19761<br><b>A Cappella Choir I</b><br>GPA Scale: Regular<br>PEIMS#: 03150900   | A Cappella Choir (ACAP) is an audition entry course for students with highly developed vocal proficiency. This ensemble performs the most advanced vocal literature. Students must exhibit advanced music-reading skills. While in ACAP, students will develop their music performance skills, music literacy, critical evaluation, and creative expression. Attendance will be required outside of class for rehearsals, trips, performances, and other engagements. Students interested in auditioning should contact the school's Choir Director. |

| 17300<br><b>Dance I</b><br>GPA Scale: Regular<br>PEIMS#: 03830100   | Dance I - IV is designed to provide the students with extensive work on technique, placement, and a series of steps from all genres of dance, including Jazz, Modern, Ballet, Tap and Folk. Throughout the dance course sequencing, students will have the opportunity to develop a more physical and scientific perception of the body, creative expression through performance, historical and cultural heritage, and critical evaluation. The student will learn more advanced terminology, techniques, and the choreographic process which will enable them to pursue dance as a career or as a life-long pursuit. Students will continue developing their appreciation of dance as an art form. The dance program offers students the additional opportunity of participating in performance groups, such as Drill Team. Due to the need to order uniforms and supplies, students interested in this additional opportunity need to audition. Auditions for the next school year generally take place prior to Spring Break. Contact the Dance teacher for more information. |

| 19570<br><b>IBDP Music I</b><br>GPA Scale: Advanced<br>PEIMS#: I3250200                       | <i>IB Courses are only offered at the Legacy campus.</i><br>The IBDP Music course is grounded in the knowledge, skills and processes associated with the study of music and offers a strengthened approach to student creativity through practical, informed and purposeful explorations of diverse musical forms, practices and contexts (personal, local and global). The course ensures a holistic approach to learning, with the roles of performer, creator and researcher afforded equal importance in all course components. Students will create an exploration portfolio, an experimentation report and a musical presentation. HL students will also submit a collaborative project. This course is designed to prepare students for the International Baccalaureate certification components, which may result in college credit.                                                                                                    |
| 19580<br><b>IBDP Music II</b><br>GPA Scale: Advanced<br>PEIMS#: I3250300                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 19240<br><b>AP Art History</b><br><br><br><br><br><br>GPA Scale: Advanced<br>PEIMS#: A3500100 | AP Art History is considered to be the equivalent of a two-semester introductory college or university art history survey course. The AP Art History course welcomes students into the global art world to engage with its forms and content as they research, discuss, read, and write about art, artists, art making, and responses to and interpretations of art. By investigating specific course content of 250 works of art characterized by diverse artistic traditions from prehistory to the present, the students develop in-depth, holistic understanding of the history of art from a global perspective. Students learn and apply skills of visual, contextual, and comparative analysis to engage with a variety of art forms, developing understanding of individual works and interconnections across history. This course is designed to prepare students for the Advanced Placement test, which may result in college credit. |

| 19890<br><b>AP Music Theory</b><br><br>GPA Scale: Advanced<br>PEIMS#: A3150200                         | The AP Music Theory course corresponds to one-to-two semesters of typical, introductory college music theory coursework that covers topics such as musicianship, theory, and musical materials and procedures. Musicianship skills, including dictation and listening skills, sight-singing, and harmony, are an important part of the course. Through the course, students develop the ability to recognize, understand, and describe basic materials and processes of tonal music that are heard or presented in a score. Development of aural (listening) skills is a primary objective. Performance is also part of the curriculum through the practice of sight-singing. Students learn basic concepts and terminology by listening to and performing a wide variety of music. Notational skills, speed, and fluency with basic materials are emphasized. This course is designed to prepare students for the Advanced Placement test, which may result in college credit. |
| VC1981<br><b>Dual Credit Music App (Vernon College)</b><br><br>GPA Scale: Advanced<br>PEIMS#: 03155600 | <i>*Note: These are college courses taken for high school credit.</i><br>MUSI 1306 is a course designed to develop an understanding of music through the study of cultural periods, major composers, and musical elements. Illustrated with audio recordings and live performances.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| MD1981<br><b>Dual Credit Music App (MSU Texas)</b><br><br>GPA Scale: Advanced<br>PEIMS#: 03155600      | <i>*Note: These are college courses taken for high school credit.</i><br>MUSC 1033 is a course designed to increase the variety and depth of the student's exposure to music and to enhance understanding and enjoyment of music as an art. Offered as traditional music appreciation or jazz/rock music appreciation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| VC1921<br><b>Dual Credit Art App (Vernon College)</b><br><br>GPA Scale: Advanced<br>PEIMS#: 03500110   | <i>*Note: These are college courses taken for high school credit.</i><br>ARTS 1301 is an exploration of purposes and processes in the visual arts including evaluation of selected works.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

The majority of CTE courses are taken in a specific sequence as part of a Program of Study under the student's chosen Endorsement. Since most of the upper level CTE courses are taken at the Career Education Center (CEC), travel time is required, which means that a 1 credit class might take up 2 slots in the student's 8-period day, a 2 credit class might take up 3 slots, and so on. See [page 60](#) for more information about course sequencing and programs of study.

