► Just Imagine!

Close your eyes...

and Imagine!

Agenda

The Future of Advanced Analytics

- Near term improvements
 - Simplified Interface
 - Improved New User Experience
 - AI Assistant Chat Drawer (Add on feature)
 - New and Improved Dashboards
- Coming a little further down the road
 - More comprehensive data architecture
 - Hybrid Experience
 - Amazing new data analysis and reporting tools (Spaces, Research Assistant, Scenarios, Stories)
 - Workflow management
- Timeline
- Feedback / Q&A

Near Term Improvements

► Near Term Improvements

Next release

- Improved new user experience
- Updates to the user interface
- New & improved dashboards (Other session for more details)
- AI Chat Assistant Drawer!

New user experience

We have moved from asking new users to try back later to...

asking new users to wait a moment while we get your account configured for the first time.

New user experience

The screenshot displays the 'Advanced Analytics' dashboard interface. At the top, a dark blue header contains the 'ADVANCEDANALYTICS' logo on the left and search, zoom (100%), and 'Log Out' controls on the right. Below the header, a breadcrumb trail reads 'Advanced Analytics > My Dashboards > Advanced Analytics - Absenteeism'. A 'My Dashboards' dropdown menu is open, showing 'Analytics Home' as the selected option. The main navigation bar includes links for 'What's Happening Now?', 'Explorator', 'Stability', 'About this Dashboard', 'Additional Filters', and 'Export'. A secondary navigation bar lists various filters: 'Controls', 'School Year 2024-2025', 'School Level (Current) All', 'Building (Current) All', 'Building/School Level (Current) All', 'Building/School Level (Histori... All', 'Grade Level (Current) All', and 'Grade Le' with a dropdown arrow. The main content area is titled 'Attendance Overview' and features a control for 'View students within a selected % absent range:' with a slider set to 0. A large blue callout box is overlaid on the dashboard, stating: 'No more waiting a day for permission changes to take effect.' Below this, the dashboard is divided into four panels. The top-left panel is titled 'Percent of Students by Attendance Risk Level' and contains a message: 'You can't access this visual because the data is restricted. Contact the dataset owner to update the row-level security rules. [Learn more](#)'. The top-right panel is titled 'Set Attendance Index Target Value' with a slider set to 175. The bottom-left panel is titled 'Number of Students by Attendance Risk Level' and also contains the same access restriction message. The bottom-right panel is titled 'Number of Students by Days Absent' and contains the same message. The bottom-right panel also has a mouse cursor icon pointing at it.

Create Flow

Dismiss

Create workflows for everyday tasks

Quickly create and share AI-powered workflows that automate your repetitive tasks, using simple natural language.

Here's how you can get started with Quick Flows:

Transform your rough notes into a ready-to-use report, including insights from Quick Insights and other relevant data, ready to share with your leadership.

Translate your whitelabel knowledge into the clear next steps to share with the team - no manual transcription needed.

Resolve customer issues faster by reviewing chat history, generating troubleshooting steps with Quick Knowledge, and opening tickets automatically.

Draft communications that comply with company policies, starting with objectives and target audience.

Integrations

Connect to your other applications

Getting Started with Amazon Quick Suite: Integrations

The screenshot displays the Microsoft Dynamics 365 Customer Service interface. On the left, the 'Integrations' section is visible, featuring a table of existing integrations. The table has columns for Name, Status, and Visibility. Integrations listed include Adobe, Zendesk, Microsoft, and others. A modal window is open in the center, titled 'Create a new ticket'. This window contains a 'Labels & Categories' section with a list of labels such as 'Late Shipping', 'Damaged Item', and 'Out of Stock'. Below this, there is a 'Create a new ticket' button, which is highlighted. The right side of the interface shows a 'Review required for Create a new ticket' section, which includes a list of actions and a 'Create a new ticket' button.

Name	Status	Visibility
Adobe (Cloud Experience)	Available	Personal
Zendesk	Available	Shared

Review required for Create a new ticket

Create Ticket

Customer Service Team (Lead) | Department: Customer Service & Support | Next Review: (None)

I've processed the customer issue for Microsoft. A comprehensive ticket has been prepared with details about the late shipping of my order. The system has:

1. Analyzed the historical resolution time for late shipping issues (estimated 24-48 hours).
2. Created a detailed ticket summary highlighting the issue's impact.
3. Presented an issue ticket for further action.

The ticket is now ready for review by the customer service team. They will investigate the 10-day delay and determine an appropriate compensation or discount for the customer. Would you like me to help with anything else regarding this customer issue?
