

Students use data and technology to explore environmental problems and design solutions that help their communities. Using real-world problems, students collect and analyze data, test ideas, and design solutions that help people and communities care for the environment responsibly.

**Registration will begin March 9th**

### Why Sign Your Child Up for an Eco-Rangers Camp?

-  **Solve Real Environmental Missions**  
Tackle real-world challenges like pollution, waste, and wildlife protection.
-  **Explore AI for Good**  
Discover how artificial intelligence helps scientists and communities protect our planet in a safe way.
-  **Design Solutions That Matter**  
Prototype ideas that could actually help your school, neighborhood, or city.
-  **Become a Tech Changemaker**  
Gain confidence as a creator of technology.

### \$50 Commitment Deposit

To help as many students as possible attend camps, TECH CORPS uses a \$50 commitment deposit. Attend and complete camp, and it's fully refunded, keeping every seat filled and ready for adventure.

**Sign up to receive information about programs near you!**

**Educate. Excite. Empower.**