*\*Course may be taken outside of the endorsement pathway if the student meets all listed prerequisites.*

| 13780<br><b>Professional Communications*</b><br><br>GPA Scale: Regular<br>PEIMS#: 13009900    | Professional Communications blends written, oral, and graphic communication in a career-based environment. Careers in the global economy require individuals to be creative and have a strong background in computer and technology applications, a strong and solid academic foundation, and a proficiency in professional oral and written communication. Within this context, students will be expected to develop and expand the ability to write, read, edit, speak, listen, apply software applications, manipulate computer graphics, and conduct Internet research.<br><i>*Home campus, 10th grade &amp; up, no credit prerequisites</i>                                                   |
| 20733/20734 @CEC<br><b>Wildlife Management*</b><br><br>GPA Scale: Regular<br>PEIMS#: 13001500 | Wildlife, Fisheries, and Ecology Management examines the management of game and non-game wildlife species, fish, and aquacrops and their ecological needs as related to current agricultural practices.<br><i>*Home campus, 10th grade &amp; up, no credit prerequisites</i>                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 20380<br><b>Floral Design*</b><br><br>GPA Scale: Regular<br>PEIMS#: 13001800                  | Floral Design is designed to develop students' ability to identify and demonstrate the principles and techniques related to floral design as well as develop an understanding of the management of floral enterprises. Through the analysis of artistic floral styles and historical periods, students will develop respect for the traditions and contributions of diverse cultures. Students will respond to and analyze floral designs, thus contributing to the development of lifelong skills of making informed judgments and evaluations.<br><i>*Home campus, 10th grade &amp; up, no credit prerequisites</i>                                                                              |
| 20781<br><b>Horticulture*</b><br><br>GPA Scale: Regular<br>PEIMS#: 13002000                   | Horticultural Science is designed to develop an understanding of common horticultural management practices as they relate to food and ornamental plant production.<br><i>*Home campus, 10th grade &amp; up, no credit prerequisites</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>Work Program*</b><br><br>GPA Scale: Regular<br>PEIMS#: 12701305                            | The Work Program provides opportunities for students to participate in a work-based learning experience that combines classroom instruction with business and industry employment experiences. The goal is to prepare students with a variety of skills for a changing workplace. Classroom instruction and assignments are in a face-to-face classroom, and students will have 2 periods allotted in their schedule for off-campus lab (work). <b>Students must have valid employment on the first day of class and maintain employment throughout the school year working at least 10 hours per week and completing assignments.</b><br><i>*Home campus, 12th grade, no credit prerequisites</i> |

| 20730B<br><b>Vet Med Applications</b><br><br>GPA Scale: Regular<br>PEIMS#: 13000600               | Veterinary Medical Applications covers topics relating to veterinary practices, including practices for large and small animal species.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 21600<br><b>Princ of Industrial Trade</b><br><br>GPA Scale: Regular<br>PEIMS#: 13032200           | In Principles of Industrial Trade, students are introduced to knowledge and skills used in the proper application of principles of manufacturing. The study of manufacturing technology allows students to reinforce, apply, and transfer academic knowledge and skills to a variety of interesting and relevant activities.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 21311<br><b>Princ of Construction</b><br><br>GPA Scale: Regular<br>PEIMS#: 13004220               | Principles of Construction is intended to provide an introduction and lay a solid foundation for those students entering the construction or craft skilled areas. The course provides a strong knowledge of construction safety, construction mathematics, and common hand and power tools.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 21310<br><b>Construction Technology</b><br><br>GPA Scale: Regular<br>PEIMS#: 13005100             | In Construction Technology I, students will gain knowledge and skills needed to enter the workforce as carpenters or building maintenance supervisors or to prepare for a postsecondary degree in construction management, architecture, or engineering. Students will acquire knowledge and skills in safety, tool usage, building materials, codes, and framing.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 21360<br><b>Practicum in Construction</b><br><br>GPA Scale: Regular<br>PEIMS#: 13005255           | In Practicum in Construction, students will be challenged with the application of knowledge and skills gained in previous construction-related coursework. In many cases students will be allowed to work at a job (paid or unpaid) outside of school or be involved in local projects the school has approved for this class.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 21312<br><b>Plumbing I</b><br><br><br><br><br><br><br><br>GPA Scale: Regular<br>PEIMS#: 13006000  | In Plumbing Technology I, students will gain knowledge and skills needed to enter the industry as a plumbing apprentice, building maintenance technician, or supervisor or prepare for a postsecondary degree in construction management, architecture, or engineering. Students will acquire knowledge and skills in industry workplace basics and employer/customer expectations, including how to use a plumbing code book; how to identify and use power and hand tools; how to be safe on the jobsite and when using hand and power tools; how to apply basic plumbing mathematics and plumbing drawing; and how to identify, fit, and use plastic, copper, cast iron, carbon steel, and corrugated stainless steel pipe. In addition, students will be introduced to gas, drainage, and water supply systems and continue their knowledge of workplace basics and green technologies. |
| 21315<br><b>Plumbing II</b><br><br><br><br><br><br><br><br>GPA Scale: Regular<br>PEIMS#: 13006100 | In Plumbing Technology II, students will gain the advanced knowledge and skills needed to enter the industry as a plumber, building maintenance technician, or supervisor or prepare for a postsecondary degree in mechanical engineering. Students will acquire knowledge and skills in plumbing codes, industry workplace basics, and employer/customer expectations, including tool and jobsite safety, advanced plumbing mathematics, commercial drawings, basic electricity, hanger installation, supports and structural penetrations, roof drains, fixture installation, valves and faucets, and oxy-fuel safety. Students will also learn about setup, cutting, brazing and welding water system sizing; gas, drain, waste and vent installation and testing; and water heater installation.                                                                                        |

