Glacier Peak High School **AP Chemistry**

Hello all! Although there is **no mandatory** summer assignment for AP Chemistry, I would highly recommend every student complete the following **optional** assignment.

Find the AP Chemistry/College Chemistry Khan Academy Course (URL below) and complete Units 1 and 2. You are more than welcome to complete more Units if you wish. I also recommend getting one of the AP Chemistry review books sold by The Princeton Review (doesn't need to be the newest one, as long as it's newer than 2023) and completing Units 1 and 2 for that as well. Once again, these are not mandatory, but doing this will help you get a sense for the difficulty of the course and also help you feel more prepared for the beginning of class in the Fall.

Good luck and thank you for taking AP Chemistry!

-Mr. Koerber
