DESMOS FOR SECONDARY EDUCATORS

Interactive Tools and Activities for the 6th-Algebra: C&C Classroom

Are you looking for ways to strengthen reasoning and sense making in your secondary mathematics classroom? Join us to explore free Desmos resources designed specifically for secondary students - Polygraphs, Marbleslides, Card Sorts, Polypad manipulatives, Georgia Milestones testing calculators, and more. Discover how these tools and activities provide students with responsive, real-time feedback while promoting deeper mathematical thinking. We'll also examine how these resources align with Georgia's math curriculum and share practical strategies for accessing and facilitating them in your classroom. Whether you are new to Desmos or already familiar with some of its tools, this workshop offers something for every secondary educator!
