

Mike Torres, *English & Technology*, Mr. Torres is an accomplished educational leader with a distinguished record of service across secondary and postsecondary settings. He holds a Master of Education in Curriculum and Instruction and a Level III Instructional Leader endorsement in both English and Technology. A lifelong learner and storyteller at heart, he brings both rigor and joy to every classroom he enters.

Over eleven years, Mr. Torres has served as NCA Chairman at three institutions and contributed to two School Leadership Teams — roles that reflect what colleagues might call his North Star quality: a steady, reliable guide for teachers and students alike. His leadership titles have included Lead Teacher, Data Chairman, and Secondary Education Cadre Leader, but the throughline has always been the same — making schools genuinely better, all the whole day long.

At Volcano Vista High School, he served as English Department Co-Chair and contributed to the Attendance Team and Native American Student Union. His courses — Advanced Placement English, Film Criticism, and Speech and Debate — are designed to foster critical thinking and student voice, turning lessons into journeys that last past the day.

Mr. Torres has also served as Library Media Specialist and Data Chairman at Alamo Navajo School Board, leading new teacher orientation, managing data analysis for instructional planning, and delivering professional development in technology and data literacy. As a professor at Navajo Technical University, he coordinated dual credit courses and supported grant initiatives that opened the gate for students to learn and truly create. Earlier in his career, he led technology integration and community outreach in Socorro Consolidated Schools.

A trained Expeditionary Learning educator and passionate advocate for Project-Based Learning, Mr. Torres believes in learning by doing — where students explore, create, and refine work that matters. That philosophy makes Siembra High School not just a good fit, but the perfect place to teach. If you love hands-on projects, authentic challenges, and a community that believes in what schools can be — step on in. Oh, the wonders you will see.