| 21550B<br><b>Practicum in Electrical</b><br><br>GPA Scale: Regular<br>PEIMS#: 13005250                     | In Practicum in Electrical Construction, students will be challenged with the application of knowledge and skills gained in previous electrical-related coursework. In many cases students will be allowed to work at a job (paid or unpaid) outside of school or be involved in local projects the school has approved for this class.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 20270<br><b>Principles of Architecture</b><br><br>GPA Scale: Regular<br>PEIMS#: 13004210                   | Principles of Architecture provides an overview of the various fields of architecture, interior design, and construction management. Achieving proficiency in decision making and problem solving is an essential skill for career planning and lifelong learning. Students use self-knowledge, education, and career information to set and achieve realistic career and educational goals. Job-specific training can be provided through training modules that identify career goals in trade and industry areas. Classroom studies include topics such as safety, work ethics, communication, information technology applications, systems, health, environment, leadership, teamwork, ethical and legal responsibility, employability, and career development and include skills such as problem solving, critical thinking, and reading technical drawings.                                                                                                                                                                                                                                      |
| 21300<br><b>Architecture Design I</b><br><br>GPA Scale: Regular<br>PEIMS#: 13004600                        | In Architectural Design I, students will gain knowledge and skills needed to enter a career in architecture or construction or prepare a foundation toward a postsecondary degree in architecture, construction science, drafting, interior design, or landscape architecture. Architectural Design I includes the knowledge of the design, design history, techniques, and tools related to the production of drawings, renderings, and scaled models for nonresidential or residential architectural purposes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 21350<br><b>Interior Architecture Dsgn</b><br><br>GPA Scale: Regular<br>PEIMS#: 13004300                   | Interior Architecture Design is a technical course that addresses psychological, physiological, and sociological needs of individuals by enhancing the environments in which they live and work. Students will use knowledge and skills related to interior and exterior environments, construction, and furnishings to make wise consumer decisions, increase productivity, promote sustainability, and compete in industry.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 21355<br><b>Civil Engineering &amp; Arch*</b><br><br>GPA Scale: Regular<br>PEIMS#: N1303747                | In Civil Engineering and Architecture (CEA) students are introduced to important aspects of building and site design and development. They apply math, science, and standard engineering practices to design both residential and commercial projects and document their work using 3D architectural design software. Throughout the course, students progress from completing structured activities to solving open-ended projects and problems that require them to develop planning, documentation, communication, and other professional skills. Students develop skill in engineering calculations, technical representation, documentation of design solutions according to accepted technical standards, and use of current 3D architectural design and modeling software to represent and communicate solutions.<br><i>*Seniors may enroll in this course without participation in the Program of Study if the student: 1) is interested in a related career after high school; 2) has at least a 3.5 gpa; 3) has credit for Algebra II; and 4) has credit for 2 or more advanced courses</i> |
| 20310<br><b>Princ Arts, Audio/Video &amp; Communications</b><br><br>GPA Scale: Regular<br>PEIMS#: 13008200 | In Principles of Arts, Audio/Video Technology, and Communications (AAVCT), students will be expected to develop an understanding of the various and multifaceted career opportunities in this cluster and the knowledge, skills, and educational requirements for those opportunities.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

