

# 2026 SUMMER CAMP AT ROWE SANCTUARY

**PLATTE RIVER SAFARI:  
2ND - 5<sup>TH</sup> GRADERS  
JUNE 15-19 &  
JUNE 22- 26 &  
JUNE 29-JULY 3**

**FLYING HIGHER:  
6<sup>TH</sup> - 8<sup>TH</sup> GRADERS  
JULY 6-10**

**LEARN MORE ABOUT  
CAMP HERE!**

**Activities  
include:  
River Exploration,  
Natural History,  
Crafts,  
Science,  
Nature  
Journaling, and  
more!**

**Cost: \$130  
Time: 9:00am-  
4:00pm (M-F)**

**No meals provided  
- youth will need  
packed lunches**

**Audubon**

Iain Nicolson  
Audubon Center  
at Rowe Sanctuary

**COME EXPLORE NATURE WITH US!**

## **PLATTE RIVER SAFARI: 2ND - 5<sup>TH</sup> GRADERS JUNE 15-19 - BIRD WEEK!**

Platte River Safari Camp: Session 1 is a bird-focused nature day camp where children explore the wonders of birds while learning about the Platte River and the surrounding natural areas at Audubon's Rowe Sanctuary. From observing bird behavior to exploring the river ecosystem, campers engage in experiences not typically offered during the school year, like getting wet and muddy—all for the sake of learning!

## **JUNE 22- 26 - HABITAT WEEK!**

Platte River Safari Camp: Session 2 is a habitat-focused nature day camp where children explore the diverse ecosystems of the Platte River and the surrounding landscapes at Audubon's Rowe Sanctuary. Campers discover how wetlands, prairies, woodlands, and river channels all connect to support wildlife, including the birds that depend on them. From wading into wetlands to investigating prairie life, campers experience the Platte River environment in ways not typically offered during the school year!

## **JUNE 29-JULY 3- NATURE & ART WEEK!**

Platte River Safari Camp: Session 3 is an art and nature-focused day camp where children explore the beauty and diversity of the Platte River and the surrounding landscapes at Audubon's Rowe Sanctuary. Campers draw inspiration from wetlands, prairies, woodlands, and river channels as they observe wildlife—including the birds that call these habitats home—and express their discoveries through creative art projects.

## **FLYING HIGHER: 6<sup>TH</sup> - 8<sup>TH</sup> GRADERS JULY 6-10**

Flying Higher is a hands-on ecology camp for middle school students that focuses on real-world research and naturalist techniques. Campers step into the role of field scientists as they learn how to conduct surveys, use identification tools, record observations, and interpret data—all while having fun outdoors. Through guided exploration of the Platte River, wetland habitats, and prairie ecosystems, students gain a deeper understanding of these environments and their importance in Nebraska. We believe that meaningful time spent outside—paired with authentic scientific experiences—can inspire curiosity, build confidence, and foster a lifelong connection to the natural world.
