

Dear Friend of Education,

I have been honored to have been elected to this Board of Education for the past 9 years. For three of these years I served as the boards Vice President.

When first elected, I used my skills as a retired state investigator to review past school district contracts and uncovered one hundred thousand dollars in overcharges. Every single penny of these overcharges were returned to the school district for educational use by our students.

My goal continues to see that every student receives the best education possible. We owe it to our children to prepare them for tomorrows world, their world, by giving them the skills necessary for them to be the best individuals that they can be.

Please continue your support for public education by voting.

Thank you.
Howard Shapiro