|                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|--------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>20503<br/><b>Advertising</b></p> <p>GPA Scale: Regular<br/>PEIMS#: 13034200</p>               | <p>Advertising is designed as a comprehensive introduction to the principles and practices of advertising. Students will gain knowledge of techniques used in current advertising, including print, broadcast, and digital media. The course explores the social, cultural, ethical, and legal issues of advertising, historical influences, strategies, media decision processes as well as integrated marketing communications, and careers in advertising and sales promotion. The course provides an overview of how communication tools can be used to reach target audiences and increase consumer knowledge.</p>                                              |
| <p>20504<br/><b>Social Media</b></p> <p>GPA Scale: Regular<br/>PEIMS#: 13034650</p>              | <p>Social Media Marketing is designed to look at the rise of social media and how marketers are integrating social media tools in their overall marketing strategy. The course will investigate how the marketing community measures success in the new world of social media. Students will manage a successful social media presence for an organization, understand techniques for gaining customer and consumer buy-in to achieve marketing goals, and properly select social media platforms to engage consumers and monitor and measure the results of these efforts.</p>                                                                                      |
| <p>20520<br/><b>Entrepreneurship</b></p> <p>GPA Scale: Regular<br/>PEIMS#: 13034400</p>          | <p>In Entrepreneurship, students will gain the knowledge and skills needed to become an entrepreneur. Students will learn the principles necessary to begin and operate a business. The primary focus of the course is to help students understand the process of analyzing a business opportunity, preparing a business plan, determining feasibility of an idea using research, and developing a plan to organize and promote the business and its products and services. In addition, students will understand the capital required, the return on investment desired, and the potential for profit.</p>                                                          |
| <p>20561<br/><b>Practicum in Marketing</b></p> <p>GPA Scale: Regular<br/>PEIMS#: 13034800</p>    | <p>Practicum in Marketing is a series of dynamic activities that focus on the customer to generate a profitable exchange. Students will gain knowledge and skills that help them to be proficient in one or more of the marketing functional areas associated with distribution, financing, marketing information management, pricing, product planning, promotion, purchasing, risk management, and selling skills. Students will integrate skills from academic subjects, information technology, interpersonal communication, and management training to make responsible decisions. The course may offer opportunities for a paid or unpaid work experience.</p> |
| <p>20180<br/><b>Princ of Information Tech</b></p> <p>GPA Scale: Regular<br/>PEIMS#: 13027200</p> | <p>In Principles of Information Technology, students will develop computer literacy skills to adapt to emerging technologies used in the global marketplace. Students will implement personal and interpersonal skills to prepare for a rapidly evolving workplace environment. Students will enhance reading, writing, computing, communication, and reasoning skills and apply them to the information technology environment.</p>                                                                                                                                                                                                                                 |
| <p>20276<br/><b>Computer Maintenance</b></p> <p>GPA Scale: Regular<br/>PEIMS#: 13027300</p>      | <p>In Computer Maintenance, students will acquire knowledge of computer maintenance and creating appropriate documentation. Students will analyze the social responsibility of business and industry regarding the significant issues relating to the environment, ethics, health, safety, and diversity in society and in the workplace as related to computer maintenance. Students will apply technical skills to address the IT industry and emerging technologies.</p>                                                                                                                                                                                          |
| <p>20291<br/><b>Networking</b></p> <p>GPA Scale: Regular<br/>PEIMS#: 13027400</p>                | <p>In Networking, students will develop knowledge of the concepts and skills related to data networking technologies and practices in order to apply them to personal or career development. To prepare for success, students will have opportunities to reinforce, apply, and transfer knowledge and skills to a variety of settings and problems.</p>                                                                                                                                                                                                                                                                                                              |

| <p>21705<br/><b>Introduction to Welding</b></p> <p>GPA Scale: Regular<br/>PEIMS#: 13032250</p>  | <p>Introduction to Welding will provide an introduction to welding technology with an emphasis on basic welding laboratory principles and operating procedures. Students will be introduced to the three basic welding processes. Topics include: industrial safety and health practices, hand tool and power machine use, measurement, laboratory operating procedures, welding power sources, welding career potentials, and introduction to welding codes and standards. Introduction to Welding will provide students with the knowledge, skills, and technologies required for employment in welding industries. Students will develop knowledge and skills related to welding and apply them to personal career development.</p> |
| <p>21710<br/><b>Welding I</b></p> <p>GPA Scale: Regular<br/>PEIMS#: 13032300</p>                | <p>Welding I provides the knowledge, skills, and technologies required for employment in metal technology systems. Students will develop knowledge and skills related to this system and apply them to personal career development.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <p>21721<br/><b>Welding II</b></p> <p>GPA Scale: Regular<br/>PEIMS#: 13032400</p>               | <p>Welding II builds on the knowledge and skills developed in Welding I and provides an introduction to welding technology with an emphasis on basic welding laboratory principles and operating procedures. Students will develop advanced welding concepts and skills as related to personal and career development. Students will integrate academic and technical knowledge and skills.</p>                                                                                                                                                                                                                                                                                                                                        |
| <p>21211<br/><b>Automotive Basics</b></p> <p>GPA Scale: Regular<br/>PEIMS#: 13039550</p>        | <p>Automotive Basics includes knowledge of the basic automotive systems and the theory and principles of the components that make up each system and how to service these systems. Automotive Basics includes applicable safety and environmental rules and regulations. In Automotive Basics, students will gain knowledge and skills in the repair, maintenance, and servicing of vehicle systems. The focus of this course is to teach safety, tool identification, proper tool use, and employability.</p>                                                                                                                                                                                                                         |
| <p>21210<br/><b>Automotive Technology I</b></p> <p>GPA Scale: Regular<br/>PEIMS#: 13039600</p>  | <p>Automotive Technology I includes knowledge of the major automotive systems and the principles of diagnosing and servicing these systems. This course includes applicable safety and environmental rules and regulations. In Automotive Technology, students will gain knowledge and skills in the repair, maintenance, and diagnosis of vehicle systems.</p>                                                                                                                                                                                                                                                                                                                                                                        |
| <p>21221<br/><b>Automotive Technology II</b></p> <p>GPA Scale: Regular<br/>PEIMS#: 13039700</p> | <p>Automotive Technology II includes knowledge of the major automotive systems and the principles of diagnosing and servicing these systems. Automotive Technology II includes applicable safety and environmental rules and regulations. In this course, students will extend and put into practice their knowledge and skills in the repair, maintenance, and diagnosis of vehicle systems.</p>                                                                                                                                                                                                                                                                                                                                      |
| <p>21115<br/><b>Basic Collision</b></p> <p>GPA Scale: Regular<br/>PEIMS#: 13039750</p>          | <p>Basic Collision Repair and Refinishing includes knowledge of the processes, technologies, and materials used in the reconstruction of vehicles. This course is designed to teach the concepts and theory of systems related to automotive collision repair and refinishing.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <p>21110<br/><b>Collision Repair I</b></p> <p>GPA Scale: Regular<br/>PEIMS#: 13039800</p>       | <p>Collision Repair I includes knowledge of the processes, technologies, and materials used in the reconstruction of vehicles. This course is designed to teach the concepts and theory of systems related to automotive collision repair and refinishing. Collision Repair I is rooted in hands-on practice and learning opportunities.</p>                                                                                                                                                                                                                                                                                                                                                                                           |

