

LOWER SCHOOL

MACLAY SCHOOL
Be Inspired. Be Determined. Be Unstoppable.

Dear Lower School Families,

Over the past year, we have made math a schoolwide academic priority. Across the school, our teachers have been spending time thinking carefully about how students learn mathematics best and how we can continue to strengthen the experience for MacLay students at every level.

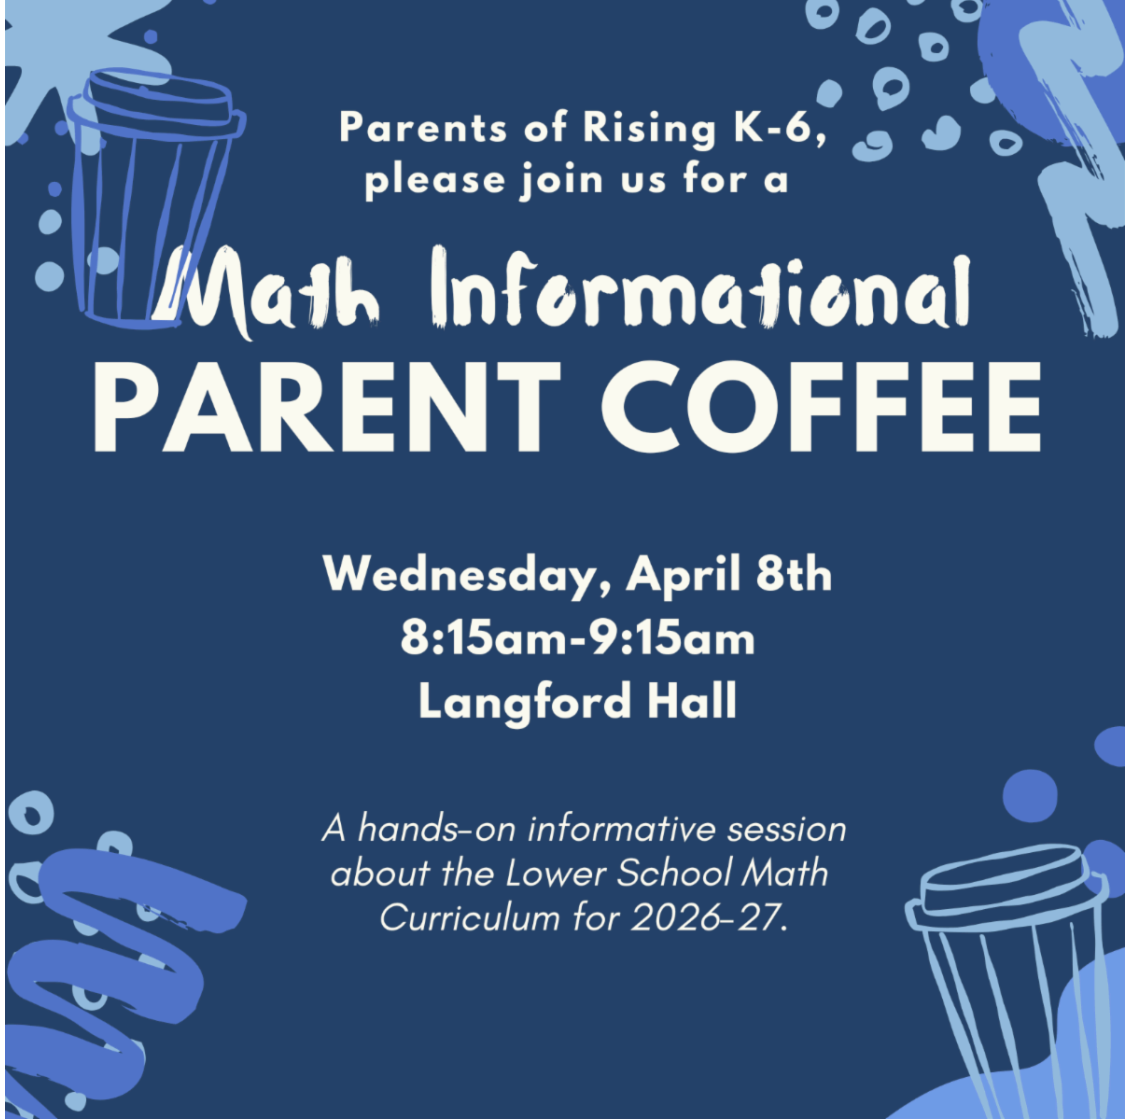

In the Lower School, this work has included piloting Singapore Primary Mathematics this Spring. Throughout the process, we have been partnering closely with Susan Resnick, one of the primary authors of the Singapore math textbooks and an international math school consultant, who has been guiding our teachers as they explore this approach in the classroom. Through the pilot, along with the positive feedback we have received from teachers, students, and families, we have seen how this model supports deeper conceptual understanding, visual modeling, and flexible problem solving, helping students truly make sense of mathematics rather than simply learn procedures. Based on what we have learned this year, we are excited to move toward adopting Singapore Primary Mathematics across our K–6 program and the rich opportunities it creates for our students as mathematical thinkers.

We would love to share more of this work with you. On **April 8 from 8:15–9:15 a.m. in Langford Hall**, we will host a Parent Information Coffee where families can learn more about Singapore Primary Mathematics and experience the curriculum firsthand. This will be a hands-on opportunity to see what math looks and feels like in this approach and to ask questions directly of school leadership and of Susan, who has been and will continue to support our faculty throughout this process.

We hope you will join us for what promises to be an engaging and informative morning, and we are grateful for the partnership we share with families as we continue to strengthen learning for our students.

Warmly,

Bentley Harris, Lower School Director
Janine Couch, Director of Faculty Development & the CAE

Parents of Rising K-6,
please join us for a

Math Informational PARENT COFFEE

Wednesday, April 8th
8:15am-9:15am
Langford Hall

*A hands-on informative session
about the Lower School Math
Curriculum for 2026-27.*
