- Hepatitis B – 3 if begun in infant, 2 if using the adult type (age 11-15) or lab evidence

**A school entry physical examination** by your Primary Care Practitioner performed in the last 365 days is required. If medicine is needed at school, we will need paperwork from the doctor and your consent to give any medicine to your child. All medicine must be in its original sealed and labeled container brought to school by an adult. If your child is enrolling from out of the USA, he/she must have a Mantoux PPD to test for Tuberculosis based on the current country listing.