|                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|-----------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 21123<br><b>Collision Repair II</b><br><br>GPA Scale: Regular<br>PEIMS#: 13039900       | Collision Repair II is a continuation of the Collision Repair I course. This course is designed to teach the concepts and theory of systems related to automotive paint and refinishing through hands-on practice in a laboratory (auto shop) setting..                                                                                                                                                                                                                                                                                                                                                                   |
| 21965<br><b>Introduction to Culinary</b><br><br>GPA Scale: Regular<br>PEIMS#: 13022550  | Introduction to Culinary Arts will emphasize the principles of planning, organizing, staffing, directing, and controlling the management of a variety of food service operations. The course will provide insight into the operation of a well-run restaurant, food production skills, various levels of industry management, and hospitality skills.                                                                                                                                                                                                                                                                     |
| 21970<br><b>Culinary Arts</b><br><br>GPA Scale: Regular<br>PEIMS#: 13022600             | Culinary Arts begins with the fundamentals and principles of the art of cooking and the science of baking and includes management and production skills and techniques. Students can pursue a national sanitation certification or other appropriate industry certifications. This course is offered as a laboratory-based course (hands-on kitchen activities).                                                                                                                                                                                                                                                          |
| 21972<br><b>Advanced Culinary Arts</b><br><br>GPA Scale: Regular<br>PEIMS#: 13022650    | Advanced Culinary Arts will extend content and enhance skills introduced in Culinary Arts by in-depth instruction of industry-driven standards in order to prepare students for success in higher education, certifications, and/or immediate employment.                                                                                                                                                                                                                                                                                                                                                                 |
| 21910<br><b>Principles Health Science</b><br><br>GPA Scale: Regular<br>PEIMS#: 13020200 | The Principles of Health Science course is designed to provide an overview of the therapeutic, diagnostic, health informatics, support services, and biotechnology research and development systems of the healthcare industry.                                                                                                                                                                                                                                                                                                                                                                                           |
| 21903<br><b>Medical Terminology</b><br><br>GPA Scale: Regular<br>PEIMS#: 13020300       | The Medical Terminology course is designed to introduce students to the structure of medical terms, including prefixes, suffixes, word roots, singular and plural forms, and medical abbreviations. The course allows students to achieve comprehension of medical vocabulary appropriate to medical procedures, human anatomy and physiology, and pathophysiology.                                                                                                                                                                                                                                                       |
| 21900<br><b>Certified Nursing Assist</b><br><br>GPA Scale: Regular<br>PEIMS#: 13020500  | The CNA or Practicum in Health Science course is designed to give students practical application of previously studied knowledge and skills. Practicum experiences can occur in a variety of locations appropriate to the nature and level of experience. Specifically, students will prepare for the certification requirements in order to obtain a CNA certification.                                                                                                                                                                                                                                                  |
| 21905<br><b>Prac in HS (Med Assist)*</b><br><br>GPA Scale: Regular<br>PEIMS#: 13020510  | The Medical Assistant course provides students with the knowledge and skills to pursue a career as a medical assistant and to improve college and career readiness. Students will obtain communication skills, clinical ethics knowledge, safety awareness, and information related to medical assisting career opportunities.<br><i>*Seniors may enroll in this course without participation in the Program of Study if the student: 1) is interested in a related career after high school; 2) has at least a 3.5 gpa; 3) has credit for Anatomy &amp; Physiology; and 4) has credit for 2 or more advanced courses</i> |
| 15651<br><b>Medical Microbiology</b><br><br>GPA Scale: Regular<br>PEIMS#: 13020700      | The Medical Microbiology course is designed to explore the microbial world, studying topics such as pathogenic and non-pathogenic microorganisms, laboratory procedures, identifying microorganisms, drug resistant organisms, and emerging diseases.                                                                                                                                                                                                                                                                                                                                                                     |

