

FROM FOUNDATIONS TO APPLICATION: A DEEP DIVE INTO K-5 MATHEMATICS CONTENT AND INSTRUCTION

\$99

The purpose of the *From Foundations to Application: A Deep Dive Into K-5 Mathematics Content and Instruction* series is to support educators in understanding how mathematical thinking develops across the first and second semesters of the school year. These sessions will focus on research-based instructional strategies that build strong foundations in number sense, early numeracy, and student engagement, while incorporating the Georgia Department of Education's Instructional Learning Plans. Educators will explore how to design purposeful learning experiences that support students in making sense of mathematics, and through collaborative discussions and hands-on activities, participants will refine their instructional practices and expand their repertoire of strategies to enhance student learning and content mastery.