| <p>21500<br/><b>Eng Design/Presentation</b></p> <p>GPA Scale: Regular<br/>PEIMS#: 13036500</p>                                            | <p>Students enrolled in Engineering Design and Presentation I will demonstrate knowledge and skills of the design process as it applies to engineering fields and project management using multiple software applications and tools necessary to produce and present working drawings, solid model renderings, and prototypes. Through implementation of the design process, students will transfer advanced academic skills to component designs.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <p>20263<br/><b>Eng Design/Problem Slvg*</b></p> <p>GPA Scale: Regular<br/>PEIMS#: 13037300</p>                                           | <p>The Engineering Design and Problem Solving course is the creative process of solving problems by identifying needs and then devising solutions. The solution may be a product, technique, structure, or process depending on the problem. Science aims to understand the natural world, while engineering seeks to shape this world to meet human needs and wants. Engineering design takes into consideration limiting factors or "design under constraint." Various engineering disciplines address a broad spectrum of design problems using specific concepts from the sciences and mathematics to derive a solution. The design process and problem solving are inherent to all engineering disciplines. Requires physics as a prerequisite or corequisite.</p> <p><i>*Seniors may enroll in this course without participation in the Program of Study if the student: 1) is interested in a related career after high school; 2) has at least a 3.5 gpa; 3) has credit for Algebra II &amp; Physics; and 4) has credit for 2 or more advanced courses</i></p> |

| 20251<br><b>Fund of Computer Science</b><br><br>GPA Scale: Regular<br>PEIMS#: 13580140    | Fundamentals of Computer Science is intended as a first course for those students just beginning the study of computer science. Students will learn about the computing tools that are used every day. Students will foster their creativity and innovation through opportunities to design, implement, and present solutions to real-world problems. Students will collaborate and use computer science concepts to access, analyze, and evaluate information needed to solve problems. Students will learn computational thinking, problem-solving, and reasoning skills that are the foundation of computer science. By using computer science knowledge and skills that support the work of individuals and groups in solving problems, students will select the technology appropriate for the task, synthesize knowledge, create solutions, and evaluate the results. Students will learn digital citizenship by researching current laws, regulations, and best practices and by practicing integrity and respect. Students will gain an understanding of the principles of computer science through the study of technology operations and concepts. |
| 20010<br><b>Computer Science 1*</b><br><br>GPA Scale: Regular<br>PEIMS#: 13580200         | Computer Science I will foster students' creativity and innovation by presenting opportunities to design, implement, and present meaningful programs through a variety of media. Students will collaborate with one another, their instructor, and various electronic communities to solve the problems presented throughout the course. Through computational thinking and data analysis, students will identify task requirements, plan search strategies, and use computer science concepts to access, analyze, and evaluate information needed to solve problems.<br><i>*Seniors may enroll in this course without participation in the Program of Study if the student: 1) is interested in a related career after high school; 2) has at least a 3.5 gpa; 3) has credit for Algebra II; and 4) has credit for 2 or more advanced courses</i>                                                                                                                                                                                                                                                                                                           |

| 20258<br><b>Game Programming/Dsgn</b><br><br>GPA Scale: Regular<br>PEIMS#: 13580380       | Game Programming and Design will foster student creativity and innovation by presenting students with opportunities to design, implement, and present meaningful programs through a variety of media. Students will collaborate with one another, their instructor, and various electronic communities to solve gaming problems. Through data analysis, students will include the identification of task requirements, plan search strategies, and use programming concepts to access, analyze, and evaluate information needed to design games.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 17901<br><b>Ath Trng 1 (Kinesiology I)</b><br><br>GPA Scale: Regular<br>PEIMS#: N1302104  | This course is designed to introduce students to the basic concepts of kinesiology. Students will gain an understanding of body mechanics, physiological functions of muscles and movements, the history of kinesiology, and the psychological impact of sports and athletic performance.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 17902<br><b>Ath Trng 2 (Kinesiology II)</b><br><br>GPA Scale: Regular<br>PEIMS#: N1302124 | The Kinesiology II course is designed to provide students an advanced level of knowledge, skills, and understanding of body composition and the effect on health, nutritional needs of physically active individuals, qualitative biomechanics, application of therapeutic modalities, appropriate rehabilitation services, and aerobic training intensity programs.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| 11 | Computer Science II              | 1 / 2       | \$50 |
| 12 | Game Programming and Design      | 1 / 2       |      |

**Note: Students can also obtain a STEM Endorsement by earning:**

- |                                               |           |                                           |
|-----------------------------------------------|-----------|-------------------------------------------|
| • A total of 5 credits in Mathematics courses | <b>OR</b> | • A total of 5 credits in Science courses |
|-----------------------------------------------|-----------|-------------------------------------------|

**Requirements:** To graduate high school, students must complete one credit in physical education. However, a student may earn up to four units of PE equivalent credit that count toward graduation requirements through athletics or other substitution courses. No student may be enrolled in more than one PE credit or PE substitution credit in any semester.

See <a href="#">JROTC</a> for more information on the program.                                                                                                                                                                                                                                                                                                                       |

## ATHLETICS

[▲ BACK TO TOP](#)

Athletics is intended for students interested in playing competitive sports. Athletic participation is a privilege, not a right and student athletes are held to a high standard of conduct. If a student is removed or quits a sport during the school year they will be placed in any available PE course for which they do not already have credit. Students cannot come out of a sport for a free period. Any questions concerning participation should be addressed to the specific coach or campus athletic coordinator.

- Students participating in WFISD Athletics are **REQUIRED** to have an annual physical and complete all appropriate paperwork prior to participation in tryouts, practices, and games.
- Physicals must be completed on the official UIL physical form.
- Attendance will be required outside of class for practices, games, and other engagements.
- According to UIL rules, student athletes must maintain a 70 average in all of their classes to remain eligible for competition.
- Students participating in multiple team-based sports should register for the sport that has the earliest season (e.g. football starts at the beginning of the year as opposed to basketball, which begins at the end of the fall semester), and they should notify the head coach of each sport.
- Participation in a full year of athletics satisfies the PE credit graduation requirement.

Students in the WFISD are able to participate in the following individual and team sports:

### Traditionally Individual Sports

Cross Country  
Track  
Tennis\*  
Swimming\*  
Golf\*

### Traditionally Men's Team Sports

Football  
Basketball  
Soccer  
Baseball

### Traditionally Women's Team Sports

Volleyball  
Basketball  
Softball  
Soccer  
Cheerleading\*

Please note that ***Cheerleading*** auditions take place in the spring **BEFORE** the next school year begins in order to order uniforms and other necessary supplies, register for summer camp, etc. Generally, these auditions will take place early in the 2nd semester. Contact the Cheer Sponsor for specific information regarding auditions.

| Local Course ID | Course                              | Prerequisites/Information             | Grade Level | Credits |
|-----------------|-------------------------------------|---------------------------------------|-------------|---------|
| 17710           | Freshman Boys Athletics             | For all 9th grade boys in athletics*  | 9           | 1.0     |
| 17810           | Freshman Girls Athletics            | For all 9th grade girls in athletics* | 9           | 1.0     |
| XXXXX           | Athletic Sport(s) of Choice (II-IV) | Courses taken in sequence             | 10-12       | 1.0     |

\*Freshman can register for these sports, instead of Freshman Athletics, if they are joining the team and not playing another sport.

## ADDITIONAL ELECTIVE COURSE DESCRIPTIONS (continued)

|                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 17103<br><b>Health</b><br><br>GPA Scale: Regular<br>PEIMS#: 03810100                                             | Health provides instruction that allows youth to develop and sustain health-promoting behaviors throughout their lives. The understanding and application of these standards will allow students the ability to gather, interpret, and understand health information; achieve health literacy; and adapt to the ever-evolving science of health. Curriculum is presented to students in a positive manner to support the development of a healthy self-concept and responsible decision-making. The standards will help students reinforce, foster, and apply positive character traits.                                                                                                       |
| 12401<br><b>PAL 1 (Fam/Comm Srvc)</b><br>GPA Scale: Regular<br>PEIMS#: 13024900                                  | The PAL program is designed to involve students in realistic and meaningful community-based activities through direct service or service-learning experiences. Students are provided opportunities to interact with and provide services to individuals, families, and the community through community or volunteer services. Emphasis is placed on developing and enhancing organizational and leadership skills and characteristics. Students will travel to elementary schools to mentor their younger peers, and they will participate in peer mentoring on their home campus. Students will learn to understand and assist with the needs of individuals and families in their community. |
| 12402<br><b>PAL 2 (Prac Human Srvc)</b><br>GPA Scale: Regular<br>PEIMS#: 13025000                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 16641(S2Jr) /16642(S1Sr)<br><b>IBDP Theory of Knowledge (ToK)</b><br><br>GPA Scale: Advanced<br>PEIMS#: N1290322 | <i>IB Courses are only offered at the Legacy campus.</i><br>Full IB diploma candidates will explore the various Ways of Knowing and Areas of Knowledge and Problems of Knowledge through exploration of human knowledge, intellectual honesty, and its interpretations as well as the social construct. Socratic questioning and discussion will be the basis for exploration. IB ToK is taught over the course of 2 years in combination with the required community service course. In 11th grade, students will take IB ToK in the spring semester, while 12th grade students will finish the course in the fall semester.                                                                  |
| 12300(S1Jr) /12305(S2Sr)<br><b>CAS (IB Program)</b><br><br>GPA Scale: Regular<br>PEIMS#: 03380002/<br>03380022   | <i>IB Courses are only offered at the Legacy campus.</i><br>Creativity, Activity, Service or CAS is a crucial course on the journey to an IB Diploma. Students are required to better themselves and their community through concentrating on the 3 strands of IB: creativity, activity, and community service. Activities in CAS are individualized, based upon what activity the students chooses to complete each of the 3 components. The CAS course must be taken in conjunction with the IB Theory of Knowledge course during the students junior and senior year.                                                                                                                       |
| 130CP<br><b>College Prep ELA</b><br><br>GPA Scale: Regular<br>PEIMS#: CP110100                                   | This is an online, self-paced course that is a requirement for those who are not considered (based on TEA standards) college and/or career ready by their senior year. Students who are not college/career ready are not able to have a “free period” in their schedule as a senior. Completion of this course allows students to become eligible for a free period. <i>Students will earn an elective credit for completion of this course.</i>                                                                                                                                                                                                                                               |

| MD3103<br><b>Dual Credit Contemp Media<br/>(MSU Texas)</b><br><br>GPA Scale: Advanced<br>PEIMS#: 03241401     | <i>*Note: These are college courses taken for high school credit.</i><br>MCOM 2243 is a workshop course focusing on news reporting and writing techniques used in both traditional print media and Internet publishing. Students will be introduced to the basics of accuracy, clarity, word choice, journalistic style, story structure, and deadlines. Coverage of on-campus news events is supplemented by deadline writing exercises in a classroom laboratory. |

Dual credit is a special way for students to take courses that count for credits both in high school and in college. Currently, these courses must be taken on the college campus either through Vernon College or Midwestern State University. Dual credit students must meet college entrance requirements, and have schedules that allow for travel back and forth between campuses. For more detailed information, please visit [www.wfisd.net/dual](http://www.wfisd.net/dual).

| Grade | College Course                      | College | Pre-requisites                                   | HS Credit                        | Local ID |
|-------|-------------------------------------|---------|--------------------------------------------------|----------------------------------|----------|
| 11    | Composition I & II (ENGL 1143/1153) | MSU     | English II,<br><a href="#">TSI Clear</a> in ELAR | English III                      | MD1333-4 |
| 11    | Composition I & II (ENGL 1301/1302) | VC      |                                                  | English III                      | VC1333-4 |
| 11    | US History (HIST 1133/1233)         | MSU     | <a href="#">TSI Clear</a> in ELAR                | Special Topics in Social Studies | MD1633-4 |
| 11    | US History (HIST 1301/1302)         | VC      |                                                  | Special Topics in Social Studies | VC1633-4 |

During 11th grade, students can take Composition and US History, which in most cases must be paired and taken on alternating days. Successful dual credit students have more options in grade 12.

**\*\*The IB Diploma Program is only offered on the Legacy Campus.\*\***

### About the IB Program

The International Baccalaureate (IB) Programme offers rigorous and engaging college preparatory work.

### Philosophy/ Objectives

The IB Diploma Programme is a challenging two-year course of study. It provides students with the intellectual, social, and critical perspective necessary for the international world. Students in the program will study how to learn, how to analyze, and how to reach considered conclusions about people and other cultures. The IB Programme takes on a special significance today when knowledge continues to expand dramatically and existence in an international community requires understanding and an appreciation of cultural diversity. It is essential, therefore, that academic training provides students with the skills and opportunities that will enable them to succeed in the competitive global society.

Benefits of the Diploma Programme:

- College credit, which has exceeded 40 hours for some students
- Geared at multiculturalism and viewed through a global lens
- Emphasis on extensive writing assignments like those found in university courses
- Fosters 21st century skills such as collaboration, problem-solving, and communication

### Transferring for the IB Program

A student wishing to transfer from Memorial HS to Legacy HS for the IB Program must meet the following expectations:

- Students wishing to transfer into the program for the 9th grade should have taken Advanced courses in middle school and maintained a “B” average in their Advanced courses (from English, math, science, social studies, and Spanish).
- Once enrolled, the student must maintain at least a **3.0 weighted GPA**.
- In grades 9-10, the student must stay **enrolled in at least 4 Honors courses** (from English, math, science, social studies, and Spanish).
- In grades 11-12, the student must be actively seeking the **full IB diploma** initially, or they must remain enrolled in at least **two IB certificate courses**, if unable to complete the full diploma program after initial enrollment.

Any local transfer students not meeting these expectations will have their transfer revoked at the end of the related semester (December or May).

ALSO: Because it is a 2-year program for Juniors and Seniors, students are not allowed to enter/begin the IB Diploma Program as 12th graders.

Please note that transfer requests for IB must be completed during the standard open transfer period for high schools.

## ADVANCED PLACEMENT (AP) COURSES

[▲ BACK TO TOP](#)

### About the AP Program

Advanced Placement courses are offered at both Legacy High School and Memorial High School. High school students take AP courses and exams to challenge themselves, explore their interests, earn college credit and gain “advanced” placement for course selections. Passing AP exam scores can help you earn college credit before you set foot on a college campus, and perhaps, let you skip introductory college courses.

### AP COURSE OFFERINGS

*Click on each course to be taken back to the course description.*

| Local Course ID | Course                                                | Prerequisites/Information                                                                       | Grade Level | Credits |
|-----------------|-------------------------------------------------------|-------------------------------------------------------------------------------------------------|-------------|---------|
